Walden University is accredited by The Higher Learning Commission and a member of the North Central Association, www.ncahlc.org.

Walden University practices a policy of nondiscrimination in admission to, access to, and employment in its programs and activities. Walden does not discriminate on the basis of race, color, sex, age, religion or creed, marital status, disability, national or ethnic origin, socioeconomic status, sexual orientation, or other legally protected status.

Walden is committed to providing barrier-free access to its educational services and makes appropriate and reasonable accommodations when necessary. Students requesting accommodations per the Americans with Disabilities Act (ADA) must contact the Office of Disability Services at disability@waldenu.edu.

Walden University publications, including the catalog and student handbook, represent current curricula, educational plans, offerings, requirements, tuition, and fees. These may be modified or discontinued from time to time in the university’s sole discretion to carry out the university’s purposes and objectives. Neither the provisions of this document, nor the acceptance of students through registration and enrollment in the university, constitutes a contract or an offer of a contract.

THE RICHARD W. RILEY COLLEGE OF EDUCATION AND LEADERSHIP

Research and Residencies

BACHELOR’S DEGREE PROGRAMS

B.S. in Child Development
- General
- Administration and Management
- Child and Adolescent Studies
- Dual Preschool and Infant/Toddler
- Family Health and Wellness
- Infant/Toddler
- Preschool
- Psychology

B.S. in Instructional Design and Technology
- General Program
- Business and Organizational Change
- Human Factors and Interface Design

OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master’s (AIM) Programs

Undergraduate Minors
- Minor in Applied Instructional Design and Technology
- Minor in Child Development
- Minor in Introductory Design and Technology

TEACHER PREPARATION PROGRAM

Teacher Preparation Program With a Master of Arts in Teaching (M.A.T.)
- Early Childhood Education (Birth–Grade 3)
- Special Education (K–Age 21)

ENDORSEMENT PROGRAMS

Reading K–12 Endorsement
- M.S. in Education With a Specialization in Reading and Literacy With a Reading K–12 Endorsement

GRADUATE CERTIFICATES

Graduate Certificate in Adult Learning
- Graduate Certificate in College Teaching and Learning
- Graduate Certificate in Curriculum, Instruction, and Assessment
- Graduate Certificate in Developmental Education
- Graduate Certificate in Early Childhood Administration, Management, and Leadership
- Graduate Certificate in Early Childhood Advocacy and Public Policy
- Graduate Certificate in Elementary Reading and Literacy
- Graduate Certificate in Engaging Culturally Diverse Learners
- Graduate Certificate in Enrollment Management and Institutional Marketing
- Graduate Certificate in Higher Education Leadership for Student Success

Welcome to the Catalog, Student Handbook, and University Guidebooks

- A Message for Students
- About the Catalog
- Where to Look
Catalog, Student Handbook, and University Guidebooks

Catalog: To access the catalog, select from the topics listed on the left navigation pane. For more information, click the “Help” button (upper right) or select the “Catalog Features” link.

Student Handbook: To access the student handbook, select “2014–2015 Walden University Handbook (September 2015),” from the drop-down menu in the upper-right corner of this page and then click “Enter.”

University Guidebooks: On the drop-down menu in the upper-right corner of this page, select “University Guidebooks” and then click “Enter.”

About the Catalog

The 2014–2015 Walden University Catalog is the primary resource for academic information, including official curricular requirements, for Walden University graduate and undergraduate students. The Walden University Catalog is available electronically only on this web site. Updates are made quarterly. Students are encouraged to routinely check the site for new or supplemental information. Students should contact a member of the Academic Advising Team or the program directors for clarification of specific academic program requirements.

Students who are admitted for, and enrolled during, the 2014–2015 academic year are subject to the degree requirements described in this Walden University Catalog. The university reserves the right to change any provision, offering, requirement, or fee at any time within the student's enrollment period. Neither the provisions of this Walden University Catalog nor the acceptance of students to the university through the admission, enrollment, and registration processes constitutes a contract or an offer of a contract. The university further reserves the right to require a student to withdraw from the university for cause at any time.
A Message for Students

Welcome to the 2014–2015 Walden University Site

The *Walden University Catalog* and *Student Handbook* are updated quarterly—in September, December, March, and June. The most recent version of the catalog is the default publication, but students can access the current handbook or other catalogs from the current academic year by opening the drop-down menu in the upper-right corner of this page, making a selection, and then clicking “Go.” Older catalogs are available by selecting the “Archived Catalogs” link in the left navigation pane.

Students who are enrolled during the 2014–2015 academic year are subject to the degree requirements described in the *Walden University Catalog* for the academic year in which they were admitted.

Additionally, students are subject to the policies and procedures described in the most current *Walden University Student Handbook*, regardless of the academic year in which they were admitted. The university reserves the right to change any provision, offering, requirement, or fee at any time within the student's enrollment period.

Students are encouraged to provide feedback about the catalog and handbook or any suggestions for improvement by sending their comments to catalog@waldenu.edu.

Students should contact their academic advisor with any questions about information in the catalog or handbook.

The faculty and staff of Walden are here to help students succeed in their academic pursuits.

Eric Riedel, Ph.D.
Chief Academic Officer, Walden University

INTRODUCTION

About Walden University

Walden University is an accredited institution that for more than 40 years has provided an engaging learning experience for working professionals. Our mission of producing scholar-practitioners has attracted a community of extraordinary students and faculty, all sharing a common desire to make a positive social impact—to make a difference.

Highlights of Walden's commitment include

- **Diverse and comprehensive core curriculum:** Walden University provides students the intellectual foundation necessary to see the interrelationships among the central ideas and means of expression that are specific to the disciplines. This foundation supplies a context for knowledge and makes possible the cross-fertilization of ideas to enhance creativity, innovation, and problem-solving.
- **Student-centeredness:** Walden's faculty and staff are devoted to helping students balance their education with their personal and professional lives. Walden's library, tutoring, and other student services also provide essential resources.
- **Real-world application:** Degree programs are developed by scholar-practitioners who continually assess courses to make sure they are current and relevant.
- **International perspectives:** Walden University is part of the Laureate International Universities global network of more than 75 accredited campus-based and online universities in 30 countries, serving more than 800,000 students around the world. Students in the Laureate International Universities network have an unprecedented opportunity to expand their international outlook and gain insights that they can apply directly to their professions.
- **Positive social change:** Walden believes that knowledge is most valuable when put to use for the greater good. Students, alumni, and faculty are committed to improving the human and social condition by creating and applying ideas to promote the development of individuals, communities, and organizations, as well as society as a whole.
- **Scholar-practitioner model:** Walden's goal is to help students become scholar-practitioners by challenging them to integrate scholarly research with their own expertise as skilled practitioners in their fields.

History

“The scenery of Walden is on a humble scale, and, though very beautiful, does not approach to grandeur, nor can it much concern one who has not long frequented it or lived by its shore; yet this pond is so remarkable for its depth and purity as to merit a particular description.”

—Henry David Thoreau, *Walden* (1854)
“Evidence for the failure of higher education is all around us,” wrote Harold L. “Bud” Hodgkinson in a 1969 issue of the journal *Soundings*. “Many of our brightest students are telling us that higher education is insulating them from reality rather than assisting them to peel off its infinite layers.” Though more a critique of the academy than a blueprint for a new institution, “Walden U.: A Working Paper” helped inspire the university that bears the name made famous by Henry David Thoreau.

As Hodgkinson was writing about the need for change in higher education, two New York teachers, Bernie and Rita Turner, fresh from graduate work at the New School for Social Research, were becoming interested in effecting social change by developing a new kind of institution for higher education: one that focused on significant problems affecting society from the vantage point of the professional and one that permitted professionals the opportunity to continue working while earning a degree. Thus, Walden University was born.

Walden began by offering a Doctor of Education (Ed.D.) degree focused on dissertation research for midcareer professionals who had postponed finishing their doctoral degrees. Conferring its first degree in 1971 and implementing a formal curriculum in 1977, Walden provided learner-centered programs to professionals in education, business, and government who pursued doctoral degrees in related disciplines, including health and human services. In 1982, Walden's academic office moved from Bonita Springs, Fla., to Minneapolis, Minn., in an effort to gain accreditation in a region that nurtures innovative education. The North Central Association of Colleges and Schools granted Walden University full regional accreditation status in 1990.

After more than 20 years with the university, satisfied that it was well-established, the Turners decided it was time to move on. Don Ackerman, a partner in a venture capital firm in Florida, became the university's owner and chairman of the board in 1992. It was at this time that today's Walden began to emerge as an online university with curricula that emphasized a scholar-practitioner philosophy: applying theoretical and empirical knowledge to professional practice with the goal of improving organizations, educational institutions, and whole communities. To further advance access to higher education, in 1995, Walden offered its first master's degree, the Master of Science in Educational Change and Technology Innovation. The web-based Ph.D. in Psychology program was introduced in 1997, and after a rigorous 2-year self-study process, the North Central Association reaccredited the university for 7 years in 1998.

In February 2002, following the transfer of majority interest in Walden University from Ackerman to Sylvan Ventures, the university began changing from a graduate institution to a comprehensive university, offering bachelor's, master's, and doctoral degrees. In 2004, Ackerman sold his remaining interest in Walden to Laureate Education, Inc. (formerly Sylvan Learning Systems, Inc.).

In January 2005, Walden University merged with National Technological University, an online engineering graduate school also owned by Laureate Education, Inc., providing the university reach into another major profession in need of access to high-quality education. With this change in ownership, the university has made significant improvements in its infrastructure, its faculty, and its student services. Walden was reaccredited by the North Central Association for another 7
years in 2005. The university's curriculum for the master's program in nursing was accredited by the Commission on Collegiate Nursing Education in 2006.

Each year, the university continues to expand its offerings, with new programs recently added in education, psychology, healthcare, public administration, and management. In 2008, Walden named its College of Education in honor of Richard W. Riley (the former Secretary of the U.S. Department of Education) and launched teacher preparation and special education endorsement programs.

To support its mission to increase access to higher education for working adults, in 2008 Walden launched full bachelor's programs in such areas as business administration, child development, and psychology. Walden also created a third online peer-reviewed journal: the *Journal of Social, Behavioral, and Health Sciences*. Similar to Walden's other two journals, the *Journal of Social Change* and the *International Journal of Applied Management and Technology*, this journal promotes research findings and encourages dialogue between scholars and practitioners.

In 2009, Walden's M.S. in Mental Health Counseling received accreditation by the Council for Accreditation of Counseling and Related Educational Programs. Walden also introduced additional technology to better address the needs of its students. Services include a fully digital library, a Career Services Center with practical online tools, Virtual Field Experiences (VFE®), and MobileLearn®, which enables students to download course content for use on mobile devices.

Today, the university's academic programs are organized under the following academic units:

Walden's academic offices are located in Minneapolis. The administrative offices are headquartered in Baltimore and provide university support services, including student recruitment, admissions, outreach, finances, and financial aid; new-program and electronic-
classroom development; learning-platform support and help desk; project management; human resources; web and software applications development and support; and information technology infrastructure development and support.
VISION, MISSION, AND GOALS

Vision

Walden University envisions a distinctively different 21st-century learning community where knowledge is judged worthy to the degree that it can be applied by its graduates to the immediate solutions of critical societal challenges, thereby advancing the greater global good.

Mission

Walden University provides a diverse community of career professionals with the opportunity to transform themselves as scholar-practitioners so that they can effect positive social change.

Goals

- To provide multicontextual educational opportunities for career learners.
- To provide innovative, learner-centered educational programs that recognize and incorporate the knowledge, skills, and abilities students bring into their academic programs.
- To provide its programs through diverse process-learning approaches, all resulting in outcomes of quality and integrity.
- To provide an inquiry/action model of education that fosters research, discovery, and critical thinking and that results in professional excellence.
- To produce graduates who are scholarly, reflective practitioners and agents of positive social change.

Social Change

Walden University defines positive social change as a deliberate process of creating and applying ideas, strategies, and actions to promote the worth, dignity, and development of individuals, communities, organizations, institutions, cultures, and societies. Positive social change results in the improvement of human and social conditions. This definition of positive social change provides an intellectually comprehensive and socially constructive foundation for the programs, research, professional activities, and products created by the Walden academic community. In addition, Walden supports positive social change through the development of principled, knowledgeable, and ethical scholar-practitioners, who are and will become civic and professional role models by advancing the betterment of society.

University Outcomes

Walden University strives to produce graduates with the knowledge, skills, and abilities to:
1. Facilitate positive social change where they work, in their communities, and in society.
2. Use their knowledge to positively impact their profession, communities, and in society.
3. Demonstrate a commitment to lifelong learning.
4. Apply their learning to specific problems and challenges in their workplace and professional settings.
5. Demonstrate information literacy.*
   *Information literacy is defined as the ability to know when there is a need for information, and being able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand.
6. Demonstrate an understanding of the methods of inquiry used in their professional or academic field.
7. Practice legal and ethical integrity in their professional work.
8. Effectively communicate their ideas and the rationale behind them to others.
9. Support diversity and multiculturalism within their profession, communities, and society.

**University Values**

**Values**

Three values—quality, integrity, and student-centeredness—are the core of the university and the touchstones for action at all levels of the organization. They demand high standards of excellence, uncompromising openness and honesty, and primary attention to the progress of our students. These values and principles give Walden University its unique identity and underpin the Walden University mission.

**Quality**

- Walden University believes that quality and integrity are the cornerstones of all academic processes.
- Walden University believes in innovation and flexibility in the conception and delivery of its educational programs, and that there are many different academic routes to achieve quality and integrity.

**Integrity**

- Walden University believes that education and social change are fundamental to the provision and maintenance of democratic ideals and principles, especially that of the common good.
- Walden University believes that its learners effect positive social change when they behave as reflective or scholarly practitioners.
- Walden University believes that the inquiry/action model fosters critical thinking and underpins research and discovery for reflective practitioners (bachelor’s and master’s
students) and scholar-practitioners (doctoral students). This model provides the framework for teaching, learning, and assessment.

**Student-Centeredness**

- Walden University believes that all adult learners should have innovative educational access, especially those who are without opportunity in other venues.
- Walden University believes that academic programs must be learner-centered, incorporating learners’ prior knowledge and allowing them to focus their academic work on their needs and interests.

**Accreditation**

Walden University is accredited by The Higher Learning Commission and a member of the North Central Association, [www.ncahlc.org](http://www.ncahlc.org).

The Richard W. Riley College of Education and Leadership at Walden University is accredited by the National Council for Accreditation of Teacher Education (NCATE). This accreditation covers initial teacher preparation programs and advanced educator preparation programs. However, the accreditation does not include individual education courses offered to PreK–12 educators for professional development, relicensure, or other purposes.

Walden's M.S. in Mental Health Counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). CACREP accreditation attests to the quality and relevancy of Walden's program—a program that helps provide students with the skills and credibility to maximize their impact on the profession. In addition, earning a degree that is CACREP-accredited helps to streamline the licensing application process and provides students with an advantage when applying to doctoral programs.

Walden University's B.S. in Business Administration, Executive Master of Business Administration (EMBA), Master of Business Administration (M.B.A.), Doctor of Business Administration (D.B.A.), and Ph.D. in Management programs are accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

Walden has been reviewed and approved as a provider of project management training by the Project Management Institute (PMI). As a PMI Registered Education Provider (R.E.P.), Walden has agreed to abide by PMI-established quality assurance criteria.
The Society for Human Resource Management (SHRM) acknowledges that Walden's M.S. in Human Resource Management fully aligns with the SHRM's 2010 edition of HR Curriculum Guidebook and Templates, which help define HR education standards and help business schools develop degree programs that follow these standards.

Walden's Bachelor of Science in Nursing (BSN) Completion program, Master of Science in Nursing (MSN) program, and Doctor of Nursing Practice (DNP) program are accredited by the Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, NW, Suite 530, Washington, D.C. 20036. CCNE is a national accrediting agency recognized by the U.S. Department of Education and ensures the quality and integrity of bachelor's and graduate education programs in preparing effective nurses. For students, accreditation signifies program innovation and continuous self-assessment.

**Licensure**

Walden University has received permission to operate in a number of states. Some states, in addition to the permission they have given, have requested that specific statements be printed in this *Walden University Catalog*.

**Florida**

Prospective students from Florida may obtain additional information regarding Walden University by contacting the Commission on Independent Education, Florida Department of Education, 325 West Gaines Street, Suite 1414, Tallahassee, FL 32399-0400; 1-888-224-6684. Credits and degrees earned from this college do not automatically qualify the holder to participate in professional licensing examinations to practice certain professions in Florida. Persons interested in practicing a regulated profession in Florida should contact the appropriate state regulatory agency in the field of their interest.

**Minnesota**

Walden University is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

**Oregon**

Walden University is authorized by the State of Oregon to offer and confer the academic degrees described herein, following a determination that state academic standards will be satisfied under OAR 583-030. Inquiries concerning the standards or school compliance may be directed to the Office of Degree Authorization, 1500 Valley River Drive, Suite 100, Eugene, OR 97401.

**Pennsylvania**

*Note to all Pennsylvania residents:* Walden University's teacher preparation program and special education endorsement programs are approved by the Minnesota Board of Teaching as leading to
licensure and endorsement, respectively. Because these programs are not reviewed by the Pennsylvania Department of Education, candidates are instructed to apply for Pennsylvania certification as out-of-state graduates of a teacher preparation program.

**South Carolina**

Licensed by the South Carolina Commission on Higher Education, 1333 Main Street, Suite 200, Columbia, SC 29201; 1-803-737-2260. Licensure indicates only that minimum standards have been met; and it is not equal to or synonymous with accreditation by an accrediting agency recognized by the U.S. Department of Education.

**Tennessee**

Walden University is authorized by the Tennessee Higher Education Commission. This authorization must be renewed each year and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility.

Credits earned at Walden University may not transfer to another educational institution. Credits earned at another educational institution may not be accepted by Walden University. Students should obtain confirmation that Walden University will accept any credits they have earned at another educational institution before they execute an enrollment contract or agreement. Students should also contact any educational institutions that they may want to transfer credits earned at Walden University to determine if such institutions will accept credits earned at Walden University prior to executing an enrollment contract or agreement. The ability to transfer credits from Walden University to another educational institution may be very limited. Credits may not transfer and students may have to repeat courses previously taken at Walden University if they enroll in another educational institution. Students should never assume that credits will transfer to or from any educational institution. It is highly recommended and students are advised to make certain that they know the transfer of credit policy of Walden University and of any other educational institutions they may in the future want to transfer the credits earned at Walden University before they execute an enrollment contract or agreement.

**Washington**

Walden University is authorized by the Washington Higher Education Coordinating Board (HECB) and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes Walden University to advertise, recruit and offer residencies for the following degree programs: Bachelor of Science in Business Administration; Master of Arts in Teaching; Master of Business Administration; Master of Public Administration; Master of Public Health; Master of Science in Education; Master of Science in Mental Health Counseling; Master of Science in Nursing; Master of Science in Public Health (in teach-out); Master of Science in Psychology; Doctor of Education; Doctor of Philosophy in Applied Management and Decision Sciences; Doctor of Philosophy in Education; Doctor of Philosophy in Health Services; Doctor of Philosophy in Human Services; Doctor of Philosophy in Psychology; Doctor of Philosophy in Public Health; and Doctor of Philosophy in Public Policy and Administration.
Authorization by the HECB does not carry with it an endorsement by the board of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the HECB at P.O. Box 43430, Olympia, WA 98504-3430.
LEGAL INFORMATION

Privacy Policy

Walden University respects and understands the importance of privacy and security for its online customers. Any information collected is used only by Walden University and its affiliates (including Laureate Education, Inc. and Canter & Associates, Inc.) to contact consumers for marketing and operational purposes. Persons who supply their telephone numbers or e-mail addresses online may receive telephone or e-mail contact with information regarding special promotions, new products and services, or upcoming events. Walden University and its affiliates will not release, sell, rent, or trade that personal information to any third party.

Additional policies regarding the privacy, security, and retention of materials transmitted or received using Walden University e-mail systems, electronic portals, and other facilities are contained in the Technology Policies section of the Walden University Student Handbook.

Do-Not-Call Policy

Telephone communications provide valuable opportunities for students and prospective students to consult with enrollment advisors regarding products and services offered by the Global Products and Services (GPS) division, a division of Laureate Education, Inc. (“Laureate”), and its U.S.-based affiliates. Laureate and its affiliates have adopted and adhere to the policies described here to comply with Federal Trade Commission (“FTC”) and Federal Communications Commission (“FCC”) telemarketing regulations and applicable state laws. As used in this document, telemarketing means a plan, program, or campaign conducted to induce the purchase of goods or services by use of a telephone. Laureate's affiliates include Walden University and Canter & Associates.

Policy Overview

Laureate contacts only individuals that have provided their prior express consent to be called or with whom Laureate has an established business relationship. Laureate does not make “cold calls” to consumers for telemarketing purposes. Laureate does not use facsimile machines, predictive dialers, or autodialers for telemarketing purposes.

Laureate maintains comprehensive written procedures for its employees who interact with students and prospective students by telephone. Laureate employees are trained to use these procedures and record the do-not-call requests of consumers who no longer wish to receive telephone solicitation calls from Laureate. Laureate takes appropriate administrative actions against employees who violate company policy. Laureate also requires any third parties that assist with Laureate's calling campaigns to follow company policy and applicable laws.
Do-Not-Call Requests

Laureate and its affiliates maintain an internal do-not-call (DNC) list that includes specific requests from consumers who do not wish to be called by Laureate or any of its affiliates. This DNC list is used enterprise-wide. Laureate and its affiliates purge from any calling list any names and/or numbers on its company-specific DNC list.

Any consumer can prohibit Laureate from calling by asking to be put on Laureate's DNC list. A consumer's do-not-call request will be recorded in Laureate's database within the legally mandated timeframes. Federal regulations require Laureate to honor DNC requests within 30 calendar days. Consumers may place company-specific DNC requests by e-mailing their request, including their full name, address, and telephone number, to removeme@laureate-inc.com

The Global Products and Services (GPS) division, a division of Laureate Education, Inc. (“Laureate”), and its U.S.-based affiliates believe that e-mail is an effective tool for communicating with students and prospective students. Initially, Laureate requires that individuals provide their private e-mail address to receive information about Laureate schools and programs, enabling interaction that is simple, convenient, and secure. Once an individual is a student in a Laureate school or program, all communications regarding schools and programs will be sent to the student's new Laureate school or program e-mail account. Laureate's privacy policy can be found at www.laureate-inc.com. Laureate's affiliates include Walden University and Canter & Associates. Walden's privacy policy can be found at www.WaldenU.edu under the “Legal Information” link, and Canter's privacy policy can be found at www.canter.net under the “Legal Information” link.

Laureate collects e-mail addresses from online information request forms, returned business reply cards, application forms, and other sources. This information is used to contact students about Laureate schools and programs and for promotional purposes strictly related to the products and services of Laureate and its affiliates. Laureate never disguises the origin of its messages. When students receive messages from Laureate, they will be able to identify Laureate or one of its affiliates as the sender.

Each promotional message that Laureate sends will contain either a functioning e-mail address or Internet-based mechanism that students can use to opt out of receiving future promotional messages from Laureate and its schools. In addition, students may submit an opt-out request by contacting removeme@laureate-inc.com and providing the e-mail address that they would like to remove from Laureate's marketing database. The request should include the student's full name, address, and telephone number to ensure proper recording of the request. Laureate processes opt-out requests within 14 calendar days. If students would like to resume receiving promotional messages after making an opt-out request, they must provide Laureate with their express consent to receive such messages.

At no time will Laureate sell, share, or rent any e-mail address that it has collected with third parties. Laureate does not authorize the harvesting, mining, or collection of e-mail addresses or other information from or through its sites by third parties. For this reason, Laureate will never publicly display students' e-mail addresses on its website or make them available through any other electronic means, except that student e-mail addresses may be included in student directories.
Questions about privacy policies should be directed in writing to

Warranty and Other Disclaimers

The materials and information found on the Walden University website are provided “as is,” without warranty of any kind, either express or implied, including without limitation any warranty for information, services, or products provided through or in connection with the Walden University website. Without limiting the foregoing, all implied warranties of
merchantability, fitness for a particular purpose, expectation of privacy, or noninfringement are expressly excluded and disclaimed. Some jurisdictions do not allow the exclusion of implied warranties, so the above exclusion may not apply to all students. This disclaimer of liability applies to any damages or injury caused by any failure of performance, error, omission, interruption, deletion, defect, delay in operation or transmission, computer virus, communication line failure, theft or destruction, or unauthorized access to, alteration of, or use of record, whether for breach of contract, tortious behavior, negligence, or under any other cause of action. Students specifically acknowledge that Walden University is not liable for any defamatory, offensive, infringing, or illegal materials or conduct, or that of third parties contained on the Walden University website, and Walden University reserves the right to remove such materials from the Walden University website without liability.
The Center for Student Success provides student services that support the academic and professional growth of Walden University students. The center offers several non-degree Student Success Courses designed to improve Walden University students' knowledge and skills in reading, writing, statistics, communications, and critical thinking.

Also see the Center for Student Success section of the *Walden University Student Handbook* for information on the Walden University Library, the Writing Center, Career Services, and additional services.

**Student Success Courses**

The Center for Student Success offers several non-degree courses designed to improve Walden University students' knowledge and skills in reading, writing, statistics, communications, and critical thinking, and to help students successfully complete their academic program. Faculty or academic advising staff also may recommend these courses to help students who need extra support to successfully complete their studies.

Credit is granted for successful completion of each student success course but does not apply toward degree program requirements.

Most courses are available in both quarter-based and semester-based programs. Course length varies depending on the program and specific course.
BACHELOR’S STUDENTS

Student Success Courses

For Students in Quarter-Based Programs

**WCSS 3100 - Skills for Academic Integrity**

(1.5 cr.) This course is designed to provide students with an understanding of academic integrity and to provide practice using a plagiarism detection tool. Topics include definitions of academic integrity and plagiarism, Walden University academic integrity policy, and strategies for avoiding plagiarism. This course is designed to help students who need extra practice writing with academic integrity and is required for students who have academic integrity violations. Upon completion, students will be able to demonstrate improvement in writing with academic integrity. *Note:* This course is for bachelor's-level students.

**WCSS 3200 - A Practical Course in APA Style**

(1.5 cr.) This 4-week course focuses on the most relevant aspects of scholarly writing as presented in the latest edition of the *Publication Manual of the American Psychological Association*. Instruction and practice is provided in references and citations, reducing bias in language, headings, lists, statistical and mathematical copy, italics and capitalization, numbers style, and table and figure formatting. The course is designed to help prepare students for successful writing experiences in their coursework and major writing projects. This course focuses on grammar only in regard to APA style nuances. Weekly assignments are based on the required text, Mastering APA Style: Student’s Workbook and Training Guide. *Note:* This course is for bachelor's-level students.

**WCSS 6300 - Advanced Reading Strategies**

(3 cr.) This course is designed for students seeking to enhance key reading competencies. Advanced reading strategies can accelerate comprehension, evaluation, and recall. Students will practice an active approach to reading, gaining skills that will assist in quickly navigating texts. Students can become better consumers of information. Information literacy techniques allow students to evaluate and analyze content with greater ease. This course is appropriate for students preparing for tests of reading-related skills and students in reading-intensive courses.

**WCSS 6400 - Succeeding on Academic and Professional Exams**

(3 cr.) Students in this course are helped to prepare for professional and academic exams, many
of which are required for licensure. Students will learn test-taking strategies for computer-based and paper-based exams. They also learn how to recognize and harness test anxiety, assess previous knowledge, manage time, and create a plan of study that allows for success in displaying expertise in an exam setting.
**MASTER’S STUDENTS**  
**(QUARTER-BASED)**

**WCSS 3100 - Skills for Academic Integrity**

*(1.5 cr.)* This course is designed to provide students with an understanding of academic integrity and to provide practice using a plagiarism detection tool. Topics include definitions of academic integrity and plagiarism, Walden University academic integrity policy, and strategies for avoiding plagiarism. This course is designed to help students who need extra practice writing with academic integrity and is required for students who have academic integrity violations. Upon completion, students will be able to demonstrate improvement in writing with academic integrity. **Note:** This course is for quarter-based master’s-level students. (Course previously listed as SBSF 5100.)

**WCSS 3200 - A Practical Course in APA Style**

*(1.5 cr.)* This 4-week course focuses on the most relevant aspects of scholarly writing as presented in the latest edition of the *Publication Manual of the American Psychological Association*. Instruction and practice is provided in references and citations, reducing bias in language, headings, lists, statistical and mathematical copy, italics and capitalization, numbers style, and table and figure formatting. The course is designed to help prepare students for successful writing experiences in their coursework and major writing projects. This course focuses on grammar only in regard to APA style nuances. Similarly, while statistics and presentation of research findings are covered in the APA *Manual*, this course does not offer instruction in the presentation of advanced research nor is it a course in research methods. Weekly assignments are based on the required text, *Mastering APA Style: Student's Workbook and Training Guide*. **Note:** This course is for quarter-based master’s-level students.

**WCSS 6000 - Graduate Writing: Evaluative and Persuasive Composition Skills**

*(3 cr.)* This course is designed for students to enhance their ability to succeed in Walden’s writing-intensive courses and is recommended for those whose course instructors have encouraged them to enroll in a writing skills course. For graduate-level composition, students must be able to paraphrase, summarize, and evaluate peer-reviewed research while using graduate-level mechanics. This class provides a solid skills refresher to help students with clear and concise graduate-level composition tasks. Through prewriting, drafting, and revising, students will practice the written communication skills necessary to successfully compose course assignments, create discussion board posts, and write in a scholarly voice. Navigating peer-reviewed material, describing and evaluating primary research, and composing strong scholastic arguments takes practice. Analyzing, synthesizing, interpreting, and evaluating primary research are the skills necessary to complete the capstone project, thesis, or dissertation. This course will
provide students with the written communication tools necessary to complete longer writing projects that necessitate a persuasive academic voice. **Note:** This course is for quarter-based master’s-level students.

**WCSS 6100 - Critical Thinking and Logic**

(3 cr.) The focus of this course is on the skills students need to read critically and think about complex issues, evaluate the validity of arguments, and construct reasoned arguments with logical conclusions. Students learn techniques for assessing ideas presented in written materials to help readers judge the strengths and weaknesses of other communicators’ arguments. Students learn to develop logically sound, evidence-based arguments to support their ideas and views in their studies and work. Finally, the course offers additional ways for students to bolster their critical-thinking skills by considering succinct writing, logical reasoning, and moral and ethical values. **Note:** This course is for quarter-based master’s-level students.

**WCSS 6150 - Graduate Writing for Non-Native English Speakers**

(3 cr.) This course is designed to improve the academic writing skills of graduate students whose first language is not English. Course readings, activities, and assignments provide models to help students master academic style and create their own writing processes, revise drafts based on instructor and classmate feedback, and edit and proofread final drafts. Establishing these individual processes will hone the analytical and writing skills students need to perform at a graduate level. Major projects include summaries, analyses of academic writing, research, and self-reflection essays, as well as peer reviews. **Note:** This course is for quarter-based master’s-level students.

**WCSS 6300 - Advanced Reading Strategies**

(3 cr.) This course is designed for students seeking to enhance key reading competencies. Advanced reading strategies can accelerate comprehension, evaluation, and recall. Students will practice an active approach to reading, gaining skills that will assist in quickly navigating texts. Students can become better consumers of information. Information literacy techniques allow students to evaluate and analyze content with greater ease. This course is appropriate for students preparing for tests of reading-related skills and students in reading-intensive courses.

**WCSS 6400 - Succeeding on Academic and Professional Exams**

(3 cr.) Students in this course are helped to prepare for professional and academic exams, many of which are required for licensure. Students will learn test-taking strategies for computer-based and paper-based exams. They also learn how to recognize and harness test anxiety, assess previous knowledge, manage time, and create a plan of study that allows for success in displaying expertise in an exam setting.

**WCSS 6500 - Effective Assignment Strategies**
This course is designed for students seeking to improve their skills in daily writing tasks. Losing points on small assignments can contribute to failing grades. Mastering the skills to successfully complete weekly writing assignments is crucial to success in online courses. Students focus on strategies essential for the effective comprehension and completion of assignments, such as discussion posts, discussion follow-up responses, and short analytic papers. Students also focus on library skills, grammar refreshers, and the academic voice necessary to write at an appropriate level for the university. Increased success in daily course writing helps students equip themselves with the skills needed for writing high-quality larger papers common in many courses.

WCSS 8350 - Writing a Literature Review

The purpose of this course is to help students write a well-structured, soundly presented critical literature review. The course covers topic selection, research analysis, and writing, editing, and proofreading strategies. Upon completing the course, students will have produced a literature review using a minimum of 15 self-selected research articles. This course is appropriate for master’s and doctoral students who are writing course papers, theses, or dissertations.

Note: This course is for quarter-based master’s-level students. (Course previously listed as SBSF 5350.)
MASTER’S STUDENTS
(SEMESTER-BASED) COURSES

*NURS 5501 - Introduction to Statistics and Applied Research Methods*

(4 sem. cr.) Students in this course are provided with an introductory understanding of elementary statistics for social scientists as well as an introduction to social science research. Statistical methods include computation and analysis of frequency distributions, measures of central tendency, understanding of basic probability, and understanding of the normal curve, as well as conceptual understanding of effect sizes, probability value, and the correlation coefficient. Research methods include understanding basic language associated with research, such as the difference between theory and hypothesis, the nature of variables, and different research designs. Students learn to read research critically. *Note:* This course is for semester-based master’s-level students.

*WCSS 3101 - Skills for Academic Integrity*

(1 sem. cr.) This course is designed to provide students with an understanding of academic integrity and to provide practice using a plagiarism detection tool. Topics include definitions of academic integrity and plagiarism, Walden University academic integrity policy, and strategies for avoiding plagiarism. This course is designed to help students who need extra practice writing with academic integrity and is required for students who have academic integrity violations. Upon completion, students will be able to demonstrate improvement in writing with academic integrity. *Note:* This course is for semester-based master’s-level students. (Course previously listed as SBSF 5101.)

*WCSS 3201 - A Practical Course in APA Style*

(1 sem. cr.) This 4-week course focuses on the most relevant aspects of scholarly writing as presented in the latest edition of the *Publication Manual of the American Psychological Association*. Instruction and practice are provided in references and citations, reducing bias in language, headings, lists, statistical and mathematical copy, italics and capitalization, numbers style, and table and figure formatting. The course is designed to help prepare students for successful writing experiences in coursework, KAMs, and capstone projects. The focus of this course is on grammar only in regard to APA style nuances. Similarly, while statistics and presentation of research findings are covered in the APA Manual, instruction in the presentation of advanced research is not offered nor is it a course in research methods. Weekly assignments are based on the required text, *Mastering APA Style: Student's Workbook and Training Guide*. *Note:* This course is for semester-based master’s-level students.
WCSS 6010 - Graduate Writing I: Evaluative Composition Skills

(1 sem. cr.) This course is designed for students to enhance their ability to succeed in Walden’s writing-intensive courses and is recommended for those whose course instructors have encouraged them to enroll in a writing skills course. For graduate-level composition, students must be able to paraphrase, summarize, and evaluate peer-reviewed research while using proper grammar and punctuation. This class is a solid skills refresher to help students with clear and concise graduate-level composition tasks. Through prewriting, drafting, and revising, students will practice the written communication skills necessary to successfully compose course assignments, create discussion board posts, and work to develop an academic voice. Note: This course is for semester-based master’s-level students.

WCSS 6011 - Graduate Writing II: Persuasive Composition Skills

(1 sem. cr.) This course is designed for students to enhance their ability to succeed in Walden’s writing-intensive courses and taking the Graduate Writing I: Evaluative Composition Skills course, which is recommended but is not a prerequisite for this course. Navigating peer-reviewed material, describing and evaluating primary research, and composing strong scholastic arguments takes practice. Analyzing, synthesizing, interpreting, and evaluating primary research are the skills necessary to complete the capstone project, thesis, or dissertation. Students in this course are provided with the written communication tools necessary to complete longer writing projects that necessitate a persuasive academic voice. Note: This course is for semester-based master’s-level students.

WCSS 6101 - Critical Thinking and Logic

(2 sem. cr.) The focus of this course is on the skills students need to read critically and think about complex issues, evaluate the validity of arguments, and construct reasoned arguments with logical conclusions. Students learn techniques for assessing ideas presented in written materials to help readers judge the strengths and weaknesses of other communicators’ arguments. Students learn to develop logically sound, evidence-based arguments to support their ideas and views in their studies and work. Finally, the course offers additional ways for students to bolster their critical-thinking skills by considering succinct writing, logical reasoning, and moral and ethical values. Note: This course is for semester-based master’s-level students.

WCSS 6151 - Graduate Writing for Non-Native English Speakers

(2 sem. cr.) This course is designed to improve the academic writing skills of graduate students whose first language is not English. Course readings, activities, and assignments provide models to help students master academic style and create their own writing processes, revise drafts based on instructor and classmate feedback, and edit and proofread final drafts. Establishing these individual processes will hone the analytical and writing skills students need to perform at a graduate level. Major projects include summaries, analyses of academic writing, research, and self-reflection essays, as well as peer reviews. Note: This course is for semester-based master’s-level students.
**WCSS 6301 - Advanced Reading Strategies**

*(2 sem. cr.)* This course is designed for students seeking to enhance key reading competencies. Advanced reading strategies can accelerate comprehension, evaluation, and recall. Students will practice an active approach to reading, gaining skills that will assist in quickly navigating texts. Students can become better consumers of information. Information literacy techniques allow students to evaluate and analyze content with greater ease. This course is appropriate for students preparing for tests of reading-related skills and students in reading-intensive courses.

**WCSS 6401 - Succeeding on Academic and Professional Exams**

*(2 sem. cr.)* Students are helped to prepare for professional and academic exams, many of which are required for licensure, in this course. Students learn test-taking strategies for computer-based and paper-based exams. They also learn how to recognize and harness test anxiety, assess previous knowledge, manage time, and create a plan of study that allows for success in displaying expertise in an exam setting.

**WCSS 6501 - Effective Assignment Strategies**

*(2 sem. cr.)* This course is designed for students seeking to improve their skills in daily writing tasks. Losing points on small assignments can contribute to failing grades. Mastering the skills to successfully complete weekly writing assignments is crucial to success in online courses. Students focus on strategies essential for the effective comprehension and completion of assignments, such as discussion posts, discussion follow-up responses, and short analytic papers. Students also focus on library skills, grammar refreshers, and the academic voice necessary to write at an appropriate level for the university. Increased success in daily course writing helps students equip themselves with the skills needed for writing high-quality larger papers common in many courses.

**WCSS 8351 - Writing a Literature Review**

*(3 sem. cr.)* The purpose of this course is to help students write a well-structured, soundly presented critical literature review. Topic selection, research analysis, and writing, editing, and proofreading strategies are covered in this course. Upon completing the course, students will have produced a literature review using a minimum of 15 self-selected research articles. This course is appropriate for master’s and doctoral students who are writing course papers, theses, or dissertations. **Note:** This course is for semester-based master’s-level students. (Course previously listed as SBSF 5351.)
D.B.A., Ed.D., AND Ed.S.
STUDENTS (SEMESTER-BASED) COURSES

*SBSF 8015 - Graduate Writing I: Evaluative Composition Skills (Ed.D. and Ed.S.)*

(2 sem. cr.) This course is designed for students to enhance their ability to succeed in Walden's writing-intensive courses and is recommended for those whose course instructors have encouraged them to enroll in a writing skills course. For graduate-level composition, students must be able to paraphrase, summarize, and evaluate peer-reviewed research while using proper grammar and punctuation. This class provides a solid skills refresher to help students with clear and concise graduate-level composition tasks. Through prewriting, drafting, and revising, students will practice the written communication skills necessary to successfully compose course assignments, create discussion board posts, and work to develop an academic voice. **Note:** This course is for semester-based students in the Doctor of Education (Ed.D.) and Education Specialist (Ed.S.) programs.

*SBSF 8016 - Graduate Writing II: Persuasive Composition Skills (Ed.D. and Ed.S.)*

(2 sem. cr.) This course is designed for students to enhance their ability to succeed in Walden’s writing-intensive courses and taking the Graduate Writing I: Evaluative Composition Skills course is recommended but is not a prerequisite for this course. Navigating peer-reviewed material, describing and evaluating primary research, and composing strong scholastic arguments takes practice. Analyzing, synthesizing, interpreting, and evaluating primary research are the skills necessary to complete the capstone project, thesis, or dissertation. This course will provide students with the written communication tools necessary to complete longer writing projects that necessitate a persuasive academic voice. **Note:** This course is for semester-based students in the Doctor of Education (Ed.D.) and Education Specialist (Ed.S.) programs.

(1 sem. cr.) This course is designed to provide students with an understanding of academic integrity and to provide practice using a plagiarism detection tool. Topics include definitions of academic integrity and plagiarism, Walden University academic integrity policy, and strategies for avoiding plagiarism. This course is designed to help students who need extra practice writing with academic integrity and is required for students who have academic integrity violations. Upon completion, students will be able to demonstrate improvement in writing with academic integrity. **Note:** This course is for semester-based doctoral-level students.
WCSS 3201 - A Practical Course in APA Style

(1 sem. cr.) This 4-week course focuses on the most relevant aspects of scholarly writing as presented in the latest edition of the Publication Manual of the American Psychological Association. Instruction and practice are provided in references and citations, reducing bias in language, headings, lists, statistical and mathematical copy, italics and capitalization, numbers style, and table and figure formatting. The course is designed to help prepare students for successful writing experiences in coursework, KAMs, and capstone projects. The focus of this course is on grammar only in regard to APA style nuances. Similarly, while statistics and presentation of research findings are covered in the APA Manual, instruction in the presentation of advanced research is not offered nor is it a course in research methods. Weekly assignments are based on the required text, Mastering APA Style: Student's Workbook and Training Guide. Note: This course is for semester-based doctoral-level students.

WCSS 6010G - Graduate Writing I: Evaluative Composition Skills (D.B.A.)

(1 sem. cr.) This course is designed for students to enhance their ability to succeed in Walden’s writing-intensive courses and is recommended for those whose course instructors have encouraged them to enroll in a writing skills course. For graduate-level composition, students must be able to paraphrase, summarize, and evaluate peer-reviewed research while using proper grammar and punctuation. This class provides a solid skills refresher to help students with clear and concise graduate-level composition tasks. Through prewriting, drafting, and revising, students will practice the written communication skills necessary to successfully compose course assignments, create discussion board posts, and work to develop an academic voice. Note: This course is for semester-based students in the Doctor of Business Administration (D.B.A.) program.

WCSS 6011G - Graduate Writing II: Persuasive Composition Skills (D.B.A.)

(1 sem. cr.) This course is designed for students to enhance their ability to succeed in Walden’s writing-intensive courses and taking the Graduate Writing I: Evaluative Composition Skills course is recommended but is not a prerequisite for this course. Navigating peer-reviewed material, describing and evaluating primary research, and composing strong scholastic arguments takes practice. Analyzing, synthesizing, interpreting, and evaluating primary research are the skills necessary to complete the capstone project, thesis, or dissertation. This course will provide students with the written communication tools necessary to complete longer writing projects that necessitate a persuasive academic voice. Note: This course is for semester-based students in the Doctor of Business Administration (D.B.A.) program.

WCSS 6101 - Critical Thinking and Logic

(2 sem. cr.) The focus of this course is on the skills students need to read critically and think about complex issues, evaluate the validity of arguments, and construct reasoned arguments with
logical conclusions. Students learn techniques for assessing ideas presented in written materials to help readers judge the strengths and weaknesses of other communicators’ arguments. Students learn to develop logically sound, evidence-based arguments to support their ideas and views in their studies and work. Finally, the course offers additional ways for students to bolster their critical-thinking skills by considering succinct writing, logical reasoning, and moral and ethical values. **Note:** This course is for semester-based doctoral-level students.

**WCSS 6151 - Graduate Writing for Non-Native English Speakers**

*(2 sem. cr.)* This course is designed to improve the academic writing skills of graduate students whose first language is not English. Course readings, activities, and assignments provide models to help students master academic style and create their own writing processes, revise drafts based on instructor and classmate feedback, and edit and proofread final drafts. Establishing these individual processes will hone the analytical and writing skills students need to perform at a graduate level. Major projects include summaries, analyses of academic writing, research, and self-reflection essays, as well as peer reviews. **Note:** This course is for semester-based doctoral-level students.

**WCSS 8351 - Writing a Literature Review**

*(3 sem. cr.)* The purpose of this course is to help students write a well-structured, soundly presented critical literature review. Topic selection, research analysis, and writing, editing, and proofreading strategies are covered in this course. Upon completing the course, students will have produced a literature review using a minimum of 15 self-selected research articles. This course is appropriate for master’s and doctoral students who are writing course papers, theses, or dissertations. **Note:** This course is for semester-based doctoral-level students. (Course previously listed as SBSF 7251.)
PH.D. STUDENTS (QUARTER-BASED) COURSES

SBSF 8024 - Graduate Writing: Evaluative and Persuasive Composition Skills (Ph.D. in Education Students)

(4 cr.) This course is designed for students to enhance their ability to succeed in Walden's writing-intensive courses and is recommended for those whose course instructors have encouraged them to enroll in a writing skills course. For graduate-level composition, students must be able to paraphrase, summarize, and evaluate peer-reviewed research while using graduate-level mechanics. This class provides a solid skills refresher to help students with clear and concise graduate-level composition tasks. Through prewriting, drafting, and revising, students will practice the written communication skills necessary to successfully compose course assignments, create discussion board posts, and write in a scholarly voice. Navigating peer-reviewed material, describing and evaluating primary research, and composing strong scholastic arguments takes practice. Analyzing, synthesizing, interpreting, and evaluating primary research are the skills necessary to complete the capstone project, thesis, or dissertation. This course will provide students with the written communication tools necessary to complete longer writing projects that necessitate a persuasive academic voice. **Note:** This course is for Ph.D. in Education students.

WCSS 3100 - Skills for Academic Integrity

(1.5 cr.) This course is designed to provide students with an understanding of academic integrity and to provide practice using a plagiarism detection tool. Topics include definitions of academic integrity and plagiarism, Walden University academic integrity policy, and strategies for avoiding plagiarism. This course is designed to help students who need extra practice writing with academic integrity and is required for students who have academic integrity violations. Upon completion, students will be able to demonstrate improvement in writing with academic integrity. **Note:** This course is for quarter-based doctoral-level students.

WCSS 3200 - A Practical Course in APA Style

(1.5 cr.) This 4-week course focuses on the most relevant aspects of scholarly writing as presented in the latest edition of the Publication Manual of the American Psychological Association. Instruction and practice is provided in references and citations, reducing bias in language, headings, lists, statistical and mathematical copy, italics and capitalization, numbers style, and table and figure formatting. The course is designed to help prepare students for successful writing experiences in coursework, KAMs, and capstone projects. This course focuses on grammar only in regard to APA style nuances. Similarly, while statistics and presentation of research findings are covered in the APA Manual, this course does not offer instruction in the
presentation of advanced research nor is it a course in research methods. Weekly assignments are based on the required text, Mastering APA Style: Student’s Workbook and Training Guide. Note: This course is for quarter-based doctoral-level students.

**WCSS 6000G - Graduate Writing: Evaluative and Persuasive Composition Skills**

(3 cr.) This course is designed for students to enhance their ability to succeed in Walden’s writing-intensive courses and is recommended for those whose course instructors have encouraged them to enroll in a writing skills course. For graduate-level composition, students must be able to paraphrase, summarize, and evaluate peer-reviewed research while using graduate-level mechanics. This class provides a solid skills refresher to help students with clear and concise graduate-level composition tasks. Through prewriting, drafting, and revising, students will practice the written communication skills necessary to successfully compose course assignments, create discussion board posts, and write in a scholarly voice. Navigating peer-reviewed material, describing and evaluating primary research, and composing strong scholastic arguments takes practice. Analyzing, synthesizing, interpreting, and evaluating primary research are the skills necessary to complete the capstone project, thesis, or dissertation. This course will provide students with the written communication tools necessary to complete longer writing projects that necessitate a persuasive academic voice. Note: This course is for quarter-based doctoral-level students.

**WCSS 6100 - Critical Thinking and Logic**

(3 cr.) The focus of this course is on the skills students need to read critically and think about complex issues, evaluate the validity of arguments, and construct reasoned arguments with logical conclusions. Students learn techniques for assessing ideas presented in written materials to help readers judge the strengths and weaknesses of other communicators’ arguments. Students learn to develop logically sound, evidence-based arguments to support their ideas and views in their studies and work. Finally, the course offers additional ways for students to bolster their critical-thinking skills by considering succinct writing, logical reasoning, and moral and ethical values. Note: This course is for quarter-based doctoral-level students.

**WCSS 6150 - Graduate Writing for Non-Native English Speakers**

(3 cr.) This course is designed to improve the academic writing skills of graduate students whose first language is not English. Course readings, activities, and assignments provide models to help students master academic style and create their own writing processes, revise drafts based on instructor and classmate feedback, and edit and proofread final drafts. Establishing these individual processes will hone the analytical and writing skills students need to perform at a graduate level. Major projects include summaries, analyses of academic writing, research, and self-reflection essays, as well as peer reviews. Note: This course is for quarter-based doctoral-level students.

**WCSS 6400 - Succeeding on Academic and Professional Exams**
(3 cr.) Students in this course are helped to prepare for professional and academic exams, many of which are required for licensure. Students will learn test-taking strategies for computer-based and paper-based exams. They also learn how to recognize and harness test anxiety, assess previous knowledge, manage time, and create a plan of study that allows for success in displaying expertise in an exam setting.

**WCSS 8350 - Writing a Literature Review**

(4.5 cr.) The purpose of this course is to help students write a well-structured, soundly presented critical literature review. The course covers topic selection, research analysis, and writing, editing, and proofreading strategies. Upon completing the course, students will have produced a literature review using a minimum of 15 self-selected research articles. This course is appropriate for master’s and doctoral students who are writing course papers, theses, or dissertations. **Note:** This course is for quarter-based doctoral-level students. (Course previously listed as SBSF 7250.)
STUDENT SUCCESS COURSES

WCSS 6500G - Effective Assignment Strategies

(3 cr.) This course is designed for students seeking to improve their skills in daily writing tasks. Losing points on small assignments can contribute to failing grades. Mastering the skills to successfully complete weekly writing assignments is crucial to success in online courses. Students focus on strategies essential for the effective comprehension and completion of assignments, such as discussion posts, discussion follow-up responses, and short analytic papers. Students also focus on library skills, grammar refreshers, and the academic voice necessary to write at an appropriate level for the university. Increased success in daily course writing helps students equip themselves with the skills needed for writing high-quality larger papers common in many courses. **Note:** Free version.

WCSS 6501G - Effective Assignment Strategies

(2 sem. cr.) This course is designed for students seeking to improve their skills in daily writing tasks. Losing points on small assignments can contribute to failing grades. Mastering the skills to successfully complete weekly writing assignments is crucial to success in online courses. Students focus on strategies essential for the effective comprehension and completion of assignments, such as discussion posts, discussion follow-up responses, and short analytic papers. Students also focus on library skills, grammar refreshers, and the academic voice necessary to write at an appropriate level for the university. Increased success in daily course writing helps students equip themselves with the skills needed for writing high-quality larger papers common in many courses. **Note:** Free version.

WCSS 6600 - Effective Essay Strategies

(3 cr.) Mastering skills in organization, citation, and writing is crucial to success in Walden's online courses. In this course, students have an opportunity to improve their ability to complete research and writing projects. They do this by learning strategies to evaluate sources, conduct research, and use instructor feedback to improve grades. Students also focus on paraphrasing techniques, grammar refreshers, and the academic voice necessary to write at an appropriate level for the university. By assessing strategies and engaging in practical exercises, students gain research and writing skills necessary to complete longer papers common in many courses. The course is appropriate for all students hoping to improve their academic writing skills, including those students for whom English is not a first language.

WCSS 6601 - Effective Essay Strategies

(2 sem. cr.) Mastering skills in organization, citation, and writing is crucial to success in Walden's online courses. In this course, students have an opportunity to improve their ability to
complete research and writing projects by learning strategies to evaluate sources, conduct research, and use Instructor feedback to improve grades. Students also focus on paraphrasing techniques, grammar refreshers, and the academic voice necessary to write at an appropriate level for the university. By assessing strategies and engaging in practical exercises, students gain research and writing skills necessary to complete longer papers common in many courses. The course is appropriate for all students hoping to improve their academic writing skills, including those students for whom English is not a first language.

**WCSS 8010 - Doctoral Writing Workshop: Revising and Editing the Proposal**

*(0 cr.)* Doctoral students who have begun the development of their dissertation, project, or doctoral study proposal but find themselves needing writing guidance and support should take this small-group workshop. With the assistance of the writing faculty member, students will spend 6 weeks advancing their Proposal through tailored one-on-one writing instruction and supportive group work with their peers. They will get to know the required components of the Proposal and have an opportunity to learn how to address common writing issues, such as APA, citing and referencing sources, clarity and concision, and writer's block. Importantly, the instruction and feedback students receive will be anchored in their own work. In addition to a further developed Proposal, at the end of the workshop, students will have a tailored plan based on their specific needs to ensure that they can continue to make progress on their draft.

**WCSS 8020 - Doctoral Writing Workshop: Revising and Editing the Introduction**

*(0 cr.)* Doctoral students who are committed to an area of research for their dissertation, project study, or doctoral study but unclear as to how to introduce and articulate its importance to a scholarly audience should take this small-group workshop. With the help of the writing faculty member, workshop participants will spend 6 weeks advancing the draft of the Introduction through tailored one-on-one writing instruction and supportive group work with the students' peers. Students will get to know the required components of the Introduction and have the opportunity to learn how to describe their study, its purpose, and its intentions as well as address common writing issues associated with the Introduction, such as writing a strong problem statement, articulating the gap in the literature or practice, applying correct use of APA and source citations, and overcoming writer's block. Importantly, the instruction and feedback that students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the Introduction. As needed, the writing faculty member will help create a tailored plan based on students' specific needs to ensure that they can continue to advance their draft.

**WCSS 8030 - Doctoral Writing Workshop: Revising and Editing the Literature Review**

*(0 cr.)* Is writing the Literature Review a stumbling block? Is the research relayed without purpose or synthesis? This small-group workshop is for doctoral candidates who have begun the Literature Review of their dissertation, project study, or doctoral study but need writing guidance and support. With the help of the writing faculty member, students will spend 6 weeks advancing their Literature Review through tailored one-on-one writing instruction and supportive
group work with their peers. Students will get to know the required components of the Literature Review and have the opportunity to learn how to address common writing issues, such as effective use of summary and synthesis, applying correct use of APA and source citations, and articulating search strategies. Importantly, the instruction and feedback students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the Literature Review. As needed, the faculty member will help create a tailored plan based on students' specific needs to ensure that they can continue to advance their draft.

**WCSS 8040 - Doctoral Writing Workshop: Revising and Editing the Methodology Section**

(0 cr.) Writing about the method or methods of study can be a challenge. It's not easy to articulate variables, validity, or data analysis plans. Students who feel like they need some extra help or support with the writing component of their dissertation, project study, or doctoral study Methods section should take this small-group workshop. With the help of the writing faculty member, students will spend 6 weeks advancing the writing of their Methods section through tailored one-on-one writing instruction and supportive group work with their peers. Workshop students will get to know the required components of the Methods section and have the opportunity to learn how to address common writing issues inherent in this section, including effectively explaining data collection and analysis, formatting APA-compliant tables and figures, and articulating ethical procedures and concerns associated with the study. Importantly, the instruction and feedback students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the Methodology section. If needed, the faculty member will help create a tailored plan based on students' specific needs to ensure that they can continue to advance their draft.
THE RICHARD W. RILEY COLLEGE OF EDUCATION AND LEADERSHIP

The Richard W. Riley College of Education and Leadership at Walden University is accredited by the National Council for Accreditation of Teacher Education (NCATE). This accreditation covers initial teacher preparation programs and advanced educator preparation programs. However, the accreditation does not include individual education courses offered to PreK–12 educators for professional development, relicensure, or other purposes.

Note on certification and licensure: Acceptance of education degrees from Walden University by individual states for the satisfaction of certification or licensure requirements rests with each state. Walden's advisors can provide individuals with basic guidelines and other information about state requirements. It remains the individual's responsibility to understand and comply with the regulations and other requirements for the state in which he or she resides.

Prospective Alabama students: Contact the Teacher Education and Certification Division of the Alabama State Department of Education at 1-334-242-9935 or www.alsde.edu to verify that these programs qualify for teacher certification, endorsement, and/or salary benefits.

Prospective Washington state students are advised to contact the Office of the Superintendent of Public Instruction at 1-360-725-6275 or prof.educ@k12.wa.us to determine whether Walden's programs in the field of education are approved for teacher certification or endorsements in Washington state. Additionally, teachers are advised to contact their individual school district as to whether this program may qualify for salary advancement.

Learn more about the Undergraduate Minors and Accelerate Into Master's (AIM) Programs.

Research and Residencies

Research and Residencies guides and promotes quality in all aspects of doctoral research and residencies in The Richard W. Riley College of Education and Leadership. In collaboration with Walden University's Center for Research Quality, Research and Residencies supports student success through the administration of The Richard W. Riley College of Education and Leadership University Research Reviewers and the supervision of the Riley College Research Courses and Doctoral Forums. Research and Residencies also coordinates the Ed.D. and Ph.D. residencies for the Riley College working closely with Walden University's Academic Residencies team. Face-to-face residencies and virtual experiences are offered to students throughout the year in various parts of the country and overseas. These residencies provide socialization opportunities using innovative technologies and principles of adult learning to develop scholar-practitioners who think critically and contribute to the greater social good.
BACHELOR’S DEGREE PROGRAMS

B.S. in Child Development

The Walden University B.S. in Child Development degree program addresses the needs of child development professionals by providing the tools and strategies needed to improve practice with children across a variety of age levels. Students can choose from eight concentrations: Infant/Toddler, Preschool, Dual Infant/Toddler and Preschool, Child and Adolescent Studies, or Psychology. All eight concentrations in the program deliver an in-depth focus on child development, child-centered learning, developmentally appropriate environments, and effective practices for working with children and families. Students will gain insights in the field of child development through courses that bridge the gap between theoretical and practical knowledge, led by national experts, researchers, and experts in the field.

Learning Outcomes

At the end of this program, the education professional:
1. Identifies developmentally appropriate practices related to creating environments that are healthy, respectful, supportive, and challenging for all children.
2. Identifies the individual characteristics of children and uses this knowledge to make informed decisions regarding the emotional, social, physical, and intellectual well-being.
3. Explains the vital role that healthy, respectful, and reciprocal family and community relationships play in supporting the growth and well-being of the whole child.
4. Demonstrates an understanding of the importance of cultural and linguistic diversity and the vital role it plays in children's healthy development and learning.
5. Uses professional resources, including collegial sharing for continued professional development, to promote advocacy and social change.

Concentrations

- General
- Administration and Management
- Child and Adolescent Studies
- Dual Infant/Toddler and Preschool
- Family Health and Wellness
- Infant/Toddler
- Preschool
- Psychology
Curriculum

The B.S. in Child Development curriculum consists primarily of core courses that are 6-week, 5-credit courses, culminating with a 6-week, 7-credit Capstone course. Through these courses, students will develop concentration-specific content knowledge, written and oral communications skills, the ability to contribute professionally to a diverse and changing child development field, and an understanding of developmentally appropriate practices. These skills are essential to the field of early childhood education, and they prepare students to make a successful contribution in their current and future work settings.

General Education Courses (46 cr.)

See the general education section of this *Walden University Catalog*.  
*Note:* A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Child Development program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

General

The General Program provides students with a foundation in child development and educational theory. Coursework examines children's key developmental milestones from birth through adolescence, exploring their physical, social-emotional, and cognitive/language development. Students learn how to create environments that promote healthy development. This concentration allows for a larger number of transferable credits than more specialized programs permit, helping students earn their degree at an accelerated pace.*

*Time to completion may vary by student, depending on individual progress and credits transferred, if applicable.

Degree Requirements

- 180 total quarter credit hours
- General education courses (46 cr.)
- Core courses (55 cr.)
- Elective courses (72 cr.)
- Capstone course (7 cr.)
Curriculum

General Education Courses (46 cr.)
See the General Education section of this Walden University Catalog.

Core Courses (45 cr.)

- EDUC 1001 - Introduction to Education
- EDUC 1002 - Pioneers and Philosophies of Education
- EDUC 1004 - Child Development
- EDUC 1005 - Child Health, Safety, and Nutrition
- EDUC 1006 - Child, Family, and Community Relationships
- EDUC 2001 - Language Development
- EDUC 3003 - Observation and Assessment of the Young Child
- EDUC 4004 - Children With Special Needs
- EDUC 4005 - Cultural and Linguistic Diversity

Child Development Upper-Elective Courses (10 cr.)
Choose two Child Development courses as upper-level electives (10 cr.).

Elective Courses (72 cr.)
Choose five courses from general education, B.S. in Child Development, or other Walden bachelor's degree programs. At least 20 credits must be at the 3000–4000 level.

Note on Minors: Electives can also be used to complete a six-course minor.

Capstone Course (7 cr.)

- EDUC 4500 - Capstone
  OR
- EDUC 4001 - Capstone

Administration and Management
The concentration in Administration and Management will teach students the unique set of competencies needed to successfully administer a child care program or operate a child care business. The course content will give students a strong foundation in management, leadership, human resources, marketing, and small business entrepreneurship. Students will learn how to develop curriculum and programmatic content at the administrative level. Students will gain an understanding of health, safety, and other state codes and how to ensure that their center or program is in compliance with those standards. Students will explore strategies for
communicating effectively about a center and its programs with parents, families, and the larger community.

Note on Minors: Electives can also be used to complete a six-course minor.

Capstone Course (7 cr.)

- EDUC 4500 - Capstone
- EDUC 4001 - Capstone

Child and Adolescent Studies

The concentration in Child and Adolescent Studies will provide students with foundational knowledge, current research, and career perspectives in the areas of development, education, and human ecology. Students will study how school-age children and adolescents develop and learn. This will include the study of typical and atypical cognitive, physical, and social-emotional development, as well as the relationship among these. Additionally, it will also examine developmental domains as well as explore ways that culturally diverse values and social attitudes are transmitted to school-age children and adolescents. Students will learn effective strategies needed for working with this age group in group and classroom settings, and techniques needed to facilitate positive relationships between and among homes, schools, and communities. Students will be able to critically examine selected issues and trends related to school-age children and adolescents.

Family Health and Wellness
The Family Health and Wellness concentration explores the impact of wellness across the lifespan. Students will learn how to identify key indicators of healthy habits and develop strategies to foster healthier choices for children and their families. Coursework addresses health issues, such as nutrition, exercise science, stress management, and the role of culture and socioeconomic factors in perceptions of healthy behavior.

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.
Curriculum

Core Courses (45 cr.)

- EDUC 1001 - Introduction to Education
- EDUC 1002 - Pioneers and Philosophies of Education
- EDUC 1004 - Child Development
- EDUC 1005 - Child Health, Safety, and Nutrition
- EDUC 1006 - Child, Family, and Community Relationships
- EDUC 2001 - Language Development
- EDUC 3003 - Observation and Assessment of the Young Child
- EDUC 4004 - Children With Special Needs
- EDUC 4005 - Cultural and Linguistic Diversity

Concentration Courses (30 cr.)

- EDUC 3101 - Professionalism and Advocacy in the Early Childhood Field
- EDUC 3202 - Quality Programs for Infants and Toddlers
- EDUC 3203 - Infant/Toddler Mental Health
- EDUC 3204 - Family Cultures of Infants and Toddlers
- EDUC 4205 - Developmentally Appropriate Practices in Infant Settings
- EDUC 4206 - Developmentally Appropriate Practices in Toddler Settings

Elective Courses (53 cr.)

Choose courses from general education, B.S. in Child Development, or other Walden bachelor's degree programs.

Note on Minors: Electives can also be used to complete a six-course minor.

Psychology

From infancy to adolescence, children are shaped by emotional, physical, social, and environmental factors. The Psychology concentration will expand students' understanding of the development, behavior, and motivations of children of all ages. Students build the knowledge base needed to work with children and their families in a variety of public, private, and nonprofit organizations. The B.S. in Child Development program is one of the only non-licensure degree programs in the nation to offer this concentration, which is designed for individuals who want to increase their knowledge of human psychology and behavior as they relate to development from infancy through adolescence.

**B.S. in Instructional Design and Technology**

The B.S. in Instructional Design and Technology provides students with an opportunity to obtain the knowledge and skills necessary for entry into the growing field of instructional design. This program will prepare students to use technology to create and evaluate learning materials for use in various instructional settings.

Students will learn how to work collaboratively to understand their organizations' learning needs and how to effectively develop instructional materials to meet these needs. Students will have an understanding of how people learn plus the practical skills to apply their knowledge immediately in the field. Additionally, students graduating with this degree will be uniquely qualified due to their experiences with learning online. Students' experience with the Learning Management Systems and the tools used in the online environment will put them in position for the many jobs available for instructional designers in the online learning field.

The B.S. in Instructional Design and Technology courses are aligned with the standards of the Association for Education Communications and Technology (AECT). These standards are critical indicators of quality in instruction through technology and their inclusion reflects the integrity of the Walden University learning experience as well as its relevancy in professional and educational settings.
Learning Outcomes

Upon completion of the program, education professionals will be able to:
1. Design conditions for learning by applying principles of instructional systems design, instructional strategies, and learner characteristics.
2. Develop instructional materials and experiences using print, audiovisual, computer-based, and integrated technologies.
3. Use processes and resources for learning by applying principles and theories of media utilization.
4. Evaluate the adequacy of instruction and learning by applying principles of problem analysis, criterion-references measurement, and formative and summative evaluation.

Concentrations

- General Program
- Business and Organizational Change
- Human Factors and Interface Design

Curriculum

Walden University offers a B.S. in Instructional Design and Technology degree to students who want to gain the skills and practical hands-on experience needed to succeed in this growing field. The broad framework of the General Program can help to prepare you for a rewarding career in the field of instructional design and technology. Walden also offers the following concentrations: Business and Organizational Change and Human Factors and Interface Design.

Note: Students admitted prior to September 2010 are required to complete CMIS 1002, CMIS 2001, and CMIS 4201 as part of the core curriculum.

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Education Core Courses (30 cr.)

- EDUC 1014 - Understanding Today’s Instructional Environments
- EDUC 1015 - How People Learn
- EDUC 2003 - Human Development
- EDUC 2004 - Literacy in the 21st Century
- EDUC 3004 - Curriculum Design
- EDUC 3005 - Evaluation and Assessment
Instructional Design Core Courses (45 cr.)

- EIDT 2001 - Technology and Learning
- EIDT 2002 - Web Design I
- EIDT 2003 - Introduction to Distance Education
- EIDT 2004 - Instructional Design I
- EIDT 3003 - Ethical and Fair Use of Instructional Materials
- EIDT 3002 - Multimedia Tools
- EIDT 3004 - Instructional Design II
- EIDT 4004 - Instructional Design III
- EIDT 4002 - Web Design II

Elective Courses (20–55 cr.)

Students in the General Program choose 11 additional elective courses (55 cr.) from either general education, B.S. in Child Development, B.S. in Educational Studies, or any bachelor’s program. At least 15 elective credits must be at the 3000 level or above.

Students in the Business and Organizational Change concentration choose seven additional elective courses (35 cr.) from either general education, B.S. in Child Development, B.S. in Educational Studies, or any bachelor’s program.

Students in the Human Factors and Interface Design concentration choose four additional elective courses (20 cr.) from either general education, B.S. in Child Development, B.S. in Educational Studies, or any bachelor’s program.

Capstone Course (5 cr.)

- EIDT 4001 - Instructional Design and Technology Capstone

Additional Technology Requirements

Note: In addition to Walden’s general technical requirements, this program has additional technology requirements:

- Windows Vista or Mac OS X
- Free, downloadable software programs that may be required in order to complete the course and program requirements

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Instructional Design and Technology program relating to the types of occupations this program
may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**General Program**

The broad framework of the General program allows students the flexibility to design a program that meets their specific needs. Through a combination of general education courses, electives, and a core of applied instructional design courses, students can gain a wealth of competencies, skills, and experiences to apply technology to a variety of instructional settings.

**Degree Requirements**

- 181 total quarter credit hours
- General education courses (46 cr.)
- Core courses (75 cr.)
- Elective courses (55 cr.)
- Capstone course (5 cr.)

**Curriculum**

**General Education Courses (46 cr.)**

- EIDT 3002 - Multimedia Tools
- EIDT 3004 - Instructional Design II
- EIDT 4004 - Instructional Design III
Electives (55 cr.)
Choose nine courses from general education, B.S. in Instructional Design and Technology, or other Walden bachelor’s degree programs. At least 55 credits must be at the 3000–4000 level. The elective credits should total 55 to meet program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

Capstone Course (5 cr.)

- **EIDT 4001 - Instructional Design and Technology Capstone**

Business and Organizational Change
The Business and Organizational Change concentration will be beneficial for those looking to blend their knowledge of instructional design and technology within the business landscape. Students will learn the essential principles and concepts of management theory and practice. In order to help their organizations become more successful, students will also study effective change management tools and techniques. This concentration will also focus on the basic principles of leadership and motivational theory, as well as the importance of communication.

- HRMG 3001 - Human Resource Management

Elective Courses (35 cr.)

Choose nine courses from general education, B.S. in Instructional Design and Technology, or other Walden bachelor's degree programs. At least 55 credits must be at the 3000–4000 level. Elective credits should total 20 to meet the program requirements. Students may also be eligible to transfer previous credit to meet elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

Capstone Course (5 cr.)

- EIDT 4001 - Instructional Design and Technology Capstone

Human Factors and Interface Design

The Human Factors and Interface Design concentration allows students to gain a deeper understanding of user needs and preferences in order to develop learning applications that are accessible and easy for the learner to use. Students will learn the various methods available for evaluating, measuring, and improving the way humans and computers interact. They will also be able to apply their knowledge of e-learning systems to real-world challenges.

Students may also be eligible to transfer previous credit to meet the elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.
OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a C in the graduate-level course but only a grade of B or better will carry over to the graduate program. Students who receive a C grade will be awarded a grade of C*, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement.

Students who do not receive a B or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.
3. AIM courses are (5000-level) graduate courses.*
   a. Tuition for these courses is charged at the undergraduate rate.
b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a B or better in each course to have that course applied to the master's program.
   o Students who get lower than a B in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   o Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a B or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note*: Graduate students cannot register for AIM courses.

---

**M.S. in Forensic Psychology**

Students may select up to five of these courses. Individual course prerequisites apply.  
**Note:** These courses are 11 weeks in length.

---

**School of Social Work and Human Services**

---

**M.S. in Clinical Mental Health Counseling**

These courses are open only to students in the B.S. in Human Services and B.S Psychology programs. Students may select any or all of these courses. Individual course prerequisites apply.  
**Note:** These courses are 11 weeks in length.

---

**M.S. in Addiction Counseling**

These courses are open only to students enrolled in the B.S. in Human Services Addictions concentration or the B.S. in Psychology Addictions concentration. Students may select any or all of these courses. Individual course prerequisites apply.  
**Note:** These courses are 11 weeks in length.
Treatment, and Case Management of Addiction

- HUMN 5203 - Psychopharmacology and Biopsychosocial Considerations
- HUMN 5215 - Lifespan Development

Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their academic advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Child Development
- Minor in Communication
- Minor in Criminal Justice
- Minor in Healthcare Management
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Introductory Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health

Minor in Applied Instructional Design and Technology

The Undergraduate Minor in Applied Instructional Design and Technology is designed for non-education major students who are interested in the growing field of instructional design. This minor can help prepare students to use technology to create and evaluate learning materials for use in various instructional settings. For students looking to focus more on design and who are willing to purchase the Adobe Web Premium software, the Applied Instructional Design and Technology minor will allow them to gain actual design experience with hands-on use of the Adobe Web Premium software.
Note: This minor is not available to students in the B.S. in Instructional Design and Technology program.

Required (30 cr.)

Courses should be completed in the following order:

- EDUC 1015 - How People Learn
- EIDT 3002 - Multimedia Tools
- EIDT 2002 - Web Design I
- EIDT 2004 - Instructional Design I
- EIDT 3004 - Instructional Design II
- EIDT 4004 - Instructional Design III

Minor in Child Development

The Minor in Child Development is for the non-education major student seeking skills and knowledge in child development, child-centered learning, developmentally appropriate environments, and effective practices for working with children and families. Students will gain insights in the field of child development through courses that bridge the gap between theoretical and practical knowledge, led by national experts, researchers, and experts in the field.

Note: This minor is not available to students in the B.S. in Child Development program.

Required (30 cr.)

- EDUC 1004 - Child Development
- EDUC 4005 - Cultural and Linguistic Diversity
  Students may select from four of the following courses:
- EDUC 1005 - Child Health, Safety, and Nutrition
- EDUC 1006 - Child, Family, and Community Relationships
- EDUC 2001 - Language Development
- EDUC 2002 - Children’s Literature
- EDUC 3003 - Observation and Assessment of the Young Child
- EDUC 3203 - Infant/Toddler Mental Health

Minor in Introductory Design and Technology

The Undergraduate Minor in Introductory Instructional Design and Technology is for the non-education major student who may be interested in designing learning experiences and training programs. Students will gain firsthand knowledge of a learning management system and how it is used to provide engaging and content-rich instruction. This minor will not require the purchase of Adobe Web Premium software.

Note: This minor is not available to students in the B.S. in Instructional Design and Technology program.
Required (30 cr.)

- EDUC 1014 - Understanding Today's Instructional Environments♦
- EIDT 2001 - Technology and Learning♦
- EIDT 2003 - Introduction to Distance Education♦
- EIDT 2004 - Instructional Design I♦
- EIDT 3003 - Ethical and Fair Use of Instructional Materials♦
- EDUC 3005 - Evaluation and Assessment♦
Teacher Preparation Program Program With a Master of Arts in Teaching (M.A.T.)

Walden's Minnesota state-approved* teacher preparation program with a Master of Arts in Teaching (M.A.T.) option is designed to prepare candidates to become P–12 classroom teachers with the knowledge, skills, and dispositions of exemplary educators who work in diverse settings. The Richard W. Riley College of Education and Leadership is committed to individuals who seek to become skilled classroom teachers and to providing them developmentally appropriate, student-centered learning experiences that build their students' knowledge and skills.

* Note to all Pennsylvania residents: Walden University's teacher preparation program is approved by the Minnesota Board of Teaching as leading to licensure. Because this program is not reviewed by the Pennsylvania Department of Education, candidates are instructed to apply for Pennsylvania certification as out-of-state graduates of a teacher preparation program.

At the end of this program, teachers are able to:

1. Understand the central concepts, tools of inquiry, and structures of the discipline he or she teaches and can create learning experiences that make these aspects of subject matter meaningful for students.
2. Understand how children learn and develop, and can provide learning opportunities that support a child's intellectual, social, and personal development.
3. Understand and use a variety of instructional strategies to encourage student development of critical-thinking, problem-solving, and performance skills.
4. Plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals.
5. Understand and use formal and informal assessment strategies to evaluate and ensure the continuous intellectual, social, and physical development of the learner.
6. Be a reflective practitioner who continually evaluates the effects of his or her choices and actions on others (students, parents, and other professionals in the learning community) and who actively seeks out opportunities to grow professionally.
7. Use knowledge of effective verbal, nonverbal, and media communication techniques to foster active inquiry, collaboration, and supportive interaction in the classroom.
8. Foster relationships with school colleagues, parents, and agencies in the larger community to support students' learning and well-being.
9. Understand how students differ in their approaches to learning and creates instructional opportunities that are adapted to diverse learners.
10. Use an understanding of individual and group motivation and behavior to create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

**Specializations**

- Early Childhood Education (Birth–Grade 3)
- Special Education (K–Age 21)

**Completion Requirements**

- 43–46 semester credits
- Core courses (13–18 sem. cr.)
- Specialization courses (18–24 sem. cr.)
- Field experience**: a minimum of 75 hours of classroom-based and virtual experiences in conjunction with coursework; 12–14 weeks of full-time demonstration teaching
- M.A.T. courses
- ePortfolio

**Note:** In addition to Walden's general technical requirements, access to a scanner is required so that candidates can electronically submit signed documents verifying their field experience hours.

**Curriculum**

The teacher preparation program with a Master of Arts in Teaching is offered on a semester system. Each specialization has a planned sequence of courses. An ePortfolio based on the program's identified outcomes must be submitted and approved during the final course of the program.

**Course Sequence**

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Teacher Preparation Program With a Master of Arts in Teaching (M.A.T.) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
Early Childhood Education (Birth–Grade 3)

The teacher preparation program with a Master of Arts in Teaching (M.A.T.) with a specialization in Early Childhood Education (Birth–Grade 3) is a 43-semester-credit program. Courses and field experiences are closely aligned with Minnesota standards for teachers and the initial licensure standards of the National Association for the Education of Young Children (NAEYC).

This specialization provides candidates with an educational foundation based on theoretical and conceptual frameworks and best practices that are widely accepted by experts in the field. Specialization courses address a trajectory of learning and development that begins at birth and extends throughout the early school years. Typical development as well as exceptionalities are emphasized in all coursework and related field experiences. Issues of diversity and cross-cultural communication are also integrated throughout. Pre-service teachers develop content knowledge, planning processes, teaching methodology, classroom management, and adult/child communication strategies through a variety of learning opportunities online and in the field.

Each course in the first three semesters is 5 weeks long, and there are three consecutive courses per semester. In the fourth semester, the three required courses are 5 weeks, 10 weeks, and 14 weeks long; they are taken concurrently. In addition, candidates take two consecutive 8-week courses in the fifth semester (for a total of 43 semester credits). The program is offered in a prescribed online sequence.

Curriculum

Core Courses (13 sem. cr.)

- EDUC 6605 - Teacher as Lifelong Learner and Professional Educator
- EDUC 6606 - Today's Classroom and the Diverse Learner
- EDUC 6607 - Effective Practices: Assessment, Teaching, and Learning
- EDUC 6608 - Classroom Management
- EDUC 6611 - Seminar: Professional Ethics, Communication, and Collaboration: Early Childhood Education

Specialization Courses (18 sem. cr.)

- EDUC 6681 - Early Childhood Education: Past, Present, and Future
- EDUC 6682 - Teaching Reading, P–3
- EDUC 6683 - Developmentally Appropriate Practices for Infants and Toddlers
- EDUC 6684 - Play and Learning for the Preschool Child
- EDUC 6685 - Teaching Mathematics, P–3
- EDUC 6686 - Teaching Across the Content Areas, P–3
Field Experience (6 sem. cr.)

- EDUC 6687 - Demonstration Teaching: Early Childhood Education

Master of Arts in Teaching Courses (6 sem. cr.)

- EDUC 6621 - Educational Research: Foundations
- EDUC 6622 - Educational Research: Practical Applications

* Note: Exact sequence of study may vary, depending on start date.

Note: The teacher preparation program with a Master of Arts in Teaching (MAT) does not offer any courses during the summer that have field experience or demonstration teaching requirements.
Guidebook

Walden University requires that all candidates in its teacher preparation program with a Master of Arts in Teaching (M.A.T.) review the Candidate Guidebook and Field Experience and Demonstration Teaching Handbook to help them understand the guidelines and requirements of the program, including transition points and field experiences.

Candidates can access the Candidate Guidebook and Field Experience and Demonstration Teaching Handbook from their myWalden university portal. Candidates enrolled in the teacher preparation program with a Master of Arts in Teaching (M.A.T.) should refer to the Candidate Guidebook for complete information on the programs and related policies and procedures related to them.

Candidates should refer to the Field Experience and Demonstration Teaching Handbook for detailed information regarding the field experience requirements in the program.

Note on Licensure

Walden is approved by the Minnesota Board of Teaching to offer a program leading to initial licensure in Early Childhood Education. Candidates must pass the required Minnesota Teacher Licensure Exams (MTLEs) before Walden can recommend candidates to the Minnesota Department of Education (MDE) for the license. Candidates are responsible for completing any other Minnesota requirements beyond Walden’s state-approved program and MDE is solely responsible for reviewing applications and issuing licenses.

Individuals interested in an early childhood licensure in states other than Minnesota may qualify by virtue of completing a state-approved teacher preparation program; however, individuals must review their state's regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement.

Special Education (K–Age 21)

The Master of Arts in Teaching (M.A.T.) with a specialization in Special Education (K–Age 21) program is designed for individuals seeking licensure as special educators. This specialization focuses on the learning and development of students of all ages (K–Age 21) with a broad range of exceptionalities, including autism spectrum disorders, developmental cognitive disorders, health disabilities, emotional and behavioral disorders, and learning disabilities. Candidates will develop an in-depth understanding of a variety of learning styles and learn how to apply instructional skills and strategies to assist students with multiple disabilities to develop critical-thinking, problem-solving, and performance skills. The curriculum includes field experiences that provide opportunities to observe expert educators, receive mentoring, and apply what is learned across age levels in primary and secondary settings.

Courses and field experiences for this specialization incorporate standards of the Council for Exceptional Children (CEC) and the Interstate New Teacher Assessment and Support Consortium (InTASC) and are aligned with Minnesota state's special education licensure standards.
During candidates' participation in the M.A.T. Program for Special Education, they may join Walden's Chapter of the Council for Exceptional Children, which is the largest international professional organization dedicated to improving the educational success of individuals with disabilities. A New Teacher Mentor Program is also offered to graduates.

Curriculum

Core Courses (18 sem. cr.)

- EDUC 6605 - Teacher as Lifelong Learner and Professional Educator
- EDUC 6606 - Today's Classroom and the Diverse Learner
- EDUC 6607 - Effective Practices: Assessment, Teaching, and Learning
- EDUC 6608 - Classroom Management
- EDUC 6649 - Seminar for Professional Educators
- EDUC 6688 - Action Research

Specialization Courses (24 sem. cr.)

- EDUC 6627 - Foundations of Literacy
- EDUC 6626 - Foundations of Special Education
- EDUC 6628 - Individualizing Education Programs for Learners With Exceptionalities
- EDUC 6636 - Characteristics of Learners With Exceptionalities
- EDUC 6637 - Literacy Assessment and Intervention to Support Student Learning
- EDUC 6638 - Behavior Management to Support Learners With Exceptionalities
- EDUC 6639 - Instructional Strategies for Learners With Exceptionalities
- EDUC 6209 - Collaboration to Support All Learners

Field Experience (4 sem. cr.)

- EDUC 6648 - Demonstration Teaching

**Note:** The teacher preparation program with a Master of Arts in Teaching (MAT) does not offer any courses during the summer that have field experience or demonstration teaching requirements.

### Guidebook
Walden University requires that all candidates in its teacher preparation program with a Master of Arts in Teaching (M.A.T.) review the *Candidate Guidebook* and *Field Experience and Demonstration Teaching Handbook* to help them understand the guidelines and requirements of the program, including transition points and field experiences.

Candidates can access the *Candidate Guidebook* and *Field Experience and Demonstration Teaching Handbook* from their myWalden university portal. Candidates enrolled in the teacher preparation program with a Master of Arts in Teaching (M.A.T.) should refer to the *Candidate Guidebook* for complete information on the programs and related policies and procedures related to them. Candidates should refer to the *Field Experience and Demonstration Teaching Handbook* for detailed information regarding the field experience requirements in the program.

### Note on Licensure
*Walden is approved by the Minnesota Board of Teaching to offer a program leading to initial licensure in Special Education: Academic and Behavioral Strategist.* Candidates must pass the required Minnesota Teacher Licensure Exams (MTLEs) before Walden can recommend candidates to the Minnesota Department of Education (MDE) for the license. Candidates are responsible for completing any other Minnesota requirements beyond Walden's state-approved program and MDE is solely responsible for reviewing applications and issuing licenses.

Individuals interested in a special education licensure in states other than Minnesota may qualify by virtue of completing a state-approved teacher preparation program; however, individuals must review their state’s regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers. The standards for an academic and behavioral strategist cover a wide spectrum of disabilities including, autism spectrum disorders, developmental cognitive disability, emotional or behavioral disorders, other health disorders, and specific learning disabilities; at the moderate level. Other states may refer to this as a cross-categorical, generalist, or mild/moderate license.
Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement.
ENDORSEMENT PROGRAMS

Reading K–12 Endorsement

The Reading K–12 Endorsement program enables licensed teachers to enhance their knowledge and skills in reading and literacy instruction. Through a graduate-level curriculum, educators examine reading research, theories, and practices and explore how and when to use a variety of literary assessments to diagnose reading difficulties. Educators also gain the ability to design intensive instruction for students with reading challenges and create highly engaging learning environments that promote literacy development in all learners. Coursework encourages the use of a wide range of text structures and genres, including high-quality literary and informational text, digital text, and electronic resources, and assistive technologies based on the needs and interests of students as well as literacy learning goals and objectives.

The Reading K–12 Endorsement program also includes field experience activities, providing ongoing opportunities for educators to apply their new-found knowledge in real-world elementary, middle, and secondary school settings.

M.S. in Education With a Specialization in Reading and Literacy With a Reading K–12 Endorsement

The M.S. in Education with a specialization in Reading and Literacy with a Reading K–12 Endorsement enables licensed teachers to build their skills in reading and literacy instruction. Through an exploration of reading research, theories, and practices, educators gain an understanding of how to diagnose reading difficulties through various assessments and plan effective reading instruction for all students, including those who struggle with reading and writing, those from diverse cultural and linguistic backgrounds, and those who are academically gifted. Field experience opportunities allow participants to apply their knowledge in elementary, middle, and secondary classrooms.

Learning Outcomes

At the end of this program, educator professionals can show their abilities in the following areas:

1. **Literacy Development**: Apply reading and writing developmental stages and processes that impact literacy development in order to support student development.

2. **Diverse Literacy Learners**: Create a positive and motivational literate environment that contributes to the success of all learners.

3. **Literacy Instructional Strategies**: Apply a variety of instructional methods and strategies in order to encourage student skill development.
4. **Literacy Assessment and Planning**: Use formal and informal assessment strategies to determine student literacy needs and develop curriculum and instruction to meet those needs.

5. **Literacy Reflective Practice and Professional Growth**: Demonstrate the ability to reflect on choices and actions, and seek out opportunities to grow professionally.

6. **Literacy Leadership and Collaboration**: Collaborate with teachers, parents, staff, and others to implement literacy-related initiatives and data-driven decision making.

**Program Requirements**

- Reading K–12 Endorsement (19 sem. cr.)
- M.S. in Education with a specialization in Reading and Literacy with a Reading K–12 Endorsement (31 sem. cr.)

**Curriculum**

**Courses (19 sem. cr.)**

- EDUC 6631 - *Foundations of Reading: Theory, Research, and Practice*
- EDUC 6632 - *Assessment and Instruction to Promote Literacy Development*
- EDUC 6716 - *Clinical Experience 1*
- EDUC 6633 - *Reading, Writing, and Critical Thinking in Content Disciplines*
- EDUC 6717 - *Clinical Experience 2*
- EDUC 6634 - *Assessment and Intervention for Students With Reading Difficulties*
- EDUC 6718 - *Clinical Experience 3*
- EDUC 6689 - *Guiding and Supporting School Literacy Environments*
- EDUC 6719 - *Clinical Experience 4*

**Optional M.S. in Education With a Specialization in Reading and Literacy Courses (12 sem. cr.)**

- EDUC 6640 - *Designing Curriculum, Instruction, and Assessment*
- EDUC 6650 - *Enhancing Learning Through Linguistic and Cultural Diversity*
- EDUC 6733 - *Action Research for Educators*
- EDUC 6657 - *Creating an Effective Classroom Learning Environment*

Guidebook

Walden University requires that all participants in its reading K–12 endorsement program review the Candidate Guidebook and the Field Experience and Clinical Practicum Handbook to help them understand the guidelines and requirements of the program, including transition points, state endorsement, and field experiences.

Participants can access the Candidate Guidebook and the Field Experience and Clinical Practicum Handbook from their myWalden university portal. Participants enrolled in any of the reading K–12 endorsement programs should refer to the Candidate Guidebook for complete information on the programs and the policies and procedures related to them. Candidates should refer to the Field Experience and Clinical Practicum Handbook for detailed information regarding the field experience requirements in the program.

Note on Licensure

Walden is approved by the Minnesota Board of Teaching to offer a program leading to the K–12 reading endorsement. Candidates must pass the required Minnesota Teacher Licensure Exam (MTLE) before Walden can recommend candidates to the Minnesota Department of Education (MDE) for the reading endorsement. The MTLE is offered exclusively in the United States. MDE is solely responsible for reviewing applications and issuing endorsements and candidates are responsible for completing any other Minnesota requirements beyond completion of Walden’s state-approved program.

Individuals interested in a reading endorsement in states other than Minnesota may qualify for the endorsement by virtue of completing a state-approved endorsement program; however, individuals must review their state’s regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers. In most cases, candidates do not need to qualify for the Minnesota endorsement. In the case where candidates are required to obtain the Minnesota endorsement before applying to...
their state, their current (initial) teaching license must be deemed equivalent to a comparable Minnesota initial license before the endorsement will be granted. This program is not approved for endorsement as a reading leader, reading specialist, etc.

Individuals enrolling internationally must be supervised by a teacher with a valid state teaching license, and must check that the program is accepted by their state for an endorsement to their current license.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Reading K–12 Endorsement program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
GRADUATE CERTIFICATES

Graduate Certificate in Adult Learning

The Adult Learning certificate can help students meet the increasing demand for qualified adult educators and training professionals. Students will explore a broad range of teaching techniques designed to help adult learners in areas that include adult literacy, vocational education, community programs, employee training, and self-enrichment. Credits earned from this certificate program may be applied toward Walden's M.S. in Adult Learning program.

Certificate Requirements

- 12 total semester credit hours

Curriculum

Certificate Courses (12 sem. cr.)

- EDUC 6171 - Theories and Frameworks for Adult Learning
- EDUC 6172 - Cultural Diversity and Motivation
- EDUC 6174 - Developing a Repertoire of Effective Teaching Practices
- EDUC 6175 - Planning, Assessing, and Improving Adult Learning

Graduate Certificate in College Teaching and Learning

The Graduate Certificate in College Teaching and Learning can help students gain the skills they need to meet the increasing demand for qualified college instructors. Students will discover the major steps in the teaching and learning process: planning, developing, and facilitating learning experiences and assessing outcomes. Online learning environments and student requirements in the virtual classroom will be explored. Credits earned in this certificate program may be applied toward Walden’s M.S. in Higher Education with a specialization in College Teaching and Learning.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Graduate Certificate in College Teaching and Learning program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Note on Licensure

Walden's Graduate Certificate in College Teaching and Learning focuses on the development of scholarly teaching knowledge and skills. It does not necessarily provide individuals with all of
the course credits required to teach in a particular academic discipline; therefore, additional subject-specific graduate credits may be needed. Individuals are responsible for ensuring that they meet the credentialing requirements of the institution where they want to teach. Walden makes no representation or guarantee that completion of this coursework will permit an individual to teach at a higher education institution.

**Graduate Certificate in Curriculum, Instruction, and Assessment**

This certificate is designed to give teachers the tools to plan, develop, and implement quality units and lessons with an emphasis on the important interrelationships between curriculum, instruction, and assessment. It sets the stage for refocusing and energizing planning so teachers' classrooms can become a place where students are motivated and engaged in meaningful learning.

This certificate also explores how teachers can be effective leaders of learning in their classrooms. Teachers learn the latest findings in neuroscience and apply a variety of teaching strategies that promote and foster real learning and achievement.

Graduate Certificate in Developmental Education

Combining theoretical background and best practices in both adult learning and developmental education, the Graduate Certificate in Developmental Education prepares educators to manage adult developmental education programs in a variety of settings, including community colleges, 4-year institutions, and continuing and community education organizations. Educators examine research-based adult learning strategies; theoretical, political, and economic issues surrounding developmental education; organizational approaches to providing developmental education programs; best practices in designing curriculum and integrating technology; and intake, teaching, assessment, and collaboration strategies. Credits earned from this certificate program may be applied toward Walden’s M.S. in Adult Learning with a specialization in Developmental Education.

### Graduate Certificate in Early Childhood Administration, Management, and Leadership

The Early Childhood Administration, Management, and Leadership certificate program is designed to prepare educators to effectively manage child care centers or administer programs for young children. Learners explore the essential components of effective early childhood programs and develop the practical personnel and business management skills they need to lead those programs. Coursework covers effective program practices; budget and resource allocation; and personnel recruitment, evaluation, and management. Learners also consider and are provided tools to respectfully address the impact of diversity, culture, and equity issues on early childhood development. Learners can apply the credits they earn in this certificate program toward Walden’s M.S. in Early Childhood Studies with a specialization in Administration, Management, and Leadership.

Graduate Certificate in Early Childhood Advocacy and Public Policy

Through the Graduate Certificate in Early Childhood Advocacy and Public Policy, educators are furnished the background knowledge and specialized skills they need to shape public policy and advocate effectively on behalf of young children, their families, and the field of early childhood studies. Learners explore current research and theories on child development; the essential components of effective early childhood programs; and local, state, national, and international perspectives on early childhood infrastructures. Coursework also examines practical strategies for effecting policy change and public opinion, including grant writing, coalition building, communications planning, and policy development. Learners can apply the credits they earn in this certificate program toward Walden’s M.S. in Early Childhood Studies with a specialization in Early Childhood Public Policy and Advocacy.

Graduate Certificate in Elementary Reading and Literacy

The Graduate Certificate in Elementary Reading and Literacy prepares educators to provide developmentally appropriate and culturally responsive literacy instruction to PreK–6 students of diverse abilities and backgrounds. Courses examine assessment methods, resources, and instructional strategies required to support beginning PreK–3 readers and developing readers in grades 4–6 by using the five pillars of reading as an organizational framework (phonemic awareness, phonics, fluency, vocabulary, and comprehension). To support English-language learners (ELLs), educators examine the second-language acquisition process, learn to assess literacy proficiency, and select appropriate instruction materials. Educators learn to assess progress and differentiate instruction for both struggling and gifted readers. Effective collaboration skills are emphasized throughout the coursework. Credits earned from this certificate program may be applied toward Walden’s M.S. in Education with a specialization in Elementary Reading and Literacy (PreK–6).

Graduate Certificate in Engaging Culturally Diverse Learners

Today's classrooms serve students and families of great diversity. So it is essential that teachers develop self-awareness and knowledge with regard to the complex influences of culture, language, and life experiences and explore the nature of diversity in today's society and in today's schools.

The courses in this certificate program offer teachers opportunities to explore current theories, research, and effective practices related to student diversity. Teachers study ways to meet student needs through models such as the Universal Design by Learning (UDL) and Differentiated Instruction (DI) as well as how to integrate technology to customize instruction. Teachers also
have hands-on experiences in building a repertoire of research-based strategies for diverse learning environments. The goal of the certificate is for teachers to develop an approach that is appropriate for their students.

**Graduate Certificate in Enrollment Management and Institutional Marketing**

The Certificate in Enrollment Management and Institutional Marketing can help educators explore the latest techniques to attract and retain students in accordance with their institution’s mission. Educators develop comprehensive strategies and utilize a range of communication and marketing tools to promote their institution and reach students. Credits earned in this certificate
program may be applied toward Walden’s M.S. in Higher Education with a specialization in Enrollment Management and Institutional Marketing.

Graduate Certificate in Higher Education Leadership for Student Success

The Graduate Certificate in Higher Education Leadership for Student Success is intended to prepare educators to develop and lead higher education programs and services that can improve outcomes for an increasingly diverse student population. Learners examine the history and
structure of the U.S. higher education system, as well as factors affecting student success, engagement, and retention. Coursework explores fundamental principles of adult learning, best practices for student success, methodologies for meeting the needs of underprepared and first-generation higher education students, and strategies for leading the institutional changes necessary to improve student outcomes. This program is designed to prepare leaders who can help higher education institutions meet their students’ needs more effectively and cost-efficiently. Learners can apply the credits they earn in this certificate program toward Walden’s M.S. in Higher Education with a specialization in Leadership for Student Success.

Graduate Certificate in Integrating Technology in the Classroom

Educators must stay apprised of the latest technologies that support teaching and learning. This certificate provides teachers with the 21st-century knowledge, strategies, and skills to create effective and motivating learning environments, while actively engaging today's technologically savvy students.

The courses in the certificate provide hands-on, practical opportunities to create learner-centered classrooms using the latest digital technologies. Teachers study ways to meet the needs of diverse learners by incorporating new technologies into instruction across grade levels and content areas.

Certificate Requirements

**Graduate Certificate in Mathematics 5-8**

This five-course certificate is designed to expand the middle school mathematics teacher's repertoire of instructional strategies and resources. Using the Common Core State Standards and the National Council of Teachers of Mathematics content and process standards as a framework, students in these courses explore key topics in a well-balanced middle school program, including number systems and operations; geometric thinking and measurement; algebraic reasoning, functions, and equations; and data, probability, and statistical reasoning. The emphases of the program are the proportional reasoning and algebraic thinking skills critical to student success in high school mathematics as well as methods for assessing mathematics skills and knowledge, addressing misconceptions, and engaging students through mathematical modeling and multiple representations.

**Certificate Requirements**

- 15 total semester credit hours

**Curriculum (15 sem. cr.)**

Graduate Certificate in Mathematics K-6

This five-course certificate is designed for K–6 teachers who wish to deepen their own mathematical expertise as they expand their repertoire of instructional strategies and resources. Using the Common Core State Standards and the National Council of Teachers of Mathematics content and process standards as a framework, the focus of these courses is on preparing teachers to assess K–6 students' existing mathematical knowledge and skills, plan interventions, and engage students. Course topics include practical strategies for teaching the base ten number system and operations; measurement, data, and geometric thinking; and rational numbers and proportional reasoning.

Certificate Requirements

- 15 total semester credit hours

Curriculum

Graduate Certificate in Online Teaching for Adult Educators

The Graduate Certificate in Online Teaching for Adult Educators prepares educators to design and deliver online courses and programs geared to adult learners. Grounded in adult learning theory, courses examine how to leverage new technologies to enhance the adult learning process; analyze, select, and design the online instructional strategies most effective for adult learners; integrate course management tools and multimedia technologies into synchronous and asynchronous environments; and assess student learning in those environments. Credits earned from this certificate program may be applied toward Walden’s M.S. in Adult Learning with a specialization in Online Teaching.

**Graduate Certificate in Science, Grades K–8**
The Graduate Certificate in Science, Grades K–8 strengthens educators' understanding of key science concepts and prepares them to transfer that knowledge to the K–8 classroom. Educators explore the nature and history of science, environmental science, physical phenomena, ecology, and earth science. Throughout these courses, educators engage actively in the scientific process, learning how to apply the tools of scientific inquiry, discovery, and hypothesis to deepen their own understanding and create engaging K–8 learning experiences. Educators consider emerging trends and issues in science and science education, including genetic engineering, biotechnologies, climate change, and the demand for increased science, technology, engineering, and mathematics (STEM) instruction. Credits earned from this certificate program may be applied toward Walden's M.S. in Education with a specialization in Science (Grades K–8).

Graduate Certificate in Special Education

The Graduate Certificate in Special Education prepares educators to develop effective literacy and behavioral interventions, differentiate instruction, and collaborate successfully to support diverse special needs students. Course topics include: research-based approaches to monitoring progress and designing and delivering standards-based instruction in the content areas; methods for identifying reading and writing disabilities and devising appropriate interventions; and advanced behavior assessment, management, and intervention practices. Courses emphasize the importance of professional collaboration in serving special needs students. Credits earned from this certificate program may be applied toward Walden’s M.S. in Education with a specialization in Special Education (Non-Licensure) (Grades K–12).

Graduate Certificate in Teacher Leadership

This certificate helps teachers establish leadership qualities and build upon existing expertise while renewing excitement about teaching. The courses address key challenges, such as the changing educational environment, parent involvement, and raising student achievement. Teachers study ways to lead with confidence while leveraging the latest research to guide decisions and mentor others throughout the learning community.

**Graduate Certificate in Teaching Adults English as a Second Language**

Educators and professionals in varied disciplines and settings gain strategies to promote successful instruction of adults who are learning English as a second language (ESL). Coursework explores adult learning theory, concepts in second language acquisition, and established ESL instruction techniques such as the communicative language teaching (CLT) approach. Students examine basic approaches and best practices for planning lessons, designing assessments, evaluating adult ESL learners, and creating effective, culturally respectful learning environments. Techniques apply to diverse settings including those where instructors and students do not share a common language. Credits earned from this certificate program may be applied toward Walden’s M.S. in Adult Learning with a specialization in Teaching Adults English as a Second Language.

Graduate Certificate in Teaching Adults in the Early Childhood Field

The Graduate Certificate in Teaching Adults in the Early Childhood Field endeavors to prepare educators to use their expertise in early childhood education and development to teach adults who work in a variety of roles, including higher education faculty members, community trainers, coaches, and mentors. Coursework combines the study of adult learning theory and instructional strategies with an examination of the latest child development theories, trends, and effective program practices. Learners can apply the credits they earn in this certificate program toward Walden’s M.S. in Early Childhood Studies with a specialization in Teaching Adults in the Early Childhood Field.

Graduate Certificate in Teaching and Diversity in Early Childhood Education

The Graduate Certificate in Teaching and Diversity in Early Childhood Education seeks to prepare educators to understand and address the role that diversity—cultural, socioeconomic, and otherwise—plays in child development and learning. Educators examine the types and stages of early childhood development with a focus on the role of cultural and linguistic diversity; essential components of effective early childhood programs; and the impact of access, equity, and social justice on child development and early childhood programming. Educators also study approaches to meeting the needs of English language learners, children on the autism spectrum, and children with developmental delays. Coursework explores practical strategies for planning curricula, teaching and assessing young children, and referring children to appropriate resources. Learners can apply the credits they earn in this certificate program toward Walden’s M.S. in Early Childhood Studies with a specialization in Teaching and Diversity in Early Childhood Education.

**Graduate Certificate in Teaching English Language Learners**

This four-course, graduate certificate program provides effective strategies for: teaching English as a Second Language (ESL); making content accessible to English Language Learners (ELLs); and creating collaborative, culturally responsive learning environments. Coursework explores language acquisition theory and research as well as language-learning programs such as dual language immersion, transitional bilingual education, and structured English immersion. Participants learn practical methods for integrating content and literacy objectives to help K–12 students master both subject matter and English listening, speaking, reading, and writing skills. Courses also introduce a variety of assessment tools and interpretative techniques for evaluating language proficiency and guiding instructional approaches.

Graduate Certificate in Teaching K–12 Students Online

This certificate prepares teachers to design and deliver online instruction that meets the diverse needs of learners today. Through the courses in this certificate, teachers study ways to create learning experiences that interest, engage, and motivate students. Teachers will be able to accurately assess the progress of learners, while also creating a sense of community where all interactions are meaningful, collaborative, safe, and ethical.

POST-BACCALAUREATE CERTIFICATE

Post-Baccalaureate Certificate in Instructional Design and Technology

Walden University offers a four-course certificate program in Instructional Design and Technology with specializations in Instructional Design, Online Learning, and Training and Performance Improvement. Depending on the specialization chosen, this certificate will demonstrate to current or potential employers that students have mastered the foundational concepts and principles related to instructional design, distance learning, learning theories, and program effectiveness.

Students who successfully complete the certificate can apply the certificate credits toward Walden's M.S. in Instructional Design and Technology degree program.

Specializations

- Instructional Design
- Online Learning
- Training and Performance Improvement

Certificate Requirements

- 12 total semester credit hours

Additional Technology Requirements

Note: In addition to Walden's general technical requirements, this program has additional technology requirements:

- Windows Vista or Mac OS X
- Free, downloadable software programs that may be required in order to complete the course and program requirements

Program Data
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Post-Baccalaureate Certificate in Instructional Design and Technology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Instructional Design
The specialization in Instructional Design provides students with foundational concepts and principles related to instructional design, multimedia development, learning theories, and instruction. This specialization is for students who are interested in finding out more about this field and who want to demonstrate to current or potential employers their knowledge in this field.

Curriculum
Note: Students take all courses in the sequence listed.

Certificate Courses (12 cr.)

- EDUC 6115 - Learning Theories and Instruction
- EIDT 6100 - Instructional Design
- EIDT 6110 - Advanced Instructional Design
- EIDT 6120 - Multimedia Design and Development

Online Learning
In the Online Learning certificate specialization, students can learn to produce and deliver courses from a leader in online content development and instructional delivery. Students leverage Walden's 40 years of experience in the field as they gain effective strategies for engaging and teaching distance learners and for assessing student learning outcomes in online environments.

Curriculum
Note: Students take all courses in the sequence listed.

Certificate Courses (12 cr.)

- EIDT 6100 - Instructional Design
- EDUC 6135 - Distance Learning
- EIDT 6510 - Online Instructional Strategies
- EIDT 6511 - Assessments in Online Environments
Training and Performance Improvement

The Training and Performance Improvement certificate specialization focuses on managing and delivering training programs and improving workplace performance through quality instruction. Students explore the latest technologies to support training, and they learn to identify performance gaps, conduct needs assessments, and evaluate program effectiveness.

Curriculum

Note: Students take all courses in the sequence listed.

Certificate Courses (12 cr.)

- EIDT 6100 - Instructional Design
- EIDT 6130 - Program Evaluation
- EIDT 6500 - Performance Improvement
- EIDT 6501 - Training and Development
CANTER SELF-PACED COURSES

The leader in education programs for working professionals, The Richard W. Riley College of Education and Leadership focuses on helping educators develop as leaders in their learning communities. The college offers a diverse portfolio of individual online and distance-learning courses for adult learners who are seeking to meet their immediate educational needs.

The following courses are self paced and offered in print & DVD and Online. The self-paced courses are provided through a unique partnership with Canter, a pioneer in the field of teacher professional development.

