Organizational credibility, community trust, and fund-raising are increasingly dependent upon demonstration of program effectiveness and success. Students in this course are introduced to research and evaluation methods in the public and nonprofit sectors to study ways to measure and assess a program's effectiveness and potential success as well as to address problems or issues in the field. Students examine the strengths, limitations, and threats to validity; models, quantitative metrics, and tools used to evaluate programs and policies; and legal and ethical issues associated with research and evaluation methods. Using these parameters and other concepts presented in the course, students critically evaluate sample research, consider ways to communicate results to an intended audience, and reflect on trends and challenges that could affect future program evaluation.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 6100 - Critical Issues in Emergency Management

(5 cr.)
Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

MSEM 6115 - Foundations of Graduate Study

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals and develop a program of study and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. Students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 6116 - Foundations for Graduate Study

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals and develop a program of study and strategies for online success. Students also explore
resources used throughout the program, such as the online Walden University Library. Students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

**MSEM 6137 - The Nature of Crime and Criminology**

(5 cr.)
Students in this course are introduced to contemporary views and theories of maladaptive and criminal behavior. They examine a broad conceptualization of criminal behavior from an interdisciplinary perspective as well as theories and application of criminal profiling. Students also explore specific views of criminal behavior germane to groups, such as psychopaths, serial offenders, and sexually violent predators. At the end of this course, students will have an understanding of the theories and practices that are the foundations of the field of criminology.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MSEM 6200 - Risk Assessment, Preparedness, and Disaster Mitigation**

(5 cr.)
Risk assessment and mitigation are key components to effective emergency management and all-hazard planning and response. Students in this course focus on the methods and techniques required to assess an organization or government’s risk associated with the protection of human life and capital assets. They study ways to evaluate the social vulnerabilities to disaster and the special needs of at-risk populations, and they explore methods to reduce vulnerabilities and build capacity through structural and nonstructural mitigation. Additionally, students complete the FEMA Emergency Management Institute course IS-393.a: Introduction to Hazard Mitigation as part of this course.

**MSEM 6215 - Controversies in Criminal Justice**

(5 cr.)
Justice is at the heart of the U.S. democratic system, yet opposing viewpoints surrounding and within the system often muddle interpretations of the law and the development of policies to promote and enforce justice. In this course, students examine events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act, for example, the terrorist acts of September 11, 2001. They learn how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties. Through discussion with peers, assessment of contemporary articles, and examination of Supreme Court cases, students have the opportunity to reflect on and potentially broaden their own opinions.
and perspectives on current criminal justice affairs in regard to issues of law enforcement, public perception, policy development, and ethics.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 6217 - Technological Solutions and 21st-Century Crime♦

(5 cr.)
In consideration of modern technological innovation and the spread of knowledge through digital means, the relationship between technology and criminal activity is increasing. In this course, students explore this relationship and gain a comprehensive view of cyber crime, including current trends. They learn how law enforcement agencies use technology to track and apprehend criminals. Through real-world scenarios, students examine legal responses to cyber crime and learn different approaches and techniques for solving cyber crimes and handling related challenges. Students also have the opportunity to gain a comprehensive understanding of building cases and prosecuting crimes through practical exercises in identification, data mining, and the protection and gathering of evidence.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 6300 - Disaster Response and Recovery

(5 cr.)
A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issues, including evacuation, relocation, and tactical and strategic decisions in the immediate aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework (NRF), and they can gain an understanding of how local, state, and federal policies mesh in response and recovery efforts. Through their exploration, they study how recovery begins once the immediate threat of the emergency wanes and the focus shifts to restoring disaster-affected areas. As part of this course, students complete the FEMA Emergency Management Institute course IS208.a: State Disaster Management.

MSEM 6320 - Public Policy Implications of Terrorism Legislation and Policies♦

(5 cr.)
Critical issues, such as infectious diseases, inadequate healthcare access, and an aging population, require leaders who have a diverse skill set as well as the professional and ethical sensibilities needed to lead efforts that improve quality of life for individuals and communities. In this course, students examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health
goals. They explore ethical choices, values, professionalism, opportunities for advocacy, and application of principles of social justice implicit in public health decisions and practice. Students study ways to employ collaborative methods for working with and motivating diverse communities and constituencies, and they consider methods and develop new strategies for evaluating and solving current problems in healthcare.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MSEM 6363 - Public Safety Issues**

*(5 cr.)*

In consideration of technological innovation, terrorism, and other modern factors, threats to the American public are changing, thus requiring professionals who have the ability to identify, plan for, and mitigate crime and disaster incidents. In this course, students examine foundational public safety concepts and investigate issues faced by public safety agencies and personnel at the local, state, and national levels, including police and sheriff, emergency medical services, fire services, and related organizations. They explore and discuss the ways in which public safety organizations communicate and coordinate, and they learn why effective interaction is vital to emergency management. They also have the opportunity to gain practical experience employing tools used by public safety professionals, such as a public safety constituency matrix through which they assess competing demands on the various agencies. In this course, students work toward gaining the skills necessary to anticipate the needs of various constituents to develop effective public safety initiatives.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MSEM 6364 - Managing Public Safety Organizations**

*(5 cr.)*

Public safety leaders are responsible for finding solutions to major issues confronting their community and organizational operating systems through research, analysis, planning, and decision making. In this course, students assess these tools and solutions to learn the intricacies of managing public safety organizations. They engage in written assignments and discussions on a variety of topics, such as systems approaches, environmental analyses, contingency planning, implications for change, coordination, and controls. Students explore ways to apply classic business management techniques and leadership principles to public safety operations. They also apply concepts presented in the course to the development of solutions and alternatives to varied situations confronting public safety managers. Additionally, the course introduces students to concepts of "first-planner" and "first-responder."

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MSEM 6390 - Strategic Context of Public Management and Leadership

(5 cr.)
Students in this course engage in a collaborative study of the changing strategic context of public administration. Students apply a systems perspective to construct a public enterprise "mental" model of a public organization to understand the strategic context for practical action and the stakeholder relations involved. Students demonstrate their knowledge of the interrelated flows of money, knowledge, and influence as they weave these elements in their model. They engage in readings and practical assignments that emphasize management and leadership in a time of unprecedented and unpredictable change. Students also work toward developing professional-action habits for pragmatic-action learning in the practice of public administration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 6391 - Transformative Change in a Shared-Power World

(5 cr.)
Students in this course engage in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 6392 - The Language of Leadership

(5 cr.)
In today’s complex environment, leaders engaged in shaping public policy must know how to use the emotional as well as the intellectual power of language to motivate, inspire, and competently manage their organizations. In this course, students examine techniques, such as effective communication, used in dynamic leadership that affect conscious and unconscious influences on human behavior. Through discussions, group assignments, and individual projects, students apply theoretical and practical course content to demonstrate the necessary components for making effective human connections. Students also study why stories, symbols, and metaphors are essential elements in the language of leadership.
MSEM 6420 - Organizational Management and Leadership

(5 cr.)
Public and nonprofit leaders in all areas of public administration require a thorough understanding of the expectations of their roles as leaders and managers of diverse and complex organizations. Students use theoretical and applied perspectives from which they study the intricacies of these roles, including the distinction between leadership and management, organizational culture, change management, systems theories, and organizational development. Students gain a practical understanding of these topics through the application of principles and concepts to public, private, and nonprofit organizational settings.

MSEM 6480 - Applied Research and Evaluation Methods

(5 cr.)
Organizational credibility, community trust, and fund-raising are increasingly dependent upon demonstration of program effectiveness and success. Students in this course are introduced to research and evaluation methods in the public and nonprofit sectors to study ways to measure and assess a program's effectiveness and potential success as well as to address problems or issues in the field. Students examine the strengths, limitations, and threats to validity; models, quantitative metrics, and tools used to evaluate programs and policies; and legal and ethical issues associated with research and evaluation methods. Using these parameters and other concepts presented in the course, students critically evaluate sample research, consider ways to communicate results to an intended audience, and reflect on trends and challenges that could affect future program evaluation.

MSEM 6540 - Management and Leadership in a Global Context

(5 cr.)
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships among strategic planning, management, and leadership from an international perspective. They connect three key institutional elements: thinking-acting-and-leading strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. They
have the opportunity to understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

**MSEM 6541 - Sustainable Development for Global Communities**

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

**MSEM 6542 - Transformative Change in a Global Environment**

(5 cr.)
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

**MSEM 6740 - Disaster, Crisis, and Trauma**

(5 cr.)
There is no shortage of natural and human-made disasters, such as war, violence, genocide, and terrorist activities. Individuals and communities affected by such disasters often need assistance from professionals who understand the social, cultural, and psychological complexities of crisis and trauma. Students in this course investigate how these incidents impact the psychology of individuals and groups. They assess traditional and current literature and complete practical exercises to study theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to
deal with trauma. Considering the various ways crisis professionals can promote positive social change, students devote special attention to the importance and development of culturally appropriate, service-delivery programs and interventions for individuals affected and traumatized by disasters.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 6771 - Terrorism: A Systematic Approach for Emergency Preparedness♦

(5 cr.)
Terrorism continues to be a constant threat to the American public, facilitating the need for accurate information, organized resources, and established approaches to respond to emergencies and keep the public informed. Students in this course examine terrorism and related public policy on a local, national, and international level. They also assess the need and function of systemic approaches for emergency preparedness. Students explore and discuss topical issues, such as terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Using analytic skills and tools, students assess recommendations that policy makers use in decisions to prevent or respond to terrorism. They also gain hands-on experience initiating the development and/or analysis of a terrorism-preparedness infrastructure.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 6830 - Current Issues in Homeland Security♦

(5 cr.)
Since its inception, the Department of Homeland Security has had a profound impact on public policy and administration. Students in this course are provided with an in-depth analysis of homeland security, including history, concepts, policies, and strategies of prevention and response. Students examine and discuss a range of topics, including ethical issues, telecommunications, technology, threat assessment, contingency planning, and risk management. Students hone their critical-thinking and analytic skills through the application of fundamental concepts and principles of homeland security to case studies and current issues.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 6831 - Critical Incident Leadership and Planning♦

(5 cr.)
Strategic leadership and planning are required to prevent, respond to, and recover from critical incidents that threaten homeland security. Students in this course explore the
role and importance of leadership and planning in critical incident management and the application of tools, strategies, and systems to specific critical incidents. Through the evaluation of case studies, students examine the impact of critical incidents on individuals and communities as well as roles of government agencies and nongovernment organizations in managing such incidents. Using concepts and theories presented in the course, students develop a critical incident management plan for their community through which they consider new strategies and perspectives in regard to critical incident leadership and planning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MSEM 6832 - Terrorism: Legislation and Policy**

(5 cr.)
The events of September 11, 2001, resulted in a new and intense focus on the issue of terrorism in the United States and abroad. Through traditional literature and a wealth of contemporary journal articles and media sources, students explore the history of terrorism, the evolution and international context of terrorist groups, and the causes of and motivations for terrorist acts. They learn about the laws, regulations, and legislation related to terrorism. They also analyze possible future trends in terrorism as well as the current role of the media, governmental agencies, and entities in the prevention of and response to terrorism. Students use concepts presented in the course and additional research to develop a proposal to change and improve an existing counterterrorism policy.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MSEM 6910 - Capstone Seminar**

(5 cr.)
In this course, students complete a capstone project through which they apply an action research model that fosters social change in public administration or nonprofit management and leadership. Through this project, students demonstrate the knowledge, skills, and competencies acquired in their master's degree program. Students also have the opportunity to reflect on how the project and the program have contributed to their personal, scholarly, and professional growth.

**MSPM 6010 - Managing People and Promoting Collaboration**

(3 sem. cr.)
Contemporary business environments are increasingly competitive, global, fast paced, and knowledge intensive. In these environments, effective use of human capital is vital to an enterprise’s success and survival. In this course, students will explore practical issues
related to developing individuals and managing collaboration and will examine the skills and strategies necessary to address them effectively. Students will examine ethical and legal implications of managing a diverse workforce including issues that arise from cross-cultural differences and virtual work settings. The importance of communication as a tool to manage internal and external relationships is emphasized as it relates to the effectiveness of managing people to achieve organizational goals.

**MSPM 6100 - Foundations for Graduate Study in Project Management**

(1 sem. cr.)
Students taking this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. Students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence as they relate to project management.

**MSPM 6101 - Foundations for Graduate Study in Project Management**

(1 cr.)
Students taking this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. Students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence as they relate to project management.

**MSPM 6102 - Practices in Project Management**

(3 sem. cr.)
Students in this course are introduced to the knowledge, skills, tools, and techniques needed to successfully manage projects throughout the life of a project, known as the project life cycle. By learning about the project management Knowledge Areas and Process Groups as well as the distinguishing characteristics of each, students gain an appreciation for how these two dimensions of project management interact in initiating, planning, executing, monitoring and controlling, and closing a project.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MSPM 6125 - Project Scheduling**

(3 sem. cr.)
Students in this course are introduced to a comprehensive framework for proactively building, managing, and controlling project schedules from initiation to closeout. They
explore the importance of defining deliverables, establishing project and product requirements, defining scope boundaries and building a detailed work breakdown structure as prerequisites to building network diagrams using both critical path and critical chain approaches. Students explore the challenges of project scheduling under uncertainty, address techniques for addressing resource constraints, and develop procedures for proactively managing and controlling the scheduling process throughout the project's lifecycle.

**MSPM 6130 - Budgeting and Management of Operations**

*(3 sem. cr.)*

Effective project management requires leaders with interdisciplinary knowledge and skills who understand the relationships between operational factors, such as business processes and product design. Students in this course learn about these relationships, in addition to other elements imperative in project management, including project goal attainment, positive operating cash flow, risk mitigation strategy, and operational alignment. Students also explore the role of budgeting and management of operations in an organizational environment. They engage in practical exercises designed to help them develop budget and operational plans based on an organization's accounting and financial data, project plans, and goals. Students also examine planning considerations associated with global operations.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MSPM 6140 - Enterprise and Project Risk Management**

*(3 sem. cr.)*

Project management involves an ongoing, and nearly inevitable, variation of risks to which managers must be attuned and ready to mitigate. In this course, students learn how to plan, analyze, respond to, and control qualitative and quantitative risk in projects. They examine the internal risks associated with managing projects and the external risks associated with customer behavior, the supply chain, transportation and distribution channels, and acts of nature within the framework of the organization's overall risk strategy. Assessing real-world examples of project risks, students learn about strategies for working with project stakeholders to identify and respond to risk within defined ethical and legal standards.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MSPM 6150 - Planning and Administering Project Contracts**

*(3 sem. cr.)*

A major responsibility of many project managers is planning and administering project
contracts for the purchase or acquisition of project resources from external sources. In this course, students learn about planning for purchases and acquisitions, requests for proposal, vendor selection, contract administration, and contract closure. They consider and discuss the role of the project manager in the procurement process as it relates to project requirements for purchases or acquisitions, managing the relationship between buyer and seller, assessing vendor performance, contract change control, and conflict resolution. Students also have the opportunity to reflect on theory presented in the course as well as how they can apply these concepts to professional practice.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

MSPM 6160 - Stakeholder Management and Organizational Behavior♦

(3 sem. cr.)
One role of the project manager is to lead teams in complex and diverse organizational settings while concurrently communicating with all stakeholders. In this course, students analyze this dual role and examine how individual and group behavior impacts organizational effectiveness. They discover how using influence, rather than organizational power, leads to more successful project management. Students learn ways to design projects to support organizational goals and how to build and engage organizational capital (intellectual, human, physical, financial, and structural). They also assess communications management as a tool to manage internal and external relationships with stakeholders, partners, vendors, and customers.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

MSPM 6170 - Sustainability in Project, Portfolio, and Program Management♦

(3 sem. cr.)
How do project managers ensure that their organization's initiatives allow for sustainable business and promote positive change through products for a sustainable environment? Students in this course are provided with an opportunity to answer such questions as well as to develop their understanding of managing projects at the portfolio and program levels. Students learn about the nature of sustainability in project management in terms of how project management processes align with the three fundamentals of sustainable development: social equity, economic efficiency, and environmental performance. Students work toward gaining a real-world understanding of concepts through the examination of current research illustrating sustainability in project management and by assessing actual products developed through projects.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

MSPM 6180 - Business Process Management and Systems
Modern organizations are constantly seeking ways to improve business processes and systems for greater efficiency and effectiveness. To ensure stakeholder's needs are met and business prospers. In this course, students learn how to harness the tools needed to help businesses gain competitive advantage through business processes and systems. Students examine strategies for managing the flow of business information within and across organizational boundaries. They become familiar with the concept of enterprise resource planning (ERP) systems and learn how these systems can lead to novel ways of efficiently managing project execution and business innovation. Students also assess and discuss technologies for business process integration, automation, and optimization, and they examine and practice using practical tools of enterprise.

**MSPM 6900 - Capstone: Social Impact in Project Management**

This course is designed to allow students to bring together knowledge gained through the program and to demonstrate mastery of the various course competencies. Students synthesize concepts and skills in an integrative project that combines multiple aspects of their program, illustrating how ethics, internal culture, and external forces shape project managers’ behaviors when executing projects within an organization. Students articulate how project managers within an organization can drive social change and sustainability through the example they set in their everyday work.

**NASC 1001S - Environmental Science**

In this course, students learn about environmental processes and the influence of human activities upon them. Students explore ecological concepts, population growth, natural resources, and current environmental problems from scientific, social, political, and economic perspectives. Students also become familiar with the scientific method. Applying course concepts, students engage in a range of practical assignments, such as an assessment of their ecological footprint, a comparison of developed nations vs. less-developed nations, an evaluation of water pollution sources, and an assessment of an area's air-quality compliance. Through this course, students gain a foundational understanding of environmental interrelationships and contemporary environmental issues.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist (1-866-492-5336 (U.S.); 1-443-627-7222 (toll)) for more information.

**NPMG 5200 - Introduction to the Nonprofit Sector**

Nonprofit organizations serve as the foundation for many social change efforts. Students in this course explore the history, foundations, and types of nonprofit organizations, as
well as the diverse political, social, and economic contexts within which they exist. Students examine and apply marketing, public relations, and communication concepts and strategies to case studies and contemporary situations. Ethical, legal, and global lenses are applied to the study of the nonprofit sector. Students develop a concept paper guiding the development of a nonprofit organization.

**NPMG 5405 - Ethics and Social Justice**

(5 cr.)
Ethics is a foundational element of leadership. Leaders face increasingly complex social and political challenges as they seek to meet the needs of diverse constituents. Students in this course explore ethics and social justice related to economic disparity, power, and privilege. Students use demographic data, current social trends, and themes to understand, analyze, and address ethical and social justice issues that impact service delivery in a global community.

**NPMG 5420 - Organizational Management and Leadership**

(5 cr.)
Public and nonprofit leaders in all areas of public administration require a thorough understanding of the expectations of their roles as leaders and managers of diverse and complex organizations. Students use theoretical and applied perspectives from which they study the intricacies of these roles, including the distinction between leadership and management, organizational culture, change management, systems theories, and organizational development. Students gain a practical understanding of these topics through the application of principles and concepts to public, private, and nonprofit organizational settings.

**NPMG 5431 - Finance and Budgeting for the Nonprofit Sector**

(5 cr.)
Sound financial practices are crucial to managing scarce funds in both public and nonprofit operations. Students in this course examine finance and budgeting concepts, policies, and practices related to organizations as well as the fiscal climate within which they operate. They assess theories for motivating major fiscal-policy debates, and they explore and discuss auditing practices, tax systems, financial management, budgetary reform, financial technology systems, the use of dashboards for financial reporting, and the impact of globalization on finance and budget. Students read and analyze budgets, financial statements, and reports. They contextualize their learning as they apply knowledge gained from their analysis to develop a new budget and financial plan for either a public or private organization.

**NPMG 5435 - Human Resource Management: Building a Capable Workforce**
The acquisition, development, and retention of talent are critical elements in the success of any organization. In this course, students examine theories, approaches, and systems related to hiring, managing, training, and retaining employees in government and nonprofit organizations. Through the use of case studies, students explore topics that include legal and ethical considerations, diversity, performance management, the establishment and implementation of policy, technology, and conflict management. Students apply principles and concepts learned in this course to real-world situations encountered in public, private, and nonprofit organizations.

**NPMG 5451 - Board Governance and Volunteer Management**

(5 cr.)
The success of nonprofit organizations (NPOs) is largely dependent on the effective management of program volunteers and board members—individuals who often serve as the lifeblood of NPOs. Students in this course explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation. They focus on methods that organizations use to create and maintain an effective Board of Directors to ensure that the board governs and guides the organization toward their mission. Students design a board development or volunteer management plan based on processes presented in the course and fundamental concepts acquired earlier in the program.

**NPMG 5461 - Resource Development**

(5 cr.)
Students explore the concepts of philanthropy and development; types of funding sources; and ethical, legal, and diversity considerations. They also analyze and apply a resource development process—including donor and/or prospect research, cultivation, and education; solicitation; and appreciation—and they create a resource development plan for a nonprofit organization.

**NPMG 5480 - Applied Research and Evaluation Methods**

(5 cr.)
Organizational credibility, community trust, and fundraising are increasingly dependent upon demonstration of program effectiveness and success. Students in this course are introduced to research and evaluation methods in the public and nonprofit sectors to learn ways to measure and assess a program’s effectiveness and potential success as well as to address problems or issues in the field. Students examine the strengths, limitations, and threats to validity; models, quantitative metrics, and tools used to evaluate programs and policies; and legal and ethical issues associated with research and evaluation methods. Using these parameters and other concepts presented in the course, students critically evaluate sample research, consider ways to communicate
results to an intended audience, and reflect on trends and challenges that could affect future program evaluation.

**NPMG 5645 - Strategic Planning: Collaboration, Cooperation, and Coordination**

(5 cr.)
In an increasingly complex world, leaders and managers in public, private, and nonprofit organizations need to be strategic in planning and creating effective, collaborative programs and services. Students in this course explore the role and process of strategic planning with an emphasis on collaboration, cooperation, and coordination within and among organizations. Students apply these concepts to real-life situations and organizations.

**NPMG 6115 - Foundations of Graduate Study**

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals and develop a program of study, a Professional Development Plan, and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. Students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence and integrity.

**NPMG 6116 - Foundations of Graduate Study**

(3 cr.)
This course introduces students to graduate-level expectations and protocols for scholarly research and academic writing. Reflecting Walden's mission and vision of promoting positive social change, this course helps students build a foundation for success as scholar-practitioners and social change agents. Course assignments focus upon students' professional goals, strategies for online student success, research skills, and academic integrity. Assignments are designed to build critical thinking skills and provide opportunities to apply academic lessons to real-world practice. Students are encouraged to take advantage of Walden's wealth of student support systems, especially the Walden Library and the Writing Center.

**NPMG 6200 - Introduction to the Nonprofit Sector**

(5 cr.)
Nonprofit (NPO) and non-government (NGO) organizations can serve to affect people and communities through positive social change. NPO and NGO leaders require a
fundamental understanding of the nonprofit sector, including related ethical, legal, financial, and global perspectives. Through the lens of the NPO and NGO leadership, students in this course explore social entrepreneurship, marketing, communication, and governance. Gaining practical insight, students also apply theories presented in the course either to build a business plan for a new NPO/NGO or to evaluate an existing one.

Prerequisites
- NPMG 6116

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**NPMG 6333 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness**

(5 cr.)
Students have an opportunity to explore and understand the cultural values and styles of communication, reasoning, and leadership unique to their home culture. Students apply their increased understanding to other cultures. They also identify and become familiar with the challenges American nonprofit organizations face as they work internationally or cross-culturally within the United States.

**NPMG 6334 - Crossing Borders: U.S. and International NGO Cultures and Environments**

(5 cr.)
In this course, students examine in depth the cultures, structures, and activities of NGOs in select countries and compare their activities, organizational cultures, structures, and working environments with nonprofit organizations in the United States.

Prerequisites
- NPMG 6333

**NPMG 6335 - Placing NGOs in the Global Context**

(5 cr.)
Through this course students are offered knowledge and understanding about the geopolitical and economic contexts in which international, nongovernmental, and voluntary agencies function in other countries. Students analyze the historical, political, social, and cultural contexts in which nongovernmental organizations (NGOs) work and the implications these contexts have on the work of local and international NGOs. Students identify strategies that make the international and cross-cultural efforts of NGOs successful.

Prerequisites
NPMG 6405 - Ethics and Social Justice♦

(5 cr.)
Ethics is a foundational element of leadership. In this course, students examine the philosophy of ethics as well as responsibility and social justice—basic tenets of public service. Students explore the complex social, political, and related ethical challenges leaders face as they seek to meet the needs of diverse constituents. They examine ethics and social justice related to economic disparity, power, and privilege. Students also assess demographic data and current social trends and themes to understand, analyze, and address ethical and social justice issues that impact service delivery in a global community. Applying concepts presented in the course, students engage in an in-depth assessment of an emerging or persistent ethical or social justice issue, through which they demonstrate their ability to make recommendations for improvement or change.
Prerequisites
- NPMG 6200

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NPMG 6420 - Organizational Management and Leadership♦

(5 cr.)
Public and nonprofit leaders in all areas of public administration require a thorough understanding of the expectations of their roles as leaders and managers of diverse and complex organizations. Students use theoretical and applied perspectives from which they study the intricacies of these roles, including the distinction between leadership and management, organizational culture, change management, systems theories, and organizational development. Students gain a practical understanding of these topics through the application of principles and concepts to public, private, and nonprofit organizational settings.
Prerequisites
- NPMG 6405

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NPMG 6431 - Finance and Budgeting for the Nonprofit Sector♦
Sound financial practices are crucial to managing scarce funds in the nonprofit sector. In this course, students examine finance and budgeting concepts, policies, and practices related to organizations as well as the fiscal climate within which they operate. Students learn about the theories underlying fiscal policy, and they read and analyze budgets, financial statements, and financial reports. They also explore and discuss related topics, such as auditing practices; financial relationships with government, donors, and other sources of revenue; financial management; budgetary reform; and financial technology systems. Students apply theories and concepts presented in the course to the development of budget and financial projects relevant to nonprofit organizations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**NPMG 6435 - Human Resource Management: Building a Capable Workforce**

The acquisition, development, and retention of talent are critical elements in the success of any organization. In this course, students examine theories, approaches, and systems related to hiring, managing, training, and retaining employees in government and nonprofit organizations. Through the use of case studies, students explore topics that include legal and ethical considerations, diversity, performance management, the establishment and implementation of policy, technology, and conflict management. Students apply principles and concepts learned in this course to real-world situations encountered in public, private, and nonprofit organizations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**NPMG 6451 - Board Governance and Volunteer Management**

The success of nonprofit organizations (NPOs) is largely dependent on the effective management of program volunteers and board members—individuals who often serve as the lifeblood of NPOs. Students in this course explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation. They focus on methods that organizations use to create and maintain an effective Board of Directors to ensure that the board governs and guides the organization toward their mission. Students design a board development or volunteer management plan based on processes presented in the course and fundamental concepts acquired earlier in the program.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**NPMG 6461 - Resource Development**
All nonprofit organizations require financial resources. Obtaining philanthropic financial support is essential to program delivery and stability. Students in this course explore the concepts of philanthropy and development, identification of funding sources, donor/prospect cultivation and education, and solicitation and appreciation strategies. They focus on processes and strategies for creating an organizational philanthropic culture based on ethics and donor relationships. Using these strategies and other concepts presented in the course, students create a resource development plan for a nonprofit organization.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NPMG 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination

In an increasingly complex world, leaders and managers in public and nonprofit organizations plan strategies to fulfill the organizational mission and enhance stakeholder satisfaction. Students in this course explore the role and process of strategic planning, including collaboration, cooperation, and coordination. They also examine the benefits, challenges, and pitfalls of strategic planning, in addition to the impact of globalization. Students apply these concepts to real-life scenarios and develop a strategic plan for a nonprofit or public organization.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NPMG 6480 - Applied Research and Evaluation Methods

Organizational credibility, community trust, and fund-raising are increasingly dependent upon demonstration of program effectiveness and success. Students in this course are introduced to research and evaluation methods in the public and nonprofit sectors. They examine the strengths, limitations, and threats to validity; models, quantitative metrics, and tools used to evaluate programs and policies; and legal and ethical issues associated with research and evaluation methods. Students are asked to critically evaluate sample research, using these parameters.

Prerequisites

- NPMG 6461

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NPMG 6540 - Strategic Planning, Management, and Leadership in a Global Context
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships among strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: thinking, acting, and leading strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or an organization with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

**NPMG 6541 - Sustainable Development for Global Communities**

(5 cr.)

Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

**Prerequisites**
- NPMG 6540

**NPMG 6542 - Transformative Change in a Global Environment**

(5 cr.)

Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the
practice of public administration.
Prerequisites
- NPMG 6540
- NPMG 6541

NPMG 6820 - Elements of Sustainable and Livable Communities
(5 cr.)
Creating and maintaining sustainable and livable communities require leaders who understand the connections between the natural, built, and social environments, and those who can address these connections in a holistic and integrated fashion. Students in this course examine concepts of sustainability and livability and explore popular approaches to creating and maintaining communities that are more environmentally sound, economically prosperous, and socially equitable. They also focus on strategies to halt urban sprawl and to promote alternative modes of transportation. Students define and explore these concepts through case studies and examples drawn from local communities.

NPMG 6821 - Tools for Sustainable Community Development
(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models and apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.
Prerequisites
- NPMG 6820

NPMG 6822 - Current Issues in Regional and Local Public Policy
(5 cr.)
Public decision-makers must understand and address a variety of complex and interrelated issues, such as land use and transportation, energy and environment, housing and schools, and regional economic development. In this course, students learn how leaders attend to these issues in light of existing policies and contemporary social, economic, political, demographic, and technological trends. Students explore and discuss planning processes, tools, approaches, strategies, and policies used to create sustainable
and livable communities through collaborative processes involving multiple stakeholders. Through the development of a policy-option written assignment, students assess critical issues and identify problem-solving strategies.

**Prerequisites**
- NPMG 6820
- NPMG 6821

**NPMG 6880 - Social Entrepreneurship and Innovation: A Global Perspective**

(5 cr.)
This course is designed for individuals who have a passion for improving conditions for people and the environment, whether locally, regionally, nationally, or internationally. Social entrepreneurship and innovation are vehicles for moving beyond social change to widespread social transformation at the root cause and systemic levels of the biggest and most intransigent problems of the world. Students learn to become social innovators as they build citizen and community engagement and develop partnerships and multi-sector coalitions among social justice organizations, nonprofits, businesses, and public agencies. This course is intended to help students identify ways in which this concept, processes, and skills can be integrated into their work to increase their contribution to creating a just, sustainable, and peaceful world.

Students will learn the process, find practical applications, and design a plan to (a) solve or find practical solutions to social and environmental problems; (b) innovate by finding a new product, service, or approach to a social problem; (c) create social value; and (d) transform or revolutionize dysfunctional systems or industries. Additionally, they will learn to use innovative, sustainable, scalable, and measurable approaches, apply social entrepreneurship and innovation skills, and anchor competencies.

**NPMG 6881 - Grant Writing**

(5 cr.)
Grant writing is a highly marketable skill that requires many nonprofit, educational, and community organizations to secure external funding in order to provide needed services to the community. In this course, students will explore the basic skills needed for grant writing including identifying potential funding sources, creating objectives and a needs statement, preparing and justifying a budget, identifying appropriate assessment plans, and writing an executive summary. Course assignments will allow students to directly apply what they are reading and discussing by writing a full grant proposal based on an actual Request for Proposal (RFP).

**Prerequisites**
- NPMG 6880

**NPMG 6883 - Transformative Change in a Global Environment**
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex networked organizations that operate in today’s global environment. Students in the course will explore the nature of the global environment and its challenges to the leaders that operate within it. They will discuss the various kinds of organizations that operate across borders and the challenges these organizations face in accomplishing their goals. Students will discuss the global environment as a networked system in which organizations operate. They will evaluate the challenges of such complex systems to global leaders and the strategies that can be used to adapt to these challenges while promoting transformative change. Students will focus on the analysis of these challenges in a single organization through the development of a leadership case study.

Prerequisites
- NPMG 6880
- NPMG 6881

NPMG 6910 - MS in Nonprofit Management and Leadership Capstone

In this course, students complete a capstone project using action research that fosters social change in public administration or nonprofit management and leadership. In the project they demonstrate the knowledge, skills, and competencies acquired in their master’s degree program. The project employs an action research model. Students reflect on how the project and the program have contributed to their personal, scholarly, and professional growth.

Prerequisites
- All prior coursework

NRNP 6531 - Primary Care of Adults Across the Lifespan

In this course, students learn how nurse practitioners master the art and science of clinical decision making among adult populations across the lifespan. Students focus on the diagnosis and management of primary healthcare needs and problems of the adult across the lifespan. They engage in a variety of course assignments that focus on physical and behavioral disease processes central to diagnosing conditions as well as planning, implementing, and evaluating therapeutic treatment programs for acute illnesses commonly encountered in a primary healthcare setting.

Prerequisites
- NURS 6501N
- NURS 6512N
- NURS 6521N
NRNP 6540 - Advanced Practice Care of Older Adults

(3 cr.)
In this course, students focus on the complex healthcare and management needs of older adults by advanced nurse practitioners in acute and primary care settings. Students learn to plan, implement, and evaluate therapeutic regimens of older adults through the application of knowledge in multiple settings. Additionally, students examine content related to end-of-life care and caregiver issues to gain the knowledge and sensibilities needed to implement positive change for the quality of life available to this vulnerable population.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521

NRNP 6541 - Primary Care of Adolescents and Children

(3 cr.)
How can a nurse practitioner master the art and science of clinical decision making among pediatric populations? This course provides students with the opportunity to answer this question as they examine content related to the primary healthcare of pediatric patients, from newborn through adolescence (up to age 21), while focusing on growth and development, health promotion, and common primary care health problems. Students learn how to identify, diagnose, and manage these problems. They also gain confidence in clinical experience in a primary healthcare setting that provides opportunities to assess, diagnose, plan, implement, and evaluate therapeutic regimens for acute and chronic illnesses commonly found in children and adolescents.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6531 or NUNP 6531

NRNP 6550 - Advanced Practice Care of Adults in Acute Care Settings II

(3 cr.)
This course is the second of four clinical courses in the Adult-Gerontology Acute Care curriculum. Students will plan, implement, and evaluate care for acutely/critically ill patients or patients experiencing an exacerbation of a chronic health problem. The clinical focus is on the role of the acute care nurse practitioner working with an
interdisciplinary team across settings to facilitate the patient’s return to optimal health. Students will apply appropriate diagnostic procedures and relevant laboratory tests in developing appropriate treatment plans to address patient health needs in the acute care setting.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6540
- NURS 6566

NRNP 6552 - Advanced Nurse Practice in Reproductive Health Care

(3 cr.)
How can a nurse practitioner decide what is important to focus on in a 15–30 minute appointment with individuals seeking primary, prenatal, or postpartum care? Students in this course gain opportunities to teach and promote wellness in individuals through the process of screening for common gynecologic conditions, normal pregnancy, and other common health conditions that impact the individual's health. Students learn to analyze data to interpret results for the benefit of the individual seeking assistance with planning healthy lifestyle behaviors. They also gain an understanding of working with individual’s sexual identity and sexual orientation with respect to, ethical decision making, and an unbiased approach to optimal care. Students will consider how this course will benefit their clinical experience in a primary healthcare setting to increase competence in diagnosis, treatment, referrals, or follow-up care with a concentration on improving patient outcomes.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6531 or NUNP 6531
- NURS 6540 or NURS 6541

NRNP 6553 - Advanced Nurse Practice in Obstetric Health Care

(1 cr.)
This course provides students with foundational knowledge in the assessment and management of pregnant women. Common physiologic changes in pregnancy, complications, and postpartum care are discussed. Students analyze available data and plan appropriate interventions leading to positive outcomes for pregnant women and infants. Students develop competence in diagnosis, treatment, referral, and follow-up
NRNP 6560 - Advanced Care of Adults in Acute Settings III

(3 cr.)
Students in this course will advance their clinical competence in the care of patients in acute care settings. Students will build confidence as they begin the transition from student to advanced practice nurse. Classroom activities and case studies will enable students to explore resources and support systems available to acutely ill adolescents, adults, and older adults. The application of knowledge in the management of patients and the collaboration between the advanced practice nurse and the patient, family, and multi-disciplinary healthcare team are emphasized.
Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NRNP 6531 and PRAC 6531
- NRNP 6560 - Advanced Care of Adults in Acute Settings III

NRNP 6565 - Synthesis in Advanced Nursing Practice Care of Patients in Primary Care Settings

(3 cr.)
Students in this synthesis course focus on clinical competence in the care of adults in primary care settings by building on knowledge and skills gained in previous courses. Students build confidence as they continue to transition from the role of registered nurse to that of advanced practice nurse. Classroom activities and case studies enable students to explore the salient nurse practitioner practice issues involved in the delivery of safe, competent, high-quality, and cost-effective care of patients in a dynamic healthcare system. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized. This course is designed for nurse practitioner (NP) students to synthesize their knowledge and clinical skills to provide care to patients with complex health conditions.
Prerequisites
- NURS 6501
NRNP 6566 - Advanced Care of Adults in Acute Settings I

(3 cr.)
This course is the first of four clinical courses in the Adult-Gerontology Acute Care curriculum. Students will explore and integrate concepts of pathophysiology, pharmacology, assessment, and collaborative management of adolescents, adults, and older adults who are acutely/critically ill or experiencing an exacerbation of a chronic health problem. The clinical focus is on the role of the acute care nurse practitioner working with an interdisciplinary team across settings to facilitate the patient's return to optimal health. Topics include cardiac, pulmonary, and renal issues as well as common diagnostic test and procedures.