Self-Paced Courses

- EDUC 6901 - The High-Performing Teacher
- EDUC 6902 - Learning Differences: Effective Teaching With Learning Styles and Multiple Intelligences
- EDUC 6903 - Building Your Repertoire of Teaching Strategies
- EDUC 6904 - Helping Students Become Self-Directed Learners
- EDUC 6908 - Improving Reading in the Content Areas
- EDUC 6909 - Motivating Today's Learner
- EDUC 6911 - Math: Teaching for Understanding
- EDUC 6913 - Supporting the Struggling Reader
- EDUC 6914 - Designing Curriculum and Instruction With the Learner in Mind
- EDUC 6915 - Helping Struggling Readers With Content Area Learning
- EDUC 6916 - How to Get Parents on Your Side
- EDUC 6917 - Succeeding With Difficult Students
- EDUC 6919 - Teaching Students to Get Along
- EDUC 6929 - Including Students With Special Needs: Curriculum, Instruction, and Assessment
- EDUC 6930 - Classroom Management to Promote Student Learning
- EDUC 6935T - The Adolescent Brain
- EDUC 6936 - Introduction to Teacher Leadership
- EDUC 6937 - Meeting the Needs of Culturally and Linguistically Diverse Learners
- EDUC 6938 - Teacher Leadership: Mentoring, Coaching, and Collaboration
- EDUC 6939 - Teacher Leadership for Learning and Teaching
- EDUC 6940T - Teacher Leadership in Professional Learning Communities
- EDUC 6941T - Differentiating Instruction for Student Success
- EDUC 6942T - Returning Creativity to the Classroom
- EDUC 6943T - Using Technology to Enhance Content Area Learning
- EDUC 6944T - Technology and 21st-Century Literacy Skills
- EDUC 6945T - The Effective Reading Teacher
- EDUC 6946T - Teaching Beginning Readers
- EDUC 6947T - Teaching Developing Readers
- EDUC 6948T - Using Technology to Engage Diverse Learners
• EDUC 6949T - Supporting Students With Learning Disabilities: Strategies for Success
• EDUC 6951T - Motivating Students to Read
• EDUC 6952T - Assertive Discipline and Beyond
• EDUC 6954T - Differentiation in the Mathematics Classroom
• EDUC 6955T - Writing Strategies for Increasing Achievement in Any Content Area
• EDUC 6961 - Assessment to Enhance Teaching and Learning
• EDUC 6964T - Advanced Instructional Strategies for Special Educators
• EDUC 6965T - Using Data to Guide School Improvement
MASTER’S DEGREE PROGRAMS

Educational Leadership and Administration (International – Non-Licensure)

This specialization prepares educators living outside the U.S. to become school leaders in diverse year 1–12 settings. Grounded in research and best practices, this scholar-practitioner program helps international educators develop the professional skills and dispositions needed to lead curriculum initiatives, improve instructional effectiveness, and positively impact year 1–12 student outcomes. Courses explore effective communication and leadership practices; school governance and management; budgeting and resource management; and human resource practices for hiring, evaluating, and motivating qualified staff. The program teaches strategies on how to build effective curriculum and lead; meet diverse student needs; and create positive, safe learning environments. Educators set goals via an individual learning plan, then document accomplishments and classroom observations through an online portfolio.

Learning Outcomes

At the end of this program, graduates will be able to:

1. Design and lead initiatives that evaluate and improve instructional programs.
2. Develop, implement, and manage ongoing evaluation and professional development in teaching and learning.
3. Create strategic plans using a visioning process to be shared and supported by stakeholders.
4. Use data to effectively manage the organization and resources for a safe, secure, and effective learning environment.
5. Communicate and collaborate with external publics to address community interests and diverse needs.
6. Articulate the school's role within the broader political, social, economic, legal, and cultural context and respond effectively to changes that impact the school community.
7. Articulate democratic value systems, ethics, and moral leadership.

Note on Licensure

The international non-licensure track of the M.S. in Educational Leadership and Administration program is not approved in the United States or elsewhere to lead to certification in administration (e.g., principal, superintendent). International candidates are responsible for knowing and understanding the requirements of the country in which they wish to work to determine if the M.S. in Educational Leadership and Administration program meets their professional and academic goals. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain certification or employment in any particular field or location.
M.S. in Adult Learning

The M.S. in Adult Learning program provides students with the knowledge and skills required to design, deliver, and manage adult learning in a variety of environments. The M.S. in Adult Learning program has been created specifically to develop the competencies of adult educators and empower them to apply knowledge to practice. A dynamic combination of theory, research, and practical approaches, including an individualized capstone project, has been designed to improve educator effectiveness and enhance student learning outcomes.

Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Demonstrate an awareness of and sensitivity to issues of diversity and multiculturalism as they impact motivation and social change in adult education.
2. Critically examine issues, trends, and current research in the field of adult learning.
3. Utilize a repertoire of practices for use in a variety of adult learning contexts.
4. Create transformative learning experiences that meet the needs of adult learners across the lifespan.
5. Evaluate and apply best practices in the use of technology in adult education.
6. Exhibit an understanding of the organizations and policies that inform practice in adult learning settings.

Specializations

- General Program
- Developmental Education
- Online Teaching
- Teaching Adults English as a Second Language
- Training and Performance Improvement

Course Sequence

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Adult Learning program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
Degree Requirements

- 30–36 total semester credit hours, depending on the specialization
- Foundation course (3 sem. cr.)
- Core courses (21–24 sem. cr. depending on specialization)
- Specialization courses (6–9 sem. cr. depending on specialization)
- Capstone course (3 sem. cr.)
- Minimum 5–6 semesters’ enrollment, depending on the specialization

General Program

Students prepare to become effective adult educators in a range of learning settings. Through the General Program, students gain an overview of adult learning theories, research, and best practices that can be applied to create transformative learning experiences for adults. They broaden their understanding of adult development, including how diversity and multiculturalism affect motivation in the adult education field.

Online Teaching

Online learning is an important component of the adult education landscape in both traditional and nontraditional settings. Students explore how to design and deliver effective online courses and programs. They learn to integrate online teaching strategies with course management and multimedia tools. Students develop assessment strategies to measure adult learning outcomes in online environments. They leverage Walden's more than 40 years of experience in distance learning as they incorporate the latest technologies to support adults with diverse learning styles.

Teaching Adults English as a Second Language

Education professionals gain the tools and strategies they need to help meet the growing demand for English language instructors. They explore essential theories and concepts of second language acquisition. Educators examine basic principles and best practices in the field as they prepare to plan lessons, design assessments, and conduct evaluations for adult learners. This specialization will help educators create effective environments for adults learning English as a second language.

**Training and Performance Improvement**

Adult students learn in a variety of environments beyond the traditional classroom, including the corporate setting. This specialization prepares educators to manage and deliver training programs that can help adults improve their workplace performance. Education professionals support the
growth and development of the workforce through the design of quality instructional materials and systems that meet the needs and goals of an organization. They explore technologies that assist in planning, presenting, and managing instructor-led and self-directed courses.

M.S. in Early Childhood Studies

In this program, students gain the knowledge and leadership skills necessary for emerging roles in the field. The program allows student to deepen their understanding of child development and learning, and effective programs and practices, as well as explore current issues and trends. Students will learn to become skillful communicators, team members, relationship-builders, and collaborators with families, colleagues, and agencies. Knowledge gained regarding equity and inclusion will help students to become advocates for social change in the field of early childhood.

Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Demonstrate deep knowledge of child development, learning, and effective programs and practices.
2. Critically examine issues, trends, and current research.
3. Understand foundational theories of research and practice evidence-based research and decision making.
4. Have deep knowledge of issues related to equity and inclusion; address inequities and advocate for social change.
5. Be skillful communicators, team members, relationship-builders, and collaborators with family members, colleagues, and agencies related to the field of early childhood.
6. Be critical and self-reflective of their own values, beliefs, and biases and use this understanding to improve their own work.

Specializations

- Administration, Management, and Leadership
- Early Childhood Public Policy and Advocacy
- Teaching Adults in the Early Childhood Field
- Teaching and Diversity in Early Childhood Education

Degree Requirements

- 30–33 total semester credits, depending on specialization
- Foundation course (3 sem. cr.)
- Core courses (18 sem. cr.)
- Specialization courses (6–9 sem. cr., depending on specialization)
- Capstone (3 sem. cr.)
Core Curriculum

Foundation Course (3 sem. cr.)

- EDUC 6005 - Foundations: Early Childhood Studies

Core Courses (18 sem. cr.)

- EDUC 6160 - Early Childhood Development
- EDUC 6161 - Effective Programs and Practices*
- EDUC 6162 - Issues and Trends in the Early Childhood Field*
- EDUC 6163 - Building Research Competencies*
- EDUC 6164 - Perspectives on Diversity and Equity*
- EDUC 6165 - Communicating and Collaborating in the Early Childhood Field*

Capstone Course (3 sem. cr.)

- EDUC 6990 - Capstone: Practical Application in the Early Childhood Field

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Early Childhood Studies program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Note on Licensure

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading. The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.
Administration, Management, and Leadership

The Administration, Management, and Leadership specialization teaches educators the competencies they need to successfully administer a child care program or operate a child care business. Education professionals develop a strong foundation in child development concepts while building key leadership and business skills. They learn how to develop curriculum and programmatic content at the administrative level. They gain an understanding of health, safety, and other state codes and how to ensure that their center or program is in compliance with those standards. Educators explore strategies for communicating effectively about a center and its programs with parents, families, and the larger community.

Early Childhood Public Policy and Advocacy

The Early Childhood Public Policy and Advocacy specialization allows students to examine the complexities of the infrastructure of the early childhood field from local, state, national, and international perspectives. Students will analyze how policies are formed, the relationship of
policies to politics, and the ways funds are allocated. In addition, students will study grant writing, family and political advocacy, and research practice.

**Teaching Adults in the Early Childhood Field**

Students explore the major theories of adult learning and motivation in order to prepare for a variety of roles in the early childhood field, such as a higher education faculty member, community trainer, technical assistance provider, parent educator, mentor, professional development facilitator, or child development associate trainer. Students will learn how to plan learning experiences, assess and modify instruction, and incorporate technology in instruction geared to adult learners.

Teaching and Diversity in Early Childhood Education

This specialization focuses on advancing students' understanding of the ways diversity affects development and learning in early childhood. Students will study specific special needs as well as the impact of poverty, stress, violence, and trauma on a child's development and well-being. This specialization will teach students the practical strategies and tools required to work with and teach young children. This includes ways to plan and implement curriculum, create caring and respectful environments, and improve developmental and learning outcomes for every child.

2014–2015 Walden University Catalog (September 2014)  Page 105
### M.S. in Education

Walden's fully online M.S. in Education program centers on the strategies that are intended to lead to greater student achievement and teacher success. The program's specializations teach advanced skills that are designed to improve student learning. Each specialization area encourages educators to put their new skills to the test in actual classroom and school settings and to continually challenge the results of teaching and learning.

### Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Treat students equitably, recognizing the individual differences that distinguish one student from another and adjusting their practice based on observation and knowledge of their students' interests, abilities, skills, knowledge, family circumstances, and peer relationships.
2. Create multiple paths to the subjects they teach, through their knowledge of how the subject is created, organized, linked to other disciplines, and applied to real-world settings.
3. Manage and monitor student learning to create, enrich, maintain and alter instructional settings to capture and sustain the interest of their students and to make the most effective use of time.
4. Draw on knowledge of human development, subject matter and instruction, and understanding of students to make principled judgments about sound practice.
5. Contribute to the effectiveness of the school by working collaboratively with families, community, and other professionals on instructional policy, curriculum development and staff development.

### Specializations

- Adolescent Literacy and Learning
• Adolescent Literacy and Technology (Grades 6–12)
• Curriculum, Instruction, and Assessment (Grades K–12)/Accelerated Curriculum, Instruction, and Assessment
• Educational Leadership and Administration (Principal Preparation program)
• Educational Leadership and Administration (International – Non-Licensure)
• Elementary Reading and Literacy (PreK–6)/Accelerated Elementary Reading and Literacy (PreK-6)
• Elementary Reading and Mathematics (Grades K–6)
• Integrating Technology in the Classroom (Grades K–12)
• Mathematics (Grades K-6)
• Mathematics (Grades 5-8)
• Mathematics and Science (Grades K–8)
• Middle Level Education (Grades 5–8)
• Professional Development (Grades P–12)
• Science (Grades K–8)
• Special Education (Non-Licensure*) (Grades K–12)
• Teacher Leadership (Grades K–12)/Accelerated Teacher Leadership Specialization
• Teaching English-Language Learners (Grades K-12)

The Richard W. Riley College of Education and Leadership, in collaboration with Canter & Associates, also provides a series of independent courses for graduate credit. Such courses are available during each of the three semesters throughout the year. Many of these courses may be substituted for courses in master's degree program specializations. A list of courses to be offered can be requested by calling 1-800-669-9011.

**Degree Requirements**

30–36 total semester credit hours, depending on the specialization
- Core courses
- Specialization courses
- ePortfolio
- Minimum 5–6 semesters enrollment, depending on the specialization

Classroom access is strongly recommended for students enrolled in this master's degree program. **Educators who do not have such access must find a student or group of students to work with when asked to apply their new knowledge and reflect on the results. Students without classroom access will not be given alternative assignments.**

**Curriculum**

The M.S. in Education program is offered on a semester system. Each specialization has a planned sequence of courses.

**Course Sequence**
The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Education program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Adolescent Literacy and Learning**

Given the importance of literacy for future success in school and in life, education professionals need the knowledge, skills, and dispositions to help adolescent learners meet the literacy challenges in grades 6 through 12. This specialization prepares educators to effectively foster content area literacy and learning, promote disciplinary literacy, support new literacies and the use of digital technologies, and maximize the potential of all students to be ready for college and career. Coursework focuses on the application of research-based instructional and assessment practices to help all adolescent learners achieve the literacy goals of the Common Core State Standards and other state standards. Education professionals explore the nature of literacy and learning for adolescents and apply evidence-based practices to promote adolescent students' reading, writing, listening, speaking, and learning.

**Learning Outcomes**

At the end of this program, education professionals will be able to:

1. Apply instructional practices to support adolescent reading, writing, listening, and speaking as outlined in Common Core State standards and other state standards.
2. Analyze the nature of literacy and literacy learning in the lives of adolescents.
3. Evaluate the need for disciplinary literacy in the content areas.
4. Implement research-based practices for teaching and assessing literacy (Grades 6–12).
5. Explain research and policy that inform literacy and learning in secondary education.
6. Apply literacy practices that prepare diverse populations of students for college and career.
7. Evaluate the importance of literacy for lifelong learning.
8. Apply professional learning as a scholar-practitioner to effect positive social change in literacy and learning.
9. Evaluate the use of media and digital technologies for literacy and learning.

Note on Licensure

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).
Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions. Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual's responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Adolescent Literacy and Technology (Grades 6–12)

This 30-semester-credit specialization is designed for middle and high school teachers who recognize the importance and value of integrating technology and literacy instruction in order to best facilitate student learning and achievement. In middle and upper grade levels, students must be able to interpret and synthesize information across the fields of math, science, history, social studies, English, and other content areas. Teachers can prepare students for these challenges by employing research- and technology-based strategies to bolster literacy skills that transcend all content areas. Based on standards set forth by the International Society for Technology in Education (ISTE), this specialization helps teachers meet the unique needs of the adolescent learner.

Learning Outcomes

At the end of this program, educator professionals will be able to:
1. Use foundational knowledge to design or implement an integrated, comprehensive, and balanced curriculum.
2. Use appropriate and varied instructional approaches, including those that develop word recognition, language comprehension, strategic knowledge, and reading–writing connections.
3. Use a wide range of texts (e.g., narrative, expository, and poetry) from traditional print, digital, and online resources.
4. Design the physical environment to optimize students' use of traditional print, digital, and online resources in reading and writing instruction.
5. Design a social environment that is low risk and includes choice, motivation, and scaffolded support to optimize students' opportunities for learning to read and write.
6. Use routines to support reading and writing instruction (e.g., time allocation, transitions from one activity to another, discussions, and peer feedback).
7. Use a variety of classroom configurations (i.e., whole class, small group, and individual) to differentiate instruction.
8. Engage students in exploring real-world issues and solving authentic problems using digital tools and resources.
9. Model collaborative knowledge construction by engaging in learning with students, colleagues, and others in face-to-face and virtual environments.
10. Design or adapt relevant learning experiences that incorporate digital tools and resources to promote student learning and creativity.
11. Develop technology-enriched learning environments that enable all students to pursue their individual curiosities and become active participants in setting their own educational goals, managing their own learning, and assessing their own progress.
12. Design or adapt relevant learning experiences that incorporate digital tools and resources to promote student learning and creativity.
13. Demonstrate fluency in technology systems and the transfer of current knowledge to new technologies and situations.
14. Model and facilitate effective use of current and emerging digital tools to locate, analyze, evaluate, and use information resources to support research and learning.
15. Advocate, model, and teach safe, legal, and ethical use of digital information and technology, including respect for copyright, intellectual property, and appropriate documentation of sources.
16. Promote and model digital etiquette and responsible social interactions related to the use of technology and information.

Curriculum

Core Courses (12 sem. cr.)

- EDUC 6610 - Teacher as Professional
- EDUC 6640 - Designing Curriculum, Instruction, and Assessment
- EDUC 6650 - Enhancing Learning Through Linguistic and Cultural Diversity
- EDUC 6733 - Action Research for Educators

Specialization Courses (18 sem. cr.)

- EDUC 6712 - Supporting Information Literacy and Online Inquiry in the Classroom
- EDUC 6713 - Integrating Technology Across the Content Areas
- EDUC 6714 - Reaching and Engaging All Learners Through Technology
- READ 6581 - Reading in the Content Areas, Grades 6–12
- READ 6582 - Writing in the Content Areas, Grades 6–12
- READ 6584 - Supporting Struggling Readers, Grades 6–12

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading. The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

**Curriculum, Instruction, and Assessment (Grades K–12)**

This 30-semester-credit specialization is informed by the Middle Childhood Generalist and Early Adolescent Generalist standards set forth by the National Board for Professional Teaching Standards and various content area professional societies. The alignment of curriculum, assessment, and instruction is a complex task but helps to meet this goal: All children can learn. Instituting standards inherently levels the playing field, suggesting the same achievement goals for all students, regardless of socioeconomic conditions, ethnicity, or learning differences. Specialization content focuses on current thinking about how teachers can best align their curriculum with state and local content standards. Each course is 8 weeks in length, and there are two consecutive courses per semester. The specialization is offered in a prescribed online sequence.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:
1. Draw on knowledge of subject matter and curriculum to make sound decisions about what is important for students to learn within and across the subject areas of the middle childhood and middle grades curriculum.
2. Develop lessons and behaviors that help students learn to respect and appreciate individual and group differences.
3. Use a variety of approaches to help students build knowledge and strengthen understanding.
4. Identify skills gaps and preconceptions students may bring to the subject.

**Curriculum**

**Core Courses (15 sem. cr.)**

New students may also choose to participate in the Accelerated Curriculum, Instruction, and Assessment course sequence.

Note on Licensure

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a PreK–12 principal. It has also been approved in Ohio for leading to building principal licensure (grades preK–6, grades 4–9, and grades 5–12).

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Accelerated Curriculum, Instruction, and Assessment

Walden University now offers an accelerated M.S. in Education specialization in Curriculum, Instruction, and Assessment* that allows students to earn their degrees faster and more cost effectively. In this format, students will:

- Complete four self-directed courses and six non–self-directed courses, all of which are instructor-led.
- Take two self-directed courses concurrently twice in the course of the program.
- Progress in the program with faculty assessing submitted assignments at various intervals throughout each self-directed course and weekly in the non–self-directed courses.

*This accelerated specialization is for new students only.

Curriculum (30 sem. cr.)

- EDUC 6610 - Teacher as Professional
- EDUC 6616 - Meeting the Needs of Culturally and Linguistically Diverse Learners
- EDUC 6619 - Including Students With Special Needs: Curriculum, Instruction, and Assessment
- EDUC 6651 - Teacher Leadership in the Classroom: Increasing Learning and Achievement♦
- EDUC 6657 - Creating an Effective Classroom Learning Environment♦
- EDUC 6730 - Curriculum Design for Learning♦
- EDUC 6731 - Assessment for Student Learning♦
- EDUC 6733 - Action Research for Educators♦
• EDUC 6734 - Differentiating Instruction for Student Success
• EDUC 6735 - Helping Students Become Self-Directed Learners

Note on Licensure

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a P–12 principal.

In addition, some of Walden’s programs in leadership can lead to principal licensure in Texas through a partnership with the Harris County Department of Education. For more information about the Texas Principal Certification Program, please contact Harris County at http://www.hcde-texas.org/default.aspx?name=PrinCert.

Prospective candidates from outside of Minnesota should review their state licensure requirements to ensure that completing a teacher or principal preparation program at Walden will meet eligibility requirements for similar licensure in their states.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.waldenu.edu/educlicensure.

Educational Leadership and Administration (Principal Preparation)

This specialization prepares aspiring educational professionals to become licensed principals and educational leaders in diverse P–12 settings. Grounded in research and best practices, this
Anward-practitioner program integrates coursework with field experiences at the elementary, middle, and high school levels. Courses explore effective communication, collaboration, and leadership practices; public policies and legal issues affecting school governance and management; budgeting and resource management; and human resource practices for hiring, evaluating, and motivating qualified staff. In support of its focus on student outcomes, the specialization also includes specific coursework on leading curriculum initiatives to improve literacy and math skills, using data to strengthen schools, and boosting achievement among English language learners. Participants learn strategies for creating safe schools, resolving conflict, and administering discipline effectively. Field experiences integrate learned skills and concepts in school settings under the mentorship of a licensed and practicing school principal. Principal candidates must complete a total of 240 hours of field experience at the elementary, middle, and high school levels. Candidates will complete 160 of those hours at the candidate's preferred level or level of primary teaching experience, and 40 hours each at the other levels.

**Learning Outcomes**

At the end of this program, graduates will be able to:

1. Design and lead initiatives that evaluate and improve instructional programs.
2. Develop, implement, and manage ongoing evaluation and professional development in teaching and learning.
3. Create strategic plans using a visioning process to be shared and supported by stakeholders.
4. Use data to effectively manage the organization and resources for a safe, secure, and effective learning environment.
5. Communicate and collaborate with external publics to address community interests and diverse needs.
6. Articulate the school’s role within the broader political, social, economic, legal, and cultural context and respond effectively to changes that impact the school community.
7. Model democratic value systems, ethics, and moral leadership.

**Degree Requirements**

- 36 total semester credit hours
- Foundation course (3 sem. credits)
- Core courses (27 sem. credits)
- Field Experience courses (6 sem. credits)

**Curriculum**

**Foundation Course (3 sem. cr.)**

- **EDUC 6002 - Foundations: Educational Leadership and Administration**
Core Courses (27 sem. cr.)

- EDUC 6200 - Teaching and Learning for School Leaders
- EDUC 6201 - Communication and Collaboration for Leaders
- EDUC 6202 - Ensuring Quality Education for Students With Diverse Needs
- EDUC 6203 - Policy and Law in School Organizations
- EDUC 6204 - Using Data to Strengthen Schools
- EDUC 6205 - Budgeting and Allocating Resources
- EDUC 6206 - Creating Positive, Safe, and Effective Learning Environments
- EDUC 6207 - Leading Curriculum Initiatives: Literacy and Math
- EDUC 6208 - Recruiting, Evaluating, and Retaining School Personnel

Field Experience Courses (6 sem. cr.)

- EDUC 6801 - Field Experience
- EDUC 6802 - Field Experience
- EDUC 6803 - Field Experience
- EDUC 6804 - Field Experience
- EDUC 6805 - Field Experience
- EDUC 6806 - Field Experience

Walden University requires that all candidates in its principal preparation program review the Principal Candidate Handbook and Field Experience Handbook to help them understand the guidelines and requirements of the program.

Candidates can access both handbooks from their myWalden university portal. Candidates enrolled in the principal preparation program should refer to the Principal Candidate Handbook for complete information on the program and other university policies and procedures related to the program's specializations. Candidates should refer to the Field Experience Handbook for detailed information regarding the field experience requirements in the program.

Program Data

Walden is committed to providing the information to students about their program. Please find detailed information for the M.S. in Education with a specialization in Educational Leadership and Administration (Principal Preparation program) relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Note on Licensure

Walden University meets the Ohio Board of Regents' standards for graduate programs and the Ohio State Board of Education's standards for Building Level Principal Licenses (grades preK–6, grades 4–9, and grades 5–12). Upon successful completion of this program, Walden can recommend candidates for principal licensure to the state of Ohio. Candidates who complete this program may qualify for principal licensure in many other states; however, individuals must review their state's regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual's responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement.

Elementary Reading and Literacy (PreK–6)

This 30-semester-credit specialization addresses the technology-oriented literacy landscape of the 21st century and provides teachers with the latest research and practical strategies to increase the achievement of all their students, including linguistically, culturally, and academically diverse learners. Based on International Reading Association standards, this specialization provides the knowledge and skills teachers need to confidently manage their classroom literacy programs and to effectively address the complexities of teaching reading and writing in today’s classroom.

Each course is 8 weeks in length, and there are two consecutive courses per semester. The specialization is offered in a prescribed online sequence.

Learning Outcomes

At the end of this program, educator professionals will be able to:
1. Use foundational knowledge to design or implement an integrated, comprehensive, and balanced curriculum.
2. Use appropriate and varied instructional approaches, including those that develop word recognition, language comprehension, strategic knowledge, and reading-writing connections.
3. Use a wide range of texts (e.g., narrative, expository, and poetry) from traditional print, digital, and online resources.
4. Understand various types of assessments and their purposes and strengths and employ them appropriately in their practice.
5. Select, develop, administer, and interpret assessments, both traditional print and electronic, for specific purposes.
6. Use assessment information to plan and evaluate instruction.
7. Communicate assessment results and implications to a variety of audiences.
8. Recognize, understand, and value the forms of diversity that exist in society and their importance in learning to read and write.
9. Use a literacy curriculum and engage in instructional practices that positively impact students' knowledge, beliefs, and engagement with the features of diversity.
10. Develop and implement strategies to advocate for equity.

**Curriculum**

**Core Courses (15 sem. cr.)**

- EDUC 6610 - Teacher as Professional
- EDUC 6640 - Designing Curriculum, Instruction, and Assessment
- EDUC 6650 - Enhancing Learning Through Linguistic and Cultural Diversity
- EDUC 6733 - Action Research for Educators

New students may also choose to participate in the Accelerated Elementary Reading and Literacy (PreK-6) course sequence.

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading. The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [WaldenU.edu/educlicensure](http://WaldenU.edu/educlicensure).

**Accelerated Elementary Reading and Literacy (PreK-6)**

Walden University now offers an accelerated M.S.Ed. specialization in Elementary Reading and Literacy that allows students to earn their degrees faster and more cost effectively. In this format students will:

- Complete five self-directed courses and five non–self-directed courses, all of which are instructor-led.
• Progress in the program with faculty members assessing submitted assignments at various intervals throughout each self-directed course and weekly in the non–self-directed courses.

*This accelerated specialization is for new students only.

Note on Licensure

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a P–12 principal. In addition, some of Walden’s programs in leadership can lead to principal licensure in Texas through a partnership with the Harris County Department of Education. For more information about the Texas Principal Certification Program, please contact Harris County at http://www.hcde-texas.org/default.aspx?name=PrinCert. Prospective candidates from outside of Minnesota should review their state licensure requirements to ensure that completing a teacher or principal preparation program at Walden will meet eligibility requirements for similar licensure in their states.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.waldenu.edu/educlicensure.

Elementary Reading and Mathematics (Grades K–6)

This specialization, designed for elementary school teachers, focuses on effective teaching strategies educators can apply to create lessons and hands-on learning experiences that facilitate reading and math learning. The reading courses in this program reflect the current technology-oriented literacy landscape and provide techniques for maximizing literacy learning and
achievement. The math courses, which provide strategies for helping students meet the Common Core State Standards for Mathematics, emphasize ways to assess students’ math skills, address misconceptions, plan interventions, and engage students so they become strong mathematical thinkers and problem-solvers.
Each course is 8 weeks in length, and there are two consecutive courses per semester.

Learning Outcomes

At the end of this program, educator professionals will be able to:
1. Enable all students to understand numbers, ways of representing numbers, relationships among numbers, and number systems.
2. Enable all students to analyze characteristics and properties of two- and three-dimensional geometric shapes and develop mathematical arguments about geometric relationships and/or understand measurable attributes of objects and the units, systems, and processes of measurement.
3. Use foundational knowledge to design or implement an integrated, comprehensive, and balanced curriculum.
4. Use appropriate and varied instructional approaches, including those that develop word recognition, language comprehension, strategic knowledge, and reading–writing connections.
5. Use a wide range of texts (e.g., narrative, expository, and poetry) from traditional print, digital, and online resources.
6. Understand types of assessments and their purposes, strengths, and limitations.
7. Select, develop, administer, and interpret assessments, both traditional print and electronic, for specific purposes.
8. Use assessment information to plan and evaluate instruction.
9. Communicate assessment results and implications to a variety of audiences.

### Note on Licensure

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading. The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/edulicensure](http://www.WaldenU.edu/edulicensure).

### Integrating Technology in the Classroom (Grades K–12)
This 30-semester-credit specialization is informed by the standards of the International Society for Technology in Education. Today's classrooms are increasingly faced with technologically savvy students, and teachers must utilize 21st-century knowledge and strategies to create an effective learning environment. This specialization allows teachers to model various technologies that engage and motivate learners and prepare them to thrive in a global society. Each course is 8 weeks in length, and there are two consecutive courses per semester. The specialization is offered in a prescribed online sequence.

Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Design or adapt relevant learning experiences that incorporate digital tools and resources to promote student learning and creativity.
2. Develop technology-enriched learning environments that enable all students to pursue their individual curiosities and become active participants in setting their own educational goals, managing their own learning, and assessing their own progress.
3. Model and facilitate effective use of current and emerging digital tools to locate, analyze, evaluate, and use information resources to support research and learning.
4. Advocate, model, and teach safe, legal, and ethical use of digital information and technology, including respect for copyright, intellectual property, and appropriate documentation of sources.
5. Promote and model digital etiquette and responsible social interactions related to the use of technology and information.
6. Customize and personalize learning activities to address students' diverse learning styles, working strategies, and abilities using digital tools and resources.
7. Engage students in exploring real-world issues and solving authentic problems using digital tools and resources.
8. Model collaborative knowledge construction by engaging in learning with students, colleagues, and others in face-to-face and virtual environments.
9. Demonstrate fluency in technology systems and the transfer of current knowledge to new technologies and situations.

Curriculum

Core Courses (12 sem. cr.)

- EDUC 6610 - Teacher as Professional
- EDUC 6650 - Enhancing Learning Through Linguistic and Cultural Diversity
- EDUC 6630 - Designing Curriculum, Instruction, and Assessment
- EDUC 6733 - Action Research for Educators

2014–2015 Walden University Catalog (September 2014)
Specialization Courses (18 sem. cr.)

- EDUC 6710 - Understanding the Impact of Technology on Education, Work, and Society
- EDUC 6711 - Bridging Learning Theory, Instruction, and Technology
- EDUC 6712 - Supporting Information Literacy and Online Inquiry in the Classroom
- EDUC 6713 - Integrating Technology Across the Content Areas
- EDUC 6714 - Reaching and Engaging All Learners Through Technology
- EDUC 6715 - New and Emerging Technologies

Note on Licensure

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).
Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual's responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

Literacy and Learning in the Content Areas (Grades 6–12)

This 30-semester-credit specialization is designed to help content area teachers of grades 6–12 improve their students' literacy skills. The specialization features research-based strategies to help teachers prepare struggling students for more complex, abstract, and sophisticated learning in the content area classroom, whether history, science, mathematics, social studies, English, or other content areas.

Each course is 8 weeks in length, and there are two consecutive courses per semester. The specialization is offered in a prescribed online sequence.

Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Use foundational knowledge to design or implement an integrated, comprehensive, and balanced curriculum.
2. Use appropriate and varied instructional approaches, including those that develop word recognition, language comprehension, strategic knowledge, and reading–writing connections.
3. Use a wide range of texts (e.g., narrative, expository, and poetry) from traditional print, digital, and online resources.
4. Design the physical environment to optimize students' use of traditional print, digital, and online resources in reading and writing instruction.
5. Design a social environment that is low risk and includes choice, motivation, and scaffolded support to optimize students' opportunities for learning to read and write.
6. Use routines to support reading and writing instruction (e.g., time allocation, transitions from one activity to another, discussions, and peer feedback).
7. Use a variety of classroom configurations (i.e., whole class, small group, and individual) to differentiate instruction.

Curriculum

Core Courses (18 sem. cr.)

- EDUC 6610 - Teacher as Professional
• EDUC 6640 - Designing Curriculum, Instruction, and Assessment
• EDUC 6650 - Enhancing Learning Through Linguistic and Cultural Diversity
• EDUC 6733 - Action Research for Educators
• EDUC 6657 - Creating an Effective Classroom Learning Environment
• EDUC 6674 - Designing Curriculum, Instruction, and Assessment for Students With Special Needs

Specialization Courses (12 sem. cr.)

• READ 6581 - Reading in the Content Areas, Grades 6–12
• READ 6582 - Writing in the Content Areas, Grades 6–12
• READ 6583 - Technology and Literacy in the Content Areas, Grades 6-12
• READ 6584 - Supporting Struggling Readers, Grades 6–12

Mathematics (Grades K–6)

To lay the foundation for future challenges in secondary mathematics as well as problem-solving in all areas of life, teachers of K–6 mathematics must foster students' ability to use mathematical knowledge to solve authentic real-world problems. The M. S. in Education with a specialization in Mathematics (Grades K–6) degree is designed for elementary school mathematics teachers who want to increase their own mathematical expertise to promote their students' conceptual understandings and abilities. The Common Core State Standards, including the Standards for Mathematical Practice, and the National Council of Teachers of Mathematics' content and process standards are explored as frameworks for understanding and teaching mathematics and for making connections across grade levels. Teachers build upon their repertoire of instructional strategies and resources and focus on ways to assess students' mathematical knowledge and skills, address misconceptions, plan interventions, and engage students through an intensive focus on the base ten number system and its properties and operations. Also addressed in the course are key topics in a well-balanced elementary-grade mathematics program including measurement, data, geometric thinking, understanding rational numbers, and proportional reasoning.

Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Utilize a variety of manipulative materials and emerging technological resources in the classroom to incorporate the National Council of Teachers of Mathematics (NCTM) Process Standards and the Common Core State Standards (CCSS) for Mathematical Practice into their teaching.
2. Apply strategies to help students diagnose misconceptions, solve problems successfully, and develop mathematical habits of mind.
3. Demonstrate an understanding of connections among mathematical concepts and ideas and help students make similar connections.
4. Demonstrate an understanding of the base-ten number system and the mathematical operations of addition, subtraction, multiplication, and division.
5. Evaluate geometry, data, and measurement strategies to guide students' thinking and reasoning about shape, spatial relationships, and measurement, including estimation.
6. Justify the importance of rational numbers, rates of change, and proportional reasoning in their teaching practices in order to promote students' ability to use Mathematical knowledge and skills in real-world problem solving contexts.
Curriculum

Core Courses (15 sem. cr.)

### Mathematics (Grades 5–8)

For elementary and middle school educators interested in focusing on mathematics, this specialization can increase their knowledge and comprehension of mathematics skills and theories. Educators study strategies that address the Common Core State Standards for Mathematics and analyze real-world applications used to improve student achievement in mathematics.

Coursework highlights key lessons covered in middle school mathematics programs, including number systems and operations; geometric thinking and measurement; functions and equations; and data, probability, and statistical reasoning.

Each course is 8 weeks in length, and there are two consecutive courses per semester. The specialization is offered in a prescribed online sequence.

### Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Utilize a variety of manipulative materials, calculators, and other emerging technological resources in the classroom to incorporate the National Council of Teachers of Mathematics (NCTM) Process Standards and the Common Core State Standards (CCSS) for Mathematical Practice into their teaching.
2. Apply strategies to help students diagnose misconceptions, solve problems successfully, and develop mathematical habits of mind.
3. Demonstrate a deep conceptual understanding of number systems and rational numbers.
4. Evaluate geometry and measurement strategies to guide students' thinking and reasoning about shape, spatial relationships, and measurement, including estimation.
5. Demonstrate an understanding of algebraic processes using mathematical modeling, high-level problem solving tasks, and real-world experiences to help students develop similar knowledge and understandings.
6. Justify the importance of proportional reasoning and probability and statistics in their teaching practices in order to promote students' ability to use mathematical knowledge and skills in real-world problem solving contexts.

For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

**Mathematics and Science (Grades K–8)**

This specialization provides elementary and middle school educators with strategies for helping their students meet the Common Core State Standards for Mathematics. Coursework offers opportunities for educators to strengthen their own knowledge and comprehension of math and science. They can apply their new skills to their classroom curricula to help ensure students gain a strong foundation in mathematics and science. By focusing on key K–8 science topics, educators will examine techniques to engage their students with lessons based on the nature and history of science, the scientific tools of inquiry and unifying themes, the physical world, and the future of science. Focus is also placed on math topics such as measurement, data, geometric thinking, understanding rational numbers, and proportional reasoning.

**Learning Outcomes**

At the end of this program, graduates will be able to:

1. Utilize a variety of manipulative materials and emerging technological resources in the classroom to incorporate the National Council of Teachers of Mathematics (NCTM) Process Standards and the Common Core State Standards (CCSS) for Mathematical Practice into their teaching.
2. Apply strategies to help students diagnose misconceptions, solve problems successfully, and develop mathematical habits of mind.
3. Demonstrate an understanding of connections among mathematical concepts and ideas and help students make similar connections.
4. Analyze student use of inquiry methods, observation, collaboration, data collection, and analysis by use of student assessments measuring achievement of concept development from empirical experiences in order to engage students in active learning.
5. Develop and communicate a plan that uses inquiry, technology, and critical analysis for teaching students to distinguish science from nonscience, to understand the evolution and practice of science as a human endeavor, and to envision an integration of science knowledge, pedagogy, history, and philosophy.
Recognize that an informed citizenry, in order to make decisions on contemporary scientific and technological issues, must conduct analyses of the facts of such issues and assess possible actions and outcomes through activities, such as creating informed scientific communities looking at societal implications of the decisions and communicating to the broader population.

2014–2015 Walden University Catalog (September 2014)
**Middle Level Education (Grades 5–8)**

This is a 33-semester-credit specialization that serves classroom educators in the middle grades who are interested in meeting the developmental and educational needs of young adolescents (ages 10–14), usually organized in schools with at least a grade 7. The specialization curriculum is based on the standards for Middle Level Teacher Preparation approved by the Association for Middle Level Education (formerly National Middle School Education) and NCATE, as well as the National Board for Professional Teaching Standards.

This specialization is designed to meet the needs of teachers whose initial preparation was focused on the elementary school or the high school, the primary trend for many years.

Specialization content focuses on the following:
- Research and best practices related to young adolescent development
- Organizational structures for high-success middle grades schools
- The middle grades curriculum continuum
- Pedagogy and assessment for student success
- Middle grades teaching content
- Connecting with families and community

Graduates are prepared to better meet the needs of young adolescents in their own classrooms and to become change agents for the reforms that need to occur in their schools and communities.

Each course is 8 weeks in length, and there are two consecutive courses per semester. The specialization is offered in a prescribed sequence.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:
1. Understand and analyze the major concepts, principles, theories, standards, and research related to their teaching field(s) and apply that knowledge in their practice.
2. Use content knowledge to make interdisciplinary connections.
3. Employs depth and breadth of technologies (e.g., computers, audio, and video presentations).
4. Use teaching and assessment strategies to advance student learning in their teaching fields.
5. Integrate state-of-the-art technologies and literacy skills in their teaching fields.
6. Understand and analyze the major concepts, principles, theories, and research related to effective middle level instruction and assessment and apply a variety of effective strategies to meet the varying abilities, interests, and learning styles of all young adolescents.
7. Understand and analyze the major concepts, principles, theories, and research related to their professional roles in middle level education and apply that knowledge in their practice.
Curriculum

Specialization Courses (27 sem. cr.)

- EDUC 6000 - Success Strategies in the Online Environment
- EDUC 6510 - Young Adolescent Development and Implications in a Global Society
- EDUC 6520 - Organizational Structures for High-Performing Middle Grades Schools
- EDUC 6525 - Concepts of Technology
- EDUC 6530 - The Middle Grades Curriculum Continuum
- EDUC 6540 - Pedagogy and Exemplary Practices for Learning in the Middle Grades
- EDUC 6550 - Assessment and Evaluation as Tools for Student Success
- EDUC 6560 - Middle Level Professional Roles
- EDUC 6565 - Arts Education for the Middle Level Educator

Teaching Fields Content (6 sem. cr.)

Choose two:
- EDUC 6561 - Mathematics for Middle Level Teachers
- EDUC 6562 - Understanding and Teaching the Language Arts
- EDUC 6563 - Science for Middle Level Teachers
- EDUC 6564 - Understanding and Teaching the Social Studies

*Please Note: Candidates admitted prior to September 2010 will follow a revised course sequence.
Note on Licensure

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Professional Development (Grades PreK–12) Specialization

Walden's M.S. in Education with a specialization in Professional Development (Grades PreK–12) helps prepare PreK–12 educators to be highly effective professional developers of teachers. Discover how to plan, design, and deliver professional development opportunities that support students' needs and improve the growth of teachers and their influence on students. Learn to assess the impact of changed practices on student achievement. Practice collaboration, facilitation, coaching, and mentoring skills.

Based on the National Board of Professional Teaching Standards (NBPTS) Core Propositions and the National Staff Development Council (NSDC) Standards, this specialization can prepare students to take an active role in the continuous improvement of teaching and learning.

Learning Outcomes

1. Demonstrate current knowledge and skills with the understanding that educators are lifelong learners who continually add to their knowledge and skills.
2. Analyze educational issues in light of current research and best practice through Walden University's scholar-practitioner model.
3. Reflect on and analyze educational issues in light of current research to inform best practice in PreK–12 classrooms.
4. Demonstrate leadership to build a shared vision for effective teaching and learning that positively impacts all stakeholders within a given educational community.
5. Demonstrate collaborative skills that integrate multiple perspectives in order to create ongoing support for the learning environment.
6. Demonstrate skills to communicate effectively and appropriately in a variety of professional and interpersonal contexts.
7. Act in ways that honor multiple perspectives and affirm the dignity and respect of all individuals internal and external to the learning environment.
8. Demonstrate the skills and professional dispositions that advocate for social change to make a positive impact where the candidate works and lives.
9. Create educational opportunities that are adapted to diverse learners and remove barriers that inhibit learning.
10. Build meaningful relationships to improve student learning by effective planning, communication, use of assessment data, and high-caliber delivery of instruction.
11. Design and develop learning environments that integrate various technology tools and applications, connect technology usage to content areas, and embed technology into assessment strategies.

Curriculum

Core Courses (9 sem. cr.)

- EDUC 6610 - Teacher as Professional
- EDUC 6650 - Enhancing Learning Through Linguistic and Cultural Diversity
- EDUC 6733 - Action Research for Educators

Specialization Courses (21 sem. cr.)

- EDUC 6730 - Curriculum Design for Learning
- EDUC 6731 - Assessment for Student Learning
- EDUC 6732 - Differentiated Instruction
- EDUC 6740 - Qualities of Effective Professional Development
- EDUC 6741 - Designing Professional Development
- EDUC 6742 - Implementing Professional Development
- EDUC 6743 - Evaluating Professional Development

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

**Science (Grades K–8)**

This 30-semester-credit specialization is designed to help teachers improve science content skills and at the same time learn best science teaching practices, such as inquiry and discovery learning. The program is aligned with standards from the National Board for Professional Teaching Standards (NBPTS) for the core educational courses and with standards from the National Science Teachers Association (NSTA) and the National Science Education Standards (NSES), which call for inquiry-based learning. The use of both real and virtual laboratory experiences enables participants to simultaneously learn content and pedagogy.

Participants engage in scientific investigations to extend their understanding of concepts and skills, rethink teaching and assessment strategies, and try ideas in their own classrooms. In essence, the laboratory experiences compose a built-in practicum. The program, using precepts from the American Academy for the Advancement of Science Project 2061, delivers a cutting-edge approach to meet the needs of teachers who are teaching science in grades K-8, allowing them to become competent and comfortable in delivering high quality science instruction to their students. The program integrates aspects of S.T.E.M. (science, technology, engineering, and mathematics) into each science course.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:

1. Convey the major concepts, principles, theories, laws, and interrelationships of biology and supporting fields.
2. Convey the major concepts, principles, theories, laws, and interrelationships of chemistry, physics, and supporting fields.
3. Convey the major concepts, principles, theories, laws, and interrelationships of earth, space science, and supporting fields.
4. Create interdisciplinary perspectives and help students understand why science is important to them.
5. Interrelate and interpret important concepts, ideas, and applications in science and conduct scientific investigations.
6. Engage students successfully in developmentally appropriate inquiries that require them to develop concepts and relationships from their observations, data, and inferences in a scientific manner.

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Special Education (Non-Licensure*) (Grades K–12)

This specialization is designed for special education teachers who want to engage in continuing collegial professional development to meet the diverse educational needs of individuals with disabilities. Informed by the Council for Exceptional Children Advanced Content Role standards and the educational outcomes of the Richard W. Riley College of Education and Leadership at Walden University, this specialization synthesizes the most current research, including neuroscience, assessment, collaboration, and scientifically based interventions, so that teachers can determine best practices for their own classrooms or school districts. Upon completion, participants will contribute to and promote positive social change in the field of special education.

*Walden University's M.S. in Education program with a specialization in Special Education (Non-Licensure) does not lead to certification or licensure in special education. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program, will permit a graduate to obtain state certification or licensure as a special education teacher.

Learning Outcomes

At the end of this program, the educator professional:

1. Advocates for legal and ethical policy that supports high quality education for individuals with exceptional learning needs.
2. Provides leadership through effective communication and use of technology to promote practices and procedures that support and respect all individuals and result in positive, productive work environments.

3. Uses educational research to increase expertise, improve instructional and intervention techniques and materials, and foster an environment that supports instructional improvement.

4. Plans, presents, and evaluates professional development for self and others that focuses on supporting student access to learning through effective teaching strategies, curriculum standards, and assistive technology.

5. Collaborates with multiple stakeholders to improve instructional programs at the school and systems levels and develop procedures to improve management systems.

6. Creates supportive environments that safeguard the legal rights of students and their families.

7. Understands the significance of the role of collaboration and promote understanding, resolve conflicts, and build consensus among both internal and external stakeholders.

**Teacher Leadership (Grades K–12)**

This is a 30-semester-credit specialization designed to help teachers lead with greater confidence and skill in their classroom and throughout their learning community. Courses are infused with key leadership concepts, such as teacher mentorship, coaching, and distributed leadership. This specialization allows teachers to build upon their existing expertise as teaching professionals with dynamic leadership tools to encourage and mentor their colleagues, learn more about their own leadership style and its impact on those around them, and leverage the latest research and theory to guide their decisions and enhance their leadership capabilities. With the strategies and experiences gained from this program, teachers can help address such key challenges as parent involvement and student achievement.

Each course is 8 weeks in length, and there are two consecutive courses per semester. The program is offered in a prescribed online sequence.
Learning Outcomes

At the end of this program, graduates will be able to:

1. Engage students in learning within and across the disciplines and help students understand how the subjects they study can be used to explore important issues in their lives and the world around them.
2. Collaborate with colleagues to improve schools and to advance knowledge and practice in their field.
3. Use a variety of approaches to help students build knowledge and strengthen understanding.
4. Identify skills gaps and preconceptions students may bring to the subject.
5. Use diverse instructional strategies to teach for understanding.
6. Collaborate with others to improve student learning.
7. Collaborate with other professionals on instructional policy, curriculum development, and staff development.

New students may also choose to participate in the Accelerated Teacher Leadership Specialization course sequence.

**Note on Licensure**

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a P–12 principal.

In addition, some of Walden’s programs in leadership can lead to principal licensure in Texas through a partnership with the Harris County Department of Education. For more information about the Texas Principal Certification Program, please contact Harris County at [http://www.hcde-texas.org/default.aspx?name=PrinCert](http://www.hcde-texas.org/default.aspx?name=PrinCert).

Prospective candidates from outside of Minnesota should review their state licensure requirements to ensure that completing a teacher or principal preparation program at Walden will meet eligibility requirements for similar licensure in their states.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

**Accelerated Teacher Leadership Specialization**

Walden University now offers an accelerated M.S. in Education specialization in Teacher Leadership* that allows students to earn their degrees faster and more cost effectively. In this format, students will:

- Complete four self-directed courses and six non–self-directed courses, all of which are instructor-led.
- Take two self-directed courses concurrently twice in the course of the program.
Progress in the program with faculty assessing submitted assignments at various intervals throughout each self-directed course and weekly in the non–self-directed courses.*

*This accelerated specialization is for new students only.

Course Sequence

Teaching English-Language Learners (Grades K–12)
This 30-semester-credit specialization is designed to help educators understand and support the unique needs of the rapidly growing population of English-language learners (ELLs) in K–12 classrooms. Informed by Teachers of English to Speakers of Other Languages (TESOL) standards, this specialization explores the most current research, models, and practical strategies for working effectively with students whose first language is not English. Teachers learn how to adapt their instruction and materials to provide equitable and differentiated learning experiences for ELLs in regular classroom settings. Methods focus on teaching English as a second language as well as teaching content to English-language learners. This specialization also addresses ways in which teachers can enhance collaboration between ELL families and school staff members and better provide assistance and resources to meet the needs of these students.

Learning Outcomes

At the end of this program, graduates will be able to:

1. Demonstrate an understanding of language as a system through the application of concepts, theories, research, and practice to facilitate the acquisition of a primary and a new language.
2. Demonstrate the ability to integrate major concepts, principles, theories, and research related to the role of culture in language development and academic achievement into planning that supports student learning.
3. Demonstrate the ability to implement a variety of standard-based teaching strategies and techniques used to develop and integrate English listening, speaking, reading and writing in both ESOL and Content teaching.
4. Inform their instruction through the use of a variety of standards-based and performance-based language proficiency instruments.
5. Demonstrate the ability to use standards-based and performance-based language proficiency instruments to identify, place, and evaluate the language growth of ESOL students.
6. Demonstrate the ability to collaborate with all staff (including paraprofessionals) as a resource to improve learning for ESOL students.

Curriculum

Core Courses (18 sem. cr.)

Note on Licensure

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

M.S. in Higher Education

The M.S. in Higher Education is designed for individuals who want to make a positive impact on students and staff in 4-year colleges, community colleges, and universities to enhance their
institution's ability to successfully contribute to social equity and positive change. Students will learn to think creatively and critically about the challenges facing higher education institutions and provide expertise in addressing these challenges. Learning activities emphasize the application of research-based best practices from business leadership and management, student learning and support, and systems thinking to maximize institutional effectiveness. Critical issues in higher education policy, administration, emerging technologies, legal and ethical issues, and governance are addressed throughout the program in the context of real-world problems facing today's colleges.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:

1. Apply an understanding of higher education systems, business principles, and student learning in solving institutional problems to drive institutional and student success.
2. Make effective decisions based on critical evaluation of research and data.
3. Articulate the perspectives and interests of multiple stakeholders.
4. Choose leadership approaches appropriate to the culture of the organization.
5. Demonstrate an ability to deploy resources to achieve intended results.
6. Evaluate the potential impact of policies and processes on student outcomes.

**Specializations**

- General Program
- College Teaching and Learning
- Enrollment Management and Institutional Marketing
- Global Higher Education
- Leadership for Student Success
- Online and Distance Learning

**Degree Requirements**

- 30 total semester credits
- Foundation course (3 sem. cr.)
- Core courses (12–27 sem. cr., depending on the specialization)
- Specialization courses (0–12 sem. cr., depending on the specialization)
- Capstone course (3 sem. cr.)
- Minimum 5 semesters enrollment

**Core Curriculum**

*Foundation Course (3 sem. cr.)*
• **EDUC 6155 - Understanding Higher Education**

**Shared Core Courses (12 sem. cr.)**

• **EDUC 6156 - Understanding Students: Learning, Development, and Diversity**
• **EDUC 6157 - Understanding Institutions: Organizational Behavior and Culture**
• **EDUC 6158 - Using Research and Data to Drive Decision Making**
• **EDUC 6263 - Best Practices for Student Success**

**Capstone Course (3 sem. cr.)**

• **EDUC 6960 - Capstone: Master's Project**

**Course Sequence**

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Higher Education program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

**General Program**

Today's higher education institutions need leaders and managers with a broad range of knowledge and skills. The general program emphasizes student-centered management practices
critical to planning and administration of effective programs and services in higher education. Graduates of the General Program will be prepared to work successfully in a variety of mid-level administrative positions, build collaborations with other departments and programs, and advocate for resources and policies that support student success in their areas of responsibility.

**College Teaching and Learning**

The specialization in College Teaching and Learning within the M.S. in Higher Education is designed for individuals who already serve as instructors in higher education environments, or those who possess the subject-matter credentials to teach in higher education, and who want to develop expertise in college teaching and learning. The first three courses in this specialization address the major steps in the teaching and learning process: planning, developing and facilitating learning experiences, and assessment. The fourth course expands on this process in addressing the special opportunities and challenges of online learning environments. The core
courses in the program provide foundational knowledge about higher education institutions, students, and programs that can help expert instructors ground their practice within the larger context of higher education and become teacher-leaders who can facilitate continuous improvement in their institutions.

Learning Outcomes

At the end of this program, education professionals will be able to:

1. Create effective learning environments using research-based teaching strategies that engage and support diverse learners.
2. Design course plans, curricula, and learning activities that enable diverse learners to meet desired learning goals.
3. Apply the skills needed to assess and provide feedback on learner performance in ways that support learning and development.
4. Demonstrate the ability to use appropriate technologies to support learning in a variety of teaching contexts.
5. Independently conduct, evaluate, and apply research in making, implementing, and evaluating teaching decisions.
6. Articulate the process for development of a continuous improvement plan to impact teaching through scholarly inquiry and reflection.

Enrollment Management and Institutional Marketing

Recruitment and retention are increasingly everyone's business in higher education. The specialization in Enrollment Management and Institutional Marketing prepares professionals at all levels of higher education institutions to engage in an increasingly competitive market, to increase awareness of their programs and the institution, and to help students become engaged and stay committed to their educational goals. A wide range of opportunities in higher education exists for individuals with this specialization, including but not limited to positions in admissions and enrollment management. Current and future leaders of academic programs or divisions also benefit from an ability to recruit and retain students in their programs, plan strategically for program growth, and use current technologies to increase student awareness and engagement.

Global Higher Education

The specialization in Global Higher Education within the M.S. in Higher Education is designed for individuals who want to help their institutions capitalize on expanding opportunities for collaboration among colleges and universities throughout the world. Individuals from institutions in the United States and other countries will benefit from study of global trends and issues in higher education, strategies for serving the needs of international student populations, and approaches to program planning and management.

Leadership for Student Success

The specialization in Leadership for Student Success within the M.S. in Higher Education is designed for current and future higher education professionals who want to focus more closely on the institutional factors that support student success. The two courses in this specialization build on the higher education core courses by bringing together current thinking and best practices on what institutions of higher education can do to improve the engagement, retention, and educational attainment of our increasingly diverse student populations.

Online and Distance Learning

Distance learning is the fastest-growing segment of higher education today. Almost every institution offers some online coursework or blends distance- and classroom-based learning, and the number of fully online programs continues to grow. An ability to plan the appropriate use of online learning, manage effective programs, and assess the value for students and their learning will be a critical need in higher education for the foreseeable future. The Online and Distance Learning specialization prepares M.S. in Higher Education graduates to ensure that programs incorporate the most current online technologies in ways that support student learning and institutional effectiveness.

M.S. in Instructional Design and Technology
The M.S. in Instructional Design and Technology provides students with foundational knowledge about how people learn plus the skills they need to be able to design and assess curricula across a variety of instructional settings. The program delivers the perfect balance of leadership, problem-solving skills, academic theory, and hands-on experience students need to excel. Students gain the knowledge, skills, and experience they will need to enter or advance in the instructional design field in the corporate, education, or nonprofit sectors.

The M.S. in Instructional Design and Technology courses are aligned with the standards of the Association for Education Communications and Technology (AECT). These standards are critical indicators of quality in instruction through technology, and their inclusion reflects the integrity of the Walden University learning experience, as well as its relevancy in professional and educational settings.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:

1. Design and implement conditions for learning by applying principles, theories, and research associated with instructional systems design, message design, instructional strategies, and learner characteristics.

2. Develop instructional materials and experiences by applying principles, theories, and research related to print, audiovisual, computer-based, and integrated technologies.

3. Use processes and resources for learning by applying principles, theories, and research related to media utilization, diffusion, implementations, and policy making.

4. Plan, organize, coordinate, and supervise instructional technology by applying principles, theories, and research related to project, resource, delivery system, and information management.

5. Evaluate the adequacy of instruction and learning by applying principles, theories, and research related to problem analysis, criterion references measurement, formative and summative evaluation, and long-range planning.

6. Demonstrate the ability to facilitate equitable access to instructional materials for all learners.

7. Demonstrate the ability to apply common technology tools to create innovative learning solutions and materials.

**Specializations**

- General
- Online Learning
- Training and Performance Improvement
Degree Requirements

General

- 30 total semester credit hours (including 21 credits completed at Walden)
- Core courses (27 sem. credits)
- Capstone course (3 sem. credits)

Online Learning Specialization; Training and Performance Improvement Specialization

- 36 total semester credit hours
- Core courses (27 sem. credits)
- Specialization courses (6 sem. credits)
- Capstone course (3 sem. credits)

Additional Technology Requirements

Note: In addition to Walden’s general technical requirements, this program has additional technology requirements:

- Windows Vista or Mac OS X
- Free, downloadable software programs that may be required in order to complete the course and program requirements

Course Sequence

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Instructional Design and Technology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Note on Licensure

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).
Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

General Program

The General Program offers a core of instructional design, research, project management, and evaluation courses designed to give students a well-rounded education with direct application in the workplace. With a heavy emphasis on leadership, problem-solving skills, and hands-on experience, this specialization provides a solid foundation for success in a wide variety of industries and occupations.

Online Learning

With the Online Learning specialization, students will learn from an experienced leader in online content development and instructional delivery on how to productively and innovatively deliver courses or training modules using online delivery methods. Students will gain effective strategies for engaging and teaching distance learners and be able to assess learning outcomes in online environments.

In this specialization, students will
- Learn effective methods for managing and delivering online instruction
- Apply ground-breaking, modern strategies in combination with multimedia technologies and strategic course management tools
- Develop and implement assessment strategies in online education and training environments
- Review and analyze research and practical strategies for assessing learning

Training and Performance Improvement

This specialization focuses on managing and delivering training and improving workplace performance through instruction.

In this specialization, students:

- Learn essential skills for managing and delivering training systems and modules.
- Explore technologies that support a variety of training in both traditional classroom and virtual environments.
- Learn methods and techniques for identifying performance gaps, conducting needs assessments, identifying solutions, and evaluating their effectiveness.
- Implement design changes to instructional materials and support systems based on students' analysis.

POST-MASTER’S CERTIFICATES

Post-Master’s Certificate in Adult Education

The Post-Master’s Certificate in Adult Education is designed for educators who want to quickly acquire the knowledge and insight to promote adult learning and create effective learning environments. Coursework will cover a diverse range of contemporary trends and issues in teaching and learning as they relate to postsecondary and adult education settings—whether on-site, online, or a hybrid format. Using research-based principles, educators will design a unique learning experience for a specific population of adults and develop a learning facility using Walden University’s online learning environment. Credits earned from this certificate program may be applied toward certain Walden degree programs.

Certificate Requirements

- 24 total semester credit hours

**Post-Master's Certificate in College Teaching and Learning**

The Post-Master’s Certificate in College Teaching and Learning enables education professionals to build their skills in postsecondary teaching and assessment and the use of relevant technologies. Coursework introduces research-based planning and instructional strategies in a variety of learning contexts, from the face-to-face classroom to the online environment. Through doctoral-level study, educators gain the skills to evaluate student performance, design goal-focused course plans and curricula, and collaborate with other stakeholders to promote individual and societal advancement. Graduates of this online program will also have the ability to design appropriate programs, instructional experiences, and learning activities to foster improved student learning.

**Note on Licensure**

Walden's Post-Master's Certificate in College Teaching and Learning focuses on the development of scholarly teaching knowledge and skills. It does not necessarily provide individuals with all of the course credits required to teach in a particular academic discipline; therefore, additional subject-specific graduate credits may be needed. Individuals are responsible for ensuring that they meet the credentialing requirements of the institution where they want to teach. Walden makes no representation or guarantee that completion of this coursework will permit an individual to teach at a higher education institution.
**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Post-Master's Certificate in College Teaching and Learning program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
Education Specialist (Ed.S.) in Administrator Leadership for Teaching and Learning Acceleration

Advanced Walden graduate students can accelerate the time to complete the Ed.S. in Administrator Leadership for Teaching and Learning degree. To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must meet the minimum admission requirements for the Education Specialist program.
- The student must earn a B (3.0) or better in each of the courses.

**Note:** Students are advised to consult the *Walden University Student Handbook* for more information on requirements.

The following requirements have been established for Walden graduate students who are interested in entering Walden's Ed.S. in Administrator Leadership for Teaching and Learning program:

**Course Options**

- **EDAD 7200 - Leadership for Today’s Schools** Students who successfully complete both EDAD 6805 - Facilitating Productive Working Relationships and School Culture to Enhance Student Learning (3 sem. cr.) and EDAD 6809 - Implementing Continuous School Improvement (3 sem. cr.) from the M.S. in Education with a specialization in Educational Leadership (Non-Licensure) (Grades K–12) program with a B or better may transfer out of this course. Students who successfully complete both EDUC 6647 - Dynamic Teacher Leadership (3 sem. cr.) and EDUC 6651 - Teacher Leadership in the Classroom: Increasing Learning and Achievement (3 sem. cr.) from the M.S. in Education with a specialization in Teacher Leadership program with a B or better may transfer out of this course.

**Note on Licensure**

*The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a P–12 principal.*

*In addition, some of Walden’s programs in leadership can lead to principal licensure in Texas through a partnership with the Harris County Department of Education. For more information about the Texas Principal Certification Program, please contact Harris County at [http://www.hcde-texas.org/default.aspx?name=PrinCert](http://www.hcde-texas.org/default.aspx?name=PrinCert).*
Prospective candidates from outside of Minnesota should review their state licensure requirements to ensure that completing a teacher or principal preparation program at Walden will meet eligibility requirements for similar licensure in their states.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Education Specialist (Ed.S.) in Curriculum, Instruction, and Professional Development Acceleration

Advanced Walden graduate students can accelerate the time to complete the Ed.S. in Curriculum, Instruction, and Professional Development degree. To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must meet the minimum admission requirements for the Education Specialist program.
- The student must earn a B (3.0) or better in each of the courses.

Note: Students are advised to consult the Walden University Student Handbook for more information on requirements.

The following requirements have been established for Walden graduate students who are interested in entering Walden's Ed.S. in Curriculum, Instruction, and Professional Development program:

Course Options

- EDUC 7740 - Qualities of Effective Professional Development Students who successfully complete EDUC 6740 - Qualities of Effective Professional Development (3 sem. cr.) with a B or better may transfer out of this course.
- EDUC 7741 - Designing Professional Development Students who successfully complete EDUC 6741 - Designing Professional Development (3 sem. cr.) with a B or better may transfer out of this course.
- EDUC 7742 - Implementing Professional Development Students who successfully complete EDUC 6742 - Implementing Professional Development (3 sem. cr.) with a B or better may transfer out of this course.
- EDUC 7743 - Evaluating Professional Development Students who successfully complete EDUC 6743 - Evaluating Professional Development (3 sem. cr.) with a B or better may transfer out of this course.

Note on Licensure
The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a P–12 principal. In addition, some of Walden’s programs in leadership can lead to principal licensure in Texas through a partnership with the Harris County Department of Education. For more information about the Texas Principal Certification Program, please contact Harris County at [http://www.hcde-texas.org/default.aspx?name=PrinCert](http://www.hcde-texas.org/default.aspx?name=PrinCert).

Prospective candidates from outside of Minnesota should review their state licensure requirements to ensure that completing a teacher or principal preparation program at Walden will meet eligibility requirements for similar licensure in their states.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

**Education Specialist (Ed.S.) in Special Education Acceleration**

Advanced Walden graduate students can accelerate the time to complete the Ed.S. in Special Education degree.

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must meet the minimum admission requirements for the Doctor of Education program.
- The student must earn a B (3.0) or better in each of the courses.

**Note:** Students are advised to consult the Walden University Student Handbook for more information on requirements.

The following requirements have been established for Walden graduate students who are interested in entering Walden's Ed.S. in Special Education program:

**Course Options**

- **EDUC 7763 - Specialized Instruction** Students who successfully complete the following courses in the M.S. in Education with a specialization in Special Education with a B or better may transfer out of this course:
  - **EDUC 6720 - The Special Educator as Instructional Leader**
  - **EDUC 6721 - The Impact of Disabilities on Learning and Teaching**
  - **EDUC 6722 - Strategic Collaboration in Special Education**
  - **EDUC 6723 - Advanced Instructional Strategies in Special Education**
  - **EDUC 6724 - Literacy Interventions in Special Education**
  - **EDUC 6725 - Advanced Behavioral Interventions in Special Education**
EDUCATION SPECIALIST (ED.S.) PROGRAMS

Education Specialist (Ed.S.) in Administrator Leadership for Teaching and Learning

The Education Specialist (Ed.S.) in Administrator Leadership for Teaching and Learning program is designed for administrators who want to quickly increase their effectiveness in transforming their educational environment. The program's curriculum is focused on an innovative, collaborative model of administration and is designed to increase expertise in understanding and analyzing research. Graduates will have the skills to integrate theory and practice to advance their careers and have a positive impact on their educational communities.

Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Demonstrate knowledge of the current literature and trends in education.
2. Demonstrate the reflective teaching and learning skills needed by a professional in the field of education.
3. Evaluate, synthesize, and interpret educational research. (consumer of research)
4. Identify and propose a solution to educational problem(s). (designing/developing research)
5. Demonstrate leadership through effective communication and use of technology.
6. Demonstrate leadership through effective communication about educational issues/topics to popular audiences in written work, speech, and through using technology.
7. Utilize effective communication skills in presenting academic research so as to elicit social change.
8. Show awareness of global interrelationships and affirm diversity in their own work about teaching and learning.
9. Be familiar with scholarship in the field of education that is sensitive to global interrelationships and affirms diversity.
10. Collaborate with a range of stakeholders in education and/or learning organizations in order to effect positive social change.
11. Demonstrate active commitment to social change.

Degree Requirements

**Education Specialist (Ed.S.) in Adult Education**

The Education Specialist (Ed.S.) in Adult Education prepares current and aspiring adult
education and training practitioners to develop and deliver effective adult instruction in a variety
of settings. In this post-master’s program, students explore adult education theory; methods for
studying how adults learn; and best practices for designing, assessing, and facilitating adult
learning experiences. In the final capstone course, students examine the impact of new
technologies and globalization on adult learning trends and apply their coursework to a real-
world challenge within their work environment.

**Learning Outcomes**

At the end of this program, graduates will be able to:

1. Apply knowledge related to the current research-based literature and trends in adult
   learning.
2. Demonstrate the reflective teaching and learning skills needed by a professional in higher
   education and/or adult learning.
3. Exhibit the ability to provide leadership via effective communication and use of
   technology.
4. Articulate the impact of global interrelationships and affirm diversity in one's own work
   in adult learning.
5. Apply collaborative skills with a range of stakeholders in higher education and/or in adult
   learning organizations to effect positive social change.
6. Demonstrate the ability to impact social change in adult education.

Education Specialist (Ed.S.) in Assessment, Evaluation, and Accountability
This post-master's program provides the technical assessment tools to evaluate individual, program, and organizational performance. Educators learn the communication and leadership skills that are used to create a culture of continuous improvement in their organizations. The focus of the coursework is on organizational development theory, advanced statistical analysis methods, and processes for determining program impact and value. Through a project-based perspective, educators gain an understanding of core research theory, design, and methodology as well as strategies for effectively communicating complex information to stakeholders. A capstone course allows educators to apply their coursework directly to an assessment and evaluation initiative in an organization of their choice. This program prepares educators with the knowledge they need to support data-driven decision making and improve performance in a broad range of instructional settings, including schools, corporations, government agencies, and nonprofit organizations.

Learning Outcomes
At the end of this program, education professionals are able to:

- Demonstrate the integration of organizational effectiveness concepts with trends in assessment, evaluation, and accountability.
- Demonstrate practices that unite evaluation, assessment, and accountability in a socially responsible and ethical manner.
- Demonstrate research competencies by being able to design, analyze, evaluate, and report data, using a variety of technology tools to do so.
- Demonstrate the ability to plan for the creation, implementation, and evaluation of assessment systems for improving performance of individuals, programs, and institutions.
- Demonstrate the ability to communicate in a way that is appropriate to the audience and purpose.
• Create a plan for continuous improvement in a specific organization that addresses results of data analysis and includes building a culture that supports positive efforts for change.

Degree Requirements

• 45 total quarter credits
• Foundation course (4 cr.)
• Concentration courses (24 cr.)
• Research courses (12 cr.)
• Capstone course (5 cr.)
• ePortfolio

Curriculum

Foundation Course (4 cr.)

Education Specialist (Ed.S.) in College Teaching and Learning

The Ed.S. in College Teaching and Learning program emphasizes practical strategies and teaching techniques that can be applied to engage diverse students and improve student learning at the college level. Designed to complement the subject-matter qualifications needed to teach a particular academic discipline, the curriculum examines research-based teaching methods and principles that can be used in traditional, online, or hybrid learning settings. Educators learn how to assess and provide feedback on student performance, use appropriate technologies to facilitate learning, and develop effective learning environments that address the specialized needs of various adult student populations.

Note: Walden's Ed.S. in College Teaching and Learning focuses on the development of scholarly teaching knowledge and skills. It does not necessarily provide individuals with all of the course credits required to teach in a particular academic discipline; therefore, additional subject-specific graduate credits may be needed. Individuals are responsible for ensuring that they meet the credentialing requirements of the institution where they want to teach. Walden makes no representation or guarantee that completion of this coursework will permit an individual to teach at a higher education institution.

Learning Outcomes

At the end of this program, graduates will be able to:

1. Create effective learning environments using research-based teaching strategies that engage and support diverse learners.
2. Design course plans, curricula, and learning activities that enable diverse learners to meet desired learning goals.
3. Apply the skills needed to assess and provide feedback on learner performance in ways that support learning and development.
4. Demonstrate the ability to use appropriate technologies to support learning in a variety of educational contexts.
5. Articulate the process for development of a continuous improvement plan to impact educational practice through scholarly inquiry and reflection.
6. Collaborate within and across departments and institutions to promote individual and societal advancement in a global context.

Click here to find detailed information for the Education Specialist (Ed.S.) in College Teaching and Learning program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Note on Licensure

Walden's Ed.S. in College Teaching and Learning focuses on the development of scholarly teaching knowledge and skills. It does not necessarily provide individuals with all of the course credits required to teach in a particular academic discipline; therefore, additional subject-specific graduate credits may be needed. Individuals are responsible for ensuring that they meet the credentialing requirements of the institution where they want to teach. Walden makes no representation or guarantee that completion of this coursework will permit an individual to teach at a higher education institution.

Education Specialist (Ed.S.) in Curriculum, Instruction, and Professional Development

The Education Specialist (Ed.S.) in Curriculum, Instruction, and Professional Development program prepares K–12 educators to be effective instructional leaders within their school or district. To help all students succeed at the highest levels of achievement, educators throughout the system must have the knowledge, skills, and dispositions to enhance their own practices and make positive changes in teaching and learning. This program provides powerful learning opportunities for participants who want to lead systemic initiatives related to planning, designing, and implementing rigorous curriculum, instruction, and assessment plans. The program focuses on how to bring about teaching and learning reform through job-embedded professional development that focuses on content and aligns to standards and student needs.
Degree Requirements

- 33 total semester credits
- Foundation course (3 sem. cr.)
- Core courses (27 sem. cr.)
- Capstone course (3 sem. cr.)
- Minimum of 6 semesters enrollment
- ePortfolio

Learning Outcomes

At the end of this program, educator professionals will be able to:
1. Organize adults into learning communities whose goals are aligned with those of the school and district.
2. Become skillful school and district leaders who guide continuous instructional improvement.
3. Require resources to support adult learning and collaboration.
4. Use disaggregated student data to determine adult learning priorities, monitor progress, and help sustain continuous improvement.
5. Use multiple sources of information to guide improvement and demonstrate its impact.
6. Prepare educators to apply research to decision making.
7. Use learning strategies appropriate to the intended goal.
8. Apply knowledge about human learning and change.
9. Provide educators with the knowledge and skills to collaborate.
10. Prepare educators to understand and appreciate all students; create safe, orderly, and supportive learning environments; and hold high expectations for their academic achievement.
11. Deepen educators' content knowledge, provide them with research-based instructional strategies to assist students in meeting rigorous academic standards, and prepare them to use various types of classroom assessments appropriately.
12. Provide educators with knowledge and skills to involve families and other stakeholders appropriately.

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.
Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Education Specialist (Ed.S.) in Curriculum, Instruction, and Professional Development program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Education Specialist (Ed.S.) in Early Childhood

The Education Specialist (Ed.S.) in Early Childhood prepares professionals for leadership and advocacy roles in a variety of early childhood settings and positions at the local, regional, state, or federal level. In this post-master’s program, students explore child development and learning theory; familial, cultural, and societal influences on early childhood; and quantitative and qualitative research methods for studying human development. Providing a broad perspective on the complex, interdisciplinary landscape of the early childhood field, coursework examines national and international perspectives on child development; the interaction of disciplines such as medicine, psychology, and public health in the field; and the impact of public policy and funding on systems and services. A final capstone course encourages students to examine the characteristics of effective leadership in the field and apply their knowledge to create positive change in a specific early childhood setting.

Learning Outcomes

At the end of this program, graduates will be able to:
1. Document the use of research-based knowledge and skills in the areas of child development and/or teaching and learning to evaluate current practices and programs.
2. Assess the role of sociocultural contexts, diversity, and human relationships in influencing the development of young children.
3. Develop graduate-level scholarly skills (use of resources, scholarly writing, and critical thinking).
4. Apply self-reflection to evaluate and ensure professional growth as advocates and leaders who promote positive social change in the field of early childhood.
5. Evaluate existing systems of early care, education, and work to improve outcomes for young children and their families.
6. Demonstrate abilities as skillful leaders, managers of change, relationship-builders, and collaborators with family members, colleagues, and agencies related to the field of early childhood to promote positive short- and long-term outcomes for young children and families and positive social change.
7. Demonstrate leading positive social change through the process of producing a capstone project.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Education Specialist (Ed.S.) in Early Childhood program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Education Specialist (Ed.S.) in Educational Leadership and Administration (Principal Preparation) Program**

Walden University's Education Specialist (Ed.S.) in Educational Leadership and Administration (Principal Preparation) program is approved by the Minnesota Board of School Administrators as a principal preparation program that leads to P–12 Principal Licensure in Minnesota. With curriculum aligned to key professional organizations such as the Interstate School Leaders Licensure Consortium, the National Policy Board for Educational Administration, and the Minnesota Board of School Administrators, principal candidates can expect a learning experience that is based on established standards by respected organizations.

This program will prepare principal candidates to become exemplary, well-informed school leaders who can manage complex educational issues, evaluate and improve instructional programs, develop diverse school personnel, and create a shared strategic vision, as well as encourage and inspire students, staff, families, and the community to provide a safe and secure learning environment. This unique, scholar-practitioner program is grounded in research and provides authentic school leadership experiences that will lead to the successful development of principal candidates.

**Learning Outcomes**

At the end of this program, graduates are able to:
1. Lead initiatives that evaluate and improve instructional programs.
2. Effectively manage all personnel and provide ongoing evaluation and professional development in teaching and learning.
3. Create a strategic plan using a visioning process to be shared and supported by all stakeholders.
4. Use data to effectively manage the organization and resources for a safe, secure, and effective learning environment.
5. Address community interests and diverse needs through communicating and collaborating with internal and external publics.

*Note: This course may not be taken concurrently with any other course.*
6. Articulate the school's role within the broader political, social, economic, legal, and cultural context and respond effectively to changes that impact the school community.
7. Model democratic value systems, ethics, and moral leadership; support others to grow and develop as caring and informed citizens.

Degree Requirements

36 total semester credit hours
- Foundation course (3 sem. credits)
- Core courses (27 sem. credits)
- Field Experience* courses (6 sem. credits)
- Two 3-day residencies
- ePortfolio

*Note: In addition to Walden's general technical requirements, access to a scanner is required so that candidates can electronically submit signed documents verifying their field experience hours.

Curriculum

Foundation Course (3 cr.)

- EDUC 7002 - Foundations: Educational Leadership and Administration

Core Courses (27 sem. cr.)

- EDUC 7200 - Teaching and Learning for School Leaders
- EDUC 7201 - Communication and Collaboration for Leaders
- EDUC 7202 - Ensuring Quality Education for Students With Diverse Needs
- EDUC 7203 - Policy and Law in School Organizations
- EDUC 7204 - Using Data to Strengthen Schools
- EDUC 7205 - Budgeting and Allocating Resources
- EDUC 7206 - Creating Positive, Safe, and Effective Learning Environments
- EDUC 7207 - Leading Curriculum Initiatives: Literacy and Math
- EDUC 7208 - Recruiting, Evaluating, and Retaining School Personnel

Field Experience Courses (6 sem. cr.)

## Handbooks

Walden University requires that all candidates in its principal preparation program review the Candidate Handbook and the Field Experience Handbook in order to help them understand the guidelines and requirements of the program.

Candidates can access both handbooks (PDF) from their myWalden university portal. Candidates enrolled in the principal preparation program should refer to the Candidate Handbook for complete information on the program and other university policies and procedures related to the program's specializations. Candidates should refer to the Field Experience Handbook for detailed information regarding the field experience requirements in the program.

## Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Education Specialist (Ed.S.) in Educational Leadership and Administration (Principal Preparation) Program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

## Note on Licensure
The only programs offered by Walden University that are state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which is approved in Minnesota and Ohio, and the M.S. in Education, Educational Leadership and Administration, which is approved in Ohio. Upon successful completion of this program, Walden can recommend candidates for principal licensure to those respective states. The Minnesota and Ohio departments of education are solely responsible for reviewing applications and issuing licenses, and candidates are responsible for completing any other state requirements beyond completion of Walden’s state-approved program.

Individuals interested in principal licensure in states other than Minnesota and Ohio may qualify for the license by virtue of completing a state-approved program; however, individuals must review their state’s regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement.

**Education Specialist (Ed.S.) in Educational Technology**

This post-master's degree program prepares students to design and lead technology-rich learning experiences for a wide range of learning environments, including kindergarten to graduate classrooms and the workplace. Courses explore in depth the latest trends and issues in educational technology; best practices for integrating technology to facilitate learning across K–12 content areas; and the application of instructional design principles across multi-device eLearning environments. To prepare students to lead change in the workplace, coursework also analyzes approaches to leadership, strategic planning, communication, and motivation. Taking a project-based approach, courses in this program provide students with hands-on practice in creating and designing digital and interactive media; developing social networking and assessment rubrics; and creating an online learning module.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:

1. Use technology to design, develop, and assess the teaching and learning process based on sound theory and research.
2. Design and conduct an ethical research study based on a current problem facing educational technology.
3. Critically analyze and assess the impact of social trends on educational technology and the influence of educational technology on social trends with solid research support.
4. Demonstrate persuasive leadership for social change in the workplace using digital technologies with effective written and oral communication.
5. Use digital and written communications using the standards of academic practice, including accurate APA references and citations and a concise, succinct, grammatically accurate, and persuasive writing style.
6. Use emerging technologies for diverse, global connections in the workplace.
7. Participate in collaborative projects/research relevant to educational technology to effect positive social change related to the use of technology in the workplace (business, industry, or education).

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Education Specialist (Ed.S.) in Educational Technology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Note on Licensure

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading. The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Education Specialist (Ed.S.) in Reading and Literacy Leadership (Non-Licensure)

The Ed.S. in Reading and Literacy Leadership program prepares educators to lead effective reading and literacy programs for learners of all ages. Courses examine the influence of technology, culture, Common Core standards, and sociopolitical issues on 21st-century literacy; literacy’s developmental nature and cultural contexts; and curriculum and instructional approaches for facilitating literacy across various settings and age groups. Educators learn to use assessment tools, data, and quantitative and qualitative research methods to improve individual proficiencies and program effectiveness. Educators explore resource management, decision-making, and mentoring skills required to lead programs and fellow professionals. Educators learn how to build staff’s capacity to infuse literacy across content areas.

Learning Outcomes

At the end of this program, graduates are able to:

1. Examine the components of literacy in the 21st century including influences from the sociopolitical landscape, social media, technological innovations, and influences from Common Core standards.
2. Develop graduate-level scholarly skills (use of resources, scholarly writing, and critical thinking).
3. Demonstrate the ability to develop a plan to gain stakeholder support for improvement of literacy programming at the systematic level drawing on professional standards as well as leadership and change theories.
4. Critically evaluate existing research studies in the area of reading and literacy.
5. Examine the challenges diverse learners face and the systems that enable these learners to achieve literacy success.
6. Describe various literacy assessments used at national, state, and local levels including their value and how to use that information in literacy program decision making.
7. Recommend a literacy environment that enhances student learning and supports professional development for teachers.
8. Integrate concepts of positive social change in leadership, assessment, professional development, literacy curriculum, and literacy instruction activities.

**Degree Requirements**

Click here to find detailed information for the Education Specialist (Ed.S.) in Reading and Literacy Leadership (Non-Licensure) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Education Specialist (Ed.S.) in Special Education

The Education Specialist (Ed.S.) in Special Education program emphasizes practitioner-based research methodology to prepare educators to evaluate and improve programs and instruction. Aligned with the Council for Exceptional Children's Advanced Role Content Standards, this program's curriculum focuses on the planning and implementation of programs and interventions to benefit special education students and assist special education teachers in meeting the goals of individual education plans. The courses address policy concerns, advocacy for special needs students, inclusive practices, school-wide interventions, and working with families for positive outcomes. (This program does not lead to certification or licensure.)

Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Demonstrate mastery of key concepts through scholarly writing and project completion, for legal and ethical policy that supports high quality education for individuals with exceptional learning needs.
2. Demonstrate mastery of key concepts through scholarly writing and project completion, to serve in a leadership capacity by creating procedures that respect all individuals and positive and productive work environments.
3. Demonstrate mastery of key concepts through scholarly writing and project completion, for the use of evidence-based practices for instructional programs at the school and system levels.
4. Demonstrate mastery of key concepts, through scholarly writing and project completion, and the use of educational research to improve instructional and intervention techniques and materials.
5. Design and implement methods to evaluate the effectiveness of instructional practices and program goals for student learning of the general education curriculum and individualized IEP goals.
6. Demonstrate mastery of key concepts, through scholarly writing and project completion, of the legal rights of students, families, and personnel.
7. Plan, present, and evaluate professional development that focuses on effective practice, including expertise to support student access to learning through effective teaching strategies, curriculum standards, and assistive technology.
8. Demonstrate mastery of key concepts through scholarly writing and project completion, the importance of collaboration in special education, and the integration of services for individuals with exceptionalities.

**Education Specialist (Ed.S.) in Teacher Leadership**

The Education Specialist (Ed.S.) in Teacher Leadership program is designed for educators who want to quickly increase their ability to make contributions to their school or organization, thereby improving the lives of their students. The program's curriculum focuses on best practices that can be applied immediately in the classroom. This empowers educators at all levels of experience to use research to effect change and improve student learning, while developing the skills needed for professional advancement.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:

1. Demonstrate knowledge of the current literature and trends in education.
2. Demonstrate the reflective teaching and learning skills needed by a professional in the field of education.
3. Evaluate, synthesize, and interpret educational research. (consumer of research)
4. Identify and propose a solution to educational problem(s). (designing/developing research)
5. Demonstrate leadership via effective communication and use of technology.
6. Demonstrate leadership through effective communication about educational issues/topics to popular audiences in written work, speech, and through using technology.
7. Utilize effective communication skills in presenting academic research so as to elicit social change.
8. Show awareness of global interrelationships and affirm diversity in their own work about teaching and learning.
9. Be familiar with scholarship in the field of education that is sensitive to global interrelationships and affirms diversity.
10. Collaborate with a range of stakeholders in education and/or learning organizations in order to effect positive social change.
11. Demonstrate active commitment to social change.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Education Specialist (Ed.S.) in Teacher Leadership program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Note on Licensure**

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a P–12 principal.

In addition, some of Walden’s programs in leadership can lead to principal licensure in Texas through a partnership with the Harris County Department of Education. For more information about the Texas Principal Certification Program, please contact Harris County at [http://www.hcde-texas.org/default.aspx?name=PrinCert](http://www.hcde-texas.org/default.aspx?name=PrinCert).

Prospective candidates from outside of Minnesota should review their state licensure requirements to ensure that completing a teacher or principal preparation program at Walden will meet eligibility requirements for similar licensure in their states.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).
DOCTORAL ACCELERATION PROGRAMS

Doctor of Education (Ed.D.) With a Specialization in Administrator Leadership for Teaching and Learning Acceleration

Advanced Walden graduate students can accelerate the time to complete the Ed.D. degree with a specialization in Administrator Leadership for Teaching and Learning.

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must meet the minimum admissions requirements for the Doctor of Education program.
- The student must earn a B (3.0) or better in each of the courses.

Note: Students are advised to consult the Walden University Student Handbook for more information on requirements.

The following requirements have been established for Walden graduate students who are interested in entering Walden's Ed.D. with a specialization in Administrator Leadership for Teaching and Learning program:

Course Options

- **EDAD 8040 - Foundations: Administrator Leadership for Teaching and Learning** Students who successfully complete EDAD 7002 - Foundations: Administrator Leadership for Teaching and Learning (6 sem. cr.) with a B or better may transfer out of this course.

- **EDAD 8140 - Leadership for Today's Schools** Students who successfully complete EDAD 7200 - Leadership for Today's Schools (6 sem. cr.) with a B or better may transfer out of this course. Students who successfully complete both EDAD 6805 - Facilitating Productive Working Relationships and School Culture to Enhance Student Learning (3 sem. cr.) and EDAD 6809 - Implementing Continuous School Improvement (3 sem. cr.) from the M.S. in Education specialization in Educational Leadership (Non-Licensure) (Grades K–12) program with a B or better may transfer out of this course. Students who successfully complete both EDUC 6647 - Dynamic Teacher Leadership (3 sem. cr.) and EDUC 6651 - Teacher Leadership in the Classroom: Increasing Learning and Achievement (3 sem. cr.) from the M.S. in Education specialization in Teacher Leadership program with a B or better may transfer out of this course.
• **EDAD 8141 - Applied Research in Education** Students who successfully complete EDAD 7200 - Leadership for Today’s Schools (6 sem. cr.) with a B or better may transfer out of this course. Students who successfully complete both EDAD 6805 - Facilitating Productive Working Relationships and School Culture to Enhance Student Learning (3 sem. cr.) and EDAD 6809 - Implementing Continuous School Improvement (3 sem. cr.) from the M.S. in Education specialization in Educational Leadership (Non-Licensure) (Grades K–12) program with a B or better may transfer out of this course. Students who successfully complete both EDUC 6647 - Dynamic Teacher Leadership (3 sem. cr.) and EDUC 6651 - Teacher Leadership in the Classroom: Increasing Learning and Achievement (3 sem. cr.) from the M.S. in Education specialization in Teacher Leadership program with a B or better may transfer out of this course.

• **EDAD 8142 - Leading to Promote Learning** Students who successfully complete EDAD 7202 - Leading to Promote Learning (6 sem. cr.) with a B or better may transfer out of this course.

• **EDAD 8143 - Leading Professional Learning Communities** Students who successfully complete EDAD 7203 - Leading Professional Learning Communities (6 sem. cr.) with a B or better may transfer out of this course.

• **EDAD 8144 - School Leadership: Trends, Issues, Global Perspectives** Students who successfully complete EDAD 7900 - School Leadership Capstone: Trends, Issues, and Global Perspectives (6 sem. cr.) with a B or better may transfer out of this course.

### Note on Licensure

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a P–12 principal.

In addition, some of Walden’s programs in leadership can lead to principal licensure in Texas through a partnership with the Harris County Department of Education. For more information about the Texas Principal Certification Program, please contact Harris County at [http://www.hcde-texas.org/default.aspx?name=PrinCert](http://www.hcde-texas.org/default.aspx?name=PrinCert).

Prospective candidates from outside of Minnesota should review their state licensure requirements to ensure that completing a teacher or principal preparation program at Walden will meet eligibility requirements for similar licensure in their states.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

### Doctor of Education (Ed.D.) With a Specialization in Curriculum, Instruction, and Assessment Acceleration

Advanced Walden graduate students can accelerate the time to complete the Ed.D. degree with a specialization in Curriculum, Instruction, and Assessment

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
• The student must meet the minimum admissions requirements for the Doctor of Education program.
• The student must earn a B (3.0) or better in each of the courses.

*Note:* Students are advised to consult the *Walden University Student Handbook* for more information on requirements.

The following requirements have been established for Walden graduate students who are interested in entering Walden's Ed.D. with a specialization in Curriculum, Instruction, and Assessment:

**Course Options**

• **EDUC 8745 - Applied Research in Education** Students who successfully complete EDUC 7745 Applied Research in Education, Part I (3 sem. cr.) and EDUC 7746 Applied Research in Education, Part II (3 sem. cr.) with a B or better may transfer out of this course.

**Note on Licensure**

*For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.*

Additionally, not all of Walden's programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual's responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

**Doctor of Education (Ed.D.) With a Specialization in Special Education Acceleration**

Advanced Walden graduate students can accelerate the time to complete the Ed.D. degree with a specialization in Special Education.

To help ensure student success, the following requirements have been established:
• The student must be in good standing with the university.
• The student must meet the minimum admissions requirements for the
The student must have a B (3.0) or better cumulative average for the courses being articulated.

Note: Students are advised to consult the Walden University Student Handbook for more information on requirements.

The following requirements have been established for Walden graduate students who are interested in entering Walden's Ed.D. with a specialization in Special Education program:

**Course Options**

**M.S. in Education graduates:**
- EDUC 8763 - Specialized Instruction: Students who successfully complete the following courses in the M.S. in Education with a specialization in Special Education with a B or better cumulative average may transfer out of this course:
  - EDUC 6720 - The Special Educator as Instructional Leader (3 sem. cr.)
  - EDUC 6721 - The Impact of Disabilities on Learning and Teaching (3 sem. cr.)
  - EDUC 6722 - Strategic Collaboration in Special Education (3 sem. cr.)
  - EDUC 6723 - Advanced Instructional Strategies in Special Education (3 sem. cr.)
  - EDUC 6724 - Literacy Interventions in Special Education (3 sem. cr.)
  - EDUC 6725 - Advanced Behavioral Intervention in Special Education (3 sem. cr.)

OR

**Educational Specialist (Ed.S.) in Special Education graduates:**
Students who successfully complete the following courses in the Educational Specialist (Ed.S.) in Special Education with a B or better cumulative average may transfer out of this course:
- EDUC 8760 - Foundations: Special Education Students who successfully complete EDUC 7760 - Foundations: Special Education (6 sem. cr.) may transfer out of this course.
- EDUC 8761 - Leadership Advocacy, Policy, and Law Students who successfully complete EDUC 7761 - Leadership, Advocacy, Policy, and Law (6 sem. cr.) may transfer out of this course.
- EDUC 8763 - Specialized Instruction Students who successfully complete EDUC 7763 - Specialized Instruction (6 sem. cr.) may transfer out of this course.
- EDUC 8764 - Research Methodology and Special Education Students who successfully complete EDUC 7764 - Research Methodology and Special Education (6 sem. cr.) may transfer out of this course.
- EDUC 8765 - School-Wide Intervention Models Students who successfully complete EDUC 7765- School-Wide Intervention Models (6 sem. cr.) may transfer out of this course.
- EDUC 8767 - Sustaining and Supporting Effective Practices Students who successfully complete EDUC 7766 - Capstone: Sustaining and Supporting Effective Practices (6 sem. cr.) may transfer out of this course.
Doctor of Education (Ed.D.) With a Specialization in Teacher Leadership Acceleration

Advanced Walden graduate students can accelerate the time to complete the Ed.D. degree with a specialization in Teacher Leadership.

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must meet the minimum admissions requirements for the Doctor of Education program.
- The student must earn a B (3.0) or better in each of the courses.

Note: Students are advised to consult the Walden University Student Handbook for more information on requirements.

The following requirements have been established for Walden graduate students who are interested in entering Walden's Ed.D. with a specialization in Teacher Leadership:

Course Options

- **EDUC 8040 - Foundations: Teacher Leadership** Students who successfully complete EDUC 7004 - Foundations: Teacher Leadership (6 sem. cr.) with a B or better may transfer out of this course.
- **EDUC 8140 - Leadership for Today’s Schools** Students who successfully complete EDAD 7200 - Leadership for Today’s Schools (6 sem. cr.) with a B or better may transfer out of this course. Students who successfully complete both EDAD 6805 - Facilitating Productive Working Relationships and School Culture to Enhance Student Learning (3 sem. cr.) and EDAD 6809 - Implementing Continuous School Improvement (3 sem. cr.) from the M.S. in Education specialization in Educational Leadership (Non-Licensure) (Grades K–12) program with a B or better may transfer out of this course. Students who successfully complete both EDUC 6647 - Dynamic Teacher Leadership (3 sem. cr.) and EDUC 6651 - Teacher Leadership in the Classroom: Increasing Learning and Achievement (3 sem. cr.) from the M.S. in Education specialization in Teacher Leadership program with a B or better may transfer out of this course.
- **EDUC 8141 - Applied Research in Education** Students who successfully complete EDUC 7211 - Applied Research in Education (6 sem. cr.) with a B or better may transfer out of this course.
- **EDUC 8142 - Teaching and Learning: Theory and Research** Students who successfully complete EDUC 7212 - Teaching and Learning: Theory and Research (6 sem. cr.) with a B or better may transfer out of this course.
• **EDUC 8143 - Collegial Interactions and Professional Development** Students who successfully complete EDUC 7213 - Collegial Interactions and Professional (6 sem. cr.) with a B or better may transfer out of this course.

• **EDUC 8144 - Teacher Leadership: Trends, Issues, and Global Perspectives** Students who successfully complete EDUC 7902 - Teacher Leadership Capstone: Trends, Issues, and Global Perspectives (6 sem. cr.) with a B or better may transfer out of this course.

**Note on Licensure**

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a P–12 principal.

In addition, some of Walden’s programs in leadership can lead to principal licensure in Texas through a partnership with the Harris County Department of Education. For more information about the Texas Principal Certification Program, please contact Harris County at [http://www.hcde-texas.org/default.aspx?name=PrinCert](http://www.hcde-texas.org/default.aspx?name=PrinCert).

Prospective candidates from outside of Minnesota should review their state licensure requirements to ensure that completing a teacher or principal preparation program at Walden will meet eligibility requirements for similar licensure in their states.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

**Ph.D. in Education With a Specialization in Educational Technology Acceleration**

Advanced Walden graduate students can accelerate the time to complete the Ph.D. in Education with a specialization in Educational Technology degree.

To help ensure student success, the following requirements have been established:

• The student must be in good standing with the university.

• The student must meet the minimum admissions requirements for the Ph.D. in Education program.

• The student must earn a B (3.0) or better in each of the courses.

**Note:** Students are advised to consult the *Walden University Student Handbook* for more information on requirements.

The following requirements have been established for Walden graduate students who are interested in entering Walden's Ph.D. in Education with a specialization in Educational Technology program:

**Course Options**
• **EDUC 8840 - Evolution of Educational Technology** Students who successfully complete EDUC 7100 - Evolution of Educational Technology (4 cr.) with a B or better may transfer out of this course.

• **EDUC 8841 - Diffusion and Integration of Technology in Education** Students who successfully complete EDUC 6710 - Understanding the Impact of Technology on Education, Work, and Society (3 sem. cr.) or EDUC 7101 - Diffusion and Integration of Technology in Education (4 cr.) with a B or better may transfer out of this course.

• **EDUC 8842 - Principles of Distance Education** Students who successfully complete EDUC 7102 - Principles of Distance Learning (4 cr.) with a B or better may transfer out of this course.

• **EDUC 8843 - Leading and Managing Educational Technology** Students who successfully complete EDUC 7103 - Leading and Managing Educational Technology (4 cr.) with a B or better may transfer out of this course.

• **EDUC 8844 - Designing Instruction for Distance Education** Students who successfully complete EIDT 6110 - Advanced Instructional Design I (3 sem. cr.) or EDUC 7104 - Designing Instruction for Distance Education (4 cr.) with a B or better may transfer out of this course.

• **EDUC 8845 - Learning Theory and Educational Technology** Students who successfully complete EDUC 6115 - Learning Theories and Instruction (3 sem. cr.) or EDUC 6711 - Bridging Learning Theory, Instruction, and Technology (3 sem. cr.) or EDUC 7105 - Learning Theory and Educational Technology (4 cr.) with a B or better may transfer out of this course.

• **EDUC 8847 - Multimedia Technology to Facilitate Learning** Students who successfully complete EDUC 6120 - Multimedia Design and Development (3 sem. cr.) or EDUC 7107 - Multimedia Technology to Facilitate Learning (4 cr.) with a B or better may transfer out of this course.

• **EDUC 8848 - Emerging and Future Technology** Students who successfully complete EDUC 6715 - New and Emerging Technologies (3 sem. cr.) or EDUC 7108 - Emerging and Future Technology Students (4 cr.) with a B or better may transfer out of this course.

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.
Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.
DOCTORAL PROGRAMS

Doctor of Education (Ed.D.)

Walden's Ed.D. programs are designed for educators who want to continue their practice while assuming influential roles in their schools and communities. The programs are built upon five critical components: teaching and lifelong learning, research and reflective analytical thought, leadership and communication, diversity, and collaborative social change. These critical components are the basis for the programs' learning outcomes, as students develop expertise in various areas, promoting equity and excellence.

Specializations

- Administrator Leadership for Teaching and Learning
- Adult Education
- College Teaching and Learning
- Curriculum, Instruction, and Assessment
- Early Childhood
- Higher Education Leadership
- Reading and Literacy Leadership
- Special Education
- Teacher Leadership

Degree Requirements

- 54–60 total semester credit hours
- Foundation course (6 sem. cr.)
- Applied Research course (6 sem. cr.)
- Research in Practice course (6 sem. cr.)
- Core courses (24–30 sem. cr.)
- Completing the Prospectus study (one semester, noncredit)
- Doctoral study intensive (a minimum of 12 sem. cr.)
- One 3-day academic residency
- ePortfolio
- Minimum 9 semesters’ enrollment

Course Sequence
The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Doctor of Education (Ed.D.) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Administrator Leadership for Teaching and Learning

The specialization in Administrator Leadership for Teaching and Learning is designed for education administrators seeking to develop the knowledge, abilities, and dispositions of scholar-practitioners. With a curriculum that focuses on leadership development and professional renewal, the program provides an opportunity for education professionals to build their capacity as agents of change in reforming schools and other learning organizations.

Learning Outcomes

At the end of this program, educator professionals will be able to:
1. Demonstrate knowledge of the current literature and trends in education.
2. Demonstrate the reflective teaching and learning skills needed by a professional in the field of education.
3. Evaluate, synthesize, and interpret educational research. (consumer of research)
4. Utilize effective communication skills in presenting academic research so as to elicit social change.
5. Demonstrate leadership via effective communication and use of technology.
6. Demonstrate leadership through effective communication about educational issues/topics to popular audiences in written work, speech, and through using technology.
7. Utilize effective communication skills in presenting academic research so as to elicit social change.
8. Show awareness of global interrelationships and affirm diversity in their own work about teaching and learning.
9. Be familiar with scholarship in the field of education that is sensitive to global interrelationships and affirms diversity.
10. Collaborate with a range of stakeholders in education and/or learning organizations in order to effect positive social change.
11. Demonstrate active commitment to social change.

Curriculum

Foundation Course (6 sem. cr.)
• **EDAD 8040 - Foundations: Administrator Leadership for Teaching and Learning**

**Applied Research Course (6 sem. cr.)**

• **EDAD 8141 - Applied Research in Education**

**Core Courses (24 sem. cr.)**

• **EDAD 8140 - Leadership for Today's Schools**
• **EDAD 8142 - Leading to Promote Learning**
• **EDAD 8143 - Leading Professional Learning Communities**
• **EDAD 8144 - School Leadership: Trends, Issues, Global Perspectives**

**Research in Practice Course (6 sem. cr.)**

• **EDAD 8145 - Research in Practice**

**Doctoral Study (minimum of 12 sem. cr.)**

• **EDUC 8081 - Completing the Prospectus**
• **EDUC 8090 - Doctoral Study Intensive**

**Note on Licensure**
The only programs offered by Walden University that are state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which is approved in Minnesota and Ohio, and the M.S. in Education, Educational Leadership and Administration, which is approved in Ohio. Upon successful completion of this program, Walden can recommend candidates for principal licensure to those respective states. The Minnesota and Ohio departments of education are solely responsible for reviewing applications and issuing licenses, and candidates are responsible for completing any other state requirements beyond completion of Walden’s state-approved program.

Individuals interested in principal licensure in states other than Minnesota and Ohio may qualify for the license by virtue of completing a state-approved program; however, individuals must review their state’s regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement.

**Adult Education**

The Adult Education specialization prepares adult educators and training professionals to design, evaluate, and lead adult learning programs across a variety of settings and disciplines. Students explore adult learning and development theories including phase and stage development; qualitative and quantitative research methods for studying how adults develop and learn; and best practices in adult education from both the teaching and learning perspectives. Students also examine how trends in brain research, globalization, and technology are affecting adult education. Applied research is emphasized throughout the curriculum, enabling students to synthesize coursework, design learning experiences for specific adult populations, and lay the groundwork for the culminating doctoral study intensive.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:

1. Apply knowledge related to the current research-based literature and trends in adult learning.
2. Demonstrate the reflective teaching and learning skills needed by a professional in higher education and/or adult learning.
3. Provide evidence of knowledge and skills necessary to evaluate, synthesize, and interpret educational research.
4. Exhibit the ability to provide leadership via effective communication and use of technology.
5. Articulate the impact of global interrelationships and affirm diversity in your own work in adult learning.
6. Apply collaborative skills with a range of stakeholders in higher education and/or in adult learning organizations in order to effect positive social change.
7. Demonstrate the ability to impact social change in adult education.
Curriculum

Foundation Course (6 sem. cr.)

- EDUC 8005 - Foundations: The Changing Context of Postsecondary and Adult Teaching and Learning*

  *EDUC 8005 may not be taken with any other course.

Applied Research Course (6 sem. cr.)

- EDUC 8102 - Applied Research in Education

Core Courses (24 sem. cr.)

- EDUC 8101 - How Adults Learn: Theory and Research
- EDUC 8103 - Designing and Assessing Learning Experiences
- EDUC 8104 - Facilitating Adult Learning
- EDUC 8105 - Adult Learning: Trends, Issues, Global Perspectives

Research in Practice Course (6 sem. cr.)

- EDUC 8106 - Research in Practice

Doctoral Study (minimum of 12 sem. cr.)

- EDUC 8081 - Completing the Prospectus
- EDUC 8090 - Doctoral Study Intensive (12 sem. cr.—6 sem. cr. per term for two terms)*

  *Note: Neither term of EDUC 8090 may be taken with any other course.

College Teaching and Learning

Designed for current and prospective postsecondary and college educators, the College Teaching and Learning specialization helps candidates build on their teaching experience. Through research-based teaching strategies, candidates cultivate more effective educational experiences for learners. This specialization combines online coursework and a face-to-face residency where candidates learn how to develop effective learning activities that enable diverse learners to meet their educational goals. This Ed.D. specialization takes into consideration the latest principles, policies, and practices of today’s changing landscape of postsecondary teaching.

Learning Outcomes

At the end of this program, graduates will be able to:

1. Create effective learning environments using research-based teaching strategies that engage and support diverse learners.
2. Design course plans, curricula, and learning activities that enable diverse learners to meet desired learning goals.
3. Apply the skills needed to assess and provide feedback on learner performance in ways that support learning and development.
4. Demonstrate the ability to use appropriate technologies to support learning in a variety of teaching contexts.
5. Independently conduct, evaluate, and apply research in making, implementing, and evaluating teaching decisions.
6. Articulate the process for development of a continuous improvement plan to impact teaching through scholarly inquiry and reflection.
7. Collaborate within and across departments and institutions to promote individual and societal advancement in a global context.

**Note on Licensure**

Walden’s Ed.D. with a specialization in College Teaching and Learning focuses on the development of scholarly teaching knowledge and skills. It does not necessarily provide individuals with all of the course credits required to teach in a particular academic discipline; therefore, additional subject-specific graduate credits may be needed. Individuals are responsible for ensuring that they meet the credentialing requirements of the institution where they want to teach. Walden makes no representation or guarantee that completion of this coursework will permit an individual to teach at a higher education institution.

**Curriculum, Instruction, and Assessment**

The Curriculum, Instruction, and Assessment specialization is designed for educators who want to drive innovation and change at the systemic level, including the district, regional, state, or federal level. Through a blend of learning and organizational theory, candidates will develop expertise in the latest research and best practices in curriculum design, teacher professional development, and program assessment, as well as strategies to effect measurable change in K–12 schools. Candidates will acquire the critical-thinking and research skills needed to shape schools and school systems in order to meet the diverse needs of all students.

**Learning Outcomes**

Candidates who complete the program are education leaders who have the knowledge and ability to promote the success of all students by:

1. Facilitating the development, articulation, implementation, and stewardship of a school or district vision of learning supported by the school community.
2. Promoting a positive school culture, providing an effective instructional program, applying best practice to student learning, and designing comprehensive professional growth plans for staff.
3. Managing the organization, operations, and resources in a way that promotes a safe, efficient, and effective learning environment.
4. Collaborating with families and other community members, responding to diverse community interests and needs, and mobilizing community resources.
5. Acting with integrity, fairly, and in an ethical manner.
6. Understanding, responding to, and influencing the larger political, social, economic, legal, and cultural context.

**Curriculum**
Foundation Course (6 sem. cr.)

- EDUC 8011 - Foundations for Doctoral Study in Curriculum, Instruction, and Assessment

EDUC 8090 - Doctoral Study Intensive* – continued

6 sem. cr.

*Note: This course may not be taken concurrently with any other course. Students will continue taking EDUC 8090 until they have an approved doctoral study.

Note on Licensure

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Early Childhood

This specialization prepares the early childhood professional to create system-wide changes in the early childhood field as a scholar, leader, or advocate on behalf of young children (prenatal to age 8). In this doctoral specialization, students explore child development and learning theory; familial, cultural, and societal influences on early childhood; and risk factors including trauma and poverty. Research courses cover quantitative and qualitative research methods for studying human development and provide students with hands-on opportunities to practice research design, data analysis, and collection skills. Providing a broad perspective on the complex, interdisciplinary landscape of the early childhood field, coursework examines national and international perspectives on child development; the interaction of disciplines such as medicine, psychology, and public health in the field; and the impact of public policy and funding on systems and services. The two-semester doctoral study intensive encourages original inquiry and focuses on learning, teaching, and leading within a designated community.

Learning Outcomes

At the end of this program, graduates are able to:

1. Document the use of research-based knowledge and skills in the areas of child development and/or teaching and learning to evaluate current practices and programs.
2. Assess the role of sociocultural contexts, diversity, and human relationships in influencing the development of young children.
3. Develop graduate-level scholarly skills (use of resources, scholarly writing, and critical thinking).
4. Critically evaluate existing research in areas related to the early childhood field such as area of child development or early childhood education.
5. Apply self-reflection to evaluate and ensure professional growth as advocates and leaders who promote positive social change in the field of early childhood.
7. Demonstrate abilities as skillful leaders, managers of change, relationship-builders, and collaborators with family members, colleagues, and agencies related to the field of early childhood to promote positive short- and long-term outcomes for young children and families and positive social change.
8. Demonstrate the appropriate use of research methods through the process of producing a research project.

Degree Requirements

- 54 total semester credit hours
- Foundation course (6 sem. cr.)
- Applied Research course (6 sem. cr.)
- Core courses (24 sem. cr.)
- Research in Education course (6 sem. cr.)
- Doctoral study intensive (a minimum of 12 sem. cr.)
- One 3-day academic residency
- ePortfolio
- Minimum 9 semesters enrollment

Curriculum

Foundation Course (6 sem. cr.)

- EDUC 8850 - Foundations in Early Childhood: Developing a Shared Vision
  EDUC 8850 may not be taken with any other course.

Applied Research Course (6 sem. cr.)

- EDUC 7852 - Applied Research in Education

Core Courses (24 sem. cr.)

- EDUC 8851 - Global Perspectives on Development and Learning
• EDUC 8853 - Influences of Family, Culture, and Society in Early Childhood
• EDUC 8854 - Dynamics of Early Childhood Policies and Systems
• EDUC 8856 - Advocacy and Leadership for Positive Social Change

**Research in Practice Course (6 sem. cr.)**

• EDUC 8855 - Research in Practice

**Doctoral Study (12 sem. cr.)**

• EDUC 8081 - Completing the Prospectus
• EDUC 8090 - Doctoral Study Intensive (12 sem. cr.—6 sem. cr. per term for two terms)
  *Neither term of EDUC 8090 may be taken with any other course.

**Higher Education Leadership**

The landscape of higher education is constantly changing. In this specialization, students examine emerging trends and issues and develop the skills required to lead and manage in the complex political environment of today's colleges and universities. With a focus on the learning-centered institution, students explore how to conduct and apply research and implement effective strategies that address the needs of all stakeholders.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:
1. Employ leadership and management strategies that drive and sustain a diverse learning organization.
2. Independently conduct, evaluate, and apply research in making and implementing strategic decisions.
3. Create entrepreneurial and innovative solutions that anticipate and address real-world problems.
4. Proactively collaborate, negotiate, and advocate in ways that honor the needs and interests of all stakeholders.
5. Find, deploy, allocate, and manage resources to achieve learning-centered priorities in an ethical, legally compliant, and fiscally responsible manner.
6. Collaborate within and across organizations to promote individual and societal advancement in a global context.

Curriculum

Foundation Course (6 sem. cr.)

- EDUC 8640 - The Learning-Centered Institution
  Note: EDUC 8640 may not be taken with any other course.

Core Courses (24 sem. cr.)

- EDUC 8641 - The New Higher Education Enterprise
- EDUC 8642 - Transformative Leadership in Higher Education
- EDUC 8643 - Achieving Coherence in Complex Institutions
- EDUC 8645 - Managing Resources to Drive Change in Higher Education

**Reading and Literacy Leadership**

The Reading and Literacy Leadership specialization prepares students to evaluate the effectiveness of existing reading and literacy programs and to design new approaches aligned to Common Core standards and 21st-century skill requirements. Coursework explores the theoretical framework of language and literacy development; political, social, cultural, and economic influences on literacy and literacy programming; and assessment and analytical methods for evaluating individual proficiency and program effectiveness. Research courses provide students the opportunity to apply qualitative and quantitative research methods and develop skills in research design, data analysis, and presentation. The specialization emphasizes development of leadership skills as well as the scholarly expertise required to improve student literacy programs.

**Learning Outcomes**

At the end of this program, graduates will be able to:

1. Analyze the components of literacy in the 21st century including influences from the sociopolitical landscape, social media, technological innovations, and influences from Common Core standards.
2. Develop graduate-level scholarly skills (use of resources, scholarly writing, and critical thinking).
3. Demonstrate the ability to develop a plan to gain stakeholder support for improvement of literacy programming at the systematic level drawing on professional standards as well as leadership and change theories.
4. Critically evaluate existing research studies in the area of reading and literacy.
5. Analyze the challenges diverse learners face and the systems that enable these learners to achieve literacy success.
6. Demonstrate the ability to make appropriate literacy programming decisions based on information about literacy assessments used at the national, state, and local levels.
7. Demonstrate the appropriate use of research methods through the process of producing a research project.
8. Demonstrate the skills necessary to develop a literacy environment that enhances student learning and supports professional development for teachers.
9. Integrate concepts of positive social change in leadership, assessment, professional development, literacy curriculum, and literacy instruction activities.

**Degree Requirements**

- 54 total semester credit hours
- Foundation course (6 sem. cr.)
- Applied Research course (6 sem. cr.)
- Core courses (20 sem. cr.)
- Research in Education course (6 sem. cr.)

Special Education

This specialization examines trends, issues, consultation/collaboration, and instructional practices in special education. The curriculum, aligned with the Council for Exceptional Children's Advanced Role Content Standards, allows students to focus their studies on systemic practices or issues in the field and specialized practices for particular areas of exceptionality. Coursework explores adaptive and assistive technology, collaborative instruction between regular and special educators, school-wide interventions, culturally responsive assessment, and training of special education teachers. The coursework culminates in a doctoral study that focuses on a real-world issue in schools or organizations. *(This program does not lead to certification or licensure.)*
Learning Outcomes

The Council for Exceptional Children's (CEC) Advanced Role Content Standards address six different areas that provide the groundwork for and inform the Ed.D. in Education with a specialization in Special Education. Walden has written learning outcomes for the program that are based on the CEC (SPA) standards but rewritten specifically for these courses with measurement language. Learning outcomes for the Ed.D. in Education with a specialization in Special Education are listed below.

At the end of this program, graduates will be able to:

1. Demonstrate mastery of key concepts through scholarly writing and project completion, for legal and ethical policy that supports high quality education for individuals with exceptional learning needs.
2. Demonstrate mastery of key concepts through scholarly writing and project completion, to serve in a leadership capacity by creating procedures that respect all individuals and positive and productive work environments.
3. Demonstrate mastery of key concepts through scholarly writing and project completion, for the use of evidence-based practices for instructional programs at the school and system levels.
4. Demonstrate mastery of key concepts through scholarly writing and project completion, and the use of educational research to improve instructional and intervention techniques and materials.
5. Demonstrate the importance of an environment that supports instructional improvement by engaging in and developing a scholarly response to a local educational problem in a doctoral project study informed by a critical review of related, relevant research and theoretical frameworks, collecting and analyzing data, and resulting in a project or product that will ameliorate the problem.
6. Demonstrate mastery of key concepts through scholarly writing and project completion, of the legal rights of students, families, and personnel.
7. Plan, present, and evaluate professional development that focuses on effective practice, including expertise to support student access to learning through effective teaching strategies, curriculum standards, and assistive technology.
8. Demonstrate mastery of key concepts, through scholarly writing and project completion, the importance of collaboration in special education, and the integration of services for individuals with exceptionalities.

Degree Requirements

- 60 total semester credit hours
- Foundation course (6 sem. cr.)
- Applied Research course (6 sem. cr.)
- Core courses (30 sem. cr.)
- Project study (6 sem. cr.)
- Doctoral study intensive (a minimum of 12 sem. cr.)

Teacher Leadership

The specialization in Teacher Leadership focuses on the “teacher as leader” and promotes experienced educators to effect change through improvement of teaching and learning. Unlike doctoral programs that are designed to lead instructional professionals out of the learning setting into positions as principals, superintendents, or other administrators, this degree is intended for educators whose aspirations are as follows:

- To perfect the art and science of teaching.
- To use their talents to improve learning among students in the classroom.
- To influence positively the conditions for learning at the school, district, community, and state levels.

Learning Outcomes

At the end of this program, educator professionals will be able to:

1. Demonstrate knowledge of the current literature and trends in education.
2. Demonstrate the reflective teaching and learning skills needed by a professional in the field of education.
3. Utilize effective communication skills in presenting academic research so as to elicit social change.
4. Identify and propose a solution to educational problem(s). (designing/developing research)
5. Demonstrate leadership via effective communication and use of technology.
6. Demonstrate leadership through effective communication about educational issues/topics to popular audiences in written work, speech, and through using technology.
7. Utilize effective communication skills in presenting academic research so as to elicit social change.
8. Show awareness of global interrelationships and affirm diversity in their own work about teaching and learning.
9. Be familiar with scholarship in the field of education that is sensitive to global interrelationships and affirms diversity.
10. Collaborate with a range of stakeholders in education and/or learning organizations in order to effect positive social change.
11. Demonstrate active commitment to social change.

Note on Licensure

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a P–12 principal.

In addition, some of Walden’s programs in leadership can lead to principal licensure in Texas through a partnership with the Harris County Department of Education. For more information about the Texas Principal Certification Program, please contact Harris County at http://www.hcde-texas.org/default.aspx?name=PrinCert.

Prospective candidates from outside of Minnesota should review their state licensure requirements to ensure that completing a teacher or principal preparation program at Walden will meet eligibility requirements for similar licensure in their states.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Ph.D. in Education

The Ph.D. in Education is a research-focused program that produces outstanding professionals who can address the nation’s most pressing challenges in the field of education. Specializations in a variety of established and newly emerging fields and a general program are available. For those educators whose particular learning interests are not met by one of the specializations or whose interests are interdisciplinary, The Richard W. Riley College of Education and Leadership also offers a self-designed specialization to meet their unique needs.

The Ph.D. in Education learning outcomes will be demonstrated through numerous direct and indirect measures in each of the Ph.D. specializations.

Learning Outcomes

At the end of this program, the education professional will:

1. Synthesize content knowledge, concepts, and principles grounded in a specific educational discipline.
2. Propose interventions based on the analysis of educational needs.
3. Design and conduct research that is grounded in theory and based on previous research in the field.
4. Conduct research that positively impacts social change.
5. Communicate to multiple audiences via effective oral and written formats.
6. Advocate for social change that integrates diverse perspectives and demonstrates awareness of global interrelationships.

**Specializations**

- General Program
- Adult Education Leadership
- Assessment, Evaluation, and Accountability
- Community College Leadership
- Curriculum, Instruction, and Assessment
- Early Childhood Education
- Educational Technology
- Global and Comparative Education
- Higher Education
- Leadership, Policy, and Change in Education
- Learning, Instruction, and Innovation
- Special Education
- Self-Designed

**Degree Requirements**

**Course-Based Specializations**

*Assessment, Evaluation, and Accountability; Educational Technology; Leadership, Policy, and Change; and Learning, Instruction, and Innovation specializations*

- 85–96 total quarter credit hours
- Foundation courses
- Courses and Research Sequence
- Proposal, dissertation, and oral presentations (20 cr.)
- Satisfactory progress in EDUC 8900 or EDUC 9001 while enrolled
- Four Ph.D. residencies
- Minimum 8 quarters enrollment
- ePortfolio

**Mixed-Model (KAM/Course) Specializations**
General Program; Adult Education Leadership; Community College Leadership; Curriculum, Instruction, and Assessment; Early Childhood Education; Global and Comparative Education; Higher Education; Special Education; and Self-Designed specializations

• 96 total quarter credit hours
• Foundation courses (12 cr.)
• KAMs and/or courses and Research Sequence (64 cr.)
• Satisfactory progress in EDUC 8800 or EDUC 9002 while enrolled
• Proposal, dissertation, and oral presentations (20 cr.)
• Four Ph.D. residencies
• Minimum 8 quarters enrollment
• ePortfolio

**Timing of residencies**

- Residency 1: Upon enrollment in program
- Residency 2: Within 18 months of start date or linked to registration in or completion of first research course
- Residency 3: By the end of third year
- Residency 4: During third year and beyond

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Education program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**General Program**

The General Program is intended for students whose professional practice and career goals cover a range of educational topics or are interdisciplinary, combining specific education subjects with complementary subjects from the social and behavioral sciences or the humanities.
Curriculum

Foundation Courses (12 cr.)
- EDUC 8110 - Development of the Scholar-Practitioner
- EDUC 8111 - Principles of Social Change
- EDUC 8112 - Social Change in Education

Core Courses (24 cr.)
- EDUC 8113 - The Learner Across the Lifespan
- EDUC 8114 - Learning and Instruction
- EDUC 8115 - Assessment and Accountability in Education
- EDUC 8116 - Leadership in a Global Society
- EDUC 8117 - Educational Organizations and Contexts
- EDUC 8118 - Innovation and Change in Education

Core Research Sequence (12 cr.)
Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed prior to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to beginning the dissertation or attending Residency 3.
- RSCH 8100D - Research Theory, Design, and Methods
- RSCH 8200D - Quantitative Reasoning and Analysis
- RSCH 8300D - Qualitative Reasoning and Analysis

Specialized KAMS V–VI (24 cr.)

Specialized KAM V: Theories of Intelligence, Learning, and Motivation (12 cr.)
This KAM examines theoretical foundations of the learning process with its associated phenomena, such as intelligence, cognition, motivation, and their implications for educators. Students demonstrate mastery of classical and contemporary theory and research knowledge as background for use in teaching, and learning facilitation of, students in a range of education settings.
- Breadth: EDUC 8510 - Theories of Intelligence, Learning, and Motivation as a Basic Praxis
- Depth: EDUC 8520 - Educators as Facilitators of Learning for Diverse Populations
- Application: EDUC 8530 - Professional Practice Using Learning Theories

Specialized KAM VI: Learning Institutions: Organization, Purpose, Goals, and Missions (12 cr.)
This KAM examines critical issues in the organization and planning of learning institutions. Students research and identify principles of effective practice, identify and sharpen skills in
planning and implementing instructional programs, and develop abilities as education professionals.

- **Breadth:** *EDUC 8610 - The Organization of Learning Institutions*
- **Depth:** *EDUC 8620 - Social Change in Learning Institutions and Curricula*
- **Application:** *EDUC 8630 - Creating and Implementing Educational Change*

**Advanced Research Courses (4 cr.)**

Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:

- *RSCH 8250D - Advanced Quantitative Reasoning and Analysis*
- *RSCH 8350D - Advanced Qualitative Reasoning and Analysis*
- *RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis*

**Dissertation (20 cr.)**

- *EDUC 8900 - Dissertation Companion*
- *EDUC 9001 - Dissertation*

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

**Adult Education Leadership**

The historical roots of social change are grounded in adult education. This specialization is designed for educators who want to think broadly about the field of adult education, whether in community-based settings, schools, government, or the private sector. The specialization guides students in understanding the interdisciplinary nature of adult education as a field of study,
principles of adult learning and development, and the impact of adult educators on organizations and communities in which they work.

**Curriculum**

The Ph.D. in Education program requires mastery of knowledge in three areas:

- The foundational social and behavioral sciences
- Scientific inquiry and research methodology
- The student's specialized field chosen from a broad range of professional education studies

**Foundation Courses (12 cr.)**

- EDUC 8110 - Development of the Scholar-Practitioner
- EDUC 8111 - Principles of Social Change
- EDUC 8112 - Social Change in Education

**Core Courses (24 cr.)**

- EDUC 8113 - The Learner Across the Lifespan
- EDUC 8114 - Learning and Instruction
- EDUC 8115 - Assessment and Accountability in Education
- EDUC 8116 - Leadership in a Global Society
- EDUC 8117 - Educational Organizations and Contexts
- EDUC 8118 - Innovation and Change in Education

**Specialized KAMS V–VI (24 cr.)**

**Specialized KAM V: Principles of Adult Education (12 cr.)**

This KAM examines the adult learner through historical, philosophical, and psychosocial principles, with a focus on the interdisciplinary nature of adult education. Students demonstrate mastery of theory and research knowledge for application in a range of community education settings, including those outside the United States.

- **Breadth:** EDUC 8514 - Interdisciplinary Foundations and Theory in Adult Education and Learning
- **Depth:** EDUC 8524 - Current Research in Adult Education and Learning
- **Application:** EDUC 8534 - Professional Practice in Adult Learning

**Specialized KAM VI: Critical Issues for Adult Education Leaders (12 cr.)**

This KAM examines the role of the adult education professional within the economic, social, political, and organizational environments. Students research the integration of adult learning theory with program planning and management in a variety of contexts, including community development, education institutions, business, government, and nonprofit organizations.

- **Breadth:** EDUC 8614 - Principles for Adult Education Leaders
• Depth: EDUC 8624 - Current Research in Program Planning and Delivery
• Application: EDUC 8634 - Professional Practice for Adult Education Leaders

Core Research Sequence (12 cr.)
Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed prior to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8100D - Research Theory, Design, and Methods
- RSCH 8200D - Quantitative Reasoning and Analysis
- RSCH 8300D - Qualitative Reasoning and Analysis

Advanced Research Courses (4 cr.)
Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:
- RSCH 8250D - Advanced Quantitative Reasoning and Analysis
- RSCH 8350D - Advanced Qualitative Reasoning and Analysis
- RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis

Dissertation (20 cr.)
- EDUC 8900 - Dissertation Companion
- EDUC 9001 - Dissertation

Note on Licensure
The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a preK–12 principal. It has also been approved in Ohio for leading to building principal licensure (grades preK–6, grades 4–9, and grades 5–12).

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Assessment, Evaluation, and Accountability
This specialization focuses on preparing leaders and scholars to address the growing need for assessment and accountability systems across all sectors. Covering the technical elements of assessment, course topics include analyzing the quantitative, qualitative, and mixed-methods data essential to accountability systems and designing assessment systems to improve individual, program, and institutional performance. Focusing on assessment as a tool for positive change,
this specialization also considers the complex sociological, political, and economic factors affecting assessment, evaluation, and accountability processes.

**Prospective Georgia students:** At this time, this program is not eligible for certificate level upgrades in Georgia.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:
1. Formulate and execute practices that unite evaluation, assessment, and accountability in a socially responsible and ethical manner.
2. Develop and defend a comprehensive plan for assessment systems designed for improving the performance of individuals, programs, and institutions.
3. Design proposals for evaluation, assessment, and accountability with evidence of sociological, political, and economic considerations integrated within.
4. Construct reports that clearly synthesize and communicate actionable findings for quantitative and qualitative data.
5. Develop written and visual assessment communication in a way that is appropriate to the audience and purpose.
6. Execute a plan for sustaining a culture of improvement in an organization.

**Curriculum**

**Foundation Courses (12 cr.)**

- EDUC 8110 - Development of the Scholar-Practitioner
- EDUC 8111 - Principles of Social Change
- EDUC 8112 - Social Change in Education

**Core Courses (24 cr.)**

- EDUC 8113 - The Learner Across the Lifespan
- EDUC 8114 - Learning and Instruction
- EDUC 8115 - Assessment and Accountability in Education
- EDUC 8116 - Leadership in a Global Society
- EDUC 8117 - Educational Organizations and Contexts
- EDUC 8118 - Innovation and Change in Education

**Specialization Courses (24 cr.)**

- EDUC 8350 - A New Vision of Assessment, Evaluation, and Accountability
- EDUC 8351 - Assessment, Evaluation, and Accountability: The Sociological, Political, and Economic Contexts
- EDUC 8352 - Assessing for Individual Growth
- EDUC 8353 - Evaluating and Improving Programs, Organizations, and Systems
- EDUC 8354 - Dynamics of Communication for Impact and Results
• **EDUC 8355 - Building a Culture of Continuous Improvement**

**Core Research Sequence (12 cr.)**
Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed prior to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to beginning the dissertation or attending Residency 3.

- **RSCH 8100D - Research Theory, Design, and Methods**
- **RSCH 8200D - Quantitative Reasoning and Analysis**
- **RSCH 8300D - Qualitative Reasoning and Analysis**

**Advanced Research Courses (4 cr.)**
Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:
- **RSCH 8250D - Advanced Quantitative Reasoning and Analysis**
- **RSCH 8350D - Advanced Qualitative Reasoning and Analysis**
- **RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis**

**Dissertation (20 cr.)**
- **EDUC 8900 - Dissertation Companion**
- **EDUC 9001 - Dissertation**

**Community College Leadership**
Students in the Community College Leadership specialization (whether from the perspective of president, academic leader, student services, technology specialist, specific area program officer, or other leadership position within the community college) will develop proficiency in knowing the following:
- How individuals, particularly adults, learn most effectively
- What tools and strategies best promote learning
- How education systems and policies can be changed to promote the academic mission of the community college in today's society

**Curriculum**
The Ph.D. in Education program requires mastery of knowledge in three areas:
- The foundational social and behavioral sciences
- Scientific inquiry and research methodology
- The student's specialized field chosen from a broad range of professional education studies
Foundation Courses (12 cr.)

- EDUC 8110 - Development of the Scholar-Practitioner
- EDUC 8111 - Principles of Social Change
- EDUC 8112 - Social Change in Education

Core Courses (24 cr.)

- EDUC 8113 - The Learner Across the Lifespan
- EDUC 8114 - Learning and Instruction
- EDUC 8115 - Assessment and Accountability in Education
- EDUC 8116 - Leadership in a Global Society
- EDUC 8117 - Educational Organizations and Contexts
- EDUC 8118 - Innovation and Change in Education

Core Research Sequence (12 cr.)

Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed prior to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8100D - Research Theory, Design, and Methods
- RSCH 8200D - Quantitative Reasoning and Analysis
- RSCH 8300D - Qualitative Reasoning and Analysis

Specialized KAMs V–VI (24 cr.)

Specialized KAM V: The Contemporary Community College (12 cr.)

- Breadth: EDUC 8512 - Perspectives on the Role of the Community College
- Depth: EDUC 8522 - Current Research in Trends in the Community College
- Application: EDUC 8532 - Professional Practice and Current Trends in Community Colleges

Specialized KAM VI: Leadership and Strategic Planning in the Community College (12 cr.)

- Breadth: EDUC 8612 - Perspectives on Leadership and Strategic Planning in Community Colleges
- Depth: EDUC 8622 - Current Research in Leadership and Strategic Planning in Community Colleges
- Application: EDUC 8632 - Professional Practice in Leadership and Strategic Planning in Community Colleges

Advanced Research Courses (4 cr.)

Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods.
When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:

- RSCH 8250D - Advanced Quantitative Reasoning and Analysis
- RSCH 8350D - Advanced Qualitative Reasoning and Analysis
- RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis

Dissertation (20 cr.)

- EDUC 8900 - Dissertation Companion
- EDUC 9001 - Dissertation

Note on Licensure

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a preK–12 principal. It has also been approved in Ohio for leading to building principal licensure (grades preK–6, grades 4–9, and grades 5–12).

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual's responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Curriculum, Instruction, and Assessment

The alignment of curriculum, instruction, and assessment practices to maximize student learning is the essence of education. Educators must draw on current research-based knowledge of effective educational methods to maximize their learning. This specialization allows students flexibility, providing in-depth individualized research opportunities tailored to their chosen academic discipline, age level, or grade level. One-on-one mentoring and research methods courses produce outstanding professionals who are researcher-practitioners.

Curriculum

The Ph.D. in Education program requires mastery of knowledge in three areas:

- The foundational social and behavioral sciences
- Scientific inquiry and research methodology
- The student's specialized field chosen from a broad range of professional education studies

Foundation Courses (12 cr.)

- EDUC 8110 - Development of the Scholar-Practitioner
- EDUC 8111 - Principles of Social Change
- EDUC 8112 - Social Change in Education

Core Courses (24 cr.)
- EDUC 8113 - The Learner Across the Lifespan
- EDUC 8114 - Learning and Instruction
- EDUC 8115 - Assessment and Accountability in Education
- EDUC 8116 - Leadership in a Global Society
- EDUC 8117 - Educational Organizations and Contexts
- EDUC 8118 - Innovation and Change in Education

**Core Research Sequence (12 cr.)**

Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed prior to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8100D - Research Theory, Design, and Methods
- RSCH 8200D - Quantitative Reasoning and Analysis
- RSCH 8300D - Qualitative Reasoning and Analysis

**Specialized KAMs V–VI (24 cr.)**

**Specialized KAM V: Principles of Curriculum, Instruction, and Assessment (12 cr.)**

This KAM examines how curriculum, instruction, and assessment relate to human learning, intelligence, and motivation. Identification and development of best practices may be considered at multiple stages (from early childhood through higher education, adult, and lifelong learning) and from multiple disciplinary perspectives. Implications and alignment of these practices with desired educational outcomes are also analyzed.

- **Breadth:** EDUC 8518 - Theories of Human Learning in Curriculum, Instruction, and Assessment
- **Depth:** EDUC 8528 - Current Research in Curriculum, Instruction, and Assessment to Optimize Human Learning
- **Application:** EDUC 8538 - Professional Practice in Learning Related to Curriculum, Instruction, and Assessment

**Specialized KAM VI: Leadership in Curriculum, Instruction, and Assessment (12 cr.)**

Critical issues surrounding leadership in curriculum, instruction, and assessment are analyzed in this KAM. Implications of new curriculum and instruction practices, as well as other implementation factors, are examined. Developing support for initiatives within the learning environment and the community are considered. Central to this discussion is the role of leadership in both the success and failure of change, instruction, and assessment. Perhaps most important is the role of the researcher-practitioner in creating positive social change in the field of education.

- **Breadth:** EDUC 8618 - Theories of Leadership in Curriculum, Instruction, and Assessment
- **Depth:** EDUC 8628 - Current Research and Issues in Development and Leadership of Curriculum, Instruction, and Assessment
- **Application:** EDUC 8638 - Program Development and Leadership in Curriculum, Instruction, and Assessment
**Advanced Research Courses (4 cr.)**

Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:

- **RSCH 8250D - Advanced Quantitative Reasoning and Analysis**
- **RSCH 8350D - Advanced Qualitative Reasoning and Analysis**
- **RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis**

**Dissertation (20 cr.)**

- **EDUC 8900 - Dissertation Companion**
- **EDUC 9001 - Dissertation**

**Note on Licensure**

The only program offered by Walden that is state-approved as leading to any administrative/leadership license (e.g., assistant principal, principal, teacher leader, superintendent) is the Ed.S. in Educational Leadership and Administration, which has been approved in Minnesota for leading to licensure as a preK–12 principal. It has also been approved in Ohio for leading to building principal licensure (grades preK–6, grades 4–9, and grades 5–12).

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

**Early Childhood Education**

As the demographics of the family and workforce change, the nation is increasingly turning its attention to the critical need for early childhood development and education. The Early Childhood Education specialization guides educators in gaining the expertise needed to create and implement new educational program practices, to apply emerging research on development for children ages 0–8, and to conceptualize new paradigms for early learning at home and in settings for early care and education.

The core KAM curriculum in the foundational social and behavioral sciences is aimed at a range of unique early childhood topics and research perspectives.

**Curriculum**

The Ph.D. in Education program requires mastery of knowledge in three areas:

- The foundational social and behavioral sciences
- Scientific inquiry and research methodology
- The student's specialized field chosen from a broad range of professional education studies
Foundation Courses (12 cr.)
- EDUC 8110 - Development of the Scholar-Practitioner
- EDUC 8111 - Principles of Social Change
- EDUC 8112 - Social Change in Education

Core Courses (24 cr.)
- EDUC 8113 - The Learner Across the Lifespan
- EDUC 8114 - Learning and Instruction
- EDUC 8115 - Assessment and Accountability in Education
- EDUC 8116 - Leadership in a Global Society
- EDUC 8117 - Educational Organizations and Contexts
- EDUC 8118 - Innovation and Change in Education

Core Research Sequence (12 cr.)
Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed prior to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to beginning the dissertation or attending Residency 3.
- RSCH 8100D - Research Theory, Design, and Methods
- RSCH 8200D - Quantitative Reasoning and Analysis
- RSCH 8300D - Qualitative Reasoning and Analysis

Specialized KAMS V–VI (24 cr.)

Specialized KAM V: Theories of Intelligence, Learning, and Motivation in Early Childhood Education (12 cr.)
This KAM is an analysis of intelligence and motivation theories applicable to the child from birth through age 8. Implications for educators, political leaders, policy-makers, and early childhood advocates are examined. Fiscal policy and imperatives are explored in relation to programming for varied learning and motivational styles.
- Breadth: EDUC 8513 - Theories of Intelligence, Learning, and Motivation: Birth to Age 8
- Depth: EDUC 8523 - Early Childhood Program Delivery in a Multicultural/Multifaceted Society
- Application: EDUC 8533 - Professional Practice Using Learning and Motivational Theory in Context

Specialized KAM VI: Critical Issues in the Organization and Planning of Early Childhood Education Programs (12 cr.)
Critical issues are explored in the organization and planning of early childhood programs, including theoretical perspectives on early childhood education organization, developmentally appropriate practices, and environmental and advocacy issues in early childhood organizational contexts. Depth and Application sections examine licensure and accreditation standards, role of federal and state governments, policy and resource allocation, cultural and linguistic diversity,
family involvement, ramifications of current brain research for program development, and application of early childhood education programs with focus on theory, design, execution, and evaluation.

- **Breadth:** EDUC 8613 - Organization of Early Childhood Education Programs
- **Depth:** EDUC 8623 - Critical Issues in Early Childhood Programs
- **Application:** EDUC 8633 - Early Childhood Programs: A Comprehensive Approach

**Advanced Research Courses (4 cr.)**

Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:

- **RSCH 8250D** - Advanced Quantitative Reasoning and Analysis
- **RSCH 8350D** - Advanced Qualitative Reasoning and Analysis
- **RSCH 8450D** - Advanced Mixed-Methods Reasoning and Analysis

**Dissertation (20 cr.)**

- **EDUC 8900** - Dissertation Companion
- **EDUC 9001** - Dissertation

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

**Educational Technology**

This specialization prepares students to develop solutions, create educational technologies, and lead technological change to improve learning in a wide range of education and workplace settings. Students explore instructional design principles; technology’s influence on creativity and learning in the workplace; and the latest developments in e-learning, multi-device and
mobile learning platforms, cloud technologies, and global collaboration. Students learn to evaluate emerging technologies; design and produce interactive instructional media and e-learning modules; and design plans for successfully leading instructional change in organizations. Through their dissertations, students conduct original research and contribute to the body of knowledge in a rapidly changing field.

**Curriculum**

The Ph.D. in Education program requires mastery of knowledge in three areas:
- The foundational social and behavioral sciences
- Scientific inquiry and research methodology
- The student's specialized field chosen from a broad range of professional education studies

**Foundation Course (5 cr.)**

- EDUC 8002 - Leading the Future of Education

**Core Course (4 cr.)**

- EDUC 8112 - Social Change in Education

**Core Research Sequence (12 cr.)**

Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100 must be completed prior to Residency 2 of the academic residencies. RSCH 8200 and RSCH 8300 must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8100 - Research Theory, Design, and Methods
- RSCH 8200 - Quantitative Reasoning and Analysis
- RSCH 8300 - Qualitative Reasoning and Analysis

**Specialization Courses (40 cr.)**

- EDUC 8341 - Trends and Issues in Educational Technology
- EDUC 8342 - Emerging and Future Technologies
- EDUC 8343 - Creating Digital Media
- EDUC 8344 - Innovations and the Diffusion of Learning Technologies
- EDUC 8345 - E-Learning
- EDUC 8346 - Leading Change
- EDUC 8347 - Designing Instruction for E-Learning
- EDUC 8348 - Current Research in Educational Technology

**Advanced Research Courses (4 cr.)**
Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:
- R SCH 8250 - Advanced Quantitative Reasoning and Analysis
- R SCH 8350 - Advanced Qualitative Reasoning and Analysis
- R SCH 8450 - Advanced Mixed-Methods Reasoning and Analysis

Dissertation (20 cr.)
- EDUC 8900 - Dissertation Companion
- EDUC 9001 - Dissertation

Timing of residencies
Residency 1: Upon enrollment in program
Residency 2: Within 18 months of start date or linked to registration in or completion of first research course
Residency 3: By the end of third year
Residency 4: During third year and beyond
**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).

**Global and Comparative Education**

The Global and Comparative Education specialization introduces students to the practices, policies, and conditions that influence student learning, impact education systems, and shape societies around the world. Through a mixed-model format, students will learn to develop, analyze, and implement new educational policies in a variety of multicultural settings while examining learning systems and strategies in specific international regions. Graduates of this program will be prepared to lead their organizations through the societal and cultural changes that result from globalization and its impacts on education.

**Degree Requirements**

- 96 total quarter credit hours
- Foundation courses (12 cr.)
- KAMs and/or courses and Research Sequence (64 cr.)
- Satisfactory progress in all SBSF 8100 registrations
- Proposal, dissertation, and oral presentations (20 cr.)
- 16 units of academic residency
- Minimum 8–10 quarters enrollment
- ePortfolio

**Curriculum**

**Foundation Courses (12 cr.)**
• EDUC 8110 - Development of the Scholar-Practitioner
• EDUC 8111 - Principles of Social Change
• EDUC 8112 - Social Change in Education

Core Courses (24 cr.)

• EDUC 8113 - The Learner Across the Lifespan
• EDUC 8114 - Learning and Instruction
• EDUC 8115 - Assessment and Accountability in Education
• EDUC 8116 - Leadership in a Global Society
• EDUC 8117 - Educational Organizations and Contexts
• EDUC 8118 - Innovation and Change in Education

Specialized KAMs V-VI (24 cr.)

Specialized KAM V: Global and Comparative Perspectives on Intelligence, Learning, and Motivation (12 cr.)
What types of learning opportunities are provided in specific national and cultural contexts, for whom, and for what purposes? How does cultural diversity within a society impact learning opportunities? In this KAM, educators adopt a global and comparative educational perspective to compare, contrast, and synthesize theory and research on intelligence, learning, and motivation. Using this perspective, educators propose innovations to improve educational opportunities in specific national or local settings within a global context.

• Breadth: EDUC 8540 - Culturally Situated Theories of Intelligence, Learning, and Motivation as a Basic Praxis
• Depth: EDUC 8550 - Implications of Global and Comparative International Research for Intelligence, Motivation, and Learning
• Application: EDUC 8560 - Professional Practice to Promote Successs in Global Education

Specialized KAM VI: Global and Transcultural Learning Institutions (12 cr.)
In this KAM, educators examine critical issues in the organization and planning of learning institutions through a framework of cross-cultural, multinational, and/or international contexts. Educators focus on comparative analysis of programs, purposes, and processes and the movement toward global standardization of school subjects, testing and assessment, and professional knowledge requirements. Candidates analyze the global interconnectedness and potential impact of economic, political, and social systems on local and societal educational practice and programs to promote positive social change.

• Breadth: EDUC 8650 - Organizational Theories on the Role of Learning Institutions Within and Across Societies
• Depth: EDUC 8660 - Comparative Research on Global Change and Its Impact on International, National, and Local Learning Institutions and Curricula
• Application: EDUC 8670 - Transformational Change Through Education in International, National, and Local Sites
Core Research Sequence (12 cr.)

Courses comprising the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed prior to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to beginning the dissertation.

- RSCH 8100D - Research Theory, Design, and Methods
- RSCH 8200D - Quantitative Reasoning and Analysis
- RSCH 8300D - Qualitative Reasoning and Analysis

Advanced Research Courses (4 cr.)

Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

- RSCH 8250D - Advanced Quantitative Reasoning and Analysis
- RSCH 8350D - Advanced Qualitative Reasoning and Analysis
- RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis

Dissertation (20 cr.)

- EDUC 9001 - Dissertation

Higher Education

During the 21st century, colleges and universities will undergo profound transformations as the student population becomes older and more diverse, and as educational methods incorporate more technological solutions and distance approaches.

Building on the foundational core KAMs in the social and behavioral sciences, the Higher Education curriculum emphasizes proficiency in the following:

- Understanding the needs of a changing clientele and academic community
- Analyzing and implementing strategies to promote learning and to support development in higher education
- Learning how systems and policies can be used to assure organizational effectiveness and social change in postsecondary settings

Contexts for the study and practice of higher education include community colleges; private and public liberal arts colleges; distance-learning institutions; regional and state universities; proprietary, technical, and trade schools; state and federal agencies; and national professional associations.
Curriculum

Foundation Courses (12 cr.)

- EDUC 8110 - Development of the Scholar-Practitioner
- EDUC 8111 - Principles of Social Change
- EDUC 8112 - Social Change in Education

Core Courses (24 cr.)

- EDUC 8113 - The Learner Across the Lifespan
- EDUC 8114 - Learning and Instruction
- EDUC 8115 - Assessment and Accountability in Education
- EDUC 8116 - Leadership in a Global Society
- EDUC 8117 - Educational Organizations and Contexts
- EDUC 8118 - Innovation and Change in Education

Core Research Sequence (12 cr.)

Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed prior to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8100D - Research Theory, Design, and Methods
- RSCH 8200D - Quantitative Reasoning and Analysis
- RSCH 8300D - Qualitative Reasoning and Analysis

Specialized KAMs V–VI (24 cr.)

Specialized KAM V: Learning and Development in Higher Education (12 cr.)

This KAM addresses the theoretical foundations of higher education through a multidisciplinary approach. It focuses on the processes of learning and development, and the role of the education environments in which they occur. This analysis includes identification and evaluation of techniques and methods that support student success. This knowledge is then applied to a selected area of practice in the academic community.

- Breadth: EDUC 8516 - Multiple Perspectives on Learning and Development in Higher Education
- Depth: EDUC 8526 - Current Research on Learning and Development in Higher Education
- Application: EDUC 8536 - Application to Improve Professional Practice in Higher Education

Specialized KAM VI: Effectiveness of Higher Education Organizations (12 cr.)

This KAM concerns effectiveness in higher education from the perspectives of constituents, providers, and regulators or evaluators. It focuses on the major approaches to demonstrating and assuring quality, as called for by external constituents and initiated by internal participants.
Strategies for organizational effectiveness and accountability are reviewed and evaluated within the current climate of change. Evidence for the efficacy of various approaches to improvement is emphasized in an application to professional practice in higher education.

- **Breadth:** EDUC 8617 - Perspectives on the Effectiveness of Higher Education Organizations
- **Depth:** EDUC 8627 - Contemporary Strategies for Assuring Effectiveness in Higher Education
- **Application:** EDUC 8637 - Application of Improvement Strategies in Higher Education

**Advanced Research Courses (4 cr.)**

Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:

- RSCH 8250D - Advanced Quantitative Reasoning and Analysis
- RSCH 8350D - Advanced Qualitative Reasoning and Analysis
- RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis

**Dissertation (20 cr.)**

- EDUC 8900 - Dissertation Companion
- EDUC 9001 - Dissertation

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden's programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual's responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

**Leadership, Policy, and Change in Education**

The creation and implementation of education policy is critical to advancing change in the field. This specialization is designed for school, district, and educational leaders across the education spectrum, from preschool through higher education, who want to continue to enhance their leadership abilities and influence policy at the local, national, and institutional levels. Students
gain the skills needed to provide informed leadership, affect policy, and guide the change process at all levels of the education system. This specialization is offered in a course-based format that allows students to complete a structured timeline to degree completion.

Curriculum

Foundation Courses (12 cr.)

- EDUC 8110 - Development of the Scholar-Practitioner
- EDUC 8111 - Principles of Social Change
- EDUC 8112 - Social Change in Education

Core Courses (24 cr.)

- EDUC 8113 - The Learner Across the Lifespan
- EDUC 8114 - Learning and Instruction
- EDUC 8115 - Assessment and Accountability in Education
- EDUC 8116 - Leadership in a Global Society
- EDUC 8117 - Educational Organizations and Contexts
- EDUC 8118 - Innovation and Change in Education

Specialization Courses (24 cr.)

- EDUC 8210 - Governance and Politics of Education
- EDUC 8211 - Economics of Education
- EDUC 8212 - Education Law
- EDUC 8213 - Policy Development and Implementation
- EDUC 8214 - Leadership for Change in Education
- EDUC 8215 - Capacity, Capability, and Sustainability

Core Research Sequence (12 cr.)

Courses comprising the core research sequence are conducted online and require weekly readings, participation in discussions, assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed during the second term and is linked to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to registering for Residency 3 and for the dissertation.

- RSCH 8100D - Research Theory, Design, and Methods
- RSCH 8200D - Quantitative Reasoning and Analysis
- RSCH 8300D - Qualitative Reasoning and Analysis

Advanced Research Courses (4 cr.)

Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods.
When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:

- **RSCH 8250D - Advanced Quantitative Reasoning and Analysis**
- **RSCH 8350D - Advanced Qualitative Reasoning and Analysis**
- **RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis**

**Dissertation (20 cr.)**

- **EDUC 8900 - Dissertation Companion**
- **EDUC 9001 - Dissertation**

**Learning, Instruction, and Innovation**

This specialization explores creative and innovative approaches to learning that integrate technology with the needs of learners in a global community. Educators gain a comprehensive understanding of learning theory, and they research the cognitive, psychosocial, and environmental dimensions that support learning across the lifespan. This specialization can position educators to become leaders across learning environments--from preschool through higher education--as well as in government, nonprofit, or corporate settings.

**Curriculum**

**Foundation Courses (12 cr.)**

- **EDUC 8110 - Development of the Scholar-Practitioner**
- **EDUC 8111 - Principles of Social Change**
- **EDUC 8112 - Social Change in Education**

**Core Courses (24 cr.)**

- **EDUC 8113 - The Learner Across the Lifespan**
- **EDUC 8114 - Learning and Instruction**
- **EDUC 8115 - Assessment and Accountability in Education**
- **EDUC 8116 - Leadership in a Global Society**
- **EDUC 8117 - Educational Organizations and Contexts**
- **EDUC 8118 - Innovation and Change in Education**

**Specialization Courses (24 cr.)**

- **EDUC 8401 - Cognition, Culture, and Learning**
- **EDUC 8402 - Learning Environments and Organizational Transformation**
- **EDUC 8403 - Motivation, Engagement, and Learning**
- **EDUC 8404 - Creativity and Critical Thought**
- **EDUC 8406 - Designing Responsive Curriculum for Learning**
Core Research Sequence (12 cr.)
Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100D must be completed prior to Residency 2 of the academic residencies. RSCH 8200D and RSCH 8300D must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8100D - Research Theory, Design, and Methods
- RSCH 8200D - Quantitative Reasoning and Analysis
- RSCH 8300D - Qualitative Reasoning and Analysis

Advanced Research Courses (4 cr.)
Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:
- RSCH 8250D - Advanced Quantitative Reasoning and Analysis
- RSCH 8350D - Advanced Qualitative Reasoning and Analysis
- RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis

Dissertation (20 cr.)
- EDUC 8900 - Dissertation Companion
- EDUC 9001 - Dissertation

Special Education
Most educators are strong advocates for improved services for individuals with exceptionalities/disabilities. Unfortunately, resources for the delivery of these services are often far less than schools and school districts desire. This specialization guides advanced students in the acquisition of knowledge and resources needed to succeed and excel in the special education field and to better assist their own students in the self-actualization process. The curriculum emphasizes learning services for individuals with exceptionalities/disabilities, and incorporates the related areas of special education administration, including law, finance, and ethics.

Learning Outcomes
By the end of this program, education professionals gain:
1. Knowledge of emerging trends in the field of special education that include adaptive and assistive technology, policy, and service delivery methods for students with special needs.
2. Methods of research design specific to the study of effective special education practices, including single subject, quantitative, and qualitative research designs.
3. In-depth knowledge of specialized academic instructional practices for particular special education needs of students with disabilities.

4. In-depth knowledge of specialized social-emotional and behavioral instructional practices for particular special education needs of students with disabilities.

5. Advanced knowledge of school-wide, problem-solving models that include response to intervention and a multi-tiered model for providing services to students with behavioral and academic challenges.

6. In-depth knowledge of best practices for preparing special educators, including methods for collaboration, consultation, and change theory.

7. Knowledge of special education law and policy and ways to influence the process on behalf of students with disabilities.

Curriculum

The Ph.D. in Education program requires mastery of knowledge in three areas:

- The foundational social and behavioral sciences
- Scientific inquiry and research methodology
- The student's specialized field chosen from a broad range of professional education studies

Foundation Courses (12 cr.)

- **EDUC 8110 - Development of the Scholar-Practitioner**
- **EDUC 8111 - Principles of Social Change**
- **EDUC 8112 - Social Change in Education**

Core Courses (24 cr.)

- **EDUC 8113 - The Learner Across the Lifespan**
- **EDUC 8114 - Learning and Instruction**
- **EDUC 8115 - Assessment and Accountability in Education**
- **EDUC 8116 - Leadership in a Global Society**
- **EDUC 8117 - Educational Organizations and Contexts**
- **EDUC 8118 - Innovation and Change in Education**

Core Research Sequence (12 cr.)

Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. **RSCH 8100D** must be completed prior to Residency 2 of the academic residencies. **RSCH 8200D** and **RSCH 8300D** must be completed prior to beginning the dissertation or attending Residency 3.

- **RSCH 8100D - Research Theory, Design, and Methods**
- **RSCH 8200D - Quantitative Reasoning and Analysis**
- **RSCH 8300D - Qualitative Reasoning and Analysis**
Specialized KAMS V–VI (24 cr.)

Specialized KAM V: Theories of Learning, Motivation, and Intelligence; and Implications for Persons With Special Needs (12 cr.)

This KAM covers traditional, current, and emerging theoretical underpinnings and principles of learning and exceptionality and related facets, as well as implications for educators within the context of inclusive or categorical settings.

- **Breadth:** EDUC 8511 - Theories and Principles of Human Learning and the Human Side of Exceptionalities
- **Depth:** EDUC 8521 - Educators as Facilitators of Inclusive Learning in Varied Educational Environments
- **Application:** EDUC 8531 - Educational Practice Grounded in Principles/Theories of Learning, Diversity, and Inclusion

Specialized KAM VI: Institutional Contexts for Special Education: Leadership, Learning, and Accommodation (12 cr.)

This KAM reviews delivery models for special education services and their administration. Attention is focused on the dynamics of IEP team operation, eligibility criteria, assessment procedures, and community support systems with particular reference to compliance with law. Alternative and innovative models of leadership for special education programming are explored.

- **Breadth:** EDUC 8611 - Diversity and Exceptionality in Special Education: Leading Within Learning Organizations
- **Depth:** EDUC 8621 - Due Process in Special Education: Legal and Moral Implications
- **Application:** EDUC 8631 - Practical Issues in Placement and Service Delivery

**Advanced Research Courses (4 cr.)**

Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:

- RSCH 8250D - Advanced Quantitative Reasoning and Analysis
- RSCH 8350D - Advanced Qualitative Reasoning and Analysis
- RSCH 8450D - Advanced Mixed-Methods Reasoning and Analysis

**Dissertation (20 cr.)**

- EDUC 8900 - Dissertation Companion
- EDUC 9001 - Dissertation

**Note on Licensure**
For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to www.WaldenU.edu/educlicensure.

Self-Designed

Some educators are interested in fields that are just emerging and are not yet recognized as areas of specialization at Walden University. The Self-Designed specialization, working within the General Program of Study (POS) outline, allows such individuals to create a program of study that is clearly focused on new and emerging ideas and practices. Examples include, but are not limited to, K–12 curriculum and instruction, second-language learning, community college issues or education, mathematics education, science education, adult literacy, international education, middle level education, music and arts education, and vocational education.

**Note:** Students follow the General Program of study and will develop a focus for their Self-Designed specialization for their advanced Knowledge Area Modules (KAM) V and VI. This can entail substituting KAMS V and VI with Walden Ph.D. program courses (three to four per KAM) or refocusing the KAM itself on the area of specialization. Students will have to supply the URL of an accredited university that offers a Ph.D. program with similar courses for the program to be approved.

In addition, the Self-Designed program is not intended for students who want to teach or apply for certification in a specific area, i.e., history, art, etc. It is suggested that the students interested in this option review the General Program requirements carefully.

**Declaring a Self-Designed Specialization**

Students design and declare the Self-Designed specialization in conjunction with the development of the Professional Development Plan (PDP) during their first quarter. Students are enrolled in the General program for the first quarter and beyond until completion and approval of their PDP and POS. Students work with the General and Self-Designed specialization coordinator who will give final approval of the plan. Failure to meet any of the criteria for the Self-Designed specialization will result in the student continuing in the General Education program and/or petitioning to change to another specialization. Changing specializations may result in extra time to complete degree requirements.
The PDP must clearly reflect how the student intends to integrate the Self-Designed specialization into the Depth and Application sections of all the KAMs, as well as the dissertation. The Breadth component of the specialized KAMs must also support the specialization; however, the Breadth component of the core KAMs is not used to support specializations. Students should complete the Program of Study form using the education General Program specialization course numbers for the Breadth, Depth, and Application components of each KAM. The Depth and Application components should include a subtitle that reflects the focus of the student's unique Self-Designed specialization. In the specialized KAMs, the titles of the Breadth component must also reflect the Self-Designed specialization. The core research sequence and advanced research course, which are required in all Ph.D. in Education specializations, are also required in the Self-Designed specialization. Students can contact Academic Advising Team to discuss the option of substituting three to four aligned Walden Ph.D. courses per KAM.

**Completing a Self-Designed Specialization**

To complete the Self-Designed specialization, students follow the requirements outlined in the program of study, demonstrating doctoral-level competency in all academic work and meeting all prescribed Walden University academic program requirements.

**Note on Licensure**

For initial licensure or adding endorsements (e.g., new teaching fields) to existing licenses, individuals are often required to complete a state-approved licensure program. Walden offers Minnesota state-approved licensure programs in special education, early childhood education, and P–12 principal licensure.

Additionally, not all of Walden’s programs include a practicum or cover the grade span of K–12, which are requirements for obtaining an endorsement in some states, especially in the area of reading.

The graduate degree program and coursework within the program in which you are enrolling is accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy).

Prospective students seeking licensure must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program, and (2) if there are any other requirements that apply, especially requirements pertaining to programs provided by out-of-state (except Minnesota) or online institutions.

Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For additional guidance on licensure issues, please refer to [www.WaldenU.edu/educlicensure](http://www.WaldenU.edu/educlicensure).
Post-Doctoral Certificate in Assessment, Evaluation, and Accountability

The Post-Doctoral Certificate in Assessment, Evaluation, and Accountability is designed for individuals who have earned a doctoral degree and are interested in building a culture of continuous improvement in education or a broad range of other settings that include healthcare, government, and nonprofits. Coursework emphasizes the analytical thinking, leadership strategies, and assessment systems needed to evaluate the effectiveness of people, programs, and institutions and support data-driven decision making. Students will learn how to develop surveys, create assessments, and review outcomes. A wide variety of communication methods are explored, including presentation technology, technical writing, grant writing, and collaborative communication. Upon completion, students will have a clear understanding of education measurement and the use of assessment information to evaluate learning and achievement, improve programs and initiatives, and determine resource allocations.

Certificate Requirements
- 24 total credit hours

Curriculum

- EDUC 8350 - A New Vision of Assessment, Evaluation, and Accountability
- EDUC 8351 - Assessment, Evaluation, and Accountability: The Sociological, Political, and Economic Contexts
- EDUC 8352 - Assessing for Individual Growth
- EDUC 8353 - Evaluating and Improving Programs, Organizations, and Systems
- EDUC 8354 - Dynamics of Communication for Impact and Results
- EDUC 8355 - Building a Culture of Continuous Improvement

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Post-Doctoral Certificate in Assessment, Evaluation, and Accountability program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
SCHOOL OF HEALTH SCIENCES

Learn more about the Undergraduate Minors and Accelerate Into Master's (AIM) Programs.

B.S. in Health Studies

Walden University's B.S. in Health Studies program is designed to empower students as critical and creative thinkers who are capable of addressing the health needs of local and global communities through the delivery of healthcare services. Students will gain the knowledge base required to understand and anticipate the continuing changes in the healthcare industry and prepare health professionals to work within a variety of healthcare settings.

Learning Outcomes

At the end of this program, students will be able to:
1. Demonstrate an understanding of how the concepts of health and wellness relate to health promotion and disease prevention.
2. Critically appraise the context and quality of healthcare delivery within and outside of the United States.
3. Apply epidemiological approaches to the study of patterns of disease and injury in populations.
4. Evaluate study designs, methods, and strategies for data analysis used in health-related research.
5. Analyze key behavioral and cultural factors that impact health and healthcare.
6. Demonstrate an understanding of how technology and legal and ethical issues impact the delivery of healthcare services.
7. Analyze the major advantages and disadvantages of an interdisciplinary approach to healthcare delivery.
8. Articulate critical issues in acute and long-term care from the perspective of patient and practitioner.
9. Assess public and global health issues that transcend national borders, class, race, ethnicity, and culture.

Concentrations

- General Program
- Child Development
- Disaster and Emergency Management
- Health and Cultural Diversity
- Health Communication
- Health Informatics
- Health Management
Degree Requirements

- 181 total quarter credit hours
- General education courses (46 cr.)
- Core courses (55 cr.)
- Concentration courses (30 cr., except for General)
- Elective courses (45 cr.; General 75 cr.)
- Capstone course (5 cr.)

Core Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Core Courses (55 cr.)

- HLTH 1000 - Concepts of Health Promotion
- HLTH 1005 - Context of Healthcare Delivery
- HLTH 2110 - Behavioral and Cultural Issues in Healthcare
- HLTH 2115 - Aging Across the Lifespan
- HLTH 2120 - Health Informatics
- HLTH 3100 - Ethical and Legal Issues in Healthcare
- HLTH 3105 - Interdisciplinary Perspectives in Healthcare
- HLTH 3110 - Current Issues in Healthcare Policy and Practice
- HLTH 3115 - Public and Global Health
- HLTH 4200 - Principles of Epidemiology
- HLTH 4205 - Introduction to Research Methods and Analysis

Elective Courses (45–75 cr.)

Students following a specific concentration are to select nine additional courses to fulfill the elective requirement; students choosing the General Option select 15 additional courses. Students may choose courses from either general education courses, health studies concentration courses, or courses from any of Walden's bachelor's programs. Students may also be eligible to transfer previous credit to meet their elective requirements. These credits of electives are in addition to...
the 5-credit general education elective. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Capstone Course (5 cr.)**

- **HLTH 4900 - Capstone**

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Health Studies program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**General Program**

**Elective Courses (75 cr.)**

Choose 15 courses from Health Studies, other Walden undergraduate programs, or general education. At least 10 credits must be at the 3000, 4000, or 5000 level. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Note:** A minimum of 55 quarter credits must be completed at the 3000 or 4000 level to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options. Students should consult with their academic advisor if they have questions about individual program requirements.

**Child Development**

This concentration is designed to engage and empower adult learners who are interested in learning about how our environment shapes and influences the health and development of children. Special focus is placed on cultural diversity; family and community influences; and social, cognitive, and emotional challenges as they relate to the behavioral growth and the development of children.

**Concentration Curriculum (30 cr.)**

- **EDUC 1004 - Child Development**
- **EDUC 1005 - Child Health, Safety, and Nutrition**
- **EDUC 1006 - Child, Family, and Community Relationships**
- **EDUC 4004 - Children With Special Needs**
- **EDUC 4005 - Cultural and Linguistic Diversity**
Disaster and Emergency Management

Emergency management is geared toward helping individuals and communities prevent, prepare for, and recover from natural and manmade disasters. A professional in this field may be charged with preparing and organizing communities for natural and manmade catastrophes and for building disaster-resilient communities. This includes spearheading and managing activities through each phase of the disaster and emergency management process, from prevention to preparation, relief, and recovery.

Students in this concentration will broaden their knowledge and skills in disaster management and examine threats to public health safety. Students can:

- Learn how to develop long-term measures for reducing risk and preventing future disasters.
- Discover effective methods for leading relief efforts and mobilizing resources when disasters strike, including assessing the needs of victims in emergency situations.
- Examine the importance of disaster and emergency management to homeland security.
- Gain a broader understanding of response tactics associated with terrorism and weapons of mass destruction.

The Disaster and Emergency Management concentration is a great choice for students who are interested in working within a nonprofit or federal agency, such as FEMA; the U.S. military; a private corporation; or a public health organization.

Concentration Curriculum (30 cr.)

- CRJS 4202 - Mobilizing and Coordinating Community Response
- CRJS 4301 - Terrorism
- CRJS 4302 - Critical Incidents and Cross-Agency Coordination
- CRJS 4303 - WMD and Disaster Response
- CRJS 4402 - Planning and Budgeting
- PREL 4103 - Crisis Communications

Health and Cultural Diversity

The U.S. is growing increasingly diverse and funny. To work effectively as a health professional in today’s multicultural world requires individuals to be able to practice within diverse settings and across cultures. This concentration allows students to examine the sociocultural factors that impact health, such as ethnicity, culture, religion, education, communication, and gender and prepares them to anticipate and overcome challenges in cross-cultural situations.

Note: Students who choose this concentration should complete PSYC 1001 - Introduction to Psychology as a general education course or as an elective.

Concentration Curriculum (30 cr.)
Health Communication

Health communication plays an important role in shaping public opinion and influencing health behavior. This concentration prepares health professionals to develop, implement, and evaluate health information for diverse audiences in a variety of settings through a multidisciplinary approach. Students learn about communication theory, techniques, technologies, and channels, as well as how to design various forms of communication through instruction in health, communications, education, public relations, and instructional design.

Concentration Curriculum (30 cr.)

- **COMM 1003 - Introduction to Mass Communication**
- **COMM 4001 - Intercultural Communication**
- **HLTH 4380 - Strategies for Health Communication and Wellness**
  Choose three of the following courses:
  - **ENGL 2002 - Professional Writing for Successful Communication**
  - **COMM 2002 - Fundamentals of Public Speaking**
  - **COMM 2003 - Writing for the Digital Age**
  - **PREL 3001 - Principles of Public Relations**
  - **MEDC 4102 - Emerging Media and Global Communication**
  - **PUBH 4000 - Public Health Education and Communication**
  - **MEDC 3001 - Communicating Through Media and Technology**
  - **MEDC 4103 - Emerging Media Design**
  - **PSPA 4030 - Communication for Social Change**

Health Informatics

Digital medical records require operating systems that will protect confidential patient information. This concentration will help students understand the technology infrastructure that underlies information systems, gain access to key Internet services and applications, and learn to prevent information security network attacks. In this concentration, students will explore basic approaches to computer forensics, analyze information systems for evidence of illegal or inappropriate activities, and consider the legal, ethical, and policy implications of forensic techniques. This concentration will broaden the skills needed for a position as a hospital network and systems information security department administrator, network and systems administrator, data communication analyst, or medical records and health information technician.
Concentration Curriculum (30 cr.)

- CMIS 1001 - Introduction to Information Systems*
- CMIS 1002 - Information Technology Infrastructure*
- CMIS 2001 - Internet Computing*
- CMIS 4101 - Information Security and Privacy*
- CMIS 4302 - Patient Records Practice and Policy*
- CMIS 4303 - Healthcare Information Systems Applications*

Health Management

The Health Management concentration is ideal for those individuals who wish to develop fundamental management and leadership skills that translate to a variety of employment settings. The concentration integrates coursework in business administration, leadership, organizational theory and behavior, and healthcare management in order to prepare 21st-century health professionals who can lead effectively, reason critically, act ethically, and advance their professions, organizations, and communities.

Concentration Curriculum (30 cr.)

- BUSI 1002 - Introduction to Management and Leadership*
- BUSI 2003 - Operations*
- MRKT 3001 - Marketing*
- HLTH 4000 - Introduction to Healthcare Management*
- HLTH 4100 - Healthcare Organization Theory and Behavior*
- HLTH 4105 - Healthcare Finance and Economics*

Health Promotion and Wellness

Rooted in the findings of the Healthy People 2020 study, the Health Promotion and Wellness concentration prepares students to educate individuals and communities on issues of health. Exploring the areas of nutrition, exercise, stress management, and mental health, coursework in this concentration examines how fundamental wellness principles affect overall health. The curriculum focuses on recent topics and trends of concern to professionals in the field today and helps students build knowledge that can be applied to careers across a wide range of industries.

Concentration Curriculum (30 cr.)

- HLTH 4300 - Personal Health and Wellness*
- HLTH 4320 - Nutrition Across the Lifespan*
- HLTH 4340 - Fit and Well: Core Concepts in Exercise Science*
- HLTH 4360 - Stress Management and Wellness*
- HLTH 4380 - Strategies for Health Communication and Wellness*
- PUBH 3100 - Human Disease and Prevention*
Health Psychology and Behavior

The challenges of health and well-being in today’s world require health professionals equipped to understand the social, behavioral, emotional, and cognitive factors associated with disease, illness, and injury. These factors may vary by geography, culture, race/ethnicity, or human experience. This concentration is designed to give students the academic preparation necessary to influence health behavior and affect health outcomes.

Concentration Curriculum (30 cr.)

- PSYC 1001 - Introduction to Psychology♦
- PSYC 2001 - Cross-Cultural Psychology♦
- PSYC 4001 - Cultural Perspectives in Health Psychology♦
- PSYC 2004 - Motivation and Emotion♦
- PSYC 2005 - Social Influences on Behavior♦
- PSYC 4006 - Global Perspectives in Psychology♦

Self-Designed

The Self-Designed concentration is ideal for those students who want a broad view and grounding in a variety of health-related subject areas. Students may choose six courses from any of the existing B.S. in Health Services concentrations listed. Students may also petition to use alternate upper-division courses.

Concentration Curriculum (30 cr.)

Choose six courses from any of the current B.S. in Health Sciences concentration courses listed below. At least three of these courses must be at the 3000 or 4000 level.

Example of Self-Designed concentration:

- PSYC 2005 - Social Influences on Behavior♦
- PSYC 4001 - Cultural Perspectives in Health Psychology♦
- PSYC 2004 - Motivation and Emotion♦
- EDUC 1006 - Child, Family, and Community Relationships♦
- EDUC 4004 - Children With Special Needs♦
- CMIS 2001 - Internet Computing♦

- CMIS 1001 - Introduction to Information Systems♦
- CMIS 1002 - Information Technology Infrastructure♦
- CMIS 2001 - Internet Computing♦
- CMIS 4101 - Information Security and Privacy♦
- CMIS 4302 - Patient Records Practice and Policy♦
- CMIS 4303 - Healthcare Information Systems Applications♦
B.S. in Healthcare Management

The B.S. in Healthcare Management prepares students to effectively direct, manage, and evaluate health services, organizations, and programs within a variety of settings, such as hospitals, clinics, nursing and retirement communities, physician's offices, corporations, and nonprofit organizations. Students gain skills and competencies necessary to effectively lead healthcare organizations in the 21st century and to improve the quality, safety, and delivery of health services. Because of the evolving U.S. health system, the aging population, and the projected shortage of healthcare professionals, there is a growing need for healthcare administrators. Demand and opportunity for those with even bachelor's-level training will crescendo over the next decade.

Learning Outcomes

At the end of this program, students will be able to:

1. Critically appraise the context and quality of healthcare delivery within and outside of the United States.
2. Apply epidemiological approaches to the study of patterns of disease and injury in populations.
3. Evaluate study designs, methods, and strategies for data analysis used in health-related research.
4. Analyze how changing demographics as well as key behavioral and cultural factors impact health and healthcare.
5. Demonstrate an understanding of how technology and legal and ethical issues impact the delivery of healthcare services.
6. Analyze the major advantages and disadvantages of an interdisciplinary approach to healthcare delivery.
7. Articulate critical issues in acute and long-term care from the perspective of patient and practitioner.
8. Assess public and global health issues that transcend national borders, class, race, ethnicity, and culture.
10. Analyze macro and micro factors that impact a healthcare organization's performance.
11. Apply foundational skills relating to fiscal evaluation and financial management.
13. Apply planning and evaluation methods used in strategic planning, implementation, evaluation, and marketing of healthcare organizations.
14. Evaluate human resource methods used to effectively recruit, maintain, evaluate, and manage health employees.

**Degree Requirements**

- 181 total quarter credits
- General Education courses (46 cr.)
- Core courses (85 cr.)
- Elective courses (45 cr.)
- Capstone course (5 cr.)

**Curriculum**

**General Education Courses (46 cr.)**

See the general education section of this Walden University Catalog.

*Note:* A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.
Core Courses (85 cr.)

- HLTH 1000 - Concepts of Health Promotion
- HLTH 1005 - Context of Healthcare Delivery
- HLTH 2110 - Behavioral and Cultural Issues in Healthcare
- HLTH 2115 - Aging Across the Lifespan
- HLTH 2120 - Health Informatics
- HLTH 3100 - Ethical and Legal Issues in Healthcare
- HLTH 3105 - Interdisciplinary Perspectives in Healthcare
- HLTH 3110 - Current Issues in Healthcare Policy and Practice
- HLTH 4000 - Introduction to Healthcare Management
- ACCT 1003 - Introduction to Accounting I
- HLTH 4100 - Healthcare Organization Theory and Behavior
- HLTH 4105 - Healthcare Finance and Economics
- HLTH 4110 - Healthcare Quality and Safety
- HLTH 4115 - Strategic Planning and Marketing in Healthcare
- HLTH 4120 - Managing the Healthcare Workforce
- HLTH 4200 - Principles of Epidemiology
- HLTH 4205 - Introduction to Research Methods and Analysis

Elective Courses (45 cr.)
Choose nine courses from general education, B.S. in Healthcare Management, or other Walden bachelor's degree programs. Elective credits should total 45 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

Note on Minors: Electives can also be used to complete a six-course minor.

Note: RN-BSN courses are not available to students outside the RN-BSN program.

Capstone Course (5 cr.)

- HLTH 4900 - Capstone

Program Data
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Healthcare Management program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

B.S. in Public Health
From disaster relief to disease prevention and child-wellness programs, public health professionals facilitate the conditions for a healthy, productive, and safe society. Create a
positive effect on local, national, or international communities with Walden's Bachelor of Science in Public Health.

The B.S. in Public Health degree may be the ideal tool to help you create meaningful social change in your community and in the world. This program helps prepare you to meet the growing need for formally trained, caring public health professionals who can address critical 21st-century global health challenges to improve the health of populations. Rooted in the principles and competencies of public health, the curriculum prepares students to translate and apply course content into practice. Students learn about a range of issues impacting population health and healthcare systems, including environmental health, disease prevention, health informatics, global health, ethics, health management, and behavioral and cultural issues.

Choose to complete a general program of study (which allows students to apply transfer credit) or select a concentration to deepen the understanding of a pertinent area of public health. Gain "real world" experience by choosing to complete an optional service learning project, field experience, or study abroad opportunity. This program also provides a solid foundation and fast track for individuals who would like to pursue an advanced degree in public health, such as the Master of Public Health (MPH) or doctorate in public health.

**Learning Outcomes**

At the end of this program, students will be able to:

1. Explain the historical development and contemporary context of public health, including the infrastructure and organization of public health systems.
2. Critically examine the role of public health in protecting and promoting the health of populations locally and globally.
3. Analyze social, political, and economical issues, which impact public health and healthcare delivery systems within and outside of the United States.
4. Explain the biological effects of infectious and chronic disease on the human body as well as basic epidemiological principles used to study patterns of disease and injury among diverse populations.
5. Interpret research relating to public health.
6. Analyze how social, behavioral, cultural, and environmental factors impact the health status of individuals and populations.
7. Apply basic principles related to program planning, health finance, and program evaluation, which are used to develop and implement effective public health programs and services for populations.
8. Identify ways in which technology can be used to improve the health of populations as well as the practice of public health.
9. Analyze legal, regulatory, and ethical issues that impact public health practice.
10. Articulate how public health policy is developed and how individuals and groups influence policy change.
11. Demonstrate effective communication and problem-solving skills necessary for addressing contemporary global public health issues.

General

The General concentration is ideal for those students who want a broad view and grounding in a variety of health-related subject areas. Students may choose four to six courses from any of the courses offered in the School of Health Sciences or listed under the B.S. in Public Health concentrations below. Students may also petition to use alternate upper-division courses.

Concentration Curriculum (30 cr.)

Students may choose four to six courses from any of the current B.S. in Health Sciences courses or from the other B.S. concentration courses listed below.

• CMIS 1001 - Introduction to Information Systems
• CMIS 1002 - Information Technology Infrastructure
• CMIS 2001 - Internet Computing
• CMIS 4101 - Information Security and Privacy
• CMIS 4302 - Patient Records Practice and Policy
• CMIS 4303 - Healthcare Information Systems Applications
• COMM 1003 - Introduction to Mass Communication
• CRJS 4202 - Mobilizing and Coordinating Community Response
• CRJS 4301 - Terrorism
• CRJS 4302 - Critical Incidents and Cross-Agency Coordination
• CRJS 4303 - WMD and Disaster Response
• CRJS 4402 - Planning and Budgeting
• EDUC 1004 - Child Development
• EDUC 1005 - Child Health, Safety, and Nutrition
• EDUC 1006 - Child, Family, and Community Relationships
- EDUC 3203 - Infant/Toddler Mental Health
- EDUC 4004 - Children With Special Needs
- EDUC 4005 - Cultural and Linguistic Diversity
- ENGL 2002 - Professional Writing for Successful Communication
- HLTH 1000 - Concepts of Health Promotion

- EDUC 3203 - Infant/Toddler Mental Health♦

Elective Courses (20 cr.)

Choose four courses from general education, B.S. in Public Health, or other Walden bachelor's degree programs. Elective credits should total 20 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

Note on Minors: Electives can also be used to complete a six-course minor. Although this program requires fewer than six elective courses, students have the option to complete a minor and graduate with more than the required number of credits for this program.

Disaster and Emergency Management

Hurricanes. Pandemic flu. Tsunamis. Terrorism. Whether spawned by Mother Nature or human-made, disasters can occur anywhere at any time. Nations are in need of professionals trained in a variety of disciplines to gain the skills to prepare and organize communities and to build disaster-resilient communities. The Disaster and Emergency Management concentration will broaden students' knowledge and skills in disaster management and will examine threats to public health safety. The concentration also serves as a valuable springboard for students who wish to pursue a graduate-level degree in public health, emergency management, public administration, or criminal justice.

Note: FEMA's Emergency Management Institute provides free program resources and materials in addition to training for all universities that develop programs or certificates relating to emergency management. This initiative is called the FEMA Emergency Management Higher Education Program. For more information, go to: http://training.fema.gov/EMIWeb/edu/ or training.fema.gov/.

Electives (30 cr.)

Choose six courses from general education, B.S. in Public Health, or other Walden bachelor's degree programs. Elective credits should total 30 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

Note on Minors: Electives can also be used to complete a six-course minor.

Health Promotion and Wellness

The concentration in Health Promotion and Wellness prepares students to help raise health literacy among individuals and populations. Coursework, which is rooted in the findings of the Healthy People 2020 project, examines how factors such as nutrition, exercise, stress management, and mental health affect wellness and overall health. Students learn fundamental wellness principles and explore best practices for the design and development of effective health promotion strategies. By analyzing current issues and research in health and wellness, students build a body of knowledge that they can apply to a broad spectrum of health careers.

Concentration Curriculum

Concentration Courses (30 cr.)

- HLTH 4300 - Personal Health and Wellness
- HLTH 4320 - Nutrition Across the Lifespan
- HLTH 4340 - Fit and Well: Core Concepts in Exercise Science
- HLTH 4360 - Stress Management and Wellness
- HLTH 4380 - Strategies for Health Communication and Wellness

Elective Courses (25 cr.)

Choose five courses from general education, B.S. in Public Health, or other Walden bachelor's degree programs. Elective credits should total 25 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

Note on Minors: Electives can also be used to complete a six-course minor. Although this program requires fewer than six elective courses, students have the option to complete a minor and graduate with more than the required number of credits for this program.
Health Psychology and Behavior

The challenges of health and well-being in today’s world require health professionals equipped to understand the social, behavioral, emotional, and cognitive factors associated with disease, illness, and injury. These factors may vary by geography, culture, race/ethnicity, or human experience. This concentration is designed to give students the academic preparation necessary to influence health behavior and affect health outcomes.

Concentration Curriculum

Concentration Courses (30 cr.)

- PSYC 1001 - Introduction to Psychology
- PSYC 2001 - Cross-Cultural Psychology
- PSYC 4001 - Cultural Perspectives in Health Psychology
- PSYC 2004 - Motivation and Emotion
- PSYC 2005 - Social Influences on Behavior
- PSYC 4006 - Global Perspectives in Psychology

Electives (20 cr.)

Choose four courses from general education, B.S. in Public Health, or other Walden bachelor's degree programs. Elective credits should total 20 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

Note on Minors: Electives can also be used to complete a six-course minor. Although this program requires fewer than six elective courses, students have the option to complete a minor and graduate with more than the required number of credits for this program.
OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a $C$ in the graduate-level course but only a grade of $B$ or better will carry over to the graduate program. Students who receive a $C$ grade will be awarded a grade of $C^*$, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not receive a $B$ or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.

3. AIM courses are (5000-level) graduate courses.*
   a. Tuition for these courses is charged at the undergraduate rate.
   b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a B or better in each course to have that course applied to the master's program.
   ○ Students who get lower than a B in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   ○ Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a B or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note: Graduate students cannot register for AIM courses.

M.S. in Early Childhood Studies

Students may select any or all of these courses. Individual course prerequisites apply.

Note: These courses are 8 weeks in length.

M.S. in Instructional Design and Technology

• EDUC 5105 - Organizations,
Students may select any or all of these courses. Individual course prerequisites apply.

**Note:** These courses are 8 weeks in length.

**Innovation, and Change**
- EDUC 5115 - Learning Theories and Instruction
- EIDT 5100 - Instructional Design
- EIDT 5110 - Advanced Instructional Design

### College of Health Sciences

### School of Health Sciences

**Master of Public Health (MPH)**

Students may select any or all of these courses. Individual course prerequisites apply.

*It is recommended that students complete PUBH 5101 prior to enrolling in any other MPH courses.*

**Note:** These courses are 11 weeks in length.

- PUBH 5101 - Principles of Communication in Public Health
- PUBH 5002 - Essentials of Public Health: A Case Study Approach
- PUBH 5115 - Social, Behavioral, and Cultural Factors in Public Health
- PUBH 5165 - Environmental Health
- PUBH 5235 - Program Design, Planning, and Evaluation
- PUBH 5175 - Health Policy and Management

**Master of Healthcare Administration (MHA)**

Students may select any or all of these courses. Individual course prerequisites apply.

**Note:** These courses are 8 weeks in length.

- MMHA 5015 - Foundations of Healthcare Administration
- MMHA 5100 - U.S. Healthcare Delivery System
- MMHA 5135 - Health Policy and Economics
- MMHA 5205 - Health Law and Ethics
### School of Nursing

**Master of Science in Nursing (MSN)**  
*Note: These courses are 11 weeks in length.*

- NURS 5050 - Policy and Advocacy for Improving Population Health  
- NURS 5051 - Transforming Nursing and Healthcare Through Technology  
- NURS 5052 - Essentials of Evidence-Based Practice

*Students must be admitted to the RN-BSN-MSN track to complete these AIM courses.*

### College of Social and Behavioral Sciences

### School of Public Policy and Administration

**Master of Public Administration (MPA)**  
*Students may select up to five of these courses. Individual course prerequisites apply.*  
*Note: These courses are 11 weeks in length.*

- MMPA 5200 - Introduction to Public Administration  
- MMPA 5405 - Ethics and Social Justice  
- MMPA 5420 - Organizational Management and Leadership  
- MMPA 5431 - Finance and Budgeting for the Public Sector  
- MMPA 5435 - Human Resource Management: Building a Capable Workforce  
- MMPA 5451 - Public Policy Analysis  
- MMPA 5480 - Applied Research and Evaluation Methods

**Master of Public Policy (MPP)**  
*Students may select any or all of these courses. Individual course prerequisites apply.*  
*Note: These courses are 11 weeks in length.*

- MMPP 5280 - Policy and Politics in American Political Institutions  
- MMPP 5405 - Ethics and Social Justice  
- MMPP 5111 - Leadership and Organizational Change

### School of Social Work and Human Services

### M.S. in Clinical Mental Health Counseling

These courses are open only to students in the B.S. in Human Services and B.S Psychology programs. Students may select any or all of these courses. Individual course prerequisites apply.

**Note:** These courses are 11 weeks in length.

- FPSY 5101 - Introduction to Forensic Psychology
- FPSY 5115 - Understanding Forensic Psychology Research
- FPSY 5125 - Assessment in Forensic Psychology Settings
- FPSY 5135 - Criminal Behavior
- FPSY 5145 - Ethical Issues and Professional Responsibilities in Forensic Psychology
- FPSY 5720 - Abnormal Behavior

### M.S. in Addiction Counseling

These courses are open only to students enrolled in the B.S. in Human Services Addictions concentration or the B.S. in Psychology Addictions concentration. Students may select any or all of these courses. Individual course prerequisites apply.

**Note:** These courses are 11 weeks in length.

- HUMN 5100 - Introduction to Mental Health Counseling
- HUMN 5722 - Counseling and Psychotherapy Theories
- HUMN 5316 - Techniques of Counseling
- HUMN 5723 - Multicultural Counseling
- HUMN 5103 - Introduction to Addiction
- HUMN 5204 - Assessment in Counseling and Addiction
- HUMN 5202 - Theories, Treatment, and Case
Articulations

- B.S. in Health Studies to Master of Public Health (MPH) Artication
- B.S. in Healthcare Management to Master of Public Health (MPH) Artication

B.S. in Health Studies to Master of Public Health (MPH) Artication

Walden University's advanced undergraduate health studies students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's Master of Public Health (MPH).

Requirements

To help ensure student success, the following requirements have been established:
- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.
- The student must have completed all general education and core requirements of the Bachelor of Science in Health Studies.

Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Academic Advising Team for more information regarding the Accelerated Into Master's (AIM) program.

Curriculum

All graduate courses are taken as electives and must be selected from the list below.

Note: The courses outlined in the Accelerate Into Master's program (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to four of the following courses for the Master of Public Health (MPH) program:
- PUBH 5101 - Principles of Communication in Public Health
- PUBH 5002 - Essentials of Public Health: A Case Study Approach
B.S. in Healthcare Management to Master of Public Health (MPH) Articulation

Walden University’s advanced undergraduate health studies students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden’s Master of Public Health (MPH).

Requirements

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.
- The student must have completed all general education and core requirements of the Bachelor of Science in Healthcare Management.

Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Academic Advising Team for more information regarding the Accelerate Into Master’s (AIM) program.

Curriculum

All graduate courses are taken as electives and must be selected from the list below.

Note: The courses outlined in the Accelerate into Master’s (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to four of the following courses for the Master of Public Health (MPH) program:

- **PUBH 5101 - Principles of Communication in Public Health**
- **PUBH 5002 - Essentials of Public Health: A Case Study Approach**
- **PUBH 5115 - Social, Behavioral, and Cultural Factors in Public Health**
- **PUBH 5125 - Biostatistics**
- **PUBH 5145 - Epidemiology**
- **PUBH 5165 - Environmental Health**

Note: It is recommended that students complete PUBH 5101 - Principles of Communication in Public Health prior to enrolling in any other MPH courses. Further, students should elect to enroll in PUBH 5145 - Epidemiology only after their successful completion of PUBH 5125 - Biostatistics.
Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their academic advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Child Development
- Minor in Communication
- Minor in Criminal Justice
- Minor in Healthcare Management
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Introductory Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health

Minor in Health Promotion and Wellness

The Undergraduate Minor in Health Promotion and Wellness is for the non-health sciences major student who is interested in learning how to empower individuals and communities to improve physical fitness, nutrition habits, stress management, and interpersonal behaviors. With a curriculum rooted in the latest findings on prevention and wellness, students can learn how to inspire others as they enhance their own wellness.

Note: This minor is not available to students in the B.S. in Health Studies, B.S. in Public Health, or the B.S. in Healthcare Management programs.

Required (30 cr.)

- **HLTH 4300 - Personal Health and Wellness**
- **HLTH 4320 - Nutrition Across the Lifespan**
- **HLTH 4340 - Fit and Well: Core Concepts in Exercise Science**
- **HLTH 4360 - Stress Management and Wellness**
  And students choose two of the following:
- **HLTH 4380 - Strategies for Health Communication and Wellness**
- **HLTH 2110 - Behavioral and Cultural Issues in Healthcare**
- **PUBH 4000 - Public Health Education and Communication**
Minor in Health Studies

- PUBH 3100 - Human Disease and Prevention
- HLTH 3115 - Public and Global Health
- PUBH 4030 - Planning Public Health Programs
- PUBH 4100 - Evaluating Public Health Programs
The Undergraduate Minor in Health Studies is for the non-health sciences major student and is designed to empower students as critical and creative thinkers who are capable of addressing the health needs of local and global communities through the delivery of healthcare services. Students will gain the knowledge base required to understand and anticipate the continuing changes in the healthcare industry and prepare health professionals to work within a variety of healthcare settings.

Note: This minor is not available to students in the B.S. in Health Studies, B.S. in Public Health, or the B.S. in Healthcare Management programs.

**Required (30 cr.)**

- HLTH 4300 - Personal Health and Wellness
- HLTH 1005 - Context of Healthcare Delivery
- HLTH 3115 - Public and Global Health
  And students choose three of the following:
  - HLTH 2110 - Behavioral and Cultural Issues in Healthcare
  - HLTH 2115 - Aging Across the Lifespan
  - HLTH 3100 - Ethical and Legal Issues in Healthcare
  - HLTH 3110 - Current Issues in Healthcare Policy and Practice
  - HLTH 4050 - Introduction to Disaster and Emergency Management
  - HLTH 4320 - Nutrition Across the Lifespan
  - HLTH 4340 - Fit and Well: Core Concepts in Exercise Science
  - HLTH 4360 - Stress Management and Wellness
  - HLTH 4380 - Strategies for Health Communication and Wellness
  - PUBH 3000 - Environmental Health
  - PUBH 3100 - Human Disease and Prevention
  - PUBH 4000 - Public Health Education and Communication
  - PUBH 4100 - Evaluating Public Health Programs

**Minor in Healthcare Management**

The Undergraduate Minor in Healthcare Management is for the non-health sciences major student interested in improving the quality, safety, and delivery of health services. Because of the evolving U.S. health system, the aging population, and the projected shortage of healthcare professionals, there is a growing need for healthcare administrators.

Note: This minor is not available to students in the B.S. in Health Studies, B.S. in Public Health, or the B.S. in Healthcare Management programs.

**Required (30 cr.)**

- HLTH 1005 - Context of Healthcare Delivery
- HLTH 4000 - Introduction to Healthcare Management
- HLTH 4115 - Strategic Planning and Marketing in Healthcare
- HLTH 4120 - Managing the Healthcare Workforce
And students choose two of the following:

- HLTH 3100 - Ethical and Legal Issues in Healthcare
- HLTH 3110 - Current Issues in Healthcare Policy and Practice
- HLTH 4100 - Healthcare Organization Theory and Behavior
- HLTH 4105 - Healthcare Finance and Economics
- HLTH 4110 - Healthcare Quality and Safety
- HLTH 2120 - Health Informatics

Minor in Public Health

The Undergraduate Minor in Public Health is for the non-health sciences major student. Rooted in the principles and competencies of public health, the curriculum prepares students to translate and apply course content into practice. Students learn about a range of issues impacting population health and healthcare systems, including environmental health, disease prevention, health informatics, global health, ethics, health management, and behavioral and cultural issues.

**Note:** This minor is not available to students in the B.S. in Health Studies, B.S. in Public Health, or the B.S. in Healthcare Management programs.

**Required (30 cr.)**

- PUBH 1000 - Foundations of Public Health
- HLTH 2110 - Behavioral and Cultural Issues in Healthcare
- PUBH 3000 - Environmental Health
- HLTH 4200 - Principles of Epidemiology
  And students choose two of the following:
- HLTH 2115 - Aging Across the Lifespan
- HLTH 3100 - Ethical and Legal Issues in Healthcare
- HLTH 3110 - Current Issues in Healthcare Policy and Practice
- PUBH 3100 - Human Disease and Prevention
- HLTH 3115 - Public and Global Health
- HLTH 4050 - Introduction to Disaster and Emergency Management
- HLTH 4340 - Fit and Well: Core Concepts in Exercise Science
- HLTH 4360 - Stress Management and Wellness
- HLTH 4380 - Strategies for Health Communication and Wellness
- PUBH 4000 - Public Health Education and Communication
- PUBH 4030 - Planning Public Health Programs
- PUBH 4100 - Evaluating Public Health Programs
- PUBH 4200 - Public Health Policy for Social Change
- HLTH 4205 - Introduction to Research Methods and Analysis
Graduate Certificate in Clinical Research Administration

This certificate program provides students with the knowledge and skills required to effectively monitor and manage clinical research. This includes a detailed understanding of the regulatory environment as well as budget management, biostatistics, epidemiology, and research and development. Specific emphasis is placed on providing an understanding of state-of-the-art clinical research through analysis of the day-to-day operations in clinical testing activities. Credits earned from this certificate program may be applied toward Walden's M.S. in Clinical Research Administration.

Students must meet the master's program admission requirements. Credit from courses taken for a certificate can be applied toward the Master of Clinical Research Administration. Students must show progress and maintain performance in a manner identical to a degree program. Students track their progress in their program of study, similar to degree-seeking students.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Graduate Certificate in Clinical Research Administration program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
M.S. in Clinical Research Administration

The M.S. in Clinical Research Administration program is designed to provide students with the knowledge and skills required for effective clinical research administration and management. This includes a detailed understanding of the regulatory environment and the following specialized, targeted skills:

- Management of clinical protocols
- Scientific protocol development
- Ethical and regulatory standards
- Budget management
- Statistics
- FDA regulatory compliance
- Publication in specific drug class and peer-reviewed journals
- R&D/Marketing interface
- The overall management and training of clinical research personnel

Clinical research administrator positions are found in a variety of organizations, including pharmaceutical, consumer products, healthcare, biotech, and medical device companies, as well as contract clinical research organizations (CROs), government/regulatory organizations, and university research settings.

This program is designed for students who have a broad social science or health background. Specific emphasis is placed on providing state-of-the-art understanding of clinical research execution and management through analysis of the day-to-day operations in clinical testing activities. A culminating practicum provides field experiences in a clinical trial setting.

Learning Outcomes

At the end of this program, students will be able to:

1. Describe basic research strategies, settings, methods, and goals of clinical research, including all aspects of the preclinical and clinical phases of clinical trials.
2. Critique the advantages and disadvantages of various study protocol designs as related to the test product and anticipated endpoints of the clinical research process.
3. Critically appraise published clinical research and interpretation of new research in the context of existing knowledge and global trends/issues.
4. Demonstrate an understanding of the interdependence of the different roles in the clinical research team, including the alliance of subjects, regulatory agencies, sponsors, and sites.
5. Identify ethical, legal, regulatory, and financial considerations that impact clinical trials.
6. Apply the essentials of Good Clinical Practice (GCP) in their professional practice.
7. Demonstrate an understanding of how the evolution of the safety and efficacy data in drug, biological, and device developments from preclinical testing through to registration and post-marketing surveillance impact product development.

8. Demonstrate an understanding of the basic physiological and epidemiological causes and correlations of disease as they relate to clinical trial investigations.

**Degree Requirements**

- 33 total semester credit hours
- Core courses (30 sem. cr.)
- Capstone (3 sem. cr.)

**Curriculum**

Each course is 8 weeks in length, and there are two consecutive courses per semester. The program is offered in a prescribed sequence.

**Core Course (30 sem. cr.)**

- **CLRA 6100 - Introduction to Clinical Research**
- **CLRA 6115 - Pathophysiological Basis of Clinical Research**
- **CLRA 6130 - Ethical, Legal, and Regulatory Considerations in Clinical Investigations**
- **CLRA 6145 - Design and Conduct of the Clinical Protocol**
- **CLRA 6160 - Good Clinical Practice (GCP) in Managing and Monitoring Clinical Trials**
- **CLRA 6175 - Biostatistics**
- **CLRA 6190 - Information and Data Management**
- **CLRA 6205 - Product Development in the Pharmaceutical, Biotechnology, and Medical Device Industries**
- **CLRA 6220 - Health Economics and Financial Management in Clinical Research Administration**
- **CLRA 6235 - Epidemiology**

**Capstone Course (3 sem. cr.)**

- **CLRA 6560 - Capstone**

**Practicum (Optional)**

Students in the M.S. in Clinical Research Administration program may elect to earn a practicum experience by adding an additional course, CLRA 6550 - Practicum, to their program of study. Students should contact the Academic Advising Team at any point in their program before completing CLRA 6175 - Biostatistics to request the addition of CLRA 6550 - Practicum to their program of study.

The M.S. in Clinical Research Administration optional practicum is designed to provide students who have finished their coursework with the opportunity to synthesize knowledge, to develop competence in professional practice, to apply knowledge to the solution of clinical research administration problems, and to develop a respect for and a commitment to continued professional knowledge.

The required hours of agency service may take place only during registration in the appropriate seminar. All work hours must occur on or after the official start date of the approved semester and may not go beyond the end date of the semester. Students who cannot complete the practicum hours in one semester must register for the seminar until all field hours are completed. Students must have completed the first five semesters of required coursework to begin the practicum and must be in good academic standing. Students are advised to begin seeking a practicum placement as early as possible, but no later than two terms before they plan to begin the practicum. Details about the practicum, the required forms, the approval process, and important practicum application deadlines are available through students’ myWalden university portal.

**Program Data**
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Clinical Research Administration program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**M.S. in Health Education and Promotion**

The M.S. in Health Education and Promotion program is designed to provide students with a global perspective on the role of health education. Students examine individual and population health to gain knowledge of core public health principles while using applied research to build social and physical environments that support healthy behaviors. Students gain a solid foundation in core public health disciplines so they can develop, analyze, implement, and assess health education programs and strategies in a variety of settings. Designed to reflect the Seven Areas of Responsibility for Health Educators outlined by the National Commission for Health Education Credentialing (NCHEC), coursework includes research in core public health principles, individual and population health, social sciences, behavior change theory, global trends, and current health initiatives. Upon completion of the M.S. in Health Education and Promotion, students will be prepared to sit for the national Certified Health Education Specialist (CHES) and Master Certified Health Education Specialist (MCHES) exams.

**Learning Outcomes**

Graduates of this program will be prepared to:

1. Examine historic milestones, current challenges, and future trends related to health and health education.
2. Analyze biological, social, political, cultural, environmental, and behavioral factors that impact individual and population health.
3. Assess community needs and capacity for health education.
4. Develop culturally tailored health education programs and communication using health behavior theories and models.
5. Evaluate the effectiveness of health education programs, communication, and research.
6. Apply key leadership concepts and skills to effectively administer health education programs and services.
7. Utilize best practices of health communication to promote and advocate for individual and population health.
8. Apply research principles and methods to address 21st-century health challenges.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Health Education and Promotion program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Emergency Preparedness

Students in the Emergency Preparedness specialization examine the role that health education and promotion plays in helping populations prepare for, respond to, and recover from emergency situations that impact public health. Students explore critical aspects of emergency management, including ways to assess and mitigate emergency situations; strategies for maximizing safety; systematic approaches for responding to terrorism; and how to deal with disaster, crisis, and trauma.

Focus Area Curriculum

Choose three courses below:

- HLTH 6100 - Critical Issues in Emergency Management
- HLTH 6200 - Risk Assessment, Preparedness and Disaster Mitigation
- HLTH 6300 - Disaster Response and Recovery
- HLTH 6740 - Disaster, Crisis, and Trauma
- HLTH 6771 - Terrorism: A Systematic Approach for Emergency Preparedness

Health Policy and Advocacy

The Health Policy and Advocacy specialization focuses on the role that health education and promotion plays in advocating and implementing legislative health policies, programs, or practices that address health, social, economic, and/or environmental factors that improve health across all populations. Students examine a broad range of health policy and advocacy topics, including ethics and social justice, diversity and human rights, U.S. health policies and politics, and leadership and organizational change.

Focus Area Curriculum

Choose three courses below:
• HLTH 6051 - Diversity, Human Rights, and Social Justice
• HLTH 6405 - Ethics and Social Justice
• HLTH 6111 - Leadership and Organizational Change
• HLTH 6112 - Governance and Public Policy
• HLTH 6200 - Risk Assessment, Preparedness and Disaster Mitigation
• HLTH 6840 - Health Policy and Management

Self-Designed

The Self-Designed specialization allows students to customize their studies by choosing 15 elective credits of their choice. These specialization areas include courses related to population health, behavioral health, health policy, management and leadership, teaching and learning, global health, and research.

Focus Area Curriculum

Choose three courses below:
• HLTH 6051 - Diversity, Human Rights, and Social Justice
• HLTH 6405 - Ethics and Social Justice
• HLTH 6111 - Leadership and Organizational Change
• HLTH 6112 - Governance and Public Policy
• HLTH 6200 - Risk Assessment, Preparedness and Disaster Mitigation
• HLTH 6840 - Health Policy and Management
• HLTH 6100 - Critical Issues in Emergency Management
• HLTH 6280 - Policy and Politics in American Political Institutions
• HLTH 6300 - Disaster Response and Recovery
• HLTH 6771 - Terrorism: A Systematic Approach for Emergency Preparedness
• HLTH 6740 - Disaster, Crisis, and Trauma

M.S. in Health Informatics

The M.S. in Health Informatics program is designed for current and aspiring informatics professionals. The program facilitates the development and advancement of e-health initiatives and other emerging information technologies to improve healthcare quality.

Learning Outcomes

At the end of this course, students will be able to:
1. Develop skills necessary to utilize health information technology for knowledge management.
2. Identify issues related to the implementation of the electronic health record.
3. Apply the systems development life cycle (SDLC) approach to the utilization of health information systems.
4. Describe key legal, regulatory, and ethical issues related to the utilization of health information technology.
5. Apply information technology to improve healthcare quality.
6. Acquire the skills necessary to contribute to strategic and tactical planning in utilizing health...
information systems.
7. Articulate the organizational needs and readiness for adoption of health information technology solutions.
8. Apply concepts of leadership in managing organizational change.
9. Describe key financial indicators related to the utilization of health information technology in an organization.
10. Recognize the language, terminology, ontology, acronyms, coding, and classification systems of healthcare and health informatics.
11. Identify the applications of statistical software to support evidence-based research and evaluation.

**Practicum (Optional)**

Students in the M.S. in Health Informatics program may elect to earn a practicum experience by adding an additional course, HINF 6950 Practicum, to their program of study. Students should contact the Academic Advising Team at any point in their program before completing HINF 6205 - Research and Program Evaluation to request the addition of HINF 6950 - Practicum to their program of study.

The M.S. in Health Informatics optional practicum is designed to provide students who have finished their coursework with the opportunity to synthesize knowledge, to develop competence in professional practice, to apply knowledge to the solution of health information problems, and to develop a respect for and a commitment to continued professional knowledge.

The field practicum takes place in conjunction with registration in HINF 6960 - Scholarly Project. The required hours of agency service may take place only during registration in the appropriate seminar. All work hours must occur on or after the official start date of the approved semester and may not go beyond the end date of the semester. Students who cannot complete the practicum hours in one semester must register for the seminar until all field hours are completed.

Students must have completed the first five semesters of required coursework to begin the practicum and must be in good academic standing. Students are advised to begin seeking a practicum placement as early as possible, but no later than two terms before they plan to begin the practicum. Details about the practicum, the required forms, the approval process, and important practicum application deadlines are available through students' myWalden university portal.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Health Informatics program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
Master of Healthcare Administration (MHA)

The Walden University Master of Healthcare Administration (MHA) program provides both current and future healthcare administrators and managers with the skills and understandings required for assuming leadership positions in:

- Hospitals
- Managed care organizations
- Medical group practices
- Ambulatory, long-term care, and home healthcare facilities
- Insurance and pharmaceutical companies
- Consulting firms
- Government
- For-profit and nonprofit sector organizations

The program curriculum is aligned to healthcare management content areas as defined by national healthcare administration standards. Specific emphasis is placed on providing an understanding of clinical service delivery through analysis of the day-to-day operations in clinical support service activities.

Learning Outcomes

At the end of the program, students will be able to:
1. Demonstrate effective communication skills at the individual and group levels.
2. Identify the components of the healthcare delivery system and external environmental factors affecting the management of healthcare organizations.
3. Analyze laws, regulations, court decisions, and health policy that impact healthcare organizations and health services delivery.
4. Demonstrate ethical choices, values, and professional behavior in healthcare management roles/decision making.
5. Analyze the responsibility and operations of a healthcare organization to identify and resolve problems and improve performance.
6. Use statistical reasoning in interpreting quantitative and qualitative research and organizational data.
7. Demonstrate critical thinking and effective decision making through financial management, strategic planning, economic analysis, and quality assessment and improvement.
8. Demonstrate an understanding of the roles, perspectives, and expectations of clinical practitioners, how they differ from non-clinical staff, and the challenges these differences present for management.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Master of Healthcare Administration (M.H.A.) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Master of Public Health (MPH)
Walden's Master of Public Health (MPH) program is designed to provide public health practitioners with the specialized skills and core competencies required to improve health and prevent disease among individuals, communities, and populations. Students gain a solid foundation in core public health disciplines, including biostatistics, epidemiology, environmental health, public health administration, and social and behavioral sciences. Students learn to plan, implement, and evaluate public health programs and initiatives with a special focus on reducing disparities in health and serving underserved populations or communities. Students also receive additional instruction in widely used analytical tools, explore current issues in public health financing, and hone their leadership and communication skills.

Consistent with our commitment to continuous quality improvement, Walden redesigned the MPH curriculum to incorporate case studies on the latest public health issues, improve the student's field and classroom experience, and reflect professional guidelines set forth by leading public health organizations.

**Learning Outcomes**

At the end of this program, students will be able to:

1. Utilize culturally appropriate communication skills to convey prevention and intervention strategies used to improve health outcomes among diverse local and global populations.
2. Demonstrate an understanding of how research methods, biostatistical data and software, and the epidemiological approach impact the study of patterns of disease, disability, and injury.
3. Evaluate biological, environmental, legal, and regulatory factors that affect the health of local and global communities.
4. Evaluate the major social, behavioral, and cultural factors that affect the health of local and global populations.
5. Appropriately access, interpret, and evaluate public health data that are available through the use of information technology.
6. Analyze essential services, systems, public policies, and associated challenges that impact the health of local and global communities.
7. Demonstrate skills needed for sound leadership and decision making in public health, including applications of ethics and professionalism.
8. Apply health management and systems thinking to public health agencies, programs, policies, and issues.
9. Apply the principles of program design, implementation, and evaluation to improve the health of local and global populations.
10. Exhibit a commitment to professional and ethically responsible public health research and practice.

DOCTORAL PROGRAMS

Doctor of Public Health (DrPH)

The Doctor of Public Health (DrPH) degree prepares public health practitioners to assume positions of leadership and influence in practice-based settings. In this professional doctoral degree program, students explore public health challenges from both a domestic and global standpoint and how evidence-based research can be applied to advance public health goals. Through their coursework, students examine topics such as ethics, budgeting, critical analysis, and supervision, with an overarching emphasis on enhancing practical skills. Students in this multidisciplinary program have the opportunity to collaborate on assignments with students from other Walden College of Health Sciences programs.

Learning Outcomes

As a graduate of this program, students will be prepared to:

1. Critically evaluate the interdisciplinary role of stakeholders in the application and evaluation of population-based public health strategies.
2. Evaluate approaches to inform and influence public health interventions and strategies.
3. Apply research methods in the investigation of public health problems.
5. Apply systems-thinking skills and strategies for the promotion of public health policy and advocacy.
6. Apply evidence-based research and practices to promote positive social change.
7. Examine the application of economic theories in relation to public health systems across diverse community settings.
8. Apply community health assessment techniques to identify, prioritize, and formulate solutions to community public health problems.
9. Apply ethical principles in public health practice.

**Ph.D. in Health Services**
The Ph.D. in Health Services program examines healthcare delivery and healthcare systems in the U.S. and internationally. Students are trained by scholar-practitioners to identify problems and solutions based on social science theories and models as well as a knowledge of historical and contemporary issues in health services and management. The program of study places an emphasis on healthcare practice and applied research. The program prepares students for careers in which doctoral-level education is desired, such as academia, research, government, and private sector positions within healthcare organizations.

**Learning Outcomes**

At the end of this program, students will be able to:
1. Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
2. Lead and inform the professional dialogue on key health services issues.
3. Design, conduct, and analyze studies of economic evaluation in healthcare.
4. Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
5. Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
6. Engage in scientific inquiry that advances the knowledge base of research and practice in health services.

**Specializations**

- Community Health
- Healthcare Administration
- Leadership
- Public Health Policy
- Self-Designed

**Degree Requirements**

- 101–103 total quarter credits
- Foundation course (2 cr.)
- Core courses (30 cr.)
- Foundation Research Sequence (12 cr.)
- Advanced research course (4 cr.)
- Writing course (5 cr.)
- Specialization courses (20 cr.)
- Electives (8–10 cr.)
- Proposal, dissertation, and oral presentation (20 cr.)
- Minimum 10 quarters enrollment
- Four Ph.D. residencies to equal a minimum of 16 days
Core Curriculum

Foundation Course (2 cr.)

- **HLTH 8003 - Building a Multidisciplinary Approach to Health**
  All beginning Ph.D. in Health Services students are required to successfully complete this course and are automatically enrolled in it during their first quarter.

Core Courses (30 cr.)

- **HLTH 8410 - U.S. Healthcare Delivery System**
- **HLTH 8415 - Organizational Development and Leadership**
- **HLTH 8420 - Health Economics**
- **HLTH 8425 - Health Policy**
- **HLTH 8430 - Healthcare Financial Management**
- **HLTH 8435 - Health Law and Ethics**

Foundation Research Sequence (12 cr.)

Courses composing the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100X must be completed prior to Residency 2 of the academic residencies. RSCH 8200X and RSCH 8300X must be completed prior to beginning the dissertation or attending Residency 3.

- **RSCH 8100X - Research Theory, Design, and Methods**
- **RSCH 8200X - Quantitative Reasoning and Analysis**
- **RSCH 8300X - Qualitative Reasoning and Analysis**

Advanced Research Course (4 cr.)

All Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

- **RSCH 8250X - Advanced Quantitative Reasoning and Analysis**
- **RSCH 8350X - Advanced Qualitative Reasoning and Analysis**
- **RSCH 8450X - Advanced Mixed-Methods Reasoning and Analysis**

Writing Course (5 cr.)

- **HLTH 8550 - Writing a Quality Prospectus**

Dissertation (20 cr.)

- **HLTH 9001 - Health Services Dissertation**

### Timing of residencies

- Residency 1: Upon enrollment in program
- Residency 2: Within 18 months of start date or linked to registration in or completion of first research course
- Residency 3: By the end of third year
- Residency 4: During third year and beyond

## Ph.D. in Health Services for MHA Graduates

Students who hold a Master of Healthcare Administration (MHA) degree now have the opportunity to complete Walden's Ph.D. in Health Services in less time. The special program of study recognizes the academic progress previously achieved with an MHA degree and waives 30 credits of foundation courses and one elective course required for the Ph.D. in Health Services, significantly reducing the time and money needed to complete the doctoral degree.

The program is available to current students and alumni of the Walden MHA program, as well as to students who hold an MHA degree from another accredited university.

### Degree Requirements for Students Who Hold an MHA Degree

- 65–66 total quarter credits
- Foundation course (1 cr.)
Degree Requirements

For students who hold a Master of Public Health (MPH) degree; Track 1 allows the student to forgo foundational public health courses and complete the program in a shorter amount of time. Track 1: 65 total quarter credit hours

- Foundations Course (2 cr.)
- Core courses (45 cr.)
- Research courses (8 cr.)
- Capstone (10 cr.)
- Two residencies equal to a minimum of 8 days

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Health Services program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Community Health

The Community Health specialization prepares students to promote health, reduce risk factors, and influence community leadership to support healthful conditions among diverse populations. Students will examine leadership principles, health education policies, and social and behavioral change theories that underpin effective community health education and advocacy, with consideration given to the planning and organization of health programs and the use of mass communications media and marketing strategies in support of these efforts. Throughout the course of their dissertation, students will be supported by scholar-practitioner faculty members as they pursue individual research in an interest area of community health.

Learning Outcomes

At the end of this program, students will be able to:
1. Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
2. Lead and inform the professional dialogue on key health services issues.
3. Design, conduct, and analyze studies of economic evaluation in healthcare.
4. Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
5. Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
6. Engage in scientific inquiry that advances the knowledge base of research and practice in health services.
7. Demonstrate an understanding of global community health education programs, strategies, and campaigns.

Specialization Curriculum

Specialization Courses (19 cr.)

- HLTH 8450 - Community Health Assessment
- HLTH 8440 - Application of Public Health and Behavior Change Theories
- HLTH 8050 - Global Health and Issues in Disease Prevention
- HLTH 8129 - Communications, Marketing, and Public Relations for Public Health Leaders

Healthcare Administration Specialization

The Healthcare Administration specialization prepares students to administer healthcare programs and services through the application of best practices in leadership, professionalism, ethics, and strategic planning. Students will examine the principles of social justice implicit in healthcare decisions and practice, as well as the theoretical underpinnings of governance and public policy in their chosen area of specialization, with an emphasis on collaborative and effective approaches to working with diverse workforces and communities. Throughout the course of their dissertation, students will be supported by scholar-practitioner faculty members.

Learning Outcomes

At the end of this program, students will be able to:
1. Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
2. Lead and inform the professional dialogue on key health services issues.
3. Design, conduct, and analyze studies of economic evaluation in healthcare.
4. Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
5. Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
6. Engage in scientific inquiry that advances the knowledge base of research and practice in health services.
7. Demonstrate effective approaches to leadership, strategic planning, governance, and public policy needed in health services.

Specialization Curriculum

Specialization Courses (20 cr.)

- HLTH 8031 - Public Health Administration and Leadership
- HLTH 8400 - Public Health Leadership and Systems Thinking
- HLTH 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
- HLTH 8112 - Governance and Public Policy

Leadership

The Leadership specialization prepares students to be healthcare leaders who can work effectively with diverse workforces and communities under varying political and economic conditions by utilizing competencies in organizational change management, team building, mediation, collaboration, and systems thinking and planning. Students will examine the theoretical underpinnings of leadership and ethics, as well as the professional attributes, skills, styles, and strategies required advancing public health goals. The use of dynamic language techniques by leadership will be explored, providing students with a practical foundation for motivating, inspiring, and managing their organizations through effective communication. Throughout the course of their dissertation, students will be supported by scholar-practitioner faculty members as they pursue individual research in an interest area of healthcare leadership.

Learning Outcomes

At the end of this program, students will be able to:
1. Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
2. Lead and inform the professional dialogue on key health services issues.
3. Design, conduct, and analyze studies of economic evaluation in healthcare.
4. Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
5. Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
6. Engage in scientific inquiry that advances the knowledge base of research and practice in health services.
7. Analyze leadership theories, concepts, and tools that provide the foundation for health services decision making.

Specialization Curriculum

Specialization Courses (20 cr.)