Prerequisites
• NURS 6501
• NURS 6512
• NURS 6521

NRNP 6568 - Synthesis in Advanced Nursing Practice of Patients in Family Care Settings

(3 cr.)
Students in this synthesis course focus on clinical competence in family settings by building on knowledge and skills gained in previous courses. Students build confidence as they continue to transition from the role of registered nurse to that of advanced practice nurse. Classroom activities and case studies enable students to explore the salient nurse practitioner practice issues involved in the delivery of safe, competent, high-quality, and cost-effective care of patients in a dynamic healthcare system. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized. This course is designed for nurse practitioner (NP) students to synthesize their knowledge and clinical skills to provide care to patients with complex health conditions.

Prerequisites
• NURS 6501
• NURS 6512
• NURS 6521
NRNP 6635 - Psychopathology and Diagnostic Reasoning

(3 cr.)
Psychiatric-mental health nurse practitioners (PMHNPs) need to have the knowledge and skills to provide comprehensive mental health evaluations in a safe and competent manner. In this course, students can learn how to use knowledge of psychopathology and diagnostic reasoning for health promotion and psychiatric assessment, and to develop differential diagnosis for patients with psychiatric and substance use disorders across the life span.

NRNP 6645 - Psychotherapy With Multiple Modalities

(3 cr.)
Psychotherapy involves giving more than good advice. For the psychiatric mental health nurse practitioner (PMHNP) to be effective, deliberate approaches to therapy must be consistent with evidence-based practices. Learners in this course examine a variety of therapeutic techniques that can be used during psychotherapy sessions with individuals, families, and groups across the lifespan. Emphasis is placed on evidence-based applications of various therapeutic approaches for a wide range of psychiatric issues.

NRNP 6665 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan I

(3 cr.)
Working from a lifespan approach, this course brings together diagnosis and treatment planning in psychiatry. Topics include psychiatric assessment, application of diagnostic criteria, diagnostic formulation, differential diagnosis, psychopharmacology, and appropriate labs and diagnostics. The learner will select a combination of psychotherapeutic modalities coupled with psychopharmacologic approaches to treat common psychiatric mental health conditions across the lifespan. Legal and ethical considerations for working with clients across the lifespan will be addressed. Students build confidence as they continue to transition from the role of registered nurse to that of advanced practice nurse.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6630
- NRNP 6635
- NRNP 6645
NRNP 6675 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan II

(3 cr.)
Continuing from the lifespan approach, students in this final course for the psychiatric-mental health nurse practitioner (PMHNP) focus on clinical competence in mental health settings by building on content and skills from previous courses. Selection of assessment approaches for patients across the lifespan, as well as differential diagnosis, application of diagnostic criteria, appropriate diagnostic testing, and diagnostic case formulation will be undertaken. The learner will use both psychotherapeutic approaches coupled with psychopharmacologic approaches to treat common psychiatric mental health conditions. Classroom activities and case studies enable students to explore the salient nurse practitioner practice issues involved in the delivery of safe, competent, high-quality, and cost-effective care of patients in a dynamic healthcare system. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the patient, family, and interprofessional healthcare team are emphasized. This course is designed for nurse practitioner (NP) students to synthesize their knowledge and clinical skills to provide care to patients with complex health conditions.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6630
- NRNP 6645
- NRNP 6665

NRNP 6810 - Primary Care Approaches for Children

(3 cr.)
This course is designed to provide the pediatric advanced practice nursing student with specialized knowledge needed for outpatient pediatric care of children from birth to young adulthood. There is also emphasis on pediatric illnesses commonly seen in the primary care office setting as well as evidence-based approaches to diagnosis and pediatric disease management.

NRNP 6820 - Management of Complex Pediatric Conditions

(3 cr.)
This course is designed to provide the pediatric advanced practice nursing student with specialized knowledge needed for the management of complex acute and chronic illnesses in children from birth to young adulthood. There is emphasis on evidence-
based approaches to diagnose and treat complex and chronic illnesses in pediatric patients within the family and community systems. Students also integrate knowledge, theory, and clinical practice research from a variety of disciplines into age-appropriate assessment and treatment of children using culturally appropriate strategies for patient and family education.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6800
- NRNP 6810

**NRNP 6830 - Management of Specialized Populations**

(3 cr.)
This course is designed to provide the pediatric advanced practice nursing student with specialized knowledge needed when caring for specialized pediatric populations from birth to young adulthood. There is emphasis on what makes various subpopulations special and how best to provide evidence-based healthcare and disease management for special populations. This includes behavioral health issues, bullying, adolescent health, sexuality, contraception, eating disorders, LGBTQ+ youth, child abuse, mental health, and foster children.

Prerequisites
- NRNP 6800
- NRNP 6810
- NRNP 6820

**NRNP 6840 - Synthesis of Pediatric Primary Care**

(3 cr.)
This course is designed to prepare advanced practice nursing students with a combination of knowledge and skills that will help prepare them for the pediatric nurse practitioner primary care role. It also assists students to implement the pediatric nurse practitioner role in a collaborative model of practice.

Prerequisites
- NRNP 6800
- NRNP 6810
- NRNP 6820
- NRNP 6830

**NRNP/PRAC 6550 - Advanced Practice Care of Adults in Acute Care Settings II**
NRNP/PRAC 6551 - Primary Care of Women

(5 cr.: 3 cr. didactic, 2 cr. practicum)
How can a nurse practitioner decide what is important to focus on in a 15- to 30-minute appointment with a woman seeking primary care? Students in this course gain opportunities to teach and promote wellness in women through the process of screening for commonly seen gynecological disorders. Students learn to analyze data to interpret results for the benefit of women seeking assistance with planning healthy lifestyle behaviors. They also gain clinical experience in a primary healthcare setting that provides opportunities to increase competence in diagnosis, treatment, referrals, or follow-up care with a concentration on improving patient outcomes.
Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6531 or NUNP 6531
- NURS 6540 or NURS 6541

Note: This course requires a minimum of 160 practicum hours.

NRNP/PRAC 6640 - Psychotherapy With Individuals

(5 cr.: 3 cr. didactic, 2 cr. practicum)
Psychotherapy involves giving more than "good advice." For the psychiatric mental health nurse practitioner (PMHNP) to be effective, deliberate approaches to therapy
must be used that are consistent with evidence-based practices. Learners in this course are introduced to a variety of therapeutic techniques that can be used during psychotherapy sessions with individuals across the lifespan. Emphasis is placed on evidence-based applications of various therapeutic approaches for a wide range of psychiatric issues. The focus of the practicum experience is on psychotherapeutic approaches with individuals.

Note: This course requires a minimum of 160 practicum hours.

NRNP/PRAC 6650 - Psychotherapy With Groups and Families

(5 cr.: 3 cr. didactic, 2 cr. practicum)
Managed care has ushered in a new era of effective mental health services. To that end, the psychiatric mental health nurse practitioner (PMHNP) must know how to optimize not only his or her time, but also the treatment benefits associated with family and group therapy. In this course, the emphasis is on the concept of treatment of the family unit. Group dynamics and benefits associated with group therapy are also emphasized along with introducing the learner to techniques that can be used in group therapy settings. The focus of the practicum experience is on the treatment of the family unit as well as the provision of group psychotherapy.

Note: This course requires a minimum of 160 practicum hours.

NRNP/PRAC 6660 - Psychiatric Mental Health Nurse Practitioner Role I: Child and Adolescent

(5 cr.: 3 cr. didactic, 2 cr. practicum)
Working from a lifespan approach, this first practicum course for the psychiatric mental health nurse practitioner (PMHNP) is an introduction for the learner to child and adolescent psychiatry. Emphasis is placed on the psychiatric and/or mental health disorders that begin in childhood and adolescence and topics include psychiatric assessment, differential diagnosis, application of diagnostic criteria, appropriate diagnostic testing, and diagnostic formulation. The learner will select a combination of psychotherapeutic modalities coupled with psychopharmacologic approaches to treat common psychiatric mental health conditions of children and adolescents. The focus of the practicum experience is on application of didactic concepts to actual patient care situations.

Note: This course requires a minimum of 160 practicum hours.

NRNP/PRAC 6670 - Psychiatric Mental Health Nurse Practitioner Role II: Adult and Older Adult

(5 cr.: 3 cr. didactic, 2 cr. practicum)
Continuing from the lifespan approach, the focus for the learner in this final course for the psychiatric mental health nurse practitioner (PMHNP) program is on psychiatric mental health issues that occur in adults and older adults. Selection of assessment
approaches for the adult and older adult as well as differential diagnosis, application of diagnostic criteria, appropriate diagnostic testing, and diagnostic case formulation will be undertaken. The learner will use both psychotherapeutic approaches coupled with psychopharmacologic approaches to treat common psychiatric mental health conditions of adults and older adults. Through these practicum experiences, learners will focus on the application of didactic concepts to patient care situations.

Note: This course requires a minimum of 160 practicum hours.

**NRSE 6002 - Transition to Graduate Study for Nursing**

(3 cr.)
In this course students are introduced to Walden University and online learning. Students explore strategies for the successful participation in an online curriculum. Students also will receive a foundation for academic and professional success as scholar-practitioners and social change agents. Course assignments introduce students to resources that support success, development of graduate-level writing skills and use of APA Style, academic integrity, and the creation of a professional development plan based on each student's chosen specialization. Additionally, information and requirements for the MSN Practicum are introduced.

Note: NRSE courses are equivalent to the NURS version of the course.

**NRSE 6003 - Transition to Graduate Study for Nursing**

(3 cr.)
In this course students are introduced to Walden University and online learning. Students explore strategies for the successful participation in an online curriculum. Students also will receive a foundation for academic and professional success as scholar-practitioners and social change agents. Course assignments introduce students to resources that support success, development of graduate-level writing skills and use of APA Style, academic integrity, and the creation of a professional development plan based on each student's chosen specialization. Additionally, information and requirements for the MSN Practicum are introduced.

Note: NRSE courses are equivalent to the NURS version of the course.

**NRSE 6050 - Policy and Advocacy for Improving Population Health**

(5 cr.)
In today's rapidly changing healthcare delivery system, decisions made within the political arena impact the future of health delivery systems, healthcare professionals, and the populations they serve. In this course, students examine the policy process and its impact on healthcare delivery, cost, quality, and access. Students examine the importance of getting healthcare issues on federal and state agenda, investigate governmental response through legislation and regulation, and identify where they can advocate for positive outcomes in program/policy design, implementation, and
evaluation. Global health issues are examined for their relevance and impact on the
development of the nurse advocate. Through discussions, reflection, case studies, and
the application of professional communications techniques as political tactics to
influence policy outcomes, students demonstrate integration of policy decision-making
into professional nurse practice for the benefit of individuals and populations.
Note: NRSE courses are equivalent to the NURS version of the course.

**NRSE 6051 - Transforming Nursing and Healthcare Through Technology**

(5 cr.)
Nursing informatics is essential to the provision of effective and efficient care. This
course examines nursing informatics as a nursing competency and a nursing specialty.
Students examine the role of the nurse informaticist in current practices related to the
collection, access, and use of health information and knowledge, as well as the
implementation of clinical systems. Through this course, students gain an understanding
of how informatics is used to improve advanced nursing practice and healthcare
outcomes across organizations, public health, and consumer health settings.
Note: NRSE courses are equivalent to the NURS version of the course.

**NRSE 6052 - Essentials of Evidence-Based Practice**

(5 cr.)
Nurses base practice on sound and tested evidence to ensure the safety, high quality,
and cost-effectiveness of patient care. This course provides students the opportunity to
gain a better understanding of evidence-based practice (EBP) and how it interacts and
aligns with research and quality improvement. Students will examine how to use
databases to discover evidence and how to apply their knowledge of research
methodologies to critically appraise literature. They will also examine opportunities to
strengthen their synthesis and integration skills to determine whether a change in
practice is needed, based on a body of evidence. Through exploration of
implementation, evaluation, and dissemination strategies, students will explore the
intricacies of leading and mentoring change within an organization to enhance nursing
practice.
Note: NRSE courses are equivalent to the NURS version of the course.

**NRSE 6053 - Interprofessional Organizational and Systems Leadership**

(5 cr.)
Students in this course will develop leadership skills to transform nursing and adapt
organizations in response to the turbulent healthcare environment. They will develop
and apply theory-based leadership competencies to create the organizational cultures
needed to achieve quality patient outcomes. Students will also explore evidence-based
strategies to create healthy work environments that empower nurses and build
collaborative interprofessional teams.

Note: NRSE courses are equivalent to the NURS version of the course.

NRSE 6512 - Advanced Health Assessment and Diagnostic Reasoning

(5 cr.)
The physical and emotional well-being of patients and families can be complex and multifaceted. Advanced practice nurses need to have the knowledge and ability to provide safe, competent, and comprehensive physical health assessments. Students in this course focus on concepts and skills to assess patients across the lifespan. They learn to use diagnostic reasoning, advanced communication, and physical assessment skills to identify changes in health patterns. Students also will explore preventative health through risk evaluation of healthy individuals as a central theme of clinical practice in addition to the assessment of patients with acute and chronic health problems. The advanced skills of suturing, reading 12 Lead EKGs, and interpreting X-rays will be covered. Course assignments emphasize risk assessment, diagnostic reasoning, and evidence-based assessment across the lifespan.

Note: NRSE courses are equivalent to the NURS version of the course.

NRSE 6600 - Capstone Synthesis Practicum

(5 cr.)
Students in this course apply the MSN curriculum experience by translating knowledge into practice through participation in professional activities and the development of a culminating project. Students apply theory, principles, and concepts related to their area of specialization in order to enhance nursing practice and promote positive social change.

Note: NRSE courses are equivalent to the NURS version of the course.

NSEI 6030 - Principles of Programming♦

(3 sem. cr.)
The discipline of software development demands a variety of skills. Students in this course assess the fundamental practices and principles of designing and constructing object-oriented programs. They engage in substantial hands-on practice, reinforcing algorithmic thinking, logical design, precise coding, and careful attention to quality.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6113 - Information Technology in the Organization

(3 sem. cr.)
Through a review of modern computer systems and the social and economic issues related to their use, students in this course are introduced to the conceptual
Walden University Catalog (March 2022)

foundations for designing, developing, and deploying large-scale management information systems. They investigate the role of information technology in an organization—particularly the collection, storage, and distribution of information for operations, planning, and decision making.

NSEI 6115 - Computer Networking and Operating Systems♦

(3 sem. cr.)
Within this course, students can learn the concepts of computer operating systems, including the main functions, similarities, and differences. Students can explore a variety of topics, including configuration, file systems, security, administration, interfacing, multitasking, and performance analysis. In addition, they can further their understanding of computers through the study of computer networks by learning key networking concepts, components, and the design of information and communication infrastructure solutions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6145 - Enterprise Database Design

(3 sem. cr.)
In this course, students discuss the design, implementation, and operation of databases using a principal relational database management system (DBMS). Many fundamental topics are covered in this course including: data modeling using entity-relationship diagrams; data storage, manipulation, and queries using structured query language (SQL); functional dependencies, normalization concepts, data warehouse architectures, data warehouse modeling, and data analytics.

NSEI 6511 - Information Systems Project Management♦

(3 sem. cr.)
Students develop the skills needed to plan, lead, and manage an information systems project. Topics include estimating, budgeting, and scheduling; risk management; team leadership; engineering process management; and open-source processes.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6561 - Service and Sourcing Management♦

(3 sem. cr.)
Students learn to manage projects and programs that span multiple organizations. Topics include process and best practices for qualification, acceptance, and assurance; service-level agreements; relationship management; and supply chain strategy.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6630 - Information Systems Management

(3 sem. cr.)
An effective healthcare information system is one that provides value by addressing the requirements of an organization and the needs of the individuals who will use the system. Such a system requires knowledgeable, ongoing management at each step within the complex process. Students in this course explore the technical aspects of information systems management, including key issues of systems design and development as well as system support and maintenance. Focusing on the systems development life cycle (SDLC) approach, students analyze and describe necessary steps in the cycle, such as identifying and selecting appropriate systems technology and data standards, creating requirements, evaluating security, and accommodating human factors in design and use. Additionally, students learn terminology, functions, and standards as well as the basics of information architecture and systems infrastructure.

NSEI 6631 - Data Warehousing and Business Intelligence♦

(3 sem. cr.)
Students learn key approaches to the integration of enterprise-wide information to support business strategy and decision-making. They cover issues in data acquisition, storage, retrieval, and analysis. Topics include data warehouses; data marts; dashboards, key performance indicators, and scorecards; online analytical processing; and data visualization.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6661 - Business Analytics and Data Mining♦

(3 sem. cr.)
Students learn and apply techniques for inference and discovery in large data sets. Topics include statistical inference, exploratory data analysis, data mining, text mining, and machine learning for predictive modeling.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6712 - Business Architecture and Process♦

(3 sem. cr.)
Students in this course examine the structure and operations of organizations from an information-processing point of view and develop skills in analyzing, designing, and improving operations. Topics include fundamental business structures; business process
design, management, and optimization; decision support and automation; and enterprise resource planning and integration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6713 - Business Strategy for Competitive Advantage

(3 sem. cr.)
The focus of this course is on the development and implementation of business strategies that enable competitive advantage, with an emphasis on understanding the current environment in which the organization competes and forecasting how that environment may change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6720 - Integrated Project Process Management

(3 sem. cr.)
Students in this course focus on the iterative nature of the project management processes, demonstrating how an integrated approach to project management increases the likelihood of project success. Students learn how the project management processes and process groups intersect. Students develop a comprehensive project plan that comprises the project management knowledge areas with specific emphasis on scope, time, cost, and quality management. Students also learn the paramount importance of project communications management as a tool for managing stakeholder expectations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6721 - Organizational and Social Dimensions of Information Systems

(3 sem. cr.)
In this course, students place their technical and process work in a human context, focusing on issues and effects in a broader domain. Topics include organizational behavior and change; intellectual property issues; ethics, professionalism, and social impact; and privacy and security.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NSEI 6730 - Budgeting and Management of Operations

(3 sem. cr.)
In this course, students explore the role of budgeting and management of operations in an organizational environment. Emphasis is placed on developing budget and operational
plans based on an organization’s financial data, project plans, and goals. The interdisciplinary knowledge and skills associated with achieving project goal attainment, positive operating cash flow, risk mitigation strategy, and operational alignment are developed in this course. Students are also introduced to planning considerations associated with global operations.

NSEI 6740 - Enterprise and Project Risk Management

(3 sem. cr.)
In this course, students learn how to plan, analyze, respond to, and control qualitative and quantitative risk in projects. Students examine the internal risks associated with managing projects and the external risks associated with customer behavior, the supply chain, transportation and distribution channels, and acts of nature within the framework of the organization’s overall risk strategy. Students learn about strategies for working with project stakeholders to identify and respond to risk within defined ethical and legal standards.

NSEI 6781 - Information Security Governance

(3 sem. cr.)
Students in this course cover information security issues in an organizational context, recognizing the increasing stakes in keeping systems safe from tampering and disclosure. Topics include management structures and processes for enterprise information security; information security in the supply chain; legal, regulatory, audit, and policy issues; risk management; and the business case for information security.

NUNP 6531 - Advanced Practice Care of Adults Across the Lifespan

(5 cr.)
In this course, students learn how nurse practitioners master the art and science of clinical decision making among adult populations across the lifespan. Students focus on the diagnosis and management of primary healthcare needs and problems of the adult, elderly, and frail elderly. They engage in a variety of course assignments that focus on physical and behavioral disease processes central to diagnosing illnesses as well as planning, implementing, and evaluating therapeutic treatment programs for acute illnesses commonly encountered in a primary healthcare setting. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to
plan, implement, and evaluate therapeutic regimens for adult patients with common acute and chronic illnesses.

**NUNP 6540 - Advanced Practice Care of Frail Elders**

(5 cr.)
The frail elderly are a subpopulation characterized by the decline in functional ability to meet the basic activities of daily living. In this course, students focus on the complex health care and management needs of the frail elderly by advanced nurse practitioners in community settings. Students learn to plan, implement, and evaluate therapeutic regimens through the analysis of case studies and the actual care of frail elderly in various settings. Additionally, students examine content related to end-of-life care and caregiver issues to gain the knowledge and sensibilities needed to implement positive change for the quality of life available to this vulnerable population.

**NUNP 6541 - Primary Care of Adolescents and Children**

(5 cr.)
How can a nurse practitioner master the art and science of clinical decision making among pediatric populations? This course provides students with the opportunity to answer this question as they examine content related to the primary healthcare of children and adolescents while focusing on growth and development, health promotion, and common primary care health problems. Students learn how to identify, diagnose, and manage these problems. They also gain confidence in clinical experience in a primary healthcare setting that provides opportunities to assess, diagnose, plan, implement, and evaluate therapeutic regimens for acute and chronic illnesses commonly found in children and adolescents.

**NUNP 6550 - Advanced Practice Care of Adults in Acute Care Settings I**

(5 cr.)
The complex assessment and care of patients in the hospital setting will require advanced practice nurses to obtain the specialized skills necessary to provide quality care for patients in these acute care settings. This course is designed to prepare students to provide care for acute, chronic, and critically ill patients. Students in this course will be introduced to the role of the advanced practice nurse, while gaining confidence in caring for patients. Through course assignments and clinical practice in the acute care setting, students will plan, implement, and evaluate care for patients. Students will also increase their knowledge of pharmacologic management of hospitalized patients, while applying knowledge gained through previous coursework.

**NUNP 6551 - Primary Care of Women**
How can a nurse practitioner decide what is important to focus on in a 15–30 minute appointment with a woman seeking primary, prenatal, or postpartum care? Students in this course gain opportunities to teach and promote wellness in women through the process of screening for common gynecological disorders, normal pregnancy, and other common health conditions that impact women’s health. Students learn to analyze data to interpret results for the benefit of women seeking assistance with planning healthy lifestyle behaviors. They also gain clinical experience in a primary healthcare setting that provides opportunities to increase competence in diagnosis, treatment, referrals, or follow-up care with a concentration on improving patient outcomes.

**NUNP 6560 - Advanced Practice Care of Adults in Acute Care Settings II**

(5 cr.)
Students in this course will advance their clinical competence in the care of medical and surgical patients in acute care settings. Through clinical practice, students will build confidence as they begin the transition from student to advanced practice nurse. Classroom activities and case studies will enable students to explore resources and support systems available to acutely ill adolescents, adults, and older adults. Clinical experiences in hospital settings will provide students with the continued opportunity to develop, implement, and evaluate treatment plans for patients with complex acute, critical, and chronic illness. The application of knowledge in the management of medical and surgical patients and the collaboration between the advanced practice nurse and the patient, family, and multidisciplinary healthcare team are emphasized.

**NUNP 6565 - Synthesis in Advanced Nursing Practice Care of Patients in Primary Care Settings**

(5 cr.)
Students in this synthesis course will focus on clinical competence in primary care settings by building on knowledge and skills gained in previous courses. Through clinical practice students will build confidence as they begin the transition from the role of registered nurse to advanced practice nurse. Classroom activities and case studies will enable students to explore the salient advanced practice nursing issues involved in the delivery of safe, competent, quality and cost-effective care of patients in a dynamic healthcare system. Clinical experiences in primary care settings will provide students with the continued opportunity to develop, implement, and evaluate management plans for patients with complex health conditions. The application of knowledge in the management of clients and collaboration between the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized.

**NUNP 6630 - Psychopharmacologic Approaches to Treatment of Psychopathology**
At times, psychotherapy is not enough to alleviate the emotional difficulties that some patients face. To that end, psychopharmacologic approaches are needed. Psychiatric mental health nurse practitioners (PMHNPs) must have a strong basis in psychopharmacology, extending from a prior education in pharmacology, to make appropriate medication choices for their patients. Learners in this course consider psychopharmacologic approaches to major mental health disorders including, but not limited to, major depressive disorders, bipolar disorder, anxiety disorders as well as psychotic disorders. Learners explore key considerations associated with medication selection, monitoring of efficacy, and long-term management.

**NUNP 6640 - Psychotherapy With Individuals**

(5 cr.)
Psychotherapy involves giving more than "good advice." In order for the psychiatric mental health nurse practitioner (PMHNP) to be effective, deliberate approaches to therapy must be consistent with evidence-based practices. Learners in this course examine a variety of therapeutic techniques that can be used during psychotherapy sessions with individuals across the lifespan. Emphasis is placed on evidence-based applications of various therapeutic approaches for a wide range of psychiatric issues. Practicum experiences focus on psychotherapeutic approaches with individuals.

**NUNP 6650 - Psychotherapy With Groups and Families**

(5 cr.)
This course emphasizes the concept of treatment of groups and families. Group and family dynamics and benefits associated with group and family therapy are also emphasized along with introducing the learner to techniques that can be used in group and family therapy settings. Practicum experiences focus on the treatment of the family unit as well as the provision of group psychotherapy. Managed care has ushered in a new era of effective mental health services. To that end, the psychiatric mental health nurse practitioner must know how to optimize not only his or her time, but also the treatment benefits associated with family and group therapy.

**NUNP 6660 - Psychiatric Mental Health Nurse Practitioner Role I: Child and Adolescent**

(5 cr.)
Working from a lifespan approach, this course introduces child and adolescent psychiatry. Emphasis is placed on the psychiatric and/or mental health disorders that begin in childhood and adolescence. Topics include psychiatric assessment; differential diagnosis; and application of diagnostic criteria, appropriate diagnostic testing, and diagnostic formulation. The learner will select a combination of psychotherapeutic modalities coupled with psychopharmacologic approaches to treat common psychiatric
mental health conditions of children and adolescents. The focus of the practicum experience is on application of didactic concepts to actual patient care situations. Legal and ethical considerations for working with children and adolescents will be addressed.

NUNP 6670 - Psychiatric Mental Health Nurse Practitioner Role II: Adults and Older Adults

(5 cr.) Continuing from the lifespan approach, the learner in this final course for the psychiatric mental health nurse practitioner (PMHNP) focuses on psychiatric mental health issues that occur in adults and older adults. Selection of assessment approaches for the adult and older adult as well as differential diagnosis, application of diagnostic criteria, appropriate diagnostic testing, and diagnostic case formulation will be undertaken. The learner will use both psychotherapeutic approaches coupled with psychopharmacologic approaches to treat common psychiatric mental health conditions of adults and older adults. Through these practicum experiences, learners will focus on the application of didactic concepts to patient care situations.

NURS 3000 - Issues and Trends in Nursing

(5 cr.) Improvement of healthcare delivery in the United States relies on many factors, such as effective nurse advocacy through politics, policy, and professional associations. But advocacy depends on the ability to fully understand current issues, systems, policies, and related contexts. In this course, students engage in a systems-level analysis of the implications of healthcare policy on issues of access, equity, affordability, and social justice in healthcare delivery. Through policy analysis assignments students apply legislative, regulatory, and financial processes relevant to their organization and provision of healthcare services in their community. Students consider the impact of these processes on quality and safety in nursing practice environment and disparities in the healthcare system. Through this course, students gain the knowledge and skills needed to advocate for vulnerable populations and promote positive social change.

Note: BSN students must take this course first in their sequence.

NURS 3001 - Issues and Trends in Nursing

(5 cr.) Improvement of healthcare delivery in the United States relies on many factors, such as effective nurse advocacy through politics, policy, and professional associations. But advocacy depends on the ability to fully understand current issues, systems, policies, and related contexts. In this course, students engage in a systems-level analysis of the implications of healthcare policy on issues of access, equity, affordability, and social justice in healthcare delivery.
Through policy analysis assignments, students apply legislative, regulatory, and financial processes relevant to their organization and provision of healthcare services in their community. Students consider the impact of these processes on quality and safety in nursing practice environment and disparities in the healthcare system. Through this course, students gain the knowledge and skills needed to advocate for vulnerable populations and promote positive social change.

Note: RN-MSN students must take this course first in their sequence.

**NURS 3005 - The Context of Healthcare Delivery**

(5 cr.)
Improvement of healthcare delivery in the United States relies on many factors, such as effective nurse advocacy through politics, policy, and professional associations. But advocacy depends on the ability to fully understand current issues, systems, policies, and related contexts. In this course, students engage in a systems-level analysis of the implications of healthcare policy on issues of access, equity, affordability, and social justice in healthcare delivery. Through policy analysis assignments students apply legislative, regulatory, and financial processes relevant to their organization and provision of healthcare services in their community. Students consider the impact of these processes on quality and safety in nursing practice environment and disparities in the healthcare system. Through this course, students gain the knowledge and skills needed to advocate for vulnerable populations and promote positive social change.

**Prerequisites**
- NURS 3000

**NURS 3010 - Information Management in Nursing and Healthcare**

(5 cr.)
Professionals often use information technology to support clinical and managerial decision making in the field of healthcare. Students in this course explore these information technology applications through a variety of written and practical assignments. They focus on information technology that supports the delivery of services, including the collection, storage, retrieval, and communication of data; information systems safeguards; ethical and legal issues; and information management to promote patient safety and quality of care. Students also share examples of information literacy and discuss why it is important to the practice of nursing. Additionally, students identify basic hardware and software components and explore fundamental software applications, including spreadsheets and healthcare databases.

**Prerequisites**
- BS in Communication
  - COMM 1010
- All Other Programs
  - NURS 3005
NURS 3015 - Pathopharmacology

(5 cr.)
A major responsibility of nurses is to help ensure safe administration of medication by having an in-depth understanding of drug categories and how each type interacts with other drugs in the body. In this course, students explore foundational pharmacologic principles and topics, including key drug actions and interactions, effects of various categories of drugs, and pharmacokinetics and pharmacodynamics. Through case studies and other functional applications, students learn about the pathophysiology related to major health problems across the lifespan and the pharmacologic management of those problems. They examine the cellular aspects of disease, pathophysiological signs and symptoms, and dynamics of body defenses. Students also consider pathopharmacological implications in the practice of nursing.

Prerequisites
- NURS 3010

NURS 3020 - Health Assessment♦

(5 cr.)
Through this course, students have the opportunity to gain the knowledge and skills required to collect data related to assessment of individual health status. They learn the physical examination skills of inspection, palpation, percussion, and auscultation used to assess major body systems across the lifespan. They gain practical experience using interviewing techniques and communication skills for taking patient histories, and they discuss the psychological, social, and cultural aspects of clinical assessment. Additionally, students consider the integration of data to guide the nursing process and ethical guidelines. Engaging in interactive simulations, students apply knowledge and demonstrate understanding of conducting health assessments.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

NURS 3100 - Issues and Trends in Nursing♦

(6 cr.)
In this course, students are provided with an overview of the evolution of nursing as a profession and introduced to their new role as scholar-practitioners. They examine changes in the U.S. healthcare delivery system, the importance of information technology, and measures that promote quality, safety, and better health outcomes in patient care. Students consider major issues and trends in contemporary nursing and healthcare practice, including the influence of socioeconomic, ethical, legal, and political variables and professional values. Through weekly discussions and assignments, students
explore and share personal experiences in the context of contemporary nursing issues, such as the nursing shortage, workforce challenges, healthcare financing, professional organizations, and diversity. They are challenged to examine and propose solutions to these nursing issues in addition to those in their workplace. Students reflect on Walden's mission of social change and its impact on their future nursing practice as a scholar-practitioner. Because this is the first nursing course within the RN/BSN program, students learn to use Walden University's resources to enhance writing skills. Students are also introduced to the tools essential to success at Walden.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**NURS 3101 - Issues and Trends in Nursing**

*(6 cr.)*

In this course, students are provided with an overview of the evolution of nursing as a profession and introduced to their new role as scholar-practitioners. They examine changes in the U.S. healthcare delivery system, the importance of information technology, and measures that promote quality, safety, and better health outcomes in patient care. Students consider major issues and trends in contemporary nursing and healthcare practice, including the influence of socioeconomic, ethical, legal, and political variables and professional values. Through weekly discussions and assignments, students explore and share personal experiences in the context of contemporary nursing issues, such as the nursing shortage, workforce challenges, healthcare financing, professional organizations, and diversity. They are challenged to examine and propose solutions to these nursing issues in addition to those in their workplace. Students reflect on Walden's mission of social change and its impact on their future nursing practice as a scholar-practitioner. Because this is the first nursing course within the RN/BSN program, students learn to use Walden University's resources to enhance writing skills. Students are also introduced to the tools essential to success at Walden.

**NURS 3110 - Information Management and Patient Care Technology**

*(5 cr.)*

Nursing informatics supports nursing practice in education, administration, research, patient safety, quality outcomes, core standards, and nurse-sensitive outcomes. In this course, students emphasize the meaningful use of information technology in the delivery of nursing services, including the collection, storage, retrieval, and communication of data; information system safeguards; ethical and legal issues; and information management to promote patient safety and quality of care.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**NURS 3110A - Information Management and Patient Care Technology**
Nursing informatics supports nursing practice in education, administration, research, patient safety, quality outcomes, core standards, and nurse-sensitive outcomes. In this course, students emphasize the meaningful use of information technology in the delivery of nursing services, including the collection, storage, retrieval, and communication of data; information system safeguards; ethical and legal issues; and information management to promote patient safety and quality of care.

**NURS 3150 - Foundations of Nursing Research**

(5 cr.)

Nurses must understand research in order to effectively participate in the provision of evidence-based nursing care. Students in this course learn the foundational elements of the research process, refine information literacy skills, and develop an understanding of ethical research. Students investigate each step of the research process and complete a critical examination of quantitative and qualitative research relevant to their nursing practice. Students are given the tools to analyze nurse-sensitive indicators and clinical practice guidelines.

**Prerequisites**

- RN-BSN Track Students
  - STAT 3001 or PSYC 3002
- RN-BSN-AIM Track Students
  - STAT 3001 or PSYC 3002; cannot be taken with NURS 5052

**NURS 3151 - Foundations of Nursing Research**

(5 cr.)

Nurses must understand research in order to effectively participate in the provision of evidence-based nursing care. Students in this course learn the foundational elements of the research process, refine information-literacy skills, and develop an understanding of ethical research. Students investigate each step of the research process and complete a critical examination of quantitative and qualitative research relevant to their nursing practice. Students are given the tools to analyze nurse-sensitive indicators and clinical practice guidelines.

**NURS 4000 - Research and Scholarship for Evidence-Based Practice**

(5 cr.)

Nurses engage in research to stay up-to-date on the changing scope of healthcare as well as new methods and best practices in providing quality care to patients. Students in this course learn the basic elements of the research process. They also learn how scholar-practitioners use these elements to discover new knowledge and models for applying evidence to inform clinical decisions and improve nursing practice and patient
outcomes. They consider the ethical conduct of research and scholarly work as well as the nurse's role in the collection, documentation, analysis, interpretation, dissemination, and utilization of research data. Students apply course concepts as they research a current problem in nursing practice, propose solutions for change, and synthesize literature that supports their proposed changes.

**Prerequisites**

- NURS 3020

**NURS 4001 - Research and Scholarship for Evidence-Based Practice**

(5 cr.)
Nurses engage in research to stay up-to-date on the changing scope of healthcare as well as new methods and best practices in providing quality care to patients. Students in this course learn the basic elements of the research process. They also learn how scholar-practitioners use these elements to discover new knowledge and models for applying evidence to inform clinical decisions and improve nursing practice and patient outcomes. They consider the ethical conduct of research and scholarly work as well as the nurse's role in the collection, documentation, analysis, interpretation, dissemination, and utilization of research data. Students apply course concepts as they research a current problem in nursing practice, propose solutions for change, and synthesize literature that supports their proposed changes.

**NURS 4005 - Topics in Clinical Nursing♦**

(5 cr.)
Nurses play a critical role in the care of patients with major acute and chronic health problems. They are accountable for clinical outcomes and for promoting quality and safety in patient care through the use of information technology. Students in this course will examine their role in the evaluation of nurse-sensitive indicators, standards, and core measures to develop an evidence-based practice approach to care. Students explore the relationship of genetics and genomics to health and illness as well as infection-control issues. The nurse's role in palliative and end-of-life care and complementary and alternative therapies is also explored. Students apply course concepts and demonstrate an understanding of nursing interventions and agency policy to improve nursing practice.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**NURS 4006 - Topics in Clinical Nursing**

(5 cr.)
Nurses play a critical role in the care of patients with major acute and chronic health problems. They are accountable for clinical outcomes and for promoting quality and
safety in patient care through the use of information technology. Students in this course will examine their role in the evaluation of nurse-sensitive indicators, standards, and core measures to develop an evidence-based practice approach to care. Students explore the relationship of genetics and genomics to health and illness as well as infection-control issues. The nurse’s role in palliative and end-of-life care and complementary and alternative therapies is also explored. Students apply course concepts and demonstrate an understanding of nursing interventions and agency policy to improve nursing practice.

**NURS 4010 - Family, Community, and Population-Based Care**

(7 cr.)
The focus of this course is on application of theories and concepts from nursing and public health sciences in assessing health status and preventing and controlling disease in families, aggregates, and communities as clients. The use of epidemiological and community assessment techniques to examine populations at risk, health promotion, and levels of disease prevention with special emphasis on ethnically diverse and vulnerable populations are incorporated. Major local, state, and national health issues are considered, including mental health and substance abuse and related co-morbidities, re-emergence of infectious and communicable diseases, environmental and occupational health hazards, bioterrorism, emergency preparedness, and disaster response. Practice experiences provide relevant learning opportunities in population-based health promotion in your own community.

**Prerequisites**
- NURS 4005

**NURS 4011 - Family, Community, and Population-Based Care**

(7 cr.)
The focus of this course is on application of theories and concepts from nursing and public health sciences in assessing health status and preventing and controlling disease in families, aggregates, and communities as clients. The use of epidemiological and community assessment techniques to examine populations at risk, health promotion, and levels of disease prevention with special emphasis on ethnically diverse and vulnerable populations are incorporated. Major local, state, and national health issues are considered, including mental health and substance abuse and related co-morbidities, re-emergence of infectious and communicable diseases, environmental and occupational health hazards, bioterrorism, emergency preparedness, and disaster response. Practice experiences provide relevant learning opportunities in population-based health promotion in your own community.

**NURS 4015 - Public and Global Health**
Through this course, students widen their perspectives of promoting health and preventing disease as they examine health issues that transcend national borders, class, race, ethnicity, and culture. Students discuss the role of the nurse in preserving and promoting health among diverse populations as well as their role in illness prevention and health promotion, protection, and maintenance of targeted populations. They also explore principles of epidemiology and the influencing sociopolitical factors that impact health and well-being of humankind. Students engage in assignments designed to provide practical application of content on topical issues, such as infant mortality rates in the United States and abroad, infectious or communicable disease, implications of global climate change on health, among others. Finally, students consider and reflect on the nurse’s role as a leader in transforming the future of the world’s health.

Prerequisites
- NURS 4010

NURS 4020 - Leadership Competencies in Nursing and Healthcare

(7 cr.)
This focus of this course is on building the knowledge and key competencies essential to successful leadership and influence in an evolving healthcare delivery system. Students in this course emphasize increasing self-awareness in the context of organizational challenges and individual motivation; distinguishing leadership from management, team building, strengthening interpersonal communication, and interdisciplinary effectiveness; shaping a preferred future for nursing; translating strategic vision into action; as well as developing skills in implementing and managing organizational change. Specific learning opportunities include case studies, a battery of self-assessments and 360-degree feedback instruments, and exposure to top-level leaders in nursing and healthcare. Students’ practice experiences provide relevant learning opportunities in quality improvement and leadership development in students’ own practice environment.

Prerequisites
- NURS 4015

NURS 4021 - Leadership Competencies in Nursing and Healthcare

(7 cr.)
This focus of this course is on building the knowledge and key competencies essential to successful leadership and influence in an evolving healthcare delivery system. Students in this course emphasize increasing self-awareness in the context of organizational challenges and individual motivation; distinguishing leadership from management, team building, strengthening interpersonal communication, and interdisciplinary effectiveness; shaping a preferred future for nursing; translating strategic vision into action; as well as developing skills in implementing and managing organizational change. Specific learning
opportunities include case studies, a battery of self-assessments and 360-degree feedback instruments, and exposure to top-level leaders in nursing and healthcare. Students’ practice experiences provide relevant learning opportunities in quality improvement and leadership development in their own practice environment.

**NURS 4100 - Quality and Safety Through Evidence-Based Practice**

(5 cr.)
Nurses are expected to engage in evidence-based practice. As scholar-practitioners, students in this course learn to use evidence in clinical decision making to promote a safe healthcare environment. Students apply course concepts as they identify a current problem in nursing practice and synthesize and evaluate literature, as well as identify changes in practice. Students analyze clinical guidelines and nurse-sensitive indicators in establishing quality and safety initiatives. Students utilize quality improvement models in promoting changes in practice.

Prerequisites

RN-BSN Track Students
- NURS 3150 or NURS 3151

All Other Programs
- NURS 3150

**NURS 4105 - Advocacy Through Healthcare Policy**

(5 cr.)
Effective nurse advocacy is essential to the improvement of health in the United States. In this course, students learn about the power of advocacy through politics, policy, and professional associations. Students gain an understanding of how current issues, systems, policies, and related contexts impact advocacy. They engage in a system-level analysis of healthcare policy issues of access, equity, affordability, and social justice. Students perform healthcare policy analysis by applying research as well as legislative, regulatory, and financial processes in order to positively impact the quality and safety of nursing practice in the healthcare system. Through this course, students gain the knowledge and skills needed to be empowered to advocate for vulnerable populations and promote social justice and positive social change.

**NURS 4115 - Role of the Nurse—Public and Global Health♦**

(5 cr.)
Students in this course will widen their perspectives related to promoting health and preventing disease as they examine health issues that transcend national borders, class, race, ethnicity, and culture. Students evaluate the role of the nurse in preserving and promoting health among diverse populations as well as the role in illness prevention and health promotion, protection, and maintenance of targeted populations. They also
explore principles of epidemiology and the influencing sociopolitical factors that impact health and well-being of humankind. Students engage in assignments designed to provide practical application of content on topical issues, such as infant mortality rates in the United States and abroad, infectious or communicable disease, and implications of global climate change on health, among others. Finally, students consider and reflect on the nurse’s role as a leader in promoting positive social change in transforming the health of populations in the world.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**NURS 4210 - Role of the Nurse Leader in Population Health**

(5 cr.)
Students in this course focus on application of theories and concepts from nursing and public health sciences in assessing health status, preventing and controlling disease, and promoting a healthier population by working with families, aggregates, communities, and healthcare systems. Students apply system thinking by using epidemiological and community assessment techniques to examine at-risk populations, health promotion, and levels of prevention with special emphasis on ethnically diverse and vulnerable populations. Major local, state, and national health issues are considered, including communicable disease, chronic illness, environmental and occupational health, bioterrorism, emergency and disaster preparedness and response. Practice experiences provide learning experiences in population-based health promotion by collaborating with interdisciplinary public health partners in a local community.(1 credit of practicum equates to 72 clock hours of student practice experience hours.)

Prerequisites
- NURS 3150
- NURS 4100 or NURS 5052

Note: RN-BSN Track and RN-BSN-AIM Track students must complete NURS 4210 before NURS 4220.

**NURS 4211 - Role of the Nurse Leader in Population Health**

(5 cr.)
Students in this course focus on application of theories and concepts from nursing and public health sciences in assessing health status; preventing and controlling disease; and promoting a healthier population by working with families, aggregates, communities, and healthcare systems. Students apply systems thinking by using epidemiological and community assessment techniques to examine populations at risk, health promotion, and levels of prevention with special emphasis on ethnically diverse and vulnerable populations. Major local, state, and national health issues are considered, including communicable disease, chronic illness, environmental and occupational health,
bioterrorism, emergency and disaster preparedness, and response. Practice experiences provide learning experiences in population-based health promotion by collaborating with interdisciplinary public health partners in a local community. (1 credit of practicum equates to 72 clock hours of student practice experience hours.)

**NURS 4220 - Leadership Competencies in Nursing and Healthcare**

(5 cr.)
Contemporary nurses who wish to influence the current healthcare system must equip themselves with the knowledge and competencies to lead in times of pressure, constant change, and innovation. Quality Improvement science provides a rich set of tools and techniques and has been adopted by most nursing leaders. Nurses are expected to lead with quality improvement knowledge and competencies. Students in this course work toward gaining these skills by focusing on real practice problems and developing evidence-based solutions. They also learn skills and techniques in team building; strengthening interpersonal, communication, and interdisciplinary collaboration; promoting meaningful use of data to gauge improvements and problem solving; translating day to day practice problems to long term strategy for organizational growth; and identify strategies to manage organizational change. Students apply course concepts through case studies. Through this practice experience, students gain professional knowledge from nursing leaders in practice the application of quality improvement science. (1 credit of practicum equates to 72 clock hours of student practice experience hours.)

**Prerequisites**
- NURS 4210

**Note:** RN-BSN Track and RN-BSN-AIM Track students must complete NURS 4210 before NURS 4220.

**NURS 4220A - Leadership Competencies in Nursing and Healthcare**

(5 cr.)
Contemporary nurses who wish to influence the current healthcare system must equip themselves with the knowledge and competencies to lead in times of pressure, constant change, and innovation. Quality Improvement science provides a rich set of tools and techniques and has been adopted by most nursing leaders. Nurses are expected to lead with quality improvement knowledge and competencies. Students in this course work toward gaining these skills by focusing on real practice problems and developing evidence-based solutions. They also learn skills and techniques in team building; strengthening interpersonal, communication, and interdisciplinary collaboration; promoting meaningful use of data to gauge improvements and problem solving; translating day to day practice problems to long term strategy for organizational growth; and identify strategies to manage organizational change. Students apply course concepts through case studies. Through this practice experience, students gain professional
knowledge from nursing leaders in practice the application of quality improvement science. (1 credit of practicum equates to 72 clock hours of student practice experience hours.)

Prerequisites
- NURS 4210

Note: RN-BSN Track and RN-BSN-AIM Track students must complete NURS 4210 before NURS 4220.

NURS 4221 - Leadership Competencies in Nursing and Healthcare

(5 cr.)
Contemporary nurses who wish to influence the current healthcare system must equip themselves with the knowledge and competencies to lead in times of pressure, constant change, and innovation. Quality Improvement science provides a rich set of tools and techniques and has been adopted by most nursing leaders. Nurses are expected to lead with quality improvement knowledge and competencies. Students in this course work toward gaining these skills by focusing on real practice problems and developing evidence-based solutions. They also learn skills and techniques in team building; strengthening interpersonal, communication, and interdisciplinary collaboration; promoting meaningful use of data to gauge improvements and problem solving; translating day to day practice problems to long term strategy for organizational growth; and identify strategies to manage organizational change. Students apply course concepts through case studies. Through this practice experience, students gain professional knowledge from nursing leaders in practice the application of quality improvement science. (1 credit of practicum equates to 72 clock hours of student practice experience hours.)

Prerequisites
- NURS 3151
- NURS 4211
- NURS 4006

NURS 5050 - Policy and Advocacy for Improving Population Health

(5 cr.)
In today’s rapidly changing healthcare delivery system, decisions made within the political arena impact the future of health delivery systems, healthcare professionals, and the populations they serve. In this course, students examine the policy process and its impact on healthcare delivery, cost, quality, and access. Students examine the importance of getting healthcare issues on federal and state agenda, investigate governmental response through legislation and regulation, and identify where they can advocate for positive outcomes in program/policy design, implementation, and evaluation. Global health issues are examined for their relevance and impact on the
development of the nurse advocate. Through discussions, reflection, case studies, and the application of professional communications techniques as political tactics to influence policy outcomes, students demonstrate integration of policy decision-making into professional nurse practice for the benefit of individuals and populations.

Prerequisites
RN-BSN-AIM Track Students
- NURS 3100

Note: 11-week graduate course.

**NURS 5051 - Transforming Nursing and Healthcare Through Technology**

(5 cr.)
Nursing informatics is essential to the provision of effective and efficient care. This course examines nursing informatics as a nursing competency and a nursing specialty. Students examine the role of the nurse informaticist in current practices related to the collection, access, and use of health information and knowledge, as well as the implementation of clinical systems. Through this course, students gain an understanding of how informatics is used to improve advanced nursing practice and healthcare outcomes across organizations, public health, and consumer health settings.

Prerequisites
- NURS 3100

Note: 11-week graduate course.

**NURS 5052 - Essentials of Evidence-Based Practice**

(5 cr.)
Nurses base practice on sound and tested evidence to ensure the safety, high quality, and cost-effectiveness of patient care. This course provides students the opportunity to gain a better understanding of evidence-based practice (EBP) and how it interacts and aligns with research and quality improvement. Students will examine how to use databases to discover evidence and how to apply their knowledge of research methodologies to critically appraise literature. They will also examine opportunities to strengthen their synthesis and integration skills to determine whether a change in practice is needed, based on a body of evidence. Through exploration of implementation, evaluation, and dissemination strategies, students will explore the intricacies of leading and mentoring change within an organization to enhance nursing practice.

Prerequisites
- NURS 3100
- NURS 3150
- STAT 3001 or PSYC 3002
Note: 11-week graduate course.

**NURS 5501 - Introduction to Statistics and Applied Research Methods**

* (4 sem. cr.)*
Students in this course are provided with an introductory understanding of elementary statistics for social scientists as well as an introduction to social science research. Statistical methods include computation and analysis of frequency distributions, measures of central tendency, understanding of basic probability, and understanding of the normal curve, as well as conceptual understanding of effect sizes, probability value, and the correlation coefficient. Research methods include understanding basic language associated with research, such as the difference between theory and hypothesis, the nature of variables, and different research designs. Students learn to read research critically.

*Note: This course is for semester-based master's level students.*

**NURS 6001 - Foundations for Graduate Study**

* (1 cr.)*
The purpose of this course is to introduce students to Walden University and to the requirements for successful participation in an online curriculum. Students receive a foundation for the student's academic and professional success as scholar-practitioners and social change agents. Course assignments focus on the practical application of writing and critical-thinking skills and the integration of professional practice with professional and academic excellence as they relate to practice in nursing.

**NURS 6002 - Transition to Graduate Study for Nursing**

* (3 cr.)*
In this course students are introduced to Walden University and online learning. Students explore strategies for the successful participation in an online curriculum. Students also will receive a foundation for academic and professional success as scholar-practitioners and social change agents. Course assignments introduce students to resources that support success, development of graduate-level writing skills and use of APA Style, academic integrity, and the creation of a professional development plan based on each student's chosen specialization. Additionally, information and requirements for the MSN Practicum are introduced.

**Prerequisites**

- **Master of Science in Nursing (MSN): RN Track**
  - NURS 4221
- **All Other Programs**
  - None

---

Walden University Catalog (March 2022) 1795
NURS 6003 - Transition to Graduate Study for Nursing

(3 cr.)
In this course students are introduced to Walden University and online learning. Students explore strategies for the successful participation in an online curriculum. Students also will receive a foundation for academic and professional success as scholar-practitioners and social change agents. Course assignments introduce students to resources that support success, development of graduate-level writing skills and use of APA Style, academic integrity, and the creation of a professional development plan based on each student's chosen specialization. Additionally, information and requirements for the MSN Practicum are introduced.
Prerequisites
Master of Science in Nursing (MSN): RN Track
- NURS 4221
All Other Programs
- None

NURS 6003TL - Transition to Graduate Study for Nursing [Tempo Learning®-Specific Course]

(3 cr.)
In this course students are introduced to Walden University and online learning. Students explore strategies for the successful participation in an online curriculum. Students also will receive a foundation for academic and professional success as scholar-practitioners and social change agents. Course assignments introduce students to resources that support success, development of graduate-level writing skills and use of APA Style, academic integrity, and the creation of a professional development plan based on each student's chosen specialization.
Prerequisites
Master of Science in Nursing (MSN): RN Track
- NURS 4221
All Other Programs
- None

Note: This version of NURS 6003 is only available as part of specific competency-based Tempo Learning® programs.

NURS 6050 - Policy and Advocacy for Improving Population Health

(5 cr.)
In today's rapidly changing healthcare delivery system, decisions made within the political arena impact the future of health delivery systems, healthcare professionals, and the populations they serve. In this course, students examine the policy process and its
impact on healthcare delivery, cost, quality, and access. Students examine the importance of getting healthcare issues on federal and state agenda, investigate governmental response through legislation and regulation, and identify where they can advocate for positive outcomes in program/policy design, implementation, and evaluation. Global health issues are examined for their relevance and impact on the development of the nurse advocate. Through discussions, reflection, case studies, and the application of professional communications techniques as political tactics to influence policy outcomes, students demonstrate integration of policy decision-making into professional nurse practice for the benefit of individuals and populations.

Prerequisites

**MSN Nurse Practitioner Specializations**
- NURS 6002N or NURS 6003N

**MSN Other Specializations**
- NURS 6002 or NURS 6003

---

**NURS 6050TL - Policy and Advocacy for Improving Population Health [Tempo Learning®-Specific Course]**

(5 cr.)

Prerequisites
• NURS 6002 or NURS 6003

Note: This version of NURS 6052 is only available as part of specific competency-based Tempo Learning® programs.

NURS 6053 - Interprofessional Organizational and Systems Leadership

(5 cr.)
Students in this course will develop leadership skills to transform nursing and adapt organizations in response to the turbulent healthcare environment. They will develop and apply theory-based leadership competencies to create the organizational cultures needed to achieve quality patient outcomes. Students will also explore evidence-based strategies to create healthy work environments that empower nurses and build collaborative interprofessional teams.
Prerequisites
MSN Nurse Practitioner Specializations
• NURS 6002N or NURS 6003N
MSN Other Specializations
• NURS 6002 or NURS 6003

NURS 6053TL - Interprofessional Organizational and Systems Leadership [Tempo Learning®-Specific Course]
Students in this course develop leadership skills to transform nursing and adapt organizations in response to the turbulent healthcare environment. They develop and apply theory-based leadership competencies to create the organizational cultures needed to achieve quality patient outcomes. Students also explore evidence-based strategies to create healthy work environments that empower nurses and build collaborative interprofessional teams.

**Prerequisites**
- NURS 6002 or NURS 6003

**Note:** This version of NURS 6053 is *only available* as part of specific competency-based Tempo Learning® programs.

**NURS 6200 - The Nurse Administrator: Leading and Managing for Excellence**

(4 sem. cr.)
The primary goal of leaders in nursing is to achieve excellence in the delivery of patient services. In this course, students work toward gaining the knowledge and skills required to lead and manage in the nursing profession. They examine organizational, managerial, and leadership theories, and they discuss standards of practice for nursing administration. They also examine roles and responsibilities, quality improvements, strategic planning and management, regulations, and the function of information systems. Students observe practical applications in nursing administration through field experiences in practice settings. They also sharpen writing and critical-thinking skills through application-based writing assignments, such as a business plan proposal, journal entries, and a reflection from the perspective of a nurse administrator.

**NURS 6201 - Leadership in Nursing and Healthcare**

(5 cr.)
This course sets the foundational stage for the Nurse Executive specialty track. Students focus on theoretical and practical aspects of leadership in healthcare contexts, and they discuss professional standards of practice for nursing leadership. They explore components of the redesign or reformation of healthcare delivery and performance. Through this course, students synthesize the responsibilities of the nurse leader in the achievement of healthcare outcomes.

**Prerequisites**
- MSN Nurse Executive Specialization
  - NURS 6002 or NURS 6003
  - NURS 6050
  - NURS 6051
  - NURS 6052
  - NURS 6053

**Post-Master's Certificate in Nurse Executive**
NURS 6002 or NURS 6003

NURS 6210 - Healthcare Finance and Budgeting

(4 sem. cr.)
In this course, students explore applications of financial principles in developing, budgeting, and managing resources. Students analyze budgeting processes used in healthcare settings, budgeting models and information systems, nurse administrator responsibilities in finance and budgeting, and the impact of private and public policies. They also examine budget and resource decisions that contribute to the achievement of organizational and nursing service outcomes. Students engage in field experiences in which they observe individuals in practice settings who are involved in key financial activities. Additionally, students gain hands-on experience developing financial elements of a business plan for an organization, including a financial statement, revenue and volume projections, reimbursement codes and rates, among others.

NURS 6211 - Finance and Economics in Healthcare Delivery

(5 cr.)
Students in this course examine the fundamentals of finance and economics in healthcare delivery. They explore different ways to analyze financial data and interpret the results of those analyses. They explore budgeting and financial management tools in the context of the nurse leader’s role in the management of operational and capital resources. They examine the influence of policies and budgetary assumptions on the provision of health services. Students also explore budget and resource decisions contributing to the achievement of organizational outcomes within the context of providing efficient and cost-effective quality care.

NURS 6220 - Human Resource Management

(4 sem. cr.)
One of the most important skills in the healthcare industry is the ability to manage the individuals who provide service and deliver care. Students in this course examine the roles and responsibilities of nurse administrators in human resource management. They explore and discuss current legal, ethical, professional, and practice policies and standards as well as the role of technology to support human resource functions. They also examine strategies that support positive organizational and nursing-service goals. Additionally, students observe human resource administrators within a healthcare organization to observe how they provide support to employees and align responsibilities to the strategic goals of the organization. Students use course concepts and knowledge gained from field experiences to complete various practical-application assignments.
NURS 6221 - Managing Human Resources

(5 cr.)
Nursing leadership is grounded firmly in managing our most important resource—human capital. In this course, students address nurse executives’ role and responsibilities in human resource management. Students explore recruitment and selection of human resources while ensuring current legal, ethical, professional, and practice systems and procedures align with organizational strategies, outcomes, policies and standards. They consider how to apply technology to support human resource functions. Additionally, students examine strategies to support positive organizational and nursing service goals. They also have the opportunity to gain an understanding of the importance of diversity and inclusion, staff engagement, and empowerment, as well as creating collaborative and supportive partnerships within organizations.

NURS 6223 - Healthcare Quality Assurance and Risk Management in Healthcare Organizations

(5 cr.)
This course will examine health care quality assurance and risk management and the methods that are utilized to achieve improvements in health care organizations. Topics will include: the link between patient safety and legal and regulatory compliance; the role of accreditation organization requirements in patient safety; evidenced-based outcomes and standards of care; the development and archiving of reports, data and device evidence in medical error situations; and managing patient safety compliance through credentialing of health care professionals.
Prerequisites
- NURS 6201
- NURS 6211
- NURS 6221
- NURS 6231
- NURS 6241

NURS 6224 - Quality Assurance and Regulatory Compliance

(5 cr.)
This course will cover compliance regulations resulting from federal and state laws governing health care in various settings. Students will learn the essential elements of an effective compliance program and how to implement them. Topics will include: setting up and maintaining a compliance program, the role of the health care compliance officer, investigating, reporting, enforcement and discipline, and ethics in compliance management.
Prerequisites
- NURS 6201
NURS 6226 - Introduction to Healthcare Policy

(5 cr.)
In this course, students will consider the evolution of the U.S. healthcare system and health policy. Topics covered include current challenges in the delivery of healthcare and the future of the healthcare system. Perspectives for analyzing health and healthcare will be introduced with a focus on advocacy, activism, workplace influences, and the impact of technologies on healthcare, variations in medical practice, and quality of healthcare delivery.
Prerequisites
- NURS 6050

NURS 6227 - Current Issues in Health Policy

(5 cr.)
This course serves as an introduction to major health policy issues and examines the role of government in the health care system. The course will focus on the role of policy analysis in the formation and implementation of national and local health policy and the policy implications of how government pays for care. The role of the legal system with respect to adverse medical outcomes, economic rights, and individual rights is discussed. Proposals for health policy reform at the national and local level will be examined including potential reforms of Medicare and Medicaid. An overview of health program analysis and evaluation will also be discussed.
Prerequisites
- NURS 6201
- NURS 6211
- NURS 6221
- NURS 6231
- NURS 6241

NURS 6230 - Case Study: Quality Nursing in a Complex Healthcare Organization

(4 sem. cr.)
Students in this course use a case study approach to synthesize and apply knowledge to a current nursing practice issue. Through a collaborative case study project, students use a variety of administrative strategies to achieve positive patient care delivery.
outcomes. They develop a comprehensive plan in the context of current nursing-service challenges, analyze and explicate a case study, and provide strategic recommendations that address the issues and challenges presented in the case. Building their professional portfolio, students apply leadership and management theory and strategy to the design of their own case study created for use as a leadership development exercise. Students also review the work of their peers, share perspectives, and provide feedback.

**NURS 6231 - Healthcare Systems and Quality Outcomes**

(5 cr.)
The development of leadership strategies and competencies that support the healthcare organizational delivery of quality care is imperative to quality outcomes within healthcare systems. In this course, students use a systems approach to explore structures, processes, and outcomes that impact healthcare quality and ultimately improve patient experience and outcomes. Students learn how interdisciplinary collaboration is important to the development of quality and safety. Engaging in conceptual and application-based assignments, students focus on clinical and service quality planning and improvement initiatives; models, tools, and innovations for process improvement; and the importance and use of metrics in daily operations.

**NURS 6241 - Strategic Planning in Healthcare Organizations**

(5 cr.)
Nurse leaders in healthcare organizations must be aware of and integrate strategic organizational goals. Students in this course use an interdisciplinary case study approach to address unmet organizational and/or professional needs through strategic planning processes. Students apply organizational, behavioral, political, leadership, and management knowledge and theory to planning, implementing, and evaluating strategically planned change. Through these applications, students learn to use a variety of administrative strategies within the context of supportive and collaborative interdisciplinary relationships to achieve desired health care outcomes that effect positive social change in patient and professional communities.

**NURS 6301 - Advanced Pathopharmacology**

(5 cr.)
Nurse educators must have advanced knowledge of the concepts and principles of pathophysiology and drug therapy that relate to the nursing care of a variety of patient groups. In this course, students integrate concepts of pathophysiological processes and pharmacologic treatment as a foundation for advanced nursing practice. Students have the opportunity to apply the knowledge gained to specific real-world clinical cases.

**NURS 6321 - Curriculum Development, Assessment, and Evaluation**
The educational environment in higher education and health care settings is influenced by social, economic, regulatory, and technological transformations. Students in this course learn the theoretical foundations that drive curriculum development, assessment, and evaluation. They also focus on curriculum components, which include societal, professional, and educational trends that affect nursing education curricula.

Prerequisites

**MSN Nursing Education Specialization**
- NURS 6002 or NURS 6003
- NURS 6050
- NURS 6051
- NURS 6052
- NURS 6053

**Post-Master's Certificate in Nursing Education**
- NURS 6002 or NURS 6003

**NURS 6330 - Curriculum Development, Assessment, and Evaluation**

(3 sem. cr.)
A wide array of factors, including social, economic, regulatory, and technological transformations, impact the current educational environment. Therefore, nursing education curricula must be relevant and meet the health and nursing needs of society. Students in this course learn about curriculum development and the many processes that contribute to it. They explore the philosophical foundations of curriculum development; curriculum components; societal, professional, and educational trends; frameworks, competencies, and outcomes; organizational constraints; and selection of learning activities. Students also define the processes of curriculum assessment and evaluation in the context of program, course, and student outcomes. They apply course concepts and theory to the development of a syllabus or course outline. Through this course, students work toward attaining the skills required to develop curricula that address the nursing needs of society, support standards of practice, and prepare graduates for practice in diverse settings.

**NURS 6331 - Teaching Learning Strategies: Integrating Technology Into Nursing Education**

(5 cr.)
In this course, students explore how to plan instruction on a nursing topic, creating and adapting meaningful lessons and assessment/evaluation strategies for multiple learning environments and learner characteristics. Considering the diverse learning needs and ethical considerations of different learner groups (e.g., nursing students, staff, and patients/caregivers), students examine how to effectively integrate technology tools and develop lessons encompassing those needs. Students also explore evaluation strategies
and outcome measurements related to their chosen topic and how technology can assist. A final project involves adapting a face-to-face lesson for a digital learning environment. Throughout the course, students apply innovative teaching approaches for effective nursing education.

Prerequisites

**MSN Nursing Education Specialization**
- NURS 6002 or NURS 6003
- NURS 6050
- NURS 6051
- NURS 6052
- NURS 6053

**Post-Master's Certificate in Nursing Education**
- NURS 6002 OR NURS 6003

### NURS 6340 - The Nurse Educator: Roles, Responsibilities, and Relationships

(4 sem. cr.)
The goal of nurses, in all settings, is to be effective educators who guide and facilitate learning and contribute to the educational goals of the organizations in which they work. Students in this course explore the significance of the educator role as it applies to diverse settings, and they assess associated responsibilities and relationships. They examine concepts related to being change agents and leaders, role socialization, legal and ethical expectations, and professional development. They also explore and discuss nurse educator responsibilities, such as balancing role demands, using evidence to improve teaching, promoting scholarship related to teaching, developing partnerships, and engaging in collaboration and advocacy. Using knowledge gained in previous courses as well as concepts presented in this course, students demonstrate their understanding through various application-based exercises. They also observe the role of a nurse educator in a practice setting and record their learning experiences through journal assignments.

### NURS 6341 - Specialty in Clinical Nursing

(5 cr.: 4 cr. didactic, 1 cr. practicum)
In today's complex health care arena, and with increased patient acuity, there is a continuing need for highly-skilled nurses at the patient point of care. Nurse educators must possess advanced clinical knowledge to teach complex clinical content effectively. Nursing education students are expected to advance their clinical knowledge in a selected specialty to prepare them to fulfill the role of the nurse educator.

Prerequisites
- NURS 6380
NURS 6351 - Role of the Nurse Educator

(5 cr.: 4 cr. didactic, 1 cr. practicum)
Nursing education students in this course explore the roles of the nurse educator, including staff developers, patient educators, and academic educators. Through the Practicum Experience, students translate and apply theoretical principles from their clinical specialty and teaching practices in implementing the educator role. Students will develop an appreciation for the complexities of the role of the educator and the challenges inherent to that role.
Prerequisites
- NURS 6370
- NURS 6321
- NURS 6331

NURS 6370 - Foundational Skills for Nurse Educators in Academic and Healthcare Environments

(5 cr.)
In this course, students develop basic skills that are used by Nursing Professional Development Practitioners and Academic Nurse Educators in practice and academic environments, respectively. Foundational theories of learning are covered as they are applied to the Nursing Professional Development Practitioner and Academic Nurse Educator roles. An overview of the educational design process is examined. Standards and competencies for Nursing Professional Development Practitioners, Academic Nurse Educators, and Academic Clinical Nurse Educators are explored as well as concepts of organizational alignment and leadership.
Prerequisites
MSN Nursing Education Specialization
- NURS 6002 or NURS 6003
- NURS 6050
- NURS 6051
- NURS 6052
- NURS 6053
Post-Master's Certificate in Nursing Education
- NURS 6002 or NURS 6003

NURS 6380 - Advanced Pathopharmacology and Advanced Health Assessment for Nurse Educators

(5 cr.)
Nurse educators must have advanced mastery of health assessment, and advanced knowledge of pathophysiology and drug therapy that relate to development of
educational strategies and nursing care of patient groups across the lifespan. This course builds on previous knowledge by integrating advanced concepts of pathophysiological processes, pharmacology, and health assessment skills as they apply to clinical reasoning for advanced nursing practice that lead to favorable patient care outcomes. Students apply the knowledge gained to specific real-world clinical cases for improvement of patient outcomes.

Prerequisites

- NURS 6002 or NURS 6003
- NURS 6050
- NURS 6051
- NURS 6052
- NURS 6053

NURS 6380TL - Advanced Pathopharmacology and Advanced Health Assessment [Tempo Learning®-Specific Course]

(5 cr.)
Nurse educators must have advanced mastery of health assessment, and advanced knowledge of pathophysiology and drug therapy that relate to development of educational strategies and nursing care of patient groups across the lifespan. This Area of Expertise builds on previous knowledge by integrating advanced concepts of pathophysiological processes, pharmacology, and health assessment skills as they apply to clinical reasoning for advanced nursing practice that lead to favorable patient care outcomes. Students apply the knowledge gained to specific real-world clinical cases for improvement of patient outcomes.

Note: This version of NURS 6380 is only available as part of specific competency-based Tempo Learning® programs.