- HLTH 8031 - Public Health Administration and Leadership
- HLTH 8400 - Public Health Leadership and Systems Thinking
- HLTH 8111 - Leadership and Organizational Change
- HLTH 8392 - The Language of Leadership

Public Health Policy

The Public Health Policy specialization prepares students to design, implement, manage, and influence public health policy at the local, state, and federal levels. Students will explore how scientific data can be used in the formulation of policy recommendations and the drafting of legislation and ordinances that promote the equitable distribution of health resources and the reduction of health risk, with consideration given to the factors that influence and improve the health outcomes of individuals as well as populations. Microeconomic and macroeconomic models and the influence of public finance on policy choices will be examined, as will the tools and techniques used by policy makers and analysts to evaluate the impact of social programs. Throughout the course of their dissertation, students will be supported by scholar-practitioner faculty as they pursue individual research in an interest area of public health policy.

Learning Outcomes

At the end of this program, students will be able to:
1. Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
2. Lead and inform the professional dialogue on key health services issues.
3. Design, conduct, and analyze studies of economic evaluation in healthcare.
4. Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
5. Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
6. Engage in scientific inquiry that advances the knowledge base of research and practice in health services.

Specialization Curriculum
Specialization Courses (20 cr.)

- HLTH 8127 - Public Health Policy, Politics and Progress♦
- HLTH 8451 - Public Policy Analysis♦
- HLTH 8431 - Finance and Budgeting for the Public Sector♦
- HLTH 8475 - Advanced Program Planning Implementation and Evaluation♦

Self-Designed Specialization

Healthcare professionals who are interested in pursuing an area that does not quite fit among the specializations currently offered through the program may develop their own specialization by choosing a selection of courses from all specializations listed above. Throughout the course of their dissertation, students will be supported by scholar-practitioner faculty as they pursue individual research in an interest area approved by the faculty chair.

Specialization Curriculum

Students will select four courses for the Self-Designed specialization.

Specialization Courses (19–20 cr.)

Choose three:

- HLTH 8400 - Public Health Leadership and Systems Thinking♦
- HLTH 8450 - Community Health Assessment♦
- HLTH 8129 - Communications, Marketing, and Public Relations for Public Health Leaders♦
- HLTH 8475 - Advanced Program Planning Implementation and Evaluation♦
- HLTH 8050 - Global Health and Issues in Disease Prevention♦

Choose two:

Select two courses from any Walden doctoral program (8–10 cr.).

Ph.D. in Public Health

The Ph.D. in Public Health program focuses on seeking solutions to significant public health problems by applying and integrating knowledge into public health practice and research. The program fosters the development and demonstration of research and analytical skills to prepare students for careers in academia or in public and private organizations and institutions. Students may elect to specialize in either Community Health Education or Epidemiology.

Learning Outcomes

At the end of the program, students will be able to:
1. Utilize critical-thinking and assessment skills in order to analyze barriers, assess needs, and advance the knowledge and practice of public health.
2. Evaluate and apply population-based theories and strategies used in the prevention of disease and disability.
3. Lead and inform professional communication, marketing, and public relations on key issues in public health.
4. Apply fiscal and organizational tenets to public health program leadership.
5. Demonstrate advanced competency in health informatics and surveillance techniques used in public health programs.
6. Apply public health research to promote positive social change concerning the health of diverse populations.

**Specializations**
- Community Health Education (Tracks 1 and 2)
- Epidemiology (Tracks 1 and 2)

**Degree Requirements**
- Number of credits depends on specialization
  - **Track 1:** 83–84 total quarter credit hours
  - **Track 2:** 114–115 total quarter credit hours
- Introductory Course (2 cr.)
- Foundation courses (31 cr., Track 2 only)
- Core courses (38 cr.)
- Community Health Education: 42 cr.
- Epidemiology: 38 cr.
- Specialization courses (23 cr., depending on specialization)
- Community Health Education: 19 cr.
- Epidemiology: 23 cr.
- Research proposal, dissertation, and oral presentation (20 cr.)
- Minimum 10 quarters' enrollment
- Four residencies equal to a minimum of 16 residency units

**Curriculum**
The Ph.D. program has two tracks, providing different levels of foundational knowledge based on the students' studies prior to entering the program. All students complete the same core and specialization curriculum.
- **Track 1:** Students who enter the program with a master's degree in public health complete PUBH 8003 - Building a Multidisciplinary Approach to Health followed by the program's core and specialization courses.
- **Track 2:** Students who enter the program with a bachelor's degree or with a graduate degree that is not in public health complete a set of foundational courses in the core
competencies and practice of public health before they move on to the sequence of courses described for Track 2, followed by the core and specialization courses.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Public Health program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Community Health Education Specialization in Public Health

The Community Health Education specialization focuses on the medical, social, political, ethical, and economic factors that contribute to the overall well-being of public health systems and the communities they serve.

Learning Outcomes

At the end of this program, students will be able to:

1. Utilize critical-thinking and assessment skills in order to analyze barriers, assess needs, and advance the knowledge and practice of public health.
2. Evaluate and apply population-based theories and strategies used in the prevention of disease and disability.
3. Lead and inform professional communication, marketing, and public relations on key issues in public health.
4. Apply fiscal and organizational tenets to public health program leadership.
5. Demonstrate advanced competency in health informatics and surveillance techniques used in public health programs.
6. Apply public health research to promote positive social change concerning the health of diverse populations.
7. Engage in scientific inquiry that advances the knowledge base of research and practice in community health assessment and education.
8. Examine evidence-based, community health education and intervention programs and activities designed to improve public health.

Epidemiology

The Epidemiology specialization focuses on the scientific understanding of the causes, distribution, control, and prevention of disease in populations.

Learning Outcomes

At the end of the program, students will be able to:

1. Utilize critical-thinking and assessment skills in order to analyze barriers, assess needs, and advance the knowledge and practice of public health.
2. Evaluate and apply population-based theories and strategies used in the prevention of disease and disability.
3. Lead and inform professional communication, marketing, and public relations on key issues in public health.
4. Apply fiscal and organizational tenets to public health program leadership.
5. Demonstrate advanced competency in health informatics and surveillance techniques used in public health programs.
6. Apply public health research to promote positive social change concerning the health of diverse populations.
7. Engage in scientific inquiry that advances the knowledge base of research and practice in epidemiology.
8. Apply epidemiologic concepts and analytical approaches to public health problems.

Ph.D. in Health Services

The Ph.D. in Health Services program examines healthcare delivery and healthcare systems in the U.S. and internationally. Students are trained by scholar-practitioners to identify problems and solutions based on social science theories and models as well as a knowledge of historical and contemporary issues in health services and management. The program of study places an emphasis on healthcare practice and applied research. The program prepares students for careers in which doctoral-level education is desired, such as academia, research, government, and private sector positions within healthcare organizations.

Learning Outcomes

At the end of this program, students will be able to:
1. Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
2. Lead and inform the professional dialogue on key health services issues.
3. Design, conduct, and analyze studies of economic evaluation in healthcare.
4. Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
5. Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
6. Engage in scientific inquiry that advances the knowledge base of research and practice in health services.
Specializations

- Community Health
- Healthcare Administration
- Leadership
- Public Health Policy
- Self-Designed

Degree Requirements

- 101–103 total quarter credits
- Foundation course (2 cr.)
- Core courses (30 cr.)
- Foundation Research Sequence (12 cr.)
- Advanced research course (4 cr.)
- Writing course (5 cr.)
- Specialization courses (20 cr.)
- Electives (8–10 cr.)
- Proposal, dissertation, and oral presentation (20 cr.)
- Minimum 10 quarters enrollment
- Four Ph.D. residencies to equal a minimum of 16 days

Core Curriculum

Foundation Course (2 cr.)

- HLTH 8003 - Building a Multidisciplinary Approach to Health
  All beginning Ph.D. in Health Services students are required to successfully complete this course and are automatically enrolled in it during their first quarter.

Core Courses (30 cr.)

- HLTH 8410 - U.S. Healthcare Delivery System
- HLTH 8415 - Organizational Development and Leadership
- HLTH 8420 - Health Economics
- HLTH 8425 - Health Policy
- HLTH 8430 - Healthcare Financial Management
- HLTH 8435 - Health Law and Ethics

Foundation Research Sequence (12 cr.)

Courses composing the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide
discussions and evaluate discussion and application assignments. RSCH 8100X must be completed prior to Residency 2 of the academic residencies. RSCH 8200X and RSCH 8300X must be completed prior to beginning the dissertation or attending Residency 3.

- **RSCH 8100X - Research Theory, Design, and Methods**
- **RSCH 8200X - Quantitative Reasoning and Analysis**
- **RSCH 8300X - Qualitative Reasoning and Analysis**

**Advanced Research Course (4 cr.)**

All Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements. One of the following three courses is required:

- **RSCH 8250X - Advanced Quantitative Reasoning and Analysis**
- **RSCH 8350X - Advanced Qualitative Reasoning and Analysis**
- **RSCH 8450X - Advanced Mixed-Methods Reasoning and Analysis**

**Writing Course (5 cr.)**

- **HLTH 8550 - Writing a Quality Prospectus**

**Dissertation (20 cr.)**

- **HLTH 9001 - Health Services Dissertation**

**Course Sequence**

**Ph.D. in Health Services for MHA Graduates**

Students who hold a Master of Healthcare Administration (MHA) degree now have the opportunity to complete Walden's Ph.D. in Health Services in less time. The special program of study recognizes the academic progress previously achieved with an MHA degree and waives 30 credits of foundation courses and one elective course required for the Ph.D. in Health Services, significantly reducing the time and money needed to complete the doctoral degree.

The program is available to current students and alumni of the Walden MHA program, as well as to students who hold an MHA degree from another accredited university.

**Degree Requirements for Students Who Hold an MHA Degree**

- 65–66 total quarter credits
- Foundation course (1 cr.)
- Foundation Research Sequence (12 cr.)
- Advanced research course (4 cr.)
- Writing course (5 cr.)
- Specialization courses (19 cr.)
• Elective (4–5 cr.)
• Proposal, dissertation, and oral presentation (20 cr.)
• Minimum 10 quarters enrollment
• 16 units of academic residency (four 4-day residencies)

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Health Services program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Ph.D. in Public Health**

The Ph.D. in Public Health program focuses on seeking solutions to significant public health problems by applying and integrating knowledge into public health practice and research. The program fosters the development and demonstration of research and analytical skills to prepare students for careers in academia or in public and private organizations and institutions. Students may elect to specialize in either Community Health Education or Epidemiology.

**Learning Outcomes**

At the end of the program, students will be able to:
1. Utilize critical-thinking and assessment skills in order to analyze barriers, assess needs, and advance the knowledge and practice of public health.
2. Evaluate and apply population-based theories and strategies used in the prevention of disease and disability.
3. Lead and inform professional communication, marketing, and public relations on key issues in public health.
4. Apply fiscal and organizational tenets to public health program leadership.
5. Demonstrate advanced competency in health informatics and surveillance techniques used in public health programs.
6. Apply public health research to promote positive social change concerning the health of diverse populations.

**Specializations**

• Community Health Education (Tracks 1 and 2)
• Epidemiology (Tracks 1 and 2)

**Degree Requirements**

• Number of credits depends on specialization
  o **Track 1:** 83–84 total quarter credit hours
Curriculum

The Ph.D. program has two tracks, providing different levels of foundational knowledge based on the students' studies prior to entering the program. All students complete the same core and specialization curriculum.

- **Track 1:** Students who enter the program with a master's degree in public health complete PUBH 8003 - Building a Multidisciplinary Approach to Health followed by the program's core and specialization courses.
- **Track 2:** Students who enter the program with a bachelor's degree or with a graduate degree that is not in public health complete a set of foundational courses in the core competencies and practice of public health before they move on to the sequence of courses described for Track 2, followed by the core and specialization courses.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Public Health program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Community Health

The Community Health specialization prepares students to promote health, reduce risk factors, and influence community leadership to support healthful conditions among diverse populations. Students will examine leadership principles, health education policies, and social and behavioral change theories that underpin effective community health education and advocacy, with consideration given to the planning and organization of health programs and the use of mass communications media and marketing strategies in support of these efforts. Throughout the course of their dissertation, students will be supported by scholar-practitioner faculty members as they pursue individual research in an interest area of community health.
Learning Outcomes

At the end of this program, students will be able to:

1. Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
2. Lead and inform the professional dialogue on key health services issues.
3. Design, conduct, and analyze studies of economic evaluation in healthcare.
4. Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
5. Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
6. Engage in scientific inquiry that advances the knowledge base of research and practice in health services.
7. Demonstrate an understanding of global community health education programs, strategies, and campaigns.

Specialization Curriculum

Specialization Courses (19 cr.)

- HLTH 8450 - Community Health Assessment
- HLTH 8440 - Application of Public Health and Behavior Change Theories
- HLTH 8050 - Global Health and Issues in Disease Prevention
- HLTH 8129 - Communications, Marketing, and Public Relations for Public Health Leaders

Community Health Education Specialization in Public Health

The Community Health Education specialization focuses on the medical, social, political, ethical, and economic factors that contribute to the overall well-being of public health systems and the communities they serve.

Learning Outcomes
At the end of this program, students will be able to:

1. Utilize critical-thinking and assessment skills in order to analyze barriers, assess needs, and advance the knowledge and practice of public health.
2. Evaluate and apply population-based theories and strategies used in the prevention of disease and disability.
3. Lead and inform professional communication, marketing, and public relations on key issues in public health.
4. Apply fiscal and organizational tenets to public health program leadership.
5. Demonstrate advanced competency in health informatics and surveillance techniques used in public health programs.
6. Apply public health research to promote positive social change concerning the health of diverse populations.
7. Engage in scientific inquiry that advances the knowledge base of research and practice in community health assessment and education.
8. Examine evidence-based, community health education and intervention programs and activities designed to improve public health.

**Epidemiology**

The Epidemiology specialization focuses on the scientific understanding of the causes, distribution, control, and prevention of disease in populations.

**Learning Outcomes**

At the end of the program, students will be able to:

1. Utilize critical-thinking and assessment skills in order to analyze barriers, assess needs, and advance the knowledge and practice of public health.
2. Evaluate and apply population-based theories and strategies used in the prevention of disease and disability.
3. Lead and inform professional communication, marketing, and public relations on key issues in public health.
4. Apply fiscal and organizational tenets to public health program leadership.
5. Demonstrate advanced competency in health informatics and surveillance techniques used in public health programs.
6. Apply public health research to promote positive social change concerning the health of diverse populations.
7. Engage in scientific inquiry that advances the knowledge base of research and practice in epidemiology.
8. Apply epidemiologic concepts and analytical approaches to public health problems.

**Healthcare Administration Specialization**

The Healthcare Administration specialization prepares students to administer healthcare programs and services through the application of best practices in leadership, professionalism, ethics, and strategic planning. Students will examine the principles of social justice implicit in healthcare decisions and practice, as well as the theoretical underpinnings of governance and public policy in their chosen area of specialization, with an emphasis on collaborative and effective approaches to working with diverse workforces and communities. Throughout the course of their dissertation, students will be supported by scholar-practitioner faculty members.

**Learning Outcomes**

At the end of this program, students will be able to:
1. Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
2. Lead and inform the professional dialogue on key health services issues.
3. Design, conduct, and analyze studies of economic evaluation in healthcare.
4. Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
5. Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
6. Engage in scientific inquiry that advances the knowledge base of research and practice in health services.
7. Demonstrate effective approaches to leadership, strategic planning, governance, and public policy needed in health services.

Specialization Curriculum

Specialization Courses (20 cr.)

- HLTH 8031 - Public Health Administration and Leadership
- HLTH 8400 - Public Health Leadership and Systems Thinking
- HLTH 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
- HLTH 8112 - Governance and Public Policy

Leadership

The Leadership specialization prepares students to be healthcare leaders who can work effectively with diverse workforces and communities under varying political and economic conditions by utilizing competencies in organizational change management, team building, mediation, collaboration, and systems thinking and planning. Students will examine the theoretical underpinnings of leadership and ethics, as well as the professional attributes, skills, styles, and strategies required advancing public health goals. The use of dynamic language techniques by leadership will be explored, providing students with a practical foundation for motivating, inspiring, and managing their organizations through effective communication. Throughout the course of their dissertation, students will be supported by scholar-practitioner faculty members as they pursue individual research in an interest area of healthcare leadership.

Learning Outcomes

At the end of this program, students will be able to:
1. Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
2. Lead and inform the professional dialogue on key health services issues.
3. Design, conduct, and analyze studies of economic evaluation in healthcare.
4. Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
5. Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
6. Engage in scientific inquiry that advances the knowledge base of research and practice in health services.
7. Analyze leadership theories, concepts, and tools that provide the foundation for health services decision making.

**Specialization Curriculum**

**Specialization Courses (20 cr.)**

- HLTH 8031 - Public Health Administration and Leadership
- HLTH 8400 - Public Health Leadership and Systems Thinking
- HLTH 8111 - Leadership and Organizational Change
- HLTH 8392 - The Language of Leadership

**Self-Designed Specialization**

Healthcare professionals who are interested in pursuing an area that does not quite fit among the specializations currently offered through the program may develop their own specialization by choosing a selection of courses from all specializations listed above. Throughout the course of their dissertation, students will be supported by scholar-practitioner faculty as they pursue individual research in an interest area approved by the faculty chair.

**Specialization Curriculum**

Students will select four courses for the Self-Designed specialization.

**Specialization Courses (19–20 cr.)**

Choose three:

- HLTH 8400 - Public Health Leadership and Systems Thinking
- HLTH 8450 - Community Health Assessment
- HLTH 8129 - Communications, Marketing, and Public Relations for Public Health Leaders
- HLTH 8475 - Advanced Program Planning Implementation and Evaluation
- HLTH 8050 - Global Health and Issues in Disease Prevention

Choose two:

Select two courses from any Walden doctoral program (8–10 cr.).
SCHOOL OF NURSING

Learn more about the Undergraduate Minors and Accelerate Into Master's (AIM) Programs.
Bachelor of Science in Nursing (BSN) Completion Program

The Bachelor of Science in Nursing (BSN) Completion Program provides current registered nurses (RNs) who have a diploma or associate degree in nursing with the opportunity to earn a BSN degree.

The program is specifically designed to provide students with the evidence-based practices that can be applied on the job immediately. At the same time, students will develop the skills of reflection, independent learning, and enhanced critical thinking that will enable them to stay current in their field throughout their career.

Learning Outcomes

At the end of this program, students will be able to:

1. Apply leadership and informatics concepts in decision making to promote patient safety and quality care.
2. Use evidence based on the sciences, humanities, and research to guide nursing practice across the health-illness continuum in a variety of healthcare settings.
3. Evaluate the implications of policy on issues of access, equity, affordability, and social justice in healthcare delivery including the health of vulnerable populations and healthcare disparities.
4. Demonstrate effective communication and collaboration skills to improve patient outcomes.
5. Implement individual and population-focused interventions to promote health and to prevent and manage disease and injuries.
6. Exhibit accountability for personal and professional behaviors in accordance with standards of moral, ethical, and legal conduct with a commitment to continuous professional development.
7. Provide patient-centered nursing care based on a comprehensive and focused health assessment across the lifespan using sound clinical judgment as well as developmentally and culturally appropriate approaches.

Accreditation

Walden University’s BSN program is accredited by the Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, NW, Suite 530, Washington, D.C. 20036, 1-202-887-
CCNE is a national accrediting agency recognized by the U.S. Department of Education and ensures the quality and integrity of baccalaureate and graduate education programs in preparing effective nurses. For students, accreditation signifies program innovation and continuous self-assessment.

**Tracks**

- RN-BSN Track
- RN-BSN-MSN Track

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Bachelor of Science in Nursing (BSN) Completion Program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**RN-BSN Track**

The Bachelor of Science in Nursing (BSN) Completion Program provides current registered nurses (RNs) who have a diploma or associate's degree in nursing with the opportunity to earn a BSN degree.

The program is specifically designed to provide students with the evidence-based practices that can be applied on the job immediately. At the same time, students will develop the skills of reflection, independent learning, and enhanced critical thinking that will enable them to stay current in their field throughout their career.

**Learning Outcomes**

At the end of this program, students will be able to:

1. Apply leadership and informatics concepts in decision making to promote patient safety and quality care.
2. Use evidence based on the sciences, humanities, and research to guide nursing practice across the health-illness continuum in a variety of healthcare settings.
3. Evaluate the implications of policy on issues of access, equity, affordability, and social justice in healthcare delivery including the health of vulnerable populations and healthcare disparities.
4. Demonstrate effective communication and collaboration skills to improve patient outcomes.
5. Implement individual and population-focused interventions to promote health and to prevent and manage disease and injuries.
6. Exhibit accountability for personal and professional behaviors in accordance with standards of moral, ethical, and legal conduct with a commitment to continuous professional development.

7. Provide patient-centered nursing care based on a comprehensive and focused health assessment across the lifespan using sound clinical judgment as well as developmentally and culturally appropriate approaches.

**Degree Requirements**

- 180 total credits
- Foundation Course (6 cr.)
- General education (50 cr., at least 10 of which must be completed at Walden and all of which are to be completed prior to BSN core and concentration courses)
- Nursing license transfer of credit (up to 50 cr.)
- Upper-level nursing core courses (54 cr.)
- Elective courses (25 cr.)

**Curriculum**

**Foundation Course (6 cr.)**

- *HMNT 1001 - Living and Learning in a Technological World*

**General Education Courses (50 cr.)**

BSN students are required to complete all general education requirements prior to enrolling in any major courses. The general education course curriculum builds upon a foundation of the arts, sciences, and humanities; thus, the BSN core courses are designed presuming that students have this foundation.

See the general education section of this *Walden University Catalog*.

**Note:** A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

**Nursing License Transfer of Credit (50 cr.)**

Up to 50 credits will be awarded based on transcripts from an accredited associate's degree in nursing or a nursing diploma. Students who are not awarded the maximum of 50 credits will take general education or elective courses to complete this requirement.

**Upper Level Nursing Core (54 cr.)**

- *NURS 3000 - Issues and Trends in Nursing*
- *NURS 3005 - The Context of Healthcare Delivery*
Elective Courses (25 cr.)

Choose four courses from the general education program, the Bachelor of Science in Nursing (BSN) Completion Program, or other Walden bachelor's degree programs. At least two courses must be at the 3000–4000 level. Elective credits should total 25 to meet the program requirements. Students may also be eligible to transfer previous credit to meet your elective requirements. Note on Minors: Electives can also be used to complete a six-course minor. Although this program requires fewer than six elective courses, students have the option to complete a minor and graduate with more than the required number of credits for this program.

RN-BSN-MSN Track

The RN-BSN-MSN program provides current registered nurses (RNs) who have a diploma and/or associate's degree in nursing with the opportunity to earn a BSN degree as well as take three master's-level courses that can be transferred* into a Master of Science in Nursing (MSN) degree.

The program is specifically designed to provide students with the evidence-based practices that can be applied on the job immediately. At the same time, students will develop the skills of reflection, independent learning, and enhanced critical thinking that will enable them to stay current in their field throughout their career.

The RN-BSN-MSN program will provide a student with a bachelor's degree. All students will enter the program with previously earned education credits. These credits may include:

- Credits awarded for meeting competencies required to achieve the nursing license through either a diploma program or an associate's degree program.
- Transfer credits from undergraduate courses that they have taken at other universities.
- 135 of the 180 quarter credits may potentially be transferred into the program (depending upon the qualifications the students bring as they enter).

*The three master's-level courses can only be transferred into an MSN degree if the students receive a grade of B or higher.

Learning Outcomes

At the end of this program, students will be able to:
1. Apply leadership and informatics concepts in decision making to promote patient safety and quality care.
2. Use evidence based on the sciences, humanities, and research to guide nursing practice across the health-illness continuum in a variety of healthcare settings.
3. Evaluate the implications of policy on issues of access, equity, affordability, and social justice in healthcare delivery including the health of vulnerable populations and healthcare disparities.
4. Demonstrate effective communication and collaboration skills to improve patient outcomes.
5. Implement individual and population-focused interventions to promote health and to prevent and manage disease and injuries.
6. Exhibit accountability for personal and professional behaviors in accordance with standards of moral, ethical, and legal conduct with a commitment to continuous professional development.
7. Provide patient-centered nursing care based on a comprehensive and focused health assessment across the lifespan using sound clinical judgment as well as developmentally and culturally appropriate approaches.

Specializations
- General

Degree Requirements
- 180 total credits
  - Foundation Course (6 cr.)
  - General Education (50 cr., at least 10 of which must be completed at Walden and all of which are to be completed prior to BSN core and concentration courses)
  - Nursing license transfer of credit (up to 50 cr.)
  - Upper-level nursing core courses (54 cr.)
    - NURS 5050, NURS 5051, and NURS 5052 will transfer into the MSN program with a grade of B or higher.
  - Elective courses (25 cr.)

Curriculum

Foundation Course (6 cr.)
- HMNT 1001 - Living and Learning in a Technological World

General Education Courses (50 cr.)
RN-BSN-MSN students are required to complete all general education requirements prior to enrolling in any major courses. The general education course curriculum builds upon a foundation of the arts, sciences, and humanities; thus, the BSN core courses are designed presuming that students have had this foundation.

See the general education section of this Walden University Catalog.

**Note:** A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

**Nursing License Transfer of Credit (50 cr.)**

Up to 50 credits will be awarded based on transcripts from an accredited associate degree in nursing or a nursing diploma. Students who are not awarded the maximum of 50 credits will take general education or elective courses to complete this requirement.

**Upper-Level Nursing Core Courses (54 cr.)**

- **NURS 3000 - Issues and Trends in Nursing**
- **NURS 5050 - Policy and Advocacy for Improving Population Health**
- **NURS 3015 - Pathopharmacology**
- **NURS 5051 - Transforming Nursing and Healthcare Through Technology**
- **NURS 3020 - Health Assessment**
- **NURS 5052 - Essentials of Evidence-Based Practice**
- **NURS 4005 - Topics in Clinical Nursing**
- **NURS 4010 - Family, Community, and Population-Based Care**
- **NURS 4015 - Public and Global Health**
- **NURS 4020 - Leadership Competencies in Nursing and Healthcare**

**Elective Courses (25 cr.)**

Choose four courses from the general education program, the Bachelor of Science in Nursing (BSN) Completion Program, or other Walden bachelor's degree programs. At least two courses must be at the 3000–4000 level. Elective credits should total 25 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

**Note on Minors:** Electives can also be used to complete a six-course minor. Although this program requires fewer than six elective courses, students have the option to complete a minor and graduate with more than the required number of credits for this program.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Bachelor of Science in Nursing (RN-BSN) Completion Program relating to the types of occupations this
program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
OTHER UNDERGRADUATE OPTIONS
Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a C in the graduate-level course but only a grade of B or better will carry over to the graduate program. Students who receive a C grade will be awarded a grade of C*, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement.

Students who do not receive a B or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Accelerate Into Master's (AIM) Programs

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.

3. AIM courses are (5000-level) graduate courses.*
   a. Tuition for these courses is charged at the undergraduate rate.
   b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a B or better in each course to have that course applied to the master's program.
   - Students who get lower than a B in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   - Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a B or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note: Graduate students cannot register for AIM courses.

2014–2015 Walden University Catalog (September 2014)  Page 342
## Master of Science in Nursing (MSN)

**Note:** These courses are 11 weeks in length.

- NURS 5050 - Policy and Advocacy for Improving Population Health
- NURS 5051 - Transforming Nursing and Healthcare Through Technology
- NURS 5052 - Essentials of Evidence-Based Practice

Students must be admitted to the RN-BSN-MSN track to complete these AIM courses.

## College of Social and Behavioral Sciences

## School of Public Policy and Administration

## Master of Public Administration (MPA)

*Students may select up to five of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- MMPA 5200 - Introduction to Public Administration
- MMPA 5405 - Ethics and Social Justice
- MMPA 5420 - Organizational Management and Leadership
- MMPA 5431 - Finance and Budgeting for the Public Sector
- MMPA 5435 - Human Resource Management: Building a Capable Workforce
- MMPA 5451 - Public Policy Analysis
- MMPA 5480 - Applied Research and Evaluation Methods

## Master of Public Policy (MPP)

*Students may select any or all of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- MMPP 5280 - Policy and Politics in American Political Institutions
- MMPP 5405 - Ethics and Social Justice
- MMPP 5111 - Leadership and Organizational Change
### M.S. in Emergency Management

*Students may select any or all of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- MSEM 5364 - Managing Public Safety Organizations
- MSEM 5100 - Critical Issues in Emergency Management
- MSEM 5480 - Applied Research and Evaluation Methods
- MSEM 5363 - Public Safety Issues

### M.S. in Nonprofit Management and Leadership

*Students may select up to five of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- NPMG 5200 - Introduction to the Nonprofit Sector
- NPMG 5405 - Ethics and Social Justice
- NPMG 5420 - Organizational Management and Leadership
- NPMG 5431 - Finance and Budgeting for the Nonprofit Sector
- NPMG 5435 - Human Resource Management: Building a Capable Workforce
- NPMG 5480 - Applied Research and Evaluation Methods

### M.S. in Criminal Justice

*Students may select any or all of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- CRJS 5137 - The Nature of Crime and Criminology
- CRJS 5215 - Controversies in Criminal Justice
- CRJS 5511 - Special Populations
- CRJS 5217 - Technological Solutions and 21st-Century Crime
- CRJS 5203 - Victimology

### M.S. in Criminal Justice Leadership and Executive Management

*Students may select any or all of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- CRJS 5137 - The Nature of Crime and Criminology
- CRJS 5215 - Controversies in Criminal Justice
M.S. in Psychology

Students may select any or all of these courses for the listed specializations. Individual course prerequisites apply.  
*Note:* These courses are 11 weeks in length.

Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their academic advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Child Development
- Minor in Communication
- Minor in Criminal Justice
- Minor in Healthcare Management
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Introductory Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health
MASTER’S DEGREE PROGRAMS

Master of Science in Nursing (MSN)
The Master of Science in Nursing (MSN) prepares students to focus their practice on the identified health needs of society, become leaders in their field through scholarship, manage technology and information, and develop a lifelong commitment to learning.

**Learning Outcomes**

At the end of this program, students will be able to:

1. Synthesize organizational/systems leadership for cost-effective specialist nursing practice that contributes to high-quality healthcare delivery, advancement of the nursing profession, and social change.
2. Critique evidence-based literature drawing from diverse theoretical perspectives and pertinent research to guide decision making that demonstrates best practices for specialist nursing practice in a global society.
3. Integratively assess, diagnose, plan, implement, and evaluate cost-effective healthcare strategies that reduce health disparities by patient/population advocacy for access to specialist nursing care.
4. Demonstrate ability to effectively communicate using audience-specific oral, written, and information technology for professional delivery of specialist nursing care.
5. Evaluate health needs of diverse populations for necessary teaching/coaching functions based on specialist nursing knowledge to restore/promote health and prevent illness/injury.
6. Exhibit ongoing commitment to professional development and value of nursing theories/ethical principles (altruism, autonomy, human dignity, integrity, social justice) in accordance with ethically responsible, legally accountable, specialist nursing practice.
7. Implement specialist nursing roles to promote quality improvement of patient-centered care in accordance with professional practice standards that transform health outcomes for diverse populations.

**Accreditation**

Walden University's MSN program is accredited by the Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, NW, Suite 530, Washington, D.C. 20036, 1-202-887-6791. CCNE is a national accrediting agency recognized by the U.S. Department of Education and ensures the quality and integrity of baccalaureate and graduate education programs in preparing effective nurses. For students, accreditation signifies program innovation and continuous self-assessment.

**Specializations**

- Adult-Gerontology Acute Care Nurse Practitioner
- Adult-Gerontology Nurse Practitioner
• Education
• Family Nurse Practitioner
• Leadership and Management
• Nursing Informatics

Degree Requirements

• BSN Track: 51 or 56 quarter credit hours; RN Track: 80 or 85 quarter credit hours (depending on specialization)
• Foundation course (1 qtr. cr.)
• Professional Development Plan and program of study
• Core courses (20 qtr. cr.)
• Specialization courses (30 or 35 cr., depending on specialization)
• Portfolio (excludes Adult-Gerontology Nurse Practitioner and Family Nurse Practitioner specializations)

Curriculum

The program has two tracks for registered nurses:
1. BSN Track: This track is for students with a Bachelor of Science in Nursing (BSN) degree.
2. RN Track: This track is for students with an associate's degree in nursing or a diploma in nursing that prepares for licensure in registered nursing. RN-MSN applications will not be accepted without a nursing degree conferred.

BSN Track: BSN graduates enter the program at the core course level.

RN Track: Students complete 29 quarter credits of foundational courses before starting the core courses: the foundational courses contain the essential content and learning activities to prepare students for the core courses.

BSN and RN Tracks: All students complete the same core and specialization curriculum. The four core courses provide students with a graduate-level knowledge in areas of theory, research, diversity, legality/ethics, and healthcare systems. The specialization courses build on the core courses and offer students direction and guidance for influencing nursing practice in selected areas. A portfolio based on the specific outcomes of the program must be submitted and approved before the degree is granted.

Foundational and Core Curricula

BSN and RN Tracks: Foundation Course (1 cr.)

• NURS 6001 - Foundations for Graduate Study
RN Track Only: Foundation Courses (29 cr.)

- NURS 3001 - Issues and Trends in Nursing
- NURS 4001 - Research and Scholarship for Evidence-Based Practice
- NURS 4006 - Topics in Clinical Nursing
- NURS 4011 - Family, Community, and Population-Based Care
- NURS 4021 - Leadership Competencies in Nursing and Healthcare

BSN and RN Tracks: Core Courses (20 cr.)

- NURS 6050 - Policy and Advocacy for Improving Population Health
- NURS 6051 - Transforming Nursing and Healthcare Through Technology
- NURS 6052 - Essentials of Evidence-Based Practice
- NURS 6053 - Interprofessional Organizational and Systems Leadership

Provisional General Education Courses Available

Courses are available at Walden for those students who have not completed the minimum undergraduate credits of general education courses required for admission to the master’s program. Students who choose to complete general education courses at Walden are admitted provisionally to the RN Track of the MSN program.

*Note: No course can count twice toward meeting general education requirements.*

Communication (2 courses)

- ENGL 1001 - English Composition♦
- ENGL 2002 - Professional Writing for Successful Communication♦

Arts & Humanities (2 courses)

- HMNT 3001 - Modern Popular Culture♦
- PHIL 1001 - Introduction to Philosophy♦

Social/Behavioral Sciences (2 courses)

- SOCI 1001 - Introduction to Sociology♦
- PSYC 1001 - Introduction to Psychology♦

Science (3 courses)

- BIOL 2888
  Required:
- BIOL 3020 - Essentials of Human Anatomy and Physiology♦ (May be transferred or taken at Walden.)

Additional Science courses, if needed:
Statistics (1 course)

- STAT 3001 - Statistical Methods and Applications

Elective (1 course)

- ANTH 3001 - Indigenous Peoples in the Modern World

*General Education courses are available at Walden for those students who have not completed the minimum undergraduate credits of general education courses required for admission to the master's program.

Note on Certification

The MSN nurse practitioner specializations are designed to prepare graduates to qualify to sit for national nurse practitioner certification exams, which are required for practice as a nurse.
practitioner in most states. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency to determine specific certification exam requirements. Walden enrollment advisors can provide information relating to national certification exams; however, it remains the individual's responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she intends to practice as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain national certification. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners at www.aanpcertification.org, American Nurses Credentialing Center at www.nursecredentialing.org, or other nurse practitioner certification exam websites.

**Note on Licensure**

The MSN nurse practitioner specializations are designed to prepare graduates with an active registered nurse (RN) license to practice as nurse practitioners. However, each state Board of Nursing has its own academic and certification requirements and issues its own credential for an RN to be permitted to practice as a nurse practitioner in that state. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency in the state in which he or she wishes to practice to determine specific requirements. Walden enrollment advisors can provide guidance relating to the state-by-state requirements for practice as a nurse practitioner; however, it remains the individual's responsibility to understand, evaluate, and comply with all requirements relating to the practice as a nurse practitioner in the state in which he or she intends to practice as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure, authorization, endorsement, or other state credential. For more information about the requirements to practice as a nurse practitioner, students should contact the appropriate Board of Nursing or state agency.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Master of Science in Nursing (MSN) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Adult-Gerontology Acute Care Nurse Practitioner**

In the Adult-Gerontology Acute Care Nurse Practitioner specialization, students build their core competencies to become nurse practitioners while acquiring the advanced practice skills essential to high-acuity healthcare settings such as hospital emergency rooms, intensive care units, trauma centers, and specialty practices. Coursework prepares students for the challenges of managing the care of acutely or chronically ill adolescents (13+), young adults, adults, and older adults across the entire patient care experience, from initial assessment and diagnosis to developing a
treatment and care plan. Graduates of this program will also be prepared to apply research and evidence-based practice to support quality improvement initiatives.

**Specialization Courses (35 cr.)**

- NURS 6501 - Advanced Pathophysiology
- NURS 6521 - Advanced Pharmacology
- NURS 6511 - Advanced Health Assessment and Diagnostic Reasoning
- NURS 6531 - Advanced Practice Care of Adults Across the Lifespan
- NURS 6540 - Advanced Practice Care of Frail Elders
- NURS 6550 - Advanced Practice Care of Adults in Acute Care Settings I
- NURS 6560 - Advanced Practice Care of Adults in Acute Care Settings II

**Note on Certification**

The MSN nurse practitioner specializations are designed to prepare graduates to qualify to sit for national nurse practitioner certification exams, which are required for practice as a nurse practitioner in most states. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency to determine specific certification exam requirements. Walden enrollment advisors can provide information relating to national certification exams; however, it remains the individual's responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she intends to practice as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain national certification. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners at www.aanpcertification.org, American Nurses Credentialing Center at www.nursecredentialing.org, or other nurse practitioner certification exam websites.

**Note on Licensure**

The MSN nurse practitioner specializations are designed to prepare graduates with an active registered nurse (RN) license to practice as nurse practitioners. However, each state Board of Nursing has its own academic and certification requirements and issues its own credential for an RN to be permitted to practice as a nurse practitioner in that state. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency in the state in which he or she wishes to practice to determine specific requirements. Walden enrollment advisors can provide guidance relating to the state-by-state requirements for practice as a nurse practitioner; however, it remains the individual's responsibility to understand, evaluate, and comply with all requirements relating to the practice as a nurse practitioner in the state in which he or she intends to practice as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure, authorization, endorsement, or other state credential. For more information about
the requirements to practice as a nurse practitioner, students should contact the appropriate Board of Nursing or state agency.

**Adult-Gerontology Nurse Practitioner**

The advanced practice registered nurse role in the healthcare system is becoming increasingly critical—and specialized—as the healthcare industry undergoes myriad changes. Adult-Gerontology Nurse Practitioners (AGNPs) are advanced practice nurses who hold a Master of Science in Nursing (MSN) and who have advanced clinical training. AGNPs are trained to assess, diagnose, treat, and manage a variety of health issues among adult patients, ages 18 years and older. This specialization explores strategies for improving health outcomes through effective communication and collaboration. Students have the opportunity to explore current health topics through a curriculum developed in collaboration with experts who serve in leading healthcare systems and institutions. Courses are rooted in evidence-based practice so that students can gain knowledge in providing quality, comprehensive, accessible, and cost-effective care.

This specialization can prepare students to make a positive difference in today's dynamic and ever-changing healthcare environment, whether in clinical practice or a related health professional role. Students can gain responsibility in their current role or prepare to advance their career. Walden practicum coordinators are available to assist students in meeting their practicum requirements. Graduates can pursue national adult nurse practitioner certification and state credentialing.

**Specialization Courses (35 cr.)**

- **NURS 6501 - Advanced Pathophysiology**
- **NURS 6521 - Advanced Pharmacology**
- **NURS 6511 - Advanced Health Assessment and Diagnostic Reasoning**
- **NURS 6531 - Advanced Practice Care of Adults Across the Lifespan**
- **NURS 6540 - Advanced Practice Care of Frail Elders**
- **NURS 6551 - Primary Care of Women**
- **NURS 6561 - Direct Care Roles in Health Promotion and Disease Prevention Across the Lifespan**

**Note on Certification**

Family Nurse Practitioner

As our society's population grows, so does the need for quality, comprehensive, accessible, and affordable healthcare. Family Nurse Practitioners (FNPs) are advanced practice registered nurses with the knowledge and skills to assess and manage health issues in patients of all ages, from birth through the senior years. This specialization can prepare students to gain autonomy or advance in their career as healthcare professionals. Through a series of courses and well-rounded clinical practice experiences focused on current health issues, students can effectively implement and facilitate disease prevention, health promotion, health maintenance, and restorative care interventions.

This online Family Nurse Practitioner specialization focuses on evidence-based techniques that can enhance the quality of care and outcomes for patients. The program offers strategies that can prepare students to work in acute and primary care health settings or change the course of their healthcare career. Walden practicum coordinators can assist students in meeting their clinical practice requirements. Graduates of the program can pursue national family nurse practitioner certification and state credentialing.

Specialization Courses (35 cr.)

- **NURS 6501 - Advanced Pathophysiology**
- **NURS 6521 - Advanced Pharmacology**
- **NURS 6511 - Advanced Health Assessment and Diagnostic Reasoning**
- **NURS 6531 - Advanced Practice Care of Adults Across the Lifespan**
- **NURS 6541 - Primary Care of Adolescents and Children**
- **NURS 6551 - Primary Care of Women**
- **NURS 6561 - Direct Care Roles in Health Promotion and Disease Prevention Across the Lifespan**
Leadership and Management

The Leadership and Management specialization prepares nurses for leadership positions in complex healthcare systems. Collaboration and partnerships are key to managing change and meeting standards for nursing practice. Graduates are ready to make a difference in organizations by addressing pressing issues such as workforce development, resources, integration of technology, and the maintenance and improvement of quality care.

Specialization Courses (30 cr.)

- NURS 6201 - Leadership in Nursing and Healthcare
- NURS 6211 - Finance and Economics in Healthcare Delivery
- NURS 6221 - Managing Human Resources
- NURS 6231 - Healthcare Systems and Quality Outcomes
- NURS 6241 - Strategic Planning in Healthcare Organizations
- NURS 6600 - Capstone Synthesis Practicum

Nursing Education

The Nursing Education specialization prepares nurses for faculty positions in all types of undergraduate nursing programs, as well as for educator roles in diverse practice settings. Graduates have the knowledge to develop, plan, implement, and evaluate educational programs for nursing students and other individuals or groups needing health-related education.

Specialization Courses (30 cr.)

- NURS 6301 - Advanced Pathopharmacology
- NURS 6511 - Advanced Health Assessment and Diagnostic Reasoning
- NURS 6321 - Curriculum Development, Assessment, and Evaluation
- NURS 6331 - Teaching Learning Strategies: Integrating Technology Into Nursing Education
- NURS 6341 - Specialty in Clinical Nursing
- NURS 6351 - Role of the Nurse Educator

Nursing Informatics

The Nursing Informatics specialization prepares nurses to more effectively utilize information technology to enhance the quality of patient care. This specialization blends nursing science with computer and information science. Coursework focuses on such key areas as information systems, database concepts, and effective project management. Graduates have the knowledge to integrate data, information, and knowledge to support decision-making processes that affect patients and providers. (Additional software may be required).

Specialization Courses (30 cr.)
- **NURS 6401 - Informatics in Nursing and Healthcare**
- **NURS 6411 - Information and Knowledge Management**
- **NURS 6421 - Supporting Workflow in Healthcare Systems**
- **NURS 6431 - System Design, Planning, and Evaluation**
- **NURS 6441 - Project Management: Healthcare Information Technology**
- **NURS 6600 - Capstone Synthesis Practicum**
POST-MASTER’S CERTIFICATE PROGRAMS

Nursing Education Certificate

This certificate program prepares nurses for faculty positions in all types of undergraduate nursing programs as well as for educator roles in diverse practice settings. Students who complete this certificate program have the knowledge to develop, plan, implement, and evaluate educational programs for nursing students and other individuals and groups needing health-related education.

Certificate Requirements

- 16 total quarter credits
- Foundation course (1 cr.)
- Specialization courses (15 cr.)

DOCTORAL DEGREE PROGRAMS

Doctor of Nursing Practice (DNP)

The Doctor of Nursing Practice (DNP) program builds on the student's knowledge and expertise to strengthen advanced nursing practice, augment healthcare delivery, and improve patient outcomes. The program's coursework covers a range of topics, including healthcare policy and advocacy, quality improvement, evidence-based practice, information systems/technology, advanced nursing practice, and organizational and systems leadership.

Learning Outcomes

At the end of this program, students will be able to:

1. Translate research findings to direct evidence-based nursing practice.
2. Develop organizational system changes for quality improvement in healthcare delivery in response to local and/or global community needs.
3. Apply optimal utilization of healthcare information technology across healthcare settings.
4. Advocate for the advancement of nursing and healthcare policy through sharing of science-based knowledge with healthcare policy makers.
5. Demonstrate leadership to facilitate collaborative teams for improving patient and populations health outcomes.
6. Utilize advanced nursing practice knowledge to implement methodologies to improve population health outcomes.
7. Establish a foundation for lifelong learning for continual elevation of contributions to the field of nursing through active involvement in professional organizations and/or other professional bodies.

Accreditation

Walden University's DNP program is accredited by the Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, NW, Suite 530, Washington, D.C. 20036, 1-202-887-6791. CCNE is a national accrediting agency recognized by the U.S. Department of Education and ensures the quality and integrity of baccalaureate and graduate education programs in preparing effective nurses. For students, accreditation signifies program innovation and continuous self-assessment.

Degree Requirements

- 47–53 total credits, depending on number of previously documented clinical hours
- Foundation course (1 cr.)
• Core courses (46 cr.)
• Field experience (up to 6 cr., for students with fewer than 500 documented clinical hours)
• Minimum 4 quarters enrollment

Core Curriculum

Foundation Course (1 cr.)

• NURS 8000 - Foundations and Essentials of Doctoral Study in Nursing

Core Courses (46 cr.)

• NURS 8100 - Healthcare Policy and Advocacy
• NURS 8110 - Theoretical and Scientific Foundations for Nursing
• NURS 8200 - Methods for Evidence-Based Practice
• NURS 8210 - Transforming Nursing and Healthcare Through Technology
• NURS 8300 - Organizational and Systems Leadership for Quality Improvement
• NURS 8310 - Epidemiology and Population Health
• NURS 8400 - Evidence-Based Practice I: Assessment and Design
• NURS 8410 - Best Practices In Nursing Specialties
• NURS 8500 - Evidence-Based Practice II: Planning and Implementation
• NURS 8510 - Evidence-Based Practice III: Implementation, Evaluation, and Dissemination

Field Experience (up to 6 cr.)

Students with fewer than 500 documented clinical hours take up to 6 credits of field experience (see Determining Clinical Hours for Admissions section).

• NURS 8600 - DNP Field Experience

**Determining Clinical Hours for Admissions**

To determine how many clinical hours students have upon entering the program, students must submit a letter from their previous master's in nursing program. It must be sent from the program director, associate dean, or dean of their previous institution. The letter must include all of the following items:

- Date
- Student's full name
- University name, department, school
- Name and title of authority sending the letter (must be the program director or above), and contact information for follow-up if necessary
- Program director, associate dean, or dean's signature
- University letterhead
- Date and title of degree earned
- Specialization earned
- Total number of preceptor verified field experience hours

The signed letter will be submitted as an element. Admissions will determine how many documented clinical hours students have completed prior to DNP entry and how many they will be required to complete in the DNP program (NURS 8600 - DNP Field Experience).

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Doctor
of Nursing Practice (DNP) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Ph.D. in Nursing**

The Ph.D. in Nursing program prepares nursing professionals for advanced careers in nursing research, practice, and education. With a focus on readying students to contribute to nursing science, advance knowledge in nursing practice, and improve healthcare services, practices, and policies, course topics include: advanced quantitative, qualitative, and mixed-methods research design; quality improvement systems and leadership; and theoretical and scientific perspectives in nursing. The doctoral dissertation enables students to conduct and publish original research that contributes to the body of knowledge in their chosen specialty. Based on their educational and career goals, students will choose from among five focus areas: Education, Healthcare Administration, Interdisciplinary Health, Leadership, and Public Health Policy. Students wishing to continue their studies may also pursue a second, optional focus area.

**Learning Outcomes**

Graduates of this program will be prepared to:

1. Utilize current research and theory to develop prevention and intervention strategies that advance the knowledge and practice of nursing.
2. Demonstrate advanced competency in research design and methodology to address social problems and needs.
3. Engage in scientific inquiry that advances the knowledge base of research and practice in the profession.
4. Evaluate the role of research and scholarship in the field of nursing in relation to its role in improving health interventions and advancing the development of related theory.
5. Synthesize nursing's philosophical and/or theoretical underpinnings in the practice of research.
6. Contribute to the science of nursing through social change and social policy initiatives.
7. Apply ethical decision making and values to the profession.
8. Advocate for policies and programs that improve health outcomes among culturally diverse populations.
9. Lead professional communication that supports the discipline and practice of nursing.
10. Demonstrate the ability to act as a role model and mentor to others who wish to pursue the profession. (Stewardship)

**Focus Areas**

- Education
- Healthcare Administration
- Interdisciplinary Health Focus
• Leadership
• Public Health Policy

Degree Requirements

• 74–78 total quarter credits
• Foundation course (1 cr.)
• Core courses (25 cr.)
• Research courses (16 cr.)
• Focus area courses (12–16 cr.)
• Dissertation (20 cr.)
• Four Ph.D. residencies to equal a minimum of 16 days

Core Curriculum

Foundation Curriculum (1 cr.)

• NURS 8000 - Foundations and Essentials of Doctoral Study in Nursing

Core Courses (25 cr.)

• NURS 8110 - Theoretical and Scientific Foundations for Nursing
• NURS 8210 - Transforming Nursing and Healthcare Through Technology
• NURS 8250 - Advanced Theoretical and Scientific Perspectives in Nursing
• NURS 8300 - Organizational and Systems Leadership for Quality Improvement
• NURS 8551 - Preparing for Dissertation

Research Courses (16 cr.)

• RSCH 8101 - Research Theory, Design, and Methods
• RSCH 8201 - Quantitative Reasoning and Analysis
• RSCH 8301 - Qualitative Reasoning and Analysis

Research Electives (Choose one of the courses below):
• RSCH 8251 - Advanced Quantitative Reasoning and Analysis
• RSCH 8351 - Advanced Qualitative Reasoning and Analysis
• RSCH 8451 - Advanced Mixed-Methods Reasoning and Analysis

Focus Area Courses (12–16 cr.)

See each of the focus areas below for course information:

• Education
• Healthcare Administration
• Interdisciplinary Health Focus
• Leadership
• Public Health Policy

Dissertation (20 cr.)

• NURS 9000 - Dissertation

Education

The Education focus area prepares nursing professionals to design, deliver, and evaluate nursing and health sciences courses and programs in nursing schools and other healthcare or educational settings. With a focus on applying theory to practice, coursework examines behavioral, cognitive, and constructivist learning theories; distance education principles and instructional design; and the use of multimedia technology to facilitate learning.

Focus Area Curriculum

• EDUC 8842 - Principles of Distance Education
• EDUC 8844 - Designing Instruction for Distance Education
• EDUC 8845 - Learning Theory and Educational Technology
• EDUC 8847 - Multimedia Technology to Facilitate Learning

Healthcare Administration

The Healthcare Administration focus area prepares students to administer healthcare programs and services through the application of best practices in leadership, professionalism, ethics, and strategic planning. With an emphasis on working collaboratively and effectively with diverse populations, students will examine the principles of social justice implicit in healthcare decisions and practice. Students will also explore the theoretical underpinnings of governance and public policy in healthcare administration. Throughout the dissertation process, students will be supported by scholar-practitioner faculty members.

Focus Area Curriculum (15 cr.)

Choose three courses below:

• HLTH 8136 - Leadership, Professionalism, and Ethics in Public Health Practice
• HLTH 8400 - Public Health Leadership and Systems Thinking
• HLTH 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
• HLTH 8112 - Governance and Public Policy

Interdisciplinary Health Focus
Students may create their own Interdisciplinary Health focus area by choosing three courses from any of the four other Ph.D. in Nursing specializations: Education, Healthcare Administration, Leadership, and Public Health Policy. Throughout the dissertation process, students will be supported by scholar-practitioner faculty members.

**Focus Area Curriculum (12-15 cr.)**

Choose any three focus area courses from the Ph.D. in Nursing Education, Healthcare Administration, Leadership, or Public Health Policy areas:

- HLTH 8175 - Health Policy and Management
- HLTH 8475 - Advanced Program Planning Implementation and Evaluation
- HLTH 8451 - Public Policy Analysis
- HLTH 8431 - Finance and Budgeting for the Public Sector
- HLTH 8136 - Leadership, Professionalism, and Ethics in Public Health Practice
- HLTH 8400 - Public Health Leadership and Systems Thinking
- HLTH 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
- HLTH 8112 - Governance and Public Policy
- HLTH 8111 - Leadership and Organizational Change
- HLTH 8392 - The Language of Leadership
- EDUC 8842 - Principles of Distance Education
- EDUC 8844 - Designing Instruction for Distance Education
- EDUC 8845 - Learning Theory and Educational Technology
- EDUC 8847 - Multimedia Technology to Facilitate Learning

**Leadership**

The Leadership focus area helps prepare students to be healthcare leaders who can work effectively with diverse workforces and communities under varying political and economic conditions. They will explore competencies in organizational change management, team building, mediation, collaboration, and systems thinking and planning. Students will examine the theoretical underpinnings of leadership and ethics, as well as the professional attributes, skills, styles, and strategies required to advance organizational goals. The use of dynamic language techniques by leadership will be explored, providing students with a practical foundation for motivating, inspiring, and managing their organizations through effective communication. Throughout the dissertation process, students will be supported by scholar-practitioner faculty members as they pursue individual research in an interest area of healthcare leadership.

**Focus Area Curriculum (15 cr.)**

Choose three courses below:

- HLTH 8136 - Leadership, Professionalism, and Ethics in Public Health Practice
- HLTH 8400 - Public Health Leadership and Systems Thinking
- HLTH 8111 - Leadership and Organizational Change
- HLTH 8392 - The Language of Leadership

**Public Health Policy**
The Public Health Policy focus area helps prepare students to design, implement, manage, and influence public health policy at the local, state, and federal levels. Students will explore how scientific data can be used to formulate policy recommendations and draft legislation aimed at reducing healthcare disparities and public health risks for individuals and communities. Microeconomic and macroeconomic models and the influence of public finance on policy choices will be examined, as will the tools and techniques used by policymakers and analysts to evaluate the impact of social programs. Throughout the dissertation process, students will be supported by scholar-practitioner faculty members as they pursue individual research in an interest area of public health policy.

Bachelor’s Degree Programs

B.S. in Computer Information Systems

The Bachelor of Science in Computer Information Systems addresses a growing need in the marketplace for professionals who can bridge the gap between information technology and the organizations and people who depend upon it.

Graduates of the B.S. in Computer Information Systems program will have a cross-disciplinary set of skills and knowledge that will allow them to work with business and other stakeholders to define information processing needs. They will be able to map those requirements onto the building blocks provided by an ever-changing set of technologies. They also will have a strong set of process skills enabling them to carry out these tasks in a reliable and collaborative fashion.

On top of a core set of business and information systems skills, each B.S. in Computer Information Systems student will gain more specialized skills in a variety of areas. Concentration options focus on the positive impact information systems can have on people and society, in areas such as healthcare, security, usability, and collaboration.

Learning Outcomes

At the end of this program, students will be able to:

1. Apply the fundamental concepts of computing and mathematics to organizational and societal priorities.
2. Apply business and system analysis methods to identify and define the computing requirements of organizations.
3. Design, implement, and evaluate a computer-based system or program that meets the needs of organizational stakeholders.
4. Work collaboratively with others to implement new process and systems in an organization.
5. Demonstrate knowledge of the ethical, legal, security, and social dimensions of their work.
6. Communicate effectively with information system stakeholders.
7. Analyze the impact of information system solutions on individuals, organizations, and global society.
8. Create a professional development plan based on recognition of its need and value.
9. Apply current techniques and tools to manage information systems projects.
10. Demonstrate knowledge of processes that support the delivery and management of information systems within a business environment.
Program Educational Objectives (PEOs)

1. Develop information systems solutions to meet the needs of employers and communities in a global society.
2. Collaborate effectively with a variety of stakeholders to meet user needs.
3. Be employed in progressively more responsible positions in the information systems field.
4. Demonstrate ethical behavior as information system professionals.
5. Demonstrate sensitivity to the impact of technology on the individual, the organization, and society as an information system professional.
6. Maintain up-to-date knowledge in the world of information systems and information systems-related business practices.

Concentrations

- General Program (listed below)
- Cyber Security for Information Systems
- Healthcare Informatics
- Information Systems Management
- Web and Mobile Applications Design

Degree Requirements

- 181 total quarter credit hours
- General education (46 cr.)
- Business courses (25 cr.)
- Computer information systems courses (35 cr.)
- Concentration courses (20 cr., depending on concentration)
- Elective courses (50–70 cr., depending on concentration)
- Capstone course (5 cr.)

Core Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Business Courses (25 cr.)

- BUSI 1002 - Introduction to Management and Leadership
- ACCT 1003 - Introduction to Accounting
- STAT 3001 - Statistical Methods and Applications
- BUSI 2003 - Operations
- ISYS 3001 - Information Systems in Enterprise

**Computer Information Systems Courses (35 cr.)**

- CMIS 1004 - Object-Oriented Programming Concepts
- CMIS 2001 - Internet Computing
- ITEC 1010 - IT Infrastructure
- ITEC 2060 - Database Management Systems
- ITEC 2040 - Systems Analysis
- ITEC 2050 - Systems Design
- ITEC 3040 - IT Project Management
- COMM 1005 - Developing Student Portfolios for Communication (optional)

**Capstone Course (5 cr.)**

- CMIS 4999 - IS Capstone Project

**Electives (50–70 cr., depending on concentration)**

Students are to select 10–14 additional courses, depending on whether they select the General Program option or a concentration, to fulfill the elective requirement. Students may choose courses from either general education courses, B.S. in Computer Information Systems concentration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. Each concentration has a minimum number of elective courses that must be taken at the upper level. See individual concentration pages for more information.

**Note on Minors:** Electives can also be used to complete a six-course minor.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Computer Information Systems program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Cyber Security for Information Systems**

In the Cyber Security for Information Systems concentration, students learn how to effectively assess and guide security aspects impacting the information systems of an organization. The curriculum helps students gain insights into policies and techniques to increase the security of information utilized by an organization plus issues related to privacy and ethical concerns when using information.

**Concentration Curriculum (20 cr.)**
• ITEC 3020 - Computer Security Fundamentals
• ITEC 3101 - Systems Software Security
• ITEC 4101 - Network Security
• ITEC 2030 - Operating Systems Fundamentals and Administration

Healthcare Informatics

The Healthcare Informatics concentration focuses on the use of information systems in the healthcare industry. Students focus on specialized needs related to privacy and security of patient data, use and management of data generated by diagnostic equipment, and policies and practices of information management in healthcare systems.

Concentration Curriculum (15 cr.)

• CMIS 4301 - Structure of the Healthcare Industry
• CMIS 4302 - Patient Records Practice and Policy
• CMIS 4303 - Healthcare Information Systems Applications

Information Systems Management

The Information Systems Management concentration teaches students how to leverage technology to meet their organization's strategic goals by evaluating technology options; developing methods for transferring and assimilating new technology; and managing large, complex projects.

Concentration Curriculum (15 cr.)

• ISYS 4301 - Business Process Design
• ISYS 4302 - Management of Technology
• CMIS 4601 - Information Systems Service Management

Web and Mobile Applications Design

This concentration provides students with an in-depth exploration of the role of the systems designer in application development. Students study ways to design and develop user-friendly applications and systems—for both the Web and mobile devices—that reach the target audience and optimize the user experience. Coursework topics include Web programming, mobile application development, human-computer interaction, and user experience design. Students examine the tools and techniques they need to create applications for multiple platforms.

Concentration Curriculum (15 cr.)

• ITEC 2070 - Human-Computer Interaction
B.S. in Information Technology

The Bachelor of Science in Information Technology program examines the role of information technologies in the organization and empowers students as critical thinkers and effective social change agents by providing infrastructural solutions for information interchange and collaboration. The program prepares graduates for jobs they are likely to get after graduation and focuses on skills that are not as easy to outsource. Organizations need to have people in-house (such as frontline and help-desk employees) who can help the rest of the employees troubleshoot; take care of the network(s) and resolve issues; manage vendors; assess risk; and provide quality assurance of vendors' work. Students learn to implement social responsibility as they study IT to apply IT methodologies and practices.

The Bachelor of Science in Information Technology program focuses on information technologies in the context of a business. In addition to project management and sourcing, students will understand the rules, regulations, and standards of IT governance. And they will learn what to be aware of when helping to make decisions, such as quality standards, what's professionally acceptable, and ethics.

Learning Outcomes

At the end of this program, students will be able to:

1. Apply mathematical and computing concepts to support programming logic, functions, data structures, and database access.
2. Analyze a problem to identify and define the computing requirements appropriate to its solution.
3. Design a computer-based system, process, component, or program to meet defined needs.
4. Implement the design of a computer-based system, process, component, or program.
5. Evaluate the quality of a computer-based system, process, component, or program.
6. Work collaboratively as a member of a team to develop and deliver IT solutions.
7. Demonstrate an understanding of IT professional, ethical, legal, security, and social issues and responsibilities.
8. Communicate effectively, in oral and written form, with IT stakeholders.
9. Analyze the impact of IT solutions on individuals, organizations, and global society.
10. Engage in continuing professional development based on recognition of its need and value.
11. Apply current techniques and tools in the development, deployment, and evaluation of IT solutions.
12. Apply current technical concepts and practices in the core information technologies.
13. Incorporate user needs in the selection, creation, evaluation, and administration of computer-based systems.
14. Integrate technologies, products, and services from multiple sources into a user environment.
15. Apply "best practice" and standards in IT development, deployment, and evaluation processes.
16. Formulate a project plan based on appropriate systems development methods and project management practice.

**Program Educational Objectives (PEOs)**

1. Develop IT solutions to meet the needs of employers and communities in a global society.
2. Implement IT projects to satisfy business needs within time, budget, and quality constraints.
3. Collaborate effectively with a variety of stakeholders to meet user needs.
4. Be employed in progressively more responsible positions in the IT field.
5. Demonstrate ethical behavior as IT professionals.
6. Demonstrate sensitivity to the impact of technology on the individual, the organization, and society as an IT professional.
7. Maintain up-to-date knowledge in the world of IT and IT-related business practice.

**Concentrations**

**Students must complete one of the following concentrations. For each concentration, all listed courses are required for the concentration.**

- Application Development, Testing, and Quality Assurance
- Cyber Security and Forensics
- Database Administration and Data Center Operations
- Healthcare Informatics
- Networking and Operations
- Web and Mobile Applications Development
- Self-Designed

**Degree Requirements**

- 181 total quarter credits
- General education courses (46 cr.)
- Core courses (85 cr.)
- Concentration courses (20 cr.)
- Elective courses (20 cr.)
- Capstone courses (10 cr.)

**Core Curriculum**

**General Education Courses (46 cr.)**

See the general education section of this *Walden University Catalog*.  
*Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or
4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

**Core Courses (90 cr.)**

- ITEC 1010 - IT Infrastructure
- ITEC 1020 - Networking Fundamentals
- ITEC 1030 - Introduction to Programming
- ITEC 2010 - Data Structures
- ITEC 2020 - IT Theory Fundamentals
- ITEC 2030 - Operating Systems Fundamentals and Administration
- ITEC 2040 - Systems Analysis
- ITEC 2050 - Systems Design
- ITEC 2060 - Database Management Systems
- ITEC 2070 - Human-Computer Interaction
- ITEC 2080 - Web Programming
- ITEC 3010 - Mobile and Pervasive Technologies
- ITEC 3020 - Computer Security Fundamentals
- ITEC 3040 - IT Project Management
- ITEC 4010 - Network Administration
- ITEC 4030 - Systems Integration
- STAT 3401 - Statistical Concepts

**Elective Courses (20 cr.)**

Students are to select four additional courses to fulfill the elective requirement. Students may choose courses from either general education courses, B.S. in Information Technology concentration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. These 20 credits of electives are in addition to the 5-credit general education elective. This also includes the option to take the following course:

- ITEC 2001 - Technology and Society

**Note on Minors:** Electives can also be used to complete a six-course minor. Although this program requires fewer than six elective courses, students have the option to complete a minor and graduate with more than the required number of credits for this program.

**Capstone Courses (10 cr.)**

- ITEC 4902 - IT Senior Seminar
- ITEC 4999 - IT Capstone Project

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Information Technology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
Application Development, Testing, and Quality Assurance

This concentration teaches the latest quality assurance procedures and practices for measuring and improving the correctness, reliability, usability, and performance of organizational systems and processes. Students learn to write, test, debug, and maintain source code to meet business application requirements. Students also evaluate testing methods used during the software development process to explore ways to improve human-computer interfaces.

Concentration Curriculum (20 cr.)

- ITEC 4020 - Quality Management Standards for IT
- ITEC 3402 - Server-Side and Multi-Tier Programming
- ITEC 4401 - Software QA Testing and Test Tools
- ITEC 4402 - User Interface Evaluation, Design, and Development

Cyber Security and Forensics

Students in this concentration gain the specialized knowledge to identify network security vulnerabilities and implement frameworks for incident prevention, response, and recovery. With courses in computer forensics and network and software security, the curriculum examines the tools, techniques, issues, and best practices related to computer security in organizations today.

Concentration Curriculum (20 cr.)

- ITEC 3101 - Systems Software Security
- ITEC 4101 - Network Security
- ITEC 4102 - Application Software Security
- ITEC 4103 - Computer Forensics

Database Administration and Data Center Operations

This concentration focuses on the development, deployment, management, and integration of databases and information systems. Courses explore topics on database-driven web applications, database administration, data centers, and fault-tolerant systems. Students gain a comprehensive understanding of the database environment and learn to plan, design, and implement data storage solutions to ensure business continuity.

Concentration Curriculum (20 cr.)

- ITEC 3201 - Database-Driven Web Applications
- ITEC 4201 - Database Administration
- ITEC 3202 - Data Centers
- ITEC 4203 - Fault-Tolerant Systems
Healthcare Informatics

Students in the Healthcare Informatics concentration are prepared to take an active role in designing, building, and supporting the information systems required to operate today's dynamic healthcare systems. Students gain an understanding of how information technology is used in patient care, research, administration, and public health; learn to analyze and design information systems, policies, and processes in response to industry needs; and explore social and ethical issues as they relate to the storage, retrieval, and management of patient data. Hands-on lab activities and cross-functional team collaboration give participants the skills they need to solve real challenges facing the healthcare industry today. The program culminates in a capstone experience in which students revisit their professional goals and develop plans for continued learning and career development.

Concentration Curriculum (20 cr.)

- HLT1210 - Health Informatics
- CMIS 4301 - Structure of the Healthcare Industry
- CMIS 4302 - Patient Records Practice and Policy
- CMIS 4303 - Healthcare Information Systems Applications

Networking and Operations

This concentration focuses on the design, deployment, and administration of scalable data networks and telecommunication infrastructures. Courses address IT service management; planning, maintenance, and security of networks; and network fault-tolerance. Students gain an understanding of computer network operations, computer hardware and software, network equipment management, and network security and reliability.

Concentration Curriculum (20 cr.)

- ITEC 4203 - Fault-Tolerant Systems
- ITEC 3301 - IT Service Management
- ITEC 4101 - Network Security
- ITEC 4302 - Network Planning and Maintenance

Web and Mobile Applications Development

In the Web and Mobile Applications Development concentration, students learn how to develop, design, and integrate Web-based applications. Students examine information architecture design as well as visual and interaction design. They discover the elements of building a Web application from start to finish, gaining a holistic view of the Web development life cycle. Students have the opportunity to gain experience creating applications for multiple platforms, including smartphones, gaming, and cellular devices.
Concentration Curriculum (20 cr.)

- ITEC 3501 - Web and Mobile Application Development
- ITEC 4501 - Web and Mobile User Experience Design
- ITEC 4502 - Implementing Effective Mobile User Interfaces
- ITEC 4503 - Developing Multiplatform Mobile Applications

Self-Designed

Concentration Curriculum (20 cr.)

The Self-Designed concentration is ideal for those students who want a broad view and solid grounding in preparation for today’s information technology environment. Because students can choose the courses that make up the Self-Designed concentration, this concentration is a beneficial option for those students with interests in a variety of areas.

Students in the Self-Designed concentration may take any four courses from the other B.S. in Information Technology concentrations listed. Students may also petition to use alternate upper-division courses.
OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a C in the graduate-level course but only a grade of B or better will carry over to the graduate program. Students who receive a C grade will be awarded a grade of C*, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement.

Students who do not receive a B or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.

3. AIM courses are (5000-level) graduate courses.*
   a. Tuition for these courses is charged at the undergraduate rate.
   b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a B or better in each course to have that course applied to the master's program.
   - Students who get lower than a B in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   - Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a B or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note: Graduate students cannot register for AIM courses.

**College of Social and Behavioral Sciences**

**School of Public Policy and Administration**

### Master of Public Administration (MPA)

*Students may select up to five of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- MMPA 5200 - Introduction to Public Administration
- MMPA 5405 - Ethics and Social Justice
- MMPA 5420 - Organizational Management and Leadership
- MMPA 5431 - Finance and Budgeting for the Public Sector
- MMPA 5435 - Human Resource Management: Building a Capable Workforce
- MMPA 5451 - Public Policy Analysis
- MMPA 5480 - Applied Research and Evaluation Methods

### Master of Public Policy (MPP)

*Students may select any or all of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- MMPP 5280 - Policy and Politics in American Political Institutions
- MMPP 5405 - Ethics and Social Justice
- MMPP 5111 - Leadership and Organizational Change

### M.S. in Emergency Management

*Students may select any or all of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- MSEM 5364 - Managing Public Safety Organizations♦
- MSEM 5100 - Critical Issues in Emergency Management
- MSEM 5480 - Applied Research and Evaluation Methods♦
- MSEM 5363 - Public Safety Issues♦

### M.S. in Nonprofit Management and Leadership

*Students may select up to five of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

### School of Social Work and Human Services

#### M.S. in Clinical Mental Health Counseling

*These courses are open only to students in the B.S. in Human Services and B.S Psychology programs. Students may select any or all of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- HUMN 5100 - Introduction to Mental Health Counseling
- HUMN 5722 - Counseling and Psychotherapy Theories
- HUMN 5316 - Techniques of Counseling
- HUMN 5723 - Multicultural Counseling

#### M.S. in Addiction Counseling

*These courses are open only to students enrolled in the B.S. in Human Services Addictions concentration or the B.S. in Psychology Addictions concentration. Students may select any or all of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- HUMN 5103 - Introduction to Addiction
- HUMN 5204 - Assessment in Counseling and Addiction
- HUMN 5202 - Theories, Treatment, and Case Management of Addiction
- HUMN 5203 - Psychopharmacology and Biopsychosocial Considerations
- HUMN 5215 - Lifespan Development

### Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their academic advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Child Development
- Minor in Communication
- Minor in Criminal Justice
- Minor in Healthcare Management
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Introductory Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health
Graduate Certificate in Information Systems

This four-course certificate program enables students to learn the basic programming, networking, and database design and management skills required to enter the fields of information systems and information technology. Students explore IT's role in organizations, relational database systems and accepted practices in data modeling and database design, and object-oriented programming. Credits in this certificate program may be applied toward the M.S. in Information Technology or Master of Information Systems Management programs.

Certificate Requirements

Program Data
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Graduate Certificate in Information Systems program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
MASTER’S DEGREE PROGRAMS

M.S. in Information Technology

Offering a choice of four specializations, Walden's M.S. in Information Technology program provides students with the advanced skills required for senior IT specialist and management positions. In core courses, students develop essential networking, programming, and database management skills. Students then choose advanced training in one of four high-demand specializations: Health Informatics, Information Assurance and Cyber Security, Information Systems, or Software Engineering. After completing the four core courses, students are eligible to receive the Graduate Certificate in Information Systems at no additional cost. Upon completion of the full program, students are prepared to create, maintain, and secure information systems in a variety of settings.

Learning Outcomes

At the end of this program, students will be able to:
1. Apply core information technology principles and practices.
2. Apply best software engineering principles and practices to develop and maintain stable, secure, scalable, maintainable software.
3. Work in geographically dispersed teams to produce effective solutions to complex information technology problems.
4. Recommend appropriate information technology solutions based on organizational needs and an evaluation of alternatives.
5. Identify and discuss professional, individual, organizational, societal, and regulatory implications of information systems and technology.
6. Select technologies, policies, and procedures to assure the confidentiality, integrity, and availability of information and IT systems.

Specializations

- Health Informatics
- Information Assurance/Cyber Security
- Information Systems
- Software Engineering

Degree Requirements

- 30 total semester credits
  - Core Courses (12 sem. cr.)
  - Specialization Courses (18 sem. cr.)
Core Curriculum

- ITEC 6111 - Information Technology in the Organization
- ITEC 6115 - Computer Networking and Operating Systems
- ITEC 6140 - Data Modeling and Database Design
- ITEC 6030 - Principles of Programming

Course Sequence

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Information Technology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Health Informatics

This specialization prepares students to apply information systems and technology solutions to improve the efficiency and effectiveness of healthcare. In addition to coursework in information systems management, students explore the emergence of new technologies in healthcare; diverse terminology, ontology, acronyms, coding, and classification systems used in health information technology; and health data standards.

Health Informatics Specialization Courses (18 sem. cr.)

- ITEC 6712 - Business Architecture and Process
- ITEC 6721 - Organizational and Social Dimensions of Information Systems
- ITEC 6713 - Business Strategy for Competitive Advantage
- ITEC 6600 - Foundations of Health Informatics
- ITEC 6631 - Information Systems Management
- ITEC 6645 - Representation of Health Information

Information Assurance/Cyber Security

This specialization provides an in-depth treatment of the field of information assurance and cyber security. Students in this specialization will learn about the security governance structures employed by organizations to manage risks related to information technology; develop a thorough understanding of security techniques required to detect threats and protect and defend against attacks, gain a critical understanding of information ethics, and apply methods to investigate security breaches and respond to incidents.

Information Assurance/Cyber Security Specialization Courses (18 sem. cr.)

- ITEC 6120 - Operating System and Network Architecture
- ITEC 6170 - Fundamentals of Information Assurance
- ITEC 6610 - Information Assurance and Risk Management
- ITEC 6620 - Information and Systems Security
- ITEC 6630 - Computer Law, Crime, and Investigation
- ITEC 6640 - Topics in High-Assurance Computing

Software Engineering

This specialization prepares students to develop complex software products on time and budget at high levels of quality. Students will learn to develop technology solutions to meet complex organizational needs; apply sound requirements engineering and proven software engineering design principles; understand the relationship between process quality and product quality; and measure the quality, costs, and effectiveness of alternative software designs.
Software Engineering Courses (18 sem. cr.)

- ITEC 6130 - Advanced Software Development
- ITEC 6150 - Principles of Software Engineering
- ITEC 6650 - Software Systems Engineering and Requirements Management
- ITEC 6660 - Software Design and Construction
- ITEC 6670 - Software Quality and Testing

Master of Information Systems Management (M.I.S.M.)

The Master of Information Systems Management program integrates management and technical training to prepare students for IT-related senior management positions. After developing basic networking, programming, and database management skills in core courses, students learn to manage IT projects and teams across multiple organizations, develop business strategies that provide a competitive advantage, and secure information systems and assets. After completing the four core courses, students are eligible to receive the Graduate Certificate in Information Systems at no additional cost. Upon completion of the full program, students are prepared to design and lead the information systems, resources, and personnel that are critical to organizations' effectiveness and success.

Learning Outcomes

At the end of this program, students will be able to:
1. Design appropriate software system structures in response to application needs, organizational environment, and technical ecology.
2. Make appropriate design choices based on system, service, and business process needs.
3. Analyze social, legal, ethical, and professional issues in business and technical decision making.
4. Employ best communication practices with business partners, users, customers, and third-party providers.
5. Use sound evaluation practices to select appropriately among competing technologies and
6. Manage business processes through analysis, design, and optimization in response to organizational needs.

DOCTORAL DEGREE PROGRAMS

Doctor of Information Technology (D.I.T.)

This program prepares students to address information technology-related challenges at the highest level of an organization. Students examine the latest advancements in technology and develop solutions for complex, real-world industry challenges. They also study ways to effectively communicate complex IT strategies to company executives and stakeholders.

Coursework focuses on IT strategic analysis, information management, and human-computer interaction. The curriculum blends theory and practice through a variety of learning formats, including leadership simulations, seminar courses, a doctoral study, and face-to-face residencies.

Learning Outcomes

Graduates of the Doctor of Information Technology (D.I.T.) program will be prepared to:

1. Assess the relevance of current and emerging business theory and practice from an interdisciplinary perspective.
2. Formulate and execute effective solutions to complex, real-world problems common to the practice of business and management.
3. Apply the current research literature from business and management to practical problems found in business and management.
4. Design and conduct rigorous research that contributes to the professional body of knowledge on business and management.
5. Clearly communicate to stakeholders about problem statements, research approaches and results, solutions, and assessment.
6. Explain their ethical responsibilities as a member of the business community and citizens in society.

Degree Requirements

- 64 Semester credits
- Foundation course (3 sem. cr.)
- Core courses (21 sem. credits)
- Leadership Simulator courses (9 sem. credits)
- Research sequence (10 sem. cr.)
- Seminar courses (6 sem. cr.)
- Doctoral Study completion (15 sem. cr.)
- 8 days of academic residency (two 4-day residencies)

Curriculum
**Foundation Course (3 sem. cr.)**

- **ITEC 8000 - Foundation and Communications for Information Technology**

**Core Courses (21 sem. cr.)**

- **ITEC 8010 - Fundamentals of Information Systems**
- **ITEC 8030 - Principles of Programming**
- **ITEC 8120 - Operating System and Network Architecture**
- **ITEC 8140 - Data Modeling and Database Design**
- **ITEC 8160 - Enterprise Systems Architecture**
- **ITEC 8170 - Fundamentals of Information Assurance**
- **ITEC 8040 - Systems Analysis and Design**
- **ITEC 8050 - Principles of Programming**
- **ITEC 8125 - Operating System and Network Architecture**
- **ITEC 8145 - Data Modeling and Database Design**
- **ITEC 8165 - Enterprise Systems Architecture**
- **ITEC 8175 - Fundamentals of Information Assurance**

**Leadership Simulator Courses (9 sem. cr.)**

- **ITEC 8201 - IT Leadership Simulator: Integrating Diverse Systems and Leading Technology**
- **ITEC 8202 - Leadership Simulator: Developing Proactive and Reactive Security Plans**
- **ITEC 8203 - IT Leadership Simulator: Leading IT in a Dynamic Environment**

**Research Sequence (10 sem. cr.)**

- **ITEC 8427 - Applied Research Methods—Qualitative and Quantitative**
- **ITEC 8437 - Quantitative Decision Making for Strategic Analysis**
- **ITEC 8447 - Qualitative and Case Study Research for Strategic Analysis**

**Seminar Courses (6 sem. cr.)**

D.I.T. students only need to pick two of the four specialization courses,

- **ITEC 8501 - Seminar in Information Security**
- **ITEC 8502 - Seminar in IT Systems, Software, and Management**
- **ITEC 8503 - Seminar in Project Management**
- **ITEC 8504 - Seminar in Cloud and Grid Computing**

**Doctoral Study Completion (15 sem. cr.)**

- **ITEC 8100 - Doctoral Study Mentoring**
- **ITEC 9000 - Doctoral Study Completion** (15 sem. cr.—3 cr. taken each term for a minimum of 5 terms)

BACHELOR’S DEGREE PROGRAMS

B.S. in Accounting

Students in the Bachelor of Science (B.S.) in Accounting program are provided with a comprehensive professional accounting knowledge base mapped to American Institute of Certified Public Accountants (AICPA) competencies in functional accounting and professional and ethical standards. In today’s diverse, global, and technologically sophisticated accounting environment, these competencies are highly sought by employers. Through this program, students gain a practical knowledge of the principles, theories, concepts, and professional practices used in today’s global accounting environment.

In core courses, students learn about professional accounting products, master the intricacies of developing those products, and explore how to interpret financial information to support business and organizational decision making. Students also master the digitization of accounting data and the technology that support international financial reporting.

Students can choose the Public Accountancy concentration or the General Program and then focus on gaining the knowledge required to become certified public accountants (CPAs)* or prepare for other professional certifications. By combining a solid foundation in accounting principles with the flexibility to choose career-focused coursework, the B.S. in Accounting program ensures students gain professionally relevant skills that can be directly applied in the working world.

The program is results-oriented and extends beyond theories and conceptual understanding to practical application. Learning outcomes are achieved through coursework completed in specific area requirements for general education, as well as through both lower- and upper-division content courses.

Learning Outcomes

The B.S. in Accounting program provides students with a comprehensive understanding of accounting principles and practices, combining functional skills with a larger perspective of accounting’s role in business.

At the end of this program, students will:

1. Apply problem-solving skills to multiple accounting situations, including those occurring in the international setting.
2. Communicate effectively about accounting and business practices within the context of larger organizational frameworks.
3. Access relevant accounting/financial guidance and apply it in their accounting practice.
4. Demonstrate well-developed competency in their accounting techniques.
5. Demonstrate collaborative skills across accounting and functional business areas.
6. Analyze sources of organizational risk.
7. Apply knowledge of the legal and regulatory environment in which the accounting profession operates.
8. Apply ethical reasoning in their accounting practices.

Concentrations

- General
- Public Accountancy

Degree Requirements

- 181 total quarter credits
- General Education courses (46 cr.)
- Core courses (100 cr.)
- Concentration courses (0–20 cr., depending on concentration)
- Elective courses (10 cr.–30 cr., depending on concentration)
- Capstone course (5 cr.)

Core Curriculum

General Education Courses (46 cr.)
See the General Education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Core Courses (100 cr.)

- BUSI 1002 - Introduction to Management and Leadership
- ACCT 1003 - Introduction to Accounting I
- ECON 1002 - Microeconomics
- ACCT 2003 - Introduction to Accounting II
- BUSI 2001 - Business Law
- STAT 2001 - Statistics
- ACCT 2002 - Managerial Accounting: Introduction to Financial Planning and Analysis
- FNCE 3001 - Financial Management
- ACCT 3006 - Accounting Information Systems
- BUSI 3002 - Ethical Leadership
- ACCT 3001 - Intermediate Accounting I
- ACCT 3002 - Auditing and Internal Controls
- ACCT 3003 - Intermediate Accounting II
- ACCT 3004 - Intermediate Accounting III
- ACCT 3005 - Intermediate Accounting IV
Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Accounting program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Note on Licensure

Most states require individuals to complete 150 semester (225 quarter) hours in certain subject areas in order to be eligible to sit for the Certified Public Accountant (CPA) exam and/or obtain a CPA license. Walden's accounting programs can help graduates progress toward meeting those requirements. The B.S. in Accounting offers 120-quarter (80-semester) credit hours that include upper-level courses in topics such as financial accounting, auditing, taxation, and management accounting. The M.S. in Accounting and the M.S. in Accounting and Management programs offer 30 semester (45 quarter) credit hours, while the M.B.A. Accounting for Managers specialization offers nine semester (13.5 quarter) credit hours. These programs include graduate courses in topics such as financial accounting, managerial accounting, and legal and ethical accounting practices. This will require students to complete additional coursework to meet state requirements.

In each state, there are specific policies that must be followed when an individual is seeking to become a licensed accountant. Some states will not allow individuals who complete the Walden accounting programs to sit for the CPA licensing exams due to state-specific issues such as professional accreditation or face-to-face instruction. For information on the educational requirements for your state, refer to the state's Board of Accountancy or related agency. Walden enrollment advisors can provide guidance about accountant licensure; however, it remains the responsibility of the individual enrolling in the program to read, understand, and comply with the licensure requirements in the state where he or she wishes to practice.

Walden University can make no representation, warranty, guarantee, or commitment that successful completion of a Walden program, or coursework for credit within a program, will make a graduate eligible to sit for a licensure exam or to obtain state licensure.

General

In the General concentration, students deepen their understanding of the accounting profession and its role in today's business environment. Students can tailor their studies through a broad selection of electives and develop skills and knowledge they can use across business,
government, nonprofit, or financial service settings. This concentration prepares students for professional certification.

**Electives (30 cr.)**

Choose six courses from general education or Walden other bachelor's degree programs. Students may also be eligible to transfer previous credit to meet their elective requirements. *Note on Minors:* Electives can also be used to complete a six-course minor.

The following courses are recommended as electives:

- BUSI 2002 - Global Business
- BUSI 3005 - Critical Thinking
- FNCE 4101 - Corporate Finance
- ACCT 4007 - Treasury Management

**Capstone Course (5 cr.)**

- BUSI 4001 - Strategic Business Capstone Project

**Public Accountancy**

With the Public Accountancy concentration, students develop a strong foundation in accounting theory, principles, and procedures and gain a broad base of business knowledge. Students explore coursework in corporate taxation and advanced financial accounting and business law while developing the problem-solving and communications skills needed to function effectively across an organization. This program prepares students for graduate study or an accounting career in business, nonprofit, government, or financial services sectors.

**Concentration Curriculum**

**Concentration Courses (20 cr.)**

- ACCT 4006 - Federal Taxation II: Corporate Taxation
- ACCT 4003 - Advanced Financial Accounting II
- ACCT 4004 - Advanced Financial Accounting III
- BUSI 3006 - Advanced Business Law

**Electives (10 cr.)**

Choose two courses from general education or Walden other bachelor's degree programs. Elective credits should total 10 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. *Note on Minors:* Electives can also be used to complete a six-course minor. Although this program requires fewer than six elective courses, students have the option to complete a minor and graduate with more than the required number of credits for this program.
Capstone Course (5 cr.)

- ACCT 4900 - Accounting Capstone Project

B.S. in Business Administration

In today's diverse, global, and technologically advanced business environment, the B.S. in Business Administration program can help students lay the groundwork for career success. Coursework explores the key principles of leadership, communication, and analysis in order to prepare students to support both global and domestic business organizations. Students examine issues that impact business decisions from economic, political, legal, ethical, and social change standpoints and explore strategies for using technology and innovation to promote a competitive advantage within the business sphere of influence.

This program extends beyond theories and conceptual understanding to practical application of knowledge and skills. Once students have a solid foundation in business administration, they select a concentration from a variety of essential fields. This flexibility helps to ensure that students learn professionally relevant skills that can be directly applied in the working world.

Learning Outcomes

At the end of this program, students will be able to:

1. Demonstrate proficiency in the fundamental business principles and practices that enable firms to operate in both domestic and global environments.
2. Employ critical-thinking and analysis skills to solve business problems in a real-world context.
3. Analyze ethical issues that impact business decisions from economic, political, legal, and social perspectives.
4. Describe the ways in which diversity influences a company's ability to achieve its goals.
5. Evaluate the application of technology as a strategy for competitive advantage in business.
6. Conduct basic research using scholarly sources to acquire new knowledge in the business domain.

Accreditation

Walden University's B.S. in Business Administration program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

Concentrations

- General
- Accounting
- Finance
• Healthcare Management
• Human Resource Management
• Information Systems
• Management
• Marketing
• Multicultural Marketing Communication
• Project Management
• Small Business Management

Degree Requirements

• General education courses (46 cr.)
• Business courses (55 cr.)
• Concentration courses (0–15 cr., depending on concentration)
• Elective courses (65–80 cr., depending on concentration)

Core Curriculum

General Education Courses (46 cr.)
See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Business Courses (55 cr.)

• BUSI 1002 - Introduction to Management and Leadership♦
• ACCT 1003 - Introduction to Accounting I♦
• STAT 2002 - Business Statistics
• ECON 1002 - Microeconomics♦
• BUSI 2001 - Business Law♦
• BUSI 2003 - Operations♦
• BUSI 2003 - Operations♦
• MRKT 3001 - Marketing♦
• HRMG 3001 - Human Resource Management♦
• FNCE 3001 - Financial Management♦
• ISYS 3001 - Information Systems in Enterprise♦
• BUSI 4900 - Capstone: Strategic Business Management
• COMM 1005 - Developing Student Portfolios for Communication (optional)

Program Data
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Business
Administration program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**General**
A General Program is offered for those students who want to gain an understanding and knowledge of general management principles.

**Concentration Curriculum**

**Elective Courses (80 cr.)**
Students are to select sixteen additional courses to fulfill the elective requirement. Students may choose courses from either general education courses, B.S. in Business Administration courses, or courses from any of Walden’s bachelor’s degree programs. At least 25 credits must be at the 3000–4000 level. Individual course prerequisites apply.

**Accounting in B.S. in Business Administration**
In Walden's Accounting concentration, students can gain a solid understanding of accounting principles and financial analysis. Students can learn how to manage a company's books and records; prepare and read financial statements; and strengthen knowledge of taxation, auditing, and managerial accounting.

**Concentration Curriculum**

**Concentration Courses (15 cr.)**
Courses must be completed in the following order:
- ACCT 2003 - Introduction to Accounting II
- ACCT 2002 - Managerial Accounting: Introduction to Financial Planning and Analysis
- ACCT 3001 - Intermediate Accounting I

**Electives (65 cr.)**
Choose thirteen courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 20 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

**Note on Minors:** Electives can also be used to complete a six-course minor.

**Finance**
In the Finance concentration, students learn how to effectively assess and guide the financial operation of an organization. The curriculum helps students gain insights into the key financial levers of an organization, so they can help management direct the organization to optimize its value, for both its employees and shareholders. Note: Students must complete FNCE 3001 - Financial Management before entering the Finance concentration.

**Concentration Curriculum**

**Concentration Courses (15 cr.)**

Courses must be completed in the following order:

- FNCE 4101 - Corporate Finance
- FNCE 4102 - Financial Institutions and Markets
- FNCE 4103 - International Finance

**Electives (65 cr.)**

Choose 13 courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 10 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Healthcare Management**

This concentration provides an exploration of healthcare management functions, roles, and responsibilities. Coursework explores legislative, regulatory, and financial processes relevant to the organization and provision of healthcare services and the impact of these processes on quality and safety in the practice environment and disparities in the healthcare system. Students in this concentration can also gain deeper insight into the issues of healthcare access, equity, affordability, and social justice; long-term healthcare policy; and safety and technology in healthcare delivery.

**Concentration Curriculum**

**Concentration Courses (15 cr.)**

Courses must be completed in the following order:

- HLTH 1005 - Context of Healthcare Delivery
- HLTH 2120 - Health Informatics
- HLTH 3110 - Current Issues in Healthcare Policy and Practice

**Electives (65 cr.)**

Choose 13 courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 20 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.
Human Resource Management

The Human Resource Management concentration helps students develop insights into recruitment and selection, performance evaluation, compensation and benefits, job design, training, retention, and turnover. In addition, students explore how economic, social, psychological, legal, and cultural forces influence employment relations. Note: Students must complete HRMG 3001 - Human Resource Management before entering the Human Resource Management concentration.

Concentration Curriculum

Concentration Courses (15 cr.)
Courses must be completed in the following order:
- HRMG 4200 - Strategic Human Resource Management
- HRMG 4202 - Human Resource Development and Change
- HRMG 4203 - Human Resource Management: Analysis and Problems

Electives (65 cr.)
Choose 13 courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 10 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor.

Information Systems

The Information Systems concentration teaches students how to leverage technology to meet their organization's strategic goals by evaluating technology options; developing methods for transferring and assimilating new technology; and managing large, complex projects. Note: Students must complete ISYS 3001- Information Systems in Enterprise before entering the Information Systems concentration.

Concentration Curriculum

Concentration Courses (15 cr.)
Courses must be completed in the following order:
- ITEC 1010 - IT Infrastructure
- ITEC 2030 - Operating Systems Fundamentals and Administration
- ITEC 3020 - Computer Security Fundamentals

Electives (65 cr.)
Choose 13 courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 20 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor.

Management

The Management concentration focuses on aligning contemporary management practices with strategic direction. It provides students with advanced knowledge and skills in international management, human resource management, and knowledge management. Students focus on emerging trends in the international business arena, techniques for attracting and retaining effective human resources, and the integration of knowledge management with quality initiatives and organizational change. Note: Students must complete FNCE 3001 - Financial Management before entering the Corporate Finance course; BUSI 1002 - Introduction to Management and Leadership before entering the Knowledge Management course; and HRMG 3001 - Human Resource Management before entering the Strategic Human Resource Management course.

Concentration Curriculum

Concentration Courses (15 cr.)

It is recommended that courses be completed in the following order:
- FNCE 4101 - Corporate Finance
- HRMG 4200 - Strategic Human Resource Management
- MGMT 4400 - Organizational Behavior and Management

Electives (65 cr.)

Choose 13 courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 10 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor.

Marketing

The Marketing Communications concentration provides tools and techniques for delivering persuasive messaging to both local and international audiences through the use of real-world case studies. Students explore ways to identify market opportunities, develop and implement viable marketing plans, and measure their impact. Specific areas of focus include targeted communications, integrated media planning and purchasing, international marketing, and ethics.

Concentration Curriculum
Concentration Courses (15 cr.)
Courses must be completed in the following order:
- MRKT 4501 - Marketing Management
- MRKT 4504 - Global Marketing
- MRKT 4503 - Case Study: Services Marketing

Electives (65 cr.)
Choose 13 courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 10 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

Multicultural Marketing Communication
This concentration focuses on the importance of incorporating multicultural perspectives into modern marketing strategies. Students examine how to match marketing strategy with organizational strategy, research and forecasting approaches, competitive analysis, and implementation of marketing strategies. Coursework also explores how to develop targeted communication media that supports marketing initiatives in a global context.

Concentration Curriculum

Concentration Courses (15 cr.)
Courses must be completed in the following order:
- MRKT 4504 - Global Marketing
- MRKT 4505 - Hispanic Marketing in a Multicultural Context
- MRKT 4506 - Multicultural Marketing Communication

Electives (65 cr.)
Choose 13 courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 10 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

**Note on Minors:** Electives can also be used to complete a six-course minor.

Project Management
Students in this concentration explore the use of project management as a structured approach to meeting organizational goals. Coursework examines strategic project management practices, organizational support systems that support project success, project authority, and ethics in project execution. The four major project management knowledge areas are covered in this concentration, including scope, time, cost risk, and quality management.
Concentration Curriculum

Concentration Courses (15 cr.)

Courses must be completed in the following order:

- PMGT 3000 - Project Management Strategies
- PMGT 3001 - Project Management Methods I
- PMGT 4001 - Project Management Methods II

Electives (65 cr.)

Choose 13 courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 10 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

Note on Minors: Electives can also be used to complete a six-course minor.

Small Business Management

This concentration focuses on the operational side of managing a small business, including marketing and customer relations. Students develop practical skills to help them grow or create a small business. Students also examine case studies and real-life examples of small business successes and failures across a wide range of small business models, including startups, franchises, family businesses, and e-commerce ventures.

Concentration Curriculum

Concentration Courses (15 cr.)

It is recommended that courses be completed in the following order:

- BUSI 4002 - Small Business Ventures
- BUSI 4003 - Marketing Strategies for Small Business
- BUSI 4004 - Customer Relationship Management for Small Business

Electives (65 cr.)

Choose 13 courses from general education, B.S. in Business Administration, or other Walden bachelor's degree programs. At least 10 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor.

B.S. in Business Communication

Students in the B.S. in Business Communication program are prepared to meet the growing demand for professionals who can create effective business strategies and communicate them
effectively to colleagues, customers, and other key audiences. Through a multidisciplinary curriculum, students learn strategic communication skills while exploring the fundamentals of business and the dynamics of organizations. Topics in this program include social media; interpersonal, oral, and written communications; emerging media and new technologies; human resources; leadership; and organizational management.

**Learning Outcomes**

Graduates of the B.S. in Business Communication program will be prepared to:

1. Use fundamental business principles and practices to solve business problems in a real-world context.
2. Demonstrate an awareness of their own values, dispositions, and communication styles through their personal and professional communication.
3. Apply technology to enable digital communication in professional settings.
4. Demonstrate economic, political, legal, ethical, and socially aware strategies in their communications with both local and global audiences.
5. Utilize a systems perspective to optimize organizational, community, and global communication.
6. Employ critical-thinking skills in selecting communication strategies that are appropriate considering the diversity of the audience.
7. Examine communication strategies necessary to promote social change.

**Concentrations**

- General
- Emerging Media
- Health Communication
- Human Resource Management
- Management and Organizational Communication
- Marketing Communication
- Public Relations
- Self-Designed

**Degree Requirements**

- 181 total quarter credit hours
- General Education courses (46 cr.)
- Core courses (55 cr.)
- Concentration courses (0–20 cr., depending on concentration)
- Elective courses (55–75 cr., depending on concentration)
- Capstone course (5 cr.)

**Curriculum**

**Core Curriculum**
General Education Courses (46 cr.)
See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Core Courses (55 cr.)

- COMM 1003 - Introduction to Mass Communication
- BUSI 1002 - Introduction to Management and Leadership
- COMM 1004 - Interpersonal Communication
- BUSI 2001 - Business Law
- COMM 2001 - Dynamics of Group Communication
- COMM 2003 - Writing for the Digital Age
- BUSI 3003 - Dynamics of Change
- ISYS 3001 - Information Systems in Enterprise
- MEDC 3001 - Communicating Through Media and Technology
- COMM 3002 - Negotiation and Persuasion
- PREL 3001 - Principles of Public Relations

Capstone Course (5 cr.)

- COMM 4901 - Communication Capstone

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Business Communication program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

General

Concentration Curriculum

Elective Courses (75 cr.)

Students are to select 15 additional courses to fulfill the elective requirement. Students may choose courses from either General Education courses, B.S. in Business Communication concentration courses, B.S. in Business Administration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. These elective credits are in
addition to the 5-credit general education elective. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Emerging Media**

In this concentration, students study ways to use contemporary tools of communication, such as smartphones, social networking tools, blogs, podcasts, and other media, that can be leveraged to communicate and connect effectively with audiences in a variety of settings. Through their coursework, students examine various forms of new media, the use of emerging media in global markets, and how technology continues to evolve methods of mass communication.

**Concentration Curriculum**

**Concentration Courses (15 cr.)**

- MEDC 4101 - Leveraging Emerging Media for Mass Communication♦
- MEDC 4102 - Emerging Media and Global Communication♦
- MEDC 4103 - Emerging Media Design♦

**Elective Courses (60 cr.)**

Students are to select 12 additional courses to fulfill the elective requirement. Students may choose courses from either General Education courses, B.S. in Business Communication concentration courses, B.S. in Business Administration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. These elective credits are in addition to the 5-credit general education elective. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Health Communication**

In this concentration, students have the opportunity to gain the specialized communication skills needed for a career in the evolving healthcare sector. Students study ways to shape messages for a variety of audiences to promote wellness and to raise awareness of important health and policy issues. The interdisciplinary curriculum provides a broad understanding of the changing healthcare system and explores cultural and socioeconomic factors in healthcare, stress and personal health management, communication with diverse populations, and social media use in marketing and communications.

**Concentration Curriculum**
Concentration Courses (15 cr.)

- HLTH 4300 - Personal Health and Wellness
- HLTH 3115 - Public and Global Health
- HLTH 4380 - Strategies for Health Communication and Wellness

Elective Courses (60 cr.)

Students are to select 12 additional courses to fulfill the elective requirement. Students may choose courses from either General Education courses, B.S. in Business Communication concentration courses, B.S. in Business Administration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. These elective credits are in addition to the 5-credit general education elective. Note on Minors: Electives can also be used to complete a six-course minor.

Human Resource Management

With this concentration, students have the opportunity to gain a broad understanding of the principles and practices of human resource management. They will explore the strategy and process behind recruiting and selecting employees as well as examine key employee relations areas, such as performance evaluation, compensation and benefits, job design, training, retention, and turnover.

Concentration Curriculum

Concentration Courses (15 cr.)

- HRMG 3001 - Human Resource Management
- HRMG 4201 - Strategic Human Resource Management
- HRMG 4202 - Human Resource Development and Change

Elective Courses (60 cr.)

Students are to select 12 additional courses to fulfill the elective requirement. Students may choose courses from either General Education courses, B.S. in Business Communication concentration courses, B.S. in Business Administration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. These elective credits are in addition to the 5-credit general education elective. Note on Minors: Electives can also be used to complete a six-course minor.

Management and Organizational Communication

In this concentration, students examine the role of internal and external communication strategies in managing organizational change and cultivating corporate culture. Students learn communication strategies and approaches for crisis management, employee awareness, and
shareholder communication. Coursework examines human behavior in an organizational setting, ethics, and the purpose and need for effective communication in complex organizations.

**Concentration Curriculum**

**Concentration Courses (15 cr.)**
Courses should be completed in the following order:
- MGMT 4401 - Management and Organizational Behavior
- COMM 4101 - Organizational Communication
- PREL 4103 - Crisis Communications

**Electives (70 cr.)**
Choose 14 courses from general education, B.S. in Communication, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Elective credits should total 70 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Marketing Communication**
In this concentration, students have the opportunity to gain a fundamental understanding of marketing principles, concepts, and best practices. Through their coursework, students incorporate the closely related fields of marketing and communication by focusing on the development of targeted communications that support awareness initiatives, strategies and concepts in international marketing, and integrated media planning and purchasing.

**Concentration Curriculum**

**Concentration Courses (20 cr.)**
- MRKT 3001 - Marketing
- MRKT 4511 - Marketing Communications
- MRKT 4512 - International Marketing Communications
- MRKT 4513 - Media Planning and Purchasing

**Elective Courses (60 cr.)**
Students are to select 12 additional courses to fulfill the elective requirement. Students may choose courses from either General Education courses, B.S. in Business Communication concentration courses, B.S. in Business Administration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. These elective credits are in addition to the 5-credit general education elective. **Note on Minors:** Electives can also be used to complete a six-course minor.
Public Relations

In this concentration, students explore methods for crafting communications that shape public perceptions and attitudes about companies, organizations, people, products, issues, and ideas. Students have the opportunity to gain a broad understanding of public relations principles and best practices in a variety of settings. Through their coursework, students focus on press release writing, publicity planning, media relations, advertising, and crisis management.

Concentration Curriculum

Concentration Courses (15 cr.)

- PREL 4101 - Publicity and Public Relations
- PREL 4102 - Applied Public Relations
- PREL 4103 - Crisis Communications

Elective Courses (60 cr.)

Students are to select 12 additional courses to fulfill the elective requirement. Students may choose courses from either General Education courses, B.S. in Business Communication concentration courses, B.S. in Business Administration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. These elective credits are in addition to the 5-credit general education elective. Note on Minors: Electives can also be used to complete a six-course minor.

Self-Designed

Students have the opportunity to gain a broad overview of several areas of communication to increase their versatility as communications professionals. Students customize their program, selecting at least three courses from other B.S. in Business Communication concentrations. For those without a specific interest, Walden recommends one course from Marketing Communication, one course from Public Relations, and one course from Management and Organizational Communication.

Concentration Curriculum

Concentration Courses (15 cr.)

Select three courses from any B.S. in Business Communication concentration.

Suggested Courses:
- HRMG 3001 - Human Resource Management
- PREL 4101 - Publicity and Public Relations
- PREL 4103 - Crisis Communications
- MRKT 3001 - Marketing
Elective Courses (60 cr.)

Students are to select 12 additional courses to fulfill the elective requirement. Students may choose courses from either General Education courses, B.S. in Business Communication concentration courses, B.S. in Business Administration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. These elective credits are in addition to the 5-credit general education elective. **Note on Minors:** Electives can also be used to complete a six-course minor.

B.S. in Communication

The B.S. in Communication program prepares students to meet the growing demand for professionals who can create strategic, effective communications that engage audiences and drive results. Coursework focuses on developing the real-world communication skills students need in fields such as marketing, public relations, corporate communications, political campaigning, healthcare, and advertising. Topics in this program include social media; interpersonal, oral, and written communications; and emerging media and new technologies.

Students learn to create effective communications to build relationships, sell products and ideas, influence consumer behavior, resolve conflicts, manage crisis, create and deliver presentations, and build corporate brands. Studies culminate with a capstone course in which students apply their learning to create a comprehensive communications plan for an organization of their choice.

Learning Outcomes

The B.S. in Communication program helps students to blend communication theory with practical communication skills. At the end of this program, students will be able to:

1. Demonstrate effective written communication skills for multicultural and diverse audiences.
2. Assess awareness of their own values, dispositions, and communication styles as evident in their interpersonal, group, and mass communications.
3. Critically analyze contextual needs to select appropriate communication strategies.
4. Successfully collaborate with others in ways that promote personal accountability and mutual respect.
5. Competently employ use of digital communication in professional settings.
6. Utilize a systems perspective to optimize organizational, community, and global communication.
7. Demonstrate ethical, socially aware strategies in their communications with both local and far-reaching audiences.

### Marketing Communication

Through this concentration, students gain a fundamental understanding of marketing principles, concepts, and best practices. Coursework incorporates the closely related fields of marketing and
communication by focusing on the development of targeted communications that support awareness initiatives, strategies and concepts in international marketing, and integrated media planning and purchasing.

**Concentration Curriculum**

**Concentration Courses (20 cr.)**
Courses should be completed in the following order:
- **MRKT 3001 - Marketing**<sup>♦</sup>
- **MRKT 4511 - Marketing Communications**<sup>♦</sup>
- **MRKT 4512 - International Marketing Communications**<sup>♦</sup>
- **MRKT 4513 - Media Planning and Purchasing**<sup>♦</sup>

**Electives (65 cr.)**
Choose 13 courses from general education, B.S. in Communication, or other Walden bachelor's degree programs. At least 10 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a 6-course minor.

**Political Communication**

Students in this concentration focus on developing political communications that target diverse audiences. The interdisciplinary curriculum joins the fields of political science and communication and examines communication as an integral component of the public sector. Students gain an understanding of how information flows through political processes and learn how to plan and manage crises and to promote positive social change through effective communication strategies. Through their coursework students also examine legal aspects of social issues and how organizations employ communication strategies to advance political goals.

**Concentration Curriculum**

**Concentration Courses (15 cr.)**
Courses should be completed in the following order:
- **PREL 4103 - Crisis Communications**<sup>♦</sup>
- **PSPA 4010 - Contemporary Legal Debates**<sup>♦</sup>
- **PSPA 4030 - Communication for Social Change**<sup>♦</sup>

**Electives (70 cr.)**
Choose 14 courses from general education, B.S. in Communication, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Elective credits should total 70 to meet the program requirements. Students may also be eligible to transfer previous credit to
meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Public Relations**

In this concentration, students explore methods for crafting communications that shape public perceptions and attitudes about companies, organizations, people, products, issues, and ideas. Students gain a broad understanding of public relations principles and best practices in a variety of settings. Through their coursework, students focus on press release writing, publicity planning, media relations, advertising, and crisis management.