NURS 6401 - Informatics in Nursing and Healthcare

(5 cr.)
Nursing informatics is a rapidly evolving discipline that impacts all areas of nursing practice. Students in this course establish foundational knowledge for understanding and practicing nursing informatics in healthcare settings. Students increase their awareness of the innovative ways the informatics discipline is helping transform healthcare policies and procedures by appraising the many roles of nurse informaticists. Students explore models and theories that support nursing informatics and examine the use of information technology in support of decisions that promote safety and quality in patient-centered care. They also differentiate concerns about information protection and system integrity. Using concepts learned in the course, students engage in assignments through which they focus on healthcare applications, thus acquiring necessary skills to improve the management of healthcare through nursing informatics practice.
Prerequisites

MSN Nursing Informatics Specialization

- NURS 6002 or NURS 6003
- NURS 6050
- NURS 6051
- NURS 6052
- NURS 6053

Post-Master's Certificate in Nursing Informatics

- NURS 6002 or NURS 6003

**NURS 6410 - Information and Knowledge Management**

*(4 sem. cr.)*

Healthcare professionals must have the knowledge and skills to make data-based decisions that lead to effective practice and improved patient care. Students in this course examine database systems as a foundation for studying concepts of data modeling, techniques of data definition, and data manipulation. They explore concepts of information and knowledge management with emphasis on application to the practice setting. Students discuss a variety of topics, such as information management in practice, data modeling, maximizing database performance, and human error in decision making, among others. They also engage in an integrative, collaborative project through which they investigate a current nursing or healthcare issue, plan and build a relational database to address the issue, and assess and provide feedback on plans presented by peers.

**NURS 6411 - Information and Knowledge Management**

*(5 cr.)*

Effectively managing healthcare data is essential to the practice of nursing informatics. In this course, students examine database systems, including database design and manipulation. Students also explore concepts of information and knowledge management in the healthcare practice setting. Course assignments provide students with the opportunity to work efficiently in teams and build essential skills to execute database design. Through this course, students examine nursing’s contributions to knowledge management in healthcare organizations.

*Note:* Microsoft Access 2010 is required for this course. Access is commonly furnished with Microsoft Office.

**NURS 6412 - Information and Knowledge Management**

*(5 cr.)*

Effectively managing healthcare data is essential to the practice of nursing informatics. In this course, students examine database systems including the concept of data modeling.
and techniques of data definition, data manipulation, and data analytics and visualization. Students explore concepts of information and knowledge management in the healthcare practice setting, including issues related to Big Data. Course assignments provide students with the opportunity to build essential skills to manage the lifecycle of data from how it is captured to how it is managed, stored, interpreted, and applied. Through this course, students have the opportunity to gain the skills needed to make informed decisions related to data management and the translation of data to improve patient care.

NURS 6420 - Supporting Workflow in Healthcare Systems

(4 sem. cr.)
Nurse informaticians must understand the flow of nursing work to develop information systems that provide effective support and usability. In this course, students examine the analysis, design, development, implementation, and evaluation of electronic information systems in healthcare. They compare, contrast, and critique methods of systems design and devote special attention to workflow modeling. They also engage in a variety of assignments to gain an understanding of the various workflow issues that impact the role of a nurse informatician, such as observing or interviewing healthcare professionals, developing a needs assessment plan, creating a model of a problematic workflow, and redesigning the workflow using a case approach.

NURS 6421 - Supporting Workflow in Healthcare Systems

(5 cr.)
Nurses are at the center of care coordination for patients, and informatics nurses are central to the design and development of information systems that support workflow in nursing practice. This course examines the analysis, design, development, and implementation of electronic information systems in health care. Students compare, contrast, and critique methods of system design. Course assignments focus on workflow modeling in systems design, including assessment of current-state workflow and design of future-state workflow. Through this course, students have the opportunity to apply workflow design best practices to support the implementation and optimization of electronic health records.

NURS 6430 - Project Management: Healthcare Information Technology

(4 sem. cr.)
The field of health informatics requires leaders who have the knowledge and skill to oversee all types of projects, from product or service conception through delivery to stakeholders; such knowledge requires an understanding of multiple core areas of management, such as scope, time, and quality management, among others. Students in this course explore the theory and practice of how to manage health information technology projects. Students learn how to plan, schedule, and control healthcare
informatics projects. They consider hypothetical scenarios and professional experiences as they discuss project management specifics, such as managing risk, controlling changes in scope, and handling budget issues. Students use project management software to build a project schedule, and they engage in an integrative team project scenario, including all the major elements and challenges of a healthcare informatics project in the real world.

NURS 6441 - Project Management: Healthcare Information Technology

(5 cr.)
Project management is the foundation of healthcare information technology and the implementation of electronic health records. In this course, students learn the foundational principles of health information technology project management and apply it to real-world experiences. Using project management software, students create a project management plan and schedule, and they control and close tasks related to a health informatics project. Through projects and applications, students build skills and confidence that support the implementation of healthcare information technology to improve the quality of care and patient outcomes.

NURS 6451 - Evaluation Methods for Health Information Technology

(5 cr.)
Healthcare policy, including the American Recovery and Reinvestment Act (2009) and Meaningful Use demand that electronic documentation systems are interoperable, integrated, and effective. In this course, students explore the history, process, and methodology in evaluation of healthcare informatics. Through discussion of real-world practice that includes public health and community-based settings, students evaluate the impact of the implementation of information technology throughout the organization. Students create a plan for systems evaluation. Through individual applications, they build skills and confidence that support collaborative, interdisciplinary system evaluation plans to improve the effectiveness of care.

NURS 6461 - Capstone Synthesis Practicum

(5 cr.)
Students in this course apply the Master of Science in Nursing (MSN) curriculum experience by translating knowledge into practice through participation in professional activities and the development of a culminating project. Students apply theory, principles, and concepts related to their area of specialization in order to enhance nursing practice and promote positive social change.
Prerequisites
- NURS 6401
- NURS 6412
- NURS 6421
- NURS 6441
NURS 6500 - Capstone Synthesis: Practicum I

(3 sem. cr.)
Students in the practicum are provided with the opportunity to engage in a supervised experience that integrates theory and research with practice. With guidance and support from their preceptor and instructor, students apply theory to better understand a specialization role in the context of an organization, formulate and achieve individualized learning objectives, and initiate a project conceptualized in collaboration with their preceptor in agreement with the instructor. The practicum (NURS 6500 and NURS 6510) requires a minimum of 125 total hours, which students record in their time log. Students also complete a cumulative journal in which they provide evidence-based or theory-based analyses of activities, issues, or problems that occur during their experience.

NURS 6501 - Advanced Pathophysiology

(5 cr.)
Advanced practice nurses must be equipped with an in-depth understanding of pathophysiological disease processes across the lifespan. In this course, students focus on understanding the bio-physiological processes, the deviations from these processes, and an in-depth examination of the scientific concepts related to the biology of disease processes. Advanced practice nursing students build on their knowledge of normal organ systems functioning to help organ systems return to optimal homeostasis. Through knowledge of pathophysiological disease processes, students synthesize the information needed to develop appropriate treatment plans for patients across the life span. Students explore a variety of topics regarding organ system diseases.

Prerequisites
MSN NP Specializations: Adult Gerontology Acute Care Nurse Practitioner, Adult Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, and Pediatric Nurse Practitioner Primary Care
- NURS 5050 or NURS 6050
- NURS 5051 or NURS 6051
- NURS 5052 or NURS 6052
- NURS 6053

Post-Master's Certificates in Adult Gerontology Acute Care Nurse Practitioner, Adult Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, and Psychiatric Mental Health Nurse Practitioner
- NURS 6002N or NURS 6003N

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
NURS 6510 - Capstone Synthesis: Practicum II

(3 sem. cr.)
This course is a continuation of students' practicum experience and coursework started in NURS 6500. Students bring closure to their work on real-world problems, which they developed with their preceptors earlier in their experience. They also evaluate and complete their practicum project and present it to their work site and in the online classroom. The practicum (NURS 6500 and NURS 6510) requires a minimum of 125 total hours, which students record in their time log. Students continue work on their cumulative journal, which provides evidence-based or theory-based analyses of activities, issues, or problems that occur during their experience.

NURS 6512 - Advanced Health Assessment and Diagnostic Reasoning♦

(5 cr.)
The physical and emotional well-being of patients and families can be complex and multifaceted. Advanced practice nurses need to have the knowledge and ability to provide safe, competent, and comprehensive physical health assessments. Students in this course focus on concepts and skills to assess patients across the lifespan. They learn to use diagnostic reasoning, advanced communication, and physical assessment skills to identify changes in health patterns. Students also will explore preventative health through risk evaluation of healthy individuals as a central theme of clinical practice in addition to the assessment of patients with acute and chronic health problems. The advanced skills of suturing, reading 12 Lead EKGs, and interpreting X-rays will be covered. Course assignments emphasize risk assessment, diagnostic reasoning, and evidence-based assessment across the lifespan.

Prerequisites
MSN NP Specializations: Adult Gerontology Acute Care Nurse Practitioner, Adult Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, and Pediatric Nurse Practitioner Primary Care
- NURS 5050 or NURS 6050
- NURS 5051 or NURS 6051
- NURS 5052 or NURS 6052
- NURS 6053

Post-Master's Certificates in Adult Gerontology Acute Care Nurse Practitioner, Adult Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, and Psychiatric Mental Health Nurse Practitioner
- NURS 6002N or NURS 6003N

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NURS 6521 - Advanced Pharmacology♦
A solid foundation in the concepts and principles of drug therapy across the lifespan is essential to the work of advanced practice nurses. This course applies the advanced principles of pharmacology, including pharmacogenomics, pharmacokinetics, and pharmacodynamics, by analysis of common drug classes prescribed by advanced practice nurses across the life span. Factors influencing successful therapy, such as effectiveness, safety, acceptability, cost, genetic/environmental influences, complementary regimens, and patient behaviors are considered. Through this course, students prepare to examine complex decisions in the management and treatment of selected acute and chronic diseases across the life span through pharmacologic and non-pharmacologic agents. Advanced practice nursing students will have a more in-depth understanding of drug legislation and regulation for prescribing drugs.

**Prerequisites**

MSN NP Specializations: Adult Gerontology Acute Care Nurse Practitioner, Adult Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, and Pediatric Nurse Practitioner Primary Care

- NURS 5050 or NURS 6050
- NURS 5051 or NURS 6051
- NURS 5052 or NURS 6052
- NURS 6053

Post-Master's Certificates in Adult Gerontology Acute Care Nurse Practitioner, Adult Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, and Psychiatric Mental Health Nurse Practitioner

- NURS 6002N or NURS 6003N

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**NURS 6531 - Advanced Practice Care of Adults Across the Lifespan**

(5 cr.)

In this course, students learn how nurse practitioners master the art and science of clinical decision making among adult populations across the lifespan. Students focus on the diagnosis and management of primary healthcare needs and problems of the adult, elderly, and frail elderly. They engage in a variety of course assignments that focus on physical and behavioral disease processes central to diagnosing illnesses as well as planning, implementing, and evaluating therapeutic treatment programs for acute illnesses commonly encountered in a primary healthcare setting. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to plan, implement, and evaluate therapeutic regimens for adult patients with common acute and chronic illnesses.

**NURS 6540 - Advanced Practice Care of Frail Elders**
The frail elderly are a subpopulation characterized by the decline in functional ability to meet the basic activities of daily living. In this course, students focus on the complex health care and management needs of the frail elderly by advanced nurse practitioners in community settings. Students learn to plan, implement, and evaluate therapeutic regimens through the analysis of case studies and the actual care of frail elderly in various settings. Additionally, students examine content related to end-of-life care and caregiver issues to gain the knowledge and sensibilities needed to implement positive change for the quality of life available to this vulnerable population.

NURS 6541 - Primary Care of Adolescents and Children

How can a nurse practitioner master the art and science of clinical decision making among pediatric populations? This course provides students with the opportunity to answer this question as they examine content related to the primary healthcare of children and adolescents while focusing on growth and development, health promotion, and common primary care health problems. Students learn how to identify, diagnose, and manage these problems. They also gain confidence in clinical experience in a primary healthcare setting that provides opportunities to assess, diagnose, plan, implement, and evaluate therapeutic regimens for acute and chronic illnesses commonly found in children and adolescents.

NURS 6550 - Advanced Practice Care of Adults in Acute Care Settings I

The complex assessment and care of patients in the hospital setting will require advanced practice nurses to obtain the specialized skills necessary to provide quality care for patients in these acute care settings. This course is designed to prepare students to provide care for acute, chronic, and critically ill patients. Students in this course will be introduced to the role of the advanced practice nurse, while gaining confidence in caring for patients. Through course assignments and clinical practice in the acute care setting, students will plan, implement, and evaluate care for patients. Students will also increase their knowledge of pharmacologic management of hospitalized patients, while applying knowledge gained through previous coursework.

NURS 6551 - Primary Care of Women

How can a nurse practitioner decide what is important to focus on in a 15–30 minute appointment with a woman seeking primary, prenatal, or postpartum care? Students in this course gain opportunities to teach and promote wellness in women through the process of screening for common gynecological disorders, normal pregnancy, and other common health conditions that impact women's health. Students learn to analyze data
to interpret results for the benefit of women seeking assistance with planning healthy lifestyle behaviors. They also gain clinical experience in a primary healthcare setting that provides opportunities to increase competence in diagnosis, treatment, referrals, or follow-up care with a concentration on improving patient outcomes.

NURS 6560 - Advanced Practice Care of Adults in Acute Care Settings II

(5 cr.)
Students in this course will advance their clinical competence in the care of medical and surgical patients in acute care settings. Through clinical practice, students will build confidence as they begin the transition from student to advanced practice nurse. Classroom activities and case studies will enable students to explore resources and support systems available to acutely ill adolescents, adults, and older adults. Clinical experiences in hospital settings will provide students with the continued opportunity to develop, implement, and evaluate treatment plans for patients with complex acute, critical, and chronic illness. The application of knowledge in the management of medical and surgical patients and the collaboration between the advanced practice nurse and the patient, family, and multidisciplinary healthcare team are emphasized.

NURS 6561 - Synthesis in Advanced Practice Care of Complex Patients in Primary Care Settings

(5 cr.)
Students in this synthesis course focus on clinical competence in primary care settings by building on knowledge and skills gained in previous courses. Through clinical practice, students build confidence as they begin the transition from the role of registered nurse to that of advanced practice nurse. Classroom activities and case studies enable students to explore the salient advanced practice nursing issues involved in the delivery of safe, competent, high-quality, cost-effective care of patients in a dynamic healthcare system. Through clinical experiences in primary care settings, students have the continued opportunity to develop, implement, and evaluate management plans for patients with complex health conditions. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6531
- NURS 6540 or NURS 6541
- NURS 6551
Note: This course requires a minimum of 144 practicum hours and must be the last course in the curriculum.

**NURS 6565 - Synthesis in Advanced Nursing Practice Care of Patients in Primary Care Settings**

(5 cr.)
Students in this synthesis course will focus on clinical competence in primary care settings by building on knowledge and skills gained in previous courses. Through clinical practice students will build confidence as they begin the transition from the role of registered nurse to advanced practice nurse. Classroom activities and case studies will enable students to explore the salient advanced practice nursing issues involved in the delivery of safe, competent, quality and cost-effective care of patients in a dynamic healthcare system. Clinical experiences in primary care settings will provide students with the continued opportunity to develop, implement, and evaluate management plans for patients with complex health conditions. The application of knowledge in the management of clients and collaboration between the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized.

**NURS 6600 - Capstone Synthesis Practicum**

(5 cr.)
Students in this course apply the MSN curriculum experience by translating knowledge into practice through participation in professional activities and the development of a culminating project. Students apply theory, principles, and concepts related to their area of specialization in order to enhance nursing practice and promote positive social change.

**NURS 6600TL - Capstone [Tempo Learning®-Specific Course]**

(5 cr.)
Students in this course apply the Master of Science in Nursing (MSN) curriculum experience by translating knowledge into practice through participation in professional activities and the development of a culminating project. Students apply theory, principles, and concepts related to their area of specialization in order to enhance nursing practice and promote positive social change.

Note: This version of NURS 6600 is only available as part of specific competency-based Tempo Learning® programs.

**NURS 6630 - Psychopharmacologic Approaches to Treatment of Psychopathology**

(5 cr.)
At times, psychotherapy is not enough to alleviate the emotional difficulties that some
patients face. To that end, psychopharmacologic approaches are needed. Psychiatric nurse practitioners (PNPs) must have a strong basis in psychopharmacology, extending from a prior education in pharmacology, to make appropriate medication choices for their patients. Learners in this course consider psychopharmacologic approaches to major behavioral health disorders including but not limited to major depressive disorders, bipolar disorder, anxiety disorders, as well as psychotic disorders. Learners explore key considerations associated with medication selection, monitoring efficacy, and long-term management.

Prerequisites

- NURS 6501N
- NURS 6521N
- NURS 6512N

**NURS 6640 - Psychotherapy With Individuals**

(5 cr.: 3 cr. didactic, 2 cr. practicum)
Psychotherapy involves giving more than "good advice." In order for the psychiatric mental health nurse practitioner (PMHNP) to be effective, deliberate approaches to therapy must be consistent with evidence-based practices. Learners in this course examine a variety of therapeutic techniques that can be used during psychotherapy sessions with individuals across the lifespan. Emphasis is placed on evidence-based applications of various therapeutic approaches for a wide range of psychiatric issues. Practicum experiences focus on psychotherapeutic approaches with individuals.

**NURS 6650 - Psychotherapy With Groups and Families**

(5 cr.: 3 cr. didactic, 2 cr. practicum)
This course emphasizes the concept of treatment of groups and families. Group and family dynamics and benefits associated with group and family therapy are also emphasized along with introducing the learner to techniques that can be used in group and family therapy settings. Practicum experiences focus on the treatment of the family unit as well as the provision of group psychotherapy. Managed care has ushered in a new era of effective mental health services. To that end, the psychiatric mental health nurse practitioner must know how to optimize not only his or her time, but also the treatment benefits associated with family and group therapy.

**NURS 6660 - Psychiatric Mental Health Nurse Practitioner Role I: Child and Adolescent**

(5 cr.: 3 cr. didactic, 2 cr. practicum)
Working from a lifespan approach, this course introduces child and adolescent psychiatry. Emphasis is placed on the psychiatric and/or mental health disorders that begin in childhood and adolescence. Topics include psychiatric assessment; differential
diagnosis; and application of diagnostic criteria, appropriate diagnostic testing, and diagnostic formulation. The learner will select a combination of psychotherapeutic modalities coupled with psychopharmacologic approaches to treat common psychiatric mental health conditions of children and adolescents. The focus of the practicum experience is on application of didactic concepts to actual patient care situations. Legal and ethical considerations for working with children and adolescents will be addressed.

**NURS 6670 - Psychiatric Mental Health Nurse Practitioner Role II: Adults and Older Adults**

(5 cr.: 3 cr. didactic, 2 cr. practicum)
Continuing from the lifespan approach, the learner in this final course for the psychiatric mental health nurse practitioner (PMHNP) focuses on psychiatric mental health issues that occur in adults and older adults. Selection of assessment approaches for the adult and older adult as well as differential diagnosis, application of diagnostic criteria, appropriate diagnostic testing, and diagnostic case formulation will be undertaken. The learner will use both psychotherapeutic approaches coupled with psychopharmacologic approaches to treat common psychiatric mental health conditions of adults and older adults. Through these practicum experiences, learners will focus on the application of didactic concepts to patient care situations.

**NURS 6700 - Epidemiology and Population Health**

(5 cr.)
Advanced practice nurses frequently apply epidemiologic concepts to inform evidence-based practice. Students in this course are provided with an overview of epidemiologic methods in the study of the distribution and etiology of disease and health-related conditions in human populations. Students examine select population health issues such as chronic and infectious diseases and effects of disasters and emergencies. Throughout this course, students gain a deeper understanding of the various research designs and methodologies professionals use in epidemiologic research and their relevance to population-based nursing practice. Consideration is given to study designs, primary and secondary data sources, epidemiologic measures, sources of error, and ethical issues relevant to research. Students apply epidemiologic methods to the development of a program proposal for a population health issue.

**Prerequisites**
- NURS 6002 or NURS 6003
- PUBH 6127
- NURS 6051
- NURS 6052
- NURS 6053

**NURS 6710 - Public Health Nursing Theory and Practice**
Public health nursing is shaped by social, behavioral, cultural, and demographic factors that impact health care at multiple levels. In this course, students will develop an understanding of the history of public health and public health nursing, public health law and ethics, system infrastructure, and issues related to health equity and health disparities. Students will analyze theories and research that will assist them to understand the social determinants of health and develop models to assess and deliver health care to populations to promote a culture of health.

Prerequisites
- All core courses

NURS 6720 - Population-Based Public Health Nursing Interventions

(5 cr.: 2 cr. didactic, 3 cr. practicum)
In this course students will continue to develop specialized knowledge and skills in advanced public health nursing (PHN) and the delivery of population health care within the context of inter-professional practice. Students will gain a greater understanding of the use of data in planning interventions, evidence-based public health, and the role of advocacy for policy and social change. The focus of the course will be on the assessment and development of culturally-competent interventions targeted at community and population levels through a practicum experience.

Prerequisites
- NURS 6710
- PUBH 6034
- NURS 8310

NURS 6730 - Public Health Nursing Leadership

(5 cr.: 3 cr. didactic, 2 cr. practicum)
The development of leadership strategies that supports the public health care system delivery of population health is imperative to quality outcomes. This course addresses the application of principles of leadership and management in a public health setting. And the skills needed for nurses to provide effective leadership across agency partnerships at the community, state, national, and international levels. A special focus will be placed on developing collaborative partnerships, systems thinking, evidence-based decision-making, organizational problem-solving, public health finance, professional accreditation, emergency preparedness, and global health competencies. Students will complete a practicum with a public health-related agency focused on program evaluation and the use of management and leadership skills.

Prerequisites
- NURS 6720
- PUBH 6475
NURS 6800 - Advanced Pediatric Development and Behavior

(5 cr.)
This introductory course, designed for pediatric advanced practice nurses, introduces students to pediatric development and behavior. The course focuses on developmental and behavioral milestones, family systems, parenting styles, screening, surveillance, and assessment of infants, children, and adolescents. Management strategies, referral options as well as legal, ethical, and policy issues are discussed for children with normal development and behavior. The course also focuses on strategies for promoting wellness through anticipatory guidance of the child and family at each stage of development.

NURS 8000 - Foundations and Essentials of Doctoral Study in Nursing

(1 cr.)
Students in this course are introduced to Walden University and are provided with a foundation for professional development in doctoral nursing practice. Students learn professional standards and end-of-program expectations, and they explore the role of the scholar-practitioner as one who effects positive social change. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the requirements for successful participation in an online curriculum. Students also explore the essentials of being a Walden doctoral student, relevant professional and specialty standards of doctoral-level nursing, intra- and interprofessional collaboration, and the process of the DNP scholarly project.

NURS 8001 - Foundations and Essentials of Doctoral Study in Nursing

(1 cr.)
Students in this course are introduced to Walden University and are provided with a foundation for professional development in doctoral nursing practice. Students learn professional standards and end-of-program expectations, and they explore the role of the scholar-practitioner as one who effects positive social change. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the requirements for successful participation in an online curriculum. Students also explore the essentials of being a Walden doctoral student, relevant professional and specialty standards of doctoral-level nursing, intra- and interprofessional collaboration, and the process of the PhD dissertation.

NURS 8002 - Foundations and Essentials for the Doctor of Nursing Practice

(5 cr.)
Students in this course are introduced to Walden University and are provided with a
foundation for academic and professional development in the DNP program. Students apply professional standards and explore the role of the doctorally prepared nurse as one who effects positive social change. They engage in course assessments focused on the practical application of scholarly writing, critical-thinking skills, and the requirements for successful participation in an online curriculum. Students also explore the essentials of being a Walden doctoral student, relevant professional and specialty standards of doctoral-level nursing practice, intra- and interprofessional collaboration, and the process of the DNP Doctoral Project.

**NURS 8003 - Foundations and Essentials in Nursing**

(1 cr.) Students in this course are introduced to Walden University and are provided with a foundation for professional development as a PhD scholar practitioner. Students learn professional standards and end-of-program expectations and explore the role of the scholar-practitioner as one who effects positive social change. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, research, and the requirements for successful participation in an online curriculum. Students also explore the essentials of being a Walden doctoral student, relevant professional and specialty standards of doctoral-level nursing, intra- and interprofessional collaboration, and the process of the PhD dissertation.

**NURS 8006 - Foundations and Essentials for the Doctor of Nursing Practice**

(5 cr.) Students in this course are introduced to Walden University and are provided with a foundation for academic and professional development in the DNP program. Students apply professional standards and explore the role of the doctorally prepared nurse as one who effects positive social change. They engage in course assessments focused on the practical application of scholarly writing, critical-thinking skills, and the requirements for successful participation in an online curriculum. Students also explore the essentials of being a Walden doctoral student, relevant professional and specialty standards of doctoral-level nursing practice, intra- and interprofessional collaboration, and the process of the DNP Doctoral Project.

**NURS 8100 - Healthcare Policy and Advocacy**

(5 cr.) In this course, students examine economic, financial, and political factors influencing the delivery of healthcare, and consider policy reform through legal, regulatory, ethical, societal, and organizational contexts. They examine the political and policy process, including agenda setting, stakeholder analysis, and application of policy analysis frameworks. Students also explore the importance of interprofessional collaboration in improving health outcomes through the policy process and advocacy for development
and implementation of nursing and healthcare policies in organizations at the local, state, national, and international levels. Students engage in written analyses through which they develop new policies and/or critically evaluate existing policies through policy analysis frameworks.

Prerequisites

Doctor of Nursing Practice (DNP)
- NURS 8002 or NURS 8002A or NURS 8002C or NURS 8002F or NURS 8002S or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S

All Other Programs
- NURS 8000 or NURS 8000A or NURS 8000C or NURS 8000F or NURS 8000S

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NURS 8110 - Theoretical and Scientific Foundations for Nursing

(5 cr.)
In this course, students focus on the integration of scientific, philosophical, and theoretical concepts as the basis for the highest level of nursing practice. They examine the scientific underpinnings for nursing practice, including biobehavioral, pathophysiological, psychosocial, and environmental sciences, and they explore the interrelationship among knowledge, research, and practice. Students also explore and discuss clinical inquiry, ethical issues, and models of evidence-based practice.
Considering various philosophies, students describe their own philosophy of nursing. They also apply course concepts to a variety of practical assignments, including a literature review, concept map, and evaluation of current clinical practice problems, among others.

Prerequisites

Doctor of Nursing Practice (DNP)
- NURS 8000 or NURS 8000A or NURS 8000C or NURS 8000F or NURS 8000S

PhD in Nursing
- NURS 800IN

NURS 8112 - Theoretical and Scientific Foundations of Nursing Research

(5 cr.)
In this course, students focus on the integration of scientific, philosophical, and theoretical concepts as the basis for the highest level of nursing practice. They examine the scientific underpinnings for nursing knowledge development, including major theoretical frameworks and the interrelated concepts that inform nursing knowledge, research, and practice. Students explore scientific inquiry and ethical issues related to
research. Considering various philosophical worldviews, students describe their own philosophy of nursing and research. They apply course concepts to a variety of assignments designed to prepare for their dissertation research.

**NURS 8114 - Theoretical and Scientific Foundations of Nursing**

(5 cr.)

In this course, students focus on the integration of scientific, philosophical, and theoretical concepts as the basis for the highest level of nursing practice. They examine the scientific underpinnings for nursing practice, including middle range nursing and interdisciplinary theories and they explore the interrelationship among knowledge, research, and practice. Students also explore clinical inquiry, models of evidence-based practice, implementation science, and translation of evidence for practice change and quality improvement. Students develop their own philosophy of nursing practice.

**Prerequisites**

Doctor of Nursing Practice (DNP)

Prerequisite may be taken concurrently.

- NURS 8002 or NURS 8002A or NURS 8002C or NURS 8002F or NURS 8002S or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S

**NURS 8200 - Methods for Evidence-Based Practice**

(5 cr.)

Students in this course focus on the integration of scientific, philosophical, and theoretical concepts as the basis for the highest level of nursing practice. The scientific underpinnings for nursing practice including biobehavioral, pathophysiological, psychosocial, and environmental sciences are examined. The interrelationship among knowledge, research, and practice is explored. Clinical inquiry, ethical issues, and models of evidence-based practice are presented.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**NURS 8201 - Research for Evidence Based Practice**

(5 cr.)

The focus of this course is to integrate and extend the Doctor of Nursing Practice student’s skills and knowledge of research methods to read, interpret, and evaluate research studies using qualitative and quantitative methods for nursing and the other healthcare professions. Essential topics include overview of research concepts and the research process; quantitative, qualitative, and mixed methods research methods and designs, including data collection, data analysis, and interpretation techniques; ethical
issues in research; and utilizing research findings to guide practice. Basic statistics will be reviewed, including the appropriate use of various statistics, underlying assumptions of the procedures, and the interpretation of results generated from statistical software.

**Prerequisites**
- NURS 8002 or NURS 8002A or NURS 8002C or NURS 8002F or NURS 8002S or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S

**NURS 8210 - Transforming Nursing and Healthcare Through Technology**

(5 cr.)
When used effectively, information technology can support generation of new knowledge and emerging information technologies. In this course, students examine the critical appraisal and use of information technology in advanced nursing practice. Students work to gain the skills and knowledge needed to research, develop, process, integrate, and manage data, communication and information systems, and programs through technology resources in consumer, clinical, and public health settings. Students engage in a variety of discussions and assignments designed to provide practical application of content on topics including retrieval and critical analysis of digital data and emerging technology to support healthcare quality improvement; electronic health records integration and evaluation; and web-based learning and intervention tools to support and improve patient care. They also explore ethical, regulatory, and legal issues as well as the healthcare standards and principles for selecting and evaluating information systems and patient care technology that effects positive social change. They engage in course assessments focused on the practical application of scholarly writing, critical-thinking skills, and the requirements for successful participation in an online curriculum. Students also explore the essentials of being a Walden doctoral student, relevant professional and specialty standards of doctoral-level nursing practice, intra- and interprofessional collaboration, and the process of the DNP Doctoral Project/dissertation.

**Prerequisites**
- Doctor of Nursing Practice (DNP)
  - NURS 8002 or NURS 8002A or NURS 8002C or NURS 8002F or NURS 8002S or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S
- PhD in Nursing
  - NURS 8110N or NURS 8003

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**NURS 8250 - Advanced Theoretical and Scientific Perspectives in Nursing**
Students in this course focus on the sufficient formal and informal learning experiences to build scientific depth in an identified area of study. Students gain the competencies to critique, utilize, and integrate different theoretical and scientific perspectives for the conduct of research, including team science, to generate new ideas based on a critical evaluation of existing knowledge. Attention is given to integration of the components of scholarship, research, teaching, mentoring, and service to the profession gained from understanding the theoretical/scientific underpinnings of nursing and other disciplines.

**Prerequisites**
- RSCH 8110N

---

**NURS 8300 - Organizational and Systems Leadership for Quality Improvement**

(5 cr.)
The focus of this course is on the development of leadership strategies and competencies to support healthcare and organizational quality delivery of care. Emphasis is placed on a systems approach exploring the organizational structures, which impact healthcare quality performance and, ultimately, patient outcomes. Using macro (enterprise-wide) and micro (individual and team performance) perspectives, students examine the leadership roles, which define, develop, and support decisions effecting quality strategies. In this course, students address how key organizational theories, principles, and concepts relate to achieving the effective and efficient delivery of safe healthcare services. Through the development of a quality program initiative, students demonstrate an understanding of the impact an initiative has on organizational structure, its environment, and the system’s leadership.

**NURS 8301 - Leading Organizations for Quality Improvement Initiatives**

(5 cr.)
The focus of this course is the development of leadership competencies and strategies to support organizational and systems leadership for continuous improvement in health outcomes and the delivery of quality care. Emphasis will be on understanding the challenges and complexity in the healthcare system and the development of skills and knowledge to lead, manage, evaluate, and innovate to transforms the healthcare environment. Essential topics include leadership for change and transformation, quality improvement tools and methods, safety principles, and project management.

**NURS 8302 - Leading Organizations for Quality Improvement Initiatives**

(5 cr.)
The focus of this course is the development of leadership competencies and strategies to support organizational and systems leadership for continuous improvement in health outcomes and the delivery of quality care. Emphasis is on understanding the challenges...
and complexity in the healthcare system and the development of skills and knowledge to lead, manage, evaluate, and innovate to transform the healthcare environment. Essential topics include leadership for change and transformation, quality improvement tools and methods, safety principles, and project management.

Prerequisites
- NURS 8002 or NURS 8002A or NURS 8002C or NURS 8002F or NURS 8002S or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S
- NURS 8114 or NURS 8114A or NURS 8114C or NURS 8114F or NURS 8114S

NURS 8310 - Epidemiology and Population Health

(5 cr.)
Advanced practice nurses frequently apply epidemiologic concepts to inform evidence-based practice. Students in this course are provided with an overview of epidemiologic methods in the study of the distribution and etiology of disease and health-related conditions in human populations. Students examine select population health issues such as chronic and infectious diseases and effects of disasters and emergencies. Throughout this course, students gain a deeper understanding of the various research designs and methodologies professionals use in epidemiologic research and their relevance to population-based nursing practice. Consideration is given to study designs, primary and secondary data sources, epidemiologic measures, sources of error, and ethical issues relevant to research. Students apply epidemiologic methods to the development of a program proposal for a population health issue.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NURS 8400 - Evidence-Based Practice I: Assessment and Design

(5 cr.)
In this course, students focus on the competencies required of the healthcare professional in planning for the design, development, implementation, and evaluation of health promotion and disease prevention initiatives. They explore and discuss strategic approaches to planning, implementation, and evaluation, including cost-benefit analysis. Note: This is a 5-cr. course (4 didactic cr., 1 clinical cr.). Clinical hours have a 1:6 ratio (credit/clinical), resulting in 72 clinical hours.

NURS 8410 - Best Practices in Nursing Specialties

(5 cr.)
A scholarly inquiry of key concepts in nursing is presented in this course. Students analyze best practices and evolving issues in their nursing areas of practice. They explore advanced specialty practice problems through a guided initial review of literature.
Students develop a program or project to address clinical/practice questions under the guidance of an approved clinical mentor. Students generate an evidence-based practice question and develop and implement an intervention within the practicum setting. Students disseminate the project plan and results at the practicum site. 

Note: This is a 5-cr. course (4 didactic cr., 1 clinical cr.). Clinical hours have a 1:6 ratio (credit/clinical), resulting in 72 clinical hours.

**NURS 8500 - Evidence-Based Practice II: Planning and Implementation**

(3 cr.)

In this DNP practicum course, students focus on planning and implementing an evidence-based practice program/project designed to address their clinical/practice questions; students complete work under the guidance of an approved practicum mentor. Students generate practicum journals and discussion content that drill down to the evidence-based change project related to their clinical/practice question and resulting findings, conclusions, and recommendations.

**Prerequisites**

- NURS 8110 or NURS 8110A or NURS 8110C or NURS 8110F or NURS 8110S
- NURS 8200 or NURS 8200A or NURS 8200C or NURS 8200F or NURS 8200S
- NURS 8210 or NURS 8210A or NURS 8210C or NURS 8210F or NURS 8210S
- NURS 8300 or NURS 8300A or NURS 8300C or NURS 8300F or NURS 8300S

Note: This 3-cr. practicum course has a 1:6 ratio of credit to clinical hours, resulting in 216 clinical hours.

**NURS 8502 - Evidence Based Practice I**

(5 cr.)

The purpose of this course is to provide the student with opportunities to create individualized objectives based on the American Association of Colleges of Nursing DNP Essentials to develop leadership skills and competencies in their specific areas of interest. Students work with an approved practicum mentor to generate practicum evidence and complete practicum journal requirements. Students complete a self-evaluation and reflect on their personal growth.

**Prerequisites**

- NURS 8002 or NURS 8002A or NURS 8002C or NURS 8002F or NURS 8002S or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S
- NURS 8114 or NURS 8114A or NURS 8114C or NURS 8114F or NURS 8114S
- NURS 8201 or NURS 8201A or NURS 8201C or NURS 8201F or NURS 8201S
- NURS 8302 or NURS 8302A or NURS 8302C or NURS 8302F or NURS 8302K or NURS 8302M or NURS 8302S or NURS 8302W
Note: These 2 credits of practicum hours have a 1:80 ratio of credit to practicum hours, resulting in 160 practicum hours.

**NURS 8503 - Evidence Based Practice II**

(5 cr.)
In this DNP practicum course, students will create individualized objectives to continue completing the gap in practice activities identified in NURS 8502. Students will implement gap in practice activities, monitor, measure, evaluate outcomes, and disseminate results back to the organization. The course will focus on the continuation of the evidence-based practice problem identified in NURS 8502. Students will complete work under the guidance of an approved clinical mentor. Students will generate a practicum portfolio that drills down to the evidence regarding their clinical/administrative question and resulting findings, conclusions, and recommendations. Students complete the practicum journal requirements throughout the course. Students will complete a self-evaluation and reflect on their personal growth in their specific area of interest.

**Prerequisites**
- NURS 8502

Note: This 2-credit practicum course has a 1:80 ratio of credit to practicum hours, resulting in 160 practicum hours.

**NURS 8504 - Evidence Based Practice for the Executive Leader I**

(5 cr.)
The purpose of this course is to provide the student with opportunities to create individualized objectives based on the American Association of Colleges of Nursing DNP Essentials to develop leadership skills and competencies in their specific areas of interest. Students work with an approved practicum mentor to generate practicum evidence and complete practicum journal requirements. Students will complete a self-evaluation and reflect on their personal growth.

**Prerequisites**
- NURS 8002 or NURS 8002A or NURS 8002C or NURS 8002F or NURS 8002S or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S
- NURS 8114 or NURS 8114A or NURS 8114C or NURS 8114F or NURS 8114S
- NURS 8201 or NURS 8201A or NURS 8201C or NURS 8201F or NURS 8201S
- NURS 8302 or NURS 8302A or NURS 8302C or NURS 8302F or NURS 8302K or NURS 8302M or NURS 8302S or NURS 8302W
Note: These 2 credits of practicum hours have a 1:80 ratio of credit to practicum hours, resulting in 160 practicum hours.

NURS 8505 - Evidence Based Practice for the Executive Leader II

(5 cr.)
In this DNP practicum course, students will create individualized objectives to continue completing the gap in practice activities identified in NURS 8502. Students will implement gap in practice activities, monitor, measure, evaluate outcomes, and disseminate results back to the organization. The course will focus on the continuation of the evidence-based practice problem identified in NURS 8502. Students will complete work under the guidance of an approved clinical mentor. Students will generate a practicum portfolio that drills down to the evidence regarding their clinical/administrative question and resulting findings, conclusions, and recommendations. Students complete the practicum journal requirements throughout the course. Students will complete a self-evaluation and reflect on their personal growth in their specific area of interest.
Prerequisites
- NURS 8504

Note: This 3-credit practicum course has a 1:80 ratio of credit to practicum hours, resulting in 160 practicum hours.

NURS 8510 - Evidence-Based Practice III: Implementation, Evaluation, and Dissemination

(3 cr.)
The focus of this DNP practicum course is on the evaluation of an evidence-based health project relevant to aggregate, systems, or organizational levels of healthcare. In addition, students develop and plan for the dissemination of a scholarly product generated by that project to a wider community of scholar-practitioners. Students work with an approved practicum mentor to generate practicum evidence and complete practicum journal requirements, and the evidence-based project, demonstrating the use of leadership skills and advanced nursing practice knowledge to promote quality improvement, improve health outcomes, and inform healthcare policy. Students in the DNP practicum course are provided with the opportunity to reflect on self-evaluation, professional growth, and postgraduation plans.
Prerequisites
- NURS 8500 or NURS 8500A or NURS 8500C or NURS 8500F or NURS 8500K or NURS 8500M or NURS 8500S

Note: This 3-credit practicum course has a 1:6 ratio of credit to practicum hours, resulting in 216 practicum hours.
NURS 8540 - Academic Nursing Faculty Role Development

(5 cr.)
This course will build skills in the transition to doctoral level faculty roles. Students can gain competencies in identifying future career trajectories, scholarly interests, and collaboration skills to contribute to new knowledge development, dissemination, and implementation of evidence in one’s field. Integrating multiple trends in nursing and team science, the role of a progressively developed professor will be discussed, critiqued, and synthesized. Students will use self-awareness and reflection to prepare an individual development plan (IDP) that leads to success in exemplary teaching methods, mentorship, scholarship, service, and lifelong learning. Readings and guided discussions provide a lens to view trends and emerging interest areas to guide students' preparation of an IDP and scholarly interest concept analysis.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NURS 8542 - Curriculum Change: Applying Research Strategies to Prepare Tomorrow's Nursing Education Programs

(5 cr.)
Curricula and courses have enduring frameworks, yet the content and processes for teaching nursing require continuous change as technology innovates and the science of disease management and prevention evolves. In this course, students prepare for their work as curriculum change leaders and advocates to ensure nursing education meets the requirements and challenges of today’s and tomorrow’s healthcare needs. Course content and activities apply research processes and strategies that PhD students have mastered in previous courses for their dissertation work. Students begin by examining core competencies for nurse educators and evaluating their individual capacity in competencies with particular relevance to curriculum change leadership. They develop a theoretical framework for curriculum change; complete a literature review on a recommended national goal for transforming nursing education; explore trends with implications for nursing curriculum and educators; promote interprofessional collaboration by writing an article for publication; and create a concept map as a visual representation of the evaluation process, including as a catalyst for curriculum change. Through weekly Discussions and Blogs, students replicate the collaboration and debate between nursing faculty and demonstrate their potential as nurse educators to be agents of positive social change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NURS 8544 - Strategies for Teaching Innovations in Nursing Education
In this course, students will critically analyze nursing education teaching and learning theories, teaching strategies in classroom and clinical settings, in face-to-face and online environments, and how these strategies relate to the learning and development of desired outcomes in nursing education. Students will also apply the research process to analyze cultural competence for their professional role and how to address the needs of diverse learners to foster intercultural learning in a variety of educational settings. Students' primary Assignment will involve designing of a BSN-level nursing course.

Prerequisites
- NURS 8003 or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S
- NURS 8112
- NURS 8250N

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NURS 8546 - Strategies for Innovation in Nursing Education

In this course, students will explore the technical landscape of modern nursing practice, the factors impacting the push to integrate informatics competencies as foundational practice concepts, and how to best function in the domain where technology education and traditional nursing education form partnerships for instruction. Students will investigate emerging technologies and care models that may impact their general approach to education, as well as the role of technology in those models. Upon successful completion of the course, students will possess the proficiencies and professional dispositions required to educate—and meet the global demand for—technology-savvy nurses from the start of nursing school through their evolution to an expert-level clinician.

Prerequisites
- NURS 8003
- NURS 8112
- NURS 8250N

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

NURS 8551 - Preparing for Dissertation

The focus of this course is on the preparation for the dissertation phase of training. In this course, students identify a dissertation topic and potential dissertation committee
members; begin to conduct a literature review; develop a problem statement and research questions; and evaluate research designs, methods, and types of analyses to use for their dissertation. Students also complete their initial premise in this course and an annotated outline of their prospectus.

**Prerequisites**
- RSCH 8310N

**NURS 8601 - DNP Field Experience**

(1 cr.)
The purpose of this course is to provide students with the opportunity to complete additional practicum hours to fulfill the 1,000-hour requirement of the DNP. Students may take the DNP Field Experience course up to six times based on practicum hours attained prior to DNP admission. Students generate practicum portfolio evidence.

**Prerequisites**
- NURS 8002 or NURS 8002A or NURS 8002C or NURS 8002F or NURS 8002S or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S

**Note:** This 1-credit practicum course has a 1:80 ratio of credit to practicum hours, resulting in 80 practicum hours.

**NURS 8700 - DNP Project Mentoring**

(0 cr.)
The purpose of this course is to serve as a platform for ongoing communication between students and their DNP Project Committee chairs and a repository for drafts and documentation related to the DNP project. Students will be assigned to sections of NURS 8700 based on their DNP Project Committee chair, which will support communication between students who are working on their DNP projects with common faculty chairs in an ongoing collaborative learning community.

**NURS 8701 - DNP Project Completion**

(3 cr. per term as needed to complete the DNP Project.)
The purpose of this course is to serve as a platform for ongoing communication between students and their DNP Project Committee chairs and a repository for drafts and documentation related to the DNP project. Students will be assigned to sections of NURS 8701 based on their DNP Project Committee chair, which will support communication between students who are working on their DNP projects with common faculty chairs in an ongoing collaborative learning community.
Students take this course for a minimum of four quarters and are continuously enrolled until completion of their doctoral project with final chief academic officer (CAO) approval.

To complete a doctoral project, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral project on ProQuest before their degree is conferred.

**NURS 8702 - DNP Project Mentoring**

(0 cr.)
The purpose of this course is to serve as a platform for ongoing development, mentoring, and communication between students and their faculty advisor for the DNP Project. This course supports the required approval process for the DNP Project, including serving as a repository for drafts and final, approved documentation related to the DNP Project. Students will be assigned to sections of NURS 8702 with their faculty advisor. The student and faculty advisor will establish an ongoing, collaborative learning community that will support development and communication for the completion of the DNP Project.

**Prerequisites**
- NURS 8002/8006
- NURS 8114
- NURS 8201
- NURS 8302

**NURS 8703 - DNP Project Completion**

(3 cr. per term as needed to complete the DNP Project)
This course is designed for the student to complete their DNP project. The final DNP project demonstrates students’ ability to integrate knowledge into practice and to demonstrate the competencies of the AACN DNP Essentials. Students will demonstrate organizational/systems leadership, translation of evidence, and quality improvement processes of a change impacting health outcomes. Projects will follow the project management process and include components of planning, implementation, evaluation, and dissemination. Students complete the DNP project independently, with the guidance of a faculty advisor and an organization mentor. The order and format of the steps of the DNP project are outlined in the DNP Project Process Guide.

**Prerequisites**
- NURS 8002 or NURS 8002A or NURS 8002C or NURS 8002F or NURS 8002S or NURS 8006 or NURS 8006A or NURS 8006C or NURS 8006F or NURS 8006S
- NURS 8100 or NURS 8100A or NURS 8100C or NURS 8100F or NURS 8100S
- NURS 8114
- NURS 8201
- NURS 8210
- NURS 8302
- NURS 8310 or NURS 8502 or NURS 8503 or NURS 8504 or NURS 8505

Note: Students are automatically enrolled in this course each term while completing the DNP project after they have completed all other course requirements for the DNP program of study.

**NURS 8710 - Doctoral Seminar I**

(1 cr.)
Seminar I gets students prepared for the dissertation process. Students are introduced to the Doctoral Degree Coach, helpful dissertation resources, time management strategies, and potential topics relevant to their field of study. Students also examine exemplar dissertations to better understand the journey they will be undertaking.

**NURS 8720 - Doctoral Seminar II**

(1 cr.)
Seminar II represents the preboarding phase of the journey. Students learn how to use the library, develop doctoral-level writing strategies, and write a literature review. Students also examine how social problems drive scientific inquiry.

**NURS 8730 - Doctoral Seminar III**

(1 cr.)
Seminar III has students take off into developing critical elements of a scientific study. Students distinguish the characteristics of strong quantitative and qualitative research questions and evaluate conceptual and theoretical frameworks with respect to their alignment with a study. Students will engage in an iterative process of developing research questions through peer review and feedback.

**NURS 8740 - Doctoral Seminar IV**

(1 cr.)
Seminar IV has students fly toward completing their prospectus by developing methods appropriate to answer a research question as well as explain the nature and significance of a scientific study. Students evaluate how to align various elements of a scientific study and ensure ethical concerns are addressed. Students end this course with a solid draft of their prospectus.
**NURS 8750 - Doctoral Seminar V**

(1 cr.)
Seminar V culminates the student's journey towards developing a prospectus. This course focuses on completing the Prospectus Form. Students deliver an asynchronous oral and visual presentation of their proposed doctoral study and get feedback from peers and the instructor.

**NURS 8800 - Doctor of Nursing Practice Coaching**

(1 cr.)
[Under development]

**NURS 9000 - Dissertation**

(5 cr. per term for a minimum of 4 quarters until completion)
In this course, doctoral students have the opportunity to integrate their program of study into an in-depth exploration of an interest area that includes the completion of a research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation.
Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**Prerequisites**
- RESI 8403N

**PBHL 8002 - Foundations of Graduate Study**

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals, and they develop a program of study, a professional development plan, and strategies for online success. Students also explore resources used throughout the program, such as
the online Walden University Library. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

**PBHL 8005 - Business Concepts for Organizational Development Professionals**

(5 cr.)
Organizational success depends on many aspects, such as human and market factors. In this course, students explore these factors as well as the language of work, business, and management structures and processes. They also examine related topics, such as finance, marketing, accounting, strategic planning, organizational design, and quality and process improvement. Students apply concepts and theories to case study scenarios and real-life situations. They also demonstrate their knowledge through a health audit of an actual organization, for which they provide a synopsis of a variety of organization aspects, such as ethical and legal issues, organizational architecture, group relations, human factors, and accounting and financial factors, among others.

**PBHL 8012 - Behavioral Health Management**

(5 cr.)
Management in modern healthcare organizations has become increasingly more complex and challenging. Leaders in behavioral healthcare management can expect their roles and responsibilities to be multifaceted. In this course, students will explore the commonalities and differences between healthcare management in general and behavioral healthcare in particular. They will also consider what it means to be an effective leader and an effective manager and how to apply theories of leadership to the behavioral healthcare setting. Additionally, the range of management roles and functions will be identified and applied to a behavioral healthcare setting.

**PBHL 8050 - Global Health and Issues in Disease Prevention**

(5 cr.)
An in-depth review of how population-based strategies are used in the prevention of disease and disability is provided to students in this course. Students explore the topics of population health and disease prevention from the perspective of understanding the determinants of health. Using a cross-disciplinary approach, students examine how economics, social factors, health policy, urbanization, globalization, the environment, and other factors influence disease. Students consider how research in disease prevention, health determinants, and population health applies to public and community health efforts.

**PBHL 8130 - Communications and Social Marketing Strategies for Public Health Leaders**
This course provides to students an overview of communication and social marketing strategies as they relate to public health, highlighting theoretical concepts that are commonly used in health communications and research. Topics include using communication theory, social marketing techniques, promoting health literacy, developing community partnerships, and creating culturally sensitive and appropriate promotional materials. Students focus on developing, implementing, and evaluating an abbreviated Public Health Communication Campaign by applying basic social marketing principles, such as the use of social media techniques, to identify and advance public health interests and address public health problems. Through their Public Health Communication Campaign, which is this course’s Scholar-Practitioner Project, students examine how they can use marketing and communication practices to translate health research into social action and behavioral change.

**PBHL 8200 - Behavioral Health Social Entrepreneurship and Advocacy**

This course is on applying the concepts of sustainable value to create behavioral health business sustainability through investment strategies, market insight, and operational excellence. Students will gain an understanding of how sustainable development and sustainability principles are used as drivers for innovation, collaboration, and transformation. Topics will also include business planning and decision making using strategic management principles and the model of strategic planning for the public and private sectors. Students in this course use the case-based method of learning in applying concepts from strategy, leadership, decision analysis, and behavioral health management to the development of situational analyses, corporate- and operational-level decision making, implementation plan development, and strategic evaluation.

**Prerequisites**
- DRWI 8504

**PBHL 8207 - Grant Writing**

Grant writing is a highly marketable skill that requires many not-for-profit, educational, and community organizations to secure external funding in order to provide needed services to the community. In this course, students will explore the basic skills needed for grant writing including identifying potential funding sources, creating objectives and a need statement, preparing and justifying a budget, identifying appropriate assessment plans, and writing an executive summary. Through their course assignments, students can directly apply what they are reading and discussing by writing a full grant proposal based on an actual Request for Proposal (RFP).

**PBHL 8214 - Consulting for Organizational Change**
Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

Prerequisites
- PBHL 8752

PBHL 8216 - Dynamics of Contemporary, International, and Virtual Organizations

Globalization, technological innovation, and market factors continually change the context of business, requiring professionals who understand how organizations function to work through challenges and harness opportunities for change. In this course, students explore the implications of the changing nature of organizations as well as the emergence of international and virtual organizations in a global economy. Through contextual and application-based assignments, students address the unique opportunities and challenges for government, for-profit, nonprofit, international, and virtual organizations. Applying acquired knowledge and skills, students provide a diagnosis and recommendations for a specific organization's development efforts.

PBHL 8242 - Changing Health Behavior: Theory and Practice

Students in this course will review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. Coverage of health-related issues includes dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, students will examine the analysis of behavior change within specific populations (young, elderly, cognitively impaired, etc.) and factors that predict or serve as obstacles to lifestyle change and adherence.

PBHL 8300 - Healthcare Financial Management and Economics

In this course, students gain knowledge of economic principles such as cost, quality, and access as they relate to the healthcare world. The principles of healthcare financial management, including accounting and finance, are vitally important to the viability and
ongoing operations of a healthcare business. Students have the opportunity to interpret and analyze the financial statements of a business, use and analyze financial ratios, utilize variance analysis, understand and implement operating and capital budgeting, and develop knowledge of the business planning process. Students create portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.

Prerequisites

- PBHL 8002
- PBHL 8012
- PBHL 8214
- RSCH 8110
- RSCH 8210
- RSCH 8310
- PBHL 8200
- PBHL 8600
- PBHL 8755
- PBHL 8465
- PBHL 8900
- PBHL 8315 or PBHL 8207

PBHL 8315 - Program Evaluation

(5 cr.)
The skills required to assess research and work effectively with stakeholders are among the many proficiencies required of professionals who evaluate and develop programs. In this course, students examine these skill sets as well as the history, theory, and major approaches underlying program evaluation. Students learn how to select appropriate quantitative and/or qualitative models and techniques to perform evaluations, demonstrate program effectiveness, and disseminate results. Additionally, students explore the procedures and techniques involved in offering their evaluation services to a specific group or organization. They also examine strategies to gain stakeholder interest in developing appropriate standards, research progress, and evaluation outcomes. Students acquire practical experience evaluating a program of interest through which they outline organizational structure, identify stakeholders, employ evaluation models, explain steps in planning, and predict possible challenges or stakeholder fears, for which they recommend solutions.

PBHL 8316 - Economics and Financing of Public Health Systems

(5 cr.)
In this course, students investigate the provision of resources for the delivery of public health services and the application of economic theories to health policy issues. Students
explore how organizational characteristics interact with economic forces to produce systems performance outcomes, as well as how fiscal policy can influence the performance of public health systems. Students analyze grant-writing strategies and the advantages and disadvantages of various financing options. Other topics include methods of economic evaluation and their usefulness in determining appropriate financing mechanisms for public health systems.

**PBHL 8320 - Development in an Era of Global Crisis**

(5 cr.)
Students in this course review how recent international issues such as terrorism, civil war, mass migration, and refugee crises influence development and lives of human beings throughout the lifespan. They examine how extreme life stressors such as exposure to disaster, war, terrorism, displacement, genocide, instability, loss of family, and death influence health (e.g., sanitation, diseases, reproductive issues) and mental health issues (e.g., trauma, anxiety, depression, adjustment difficulties, debilitating mental illnesses) and also impact the psychosocial well-being and development of infants, children, young adults, adults, and elders within their specific contextual and cultural background. Students also examine psychosocial support and intervention programs developed for health and mental health promotion of the affected individuals and how they impact positive social change.

**PBHL 8330 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness**

(5 cr.)
Professionals in all areas of public policy and administration work with individuals and organizations of different cultures on a daily basis; therefore, global consciousness is vital to effective communication and interaction in the field. In this course, students explore and analyze the cultural values and styles of communication, reasoning, and leadership unique to their home culture. Students apply these concepts to better understand the people, values, and policies of other cultures. They also identify and become familiar with challenges that American nonprofit organizations face as they work internationally or cross-culturally within the United States. Sharpening critical-thinking skills, students research and assess an organization within their own community that has international links; through this assessment, students gain further awareness of different cultures and the importance of cross-cultural ties.

**PBHL 8450 - Project and Resource Management in Health Services Organizations**

(5 cr.)
In this course, students focus on the strategic resource management process in an organizational setting. As leaders in the healthcare field, students explore resource management within the context of the healthcare mission, planning resource allocation,
program implementation, and program evaluation. Students have the opportunity to assess their organization's current strategic position and apply relevant theoretical models in healthcare settings to adjust management practices in a changing healthcare environment. Students can also address the organizational dynamics and change management processes of integrated health systems and their networks of hospitals, nursing homes, group practices, and medical offices.

**PBHL 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination**

(5 cr.)
In an increasingly complex world, leaders and managers in public, private, and not-for-profit organizations need to be strategic in planning and creating effective, collaborative programs and services. In this course, students explore the role and process of strategic planning, with an emphasis on collaboration, cooperation, and coordination within and among organizations. Students apply these concepts to real-life situations and organizations.

Prerequisites
- DRWI 8507

**PBHL 8540 - Strategic Planning, Management, and Leadership in a Global Context**

(5 cr.)
Public policy implementation can take place in various types of organizations. Students engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships among strategic planning, management, and leadership from an international perspective. Students cover three key institutional elements: thinking, acting, and leading strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

**PBHL 8573 - Child and Adolescent Health**

(5 cr.)
Students in this course will review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. Coverage of health-related issues includes dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, students will examine the analysis of behavior change
within specific populations (young, elderly, cognitively impaired, etc.) and factors that predict or serve as obstacles to lifestyle change and adherence.

**PBHL 8574 - Women's Health**

(5 cr.)
Students in this course examine healthcare issues in women and girls. Topics include healthy development, trauma, coping, self-esteem, resilience, self-care, well-being, sexual health, relationships, roles, family, schooling, careers, motherhood, transitions, violence, security, bereavement, and positive aging.

**PBHL 8600 - Governance, Law, and Policy for Healthcare Leaders or Behavioral Healthcare**

(5 cr.)
Many economic, financial, and political factors influence the delivery of behavioral health healthcare, making healthcare reform a challenging task. In this course, students examine these factors and challenges, and they consider policy reform through legal, regulatory, ethical, societal, and organizational contexts. Topics include behavioral healthcare policy, advocacy, laws, mandates, contracts, and ethical obligations to provide quality behavioral healthcare by being stewards of their organization. They examine the political and policy process, including agenda setting, stakeholder analysis, and application of policy analysis frameworks.

**Prerequisites**
- DRWI 8504

**PBHL 8745 - Health Psychology**

(5 cr.)
Health psychologists work toward positive change in healthcare and health behavior through the study of relationships between patients and providers, how individuals and groups adapt to illness, damaging health behaviors, health cognitions, and many other related issues. In this course, students explore the field of health psychology with a focus on the biopsychosocial model. They discuss behavioral and biomedical theories as well as the effect of psychological (personality), behavioral (health behaviors and coping), and social factors (stress and physician-patient relationships) on physical health and wellness. Through the examination of current literature and peer discussions, students explore and address issues related to cardiovascular and immune health, including heart disease, stroke, cancer, and HIV/AIDS. They demonstrate their understanding of course material and consider how topics apply to their personal and professional life through the development of task force papers, a health brochure, and a final essay.
PBHL 8750 - Trends and Issues in Executive-Level Management for Healthcare Administrators

(5 cr.)
Given the dynamic nature of the healthcare industry, healthcare administrators are facing more challenges and opportunities than ever before. In this seminar-style course, students address how executive-level managers leading complex health systems can use strategic planning, risk management, and innovative business practices to take advantage of healthcare trends, as well as the current social and economic forces that guide strategic planning of healthcare systems. Students explore ways to improve board of director relationships, address financial challenges, and implement healthcare reform measures. As a result of this course, students are better able to visualize and address the quickly changing landscape of healthcare delivery per the guidelines outlined in the Patient Protection and Affordable Care Act of 2010. Students also have the opportunity to address the cultural issues that are present in the healthcare environment.

PBHL 8752 - Psychology of Organizational Behavior

(5 cr.)
Students in this course examine the application of behavioral theories in organizational settings. The focus is on individual, group, and organizational behavior. Topics include individual differences in employee motivation and job satisfaction, group development, team building, organizational leadership, and organizational design, culture, and development. Students acquire a broad knowledge base in organizational psychology, its research, and its applications.

PBHL 8755 - Leadership and Leader Development

(5 cr.)
Effective leadership requires the ability to facilitate positive change, lead others in efforts to effect similar change, and work through challenges when met with resistance to change. Students in this course are provided with an extensive overview of leadership theories. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership and change. Students also examine various perspectives on leadership and the role of leadership in the achievement of organizational, group, and team goals. Students engage in practical assignments and discussions, focusing on effective leadership issues and practices during the process of organizational change.
Prerequisites
- PBHL 8600
- DRWI 8504
- PBHL 8752
PBHL 8762 - Teaching of Psychology

(5 cr.)
Students in this course examine techniques and issues related to teaching psychology at the college and/or university level. They examine aspects of the adult development process, teaching skills, rapport with students, and course and classroom management. Students also explore classroom communication and ethical issues relevant to both instructors and students. Demonstrating their knowledge and communicating perspectives, students complete writing assignments on topics related to teaching psychology. They also have the opportunity to gain practical experience and constructive feedback as they lead discussions, assign grades, and evaluate other student teachers.

PBHL 8763 - Principles of Instructional Design

(5 cr.)
Students in this course are presented with an overview and critical analysis of various instructional methods and techniques, including their historical, psychological, and social foundations. Students analyze specific instructional applications in various settings and through multiple theories of learning, such as behavioral, cognitive, humanistic, and social-situational. They apply prior knowledge of learning, development, and cognition to understand these applications. Students also consider and discuss the major challenges affecting curriculum design as well as potential future trends. Demonstrating understanding of course concepts, students critically analyze and present current issues in instructional design through collaborative projects.

PBHL 8764 - Instructional Design for Online Course Development

(5 cr.)
In this course, students explore instructional design and delivery of online courses, issues related to assessment, evaluation in a distance-learning environment, and appropriate and systematic use of technology in online learning venues. Addressing course objectives and discussion questions, students explore and assess issues related to learning styles and instructional strategies in the online environment as well as alternatives to the online lecture. Students gain hands-on experience developing components for online instruction using course concepts and best practices in the field.

Prerequisites
- PBHL 8763

PBHL 8815 - Contemporary Gerontology/Geriatric Psychology

(5 cr.)
Statistical data indicate that people are living longer and the number of older persons is continually increasing. As the population ages, society must prepare to address their
needs. Students in this course are provided with a multidisciplinary approach to the study of aging in contemporary societies. Students examine the biological, psychological, social, and societal contexts of aging. They also explore the historical and cross-cultural perspectives on aging, social theories of aging, managing chronic diseases, cognitive changes associated with aging, mental health issues, sexuality, and social interactions. Through a series of taskforce reports on various topics, such as sexually transmitted diseases, substance abuse, and elder abuse, students apply course concepts and critically examine current issues in gerontology.

**PBHL 8900 - Doctoral Research Project Lab**

(5 cr.)
Through this course, doctoral students have a platform for the ongoing collaborative learning communication between them and their doctoral study chairs and as a repository for drafts and documentation materials related to the doctoral study. The final doctoral study is a demonstration of students' scholarly ability to examine, critique, and synthesize knowledge, theory, and experience, so that new ideas can be tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. In all cases, students engage in rigorous inquiry that results in new knowledge, insight, or practice, demonstrating efficacy in the world of behavioral health leadership.

**Prerequisites**
- PBHL 8465
- PBHL 8315
- PBHL 8207
- DRWI 8507

**PBHL 8911 - Healthcare Quality Management**

(5 cr.)
The focus of this course is the development of leadership strategies and competencies to support healthcare and organizational quality delivery of care. Emphasis is placed on a systems approach for exploring the organizational structures, which impact healthcare quality performance and, ultimately, patient outcomes. Using macro (enterprise-wide) and micro (individual and team performance) perspectives, students examine the leadership roles, which define, develop, and support decisions affecting quality strategies. Students in this course address how key organizational theories, principles, and concepts relate to achieving the effective and efficient delivery of safe healthcare services. Through the development of a quality program initiative, students demonstrate an understanding of the impact an initiative has on organizational structure, its environment, and the system's leadership.

**PBHL 9001 - BHL Doctoral Study 1**
This course represents the final phases of study for Walden University doctoral students enrolled in the Behavioral Health Leadership program. Walden requires the doctoral study to reflect a high level of scholarly effort and to either expand existing knowledge or contribute to professional practice. In this capstone course, doctoral students have the opportunity to integrate their academic learning with their applied skill set by demonstrating their ability to conduct an in-depth examination and/or assessment of a behavioral health practice problem. Students complete an applied practice-based study independently, with the guidance of their doctoral study supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and carry out and analyze a research protocol and study.

Prerequisites

- PBHL 8900

PBHL 9002 - BHL Doctoral Study 2

This course represents the final phases of study for Walden University doctoral students enrolled in the Behavioral Health Leadership program. Walden requires the doctoral study to reflect a high level of scholarly effort and to either expand existing knowledge or contribute to professional practice. In this capstone course, doctoral students have the opportunity to integrate their academic learning with their applied skill set by demonstrating their ability to conduct an in-depth examination and/or assessment of a behavioral health practice problem. Students complete an applied practice-based study independently, with the guidance of their doctoral study supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and carry out and analyze a research protocol and study.

Prerequisites

- PBHL 9001

PBHL 9003 - BHL Doctoral Study 3

This course represents the final phases of study for Walden University doctoral students enrolled in the Behavioral Health Leadership program. Walden requires the doctoral study to reflect a high level of scholarly effort and to either expand existing knowledge or contribute to professional practice. In this capstone course, doctoral students have the opportunity to integrate their academic learning with their applied
skill set by demonstrating their ability to conduct an in-depth examination and/or assessment of a behavioral health practice problem. Students complete an applied practice-based study independently, with the guidance of their doctoral study supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and carry out and analyze a research protocol and study.

Prerequisites
- PBHL 9002

**PBHL 9004 - BHL Doctoral Study 4**

(5 cr. per term until completion)
This course represents the final phases of study for Walden University doctoral students enrolled in the Behavioral Health Leadership program. Walden requires the doctoral study to reflect a high level of scholarly effort and to either expand existing knowledge or contribute to professional practice. In this capstone course, doctoral students have the opportunity to integrate their academic learning with their applied skill set by demonstrating their ability to conduct an in-depth examination and/or assessment of a behavioral health practice problem. Students complete an applied practice-based study independently, with the guidance of their doctoral study supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and carry out and analyze a research protocol and study.

Prerequisites
- PBHL 9003

**PHIL 1001 - Introduction to Philosophy**

(5 cr.)
Philosophy is a way to explore and process complex issues in life through different perspectives. In this course, students have the opportunity to think about their values, their knowledge and belief systems, their lives, and their place in the world. Students learn about concepts of logic, ethics, metaphysics, reality and truth, and political philosophy. They explore the history of philosophy in the context of important contemporary issues and positions. Through this exploration, combined with self-reflection, students learn to ground their personal philosophies in traditions of philosophical reasoning.

Prerequisites
- ENGL 1001 or ENGL 1010
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHIL 1001S - Introduction to Philosophy♦

(5 cr.)
Philosophy is a way to explore and process complex issues in life through different perspectives. In this course, students have the opportunity to think about their values, their knowledge and belief systems, their lives, and their place in the world. Students learn about concepts of logic, ethics, metaphysics, reality and truth, and political philosophy. They explore the history of philosophy in the context of important contemporary issues and positions. Through this exploration, combined with self-reflection, students learn to ground their personal philosophies in traditions of philosophical reasoning.
Prerequisites
- ENGL 1001 or ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHIL 2001 - Ethics♦

(5 cr.)
Students are introduced to the nature and foundations of moral judgments and applications to contemporary moral issues in this course. Students explore an overview of ethical constraints from the prevailing philosophical and religious perspectives. Using a range of moral theories, students assess their beliefs, values, and perspectives on various ethical scenarios. Through this course, students gain the knowledge needed to formulate solutions to problems of professional and private life against the backdrop of ethical theory.
Prerequisites
- ENGL 1001 or ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHIL 2001C - Ethics♦

(5 cr.)
Students are introduced to the nature and foundations of moral judgments and applications to contemporary moral issues in this course. Students explore an overview of ethical constraints from the prevailing philosophical and religious perspectives. Using
a range of moral theories, students assess their beliefs, values, and perspectives on various ethical scenarios. Through this course, students gain the knowledge needed to formulate solutions to problems of professional and private life against the backdrop of ethical theory.

Prerequisites
• ENGL 1001 or ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHIL 3010 - Science and Spirituality♦

(5 cr.)
Students in this course investigate the human experience as understood through science, spiritual traditions, and contemporary thinking. They analyze the roles of evolutionary psychology, social psychology, science, and spirituality as they relate to human beliefs and experiences, such as happiness and love. Through a range of conceptual and applied assignments, students gain an understanding of historical and religious traditions and scientific theories as well as the theories and arguments of leading scientific and religious thinkers. Students also learn to determine the separateness or duality of science and spirituality.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8006 - Foundations of Doctoral Success in Public Health♦

(5 cr.)
In this course, students will explore the field of public health and analyze foundational components of the discipline, including philosophies and values, from the viewpoint of what it means to become a scholar-practitioner in the field. They will also examine literature in public health including information on emerging issues and trends and technologies used. Students will learn about the public health doctoral programs and the resources that are available to improve scholarly voice, writing, and communication. In addition, students will examine the skills that are needed to complete a doctoral study program with regards to time management, self-discipline, and academic integrity.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8011 - Foundations of Doctoral Success in Public Health♦

(5 cr.)
In this course, students will explore the field of public health and analyze foundational components of the discipline, including philosophies and values, from the viewpoint of
what it means to become a scholar-practitioner in the field. They will also examine literature in public health including information on emerging issues and trends and technologies used. Students will learn about the public health doctoral programs and the resources that are available to improve scholarly voice, writing, and communication. In addition, students will examine the skills that are needed to complete a doctoral study program with regards to time management, self-discipline, and academic integrity.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PHLT 8031 - Public Health Administration and Leadership**

(5 cr.)
In this course, students are provided with a foundational understanding of the administrative, managerial, and organizational practices of public health and healthcare delivery systems. Students examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. They engage in a variety of contextual and practical assignments focused on management theories, policy processes, systems thinking, strategic planning and partnerships, public health financing, human resource management, public health informatics, quality and performance improvement, leadership, and organizational behavior. Students also consider the impact of global trends on public health.

Prerequisites
- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PHLT 8032 - SPSS Revealed**

(1 cr.)
In this laboratory course, students can learn the skills needed to use the statistical computer package SPSS (Software Package for the Social Sciences) in public health practice and research. Topics include importation of data, management of various types of data, creation and exportation of tables and graphs, and computation of basic statistical tests using SPSS.

Prerequisites
- PHLT 8006 or PHLT 8011

**PHLT 8033 - Interpretation and Application of Public Health Data**

(5 cr.)
Students in this course learn about biostatistical methods and concepts used in public health practice and research. Emphasis is placed on interpretation and application of
concepts rather than statistical formulas. Major topics include identification of levels of measurement, interpretation of narrative and graphical descriptive statistics, conceptualization of statistical inference and probability, and interpretation of commonly used statistical tests such as t tests, analysis of variance, correlation and regression, comparing proportions, contingency tables, and chi-square tests. Students are required to use the statistical computer package SPSS.