**Concentration Curriculum**

**Concentration Courses (20 cr.)**

Courses should be completed in the following order:

- **PREL 3001 - Principles of Public Relations**
- **PREL 4101 - Publicity and Public Relations**
- **PREL 4102 - Applied Public Relations**
- **PREL 4103 - Crisis Communications**

**Electives (65 cr.)**

Choose 13 courses from general education, B.S. in Communication, or other Walden bachelor's degree programs. At least 10 credits must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Self-Designed**

Students gain a broad overview of several areas of communication to increase their versatility as communications professionals. Students customize their program, selecting at least three courses from other B.S. in Communication concentrations. For those without a specific interest, Walden recommends one course from Marketing Communication, one course from Public Relations, and one course from Management and Organizational Communication.

**Concentration Curriculum (15 cr.)**

Students will choose three courses from any B.S. in Communication concentration. Individual course prerequisites are required to be met.

**Electives Courses (70 cr.)**
Students are to select 14 additional courses to fulfill the elective requirement. Students may choose courses from either General Education courses, B.S. in Business Communication concentration courses, B.S. in Business Administration courses, or courses from any of Walden's bachelor's degree programs. Individual course prerequisites apply. These elective credits are in addition to the 5-credit general education elective. Note on Minors: Electives can also be used to complete a six-course minor.
OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master's (AIM)

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a C in the graduate-level course but only a grade of B or better will carry over to the graduate program. Students who receive a C grade will be awarded a grade of C*, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement.

Students who do not receive a B or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Accelerate Into Master's (AIM) Programs

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.
3. AIM courses are (5000-level) graduate courses.*
a. Tuition for these courses is charged at the undergraduate rate.
b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a \( B \) or better in each course to have that course applied to the master's program.
   - Students who get lower than a \( B \) in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   - Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a \( B \) or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note: Graduate students cannot register for AIM courses.

### M.S. in Clinical Mental Health Counseling

*These courses are open only to students in the B.S. in Human Services and B.S Psychology programs. Students may select any or all of these courses. Individual course prerequisites apply.*

*Note: These courses are 11 weeks in length.*

- HUMN 5100 - Introduction to Mental Health Counseling
- HUMN 5722 - Counseling and Psychotherapy Theories
- HUMN 5316 - Techniques of Counseling
- HUMN 5723 - Multicultural Counseling

### M.S. in Addiction Counseling

*These courses are open only to students enrolled in the B.S. in Human Services Addictions concentration or the B.S. in Psychology Addictions concentration. Students may select any or all of these courses. Individual course prerequisites apply.*

*Note: These courses are 11 weeks in length.*

- HUMN 5103 - Introduction to Addiction
- HUMN 5204 - Assessment in Counseling and Addiction
- HUMN 5202 - Theories, Treatment, and Case Management of Addiction
- HUMN 5203 - Psychopharmacology and Biopsychosocial Considerations
- HUMN 5215 - Lifespan Development

### Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their academic advisor. Students may select a maximum of two minors.
• Minor in Applied Instructional Design and Technology
• Minor in Business
• Minor in Child Development
• Minor in Communication
• Minor in Criminal Justice
• Minor in Healthcare Management
• Minor in Health Promotion and Wellness
• Minor in Health Studies
• Minor in Introductory Design and Technology
• Minor in Political Science and Public Administration
• Minor in Psychology
• Minor in Public Health

**Minor in Business**

The Undergraduate Minor in Business is for non-business major students interested in obtaining knowledge and competencies required in today’s diverse, global, and technologically sophisticated business environment. Students gain a working knowledge of the principles and concepts of management theory and practice by examining the interrelationships among the major business disciplines.

**Note:** This minor is not available to students in the B.S. in Business Administration, B.S. in Business Communication, or B.S. in Accounting programs.

**Required (30 cr.)**

Courses should be completed in the following order:

- BUSI 1002 - Introduction to Management and Leadership
- ACCT 1003 - Introduction to Accounting
- MRKT 3001 - Marketing
- HRMG 3001 - Human Resource Management
- FNCE 3001 - Financial Management
- ISYS 3001 - Information Systems in Enterprise

**Minor in Communication**

The Undergraduate Minor in Communication program is designed for non-business major students who are interesting in such communication industries as marketing, public relations, corporate communications, and advertising. With the minor, students can develop their analytical, theoretical, and practical communication skills required to identify and develop creative and strategic communication solutions using various forms of media. Areas of focus may include mass communication, interpersonal communication, persuasive speaking, group dynamics, crisis management, critical thinking, professional writing strategies, intercultural communications, and future trends in new and emerging media.
Note: This minor is not available to students in the B.S. in Communication or B.S. in Business Communication program.

**Required (30 cr.)**

Select six of the following:

- **COMM 1003 - Introduction to Mass Communication**
- **COMM 2001 - Dynamics of Group Communication**
- **COMM 2002 - Fundamentals of Public Speaking**
- **COMM 2003 - Writing for the Digital Age**
- **MEDC 3001 - Communicating Through Media and Technology**
- **COMM 3001 - Applied Interpersonal Communication**
- **COMM 3002 - Negotiation and Persuasion**
GRADUATE CERTIFICATE PROGRAMS

Graduate Certificate in Advanced Project Management

Project Management Certificates

Walden University's project management certificate programs are geared toward students who want to learn the foundational skills for this field or those who want to build upon their existing senior-level experience to advance their career in project management. Each program positions students to take the Project Management Professional (PMP)® exam* from the Project Management Institute (PMI)®. Students who are already PMP-certified and are seeking recertification earn Professional Development Units (PDUs) that can be applied toward the 60 credits needed. Walden is also a PMI Registered Education Provider (R.E.P.) and, as such, has agreed to abide by PMI-established quality assurance criteria. Credits from all required courses in both certificate programs can be applied toward Walden's M.S. in Project Management program.

The Graduate Certificate in Advanced Project Management is designed for senior project managers. Aligned with the standards in the Project Management Institute's (PMI's)® A Guide to the Project Management Body of Knowledge (PMBOK® Guide), this certificate program leverages students' knowledge and experience to help them place project management in a strategic perspective within their organizations. Students who successfully complete this certificate program will have a demonstrable proficiency in advanced project management skills that they can show current and future employers.

*Eligibility for the PMP® credential requires individuals to first attain specific educational and project management experience, including 35 contact hours of project management education and a minimum of 3 years, or 36 months, of project management experience, during which at least 4,500 hours were spent leading and directing project tasks. The final step in earning the PMP credential is passing the PMP exam. For more information, visit the Project Management Institute (PMI) website at www.pmi.org.

Note: PMI is a registered trademark and service mark of the Project Management Institute, Inc. PMP is a registered certification mark of the Project Management Institute, Inc.

**Graduate Certificate in Communication**

The Graduate Certificate in Communication is designed to help students communicate effectively via multiple channels and platforms. Coursework examines the five pillars of communication—written, oral, interpersonal and group, social media, and technology—as well as best practices for reaching audiences through traditional, digital, and social media. Students also learn how to craft engaging messages that inspire others to take action.

Graduate Certificate in Leadership

This online graduate certificate program helps students prepare to lead organizations and teams in an increasingly global environment. Students explore various concepts of leadership and assess their own leadership traits as they work toward becoming effective leaders and team members. Through these courses students examine approaches to interpreting and shaping organizational culture to maximize success and apply knowledge of group dynamics to create diverse, effective teams. Students also explore concepts of sustainable business strategies and crisis leadership as they relate to leading in a global environment. All credits in this program may be applied toward Walden's M.S. in Leadership degree.

Master's Degree Programs

Executive Master of Business Administration (EMBA)

Students in Walden's Executive Master of Business Administration (EMBA) program learn how to become effective business leaders in today's global marketplace. The curriculum combines application-based coursework with real-world learning to prepare students with the skills they need to make executive-level decisions. Students study topics such as economic theory, stakeholder analysis, innovative marketing, and managing a global workforce. Courses feature online interviews and presentations with innovators and leaders in today's business, economic, and technology industries, offering students a diverse range of perspectives. By attending a U.S.-based residency with their cohort, students hone their leadership and team-building skills. An international residency provides them with a new understanding of cultures and global business practices.

Learning Outcomes

Students in the EMBA program will be able to:
1. Develop appropriate solutions to address problems that are common in a business environment.
2. Demonstrate professional communication skills necessary for the business environment.
3. Demonstrate the ability to make decisions that are ethical and socially responsible within a global business context.
4. Effectively collaborate with others from diverse perspectives in a business environment.
5. Use systems thinking in the evaluation of business operations, decisions, and processes.
6. Apply skills that are necessary to improve an organization's competitive position in a complex global marketplace.
7. Create a vision for positive change in one's self, organization, or broader community.
8. Evaluate how businesses operate in the U.S. and abroad.

Accreditation

Walden University's Executive Master of Business Administration (EMBA) program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

Degree Requirements

- 30 total semester credit hours
- Core courses (27 sem. cr.)
- Capstone (3 sem. cr.)
• Two residencies (one U.S. residency and one international residency)

Curriculum

Core Courses (27 cr.)

• EMBA 6010 - Leading in a Dynamic Era
• EMBA 6020 - Economic Decision Making
• EMBA 6030 - Creativity, Innovation, and Foresight
• EMBA 6040 - Accounting Measurement for Leaders
• EMBA 6050 - Managing People and Teams in Globally Diverse Organizations
• EMBA 6060 - Money and the Firm
• EMBA 6070 - Leveraging Systems and Operations for Performance
• EMBA 6080 - Competing in the Global Marketplace
• EMBA 6090 - Establishing and Cultivating Customer Markets

Capstone Course (3 cr.)

• EMBA 6100 - Capstone: Business Strategy for Sustainable Competitive Advantage

M.S. in Accounting

The M.S. in Accounting program is focused on advanced accounting principles as well as current topic analyses that form a basis for improved decision-making and analytical capability. This program is geared toward accounting professionals who desire to refine and increase their knowledge in accounting topics. These individuals may be working as public accountants, in private practice, in government, or in nonprofit organizations. The core courses in the M.S. in Accounting program focus on developing skills in accounting research and communication, legal and ethical analysis, and managerial accounting with a focus on organization-wide performance. This degree program also has content aligned with professional certifications such as CPA, CIA, CFE, CFA, and CMA.

The M.S. in Accounting program is results-oriented and extends beyond theories and conceptual understanding to practical application. Advanced learning outcomes are achieved through a live research and case study methodology that will provide learners with the skills necessary to thrive in a rapidly changing profession.

Learning Outcomes

At the end of this program, students will be able to:

1. Assess the impact of managerial decisions in organizational contexts using research techniques and results.
2. Communicate effectively about accounting and business practices, demonstrating knowledge of and respect for a variety of audiences.
3. Effectively employ quantitative and analytical skills essential in the accounting profession.
5. Evaluate accounting and business practices from ethical, legal, and regulatory perspectives, considering diverse stakeholders and competing interests.
6. Appraise the mission-critical role the accounting professional has as an active partner in supporting the goals and needs of the organization.
7. Evaluate opportunities accounting professionals have to promote sustainable, socially aware organizations.

Specializations

- Accounting for the Professional
- Accounting With CPA Emphasis
- Self-Designed
Degree Requirements

- 30 total semester credits
- Core courses (15 sem. cr.)
- Specialization courses (15 sem. cr.)

Core Curriculum

Core Courses (15 sem. cr.)

- ACCT 6100 - Effective Communication for the Accountant
- ACCT 6110 - Legal and Ethical Issues in Accounting
- ACCT 6120 - Financial Management Tools for Decision Making
- ACCT 6130 - Managerial Accounting for Organizational Performance
- ACCT 6140 - Current Trends in Accounting Standards

Course Sequence

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Accounting program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Note on Licensure

Most states require individuals to complete 150 semester (225 quarter) hours in certain subject areas in order to be eligible to sit for the Certified Public Accountant (CPA) exam and/or obtain a CPA license. Walden's accounting programs can help graduates progress toward meeting those requirements. The B.S. in Accounting offers 120-quarter (80-semester) credit hours that include upper-level courses in topics such as financial accounting, auditing, taxation, and management accounting. The M.S. in Accounting and the M.S. in Accounting and Management offer 30 semester (45 quarter) credit hours, while the M.B.A. Accounting for Managers specialization offers nine semester (13.5 quarter) credit hours. These programs include graduate courses in topics such as financial accounting, managerial accounting, and legal and ethical accounting practices. This will require students to complete additional coursework to meet state requirements.

In each state, there are specific policies that must be followed when an individual is seeking to become a licensed accountant. Some states will not allow individuals who complete the Walden accounting programs to sit for the CPA licensing exams due to state-specific issues such as professional accreditation or face-to-face instruction. For information on the educational requirements for your state, refer to the state's Board of Accountancy or related agency.
Walden enrollment advisors can provide guidance about accountant licensure; however, it remains the responsibility of the individual enrolling in the program to read, understand, and comply with the licensure requirements in the state where he or she wishes to practice. Walden University can make no representation, warranty, guarantee, or commitment that successful completion of a Walden program, or coursework for credit within a program, will make a graduate eligible to sit for a licensure exam or to obtain state licensure.

**Accounting for the Professional**

In Accounting for the Professional, students will build on skills and knowledge gained as a result of the M.S. in Accounting general program with a focus on the challenges of today's accountant as a practitioner. The courses are designed for individuals with some background in accounting. Students will explore best practices in managing business risk and understand how regulatory compliance impacts an organization's accounting requirements. The student will also develop knowledge in promulgated international accounting standards, and techniques in forensic and auditing issues prevalent in organizations. As a result of their studies, students will realize their potential to inspire others and influence the future of their organizations.

**Specialization Curriculum (15 sem. cr.)**

- ACCT 6600 - Managing Operational and Financial Business Risks
- ACCT 6610 - Managing Regulatory Compliance
- ACCT 6620 - Accounting Theory and Application
- ACCT 6650 - Forensic and Advanced Auditing Topics
- ACCT 6660 - International Perspectives in Accounting

**Accounting With CPA Emphasis**
In Accounting With CPA Emphasis, students will build on skills and knowledge gained as a result of the M.S. in Accounting general program with a focus on the challenges typical of today's CPA professional. The courses are designed to prepare the student for the CPA exam and profession. Students will explore best practices in managing business risk; come to understand how regulatory compliance impacts an organization's accounting requirements; and increase knowledge regarding the application of accounting practices and tax strategies in a dynamic business environment. Students will also gain knowledge about solving prior CPA exam problems.

**Specialization Curriculum (15 sem. cr.)**

- ACCT 6600 - Managing Operational and Financial Business Risks
- ACCT 6610 - Managing Regulatory Compliance
- ACCT 6620 - Accounting Theory and Application
- ACCT 6630 - Tax Analysis and Decision Making
- ACCT 6640 - Solving CPA Problems

**Self-Designed**

In the Self-Designed specialization, students will build on skills and knowledge gained as a result of the M.S. in Accounting general program. The focus will be on developing the professional accountant to allow them to participate in a number of industries and self-design technical accounting areas that may not be readily accessible otherwise. These areas include accounting courses in nonprofits and government, international business, or further studies in forensic and auditing applications. Students will have the ability to select specific courses to increase their knowledge base to help them realize their potential to inspire others and influence the future of their organizations.

**Specialization Curriculum (15 sem. cr.)**

Student will choose **a total of five** courses from the lists below:
Accounting Courses

Student may select up to five courses from this group:

- ACCT 6600 - Managing Operational and Financial Business Risks
- ACCT 6610 - Managing Regulatory Compliance
- ACCT 6620 - Accounting Theory and Application

Accountants as Strategic Managers

In Accountants as Strategic Managers, students will build on the skills and knowledge gained as a result of the core accounting courses with a focus on developing proficiency as a strategic advisor to management. Students will also achieve an aptitude for creating growth and value through the implementation of effective strategies. In particular, students will use their decision-
making as well as their critical- and analytical-thinking skills from the accounting core to address challenges and opportunities organizations face, while exploring means to improve strategic goals and objectives such as supply chain, quality, innovation, and forecasting.

M.S. in Communication

Through a curriculum aligned with the latest communication practices and theories, the M.S. in Communication program prepares students for challenging careers in marketing, public relations, social media, and related fields. Coursework focuses on how to create engaging messages for local, national, and global audiences and translate that messaging into various media. Students
also explore how to strategize, execute, and measure integrated communication plans using both traditional and digital channels.

**Learning Outcomes**

Graduates of the M.S. in Communication program will be prepared to:
1. Apply communication theories and principles effectively.
2. Critically analyze media from producer and consumer perspectives.
3. Use appropriate traditional and digital media to attain desired results.
4. Demonstrate an understanding of how the regulatory environment impacts the communication field.
5. Evaluate communication plans and activities that will result in achievement of organizational goals.
6. Practice ethically in the field of communication.
7. Communicate professionally with stakeholders in oral and written modes.
8. Use the creative process to solve organizational issues.
9. Develop, implement, and measure integrated communication plans.

**Degree Requirements**

- 30 total credits
- Nine Core Courses (27 sem. cr.)
- Capstone Course (3 sem. cr.)

**Curriculum**

**Core Courses (27 sem. cr.)**

- COMM 6100 - Communication Theory in Practice: Here and Now
- COMM 6110 - Media Effects: Mass Media in Modern Society
- COMM 6120 - Persuasive Storytelling
- COMM 6130 - Communicating Using Social and Digital Media
- COMM 6140 - Message Design, Audience, and Evaluation
- COMM 6150 - Interpersonal Communication
- COMM 6160 - Creative Strategy and Execution: From Brief to Presentation
- COMM 6170 - Public Relations Concepts and Strategy
- COMM 6180 - Crisis Communication

**Capstone Course (3 sem. cr.)**

- COMM 6900 - Communication Capstone

**Program Data**
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. **M.S. in Human Resource Management**

The M.S. in Human Resource Management program was designed for students who want to enter the field or those who want to grow and expand their existing careers in human resources. The program applies a human capital development and management approach throughout all of its specializations and courses. Students prepare to oversee, develop, and manage the human capital of small to large organizations, thereby addressing the vital roles of the human resource professional within an operations and strategy setting. Students have the opportunity to develop and enhance critical management, strategic, organizational, and analytical skills through one of three specializations, which are based on industry needs and traditional curricula. Each specialization aligns with the recommended curriculum and skill development needs of human resource professionals as identified by the Society for Human Resource Management (SHRM).

**Learning Outcomes**

At the end of the program, students will be able to:

1. Apply the theoretical and practical aspects of human resource management to formulate strategies that will enable organizations to achieve both operational and strategic goals related to the organization's human capital.
2. Deploy appropriate HRM metrics and other HRM analytics to make informed decisions that enhance the effectiveness of the recruitment, training, development, and retention of human resources and align the HRM strategy with the overall organizational strategy and purpose.
3. Appraise and apply techniques in talent management that human resource professionals may use to facilitate effective position planning, talent selection, placement, compensation and rewards, as well as retention.
4. Propose mediation or negotiation strategies that lead to positive, ethical outcomes and demonstrate scrupulous consideration of perceived points of conflict; differences in values, beliefs, and cultures; or divergence of goals.
5. Assess opportunities to improve and sustain organizational performance through strategic thinking and management, the development of human capital, the allocation of physical and financial resources.
6. Exhibit the ability to make reasoned, ethical decisions based on professional standards and practices for ethical conduct, legal requirements, and regulatory guidelines in human resource management that are in the best interest of the individual, the organization, the environment, and society as a whole.
7. Propose systematic, systemic, and sustainable solutions to complex business problems related to human capital and human resource needs and issues by applying critical-thinking and analytical skills.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Human Resource Management program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

General Program

Through the General specialization of the M.S. in Human Resource Management program, students prepare to help organizations manage their most valuable asset—their employees. The skills and strategies required to develop effective human resource management policies and programs that align with a company's organizational strategic goals are emphasized in the coursework. Students will learn how to develop and manage performance systems; negotiate and resolve conflict; attract, develop, and retain talent; build trust and achieve credibility; and budget and plan for future organizational needs.

Functional Human Resource Management

This specialization provides a solid foundation in human resources for students who want to begin or broaden their functional skills in the field. Students explore how to create an environment that nurtures productivity and growth. Students appraise techniques used to effect positive outcomes for an organization, including individual performance management, organizational capacity, benefits and compensation, training and development, and vendor
management. At the end of the program, the capstone course reviews functional decision making in the human resource environment.

**Specialization Curriculum (9 sem. cr.)**

- MHRM 6625 - Building Human Capital Through Training and Development●
- MHRM 6615 - Legal and Regulatory Environment of Human Resource Management
- MHRM 6630 - Benefits and Compensation●

**Integrating Functional and Strategic Human Resource Management**

This specialization combines the essentials of functional human resource management with elements of strategic human resources. This specialization is designed for students who are mid-career professionals and want to transition from human resource generalists or functional human resource specialists to roles with more strategic responsibilities. Students explore legal and regulatory issues used to facilitate effective decisions on behalf of the organization. Students also work to develop skills in leadership, team building, and diversity management. At the end of the program, the capstone course examines core management challenges faced by general human resource managers.

**Specialization Curriculum (9 sem. cr.)**

- MHRM 6620 - Leading Vibrant and Diverse Teams●
- MHRM 6510 - Personal Leadership: Mentoring and Coaching●
- MHRM 6615 - Legal and Regulatory Environment of Human Resource Management

**Organizational Strategy**

This specialization is designed to provide experienced human resource professionals with the skills and ability to move into senior-level or executive positions. Topics include issues in critical areas such as business operations, succession planning, workforce development, and mergers and acquisitions. Students explore approaches to becoming involved in executive-level decision making and policymaking. Students also assess various theoretical perspectives of strategic human resource management necessary to strategic planning and management. At the end of the program, the capstone course examines the strategic challenges faced by executives.

**Specialization Curriculum (9 sem. cr.)**

- MHRM 6530 - Leadership in a Global Landscape●
- MHRM 6610 - Aligning Human Resources With Business Operations●
- MHRM 6640 - The Role of Human Resources in Mergers and Acquisitions●
M.S. in Leadership

The M.S. in Leadership program is designed to build the necessary knowledge base and skills for leaders to excel in meeting the ever-evolving challenges of a complex world. The degree program will help prepare leaders to seek and find innovative answers to novel problems and challenges. Moreover, this program will help prepare students to create positive change at individual, organizational, local, regional, and international levels of engagement, where traditional approaches no longer suffice.

Learning Outcomes

At the end of the program:

1. Students will apply sound principles in the practice of innovative leadership in complex environments to achieve positive transformation of individuals and organizations.
2. Students will apply appropriate research and analysis techniques to investigate complex situations in order to develop formal research-based solutions rooted in leadership concepts and practice.
3. Students will demonstrate reasoned, ethical decision-making skills, recognizing the local and far-reaching implications and effects of complex decisions.
4. Students will formulate strategies for organizational or community growth and success that promote accountability, sustainability, mutual respect, and diversity among constituents.
5. Students will develop constructive approaches to change and innovation that manage risk, embrace ambiguity, and enable agility by responding and adapting to evolving circumstances.
6. Students will evaluate their own values, strengths, and weaknesses in order to further develop their own leadership styles and improve their leadership effectiveness.
7. Students will effectively and persuasively articulate challenges and opportunities facing leaders in the contemporary global setting, demonstrating an integrated, empirical perspective; an appreciation for the long term; and an understanding of changing expectations and roles of leaders.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Leadership program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

General Program

With the General specialization in the M.S. in Leadership program, students prepare to create strategic initiatives, lead diverse teams, and better position companies for long-term growth and financial success. Students learn real-world business principles and communication strategies they can apply to build corporate culture, motivate key staff, make informed decisions, and apply conflict-resolution strategies at the individual and organizational level. The curriculum includes coursework in critical thinking, leadership, change management, and human resource management.

Specialization Curriculum (11 sem. cr.)

- MMSL 6570 - Leading Strategic Initiatives for Growth and New Value♦
- MMSL 6700 - Introduction to Human Resource Management♦
- MMSL 6661 - Leadership in Action: Change Management and Conflict Resolution♦

Human Resource Leadership

Through a specialization in Human Resource Leadership, students learn to develop a deeper awareness of leadership styles and how they affect individuals and teams. They study the tools needed to lead a high-functioning team and to counsel senior management on key personnel issues.

Specialization Curriculum (9 sem. cr.)

- MMSL 6550 - Strategic Human Resource Management♦
- MMSL 6560 - Managing Business Partner Relationships♦
- MMSL 6570 - Leading Strategic Initiatives for Growth and New Value♦

Innovation and Technology

Through a specialization in Innovation and Technology, students study the link between business strategy and innovation. They learn how to benchmark best practices employed by technology-
based organizations, identify emerging technologies, and foster an environment that encourages innovation to enhance their competitive advantage.

**Specialization Curriculum (11 sem. cr.)**

- MMSL 6540 - Innovation and Technology•
- MMSL 6730 - Strategies for Advancing Innovation and Technology•
- MMSL 6731 - Strategies for Implementing Innovation and Technology

**Leader Development**

Through a specialization in Leader Development, students learn to enhance their skills in communication and engagement in complex and changing decision environments and to develop capabilities to mentor, coach, and communicate more effectively with others.

**Specialization Curriculum (9 sem. cr.)**

- MMSL 6510 - Building Organizational Capacity Through Succession Planning•
- MMSL 6520 - Building Human Capital Through Training and Development•
- MMSL 6530 - Toward Sustainable Futures: Leadership in Complex, Crisis-Driven Environments•

**Self-Designed**

In the Self-Designed specialization, students can customize their studies by choosing 9 credits from any of the M.S. in Leadership specialization courses.

**Specialization Curriculum (9 sem. cr.)**

Select three courses from the list below:

- MMSL 6510 - Building Organizational Capacity Through Succession Planning•
- MMSL 6520 - Building Human Capital Through Training and Development•
- MMSL 6530 - Toward Sustainable Futures: Leadership in Complex, Crisis-Driven Environments•
- MMSL 6550 - Strategic Human Resource Management•
- MMSL 6560 - Managing Business Partner Relationships•
- MMSL 6570 - Leading Strategic Initiatives for Growth and New Value•

**M.S. in Management**
Walden's Master of Science in Management program focuses on building the essential managerial skills necessary to thrive in a rapidly changing world. Building on the fundamentals of quality management—sound, ethical decision making and solid communication—the program provides a relevant and real-world-oriented curriculum designed to enhance the learner's effectiveness as a manager within a wide range of organizations. Learners in the M.S. in Management program will have the option to add two to three additional courses to the end of the program, allowing them to expand and deepen their core management knowledge.

**Learning Outcomes**

At the end of this program, students will be able to:

1. Demonstrate critical-thinking skills that lead to ethical and reasoned decision making within a management context.
2. Formulate sustainable solutions to practical management problems encountered in a complex global environment by synthesizing relevant data and information and applying systems thinking to problem-solving.
3. Assess opportunities to improve and sustain organizational performance through strategic thinking, the development of human capital, the allocation of physical resources, and the management of financial resources.
4. Evaluate methods to develop people and manage teams to obtain the best performance in order to achieve goals and positive environments despite potential challenges imposed by a diverse workforce, cross-cultural differences, and virtual work settings.
5. Propose negotiation strategies that will lead to positive, ethical outcomes and demonstrate scrupulous consideration of perceived points of conflict; differences in values, beliefs, and culture; or divergence of goals.
6. Appraise techniques managers may use to facilitate change, examining the implications of culture, inertia, and uncertainty as well as the importance of understanding motivation and devising effective communications.
7. Develop effective communications for various types of management scenarios, demonstrating awareness of audience needs, accepted standards of professional practice, correct grammar, and appropriate writing style.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Management program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Communication**

In the Communication specialization, students can enhance their ability to communicate effectively with a variety of internal and external stakeholders. Coursework covers the process of selecting appropriate communication strategies for business initiatives and the elements of creating compelling messages in both the written and spoken forms. Students explore different communication channels, how to tailor messages for various channels and audiences, and the role of the manager in ensuring that organizational communications are accurate and impactful.

**Specialization Curriculum (9 sem. cr.)**

- MGMT 6689 - Message Design, Audience, and Evaluation
- MGMT 6693 - Interpersonal Communication
- MGMT 6697 - Creative Strategy and Execution: From Brief to Presentation

**Healthcare Management**

In the Healthcare Management specialization, students will build on skills and knowledge gained as a result of the M.S. in Management General Program with a focus on understanding the
structure and components of healthcare organizations in the United States. Students will examine the economic principles and decision making related to the amount, structure, and distribution of healthcare resources and services. In this specialization, students are introduced to the terminology, theory, and concepts used in the accounting and finance functions of healthcare organizations and will explore the techniques required to develop, manage, and control healthcare finances.

**Specialization Curriculum (9 sem. cr.)**

- MGMT 6690 - U.S. Healthcare Delivery System
- MGMT 6695 - Health Policy and Economics
- MGMT 6692 - Financial Management

**Human Resource Management**

In the Human Resource Management specialization, students will build on skills and knowledge gained as a result of the M.S. in Management General Program with a focus on the role of HR as a strategic resource within an organization. Students will learn to view employees as assets, formulating policies and programs that support high performance through balancing rewards, training, empowerment, and job design. Students will explore how economic, social, psychological, legal, and cultural forces influence employment relations and gain expertise in areas related to recruitment and selection, performance evaluation, compensation and benefits, job design, retention, and turnover.

**Specialization Curriculum (9 sem. cr.)**

- MGMT 6612 - Talent Management
- MGMT 6613 - Human Resource Metrics
- MGMT 6617 - Performance Management

**International Business**

Students who choose the International Business specialization in the M.S. in Management program develop knowledge and understanding of the international business climate and explore the challenges of working with different cultures. Students will investigate the political, financial, competitive, regulatory, operational, and social issues today's global managers face and how to evaluate the concepts of sustainable business strategies, international trade, foreign direct investment, and regional economic integration.

**Specialization Curriculum (9 sem. cr.)**
Leadership

Students in the Leadership specialization of the M.S. in Management program have the opportunity to develop their potential for becoming a valued and respected leader who can motivate change and inspire others. Students will learn about key qualities that today's successful leaders share and consider current viewpoints on the importance leadership plays in today's global economy. The curriculum includes the opportunity for students to evaluate their own leadership styles, develop effective mentoring skills, and learn how to use feedback to create interactive dialogues that positively impact individual and group behavior.

Specialization Curriculum (9 sem. cr.)

- MGMT 6640 - Leadership in a Global Landscape
- MGMT 6621 - Personal Leadership: Mentoring and Coaching
- MGMT 6637 - Leadership in Action: Change Management and Conflict Resolution

Managers as Leaders

In the Managers as Leaders specialization, students will build on skills and knowledge gained as a result of the M.S. in Management General Program with a focus on developing their own leadership abilities. Students will explore various perspectives of what makes a good leader and will evaluate their own leadership style. As a result of their studies, students will realize their potential to inspire others and influence the future of their organizations.

Specialization Curriculum (7 sem. cr.)

- MGMT 6620 - Leadership for the Contemporary Organization
- MGMT 6621 - Personal Leadership: Mentoring and Coaching

Marketing

Through the M.S. in Management program with a specialization in Marketing, students develop an in-depth understanding of marketing fundamentals and how they apply to today's global marketplace. Students will study the various ways that emerging media channels impact traditional marketing while they gain new knowledge and skills that can help them advance in areas that include integrated marketing, digital and social media marketing, strategic brand management, and new product development.

Specialization Curriculum (9 sem. cr.)
• MGMT 6659 - Marketing for Competitiveness
• MGMT 6662 - Developing an Integrated Marketing Strategy and Brand Management
• MGMT 6663 - Customer Loyalty and Buyer Behavior

Project Management

In the Project Management specialization, students will build on skills and knowledge gained as a result of the M.S. in Management General Program with a focus on successful management of projects of various scopes and sizes. Students will learn how to avoid the typical pitfalls of missed deadlines and mismanaged resources and will explore current theories and research, putting their newfound project management knowledge to work in real-world exercises. Students will benefit from gaining an understanding of the processes and concepts commonly addressed by managers evaluating challenges and opportunities related to projects.

Specialization Curriculum (9 sem. cr.)

• MGMT 6622 - Practices in Project Management
• MGMT 6623 - Enterprise and Project Risk Management
• MGMT 6627 - Stakeholder Management and Organizational Behavior

Strategy and Operations

In the Strategy and Operations specialization, students will build on the skills and knowledge gained as a result of the M.S. in Management General Program with a focus on developing proficiency in the ways that business and organizations operate in a global environment. Students also will achieve an aptitude for creating growth and value through the implementation of effective strategies. In particular, students will use decision-making as well as their critical- and systems-thinking skills to address challenges and opportunities organizations face, while exploring means to improve processes such as supply chain, quality, innovation, and forecasting. Note that in the Business Operations course, students will be expected to participate and contribute at a doctoral level.

Specialization Curriculum (9 sem. cr.)

• MGMT 6610 - Leading Strategic Initiatives for Growth and New Value
• MGMT 6611 - Business Operations: Systems Perspectives in Global Organizations
• MGMT 6677 - Competing in the Global Economy

M.S. in Marketing

Featuring coursework grounded in established theory and current best practices, the M.S. in Marketing program examines a variety of traditional and digital tools and platforms and how
they integrate into the marketing mix. Students explore customer understanding—the foundation for marketing planning and execution—and the importance of relationship marketing in customer retention. Other topics include the role of persuasion and storytelling in developing content, the creative process, leveraging the power of social media, and brand and product management. Students also examine marketing analytics as a way to inform strategic decision making. The program offers myriad hands-on project opportunities and culminates in the development of a strategic marketing plan.

Degree Requirements

- 30 semester credits

Learning Outcomes

Graduates of the M.S. in Marketing program will be prepared to:
1. Formulate statements of marketing opportunities to facilitate dialogue among stakeholders.
2. Make ethically and socially responsible decisions.
3. Collaborate with others from diverse perspectives in a business environment.
4. Apply current trends to analyze marketing problems.
5. Communicate professionally with stakeholders.
6. Evaluate marketing decisions in a business environment.

M.S. in Project Management

Walden University's M.S. in Project Management can help equip students with the skills needed to manage projects while leading diverse teams to help their organizations achieve their strategic goals. In this program, students will explore ways to communicate effectively with all stakeholders and will control project risks as they successfully develop and implement projects for their organizations.

Learning Outcomes

At the end of the program, students will be able to:

1. Apply the theoretical and practical aspects of project management to formulate strategies enabling organizations to achieve strategic goals through projects.
2. Evaluate management by projects as an emerging business model in the context of managing complexity, managing change, and optimizing business performance in a dynamic environment.
3. Employ critical-thinking and analytical skills to investigate complex business problems to propose project-based solutions that are derived from project management theory and practice.
4. Articulate the value of project risk management in the broader context of enterprise risk management considering both threats and opportunities posed by environmental factors.
5. Exhibit the ability to make reasoned, ethical decisions that are based on professional standards for ethical conduct in project management as well as in the best interest of the project, the organization, the environment, and society as a whole.
6. Assess leadership styles from the perspectives of the role of the leader and leadership effectiveness in organizations that are managed by function, by matrix, and by projects.

Accreditation

Walden University's M.S. in Project Management program is accredited by the Project Management Institute (PMI)® Global Accreditation Center for Project Management Education Programs (GAC). PMI GAC accreditation is the gold standard for excellence in project
management education, affirming that Walden's curriculum meets rigorous quality standards established by the GAC.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Project Management program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Master of Business Administration (M.B.A.)

Walden's M.B.A. curriculum connects students to real-world issues and trends, with coursework that emphasizes business skills and strategies to help them become more effective business communicators, successful collaborators, creative thinkers, and world-class managers who are well-equipped to work in today's global work environments. The curriculum touches upon all facets of business and integrates career development strategies throughout the coursework, providing an opportunity to gain skills they can use to effectively manage their careers. Students can customize the M.B.A. program by choosing a specialization or designing their own.

Learning Outcomes

At the end of this program, students will:

1. Evaluate the environment in which businesses operate with awareness of complexities, interdependencies, risks, consequences, and diverse stakeholder perspectives.
2. Make decisions within a business context that are effective, well-reasoned, ethical, and socially responsible.
3. Formulate statements of business problems or opportunities to facilitate insightful dialogue and critical thinking.
4. Generate solutions to complex business problems or opportunities through critical, creative, and systems thinking and applying appropriate theories, concepts, tools, skills, practices, and research.
5. Employ business-appropriate communication skills that enable effective exchange or transfer of information, promote mutual respect, encourage healthy discourse, and display an acute awareness of the needs of the intended audience.
6. Demonstrate the ability to work with others to meet goals in diverse and complex business environments.
7. Evaluate opportunities for business stakeholders, including oneself, to contribute to positive social change locally and globally.
Accreditation

Walden University's Master of Business Administration (M.B.A.) program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Master of Business Administration (M.B.A.) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Accounting

The Accounting specialization provides students with an opportunity to learn auditing, reporting, documenting, and decision-making skills and explore financial decision-making tools that will help them analyze and optimize organizational performance. Coursework examines forecasting, cost analysis, and assessment methods as well as budgeting and financial procedures. Students can broaden their cross-functional business knowledge and discover how to more effectively manage resources and reduce business risks.

Specialization Curriculum (9 sem. cr.)

- WMBA 6680 - Financial Management Tools for Decision Making
- WMBA 6683 - Managerial Accounting for Organizational Performance
- WMBA 6687 - Managing Operational and Financial Business Risks

Note on Licensure

Most states require individuals to complete 150 semester (225 quarter) hours in certain subject areas in order to be eligible to sit for the Certified Public Accountant (CPA) exam and/or obtain
a CPA license. Walden's accounting programs can help graduates progress toward meeting those requirements. The B.S. in Accounting offers 120-quarter (80-semester) credit hours that include upper-level courses in topics such as financial accounting, auditing, taxation, and management accounting. The M.S. in Accounting and the M.S. in Accounting and Management offer 30 semester (45-quarter) credit hours, while the M.B.A. Accounting for Managers specialization offers nine semester (13.5-quarter) credit hours. These programs include graduate courses in topics such as financial accounting, managerial accounting, and legal and ethical accounting practices. This will require students to complete additional coursework to meet state requirements.

In each state, there are specific policies that must be followed when an individual is seeking to become a licensed accountant. Some states will not allow individuals who complete the Walden accounting programs to sit for the CPA licensing exams due to state-specific issues such as professional accreditation or face-to-face instruction. For information on the educational requirements for your state, refer to the state's Board of Accountancy or related agency. Walden enrollment advisors can provide guidance about accountant licensure; however, it remains the responsibility of the individual enrolling in the program to read, understand, and comply with the licensure requirements in the state where he or she wishes to practice. Walden University can make no representation, warranty, guarantee, or commitment that successful completion of a Walden program, or coursework for credit within a program, will make a graduate eligible to sit for a licensure exam or to obtain state licensure.

**Corporate Finance**

The Corporate Finance specialization explores the broad range of financial issues today's global corporations face, enabling them to make more informed and profitable business decisions. Students participate in a comprehensive overview of financial principles and accepted practices in financial markets, thrift institutions, and commercial and investment banking. They analyze legal and ethical issues across a broad spectrum of companies and industries to support their decision-making processes and complete the program with real-world case studies in financial modeling and analysis.

**Specialization Curriculum (9 sem. cr.)**

- WMBA 6640 - Advanced Managerial Finance
- WMBA 6643 - Theories of Corporate Finance
- WMBA 6647 - Applied Corporate Finance

**Communication**

The Communication specialization is designed to help students communicate more effectively with internal and external stakeholders in a variety of scenarios. Coursework explores the elements of compelling interpersonal and organizational communication as well as the manager's role in ensuring that communications achieve desired goals. Students examine the art and science of creating persuasive written and oral messages, how to tailor communications to various
audiences and purposes, and the process of selecting, planning, executing, and evaluating communication strategies.

Specialization Curriculum (9 sem. cr.)

- WMBA 6690 - Message Design, Audience, and Evaluation
- WMBA 6693 - Interpersonal Communication
- WMBA 6697 - Creative Strategy and Execution: From Brief to Presentation

Entrepreneurship and Small Business

The Entrepreneurship specialization provides students with hands-on experience in launching a new business. Coursework covers a broad spectrum of topics, including new venture creation, the emergence of "glocalities," and sustainable strategies for managing small businesses. Students learn how to identify opportunities and confidently navigate the challenges associated with becoming an entrepreneur and become prepared to jump-start a new or existing business.

Specialization Curriculum (9 sem. cr.)

- WMBA 6650 - The Impact of Entrepreneurship
- WMBA 6653 - New Venture Creation and Entrepreneurship
- WMBA 6657 - Managing a Sustainable Small Business

Healthcare Management

The Healthcare Management specialization provides students with an understanding of the structure and components of health services and the health services delivery system in the United States. Coursework offers an opportunity to closely examine the techniques required to develop, manage, and control healthcare finances. Students are also introduced to the terminology, theory, concepts, and techniques used in the accounting and finance functions of healthcare organizations.

Specialization Curriculum (9 sem. cr.)

- WMBA 6600 - U.S. Healthcare Delivery System
- WMBA 6603 - Health Policy and Economics
- WMBA 6607 - Financial Management

Human Resource Management

The Human Resource Management specialization encourages students to adopt a strategic view of human resource management policies and programs and to evaluate their alignment with organizational strategic goals. Coursework emphasizes the skills and strategies required to
confidently develop, manage, recruit, and lead departments and staff members. Students explore how economic, social, psychological, legal, and cultural forces influence employment relations and gain expertise in areas related to recruitment and selection, performance evaluation, compensation and benefits, job design, retention, and turnover.

**Specialization Curriculum (9 sem. cr.)**

- WMBA 6610 - Talent Management
- WMBA 6613 - Human Resource Metrics
- WMBA 6617 - Performance Management

**International Business**

The International Business specialization emphasizes the management and leadership needs of complex organizations whose operations and interests cross over multiple markets, cultures, and geography. Students will study how global organizations operate and adopt and explore the critical challenges that global managers face, including the political, financial, competitive, regulatory, operational, and social dimensions of international business.

**Specialization Curriculum (9 sem. cr.)**

- WMBA 6670 - Applications in Global Business
- WMBA 6673 - Case Studies in Global Business
- WMBA 6677 - Competing in the Global Economy

**Leadership**

The Leadership specialization helps students realize their potential to become effective and respected leaders who can build culture, motivate others, and confidently guide companies and departments through organizational change. Students explore various perspectives of what makes a good leader and evaluate their own leadership style. Through an ongoing process of self-reflection, new knowledge, and hands-on experience, students build upon their existing leadership strengths and enhance their expertise in areas that include communication, change management, organizational culture, ethics, and global business.

**Specialization Curriculum (9 sem. cr.)**

- WMBA 6630 - Leadership in a Global Landscape
- WMBA 6633 - Personal Leadership: Mentoring and Coaching
- WMBA 6637 - Leadership in Action: Change Management and Conflict Resolution

**Marketing**

The Marketing specialization provides students with an in-depth understanding of consumer behaviors, brand positioning, and how emerging media channels are transforming traditional
marketing. Students solidify their knowledge of marketing fundamentals, including market analysis and product positioning, while learning new strategies for integrated marketing, customer relationship management, new product development, and brand management.

**Specialization Curriculum (9 sem. cr.)**

- WMBA 6660 - Communicating Using Social and Digital Media
- WMBA 6663 - Market Research and Customer Insights
- WMBA 6667 - From Marketing Strategy to Execution

**Project Management**

The Project Management specialization helps students develop the skills and strategies needed to manage projects of all scopes and sizes. Students learn how to avoid typical pitfalls of missed deadlines and mismanaged resources and explore current theories and research, putting their new-found project management skills to work in real-world exercises. Walden is an approved provider of project management training by the Project Management Institute (PMI®).

**Specialization Curriculum (9 sem. cr.)**

- WMBA 6620 - Practices in Project Management
- WMBA 6623 - Enterprise and Risk Management
- WMBA 6627 - Stakeholder Management and Organizational Behavior

**Self-Designed**

The Self-Designed specialization allows students to customize their studies by choosing 9 elective credits from a preselected list of available courses. Students may also apply transfer credits toward their elective courses.

**Specialization Curriculum (9 sem. cr.)**

Students may use Transfer of Credit from prior graduate work or choose three courses from any of the Walden M.B.A. specializations to equal 9 semester credits.
DOCTORAL DEGREE
PROGRAMS

Doctor of Business Administration (D.B.A.)

The Doctor of Business Administration (D.B.A.) is a practitioner-scholar doctoral degree in business administration and management. It is targeted to business executives who have a master's degree in a discipline or field related to the program/specialization for which application is made and who have practical business management experience. The program helps students enhance their career profile with real-time knowledge—in preparation for expanded roles with their current employer or with another organization, or for roles as consultants or university-level teachers.

Learning Outcomes

At the end of the program, students will be able to:
1. Assess the relevance of current and emerging business theory and practice from an interdisciplinary perspective.
2. Formulate and execute effective solutions to complex, real-world problems common to the practice of business and management.
3. Apply the current research literature from business and management to practical problems found in business and management.
4. Design and conduct rigorous research that contributes to the professional body of knowledge on business and management.
5. Clearly communicate to stakeholders about problem statements, research approaches and results, solutions, and assessment.
6. Explain their ethical responsibilities as members of the business community and citizens in society.

Accreditation

Walden University's Doctor of Business Administration (D.B.A.) program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

Specializations

- Accounting
- Entrepreneurship
- Finance
- Global Supply Chain Management
• Healthcare Management
• Homeland Security
• Human Resource Management
• Information Systems Management
• International Business
• Leadership
• Marketing
• Project Management
• Social Impact Management
• Technology Entrepreneurship
• Self-Designed

Degree Requirements

• 60 total semester credit hours*
• Foundation course (3 sem. cr.)
• Core courses (18 sem. cr.)
• Research methods courses (10 sem. cr.)
• Specialization courses (9 sem. cr.)
• Doctoral studies sequence (20 sem. cr.)
• 8 days of academic residency (two 4-day residencies)

*Note: Students who have earned a Chartered Property Casualty Underwriter (CPCU), Professional in Human Resources (PHR), Senior Professional in Human Resources (SPHR), Global Professional in Human Resources (GPHR), Chartered Financial Analyst, or Project Management Institute designation or certification may be eligible to accelerate their D.B.A. program. For information, contact the Academic Advising Team.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Doctor of Business Administration (D.B.A.) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Accounting

The Accounting specialization explores the principles and methods used in managerial accounting, including revenue forecasting and cost-volume-profit analyses. Students examine applied research methods in the context of decision-making and performance-evaluation systems. Theories of managerial decision making from both domestic and global perspectives are used to develop solutions for real-world business problems. Students can learn to communicate financial results clearly to finance executives within their organizations.

Specialization Curriculum (9 sem. cr.)

- **DDBA 8550 - Seminar in Managerial Accounting**
- **DDBA 8551 - Seminar in Accounting-Based Performance Evaluation Systems**
- **DDBA 8552 - Seminar in International Aspects of Managerial Accounting**

Entrepreneurship

Students in the Entrepreneurship specialization explore the entrepreneurial concepts and processes that are found in both established companies with a pioneering spirit and start-ups. They build entrepreneurial skills and knowledge with a learning experience that combines theory with practical strategies drawn from real-world situations, such as identifying market opportunities, managing risk and change, encouraging innovation, and raising capital. In addition, they analyze how an entrepreneurial organization can make a greater contribution in today's society. Coursework focuses on the development of writing and critical-thinking skills at the doctoral level.

Specialization Curriculum (9 sem. cr.)

- **DDBA 8511 - Seminar in Innovation Management**
- **DDBA 8541 - Seminar in Entrepreneurial Finance**
- **DDBA 8531 - Seminar in B2B Marketing**

Finance

Students gain the finance tools that help managers maximize their firm's value, including valuation, capital budgeting and structure, working capital management, multinational concepts, and Capital Asset Pricing Model (CAPM). As they develop their expertise in finance, students
explore more advanced theories such as option pricing, derivatives, and hedging. Throughout the program, students will be encouraged to combine practice and theory in order to apply their new knowledge to organizational problems. Coursework focuses on the development of writing and critical-thinking skills at the doctoral level.

**Specialization Curriculum (9 sem. cr.)**

- DDBA 8540 - Seminar in International Finance
- DDBA 8541 - Seminar in Entrepreneurial Finance
- DDBA 8523 - Seminar in Law and Compliance

**Global Supply Chain Management**

Whether students work as manufacturers, retailers, or service providers, if they conduct business globally, they need to understand how products and services move from concept to delivery. Students learn the systems required to identify sources of personnel and material, and how to ensure that supply chains conform to the highest global standards. In addition, they will explore new ways of applying technology to help cut costs, increase customer satisfaction, and find new business opportunities. Coursework focuses on the development of writing and critical-thinking skills at the doctoral level.

**Specialization Curriculum (9 sem. cr.)**

- DDBA 8510 - Seminar in Global Supply Chain Management
- DDBA 8512 - Seminar in IT for Competitive Advantage
- DDBA 8524 - Seminar in Multicultural Management

**Healthcare Management**

The Healthcare Management specialization focuses on healthcare policy development and its effect on organizational operations, the analysis of healthcare delivery systems, and an investigation of the regulatory and ethical dynamics that exist within the U.S. healthcare industry. Students can learn to apply managerial decision-making skills to the healthcare policy development and implementation process that guides the operation of healthcare organizations. The curriculum explores solutions for real-world management challenges that can affect delivery systems and the continuum of health services.

**Specialization Curriculum (9 sem. cr.)**

- DDBA 8560 - Seminar in Healthcare Managerial Decision Making
- DDBA 8561 - Seminar in Managing Healthcare Delivery Systems
- DDBA 8562 - Seminar in Law and Ethics in Healthcare Management
Homeland Security

Designed for leaders in the private and public sectors interested in analyzing the impact of homeland security policies and crisis planning from a business perspective, the students in the Doctor of Business Administration (D.B.A.) with a specialization in Homeland Security explore how the field has evolved and how it shapes the practice of business continuity. Using a seminar discussion delivery format, students have the opportunity to study the principles of global terrorism from a historical and contemporary perspective, as well as discuss key issues and global challenges facing the U.S. intelligence community. Students can also develop the skills and critical thinking necessary to assess and implement various risk tools, business strategies, and policies designed to mitigate risk and protect their organization from terrorist attacks, natural disasters, or other crisis that threaten critical business infrastructure.

Specialization Curriculum (9 sem. cr.)

- DDBA 8590 - Impact of Homeland Security Policies on Business Continuity
- DDBA 8591 - Homeland Security—Business Planning
- DDBA 8592 - Business Infrastructure Vulnerability Analysis

Human Resource Management

The Human Resource Management specialization enables students to gain an understanding of how human and knowledge capital can be leveraged to create and drive an organization's agility, growth, and success. Coursework examines contemporary organizational issues that human resource (HR) professionals must address as strategic partners to executive leadership, such as succession planning for the organization's long-term success, creating and managing external strategic partnerships, and comprehensive planning from an HR perspective for the organization's overall business goals. Students in this specialization have the opportunity to research and address issues relevant to their interests and organization. This specialization culminates with the creation of an annual HR operating plan (AHROP), which allows students to apply their knowledge to a tangible action plan that can be implemented immediately.

Specialization Curriculum (9 sem. cr.)

- DDBA 8580 - The New HR: The Savvy Strategic Partner
- DDBA 8581 - Succession Planning: A Survival Tool of the Fittest
- DDBA 8582 - An HR Plan for Organizational Agility

Information Systems Management
With this specialization, students develop expertise in information systems management with a focus on addressing the management challenges facing technology-based businesses. They gain the knowledge and skills to help align business needs with technological solutions, identify new applications for technology, and leverage technological solutions in order to enhance their organization's competitive position in the marketplace. They examine how technological solutions can be affected in a global environment. Coursework focuses on the development of writing and critical-thinking skills at the doctoral level.

**Specialization Curriculum (9 sem. cr.)**

- DDBA 8510 - Seminar in Global Supply Chain Management
- DDBA 8511 - Seminar in Innovation Management
- DDBA 8512 - Seminar in IT for Competitive Advantage

**International Business**

Students learn the skills necessary to manage and lead a spectrum of workers, managers, and teams in a global marketplace. They examine the financial implications of conducting business internationally, including how capital investment is undertaken globally and how financial markets and global trade influence investment opportunities. They gain an overview of the effect the world's financial institutions—such as the World Bank, International Monetary Fund, and World Trade Organization (WTO)—have on trade, new markets, and exchange and interest rates. Coursework focuses on the development of writing and critical-thinking skills at the doctoral level.

**Specialization Curriculum (9 sem. cr.)**

- DDBA 8510 - Seminar in Global Supply Chain Management
- DDBA 8540 - Seminar in International Finance
- DDBA 8524 - Seminar in Multicultural Management

**Leadership**

Globalization, advances in technology, and rapid changes in the marketplace all contribute to the need for business professionals to continually develop their leadership skills. Students explore new frameworks and perspectives that will help them lead and manage change effectively. They will investigate a variety of current leadership principles and practices to determine which work best in any given situation. Coursework focuses on the development of writing and critical-thinking skills at the doctoral level.

**Specialization Curriculum (9 sem. cr.)**

- DDBA 8521 - Seminar in Change Management
- DDBA 8522 - Seminar in Sustainability
- DDBA 8524 - Seminar in Multicultural Management
Marketing

This specialization investigates marketing challenges and opportunities from a real-world context. Students study key marketing concepts, including market segmentation, marketing channels, competitive intelligence, integrated marketing, product development and commercialization, and consumer behavior. They learn the skills and knowledge needed to succeed in an international marketplace, including leveraging strategies in global marketing and international pricing. Coursework focuses on the development of writing and critical-thinking skills at the doctoral level.

Specialization Curriculum (9 sem. cr.)

- DDBA 8533 - Seminar in Marketing Research
- DDBA 8531 - Seminar in B2B Marketing
- DDBA 8532 - Seminar in Consumer Behavior

Project Management

The Project Management specialization focuses on achieving organizational effectiveness objectives through project, program, and portfolio management. Students can study the principles of project-based strategic leadership, learn to assess portfolio risk, and analyze opportunities for portfolio performance improvement. Students can develop the skills to engage in dynamic project portfolio management and to address real-world project management challenges.

Specialization Curriculum (9 sem. cr.)

- DDBA 8570 - Seminar in Program and Portfolio Management
- DDBA 8571 - Seminar in Project Portfolio Performance and Organizational Effectiveness
- DDBA 8572 - Seminar in Project-Based Strategic Leadership

Social Impact Management

As more companies move from a profit-only outlook to one that focuses on communities and society as a whole, the ability to manage and improve an organization's social impact is in high demand. Students examine key issues in corporate responsibility, such as how to achieve greater transparency while protecting proprietary information, leverage social involvement in branding, improve operational efficiency through environmental initiatives, and strengthen stakeholder relationships. Coursework focuses on the development of writing and critical-thinking skills at the doctoral level.

Specialization Curriculum (9 sem. cr.)

- DDBA 8521 - Seminar in Change Management
Technology Entrepreneurship

Students examine what innovation is and what it is not. They learn how to design the concepts, processes, and tools to increase the rate and extent of innovation in their company, thereby enhancing the company's competitive edge. Students discover new ways of applying technology to cut costs, increase customer satisfaction, and create new business opportunities. Coursework focuses on the development of writing and critical-thinking skills at the doctoral level.

Specialization Curriculum (9 sem. cr.)

- DDBA 8511 - Seminar in Innovation Management
- DDBA 8541 - Seminar in Entrepreneurial Finance
- DDBA 8512 - Seminar in IT for Competitive Advantage

Self-Designed

Students create their own specialization based on their individual goals and interests in business administration. They choose seminars from the program's other nine specializations under the guidance of a Walden faculty mentor. Assignments will focus on the practical application of writing and critical-thinking skills and the integration of professional practice at the doctoral level.

Specialization Curriculum (9 sem. cr.)

Choose any three seminars from any of the other D.B.A. specializations.

Ph.D. in Management

Walden's Ph.D. in Management, formerly the Ph.D. in Applied Management and Decision Sciences, is one of the few Ph.D. programs in management offered online. The program takes an interdisciplinary approach to the field of management and its influence on the development of individuals and society. Students will conduct original research in a specific area of interest as they have the opportunity to learn theories, concepts, and techniques that provide the foundation for sound management decision making. Students will help prepare to meet the challenges and opportunities in their profession and their organization; study ways to facilitate positive social change; and help enhance their capabilities as a researcher, scholar, manager, or consultant. The curriculum for the Ph.D. in Management offers an interdisciplinary approach to the study of management. Students may choose a specialization that fits a personal and/or career objective.
Learning Outcomes

At the end of the program, students will be able to:

1. Articulate the evolution of the field of management and its relationship to human and societal development.
2. Analyze various theories, concepts, and tools that seek to explain and provide the basis for management decision making.
3. Evaluate management and systems-thinking principles at the core of the design and evolution of organizational and social systems.
4. Appraise the relevance of seminal, current, and emerging management theories and practices from an interdisciplinary and social-change perspective.
5. Assess identified gaps in the current research literature in the field of management and in their chosen areas of specialization.
6. Design efficacious and ethical research that addresses identified gaps in the body of knowledge in management and related sub-fields.
7. Advance the body of knowledge through original research in the field of management and chosen areas of specialization via the application of a variety of appropriate methodology, design, and analysis methods.
8. Communicate effectively to academic and general stakeholders the results of original research that advances the field of knowledge in management and chosen specializations and contributes to positive social change.

Accreditation

Walden University's Ph.D. in Management program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading, specialized accreditation association that identifies and supports excellence in business education.

Specializations

- Finance
- Human Resource Management
- Information Systems Management
- Leadership and Organizational Change

Degree Requirements

- Professional Development Plan and program of study
- Core coursework (20 cr.)
- Foundation Research Sequence (12 cr.)
- Specialization coursework (20 cr.)
- Advanced Research course (4 cr.)
- Proposal, dissertation, and oral presentation (26 cr.)
- Four 4-day residencies

Course Sequence
Course-Based Specializations
The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Program Data
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Management program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Finance
This specialization integrates foundations in management and decision sciences with topics in financial theory, systems, and practices. The curriculum examines the development of financial market cultures and financial decision-making techniques. Students study financial models and examine how their structures influence social, political, and economic systems. With a focus on research and applied theory related to corporate, investment, and international finance, students consider case-study analysis and principles of social and behavioral research.

Curriculum

Core Courses (20 cr.)
- MGMT 8015 - Gateway to Doctoral Studies
- MGMT 8025 - Perspectives on Organizations and Their Implications for Leaders
- MGMT 8035 - Complexity and Applied Systems Thinking
- MGMT 8045 - Mechanics of Individual and Group Decision Making

Specialization Courses (20 cr.)
- MGMT 8610 - Financial Decision Making for Individuals and Firms
- MGMT 8620 - Financial Markets: Risk and Return, Capital Structure, and International Dimensions of Finance
- MGMT 8630 - Corporate Financial Management
- MGMT 8640 - Valuation of Assets, Entities, and Opportunities
- MGMT 8650 - Financial Analysis, Planning, and Forecasting

Foundation Research Sequence (12 cr.)
Courses comprising the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8101Z must be completed during the third term (second term for KAM-based and mixed-model students) and is a prerequisite for Residency 2 of the academic residencies. RSCH 8201Z and RSCH 8301Z must be completed prior to registering for Residency 3 and for the dissertation.
- RSCH 8101Z - Research Theory, Design, and Methods
Advanced Research Course (4 cr.)
Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses. Students should refer to their specific programs of study to determine program-specific requirements.
One of the following three courses is required:
- RSCH 8251Z - Advanced Quantitative Reasoning and Analysis
- RSCH 8351Z - Advanced Qualitative Reasoning and Analysis
- RSCH 8451Z - Advanced Mixed-Methods Reasoning and Analysis

Mentoring (0 cr.)
All course-based students will be enrolled in MGMT 8100 each term following the completion of RSCH 8201Z until beginning the dissertation in MGMT 9000.
- MGMT 8100 - Dissertation Mentoring

Dissertation (26 cr.)
- MGMT 8990 - Developing a Prospectus
- MGMT 8991 - Writing a Proposal
- MGMT 9000 - Doctoral Dissertation

**2.75 years of courses + dissertation: Total 82 cr.**

*Note:* Following the completion of RSCH 8201Z - Quantitative Reasoning and Analysis, students will be continuously registered in MGMT 8100 until the completion of MGMT 8991. This course will be 0 credits and $0 per credit, and is designed to allow time for the student to work with their mentor through the early stages of the dissertation process.

**Residency Requirement: 16 units**
- Residency 1: Within 90 days following MGMT 8015
- Residency 2: During first Research Sequence course
- Residency 3: Before writing the proposal after third specialization course
- Residency 4: During dissertation, to prepare completion and defense of dissertation and for facilitating future publications (Prerequisite: Completion of MGMT 8991.)

**General Management (KAM-Based)**

**Foundation Course (6 cr.)**

All beginning KAM-based/mixed-model track Ph.D. in Management students are required to successfully complete this course and are automatically enrolled in it during their first quarter. In this course, students develop a Professional Development Plan and a Plan of Study as their guide to the rest of their program.

- **AMDS 8008 - Foundations for Doctoral Study**

**Core KAMs I–III (36 cr.)**
Core KAM I: Principles of Social Change (12 cr.)
Perspectives in social and behavioral sciences as they influence human values and lifestyles, communication, social networks, and forecasting alternative futures are addressed. Students begin to integrate theoretical constructs into practical applications for their own interest areas.
- **Breadth:** SBSF 8110 - Theories of Social Change
- **Depth:** SBSF 8120 - Current Research in Social Change
- **Application:** SBSF 8130 - Professional Practice and Social Change

Core KAM II: Principles of Human Development (12 cr.)
This KAM covers basic theories and current research on biological, psychosocial, cognitive, and affective human development, including normal developmental patterns and crises that may occur. Students explore developmental questions in the context of both chronological time and underlying physical, social, and psychological experiences.
- **Breadth:** SBSF 8210 - Theories of Human Development
- **Depth:** SBSF 8220 - Current Research in Human Development
- **Application:** SBSF 8230 - Professional Practice and Human Development

Core KAM III: Principles of Organizational and Social Systems (12 cr.)
This is an introduction to systems theories from various disciplines. The primary models of structured system theories are presented as a background and theoretical framework for the other knowledge areas. Also considered are theories that impact micro and macro levels of social, political, and economic systems.
- **Breadth:** SBSF 8310 - Theories of Organizational and Social Systems
- **Depth:** SBSF 8320 - Current Research in Organizational and Social Systems
- **Application:** SBSF 8330 - Professional Practice and Organizational and Social Systems

Foundation Research Sequence (12 cr.)
Courses composing the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100Z must be completed during the second term (third term for course-based students) and is a prerequisite for Residency 2 of the academic residencies. RSCH 8200Z and RSCH 8300Z must be completed prior to registering for Residency 3 and for the dissertation.
- **RSCH 8100Z - Research Theory, Design, and Methods**
- **RSCH 8200Z - Quantitative Reasoning and Analysis**
- **RSCH 8300Z - Qualitative Reasoning and Analysis**

Advanced Research Course (4 cr.)
Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses. Students should refer to their specific programs of study to determine program-specific requirements.
One of the following three courses is required:
- **RSCH 8250Z - Advanced Quantitative Reasoning and Analysis**
- **RSCH 8350Z** - Advanced Qualitative Reasoning and Analysis
- **RSCH 8450Z** - Advanced Mixed-Methods Reasoning and Analysis

**Specialized KAMs (24 cr.)**

Students may choose between writing KAM V or VI. KAM VII is required.

**Specialized KAM V: Organizational Dynamics and Development (12 cr.)**

- **Breadth:** AMDS 8510 - Theories of Organizational Dynamics and Development
- **Depth:** AMDS 8520 - Contemporary Research and Issues in Theories of Organizational Dynamics and Development
- **Application:** AMDS 8530 - Professional Practice Application of a Theory of Organizational Dynamics and Development

**Specialized KAM VI: Decision Sciences (12 cr.)**

- **Breadth:** AMDS 8610 - Decision Theory and Analysis
- **Depth:** AMDS 8620 - Current Research in Decision Sciences
- **Application:** AMDS 8630 - Models for Decision-Making

**Specialized KAM VII: Research (12 cr.)**

- **Breadth:** AMDS 8710 - Research Methods
- **Depth:** AMDS 8720 - Selected Research Methods
- **Application:** AMDS 8730 - Research Design

**Dissertation (20 cr.)**

- AMDS 9000 - Dissertation

**Human Resource Management**

The Human Resource Management specialization integrates foundational study in management with specialized topics in human resource management that extend the research boundaries in areas such as strategic human resource management; the role of human resource management in organizational effectiveness and performance; human capital development and maintenance; the regulatory, ethical, and cultural environment of human resource management; conflict resolution; and labor relations and human resource metrics. Special emphasis on the global and multidisciplinary aspects of human resource management is provided throughout the specialization, which is composed of five research seminar courses in which learners seek to identify gaps in understanding in the field of human resource management, and where they explore specific topics for potential dissertation research.

**Curriculum**
Core Courses (20 cr.)

- MGMT 8015 - Gateway to Doctoral Studies
- MGMT 8025 - Perspectives on Organizations and Their Implications for Leaders
- MGMT 8035 - Complexity and Applied Systems Thinking
- MGMT 8045 - Mechanics of Individual and Group Decision Making

Specialization Courses (20 cr.)

- MGMT 8710 - Organizational Behavior and Effective Human Resource Management
- MGMT 8720 - Strategic Thinking for Effective Human Resource Management
- MGMT 8730 - The Development of Human Capital Within Organizations
- MGMT 8740 - The Legal, Ethical, and Cultural Environment of Human Resource Management
- MGMT 8750 - Human Resource Management and Its Role in Labor Relations, Negotiation, and Conflict Resolution

Foundation Research Sequence (12 cr.)

Courses comprising the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8101Z must be completed during the third term (second term for KAM-based and mixed-model students) and is a prerequisite for Residency 2 of the academic residencies. RSCH 8201Z and RSCH 8301Z must be completed prior to registering for Residency 3 and for the dissertation.

- RSCH 8101Z - Research Theory, Design, and Methods
- RSCH 8201Z - Quantitative Reasoning and Analysis
- RSCH 8301Z - Qualitative Reasoning and Analysis

Advanced Research Course (4 cr.)

Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

- RSCH 8251Z - Advanced Quantitative Reasoning and Analysis
- RSCH 8351Z - Advanced Qualitative Reasoning and Analysis
- RSCH 8451Z - Advanced Mixed-Methods Reasoning and Analysis

Mentoring (0 cr.)

All course-based students will be enrolled in MGMT 8100 each term following the completion of RSCH 8201Z until beginning the dissertation in MGMT 9000.

- MGMT 8100 - Dissertation Mentoring

Dissertation (26 cr.)

### Information Systems Management

This specialization provides an integrative approach to managing information systems in today's data-rich environment. Students will study ways to derive maximum value and innovation from investing in organizational systems and will help build the leadership skills that successful technology executives have found essential. Students will take the opportunity to broaden their understanding of all aspects of e-commerce systems, security management and risk assessment, and system design. They will study ways to develop expertise in leading and managing people, processes, and systems, and contribute to positive social change by helping to improve organizational performance through information systems management.

### Curriculum

#### Core Courses (20 cr.)
- MGMT 8015 - Gateway to Doctoral Studies
- MGMT 8025 - Perspectives on Organizations and Their Implications for Leaders
- MGMT 8035 - Complexity and Applied Systems Thinking
- MGMT 8045 - Mechanics of Individual and Group Decision Making
Specialization Courses (20 cr.)

- MGMT 8510 - Managing E-Commerce Management Information Systems
- MGMT 8520 - Organizational Performance Improvement
- MGMT 8530 - Managing Projects in Complex Environments
- MGMT 8540 - Systems Analysis, Design, and Implementation
- MGMT 8550 - Security Management and Risk Assessment

**Leadership and Organizational Change**

In this specialization, students will examine leading-edge as well as traditional models of leadership and organizational structures. Students will study ways to promote effective leadership development, strengthened interpersonal relationships, and successful group and organizational dynamics, all of which can lead to improved performance in organizations. Students will also explore ways to mobilize change and work effectively in cross-cultural environments.

- Residency 4: During dissertation, to prepare completion and defense of dissertation and for facilitating future publications (Prerequisite: Completion of MGMT 8991.)

**Learning Management Specialization (Mixed-Model)**
The Knowledge Management and Learning Management specializations prepare students to develop innovative solutions to their organizations’ most critical challenges through the comprehensive creation, sharing, and use of knowledge, and the effective education of adult learners. The specializations focus on the effective use of knowledge, organizational change (e.g., total quality, Six Sigma, re-engineering, Malcolm Baldrige National Quality Award), and organizational learning, including the deployment of corporate universities.

**Foundation Course (6 cr.)**
All beginning KAM-based/mixed-model track Ph.D. in Management students are required to successfully complete this course and are automatically enrolled in it during their first quarter. In this course, students develop a Professional Development Plan and a Plan of Study as their guide to the rest of their program.

**Advanced Research Course (4 cr.)**
Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

- **RSCH 8250Z - Advanced Quantitative Reasoning and Analysis**
- **RSCH 8350Z - Advanced Qualitative Reasoning and Analysis**
- **RSCH 8450Z - Advanced Mixed-Methods Reasoning and Analysis**

**Specialization Courses (16 cr.)**

*Students complete all four courses under Learning Management.*

**Learning Management**
• AMDS 8830 - Adult Learning
• AMDS 8831 - Lifelong Learning
• AMDS 8832 - Education Design for Adult Learners
• AMDS 8833 - Integration of Knowledge and Learning Management With Strategic Educational Initiatives

Two Appropriate KAMs (24 cr.)

Capstone Course (6 cr.)

• AMDS 8899 - Capstone Seminar

Dissertation (20 cr.)

• AMDS 9000 - Dissertation
POST-DOCTORAL CERTIFICATE PROGRAMS

Post-Doctoral Bridge to Business Administration Certificate

The Post-Doctoral Bridge to Business Administration Certificate program is designed to provide students who hold a doctoral degree in business or a non-business field with core knowledge in a business discipline outside their previous doctoral studies. Students explore such topics as marketing, business strategy, supply chain management, and compliance. This certificate program emphasizes business aspects in a global context and explores relevant trends students can apply in settings that include postsecondary education, research, and consulting.

With the exception of DDBA 8006 and DDBA 8161, any courses used toward the completion of a doctoral program cannot be applied toward the completion of the post-doctoral bridge certificate.

Certificate Requirements

- Hold a recognized terminal degree in a business or non-business field
- 15 total semester credit hours
- Foundation course (3 sem. cr.)
- Core course (3 sem. cr.)
- Specialization courses (9 sem. cr.)

Curriculum

Foundation Course (3 sem. cr.)

- DDBA 8006 - Contemporary Challenges in Business

Core Course (3 sem. cr.)

- DDBA 8161 - Business Strategy and Innovation for Competitive Advantage

Specialization Courses (9 sem. cr.)

Choose from one of the following three-course specialization sequences:

Accounting

- DDBA 8550 - Seminar in Managerial Accounting
- DDBA 8551 - Seminar in Accounting-Based Performance Evaluation Systems
• DDBA 8552 - Seminar in International Aspects of Managerial Accounting

Entrepreneurship

• DDBA 8511 - Seminar in Innovation Management
• DDBA 8541 - Seminar in Entrepreneurial Finance
• DDBA 8531 - Seminar in B2B Marketing

Finance

• DDBA 8540 - Seminar in International Finance
• DDBA 8541 - Seminar in Entrepreneurial Finance
• DDBA 8523 - Seminar in Law and Compliance

Global Supply Chain Management

• DDBA 8510 - Seminar in Global Supply Chain Management
• DDBA 8512 - Seminar in IT for Competitive Advantage
• DDBA 8524 - Seminar in Multicultural Management

Healthcare Management

• DDBA 8560 - Seminar in Healthcare Managerial Decision Making
• DDBA 8561 - Seminar in Managing Healthcare Delivery Systems
• DDBA 8562 - Seminar in Law and Ethics in Healthcare Management

Homeland Security

• DDBA 8590 - Impact of Homeland Security Policies on Business Continuity
• DDBA 8591 - Homeland Security—Business Planning
• DDBA 8592 - Business Infrastructure Vulnerability Analysis

Human Resource Management

• DDBA 8580 - The New HR: The Savvy Strategic Partner
• DDBA 8581 - Succession Planning: A Survival Tool of the Fittest
• DDBA 8582 - An HR Plan for Organizational Agility

Information Systems Management

• DDBA 8510 - Seminar in Global Supply Chain Management
• DDBA 8511 - Seminar in Innovation Management
• DDBA 8512 - Seminar in IT for Competitive Advantage

International Business

• DDBA 8510 - Seminar in Global Supply Chain Management
• DDBA 8540 - Seminar in International Finance
• DDBA 8524 - Seminar in Multicultural Management

Leadership

• DDBA 8521 - Seminar in Change Management
- **DDBA 8522 - Seminar in Sustainability**
- **DDBA 8524 - Seminar in Multicultural Management**

**Marketing**

- **DDBA 8533 - Seminar in Marketing Research**
- **DDBA 8531 - Seminar in B2B Marketing**
- **DDBA 8532 - Seminar in Consumer Behavior**

**Project Management**

- **DDBA 8570 - Seminar in Program and Portfolio Management**
- **DDBA 8571 - Seminar in Project Portfolio Performance and Organizational Effectiveness**
- **DDBA 8572 - Seminar in Project-Based Strategic Leadership**

**Social Impact Management**

- **DDBA 8521 - Seminar in Change Management**
- **DDBA 8522 - Seminar in Sustainability**
- **DDBA 8523 - Seminar in Law and Compliance**

**Technology Entrepreneurship**

- **DDBA 8511 - Seminar in Innovation Management**
- **DDBA 8541 - Seminar in Entrepreneurial Finance**
- **DDBA 8512 - Seminar in IT for Competitive Advantage**

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Post-Doctoral Bridge to Business Administration Certificate program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Post-Doctoral Bridge to Management Certificate**

The Post-Doctoral Bridge to Management Certificate program is designed to provide students who hold a doctoral degree in management or a non-management field with core knowledge in a
management discipline outside their previous doctoral studies. Students explore such topics as ethical leadership, information systems management, financial decision making, and performance improvement implementation. This certificate program emphasizes management aspects in a global context and explores relevant trends students can apply in settings that include postsecondary education, research, and consulting.

With the exception of MGMT 8000, any courses used toward the completion of a doctoral program cannot be applied toward the completion of the post-doctoral bridge certificate.

Certificate Requirements

- Hold a recognized terminal degree in a business or non-business field
- 25 total quarter credit hours
- Foundation course (5 cr.)
- Specialization courses (20 sem. cr.)

Curriculum

Foundation Course (5 cr.)
- MGMT 8015 - Gateway to Doctoral Studies

Specialization Courses (20 cr.)
Choose from one of the following five-course specialization sequences:

Leadership and Organizational Change

- MGMT 8410 - Leadership, Influence, and Power
- MGMT 8420 - Challenging Conventional Leadership
- MGMT 8430 - The Changing Face of Leadership—Diverse Perspectives
- MGMT 8440 - The Socially Conscious Leader
- MGMT 8450 - Crafting and Responding to Change

Information Systems Management

- MGMT 8510 - Managing E-Commerce Management Information Systems
- MGMT 8520 - Organizational Performance Improvement
- MGMT 8530 - Managing Projects in Complex Environments
- MGMT 8540 - Systems Analysis, Design, and Implementation
- MGMT 8550 - Security Management and Risk Assessment

Finance

- MGMT 8610 - Financial Decision Making for Individuals and Firms
- MGMT 8620 - Financial Markets: Risk and Return, Capital Structure, and International Dimensions of Finance
- MGMT 8630 - Corporate Financial Management
- MGMT 8640 - Valuation of Assets, Entities, and Opportunities
- MGMT 8650 - Financial Analysis, Planning, and Forecasting
Human Resource Management

- MGMT 8710 - Organizational Behavior and Effective Human Resource Management
- MGMT 8720 - Strategic Thinking for Effective Human Resource Management
- MGMT 8730 - The Development of Human Capital Within Organizations
- MGMT 8740 - The Legal, Ethical, and Cultural Environment of Human Resource Management
- MGMT 8750 - Human Resource Management and Its Role in Labor Relations, Negotiation, and Conflict Resolution

COLLEGE OF SOCIAL AND BEHAVIORAL SCIENCES
OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a C in the graduate-level course but only a grade of B or better will carry over to the graduate program. Students who receive a C grade will be awarded a grade of C*, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not receive a B or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.

3. AIM courses are (5000-level) graduate courses.*
   a. Tuition for these courses is charged at the undergraduate rate.
   b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
   c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a B or better in each course to have that course applied to the master's program.
Students who get lower than a B in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   • Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a B or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note: Graduate students cannot register for AIM courses.

**Undergraduate Minors**

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their academic advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Child Development
- Minor in Communication
- Minor in Criminal Justice
- Minor in Healthcare Management
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Introductory Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health
MASTER’S DEGREE PROGRAMS

M.S. in Addiction Counseling

The focus of the M.S. in Addiction Counseling program is on the skills students need to support people who are dealing with substance abuse and addictive behaviors related to gambling, exercising, technology, and pornography. Coursework provides an overview of history, theories, and trends in the addiction counseling field. Students examine the factors that put individuals at risk for developing addictions, and they study how to treat addictions that may coexist with other mental health issues, such as anxiety, depression, and obsessive-compulsive behavior. By analyzing various diagnostic and assessment tools, students learn best practices for conducting clinical evaluations to identify and address addictive disorders.

Learning Outcomes

Graduates of this program will be prepared to:
1. Develop a professional orientation and identity as a counselor.
2. Effectively address the social and cultural diversity issues that impact the counseling process.
3. Utilize the major counseling theories to develop an empirically based personal theoretical orientation that integrates theory and best practices.
4. Apply theories and models of career development to related life factors which affect an individual's lifestyle and mental health.
5. Utilize major counseling theories to develop an empirically based personal theoretical orientation that integrates theory and best practices.
6. Apply theoretical and experiential principles of group work to develop targeted interventions within group contexts.
7. Evaluate and interpret individual and group assessment in a multicultural society.
8. Utilize research methods commonly used in the counseling profession.
9. Demonstrate skills in applying principles of advocacy toward promoting cultural understanding and positive social change in individuals, communities, and society.
10. Achieve personal growth and sustainability in the profession.

Students will also be able to:
1. Apply sound ethical, legal, and business practices in the work of an addiction counselor.
2. Implement counseling/prevention/intervention services related to addiction counseling.
3. Promote diversity and advocacy as related to addiction counseling.
4. Employ various assessment techniques to appropriately intervene in meeting the needs of diverse addiction clientele.
5. Use evidence-based research literature to inform practice in meeting the needs of diverse addiction clientele.
6. Use diagnostic tools to diagnose addiction and other disorders in diverse clientele.
Note on Requirements to Practice as an Addiction Counselor

Walden University's M.S. in Addiction Counseling program is not accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA) which is a requirement to practice addiction counseling in some states. The M.S. in Addiction Counseling program is designed to prepare graduates to qualify to sit for national and state addiction counseling certification exams, to sit for counseling licensure exams, and to practice as addiction counselors. Because no program can guarantee licensure or certification upon graduation, we encourage students to consult the appropriate agency to determine specific requirements. However, each state board responsible for regulating the practice of addiction counseling has its own academic, licensure, and certification requirements and issues its own credential for an individual to practice as an addiction counselor in that state. Walden enrollment advisors can provide information relating to national and state certification exams and guidance relating to the state-by-state requirements for counseling licensure and practice as an addiction counselor; however, it remains the individual's responsibility to understand, evaluate, and comply with all requirements relating to certification exams and licensing requirements for the state in which he or she intends to practice. Walden makes no representations or guarantee that completion of its coursework or programs will permit an individual to obtain certification or to obtain state licensure, authorization, endorsement, or other state credential.

Degree Requirements

- 90 total credits for General Program (100 cr. with optional 10-credit specialization)
- Foundation course (1 cr.)
- Core courses (80 cr.)

Optional Specialization Courses (10 cr.)

- Field experience (9 cr.: Practicum, 100 hours; Internship, 600 hours)
- Professional development plan, program of study, licensure plan
- 12 days of residency (two 6-day residencies)

Specializations

- General Program
- Addictions and Public Health
- Child and Adolescent Counseling
- Family Studies and Interventions
- Forensic Counseling
- Military Families and Culture
- Trauma and Crisis Counseling

Addictions and Public Health

Students in this specialization gain an understanding of health promotion and its role in creating positive social change in communities. Students focus on developing skills they can apply in agencies that organize culturally and contextually relevant prevention and treatment plans. They can use these plans to address today’s most pressing public health issues concerning addictions and other mental health disorders.

Forensic Counseling

This specialization prepares students to provide addiction counseling and mental health services to individuals and groups served by the legal system. Coursework provides a solid foundation in mental health law and the treatment of forensic populations. Through conceptual and application-based assignments, students gain practical insight into the role that counselors and case management specialists serve in various forensic settings, including juvenile courts, correctional facilities, group rehabilitation homes, and agencies that offer conflict mediation services.

Military Families and Culture

This specialization can prepare students to provide addiction counseling to military personnel and their families. Students examine the nuances of military culture along with the unique stressors inherent to military life, such as the strain of combat, debilitating injuries, and long and painful separations from loved ones. Students in this specialization explore current approaches for working with military personnel, veterans, and their spouses and children and can gain the skills needed to support these individuals through a number of challenges.

**Specialization Courses (10 cr.)**

- COUN 6400 - Military Culture
- COUN 6402 - Working with Military Spouses, Families, and Children

Trauma and Crisis Counseling

With this specialization, students acquire knowledge and techniques in crisis intervention as it relates to families and individuals who are experiencing mental health crises and addictions of varying kinds. Courses in crisis intervention and vicarious trauma explore the most current theories and models for working with adults, children, and adolescents. The specialization prepares students to provide counseling and interventions with individuals, families, suicidal clients, and victims of abuse.

**Specialization Courses (10 cr.)**

- COUN 6333A - Vicarious Trauma and Compassion Fatigue
- COUN 6145A - Crisis Management

**M.S. in Career Counseling**

The M.S. in Career Counseling is designed to prepare students to serve effectively in their roles as career development counselors, specialists, and consultants in a variety of settings including, community agencies, schools, colleges, universities, private practice, business, and government. Students gain the opportunity to use their specialized counseling training to foster the development of individuals and groups around issues of career decision making, career transitions, and career development.

This program responds to an economic climate that calls for professionals who can support and assist clients around issues of initial career decisions and marketability and viability in the
workplace. Students will be able to use their knowledge of human growth and development, career development, counseling theories, and research as well as their clinical training to provide ethical and contextually-relevant career services to diverse populations reflective of individuals' personal and social values.

**Learning Outcomes**

1. At the end of the program, students will be able to:
2. Apply sound ethical, legal, and business practices in the work of a career counselor.
3. Implement counseling/prevention/intervention services related to career counseling.
4. Promote diversity and advocacy as related to career counseling.
5. Employ various assessment techniques to appropriately meet the career-related needs of diverse clientele.
6. Use evidence-based research literature to inform practice in meeting the career-related needs of diverse clientele.
7. Demonstrate the promotion, management, and implementation of career-related services.
8. Disseminate information resources related to career counseling.

Students will also be able to:
1. Develop a professional orientation and identity as a counselor.
2. Effectively address the social and cultural diversity issues that impact the counseling process.
3. Synthesize theories of human growth and development to develop culturally responsive counseling practices.
4. Apply theories and models of career development to related life factors, which affect an individual's lifestyle and mental health.
5. Utilize major counseling theories to develop an empirically based, personal theoretical orientation that integrates theory and best practices.
6. Apply theoretical and experiential principles of group work to develop targeted interventions within group contexts.
7. Evaluate and interpret individual and group assessment in a multicultural society.
8. Utilize research methods commonly used in the counseling profession.
9. Demonstrate skills in applying principles of advocacy toward promoting cultural understanding and positive social change in individuals, communities, and society.
10. Achieve personal growth and sustainability in the profession.

**Professional Accreditation**

The M.S. in Career Counseling is not accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). However, the program was developed to reflect the professional criteria set forth by leading counseling organizations. Since Walden's M.S. in Career Counseling is a new program, the university is not yet able to apply for CACREP accreditation. Students will be notified if the program becomes accredited in the future.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Career Counseling program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Note on Licensure**

The M.S. in Career Counseling is not a licensure program and does not prepare an individual to become a licensed counseling professional.

**M.S. in Marriage, Couple, and Family Counseling**

The M.S. in Marriage, Couple, and Family Counseling program at Walden University is designed to provide students with all the educational competencies and skill development as entry-level professional counselors who specialize in preventing and remediating conflicts or crises in and fostering the development of individuals, marriages, couples, and families and to provide students with the advantage of quality distance education and training. With an emphasis on systems theory and evidence-based practice, the program trains individuals to work in a culturally and contextually appropriate way in a variety of settings, including community agencies, county and state agencies, hospitals, and private practice, and to provide consultation to businesses and agencies.

**Learning Outcomes**

At the end of the program, students will be able to:
1. Engage in ethical and legal practices as a marriage, couple, and family (MCF) counselor.
2. Work successfully with couples and families from multicultural and diverse backgrounds.
3. Promote diversity and advocacy as related to the work of a marriage, couple, and family counselor.
4. Employ various assessment techniques to appropriately intervene in meeting the needs of diverse clientele.
5. Evaluate evidence-based research to inform practice in meeting the needs of couples and families from multicultural and diverse backgrounds.
6. Apply preventive, developmental, and wellness strategies to strengthen couples and family systems.

Students will also be able to:
1. Develop a professional orientation and identity as a counselor.
2. Effectively address the social and cultural diversity issues that impact the counseling process.
3. Synthesize theories of human growth and development to develop culturally responsive counseling practices.
4. Apply theories and models of career development to related life factors, which affect an individual's lifestyle and mental health.
5. Utilize major counseling theories to develop an empirically based, personal theoretical orientation that integrates theory and best practices.

**Note on Licensure**

Walden University’s M.S. in Marriage, Couple, and Family Counseling is not accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) or the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE), specialized accrediting bodies recognized by the Council for Higher Education Accreditation (CHEA), which is a requirement for licensure in some states. The M.S. in Marriage, Couple, and Family Counseling program is designed to prepare graduates to qualify to sit for licensing exams and to meet the academic licensure requirements of many state counseling boards. Because no graduate program can guarantee licensure upon graduation, we encourage students to consult the appropriate agency to determine specific requirements. Walden enrollment advisors can provide guidance on licensure issues; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure or endorsement. For more information about licensure, students should visit the National Board for Certified Counselors at http://www.nbcc.org/stateboardmap and contact the appropriate licensing body. International students are encouraged to identify and contact their appropriate licensing body.

**Professional Accreditation**

The M.S. in Marriage, Couple, and Family Counseling is not accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). However, the program was developed to be in line with CACREP national standards for preparing professional counselors with expertise in working with couples and families. Since Walden’s M.S. in Marriage, Couple, and Family Counseling is a new program, the university is in the process of applying for CACREP accreditation. Students will be notified at such time if the program becomes accredited in the future.
Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Marriage, Couple, and Family Counseling program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Addiction Counseling

In this specialization, students explore the various types of addiction, the multifaceted impact of addictive behavior, and the variety of treatment and intervention models currently employed to address addiction. The focus of the coursework is on preparing students to provide addiction-related counseling to both individuals and families in a number of settings, including schools, businesses, and community agencies.

Specialization Courses (10 cr.)

- COUN 6202 - Theories, Treatment, and Case Management of Addiction
- COUN 6204 - Assessment in Counseling and Addiction

Career Counseling

In addition to exploring the history, theories, and approaches behind career counseling, students in this specialization examine the qualities of an effective career counselor. Various modern approaches to counseling and assessment are also studied. Additionally, students can gain insight into academic and career development from elementary school through higher education and develop the skills necessary to guide youths and adults toward successful vocations.

Specialization Courses (10 cr.)

- COUN 6345 - Career, Consultation, and Assessment
- COUN 6355 - Academic and Career Counseling

Forensic Counseling

The expert advice and skills of forensic counselors are in constant demand within the legal system. Through this specialization, students can build their knowledge of mental health law and enhance their competencies in conflict management and negotiation. Students will also learn how those skills can be applied to resolve marriage and family conflicts in the criminal justice system, from parental mediation services and divorce adjustment counseling for families to court-ordered parenting skills training and anger management sessions.

### Military Families and Culture

This specialization can prepare students to provide essential emotional support to military personnel and their families. Students examine the intricacies of military culture and develop skills essential to helping military personnel and their spouses and children cope with a variety of challenges, including long-term deployments, frequent relocation, and post-traumatic stress disorder (PTSD). Students also study modern approaches for working with active and former military personnel and their families in a counseling context.
**Specialization Courses (10 cr.)**

- COUN 6400 - Military Culture
- COUN 6402 - Working with Military Spouses, Families, and Children

**Trauma and Crisis Counseling**

If traumas or crises are not resolved in healthy ways, the experiences can lead to lasting psychological, social, and medical problems for couples, families, and children. Through this specialization, students will gain the knowledge, skills, and practices specific to crisis counseling, including theories of crisis intervention and models for working with children and adolescents. Students will also learn to help couples and families address health-related, school, and mental health crises, including intervention with suicidal clients and victims of abuse.

M.S. in Clinical Mental Health Counseling

The Master of Science in Clinical Mental Health Counseling program prepares students to identify and address the need for culturally and contextually relevant counseling and social change for individuals, communities, and society.

Learning Outcomes

Through the use of technology, experiential practice, and collaboration, M.S. in Clinical Mental Health Counseling students will be able to:

1. Apply sound ethical, legal, and business practices in the work of a mental health counselor.
2. Implement counseling/prevention/intervention services related to mental health counseling.
3. Promote diversity and advocacy as related to mental health counseling.
4. Employ various assessment techniques to appropriately intervene in meeting the needs of diverse clients.
5. Use evidence-based research literature to inform practice in meeting the needs of diverse clientele.
6. Use diagnostic tools to diagnose disorders in diverse clientele.

Students will also be able to:

1. Develop a professional orientation and identity as a counselor.
2. Effectively address the social and cultural diversity issues that impact the counseling process.
3. Synthesize theories of human growth and development to develop culturally responsive counseling practices.
4. Apply theories and models of career development to related life factors, which affect an individual's lifestyle and mental health.
5. Utilize major counseling theories to develop an empirically based, personal theoretical orientation that integrates theory and best practices.
6. Apply theoretical and experiential principles of group work to develop targeted interventions within group contexts.
7. Evaluate and interpret individual and group assessment in a multicultural society.
8. Utilize research methods commonly used in the counseling profession.
9. Demonstrate skills in applying principles of advocacy toward promoting cultural understanding and positive social change in individuals, communities, and society.
10. Achieve personal growth and sustainability in the profession.

Accreditation
Walden's M.S. in Clinical Mental Health Counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). CACREP accreditation attests to the quality and relevancy of Walden's program—a program that helps provide students with the skills and credibility to maximize their impact on the profession. In addition, earning a degree that is CACREP-accredited helps to streamline the licensing application process and provides students with an advantage when applying to doctoral programs.

Specialization (Optional)
- General Program
- Addiction Counseling
- Career Counseling
- Forensic Counseling
- Military Families and Culture
- Trauma and Crisis

Degree Requirements
- 90 total quarter credit hours for General Program (100 cr. with optional 10-credit specialization)
- Foundation course (1 cr.)
- Core courses (80 cr.)

Optional Specialization Courses (10 cr.)
- Field experience: 100-hour practicum (3 cr.); 600-hour internship (6 cr.)
- 12 days of academic residency (two 6-day residencies)

Core Curriculum (General Program)
The M.S. in Clinical Mental Health Counseling consists of core coursework, a practicum, an internship, two 6-day residencies, and the completion of a capstone or thesis. Core courses must be taken in the order presented. Additional courses may be taken at the end of the program of study to provide breadth and depth of learning.

### Note on Licensure

Walden University's M.S. in Mental Health Counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA), which is a requirement for licensure in many states. The M.S. in Mental Health Counseling program is designed to prepare graduates to qualify to sit for licensing exams and to meet the academic licensure requirements of many state counseling boards. Because no graduate program can guarantee licensure upon graduation, we encourage students to consult the appropriate agency to determine specific requirements. For more information about licensure, students should visit the National Board for Certified Counselors at www.nbcc.org/stateboardmap, the American Association of State Counseling Boards at www.aascb.org, and contact the appropriate licensing body. International students are encouraged to identify and contact their appropriate licensing body.

### Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Mental Health Counseling program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

### Addiction Counseling

In this specialization, students can gain skills to address the unique emotional challenges facing individuals and families affected by addictive behaviors such as compulsive hoarding, substance abuse, or gambling. In addition to examining the various types of addiction, students explore contemporary treatment and intervention models used to promote recovery. This specialization...
can prepare students to provide addiction counseling services to various clients in schools, businesses, community agencies, and other settings.

**Specialization Courses (10 cr.)**
- COUN 6202 - Theories, Treatment, and Case Management of Addiction
- COUN 6204 - Assessment in Counseling and Addiction

**Career Counseling**
This specialization can prepare students to help individuals achieve professional and personal fulfillment. Through their coursework, students explore the history, theories, and methods of career counseling and assessment; the skill set required of an effective career counselor; and the various counseling and assessment techniques used in clinical and organizational settings. Students also examine career counseling approaches that are applicable in academic environments.

**Specialization Courses (10 cr.)**
- COUN 6345 - Career, Consultation, and Assessment
- COUN 6355 - Academic and Career Counseling

**Forensic Counseling**
This specialization prepares graduates to apply their skills in and knowledge of counseling to various forensic populations in need of mental health services. Examples of the various forensic settings would be family courts, drug courts, prisons, juvenile courts, group homes, and agencies offering dispute resolution services. This specialization would be most applicable to the student interested in the delivery of traditional mental health services to populations served by the legal system.

**Specialization Curriculum (10 cr.)**
- COUN 6511 - Treatment of Forensic Populations

Choose one:
- COUN 6912 - Mental Health Law
- COUN 6512 - Juvenile Justice, Delinquency, and Development
- COUN 6742 - Conflict, Conflict Resolution, and Peace

**Military Families and Culture**
In this specialization, students can acquire the advanced skills needed to help families cope with the complex emotional challenges of military life. Students explore the nuances of military culture as well as common hardships associated with the military lifestyle—from prolonged separation and combat-related injuries to post-traumatic stress disorder (PTSD). Students are also
introduced to considerations and best practices for counseling active military personnel, veterans, and their spouses and children.

**Specialization Courses (10 cr.)**
- COUN 6404 - Military Culture
- COUN 6406 - Working with Military Spouses, Families, and Children

**Trauma and Crisis**
If traumas or crises are not resolved in healthy ways, the experiences can lead to lasting psychological, social, and medical problems for couples, families, and children. Through this specialization, students learn the skills and practices specific to crisis counseling, including theories of crisis intervention and models for working with children and adolescents. Students develop the skills needed to help couples and families address health-related, school, and mental health crises, including interventions with suicidal clients and victims of abuse.

**Specialization Curriculum**
- COUN 6333 - Vicarious Trauma and Compassion Fatigue
- COUN 6145 - Crisis Management

**M.S. in School Counseling**
The M.S. in School Counseling program is offered by Walden University, an institution accredited by the National Council for Accreditation of Teacher Education (NCATE). The Master of Science in School Counseling degree is designed to prepare students to serve as certified or licensed school counselors in pre-kindergarten through high school (PreK–12) school settings. The M.S. in School Counseling program will include curricular experiences, residency experiences, and fieldwork experiences all designed to best prepare students to serve as professional school counselors in the field. Walden graduates will be prepared to support PreK–12 students in diverse school settings to be emotionally, socially, and academically successful.

**Learning Outcomes**
After graduating from the M.S. in School Counseling program, students will be able to:
1. Develop a professional orientation as a school counselor.
2. Apply legal and ethical standards and serve as an advocate and agent of social change.
3. Demonstrate multicultural competencies in relation to diversity, equity, and opportunity.
4. Use evidence-based research to inform the development of prevention and intervention strategies in schools.
5. Serve as a leader in the school environment who collaborates and consults with key stakeholders to promote academic success of all students.
6. Work to promote academic success and to close the achievement gap for all students.
7. Demonstrate knowledge and skills in the areas of assessment, and evaluation to develop comprehensive school counseling programs.
Specializations (Optional)

- Addiction Counseling
- Career Counseling
- Crisis and Trauma
- Military Families and Culture

Degree Requirements

General Program Requirements

- Total credits 75 cr.
- Core Courses (66 cr.)
- Practicum—100 hours (3 cr.)
- Internship I—300 hours (3 cr.)
- Internship II—300 hours (3 cr.)
- General Program
- Optional Specialization (10 cr.)
- Optional Accelerated track allows completion in 21 months (three courses per quarter).

Core Curriculum

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in School Counseling program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Career Counseling

In this specialization, students can gain skills to help teens discover their talents and attain their full potentials. In their coursework, students examine the fundamentals of the career counseling profession, including its history, philosophy, and theoretical foundations. Students in this specialization can prepare to help youths make smart decisions about their educations and ensure successful futures.

**Specialization Courses (10 cr.)**

- COUN 6102 - Introduction to Career Counseling
- COUN 6345 - Career, Consultation, and Assessment

Crisis and Trauma

In this specialization, students prepare to assist children, adolescents, and their families in the wake of a crisis or emergency, such as an act of terror or natural disaster. Through the curriculum, students examine the actions and behaviors that follow a disaster, how to address related emotional difficulties, and psychological disorders, such as post-traumatic stress disorder. Students also have the opportunity to learn how to develop a crisis plan to prepare for future emergencies.

**Specialization Courses (10 cr.)**

- COUN 6145 - Crisis Management
- COUN 6333 - Vicarious Trauma and Compassion Fatigue

Addiction Counseling

In this specialization, students gain the skills needed to help children and adolescents cope with the emotional challenges of having a family member who is struggling with addiction. Through their coursework, students explore the various types of addiction, current theories around treatment, and best practices for counseling children and adolescents who are dealing with addictive behavior in the home.

**Specialization Courses (10 cr.)**

- COUN 6103 - Introduction to Addiction
Military Families and Culture

In this specialization, students gain insight into military culture as well as the unique emotional needs of children of active military personnel or veterans. Through their coursework, students explore military culture and the considerations and best practices for working with military spouses, families, and children. Students develop skills to support children and family members through a variety of hardships, from long-term separation to combat-related injuries.

DOCTORAL DEGREE PROGRAMS

Ph.D. in Counselor Education and Supervision

The doctoral program in Counselor Education and Supervision is designed to evaluate the theory and practice of counseling through quantitative and qualitative research and to prepare educators and leaders in the profession of counseling.

Learning Outcomes

Through the use of technology, experiential practice, collaboration, and a culturally and contextually relevant curriculum designed to meet the nationally recommended counseling standards, Counselor Education and Supervision students will be able to:

1. Demonstrate knowledge, skills, and effective practice of clinical supervision.
2. Demonstrate knowledge, skills, and effective practice related to leadership, advocacy, and social change.
3. Demonstrate knowledge and skills related to legal, ethical, and multicultural issues.
4. Demonstrate knowledge, skills, and effective practice related to research and scholarship.
5. Demonstrate advanced knowledge, skills, and effective practice related to professional counseling.
6. Demonstrate knowledge, skills, and effective practice related to effective teaching in counselor education.

Specializations

- General Program
- Advanced Research Methods
- Consultation
- Counseling and Social Change
- Forensic Mental Health Counseling
- Leadership and Program Evaluation
- Trauma and Crisis

Degree Requirements

- 93–98 total quarter credits, depending on the specialization
- Foundation course (1 cr.)
- Core courses (45 cr.)
- Foundation Research Sequence (12 cr.)
• Advanced Research course (4 cr.)

**Elective and/or Specialization Courses (10–15 cr., depending on the specialization)**

• Field experience courses (9 cr.)
• Proposal, dissertation, and oral presentation (12 cr.)
• Professional Development Plan and program of study (included in COUN 8001)
• Minimum 11 quarters enrollment, depending on the transfer of credit
• 20 days of residency

**Core Curriculum**

**Foundation Course (1 cr.)**

• COUN 8001 - Foundations of Graduate Study in Counselor Education and Supervision

**Core Courses (45 cr.)**

• COUN 8110 - Professional Orientation, Ethics, and Identity
• COUN 8125 - Teaching in Counselor Education
• COUN 8115 - Advanced Counseling Theories
• COUN 8203 - Survey Research Methods
• COUN 8135 - Clinical Supervision
• COUN 8120 - Professional Consultation, Program Evaluation, and Leadership
• COUN 8146 - Crisis Management
• COUN 8551 - Preparing for Dissertation
• COUN 8660 - Social Change, Leadership, and Advocacy for Counseling Professionals

**Foundation Research Sequence (12 cr.)**

Courses composing the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8101 must be completed during the second term and is linked to Residency 2 of the academic residencies. RSCH 8201 and RSCH 8301 must be completed prior to registering for the dissertation. Students are required to complete their first residency before enrolling in RSCH 8101.

• RSCH 8101 - Research Theory, Design, and Methods
• RSCH 8201 - Quantitative Reasoning and Analysis
• RSCH 8301 - Qualitative Reasoning and Analysis

**Advanced Research Course (4 cr.)**

All Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements. One of the following three courses is required:

• RSCH 8251 - Advanced Quantitative Reasoning and Analysis
Field Experience Courses (9 cr.)

- COUN 8890 - Doctoral Practicum
- COUN 8895 - Doctoral Internship A
- COUN 8896 - Doctoral Internship B

Dissertation (12 cr.)

- COUN 8560 - Dissertation

**Timing of Residencies**

Residency 1: Within the first two semesters of program
Residency 2: After completion of COUN 8125 and RSCH 8100
Residency 3: After completion of COUN 8135, RSCH 8200, and RSCH 8300

*Students take 2 or 3 Specialization Courses, depending on the specialization chosen.*

**Prerequisites for Counselor Education and Supervision**

Students accepted into Walden University’s Ph.D. in Counselor Education and Supervision program who have not graduated from a CACREP-accredited or CACREP-equivalent master’s program are required to demonstrate curricular experiences equivalent of CACREP entry-level standards and curricular requirements of a specific program area. To fulfill these requirements, students will complete the following courses prior to beginning doctoral-level counselor education coursework:

**Prerequisites**

- COUN 8215 - Lifespan Development
- COUN 8723 - Multicultural Counseling
- COUN 8316 - Techniques of Counseling
- COUN 8722 - Counseling and Psychotherapy Theories
- COUN 8250 - Group Process and Dynamics
- COUN 8753 - Vocational Psychology and Counseling
- COUN 8360 - Assessment in Counseling and Education
- COUN 8326 - Research and Program Evaluation
- COUN 8320 - Counseling Practicum
- COUN 8682 - Counseling Internship

Choose one of the following two courses to complete the core requirement:

- COUN 8726 - Couples and Family Counseling
- COUN 8728 - Substance Abuse Counseling
**Accreditation**

Walden University's Ph.D. in Counselor Education and Supervision; M.S. in Marriage, Couple, and Family Counseling; and M.S. in Mental Health Counseling programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA), which is a requirement for licensure in many states.

**Note on Licensure**

The Ph.D. in Counselor Education and Supervision is not a licensure program and does not prepare an individual to become a licensed counseling professional.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Counselor Education and Supervision program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**General Program**

This specialization prepares graduates for various roles related to counseling, research, teaching, leadership, and supervision. Graduates will be able to effectively evaluate theory and practice of counseling through quantitative and qualitative research and use it effectively as counselor educators and scholar-practitioners. This specialization gives students the opportunity to complete two electives, allowing them diversity of knowledge.

**Specialization Courses (10 cr.)**

Students choose two electives from any COUN-prefix course at Walden.

**Advanced Research Methods**

Designed for students interested in serving as methodologists and conducting research as counselor educators or supervisors, this specialization introduces the various research methodologies used in the field. Through their coursework, students focus on developing critical competencies in quantitative, qualitative, and mixed-methods approaches used in social science research. Students also have the opportunity to apply their knowledge and skills by developing qualitative, quantitative, and mixed-methods research plans.

**Specialization Courses (8 cr.)**

Select two courses from this list to add to the previously chosen advanced course option:

- RSCH 8251 - Advanced Quantitative Reasoning and Analysis
- RSCH 8351 - Advanced Qualitative Reasoning and Analysis
- RSCH 8451 - Advanced Mixed-Methods Reasoning and Analysis
Consultation

This specialization prepares graduates for various roles related to consultation. Graduates will be able to effectively apply consultation skills designed to improve individual, group, and organizational performance. The specialization is most applicable to graduates interested in providing consultation in schools, mental health agencies, universities, and business and industry.

Specialization Courses (10 cr.)
- COUN 8671 - Consulting for Organizational Change
- COUN 8672 - Psychological Consultation

Counseling and Social Change

In this specialization, students have the opportunity to develop their capabilities as professional advocates for social change. Through their coursework, students explore the theories of social and personal change and the effect of these theories on children, families, and society. Through a variety of practical learning assignments, students can address real-world topics, such as gender inequality, and propose solutions designed to drive transformative social change.

Specialization Courses (10 cr.)
- COUN 8140 - Professional Counselor as Scholar-Practitioner
- COUN 8662 - Psychology and Social Change

Forensic Mental Health Counseling

This specialization is designed for students interested in pursuing practitioner, leader, or educator roles within the legal and criminal justice systems. Through their coursework, students explore the various assessment tools and techniques used in forensic psychology and how research findings can be applied to forensic clinical settings. Students are also introduced to the history, theories, and approaches of program evaluation and how to choose the most appropriate research models to perform evaluations. The Forensic Mental Health Counseling specialization can prepare students to work in family courts, drug courts, group homes, and agencies that offer dispute resolution.

Specialization Courses (15 cr.)
- COUN 8116 - Understanding Forensic Psychology
- COUN 8126 - Assessment in Forensic Psychology
- COUN 8317 - Program Evaluation

Trauma and Crisis

This specialization is for students who are licensed professional counselors with a master's degree in counseling or who have graduated from a CACREP-accredited master's program.* Students will apply theory and best practices related to trauma and crisis management, working
with individuals and groups recovering from the effects of trauma and crisis, such as natural disasters, violence, terrorism, or war. Students will broaden their understanding of the models, leadership roles, and effective strategies to respond to crises as counseling leaders or managers. They also learn the appropriate ethical and legal responses to individual, community, national, and international crises.

*Learn more about completion requirements for students who are not licensed professional counselors with a master's degree in counseling or who have not graduated from a CACREP-accredited master's program.

**Specialization Courses (10 cr.)**
- COUN 8333 - Vicarious Trauma and Compassion Fatigue♦
- COUN 8336 - Crisis, Trauma, and Disaster Response

**Leadership and Program Evaluation**

This focus of this specialization is on helping students build leadership skills as counseling educators and supervisors. Through their coursework, students explore the qualities inherent in qualified leaders as well as strategies for leading diverse organizations through major change initiatives. Students are introduced to the specific skills required for assessing research. They also explore the history, theory, and approaches of program evaluation. Students in this specialization can prepare to serve organizations directly as program leaders, researchers, educators, counselors, supervisors, consultants, volunteers, or board members.

**Specialization Courses (10 cr.)**
- COUN 8111 - Leadership and Organizational Change
- COUN 8317 - Program Evaluation♦
BACHELOR’S DEGREE PROGRAMS

B.S. in Forensic Psychology

The B.S. in Forensic Psychology program provides a broad background in general psychology with an additional strong foundation aimed specifically at forensic psychology. To further the students' opportunities, four concentrations are offered. Graduates of the program will be prepared to work effectively and ethically with diverse populations (victims, criminals, families, children, adults, etc.) in a wide range of settings (government, courts, business, community, and correctional institutions).

Learning Outcomes

At the end of this course, students will be able to:
1. Describe current issues, problems, and trends in the field of forensic psychology.
2. Apply basic research methods in psychology, including research design, data analysis, and interpretation.
3. Use forensic assessment strategies, including interviews and observations, to solve problems related to forensic psychology.
4. Apply psychological theory and research to provide successful interventions for personal, social, and organizational issues in the realm of forensic psychology.
5. Describe the role of ethical behavior in promoting social change in a variety of settings.
6. Demonstrate the ability to use guidelines and standards of the profession to communicate information about psychological processes in various forensic settings.
7. Discuss the importance of diversity and multicultural issues when evaluating and intervening with forensic psychology populations.
8. Develop a strategy for personal and career development in the field of forensic psychology.

Note on Licensure

The M.S. in Forensic Psychology is not a licensure program and does not prepare an individual to become a licensed psychology professional.

Concentrations

- Forensics and the Law
- Victims and Justice
- Leadership and Management
- Self-Designed
Degree Requirements

- 181 total quarter credits
- General education courses (46 cr.)
- Core courses (50 cr.)
- Concentration courses (15 cr.)
- Elective courses (65 cr.)
- Capstone course (5 cr.)

Core Curriculum

General Education Courses (46 cr.)
See the General Education section of this Walden University Catalog.
Note: At least three general education courses taken must be taken at the 3000 level or higher, including SOCI 4080.

Core Courses (50 cr.)

- PSYC 2001 - Cross-Cultural Psychology
- PSYC 2002 - Human Development: Childhood and Adolescence
- OR
- PSYC 2003 - Human Development: Adulthood
- PSYC 2005 - Social Influences on Behavior
- PSYC 2009 - Theories of Personality
- PSYC 3003 - Methods in Psychological Inquiry
- PSYC 3004 - Psychological Disorders
- FPSY 2009 - Personality
- FPSY 2101 - Introduction to Forensic Psychology
- CRJS 4102 - The Criminal Mind
- FPSY 4111 - Forensic Interviewing and Investigation
- FPSY 4112 - Forensic Assessment

Elective Courses (65 cr.)
Students are to select 13 additional courses to fulfill the elective requirement. Students may choose courses from either general education courses, B.S. in Forensic Psychology concentration courses, or courses from any of Walden's bachelor's degree programs. At least four (20 cr.) elective courses must be at the 3000 level or above. These 65 credits of electives are in addition to the five-credit general education elective. Students may also be eligible to transfer previous credit to meet their elective requirements.
Note: Electives can also be used to complete a six-course minor. RN-BSN courses are not available to students outside the RN-BSN program.

Capstone Course

- FPSY 4920 - Capstone
**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Forensic Psychology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Forensics and the Law**

**Concentration Curriculum (15 cr.)**

- CRJS 2003 - Criminal Law
- CRJS 3002 - Courts and Judicial Process

- PSPA 3020 - Principles of Public Personnel Management and Human Resources
- PSPA 3040 - Global Social Justice
- PSYC 3009 - Psychology of Leadership
B.S. in Psychology

The Walden University Bachelor of Science in Psychology program provides students with a broad understanding and global perspective of psychology and its relevance in an increasingly diverse and global society. Students will apply psychological theories and methodology to current issues in psychology as they gain perspective in social awareness, responsibility, civic engagement, cross-cultural competence, and evidence-based decision-making in an information-rich world.

Students participate in courses that stimulate critical thinking through the use of applied learning methods that facilitate applications of psychological theories, principles, and methodology to the solution of contemporary personal, interpersonal, and societal problems. The scientific nature of psychology is embedded throughout the program. The program of study provides maximum flexibility as students meet Walden University general education, major, and elective requirements.

Learning Outcomes

At the end of this course, students will be able to:

1. Demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.
2. Understand and apply basic research methods in psychology, including research design and data analysis and interpretation.
3. Respect and use critical and creative thinking, skeptical inquiry, and, when possible, a scientific approach to solve problems related to behavior and mental processes.
4. Understand and apply psychological principles to personal, social, and organizational issues.
5. Tolerate ambiguity, act ethically, and reflect other values that are the underpinnings of psychology as a science serving a global society.
6. Apply cultural competencies to effective and sensitive interactions with people from diverse backgrounds and cultural perspectives.

Concentrations

- Addiction
- Applied Psychology
- Child and Adolescent Development
- Criminal Justice
- General Psychology
- Human Services
- Infant and Toddler Development
- Preparation for Graduate Studies
- Preschool Child Development
- Workplace Psychology
Degree Requirements

- 181 total quarter credit hours
- General education courses (46 cr.)
- Core courses (35 cr.)
- Concentration courses (25–35 cr., depending on concentration)
- Psychology elective courses (10–20 cr., depending on concentration)
- Elective courses (45–70 cr., depending on concentration)

Core Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Core Courses (35 cr.)

- PSYC 1002 - Psychology as a Natural Science
- PSYC 1003 - Psychology as a Social Science
- PSYC 2001 - Cross-Cultural Psychology
- PSYC 2009 - Theories of Personality
- PSYC 3002 - Data Analysis and Presentation
- PSYC 3003 - Methods in Psychological Inquiry
- PSYC 4010 - Capstone: Professional Issues and Ethics in Psychology

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Psychology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

General Psychology

In this concentration, students will gain a solid foundation and knowledge of psychological principles and practices that relate to many different occupations. The curriculum helps students build on the ability to relate to all types of people, while increasing understanding of life in a complex world.
Concentration Curriculum

Concentration Courses (25 cr.)
For the General Psychology concentration, choose any five courses from B.S. in Psychology concentrations in Applied Psychology, Workplace Psychology, and Preparation for Graduate Studies.

Psychology Elective Courses (10 cr.)
Choose two of the four courses listed below or any two 3000-level, 4000-level, or 5000-level courses in the School of Psychology.
- PSYC 3005 - Racial and Ethnic Identities
- PSYC 3006 - Psychology of Gender
- PSYC 3007 - Influence and Persuasion
- PSYC 4006 - Global Perspectives in Psychology

Elective Courses (65 cr.)
Choose 13 courses from General Education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor.

Addiction
Addiction can take many forms. Individuals today are coping with addictions to a variety of substances and activities, including alcohol, drugs, gambling, pornography, shopping, and self-injury. Managing addiction involves more than just identifying available treatment options. Uncovering the internal and external behaviors that cause these disorders is critical to helping individuals who suffer from them.
Through the Addiction concentration, students can explore current theories about what causes individuals to develop addictive behavior and what can be done to prevent it. They focus on substance abuse education, study prevention and treatment methods, and discover the factors that put some people at a higher risk of addiction. This concentration can also help students earn some of the hours they need to pursue an addiction counselor certification.

Concentration Curriculum

Concentration Courses (35 cr.)
- PSYC 2003 - Human Development: Adulthood
- PSYC 2008 - Learning
- PSYC 2006 - Introduction to Addiction
- PSYC 3011 - Addictions Assessment
- PSYC 3012 - Prevention and Treatment of Addictions
- PSYC 4002 - Brain and Behavior
• PSYC 4003 - Case Management and Addictions

**Psychology Elective Courses (20 cr.)**
Choose all four courses listed below or any four 3000-level, 4000-level, or 5000-level courses in the School of Psychology.

- PSYC 3005 - Racial and Ethnic Identities
- PSYC 3006 - Psychology of Gender
- PSYC 3007 - Influence and Persuasion
- PSYC 4006 - Global Perspectives in Psychology

**Electives Courses (45 cr.)**
Choose nine courses from general education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should total 45 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Applied Psychology**
For individuals in the helping professions who want to gain knowledge in psychology or help prepare themselves for an advanced degree, the Applied Psychology concentration provides a foundation. Students will learn about psychological development at all stages of life, study the most common psychological disorders and keys to effective diagnoses, and improve their abilities in research, statistics, and data analysis.

**Concentration Curriculum**

**Electives (65 cr.)**
Choose 13 courses from general education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Concentration Courses (25 cr.)**

- PSYC 2002 - Human Development: Childhood and Adolescence
- PSYC 2003 - Human Development: Adulthood
- PSYC 3004 - Psychological Disorders

Choose two:

- PSYC 2007 - Adjustment in the 21st Century
- PSYC 2008 - Learning
- PSYC 4001 - Cultural Perspectives in Health Psychology
• PSYC 4002 - Brain and Behavior♦

**Psychology Elective Courses (10 cr.)**
Choose two of the four courses listed below or any two 3000-level, 4000-level, or 5000-level courses in the School of Psychology.
- PSYC 3005 - Racial and Ethnic Identities♦
- PSYC 3006 - Psychology of Gender♦
- PSYC 3007 - Influence and Persuasion♦
- PSYC 4006 - Global Perspectives in Psychology♦

**Child and Adolescent Development**
Every day, children and adolescents deal with tough situations that can have a critical impact on their lives and development. This age group often faces serious issues, such as bullying, drug and alcohol abuse, eating disorders, strained relationships with parents, and school pressures. The Child and Adolescent Development concentration explores the cognitive, physical, and socioemotional development of school-age children and adolescents. By focusing on childhood and adolescence in psychology, students can learn strategies for working with these age groups in a variety of settings to address the challenging issues they face today.

**Concentration Curriculum**

**Concentration Courses (35 cr.)**
- PSYC 2002 - Human Development: Childhood and Adolescence♦
- PSYC 2005 - Social Influences on Behavior♦
- PSYC 2008 - Learning♦
- EDUC 3301 - School-Age and Adolescent Development♦
- EDUC 3303 - Motivating and Guiding School-Age Children and Adolescents♦
- EDUC 4303 - Trends and Issues in School-Age Children♦
- EDUC 4304 - Trends and Issues in Adolescence♦

**Psychology Elective Courses (20 cr.)**
Choose all four courses listed below or any four 3000-level, 4000-level, or 5000-level courses in the School of Psychology.
- PSYC 3005 - Racial and Ethnic Identities♦
- PSYC 3006 - Psychology of Gender♦
- PSYC 3007 - Influence and Persuasion♦
- PSYC 4006 - Global Perspectives in Psychology♦

**Elective Courses (45 cr.)**
Choose nine courses from general education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should total 45 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.
Criminal Justice

Through the Criminal Justice concentration, students will explore the criminal mind and theories of criminal behavior from the serial killer to the terrorist. They will learn the cognitive, behavioral and psychological explanations of criminal behavior. Students will also discover and analyze the types of victimization and how to work with victims of crime.

Concentration Curriculum

Concentration Courses (35 cr.)

- PSYC 2002 - Human Development: Childhood and Adolescence
- PSYC 2005 - Social Influences on Behavior
- PSYC 3004 - Psychological Disorders

Choose four:

- CRJS 2001 - Criminology and Social Control
- CRJS 3010 - Profiling Serial and Mass Murderers
- CRJS 4102 - The Criminal Mind
- CRJS 4201 - Restorative Justice
- CRJS 4202 - Mobilizing and Coordinating Community Response
- CRJS 4203 - Victimology

Psychology Elective Courses (20 cr.)

- PSYC 3005 - Racial and Ethnic Identities
- PSYC 3006 - Psychology of Gender
- PSYC 3007 - Influence and Persuasion
- PSYC 4006 - Global Perspectives in Psychology

Elective Courses (45 cr.)

Choose nine courses from general education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should total 45 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor.

Human Services

The focus of the Human Services concentration is on building the skills that students need to create meaningful and positive changes in their communities. By understanding and applying the latest psychological principles and research findings, students learn ways to address many of the challenges—including poverty, drug addiction, and domestic violence—facing individuals today. Students have an opportunity to learn how to work effectively with families, social services agencies, and nonprofit organizations to implement solutions that improve the quality of life for
others. Through their coursework, students examine best practices for crisis intervention, conflict mediation, and case management. This concentration prepares students for settings that promote the well-being of individuals and serve clients through advocacy and policymaking.

**Concentration Curriculum**

**Concentration Courses (35 cr.)**

- PSYC 4008 - Intergroup Conflict and Peace Building
- CRJS 4302 - Critical Incidents and Cross-Agency Coordination
- CRJS 4402 - Planning and Budgeting
- IDST 2050 - Interdisciplinary Experience: Sustaining Quality of Life in the City
- PSYC 2010 - Introduction to Human Services
- PSYC 3010 - Crisis and Intervention

**Choose one:**

- PSYC 2002 - Human Development: Childhood and Adolescence
- PSYC 2003 - Human Development: Adulthood

**Psychology Elective Courses (20 cr.)**

Choose all four courses listed below or any four 3000-level, 4000-level, or 5000-level courses in the School of Psychology.

- PSYC 3005 - Racial and Ethnic Identities
- PSYC 3006 - Psychology of Gender
- PSYC 3007 - Influence and Persuasion
- PSYC 4006 - Global Perspectives in Psychology

**Electives (45 cr.)**

Choose nine courses from general education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should total 45 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Infant and Toddler Development**

The Infant and Toddler Development concentration examines the development of infants and the importance of quality relationships to their emotional and social well being. Students will learn to assess developmental delays at an early age and identify treatment alternatives. And they will explore healthy living and learning environments that foster infant/toddler growth socially, emotionally, cognitively and physically.
Concentration Curriculum

Concentration Courses (35 cr.)

- PSYC 2002 - Human Development: Childhood and Adolescence
- PSYC 2005 - Social Influences on Behavior
- PSYC 2008 - Learning
- EDUC 3203 - Infant/Toddler Mental Health
- EDUC 3204 - Family Cultures of Infants and Toddlers
- EDUC 4205 - Developmentally Appropriate Practices in Infant Settings
- EDUC 4206 - Developmentally Appropriate Practices in Toddler Settings

Psychology Elective Courses (20 cr.)

Choose all four courses listed below or any four 3000-level, 4000-level, or 5000-level courses in the School of Psychology.

- PSYC 3005 - Racial and Ethnic Identities
- PSYC 3006 - Psychology of Gender
- PSYC 3007 - Influence and Persuasion
- PSYC 4006 - Global Perspectives in Psychology

Electives (45 cr.)

Choose nine courses from general education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should total 45 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. *Note on Minors:* Electives can also be used to complete a six-course minor.

Preschool Child Development

The Preschool Child Development concentration explores the cognitive, language, social, emotional and physical development of the preschool child. Students will observe and assess the learning needs of preschool children. They will learn to foster and enhance child development and identify best practices for playing and learning. And they will acquire the skills to work collaboratively with families.

Concentration Curriculum

Concentration Courses (35 cr.)

- PSYC 2002 - Human Development: Childhood and Adolescence
- PSYC 2005 - Social Influences on Behavior
- PSYC 2008 - Learning
- EDUC 3003 - Observation and Assessment of the Young Child
- EDUC 3103 - Guiding Young Children's Behavior
- EDUC 4004 - Children With Special Needs
- EDUC 4102 - Play and Learning for the Preschool Child
Psychology Elective Courses (20 cr.)
Choose all four courses listed below or any four 3000-level, 4000-level, or 5000-level courses in the School of Psychology.

- PSYC 3005 - Racial and Ethnic Identities
- PSYC 3006 - Psychology of Gender
- PSYC 3007 - Influence and Persuasion
- PSYC 4006 - Global Perspectives in Psychology

Electives (45 cr.)
Choose nine courses from general education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should total 45 to meet the program requirements. Statements may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor.

Preparation for Graduate Studies
For students who are considering an advanced degree in psychology in the future, the Preparation for Graduate Studies concentration can help with preparations now. Students will expand their knowledge across all major areas from human development to professional ethics. They will learn to conduct research, analyze data, and present their findings. Students will also increase their understanding of what influences social behavior as they develop the quantitative and qualitative analytical skills needed for graduate study.

Concentration Curriculum

Concentration Courses (25 cr.)

- PSYC 2002 - Human Development: Childhood and Adolescence
- PSYC 2003 - Human Development: Adulthood
- PSYC 2005 - Social Influences on Behavior
- PSYC 4002 - Brain and Behavior
- PSYC 4007 - Judgment, Choice, and Decision Making

Psychology Elective Courses (10 cr.)
Choose two of the four courses listed below or any two 3000-level, 4000-level, or 5000-level courses in the School of Psychology.

- PSYC 3005 - Racial and Ethnic Identities
- PSYC 3006 - Psychology of Gender
- PSYC 3007 - Influence and Persuasion
- PSYC 4006 - Global Perspectives in Psychology

Electives (65 cr.)
Choose 13 courses from general education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should
total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

**Workplace Psychology**

For individuals who want to apply knowledge of psychology in a nonprofit, government, or business environment, the Workplace Psychology concentration provides students with an opportunity to handle all types of work situations as they identify various influences on behavior. Students can learn the basic principles of decision making and factors that affect it. They can also apply principles of conflict management and peace building as solutions for individual and group issues.

**Concentration Curriculum**

**Concentration Courses (25 cr.)**

- PSYC 2005 - Social Influences on Behavior♦
- PSYC 4007 - Judgment, Choice, and Decision Making♦
- PSYC 4008 - Intergroup Conflict and Peace Building♦

Choose two:

- PSYC 2004 - Motivation and Emotion♦
- PSYC 2008 - Learning♦
- PSYC 3009 - Psychology of Leadership♦
- PSYC 4001 - Cultural Perspectives in Health Psychology♦

**Psychology Elective Courses (10 cr.)**

Choose two of the four courses listed below or any two 3000-level, 4000-level, or 5000-level courses in the School of Psychology.

- PSYC 3005 - Racial and Ethnic Identities♦
- PSYC 3006 - Psychology of Gender♦
- PSYC 3007 - Influence and Persuasion♦
- PSYC 4006 - Global Perspectives in Psychology♦

**Electives (65 cr.)**

Choose 13 courses from general education, B.S. in Psychology, or other Walden bachelor's degree programs. At least four courses must be at the 3000–4000 level. Elective credits should total 65 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.
OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a C in the graduate-level course but only a grade of B or better will carry over to the graduate program. Students who receive a C grade will be awarded a grade of C*, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not receive a B or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.

3. AIM courses are (5000-level) graduate courses.*
   a. Tuition for these courses is charged at the undergraduate rate.
   b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
   c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a B or better in each course to have that course applied to the master's program.
- Students who get lower than a B in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   - Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an *Intent to Graduate* form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a *B* or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note:* Graduate students cannot register for AIM courses.

### School of Health Sciences

#### Master of Public Health (MPH)

*Students may select any or all of these courses. Individual course prerequisites apply. It is recommended that students complete PUBH 5101 prior to enrolling in any other MPH courses.*

*Note:* These courses are 11 weeks in length.

- PUBH 5101 - Principles of Communication in Public Health
- PUBH 5002 - Essentials of Public Health: A Case Study Approach
- PUBH 5115 - Social, Behavioral, and Cultural Factors in Public Health
- PUBH 5165 - Environmental Health
- PUBH 5235 - Program Design, Planning, and Evaluation
- PUBH 5175 - Health Policy and Management

#### Master of Healthcare Administration (MHA)

*Students may select any or all of these courses. Individual course prerequisites apply.*

*Note:* These courses are 8 weeks in length.

- MMHA 5015 - Foundations of Healthcare Administration
- MMHA 5100 - U.S. Healthcare Delivery System
- MMHA 5135 - Health Policy and Economics
- MMHA 5205 - Health Law and Ethics

### School of Nursing

#### Master of Science in Nursing (MSN)

*Note:* These courses are 11 weeks in length.

- NURS 5050 - Policy and Advocacy for Improving Population Health
- NURS 5051 - Transforming Nursing and Healthcare Through Technology
- NURS 5052 - Essentials of Evidence-Based Practice

Students must be admitted to the RN-BSN-MSN track to complete these AIM courses.

### College of Social and Behavioral Sciences

#### School of Public Policy and Administration

#### Master of Public Administration (MPA)

*Students may select up to five of these courses. Individual course prerequisites apply.*

*Note:* These courses are 11 weeks in length.

- MMPA 5200 - Introduction to Public Administration
- MMPA 5405 - Ethics and Social Justice
| Master of Public Policy (MPP) | • MMPP 5280 - Policy and Politics in American Political Institutions  
• MMPP 5405 - Ethics and Social Justice  
• MMPP 5111 - Leadership and Organizational Change |

### M.S. in Addiction Counseling

These courses are open only to students enrolled in the B.S. in Human Services Addictions concentration or the B.S. in Psychology Addictions concentration. Students may select any or all of these courses. Individual course prerequisites apply.

**Note:** These courses are 11 weeks in length.

- HUMN 5722 - Counseling and Psychotherapy Theories♦
- HUMN 5316 - Techniques of Counseling♦
- HUMN 5723 - Multicultural Counseling♦
- HUMN 5103 - Introduction to Addiction
- HUMN 5204 - Assessment in Counseling and Addiction
- HUMN 5202 - Theories, Treatment, and Case Management of Addiction
- HUMN 5203 - Psychopharmacology and Biopsychosocial Considerations
- HUMN 5215 - Lifespan Development♦

### Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their academic advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Child Development
- Minor in Communication
- Minor in Criminal Justice
- Minor in Healthcare Management
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Introductory Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health
**Minor in Forensic Psychology**

With this minor, students can gain knowledge and skills regarding psychological assessments in court, issues of criminal responsibility, criminal profiling, predicting dangerousness, eyewitness testimony, jury processes, and decision making. Students also explore the use of psychological knowledge in prisons and the psychology of criminal behavior. The courses in this undergraduate minor cover the basic procedures for interviewing both witnesses and suspects and how to select appropriate assessment instruments used in the field of forensic psychology with children and adults.

*Note:* This minor is open to all bachelor's degree students except those enrolled in the B.S. in Forensic Psychology program.

**Required Courses (15 credits)**

Minor in Psychology

The Undergraduate Minor in Psychology is for the non-psychology major student who wants a broad understanding and global perspective of psychology and its relevance in an increasingly diverse and global society. Students will apply psychological theories to current issues in psychology as they gain perspective in social awareness, responsibility, civic engagement, cross-cultural competence, and evidence-based decision making in an information-rich world.

**Note:** This minor is not available to students in the B.S. in Forensic Psychology or B.S. in Psychology programs.

**Required (30 cr.)**

- PSYC 1001 - Introduction to Psychology♦
- PSYC 3002 - Data Analysis and Presentation♦

*And students choose four of the following:*
- PSYC 2002 - Human Development: Childhood and Adolescence♦
- PSYC 2005 - Social Influences on Behavior♦
- PSYC 2009 - Theories of Personality♦
- PSYC 3004 - Psychological Disorders♦
- PSYC 3005 - Racial and Ethnic Identities♦
- PSYC 3006 - Psychology of Gender♦
- PSYC 3007 - Influence and Persuasion♦
- PSYC 4001 - Cultural Perspectives in Health Psychology♦
- PSYC 4002 - Brain and Behavior♦
- PSYC 4007 - Judgment, Choice, and Decision Making♦
- PSYC 4006 - Global Perspectives in Psychology♦
- PSYC 4008 - Intergroup Conflict and Peace Building♦

Articulations

**B.S. in Forensic Psychology to M.S. in Criminal Justice Articulation**

Walden University's advanced undergraduate psychology students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's M.S. in Criminal Justice or M.S. in Criminal Justice Leadership and Executive Management.
Requirements

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.
- The student must have completed all general education and core requirements of the Bachelor of Science in Forensic Psychology.

*Note:* Students are advised to consult the Walden University Student Handbook and contact a member of the Academic Advising Team for more information regarding the Accelerate Into Master's (AIM) program.

Curriculum

All graduate courses are taken as electives and must be selected from the list below. *Note:* The courses outlined in the Accelerate into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to five of the following courses for the M.S. in Criminal Justice program in specific specializations:

- CRJS 5136 - The Nature of Crime and Criminology
- CRJS 5215 - Controversies in Criminal Justice
- CRJS 5511 - Special Populations
- CRJS 5217 - Technological Solutions and 21st-Century Crime
- CRJS 5203 - Victimology

Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master's courses and who are graduating (or have graduated) from the B.S. in Forensic Psychology program, are invited to apply to the M.S. in Criminal Justice program. Upon acceptance to Walden's M.S. in Criminal Justice program, up to five courses can be applied to degree completion requirements.

- CRJS 6136 - Criminal Behavior Students who successfully complete CRJS 5136 - Criminal Behavior (5 cr.) with a B or better can have this course waived.
- CRJS 6215 - Controversies in Criminal Justice Students who successfully complete CRJS 5215 - Controversies in Criminal Justice (5 cr.) with a B or better can have this course waived.
- CRJS 6420 - Organizational Management and Leadership Required
- CRJS 6216 - Criminal Justice Research Required
- CRJS 6405 - Ethics and Social Justice Required
- CRJS 6511 - Special Populations Required
- CRJS 6217 - Technological Solutions and 21st-Century Crime Students who successfully complete CRJS 5217 - Technological Solutions and 21st-Century Crime (5 cr.) with a B or better can have this course waived.
- CRJS 6203 - Victimology Required
- CRJS 6218 - Applied Communications Required
B.S. in Forensic Psychology to M.S. in Criminal Justice Leadership and Executive Management Articulation

Walden University's advanced undergraduate psychology students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's M.S. in Criminal Justice Leadership and Executive Management.

Requirements

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.
- The student must have completed all general education and core requirements of the Bachelor of Science in Forensic Psychology.

Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Academic Advising Team for more information regarding the Accelerate Into Master's (AIM) program.

Curriculum

All graduate courses are taken as electives and must be selected from the list below.

Note: The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to five of the following courses for the M.S. in Criminal Justice Leadership and Executive Management program in specific specializations:

- CRJS 5136 - The Nature of Crime and Criminology
- CRJS 5215 - Controversies in Criminal Justice
- CRJS 5511 - Special Populations
- CRJS 5217 - Technological Solutions and 21st-Century Crime
- CRJS 5203 - Victimology

Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master's courses and who are graduating (or have graduated) from the B.S. in Forensic Psychology program, are invited to apply to the M.S. in Criminal Justice Leadership and Executive Management program. Upon acceptance to Walden's M.S. Criminal Justice Leadership and Executive Management program, up to five courses can be applied to degree completion requirements.

- CRJS 6136 - Criminal Behavior Students who successfully complete CRJS 5136 - Criminal Behavior (5 cr.) with a B or better can have this course waived.
- CRJS 6215 - Controversies in Criminal Justice Students who successfully complete CRJS 5215 - Controversies in Criminal Justice (5 cr.) with a B or better can have this course waived.
- CRJS 6216 - Criminal Justice Research Required
- CRJS 6405 - Ethics and Social Justice Required
- CRJS 6511 - Special Populations Required
• CRJS 6217 - Technological Solutions and 21st-Century Crime♦ Students who successfully complete CRJS 5217 - Technological Solutions and 21st-Century Crime (5 cr.) with a B or better can have this course waived.
• CRJS 6203 - Victimology Required
• CRJS 6218 - Applied Communications Required

B.S. in Forensic Psychology to M.S. in Forensic Psychology Articulation

Walden University's advanced undergraduate psychology students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's M.S. in Forensic Psychology.

Requirements

To help ensure student success, the following requirements have been established:

• The student must be in good standing with the university.
• The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.
• The student must have completed all general education and core requirements of the Bachelor of Science in Forensic Psychology.

Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Academic Advising Team for more information regarding the Accelerate Into Master's (AIM) program.

Curriculum

All graduate courses are taken as electives and must be selected from the list below.

Note: The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to five of the following courses for the M.S. in Forensic Psychology program:

• FPSY 5101 - Introduction to Forensic Psychology
• FPSY 5720 - Abnormal Behavior
• FPSY 5115 - Understanding Forensic Psychology Research
• FPSY 5125 - Assessment in Forensic Psychology Settings
• FPSY 5135 - Criminal Behavior
• FPS FPSY 5145 - Ethical Issues and Professional Responsibilities in Forensic Psychology

Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master's courses and who are graduating (or have graduated) from the B.S. in Psychology program are invited to apply to the M.S. in Forensic Psychology program. Upon acceptance to Walden's M.S. in Forensic Psychology program, up to five courses can be applied to degree completion requirements.

• PSYC 6001 - Foundations for Graduate Study in Psychology Required
• FPSY 6101 - Introduction to Forensic Psychology♦ Students who successfully complete FPSY 5101 - Introduction to Forensic Psychology (5 cr.) with a B or better can have this course waived.

• FPSY 6720 - Abnormal Behavior♦ Students who successfully complete FPSY 5720 - Abnormal Psychology (5 cr.) with a B or better can have this course waived.

• FPSY 6115 - Understanding Forensic Psychology Research♦ Students who successfully complete FPSY 5115 - Understanding Forensic Psychology Research (5 cr.) with a B or better can have this course waived.

• FPSY 6125 - Assessment in Forensic Psychology Settings Students who successfully complete FPSY 5125 - Assessment in Forensic Psychology (5 cr.) with a B or better can have this course waived.

• FPSY 6135 - Criminal Behavior♦ Students who successfully complete FPSY 5135 - Criminal Behavior (5 cr.) with a B or better can have this course waived.

• FPSY 6145 - Ethical Issues and Professional Responsibilities in Forensic Psychology♦ Students who successfully complete FPSY 5145 - Ethical Issues and Professional Responsibilities in Forensic Psychology (5 cr.) with a B or better can have this course waived.

• PSYC 6393 - M.S. in Psychology Capstone

OR

• FPSY 6915 - Field Experience

**B.S. in Forensic Psychology to Master of Public Administration**

Walden University's advanced undergraduate psychology students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's or Master of Public Administration (MPA) programs.

**Requirements**

To help ensure student success, the following requirements have been established:

• The student must be in good standing with the university.

• The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.

• The student must have completed all general education and core requirements of the Bachelor of Science in Forensic Psychology.

*Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Academic Advising Team for more information regarding the Accelerate into Master's (AIM) program.*

**Curriculum**

All graduate courses are taken as electives and must be selected from the list below.
Note: The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to five of the following courses for the Master of Public Administration (M.P.A.) program:

- MMPA 5200 - Introduction to Public Administration
- MMPA 5405 - Ethics and Social Justice
- MMPA 5420 - Organizational Management and Leadership
- MMPA 5431 - Finance and Budgeting for the Public Sector
- MMPA 5435 - Human Resource Management: Building a Capable Workforce
- MMPA 5451 - Public Policy Analysis
- MMPA 5480 - Applied Research and Evaluation Methods

Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master's (AIM) courses and who are graduating (or have graduated) from the B.S. in Forensic Psychology program are invited to apply to the Master of Public Administration program. Upon acceptance to Walden’s Master of Public Administration (M.P.A.) program, up to five courses can be applied to degree completion requirements.

- MMPA 6115 - Foundations for Graduate Study **Required**
- MMPA 6200 - Principles of Public Administration
  - Students who successfully complete MMPA 5200 - Introduction to Public Administration (5 cr.) with a B or better can have this course waived.
- MMPA 6405 - Ethics and Social Justice
  - Students who successfully complete MMPA 5405 - Ethics and Social Justice (5 cr.) with a B or better can have this course waived.
- MMPA 6420 - Organizational Management and Leadership
  - Students who successfully complete MMPA 5420 - Organizational Management and Leadership (5 cr.) with a B or better can have this course waived.
- MMPA 6431 - Finance and Budgeting for the Public Sector
  - Students who successfully complete MMPA 5431 - Finance and Budgeting for the Public Sector (5 cr.) with a B or better can have this course waived.
- MMPA 6435 - Human Resource Management: Building a Capable Workforce
  - Students who successfully complete MMPA 5435 - Human Resource Management: Building a Capable Workforce (5 cr.) with a B or better can have this course waived.
- MMPA 6461 - Public Sector Economics
  - **Required**
- MMPA 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination
  - **Required**
- MMPA 6451 - Public Policy Analysis
  - Students who successfully complete MMPA 5451 - Public Policy Analysis (5 cr.) with a B or better can have this course waived.
- MMPA 6480 - Applied Research and Evaluation Methods
  - Students who successfully complete MMPA 5480 - Applied Research and Evaluation Methods (5 cr.) with a B or better can have this course waived.
- MMPA 6910 - Master of Public Administration Capstone **Required**
B.S. in Psychology to M.S. in Forensic Psychology Articulation

Walden University's advanced undergraduate psychology students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's M.S. in Forensic Psychology.

Requirements

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.
- The student must have completed all general education and core requirements of the Bachelor of Science in Psychology.

Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Academic Advising Team for more information regarding the Accelerate Into Master's (AIM) program.

Curriculum

All graduate courses are taken as electives and must be selected from the list below.

Note: The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to five of the following courses for the M.S. in Forensic Psychology program:

- FPSY 5101 - Introduction to Forensic Psychology

Post-Baccalaureate Certificate to Master's Degree Articulation

Organizational Psychology and Development Certificate to M.S. in Psychology

The following requirements have been established for Walden students who have earned the Post-Baccalaureate Organizational Psychology and Development Certificate and who wish to enter into the M.S. in Psychology program with a specialization in Organizational Psychology and Development:

Articulation Requirements

- PSYC 6001 - Foundations for Graduate Study in Psychology **Required**
- PSYC 6005 - Business Concepts for the Organizational Development Professional♦ **Required**
- PSYC 6211 - Contemporary Issues in Psychology♦ **Required**
- PSYC 6480 - Psychology of Organizational Behavior♦ Students who successfully complete this course with a B or better can have this course waived.
- RSCH 6100Y - Research Theory, Design, and Methods **Required**
- PSYC 6755 - Leadership and the Process of Change♦ Students who successfully complete this course with a B or better can have this course waived.
- RSCH 6200Y - Quantitative Reasoning and Analysis **Required**
- PSYC 6214 - Consulting for Organizational Change♦ Students who successfully complete this course with a B or better can have this course waived.
- PSYC 6754 - Personnel Psychology in the Workplace♦ Students who successfully complete this course with a B or better can have this course waived.
- PSYC Elective (5 cr.) **Required**
- PSYC 6391 - Capstone I **Required**
- PSYC 6392 - Capstone II **Required**
MASTER’S DEGREE PROGRAMS

M.S. in Clinical Psychology

The M.S. in Clinical Psychology program provides a broad background in clinical psychology with the opportunity to complete an optional counseling specialization. It prepares students to work ethically and effectively at the master's level with diverse individuals in a variety of settings. In addition, this program offers students an opportunity to complete a graduate degree that is more practitioner-focused and less research-focused and includes a broader survey of the topics in clinical psychology compared to many other degree programs.

Learning Outcomes

At the end of the program, students will be able to:

1. Describe the foundations of psychology.
2. Synthesize psychological theory and research to apply in real-world situations in clinical settings.
3. Interpret psychological theory and research.
4. Describe psychological theory, research, and practice from a multicultural and/or global perspective.
5. Apply psychological theory, research, and practice to scholarly and/or professional activities that promote positive social change.
6. Use a framework of evidence-based practice to develop constructive working relationships with clients, supervisors, instructors, and colleagues.
7. Demonstrate an appropriate and professional demeanor with clients, supervisors, instructors, and colleagues.

Specializations

- General Program
- Counseling

Degree Requirements

- 56–59 total quarter credit hours for General Program (91–94 cr. with optional specialization)
- Foundation course (1 cr.)
- Core courses (45 cr.)
- Foundation Research Sequence course (4 cr.)

Optional Specialization Curriculum (35 cr., including 10 cr. electives)

- Practicum (6–9 cr.)
Core Curriculum

**Foundation Course (1 cr.)**
- CPSY 6001 - Foundations for Graduate Study in Psychology

**Core Courses (45 cr.)**
- CPSY 6215 - Lifespan Development
- CPSY 6221 - Psychopathology From a Clinical Perspective
- CPSY 6705 - Ethics and Standards of Professional Practice
- CPSY 6342 - Interventions I
- CPSY 6341 - Psychological Assessment
- CPSY 6343 - Interventions II
- CPSY 6701 - Culture and Psychology
- CPSY 6250 - Group Process and Dynamics
- CPSY 6245 - Social Psychology

**Foundation Research Sequence (4 cr.)**
Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 6100 must be completed during the second term and is linked to Milestone 2 of the academic residencies. RSCH 6200 and RSCH 6300 must be completed prior to registering for the dissertation.
- RSCH 6100L - Research Theory, Design, and Methods

**Practicum Sequence (6–9 cr.)**
- CPSY 6700 - Master's Practicum I
- CPSY 6800 - Master's Practicum II
- CPSY 6900 - Master's Practicum III *

*CPSY 6900 - Master's Practicum III is an optional course that may be applied to the Ph.D. in Psychology program. Students should take this course if they plan to pursue their doctoral degree.

**Note on Licensure**

The M.S. in Clinical Psychology degree is not designed to prepare students to become a licensed psychology professional. The M.S in Clinical Psychology Counseling Specialization program is not approved by the Kansas Board of Regents and does not lead to master's-level psychology license eligibility in the state of Kansas.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Clinical Psychology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Counseling**

In this specialization, students discover how clinical psychology training can position them to promote psychological health in individuals, families, groups, and organizations by studying current theory, research, and practices associated with major dysfunctional behavior. This specialization can lead to work in a range of settings, including healthcare and community mental health settings. The coursework offers a foundation for pursuing clinical psychology through doctoral study. Students engage in training with individuals, groups, couples, and families.

**Learning Outcomes**

At the end of the program, students will be able to:
1. Describe the foundations of psychology.
2. Synthesize psychological theory and research to apply in real-world situations in clinical settings.
3. Interpret psychological theory and research.
4. Describe psychological theory, research, and practice from a multicultural and/or global perspective.
5. Use a framework of evidence-based practice to develop constructive working relationships with clients, supervisors, instructors, and colleagues.

6. Demonstrate an appropriate and professional demeanor with clients, supervisors, instructors, and colleagues.

7. Apply psychological theory, research, and practice to scholarly and/or professional activities that promote positive social change.

8. Utilize critical thinking and apply relevant ethical codes (e.g., APA, ACA) to decision making with diverse populations in a variety of settings.

9. Demonstrate proficiency in utilizing empirically supported models of counseling/therapy (including group; substance abuse; and couples, marriage, and family counseling as well as career counseling) with diverse populations.

Specialization Curriculum

Specialization Courses (25 cr.)

- CPSY 6722 - Counseling and Psychotherapy Theories
- CPSY 6356 - Marriage, Couple, and Family Therapy
- CPSY 6728 - Substance Abuse Counseling
- CPSY 6753 - Career Counseling
- CPSY 6100 - Introduction to Mental Health Counseling

Electives (10 cr.)

Students select any two elective courses from graduate-level courses in psychology, provided the prerequisites are met. These electives are self-registered.

### M.S. in Forensic Psychology

Walden University's M.S. in Forensic Psychology prepares individuals to work within settings that integrate psychology and the legal system, including jails and prisons, community corrections offices, law enforcement agencies, the military, victims' advocacy programs and systems, and governmental agencies focused on criminal justice and crime. Forensic psychology is a rapidly growing field. This program emphasizes the integration of psychology into forensic settings. It is especially geared toward professionals interested in career advancement and enhancement, rather than a move into clinical forensic practice with clients. Thus, instead of leading to licensure or practice within forensic or correctional systems, graduates of this program leverage the benefits of psychology and clinical understanding to positively impact the larger forensic and criminal justice systems and to enhance personal career opportunities through graduate education.

The Walden focus on social justice and community benefit will give graduates the edge in making these systems that touch thousands of lives more functional and able to serve the populations within them.

### Learning Outcomes

At the end of this program, students will be able to:

1. Identify the role of psychology within the legal system.
2. Apply psychological concepts and principles within forensic settings.
3. Implement the use of diagnostic and assessment tools in forensic settings.
4. Demonstrate the principles of research design as applied to forensic psychology research.
5. Distinguish and implement professional roles, responsibilities, and ethics to the practice of forensic psychology at the master's level.
6. Differentiate theories of maladaptive and criminal behavior.
Specializations

- General Program
- Forensic Psychology in the Community
- Mental Health Applications
- Program Planning and Evaluation in Forensic Settings
- Psychology and Legal Systems

General Program

Gain a broad understanding of the forensic psychology field and how its principles are applied in a range of settings from correctional institutions to court systems to community-based programs. In this specialization, select electives that will build your knowledge of how forensic psychology professionals work within the legal system and in community-based programs with an emphasis on preventing and reducing criminal behavior.

Specialization Courses (10 cr.)

- FPSY 6511 - Treatment of Forensic Populations
- FPSY 6520 - Psychology in the Courts♦
- OR
- FPSY 6521 - Police Psychology♦

Forensic Psychology in the Community

In this specialization, learn more about prevention, intervention, and consultation programs for criminal offenders in their communities. Understand the foundations of community crime prevention and restorative justice for victims and offenders. Prepare to work with crime
prevention programs, early intervention youth programs, victim advocate programs, and other programs to reduce crime and recidivism.

**Specialization Courses (10 cr.)**

- FPSY 6530 - Forensic Applications in Community Settings
- FPSY 6810 - Community Psychology
  OR
- FPSY 6785 - Prevention: Research and Practice

**Mental Health Applications**

Many adult and juvenile offenders suffer from mental health issues that must be addressed if they are to return to their communities and lead productive lives. In this specialization, learn to evaluate and use traditional forms of intervention, including individual and group psychotherapy, as well as recent innovations in restorative justice. Gain the skills to work directly with individuals in correctional facilities, community mental health agencies, and through the court system.

**Specialization Courses (10 cr.)**

- FPSY 6511 - Treatment of Forensic Populations
- FPSY 6912 - Mental Health Law

**Program Planning and Evaluation in Forensic Settings**

In today’s evidence-based treatment environment, programs must be constantly reviewed to determine if they are working. In this specialization, learn to conduct and apply forensic mental health research to various legal settings and to formulate research that applies to psychology and public policy. Discover tools to evaluate current programs and assess their effectiveness, and recommend treatment alternatives for forensic populations in community-based programs and correctional institutions.

**Specialization Courses (10 cr.)**

- FPSY 6314 - Program Evaluation
- FPSY 6310 - Research Design

**Psychology and Legal Systems**

In today’s complex legal system, forensic psychology professionals constantly provide their expertise on issues that intersect psychology and the law. In this specialization, explore the many ways you can interact with the court system as you gain a basic understanding of expert testimony, jury selection, and eyewitness testimony. Discover how you can work with police departments or other law enforcement agencies assisting in officer selection and training, stress management, critical incident stress debriefing, hostage negotiations, and selection of special operations officers.
Specialization Courses (10 cr.)

- FPSY 6912 - Mental Health Law♦
- FPSY 6520 - Psychology in the Courts♦
  OR
- FPSY 6521 - Police Psychology♦

M.S. in Psychology

The M.S. in Psychology provides students with pre-doctoral training—a background in the development and application of psychological theories, basic scientific methods, and principles of psychological science.

Learning Outcomes

At the end of this course, students will be able to:
1. Describe the foundations of psychology.
2. Synthesize psychological theory and research to apply in real-world situations, such as in educational, social, organizational, and health settings.
3. Interpret psychological theory and research.
4. Describe psychological theory, research, and practice from a multicultural and/or global perspective.
5. Apply psychological theory, research, and practice to scholarly and/or professional activities that promote positive social change.

Specializations

- General Psychology
- Applied Psychology Specialization
- Child and Adolescent Development
- Crisis Management and Response Specialization
- Educational Psychology Specialization
- Health Psychology Specialization
- Leadership Development and Coaching Specialization
- Organizational Psychology Specialization
- Psychology of Culture Specialization
- Psychology, Public Administration, and Social Change Specialization
- Social Psychology Specialization
- Terrorism and Security Specialization

Curriculum

The M.S. in Psychology program consists of a foundation course; core courses; in some cases, elective courses; and the completion of a capstone project.
Master's to Ph.D. Matriculation

Students enrolled in Walden University's M.S. in Psychology program are required to complete all degree requirements for that program (including an upper-level research course) and must be accepted into one of Walden's Ph.D. in Psychology specializations before taking any other courses that will count toward the doctoral degree. Students who complete Walden's M.S. in Psychology degree and then matriculate into Walden's Ph.D. in Psychology program will not have to repeat any courses required for the Ph.D. program that were completed (with a B or better) during the M.S. in Psychology program. Students must meet the minimum admission requirements for the Ph.D. program, as specified in the current Walden University Catalog.

Note on Licensure

The M.S. in Psychology is not a licensure program and does not prepare an individual to become a licensed psychology professional.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Psychology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

General Psychology

The General Psychology specialization prepares students to apply theories to practice and to conceptualize social science research.

**Applied Psychology**

The Applied Psychology specialization provides students with a broad exposure to the field of psychology including both research and practice-oriented elements of the profession. Students can explore the fundamentals of psychology, including methods, theory, and principles of the field while also learning about psychopathology, intervention, and principles of ethics in professional psychology practice. This specialization provides a foundation for doctoral study in clinical psychology for students considering practicing professionally at the doctoral level.

Child and Adolescent Development

The Child and Adolescent Development specialization emphasizes the practical application of theory and research to help children and adolescents cope with real-world challenges. Coursework includes developmental processes and theories; health psychology; child and
adolescent diseases and disorders; and models, classifications, and epidemiology of childhood psychopathology. Students also explore diversity issues and the application of behavioral analysis principles. Research courses provide the core knowledge and skills required for doctoral level study. A capstone course enables students to integrate their coursework in a practical project designed to promote positive social change.

**Educational Psychology**

The Educational Psychology specialization emphasizes the study of cognition, motivation, lifespan development, and learning for individuals ranging from high achievers to those whose needs are more specialized. This specialization can provide students with a multicultural perspective in understanding, evaluating, and applying research. Students can gain the skills and knowledge to enhance their work in the classroom and other educational settings. Students can also prepare for doctoral study in educational psychology.

**Health Psychology**

The Health Psychology specialization provides students with a broad understanding of the field of psychology, along with a specific focus on the knowledge and skills required to work in the fields of health, illnesses, prevention of illnesses, and health promotion. Students participate in courses that stimulate critical thinking through the use of applied learning methods (such as program evaluation) that facilitate applications of psychological theories and principles to the understanding of the impact of illnesses and stress on the health of individuals. The program specialization provides students with basic qualifications to begin work in the field of health psychology. It prepares students to start entry-level careers in healthcare organizations, communities, mental health agencies, and other settings. This specialization also provides a strong foundation for a doctoral degree in health psychology.

Psychology, Public Administration, and Social Change

In the Psychology, Public Administration, and Social Change specialization, students learn to apply psychological theories and skills to management within public, private, and nonprofit organizations. Drawing from their own community experiences, students integrate strategic planning and management with public policy as they explore examples of organizational change and its impact on social justice.

Degree Requirements

- 45 total quarter credit hours
- Professional Development Plan with program of study (included in PSYC 6001)
- Foundation course (2 cr.)
- Core courses (38 cr.)
- Final project: capstone (5 cr.)

Curriculum

**Terrorism and Security**

In the specialization in Terrorism and Security, students apply psychological and public policy principles to understand the impact of terrorism and the countermeasures required to combat terrorist threats. Students gain an understanding of systemic approaches to the issues of public safety, emergency preparedness, and disaster or trauma management, preparing them for positions in the expanding field of homeland security.

POST-MASTER’S CERTIFICATE PROGRAMS

Post-Master's Certificate in Teaching Online
The Post-Master's Certificate in Teaching Online program provides students with hands-on training as they teach an online course. They study principles of instructional design, teaching strategies, best practices for teaching a diverse student body, and the online environment.

Certificate Requirements
- Certificate courses (20 cr.)

Curriculum
- PSYC 8760 - Educational Psychology
- PSYC 8762 - Teaching of Psychology
- PSYC 8763 - Principles of Instructional Design
- PSYC 8764 - Instructional Design for Online Course Development

DOCTORAL DEGREE PROGRAMS

Ph.D. in Psychology

The university's mission includes broad access to high-quality postsecondary education through a distance-learning environment and preparation of its graduates to achieve professional excellence and to effect positive social change. Consistent with this mission, the Ph.D. in Psychology program is designed to prepare scholar-practitioners to meet real-world challenges and facilitate positive change in individuals, groups, organizations, and local, national, and global communities.

Specifically, the program prepares lifelong learners to integrate psychological theory, research, established methods of scientific inquiry, and evidence-based practices that incorporate cultural and individual diversity. The School of Psychology training model encompasses an integrated, developmental, and sequential plan of study that includes web-based and face-to-face coursework; residencies that provide opportunities for knowledge and skill acquisition, ethical practice, and professional socialization; field training; and demonstration of research competency.

Specializations

- Clinical Psychology
- Counseling Psychology
- Educational Psychology
- Forensic Psychology
- General Psychology
  - Teaching Focus
  - Research Focus
- Health Psychology
- Organizational Psychology
- Social Psychology

Degree Requirements

- 105–160 total quarter credit hours, depending on the specialization
- Foundation course (5 cr.)
- Professional Development Plan with program of study and, for students in the Clinical Psychology and Counseling Psychology specializations, a Personal State Licensure Plan (included in PSYC 8002 and PSYC 8003)
- Core courses (66–86 cr., depending on specialization)
• Elective courses (10–15 cr., depending on specialization)
• Track courses (105–106 cr., only in General specialization)
• Dissertation (20 cr.)
• Practicum (12 cr., 1,000 hours for Counseling Psychology; 6 cr., 750 hours for Clinical Psychology)
• Internship field experience—required for the Clinical Psychology and Counseling Psychology specializations (12 cr., 2,000 hours)
• Residency:
  ▪ Clinical Psychology and Counseling Psychology specializations: four 4-day residencies and 40 cr. of Academic Year in Residence
  ▪ Other specializations: four 4-day residencies

Curriculum

The curriculum for each specialization of the Ph.D. in Psychology is composed of core and elective courses, research competency, and the dissertation. Core courses appear, for each specialization, in the order of recommended sequence. Students in the Clinical Psychology and Counseling Psychology specializations also complete a \textit{750-hour minimum practicum for Clinical}, a \textit{1,000-hour minimum practicum for Counseling}, and a 2,000-hour (1-year full-time or 2-year part-time) internship field experience.

Demonstration of Research Competency

Prior to starting the dissertation, all students must demonstrate research competency. Research competency is demonstrated by the successful completion of the following:

- PSYC 8000 - Foundations for Graduate Study in Psychology
- PSYC 8002 - Foundations for Graduate Study in Clinical Psychology
- PSYC 8003 - Foundations for Graduate Study in Counseling Psychology
- RSCH 8100Y - Research Theory, Design, and Methods
- RSCH 8200Y - Quantitative Reasoning and Analysis
- RSCH 8300Y - Qualitative Reasoning and Analysis
- RSCH 8250Y - Advanced Quantitative Reasoning and Analysis
- PSYC 8316 - Tests and Measurement♦
- PSYC 8117 - Writing a Quality Prospectus in Psychology (Clinical Psychology and Counseling Psychology only)
- PSYC 8315 - Program Evaluation♦ (not applicable to Clinical Psychology and Counseling Psychology)
- PSYC 8551 - I/O Tests and Measurement♦ (Organizational Psychology only)

Dissertation Proposal

For the current dissertation processes and guidelines, students should refer to the \textit{Dissertation Guidebook}, located under Dissertation Process of the Walden Research Center website.
**Academic Year in Residence (AYR)—Clinical Psychology and Counseling Psychology Specializations Only**

The Academic Year in Residence (AYR) is designed to provide students with the critical clinical skills that are essential for professional practice in the field of psychology. As part of the AYR experience, students will complete eight courses in a blended format (40 quarter credits total). Students will take part of each course online but the majority of the course will occur in person with their classmates and faculty at Walden University in Minneapolis, Minnesota. Students will be required to travel to Minneapolis once per quarter to complete the in-residence portion of the courses. Students will travel to Minneapolis four times during the AYR, once each quarter, for 9-day sessions Saturday through the following Sunday including travel time. These sessions are required to pass the course and successfully complete the AYR.

The Academic Year in Residence allows students to focus on development as a doctoral student and practitioner-in-training. This period of study allows for the acquisition and evaluation of skills essential for supervised and entry-level practice in practicum and internship placements including assessment and interventions skills based on evidence based practice using empirically supported techniques to identify and resolve psychological difficulties. Additional coursework in ethics, consultation and supervision, as well as multicultural psychology during the AYR will complement the student's training. Additionally, students will focus on research and dissertation skills with the guidance of faculty and in concert with their peers.

The AYR offers a unique opportunity for students to become socialized into the profession of psychology, encouraging close interaction with faculty and fellow students. During AYR, students' progress and the evaluation of knowledge, skills, and abilities required for scholarship and professional practice at the doctoral level will be assessed.

**Note:** Students must complete all the AYR courses with a grade of B or better. Students are advised to consult the School of Psychology Academic Year in Residence section of the *Walden University Student Handbook* for more information.

**Psychological Assessment Coursework**

The purpose of the psychological assessment coursework is to provide a framework for doctoral students in the Clinical Psychology and Counseling Psychology specializations to develop their assessment knowledge and skills repertoire. Based on a developmental progression, students gain the following:

- An understanding of the assessment process and related legal, ethical, and diversity issue
- An understanding of principles of tests and measurement
- A set of basic skills in the administration, scoring, and interpretation of assessment measures across domains
- The ability to write an interpretive summary of assessment data

At the advanced level, doctoral students further develop their psychological assessment repertoire in the areas of testing, interpretation, data-based diagnoses and recommendations for intervention, and data-based psychological report writing.

Basic-level courses include the following:

- **PSYC 8316 - Tests and Measurement**
- **PSYC 8340 - Cognitive Assessment**
- **PSYC 8350 - Personality Assessment**
• PSYC 8208 - Career Assessment and Intervention

See the Course Descriptions section of this *Walden University Catalog* for more information on each course and its prerequisites.

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Psychology program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Clinical Psychology Specialization**

The Ph.D. in Psychology with a specialization in Clinical Psychology places an emphasis on the medical model, in which psychologists focus on diagnosing pathology and remediating symptoms to improve functioning. Students will learn to diagnose, assess, and provide interventions for a wide array of emotional and behavioral disorders.

The Clinical Psychology specialization emphasizes:

- Foundational psychological theory
- Research design and methods
- Empirically supported assessments and interventions
- Competence in multicultural issues and individual difference
- Ethical practice including:
  - Therapeutic intervention
  - Consultation and supervision, and
  - Commitment to critical thinking, lifelong learning, and scholarly contribution to the profession

**Program Goals and Learning Outcomes**

**PROGRAM GOAL 1:** Walden University's Clinical Psychology graduates will acquire knowledge in the foundations of psychology and will develop identities as clinical psychologists.

**Learning Outcome 1.1**

Students will be able to explain the contributions of the biological, affective, social, and cognitive areas of psychology as they impact human adaptive and maladaptive functioning.

**Learning Outcome 1.2**

Students will be able to articulate the history of clinical psychology, how the specialty of clinical psychology is unique, and how to develop a clinical psychology identity.

**PROGRAM GOAL 2:** Walden University's Clinical Psychology graduates apply knowledge and demonstrate skills in the scientific, methodological, and theoretical foundations of psychology from a scholar-practitioner perspective.

**Learning Outcome 2.1**

Students will be able to synthesize principles of basic and advanced research methods to produce independent scholarly research.

**Learning Outcome 2.1**

Students will demonstrate proficiency in evaluating the effectiveness of empirically supported treatments using an evidence-based practice approach.
Learning Outcome 2.3
Students will synthesize theory and contemporary research to establish a theoretically and empirically anchored personal orientation to the practice of clinical psychology.

PROGRAM GOAL 3: Walden University's Clinical Psychology graduates will demonstrate proficiency in the use of empirically supported psychological assessment and intervention techniques with diverse clientele in various settings.

Learning Outcome 3.1
Students will demonstrate proficiency in utilizing empirically supported models of clinical psychotherapy, consultation, and supervision with diverse populations.

Learning Outcome 3.2
Students will demonstrate proficiency in utilizing cognitive and personality assessment skills with diverse populations.

Learning Outcome 3.3
Students will develop constructive working relationships with clients, supervisors, instructors, and colleagues while also demonstrating an appropriate and professional demeanor.

PROGRAM GOAL 4: Walden University's Clinical Psychology graduates will demonstrate the ability to work ethically and effectively with a diverse clientele.

Learning Outcome 4.1
Students will engage in personal self-assessment to examine their feelings, beliefs, attitudes and opinions regarding their own and others' cultural perspective and world view.

Learning Outcome 4.2
Students will be able to describe salient experiences and perspectives of diverse populations including but not limited to race, culture, socioeconomics, age, gender, sexual orientation, and disability.

Learning Outcome 4.3
Students will utilize critical thinking and apply relevant ethical codes (e.g., APA, ACA) to decision making with diverse populations in a variety of settings.

Learning Outcome 4.4
Students will demonstrate the ability to use multicultural clinical intervention and assessment skills in varied training and professional settings.

PROGRAM GOAL 5: To prepare Walden University graduates to actively identify and contribute to the clinical psychology profession by demonstrating attitudes and behaviors essential for lifelong learning, scholarly inquiry, advocacy, and professional problem solving as clinical psychologists, with a particular emphasis on positive social change.

Learning Outcome 5.1
Students will demonstrate an awareness of how social/political issues, policies, and events impact the field of clinical psychology.

Learning Outcome 5.2
Students will engage in professional activities related to clinical psychology that promote positive social change.

Specialization Curriculum (159 cr.)

Foundation Course (5 cr.)
- PSYC 8002L - Foundations for Graduate Study in Clinical Psychology

Core Courses (61 cr.)
- PSYC 8781 - Psychopathology From a Clinical Perspective
- PSYC 8344 - Interventions I
- RSCH 8100Y - Research Theory, Design, and Methods
• PSYC 8247 - Social Psychology
• RSCH 8200Y - Quantitative Reasoning and Analysis
• PSYC 8316 - Tests and Measurement
• PSYC 8215 - Lifespan Development
• PSYC 8226 - Biopsychology
• RSCH 8300Y - Qualitative Reasoning and Analysis
• PSYC 8700 - Psychology and Social Change
• RSCH 8250Y - Advanced Quantitative Reasoning and Analysis
• PSYC 8238 - Cognitive and Affective Bases of Behavior
• PSYC 8207 - History and Systems of Psychology

**AYR Courses (40 cr.)**

• PSYC 8704 - Ethics and Standards of Psychological Practice
• PSYC 8340 - Cognitive Assessment
• PSYC 8350 - Personality Assessment
• PSYC 8421 - Multicultural Psychology
• PSYC 8232 - Consultation and Supervision in Psychology
• PSYC 8345 - Interventions II
• PSYC 8117 - Writing a Quality Prospectus in Psychology
• PSYC 8346 - Clinical Psychopharmacology

**Elective Courses (15 cr.)**

Three elective courses, selected from the graduate courses in the School of Psychology, may be added anywhere in the student’s program, provided prerequisites are met.

**Clinical Neuropsychology**

• PSYC 8710 - Clinical Neuropsychology
• PSYC 8712 - Clinical Child Neuropsychology
• PSYC 8815 - Contemporary Gerontology/Geriatric Psychology

**Child and Adolescent Psychology**

• PSYC 8719 - Developmental Psychopathology
• PSYC 8724 - Child Psychotherapy
• PSYC 8785 - Prevention: Research and Practice

**Media and Professional Practice**

• PSYC 8765 - The Psychological Impact of the Internet and Mobile Technologies
• PSYC 8759 - Psychology and the Media
• PSYC 8912 - Mental Health Law

**Gender and Sexuality**

• PSYC 8825 - Psychology of Gender
• PSYC 8830 - Psychology of Sexuality
• PSYC 8356 - Marriage, Couple, and Family Therapy
Couples and Family
- PSYC 8356 - Marriage, Couple, and Family Therapy
- PSYC 8724 - Child Psychotherapy
- PSYC 8830 - Psychology of Sexuality♦

Disaster and Trauma
- PSYC 8740 - Disaster, Crisis, and Trauma♦
- PSYC 8748 - Stress and Coping♦
- PSYC 8732 - Medical Crisis Counseling

Psychology as a Business
- PSYC 8784 - Psychological Consultation
- PSYC 8820 - Successful Practice Management
- PSYC 8757 - Leadership Coaching: Application♦

Leadership and Coaching
- PSYC 8749 - Leadership Development♦
- PSYC 8751 - Leadership Coaching: Process and Practice♦
- PSYC 8757 - Leadership Coaching: Application♦

Community Psychology
- PSYC 8785 - Prevention: Research and Practice
- PSYC 8810 - Community Psychology
- PSYC 8784 - Psychological Consultation

Dissertation (20 cr.)
- PSYC 9000 - Dissertation (20 cr. minimum—5 cr. per term for a minimum of four terms)

Field Experience (18 cr.)*
*Note: Due to the practicum requirements of this program, applicants must be a citizen or permanent resident of the United States or U.S. Territories at time of admission and currently reside in the United States or U.S. Territories at time of admission to be eligible for this program. U.S. military personnel stationed abroad should contact their enrollment advisor to determine eligibility.

Practicum 750 hours
(6 cr.—3 cr. per term)
for a minimum two terms)

- PSYC 8290 - Clinical Psychology Practicum I
- PSYC 8291 - Clinical Psychology Practicum II

Internship 2000 (12 cr.—3 cr. per term for a minimum of four terms)

- PSYC 8292 - Clinical Psychology Internship I
- PSYC 8293 - Clinical Psychology Internship II
- PSYC 8294 - Clinical Psychology Internship III
- PSYC 8295 - Clinical Psychology Internship IV

**Note on Licensure**

The Clinical Psychology specialization in the Psychology Ph.D. program is designed to prepare graduates to qualify to sit for psychology licensing exams. This specialization is designed to meet the academic licensure requirements of many state psychology boards. However, Walden University's specializations in Clinical Psychology and Counseling Psychology are not accredited by the American Psychological Association (APA) and have not received designation by the Association of State and Provincial Psychology Boards/National Register (ASPPB/NR), which are requirements for licensure in some states. Because no graduate program can guarantee licensure upon graduation, we encourage students to consult the appropriate agency to determine specific requirements. For more information about licensure, students should visit the Association of State and Provincial Psychology Boards at [http://www.asppb.net/i4a/pages/index.cfm?pageid=3395](http://www.asppb.net/i4a/pages/index.cfm?pageid=3395) and contact the appropriate licensing body. International students are encouraged to identify and contact their appropriate licensing body.
Counseling Psychology

The Counseling Psychology specialization of the Ph.D. in Psychology is a unique blended program that comprises both blended and online courses. The program prepares scholar-practitioners to work ethically with diverse clients in various settings. Core-skills-based courses are provided in a blended format, the majority of which are in person to allow the development, practice, and assessment of those skills. The philosophy of the program is strengths-based, meaning that the curriculum focuses on promoting functional behavior and relationships, developing internal and external client resources as well as remediating challenges and difficulties, and preventing as well as diagnosing and treating intrapsychic and interpersonal psychological problems. The program emphasizes and teaches foundational psychological theory; research design and methods; empirically supported assessments (cognitive, personality, and vocational) and interventions; competence in multicultural issues and individual differences; ethical practice including therapeutic interventions as well as consultation and supervision; and a commitment to critical thinking, lifelong learning, and scholarly contribution to the profession. The program espouses and embodies the university mission of positive social change, working with individuals, families, groups, and systems to overcome problems in living and enrich lives.

Program Goals and Learning Outcomes

PROGRAM GOAL 1: Walden University's Counseling Psychology graduates will acquire knowledge in the foundations of psychology and will develop identities as counseling psychologists.

Learning Outcome 1.1
Students will be able to explain the contributions of the biological, affective, social, and cognitive areas of psychology as they impact human adaptive and maladaptive functioning.

Learning Outcome 1.2
Students will be able to articulate the history of counseling psychology, how the specialty of counseling psychology is unique, and how to develop a counseling psychology identity.

PROGRAM GOAL 2: Walden University's Counseling Psychology graduates apply knowledge and demonstrate skills in the scientific, methodological, and theoretical foundations of psychology from a scholar-practitioner perspective.

Learning Outcome 2.1
Students will be able to synthesize principles of basic and advanced research methods to produce independent scholarly research.

Learning Outcome 2.2
Students will demonstrate proficiency in evaluating the effectiveness of empirically supported treatments using an evidence-based practice approach.

Learning Outcome 2.3
Students will synthesize theory and contemporary research to establish a theoretically and empirically anchored personal orientation to the practice of counseling psychology.

PROGRAM GOAL 3: Walden University's Counseling Psychology graduates will demonstrate proficiency in the use of empirically supported psychological assessment and intervention techniques with diverse clientele in various settings.

Learning Outcome 3.1
Students will demonstrate proficiency in utilizing empirically supported models of counseling/therapy, consultation, supervision, and career counseling with diverse populations.

Learning Outcome 3.2
Students will demonstrate proficiency in utilizing cognitive, personality, and vocational assessment skills with diverse populations.

Learning Outcome 3.3
Students will develop constructive working relationships with clients, supervisors, instructors, and colleagues while also demonstrating an appropriate and professional demeanor.

**PROGRAM GOAL 4:** Walden University's Counseling Psychology graduates will demonstrate the ability to work ethically and effectively with a diverse clientele.

**Learning Outcome 4.1**
Students will engage in personal self-assessment to examine their feelings, beliefs, attitudes, and opinions regarding their own and others' cultural perspective and world view.

**Learning Outcome 4.2**
Students will be able to describe salient experiences and perspectives of diverse populations including but not limited to race, culture, socioeconomics, age, gender, sexual orientation, and disability.

**Learning Outcome 4.3**
Students will utilize critical thinking and apply relevant ethical codes (e.g., APA, ACA) to decision making with diverse populations in a variety of settings.

**Learning Outcome 4.4**
Students will demonstrate the ability to use multicultural counseling skills in varied training and professional settings.

**PROGRAM GOAL 5:** To prepare Walden University graduates to actively identify and contribute to the counseling psychology profession by demonstrating attitudes and behaviors essential for lifelong learning, scholarly inquiry, advocacy, and professional problem-solving as counseling psychologists, with a particular emphasis on positive social change.

**Learning Outcome 5.1**
Students will demonstrate an awareness of how social/political issues, policies, and events impact the field of counseling psychology.

**Learning Outcome 5.2**
Students will engage in professional activities related to counseling psychology that promote positive social change.

**Curriculum (160 cr.)**

The Counseling Psychology specialization consists of a foundation course, core and elective courses, AYR courses, dissertation, and field experiences (practicum and internship). The curriculum is an integrated, developmental, and sequential plan of study; specific details about the course sequence are provided to prospective students on the Walden website.

**Foundation Course (5 cr.)**
- PSYC 8003 - Foundations for Graduate Study in Counseling Psychology

**Core Courses (42 cr.)**
- PSYC 8782 - Psychopathology From a Counseling Perspective
- PSYC 8344 - Interventions I
- RSCH 8100Y - Research Theory, Design, and Methods
- PSYC 8247 - Social Psychology♦
- RSCH 8200Y - Quantitative Reasoning and Analysis
- PSYC 8316 - Tests and Measurement♦
- PSYC 8215 - Lifespan Development♦
- PSYC 8226 - Biopsychology♦
- RSCH 8300Y - Qualitative Reasoning and Analysis
AYR Courses (40 cr.)
- PSYR 8704 - Ethics and Standards of Psychological Practice
- PSYR 8340 - Cognitive Assessment
- PSYR 8350 - Personality Assessment
- PSYR 8232 - Consultation and Supervision in Psychology
- PSYR 8345 - Interventions II
- PSYR 8117 - Writing a Quality Prospectus in Psychology
- PSYR 8346 - Clinical Psychopharmacology

Elective Courses (10 cr.)
Choose:
- PSYC 8725 - Group Therapy
OR
- PSYC 8356 - Marriage, Couple, and Family Therapy
- RSCH 8250Y - Advanced Quantitative Reasoning and Analysis

Dissertation
- PSYC 9000 - Dissertation (20 cr. minimum—5 cr. per term for a minimum of four terms)

Field Experience (24 cr.)*

Practicum 1000 hours
(12 cr.—3 cr. per term for a minimum of four terms)

- PSYC 8281 - Counseling Psychology Practicum I
- PSYC 8283 - Counseling Psychology Practicum II
- PSYC 8284 - Counseling Psychology Practicum III
- PSYC 8285 - Counseling Psychology Practicum IV
Internship 2000 (12 cr.—3 cr. per term for a minimum of four terms)

- PSYC 8286 - Counseling Psychology Internship I
- PSYC 8287 - Counseling Psychology Internship II
- PSYC 8288 - Counseling Psychology Internship III
- PSYC 8289 - Counseling Psychology Internship IV

**Note on Licensure**

The Ph.D. in Psychology with a specialization in Counseling Psychology is designed to prepare graduates to qualify to sit for psychology licensing exams. This specialization is designed to meet the academic licensure requirements of many state psychology boards. However, Walden University's specializations in Clinical Psychology and Counseling Psychology are not accredited by the American Psychological Association (APA) and have not received designation by the Association of State and Provincial Psychology Boards/National Register (ASPPB/NR), which are requirements for licensure in some states. Because no graduate program can guarantee licensure upon graduation, we encourage students to consult the appropriate agency to determine specific requirements. For more information about licensure, students should visit the Association of State and Provincial Psychology Boards and contact the appropriate licensing body. International students are encouraged to identify and contact their appropriate licensing body.
Educational Psychology

Students in this specialization will contribute to the field of human learning and education through independent, professional research. Students will gain a deepened understanding of key psychological theory affecting the breadth of issues related to the learning experiences of both high achievers and individuals whose needs are more specialized. Students will explore how to apply this theory to teaching learners across their lifespan and researching their cognition, motivation, and development.

Program Goals and Learning Outcomes

**PROGRAM GOAL 1:** Walden University's Educational Psychology graduates will acquire knowledge in the foundations of psychology and will develop identities as educational psychologists.

**Learning Outcome 1.1**

Students will integrate current theory and research to explain behavior in the biological, affective, social, individual differences, and cognitive areas of psychology.

**Learning Outcome 1.2**

Students will be able to articulate the history of educational psychology, how the specialty of educational psychology is unique, and how to develop an educational psychology identity.

**Learning Outcome 1.3**

Students will be able to apply seminal works within the field of educational psychology (including the areas of educational psychology, tests and measurement, psychology of the exceptional individual, special education, adult development and learning, and instructional design) in various educational settings.

**PROGRAM GOAL 2:** Walden University's Educational Psychology graduates apply knowledge and demonstrate skills in the scientific, methodological, and theoretical foundations of psychology from a scholar-practitioner perspective.

**Learning Outcome 2.1**

Students will be able to synthesize principles of basic and advanced research methods to produce independent scholarly research.

**Learning Outcome 2.2**

Students will be able to conduct scholarly educational psychological research in areas including development, cognition, motivation, adult, and special needs learning.

**PROGRAM GOAL 3:** Walden University's Educational Psychology graduates will demonstrate the ability to apply theoretical knowledge to teaching and empirically based research regarding human learning across the lifespan in various educational settings.

**Learning Outcome 3.1**

Students will be able to synthesize educational psychology theory and research in the areas of development, cognition, motivation, adult, and special needs learning to enhance the quality of instruction.

**Learning Outcome 3.2**

Students will be able to apply evidence-based educational psychology research methods to enhance educational instruction in various educational institutions and organizations.

**PROGRAM GOAL 4:** Walden University's Educational Psychology graduates will demonstrate the ability to work ethically and effectively with diverse populations.

**Learning Outcome 4.1**

Students will be able to describe experiences and perspectives of diverse populations including but not limited to race, culture, socioeconomics, age, gender, sexual orientation, and disability.

**Learning Outcome 4.2**

Students will utilize critical thinking to apply relevant ethical codes (e.g., APA) to decision making with diverse populations in research practice and work settings.
PROGRAM GOAL 5: To prepare Walden University graduates to actively identify and contribute to the educational psychology profession by demonstrating attitudes and behaviors essential for lifelong learning, scholarly inquiry, advocacy, and professional problem-solving as educational psychologists, with a particular emphasis on positive social change.

Learning Outcome 5.1
Students will be able to discuss how social/political issues, policies, and events impact the field of educational psychology.

Learning Outcome 5.2
Students will engage in professional activities related to educational psychology that promote positive social change.

</table>

**Timing of residencies**

- Residency 1: Upon enrollment in program
- Residency 2: Within 18 months of start date or linked to registration in or completion of first research course
- Residency 3: By the end of third year
- Residency 4: During third year and beyond

**Note on Licensure**

The Educational Psychology specialization in the Ph.D. in Psychology is not a licensure program and does not prepare an individual to become a licensed psychology professional.

**Forensic Psychology**

Students in this specialization will develop a greater understanding of the criminal justice system and the mental health issues that drive many aspects of criminal behavior. Students will broaden their understanding of advanced forensic psychology research methods and explore ways to evaluate programs designed specifically for forensic populations such as the incarcerated, recently released offenders, the mentally ill, and juveniles. This specialization can lead to a
deeper understanding of systems and programs for incarcerated and recently released offenders to create positive change in the legal system and community settings.

Program Goals and Learning Outcomes

PROGRAM GOAL 1: Walden University's Forensic Psychology graduates will acquire knowledge in the foundations of psychology.
Learning Outcome 1.1
Students will be able to integrate current theory and research to explain behavior from a forensic psychology perspective.
Learning Outcome 1.2
Students will be able to discuss seminal works within the field of forensic psychology and how they relate to education and/or research.

PROGRAM GOAL 2: Walden University's Forensic Psychology graduates apply knowledge and demonstrate skills in the scientific, methodological, and theoretical foundations of psychology with a focus on education and research.
Learning Outcome 2.1
Students will be able to synthesize principles of basic and advanced research methods to produce independent scholarly research.
Learning Outcome 2.2
Students will demonstrate proficiency in evaluating the effectiveness of empirically supported methods of research and/or teaching.

PROGRAM GOAL 3: Walden University's Forensic Psychology graduates will demonstrate the ability to apply theoretical knowledge and research skills.
Learning Outcome 3.1
Students will integrate current theory and research to explain behavior from the perspective of forensic psychology.
Learning Outcome 3.2
Students will be able to apply evidence-based psychological research in various institutions and organizations.

PROGRAM GOAL 4: Walden University's Forensic Psychology graduates will demonstrate the ability to work ethically and effectively with diverse populations.
Learning Outcome 4.1
Students will be able to describe experiences and perspectives of diverse populations including but not limited to race, culture, socioeconomics, age, gender, sexual orientation, and disability.
Learning Outcome 4.2
Students will apply relevant ethical codes (e.g., APA) to decision making with diverse populations in both research practice and work settings.

PROGRAM GOAL 5: To prepare Walden University graduates to actively identify and contribute to the forensic psychology profession by demonstrating attitudes and behaviors essential for lifelong learning, scholarly inquiry, advocacy, and professional problem-solving, with a particular emphasis on positive social change.
Learning Outcome 5.1
Students will be able to discuss how social/political issues, policies, and events impact the field of forensic psychology.
Learning Outcome 5.2
Students will apply their knowledge of forensic psychology to scholarly and/or professional activities to promote positive social change.

**Note on Licensure**

The Forensic Psychology specialization in the Ph.D. in Psychology is not a licensure program and does not prepare an individual to become a licensed psychology professional.

**General Psychology**

The General Psychology specialization—with focus in Teaching and in Research—prepares individuals to teach, mentor, and/or conduct culturally and contextually relevant research in psychology in institutions of higher education and to engage their knowledge and skills in applied settings. Students will gain the skills and acumen to make valuable contributions to the field of psychology. Students will examine the physical, social, emotional, and cognitive issues impacting human behavior and acquire the foundation necessary to plan and conduct relevant psychological research. Students may also explore the real-world legal and ethical issues faced by today's industry professionals and choose among options to focus on teaching and/or research in psychology.

**Program Goals and Learning Outcomes**

**PROGRAM GOAL 1:** Walden University's General Psychology graduates will acquire knowledge in the foundations of psychology.

**Learning Outcome 1.1**

Students will be able to articulate the general history of psychology by explaining the depth and breadth of the field from the perspective of a future educator and/or researcher.

**Learning Outcome 1.2**

Students will be able to discuss seminal works within the field of general psychology including the broad areas of biological/physiological, learning/cognition, and social/developmental psychology.
Learning Outcome 1.3
Students will be able to discuss how seminal works in the field of general psychology relate to education and/or research.

PROGRAM GOAL 2: Walden University's General Psychology graduates apply knowledge and demonstrate skills in the scientific, methodological, and theoretical foundations of psychology with a focus on education and research.

Learning Outcome 2.1
Students will be able to synthesize principles of basic and advanced research methods to produce independent scholarly research.

Learning Outcome 2.2
Students will demonstrate proficiency in evaluating the effectiveness of empirically supported methods of research and/or teaching.

Learning Outcome 2.3
Students will synthesize theory and contemporary research to apply in the practice of research or teaching.

PROGRAM GOAL 3: Walden University's General Psychology graduates will demonstrate the ability to apply theoretical knowledge and research skills.

Learning Outcome 3.1
Students will integrate current theory and research to explain behavior in the biological, affective, social, individual differences, and cognitive areas of psychology.

Learning Outcome 3.2
Students will be able to apply evidence-based psychological research in various institutions and organizations.

PROGRAM GOAL 4: Walden University's General Psychology graduates will demonstrate the ability to work ethically and effectively with diverse populations.

Learning Outcome 4.1
Students will be able to describe experiences and perspectives of diverse populations including but not limited to race, culture, socioeconomics, age, gender, sexual orientation, and disability.

Learning Outcome 4.2
Students will apply relevant ethical codes (e.g., APA) to decision making with diverse populations in both research practice and work settings.

PROGRAM GOAL 5: To prepare Walden University graduates to actively identify and contribute to the general psychology profession by demonstrating attitudes and behaviors essential for lifelong learning, scholarly inquiry, advocacy and professional problem-solving as general psychologists, with a particular emphasis on positive social change.

Learning Outcome 5.1
Students will be able to discuss how social/political issues, policies, and events impact the field of general psychology.

Learning Outcome 5.2
Students will apply their knowledge of general psychology to scholarly and/or professional activities to promote positive social change.

Note on Licensure
The General Psychology specialization in the Ph.D. in Psychology program is not a licensure program and does not prepare an individual to become a licensed psychology professional.
General Psychology: Teaching Psychology Focus (106 cr.)

The Teaching Psychology focus prepares students to integrate psychological theory and practice, using scientific methods and evidence-based practice to inform undergraduate and graduate instruction that incorporates issues of cultural and individual diversity. Students in the Teaching Psychology focus will

- Acquire a broad knowledge base in psychology and its history, ethics, research methods, and applications.
- Use psychological theory, research, and practice to inform instructional process and content.
- Apply psychological theories and research to educational practice.
- Develop the ability to promote attitudes and skills for lifelong learning, critical inquiry, and problem-solving in graduate and undergraduate learners.
- Develop the research skills necessary to make scholarly contributions to the field of psychology.

The Teaching Psychology focus consists of a foundation course, core and Specialization Courses, three elective courses, demonstration of research competency, and dissertation. Additional courses may be taken to provide breadth and depth of learning.

Foundation Course (5 cr.)
- PSYC 8000 - Foundations for Graduate Study in Psychology

Core Courses (26 cr.)
- RSCH 8100Y - Research Theory, Design, and Methods
- RSCH 8200Y - Quantitative Reasoning and Analysis
- RSCH 8300Y - Qualitative Reasoning and Analysis
- PSYC 8115 - Writing a Quality Prospectus
- PSYC 8703 - Ethics and Standards of Psychology
- RSCH 8250Y - Advanced Quantitative Reasoning and Analysis

Breadth Courses (25 cr.)

Select two courses from the following list:
- PSYC 8207 - History and Systems of Psychology
- PSYC 8215 - Lifespan Development
- PSYC 8226 - Biopsychology
- PSYC 8238 - Cognitive and Affective Bases of Behavior
- PSYC 8316 - Tests and Measurement
- PSYC 8247 - Social Psychology

Select three more courses from the list above and/or below:
- PSYC 8781 - Psychopathology From a Clinical Perspective
- PSYC 8241 - Human Motivation
- PSYC 8701 - Culture and Psychology
• PSYC 8202 - Survey Research Methods
• PSYC 8315 - Program Evaluation
• PSYC 8300 - Philosophical Foundations in Psychological Research

**Teaching Focus Courses (15 cr.)**
• PSYC 8762 - Teaching of Psychology
• PSYC 8763 - Principles of Instructional Design
• PSYC 8764 - Instructional Design for Online Course Development

**Elective Courses (15 cr.)**
Three elective courses selected from the graduate courses in the School of Psychology may be added anywhere in the student’s program, provided prerequisites are met.

**Dissertation (20 cr.)**
• PSYC 9000 - Dissertation (20 cr. minimum—5 cr. per term for a minimum of four terms)

| Residency 3: By the end of third year |
| Residency 4: During third year and beyond |

**General Psychology: Research Psychology Focus (105 cr.)**

The Research and Evaluation focus prepares students to integrate psychological theory and practice, using scientific methods and evidence-based practice to apply their knowledge and skills about research and evaluation in a variety of settings.

Students in the Research focus will:
- Acquire a broad knowledge base in psychology and its history, ethics, research methods, and applications.
- Develop the research skills necessary to make culturally and contextually relevant scholarly contributions to the field of psychology.
- Analyze and evaluate the theories and applications underlying multiple data collection techniques used in psychology.
- Use psychological theory and research to inform practice in a variety of public, private, governmental, and nongovernmental settings.
- Use research and evaluation strategies to study the efficacy, integrity, acceptability, transferability, and contextual and cultural relevance of programs and interventions.

Students in this focus also will:
- Conceptualize, design, analyze, and evaluate a wide variety of research approaches and methodologies.
- Develop, implement, and evaluate programs and strategies.
- Collaborate with professionals in the development and application of research.
- Use research and evaluation strategies to examine social change from the psychological perspective of individuals, groups, organizations, and local and global communities.
- Serve as consultants in research, data analysis, and evaluation in a range of settings (e.g., higher education, government, public sector).

The Research focus consists of a foundation course, core and research focus courses, three elective courses, demonstration of research competency, and dissertation. Additional courses may be taken to provide breadth and depth of learning.

**Foundation Course (5 cr.)**

- PSYC 8000 - Foundations for Graduate Study in Psychology
Core Courses (26 cr.)
- RSCH 8100Y - Research Theory, Design, and Methods
- RSCH 8200Y - Quantitative Reasoning and Analysis
- RSCH 8300Y - Qualitative Reasoning and Analysis
- PSYC 8115 - Writing a Quality Prospectus
- PSYC 8703 - Ethics and Standards of Psychology
- RSCH 8250Y - Advanced Quantitative Reasoning and Analysis

Breadth Courses (25 cr.)
Select two courses from the following list of courses:
- PSYC 8207 - History and Systems of Psychology
- PSYC 8215 - Lifespan Development
- PSYC 8226 - Biopsychology
- PSYC 8238 - Cognitive and Affective Bases of Behavior
- PSYC 8316 - Tests and Measurement
- PSYC 8247 - Social Psychology
Select three more courses from the list above and/or below:
- PSYC 8781 - Psychopathology From a Clinical Perspective
- PSYC 8241 - Human Motivation
- PSYC 8762 - Teaching of Psychology
- PSYC 8763 - Principles of Instructional Design
- PSYC 8764 - Instructional Design for Online Course Development
- PSYC 8202 - Survey Research Methods
- PSYC 8315 - Program Evaluation
- PSYC 8300 - Philosophical Foundations in Psychological Research
- PSYC 8701 - Culture and Psychology

Research Focus Courses (14 cr.)
- PSYC 8202 - Survey Research Methods
- PSYC 8315 - Program Evaluation
Choose:
- RSCH 8350Y - Advanced Qualitative Reasoning and Analysis
OR
- RSCH 8450Y - Advanced Mixed-Methods Reasoning and Analysis

Elective Courses (15 cr.)
Three elective courses selected from the graduate courses in the School of Psychology may be added anywhere in the student’s program, provided prerequisites are met.

Dissertation (20 cr.)
- PSYC 9000 - Dissertation (20 cr. minimum—5 cr. per term for a minimum of four terms)

**Health Psychology**

The Health Psychology specialization educates students on the complex relationship among psychological, social, and biological factors implicated in health and illness. This research-focused program prepares students to work in a variety of settings, such as health and wellness centers, corporations, research institutions, and academic institutions in research, teaching, psychoeducational, and administrative positions.
Health Psychology students will be able to develop the strong theoretical background to design and conduct research on the biological, psychological, behavioral, social, cultural, and environmental factors that contribute to health and illness. By learning how to apply advanced research methodologies, students can promote positive health behaviors and encourage change as a researcher in academic, medical, business, government, and community settings.

The Health Psychology specialization consists of a Foundation course, core and Specialization Courses, three elective courses, demonstration of research competency, and a dissertation.

Program Goals and Learning Outcomes

PROGRAM GOAL 1: Walden University's Health Psychology graduates will acquire knowledge in the foundations of psychology and will develop identities as health psychologists.
Learning Outcome 1.1
Students will explain behavior using current theory and research in the biological, affective, social, individual differences, and cognitive areas of psychology.
Learning Outcome 1.2
Students will be able to discuss how key issues within the field of health psychology impact health-related issues.

PROGRAM GOAL 2: Walden University's Health Psychology graduates apply knowledge and demonstrate skills in the scientific, methodological, and theoretical foundations of psychology from a scholar-practitioner perspective.
Learning Outcome 2.1
Students will be able to synthesize principles of basic and advanced research methods to produce independent scholarly research.
Learning Outcome 2.2
Students will be able to synthesize theory and research to apply in the practice of health psychology.

PROGRAM GOAL 3: Walden University’s Health Psychology graduates will demonstrate proficiency in the use of empirically supported intervention techniques with diverse populations.
Learning Outcome 3.1
Students will be able to identify and describe personal and environmental factors that impact health.
Learning Outcome 3.2
Students will demonstrate proficiency in using empirically supported evidence to evaluate the effectiveness of health-related treatments.

PROGRAM GOAL 4: Walden University's Health Psychology graduates will demonstrate the ability to work ethically and effectively with diverse populations.
Learning Outcome 4.1
Students will be able to describe experiences and perspectives of diverse populations including but not limited to race, culture, socioeconomics, age, gender, sexual orientation, and disability.
Learning Outcome 4.2
Students will apply relevant ethical codes (e.g., APA) to decision making with diverse populations in both research practice and work settings.

PROGRAM GOAL 5: To prepare Walden University graduates to actively identify and contribute to the health psychology profession by demonstrating attitudes and behaviors essential for lifelong learning, scholarly inquiry, advocacy, and professional problem-solving as health psychologists, with a particular emphasis on positive social change.
Learning Outcome 5.1
Students will be able to discuss how social/political issues, policies, and events impact the field of health psychology.
Learning Outcome 5.2
Students will engage in professional activities related to health psychology that promote positive social change.

- Residency 4: During third year and beyond

**Note on Licensure**

The Health Psychology specialization in the Ph.D. in Psychology is not a licensure program and does not prepare an individual to become a licensed psychology professional.

**Organizational Psychology**

The Organizational Psychology specialization will help students make valuable contributions to their field and help build successful organizations by improving student performance and well-being of its people. Through this doctoral specialization, designed to deepen knowledge of workplace and organizational behavior, students will research selection, performance management, training and development, organizational behavior and development, leadership, motivation, and job-related attitudes.
Program Goals and Learning Outcomes

PROGRAM GOAL 1: Walden University's Organizational Psychology graduates will acquire knowledge in the foundations of psychology and will develop identities as organizational psychologists.

Learning Outcome 1.1
Students will explain behavior using current theory and research in the affective, social, individual differences, and cognitive areas of psychology.

Learning Outcome 1.2
Students will be able to articulate the history of organizational psychology, how the specialty of organizational psychology is unique, and how to develop an organizational psychology identity.

Learning Outcome 1.3
Students will be able to discuss how key issues such as individual behavior, leadership, job analysis, and performance measurement affects organizations.

PROGRAM GOAL 2: Walden University's Organizational Psychology graduates apply knowledge and demonstrate skills in the scientific, methodological, and theoretical foundations of psychology from a scholar-practitioner perspective.

Learning Outcome 2.1
Students will be able to synthesize principles of basic and advanced research methods to produce independent scholarly research.

Learning Outcome 2.2
Students will demonstrate proficiency in using evidence-based practices to evaluate the effectiveness of empirically supported talent management systems.

PROGRAM GOAL 3: Walden University's Organizational Psychology graduates demonstrate proficiency in the use of scientific research-based organizational change techniques with diverse populations in various settings.

Learning Outcome 3.1
Students will be able to evaluate individual, group, organizational, leadership, and cultural diversity factors that impact organizational performance.

Learning Outcome 3.2
Students will use empirically based research to evaluate and document the impact of organizational change initiatives.

Learning Outcome 3.3
Students will be able to consult with organizations about the use of research-based best practices to incorporate issues of diversity in their organizational development activities.

PROGRAM GOAL 4: Walden University's Organizational Psychology graduates will demonstrate proficiency in conducting research and applying research-based practices in all aspects of job analysis, job fit, and performance measurement.

Learning Outcome 4.1
Students will be able to conduct valid and defensible job analysis projects for organizations.

Learning Outcome 4.2
Students will be able to identify appropriate methods and measures for valid, fair, and defensible worker-selection systems.

Learning Outcome 4.3
Students will be able to develop valid and useful performance measurement systems for assessing worker performance.

PROGRAM GOAL 5: To prepare Walden University graduates to actively identify and contribute to the organizational psychology profession by demonstrating attitudes and behaviors essential for lifelong learning, scholarly inquiry, advocacy, and professional problem-solving as organizational psychologists, with a particular emphasis on positive social change.

Learning Outcome 5.1
Students will be able to discuss how social/political issues, policies, and events impact the field of organizational psychology.
Learning Outcome 5.2
Students will apply their knowledge to scholarly and/or professional activities related to organizational psychology to promote positive social change.

The Organizational Psychology specialization consists of a foundation course, core and Specialization Courses, two track courses, three elective courses, demonstration of research competency, and the dissertation sequence.

**Note on Licensure**

The Organizational Psychology specialization in the Ph.D. in Psychology is not a licensure program and does not prepare an individual to become a licensed psychology professional.

**Social Psychology**

Students will apply knowledge of social psychological theory to conduct research on such important social issues as social cognition, attitudes, interpersonal processes, and group dynamics. Through this specialization, students can expand their understanding of how social factors influence human psychology and behavior and the use of sophisticated research methods to position themselves to teach and conduct research in higher education.
Program Goals and Learning Outcomes

PROGRAM GOAL 1: Walden University's Social Psychology graduates will acquire knowledge in the foundations of psychology and will develop identities as social psychologists.

Learning Outcome 1.1
Students will explain behavior using current theory and research in the affective, social, individual differences, and cognitive areas of psychology.

Learning Outcome 1.2
Students will be able to articulate the history of social psychology, how the specialty of social psychology is unique, and how to develop an identity as a social psychologist.

Learning Outcome 1.3
Students will be able to discuss how seminal works within the field of social psychology (including the areas of social cognition, social influence, attitudes, intergroup relations, and interpersonal relations) apply to social contexts.

PROGRAM GOAL 2: Walden University's Social Psychology graduates will acquire research-based skills relative to their work as social psychologists. These skills will be related to areas such as social cognition, social influence, attitudes, intergroup relations, and interpersonal relations.

Learning Outcome 2.1
Students will be able to synthesize principles of basic and advanced research methods to produce independent, scholarly work.

Learning Outcome 2.2
Students will apply theory and contemporary research in the practice of a social psychologist.

PROGRAM GOAL 3: To prepare Walden University graduates to apply their theoretical knowledge and research skills in the areas of social cognition, social influence, attitudes, intergroup relations, and interpersonal relations.

Learning Outcome 3.1
Students will be able to explain how social psychological theory and research applies to behavior in social settings.

Learning Outcome 3.2
Students will be able to apply social psychological research methods in work environments known to utilize social psychological methods.

PROGRAM GOAL 4: Walden University's Social Psychology graduates will demonstrate the ability to work ethically and effectively with diverse populations.

Learning Outcome 4.1
Students will be able to describe experiences and perspectives of diverse populations including but not limited to race, culture, socioeconomics, age, gender, sexual orientation, and disability.

Learning Outcome 4.2
Students will apply relevant ethical codes (e.g., APA) to decision making with diverse populations in both research practice and work settings.

PROGRAM GOAL 5: To prepare Walden University graduates to actively identify and contribute to the social psychology profession by demonstrating attitudes and behaviors essential for lifelong learning, scholarly inquiry and research, advocacy, and professional problem-solving as social psychologists, with a particular emphasis on positive social change.

Learning Outcome 5.1
Students will be able to discuss how social/political issues, policies and events impact the field of social psychology.

Learning Outcome 5.2
Students will be able to apply their knowledge of social psychology to scholarly and/or professional activities to promote positive social change.

**Note on Licensure**

The Social Psychology specialization in the Ph.D. in Psychology is not a licensure program and does not prepare an individual to become a licensed psychology professional.
POST-DOCTORAL CERTIFICATE PROGRAMS

Post-Doctoral Respecialization Certificate

Earning a Respecialization Certificate gives students the opportunity to gain theory and knowledge in a specialization other than the one they focused on in their degree work. Students complete a unique program of study that accounts for previous coursework and includes courses required to achieve essential knowledge in the new specialization.

Choose from any of the following specializations:

- Educational Psychology
- Forensic Psychology
- General Psychology
- Health Psychology
- Organizational Psychology
- Social Psychology

Completion Requirements

- Specific coursework determined by the student and the School of Psychology's faculty chair for the specialization chosen
- Minimum 3.0 GPA

Time to completion may vary by student, depending on individual progress and credits transferred, if applicable. For a personalized estimate of time to completion, students should call an enrollment advisor at 1-866-492-5336.

Students should request information or speak with an enrollment advisor by calling 1-866-492-5336 for assistance in deciding which online program best fits their goals. A list of international toll-free phone numbers is available for students outside the United States.

Note on Licensure

The respecialization certificate is not a licensure program and does not prepare an individual to become a licensed psychology professional.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Post-Doctoral Respecialization Certificate program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
Undergraduate Certificate in Homeland Security

In this certificate program, students will develop their skills to identify and plan responses to terrorist threats. Students will study the procedures for responding to attacks and expand their understanding of the types of weapons of mass destruction (WMD) and the impact of biological and chemical threats and disasters.

Students must meet the bachelor's degree admission requirements. Credit from courses taken for a certificate can be applied toward the B.S. in Criminal Justice or B.S. in Political Science and Public Administration.

Students must take all courses in sequence and receive a B or better in each course. **Note:** A grade of B– is not acceptable.

**Certificate Requirements**
- 30 total quarter credits

**Certificate Curriculum (30 cr.)**
- COMM 1001 - Contemporary Communications **Must be taken in first quarter**
- CRJS 1001 - Contemporary Criminal Justice Systems♦
- CRJS 3004 - Data Analysis for the Criminal Professional♦
- CRJS 4301 - Terrorism♦
- CRJS 4302 - Critical Incidents and Cross-Agency Coordination♦
- CRJS 4303 - WMD and Disaster Response♦

BACHELOR’S DEGREE PROGRAMS

B.S. in Criminal Justice

Walden University's B.S. in Criminal Justice program is designed to help students gain the skills and knowledge to prepare for a career in law enforcement, the justice system, corrections, homeland security, and social services. The program blends contemporary theory on the nature, extent, and cause of crime with the study of national and international criminal justice practices. Learning is supported through coursework and a final capstone project. The curriculum is based on the recommendations of the Academy of Criminal Justice Sciences. The program can help prepare students to become more effective social change agents in criminal justice organizations at the local, state, federal, or international levels.

Learning Outcomes

At the end of the program, students will be able to:
1. Explain concepts, theoretical perspectives, empirical findings, and trends in criminal justice.
2. Demonstrate the ability to apply legal and ethical principles to the criminal justice system.
3. Describe the structure, function, and interaction of key institutions in criminal justice.
4. Discuss the patterns, typologies, and root causes of crime.
5. Apply criminal justice concepts, processes, and practices to social justice and social change.

Concentrations

- Computer Information Systems and Security
- Crime and Criminals
- Criminal Justice Management and Administration
- Homeland Security
- Human Services for Criminal Justice

Degree Requirements

- 181 total quarter credit hours
- General education courses (46 cr.)
- Core courses (40 cr.)
- Concentration courses (15–30 cr., depending on concentration)
- Elective courses (60–75 cr., depending on concentration)
- Capstone course (5 cr.)
Core Curriculum

General Education Courses (46 cr.)
See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Core Courses (40 cr.)
- CRJS 1001 - Contemporary Criminal Justice Systems♦
- CRJS 2001 - Criminology and Social Control♦
- CRJS 2002 - Juvenile Delinquency and Justice♦
- CRJS 2003 - Criminal Law♦
- CRJS 3001 - Corrections♦
- CRJS 3002 - Courts and Judicial Process♦
- CRJS 3003 - Law Enforcement♦
- CRJS 3004 - Data Analysis for the Criminal Professional♦

Elective Courses (60–75 cr.)
Students are to select 12 or 15 additional courses to fulfill the elective requirement, depending on the concentration. Students may choose courses from either general education courses, criminal justice concentration courses, or courses from any of Walden’s bachelor’s programs. At least three elective courses must be at the 3000 level or above. These credits of electives are in addition to the 5-credit general education elective.

Students are encouraged, but not required, to take an elective course specifically designed for this program.
- CRJS 3010 - Profiling Serial and Mass Murderers♦

Capstone Course (5 cr.)
- CRJS 4150 - Capstone: International Justice and Human Rights

Program Data
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Criminal Justice program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Computer Information Systems and Security
Today's criminals often leave a digital trail, and law enforcement agencies must protect confidential information as well as extract key data involved in crimes. This concentration will help students understand the technology infrastructure that underlies information systems, gain access to key Internet services and applications, and learn to prevent information security
network attacks. In this concentration, students will explore basic approaches to computer forensics, analyze information systems for evidence of illegal or inappropriate activities, and consider the legal, ethical, and policy implications of forensic techniques. This concentration will broaden the skills needed for a position as a computer and cyber crime professional in government, corporate information security departments, law enforcement agencies, and law firms.

**Concentration Curriculum**

**Concentration Courses (30 cr.)**

- CMIS 1002 - Information Technology Infrastructure♦
- CMIS 2001 - Internet Computing♦
- CMIS 4101 - Information Security and Privacy♦
- CMIS 4102 - Information Security Techniques I♦
- CMIS 4103 - Information Security Techniques II♦
- CMIS 4104 - Computer Forensics♦

**Electives (60 cr.)**

Choose 12 courses from general education, B.S. in Criminal Justice, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Elective credits should total 60 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. *Note on Minors:* Electives can also be used to complete a six-course minor.

**Crime and Criminals**

As crime continues to plague large cities and small communities throughout the world, the need for criminal investigators continues to grow. In this concentration, students study criminal theories and behavior and discover the proper way to conduct a criminal investigation, including assessing a crime scene; handling witnesses, suspects, and informants; and administering surveillance techniques. The world of drugs, gangs, and organized crime will be explored, along with the impact of these group activities on crime and policing. Students should consider this concentration if they are interested in exploring the world of gangs and organized crime units and task forces or if they are interested in working as a crime scene investigator, criminologist, researcher, or detective.

**Concentration Curriculum**

**Concentration Courses (15 cr.)**

- CRJS 4101 - Criminal Evidence and Investigation♦
- CRJS 4102 - The Criminal Mind♦
- CRJS 4103 - Drugs, Gangs, and Organized Crime♦
**Electives (75 cr.)**

Choose 15 courses from general education, B.S. in Criminal Justice, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Elective credits should total 75 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. *Note on Minors:* Electives can also be used to complete a six-course minor.

**Criminal Justice Management and Administration**

Managers and organizational leaders must learn to successfully guide criminal justice organizations into the global 21st century. In this concentration, students will study how to create and apply policies and budgets to successfully manage their organizations. They will develop and integrate models of cross-agency coordination among regional, state, national, and international agencies in anticipation and response to typical critical incidents. And they will prepare for positions in a range of departments of local and regional law enforcement offices, in victim and advocacy services, and in criminal justice-related nonprofit organizations.

**Concentration Curriculum**

**Concentration Courses (15 cr.)**

- CRJS 4401 - Management and Supervision in Criminal Systems
- CRJS 4402 - Planning and Budgeting

Choose one:

- CRJS 4302 - Critical Incidents and Cross-Agency Coordination
- CRJS 4202 - Mobilizing and Coordinating Community Response

**Electives (75 cr.)**

Choose 15 courses from general education, B.S. in Criminal Justice, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Elective credits should total 75 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. *Note on Minors:* Electives can also be used to complete a six-course minor.

**Homeland Security**

In the wake of the events on 9/11, the field of homeland security has grown exponentially. Students who want to learn more about standard operating procedures for identifying, planning for, and responding to terrorist threats, as well as patterns and trends related to terrorism, should consider the Homeland Security concentration. Students will explore all types of weapons of mass destruction, including biological and chemical threats and disasters, and they will discover how to manage such incidents. Students will also study the skills required for a homeland security position with the border patrol; local and regional first responders; hazardous material response teams; and emergency relief agencies such as the Federal Emergency Management Administration.
Concentration Curriculum

Concentration Courses (15 cr.)

- CRJS 4301 - Terrorism
- CRJS 4302 - Critical Incidents and Cross-Agency Coordination
- CRJS 4303 - WMD and Disaster Response

Electives (75 cr.)

Choose 15 courses from general education, B.S. in Criminal Justice, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Elective credits should total 75 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

Human Services for Criminal Justice

Victims who return safely to their communities often need help addressing the injustices they have experienced. This concentration is ideal for individuals who want to work as an advocate for victims or communities or who want to work directly with victims in social services and nonprofit organizations. Students will study how to assess the needs of victims and to identify community resources and responses, as well as analyze contemporary problems and trends in victimology. In addition, students will explore restorative justice strategies to repair the harm caused by criminal behavior and to return criminals and victims to the community for productive, crime-free lives.

Concentration Curriculum

Concentration Courses (15 cr.)

- CRJS 4201 - Restorative Justice
- CRJS 4202 - Mobilizing and Coordinating Community Response
- CRJS 4203 - Victimology

Electives (75 cr.)

Choose 15 courses from general education, B.S. in Criminal Justice, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Elective credits should total 75 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

B.S. in Political Science and Public Administration

Delivering a unique blend of theory and application, Walden's B.S. in Political Science and Public Administration program helps prepare students to advance their careers in public service...
or in the private sector—empowering them to effect positive change in their organizations and their communities. This degree can also help set the foundation for graduate study across a variety of disciplines, including law and public administration. Through Walden's new B.S. in Political Science and Public Administration program, students will have the opportunity to:

- Explore the foundations of American government, as well as contemporary issues and debates related to constitutional law and the judicial process.
- Understand the tools, skills, and strategies of today's successful public-sector leaders and the intricacies involved in shaping public policy.
- Examine the ethical considerations facing leaders today and learn how to build organizations that reflect strong values.
- Address top issues and challenges in 21st-century global politics, from energy and trade to human rights and healthcare.
- Develop essential leadership skills in human resources, communications, planning, and budgeting.

### Learning Outcomes

At the end of the program, students will be able to:

1. Explain the constitutional, legal, institutional, and political foundations of American government.
2. Explain the historical development and contemporary context of public administration in the United States.
3. Define ethical leadership and evaluate its importance in contemporary government and public administration.
4. Explain the principal dimensions of major global issues and their relevance to choices made at the national, state, and local levels.
5. Identify key debates over political principles that have endured over time and describe how these debates manifested in several contemporary political controversies.
6. Explain how public policy is formulated and implemented.
7. Describe how public sector organizations function with their political, social, and economic context.
8. Demonstrate how the methods of political science, public administration, or social entrepreneurship can be used to solve problems and create positive social change.

### Concentrations

- General Program
- Global Issues and Social Justice
- Law and Legal Studies
- Managing in the Public Environment
- Public Service Through Civic Engagement
• Social Entrepreneurship

Degree Requirements

181 total quarter credits
• General education courses (46 cr.)
• Core courses (35 cr.)
• Concentration courses (25 cr., except General Program)
• Elective courses (70 cr., except 95 cr. in General Program)
• Capstone course (5 cr.)

Core Curriculum

General Education Courses (46 cr.)
See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

Core Courses (35 cr.)
• POLI 1001 - American Government and Politics
• PSPA 1002 - Global Issues in Politics
• PSPA 1003 - Political Controversies
• PSPA 3001 - Constitutional Law
• PSPA 2001 - Principles of Public Administration
• PSPA 2002 - The Making of Public Policy
• PSPA 3002 - Ethics in Public Leadership

Capstone Course (5 cr.)
• PSPA 4080 - Capstone

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Political Science and Public Administration program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
General Program

Elective Courses (95 cr.)
Choose 19 Political Science and Public Administration courses. At least 25 credits must be at the 3000–4000 level. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor. RN-BSN courses are not available to students outside the RN-BSN program.

Global Issues and Social Justice
In this concentration, students will develop solutions that enable changes to local and global communities through understanding the international implications of local decisions and the local implications of international decisions. Cultural, political and geographical sensitivity will be highlighted with special emphasis on issues of social justice.

Learning Outcomes
At the end of this program, students will be able to:
1. Explain the constitutional, legal, institutional, and political foundations of American government.
2. Explain the historical development and contemporary context of public administration in the United States.
3. Define ethical leadership and evaluate its importance in contemporary government and public administration.
4. Explain the principal dimensions of major global issues and their relevance to choices made at the national, state, and local levels.
5. Identify key debates over political principles that have endured over time and describe how these debates manifested in several contemporary political controversies.
6. Explain how public policy is formulated and implemented.
7. Describe how public sector organizations function with their political, social, and economic context.
8. Demonstrate how the methods of political science, public administration, or social entrepreneurship can be used to solve problems and create positive social change.
9. Describe current social, political, and economic issues and trends around the world.
10. Discuss ways to promote social justice in communities around the world.

Concentration Curriculum

Concentration Courses (25 cr.)
- PSPA 3040 - Global Social Justice♦
- HLTH 3115 - Public and Global Health♦
- COMM 4001 - Intercultural Communication♦
• PSPA 4040 - Service in the Global Community
• Students must also choose an upper-level course in addition to the four prescribed courses listed above.

**Elective Courses (70 cr.)**

Choose 14 courses from general education, B.S. in Political Science and Public Administration, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor. **Please note:** RN-BSN courses are not available to students outside the RN-BSN program.

**Law and Legal Studies**

In this concentration, students will gain a better understanding and awareness of the legal system in the United States. Students will learn about the structure and processes of the law and how it relates to their personal and professional worlds. The law is an increasingly key aspect of business, government, and other related sectors, and this concentration can help students excel and advance in these arenas.