Prerequisites
- PHLT 8006 or PHLT 8011
- PUBH 8032

PHLT 8034 - Environmental Health♦

(5 cr.)
A comprehensive overview of environmental factors that affect the health and safety of 21st century communities is provided in this course. Students examine associations and interrelationships among chemical, physical, and biological hazards in the environment and their impact on human health. Concepts cover food, water, air, waste, radiation, noise, pests, population growth, and climate change. Students analyze and discuss current local and global problems and solutions and consider new ways to address environmental issues.

Prerequisites
- PHLT 8033

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8035 - Epidemiology: Decoding the Science of Public Health

(5 cr.)
Public health officials frequently use epidemiologic research to develop educational strategies and intervention programs to improve the overall health of communities. Using an epidemiological approach, students in this course examine the incidence, prevalence, and patterns of disease and injury in populations and learn how to apply these concepts to the control of public health problems. Students identify key sources of data for epidemiological purposes and address principles and limitations of public health screening programs. Students calculate basic epidemiological measures and draw appropriate inferences from epidemiological data and reports. Through this course, students gain a deeper understanding of the various research designs and methodologies professionals use in public health research.

Prerequisites
- PHLT 8038
- PHLT 8032
- PHLT 8033
PHLT 8038 - Health Behavior Theory♦

(5 cr.)
Students in this course are introduced to concepts necessary for promoting positive health-behavior change by examining the most commonly used theories and models in public health and health education and promotion. Coursework focuses on the identification and application of theories and models for promoting and designing effective health behavior programs and interventions. Students explore individual, interpersonal, and community theories and modules to determine the most appropriate application.
Prerequisites
  • PHLT 8006 or PHLT 8011

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8040 - Advanced Public Health Policy and Advocacy♦

(5 cr.)
In this course, students examine the role of federal, state, and local government in the assurance of public health through health policy and law. Consideration is given to contemporary policy, law, and regulatory issues arising in public health practice, as well as to the economics and financing of public health programs. The advocacy, political, and creative process in the formulation, implementation, and modification of health policy are examined and discussed. Students also learn how to structure and write a health policy brief, which will provide students with experience integrating scientific information, legal, and regulatory approaches, ethical frameworks, and varied stakeholder interests in policy development and analysis.
Prerequisites
  • PHLT 8006 or PHLT 8011

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8042 - Public Health Ethics♦

(3 cr.)
This course will introduce students to the main values and principles that drive decision-making in public health research and practice. Through a case study approach, students will be exposed to different ethical theories and their application in real-life public health scenarios, such as resource allocation, individual autonomy versus the needs of the community, and protecting vulnerable populations. In addition, principles of research
ethics will be discussed and students will be exposed to the Institutional Review Board (IRB) application process.

Prerequisites

- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8044 - Advanced Program Evaluation

(5 cr.)
The course provides students interested in pursuing a public health doctoral-level degree with the advanced competencies necessary to evaluate public health programs. This course will emphasize public health practice and is designed to assist students in understanding how to plan, conduct, and report on a program evaluation. Students will learn the importance of abiding by the program evaluation standards and evaluator guiding principles. These are fundamental to ensure students complete evaluations with integrity and utility. Students will learn the importance of evaluation theory and the relationship between evaluation theory, program theory, and public health change theories.

Prerequisites

- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8046 - Grant Writing and Review for Public Health Research

(5 cr.)
In this course, students investigate the multiple funding sources of public health research. Students analyze grant-writing strategies and the advantages and disadvantages of various financing options. Students will be responsible for writing a mock public health grant proposal to support a real-world research topic. In addition, students will be exposed to the grant approval review process and gain experience in grant review and evaluation.

Prerequisites

- PHLT 8006
- PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PHLT 8048 - Research and Application of Public Health and Behavior Change Theories

(5 cr.)
This course presents a comprehensive look at public health and behavior change theoretical and conceptual models that apply to public health research and practice. Students review and assess predominant social and behavioral principles at the individual, interpersonal, and community levels. Students learn to integrate knowledge on different public health theoretical and conceptual frameworks, research approaches, methods, values and potential contributions from multiple professions and systems in addressing public health problems. Finally, students learn to apply theories to public health quantitative, qualitative and mixed methods research and practice.
Prerequisites
- RSCH 8310H

PHLT 8051 - Advanced Issues in Global Public Health

(5 cr.)
This course provides an in-depth review and analysis of the leading global health problems, and the primary methods used to measure those problems. Students analyze the social and environmental determinants of global health problems, including urbanization, global industrialization, environmental pollution, and their role in health inequalities within and between populations. In addition, students evaluate population-based approaches to improving global public health, including culturally inclusive and sensitive primary health care, and policies that promote health literacy, health equity and positive social change. Emphasis is placed on strategies to advance inclusion, cultural humility and health equity in public health research, policies and programs. The course takes a cross-disciplinary, ecological approach, enabling students to examine the complex inter-relationships between economic, social and environmental factors, and health.
Prerequisites
PhD in Nursing
- None
PhD in Public Health
- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8054 - Lifestyle and Chronic Diseases

(5 cr.)
In this course, students explore how lifestyle and related risk factors influence chronic
diseases, also called noncommunicable diseases. Topics include the role of diet, nutrition, physical activity, sleep, stress management, and substance use (tobacco, alcohol, and drug use) on the epidemiology of heart disease, diabetes, cancer, and asthma. Through development of an evidence-based intervention to improve a lifestyle behavior, students evaluate the use of theories of health behavior change, measurement techniques, screening approaches, and prevention of chronic diseases.

**Prerequisites**
- PHLT 8006 or PHLT 8011

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**PHLT 8060 - Dissertation Seminar I**

(1 cr.)
[Under development]

**Prerequisites**
- PHLT 8006 or PHLT 8011

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**PHLT 8062 - Dissertation Seminar II**

(1 cr.)
Dissertation Seminar Course 2 on the *Journey to the Communities of Scholars* represents the preboarding phase of the journey. Students learn how to use the library, develop doctoral-level writing strategies, and write a literature review. Students also examine how social problems drive scientific inquiry.

**Prerequisites**
- PHLT 8060

**PHLT 8064 - Dissertation Seminar III**

(1 cr.)
Dissertation Seminar 3 gives you continued practice developing critical elements of a scientific study. You will examine the characteristics of strong quantitative and qualitative research questions and evaluate conceptual and theoretical frameworks with respect to their alignment with a study. You will engage in an iterative process of developing research questions through peer review and feedback.

**Prerequisites**
- PHLT 8062
- RSCH 8110H
PHLT 8066 - Dissertation Seminar IV

(1 cr.)
[Under development]
Prerequisites
• RSCH 8310H
• PHLT 8064

PHLT 8068 - Dissertation Seminar V

(1 cr.)
[Under development]
Prerequisites
• RESI 8401
• RESI 8402
• PHLT 8066

PHLT 8072 - Communicable Disease Epidemiology♦

(5 cr.)
This course covers principles and methods of communicable disease epidemiology. Topics include history of communicable disease control, infectious disease definitions and terminology, the epidemiologic triad, dynamics of transmission, laboratory diagnosis, outbreak investigations, disease surveillance, immunity, vaccines, and pandemics. Case studies are used to investigate vaccine-preventable diseases, respiratory diseases, sexually transmitted diseases, zoonotic diseases, diarrheal diseases, and antibiotic resistant infections.
Prerequisites
• PHLT 8006 or PHLT 8011

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8074 - Environmental and Occupational Epidemiology♦

(5 cr.)
This course provides students with the key health effects of environmental and occupational exposures and the epidemiologic methods used to identify and estimate those effects, including addressing equity-related barriers. Students learn about environmental and occupational exposures (including water and air pollution, food contamination, ionizing radiation, persistent environmental pollutants, and emergent
environmental exposures) and key methodological issues relevant for these exposures in population studies (including study design, exposure assessment and biomonitoring, disease clusters, dose-response relationships, susceptibility, geographic analysis, and evidence synthesis). Students will also learn the major health consequences and increased health risks of climate effects (including injuries, heat-related illness and death, and exacerbations of respiratory and cardiovascular disease).

Prerequisites
- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8076 - Fundamentals of Mapping and Geographic Information Systems for Public Health

(5 cr.)
This course enables students to acquire, manipulate and effectively display spatial data by introducing principles, methods, and techniques used in public health to help foster decision and policy-making based on the visualization of data. Students will further understand how public health researchers and practitioners can increase the impact of their work by using geographic information systems (GIS) to convey information and synthesize data from multiple sources. Using basic GIS concepts, such as coordinate systems, layering, buffering, joining, merging, and aggregating spatial data, conducting spatial queries, and appropriate visualization of spatial data, students will be able to visualize, analyze, and interpret data in an accessible and useful way.

Prerequisites
- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8078 - Policy and Law for Environmental and Occupational Health

(5 cr.)
This course will explore the legal and regulatory frameworks for environmental and occupational health both in the United States and select additional countries. The roles of different levels of government in the development of environmental and occupational policies and laws will be addressed through an exploration of historical and contemporary examples. Students will gain experience in evaluation of current laws and regulations and develop strategies for addressing environmental and occupational health issues. Some of the topics covered will include evidence-based decision-making, environmental justice, and the role of climate change in health policy and law.

Prerequisites
- PHLT 8006 or PHLT 8011
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PHLT 8128 - Biological Foundations of Public Health**

(5 cr.)
This course provides learners with a foundation in the basic science and critical thinking that informs the core areas of public health. Students explore the biological and physical underpinnings of the human body in health and disease states, and they investigate the microbiological, physical, behavioral, and environmental causes of common diseases from a public health perspective.

**Prerequisites**
- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PHLT 8270 - Health Informatics and Surveillance**

(5 cr.)
By addressing current trends and future applications in public health research, students develop advanced competency in health informatics and surveillance in this course. The key informatics issues of data standards and integration, vocabularies and data transmission protocols, natural language or text processing, health information technology, surveillance systems, and the application of geographical information systems to situation awareness are addressed. Through surveillance data analysis, students will use trend data to detect and interpret aberrations in person, place, and time trends. Other topics include information architecture, public health records, electronic medical records, electronic health records, health information exchange, and database design, as well as information storage, security, and privacy.

**Prerequisites**
- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PHLT 8402 - Applied Leadership and Multicultural Perspectives in Public Health**

(5 cr.)
In this course, students explore various definitions of public health leadership versus public health management. Students apply insights to current and future public health leadership roles, examine the strengths and limitations of the various theories and
models of leadership, and consider which most resonates with their personal leadership philosophy. They reflect on the importance of cultural proficiency, apply a multicultural perspective for leadership in public health, consider negotiation and conflict resolution methods and reflect on the value of diversity in research. Students apply a systems thinking approach to public health leadership, and in doing so analyze their own personal leadership characteristics, values, and behaviors, assessing their own attitudes, beliefs, and implicit bias. They explore the importance of ethical decision making for effective public health leadership, engage in professional development planning, and apply public health leadership theory to design a system-level intervention.

Prerequisites

PhD in Nursing
- None

PhD in Public Health
- PHLT 8006 or PHLT 8011

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8450 - Community Health Assessment

(5 cr.)
Students in this course cover community health assessment and its application to program planning. They learn to identify and prioritize problems, then assess and utilize community resources to address these problems. Topics include measuring selected determinants of community health status and health services use, classifying community assets, identifying data sources, and applying certain methods to maximize community participation. Students synthesize the results of a community health assessment to create a community diagnosis that serves as the basis for program planning and research design.

Prerequisites
- PHLT 8006 or PHLT 8011

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8500 - Advanced Biostatistics

(5 cr.)
Students in this course cover the advanced biostatistics methods needed to prepare for conducting future research, as well as for critically reviewing the statistical methods incorporated in public health literature. Students learn to use statistical methodologies such as covariance and repeated measures, longitudinal data analysis, life tables and survival analysis, multiple regression, logistic regression, Poisson regression, and the Cox
proportional hazards regression model. In this course, students use SPSS statistical software for advanced data management, manipulation, analysis, and the use of graphical techniques.

Prerequisites
- RSCH 8210H

PHLT 8520 - Advanced Epidemiological Methods

(5 cr.)
The principles of epidemiologic design, analysis, and interpretation at an advanced level are integrated in this course. Students discuss data sources, assessment of dependent and independent variables, measurement error, confounding, and bias. They explore methodological issues in epidemiology, including factors critical to public health research, such as missing data, intermediate variables, confounding, complex study designs, meta-analysis, and questionnaire design. The concepts and applications in survival analysis, analysis of incidence rates, life tables, and parametric and nonparametric approaches are covered in this course.

Prerequisites
- PHLT 8500

PHLT 8522 - Epidemiological Investigations♦

(5 cr.)
This course introduces epidemiologic methods used to solve health related problems. Students gain knowledge in field epidemiology, surveillance, traceback studies, environmental health assessments, rapid assessments, and contact tracing through case studies of actual epidemiological investigations. Resources that are critical to epidemiological investigations are presented, such as public health laboratories, incident command system, and geographic information systems. Topics will range from Cyclosporiasis and Salmonella, to HIV and COVID-19.

Prerequisites
- PHLT 8006 or PHLT 8011

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8560 - Advanced Analysis of Secondary Data♦

(5 cr.)
Through this course, students develop an advanced understanding of statistical and epidemiological methodology and the use of public health and biomedical secondary data sources. Students explore how to design research to make appropriate use of available
secondary data sources. Students also evaluate the strengths and limitations of using secondary data.
Prerequisites
- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8702 - Environmental and Occupational Exposure Measurement and Assessment

(5 cr.)
This course provides students with a thorough understanding of the steps and key considerations involved in designing and conducting an exposure assessment, mainly in the context of epidemiological investigation and health risk assessment. Students will acquire scientific knowledge of sources of exposure, exposure measurement and assessment, and prevention and mitigation of hazardous environmental exposure. Topics include basic concepts of exposure science, types and sources of environmental agents that people are exposed to, exposure measurement and assessment methods, and emerging environmental exposure issues.
Prerequisites
- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PHLT 8704 - Environmental and Occupational Toxicology

(5 cr.)
In this course, students will explore the principles of toxicology from an environmental and occupational public health context. This course will emphasize an examination of the risks associated with exposure to various toxicants within both environmental and occupational settings, as well as the toxicology of major organ systems; the health effects of categories of toxins; and review of toxicological testing types. As a result of this course, students should be able to explain potential routes of exposure for various toxicants and measurement of adverse effects of exposure. Students will also be able to communicate toxicological characteristics to educate populations, change behavior, and drive social change.
Prerequisites
- PHLT 8006 or PHLT 8011

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PHLT 9005 - Dissertation Prospectus

(5 cr.)
A doctoral capstone (e.g., dissertation, project study, etc.) is required in the final phase of a student's doctoral journey, after meeting the requirements for doctoral candidacy. During the capstone course sequence, students integrate their program of study into an in-depth exploration culminating in the completion of a doctoral research study. Students complete the study independently, with the guidance of a capstone committee, and following the process guidance in the Doctoral Degree Coach.

The first stage of capstone development is the prospectus. The doctoral prospectus is a brief document that provides preliminary information about the capstone research. It serves as the tentative plan for developing the proposal and is evaluated to ensure doctoral-level work (e.g., feasibility, alignment, etc.) by the committee chair, second committee member, and a program-level designee. Program-level approval is required to progress to the proposal.

Prerequisites

- All required coursework
- Residencies 1, 2, and 3 (RESI 8401, and RESI 8402, and RESI 8403)

PHLT 9015 - Dissertation Proposal

(5 cr.)
A doctoral capstone (e.g., dissertation, project study, etc.) is required in the final phase of a student's doctoral journey, after meeting the requirements for doctoral candidacy. During the capstone course sequence, students integrate their program of study into an in-depth exploration culminating in the completion of a doctoral research study. Students complete the study independently, with the guidance of a capstone committee, and following the process guidance in the Doctoral Degree Coach.

The second stage of capstone development is the proposal. The doctoral proposal consists of the first few chapters or sections of the capstone and an APA-Style reference list. The proposal presents a detailed plan of the proposed research and describes a specific problem, the related literature, and the intended research methodology. The proposal is evaluated to ensure doctoral-level work (e.g., exhaustive review of literature, alignment, etc.) by the committee chair, second committee member, and a university research reviewer. Students complete an oral defense, and the Proposal Stage culminates with the research ethics review process. IRB approval is required to progress to the final study.

Prerequisites

- Dissertation prospectus (PHLT 9005)

PHLT 9025 - Dissertation Final Study
A doctoral capstone (e.g., dissertation, project study, etc.) is required in the final phase of a student's doctoral journey, after meeting the requirements for doctoral candidacy. During the capstone course sequence, students integrate their program of study into an in-depth exploration culminating in the completion of a doctoral research study. Students complete the study independently, with the guidance of a capstone committee, and following the process guidance in the Doctoral Degree Coach.

The last stage of capstone development is the final study. After the IRB application has been approved, students conduct their research, collect and analyze data, report findings, and draw conclusions. With the guidance of the committee, students write the remaining chapters or sections of the capstone as well as the document abstract. The final study is evaluated to ensure doctoral-level work (e.g., accurate results, alignment, etc.) by the committee chair, second committee member, and a university research reviewer. Students complete the form and style review process and an oral defense. The final study stage culminates in the chief academic officer (CAO) designee review process and CAO approval is required for capstone completion.

Prerequisites
- Dissertation proposal (PHLT 9015)

**PHSC 1001 - Earth Science**

(5 cr.)
 Students are introduced to the major concepts in astronomy, meteorology, and geology with selected examples of interrelationships in this course. Students explore Earth's air, water, and physical processes as they shape the physical world. They engage in assignments that emphasize the relationship of the study of Earth sciences to the world in which they live, such as an evaluation of the world's energy and environmental problems. Through such assignments, students develop an understanding of fundamental scientific principles. They also gain the knowledge needed to understand and express major issues that affect the health of their community. Additionally, students develop an appreciation for the natural processes that occur on Earth and how they impact and affect the natural world.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PHSC 1001C - Earth Science**

(5 cr.)
 Students are introduced to the major concepts in astronomy, meteorology, and geology with selected examples of interrelationships in this course. Students explore Earth's air, water, and physical processes as they shape the physical world. They engage in assignments that emphasize the relationship of the study of Earth sciences to the world
in which they live, such as an evaluation of the world's energy and environmental problems. Through such assignments, students develop and demonstrate an understanding of fundamental scientific principles. They also gain the knowledge needed to understand and express major issues that affect the health of their community. Additionally, students develop an appreciation for the natural processes that occur on Earth and how they impact and affect the natural world.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**PMGT 3000 - Project Management Strategies**

(5 cr.)
Organizational leaders face significant challenges in meeting strategic objectives, given the global nature and inherent complexity of today's business environment. Students in this course are introduced to project management, an organizational structure and business model for attaining strategic goals. Students in this course focus on the project management body of knowledge and trends in project management. Topics include defining the difference between project and operational management; the management of cost, schedule and quality; the project charter; and the project management plan.

Prerequisites
- BUSI 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**PMGT 3001 - Project Management Methods I**

(5 cr.)
As a business practice, project management helps organizations with a structured approach to accomplishing work and meeting strategic goals. More and more organizations now manage by projects and, as a result, the profession of project management has gained prominence. Students in this course focus on the latest concepts in project management and can gain the knowledge and skills needed to successfully manage projects as a project management professional. Topics include the major Project Management Knowledge Areas: Scope, Time, Cost, Risk, and Quality Management.

Prerequisites
- PMGT 3000

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**PMGT 4001 - Project Management Methods II**
Companies now recognize the value of project management as a way to achieve greater organizational performance. Project success certainly depends on the proper application of project management tools and techniques. At the same time, the managerial skills of the professional project manager are equally or perhaps even more important. Students in this course focus on the soft skills that a professional project manager needs to effectively manage and communicate with internal and external project stakeholders. Topics include project management knowledge areas covering Human Resource, Procurement, Communications, and Stakeholder Management.

Prerequisites
- PMGT 3001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

POLI 1001 - American Government and Politics

The air we breathe, the water we drink, and the protection of our lives and property all are affected by the actions of local, regional, and national levels of government. In this course, students learn about the workings of the American government and the roles, rights, and responsibilities of citizens. Students explore the constitutional foundations and major institutions of American government demonstrated through the executive, legislative, and judicial branches. They engage in a range of assignments, such as an analysis on Supreme Court decisions, to gain an understanding of how the U.S. government functions, including the roles of political parties, elections, voting, and interest groups, as well as how the United States formulates and implements public policy.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

POLI 1001S - American Government and Politics

The air we breathe, the water we drink, and the protection of our lives and property all are affected by the actions of local, regional, and national levels of government. In this course, students are introduced to the workings of the U.S. government and the roles, rights, and responsibilities of citizens. Students explore the constitutional foundations and major institutions of U.S. government demonstrated through the executive, legislative, and judicial branches. They engage in a range of assignments, such as an analysis of Supreme Court decisions, to gain an understanding of how the U.S. government functions, including the roles of political parties, elections, voting, and interest groups, as well as how the United States formulates and implements public
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**POLI 1099 - Divisions of Government**

(1 cr.)
In this course, students study the three essential components of the system of government in the United States and also explore the fascinating and vast world of the federal bureaucracy and the role of state and local governments. Grounding themselves in this knowledge not only helps students be better informed about the concepts, principles, and processes related to the divisions of government in the United States but also become a more effective advocate for positive social change efforts.

*Note:* Students who have previously taken POLI 1001 - American Government will not receive credit for this course.

**PPPA 7201 - Strategic Planning: Collaboration, Cooperation, and Coordination**

(5 cr.)
In an increasingly complex world, leaders and managers in public, private, and nonprofit organizations need to be strategic in planning and creating effective, collaborative programs and services. This course explores the role and process of strategic planning with an emphasis on collaboration, cooperation, and coordination within and among organizations. Students apply these concepts to real-life situations and organizations.

**Prerequisites**
- EDUC 7311

**PPPA 7202 - Ethics and Social Justice**

(5 cr.)
Ethics is a fundamental element of leadership. In this course, students consider some of the leading philosophical bases of ethics as well as foundational social justice themes upon which public service rests. Seminal texts and case studies used to illuminate the tasks leaders face as they seek to serve diverse constituents. Students confront the challenge of ethical decision making and moral action in a world characterized (among other things) by economic disparity, power imbalances, social privilege, and division due to race and/or religion. Applying concepts presented in the course, students engage in an in-depth assessment of emerging or persistent ethical and social justice issues, with the objective of demonstrating an ability to make recommendations which lead to positive social change.

**Prerequisites**
- EDUC 7311
PPPA 8000 - Foundations of Doctoral Study

(1 cr.)
Students taking this course are introduced to Walden University and the requirements for successful participation in a doctoral program in an online learning environment. Students are also provided with a foundation for academic and professional success as a scholar-practitioner and social change agent. Course assignments focus on the practical application of critical reading and thinking, scholarly writing, and academic integrity. Students also become familiar with Walden's library, scholarly resources, and APA Style rules.

PPPA 8000i - Foundations of Doctoral Studies for International Students

(1 cr.)
Students taking this course are introduced to Walden University and the requirements for successful participation in a doctoral program in an online learning environment. They are also provided with a foundation for academic and professional success as a scholar-practitioner and social change agent, from an international student perspective. Course assignments focus on the practical application of critical reading and thinking, scholarly writing, and academic integrity, addressing themes and issues that are most relevant to international students or students who live and work outside the United States. Students also become familiar with Walden's library, scholarly resources, and APA Style rules.

PPPA 8004 - Foundations in Doctoral Studies

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online doctoral program and learning environment. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals and develop best practices and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library, the Writing Center, and other Walden academic centers. Students engage in course assignments focused on the practical application of scholarly and professional writing, critical thinking, and the promotion of professional and academic excellence as they relate to practice in public policy and administration.

PPPA 8004I - Foundations in Doctoral Studies

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online doctoral program and learning environment. Students work toward building a foundation for academic and professional success as
scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals and develop best practices and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library, the Writing Center, and other Walden academic centers. Students engage in course assignments focused on the practical application of scholarly and professional writing, critical thinking, and the promotion of professional and academic excellence as they relate to practice in public policy and administration.

**PPPA 8101 - Critical Issues in Emergency Management**

(5 cr.)
Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PPPA 8104 - Intellectual Traditions and Theoretical Foundations of Public Policy and Administration**

(5 cr.)
In this course, students explore the underlying theories, history, and literature (the "great writers") that provide a foundation for current studies in public policy and administration. In addition to providing foundational concepts, perspectives, and values that enhance critical thinking and an understanding of the field, the course content provides examples of theories that will help students identify relevant frameworks for their dissertation. Students will be exposed to classical and modern thought and events in public policy and administration that have resulted in seminal literature in the field. Topics include governance, economics, decision-making, politics, leadership, and public policy trends. In addition, students consider their roles as public administrators in promoting social responsibility. This course provides a bridge for students to the rest of their coursework in the PPPA curricula, throughout their dissertations, and into their futures as scholar-practitioners.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8111 - Leadership and Organizational Change♦

(5 cr.)
Successful organizations in a rapidly changing and complex world require leaders who embrace change and are able to engage others in change. In this course, students use traditional literature, current articles, and interactive media to explore the qualities, characteristics, and skills of effective leaders as well as the theories, models, and relationships between leadership and organizational change. They assess the ethical issues and standards as well as the opportunities and challenges related to leading diverse organizations through change. Students also examine how current leaders employ leadership and organizational change to contribute to social change, and they consider how to use these lessons to make further positive changes within an organization or their own community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8112 - Governance and Public Policy♦

(5 cr.)
Students in this course engage in an in-depth analysis of how societies are governed and how public policies are formulated, evaluated, adjudicated, and implemented. Students examine governance and public policy from theoretical and practical perspectives using ancient and classical voices as well as more modern and critical literature. Advanced techniques and research tools for policy analysis are used to illustrate various contemporary policy issues. With the aid of these techniques and research tools, students develop a policy plan to address a significant public policy concern or social issue of personal interest. Students also explore their future role in the field of public policy and administration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8115 - Writing a Quality Prospectus

(5 cr.)
Students in this course acquaint themselves with the format and requirements of the PhD Prospectus Form and begin working on the components of their prospectus. The Prospectus Form is a formal document and is the first step in completing a dissertation. The prospectus articulates the initial plan for a proposed study and is intended to provide the dissertation committee with enough information to determine the viability of the study.
The emphasis in this class is on the iterative development and alignment of all elements of the prospectus. Students explore the research literature related to their topic to distinguish between a social problem and a research problem and to identify a gap in the research literature; describe the specific research problem the proposed study will address and why it is appropriate for a dissertation; formulate a clear research question(s); and identify a study methodology and theoretical framework to ground the study.

The draft Prospectus Form students produce in this course should not be considered a final product that is ready for approval. Once registered for PPPA 9000 - Dissertation Research, students work with their chair and committee member to refine and finalize the Prospectus Form.

Prerequisites

- RSCH 8210P

Note: In addition to the prerequisites for this class, it is expected that students will have assembled and have available a list of peer-reviewed articles relevant to their potential research topic as part of their previous academic studies. Students will add to this collection as this course and all future dissertation work proceeds.

PPPA 8137 - The Nature of Crime and Criminology

(5 cr.)
Students in this course are introduced to contemporary views and theories of maladaptive and criminal behavior. They examine a broad conceptualization of criminal behavior from an interdisciplinary perspective as well as theories and application of criminal profiling. Students also explore specific views of criminal behavior germane to groups, such as psychopaths, serial offenders, and sexually violent predators. At the end of this course, students will have an understanding of the theories and practices that are the foundations of the field of criminology.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8201 - Risk Assessment, Preparedness, and Disaster Mitigation

(5 cr.)
Risk assessment and mitigation are key components to effective emergency management and all-hazard planning and response. Students in this course focus on the methods and techniques required to assess an organization or government's risk associated with the protection of human life and capital assets. They study ways to evaluate the social vulnerabilities to disaster and the special needs of at-risk populations, and they explore methods to reduce vulnerabilities and build capacity through structural and nonstructural mitigation. Additionally, students complete the FEMA Emergency
Management Institute course IS-393.a: Introduction to Hazard Mitigation as part of this course.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8204 - Fundamentals of Mapping and Geographic Information Systems

(5 cr.)
Students in this course are introduced to the fundamentals of mapping with geographic information systems. Through course readings and activities, students build an understanding of geospatial data assembly and manipulation, as well as the principles of cartographic design.

PPPA 8205 - Spatial Analysis and Modeling

(5 cr.)
In this course, students are introduced to advanced geospatial data processing and analysis through a combination of readings and computer exercises. Topics include advanced feature and attribute editing, spatial database queries, basic geoprocessing of both raster and vector data, and geospatial model building.

PPPA 8206 - GIS Research Methodology

(5 cr.)
Students gain familiarity with the tools and methods of research in geographic information systems by developing an intensive GIS project to solve a practical problem of student interest under guidance from the instructor.

PPPA 8215 - Controversies in Criminal Justice♦

(5 cr.)
Justice is at the heart of the U.S. democratic system, yet opposing viewpoints surrounding and within the system often muddle interpretations of the law and the development of policies to promote and enforce justice. In this course, students examine events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act, for example, the terrorist acts of September 11, 2001. They learn how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties. Through discussion with peers, assessment of contemporary articles, and examination of Supreme Course cases, students have the opportunity to reflect on and potentially broaden their own opinions and perspectives on current criminal justice affairs in regard to issues of law enforcement, public perception, policy development, and ethics.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
PPPA 8217 - Technological Solutions and 21st-Century Crime

(5 cr.)
In consideration of modern technological innovation and the spread of knowledge through digital means, the relationship between technology and criminal activity is increasing. In this course, students explore this relationship and gain a comprehensive view of cyber crime, including current trends. They learn how law enforcement agencies use technology to track and apprehend criminals. Through real-world scenarios, students examine legal responses to cyber crime and learn different approaches and techniques for solving cyber crimes and handling related challenges. Students also have the opportunity to gain a comprehensive understanding of building cases and prosecuting crimes through practical exercises in identification, data mining, and the protection and gathering of evidence.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8301 - Disaster Response and Recovery

(5 cr.)
A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issues, including evacuation, relocation, and tactical and strategic decisions in the immediate aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework (NRF), and they can gain an understanding of how local, state, and federal policies mesh in response and recovery efforts. Through their exploration, they study how recovery begins once the immediate threat of the emergency wanes and the focus shifts to restoring disaster-affected areas. As part of this course, students complete the FEMA Emergency Management Institute course IS208.a: State Disaster Management.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8320 - Public Policy Implications of Terrorism Legislation and Policies

(5 cr.)
Students in this course are provided with the opportunity to develop a broad perspective on the history of the U.S. Patriot Act, terroristic legislation and immigration laws, and their policy implications on law enforcement, governmental entities, organizations, and individuals. Students gain a foundation to build the skills that public administrators and public policy analysts use to draft and implement public policy and enforce and/or respond to potential terroristic threats while simultaneously upholding
and protecting constitutional freedoms. Students examine topics through a wide variety of resources, including contemporary texts, websites, case studies, and material representing international, national, and local governments and organizations. They critically review and analyze the U.S. Patriot Act and similar terroristic legislation and policies, and they participate in discussions about these laws and their implications on U.S. constitutional freedoms.

**PPPA 8321 - Terrorism: A Systemic Approach for Emergency Preparedness**

(5 cr.)
Terrorism continues to be a constant threat to the American public, facilitating the need for accurate information, organized resources, and established approaches to respond to emergencies and keep the public informed. Students in this course examine terrorism and related public policy on a local, national, and international level. They also assess the need and function of systemic approaches for emergency preparedness. Students explore and discuss topical issues, such as terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Using analytic skills and tools, students assess recommendations that policy makers use in decisions to prevent or respond to terrorism. They also gain hands-on experience initiating the development and/or analysis of a terrorism-preparedness infrastructure.

**PPPA 8322 - Critical Incident Planning and Leadership**

(5 cr.)
Who is responsible for emergency management, and what elements should be included in an emergency management plan? Students in this course have the opportunity to answer such questions as they examine the principles of emergency planning, selection of leaders, specialized planning (e.g., schools, tourism), mutual aid, and leadership theories. Students analyze case studies, identifying weaknesses in current methods as well as potential solutions. Through this analysis, students develop new strategies and perspectives in regard to responding to and planning for critical incidents. Public administrators or students planning to enter the field of public administration build a basic foundation to develop a critical incident plan and to gain a thorough understanding of leadership models and methods.

**PPPA 8330 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness**

(5 cr.)
Professionals in all areas of public policy and administration work with individuals and organizations of different cultures on a daily basis; therefore, global consciousness is vital to effective communication and interaction in the field. In this course, students explore and analyze the cultural values and styles of communication, reasoning, and leadership
unique to their home culture. Students apply these concepts to better understand the people, values, and policies of other cultures. They also identify and become familiar with challenges that American nonprofit organizations face as they work internationally or cross-culturally within the United States. Sharpening critical-thinking skills, students research and assess an organization within their own community that has international links; through this assessment, students gain further awareness of different cultures and the importance of cross-cultural ties.

Prerequisites
- A course or direct experience in nonprofit management is strongly advised.

**PPPA 8331 - Crossing Borders: U.S. and International NGO Organizational Cultures and Environments**

(5 cr.)
In this course, students study in depth the cultures, structures, and activities of NGOs in select countries and compare their activities, organizational cultures, structures, and working environments with nonprofits in the United States.

Prerequisites
- A course or direct experience in nonprofit management is strongly advised.

**PPPA 8332 - Placing NGOs in the Global Context**

(5 cr.)
Modern public policy and administration professionals use knowledge of international culture to understand the operations and structure of nongovernmental organizations (NGOs) in different countries, thus leading to well-informed, globally responsible decisions. In this course, students engage in a comprehensive study of the cultures, structures, and activities of NGOs in select countries. Students compare the activities, organizational cultures, structures, and working environments of these countries with nonprofit organizations in the United States. Through discussions, research, and topical writing assignments, students identify and assess the values, actions, and beliefs of a selected culture to gain an in-depth understanding of that culture's voluntary or NGO environment.

Prerequisites
- A course or direct experience in nonprofit management is strongly advised.

**PPPA 8350 - Historical and Contemporary Issues in Criminal Justice**

(5 cr.)
Decision- and policymakers must possess a fundamental understanding of crime theory, including the history of crime development, to be able to address knowledgeably and effectively modern issues of crime. In this course, students explore the evolution of
crime and punishment, including lone criminals to worldwide syndicates, using the scientific rigor built into selected readings, peer discussions, and practical assignments. They examine the philosophy of community- and problem-oriented policing, transnational crime, terrorism, and the new nexus between them. Employing quantitative and qualitative research methods, students continue their assessment of contemporary issues of crime. They also learn to use existing information to consider new methods of addressing crime. In this course, students who are current leaders or those hoping to enter a leadership role will acquire a framework upon which to build the knowledge and depth of understanding to assess and manage the opportunities, innovations, and challenges in their profession.

**PPPA 8351 - Policy Analysis in the Criminal Justice System**

(5 cr.)
Criminal justice professionals must understand the various factors that influence the development of criminal justice policy, and how to evaluate whether existing policy meets its objectives. In this course, students will examine the principles of policy analysis and the role that scientific information plays in the development of criminal justice policy. Topics explored include policing, corrections, and sentencing; juvenile justice; the relationship among drugs, race, and crime; deterrence as a crime control policy; and the use of public registries. Through further analysis of criminal justice policies, students determine how these policies have changed over time, gaining insight into possible future trends of policy development and analysis.