**Learning Outcomes**

At the end of this program, students will be able to:

1. Explain the constitutional, legal, institutional, and political foundations of American government.
2. Explain the historical development and contemporary context of public administration in the United States.
3. Define ethical leadership and evaluate its importance in contemporary government and public administration.
4. Explain the principal dimensions of major global issues and their relevance to choices made at the national, state, and local levels.
5. Identify key debates over political principles that have endured over time and describe how these debates manifested in several contemporary political controversies.
6. Explain how public policy is formulated and implemented.
7. Describe how public sector organizations function with their political, social, and economic context.
8. Demonstrate how the methods of political science, public administration, or social entrepreneurship can be used to solve problems and create positive social change.
9. Analyze legal debates surrounding key social issues.
10. Explain key legal concepts and cases.
Concentration Curriculum

Required Courses (25 cr.)

- CRJS 2003 - Criminal Law
- PSPA 3010 - Civil Law
- CRJS 3002 - Courts and Judicial Process
- PSPA 4010 - Contemporary Legal Debates

Students must also choose an upper-level course in addition to the four prescribed courses listed above.

Elective Courses (70 cr.)

Choose 14 courses from general education, B.S. in Political Science and Public Administration, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor. Please note: RN-BSN courses are not available to students outside the RN-BSN program.

Managing in the Public Environment

This concentration provides students with information about the context and methods of management in the public sector. The concentration is for students seeking management positions or graduate education in public policy and administration or who will work in non-profit and for-profit organizations that interface with the public sector.

Learning Outcomes

At the end of this course, students will be able to:

1. Explain the constitutional, legal, institutional, and political foundations of American government.
2. Explain the historical development and contemporary context of public administration in the United States.
3. Define ethical leadership and evaluate its importance in contemporary government and public administration.
4. Explain the principal dimensions of major global issues and their relevance to choices made at the national, state, and local levels.
5. Identify key debates over political principles that have endured over time and describe how these debates manifested in several contemporary political controversies.
6. Explain how public policy is formulated and implemented.
7. Describe how public sector organizations function with their political, social, and economic context.
8. Demonstrate how the methods of political science, public administration, or social entrepreneurship can be used to solve problems and create positive social change.
9. Develop solutions to challenges faced by managers in the public and nonprofit sectors.
10. Describe the skills and leadership characteristics that are necessary in effectively managing public programs, processes, and personnel.

**Concentration Curriculum**

**Required Courses (25 cr.)**
- PSPA 3020 - Principles of Public Personnel Management and Human Resources
- PSPA 4020 - New Skills for Leaders in the Public Sector
- PSPA 2020 - Complex Organizations
- CRJS 4402 - Planning and Budgeting

Students must also choose an upper-level course in addition to the four prescribed courses listed above.

**Elective Courses (70 cr.)**
Choose 14 courses from general education, B.S. in Political Science and Public Administration, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor. **Please note:** RN-BSN courses are not available to students outside the RN-BSN program.

**Public Service Through Civic Engagement**
Students will engage in learning the keys to developing meaningful activism that promotes social change through grassroots and intercultural communication and organization. This concentration will also feature community leadership and volunteerism as methods to facilitate social change within the public sector.

**Learning Outcomes**
At the end of this course, students will be able to:
1. Explain the constitutional, legal, institutional, and political foundations of American government.
2. Explain the historical development and contemporary context of public administration in the United States.
3. Define ethical leadership and evaluate its importance in contemporary government and public administration.
4. Explain the principal dimensions of major global issues and their relevance to choices made at the national, state, and local levels.
5. Identify key debates over political principles that have endured over time and describe how these debates manifested in several contemporary political controversies.
6. Explain how public policy is formulated and implemented.
7. Describe how public sector organizations function with their political, social, and economic context.
8. Demonstrate how the methods of political science, public administration, or social entrepreneurship can be used to solve problems and create positive social change.

9. Develop a plan of action for mobilizing individuals and groups to effect positive changes in their communities.

10. Articulate the skills necessary for an effective social change agent and explain their role in leading communities toward positive social change.

**Concentration Curriculum**

**Required Courses (25 cr.)**

- COMM 4001 - Intercultural Communication
- PSPA 3030 - Social Change in the Community
- PSPA 2030 - Leadership and Volunteerism
- PSPA 4030 - Communication for Social Change

Students must also choose an upper-level course in addition to the four prescribed courses listed above.

**Elective Courses (70 cr.)**

Choose 14 courses from general education, B.S. in Political Science and Public Administration, or other Walden bachelor's degree programs. At least 15 credits must be at the 3000–4000 level. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor. **Please note:** RN-BSN courses are not available to students outside the RN-BSN program.

**Social Entrepreneurship**

Social entrepreneurs work with others to combine resources in unique ways to change underlying social structures. In this concentration, students will learn to break through the status-quo, reallocate resources, and creatively address challenges communities encounter. Through planning and budgeting, leadership and volunteerism, and small business entrepreneurship, students will develop the skills to become an agent of change.

**Learning Outcomes**

At the end of this program, students will be able to:

1. Explain the constitutional, legal, institutional, and political foundations of American government.
2. Explain the historical development and contemporary context of public administration in the United States.
3. Define ethical leadership and evaluate its importance in contemporary government and public administration.
4. Explain the principal dimensions of major global issues and their relevance to choices made at the national, state, and local levels.
5. Identify key debates over political principles that have endured over time and describe how these debates manifested in several contemporary political controversies.
6. Explain how public policy is formulated and implemented.
7. Describe how public sector organizations function with their political, social, and economic context.
8. Demonstrate how the methods of political science, public administration, or social entrepreneurship can be used to solve problems and create positive social change.
9. Identify entrepreneurial opportunities that can positively impact local, national, and global communities.
10. Explain the key concepts and methods of social entrepreneurship.

**Concentration Curriculum**

**Required Courses (25 cr.)**
- PSPA 2050 - Social Entrepreneurship
- CRJS 4402 - Planning and Budgeting
- PSPA 2030 - Leadership and Volunteerism
- BUSI 3004 - Entrepreneurship for Small Business
- Students must also choose an upper-level course in addition to the four prescribed courses listed above.

**Elective Courses (70 cr.)**
Choose 14 courses from general education, B.S. in Political Science and Public Administration, or other Walden bachelor’s degree programs. At least 20 credits must be at the 3000–4000 level. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor. **Please note:** RN-BSN courses are not available to students outside the RN-BSN program.
OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a C in the graduate-level course but only a grade of B or better will carry over to the graduate program. Students who receive a C grade will be awarded a grade of C*, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not receive a B or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.

3. AIM courses are (5000-level) graduate courses.*
   a. Tuition for these courses is charged at the undergraduate rate.
   b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
   c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a B or better in each course to have that course applied to the master's program.
- Students who get lower than a B in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   - Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a B or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note: Graduate students cannot register for AIM courses.

|                                           | 2014–2015 Walden University Catalog (September 2014) Page 674 |
Note: These courses are 11 weeks in length.

- HUMN 5722 - Counseling and Psychotherapy Theories
- HUMN 5316 - Techniques of Counseling
- HUMN 5723 - Multicultural Counseling

• HUMN 5103 - Introduction to Addiction
• HUMN 5204 - Assessment in Counseling and Addiction
• HUMN 5202 - Theories, Treatment, and Case Management of Addiction
• HUMN 5203 - Psychopharmacology and Biopsychosocial Considerations
• HUMN 5215 - Lifespan Development

M.S. in Addiction Counseling

These courses are open only to students enrolled in the B.S. in Human Services Addictions concentration or the B.S. in Psychology Addictions concentration. Students may select any or all of these courses. Individual course prerequisites apply.

Note: These courses are 11 weeks in length.

Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their academic advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Child Development
- Minor in Communication
- Minor in Criminal Justice
- Minor in Healthcare Management
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Introductory Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health
Minor in Criminal Justice

The Undergraduate Minor in Criminal Justice is for the non-public policy and administration student who may be interested in law enforcement, the justice system, corrections, homeland security, and social services. With this minor, students can blend contemporary theory on the nature, extent, and cause of crime with the study of national and international criminal justice practices.

*Note:* This minor is not available to students in the B.S. in Criminal Justice program.

**Required (30 cr.)**

- CRJS 1001 - Contemporary Criminal Justice Systems
- CRJS 2001 - Criminology and Social Control
- CRJS 2003 - Criminal Law
  And students choose three of the following:
- CRJS 3001 - Corrections
- CRJS 3002 - Courts and Judicial Process
- CRJS 3003 - Law Enforcement
- CRJS 3004 - Data Analysis for the Criminal Professional
- CRJS 4102 - The Criminal Mind

Minor in Political Science and Public Administration

The Undergraduate Minor in Political Science and Public Administration is for the non-public administration major student who may be interested in learning how to effect positive change in their organizations and their communities. The minor addresses top issues and challenges in 21st-century global politics, from energy and trade to human rights and healthcare. Students also can develop essential leadership skills in human resources, communications, planning, and budgeting.

*Note:* This minor is not available to students in the B.S. in Political Science and Public Administration program.

**Required (30 cr.)**

- POLI 1001 - American Government and Politics
- PSPA 1003 - Political Controversies
- PSPA 2001 - Principles of Public Administration
  Choose three of the following:
- PSPA 1002 - Global Issues in Politics
- PSPA 2002 - The Making of Public Policy
- PSPA 3001 - Constitutional Law
- PSPA 3002 - Ethics in Public Leadership
- PSPA 3020 - Principles of Public Personnel Management and Human Resources
- PSPA 4020 - New Skills for Leaders in the Public Sector
Articulations

B.S. in Criminal Justice to M.S. in Forensic Psychology Articulation

Walden University's advanced undergraduate criminal justice students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's M.S. in Forensic Psychology program.

Requirements

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.
- The student must have completed all general education and core requirements of the Bachelor of Science in Criminal Justice.

*Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Academic Advising Team for more information regarding the Accelerate Into Master's (AIM) program.*

Curriculum

All graduate courses are taken as electives and must be selected from the list below.

*Note: The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.*

Choose up to five of the following courses for the M.S. in Forensic Psychology program:

- FPSY 5101 - Introduction to Forensic Psychology
- FPSY 5720 - Abnormal Behavior
- FPSY 5115 - Understanding Forensic Psychology Research
- FPSY 5125 - Assessment in Forensic Psychology Settings
- FPSY 5135 - Criminal Behavior
- FPSY 5145 - Ethical Issues and Professional Responsibilities in Forensic Psychology

Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master's (AIM) courses and who are graduating (or have graduated) from the B.S. in Criminal Justice program are invited to apply to the M.S. in Forensic Psychology program. Upon acceptance to Walden’s M.S. in Forensic Psychology program, up to five courses can be applied to degree completion requirements.

*• PSYC 6001 - Foundations for Graduate Study in Psychology Required
• FPSY 6101 - Introduction to Forensic Psychology Students who successfully complete FPSY 5101 - Introduction to Forensic Psychology (5 cr.) with a B or better can have this course waived.*
• FPSY 6720 - Abnormal Behavior♦ Students who successfully complete FPSY 5720 - Abnormal Psychology (5 cr.) with a B or better can have this course waived.
• FPSY 6115 - Understanding Forensic Psychology Research♦ Students who successfully complete FPSY 5115 - Understanding Forensic Psychology Research (5 cr.) with a B or better can have this course waived.
• FPSY 6125 - Assessment in Forensic Psychology Settings Students who successfully complete FPSY 5125 - Assessment in Forensic Psychology (5 cr.) with a B or better can have this course waived.
• FPSY 6135 - Criminal Behavior♦ Students who successfully complete FPSY 5135 - Criminal Behavior (5 cr.) with a B or better can have this course waived.
• FPSY 6145 - Ethical Issues and Professional Responsibilities in Forensic Psychology♦ Students who successfully complete FPSY 5145 - Ethical Issues and Professional Responsibilities in Forensic Psychology (5 cr.) with a B or better can have this course waived.
• FPSY XXXX Specialization Elective (5 cr.) Required
• FPSY XXXX Specialization Elective (5 cr.) Required
• FPSY XXXX Specialization Elective (5 cr.) Required
• FPSY XXXX Specialization Elective (5 cr.) Required
• PSYC 6393 - M.S. in Psychology Capstone OR FPSY 6915 - Field Experience Required

**B.S. in Criminal Justice to M.S. in Psychology Articulation**

Walden University's advanced undergraduate criminal justice students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's M.S. in Psychology program.

**Requirements**

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.
- The student must have completed all general education and core requirements of the Bachelor of Science in Criminal Justice.

*Note: Students are advised to consult the [Walden University Student Handbook](#) and contact a member of the Academic Advising Team for more information regarding the Accelerate Into Master's (AIM) program.*

**Curriculum**

All graduate courses are taken as electives and must be selected from the list below.
**Note:** The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to five of the following courses for the M.S. in Psychology program:

- PSYC 5205 - History and Systems of Psychology
- PSYC 5211 - Contemporary Issues in Psychology
- PSYC 5235 - Cognitive Psychology
- PSYC 5240 - Human Motivation
- PSYC 5245 - Social Psychology
- PSYC 5305 - Statistics 1
- PSYC 5310 - Research Design
- PSYC 5315 - Tests and Measurement
- PSYC 5701 - Culture and Psychology

**Articulation Requirements**

Walden University students who have successfully completed Accelerate Into Master's (AIM) courses and who are graduating (or have graduated) from the B.S. in Criminal Justice program are invited to apply to the M.S. in Psychology program. Upon acceptance to Walden’s M.S. in Psychology program, up to five courses can be applied to degree completion requirements.

- PSYC 6001 - Foundations for Graduate Study in Psychology **Required**

Curriculum

All graduate courses are taken as electives and must be selected from the list below.

Note: The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.
Choose up to five of the following courses for the Master of Public Administration (M.P.A.) program:

• MMPA 5200 - Introduction to Public Administration
• MMPA 5405 - Ethics and Social Justice
• MMPA 5420 - Organizational Management and Leadership
• MMPA 5431 - Finance and Budgeting for the Public Sector
• MMPA 5435 - Human Resource Management: Building a Capable Workforce
• MMPA 5451 - Public Policy Analysis
• MMPA 5480 - Applied Research and Evaluation Methods

Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master's (AIM) courses and who are graduating (or have graduated) from the B.S. in Political Science and Public Administration program are invited to apply to the Master of Public Administration program.
Upon acceptance to Walden’s Master of Public Administration (M.P.A.) program, up to five courses can be applied to degree completion requirements.

- MMPA 6115 - Foundations for Graduate Study **Required**
- MMPA 6200 - Principles of Public Administration Students who successfully complete MMPA 5200 Introduction to Public Administration (5 cr.) with a B or better can have this course waived.
- MMPA 6405 - Ethics and Social Justice Students who successfully complete MMPA 5405 Ethics and Social Justice (5 cr.) with a B or better can have this course waived.
- MMPA 6420 - Organizational Management and Leadership Students who successfully complete MMPA 5420 Organizational Management and Leadership (5 cr.) with a B or better can have this course waived.
- MMPA 6431 - Finance and Budgeting for the Public Sector Students who successfully complete MMPA 5431 Finance and Budgeting for the Public Sector (5 cr.) with a B or better can have this course waived.
- MMPA 6435 - Human Resource Management: Building a Capable Workforce Students who successfully complete MMPA 5435 Human Resource Management: Building a Capable Workforce (5 cr.) with a B or better can have this course waived.
- MMPA 6461 - Public Sector Economics **Required**
- MMPA 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination **Required**
- MMPA 6451 - Public Policy Analysis Students who successfully complete MMPA 5451 Public Policy Analysis (5 cr.) with a B or better can have this course waived.
- MMPA 6480 - Applied Research and Evaluation Methods Students who successfully complete MMPA 5480 Applied Research and Evaluation Methods (5 cr.) with a B or better can have this course waived.
- MMPA 6910 - Master of Public Administration Capstone **Required**

**B.S. in Political Science and Public Administration to Master of Public Health (MPH) Articulation**

Walden University's advanced undergraduate political science and public administration students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's Master of Public Health program.

**Requirements**

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the above courses.
- The student must have completed all general education and core requirements of the Bachelor of Science in Political Science and Public Administration.
**Note:** Students are advised to consult the Walden University Student Handbook and contact a member of the Academic Advising Team for more information regarding the Accelerate Into Master's (AIM) program.

**Curriculum**

All graduate courses are taken as electives and must be selected from the list below.

*Note:* The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to four of the following courses for the Master of Public Health (M.P.H.) program.

- PUBH 5101 - Principles of Communication in Public Health
- PUBH 5002 - Essentials of Public Health: A Case Study Approach
- PUBH 5115 - Social, Behavioral, and Cultural Factors in Public Health
- PUBH 5125 - Biostatistics
- PUBH 5145 - Epidemiology
- PUBH 5165 - Environmental Health

*Note:* It is recommended that students complete PUBH 5101 Principles of Communication in Public Health prior to enrolling in any other M.P.H. courses. Further, students should elect to enroll in PUBH 5145 Epidemiology only after their successful completion of PUBH 5125 Biostatistics.

**Articulation Requirements**

Walden University students who have successfully completed Accelerate Into Master's (AIM) courses and who are graduating (or have graduated) from the B.S. in Political Science and Public Administration program are invited to apply to the Master of Public Health (M.P.H.) program. Upon acceptance to Walden’s Master of Public Health (M.P.H.) program, up to five courses can be applied to degree completion requirements.

- PUBH 6101 - Principles of Communication in Public Health Students who successfully complete PUBH 5101 Principles of Communication in Public Health (4 cr.) with a B or better can have this course waived.
- PUBH 6002 - Essentials of Public Health: A Case Study Approach Students who successfully complete PUBH 5002 Essentials of Public Health: A Case Study Approach (4 cr.) with a B or better can have this course waived.
- PUBH 6115 - Social, Behavioral, and Cultural Factors in Public Health Students who successfully complete PUBH 5115 Social, Behavioral, and Cultural Factors in Public Health (4 cr.) with a B or better can have this course waived.
- PUBH 6125 - Biostatistics Students who successfully complete PUBH 5125 Biostatistics (4 cr.) with a B or better can have this course waived.
- PUBH 6135 - Leadership, Professionalism, and Ethics in Public Health Practice Required
- PUBH 6145 - Epidemiology Students who successfully complete PUBH 5145 Epidemiology (4 cr.) with a B or better can have this course waived.
- PUBH 6155 - Research in Public Health Required
- PUBH 6165 - Environmental Health Students who successfully complete PUBH 5165 Environmental Health (4 cr.) with a B or better can have this course waived.
- PUBH 6170 - Public Health Biology Required
- PUBH 6175 - Health Policy and Management Required
- PUBH 6227 - Health Informatics Required
- PUBH 6235 - Program Design, Planning, and Evaluation Required
- PUBH 6260 - Legal and Regulatory Aspects of Public Health Required
- PUBH 6635 - Practicum I: Field Experience in Public Health Required
- PUBH 6636 - Practicum II: Capstone Experience in Public Health Required
GRADUATE CERTIFICATE
PROGRAMS

Graduate Certificate in Criminal Justice

In this certificate program, students focus their understanding of key issues confronting the American criminal justice system, as well as policy analysis and the contemporary decision-making models. This certificate is designed for criminal justice professionals in policing, the courts, corrections, security, and associated support agencies. Students must meet the master’s program admission requirements. Credit from courses taken for a certificate can be applied toward the Master of Public Administration or the M.S. in Nonprofit Management and Leadership. Students must show progress and maintain performance in a manner identical to a degree program. Students track their progress in their program of study, similar to degree-seeking students. Students must receive a B or better in each course. Note: A grade of B– is not acceptable.

Graduate Certificate in Public Policy

This certificate program helps students improve their ability to create and evaluate policies that engage citizens and contribute positively to society. Designed for public and nonprofit administrators who are intimately involved in both executive and legislative board policy and decision-making, the certificate can help students develop the foundational skills and knowledge required to create and assess the financial implications of forward-thinking policy. Students must meet the master's program admission requirements. Credit from courses taken for a certificate can be applied toward the Master of Public Administration or the M.S. in Nonprofit Management and Leadership. Students must show progress and maintain performance in a manner identical to a degree program. Students track their progress in their program of study, similar to degree-seeking students. Graduate Certificate in Strategic Planning and Public Policy

In this certificate program, students will enrich their understanding of how public policy is created and implemented. Designed for emerging leaders in law enforcement, corrections, and probation and parole, the certificate will give students the opportunity to study how to develop effective strategic plans that can further their organization's mission and vision and adhere to federal, state, and local policies.

Students must meet the master's program admission requirements. Credit from courses taken for a certificate can be applied toward the Master of Public Administration or the M.S. in Nonprofit Management and Leadership.

Students must show progress and maintain performance in a manner identical to a degree program. Students track their progress in their program of study, similar to degree-seeking students. Students must receive a B or better in each course. Note: A grade of B– is not acceptable.

M.S. in Criminal Justice

Walden University's Master's in Criminal Justice program will prepare students to effectively work within criminal justice agencies, governmental organizations, and the private sector. The programs comprise a core of contemporary theory and practice as well as the study of national and international issues in the administration of criminal justice. This includes the intersections of management of local, state, and federal criminal justice systems. Thus, it provides the ability to practically apply knowledge and skills that will impact society. With a unique blend of criminal behavioral theory, human services, technology, homeland security, and management, the program will provide students with critical 21st-century skills.

Learning Outcomes

At the end of the program, students will be able to:
1. Utilize theory and research to analyze historical trends and current perspectives in criminal justice.
2. Use research to evaluate factors related to crime and the impact of crime on criminal justice policies, practices, and procedures.
3. Evaluate the impact of U.S. constitutional policy and procedures on the criminal justice system.
4. Analyze the impact of the criminal justice process on victims and perpetrators.
5. Synthesize principles from criminal justice theories, processes, and practices to promote social justice and positive social change.
6. Compare the structural functions and interactions of law enforcement, courts, and corrections within the criminal justice system at the local, state, and federal level.
7. Discuss how criminal justice laws and policies are adopted, implemented, and evaluated.

Specializations

- General Program
- Emergency Management
- Homeland Security Policy and Coordination
- Law and Public Policy
- Public Policy Analysis
- Public Management Leadership
- Terrorism, Mediation, and Peace
- Self-Designed
Degree Requirements

- General Program: 46 total quarter credits; with optional specialization: 61 total credits
- Foundation course (1 cr.)
- Core courses (45 cr.)
- Optional Specialization Courses (15 cr.)

Learning Outcomes

At the end of the program, students will be able to:
1. Utilize theory and research to analyze historical trends and current perspectives in criminal justice.
2. Use research to evaluate factors related to crime and the impact of crime on criminal justice policies, practices, and procedures.
3. Evaluate the impact of U.S. constitutional policy and procedures on the criminal justice system.
4. Analyze the impact of the criminal justice process on victims and perpetrators.
5. Synthesize principles from criminal justice theories, processes, and practices to promote social justice and positive social change.
6. Compare the structural functions and interactions of law enforcement, courts, and corrections within the criminal justice system at the local, state, and federal level.
7. Discuss how criminal justice laws and policies are adopted, implemented, and evaluated.

**Homeland Security Policy and Coordination**

Man-made and natural disasters alike have brought homeland security issues to the forefront of public policy. This specialization provides students the opportunity to explore the implementation of protective measures and policies that do not compromise individual rights and freedoms, as well as collaboration between public security agencies. This specialization also
focuses on various approaches to the National Incident Management System (NIMS) and other
dynamics of homeland security issues.

Specialization Curriculum (15 cr.)

Law and Public Policy

Legal decisions and the law have a significant impact on the creation of public policy. Students
discover the relationships between law and public policy and access vital legal knowledge
available to public policy practitioners. Students gain a solid background in legal concepts, cases,
and current trends that provide them with a head start if they decide to pursue a law degree or if
they encounter legal questions in their workplace.

Specialization Curriculum (15 cr.)

- CRJS 6810 - Fundamentals of Law and Public Policy
- CRJS 6811 - Legal Research for Policy Practitioners
- CRJS 6812 - Contemporary Cases and Issues in the Courts

Terrorism, Mediation, and Peace

The threat of terrorism is a constant concern prompting a continuing focus on preventing and resolving terrorist attacks. In this specialization, students study the immediate and long-term implications of anti-terrorist legislation and policies. Students examine how terrorism policies are drafted and enforced while analyzing the ethical issues related to human rights and the psychology of terrorism. They study the effects of disaster, crisis, and trauma and the appropriate interventions for individuals and groups. Students have the opportunity to explore the roots of international and domestic terrorism, the catalysts and motivations for terrorist acts, and how media and technology may aid or counter terrorist activities.

Specialization Curriculum (15 cr.)

Public Management Leadership

With unprecedented fiscal challenges and rising performance expectations facing public and nonprofit institutions, managers must be prepared to apply core business principles to improve the efficiencies and effectiveness of their organizations. In this specialization, students apply a systems perspective as they develop strategies for organizational change in the public organization of their choice. Students discover how transformative change occurs in complex public systems and learn to use the language of leadership to motivate, inspire, and competently lead their organization and shape public policy.

Specialization Curriculum (15 cr.)

Self-Designed

Students create their own learning experience to help broaden their understanding of criminal justice theories and issues. They have the flexibility to design a program that may include homeland security; policy analysis; or terrorism, mediation, and peace. Students explore the topics that interest them most and closely match their personal and professional goals.

Specialization Curriculum (15 cr.)

Choose any three courses from among the Master of Science in Criminal Justice program’s specializations.

M.S. in Criminal Justice Leadership and Executive Management

The M.S. in Criminal Justice program will prepare students to effectively work within criminal justice agencies, governmental organizations, and the private sector. The specializations comprise a core of contemporary theory and practice as well as the study of national and international issues in the administration of criminal justice. This includes the intersections of management of local, state, and federal criminal justice systems. Thus, the program provides students the opportunity to practically apply knowledge and skills that will impact society. With a unique blend of criminal behavioral theory, human services, technology, homeland security, and management, the program will provide students with critical 21st-century skills.

Learning Outcomes

At the end of the program, students will be able to:

1. Utilize theory and research to analyze historical trends and current perspectives in criminal justice.
2. Use research to evaluate factors related to crime and the impact of crime on criminal justice policies, practices, and procedures.
3. Evaluate the impact of U.S. constitutional policy and procedures on the criminal justice system.
4. Analyze the impact of the criminal justice process on victims and perpetrators.
5. Synthesize principles from criminal justice theories, processes, and practices to promote social justice and positive social change.
6. Compare the structural functions and interactions of law enforcement, courts, and corrections within the criminal justice system at the local, state, and federal level.
7. Discuss how criminal justice laws and policies are adopted, implemented, and evaluated.
8. Evaluate the management philosophies used in managing human resources in criminal justice organizations.
9. Discuss the leadership skills needed for working with diverse populations.

Emergency Management

The emergency situations we face in today's complex environment call for a new leadership approach. This specialization offers emergency response professionals the skills to lead, manage, and motivate others during emergencies; to build confident and capable teams; and to address challenging ethical situations that may arise during the course of duty.

Law and Public Policy

Legal decisions and the law have a significant impact on the creation of public policy. Students discover the relationships between law and public policy and access vital legal knowledge available to public policy practitioners. Students gain a solid background in legal concepts, cases, and current trends that provide them with a head start if they decide to pursue a law degree or if they encounter legal questions in their workplace.

Choose any three courses from among the Master of Science in Criminal Justice Leadership and Executive Management program's specializations.

M.S. in Emergency Management
The M.S. in Emergency Management program offers a comprehensive foundation on the history, organizational structure, systems, and concerns that shape the management of disasters and other emergencies. Topics include public safety issues; managing public safety organizations; applied research and evaluation methods; and strategies for assessing, mitigating, and responding to emergency situations. The curriculum features case studies that focus on recent disasters, offering an opportunity for students to build their critical-thinking skills and grow into the next generation of leaders in this relatively new, emerging profession. The program offers the opportunity to help prepare to earn certificates from the Federal Emergency Management Agency (FEMA)'s Emergency Management Institute.

Learning Outcomes
At the end of this program, students will be able to:
1. Apply the theoretical underpinnings of emergency management to practice.
2. Apply different research methodological approaches to theoretical and practical issues in emergency management.
3. Interpret and analyze research data results related to emergency management.
4. Critically analyze the emergency management cycle (mitigation, preparedness, response, and recovery) as applied to urban and rural settings.
5. Demonstrate competency in assessing risk susceptibility, resilience, resistance, and vulnerability among communities and organizations.
6. Critically evaluate the role and purpose of response and recovery in emergency planning and policy development and implications for social change.
7. Demonstrate advanced management skills specific to the needs of emergency management.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Emergency Management program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

General Program

Electives (10 cr.)

Select two courses from the M.S. in Emergency Management specializations.

Criminal Justice

The M.S. in Emergency Management program with a specialization in Criminal Justice explores emergency management philosophies and principles as they relate to the criminal justice field. Students study ways to establish command and control in emergency situations, develop a stronger understanding of critical incident planning, and can gain insight as to how natural and human-made disasters impact the psychology of individuals and groups. Topics include current trends in cyber crime, terrorism, and public health; the technologies used to track and apprehend criminals; and strategies for dealing with trauma. The program emphasizes the importance and development of culturally appropriate service delivery programs and interventions for individuals affected by disasters. Coursework can also help prepare students to earn certificates from the Federal Emergency Management Agency (FEMA)'s Emergency Management Institute.

Specialization Curriculum (15 cr.)

- MSEM 6137 - The Nature of Crime and Criminology
- MSEM 6215 - Controversies in Criminal Justice
- MSEM 6217 - Technological Solutions and 21st-Century Crime
Homeland Security

The M.S. in Emergency Management program with a specialization in Homeland Security focuses on the broad range of programs, principles, and processes that support homeland security. Students explore the role that homeland security plays in both private and public sectors; analyze the threats that shape and influence U.S. security today; and can develop relevant skills in leadership, planning, and policy development. Coursework covers the history, concepts, policies, organization, and strategies related to homeland security as well as topics that include terrorism, threat assessment, contingency planning, communication, technology, and ethical and legal issues. Students have the opportunity to apply fundamental concepts and principles of homeland security to case studies and develop their own homeland security plan. The curriculum can also help prepare students to earn certificates from the Federal Emergency Management Agency (FEMA)’s Emergency Management Institute.

Specialization Curriculum (15 cr.)

- MSEM 6830 - Current Issues in Homeland Security
- MSEM 6831 - Critical Incident Leadership and Planning
- MSEM 6771 - Terrorism: A Systematic Approach for Emergency Preparedness

Public Management and Leadership

The M.S. in Emergency Management program with a specialization in Public Management and Leadership focuses on the multidisciplinary issues of preparedness, mitigation, response, and recovery in anticipating and rebuilding from disasters as they relate to public management. Students can study ways to coordinate and manage emergency situations, develop leadership skills for overseeing emergency programs, and explore the technical demands of emergency situations. Topics include managing situations that deal with the uncertainty, the nature and methods of transformative change, and leadership strategies for influencing and shaping public policy. Students have an opportunity to apply strategic scenarios to create organizational change for a public organization of their choice. The curriculum can also help prepare students to earn certificates from the Federal Emergency Management Agency (FEMA)’s Emergency Management Institute.

Specialization Curriculum (15 cr.)

- MSEM 6390 - Strategic Context of Public Management and Leadership
- MSEM 6391 - Transformative Change in a Shared-Power World
- MSEM 6392 - The Language of Leadership

Terrorism and Emergency Management

The M.S. in Emergency Management program with a specialization in Terrorism and Emergency Management focuses on the history, organizational systems, planning, and response associated with public crises, with an emphasis on terrorism. Students can explore and analyze terrorism and counterterrorism efforts, develop the critical-thinking skills required to address public crises, and study policies that pertain to domestic and international terrorism. Topics include terrorism
and public health, bioterrorism, cyber terrorism, risk assessment, and the components of a systemic preparedness infrastructure. Students have an opportunity to analyze the U.S. Patriot Act and similar legislation and policies, and discuss their impact on U.S. constitutional freedoms. The curriculum can also help prepare students to earn certificates from the Federal Emergency Management Agency (FEMA)'s Emergency Management Institute.

Specialization Curriculum (15 cr.)

- MSEM 6320 - Public Policy Implications of Terrorism Legislation and Policies♦
- MSEM 6740 - Disaster, Crisis, and Trauma♦
- MSEM 6771 - Terrorism: A Systematic Approach for Emergency Preparedness♦

M.S. in Nonprofit Management and Leadership

Nonprofit organizations employ a sizable and increasing share of the nation's workforce, with employment growth outpacing a number of major industries. The M.S. in Nonprofit Management and Leadership blends academic theory with hands-on experience so students can learn, explore, and apply strategies related to the nonprofit sector. Students gain the management and organizational skills they need to lead diverse and complex nonprofit organizations and to serve as social change agents in local and global communities.

Learning Outcomes

At the end of this program, students will be able to:

1. Understand and apply concepts, principles, and processes related to nonprofit organizations in domestic and international settings.
2. Apply relevant ethical and legal guidelines and practices in public, private, and nonprofit organizations.
3. Understand cultural diversity issues and apply cultural competency in public, private, and nonprofit organizations.
4. Understand and use appropriate statistics, research methodology, and program evaluation to conduct research related to public, private, and nonprofit organizations.
5. Apply concepts, principles, and processes related to budget, finance, resource development, and strategic planning to nonprofit organizations.
6. Apply strategies related to marketing, public relations, and communication in nonprofit organizations.
7. Understand and apply strategies for acquiring, managing, developing, and retaining volunteers and board members in nonprofit organizations.
8. Understand and apply theories, concepts, and practices related to leading and managing in public, private, and nonprofit organizations.
10. Apply concepts, theories, and skills gained to create positive social change to public, private, and nonprofit organizations in domestic and international communities.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Nonprofit Management and Leadership program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Master of Public Administration (MPA)

As the public and private sectors increasingly evolve and overlap, there will be an increasing demand for leaders and managers who are scholar-practitioners. The Master of Public Administration (MPA) program prepares professionals to excel in this increasingly complex and collaborative environment. The program offers students an opportunity to directly apply academic theories and skills in their own communities, making the learning experience personally meaningful while creating positive social change.

Learning Outcomes

At the end of the program, students will be able to:

1. Describe key leadership concepts and theories that can be used to effectively lead and manage in the public sector.
2. Determine appropriate skills needed for participating in and contributing to public and nonprofit policy processes.
3. Critically evaluate strategies for resolving public policy and administration problems in a global economic and political environment.
4. Develop ethical solutions to advance and improve the lives of citizens and organizations.
5. Apply models that represent best practices in utilizing diverse perspectives in local, state, national, and international public agencies.

Specializations

Students who wish to gain additional knowledge in a specialized area can complete three courses in a specialization area. Courses must be taken in the order presented.

- General Program (see Course Sequence below)
- Criminal Justice
- Emergency Management
- Health Policy
- Homeland Security Policy and Coordination
- International Nongovernmental Organizations (NGOs)
- Law and Public Policy
• Local Government Management for Sustainable Communities
• Nonprofit Management and Leadership
• Policy Analysis
• Public Management and Leadership
• Terrorism, Mediation, and Peace

Degree Requirements
• General Program: 56 total quarter credit hours; with optional specialization: 61 quarter credit hours
• Foundation course (1 cr.)
• Core courses (40 cr.)
• Elective courses (10 cr.)

Optional Specialization Courses* (15 cr.)
• Capstone course (5 cr.)

Core Curriculum
Students can complete the General Program by taking the Core Curriculum courses. Courses are 12 weeks in length.

Foundation Course (1 cr.)
• MMPA 6115 - Foundations for Graduate Study

Core Courses (40 cr.)
• MMPA 6200 - Principles of Public Administration♦
• MMPA 6405 - Ethics and Social Justice♦
• MMPA 6420 - Organizational Management and Leadership♦
• MMPA 6431 - Finance and Budgeting for the Public Sector♦
• MMPA 6435 - Human Resource Management: Building a Capable Workforce♦
• MMPA 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination♦
• MMPA 6451 - Public Policy Analysis♦
• MMPA 6480 - Applied Research and Evaluation Methods♦

Capstone Course (5 cr.)
• MMPA 6910 - Master of Public Administration Capstone

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Master of Public Administration (M.P.A.) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Criminal Justice**

This specialization is designed for criminal justice professionals, including supervisors and managers in policing, courts, corrections, security, and associated support agencies, who aspire to move into upper-level management and administrative assignments. The coursework includes an in-depth review and discussion of contemporary decision-making models and issues confronting the U.S. criminal justice system.

**Specialization Curriculum (15 cr.)**

- MMPA 6137 - The Nature of Crime and Criminology♦
- MMPA 6215 - Controversies in Criminal Justice♦
- MMPA 6217 - Technological Solutions and 21st-Century Crime♦

**Emergency Management**

**Specialization Curriculum (15 cr.)**

- MMPA 6101 - Critical Issues in Emergency Management♦
Global Leadership

In the Global Leadership specialization, students can prepare to take an active role in helping global south regions or developing areas of the world achieve progress. Through their coursework, students explore sustainability frameworks and models, strategies for building capacity for community change, and approaches to ensuring effective and timely management decisions despite complex and precarious conditions. This specialization also gives students the opportunity to develop, manage, and lead implementation of a strategic plan for an international public or nonprofit organization or for a U.S. organization with an international focus.

Curriculum

Foundation Course (1 cr.)
- MMPA 6115 - Foundations for Graduate Study

Core Courses (40 cr.)
- MMPA 6200 - Principles of Public Administration
- MMPA 6405 - Ethics and Social Justice

Homeland Security Policy and Coordination

Specialization Curriculum (15 cr.)

- MMPA 6832 - Terrorism: Legislation and Policy
- MMPA 6346 - Terrorism: A Systemic Approach for Emergency Preparedness
- MMPA 6347 - Critical Incident Planning and Leadership
International Nongovernmental Organizations (NGOs)

Specialization Curriculum (15 cr.)

- MMPA 6333 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness
- MMPA 6334 - Crossing Borders: U.S. and International NGO Cultures and Environments
- MMPA 6335 - Placing NGOs in the Global Context

Law and Public Policy

Students gain an understanding of the relationships between law and public policy and access vital legal knowledge available to public policy practitioners.

Specialization Curriculum (15 cr.)

- MMPA 6810 - Fundamentals of Law and Public Policy
- MMPA 6811 - Legal Research for Policy Practitioners
- MMPA 6812 - Contemporary Cases and Issues in the Courts

Local Government Management for Sustainable Communities

Students gain an understanding of the interrelated elements that make a community viable. Additionally, students access the tools and resources for sustainable community development as students prepare for a career as a town manager, department head, or director of a social service organization.

Specialization Curriculum (15 cr.)

- MMPA 6820 - Elements of Sustainable and Livable Communities
- MMPA 6821 - Tools for Sustainable Community Development
- MMPA 6822 - Current Issues in Regional and Local Public Policy

Nonprofit Management and Leadership

Students gain a practical understanding of the principles and processes related to nonprofit organizations.

Specialization Curriculum (15 cr.)

- MMPA 6850 - Introduction to the Nonprofit Sector
- MMPA 6851 - Board Governance and Volunteer Management
- MMPA 6852 - Resource Development
Policy Analysis

Students are prepared to function knowledgeably and to work collaboratively to help shape public policy development and implementation.

Specialization Curriculum (15 cr.)

- MMPA 6380 - Policy and Politics in American Political Institutions
- MMPA 6381 - Public Policy and Evaluation
- MMPA 6382 - Public Policy and Finance

Public Management and Leadership

With unprecedented fiscal challenges and rising performance expectations facing public and nonprofit institutions, managers must be prepared to apply core business principles to improve the efficiencies and effectiveness of their organizations. In this specialization, students will apply a systems perspective as they develop strategies for organizational change in the public organization of their choice. They will discover how transformative change occurs in complex public systems, and will learn to use the language of leadership to motivate, inspire, and competently lead their organizations and shape public policy.

Specialization Curriculum (15 cr.)

- MMPA 6390 - Strategic Context of Public Management and Leadership
- MMPA 6391 - Transformative Change in a Shared-Power World
- MMPA 6392 - The Language of Leadership

Terrorism, Mediation, and Peace

The threat of terrorism is a constant concern prompting a continuing focus on preventing and resolving terrorist attacks. In this specialization, students will learn the immediate and long-term implications of anti-terrorist legislation and policies. They will study how terrorism policies are drafted and enforced while they analyze the ethical issues related to human rights and the psychology of terrorism. Students will explore the effects of disaster, crisis, and trauma and the appropriate interventions for individuals and groups. And students will examine the roots of international and domestic terrorism, the catalysts and motivations for terrorist acts, and how media and technology may aid or counter terrorist activities.

Specialization Curriculum (15 cr.)

- MMPA 6832 - Terrorism: Legislation and Policy
- MMPA 6740 - Disaster, Crisis, and Trauma
- MMPA 6741 - Psychology of Terrorism
Master of Public Policy (MPP)

Walden University's Master of Public Policy (MPP) program will prepare students to work effectively within government agencies, governmental organizations, and the private sector. This includes the intersections of local, state, and federal systems and among socioeconomic sectors. Thus, it provides the ability to apply knowledge and skills practically that will impact society. The program comprises a core of contemporary theory and practice of policy creation, analysis, and implementation. With a unique blend of policy analysis and econometrics, the program will provide students with critical analytical skills essential for public policy professionals and organizational leaders. The MPP will attract leaders in public policy, and those aspiring to be leaders, in a wide variety of organizations which create, operate, analyze, or live by public policy.

Learning Outcomes

Upon completion of the Master of Public Policy, students will be able to:
1. Explain how public policies are developed, approved, implemented, and evaluated.
2. Apply major theories and concepts associated with the development of U.S. public policy and public administration.
3. Apply a variety of data analysis methods in the study of public policy issues.
4. Apply a variety of research and design methods in the study of public policy issues.
5. Describe how to implement methods of organizational change and development while adhering to ethical standards of practice.
6. Design strategies for collaboration across the research, policy, and practice sectors to solve complex problems.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Master of Public Policy (M.P.P.) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Criminal Justice

This specialization is designed for criminal justice professionals, including supervisors and managers in policing, courts, corrections, security, and associated support agencies, who aspire to move into upper-level management and administrative assignments. The coursework includes an in-depth review and discussion of contemporary decision-making models and issues confronting the U.S. criminal justice system.

Specialization Curriculum (15 cr.)

- MMPP 6137 - The Nature of Crime and Criminology♦
- MMPP 6215 - Controversies in Criminal Justice♦
- MMPP 6217 - Technological Solutions and 21st-Century Crime♦

Emergency Management

The emergency situations we face in today's complex environment call for a new leadership approach. This specialization offers emergency response professionals the skills to lead, manage, and motivate others during emergencies; to build confident and capable teams; and to address challenging ethical situations that may arise during the course of duty.

Specialization Curriculum (15 cr.)

- MMPP 6100 - Critical Issues in Emergency Management
- MMPP 6200 - Risk Assessment, Preparedness, and Disaster Mitigation♦
- MMPP 6300 - Disaster Response and Recovery♦

Health Policy

Healthcare has undergone radical changes over the past several years. The major business enterprises that now govern the industry have changed the way healthcare is delivered, and managers must quickly adapt to become successful. This specialization helps students gain
valuable knowledge about health delivery systems, health policy, health administration, and health finance centers so they can manage effectively and successfully in this unique environment.

**Specialization Curriculum (15 cr.)**

- MMPP 6840 - Health Policy and Management
- MMPP 6400 - Public Health Leadership and Systems Thinking
- MMPP 6420 - Health Economics

**Homeland Security Policy and Coordination**

Man-made and natural disasters alike have brought homeland security issues to the forefront of public policy. This specialization provides students with the opportunity to explore the implementation of protective measures and policies that do not compromise individual rights and freedoms, as well as collaboration between public security agencies. This specialization also focuses on various approaches to the National Incident Management System (NIMS) and other dynamics of homeland security issues.

**Specialization Curriculum (15 cr.)**

- MMPP 6320 - Public Policy Implications of Terrorism Legislation and Policies
- MMPA 6321 - Terrorism: A Systemic Approach for Emergency Preparedness
- MMPA 6322 - Critical Incident Planning and Leadership

**International Nongovernmental Organizations (NGOs)**

In an era of increasing globalization, it is important for leaders of nonprofit organizations and government departments at the local, state, and national level to know how to operate in an international environment. This specialization explores how countries organize, regulate, and foster nongovernmental activities; how international intergovernmental organizations operate; and how representatives of these organizations can learn from, partner with, and work within organizations worldwide. By focusing on the effects of globalization and the cultures and sociopolitical environments of diverse nations and organizations, students in this specialization learn how to work effectively with nongovernmental, voluntary, and intergovernmental organizations around the world.

**Specialization Curriculum (15 cr.)**

- MMPP 6333 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness
- MMPP 6334 - Crossing Borders: U.S. and International NGO Cultures and Environments
- MMPP 6335 - Placing NGOs in the Global Context
Law and Public Policy

Legal decisions and the law have a significant impact on the creation of public policy. Students discover the relationships between law and public policy and access vital legal knowledge available to public policy practitioners. They gain a solid background in legal concepts, cases, and current trends that provide them with a head start if they decide to pursue a law degree or if they encounter legal questions in their workplace.

Specialization Curriculum (15 cr.)

- MMPP 6810 - Fundamentals of Law and Public Policy
- MMPP 6811 - Legal Research for Policy Practitioners
- MMPP 6812 - Contemporary Cases and Issues in the Courts

Local Government Management for Sustainable Communities

In this specialization, students study how to create and maintain sustainable communities that are environmentally sound, economically prosperous, and socially equitable. They explore the interrelated elements that make a community viable and access the tools and resources for sustainable community development. This specialization provides students the opportunity to gain skills to succeed in roles such as town manager, department head, or director of a social service organization.

Specialization Curriculum (15 cr.)

- MMPP 6820 - Elements of Sustainable and Livable Communities
- MMPP 6821 - Tools for Sustainable Community Development
- MMPP 6822 - Current Issues in Regional and Local Public Policy

### Nonprofit Management and Leadership

As governmental and nongovernmental institutions increasingly overlap and evolve, the demand for well-educated management professionals to excel in public service continues to grow. This specialization helps students gain skills to excel in the public or nonprofit sector by understanding how to work with government and businesses to address shared issues.

**Specialization Curriculum (15 cr.)**

- MMPP 6850 - Introduction to the Nonprofit Sector
- MMPP 6851 - Board Governance and Volunteer Management
- MMPP 6852 - Resource Development

### Public Management and Leadership

With unprecedented fiscal challenges and rising performance expectations facing public and nonprofit institutions, managers must be prepared to apply core business principles to improve the efficiencies and effectiveness of their organizations. In this specialization, students apply a systems perspective as they develop strategies for organizational change in the public organization of their choice. They discover how transformative change occurs in complex public systems and study ways to use the language of leadership to motivate, inspire, and competently lead their organization and shape public policy.

**Specialization Curriculum (15 cr.)**

- MMPP 6390 - Strategic Context of Public Management and Leadership
- MMPP 6391 - Transformative Change in a Shared-Power World
- MMPP 6392 - The Language of Leadership

### Terrorism, Mediation, and Peace

The threat of terrorism is a constant concern prompting a continuing focus on preventing and resolving terrorist attacks. In this specialization, students study the immediate and long-term implications of anti-terrorist legislation and policies. They also examine how terrorism policies
are drafted and enforced while analyzing the ethical issues related to human rights and the psychology of terrorism. Students explore the effects of disaster, crisis, and trauma and the appropriate interventions for individuals and groups. They examine the roots of international and domestic terrorism, the catalysts and motivations for terrorist acts, and how media and technology may aid or counter terrorist activities.

**Specialization Curriculum (15 cr.)**

- MMPP 6320 - Public Policy Implications of Terrorism Legislation and Policies♦
- MMPP 6740 - Disaster, Crisis, and Trauma
- MMPP 6741 - Psychology of Terrorism♦
POST-MASTER’S CERTIFICATE PROGRAM

Post-Master's Certificate in Online Teaching in Higher Education

Designed for aspiring teachers from any field, this certificate program can prepare participants to deliver effective instruction to adult learners in a fully online environment. Through their coursework, students explore teaching and learning theory, the unique considerations of teaching adult learners, and curriculum design. Participants are also introduced to the technological tools and platforms that are transforming the landscape of adult education today.

Certificate Courses

- CRJS 8171 - Theories and Frameworks for Adult Learning
- CRJS 8177 - Using Technology to Enhance Adult Learning
- CRJS 8764 - Instructional Design for Online Course Development
- CRJS 8763 - Principles of Instructional Design
DOCTORAL DEGREE PROGRAMS

Ph.D. in Criminal Justice

The Ph.D. in Criminal Justice program helps prepare students with the skills needed to pursue a range of criminal justice-related roles including leadership and education. Spanning topics such as homeland security, human services, and the role of technology in law enforcement, the curriculum examines contemporary criminal justice theory and practice while outlining some of the national and global issues facing the field today. Students can choose from six optional specializations to create a program of study that is tailored to their professional objectives.

Learning Outcomes

Upon graduation, students will be able to:
1. Evaluate the root causes of crime and its impact on criminal justice policies, practices, and procedures.
2. Evaluate management philosophies in managing human resources in criminal justice organizations.
4. Apply data analysis techniques and research design methods to scholarly research in criminal justice.
5. Evaluate the role of criminal justice in advancing social justice and positive social change.

Program Types

General (Advanced) – Advanced is a program of study for students who have a master's degree in criminal justice or a related field.
General (Non-Advanced) – Non-Advanced is a program of study for students who have a master's degree in a discipline unrelated to the criminal justice field.

Degree Requirements

77 total quarter credits
- Introductory courses (6 cr.)
- Core courses (36 cr.)
- Electives (15 cr.)
- Dissertation (20 cr.)
Specializations (Optional)

- Emergency Management
- Homeland Security Policy and Coordination
- Global Leadership
- Justice Administration (not a specialization option for the non-advanced program of study)
- Law and Public Policy
- Online Teaching in Higher Education
- Public Management and Leadership

General Program (Advanced)

Total credits - 77

- Foundation (1 cr.)
- Core Courses (56 cr.)
- Dissertation (20 cr. with a minimum of four terms of 5 credits)
- Four Ph.D. residencies to equal a minimum of 16 days

Time to completion may vary by student, depending on individual progress and credits transferred, if applicable. For a personalized estimate of your time to completion, call an enrollment advisor at 1-866-492-5336.

Foundation Course (1 cr.)

- CRJS 8000 - Foundations of Doctoral Study

Core Courses (56 cr.)

Choose three electives from the Ph.D. in Criminal Justice Specialization Courses.

- CRJS 8350 - History and Contemporary Issues in Criminal Justice
- CRJS 8351 - Policy and Analysis in Criminal Justice Systems
- CRJS 8352 - Leadership: Putting Theory into Practice in Criminal Justice Administration
- RSCH 8100 - Research Theory, Design, and Methods
- RSCH 8200 - Quantitative Reasoning and Analysis
- RSCH 8300 - Qualitative Reasoning and Analysis
- CRJS 8381 - Program Evaluation
- CRJS 8115 - Writing A Quality Prospectus
- RSCH 8250 - Advanced Quantitative Reasoning and Analysis
  OR
- RSCH 8350 - Advanced Qualitative Reasoning and Analysis
  OR
- RSCH 8450 - Advanced Mixed-Methods Reasoning and Analysis

Dissertation (20 cr.)

- CRJS 9000 - Dissertation

* Students select any 5-credit-hour graduate course from the Ph.D. in Criminal Justice Specialization Courses.

## General Program (Non-Advanced)

Total credits - 77–92, with optional specialization
- Foundation (1 cr.)
- Core Courses (56 cr.)
- Dissertation (20 cr. with minimum of four terms of 5 credits)
- Four Ph.D. residencies to equal a minimum of 16 days

Time to completion may vary by student, depending on individual progress and credits transferred, if applicable. For a personalized estimate of your time to completion, call an enrollment advisor at 1-866-492-5336.

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Criminal Justice program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Global Leadership

The Global Leadership specialization provides students with insight into effective leadership practices for the international environment, particularly in developing countries. Through their coursework, students explore sustainability frameworks and models, techniques that leaders use to build capacity for community change, and strategies for effective and timely decision making in uncertain conditions. Students also engage in the development of a strategic plan for an international public or nonprofit organization or for a U.S. organization with an international focus.

### Online Teaching in Higher Education

Students can inspire future criminal justice professionals by sharing their expert knowledge in an online education setting. Focusing on adult learning theory and practical instruction strategies, the Online Teaching in Higher Education specialization helps prepare students to work in both academic and vocational environments. They will explore today's cutting-edge online education technologies, teaching and learning theory, the foundations of instructional design and delivery, and the unique characteristics of adult learners.

**Justice Administration**

*This specialization is not available to students in the Non-Advanced General Program.*

Students pursuing this specialization have the opportunity to study the risk factors associated with criminal behavior as well as how history has shaped the modern criminal justice system. Through their coursework, students cover the latest approaches to managing crises, current trends in criminal justice, and emerging solutions to contemporary crime.

**Degree Requirements**

- Total credits (77 cr.)
- Foundation (1 cr.)
• Core Courses (56 cr.)
• Dissertation (20 cr.) Minimum of 4 terms of 5 credits

**Public Management and Leadership**

Faced with mounting performance demands and new financial challenges, managers in today's public and nonprofit institutions must be able to increase efficiency and effectiveness across their organizations. In this specialization, students will develop strategies for sparking transformative change in a public organization of their choosing. They can gain leadership and interpersonal
skills that can help them be competent leaders, shape public policy, and inspire and motivate their employees.

Emergency Management

In the event of an impending hurricane or in the aftermath of a manmade disaster, effective leaders who can manage and motivate response teams are in demand. In this specialization, students will focus on both skill development and methods for building robust, effective teams. Students also will explore new emergency management leadership tactics required in today's global world and industries, including ethical issues that can arise in some situations. This specialization will help prepare students to apply for certificates from the Federal Emergency Management Agency (FEMA) Emergency Management Institute.

Homeland Security Policy and Coordination

Now more than ever, America’s security rests in the hands of those with the ability to navigate the intricacies of public policy. Students explore how public policy designed to safeguard the nation can be enacted without infringing upon individual rights and freedoms. In this specialization, they will study homeland security-related trends and issues, such as how national security agencies collaborate to keep the public safe as well as applications of the National Incident Management System (NIMS).

**Law and Public Policy**

Through this specialization, students explore how past and present legal decisions influence the creation of public policy. In their coursework, students cover foundational legal concepts, landmark cases, and current trends in law and policy. Students also have the opportunity to examine the legal knowledge that is made available to public policy practitioners.

Ph.D. in Public Policy and Administration (Course-Based)

The Ph.D. in Public Policy and Administration program is designed to prepare students to address the challenges of governance and service delivery that exist both in the U.S. and around the world. Coursework explores public policy theory, research, and practice in a global context, enabling students to gain expertise in effective U.S. policy management and the ability to apply those insights to problems facing the world at large. The Ph.D. in Public Policy and Administration can position students for career opportunities in research, higher education, or administration in the private, public, or nonprofit sector. Students in this program may choose a specialization that fits their personal and/or career objectives.
Learning Outcomes

At the end of the program, students will be able to:

1. Discuss leadership concepts and theories that have been used to effectively lead and manage in the public sector.
2. Analyze evidence-based research, theories, and models used to promote participation in public and nonprofit policy processes.
4. Ethically apply the major theories and concepts of public policy and public administration within organizations.
5. Evaluate models and best practices utilizing diverse perspectives in local, state, national, and international public agencies by using evidence-based research.

Specializations

- Criminal Justice
- Emergency Management
- Health Policy
- Homeland Security Policy and Coordination
- International Nongovernmental Organizations (NGOs)
- Law and Public Policy
- Local Government Management for Sustainable Communities
- Nonprofit Management and Leadership
- Policy Analysis
- Public Management and Leadership
- Terrorism, Mediation, and Peace

Degree Requirements

- 82 total quarter credit hours
- Program of study
- Foundation course (1 cr.)
- Core courses (30 cr.)
- Foundation Research Sequence (12 cr.)
- Advanced Research course (4 cr.)

Specialization Courses (15 cr.)

- Proposal, dissertation, and oral presentation (20 cr.)
- Minimum enrollment of 8 quarters enrollment, depending on the transfer of credits awarded
- Four 4-day residencies
Core Curriculum

Foundation Course (1 cr.)
- PPPA 8000 - Foundations of Doctoral Study

Core Courses (30 cr.)
- PPPA 8405 - Ethics and Social Justice♦
- PPPA 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination♦
- PPPA 8431 - Finance and Budgeting for the Public Sector♦
- PPPA 8111 - Leadership and Organizational Change♦
- PPPA 8112 - Governance and Public Policy♦
- PPPA 8115 - Writing a Quality Prospectus

Foundation Research Sequence (12 cr.)
Courses composing the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100P must be completed prior to Residency 2 of the academic residencies. RSCH 8200P and RSCH 8300P must be completed prior to beginning the dissertation or attending Residency 3.
- RSCH 8100P - Research Theory, Design, and Methods
- RSCH 8200P - Quantitative Reasoning and Analysis
- RSCH 8300P - Qualitative Reasoning and Analysis

Advanced Research Course (4 cr.)
All Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements.
One of the following three courses is required:
- RSCH 8250P - Advanced Quantitative Reasoning and Analysis
- RSCH 8350P - Advanced Qualitative Reasoning and Analysis
- RSCH 8450P - Advanced Mixed-Methods Reasoning and Analysis

Dissertation (20 cr.)
- PPPA 9000 - Dissertation

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Public Policy and Administration (Course-Based) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**General Program**

Students may complete the General Program if they want to pursue an area of interest that is not among the specializations currently offered. This provides students maximum flexibility by allowing them to design a program that most closely matches their personal and professional goals.
Specialization Curriculum (15 cr.)

Choose any three Specialization Courses from any of the Ph.D. in Public Policy and Administration specializations.

Criminal Justice

This specialization is designed for criminal justice professionals, including supervisors and managers in policing, courts, corrections, security, and associated support agencies, who aspire to move into management and administrative assignments. The coursework includes an in-depth review and discussion of contemporary decision-making models and issues confronting the American criminal justice system.

Specialization Curriculum (15 cr.)

- PPPA 8137 - The Nature of Crime and Criminology
- PPPA 8215 - Controversies in Criminal Justice
- PPPA 8217 - Technological Solutions and 21st-Century Crime

Emergency Management

The emergency situations of today’s complex environments call for a new leadership approach and effective collaboration among public safety professionals. The specialization in Public Safety Management offers emergency response professionals the skills to lead, manage, and motivate others during emergencies; to build confident and capable teams; and to address challenging ethical situations that may arise during the course of duty.

Specialization Curriculum (15 cr.)

- PPPA 8101 - Critical Issues in Emergency Management
- PPPA 8201 - Risk Assessment, Preparedness, and Disaster Mitigation
- PPPA 8301 - Disaster Response and Recovery

Health Policy

Americans have seen radical changes in the healthcare industry over the past several years. They’ve watched it go from an independent structure to a collection of major business enterprises, which in turn has changed the way healthcare is delivered. As the healthcare environment changes, managers must quickly adapt to succeed. The Health Policy specialization helps students gain valuable knowledge about health delivery systems, health policy, health administration, and health finance centers, so they can manage effectively and successfully in this unique environment.

Specialization Curriculum (15 cr.)

- PPPA 8841 - Health Policy and Management
Homeland Security Policy and Coordination

Today's complex public safety environment demands smart policy on emergency response strategies. This specialization prepares homeland security professionals to implement protective measures without compromising individual rights and freedoms. With this knowledge, students are equipped to effectively develop policy to protect individuals' safety and freedom.

Specialization Curriculum (15 cr.)

- PPPA 8320 - Public Policy Implications of Terrorism Legislation and Policies
- PPPA 8321 - Terrorism: A Systemic Approach for Emergency Preparedness
- PPPA 8322 - Critical Incident Planning and Leadership

International Nongovernmental Organizations (NGOs)

In an era of increasing globalization, it is important for leaders of nonprofit organizations and governmental departments at the local, state, and national levels to know how to operate in an international environment. This specialization explores how countries organize, regulate, and foster nongovernmental activities; how international intergovernmental organizations operate; and how representatives of these organizations can learn from, partner with, and work within organizations worldwide.

By focusing on the effects of globalization and the cultures and sociopolitical environments of diverse nations and organizations, students in this specialization learn how to work effectively with nongovernmental organizations, voluntary organizations, and intergovernmental organizations around the world.

Specialization Curriculum (15 cr.)

- PPPA 8330 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness
- PPPA 8331 - Crossing Borders: U.S. and International NGO Organizational Cultures and Environments
- PPPA 8332 - Placing NGOs in the Global Context

Law and Public Policy

Students gain an understanding of the relations hips between law and public policy and they access vital legal knowledge available to public policy practitioners.

Specialization Curriculum (15 cr.)

- PPPA 8810 - Fundamentals of Law and Public Policy
- PPPA 8811 - Legal Research for Policy Practitioners
- PPPA 8812 - Contemporary Cases and Issues in the Courts
Local Government Management for Sustainable Communities

Students gain an understanding of the interrelated elements that make a community viable. Additionally, students access the tools and resources for sustainable community development as they prepare for a career as a town manager, department head, or director of a social service organization.

Specialization Curriculum (15 cr.)

- PPPA 8820 - Elements of Sustainable and Livable Communities
- PPPA 8821 - Tools for Sustainable Community Development
- PPPA 8822 - Current Issues in Regional and Local Public Policy

Nonprofit Management and Leadership

Investment in social capital is as important as investment in physical and human capital. Without constant attention to democratic and social institutions, a society and its individuals cannot prosper. Recently, considerable attention has been paid to the decline in social capital in the United States and to declining participation in many social institutions. The Nonprofit Leadership and Management specialization investigates these issues and prepares students to become knowledgeable social change agents through scholarly inquiry, applied research, and effective participation in these nonprofit institutions.

Specialization Curriculum (15 cr.)

- PPPA 8850 - Introduction to the Nonprofit Sector
- PPPA 8851 - Board Governance and Volunteer Management
- PPPA 8852 - Resource Development

Policy Analysis

Policy shapes the workings of government and its partners. This specialization provides a critical context within which organizations and individuals act in a democratic society. It will prepare students to function knowledgeably within this context and to work collaboratively to help shape public policy development and implementation.

Specialization Curriculum (15 cr.)

- PPPA 8380 - Policy and Politics in American Political Institutions
- PPPA 8381 - Public Policy and Evaluation
- PPPA 8382 - Public Policy and Finance
Public Management and Leadership

Public services are being delivered through alternative nongovernmental institutions, and citizens and their elected officials are expecting more from those who manage public and nonprofit institutions. The Public Management and Leadership specialization prepares scholar-practitioners to lead reform in public administration.

Specialization Curriculum (15 cr.)

- PPPA 8390 - Strategic Context of Public Management and Leadership
- PPPA 8391 - Transformative Change in a Shared-Power World
- PPPA 8392 - The Language of Leadership

Terrorism, Mediation, and Peace Specialization

The threat of terrorism is a constant concern prompting a continuing focus on preventing and resolving terrorist attacks. In this specialization, students will learn the immediate and long-term implications of anti-terrorist legislation and policies. They will study how terrorism policies are drafted and enforced while they analyze the ethical issues related to human rights and the psychology of terrorism. Students will explore the effects of disaster, crisis, and trauma and the appropriate interventions for individuals and groups. And students will examine the roots of international and domestic terrorism, the catalysts and motivations for terrorist acts, and how media and technology may aid or counter terrorist activities.

Specialization Curriculum (15 cr.)

- PPPA 8320 - Public Policy Implications of Terrorism Legislation and Policies
- PPPA 8740 - Disaster, Crisis, and Trauma
- PPPA 8741 - Psychology of Terrorism
BACHELOR’S DEGREE PROGRAMS

B.S. in Human Services

This program prepares students to meet the growing need for qualified professionals who have a broad understanding of human services program development, implementation, and evaluation. Through this curriculum, students gain the practical skills required to assist individuals and communities in crisis. The curriculum comprises courses through which students have the opportunity to develop core human services competencies, including managing and resolving conflict, organizing community resources, and interacting with diverse communities.

Learning Outcomes

Upon completion of the B.S. in Human Services program, students will be able to:

1. Articulate historical and current issues that have shaped the development of the human services profession.
2. Articulate the role that human service professionals play in working with individuals, communities, and families in need.
3. Identify strategies to address marginalization and social stratification for diverse communities in support of social change initiatives.
4. Advocate client needs across a variety of social domains.
5. Utilize knowledge of formal and informal networks in the human services delivery systems.
6. Apply appropriate models for addressing crisis-related problems in the lives of clients.
7. Apply legal and ethical standards in providing client services and maintaining client records.
8. Evaluate service delivery and program effectiveness.

Degree Requirements

- 181 total quarter credit hours
- General education courses (46 cr.)
- Core courses (45 cr.)
- Concentration courses (30 cr.)
- Elective courses (55 cr.)
- Capstone course (5 cr.)

Core Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog. 
**Note:** At least three general education courses taken must be at the 3000 level or higher, including SOCI 4080.

Core Courses (45 cr.)

- PSYC 2010 - Introduction to Human Services♦
- EDUC 1006 - Child, Family, and Community Relationships♦
- IDST 2050 - Interdisciplinary Experience: Sustaining Quality of Life in the City♦
- PSYC 3010 - Crisis and Intervention♦
- PSYC 4008 - Intergroup Conflict and Peace Building♦
- CRJS 4402 - Planning and Budgeting♦
- HUMN 4003 - Measuring Effectiveness of Human Services Delivery♦
- HUMN 4002 - Effective Human Services Interviewing♦
- HUMN 4001 - Case Management for Persons in Need♦

Elective Courses (55 cr.)

Choose 11 courses from either general education or other Walden bachelor's degree programs. At least 20 elective credits must be at the 3000–4000 level. Elective credits should total 55 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. **Note on Minors:** Electives can also be used to complete a six-course minor.

Capstone Course (5 cr.)

- HUMN 4920 - Capstone♦

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Human Services program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
Addiction

**Concentration Curriculum (35 cr.)**
- HUMN 2003 - Human Development: Adulthood
- HUMN 2005 - Social Influences on Behavior
- HUMN 2006 - Introduction to Addiction
- HUMN 3010 - Crisis and Intervention
- HUMN 3012 - Prevention and Treatment of Addiction
- HUMN 4004 - Brain and Behavior
- HUMN 4005 - Case Management and Addictions

Child and Adolescent Development

The period from childhood to adolescence is a complex time of transformational physical changes as well as important mental and social development. There are many social influences that can affect the attitudes, beliefs, and behaviors of children and adolescents. In the online B.S. in Human Services Child and Adolescent Development concentration, students will learn the key theories related to the biological and behavioral maturation processes of this age group. They will examine the trends and issues that affect children and adolescents today—including Internet use, social media, substance abuse, (cyber) bullying, eating disorders, depression, suicide, and teenage pregnancy.

**Concentration Curriculum (30 cr.)**
- PSYC 2002 - Human Development: Childhood and Adolescence
- PSYC 2005 - Social Influences on Behavior
- PSYC 2008 - Learning
- EDUC 3203 - Infant/Toddler Mental Health
- EDUC 3204 - Family Cultures of Infants and Toddlers
- EDUC 3301 - School-Age and Adolescent Development
- EDUC 3303 - Motivating and Guiding School-Age Children and Adolescents
- EDUC 4205 - Developmentally Appropriate Practices in Infant Settings
- EDUC 4206 - Developmentally Appropriate Practices in Toddler Settings
- EDUC 4301 - School-Age Children and Adolescence in a Multicultural Society
- EDUC 4303 - Trends and Issues in School-Age Children
- EDUC 4304 - Trends and Issues in Adolescence

Criminal Justice

In the Criminal Justice concentration, students examine contemporary criminal justice systems in the United States, focusing on the role of law enforcement and other systems of social control. The curriculum provides students with the opportunity to explore the corrections system, research causes of crime, analyze contemporary problems and trends in victimology, and recommend ways to make the system more cost effective, efficient, and streamlined.
Concentration Curriculum (30 cr.)

- CRJS 1001 - Contemporary Criminal Justice Systems
- CRJS 2001 - Criminology and Social Control
- CRJS 2002 - Juvenile Delinquency and Justice
- CRJS 2003 - Criminal Law
- CRJS 3001 - Corrections
- CRJS 3002 - Courts and Judicial Process
- CRJS 3003 - Law Enforcement
- CRJS 3004 - Data Analysis for the Criminal Professional
- CRJS 4201 - Restorative Justice
- CRJS 4202 - Mobilizing and Coordinating Community Response
- CRJS 4203 - Victimology
- PSPA 4010 - Contemporary Legal Debates

Courts and the Legal System

In this concentration, students examine the U.S. legal system, including criminal and civil law, the courts, and judicial process. Students gain a broad understanding of how the legal system functions in an increasingly complex and diverse society. Through coursework, students investigate the factors that contribute to juvenile delinquency and the concept of juvenile justice. They also learn strategies for restorative justice, focusing on repairing the harm caused by criminal behavior to victims and communities.

Concentration Curriculum (30 cr.)

- CRJS 2002 - Juvenile Delinquency and Justice
- CRJS 2003 - Criminal Law
- CRJS 3002 - Courts and Judicial Process
- CRJS 3004 - Data Analysis for the Criminal Professional
- CRJS 4201 - Restorative Justice
- CRJS 4202 - Mobilizing and Coordinating Community Response
- PSPA 3010 - Civil Law

Cultural Studies

Through this concentration, students explore methods for interpreting behavior and communicating more effectively in a multicultural world. Students examine culturally diverse values and social attitudes, and they determine how such principles and perspectives shape experiences and relationships. The curriculum comprises courses focused on the influences of gender, race, ethnicity, and sexual orientation on school-age children; methods to overcome challenges in cross-cultural situations; and evaluations of psychological issues from a global rather than a domestic perspective.

Concentration Curriculum (30 cr.)

- PSYC 2001 - Cross-Cultural Psychology
- PSYC 3005 - Racial and Ethnic Identities
Global Social Justice and Civic Engagement

Through the Global Social Justice and Civic Engagement concentration, students examine the social benefits and complexities that result from globalization. They also identify the major challenges to peace and sustainability in the global environment as well as effective strategies for producing positive social change. Through coursework, students focus on social entrepreneurship, the significance of volunteerism, and the importance of organizations dedicated to promoting social justice throughout the world.

**Concentration Curriculum (30 cr.)**

- PSPA 1002 - Global Issues in Politics
- PSPA 2030 - Leadership and Volunteerism
- PSPA 2050 - Social Entrepreneurship
- PSPA 3030 - Social Change in the Community
- PSPA 3040 - Global Social Justice
- PSPA 4030 - Communication for Social Change
- PSPA 4040 - Service in the Global Community
- PSYC 4006 - Global Perspectives in Psychology
- COMM 4001 - Intercultural Communication

Leadership and Administration

In the Leadership and Administration concentration, students explore the role of leaders and leadership in the public sector. The curriculum includes an analysis of the principles of public administration, the role of ethics in public leadership, the psychology of leadership, and necessary skills for leaders in the public sector. Through coursework, students have the opportunity to explore many of the questions and issues surrounding the making of public policy.

**Concentration Curriculum**

- PSPA 1002 - Global Issues in Politics
- PSPA 2001 - Principles of Public Administration
- PSPA 2002 - The Making of Public Policy
- PSPA 2030 - Leadership and Volunteerism
- PSPA 3002 - Ethics in Public Leadership
- PSPA 4020 - New Skills for Leaders in the Public Sector
- PSYC 3009 - Psychology of Leadership
- COMM 4001 - Intercultural Communication
- CRJS 3002 - Courts and Judicial Process
Psychology

Students in this concentration examine the ways that biology, society, multiculturalism, race, and ethnicity influence human behavior, focusing on the influence of global trends on individual and group conduct. Through a variety of course assignments, students apply what they learn to case studies and real-life examples. The curriculum includes cross-cultural psychology, racial and ethnic identities, methods of psychological inquiry, and global perspectives in psychology.

Concentration Curriculum (30 cr.)

- PSYC 1002 - Psychology as a Natural Science
- PSYC 1003 - Psychology as a Social Science
- PSYC 2001 - Cross-Cultural Psychology
- PSYC 3002 - Data Analysis and Presentation
- PSYC 3003 - Methods in Psychological Inquiry
- PSYC 3005 - Racial and Ethnic Identities
- PSYC 3007 - Influence and Persuasion
- PSYC 4006 - Global Perspectives in Psychology

Self-Designed

In this concentration, students create their own curriculum to best meet their areas of interest. Students may select six courses from the other concentrations in the B.S. in Human Services program. Possible course selections include Methods of Psychological Inquiry, Criminology and Social Control, Criminal Law, Social Influences on Behavior, Psychology of Gender, Social Change in the Community, and Ethics in Public Leadership.

Concentration Curriculum (30 cr.)

Students choose six courses from any other B.S. in Human Services concentration courses.
OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program. When undergraduate students attempt a 5000-level course, they may earn a C in the graduate-level course but only a grade of B or better will carry over to the graduate program. Students who receive a C grade will be awarded a grade of C*, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not receive a B or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.

3. AIM courses are (5000-level) graduate courses.*
   a. Tuition for these courses is charged at the undergraduate rate.
   b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
   c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a B or better in each course to have that course applied to the master's program.
• Students who get lower than a B in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
• Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a B or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note: Graduate students cannot register for AIM courses.

M.S. in Human Services

Human services professionals make a positive difference every day. A commitment to improving the quality of life for others benefits the entire community. Walden's M.S. in Human Services program helps students make an even greater impact by preparing them with the skills they need to become effective leaders in fostering social change. Students in this online master's degree program focus on expanding their understanding of the delivery, accessibility, accountability, and coordination of agency services.

By earning their M.S. in Human Services degree at Walden, students broaden their knowledge as human services professionals and advance their understanding of human services theory, research, and practice. Students learn strategies to address the ethical and social justice issues that are impacting the effective delivery of human services throughout the world today. As graduates of the M.S. in Human Services program, students can work in a variety of roles providing direct services to individuals, families, or communities or providing leadership to agencies and programs.

When students choose Walden's M.S. in Human Services, they can benefit from the flexibility of online learning and from MobileLearnSM. Offered exclusively at Walden, MobileLearn not only enables students to choose where and when they learn, but it also gives them the ability to choose how they learn.

Learning Outcomes

Graduates in the M.S. in Human Services program will be prepared to:

1. Articulate the role that human services leaders play in promoting social change and advocacy for individuals, families, and communities in need.
2. Interpret and apply human services research to inform the practice of human services delivery systems.
3. Synthesize findings from research to develop culturally and contextually relevant interventions and direct services.
4. Use knowledge of formal and informal networks in the development and evaluation of human services delivery systems.
5. Apply legal and ethical standards in the administration and delivery of human services systems.
6. Discuss how personal values and attitudes affect leadership, planning, and advocacy activities.

Specializations

- General Program
- Criminal Justice
• Disaster, Crisis, and Intervention
• Family Studies and Interventions
• Human Services Administration
• Military Families and Culture
• Public Health
• Social Policy Analysis and Planning

Degree Requirements

• General Program: 46 total quarter credit hours; with optional specialization: 51 total credit hours
• Foundation course (1 cr.)
• Core courses (30 cr.)

Elective courses (10 cr.) or optional Specialization Courses (15 cr.)

Core Curriculum

Foundation Course (1 cr.)

• HUMN 6000 - Foundation of Graduate Study in Human Services

Core Courses (30 cr.)

• HUMN 6150 - History and Development of Human Services
• HUMN 6151 - Human Services Theory, Research, and Practice
• HUMN 6701 - Culture and Psychology
• HUMN 6405 - Ethics and Social Justice
• HUMN 6152 - Human Services Administration
• HUMN 6326 - Research and Program Evaluation

Elective Courses (10 cr.)
Choose two elective courses (5 cr. each) from any M.S. in Human Services specialization.

Capstone Course (5 cr.)

• HUMN 6660 - Social Change, Leadership, and Advocacy for Human Services Professionals

Elective or Specialization Courses 10–15*
HUMN 6660 - Social Change, Leadership, and Advocacy for Human Services Professionals 5

*The General Program requires two electives (5 cr. each) in place of Specialization Courses.

Program Data
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the M.S. in Human Services program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

General Program

Electives (10 cr.)
Choose any two graduate-level courses (5 cr. each) for the elective.

Criminal Justice
This specialization is designed for professionals involved in all aspects of public safety, including law enforcement and rehabilitation. Students examine the factors that contribute to criminal behavior, such as urban decay, substance abuse, and poverty. They explore the use of traditional forms of intervention, such as individual and group psychotherapy, as well as recent developments in intervention, including restorative justice as it relates to both criminals and the victims of crimes. Through this coursework, students gain a greater insight into the problems facing the criminal justice system and how they can begin to address these challenges.

Specialization Courses (15 cr.)
- HUMN 6350 - Historical and Contemporary Issues in Criminal Justice
- HUMN 6511 - Treatment of Forensic Populations
- HUMN 6530 - Forensic Applications in Community Settings
Disaster, Crisis, and Intervention

Whether it’s an act of nature or an act of terror, effective crisis management leaders are needed to curtail the effects of the disaster and implement relief efforts. The focus of this specialization is on theories and strategies to meet the needs of individuals, families, and communities in crisis. Students can explore common reactions that communities share following a disaster and the psychological and behavioral disorders individuals can develop as a result. Coursework will allow students to gain an understanding of how different counseling practices are used to help individuals overcome the disorders. Students will examine how to analyze a crisis at both a local and regional level and apply their knowledge to design a crisis plan to prepare for future emergencies.

**Specialization Courses (15 cr.)**

- HUMN 6336 - Crisis, Trauma, and Disaster Response
- HUMN 6145 - Crisis Management
- HUMN 6741 - Psychology of Terrorism

Family Studies and Interventions

In diverse populations, human services professionals must be in tune with the special needs of underrepresented or marginalized groups such as low-income, single-parent, gay and lesbian families, bisexual, and transgender. In this M.S. in Human Services specialization, students can explore a broad spectrum of theoretical and clinical approaches to intervention. At the completion of your studies, they will be able to recognize special treatment considerations and develop multimodal therapeutic approaches.

**Specialization Courses (15 cr.)**

- HUMN 6361 - Human Sexuality
- HUMN 6811 - Community Psychology
- HUMN 6356 - Marriage, Couple, and Family Therapy

Human Services Administration

What does it take to assume a leadership role in the human services field? The focus of this specialization is on topics such as public management and leadership, program development and implementation, and staff development and training—the core competencies students will need to effectively lead a human services agency or organization. Study the theoretical foundations of organizational behavior and gain an understanding of how they can be incorporated in management and planning. After completing the program, students will understand how to evaluate the efforts of human services organizations to improve their effectiveness within the community.

**Specialization Courses (15 cr.)**

- HUMN 6392 - The Language of Leadership
- HUMN 6111 - Leadership and Organizational Change
Military Families and Culture

This specialization prepares students to address the unique needs of former and active military personnel, veterans, and their families. Through their coursework, students explore the military culture and lifestyle and examine the emotional and behavioral impact of parent-child separation, frequent family relocations, and extensive deployments. Students also can gain an understanding of post-traumatic stress disorder (PTSD) and vicarious trauma and study the latest approaches for working with members of the armed forces.

**Specialization Courses (15 cr.)**

- HUMN 6401 - Trauma, Crisis, and Stress With Military Personnel
- HUMN 6402 - Working with Military Spouses, Families, and Children

Public Health

As the population grows, the prevention of widespread disease and disability becomes paramount. In this specialization, students will analyze the major public health issues impacting communities today and discover how prevention of these issues can effect positive social change. Explore the social, environmental, and economic factors that impact public health, and gain strategies for organizing and overseeing population-based disease prevention and health promotion programs.

**Specialization Courses (15 cr.)**

- HUMN 6050 - Population Health and Issues in Disease Prevention
- HUMN 6400 - Public Health Leadership and Systems Thinking
- HUMN 6130 - Communications, Marketing, and Public Relations for Public Health Leaders

Social Policy Analysis and Planning

Creating sustainable social change means knowing how to work effectively with legislators, lobbyists, and other stakeholders in a challenging public and political arena. In the Social Policy and Analysis and Planning specialization, students have the opportunity to learn the strategies used to shape and implement public policy today. From healthcare to hate crimes to the environment, students can learn how they can impact the legislation that governs society.

**Specialization Courses (15 cr.)**

- HUMN 6451 - Public Policy Analysis
- HUMN 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination
- HUMN 6810 - Fundamentals of Law and Public Policy
Master of Social Work (MSW)

The Master of Social Work (MSW) degree program is designed to prepare students to provide services to individuals, families, groups, organizations, and communities. With a focus on advanced clinical practice, students learn to draw from social work theory and methods to engage, evaluate, and intervene in the problems experienced by individuals, families, and groups. Skills gained through this program can be applied in schools, hospitals, private practice, social service agencies, and mental health clinics. Optional elective clusters give students the opportunity to increase their knowledge in one of six key areas, and customized case studies throughout the program add perspective to the curriculum. Graduates will be prepared to provide culturally and contextually relevant social work services in their practice and to provide mentoring, supervision, advocacy, and collaboration activities with their varied client populations.

Learning Outcomes

Graduates of Walden's Master of Social Work (MSW) program will be prepared to:

1. Develop a professional orientation and identity as a social worker.
2. Apply legal and ethical standards in the administration of social work.
3. Apply principles of advocacy that promote cultural understanding and positive social change in individuals, communities, and society.
4. Utilize evidence-based research and critical-thinking skills to inform practice in meeting the needs of diverse clientele.
5. Synthesize and apply theories of human growth and development to develop culturally responsive social work practices.
6. Apply knowledge and skills in the areas of engagement, assessment, intervention, and evaluation with individuals, families, groups, organizations, and communities.

Utilize evidence-based research and critical-thinking skills to inform practice clinical social work practice in meeting the needs of diverse clientele. (PG 4)

EPAS 2.1.3 Apply critical thinking to inform and communicate professional judgments.

EPAS 2.1.6 Engage in research-informed practice and practice-informed research.

Synthesize and apply theories of human growth and development to develop culturally responsive social work practices. (PG 5)

EPAS 2.1.7 Apply knowledge of human behavior and the social environment.

Demonstrate knowledge and skills in the areas of engagement, assessment, intervention, and evaluation with individuals, families, and groups. (PG 6)

EPAS 2.1.9 Respond to contexts that shape practice.

EPAS 2.1.10(a)–(d) Engage, assess, intervene, and evaluate with individuals, families, groups, organizations, and communities.

**Degree Requirements**

- 92 total quarter credits*
- Core courses (70 cr.)
- Elective courses (10 cr.)
- Field Experience (12 cr.)
- 8 days of residency (two 4-day residencies)

*Note:* The following (tracks) are available for the MSW program:

- Part-time—This track is similar to most traditional master's-level programs in which students either complete one or two courses per quarter.
- Two-year, full-time—This track requires students to complete two courses in the first quarter, while completing three courses at the same time in many of the remaining quarters.
- Advanced Standing—This track is for students who enter the program with a Bachelor of Social Work (BSW) degree that is accredited by the Council on Social Work Education (CSWE). They will begin the program with the introductory course that all MSW students take but then move to the advanced-level courses.

**Curriculum**

**Foundation Course (1 cr.)**

**Core Courses (60 cr.)**

- SOCW 6101 - Essential Skills for Social Work Practice
- SOCW 6200 - Human Behavior and the Social Environment I
- SOCW 6051 - Diversity, Human Rights, and Social Justice
• SOCW 6210 - Human Behavior and the Social Environment II
• SOCW 6301 - Social Work Practice Research I
• SOCW 6351 - Social Policy, Welfare, and Change
• SOCW 6060 - Social Work Theory and Practice
• SOCW 6111 - Advanced Clinical Social Work Practice I
• SOCW 6090 - Psychopathology for Social Work
• SOCW 6121 - Advanced Clinical Social Work Practice II
• SOCW 6070 - Supervision, Leadership, and Administration in Social Work Organizations
• SOCW 6361 - Social Policy: Analysis and Advocacy

**Elective Courses (10 cr.)**

Choose two elective courses from any one of the elective cluster options below.

**Field Experience Courses (12 cr.)**

• SOCW 6500 - Social Work Field Education I
• SOCW 6510 - Social Work Field Education II
• SOCW 6520 - Social Work Field Education III
• SOCW 6530 - Social Work Field Education IV

### Elective Clusters

The following optional elective clusters are designed to help students more deeply explore a particular area of interest within the field of clinical social work.

- General Program
- Addiction Counseling
- Children, Families, and Couples
- Crisis and Trauma Cluster
- Forensic Populations and Settings
- Medical Social Work
- Military Families and Culture

### Note on Licensure

Licensure for MSW prepared social workers varies greatly from state to state. Each state board responsible for regulating the practice of social work has its own academic, licensure, and certification requirements and issues its own license to practice as a social worker.

In most states, the academic credential required for licensure to practice as a social worker is an MSW degree from a social work program which has been accredited by the Council on Social Work Education (CSWE). The Walden MSW program is not CSWE accredited but has applied for accreditation and is currently considered to be in pre-candidacy.

Because no program can guarantee licensure upon graduation, we encourage students to consult the appropriate social work licensing agency in the state in which they plan to practice to determine the specific academic requirements for licensure. Walden enrollment advisors can provide information relating to the state-by-state MSW degree requirements for MSW licensure. However, it remains the individual's responsibility to understand, evaluate, and comply with all licensing requirements for the state in which he or she intends to practice. Walden makes no representations or guarantee that completion of its coursework or programs will permit an individual to achieve state licensure, authorization, endorsement, or other state credential as a social worker.
Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Master of Social Work (MSW) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Addiction Counseling

Addictions can have a detrimental effect on society. Courses in this elective cluster are designed to help students prepare for social work practice with individuals, families, and communities impacted by addictions. Topics covered include the history, philosophy, and trends in addiction counseling; an overview of the various models of treatment, recovery, and relapse prevention; and a survey of current psychotropic medications used in treating mental, behavioral, and addictive disorders.

Cluster Courses:
- SOCW 6103 - Introduction to Addictions
- SOCW 6202 - Treatment of Addictions
- SOCW 6743 - Psychopharmacology and Biopsychosocial Considerations

Children, Families, and Couples Cluster

Families, children, and couples living in today's society are faced with a multitude of social, emotional, and economic challenges. This elective cluster helps prepare students to address the diverse needs of these groups in a clinical setting. Courses enable students to expand and apply theories to social work practice with children, families, and couples. Students also gain an understanding of the legal and ethical aspects of working in this specialty area, and they have an opportunity to study human sexuality in the context of couples, marriage, and family counseling.

Choose two of the following:

- SOCW 6346 - Child and Adolescent Counseling
- SOCW 6356 - Theories and Techniques in Marriage, Couples, and Family Counseling
- SOCW 6362 - Human Sexuality

### Crisis and Trauma Cluster

Designed for students who want to gain an understanding of how traumatic events affect society, this elective cluster focuses on how to work with individuals and communities who have experienced disasters and crises. Coursework includes the fundamentals of crisis management and crisis leadership, ethical and legal considerations in crisis and trauma response, current theories and treatment models for sexual trauma, crisis in individuals and families, and worldwide or national crises.

**Cluster Courses:**
- SOCW 6145 - Crisis Management
- SOCW 6333 - Vicarious Trauma and Compassion Fatigue
- SOCW 6336 - Crisis, Trauma, and Disaster Response

Forensic Populations and Settings Cluster

In this elective cluster, students have an opportunity to examine the fundamentals of working with forensic populations including sex and drug offenders, female offenders, and mentally ill offenders, among others. Courses provide a foundation in the psychological and sociological theories of criminal behavior and explore the facets of community crime prevention, restorative justice, and working with populations who are participating in or affected by the legal system.

Cluster Courses:
- SOCW 6511 - Treatment of Forensic Populations
- SOCW 6350 - Forensic Applications in Community Settings
- SOCW 6135 - Criminal Behavior

**Medical Social Work Cluster**

Individual patients or the family of a person with a chronic illness face a unique set of challenges related to the medical arena. In this elective cluster, students extend their knowledge of the role of medical social workers, the needs of clients and families, the issues faced by vulnerable populations, and how to work as part of a care team in a hospital, nursing home, or hospice facility. Students gain knowledge in supporting individual clients, families, and communities using resources and services for those dealing with acute or chronic illness, terminal illness, disability, or the challenges of aging.
**Cluster Courses:**
- SOCW 6204 - Medical Social Work I
- SOCW 6205 - Medical Social Work II
- SOCW 6743 - Psychopharmacology and Biopsychosocial Considerations

Military Families and Culture

This elective cluster prepares students to address the needs of former and active military personnel, veterans, and their families. Courses help students gain an understanding of post-traumatic stress disorder; vicarious trauma; and how extended deployments, parent-child separation, and frequent family relocations can affect individuals and their children, spouses, or other family members. Students explore current methodologies and best practices in working with members of the armed forces.

Cluster Courses:

- SOCW 6400 - Military Culture
- SOCW 6401 - Trauma, Crisis, and Stress With Military Personnel
- SOCW 6402 - Working With Military Spouses, Families, and Children

**DOCTORAL DEGREE PROGRAMS**

**Doctor of Social Work (DSW)**

The Doctor of Social Work (DSW) is a postgraduate program designed to prepare students as advanced practitioners who employ action research to design, implement, and assess social work and social welfare programs and policies for suitability for the diverse needs of families, communities, and society. This program may prepare students to design culturally and contextually relevant social services; mentor others in their efforts to provide social services to individuals, communities, and society; and provide leadership and advocacy in the social work profession regarding needs of individuals and communities with schools, governments, health services, criminal justice systems, and mental health organizations.

The DSW program specifically differs from the Ph.D. in Social Work because the development and training in the DSW is focused on providing advanced development for the practitioner-scholar. The Ph.D. program is focused on developing scholar-practitioners for service as researchers, agency leaders, policy analysts, and educators.

**Learning Outcomes**

At the end of this program, graduates will be able to:

1. Apply current research, best practices, and theory-based prevention and intervention strategies to address social problems and needs of social groups.
2. Address etiology and dynamics of social problems and social needs by using research in the field.
3. Apply results from research and evaluation to improve prevention and intervention strategies in social work practice.
4. Critically examine the history of social work, its mission, and its core values.
5. Promote social change by collaborating with clients, various professional agencies, organizations, and communities to advocate for the needs of culturally diverse clientele.
7. Apply ethical decision making to social work research and practice.

**Specializations**

- Addictions and Social Work
- Clinical Expertise
- Criminal Justice
- Disaster, Crisis, and Intervention
- Family Studies and Interventions
• Medical Social Work
• Policy Practice
• Social Work Administration

Degree Requirements
• 77 Total credits
• Foundation course (1 cr.)
• Core courses (41 cr.)

Specialization Courses (15 cr.)
• Doctoral Study Action Research Project (four terms, each 5 cr. = total 20 cr.)
• 3 years estimated time to completion (based on individual student progress)
• Residency (one 6-day face-to-face session)

Core Curriculum

Foundation Course (1 cr.)
• SOCW 8000 - Foundations of Graduate Study

Core Courses (41 cr.)
• SOCW 8110 - Advanced Social Work Theory and Practice
• SOCW 8116 - History and Development of Social Work
• SOCW 8137 - Contemporary Issues, Social Change, and Social Policy
• SOCW 8210 - Survey Research Methods
• SOCW 8138 - Program and Practice Evaluation
• SOCW 8117 - Diversity and Multiculturalism

Doctoral Action Research Project (20 cr.)
• SOCW 8600 - Action Research Project

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Doctor of Social Work (DSW) program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**Addictions and Social Work**

The Addictions and Social Work specialization prepares students to expand their professional service to support families, individuals, and communities around addictions treatment and case management and the development of prevention, intervention, and consultation around addiction.

**Specialization Courses**

- SOCW 8103 - Introduction to Addiction
- SOCW 8203 - Theories, Treatment, and Case Management of Addictions
- SOCW 8785 - Prevention, Intervention, and Consultation

**Clinical Expertise**

An advanced social work practitioner can make a positive impact in the community on various levels. This specialization can help prepare students for a career as an expert in clinical social work practice. Students will have the opportunity to focus their studies in supervision, treatment of forensic populations, and addiction case management. Students can gain the knowledge to become a supervisor of Master of Social Work students or advance their current clinical practice.
Specialization Courses

- SOCW 8570 - Social Work Supervision
- SOCW 8203 - Theories, Treatment, and Case Management of Addictions
- SOCW 8571 - Treatment of Forensic Populations

Criminal Justice

The specialization in Criminal Justice is designed for professionals involved in all aspects of public safety, including law enforcement and rehabilitation. Students will examine the factors that contribute to criminal behavior, such as urban decay, substance abuse, and poverty. They will explore the use of traditional forms of intervention, such as individual and group psychotherapy, as well as recent developments in intervention, including restorative justice as it relates to both criminals and the victims of crimes. And they will gain a greater insight into the problems facing the criminal justice system and how they can begin to address these challenges.

Specialization Courses

- SOCW 8350 - Historical and Contemporary Issues in Criminal Justice
- SOCW 8351 - Policy Analysis in the Criminal Justice System
- SOCW 8785 - Prevention, Intervention, and Consultation

Disaster, Crisis, and Intervention

The Disaster, Crisis, and Intervention specialization examines theories and strategies to respond to the initial basic needs of a community in an emergency situation and how to assist victims and their caregivers after the initial crisis has passed. Students will study skills and practices specific to crisis counseling, including theories of crisis intervention and models for working with different populations. They will examine the actions and behaviors that follow a disaster; learn how to address stress, coping, and adjustment difficulties; and study psychological disorders such as post-traumatic stress disorder. Students will explore a crisis from a community and regional level and gain experience by designing a crisis plan to prepare for future emergencies. In this specialization, students also address the psychological impact of terrorism on communities.

Specialization Courses

- SOCW 8145 - Crisis Management
- SOCW 8785 - Prevention, Intervention, and Consultation
- SOCW 8333 - Vicarious Trauma and Compassion Fatigue

Family Studies and Interventions

The Family Studies and Intervention Strategies specialization provides students with techniques for utilizing advanced clinical theory and research methodology within a unique, client-centered ecological context. Students are exposed to a broad spectrum of theoretical and clinical approaches to intervention, which emphasize the special needs of ethnic and racial minorities,
gay and lesbian, single-parent, and low-income families. Students will explore developing multimodal therapeutic approaches and recognizing special treatment considerations within a diverse client delivery system.

**Specialization Courses**

- SOCW 8356 - Theories and Techniques in Marriage, Couple, and Family Counseling
- SOCW 8346 - Child and Adolescent Counseling
- SOCW 8785 - Prevention, Intervention, and Consultation

**Medical Social Work**

The Family Studies and Intervention Strategies specialization provides students with techniques for utilizing advanced clinical theory and research methodology within a unique, client-centered ecological context. Students are exposed to a broad spectrum of theoretical and clinical approaches to intervention, which emphasize the special needs of ethnic and racial minorities, gay and lesbian, single-parent, and low-income families. Students will explore developing multimodal therapeutic approaches and recognizing special treatment considerations within a diverse client delivery system.

**Specialization Courses**

- SOCW 8204 - Medical Social Work I
- SOCW 8205 - Medical Social Work II
- SOCW 8815 - Contemporary Gerontology/Geriatric Psychology

**Policy Practice**

Effective policy and sustainable change are the result of successful collaboration with legislators, lobbyists, grass-roots organizations and other groups, and individuals. This specialization can help students advance social welfare by identifying community needs and learning best practices in working with key stakeholders on today's most pressing social policy issues. Students will have the opportunity to analyze the key factors that influence decision making related to positive social change and learn how to engage with community, state, and federal governments.

**Specialization Courses**

- SOCW 8451 - Public Policy Analysis
- SOCW 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
- SOCW 8809 - Fundamentals of Law and Public Policy

**Social Work Administration**

Strong leadership, strategic program development, and effective implementation can enhance an agency's ability to serve its target populations. This specialization helps students focus on these and other aspects of administration within the context of advancing social welfare. The curriculum is designed to help students gain insight into organizational behavior, staff development, internal and community relations, and management. Students can apply their
knowledge to help social work agencies develop effective strategies for improving the well-being of the individuals and groups they serve.

**Specialization Courses**

- SOCW 8152 - Human Services Administration
- SOCW 8750 - Leadership Development
- SOCW 8786 - Strategic Context of Public Management and Leadership

**Ph.D. in Human Services**

Social service practitioners face an increasingly diverse clientele, as delivery systems and client populations become more multicultural and include a broader range of complex issues. The Ph.D. in Human Services program prepares students to excel within a diverse service-delivery system by equipping them with action-oriented research skills and context-sensitive knowledge for application within unique practice environments.

**Learning Outcomes**

At the end of the program, students will be able to:

1. Analyzes and evaluates theories, models, historical foundations, and conceptual frameworks related to the profession of human services through a process of scholarly inquiry.
2. Evaluates and applies ethical, social, multicultural, diversity, and political considerations to scholarly inquiry and professional practice.
3. Evaluates qualitative, quantitative, and/or mixed-methods research published in professional journals, textbooks, and other scholarly resources.
4. Applies principles of quantitative, qualitative, or mixed methods to research design.
5. Applies qualitative, quantitative, and/or mixed-methods research in the investigation of problems or phenomena in human services practice.
6. Evaluates and applies social change theories to human services practice and research.
7. Evaluates and applies lifespan human development theories in human services research and practice.

**Specializations**

- General Program
- Clinical Social Work
- Criminal Justice
- Disaster, Crisis, and Intervention
- Family Studies and Intervention Strategies
- Human Services Administration
- Public Health
- Social Policy Analysis and Planning
• Military Families and Culture
The Advanced Customized Specialization (15 cr.) option gives students a unique way to meet specialization requirements. Gain a deeper level of knowledge in a specific area of interest and benefit from an independent, self-directed learning experience under the guidance of a mentor.

Degree Requirements

• 112 total quarter credits
• Foundation course (1 cr.)
• Professional Development Plan and program of study
• Core courses (60 cr.)

Specialization Courses (15 cr.)

• Foundation Research Sequence (12 cr.)
• Advanced Research Course (4 cr.)
• Elective courses (15 cr.)
• Proposal, dissertation, and oral presentation (20 cr.)
• Four 4-day residencies

Core Curriculum

Foundation Course (1 cr.)
• HUMN 8000 - Foundations of Graduate Study in Human Services

Core Courses (60 cr.)
• HUMN 8150 - History and Development of Human Services
• HUMN 8151 - Human Services Theory, Research, and Practice
• HUMN 8701 - Culture and Psychology
• HUMN 8405 - Ethics and Social Justice
• HUMN 8152 - Human Services Administration
• HUMN 8327 - Research and Program Evaluation
• HUMN 8660 - Social Change, Leadership, and Advocacy for Human Services Professionals
• HUMN 8240 - Human Motivation
• HUMN 8550 - Preparing for Dissertation
• HUMN 8750 - Leadership Development
• HUMN 8420 - Organizational Management and Leadership
• HUMN 8431 - Finance and Budgeting for the Public Sector

Foundation Research Sequence (12 cr.)
Courses composing the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100U must be
completed prior to Residency 2 of the academic residencies. RSCH 8200U and RSCH 8300U must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8100 - Research Theory, Design, and Methods
- RSCH 8200 - Quantitative Reasoning and Analysis
- RSCH 8300 - Qualitative Reasoning and Analysis

**Advanced Research Course (4 cr.)**

All Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements. One of the following three courses is required:

- RSCH 8250 - Advanced Quantitative Reasoning and Analysis
- OR
- RSCH 8350 - Advanced Qualitative Reasoning and Analysis
- OR
- RSCH 8450 - Advanced Mixed-Methods Reasoning and Analysis

**Elective Course (15 cr.)**

Choose any three elective courses from any Ph.D. in Human Services specialization or the Specialization Courses (5 cr. each for a total of 15 cr.).

**Dissertation (20 cr.)**

- HUMN 9001 - Dissertation

**Program Data**

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Human Services program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

**General Program**

Students can create their own learning experience through the General Program. They will have the flexibility to design a program that may include courses on criminal justice, clinical studies, or child and family services. Students will explore the topics that interest them most and that closely match their personal and professional goals.

**Specialization Curriculum (15 cr.)**

For the General Program, students are required to complete any three (5-cr. each) graduate-level courses.

Counseling Specialization (Course-Based)

The Counseling specialization focuses on healthy life adjustment, biopsychosocial stress, human diversity, and a synthesis of social, behavioral, and developmental approaches to human growth. Graduates utilize a learning philosophy that emphasizes developmental theories and the broad application of these theories to promote positive, health-oriented growth with emphasis on helping others achieve greater psychological, social, academic, vocational, and ethical development.

Specialization Curriculum (15 cr.)

- HUMN 8337 - Techniques in Counseling

Choose two:

- HUMN 8723 - Counseling and Psychotherapy Theories
- HUMN 8215 - Lifespan Development
- HUMN 8725 - Multicultural Counseling
- HUMN 8240 - Human Motivation
- HUMN 8306 - Ethics and Legal Issues in Counseling
- HUMN 8785 - Prevention, Intervention, and Consultation

Advanced Customized Specialization (15 cr.)

The Advanced Customized option gives students a unique way to meet the coursework requirements in this program. Gain a deeper level of knowledge in a specific area of interest and benefit from an independent, self-directed learning experience under the guidance of a mentor.

Required Specialization Course (5 cr.)

Students choose an area of specialization and take one required course for that area, listed below:

- **General:** Any graduate level course offered by Walden University
- **Clinical Social Work:** HUMN 8110 - Advanced Social Work Theory and Practice
- **Criminal Justice:** HUMN 8529 - Forensic Application in Community Settings
- **Disaster, Crisis, and Intervention:** HUMN 8145 - Crisis Management
- **Family Studies and Intervention Strategies:** HUMN 8356 - Theories and Techniques in Marriage, Couple, and Family Counseling
- **Human Services Administration:** HUMN 8111 - Leadership and Organizational Change
- **Public Health:** HUMN 8050 - Global Health and Issues in Disease Prevention
- **Social Policy Analysis and Planning:** HUMN 8451 - Public Policy Analysis

Advanced Customized Experiences (10 cr.)

The remaining 10 hours for the specialization consist of independent learning experiences:

- HUMN 8404 - Advanced Customized Experience A
- HUMN 8406 - Advanced Customized Experience B
Clinical Social Work

Students can advance their knowledge of social work theory, policy, and practice with a specialization in Clinical Social Work. They will study the leadership skills necessary to design and implement more effective policies that provide culturally and contextually relevant services to those in need. And they will gain valuable experience conducting research from both macro and micro perspectives in an effort to inform best practices in their fields. This specialization focuses on outreach and advocacy practices in addition to clinical applications.

Specialization Curriculum (15 cr.)

- HUMN 8110 - Advanced Social Work Theory and Practice
- HUMN 8700 - Psychology and Social Change
- HUMN 8785 - Prevention, Intervention, and Consultation

Criminal Justice

The specialization in Criminal Justice is designed for professionals involved in all aspects of public safety, including law enforcement and rehabilitation. Students will examine the factors that contribute to criminal behavior, such as urban decay, substance abuse, and poverty. They will explore the use of traditional forms of intervention, such as individual and group psychotherapy, as well as recent developments in intervention, including restorative justice as it relates to both criminals and the victims of crimes. And they will gain a greater insight into the problems facing the criminal justice system and how they can begin to address these challenges.

Specialization Curriculum (15 cr.)

- HUMN 8529 - Forensic Application in Community Settings
- HUMN 8350 - Historical and Contemporary Issues in Criminal Justice
- HUMN 8511 - Treatment of Forensic Populations

### Disaster, Crisis, and Intervention

In this specialization, students will examine the theory and strategies to respond to the initial basic needs of a community in an emergency situation and how to assist victims and their caregivers after the initial crisis has passed. Students can study the skills and practices specific to crisis counseling, including theories of crisis intervention and models for working with different populations. They will examine the actions and behaviors that follow a disaster; learn how to address stress, coping, and adjustment difficulties; and study psychological disorders such as post-traumatic stress disorder. And they will explore a crisis from a community and regional level, and gain experience designing a crisis plan to prepare for future emergencies. This specialization also addresses the psychology and impact of terrorism on communities.

**Specialization Curriculum (15 cr.)**

Family Studies and Intervention Strategies

The Family Studies and Intervention Strategies specialization provides students with an understanding of the utilization of advanced clinical theory and research methodology within a unique, client-centered ecological context. Students are exposed to a broad spectrum of theoretical and clinical approaches to intervention, which emphasize the special needs of ethnic and racial minority, gay and lesbian, single-parent, and low-income families. Graduates are particularly skilled at developing multi-modal therapeutic approaches and recognizing special treatment considerations within a diverse client delivery system.

Specialization Curriculum (15 cr.)

- HUMN 8361 - Human Sexuality
- HUMN 8810 - Community Psychology
- HUMN 8356 - Theories and Techniques in Marriage, Couple, and Family Counseling

**Human Services Administration**

The Human Services Administration specialization focuses on the study of the theoretical foundations of organizational behavior and the practice of management and planning. Topics for inquiry include leadership, program development and implementation, creating and sustaining interorganizational and community relations, and staff development and training. Graduates are prepared to assess the effectiveness of the internal and systemic efforts of community-based human services organizations and, as a result, provide managers and direct-line staff with more effective strategies for improving the well-being of the diverse individuals and groups they serve.
**Specialization Curriculum (15 cr.)**

- HUMN 8392 - The Language of Leadership
- HUMN 8111 - Leadership and Organizational Change
- HUMN 8390 - Strategic Context of Public Management and Leadership

Military Families and Culture

In this specialization, students can gain insight into military culture and develop the advanced skills needed to meet the needs of former and active military personnel, veterans, and their families. Coursework focuses on post-traumatic stress disorder (PTSD), vicarious trauma, and the emotional and behavioral consequences of frequent family relocations, extensive deployments, and parent-child separation. Students also explore current approaches in working with members of the armed forces.

Specialization Courses (15 cr.)

- HUMN 8401 - Trauma, Crisis, and Stress With Military Personnel
- HUMN 8402 - Working with Military Spouses, Families, and Children
- HUMN 8403 - Military Culture

Public Health

In the Public Health specialization, students will address the critical public health issues impacting their communities today and will explore the role that health promotion plays in creating positive social change. Students will engage in an epidemiological approach to the study of disease and injury in populations, and how to apply this study to the control of public health problems. They will examine the social, behavioral, and cultural factors that impact public health and explore the chemical, physical, and biological hazards that can affect the health and safety of a community. And they will gain the key strategies needed for effectively organizing and conducting population-based disease prevention and health promotion programs.

Specialization Curriculum (15 cr.)

- HUMN 8050 - Global Health and Issues in Disease Prevention
- HUMN 8400 - Public Health Leadership and Systems Thinking
- HUMN 8129 - Communications, Marketing, and Public Relations for Public Health Leaders

### Social Policy Analysis and Planning

In this specialization, students will impact and inform public policy and advance the greater good by identifying community needs and working with key stakeholders on issues affecting the health and welfare of the community. They will study how to analyze existing policy and the key economic and legal factors that influence decision making. And they will explore strategies behind successfully collaborating and coordinating with legislators, lobbyists, and others to create informed policy and sustainable change.