**PPPA 8352 - Leadership: Putting Theory Into Practice in Criminal Justice Administration**

(5 cr.)
There are many challenges plaguing the criminal justice system, from economic hardship to growing threats of terrorism. Leaders in the system must be adept in problem-solving, and they must possess the ability to think critically and proactively. Through this course, students are introduced to the problems that currently confront the criminal justice system administration as well as problems predicted for the future. Students prepare to lead efforts to address these challenges by engaging in practical assignments focusing on powerful models for strategic, critical, and reflective thinking. Students also engage in discussions about the major components of effective justice administration, including organizational thought and theory, leadership, human capital, policy development and implementation, and collaboration with other public safety and community organizations.

**PPPA 8360 - Public Safety Issues**

(5 cr.)
In consideration of technological innovation, terrorism, and other modern factors,
threats to the American public are changing, thus requiring professionals who have the ability to identify, plan for, and mitigate crime and disaster incidents. In this course, students examine foundational public safety concepts and investigate issues faced by public safety agencies and personnel at the local, state, and national level, including police and sheriff, emergency medical, fire services, and related organizations. They explore and discuss the ways in which public safety organizations communicate and coordinate and learn why effective interaction is vital to emergency management. They also gain practical experience employing tools used by public safety professionals, such as a public safety constituency matrix, through which students assess competing demands on the various agencies. In this course, students work toward gaining the skills needed to anticipate the needs of various constituents to develop effective public safety initiatives.

**PPPA 8361 - Managing Public Safety Organizations**

(5 cr.)
Public safety leaders are responsible for finding solutions to major issues confronting their community and organizational operating systems through research, analysis, planning, and decision making. In this course, students assess these tools and solutions to learn the intricacies of managing public safety organizations. They engage in written assignments and discussions on a variety of topics, such as systems approaches, environmental analyses, contingency planning, implications for change, coordination, and controls. Students learn ways to apply classic business management techniques and leadership principles to public safety operations. They also apply concepts presented in the course to the development of solutions and alternatives to varied situations confronting public safety managers.

**PPPA 8380 - Policy and Politics in American Political Institutions**

(5 cr.)
Students in this course are introduced to the crafts of policymaking and policy analysis in the U.S. democratic system. Students examine the tasks involved in the policy process, including setting agendas, using policy analysis tools, managing the political process, implementing policy, and providing evaluations and feedback. Through this analysis, students develop the skills necessary to conduct policy and economic analyses as well as to determine the political feasibility of proposed policies. They learn about regulation as a policy choice. They also work toward enhancing their ability to develop alternatives and to assess strategies proposed to achieve certain policy objectives. Students engage in scholarly writing assignments and discussions on policy areas of interest, such as communications, immigration, transportation, housing, labor, arts, and environmental policies.

**PPPA 8381 - Public Policy and Evaluation**
There are a variety of tools available to policymakers and policy analysts to evaluate the impact of social programs. In this course, students examine these tools and work toward gaining the skills needed to develop plans for evaluation and to assess social programs effectively. Students engage in discussions and assignments designed to provide practical application of content on a variety of topics, such as selecting programs to evaluate, crafting program descriptions, identifying stakeholders and their interests, developing logic models, framing evaluation questions, applying utilization-focused evaluation techniques, using quantitative and qualitative tools to complete formative and summative evaluations, and providing evaluation reports and feedback to decision makers. Using concepts presented in the course, students gain hands-on experience developing an evaluation design for a social program.

**PPPA 8382 - Public Policy and Finance**

There are a variety of tools available to policymakers and policy analysts to evaluate the impact of social programs. In this course, students examine these tools and work toward gaining the skills needed to develop plans for evaluation and to assess social programs effectively. Students engage in discussions and assignments designed to provide practical application of content on a variety of topics, such as selecting programs to evaluate, crafting program descriptions, identifying stakeholders and their interests, developing logic models, framing evaluation questions, applying utilization-focused evaluation techniques, using quantitative and qualitative tools to complete formative and summative evaluations, and providing evaluation reports and feedback to decision makers. Using concepts presented in the course, students gain hands-on experience developing an evaluation design for a social program.

**PPPA 8390 - Strategic Context of Public Management and Leadership**

Students in this course engage in a collaborative study of the changing strategic context of public administration. Students apply a systems perspective to construct a public enterprise “mental” model of a public organization to understand the strategic context for practical action and the stakeholder relations involved. Students demonstrate their knowledge of the interrelated flows of money, knowledge, and influence, as they weave these elements in their model. They engage in readings and practical assignments that emphasize management and leadership in a time of unprecedented and unpredictable change. Students also work toward developing professional-action habits for pragmatic-action learning in the practice of public administration.

**PPPA 8391 - Transformative Change in a Shared-Power World**
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

PPPA 8392 - The Language of Leadership

In today’s complex environment, leaders engaged in shaping public policy must know how to use the emotional as well as the intellectual power of language to motivate, inspire, and competently manage their organizations. In this course, students examine techniques, such as effective communication, used in dynamic leadership that affect conscious and unconscious influences on human behavior. Through discussions, group assignments, and individual projects, students apply theoretical and practical course content to demonstrate the necessary components for making effective human connections. Students also learn why stories, symbols, and metaphors are essential elements in the language of leadership.

PPPA 8401 - Public Health Leadership and Systems Thinking♦

In this course, students explore leadership models and theories, the core principles of public health leadership, and the application of systems thinking to public health. They examine how to create strategies and solutions that efficiently utilize public health and healthcare resources. Students also discuss descriptive and prescriptive systems, focusing on the application of these processes to current public health issues and challenges at the organizational and community levels.

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

PPPA 8405 - Ethics and Social Justice♦

Ethics is a fundamental element of leadership. In this course, students consider some of the leading philosophical bases of ethics as well as foundational social justice themes upon which public service rests. Seminal texts and case studies used to illuminate the tasks leaders face as they seek to serve diverse constituents. Students confront the
challenge of ethical decision making and moral action in a world characterized (among other things) by economic disparity, power imbalances, social privilege, and division due to race and/or religion. Applying concepts presented in the course, students engage in an in-depth assessment of emerging or persistent ethical and social justice issues, with the objective of demonstrating an ability to make recommendations which lead to positive social change.

**Prerequisites**

- MMPA 6116, NPMG 6116, PPPA 8000, PPPA 8000i, MMPA 6200, NPMG 6200, CRJS 6000, CRJS 6002, HUMN 8000, or HLTH 8003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PPPA 8420 - Health Economics♦**

(5 cr.)
Students in this course examine the application of economic principles to healthcare managerial decision making regarding the amount, structure, and distribution of healthcare resources and services. Because of the complexity and uncertainty of the healthcare system, as well as the scope of resources consumed by health and health-related organizations, managers must appreciate the economic implications of decisions regarding allocation of resources. Students advance their knowledge of economic principles as reflected in the population demand for health; the demand for healthcare and medical care; the supply of health organizations and practitioners; the role of insurance, moral hazard, and adverse selection; the practice of cost-shifting; the structure, competitive nature, and dynamics of markets; differing objectives of for-profit and non-profit organizations; variation in consumer access to and utilization of services; roles of uncertainty and information asymmetry; strategies for consumer cost-sharing; and the challenges healthcare organizations face in the pricing, production, allocation, and distribution of health and medical services. Special attention is devoted to understanding how health services differ in a variety of competitive markets.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PPPA 8431 - Finance and Budgeting for the Public Sector♦**

(5 cr.)
Sound financial practices are crucial to managing scarce funds in both public and nonprofit operations. Students in this course examine finance and budgeting concepts, policies, and practices related to organizations as well as the fiscal climate within which they operate. They assess theories for motivating major fiscal-policy debates, and they explore and discuss auditing practices, tax systems, financial management, budgetary reform, financial technology systems, the use of dashboards for financial reporting, and
the impact of globalization on finance and budget. Students read and analyze budgets, financial statements, and reports. They contextualize their learning as they apply knowledge gained from their analysis to develop a new budget and financial plan for either a public or private organization.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination

(5 cr.)
In an increasingly complex world, leaders and managers in public and nonprofit organizations plan strategies to fulfill the organizational mission and enhance stakeholder satisfaction. Students in this course explore the role and process of strategic planning, including collaboration, cooperation, and coordination. They also examine the benefits, challenges, and pitfalls of strategic planning, in addition to the impact of globalization. Students apply these concepts to real-life scenarios and develop a strategic plan for a nonprofit or public organization.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8540 - Strategic Planning, Management, and Leadership in a Global Context

(5 cr.)
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships between strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: thinking, acting, and leading strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

PPPA 8540i - Strategic Planning, Management, and Leadership in a Global Context

(5 cr.)
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course
identify, analyze, and evaluate the intricate relationships between strategic planning, management, and leadership from an international perspective. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

PPPA 8541 - Sustainable Development for Global Communities

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

PPPA 8541i - Sustainable Development for Global Communities

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

PPPA 8542 - Transformative Change in a Global Environment

(5 cr.)
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the
dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

**PPPA 8740 - Disaster, Crisis, and Trauma**

(5 cr.)
There is no shortage of natural and human-made disasters, such as war, violence, genocide, and terrorist activities. Individuals and communities impacted by such disasters often need assistance from professionals who understand the social, cultural, and psychological complexities of crisis and trauma. Students in this course investigate how these incidents impact the psychology of individuals and groups. They assess traditional and current literature and complete practical exercises to learn about theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with trauma. Considering the various ways crisis professionals can promote positive social change, students devote special attention to the importance and development of culturally appropriate, service-delivery programs and interventions for individuals affected and traumatized by disasters.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PPPA 8741 - Psychology of Terrorism**

(5 cr.)
Many sources define terrorism as a type of psychological warfare, as it induces fear and feelings of vulnerability. Therefore, professionals need to understand all aspects of terrorism to help prevent further terrorist acts and respond to victims who have been affected psychologically. Students in this course explore terrorism from a psychological perspective. They examine types of terrorism; contributing factors related to the development of terrorists and terrorist organizations; counterterrorism agencies and laws; the impact of terrorist events on individuals, families, and communities; prevention, intervention, and postvention with survivors; media coverage of terrorist events; human rights and ethical issues; and future trends related to the psychology of terrorism. Students also examine the threat of terrorism in their own community and evaluate the potential impact. Using concepts presented in the course, they consider applications for preventative measures as well as strategies to promote resiliency among individual and families who may become victims of terrorism.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*
**PPPA 8810 - Fundamentals of Law and Public Policy**

(5 cr.)
Legal decisions and the law often have a major impact on the creation of public policy. In this course, students explore and discuss the relationship between laws and public policy and the impact that court decisions have on policy and policy leaders. They examine the role of administrative agencies in the creation and execution of law and public policy and the role of the courts in resolving challenges to agency rule making; conflicts between executive and legislative branches of government; and conflicts between and among federal, state, and local laws. Students have the opportunity to sharpen their critical-thinking and research-database skills as they search for real-world examples of how fundamental legal concepts and processes affect the creation and execution of law and public policy.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PPPA 8811 - Legal Research for Policy Practitioners**

(5 cr.)
There is a wealth of vital legal knowledge available to public policy practitioners. In this course, students explore the many print and electronic resources available for legal research. Students examine how practitioners use the law to inform the creation of public policy. They engage in assignments designed to provide practical application of content to learn how to navigate legal libraries, cite cases, and employ research to support public policy. Students also gain experience in applying legal research to case studies and contemporary issues.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PPPA 8812 - Contemporary Cases and Issues in the Courts**

(5 cr.)
Major issues in the Supreme Court continue to have an impact on public policy at the state and local levels. In this course, students examine major past and current U.S. Supreme Court cases related to abortion, privacy, due process, personal property, and freedom of religion and speech. They also examine major cases related to state powers, government entitlement, and powers of the judicial and federal branches of government. From this assessment, students determine how outcomes of such cases affect public policy. Students also explore and discuss individual rights, property rights, administrative law, immigration law, and foreign policy as well as contemporary issues and case studies, to which they apply legal research and verdicts.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PPPA 8820 - Elements of Sustainable and Livable Communities

(5 cr.)
Creating and maintaining sustainable and livable communities requires leaders who understand the connections among the natural, built, and social environments, and who can address these connections in a holistic and integrated fashion. Students in this course examine concepts of sustainability and livability and explore popular approaches to creating and maintaining communities that are more environmentally sound, economically prosperous, and socially equitable. They also focus on strategies to halt urban sprawl and to promote alternative modes of transportation. Students define and explore these concepts through case studies and examples drawn from local communities.

♢ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8821 - Tools for Sustainable Community Development

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

♢ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8822 - Current Issues in Regional and Local Public Policy

(5 cr.)
Public decision makers must understand and address a variety of complex and interrelated issues, such as land use and transportation, energy and environment, housing and schools, and regional economic development. In this course, students learn how leaders attend to these issues in light of existing policies and contemporary social, economic, political, demographic, and technological trends. Students explore and discuss planning processes, tools, approaches, strategies, and policies used to create sustainable and livable communities through collaborative processes involving multiple stakeholders. Through the development of a policy-option written assignment, students assess critical issues and identify problem-solving strategies.

♢ Students may take this as a non-degree course, which means they do not have to be enrolled in a
PPPA 8830 - Current Issues in Homeland Security

(5 cr.)
Since its inception, the Department of Homeland Security has profoundly impacted public policy and administration. Students in this course examine homeland security history, concepts, policies, and strategies of prevention and response. Topics include ethical issues, telecommunications, technology, threat assessment, contingency planning, and risk management. Students apply fundamental concepts and principles of homeland security to case studies and current issues.

PPPA 8831 - Critical Incident Leadership and Planning

(5 cr.)
Strategic leadership and planning are required to effectively prevent, respond to, and recover from critical incidents that threaten homeland security. Students in this course explore the role and importance of leadership and planning in critical incident management and the application of tools, strategies, and systems to specific critical incidents. Through the evaluation of case studies, students examine the impact of critical incidents on individuals and communities as well as roles of government agencies and nongovernment organizations in managing such incidents. Using concepts and theories presented in the course, students develop a critical incident management plan for their community through which they consider new strategies and perspectives in regard to critical incident leadership and planning.

PPPA 8832 - Terrorism: Legislation and Policy

(5 cr.)
The events of Sept. 11 resulted in a new and intense focus on the issue of terrorism in the United States and abroad. In this course students explore the history of terrorism; laws, regulations, and legislation related to terrorism; and the roles of the media, governmental agencies, and entities in the prevention of and response to terrorism. Students apply their knowledge to case studies and current trends related to terrorism.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8841 - Health Policy and Management

(5 cr.)
In this course, students examine the factors that influence and improve health outcomes of individuals and populations, with attention to the goals of Healthy People 2010 and the main components and issues of organization, financing, and delivery of health services and public health systems in the United States. Topics include management
theories and processes, systems thinking, strategic planning and partnerships, quality and performance improvement, leadership, and organizational behavior. The policy process is addressed, as well as the advocacy role of the public health professional in influencing local, state, and federal policy. The impact of global trends on public health practice, policy, and systems is also considered.

PPPA 8843 - Legal and Regulatory Aspects of Public Health♦

(5 cr.)
In this course, students examine the role of federal, state, and local government in the assurance of public health through legislation and regulation. Consideration is given to contemporary legal and regulatory issues arising in public health practice and emergencies with attention to public health security and preparedness in response to bioterrorism and disasters.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8850 - Introduction to the Nonprofit Sector♦

(5 cr.)
Nonprofit organizations (NPOs) can serve to positively affect people's lives through social change, but they require leaders who have a fundamental understanding of the nonprofit sector, including related ethical, legal, and global perspectives. Students in this course explore these viewpoints as well as the history, foundations, and types of NPOs. They also examine the diverse political, social, and economic contexts within which NPOs exist. Students explore and apply marketing, public relations, and communication concepts and strategies to case studies and contemporary situations. Gaining practical insight, students also apply theories presented in the course to the development of a concept paper guiding the development of a nonprofit organization.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PPPA 8851 - Board Governance and Volunteer Management♦

(5 cr.)
The success of nonprofit organizations (NPOs) is largely dependent on the effective management of program volunteers and board members—individuals who often serve as the lifeblood of NPOs. Students in this course explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation. They focus on methods that organizations use to create and maintain an effective Board of Directors to ensure that the board governs and guides the organization toward their mission. Students design a board development or volunteer management plan based on processes presented in the course and fundamental concepts.
acquired earlier in the program.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PPPA 8852 - Resource Development**

*(5 cr.)*

All nonprofit organizations require financial resources. Obtaining philanthropic financial support is essential to program delivery and stability. Students in this course explore the concepts of philanthropy and development, identification of funding sources, donor/prospect cultivation and education, and solicitation and appreciation strategies. They focus on processes and strategies for creating an organizational philanthropic culture based on ethics and donor relationships. Using these strategies and other concepts presented in the course, students create a resource development plan for a nonprofit organization.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PPPA 9000 - Dissertation**

*(5 credits per quarter for a minimum of 4 quarters until completion)*

Through the final dissertation, students demonstrate their scholarly ability to examine, critique, and synthesize knowledge and experience, so that new ideas can be tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. Doctoral students have the opportunity to integrate their Program of Study into an in-depth exploration of an interest area, culminating in the completion of their dissertation research study in this course. Students complete the dissertation independently, with the guidance of a supervisory committee chair and committee members. Students complete a prospectus, proposal, Institutional Review Board application, and a final oral presentation and written dissertation. Ultimately, every dissertation should make a fresh contribution to the field of public policy and administration.

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**Prerequisites**

- All prior coursework
Note: When students register for PPPA 9000, they will be registered automatically each term until successful completion of the dissertation.

PRAC 6531 - Primary Care of Adults Across the Lifespan Practicum

(2 cr.)
Nurse practitioner students in their specialty, will synthesize their knowledge from previous clinical courses and professional experiences related to the issues and trends in healthcare needs of adults across the lifespan including the diagnosis and management of various conditions. The focus of this course is on advanced nursing practice in the acute/chronic care environment of the adult patient. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to plan, implement, and evaluate therapeutic regimens for adult patients with common acute and chronic conditions.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521

Note: This course requires a minimum of 160 practicum hours.

PRAC 6540 - Advanced Practice Care of Older Adults Practicum

(2 cr.)
This is one of four practicum courses in the Adult-Gerontology curriculum. Students will apply their knowledge of pathophysiology, pharmacology, and physical assessment to the diagnosis and management of those conditions more common in older adults. The focus of this course is on advanced nursing practice relevant to the acute and primary care environments.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521

Note: This course requires a minimum of 160 practicum hours.

PRAC 6541 - Primary Care of Adolescents and Children Practicum

(2 cr.)
Nurse practitioner students in their specialty, will synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of adolescents and children including the diagnosis and management of various conditions. The focus of this course is on advanced nursing practice in the
acute/chronic care environment of the adolescent and child patient. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to plan, implement, and evaluate therapeutic regimens for pediatric patients with common acute and chronic conditions.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6531 or NUNP 6531 or (NRNP 6531 and PRAC 6531)

Note: This course requires a minimum of 160 practicum hours.

PRAC 6550 - Advanced Practice Care of Adults in Acute Care Settings II Practicum
(2 cr.)
This is the second of four practicum courses in the Adult-Gerontology Acute Care curriculum. Students will apply their knowledge of pathophysiology, pharmacology, and physical assessment to the diagnosis and management of adolescents, adults, and older adults with acute/critical illness. The focus of this course is on the development of advanced practice clinical skills under the direct supervision of an approved preceptor in an acute care practice setting.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NUNP 6540
- NUNP 6566

Note: This course requires a minimum of 160 practicum hours.

PRAC 6552 - Advanced Nurse Practice in Reproductive Health Care Practicum
(2 cr.)
Nurse practitioner students in their specialty, will synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of individuals, families, and communities including the diagnosis and management of reproductive care. The focus of this course is on advanced nursing practice in the acute/chronic care environment of the gynecologic and/or obstetric patient. Students also examine how to care for patients based on sexual preferences and gender identification.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6531 or NUNP 6531 or (NRNP 6531 and PRAC 6531)
- (NRNP 6540 and PRAC 6540) or (NRNP 6541 and PRAC 6541)

Note: This course requires a minimum of 160 practicum hours.

**PRAC 6553 - Advanced Nurse Practice in Obstetric Health Care Practicum**

**(2 cr.)**
Nurse practitioner students in their specialty synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of individuals, families, and communities including the diagnosis and management of obstetric care. The focus of this course is on advanced nursing practice in the acute/chronic care environment of obstetric patients.

**Prerequisites**
- NURS 6501
- NURS 6512
- NURS 6521
- NRNP 6531 and PRAC 6531
- NRNP 6553

**PRAC 6560 - Advanced Care of Adults in Acute Settings III Practicum**

**(2 cr.)**
This is the final of four practicum courses in the Adult-Gerontology curriculum. Students will apply their knowledge of pathophysiology, pharmacology, and physical assessment to the diagnosis and management of adolescents, adults, and older adults with acute/critical illness. The focus of this course is on advanced nursing practice in the acute care environment.

**Prerequisites**
- NURS 6501
- NURS 6512
- NURS 6521
- NUNP 6540
- NUNP 6566
- NUNP 6550

Note: This course requires a minimum of 160 practicum hours.

**PRAC 6565 - Synthesis in Advanced Nursing Practice of Patients in Primary Care Settings Practicum**

**(2 cr.)**
This is the last of four practicum courses in the Adult Gerontology Primary Care Nurse
Practitioner program. Clinical experiences in primary care settings provide students with the continued opportunity to develop, implement, and evaluate management plans for patients with complex health conditions. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized.

**Prerequisites**
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6531 or NUNP 6531
- NURS 6541 or NUNP 6541
- NRNP 6552 or NUNP 6552

**Note:** This course requires a minimum of 160 practicum hours and must be the last course in the curriculum.

**PRAC 6566 - Advanced Care of Adults in Acute Settings I Practicum**

(2 cr.)
This is the first of four practicum courses in the Adult-Gerontology curriculum. Students will apply their knowledge of pathophysiology, pharmacology, and physical assessment to the diagnosis and management of adolescents, adults, and older adults with acute/critical illness. The focus of this course is on advanced nursing practice in the acute care environment.

**Prerequisites**
- NURS 6501
- NURS 6512
- NURS 6521

**Note:** This course requires a minimum of 160 practicum hours.

**PRAC 6568 - Synthesis in Advanced Nursing Practice of Patients in Family Care Settings Practicum**

(2 cr.)
This is the last of four practicum courses in the Family Nurse Practitioner program. Clinical experiences in family settings provide students with the continued opportunity to develop, implement, and evaluate management plans for patients with complex health conditions. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized.

**Prerequisites**
- NURS 6501
- NURS 6512
• NURS 6521
• NRNP 6531 and PRAC 6531
• (Pre- or Co-requisites) NRNP 6541 and PRAC 6541
• (Pre- or Co-requisites) NRNP 6552 and PRAC 6552

Note: This course requires a minimum of 160 practicum hours and must be the last course in the curriculum.

PRAC 6635 - Psychopathology and Diagnostic Reasoning Practicum

(2 cr.)
Advanced practice psychiatric-mental health nurses need to have the knowledge and ability to provide safe, competent, and comprehensive mental health assessments to patients in mental health settings across the lifespan. Students in this course apply assessment skills to include psychiatric interviewing, history taking, and examination to gather patient data to inform diagnosis. They also apply knowledge of psychopathology and diagnostic reasoning in clinical settings for health promotion and psychiatric assessment, and to develop differential diagnosis for patients with psychiatric and substance use disorders across the lifespan. Students synthesize their knowledge from previous coursework and professional experiences to develop advanced communication and documentation skills.

Note: Students with catalog years before Spring 2018 must complete a minimum of 144 practicum hours. Students with catalog years beginning Spring 2018 must complete a minimum of 160 practicum hours. A minimum of 80 patients are required. Required hours cannot be completed sooner than 8 weeks.

PRAC 6645 - Psychotherapy With Multiple Modalities Practicum

(2 cr.)
Psychiatric mental health nurse practitioner students in this course synthesize their knowledge from previous clinical courses and professional experiences related to the assessment, diagnosis, and treatment of various mental health conditions for patients across the lifespan. Students gain clinical experience applying psychotherapy techniques in a mental healthcare setting.

Note: 160 practicum hours and a minimum of 80 patient encounters are required for this course. Practicum experiences must include interactions with all three modalities: individuals, groups, and families.

PRAC 6665 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan I Practicum

(2 cr.)
This is the third of four practicum courses in the advanced practice psychiatric-mental health curriculum. Students will apply their knowledge of psychopathology,
psychopharmacology, and psychiatric assessment to the diagnosis, treatment, and management of mental health disorders in children, adolescents, adults, and older adults. The focus of this course is on advanced nursing practice in mental health settings.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6630
- PRAC 6635
- PRAC 6645

Note: Students with catalog years before Spring 2018 must complete a minimum of 144 practicum hours; those with catalog years beginning Spring 2018 must complete a minimum of 160 practicum hours. A minimum of 80 patient encounters (40 children/adolescents and 40 adults/older adults) is required.

PRAC 6675 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan II Practicum

(2 cr.)
This is the final of four practicum courses in the advanced practice psychiatric-mental health curriculum. Students will apply their knowledge of psychopathology, psychopharmacology, and psychiatric assessment to the diagnosis, treatment, and management of mental health disorders in children, adolescents, adults, and older adults. The focus of this course is on advanced nursing practice in mental health settings.

Prerequisites
- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6630
- PRAC 6645
- PRAC 6665

Note: Students with catalog years before Spring 2018 must complete a minimum of 144 practicum hours; those with catalog years beginning Spring 2018 must complete a minimum of 160 practicum hours. A minimum of 80 patient encounters (40 children/adolescents and 40 adults/older adults) is required.

PRAC 6810 - Advanced Pediatric Nursing Practicum I: Primary Care

(2 cr.)
Pediatric nurse practitioner students will synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of
children from birth to young adulthood, including well-child care, age-appropriate anticipatory guidance, and the diagnosis and management of various pediatric conditions. The focus of this course is on pediatric nursing practice in the outpatient care environment of the pediatric patient. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to take a subjective history, complete a thorough objective examination, make appropriate assessments with differentials, and plan both pharmacologic and non-pharmacologic treatment.

Note: This course requires a minimum of 160 clinical hours.

**PRAC 6820 - Advanced Pediatric Nursing Practicum II: Complex Care**

(2 cr.)

Pediatric nurse practitioner students will synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of children from birth to young adulthood, including well-child care, age-appropriate anticipatory guidance, and the diagnosis and management of various chronic and complex pediatric conditions. The focus of this course is on pediatric nursing practice in the outpatient care environment of the pediatric patient. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to take a subjective history, complete a thorough objective examination, conduct appropriate assessments, identify differentials, make referrals, and plan both pharmacologic and nonpharmacologic therapeutic treatment regimens for well and sick pediatric patients with common chronic and complex conditions.

**Prerequisites**

- NURS 6501
- NURS 6512
- NURS 6521
- NURS 6800
- NRNP 6810
- PRAC 6810

Note: This course requires a minimum of 160 clinical hours.

**PRAC 6830 - Advanced Pediatric Nursing Practicum III: Specialty Care**

(2 cr.)

Pediatric nurse practitioner students will synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of specialized pediatric populations from birth to young adulthood. The focus of this course is on pediatric nursing practice in the outpatient care environment of pediatrics patients of various subpopulations including patients with behavioral health issues, victims of bullying, and adolescents. Pediatric nurse practitioner students with will synthesize their knowledge of sexuality, contraception, eating disorders, LGBTQ+
youth, child abuse, mental health, and foster children. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to take a subjective history, complete a thorough objective examination, make appropriate assessments with differentials, and plan both pharmacologic and non-pharmacologic therapeutic treatment regimens for well and sick pediatric patients with common acute and chronic conditions.  
Prerequisites  
- PRAC 6810  
- PRAC 6820  

Note: This course requires a minimum of 160 clinical hours, 80 of which may be completed in specialty care.  

PRAC 6840 - Advanced Pediatric Nursing Practicum IV: Synthesis Care  
(2 cr.)  
This culminating clinical course focuses on the synthesis of theory and clinical management skills to manage the care of a pediatric patient. It also assists students with implementing the primary care pediatric nurse practitioner role in a collaborative model of practice.  
Prerequisites  
- PRAC 6810  
- PRAC 6820  
- PRAC 6830  

Note: This course requires a minimum of 160 clinical hours  

PRCM 6531 - Primary Care of Adults Across the Lifespan Practicum  
(2 cr.)  
Nurse practitioner students in their specialty, will synthesize their knowledge from previous clinical courses and professional experiences related to the issues and trends in healthcare needs of adults across the lifespan including the diagnosis and management of various conditions. The focus of this course is on advanced nursing practice in the acute/chronic care environment of the adult patient. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to plan, implement, and evaluate therapeutic regimens for adult patients with common acute and chronic conditions.  
Prerequisites  
- DNRS 6501  
- DNRS 6512  
- DNRS 6521  

Note: This course requires a minimum of 160 practicum hours.
PRCM 6540 - Advanced Practice Care of Older Adults Practicum

(2 cr.)
This is one of four practicum courses in the Adult-Gerontology curriculum. Students will apply their knowledge of pathophysiology, pharmacology, and physical assessment to the diagnosis and management of those conditions more common in older adults. The focus of this course is on advanced nursing practice relevant to the acute and primary care environments.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521

Note: This course requires a minimum of 160 practicum hours.

PRCM 6541 - Primary Care of Adolescents and Children Practicum

(2 cr.)
Nurse practitioner students in their specialty, will synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of adolescents and children including the diagnosis and management of various conditions. The focus of this course is on advanced nursing practice in the acute/chronic care environment of the adolescent and child patient. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to plan, implement, and evaluate therapeutic regimens for pediatric patients with common acute and chronic conditions.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNP 6531

Note: This course requires a minimum of 160 practicum hours.

PRCM 6550 - Advanced Practice Care of Adults in Acute Settings II Practicum

(2 cr.)
This is the second of four practicum courses in the Adult-Gerontology Acute Care curriculum. Students will apply their knowledge of pathophysiology, pharmacology, and physical assessment to the diagnosis and management of adolescents, adults, and older adults with acute/critical illness. The focus of this course is on the development of advanced practice clinical skills under the direct supervision of an approved preceptor in an acute care practice setting.

Prerequisites
• DNRS 6501
• DNRS 6512
• DNRS 6521
• DRNP 6540
• DRNP 6566

Note: This course requires a minimum of 160 practicum hours.

PRCM 6552 - Advanced Nurse Practice in Reproductive Health Care Practicum

(2 cr.)
Nurse practitioner students in their specialty, will synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of individuals, families, and communities including the diagnosis and management of reproductive care. The focus of this course is on advanced nursing practice in the acute/chronic care environment of the gynecologic and/or obstetric patient. Students also examine how to care for patients based on sexual preferences and gender identification.

Prerequisites
• DNRS 6501
• DNRS 6512
• DNRS 6521
• DRNP 6531
• DRNP 6540 or DRNP 6541

Note: This course requires a minimum of 160 practicum hours.

PRCM 6553 - Advanced Nursing Practice Care of Women’s Health Practicum

(2 cr.)
Nurse practitioner students in their specialty synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of individuals, families, and communities including the diagnosis and management of obstetric care. The focus of this course is on advanced nursing practice in the acute/chronic care environment of obstetric patients.

Prerequisites
• NURS 6501
• NURS 6521
• NURS 6512

PRCM 6560 - Advanced Practice Care of Adults in Acute Settings III Practicum
This is the final of four practicum courses in the Adult-Gerontology curriculum. Students will apply their knowledge of pathophysiology, pharmacology, and physical assessment to the diagnosis and management of adolescents, adults, and older adults with acute/critical illness. The focus of this course is on advanced nursing practice in the acute care environment.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNP 6540
- DRNP 6566
- DRNP 6550

Note: This course requires a minimum of 160 practicum hours.

PRCM 6565 - Synthesis in Advanced Nursing Practice Care of Patients in Primary Care Settings Practicum

This is the last of four practicum courses in the Adult Gerontology Primary Care Nurse Practitioner program. Clinical experiences in primary care settings provide students with the continued opportunity to develop, implement, and evaluate management plans for patients with complex health conditions. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNP 6531
- DRNP 6541
- DRNP 6552

Note: This course requires a minimum of 160 practicum hours and must be the last course in the curriculum.

PRCM 6566 - Advanced Practice Care of Adults in Acute Settings I Practicum

This is the first of four practicum courses in the Adult-Gerontology curriculum. Students will apply their knowledge of pathophysiology, pharmacology, and physical assessment to the diagnosis and management of adolescents, adults, and older adults with acute/critical illness. The focus of this course is on advanced nursing practice in the acute care environment.
environment.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521

Note: This course requires a minimum of 160 practicum hours.

PRCM 6568 - Synthesis in Advanced Nursing Practice of Patients in Family Care Settings Practicum

(2 cr.)
This is the last of four practicum courses in the Family Nurse Practitioner program. Clinical experiences in family settings provide students with the continued opportunity to develop, implement, and evaluate management plans for patients with complex health conditions. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized.

Note: This course requires a minimum of 160 practicum hours.

PRCM 6635 - Psychopathology and Diagnostic Reasoning Practicum

(2 cr.)
Advanced practice psychiatric-mental health nurses need to have the knowledge and ability to provide safe, competent, and comprehensive mental health assessments to patients in mental health settings across the lifespan. Students in this course apply assessment skills to include psychiatric interviewing, history taking, and examination to gather patient data to inform diagnosis. They also apply knowledge of psychopathology and diagnostic reasoning in clinical settings for health promotion and psychiatric assessment, and to develop differential diagnosis for patients with psychiatric and substance use disorders across the lifespan. Students synthesize their knowledge from previous coursework and professional experiences to develop advanced communication and documentation skills.

Note: This course requires a minimum of 160 practicum hours.

PRCM 6645 - Psychotherapy With Multiple Modalities Practicum

(2 cr.)
Psychiatric mental health nurse practitioner students in this course synthesize their knowledge from previous clinical courses and professional experiences related to the assessment, diagnosis, and treatment of various mental health conditions for patients across the lifespan. Students gain clinical experience applying psychotherapy techniques in a mental healthcare setting.

Note: 160 practicum hours and a minimum of 80 patient encounters are required for
this course. Practicum experiences must include interactions with all three modalities: individuals, groups, and families.

PRCM 6665 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan I Practicum

(2 cr.)
This is the third of four practicum courses in the advanced practice psychiatric-mental health curriculum. Students will apply their knowledge of psychopathology, psychopharmacology, and psychiatric assessment to the diagnosis, treatment, and management of mental health disorders in children, adolescents, adults, and older adults. The focus of this course is on advanced nursing practice in mental health settings.
Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DNRS 6630
- PRCM 6635
- PRCM 6645

Note: This course requires a minimum of 160 practicum hours.

PRCM 6675 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan II Practicum

(2 cr.)
This is the final of four practicum courses in the advanced practice psychiatric-mental health curriculum. Students will apply their knowledge of psychopathology, psychopharmacology, and psychiatric assessment to the diagnosis, treatment, and management of mental health disorders in children, adolescents, adults, and older adults. The focus of this course is on advanced nursing practice in mental health settings.
Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DNRS 6630
- PRCM 6645
- PRCM 6665

Note: This course requires a minimum of 160 practicum hours.

PRCM 6810 - Advanced Pediatric Nursing Practicum I: Primary Care
Advanced practice nursing students in this course conduct comprehensive assessments, formulate differential diagnoses, and suggest plans of care to manage well children and minor health problems in children. In collaboration with other healthcare providers, students provide care in primary care settings where they integrate health promotion, disease prevention, and evidenced-based practice.

Note: This course requires a minimum of 160 clinical hours.