#### Specialization Curriculum (15 cr.)

- HUMN 8451 - Public Policy Analysis
- HUMN 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
- HUMN 8809 - Fundamentals of Law and Public Policy

2014–2015 Walden University Catalog (September 2014)  Page 813
Ph.D. in Social Work

The Ph.D. in Social Work program is designed to prepare experienced social work professionals as leaders, researchers, educators, and supervisors in the field. This program offers students an opportunity to engage in a core body of social work knowledge and processes that focus on the history and development of the profession, contemporary issues in social work, advanced social work theory and practice, program planning and evaluation, and research methods leading to a dissertation experience designed to prepare students for their roles as leaders and advocates for social change in the field.

Learning Outcomes

Graduates of this program are able to:

1. Utilize current research, best practices, and theory to promote prevention and intervention strategies that address social problems and needs of oppressed and marginalized social groups.
2. Employ various research and statistical tools to create data to address the etiology and dynamics of social problems and social needs.
3. Evaluate the role of research and evaluation in social work in improving social interventions and advancing theory development.
4. Critically evaluate the history of social work, its mission, and its core values.
5. Promote social change by collaborating with leaders, agencies, and universities to advocate for policies and programs that advance the economic and social well-being of culturally diverse clientele.

6. Demonstrate the ability to assess the role of diversity in characterizing and shaping the human experience.

7. Apply ethical decision making and practices in social work.

Specializations

- Addictions and Social Work
- Clinical Expertise
- Criminal Justice
- Disaster, Crisis, and Intervention
- Family Studies and Interventions
- Medical Social Work
- Policy Practice
- Social Work Administration

Degree Requirements

- 77 total credits
- Foundation course (1 cr.)
- Core course (25 cr.)

Specialization Courses (15 cr.)

- Dissertation (four terms for a total of 20 cr.)
- 10 quarters; 3 years estimated time to completion (based on individual student progress)
- Four 4-day residency sessions

Core Curriculum

Foundation Course (1 cr.)

- SOCW 8000 - Foundations of Graduate Study

Core Courses (25 cr.)

- SOCW 8110 - Advanced Social Work Theory and Practice
- SOCW 8116 - History and Development of Social Work
- SOCW 8137 - Contemporary Issues, Social Change, and Social Policy
- SOCW 8138 - Program and Practice Evaluation
- SOCW 8550 - Preparing for Dissertation
**Foundation Research Sequence (12 cr.)**

Courses comprising the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100 must be completed prior to Residency 2 of the academic residencies. RSCH 8200 and RSCH 8300 must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8100 - Research Theory, Design, and Methods
- RSCH 8200 - Quantitative Reasoning and Analysis
- RSCH 8300 - Qualitative Reasoning and Analysis

**Advanced Research Sequence (4 cr.)**

All Ph.D. students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

- RSCH 8250 - Advanced Quantitative Reasoning and Analysis
- OR
- RSCH 8350 - Advanced Qualitative Reasoning and Analysis
- OR
- RSCH 8450 - Advanced Mixed-Methods Reasoning and Analysis

**Dissertation (20 cr.)**

- SOCW 9000 - Dissertation

Program Data

Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the Ph.D. in Social Work program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.

Addictions and Social Work

The Addiction and Social Work specialization prepares students to expand their professional service to support families, individuals, and communities around addictions treatment and case management and the development of prevention, intervention, and consultation around addiction.

Specialization Courses

- SOCW 8103 - Introduction to Addiction
- SOCW 8203 - Theories, Treatment, and Case Management of Addictions
- SOCW 8785 - Prevention, Intervention, and Consultation

Criminal Justice

The specialization in Criminal Justice is designed for professionals involved in all aspects of public safety, including law enforcement and rehabilitation. Students will examine the factors that contribute to criminal behavior, such as urban decay, substance abuse, and poverty. They will explore the use of traditional forms of intervention, such as individual and group psychotherapy, as well as recent developments in intervention, including restorative justice as it relates to both criminals and the victims of crimes. And they will gain a greater insight into the problems facing the criminal justice system and how they can begin to address these challenges.

Specialization Courses

- SOCW 8350 - Historical and Contemporary Issues in Criminal Justice
- SOCW 8351 - Policy Analysis in the Criminal Justice System
- SOCW 8117 - Diversity and Multiculturalism
Clinical Expertise

An advanced social work practitioner can make a positive impact in the community on various levels. This specialization can help prepare students for a career as an expert in clinical social work practice. Students will have the opportunity to focus their studies in supervision, treatment of forensic populations, and addiction case management. Students can gain the knowledge to become a supervisor of Master of Social Work students or advance their current clinical practice.

Specialization Courses

- SOCW 8117 - Diversity and Multiculturalism
- SOCW 8570 - Social Work Supervision
- SOCW 8571 - Treatment of Forensic Populations

Disaster, Crisis, and Intervention

The Disaster, Crisis, and Intervention specialization examines theories and strategies to respond to the initial basic needs of a community in an emergency situation and how to assist victims and their caregivers after the initial crisis has passed. Students will study skills and practices specific to crisis counseling, including theories of crisis intervention and models for working with different populations. They will examine the actions and behaviors that follow a disaster; learn how to address stress, coping, and adjustment difficulties; and study psychological disorders such as post-traumatic stress disorder. Students will explore a crisis from a community and regional level and gain experience by designing a crisis plan to prepare for future emergencies. In this specialization, students also address the psychological impact of terrorism on communities.

Specialization Courses

- SOCW 8145 - Crisis Management
- SOCW 8333 - Vicarious Trauma and Compassion Fatigue
- SOCW 8117 - Diversity and Multiculturalism

Family Studies and Interventions

The Family Studies and Intervention Strategies specialization provides students with techniques for utilizing advanced clinical theory and research methodology within a unique, client-centered ecological context. Students are exposed to a broad spectrum of theoretical and clinical approaches to intervention, which emphasize the special needs of ethnic and racial minorities, gay and lesbian, single-parent, and low-income families. Students will explore developing multimodal therapeutic approaches and recognizing special treatment considerations within a diverse client delivery system.

Specialization Courses

- SOCW 8356 - Theories and Techniques in Marriage, Couple, and Family Counseling
- SOCW 8346 - Child and Adolescent Counseling
- SOCW 8117 - Diversity and Multiculturalism
Medical Social Work

The Medical Social Work specialization provides students techniques for supporting individual clients or patients, families, and communities around resources and support services for vulnerable populations such as people with acute or chronic illness, terminal illness, disabilities, and challenges of age. Students in this specialization explore working as a part of treatment and care teams in hospitals, nursing homes, and hospice facilities and with caretakers and other treatment facilities. In this specialization, students are exposed to the roles and competencies of medical social workers, the needs of clients and families, particularly the aging population, and resource planning and support for vulnerable populations.

Specialization Courses

- SOCW 8204 - Medical Social Work I
- SOCW 8205 - Medical Social Work II
- SOCW 8815 - Contemporary Gerontology/Geriatric Psychology

Policy Practice

Effective policy and sustainable change are the result of successful collaboration with legislators, lobbyists, grass-roots organizations and other groups, and individuals. This specialization can help students advance social welfare by identifying community needs and learning best practices in working with key stakeholders on today's most pressing social policy issues. Students will have the opportunity to analyze the key factors that influence decision making related to positive social change and learn how to engage with community, state, and federal governments.

Specialization Courses

- SOCW 8451 - Public Policy Analysis
- SOCW 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
- SOCW 8809 - Fundamentals of Law and Public Policy

Social Work Administration

Strong leadership, strategic program development, and effective implementation can enhance an agency's ability to serve its target populations. This specialization helps students focus on these and other aspects of administration within the context of advancing social welfare. The curriculum is designed to help students gain insight into organizational behavior, staff development, internal and community relations, and management. Students can apply their knowledge to help social work agencies develop effective strategies for improving the well-being of the individuals and groups they serve.

Specialization Courses

- SOCW 8152 - Human Services Administration
- SOCW 8750 - Leadership Development
- SOCW 8117 - Diversity and Multiculturalism
- HUMN 6403 - Military Culture
THE COLLEGE OF UNDERGRADUATE STUDIES

The College of Undergraduate Studies is the academic unit of Walden University responsible for the required general education curriculum, which is a component of all baccalaureate degree programs of the university.

Additionally, the college is responsible for the B.S. in Interdisciplinary Studies and the curricular emphases within the interdisciplinary studies program. The college collaborates closely with the other colleges and schools of the university in the planning and delivery of undergraduate degree programs, particularly as they relate to general education.

The college's faculty members are highly qualified and represent the wide array of disciplines contained in the general education and Interdisciplinary Studies curricula. The college collaborates with all of the academic and student support units of the university regarding the quality of the overall university experience of undergraduate students.
THE CENTER FOR DEGREE ACCELERATION

The Center for Degree Acceleration provides several opportunities for students to accelerate their time to degree completion and reduce the cost of their program of study. The Center helps undergraduate students by providing multiple pathways to demonstrate college-level learning acquired outside of the classroom and earn college credits including:

- Allowing students to easily transfer previous college-level courses or an associate's degree.
- Serving as the point of contact between enrollment advisors and academic advisors to enable students to foster earlier degree completion.
- Offering guidance to students on ways to obtain academic credit for college-level learning through a portfolio development course.
- Instructing students on other options to earn credit by examination.
- Providing guidance on the Accelerate into Master's (AIM) programs.

The Walden University General Education Curriculum

Bachelor's degree programs at Walden University combine academic study with real-world applications to prepare students for today's competitive economy and society in business, technology, education, social, behavioral, and health sciences. General education courses blend with degree program courses to provide the breadth and depth of knowledge needed by the 21st-century citizen.

Walden's general education outcomes focus on discovery, evaluation, expression, perspective, and change. Students explore these ways of thinking and working in courses in communication, humanities, natural sciences, mathematics, and social sciences. Undergraduates learn critical and creative thinking, written and verbal communication skills, problem-solving, and group skills. These competencies prepare students for diverse public and professional lives where they will help shape a changing global community.

Learning Outcomes

The Walden University General Education learning outcomes are as follows:

1. Discovery: Students will locate and identify appropriate sources of information using multiple sources and methods, including bibliographic, textual, experiential, and experimental research.
2. *Evaluation:* Students will critically assess texts and arguments in multiple forms and contexts using quantitative and qualitative logic, the scientific method, ethics, and pragmatics.

3. *Expression:* Students will effectively and ethically communicate information and opinions verbally and nonverbally using written, oral, behavioral, and visual methods adapted for diverse audiences and purposes.

4. *Perspective:* Students will be able to articulate the consistency and flexibility of knowledge as it is experienced across time, space, and culture.

5. *Change:* Students will articulate how their ability to discover, evaluate, and express ideas from different perspectives is instrumental in their progress toward achieving personal goals and effecting social change.

**General Education Areas and Requirements**

(Minimum of 46 cr. total)

*Note:* A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their academic advisor if they have questions about individual program requirements.

**Written and Oral Communications**

(Minimum of two courses; ENGL 1001 OR ENGL 1001E is required)

- COMM 1001 - Contemporary Communications
- COMM 1003 - Introduction to Mass Communication
- COMM 1004 - Interpersonal Communication
- COMM 2002 - Fundamentals of Public Speaking
- COMM 4001 - Intercultural Communication
- ENGL 1001 - English Composition
- ENGL 2002 - Professional Writing for Successful Communication

**Humanities**

(Minimum of two courses; HMNT 1001 is required.)

- ARTS 2001 - Fundamentals of Photographic Arts
- ENGL 2050 - Women’s Literature and Social Change
- ENGL 2110 - Creative Writing: Fundamentals of Short Fiction
- ENGL 3110 - Creative Writing: Contemporary Nonfiction and Poetry
- HMNT 1001 - Living and Learning in a Technological World
- HMNT 1050 - Humanities Through the Arts
- HMNT 3001 - Modern Popular Culture
- PHIL 1001 - Introduction to Philosophy
- PHIL 2001 - Ethics
- PHIL 3010 - Science and Spirituality
- RELG 2001 - World Religions

**Mathematics/Natural Sciences**
(Minimum of two courses)

- BIOL 1001 - Introduction to Biology ♦ *
- BIOL 2320 - Nutritional Science ♦
- BIOL 3020 - Essentials of Human Anatomy and Physiology ♦ *
- CHEM 1001 - Introduction to Chemistry ♦
- MATH 1030 - College Math ♦
- MATH 1025 - Exploring Mathematics in the Everyday World ♦
- MATH 1040 - College Algebra Concepts ♦
- NASC 1001 - Environmental Science ♦
- PHSC 1001 - Earth Science ♦
- SCNC 4001 - Analyzing Contemporary Scientific Controversies ♦
- STAT 3001 - Statistical Methods and Applications ♦

Social Sciences

(Minimum of two courses; SOCI 4080 or SOCI 4080E required)

- ANTH 3001 - Indigenous Peoples in the Modern World ♦
- CUGS 2010 - What’s Your Problem? ♦ *
- GEOG 1001 - World Regional Geography ♦
- HIST 2005 - World History 1900–1945 ♦
- HIST 2006 - World History 1945–2000 ♦
- POLI 1001 - American Government and Politics ♦
- PSYC 1001 - Introduction to Psychology ♦ *
- SOCI 1001 - Introduction to Sociology ♦
- SOCI 2001 - Multicultural Dimensions of Society ♦ *
- IDST 1035 - Self in Society: An Interdisciplinary Approach ♦
- IDST 1050 - Interdisciplinary Experience: Identity in a Global Society ♦
- IDST 2050 - Interdisciplinary Experience: Sustaining Quality of Life in the City ♦
- IDST 4002 - Seminar in Public Service ♦ *
- SOCI 4080 - Social Responsibility ♦ *

*Students have the option of taking this course in a 12-week format.

Foundation Course

Many university students find they need to refresh their skills in mathematics before taking college-level courses. The College of Undergraduate Studies offers a foundational course in mathematics to prepare students for success in their degree programs. This preparatory course has a much lower tuition rate than college-level courses. The course does not apply to graduation and is not transferable to other institutions of higher education.

- MATH 0090 - Basic Algebra ♦

Elective Writing and Math Courses

The following courses are designed to prepare students for their required composition or mathematics general education requirements. Course credit applies toward degree completion as elective credit, but will not fulfill general education requirements.

- ENGL 1000 - Academic Writing ♦
- MATH 1010 - Intermediate College Math ♦
Courses That Must Be Taken at Walden

Programs Requiring Specific General Education Courses

The following general education courses are required for Bachelor of Science programs. HMNT 1001 and SOCI 4080 must be taken at Walden University. The other courses in this table are eligible for transfer credit. Also see the Transfer Maximum by Program table in the Walden University Student Handbook.

*Students have the option of taking this course in a 12-week format.

**B.S. in Interdisciplinary Studies**

The B.S. in Interdisciplinary Studies degree program provides adult students, well-versed in life experience, an approach and the tools to understand and respond to complex situations, issues, and problems that might arise within a workplace, family environment, or community. In the program, students achieve mastery of the interdisciplinary methods through application in Interdisciplinary Studies courses focusing on the phenomena of urban communities, population movements, identity, and other topics. Students in the Interdisciplinary Studies program become the future knowledge creators and innovators needed to see and solve increasingly complex societal issues.

**Emphases**

Additionally, the B.S. in Interdisciplinary Studies program provides adult students with an opportunity to create flexible career options through the use of "emphases" that are drawn from other degree programs in the university to obtain an understanding and the skills needed in professions of interest. Students are required to choose two emphases in their Interdisciplinary Studies program. Each emphasis must consist of six courses from another Walden undergraduate program.

**Learning Outcomes**

At the end of this program, students will be able to:

1. Comprehend and translate terminology across multiple program areas and perspectives.
2. Use symbols, metaphors, and models to communicate their understanding of complex issues.
3. Demonstrate systemic interdisciplinary reasoning.
4. Demonstrate inclusive thinking and techniques of integration to move toward interdisciplinary approaches to problem-solving and decision making.
5. Conduct, analyze, and apply interdisciplinary research.
6. Understand the importance of solving problems alongside individuals with multiple perspectives.
7. Evaluate the relevance of contextual factors to understand an issue.

**Degree Requirements**

- 181 total quarter credit hours (including 45 cr. completed at Walden)
- General education courses (46 cr.)
- Interdisciplinary core experience courses (40 cr.)
- Capstone courses (5 cr.)
- Elective courses (30 cr.)
- Emphasis courses (60 cr.)

**Curriculum**

**General Education Courses (46 cr.)**

See the general education section of this *Walden University Catalog*.

**Note:** A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult with their Academic Advisor if they have questions about individual program requirements.

**Interdisciplinary Core Experience Courses (40 cr.)**

- **IDST 1035 - Self in Society: An Interdisciplinary Approach**
- **IDST 1050 - Interdisciplinary Experience: Identity in a Global Society**
- **IDST 2050 - Interdisciplinary Experience: Sustaining Quality of Life in the City**
- **PSPA 3030 - Social Change in the Community**
- **PSPA 3040 - Global Social Justice**
- **IDST 3050 - Interdisciplinary Experience: Change and Population Movements Across Borders**
  Choose one of the following:
  - **COMM 4001 - Intercultural Communication**
  OR
  - **IDST 4002 - Seminar in Public Service**
  OR
  - **IDST 4003 - Seminar With Internship**
  OR
  - **IDST 4004 - Seminar With Study Abroad**
  - **IDST 4001 - Seminar in Interdisciplinary Research**

**Capstone Courses (5 cr.)**

Students must complete the following course:

- **IDST 4080 - Capstone—Interdisciplinary Methodology**
Elective Courses (30 cr.)
Choose six courses from general education, B.S. in Interdisciplinary Studies, or other Walden bachelor’s degree programs. At least 55 credits must be at the 3000–4000 level. Elective credits should total 30 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements. Note on Minors: Electives can also be used to complete a six-course minor.

Emphasis Courses (60 cr.)
Students must choose two emphases. Each emphasis consists of six required courses from another Walden undergraduate program.

Accounting Emphasis (30 cr.)
- BUSI 1002 - Introduction to Management and Leadership
- ACCT 1003 - Introduction to Accounting I
- ACCT 2003 - Introduction to Accounting II
- ACCT 2002 - Managerial Accounting: Introduction to Financial Planning and Analysis
- FNCE 3001 - Financial Management
- ACCT 3001 - Intermediate Accounting I

Business Administration Emphasis (30 cr.)
- BUSI 1002 - Introduction to Management and Leadership
- MRKT 3001 - Marketing
- ACCT 1003 - Introduction to Accounting I
- FNCE 3001 - Financial Management
- HRMG 3001 - Human Resource Management
- ISYS 3001 - Information Systems in Enterprise

Child Development Emphasis (30 cr.)
- EDUC 1004 - Child Development
- EDUC 4005 - Cultural and Linguistic Diversity
- EDUC 1005 - Child Health, Safety, and Nutrition
- EDUC 2001 - Language Development
- EDUC 3003 - Observation and Assessment of the Young Child
- EDUC 1006 - Child, Family, and Community Relationships

Communication Emphasis (30 cr.)
- COMM 1003 - Introduction to Mass Communication
- COMM 1004 - Interpersonal Communication
- COMM 2001 - Dynamics of Group Communication
- MEDC 3001 - Communicating Through Media and Technology
- COMM 3002 - Negotiation and Persuasion
- COMM 2003 - Writing for the Digital Age
Computer Information Systems Emphasis (30 cr.)

- CMIS 1004 - Object-Oriented Programming Concepts
- ITEC 1010 - IT Infrastructure
- CMIS 2001 - Internet Computing
- ITEC 2040 - Systems Analysis
- ITEC 2050 - Systems Design
- ITEC 2060 - Database Management Systems

Criminal Justice Emphasis (30 cr.)

- CRJS 1001 - Contemporary Criminal Justice Systems
- CRJS 2003 - Criminal Law
- CRJS 3002 - Courts and Judicial Process
- CRJS 3003 - Law Enforcement
- CRJS 4102 - The Criminal Mind
- CRJS 2001 - Criminology and Social Control

Forensic Psychology Emphasis (30 cr.)

- PSYC 1001 - Introduction to Psychology
- FPSY 2001 - Cross-Cultural Psychology
- FPSY 2005 - Social Influences on Behavior
- FPSY 2101 - Introduction to Forensic Psychology
- FPSY 4111 - Forensic Interviewing and Investigation
- FPSY 4112 - Forensic Assessment

Health Studies Emphasis (30 cr.)

- HLTH 4300 - Personal Health and Wellness
- HLTH 1005 - Context of Healthcare Delivery
- HLTH 2110 - Behavioral and Cultural Issues in Healthcare
- HLTH 2115 - Aging Across the Lifespan
- HLTH 3115 - Public and Global Health
- HLTH 3100 - Ethical and Legal Issues in Healthcare

Human Services Emphasis (30 cr.)

- PSYC 1001 - Introduction to Psychology
- PSYC 2010 - Introduction to Human Services
- EDUC 1006 - Child, Family, and Community Relationships
- PSYC 4008 - Intergroup Conflict and Peace Building
- HUMN 4001 - Case Management for Persons in Need
• **HUMAN 4002 - Effective Human Services Interviewing**

**Information Technology Emphasis (30 cr.)**

• *ITEC 1010 - IT Infrastructure*
• *ITEC 1020 - Networking Fundamentals*
• *ITEC 2020 - IT Theory Fundamentals*
• *ITEC 2030 - Operating Systems Fundamentals and Administration*
• *ITEC 3020 - Computer Security Fundamentals*
• *ITEC 4101 - Network Security*

**Instructional Design and Technology Emphasis (30 cr.)**

• *EDUC 1014 - Understanding Today’s Instructional Environments*
• *EDUC 1015 - How People Learn*
• *EIDT 2001 - Technology and Learning*
• *EIDT 2004 - Instructional Design I*
• *EIDT 3002 - Multimedia Tools*
• *EIDT 3004 - Instructional Design II*

**Political Science and Public Administration Emphasis (30 cr.)**

• *POLI 1001 - American Government and Politics*
• *PSPA 1003 - Political Controversies*
• *PSPA 2001 - Principles of Public Administration*
• *PSPA 2002 - The Making of Public Policy*
• *PSPA 3001 - Constitutional Law*
• *PSPA 3002 - Ethics in Public Leadership*

**Psychology Emphasis (30 cr.)**

• *PSYC 1001 - Introduction to Psychology*
• *PSYC 3002 - Data Analysis and Presentation*
• *PSYC 2002 - Human Development: Childhood and Adolescence*
• *PSYC 2005 - Social Influences on Behavior*
• *PSYC 3004 - Psychological Disorders*
• *PSYC 4002 - Brain and Behavior*

**Public Health Emphasis (30 cr.)**

• *PUBH 1000 - Foundations of Public Health*
• *HLTH 2110 - Behavioral and Cultural Issues in Healthcare*
• **PUBH 3000 - Environmental Health**
• **HLTH 4200 - Principles of Epidemiology**
• **PUBH 3100 - Human Disease and Prevention**
• **PUBH 4000 - Public Health Education and Communication**

**Self-Designed Emphasis (30 cr.)**
Must be approved by the program director. Students should contact their Academic Advisor for assistance with the Self-Designed option.

**Program Data**
Walden is committed to providing the information you need to make an informed decision about where you pursue your education. Click here to find detailed information for the B.S. in Interdisciplinary Studies program relating to the types of occupations this program may lead to, completion rate, program costs, and median loan debt of students who have graduated from this program.
OTHER UNDERGRADUATE OPTIONS

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for advanced undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a C in the graduate-level course but only a grade of B or better will carry over to the graduate program. Students who receive a C grade will be awarded a grade of C*, which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement.

Students who do not receive a B or better are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must repeat that course as a master's student.

Requirements

Walden University offers several opportunities for advanced undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Undergraduates can complete no more than 50% of the total courses required for master's degree completion, excluding thesis, practicum, or capstone. (Individual programs determine specific eligible courses and some programs may limit the number of courses available.)

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.)
   c. Be in good financial standing.
   d. Not have any incompletes.

3. AIM courses are (5000-level) graduate courses.*
   a. Tuition for these courses is charged at the undergraduate rate.
b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.
c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA.

4. Students must get a B or better in each course to have that course applied to the master's program.
   o Students who get lower than a B in an AIM course will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must repeat that course as a master's student.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   o Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a B or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

*Note: Graduate students cannot register for AIM courses.

### Master of Public Health (MPH)

*Students may select any or all of these courses. Individual course prerequisites apply.*

*It is recommended that students complete PUBH 5101 prior to enrolling in any other MPH courses.*

*Note: These courses are 11 weeks in length.*

- PUBH 5101 - Principles of Communication in Public Health
- PUBH 5002 - Essentials of Public Health: A Case Study Approach
- PUBH 5115 - Social, Behavioral, and Cultural Factors in Public Health
- PUBH 5165 - Environmental Health
- PUBH 5235 - Program Design, Planning, and Evaluation
- PUBH 5175 - Health Policy and Management

### Master of Healthcare Administration (MHA)

*Students may select any or all of these courses. Individual course prerequisites apply.*

*Note: These courses are 8 weeks in length.*

- MMHA 5015 - Foundations of Healthcare Administration
- MMHA 5100 - U.S. Healthcare Delivery System
- MMHA 5135 - Health Policy and Economics
- MMHA 5205 - Health Law and Ethics

### School of Nursing
### Master of Science in Nursing (MSN)

**Note:** These courses are 11 weeks in length.

- **NURS 5050 -** Policy and Advocacy for Improving Population Health
- **NURS 5051 -** Transforming Nursing and Healthcare Through Technology
- **NURS 5052 -** Essentials of Evidence-Based Practice

*Students must be admitted to the RN-BSN-MSN track to complete these AIM courses.*

### College of Social and Behavioral Sciences

### School of Public Policy and Administration

### Master of Public Administration (MPA)

*Students may select up to five of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- **MMPA 5200 -** Introduction to Public Administration
- **MMPA 5405 -** Ethics and Social Justice
- **MMPA 5420 -** Organizational Management and Leadership
- **MMPA 5431 -** Finance and Budgeting for the Public Sector
- **MMPA 5435 -** Human Resource Management: Building a Capable Workforce
- **MMPA 5451 -** Public Policy Analysis
- **MMPA 5480 -** Applied Research and Evaluation Methods

### Master of Public Policy (MPP)

*Students may select any or all of these courses. Individual course prerequisites apply.*

**Note:** These courses are 11 weeks in length.

- **MMPP 5280 -** Policy and Politics in American Political Institutions
- **MMPP 5405 -** Ethics and Social Justice
- **MMPP 5111 -** Leadership and Organizational Change

### M.S. in Emergency Management

*Students may select any or all of these courses. Individual course prerequisites apply.*

- **MSEM 5364 -** Managing Public Safety Organizations

School of Social Work and Human Services

M.S. in Clinical Mental Health Counseling

These courses are open only to students in the B.S. in Human Services and B.S Psychology programs. Students may select any or all of these courses. Individual course prerequisites apply.

* HUMN 5100 - Introduction to Mental Health Counseling
* HUMN 5722 - Counseling and Psychotherapy Theories
* HUMN 5316 - Techniques of Counseling
* HUMN 5723 - Multicultural Counseling

Note: These courses are 11 weeks in length.

Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their academic advisor. Students may select a maximum of two minors.

* Minor in Applied Instructional Design and Technology
* Minor in Business
* Minor in Child Development
* Minor in Communication
* Minor in Criminal Justice
* Minor in Healthcare Management
* Minor in Health Promotion and Wellness
* Minor in Health Studies
* Minor in Introductory Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health
B.S. in Business Administration Dual Degree

In the fall of 2005, Walden University created partnership programs with Laureate Universities in Latin America, enabling students at the Universidad del Valle de Mexico (UVM), and later at Universidad Latina Heredia (ULatina) located in Costa Rica, and Universidad Latinoamericana de Ciencias & Tecnologia (ULACIT) located in Panama, to earn bachelor's degrees at their home institution and at Walden.

As part of its increasing focus as a global university, Walden University offers a dual degree (DD) program that allows students from various universities within the Laureate network to obtain degrees from Walden University while simultaneously earning degrees at universities in their home institutions.

Graduates in the DD program obtain both their home institution Bachelor of Science (B.S.) in Business Administration as well as a B.S. in Business Administration from Walden University. Both programs can be completed in nine semesters.

The Walden DD program is designed to give students the tools for an international career in business. It is a 10-course sequence of core courses in the Walden B.S. in Business Administration program that, taken in conjunction with the home institution B.S. in Business Administration program allows the student to earn a B.S. in Business Administration from Walden University.

The DD program has many benefits:

• It offers an intensive curriculum designed to build business skills.
• Upon graduation, the student will have a completed business plan.
• Three M.B.A.-level courses allow the student to articulate into the Walden M.B.A. program.
• The course sequence is designed to allow the student the same amount of time to complete the bachelor's degree at their local university.
• Students can earn a degree from a U.S. university without leaving their home country.

The DD program offers start dates every semester: January, May, and September. Please consult with the Walden coordinator for specific details.

Course Sequence
Global Business Concentration Program

The Global Business Concentration (GBC) is designed for students who wish to enhance their global business knowledge, complete coursework from a U.S. university, and gain business knowledge and experience. Students are not required to have previous coursework in business, and thus, students from non-business majors interested in obtaining training and a credential in business from a U.S. institution can participate. The concentration is a three-course sequence, two of which are used in the DD program.

The Global Business Concentration has many benefits:
- It requires only three semesters of coursework to complete the sequence.
- Students will receive a Certificate of Recognition from Walden University upon successful completion of the courses.

ACCT 1000 - Developing Student Portfolios in Accounting

(1 cr.) A portfolio is a valuable tool for students to communicate and demonstrate their academic accomplishments as well as a means to advance their professional prospects. In this course, students learn about the tools for developing an electronic portfolio. They compose a high-level design and comprehensive outline through which they apply the structure and methods learned in the course. They also examine tools and techniques for managing and maintaining an electronic portfolio. Note about required first courses: Students should review the program description section of the Walden University Catalog carefully to determine which first course is required.

ACCT 1001 - Accounting I♦

(5 cr.) An introduction to accounting, this course presents the basic techniques and procedures of accounting for organizations. Students work toward gaining requisite skills that they can apply to future courses and projects in their program. Through weekly discussions, they practice communicating with peers while examining the central policies and procedures of an accounting system and utilizing basic terminology, such as language found in the four main types of financial statements. Students prepare basic financial statements through which they learn how statements are constructed and interrelated. They also examine acceptable methods of valuing assets, liabilities, and owner’s equity. For an interdisciplinary perspective, students explore how computer technology lends to the profession by examining the types of programs available to perform accounting tasks. (Prerequisite(s): MATH 1001 or MATH 1002 or STAT 3001, and BUSI 1001 or HLTH 4000.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 1003 - Introduction to Accounting I♦

(5 cr.) Students in this course take a top-down approach to understanding introductory accounting documents and procedures by exploring a business’s financial statements, including the balance sheet, income statement, and cash flow statement. Students explore the practical uses for information that can be gleaned from these statements, individually and as a whole, through a detailed examination of the properties and characteristics of each statement. Students engage in application assignments and discussions on a variety of topics, such as regulations that should be followed when preparing financial statements as promulgated by generally accepted accounting principles (GAAP). Students examine the U.S. use of GAAP in comparison to the use of International Financial Reporting Standards. (Prerequisite(s): BUSI 1001 or 1002, and MATH 1001, 1002, 1030, or 1040.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 2001 - Accounting II
A continuation of Accounting I, this course builds upon students’ knowledge of accounting principles, including the basic techniques and procedures of internal reporting in organizations and corporations. Students examine a variety of terms and concepts, enabling them to gain a clear understanding of corporate reporting and the fundamental elements of managerial accounting. Students apply strategies involving cost behavior, job-order, cost-volume-profit analysis, performance planning and budgeting, standard costs and variance analysis, relevant costs, and the statement of cash flows to real-world scenarios. Students also assess best practices in employing relevant information in the decision-making process, acquiring practical skills to use in addressing actual accounting problems in the professional arena. (Prerequisite(s): ACCT 1001.)

ACCT 2002 - Managerial Accounting: Introduction to Financial Planning and Analysis

(5 cr.) Managerial accounting provides important data to the individuals responsible for directing and controlling an operation. Through this course, students learn about the essential elements of managerial accounting, including strategic, organizational, and operational decision making using financial information. They examine cost-volume-profit analysis, capital budgeting, operational budgeting, forecasting tools, and performance measurement. Students work through case studies and functional exercises for a contextual understanding of managerial accounting, including the application of quantitative methods to determine performance, planning, and control in operations. (Prerequisite(s): ACCT 2003.)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 2003 - Introduction to Accounting II

(5 cr.) A continuation of Accounting I, this course builds upon students’ knowledge of accounting principles, providing a basic foundation of key managerial accounting concepts and activities. Students learn how managers use accounting information for decision making in an organization. They explore how to develop business plans for small businesses and larger manufacturing corporations as well as how to distinguish between the two types of organizations. Through a variety of assignments focusing on the coverage of cost-volume-profit analysis, performance planning, and budgeting, students have the opportunity to gain managerial decision-making skills, helping them prepare for issues they may encounter in the field. (Prerequisite(s): ACCT 1003 or ACCT 1001.)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 3001 - Intermediate Accounting I

(5 cr.) Although businesses often use the same authoritative standards in the production and presentation of financial statements, statements may still differ in a variety of ways. Recognizing these differences requires careful analysis and a variety of techniques. This course provides students with an overview of prevailing accounting issues as well as the ethical considerations encountered in the process; it is the first in a four-course sequence and builds upon content covered in introductory accounting courses. Students explore the principles of accrual accounting and interpret the steps in the accounting cycle. They learn about financial statement presentation.
and disclosure requirements, and they examine the conceptual framework and measurement principles underlying financial accounting. They also assess the relationship between the reporting and auditing functions in corporations. Additionally, students evaluate differences between Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards and apply these standards to their coursework. *(Prerequisite(s): ACCT 2003.)*

♦ *Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**ACCT 3002 - Auditing and Internal Controls**

*(5 cr.)* Auditing a company’s financial statements requires the ability to apply generally accepted auditing standards to a variety of situations. In this course, students learn the specifics of auditing and how to choose appropriate audit testing. They explore a variety of topics, including professional ethics, audit planning and documentation, audit evidence, statistical tools, materiality and risk, and audit reports for different assurance and non-assurance services. Students examine internal controls and accounting systems as well as software designed for evaluating business information. Through a group project, students work toward gaining practical knowledge and problem-solving skills as they analyze real audit issues and cases. Students apply the Statements of Audit Standards from the Audit Standards Board and Audit Standards of the Public Company Accounting Oversight Board to their auditing situations. *(Prerequisite(s): ACCT 2003.)* **Note:** Concurrent enrollment in ACCT 3001 is recommended.

♦ *Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**ACCT 3003 - Intermediate Accounting II**

*(5 cr.)* How does a business handle its investments and capital, and what are the generally accepted accounting principles when valuing inventory? This course provides students with the opportunity to consider and respond to prevailing accounting questions as well as gain insight on related ethical considerations; it is the second in a four-course sequence and is a continuation of Intermediate Accounting I. Students learn ways to categorize, measure, and report on cash, receivables, inventories, and investments. They gain practice in financial statement presentation and disclosure requirements. Through evaluation and online discussion, students explore the auditing function as well as inventory cost methods. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards. *(Prerequisite(s): ACCT 3001.)*

♦ *Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**ACCT 3004 - Intermediate Accounting III**

*(5 cr.)* Physical assets continually change in value; knowing how to account for them is an important task in proper financial statement disclosure. In this course, students investigate current accounting issues as well as the ethical considerations encountered in the process; this course is the third in a four-course sequence and is a continuation of Intermediate Accounting II. Students examine the measurement and accounting for property, plant, and equipment. They also
explore intangible assets, current liabilities, and contingencies. They focus on financial statement presentation and discuss how it relates to the auditing function. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards. (Prerequisite(s): ACCT 3003.)

**ACCT 3005 - Intermediate Accounting IV**

(5 cr.) What is capital structure, and how can a business use it for sustainability and reaching long-term goals? This course provides students with the opportunity to respond to such questions as well as to gain insight on related ethical considerations; it is the fourth in a four-course sequence and is a continuation of Intermediate Accounting III. Students explore the measurement and reporting principles for stockholders’ equity, retained earnings, long-term liabilities, long-term receivables, discontinued operations, and extraordinary items. They gain further practice in financial statement presentation and disclosures and explore their relationship to the auditing function. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards. (Prerequisite(s): ACCT 3004.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ACCT 3006 - Accounting Information Systems**

(5 cr.) Nearly all businesses have an accounting system that provides appropriate financial information required to make informed, timely decisions. Therefore, the design of the system is vital to the efficiency and internal controls of acquiring such information. This course provides students with the fundamental concepts of accounting systems design, including how accounting systems capture important business transactions that drive decisions and execution. Students learn about the technology of accounting systems, file processing, database concepts and tools, and internal control and risks. They also explore how to audit the information system as well as how to use the information system to perform audit functions. Through the examination of the latest commercial accounting software, students learn about technological developments for the production of reports and exchange of business data. (Prerequisite(s): ACCT 2003.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ACCT 4001 - Government and Nonprofit Accounting**

(5 cr.) The function and role of private and public sector organizations are often very different; therefore, the accounting principles used to run for-profit businesses and government businesses cannot always be the same. In this course, students compare and contrast the characteristics of government and nonprofit organizations and explore the ethical and social responsibilities of accountants working with these institutions. They also examine the measurement and reporting requirements for governmental and nonprofit organizations. They engage in discussions about the concepts of fund accounting, budget and control issues, and revenue and expense recognition. Students gain hands-on experience preparing financial statements for each type of organization. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and pronouncements of the Government Accounting
ACCT 4002 - Advanced Financial Accounting I

(5 cr.) Lease accounting from the perspectives of the lessor and lessee is an important consideration for business as an alternative to financing. But what options are available for lessors and lessees in accounting for lease transactions? This course provides students with the opportunity to investigate and respond to prevailing accounting issues in this area. This course continues the three-course sequence of Intermediate Accounting. Students assess and explain the measurement and reporting disclosures for leases, pensions, equity compensation, derivatives, and earnings per share. They apply best practices in the presentation of financial statements and analyze how this relates to the auditing function. Students also gain hands-on practice in determining pension obligations and expenses. As a basis for their coursework, students apply the Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards. (Prerequisite(s): ACCT 3005.)

ACCT 4003 - Advanced Financial Accounting II

(5 cr.) How can external users to an organization employ the statement of cash flow as a means to foresee an organization’s prospect for future earnings? This course provides students with the opportunity to research and answer accounting questions such as this; it is the second in a three-course sequence and continues the approach used in the Intermediate Accounting sequence. Students examine the measurement and reporting disclosures for changes in accounting principles, correction of errors, the statement of cash flows, segment and interim reporting, and deferred taxes. Students continue to learn about financial statement presentation and disclosures as well as how these elements relate to the auditing function. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards. (Prerequisite(s): ACCT 4002.)

ACCT 4004 - Advanced Financial Accounting III

(5 cr.) Whether it is to expand technical offerings or to gain the competitive edge over smaller entities, companies often merge together or acquire other companies. Often, this creates a positive effect on the companies involved; other times, it create severe financial strains on a company’s limited financial resources. In this course, students investigate prevalent accounting issues such as this; it is the third in a three-course sequence and continues the approach used in the Intermediate Accounting sequence. Students explore the measurement and reporting disclosures for mergers, acquisitions, and foreign currency translation. Students continue to learn financial statement presentation of business combinations and explore some of the auditing issues in this area. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards.
ACCT 4005 - Federal Taxation I: Individual Taxation

(5 cr.) In this course, students have the opportunity to gain a fundamental understanding of personal income taxes and how they are computed. They also learn appropriate tax concepts and terminologies important for students wishing to pursue a career in accounting and taxes. Students examine the federal income tax structure and apply income tax accounting to cases of individual and sole proprietorship taxation as they assemble information and documentation needed to prepare federal tax returns. They analyze federal income tax laws governing gross income, deductions, calculation of income tax rates, income tax credits, and the alternative minimum tax for individuals. (Prerequisite(s): ACCT 2003.)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 4006 - Federal Taxation II: Corporate Taxation

(5 cr.) This course is a continuation of Federation Taxation I and focuses on corporate federal taxes. Students appraise the role taxation plays on organizations, the corporate structure, and tax strategies. They learn about the application of federal income taxes business entities, including corporations, partnerships, and entities taxed as partnerships and S corporations. They also examine gift and estate taxes and income taxation of estates and trusts. Students contextualize their learning through the preparation of a corporate federal tax return and related schedules. They consider the allocation of partnership taxable income and other deductions, credits, self-employment taxes, and loss carrybacks and carryforwards. Through the evaluation of legal and ethical issues involved in federal tax practice, students become familiar with laws, best practices, and the responsibilities of accounting professionals. (Prerequisite(s): ACCT 4005.)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 4007 - Treasury Management

(5 cr.) Treasury managers are in charge of an organization’s liquid assets, and their primary goal is to manage and balance risk and returns available to the organization. In this course, students explore the role of the treasury manager and engage in specialized applications in cash management, cash forecasting and budgeting, cash conversion cycles, accounts payable, and accounts receivable. They appraise liquidity risk management, treasury management systems, foreign exchange management, off-balance sheet financing, and bank/financial institution management relations. This course also provides students with the opportunity to gain critical-thinking skills through analytical activities involving real-world problems, such as issues with generally accepted accounting principles’ emphasis on accrual accounting versus the economic results of transactions from a cash flow perspective. (Prerequisite(s): ACCT 1003, ACCT 2003, and FNCE 3001.)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
ACCT 4900 - Accounting Capstone Project

(5 cr.) A capstone course is designed to bring together knowledge gained through the entire program and to permit students to demonstrate mastery of the various course competencies. The major course project in this capstone course is a strategic case study. Through this project, students apply and integrate a variety of skills, tools, and knowledge to assess the strategic issues in a real-world case analysis and arrive at recommendations for change and/or improvement. Through coursework and the final capstone project, students appraise and explain a variety of topics, such as basic accounting theory, financial reporting, deferred taxes, engagement planning, client risk, auditing, concepts of accounting and investment percentage, objectives of the statement of cash flows, contracts, sales, bankruptcy, the debtor-creditor relationship, and business law and ethics. This course provides students the chance to demonstrate their understanding and competency in complex problem identification and solution. (Prerequisite(s): All required core and upper-division Accounting courses.)

ACCT 6100 - Effective Communication for the Accountant♦

(3 sem. cr.) An essential skill for nearly all accountants is the ability to communicate effectively with organizations to manage internal and external relationships. This course emphasizes the importance of communication in accounting and provides students the opportunity to practice using the tools required for effectual and efficient presentation of information while gaining critical-thinking, reading, and scholarly-writing skills. Students explore various written and presentational forms of communication that accountants use within organizational and managerial settings. Students examine techniques for developing and presenting white papers, memoranda used to communicate issues and recommendations to management, and financial and nonfinancial information. They learn about concepts in balanced communication coverage and how to adapt to constantly changing modes of communication, including social networking and blogging, and using professional organizations and training programs to their advantage. Through these activities, students gain a better understanding of the roles and responsibilities of the accountant as well as the ethical methodologies required to maintain a professional obligation to the community and their clients.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6110 - Legal and Ethical Issues in Accounting♦

(3 sem. cr.) Too often we hear about cases of financial fraud and misconduct involving major corporations in the news. It is a social and professional obligation of accountants to be concerned and knowledgeable about topics involving legal and ethical issues in accounting and financial reporting. In this course, students learn to appreciate this role and explore the various legal and professional responsibilities of which public and private accountants must be aware when developing financial statements and reports. They examine a variety of issues, such as the differences between statute and regulation and between common and statutory law. Students also assess the role of bankruptcy and its impact on business relationships. Through the extensive use of current and seminal case studies, students take a practical approach to examining the best practices of doing business in today’s sociopolitical climate from a legal and ethical perspective.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6120 - Financial Management Tools for Decision Making

(3 sem. cr.) Effective business managers use a variety of financial management tools as they seek to evaluate alternatives and make sound decisions. In this course, students analyze these tools, including the breakeven and cost-volume-profit analysis for model pricing and cost sensitivity, forecasting and cost prediction, variance cost analysis, relevant cost analysis, project valuation and prioritization using payback, rates of return, and discounted cash flow methods. Students sharpen their diagnostic critical-thinking skills and learn to construct effective, ethical, fact-based arguments, which are among the fundamental capabilities required for managerial decision making. Using relevant management articles, case studies, and topic analyses, students also examine how to align business needs with fact-based solutions, how to identify new opportunities, and how to manage and enhance an organization’s competitive position.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6130 - Managerial Accounting for Organizational Performance

(3 sem. cr.) One of the primary functions of the accountant’s role is preparing internal accounting information that can be used by management for effective decision making and organizational performance. Students can gain a practical perspective into this role through case study review and analysis of pricing and contribution margin analysis, cost management and allocation, activity-based costing and throughput accounting, and inventory management. Students assess performance measurements, including key performance indicators, balanced scorecard, and forecasting. They explore operating and capital budgeting and financial planning techniques and become familiar with quantitative models and approaches used in management accounting. Through this course, students learn about the different departments and operating divisions within an organization and how they work individually and collaboratively to handle accounting responsibilities.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6140 - Current Trends in Accounting Standards

(3 sem. cr.) This course allows the students to enhance and utilize advanced accounting research skills in order to investigate and review the current and emerging accounting issues and changes in promulgated accounting standards that could impact 21st-century business. The student will examine a variety of up-to-date and relevant topical areas that are discussed in sources such as: the Financial Accounting Standards Board, International Accounting Standards Board, and Securities and Exchange Commission. As a result of their studies in this course, students will be able to anticipate changes in accounting standards and analyze potential impacts for making informed decisions and recommendations to management.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
ACCT 6600 - Managing Operational and Financial Business Risks

(3 sem. cr.) Accountants and business managers must be astute and proactive in managing a business to combat the inevitable threat of operational and financial risks, including those involving credit, market, liquidity, reputation, technology, and legality. In this course, students assess the tools used by accountants and managers in managing these risks. They explore the various processes used to identify, analyze, and assess risks, and they learn the appropriate use of financial and operational controls to mitigate such risks. Additionally, students examine ways to implement techniques, such as developing a risk control matrix and using the concepts of the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework to improve an organization’s enterprise risk management.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6610 - Managing Regulatory Compliance

(3 sem. cr.) Regulatory compliance involves the policies and processes that organizations use to ensure that they follow the rules and regulations in place by the firms that control financial activity in a given jurisdiction. In this course, students explore the facets of regulatory compliance, focusing on the role of accounting with respect to corporate governance within an organizational setting. They also focus on how organizations build transparency into their governance and compliance systems. Students review and explore the responsibilities of management in terms of compliance and auditing and explore the complex processes of checks and balances that comprise compliance systems. Students further develop their understanding of regulatory compliance through a review of the Foreign Corrupt Practices Act and the Sarbanes-Oxley Act, in addition to an evaluation of decisions made by the Securities and Exchange Commission and the Public Corporation Accounting Oversight Board.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6620 - Accounting Theory and Application

(3 sem. cr.) In this quantitative course, students examine the process by which accounting policies are formulated and modified. Students use current research and case analyses to make critical evaluations of fundamental accounting concepts and foundations, such as revenue recognition, lease accounting, and other current issues, in light of their theoretical, empirical, practical, and political aspects. Students demonstrate their ability to use promulgated accounting literature to improve their general decision-making and communication skills in the area of accounting as they engage in functional exercises and weekly discussions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6621 - Global Information Systems Development

(3 sem. cr.) Students learn how to organize development projects in the global service marketplace, based on key considerations and best practices in outsourced and offshore
development. Topics include legal, economic, cultural and intellectual property issues; 24-hour development; strategic division of labor; case studies of specific geographies; and quality and process standards.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6630 - Tax Analysis and Decision Making♦

(3 sem. cr.) Students in this course are provided with an overview of current topics in taxation strategies for individuals and corporations. They learn about the Internal Revenue Code on tax differences, including book and tax accounting, inclusions, exclusions, deductions, credits, and tax aspects of property transactions. Students employ a “walk-through” technique through which they gain first-hand experience in the use of tax research services. Students also explore how economic, social, and cultural forces influence tax policy.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6640 - Solving CPA Problems♦

(3 sem. cr.) In this course, students review content pulled directly from prior certified public accountant (CPA) exams on a variety of topics, including current accounting trends, managerial accounting, and regulatory issues. Students conduct research, discuss with peers, and analyze the answers to actual CPA exam items to gain a thorough understanding of the format, concepts, and principles on which exam questions are based, gaining confidence and preparedness for taking the CPA exam.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6650 - Forensic and Advanced Auditing Topics♦

(3 sem. cr.) In this course, students are provided with tools, techniques, and insight to evaluate the potential for fraud within current operating and financial reporting systems. Students examine creative accounting techniques and red flags of fraud, such as the development of false financial statements; misuse of corporate resources; false revenue recognition; and fraud perpetrated for the benefit of third parties, shareholders, and managers. They explore special topics, such as the override of existing internal controls and absence of proper accounting documentation. Students also examine fraud audit standards, principles of legal evidence, and concepts of the Daubert Rule. Additionally, students examine strategies for identifying sources of securing evidence to prevent loss, corruption, and contamination.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6660 - International Perspectives in Accounting♦

(3 sem. cr.) Students in this course examine current topics in international standards for accounting, including financial statement presentation, auditing, and accounting for importers,
exporters, and multinational corporations to gain a comprehensive understanding of the various perspectives involved in international accounting. Students examine foreign exchange rates and markets, controlled economy accounting, social responsibility reporting, inflation accounting, and international taxation and its impact on an organization’s international financial statements. Additionally, students analyze issues in accounting for multinationals, including areas of accounting and financial reporting standards. They also conduct an evaluation of international accounting harmonization efforts, including those involving accounting standards, to acquire an appreciation of the importance of comparability in regard to international financial statements.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6665 - Initiating and Managing Change♦

(3 sem. cr.) This course explores effective strategies to initiate change in order to achieve organizational goals, as well as how to manage unplanned or unwelcome change. Students will explore a variety of approaches and methods to transition individuals and organizations within a changing environment. Students will distinguish between reactive responses and proactive responses to change, including examining the implications of culture, inertia, and uncertainty. Additionally, students will explore the importance of understanding motivation and effective communication in mitigating negative reactions to change and facilitating the change process itself.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6670 - Not-for-Profit and Government Accounting♦

(3 sem. cr.) Students explore accounting and financial reporting principles for nonprofit and governmental organizations in this course. They examine issues regarding fund accounting principles, budgetary accounting, and financial reporting practices. Through a variety of assignments on the specifics of the nonprofit and government accounting arena, students develop and hone diagnostic skills and their analytical problem-solving ability. Students learn about the concepts, procedures, and mechanics of financial and managerial accounting and the role of accounting information in nonprofit organizations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6675 - Critical Thinking for Effective Management♦

(3 sem. cr.) This course is designed to improve the student’s overall critical-thinking and reasoning skills within a managerial context. Using relevant management articles, case studies, and current topics analyses, students will hone their diagnostic reading skills and will learn to construct effective, ethical, evidence-based arguments, which are fundamental capabilities of effective managers.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
ACCT 6680 - Leadership in a Global Landscape

(3 sem. cr.) Leaders encounter many challenges as people from different cultures, social structures, religions, and languages participate in a globalized landscape and workforce. Students in this course examine these challenges and develop an understanding of the interrelatedness of nations in the global economy. They also explore the changing nature of international business and leadership. Students evaluate and discuss the concepts of sustainable business strategies, international trade, foreign direct investment, and regional economic integration in relation to leadership in a global environment.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6685 - Creating Sustainable Solutions Through Systems Thinking

(3 sem. cr.) This course explores systems thinking as a process whereby problems are viewed as individual components within a larger system. The course provides a framework for analyzing relationships within a system and for avoiding the risks associated with viewing problems in isolation. Students will use systems thinking tools to model single, double, and multiple-loop feedback systems, both at the micro and macro levels of analysis. In addition, students will be introduced to scenario building and will examine how the practice of systems thinking lays the foundation for creating sustainable outcomes for organizations and society.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6690 - Principles of Project Management

(3 sem. cr.) Students in this course are introduced to the knowledge, skills, tools, and techniques needed to manage projects successfully throughout a project life cycle. Students are exposed to project management knowledge areas and process groups as well as the distinguishing characteristics of each. They study the ways these two dimensions of project management interact in initiating, planning, executing, monitoring and controlling, and closing a project. Note: Students who have the need to complete this course as a degree requirement after September 2013 should instead be registered for ACCT 6991.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6691 - Practices in Project Management

(3 sem. cr.) Students in this course are introduced to the knowledge, skills, tools, and techniques needed to manage projects successfully throughout the life of a project, known as the project life cycle. By learning about the project management Knowledge Areas and Process Groups as well as the distinguishing characteristics of each, students gain an appreciation for how these two dimensions of project management interact in initiating, planning, executing, monitoring and controlling, and closing a project.

ACCT 6695 - Leading Strategic Initiatives for Growth and New Value
(3 sem. cr.) This course focuses on the development and implementation of business strategies that enable a competitive advantage, with an emphasis on understanding the current environment in which the organization competes and forecasting how that environment may change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6781 - Information Security Governance

(3 sem. cr.) This course covers information security issues in an organizational context, recognizing the increasing stakes in keeping systems safe from tampering and disclosure. Topics include management structures and processes for enterprise information security; information security in the supply chain; legal, regulatory, audit, and policy issues; risk management; and the business case for information security.

ACMG 6100 - Effective Communication for the Accountant

(3 sem. cr.) An essential skill for nearly all accountants is the ability to communicate effectively with organizations to manage internal and external relationships. This course emphasizes the importance of communication in accounting and provides students the opportunity to practice using the tools required for effectual and efficient presentation of information while gaining critical-thinking, reading, and scholarly-writing skills. Students explore various written and presentational forms of communication that accountants use within organizational and managerial settings. Students examine techniques for developing and presenting white papers, memoranda used to communicate issues and recommendations to management, and financial and nonfinancial information. They learn about concepts in balanced communication coverage and how to adapt to constantly changing modes of communication, including social networking and blogging, and using professional organizations and training programs to their advantage. Through these activities, students gain a better understanding of the roles and responsibilities of the accountant as well as the ethical methodologies required to maintain a professional obligation to the community and clients.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACMG 6110 - Legal and Ethical Issues in Accounting

(3 sem. cr.) Too often we hear about cases of financial fraud and misconduct involving major corporations. It is a social and professional obligation of accountants to be concerned and knowledgeable on topics involving legal and ethical issues in accounting and financial reporting. In this course, students learn to appreciate this role and explore the various legal and professional responsibilities of which public and private accountants must be aware when developing financial statements and reports. They examine a variety of issues, such as the differences between statute and regulation and between common and statutory law. Students also assess the role of bankruptcy and its impact on business relationships. Through the extensive use of current and seminal case studies, students take a practical approach to examining the best practices of doing business in today’s sociopolitical climate from a legal and ethical perspective.
ACMG 6120 - Financial Management Tools for Decision Making

(3 sem. cr.) Effective business managers use a variety of financial management tools as they seek to evaluate alternatives and make sound decisions. In this course, students analyze these tools, including the breakeven and cost-volume-profit analysis for model pricing and cost sensitivity, forecasting and cost prediction, variance cost analysis, relevant cost analysis, project valuation and prioritization using payback, rates of return, and discounted cash flow methods. Students sharpen their diagnostic critical-thinking skills and learn to construct effective, ethical, fact-based arguments, which are among the fundamental capabilities required for managerial decision making. Using relevant management articles, case studies, and topic analyses, students also examine how to align business needs with fact-based solutions, how to identify new opportunities, and how to manage and enhance an organization’s competitive position.

ACMG 6130 - Managerial Accounting for Organizational Performance

(3 sem. cr.) One of the primary functions of the accountant’s role is preparing internal accounting information that can be used by management for effective decision making and organizational performance. Students can gain a practical perspective into this role through case study review and analysis of pricing and contribution margin analysis, cost management and allocation, activity-based costing and throughput accounting, and inventory management. Students assess performance measurements, including key performance indicators, balanced scorecard, and forecasting. They explore operating and capital budgeting and financial planning techniques, and they become familiar with quantitative models and approaches used in management accounting. Through this course, students learn about the different departments and operating divisions within an organization and how they work individually and collaboratively to handle accounting responsibilities.

ACMG 6140 - Current Trends in Accounting Standards

(3 sem. cr.) This course allows the student to enhance and utilize advanced accounting research skills in order to investigate and review the current and emerging accounting issues and changes in promulgated accounting standards that could impact 21st-century business. The student will examine a variety of up-to-date and relevant topical areas that are discussed in sources such as the Financial Accounting Standards Board, International Accounting Standards Board, and the Securities and Exchange Commission. As a result of their studies in this course, students will be able to anticipate changes in accounting standards and analyze potential impacts for making informed decisions and recommendations to management.
ACMG 6600 - Managing Operational and Financial Business Risks

(3 sem. cr.) Accountants and business managers must be astute and proactive in managing a business to combat the inevitable threat of operational and financial risks, including those involving credit, market, liquidity, reputation, technology, and legality. In this course, students assess the tools used by accountants and managers in managing these risks. They explore the various processes used to identify, analyze, and assess risks, and they learn the appropriate use of financial and operational controls to mitigate such risks. Additionally, students examine ways to implement techniques, such as developing a risk control matrix and using the concepts of the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework to improve an organization’s enterprise risk management.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACMG 6610 - Managing Regulatory Compliance

(3 sem. cr.) Regulatory compliance involves the policies and processes that organizations use to ensure that they follow the rules and regulations in place by the firms that control financial activity in a given jurisdiction. In this course, students explore the facets of regulatory compliance, focusing on the role of accounting with respect to corporate governance within an organizational setting. They also focus on how organizations build transparency into their governance and compliance systems. Students review and explore the responsibilities of management in terms of compliance and auditing and explore the complex processes of checks and balances that compose compliance systems. Students further develop their understanding of regulatory compliance through a review of the Foreign Corrupt Practices Act and the Sarbanes-Oxley Act, in addition to an evaluation of decisions made by the Securities and Exchange Commission and the Public Corporation Accounting Oversight Board.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACMG 6620 - Accounting Theory and Application

(3 sem. cr.) In this quantitative course, students examine the process by which accounting policies are formulated and modified. Students use current research and case analyses to make critical evaluations of fundamental accounting concepts and foundations, such as revenue recognition, lease accounting, and other current issues, in light of their theoretical, empirical, practical, and political aspects. Students demonstrate their ability to use promulgated accounting literature to improve their general decision-making and communication skills in the area of accounting as they engage in functional exercises and weekly discussions.

ACMG 6690 - Principles of Project Management♦

(3 sem. cr.) This course introduces students to the knowledge, skills, tools, and techniques needed to manage projects successfully throughout a project life cycle. Students are exposed to project management knowledge areas and process groups as well as the distinguishing characteristics of each. Students study the ways these two dimensions of project management interact in initiating, planning, executing, monitoring and controlling, and closing a project. **Note:** Students who have the need to complete this course as a degree requirement after September 2013 should instead be registered for ACMG 6991.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACMG 6691 - Practices in Project Management

(3 sem. cr.) Students in this course are introduced to the knowledge, skills, tools, and techniques needed to manage projects successfully throughout the life of a project, known as the project life cycle. By learning about the project management Knowledge Areas and Process Groups as well as the distinguishing characteristics of each, students gain an appreciation for how these two dimensions of project management interact in initiating, planning, executing, monitoring and controlling, and closing a project.

ACMG 6695 - Leading Strategic Initiatives for Growth and New Value♦

(3 sem. cr.) This course focuses on the development and implementation of business strategies that enable a competitive advantage, with an emphasis on understanding the current environment
AMDS 8002 - Writing a Quality KAM Demonstration

(2 cr.) The Knowledge Area Module (KAM) allows students to focus directly on their area of interest, from initial inquiry to the final capstone project. KAMs set the framework for a faculty-guided study comprising three components: Breadth, Depth, and Application. This course covers the structure of the KAM as well as research and writing techniques needed for the successful development of a KAM. Under instructor guidance, students draft a Learning Agreement for their first KAM, through which they select their theme and focus. (Prerequisite(s): AMDS 8008 and all other core courses.) Note: Completion is required before KAM studies can begin in the Information Systems Management specialization.

AMDS 8008 - Foundations for Doctoral Study

(6 cr.) The purpose of this course is to introduce students to Walden University and to the requirements for successful participation in an online curriculum. It provides a foundation for academic and professional success as a scholar-practitioner and social-change agent. Course assignments focus on practical application of writing and critical thinking skills and promote professional and academic excellence. Major assignments include the preparation of the Professional Development Plan, program of study, and a sample KAM Learning Agreement. Note: Students in selected doctoral programs and specializations are required to take this course immediately upon enrollment and must successfully complete it before proceeding with KAMs or coursework.

AMDS 8110 - Management Information Systems

(4 cr.) Students are provided with broad coverage of information systems management concepts and trends underlying current and future developments as well as the principles for providing effective implementation of information technology. Students engage in multiple discussions and case studies through which they sharpen communication skills and gain a real-world understanding of how management information systems function. As the course progresses, students develop their ideas and reasoning on a variety of current issues in information systems and complete a research paper to define their position.

AMDS 8121 - Current Research in Social Change (Operations Research)

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8125 - Organizational Performance Improvement
What is business process redesign and how can it be used to achieve improvements in performance measures? Students in this course are provided with the opportunity to investigate questions such as this and survey a wide array of current literature from experts in the field. Students learn about the concepts of performance improvement and process re-engineering. They work toward achieving high-level improvements in organizational performance through redesigned business processes and the use of information technology to re-engineer an organization. Students analyze the data required for organizational performance improvement and then develop and present a report or case study of an organizational setting in the context of performance analysis and improvement. Students also engage in discussion assignments to share ideas and perspectives with peers and to reflect on weekly topics.

AMDS 8131 - Professional Practice and Social Change (Operations Research)

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8135 - Project Management

(4 cr.) The process of creation, from conception through completion, is complex and requires a diverse set of management skills. Students are introduced to the theory, tools, and techniques needed to manage projects successfully. Students engage in coursework focusing on effective project management styles, critical factors for project success, organizational support systems that enhance projects, project authority, and ethics in project execution. They examine logistical aspects of project management, such as cost, schedule, technical planning, and control methods. Students also have the opportunity to gain hands-on practice through the application of management software to a typical project plan and tracking activity.

AMDS 8215 - Systems Analysis, Design, and Implementation

(4 cr.) Students in this course have the opportunity to examine the analysis, design, and development of computer-based information systems to enhance their knowledge base in software engineering. They compare the key characteristics of object-oriented methodologies with traditional methods for an understanding of how various types of systems require different software engineering techniques. Students learn about the life-cycle concept and related activities, including information requirements determination, prototyping, detailed systems design, development, testing, and implementation strategies. Collaborating with peers, students sharpen critical-thinking and communication skills as they engage in weekly discussions on topics such as software processes, design and implementation, dependability and security, and general topics in software engineering.

AMDS 8221 - Current Research in Human Development-Decision Analysis (Operations Research)

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to
develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8225 - Database Concepts**

(4 cr.) In consideration of the rise of Web-enabled databases, there continues to be a looming risk of threat to computer systems, such as viruses and worms. Students in this course examine major trends in information systems to gain skills required to address database issues such as these. They explore methods of data security, quality, and availability. They examine database systems as the focus for studying concepts of data modeling, techniques of data definition, and data manipulation. Students engage in peer discussions on topics such as methods for creating, managing, sorting, and processing data files. They also explore concepts of relational database methods and issues of managing information in a database.

**AMDS 8231 - Professional Practice and Human Development-Applied Decision Analysis (Operations Research)**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8235 - Communications and Networking**

(4 cr.) Through this course, students learn about new business opportunities created by telecommunications technologies and consider what implications these have in the field. They analyze contemporary topics in the telecommunications industry, including competing standards, regulatory constraints, and current applications of hardware. They learn the concepts and terminology of data communications, network design, and distributed information systems. Students also assess and discuss topics such as communications equipment, protocols and architecture, transmission alternatives, communications environments, regulatory issues, and network pricing and management.

**AMDS 8300 - Advanced Individual Studies: New Faculty Training**

(4 cr.) This online faculty development course not only teaches the skills and strategies necessary for effective online teaching, but it also gives students first-hand experience communicating within the actual software environment that they may be using to teach an online course. The course replicates the Walden online classroom and provides a model for online instruction. It takes students from the initial stages of course content creation through actual setup of a classroom site. Students in this course have the opportunity to develop and share teaching methods, organization models, and communication techniques for successful online instruction and learning.
**AMDS 8301 - Advanced Individual Studies: Academic Publishing Option**

(4 cr.) This advanced individual study course is designed for students who wish to integrate learning from the core curriculum in preparation for advanced KAM and dissertation research. In this course, students gain hands-on practice using research tools, writing a literature review, evaluating peer research, and providing feedback as a reviewer. They also explore the process involved in preparing a proposal for publication and academic publication in general. Students review *The International Journal of Applied Management and Technology* (IJAMT), an online refereed journal, to examine current issues and collaborate with peers in the area of business and technology management.

**AMDS 8305 - Readings in Information Systems**

(4 cr.) Students in this course examine the information systems (IS) body of knowledge and explore the role of an IS scholar-practitioner. Students are provided with a variety of contemporary reference sites and current and classic literature to utilize in their research practice and review. Through a review of the literature, students classify and evaluate what accredited scholars and researchers have written on topics that interest students most. By studying the literature, they increase their understanding of what it means to be an IS doctoral student as well as a scholar-practitioner, including responsibilities, expectations, and roles. Demonstrating critical-thinking and communication skills, students apply concepts learned in the course to develop new perspectives; they express their ideas and findings through discussion assignments in collaboration with peers.

**AMDS 8316 - Security Management and Risk Assessment**

(4 cr.) Reliable, secure transfer of information is vital to the operation and management of all businesses. The information transfer process, however, has presented a series of challenges as modern technology and the Internet have transformed the way business is conducted. Students in this course examine the need for security measures, policies, and careful assessment to ensure data integrity in electronic commerce. They explore management aspects of information security from a business perspective as well as the implications of information security risks faced by organizations. Students learn ways to identify threats and implement safeguards on corporate networks and the Internet. They also explore topics including the return on security investment, business continuity planning, development of security policies, and information security auditing.

**AMDS 8321 - Current Research in Organizational and Social Systems-Systems Engineering (Operations Research)**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8325 - E-Commerce Strategies**
Electronic commerce continues to drive the growth of business and globalization in a variety of ways. Business managers need to be aware of how to harness e-commerce for competitive advantage. Students in this course are introduced to the emerging theories and practices of e-commerce tactics. Students explore strategies associated with both sides of the electronic commerce world: e-commerce solutions for existing companies and e-business concept development for venture startups. They identify critical issues associated with efficient control and implementation of e-strategies. Through case studies and interactive exercises, students gain practical insight on a variety of topics, such as external assessment, e-strategy development, and system and infrastructure issues.

**AMDS 8331 - Professional Practice and Organizational and Social Systems-Applications of Systems Engineering and Analysis (Operations Research)**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8335 - Principles of Knowledge Management**

(4 cr.) Information systems (IS) enable organizations to identify, acquire, store, analyze, distribute, and reuse information and knowledge from all sources (e.g., internal and external, explicit and tacit) systematically. Students in this course examine these processes as well as how IS lends to the enhancement of organizational productivity and competitiveness. They also examine how information technology supports the organizational knowledge process. Students explore the role of knowledge workers in regard to management and development of knowledge management (KM) initiatives. They contextualize their study by assessing current organizational efforts and the nature of technologies that support KM processes. **Note:** This is a 6-week course. Completion is required in the first four quarters of enrollment for students in the Knowledge Management and Learning Management specializations.

**AMDS 8510 - Theories of Organizational Dynamics and Development**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8511 - Theory of Deterministic Methods**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising
three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8512 - Classical and Emerging Paradigms of Leadership**

(5 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8513 - Theory of Corporate Finance**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8514 - Global Total Quality Management**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8515 - Theory of Financial Accounting**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8520 - Contemporary Research and Issues in Theories of Organizational Dynamics and Development**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.
AMDS 8521 - Current Research in Deterministic Methods

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8522 - Current Research on Leadership Development

(5 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8523 - Current Research in Corporate Finance

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8524 - Methods and Tools for Managing Quality Improvement

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8525 - Current Research in Financial Accounting

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8530 - Professional Practice Application of a Theory of Organizational Dynamics and Development

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to
develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8531 - Professional Practice: Application of Deterministic Methods

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8532 - Professional Practice Application of a Theory of Leadership Development

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8533 - Professional Practice: Application of Corporate Finance

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8534 - Reliability and Cost of Quality

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8535 - Professional Practice: Application of Financial Accounting

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.
**AMDS 8610 - Decision Theory and Analysis**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8611 - Theory of Stochastic Methods**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8612 - Model of Organizational Change and Development**

(5 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8613 - Theory of Investments and International Finance**

(3 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8614 - Management for World-Class Products**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8615 - Theory of Auditing and International Accounting**
This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8620 - Current Research in Decision Sciences**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8621 - Current Research in Stochastic Methods**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8622 - Current Research on a Model of Organizational Change**

(5 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8623 - Current Research in Investments and International Finance**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8624 - Collaborative/Concurrent Engineering Management**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising
three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8625 - Current Research in Auditing and International Accounting**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8630 - Models for Decision Making**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8631 - Professional Practice: Application of Stochastic Methods**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8632 - Professional Practice Application of an Organizational Change Model**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8633 - Professional Practice: Application of Investments and International Finance**

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.
AMDS 8634 - Product Life-Cycle Cost and Time to Market

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8635 - Professional Practice: Application of Auditing and International Accounting

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8710 - Research Methods

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8720 - Selected Research Methods

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8730 - Research Design

(4 cr.) This course for doctoral students has no specific course description due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

AMDS 8800 - Epistemology and the Practice of Knowledge and Learning Management

(4 cr.) The course is a broad foundation for the study of knowledge and learning management. Students explore and discuss the history of knowledge from the early contributors, including
Plato and Aristotle, to contemporary writers. They review the evolution of major movements and identify the foremost schools of thought, including rationalism, empiricism, functionalism, structuralism, and behaviorism. Students are also provided with a contemporary approach through the study of authors involved with knowledge, learning, and change management, including Senge, Drucker, Deming, Nonaka, Garvin, Argyris, Knowles, and Rogers. Students have the opportunity to demonstrate their critical-thinking and interpretive skills as they propose and defend a set of guiding principles for the practice of knowledge management. **Note:** This is a 12-week course. Completion is required in the first four quarters of enrollment for students in the Knowledge Management and Learning Management specializations.

**AMDS 8801 - Principles of Learning Management**

**4 cr.** The foundation of all universities is based on key competencies, principles, and goals. Students in this course identify these factors in relation to an organization’s core curriculum and the effectiveness of an organization’s learning management. Students explore and define the emergence of learning management, the responsibilities of the chief learning officer, and the foundations of adult learning and development. They also explore the role of corporate universities and distance learning in support of organizational learning. Students gain practice in evaluating performance gaps as well as developing strategies for moving their organization forward. **Note:** This is a 6-week course. Completion is required in the first four quarters of enrollment for students in the Knowledge Management and Learning Management specializations.

**AMDS 8810 - Integrating Knowledge Management With Strategic Initiatives**

**4 cr.** Knowledge management (KM) is an integral and essential component of an organizational system at both the operational and strategic levels. Students in this course examine major organizational change initiatives and determine how KM can be used to leverage these initiatives. They learn how factors such as quality, systems thinking, environmental scanning, convergence, and constructive conflict are essential components in the integration of KM in regard to planning, decision making, and implementing operational and strategic initiatives. Students examine embedded system elements, such as leadership and corporate culture. They also assess ways to circumvent roadblocks and pursue pathways to needed change when the adoption of a KM initiative requires structural and behavioral change to gain organizational acceptability. **(Prerequisite(s): Foundation and core courses AMDS 8008 OR SBSF 8005; and AMDS 8800, AMDS 8801, and AMDS 8335; or permission of the program director.)**

**AMDS 8811 - Advanced Knowledge Management Concepts**

**4 cr.** The future of knowledge management is changing based on the demands of global competition, the needs of 21st-century organizations, and the views of futurists looking at both organizational change and organizational learning. In this course, students explore this change and the future of knowledge management as well as the history of knowledge. Students learn about the merging roles of chief knowledge officers and chief learning officers. Using knowledge gained in the course and requisite critical-thinking and creative skills, students tackle the future demands of knowledge management through the development of a strategic initiative. **(Prerequisite(s): Foundation and core courses AMDS 8008 OR SBSF 8005; and AMDS 8800, AMDS 8801, and AMDS 8335; or permission of the program director.)**
**AMDS 8812 - Expert Systems**

(4 cr.) In this course, students examine the role of expert systems in knowledge management, including the use of artificial intelligence, neural systems, and other advanced concepts in the creation, retrieval, and competitive use of knowledge. Students use case studies to examine various types of expert systems. Upon thorough assessment of these systems, they examine current technologies used for deployment and determine which of these is most appropriate for the system. Students also define the taxonomy of knowledge that is applied to expert systems through the production of a knowledge map. *(Prerequisite(s): Foundation and core courses AMDS 8008 OR SBSF 8005; and AMDS 8800, AMDS 8801, and AMDS 8335; or permission of the program director.)*

**AMDS 8813 - E-Systems**

(4 cr.) What are some of the ways that companies measure Web traffic and advertising efforts to enhance their marketability? In this course, students have the opportunity to answer questions such as this through an examination of the function of e-systems, Internet, e-commerce, e-business, and business-to-business knowledge management (KM). They learn about the new languages, HTML, and other emerging applications. Focusing on the technical portions of KM, students define KM systems and examine how KM systems work in conjunction with other e-systems. Students process course content and share ideas with their peers through discussions on topics such as the difference between KM systems and the KM discipline, system interrelationship and methodologies, Internet-enabled KM systems, and design processes. *(Prerequisite(s): Foundation and core courses AMDS 8008 OR SBSF 8005; and AMDS 8800, AMDS 8801, and AMDS 8335; or permission of the program director.)*

**AMDS 8830 - Adult Learning**

(4 cr.) Although it’s true that many of the traditional styles of learning are applicable to both child and adult learners, adult learning presents many differences in regard to the design, implementation, and evaluation of content and instruction. Students in this course examine the foundational concepts essential for understanding adult learning and developing adult learning content, including understanding the adult as a client, diagnostic procedures for adult education, participative learning, and small-group theory in adult education. Students assess the various adult education models as well as the basic elements of adult education program design. Using classic literature and theory, they also have the opportunity to develop their own adult education philosophy to put into practice in the professional area. *(Prerequisite(s): Foundation and core courses, or permission of the program director.)*

**AMDS 8831 - Lifelong Learning**

(4 cr.) A well-established presumption is that lifelong learning improves the effectiveness of adult learners and strengthens career development. In this course, students identify strategies for these outcomes. They also examine and discuss how individuals use education to develop career options, while organizations use education to help obtain and retain the best individuals. Students assess elements of adult learning in contrast to human resource development in corporate education to identify the factors of success. They also engage in practical assignments to
discover the current role of technology in the design and function of lifelong learning. 
(Prerequisite(s): Foundation and core courses; or permission of the program director.)

**AMDS 8832 - Education Design for Adult Learners**

(4 cr.) What is transformational learning, and which approaches are most effective? Students are provided with the opportunity to answer questions such as these through the examination of theories and concepts of the learning process, including intelligence, cognition, motivation, and facilitation of adult learners. Students evaluate the components involved in the design and development of an adult learning curriculum. Gaining hands-on experience, students apply existing principles and current concepts to design a curriculum for a specific adult-learner population. They also engage in the reflection process by assessing their project as well as their existing experience in curriculum development to identify areas for additional knowledge and skill building. Aiding their continual doctoral-level study, students prepare an annotated bibliography to help them better understand their sources and to ensure the relevance, accuracy, and quality of sources used in research. (Prerequisite(s): Foundation and core courses; or permission of the program director.)

**AMDS 8833 - Integration of Knowledge and Learning Management With Strategic Educational Initiatives**

(4 cr.) In this course, students examine the design and use of appropriate organizational learning, including the function of corporate universities, distance-learning techniques, and other advanced educational concepts. Using case studies and contemporary presentations by experts in the field, students gain tools to help plan, implement, and assess learning projects for corporations and traditional and nontraditional universities. Students also build a learning program case study based on their current experiences in learning management to gain a thorough understanding of the elements and governing dynamics of learning initiatives. They use findings from their case study to complete a final paper in the form of a proposal through which they demonstrate the breadth and depth of knowledge of learning and knowledge management principles and practices. (Prerequisite(s): Foundation and core courses; or permission of the program director.)

**AMDS 8899 - Capstone Seminar**

(6 cr.) Students in this course integrate all of their previous work on knowledge and learning management, resulting in a comprehensive dissertation proposal. Students assess various research methods and data-gathering techniques; determine best practices; explore the various Walden resources; and review APA style and the Walden evaluation format. They consider their professional goals in the context of their education and develop plans for continued learning and career development in the context of their personal objectives and priorities. Students also identify future areas for research and development in their specialization. Throughout this seminar course, students engage in discussions to share progress, new perspectives, and peer feedback. (Prerequisite(s): Foundation, core, and specialization courses, and at least one KAM; or permission of the program director.)

**AMDS 9000 - Dissertation**
This course offers doctoral students the opportunity to integrate their program of study into an in-depth exploration of an interest area that includes the completion of a research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation. Once students register for AMDS 9000, they will be registered each term until successful completion of the dissertation. (Prerequisite(s): Foundation course, core KAMs, RSCH 8100Z, and RSCH 8200Z.)

**ANTH 3001 - Indigenous Peoples in the Modern World**

(5 cr.) In this course, students work toward developing a modern and inclusive understanding of indigenous peoples of the world. They explore indigenous identity; historical continuity with pre-colonial and/or pre-settler societies; indigenous identity in relation to natural resources; and indigenous languages, cultures, and beliefs. Students complete a series of weekly field note assignments in which they address topics or themes related to the exploration of their own indigenous identity. Through this course, students gain the knowledge needed to explain processes of indigenization, adaptation, and communication as phenomena of globalization.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ARTS 2001 - Fundamentals of Photographic Arts**

(5 cr.) Students in this course are introduced to the fundamentals of photography and visual fine arts using photography as the medium of expression. Students will be required to have simple film or digital cameras to produce their photographs. Topics include history and principles of design such as emotion, line, plane, space, color, light, value, texture, proportion, and scale. Upon completion, the students will be able to communicate ideas and experiences through photography, edit a portfolio of photographs in color and monochrome, and participate in an online exhibition of images. (Prerequisite(s): ENGL 1001.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BIOL 1001 - Introduction to Biology**

(5 cr.) The basis of study in a variety of fields requires the capacity to view the world from multiple perspectives as well as the ability to ask investigative question on the intricacies of life. Students in this course work toward gaining such skills as they survey fundamental biological principles. They engage in discussions and application-based assignments that emphasize basic biology, cell biology, metabolism, genetics, taxonomy, evolution, ecology, and diversity. The course also provides students with an introduction to the scientific method. Upon completion, students are able to demonstrate increased knowledge and a better understanding of biology as it applies to everyday life.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BIOL 1001E - Introduction to Biology**
The basis of study in a variety of fields builds upon the capacity to view the world from multiple perspectives as well as the ability to ask investigative questions on the intricacies of life. Students in this course work toward gaining such skills as they survey fundamental biological principles. They engage in discussions, application-based assignments, and hands-on lab work that emphasize basic biology, cell biology, metabolism, genetics, evolution, ecology, and diversity. Students also gain an introduction to the scientific method. Through this course, students have the opportunity to increase their fundamental understanding of biology as it applies to everyday life. **Note:** This course is delivered over a 12-week term, but is equated to BIOL 1001.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BIOL 2320 - Nutritional Science**

(5 cr.) An understanding of the fundamental principles of nutrition can help people make important decisions regarding a healthy diet to keep the body functioning as it should. This course introduces students to the fundamentals of the nutritional sciences with an emphasis on the biochemistry of human systems. Through discussions, lab work, and other practical assignments, students explore the body’s digestive and metabolic processes, the components of a healthy diet, the role of nutrition in growth and health through the life cycle, and the relationships between nutrition, health, culture, and the environment. Through this course, students gain knowledge needed to apply scientific principles when interpreting nutritional information. (Prerequisite(s): ENGL 1001.)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BIOL 3020 - Essentials of Human Anatomy and Physiology**

(5 cr.) This course is a study of human anatomy and physiology, which is the structure and function of bodily systems. The course extends from an analysis of cellular processes and tissue structures to the 11 major systems of the human body. Students focus specifically on the regulatory functions of the body that maintain homeostasis and how disruptions in homeostasis may result in injury and/or disease. This course is designed for a general education undergraduate audience. (Prerequisite(s): ENGL 1001.)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BIOL 3020E - Essentials of Human Anatomy and Physiology**

(5 cr.) This course is a study of human anatomy and physiology, which is the structure and function of bodily systems. The course extends from an analysis of cellular processes and tissue structures to the 11 major systems of the human body. Students focus specifically on the regulatory functions of the body that maintain homeostasis and how disruptions in homeostasis may result in injury and/or disease. This course is designed for a general education undergraduate audience. **Note:** This course is delivered over a 12-week term, but is equated to BIOL 3020. (Prerequisite(s): ENGL 1001.)
BUSI 1000 - Developing Student Portfolios

(1 cr.) A portfolio is a valuable tool for students to communicate and demonstrate their academic accomplishments as well as a means to advance their professional prospects. In this course, students learn about the tools for developing an electronic portfolio. They compose a high-level design and comprehensive outline through which they apply the structure and methods learned in the course. They also examine tools and techniques for managing and maintaining an electronic portfolio. **Note about required first courses:** Students should review the program description section of the Walden University Catalog carefully to determine which first course is required.

BUSI 1001 - Introduction to Business

(5 cr.) In this introductory course, students address the roles and functions of managers, specifically, principles and procedures for planning, organizing, leading, and controlling organizations. Students engage in practical assignments, focusing on the application of theory to reality. Through this course, students gain an understanding of the interrelationships among the functions, components, and disciplines that comprise the field of management. Students acquire comprehensive perspectives on management and leadership to use as a foundation for the further study of the management of business. **Note:** Students who have the need to complete this course as a degree requirement after July 2012 should instead register for BUSI 1002.

BUSI 1002 - Introduction to Management and Leadership

(5 cr.) The role and functions of managers, specifically principles and procedures for planning, organizing, leading, and controlling organizations, are addressed in this introductory course. Emphasized is the practical application of theory to reality. This course is structured so that students have the opportunity to see the interrelationships among the functions, components, and disciplines that comprise the field of management and thereby gain a comprehensive perspective as a foundation for the further study of management.

BUSI 2001 - Business Law

(5 cr.) Responsible business leaders and decision makers must conduct transactions and operations according to clearly defined rules, laws, and processes to ensure stability and protection for their company. Students in this course examine the legal issues faced by managers, fundamental legal principles, and common issues in the field, such as workplace law, contract disputes, and intellectual property guidelines. Students engage in discussions and application assignments focused on the responsibilities of business professionals, such as understanding the fundamental legal principles in business and commerce; analyzing business contracts; adhering
to legal issues in interviewing, hiring, and firing; developing, using, and defending intellectual property; and understanding the regulatory context. *(Prerequisite(s): BUSI 1002.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 2002 - Global Business**

(5 cr.) This course is a survey of the global business environment in the 21st century. Students examine the basic concepts of global business activity and theory. They also engage in a variety of conceptual and application-based assignments, focusing on strategic management issues, including competitive, financial, economic and socioeconomic, cultural, political, legal, and labor factors. *(Prerequisite(s): BUSI 1001.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 2003 - Operations**

(5 cr.) An overview of the concepts, methodologies, and applications of business operations management is provided to students in this course. Students can learn about operations as related to the process of transforming resources into products and services. They explore the responsibility of operations managers to make sound, cost-effective decisions that increase the productivity and competitiveness of manufacturing and service organizations. Students also have the opportunity to learn the process of planning, implementing, and monitoring operations to ensure the continuous improvement of goods and services. *(Prerequisite(s): BUSI 1002.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3001 - Knowledge Management and Organizational Change**

(5 cr.) Students learn how information systems enable organizations to identify, acquire, store, analyze, distribute, and reuse information and knowledge systematically from all sources (e.g., internal and external, explicit and tacit) to enhance organizational productivity and competitiveness. The course extends the theory of Knowledge Management and Intellectual Capital to the development of learning organizations and evaluates the definition of learning organizations and the creation of environments that facilitate knowledge growth and distribution. *(Prerequisite(s): BUSI 1001 or BUSI 1002.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3002 - Ethical Leadership**

(5 cr.) In this course, students prepare for a leadership role in the modern organization. They examine the basic principles of leadership, motivational theory, the importance of communication, and current and future trends. Students assess, discuss, and learn how to apply their own styles of leadership in the workplace and the community. They engage in a range of assignments that emphasize ethical leadership through personal and interpersonal effectiveness and organizational development. Students also learn the importance of followership and the
similarities between the roles of follower and leader at all levels of the organization. 
(Prerequisite(s): BUSI 1001 or 1002.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. 
Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3003 - Dynamics of Change**

(5 cr.) All businesses experience change. Sometimes, change is required to ensure stability; other times, the purpose of change is expansion for competitive advantage. In this course, students explore the responsibilities of managers and leaders to implement effective organizational change as well as to ensure that employees understand the function and benefits of change. Students examine change as it impacts people, processes, and products. They learn to employ tools for dealing with and managing change. They also examine methods for coping with change as an individual, a member of a group, and a member of an organization. (Prerequisite(s): BUSI 1002.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. 
Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3004 - Entrepreneurship for Small Business**

(5 cr.) Students examine the processes required to undertake the creation and maintenance of a successful business enterprise, with an emphasis on small business, in this course. Students focus initially on startup basics for a new small business, followed by the details involved in the development of a business plan. Finally, the nuts and bolts of day-to-day business management are examined, with issues ranging from legal matters to employment decisions. (Prerequisite(s): BUSI 1001 or BUSI 1002 or SOCI 4080.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. 
Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3005 - Critical Thinking**

(5 cr.) Problem-solving and decision making based on recognizing problems, gathering data, developing alternatives, and choosing solutions are critical skills for the professional manager. In this course, students apply these skills to a variety of business examples. Students become familiar with the importance of the scientific method as the basis for critical thinking and decision making. They gain practical experience identifying logical fallacies, analyzing research methodologies, and choosing appropriate problem-solving techniques. Students also reflect on content presented in the course to consider ways to become more effective critical and logical thinkers. (Prerequisite(s): BUSI 1001, BUSI 1002, or COMM 1004.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. 
Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3006 - Advanced Business Law**

(5 cr.) In this course, students build on concepts and skills learned in BUSI 2001 to gain a more comprehensive understanding of the laws, regulations, and principles that affect business operations. Students devote special attention to business law topics included on the Uniform
CPA Exam. They analyze law of agency, debtor-creditor relationships, bankruptcy, government regulation of business, real and personal property, commercial paper, and secured transactions. Through this course, students work toward gaining the ability to identify legal issues, determine if legal action is required, and to discuss the issues competently with other professionals. *(Prerequisite(s): BUSI 2001.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3007 - Knowledge Management**

*(5 cr.)* Information systems enable organizations to identify, acquire, store, analyze, distribute, and reuse information and knowledge systematically from all sources (e.g., internal and external, explicit and tacit) to enhance organizational productivity and competitiveness. Students in this course examine these processes and apply the theories of knowledge management (KM) and intellectual capital to the development of learning organizations. Students also evaluate the definition of learning organizations and the creation of environments that facilitate knowledge growth and distribution. Using course concepts and theories, students reflect on KM and explain how they plan to employ it in personal and professional endeavors. *(Prerequisite(s): BUSI 1001 or BUSI 1002.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3008 - Corporate Entrepreneurship**

*(5 cr.)* Students in this course examine how corporations succeed and grow by embracing a culture of innovation and entrepreneurship within the organization. Students learn current models for corporate entrepreneurship and innovation that align with the strategic objectives of the enterprise. Students also examine the design of repeatable and sustainable processes that leverage existing business practices and support entrepreneurial initiatives. *(Prerequisite(s): BUSI 1002.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 4001 - Strategic Business Capstone Project**

*(5 cr.)* In this capstone course, students use knowledge gained throughout the entire program to demonstrate mastery of various course competencies. The major course project in which students engage is a simulation-based, strategic case study. Students apply and integrate a variety of skills, tools, and knowledge to assess the strategic issues in a real-world case analysis and arrive at recommendations for change and/or improvement. Through this course, students demonstrate their understanding and competency in identifying complex problems and solutions. *(Prerequisite(s): All required core and upper-division business administration courses.)*

**BUSI 4002 - Small Business Ventures**

*(5 cr.)* The focus of this course is on evaluating business concepts and business plans for small businesses so that students can develop strategies for successfully launching and operating a
small business. Students examine the small business life cycle and explore resources available to small business owners. Real-world case studies expose students to the challenges of running a small business venture. Topics covered include startup business ideas, financing the small business, legal and liability issues, employment decisions, ethical and moral considerations, and expansion opportunities for small businesses. (Prerequisite(s): BUSI 3004 or 3008.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSI 4003 - Marketing Strategies for Small Business♦

(5 cr.) This course addresses the unique aspects of marketing a small business. Students examine market definition, product development, and diversification strategies designed to help small-business owners expand their business reach. Students learn effective ways small businesses can leverage technology such as e-commerce, social media, and other online marketing methods. (Prerequisite(s): BUSI 3008.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSI 4004 - Customer Relationship Management for Small Business♦

(5 cr.) In this course, students learn about the impact of operating decisions on customer relationships as they relate to building, maintaining, and growing a loyal customer base. Students assess approaches to customer relationship marketing and management for competitive advantage. They also evaluate strategies for excellence in customer service within a culture driven to meet and exceed customer expectations. (Prerequisite(s): BUSI 3008.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSI 4900 - Capstone: Strategic Business Management

(5 cr.) In this capstone course, students use knowledge gained throughout the entire program to demonstrate mastery of various core competencies. The major course project in which students engage is a simulation-based strategic case study. Students apply and integrate a variety of skills, tools, and knowledge to assess the strategic issues in a real-world case analysis and arrive at recommendations for change and/or improvement. Through this course, students demonstrate their understanding and competency in identifying complex problems and solutions. Each student, based on his or her concentration area, will demonstrate validation of skills by taking part in a third-party nationwide simulation/examination administered online. (Prerequisite(s): All required core and concentration courses.)

BUSI 5510 - Leading People

(5 cr.) Modern leaders must understand contemporary leadership concepts, including varying leadership styles, ways to accommodate diversity, and the impact of culture on an organization. In this course, students focus on major leadership theories and the human dimension of business, including individual and group behaviors and organizational culture. They explore some of the basic dimensions of human resource management, as those dimensions affect the organization.
and the employee. Students explore contemporary thinking about leadership and its importance in today’s business world. They also develop a plan for personal and professional growth to enhance their current position or prepare for a successful career in leadership. *(Prerequisite(s): BUSI 1002. To register for this course, please contact the Academic Advising Team.)*

**CHEM 1001 - Introduction to Chemistry♦**

*(5 cr.)* In this course, students explore the fundamental concepts of chemistry and survey important chemical elements and their compounds. They engage in a range of assignments on such topics as chemical measurements, properties of atoms and molecules, chemical reactions, chemical calculations, and properties of gases. Through these assignments, students gain a practical understanding of chemistry needed to describe the structure and components of basic atoms, use the periodic table to locate important chemical information, describe several types of chemical bonds, and manipulate common chemical formulas and equations. *(Prerequisite(s): MATH 1001 or MATH 1002 or MATH 1030 or MATH 1040.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CLRA 6100 - Introduction to Clinical Research♦**

*(3 sem. cr.)* This course provides students with an overview of the clinical research enterprise from a historical and evolutionary perspective, including examples of landmark studies and controversies. Students consider the context in which researchers design and implement human clinical studies and explore a variety of topics, including the components, general principles, and issues in clinical research; types and classification of research studies; formulation of research objectives and outcomes; definition and phases of clinical trial protocols; and the roles and responsibilities of the clinical research team and study sponsors. Students become familiar with key medical terminology, including basic concepts of health, wellness, and disease. They work toward developing critical-thinking, written, verbal, and interpersonal communication skills as well as competencies needed for student success in an online environment. Students also begin work on their portfolio through assigned learning activities, including a journal of interactions and interviews with professionals in the field, an assessment of an organization’s culture, and the identification of management challenges in clinical research.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CLRA 6115 - Pathophysiological Basis of Clinical Research♦**

*(3 sem. cr.)* Clinical research management or monitoring requires an understanding of the pathology under investigation as well as the corresponding physiological systems related to disease. Through this course, students gain basic knowledge of normal and pathophysiological mechanisms of disease, acquiring a foundation for clinical assessment, decision making, and management of clinical trials. Students learn methods for interpreting the rationale and procedures underlying the clinical research protocol to assess the subject’s response to therapeutic interventions adequately. Students conduct case studies on various disorders and diseases through which they explain the disease process on structural and functional levels as
well as the critical factors that relate to patients’ conditions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CLRA 6130 - Ethical, Legal, and Regulatory Considerations in Clinical Investigations**

(3 sem. cr.) The nature of human clinical research and clinical investigation facilitates a host of ethical, legal, and regulatory issues related to the treatment of subjects, personal privacy, and institutional compliance, among others. Students in this course examine ethical codes of conduct, regulatory requirements, and existing laws that govern clinical research in the context of historical events that contributed to their development. They also explore recruitment and protection of human subjects; diversity and vulnerable populations in research; informed consent; privacy and confidentiality; the role of independent review committees; and the importance of reporting serious adverse events (SAEs). Students also discuss social and ethical implications of genetic technologies and research. Applying course concepts, students complete an FDA form for a clinical trial in their region, deepening their understanding of legal protocol.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CLRA 6145 - Design and Conduct of the Clinical Protocol**

(3 sem. cr.) An introduction to the basic elements of research design for clinical inquiry is provided in this course. Students explore the methods and goals of clinical research; formulation of the research objective and hypothesis; identification of outcome measures; issues of reliability and validity; randomization procedures; documentation requirements; and data collection, analysis, and interpretation. Sharpening their critical-thinking skills, students consider the potential risks and benefits of a clinical trial case study, which they use to justify continuation or termination of the drug development process. They also examine practical aspects of clinical trial management, including the design of the case report form (CRF), clinical laboratory and multicenter trial administration, and outsourcing. Through a review of scholarly literature, students explore and describe the ethical and regulatory requirements for which professionals must account in the design of a clinical research study. Additionally, students explore health disparities and cultural diversity as factors that affect participation of subjects in clinical trials.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CLRA 6160 - Good Clinical Practice (GCP) in Managing and Monitoring Clinical Trials**

(3 sem. cr.) Through this course, students learn the process and procedures of managing and monitoring a clinical trial from study initiation to closeout. Students examine the basic tenets of good clinical practice (GCP), including historical considerations, compliance, and recruitment of study participants, focusing on quality assurance and data safety monitoring boards (DSMBs). Through discussions and application-based assignments, students investigate and describe the relationship between regulations and GCP; how GCP affects the practical elements of conducting clinical studies; the challenges of multi-center or large-scale trials, such as risk assessment and management; protocol management and amendments; and audits and various considerations for reporting requirements. Students in this course are provided with official guidance on GCP from
the International Conference on Harmonization (ICH) as well as operational imperatives of GCP.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6175 - Biostatistics

(3 sem. cr.) Competent and valuable clinical research administrators are able to read and evaluate the statistical accuracy of research, summarize data, and distinguish common distributions; however, to engage knowledgeably in these tasks, administrators must understand the language of clinical research, which is rooted in biostatistics. In this course, students learn applications and interpretations of biostatistics, including descriptive methodologies, commonly used statistical tests, confidence intervals, statistical inference and probability, analysis of variance, and considerations in powering a study. Students learn basic concepts of data collection and analysis using statistical computer software, such as SPSS. Applying principles of survey research, students also complete a written analysis of a survey design, through which they assess the method and validity as well as consider ways the survey could be improved.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6190 - Information and Data Management

(3 sem. cr.) The importance of information systems and information technology in increasing efficiencies in the management of clinical research data is examined in this course. The application of legal and ethical principles is considered, with attention to the development of a data collection and management plan that promotes information archiving and access as well as edit and query management. Issues of confidentiality and the security of information systems are addressed. Emerging technology that facilitates the capture and analysis of clinical study results, such as electronic data capture (EDC) and electronic case reporting forms (eCRF), is also examined.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6205 - Product Development in the Pharmaceutical, Biotechnology, and Medical Device Industries

(3 sem. cr.) In this course, students examine current trends and issues in the pharmaceutical, biotechnology, and medical device industries, focusing on how the commercial enterprise uses clinical research to bring products to market through the clinical development and regulatory process. They examine the process by which discoveries become new drugs or medical devices, the preclinical process, and the development of the clinical research plan, and they consider new drug and medical device applications, pre-market approvals, marketing authorizations, and post-marketing surveillance. Through discussions and practical assignments, students consider a variety of topics, including pharmacogenomics, pharmacoepidemiology, recent safety concerns of regulators, globalization, the politics of drug pricing and healthcare reimbursement, product life-cycle management, outsourcing of studies to developing countries, patent strategies, and accelerated approval of medications. They also analyze case studies representing several therapeutic categories from multiple perspectives, including business, medical, scientific, ethical,
regulatory, and biomedical engineering.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6220 - Health Economics and Financial Management in Clinical Research Administration

(3 sem. cr.) The medical product research and development process requires the participation of individuals who can make informed financial decisions that maximize health benefits, using economic principles and discerning the best allocation of resources for profitability. Students in this course are provided with a foundation for economic evaluation and financial management, with a focus on the development, analysis, and communication of economic and financial data in the context of clinical research. Students explore health economic issues in the global marketplace, and they analyze and describe advantages and disadvantages of conducting clinical global trials, considering issues of enrollment, informed consent, application of good clinical practice (GCP), patient compliance, and data security. In addition, students consider financial management aspects of clinical research, including estimating cost of clinical protocol, deciding whether to outsource, calculating direct clinical costs versus research administrative costs and institutional overhead, and developing and negotiating clinical trial budgets and payment terms with sponsors.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6235 - Epidemiology

(3 sem. cr.) Students are provided with an overview of epidemiologic methodology in the study of the distribution and etiology of disease and health-related conditions in human populations in this course. Students examine important study designs and discuss the strengths and weaknesses inherent in each. They also explore issues related to inference and causality that can be derived from studies as well as approaches to the evaluation of preventive measures. Students engage in assignments designed to provide practical application of course concepts on a variety of topics, such as calculation and interpretation of measures, acute outbreak investigations, incidence and prevalence, observational study designs, and investigation of randomized trials.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6550 - Practicum

(3 sem. cr.) Students have the opportunity to apply and integrate the knowledge and skills acquired throughout the M.S. in Clinical Research Administration and further develop key professional competencies in the practicum. Students engage in a supervised field experience, which they align to their academic and professional goals. The field experience occurs at a clinical site where a research study is underway or with a research sponsor who is planning or facilitating a study. Supervision by an on-site preceptor involved in the planning or conduct of a clinical research study is a critical component of the practicum. The on-site supervisor and the course instructor monitor and evaluate students’ performance throughout the entire practicum experience. Students are required to complete 120 hours of practicum work. They must also
participate in an accompanying online seminar course and begin to develop an ePortfolio based on assigned professional development activities.

**CLRA 6560 - Capstone**

(3 sem. cr.) The capstone is an opportunity for students to demonstrate their mastery of principles, concepts, and content presented throughout the M.S. in Clinical Research Administration program. Students choose from a selection of overarching themes and topical areas reflecting the breadth of subjects covered in the program. Guided by their faculty advisor, students identify a particular area of interest and produce a substantive written paper and presentation in an area of clinical research administration. Students also engage in group discussions through which they consider their career development plan, share information on their capstone research topic and process, and exchange feedback on final capstone presentations.

**CMIS 1000 - Developing Student Portfolios for CIS**

(1 cr.) A portfolio is a valuable tool for students to communicate and demonstrate their academic accomplishments as well as a means to advance their professional prospects. In this course, students learn about the tools for developing an electronic portfolio. They compose a high-level design and comprehensive outline through which they apply the structure and methods learned in the course. They also examine tools and techniques that lend to the management and maintenance of an electronic portfolio. Through peer discussion about portfolio challenges and solutions, students work toward building their communication and problem-solving skills, which they will use throughout their program. **Note about required first courses:** Students should review the program description section of the Walden University Catalog carefully to determine which first course is required.

**CMIS 1001 - Introduction to Information Systems**

(5 cr.) The definition of information systems (IS) is broad and can encompass a large number of components. The most important aspect, however, is that IS are vital to the daily function of nearly all individuals and organizations. In this course, students have the opportunity to gain an appreciation of the role that IS play in their lives as well as in different types of organizations and societies. Students obtain a broad overview of the field of IS through the examination and discussion of technology, practical applications, and related career issues. They also use case studies that represent recent situations in actual organizations to gain real-world knowledge of how a business manages its data in conjunction with business processes to create an information system.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 1002 - Information Technology Infrastructure**

(5 cr.) Businesses whose systems are lacking or experience failure are at risk of significant loss of time, money, and customer faith. Therefore, information technology (IT) is essential to the function and success of nearly all businesses. Through this course, students prepare for a role in the field of IT as they learn fundamental concepts of the IT infrastructure that underlie
information systems. Students examine both hardware (computers, networks, interface devices) and software (operating systems, middleware, applications, system software) elements. They also explore key issues of capacity, performance, reliability, scale, and obsolescence for a thorough understanding of all aspects of IT infrastructure.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 1003 - Object-Oriented Programming I

(5 cr.) Modern software design and programming requires techniques that simplify the development and maintenance process. Object-oriented programming (OPP) does just this by allowing programmers to develop objects that represent complex concepts in applications. This course introduces students to fundamental aspects of computer programming in an object-oriented language. Students learn about key concepts, including real-world objects, actions, and information in terms of data and algorithms; the translation and execution of computer programs; and the notion of an organized process of software development. They engage in hands-on practice in designing, creating, running, and testing programs and discuss related topics to share ideas and obtain different perspectives. (Prerequisite(s): MATH 1040.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 1004 - Object-Oriented Programming Concepts

(5 cr.) Information systems rely on underlying programs that respond to users and process information. An information systems specialist must understand the structure and purpose of programs and be able to work with programmers to ensure designs that meet system requirements. Object-oriented programming (OOP) and design facilitates this by presenting information systems as classes and objects that represent complex system contexts in a manner directly transferrable to programming specifications. This course introduces students to fundamental aspects of computer programming in an object-oriented language. Students learn about key concepts, including real-world objects and methods in an information systems context. They engage in hands-on practice in designing, creating, and running programs and discuss programming and design topics to share ideas and obtain different perspectives. This concept focus enables students to relate programming to information systems and provides a foundation for learning specific programming languages and skills in the future. (Prerequisite(s): MATH 1040.)

CMIS 2001 - Internet Computing

(5 cr.) The Internet stitches together many disparate devices and software components into a flexible fabric that supports an enormous variety of uses. Students in this course learn about the functions of these components through a comprehensive evaluation of Internet computing. They examine the design of the Internet protocol stack, the structure and function of some of the most important Internet services and applications, and Internet governance. Students have the opportunity to gain practical experience through the application of concepts, such as performance, scale, and reliability, in the design of information systems. (Prerequisite(s): CMIS
1002 or ITEC 1010.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 2002 - Object-Oriented Programming II**
(5 cr.) Students in this course elaborate their study of object-oriented programming by delving more deeply into the key concepts of programming with objects, including complex data structures. Students examine and discuss hierarchy, modularity, and abstraction—concepts that they will use in subsequent courses in the program. Students supplement their hands-on programming practice by engaging in assignments designed to provide practical application of context, including the use and development of documentation in a Web-based environment. Through this course, students learn to write more elaborate code and solve real-world problems they will encounter in the field. *(Prerequisite(s): CMIS 1003.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 3001 - Computing and Society**
(5 cr.) There are invariably challenges in the aggressive world of information technology (IT), requiring those in the field to understand and adhere to a professional code of ethics. This course introduces students to the interaction of information systems with core social concerns, including privacy, democracy, equity, security, economic progress, and intellectual property rights. Students learn to consider the social, ethical, and legal considerations inherent in the design and use of information systems. They also examine real-world and hypothetical case studies for a practical approach to applying the professional code of ethics to the field. *(Prerequisite(s): CMIS 2001.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 3002 - Database Management Systems**
(5 cr.) All types of businesses rely on systems to manage their data and to keep the data secure, accurate, and reliable. A database is a system designed to do just this, as well as to simplify the processes of data entry, search, and retrieval. Students in this course focus on the representation and manipulation of information in relational database management systems. Students learn how to map real-world concepts onto relational representations and how to manipulate them through relational queries to implement data-intensive applications. Students also learn to use a core subset of the structured query language (SQL) and how relational databases fit into a wide variety of practical information systems. *(Prerequisite(s): CMIS 1003.)*

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 3003 - Requirements Analysis**
(5 cr.) A critical step in the development of information systems, and one in which the seeds of disaster often are sown, is the analysis and definition of system requirements, both functional and
nonfunctional. This course provides students with an introduction to systems analysis and the responsibilities of a systems analyst. Students learn about the identification of stakeholders and techniques for requirement elicitation, representation (e.g., use cases), and life cycles (e.g., iterative methods, and maintenance). Students complete a comprehensive analysis project through which they work toward gaining hands-on experience meeting the responsibilities of a systems analyst. (Prerequisite(s): CMIS 3002.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 3004 - Object-Oriented Design**

(5 cr.) In this course, students learn the discipline of reducing requirements to the structural and functional design of information systems through the application of object-oriented principles to the design phase of the systems development life cycle (SDLC). They engage in discussions and assignments on a variety of topics, including conceptual modeling, design patterns, and application frameworks. They learn the basics of modeling, design representations, and the role of computer-aided software engineering (CASE) tools. Students have the opportunity to gain insight on contemporary methodologies employed in systems development, such as agile development, the Unified Process (UP), eXtreme Programming (XP), Model-Driven Architecture (MDA), and frameworks. (Prerequisite(s): CMIS 3003.)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment advisor [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 3005 - Information Systems Project Management**

(5 cr.) The process of creation, from conception through completion, is complex and requires a diverse set of management skills. This course introduces students to the knowledge, tools, and techniques needed to manage information systems projects effectively throughout a project life cycle. Students learn how information systems projects are organized and managed for efficiency and reliability. They explore topics including software process models, estimation, planning, and scheduling. Students examine case studies of successful and unsuccessful projects and gain experience with key elements of project management practice. (Prerequisite(s): CMIS 3004.)