**PRCM 6820 - Advanced Pediatric Nursing Practicum II: Complex Care**

Pediatric nurse practitioner students will synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of children from birth to young adulthood, including well-child care, age-appropriate anticipatory guidance, and the diagnosis and management of various chronic and complex pediatric conditions. The focus of this course is on pediatric nursing practice in the outpatient care environment of the pediatric patient. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to take a subjective history, complete a thorough objective examination, conduct appropriate assessments, identify differentials, make referrals, and plan both pharmacologic and nonpharmacologic therapeutic treatment regimens for well and sick pediatric patients with common chronic and complex conditions.

**Prerequisites**
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DNRS 6800
- DRNP 6810
- PRCM 6810

Note: This course requires a minimum of 160 clinical hours.

**PRCM 6830 - Advanced Pediatric Nursing Practicum III: Specialized Care**

Pediatric nurse practitioner students will synthesize their knowledge from previous clinical courses and experiences related to the issues and trends in healthcare needs of children from birth to young adulthood, including well-child care, age-appropriate anticipatory guidance, and the diagnosis and management of various pediatric conditions. The focus of this course is on pediatric nursing practice in the outpatient care environment of the pediatric patient. Students gain confidence in clinical experiences in a primary healthcare setting where they learn to take a subjective history, complete a thorough objective examination, made appropriate assessments with differentials and plan both pharmacologic and non-
pharmacologic therapeutic treatment regimens for well and sick pediatric patients with common acute and chronic conditions.

Prerequisites
- PRCM 6810
- PRCM 6820

Note: This course requires a minimum of 160 clinical hours, 80 of which may be completed in specialty care.

PRCM 6840 - Advanced Pediatric Nursing Practicum IV: Synthesis Care

(2 cr.)
This culminating clinical course focuses on the synthesis of theory and clinical management skills to manage the care of a pediatric patient. It also assists students with implementing the primary care pediatric nurse practitioner role in a collaborative model of practice.

Prerequisites
- PRCM 6810
- PRCM 6820
- PRCM 6830

Note: This course requires a minimum of 160 clinical hours.

PREL 3001 - Principles of Public Relations♦

(5 cr.)
How is communication conducted between a community and private entities and in what ways can this communication affect decision making and outcome of actions? Preparing students to answer such questions and to understand, appreciate, and apply the fundamentals of public relations (PR) is a goal of this course. Students learn about the relationships practitioners have with both internal and external communities who are affected by, and who affect, an organization’s actions or planning. Students also build their command of the basic principles and practices of PR, while applying these concepts to real-world scenarios and a written plan that includes the various phases of the PR process.

Prerequisites
BS in Communication
- COMM 1010

All Other Programs
- None

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PREL 4101 - Publicity and Public Relations♦

(5 cr.)
Public relations (PR) professionals play an important role in promoting a positive image for a wide variety of organizations, such as corporations and schools, and influential individuals, such as celebrities and politicians. In this course, students build on PR proficiencies to apply the principles and concepts of PR, specifically targeting positive publicity of persons, places, and purposes. Students assess the risks and benefits of PR tools to inform and influence the community and assess the use of social media in PR efforts. Through the extensive use of case studies, students also have the opportunity to develop expertise in promoting constructive publicity in PR through analyzing both successes and failures in the real world.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PREL 4102 - Applied Public Relations♦

(5 cr.)
Building brand relationships, fostering interactions between marketers and customers, and reaching consumers through new means of cost-effective technology now often rely on the combined efforts of advertising through marketing and the guidance of public relations (PR) professionals. Students in this course learn to apply the principles and practices of PR using the medium of advertising to achieve desired end results. Outlining the process of a PR plan, students draw upon the combined knowledge and skills in media relations, effective communications, market awareness, and integrated messaging to practice creating leverage and opportunity for organizations, individuals, products, and places.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PREL 4103 - Crisis Communications♦

(5 cr.)
Rapid shifts in the economy, changes in political leaders, and negative news reports are just a few of the factors affecting marketing campaigns and public relations (PR) efforts. In this course, students can learn the value of managing internal and external communications effectively in situations of risk, crisis, and sudden change—a critical competence for PR professionals and organizations. Students examine successful and unsuccessful crisis communication efforts and consider issues of contingency planning, speed, transparency, multiple modalities, stakeholder analysis, and ethics. They engage in assignments designed to provide practical application of content through which they gain experience developing a communication plan to mitigate and solve issues of crisis in PR.

Prerequisites

- PREL 3001 or HLTH 3115
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSPA 1002 - Global Issues in Politics

(P 5 cr.)
Professionals working in the political science and public administration arena must have a firm understanding of current political, social, economic, and religious issues to successfully engage in decision making, political debates, policy making, and other responsibilities inherent to the profession. In this course, students develop their understanding of global society through political issues. They identify the major challenges to peace and sustainability in the global environment. They also explore and discuss issues related to energy, trade, human rights, healthcare, sex and drug trafficking, and the disparity between rich nations and poor nations. Through this course, students gain skills needed to stay abreast of global issues in politics, and they consider how these issues can affect their daily personal and professional lives.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSPA 1003 - Political Controversies

(P 5 cr.)
The Declaration of Independence asserts that all men are entitled to life, liberty, and the pursuit of happiness; though, society continues to argue over how to guarantee these inalienable rights. In this course, students apply the principles of the U.S. Constitution and examine several modern political controversies, such as same-sex marriage, the role of the media in society, the debate over gun control, and others in light of their relationship to larger enduring political debates. Students employ course concepts to practical applications on a variety of topics, such as critiquing argument, protecting personal privacy, ensuring equal opportunity, predicting debate outcomes, and evaluating profiling, among others.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSPA 2001 - Principles of Public Administration

(P 5 cr.)
Public administrators make daily decisions and implement programs that impact our lives in countless ways. In this course, students explore how public administrators and managers conduct the business of government, such as implementing public policy. They assess and discuss the issues and challenges these figures encounter while performing their jobs as well as future trends and potential issues they may face in the future.
Students engage in short writing assignments through which they apply learning and reflect on how course concepts apply to the real world and their lives. Through this course, students come to understand the variety of jobs that public administrators perform and their crucial role in the successful operation of government.

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSPA 2002 - The Making of Public Policy**

(5 cr.)
What is public policy? Who develops it and how is it made? In this course, students explore how the government makes decisions and the impact these decisions have on people and communities. Students learn how issues become important, how groups exercise power, and how government policies are evaluated and modified. Students also examine whether the public policy process is generally fair to the majority of citizens or whether it provides unfair advantage to certain groups. In this course, students have an opportunity to engage in the exploration of many of the questions and issues surrounding the development of public policy.

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSPA 2030 - Leadership and Volunteerism**

(5 cr.)
Volunteers are one of the most important resources for nonprofit organizations. Through this course, students learn the crucial importance of volunteers to organizations and groups striving to build better communities and address important social problems. Students explore how successful leaders recruit qualified volunteers, retain their commitment over time, and empower them to act on behalf of shared goals. They identify the key challenges facing organizations that rely heavily on volunteers and the most effective means of addressing these challenges. Students also examine and discuss the particular leadership skills required in volunteer organizations and consider how they can develop these proficiencies to lead future volunteer efforts and effect positive social change.

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSPA 2050 - Social Entrepreneurship**

(5 cr.)
Society often associates entrepreneurship with the business world in which creative individuals use their imagination and skills to amass large fortunes. In this course, students explore a new breed of entrepreneur—the social entrepreneur. Students learn
how social entrepreneurs help others by combining resources in unique ways to change underlying social structures for the greater good. Students examine social entrepreneurship methods, practices, and values. They also explore and discuss the impact of social entrepreneurship on social change. Students synthesize knowledge and apply course concepts as they work toward developing an original social-entrepreneurial venture.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSPA 3001 - Constitutional Law**

(5 cr.)
The Constitution is the foundation for all law in the United States. In this course, students examine how the Constitution protects individual rights, legal processes, and historical conceptions. Students use landmark Supreme Court cases to examine enduring constitutional themes, including civil rights/civil liberties, federalism, property rights, the death penalty, the rights of the accused, freedom of religion, and others. Students also explore how people attempt to use the law to promote as well as to inhibit positive social change. Through this course, students gain a fundamental understanding of constitutional law, which provides the framework for informed decision making in the professional arena.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSPA 3002 - Ethics in Public Leadership**

(5 cr.)
Ethics is a key element of successful government and nonprofit leadership. Ethically, on individual and institutional levels, many things can go wrong in government and nonprofit organizations. Students in this course gain insight into causes, obstacles, and barriers to ethical leadership. They explore how successful public sector leaders build organizations that reflect strong ethical values. Students examine qualities of ethical leaders, ethical organizations, and ethical decision making. They use practical tools for achieving ethical public leadership in case studies and real-life scenarios.

**Prerequisites**
- BS in Political Science and Public Administration
  - PSPA 1002
  - PSPA 1003
  - PSPA 2001
  - PSPA 2002
  - POLI 1001

- BS in Human Services Leadership and Administration Concentration
  - PSPA 2002
All Other Programs

- None

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSPA 3010 - Civil Law♦

(5 cr.)
With the exception of the occasional traffic ticket, most individuals do not have many encounters with the criminal justice system. However, frequent interactions with the American legal system through civil law are not uncommon. Students in this course explore family law, employment law, property rights, malpractice issues, torts, and other aspects of civil law. They learn how civil law is relevant to human resource managers, healthcare professionals, and public administrators. Through written assignments and other application-based activities, students further examine topics related to civil law, such as contracts, negligence analysis, independent contractors versus employees, and commercial leases.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSPA 3020 - Principles of Public Personnel Management and Human Resources♦

(5 cr.)
How do managers most effectively motivate and lead organizations and people to accomplish organizational goals? In this course, students explore many of the tools, techniques, and challenges of modern management, such as leadership, personnel systems, affirmative actions, performance management, and strategic planning. Students learn the tools, techniques, and challenges of managing organizations and people successfully in the public and nonprofit sectors. Through discussions and practical application assignments, students gain an understanding of basic leadership principles, strategic planning, modern personnel systems, and performance management. Students culminate their learning in a final analysis through which they apply course concepts to a current issue related to human resource management.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSPA 3030 - Social Change in the Community♦

(5 cr.)
How can we address contemporary challenges resulting from unforeseen market shifts, unemployment, home foreclosures, and other issues confronting community? In this course, students identify and apply the skills that are needed by individuals and groups to
produce positive social change. They explore how positive social change takes place on a community level, and they examine the major obstacles to positive social change efforts. Additionally, students examine the key features of effective strategies, such as organization of people as well as economic and political resources. Using basic principles presented in the course, students develop a social change action plan through which they gain the practical skills and knowledge needed to effect positive social change in their own community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSPA 3040 - Global Social Justice**

(5 cr.)
Globalization has brought with it a shared understanding of human rights and a new set of social problems. Students in this course examine the issues of social justice that are prominent in the new global community. They also explore the role of women, environmental justice, the responsibility of richer nations to poorer nations, the promotion of diversity, the protection of human rights, and other contemporary issues. Students learn about the international organizations dedicated to promoting social justice and consider the importance of social justice in international relations. Throughout the course, students reflect on and respond to personal questions regarding perspectives, responsibilities, and roles in achieving global social justice. Finally, students consider how their personal ideology on global social justice has changed as a result of course readings, discussions, and applications.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSPA 4010 - Contemporary Legal Debates**

(5 cr.)
Many of society’s most intractable problems are resolved through the legal system. In this course, students examine issues at the foundation of many legal debates, such as immigration, abortion, reproductive rights, intellectual property, and the separation of church and state. Students engage in contextual and application-based assignments that highlight the legal aspects of several social issues. They share perspectives through peer discussions on topical issues, such as legal views and decisions, right to privacy, race, the death penalty, and the responsibilities of corporations as members of society. Students practice their research, persuasive-writing, and analysis skills through a final project on a contemporary legal debate.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSPA 4020 - New Skills for Leaders in the Public Sector**
Contemporary public managers use a variety of new tools and strategies to implement public policy and conduct business. Students in this course learn about the new skills required of public administrators to be successful in a rapidly changing environment. They examine a variety of topics, such as team building, contracting, procurement, compliance, grant writing, and outsourcing/insourcing. Through this course, students also have the opportunity to explore job opportunities at the government level as well as in the nonprofit sector.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSPA 4030 - Communication for Social Change♦

In a society influenced by technological innovation and virtual spread of information, we can use technology to rekindle friendships with grade-school acquaintances and we can instantaneously follow every action of our favorite entertainers. But it is also our responsibility to know how to use these same social networking techniques and other more traditional means of communication as catalysts for positive social change. In this course, students learn how to use modern communication tools to promote positive social change and mobilize communities. They analyze the use of electronic tools for public and nonprofit sector organizations. Students also examine the key elements of a communication strategy—message development, target audience identification, selection of communication tools, and obtaining feedback—and apply these to current social issues.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSPA 4040 - Service in the Global Community♦

In this course, students explore how groups and organizations are making a difference by serving the global community. Students examine the function, operation, and relationship between organizations that address global issues, such as disaster relief, HIV, hunger, education, women's rights, and healthcare; such organizations include intergovernmental organizations (IGOs) and nongovernmental organizations (NGOs). They examine the strategies and techniques that successful organizations use in responding to global challenges. Students also consider current issues that have potential to become global crises, and they discuss the future of public service in the global community. Applying concepts of service and related governance issues, students complete a final research project on a major issue currently affecting the global society.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PSPA 4080 - Capstone

(5 cr.)
A capstone project provides students with the opportunity to synthesize knowledge and skills acquired throughout their program into a practical, integrative project designed to promote positive social change. In this capstone course, students examine American democracy, the political system in the United States, and the relationships among special interest groups and political parties. They also assess how the U.S. political system affects public administration or political roles and how these roles can effect positive social change. Students employ knowledge of leadership skills as well as concepts from the course and their program to propose a public policy with implications of social change for a virtual community.

PSYC 1001 - Introduction to Psychology♦

(5 cr.)
In this course, students will be introduced to the scientific study of observable behavior and internal experiences such as thoughts and feelings. Psychological facts, principles, and theories associated with methods of analysis, learning, memory, brain functioning, sensation, perception, motivation, emotions, personality, social behavior, human development, and psychological disorders and treatment will be introduced. Students will learn to understand human behavior by examining the integrative influences of biological, psychological, and social-cultural factors. The concepts in this course will prepare psychology majors for more in-depth study of the major areas of psychology, and will provide a foundational understanding of human behavior for non-psychology majors.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 1001A - Introduction to Psychology

(5 cr.)
Students in this course are introduced to the scientific study of observable behavior and internal experiences such as thoughts and feelings. Psychological facts, principles, and theories associated with methods of analysis, learning, memory, brain functioning, sensation, perception, motivation, emotions, personality, social behavior, human development, and psychological disorders and treatment are introduced. Students can learn to understand human behavior by examining the integrative influences of biological, psychological, and social-cultural factors. The concepts in this course prepare psychology majors for more in-depth study of the major areas of psychology, and provide a foundational understanding of human behavior for non-psychology majors.

Prerequisites
- SOCI 1001A
PSYC 2000 - Psychology Seminar

(5 cr.)
In this survey course, BS in Psychology program majors assess their marketable skills, career needs, and career goals. Students learn to make informed choices and plans regarding graduate training in psychology or other related fields of study, as well as job-seeking skills in psychology. Additional topics covered are introductory-level approaches to critical thinking, information literacy skills, and writing in the format and style of the discipline. Students will also reflect on how their chosen major of psychology relates to Walden’s mission of social change. This course is graded as Satisfactory/Unsatisfactory.

Prerequisites
- PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 2001 - Cross-Cultural Psychology

(5 cr.)
Contemporary life requires the ability to relate to people who are different. In this course, students will explore major areas of psychology in light of culture’s influence, challenging their own world views and unconscious biases in order to develop greater sensitivity to the impact of cultural differences on interactions in a variety of settings. Topics include definitions and approaches to understanding culture; the role of psychology in understanding bias; cultural aspects of cognition and intelligence; emotion; motivation; development and socialization; disorders; and applications of cross-cultural psychology.

Prerequisites
BS in Psychology
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 2002 - Human Development: Childhood and Adolescence

(5 cr.)
Humans experience many developmental changes throughout the lifespan, but those of greatest significance occur from conception to young adulthood. In this course, students examine key theories related to various aspects of development in infants, children, and
adolescents. Students apply social, biological, and cognitive maturation processes and perspectives to better understand their own development and personal experiences. They also discuss related topics, such as cross-cultural issues, attachment and temperament, language and personality development, and puberty and sexual development.

Prerequisites

BS in Human Services Child and Adolescent Development Concentration
- None

BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 2003 - Human Development: Adulthood♦

(5 cr.)
Adulthood represents a rich developmental experience including many significant life transitions. In this course, students explore the key theories, transitions, and applications of adult development. They examine the social, biological, and cognitive maturation processes that define development of adulthood into older age. Students engage in assignments designed to provide practical application of theories to specific transitions and topical issues, such as career changes, attachment and marital satisfaction, personality, retirement, and cognition. Applying concepts presented in the course, students discuss cross-cultural issues in development, emotional development, adult roles, memory, and physical aging.

Prerequisites

BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 2004 - Motivation and Emotion♦
What drives people to do what they do? In this course students have the opportunity to answer this question as they explore basic theories of motivation and emotion. They also explore bodily needs, such as hunger, thirst, and sex, that drive people to action; concepts in motivation, such as achievement, altruism, and conflict; and concepts related to emotion, including happiness, hormonal influences, and mood. Students assess content and share different perspectives through peer discussions on related topics, such as sources of motivation, hunger and eating, need for power, extraversion, goals, and decision making.

**Prerequisites**

**BS in Psychology**
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

**All Other Programs**
- PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 2005 - Social Influences on Behavior**

Individuals are often influenced by others and by the social situations in which they find themselves. Students in this course examine the basic concepts and applications of social psychology, including attitudes, beliefs, and behavior; stereotyping; prejudice and discrimination; interpersonal relationships; group behavior; and the effect of environmental stress on behavior. They also learn how bias can sway objective conclusions as well as how ethical factors influence research in social psychology. Students apply principles and theories presented in the course to case studies and situations in daily life, including instances of stereotyping and discrimination. They also use these theories to understand strategies for helping others and reducing aggressive behavior.

**Prerequisites**

**BS in Health Studies Health Psychology and Behavior Concentration**
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

**BS in Human Services Child and Adolescent Development Concentration**
- None

**BS in Psychology**
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

**BS in Public Health Psychology and Behavior Concentration**
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
All Other Programs

- PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 2006 - Introduction to Addiction

(5 cr.)
Students in this course are introduced to the nature of addiction and the impairment in individuals who suffer from addictions. It includes a review of theories on substance disorders and approaches to identification, prevention, and treatment. Topics include historical perspectives, diagnoses, types of addictive behaviors, treatment, and current research.

Prerequisites
BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 2008 - Learning

(5 cr.)
How do people learn, and what strategies maximize learning? In this course, students have an introduction to the behavioral and cognitive bases of learning and memory. Students engage in contextual and application-based assignments, such as simulation lab work, focusing on classical and operant conditioning, cognitive theories of learning, and introductory concepts of memory. Students apply learning principles and concepts, such as social learning theory and locus of control, to real-world behavior and performance.

Prerequisites
BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PSYC 2009 - Theories of Personality♦

(5 cr.)
This course is an introduction to the theoretical approaches to understanding personality. Students examine key theorists and theories including psychoanalytic, neoanalytic, humanistic, trait, biological, behaviorist, and social-cognitive approaches. Perspectives on personality are applied to personal and social issues.

Prerequisites
BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

All Other Programs
- PSYC 1001 OR PSYC 1001Y

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 2100 - Workplace Psychology

(5 cr.)
Students will be introduced to the field of industrial organizational psychology where the principles of psychology are applied within the workplace. Key topics will illustrate how the tenets of industrial organizational psychology apply at three levels: the individual, group, and organizational levels. Students will also explore each side of the field: Industrial and Organizational sides. On the industrial side, students will examine job analysis, selection, training, and performance measurement. Focusing on the organizational psychology side, students will explore motivation, teams, communication, and leadership in organizations. Lastly, ethics, culture, and legal implications will be integrated throughout the course.

Prerequisites
BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y

PSYC 2101 - Introduction to Forensic Psychology♦

(5 cr.)
Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity
issues. They learn how forensic psychology links to the criminal justice system as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the field.

Prerequisites

BS in Psychology
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

PSYC 3001 - Cognitive Psychology

(5 cr.)

Students in this course are provided with a comprehensive overview of cognitive psychology, the scientific study of mental processes: How people acquire, store, transform, use, and communicate information. Topics may include perception, attention, language, memory, reasoning, problem solving, decision making, and creativity.

Prerequisites

BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y

PSYC 3002 - Introduction to Basic Statistics♦

(5 cr.)

A hallmark of science is the use of numbers to convey research findings; understanding these numbers has both practical and academic value. In this course, students examine basic statistical principles and vocabulary, differentiating methods of data analysis, and interpreting statistical results. The goal of the course is for students to better understand the importance of statistics in research.

Prerequisites

- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

BS in Psychology
- PSYC 1001 or (PSYC 1002 and PSYC 1003)
PSYC 2000
PSYC 1001 or (PSYC 1002 and PSYC 1003)
MATH 1030

All Other Programs

- PSYC 1001 or (PSYC 1002 and PSYC 1003)
- MATH 1030

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 3003 - Methods in Psychological Inquiry

(5 cr.)
A variety of factors may cloud judgment when interpreting experiences. In this course, students learn about research methods that psychologists use to test hypotheses in an objective and systematic manner to minimize biases, providing a framework for more accurate conclusions. Students examine experimental and non-experimental methods, issues related to the validity and reliability of measurement, dependent and independent variables, sampling, and ethical concerns related to psychological research.

Prerequisites
BS in Human Services Psychology Concentration
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

BS in Psychology
- PSYC 1001 or (PSYC 1002 and PSYC 1003)
- PSYC 2000
- PSYC 3002

All Other Programs
- PSYC 1001 or (PSYC 1002 and PSYC 1003)
- PSYC 3002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 3004 - Psychological Disorders

(5 cr.)
Psychological disorders form the basis of diagnosis in psychology. In this course, students examine a wide variety of common psychological disorders, including mood, thought, anxiety, substance abuse, sexual, personality, and dissociative disorders. Students also explore underlying causes, symptoms, diagnoses, and treatments. They examine concepts of normal and abnormal as related to psychology, methods used in the process of diagnosis, and the measurement of psychological functioning. Students also differentiate among disorders and learn limits to effective diagnosis. Applying
concepts and theories learned in the course, students demonstrate their understanding through practical application and case study assignments.

Prerequisites
BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000
All Other Programs
- PSYC 1001 or PSYC 1001Y

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

PSYC 3005 - Racial and Ethnic Identities♦

(5 cr.)
Most people recognize and appreciate the individuality of human beings, including race and ethnicity as related to self-perception and to the perception of others. In this course, students explore their own racial and ethnic identities in the context of contemporary psychological knowledge as well as contemporary issues and challenges related to race and ethnicity. Students explore and discuss a variety of topics, including the development of racial and ethnic identities; social classification; privilege and stigma; perceptions of racial and ethnic identities; assimilation; inequalities in race and ethnicity; and the relationship of race and ethnicity to social change. Students apply psychological concepts to better understand their own sense of ethnic and racial identities and how these identities shape their experiences in the world.

Prerequisites
BS in Human Services Psychology Concentration
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000
All Other Programs
- PSYC 1001 or PSYC 1001Y

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

PSYC 3006 - Psychology of Gender♦

(5 cr.)
Researchers have demonstrated that there are few psychological differences between men and women. And yet history and conventional thinking indicate otherwise. Students
in this course are introduced to the basic theories, principles, and applications of gender and gender differences. Students explore distinctions between sex and gender, masculinity and femininity, and sexuality and sexual orientation; gender differences in social behavior, perception, and cognitive abilities; and cross-cultural research on gender and sexuality. Through discussions and applications, students debunk myths surrounding sex and gender similarities and differences, and they apply theories to case examples and individual experiences.

Prerequisites
BS in Psychology
- PSYC 1001 or (PSYC 1002 and PSYC 1003)
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

PSYC 3007 - Influence and Persuasion✦

(5 cr.) Students in this course examine major concepts and theories of influence and persuasion. Understanding the psychology of influence and persuasion, and recognizing how we use it in daily interactions—or how we experience it used by others—is a vital component of making positive decisions about relationships and careers, as well as everyday challenges and opportunities in our lives. Students will apply specific theories to common situations to analyze and evaluate the impact of influence and persuasion on their own and others' attitudes, beliefs, and behavior. Particular areas of study include influence and persuasion in daily communication; cultural considerations; media and consumer behavior; and politics and leader influence. Throughout the course, students also apply self-reflection strategies to case studies and their personal experiences and also assess the ethical aspects of influence and persuasion.

Prerequisites
BS in Psychology
- PSYC 1001 (or PSYC 1002 and PSYC 1003)
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

PSYC 3009 - Psychology of Leadership✦
Are leaders made or born? This question has been debated for decades. Building on requisite comprehension of psychology, such as understanding development and behavior, mental processes, and how people interact, students apply this knowledge in consideration of what makes a leader. They examine theories and principles of leadership and leader development. Students engage in coursework focused on leadership styles, characteristics and qualities of effective leaders, cultural issues, empowerment and development, ethics and values, and global leadership. They apply leadership concepts and principles to personal experiences to contextualize theory and further examine the leadership role.

**Prerequisites**

**BS in Human Services Leadership and Administration Concentration**
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

**BS in Psychology**
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

**All Other Programs**
- PSYC 1001 or PSYC 1001Y

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 3011 - Addictions Assessment**

(5 cr.)

Students in this course focus on learning a systematic, multidisciplinary approach to the assessment and interpretation of data collected from clients with addictions. The most current screening, assessment, and documentation approaches will be reviewed.

**Prerequisites**
- PSYC 1001 or PSYC 1001Y
- PSYC 2000
- PSYC 2006

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 3012 - Prevention and Treatment of Addictions**

(5 cr.)

Models and theories of addiction are covered, as well as various treatment approaches. Prevention in various settings is addressed, including the etiology, patterns, and risk factors of addiction, as well as strategies for prevention. Treatment methodology, treatment planning, goal setting, and evaluation are also addressed. The multicultural
context of addiction and client diversity are included.

Prerequisites
- PSYC 1001 or PSYC 1001Y
- PSYC 2000
- PSYC 2006

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 4001 - Cultural Perspectives in Health Psychology**

(5 cr.)
How does one's culture influence health-related behavior and how does culture impact an individual's response to stress, pain, and illness? In this course, students learn how biological, psychological, sociological, and cognitive factors affect individual health behaviors. Students engage in discussions and practical, application-based assignments on a variety of topics, including cultural responses to health, stress management, and coping mechanisms; pain theory and management techniques; health psychology theories and models; and strategies for helping people achieve health psychology goals when faced with illness. Students apply principles of health psychology to case studies and real-life examples related to promoting, achieving, and maintaining optimal health as well as psychological adjustment to illness in different cultures.

Prerequisites
- BS in Health Studies Health Psychology and Behavior Concentration
  - PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
- BS in Human Services Leadership and Administration Concentration
  - PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
- BS in Psychology
  - PSYC 1001 or (PSYC 1002 and PSYC 1003)
  - PSYC 2000
- BS in Public Health Psychology and Behavior Concentration
  - PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
- All Other Programs
  - PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 4002 - Brain and Behavior**

(5 cr.)
The study of the brain and how it functions has contributed significantly to the
understanding of how people react and adapt to their environments. In this course, students examine basic brain physiology and learn how the brain functions to control behavior. Students explore specific applications of brain structure to memory and attention, sensation and perception, development, socialization, motivation and emotion, and socialization. They apply concepts and theories about the brain to psychological health and well-being.

**Prerequisites**

**BS in Psychology**
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

**All Other Programs**
- PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 4003 - Case Management and Addictions**

(5 cr.)
Students in this course explore the definitions and methodologies of case management services. The course is designed to provide students with the most up-to-date research and clinical applications of services management in the practice of addictions counseling.

**Prerequisites**
- PSYC 1001 or PSYC 1001Y
- PSYC 2000
- PSYC 2006

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 4006 - Global Perspectives in Psychology**

(5 cr.)
While traditional psychology in the United States has been Western in focus, increased globalization has promoted an examination into human behavior from a broader perspective that includes the influence of cultural and global trends on individual and group behavior. In this course, students explore a variety of global perspectives in psychology as well as some of the issues and controversies facilitated by differing cultures. They explore and discuss trends and research methods in global psychology, indigenous psychology, psychotherapy in a global world, and the role of psychologists internationally. Students critically evaluate psychological issues from a global rather than a domestic perspective.
Prerequisites

BS in Psychology
- PSYC 1001 or (PSYC 1002 and PSYC 1003)
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 4008 - Intergroup Conflict and Peace Building

(5 cr.)
In a world encumbered with conflict, tension, and injustice, strategies for building peace are essential. In this course, students assess theories and principles of conflict management and resolution. They examine and employ theories and applications of intergroup dynamics; principles and underlying philosophies of non-violence; and social science principles to understand conflict and promote peace. Students gain practical experience applying principles of peace building to proposing solutions for contemporary, individual, and social issues.

Prerequisites

BS in Psychology
- PSYC 1001 or PSYC 1001Y
- PSYC 2000

All Other Programs
- PSYC 1001 or PSYC 1001Y

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 4010 - Psychology Capstone

(5 cr.)
In this course, students integrate knowledge and skills attained through their psychology coursework to create a final Capstone Paper that examines one area of psychology through a professional lens. In addition, students engage in scholarly discourse about key issues and theories, including ethics, learned throughout the program. Finally, students reflect on their experience in the program and consider career possibilities that might utilize their learning while considering ways to contribute to positive social change.

Prerequisites
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
- PSYC 2000
- PSYC 2001
• PSYC 2009
• PSYC 3002
• PSYC 3003

PSYC 4014 - Health Psychology

(5 cr.)
Health and wellness involve more than physical symptoms and diseases. Health psychology is a dynamic course that gives students the opportunity to explore the field of health psychology, with a focus on how physical, psychological, sociocultural, economic, and spiritual factors impact health and wellness. Throughout the course, students examine the importance of health disparities and health literacy, explore strategies for promoting health enhancing behaviors, and apply health psychology research to various health issues. Students also apply their learning to the development of their own health goals. The course culminates in a case study that synthesizes students' learning from the previous weeks.

Prerequisites
BS in Psychology
• PSYC 1001
• PSYC 2000

All Other Programs
• PSYC 1001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 4110 - Forensic Evaluation

(5 cr.)
In this course students are introduced to the basic procedures for interviewing and evaluating individuals within the legal system. Students learn about various interview and evaluation strategies, including unique challenges presented when working with special populations. In addition, effective behavioral observation strategies are identified. Methods for effectively recording information from interviews and observations are covered, and best practices for preparing forensic reports are presented.

Prerequisites
BS in Psychology
• PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
• PSYC 2000
• PSYC 2101 or FPSY 2101

All Other Programs
• PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
PSYC 2101 or FPSY 2101

PSYC 4920 - Applications of Forensic Psychology

(5 cr.)
In this course, students gain the contemporary knowledge needed to apply ethical practice and professional responsibilities while working in the field of forensic psychology. The American Psychological Society’s Ethical Principles of Psychologists and Code of Conduct as well as the American Psychology—Law Society’s Specialty Guidelines for Forensic Psychology are mainstays in this course. Additionally, the various roles and responsibilities of a forensic psychologist are covered.

Prerequisites

BS in Psychology
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
- PSYC 2000
- PSYC 2101 or FPSY 2101

All Other Programs
- PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
- PSYC 2101 or FPSY 2101

PSYC 5005 - Business Concepts for the Organizational Development Professional

(5 cr.)
Organizational success depends on many aspects, such as human and market factors. In this course, students explore these factors as well as the language of work, business, and management structures and processes. They also examine related topics, such as finance, marketing, accounting, strategic planning, organizational design, and quality and process improvement. Students apply concepts and theories to case study scenarios and real-life situations. They also demonstrate their knowledge through a health audit of an actual organization, for which they provide a synopsis of a variety of organization aspects, such as ethical and legal issues, organizational architecture, group relations, human factors, and accounting and financial factors, among others.

Note: To register for this course, please contact the Student Success Advising Team.

PSYC 5100 - Themes and Theories of Psychology

(5 cr.)
In this course, students are introduced to theories, research, and themes that form the tenets of psychology. Basic theoretical models are reviewed, including psychodynamic, cognitive, developmental, social learning/sociocognitive, behaviorist, learning and motivation, systems, biopsychosocial, and gender theories. Theories encompassing diverse populations, including cross-cultural and feminist theories, are also covered.
Students critically examine the strengths and limitations of these theories and their utility in the field of psychology. Contemporary themes in psychology are explored, with an emphasis on application of theories designed to effect positive social change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 5101 - Foundations for Graduate Study in Counseling**

(1 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. They are provided with a foundation for academic and professional success as scholar-practitioners and social change agents. Topics include the relation of mission and vision to professional goals; development of the Professional Development Plan; strategies for online success; introduction to the online library; and introduction to critical thinking, professional writing, and academic integrity. The focus of course assignments is on the practical application of writing and critical-thinking skills and the promotion of professional and academic excellence as they relate to practice in counseling.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information. (Co-requisites: PSYC 5101 with PSYC 5102)

**PSYC 5102 - Introduction to Mental Health Counseling**

(5 cr.)
Students are introduced to the mental health counseling profession in this course. The history, philosophy, and theoretical foundations of the profession, and the scope of practice, credentialing, and other professional issues are explored. The focus in this course is on the student as a future mental health counselor. Students receive an overview of the mental health counseling program, the profession, and professional competencies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 5103 - Introduction to Addiction**

(5 cr.)
Students in this course are introduced to aspects of professional functioning as an addiction counselor, including but not limited to role setting of addiction counselors; history, philosophy, and trends in addictions counseling; professional standards for addictions counselors; effects of crises and trauma-causing events on persons with addictions; self-care; and ethical and culturally sensitive practice of addiction counseling. Students also explore competencies, credentialing, and other professional issues.
Students explore the future as addiction counselors as well as an overview of the addiction counseling profession.

**PSYC 5121 - Development in the Digital Age**

(5 cr.)

Students in this course examine the impact of social media and other digital technology on children, teens, and adults and at different stages of cognitive, social, and emotional development. They also examine how identity development, relationships, and socialization can be affected by the use of digital and social media. Students receive a historic review of electronic media research, including the effect of violent television on viewer behavior, which provides a foundation to examine the current impact of digital media. Current issues such as sexting, online harassment, cyberbullying, and cyberstalking are explored, along with strategies for mitigating these issues. Similarly, positive impacts of social media, such as building social groups, finding communities, overriding generational gaps, seeking health and mental health support and resources, are also explored. Students also examine generational, socioeconomic, and cultural differences in access to and use of digital media. Digital media literacy and public policy are explored, with an emphasis on positive social change.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 5122 - Understanding Digital Data in the Changing Economic Landscape**

(5 cr.)

Digital technology has impacted all aspects of human life, including the economy. With the advent of e-commerce, the economic landscape has changed drastically in the 21st century. E-commerce businesses, such as Amazon, eBay, Uber, Airbnb, Tod’s, and Starbucks have impacted the economic landscape at both micro- and macro-levels, ranging from people’s personal finances to larger economic activities such as jobs, investments, and inflation. In this course, students examine consumer behaviors before, during, and after the purchase experience. With the proliferation of digital media, businesses have begun focusing more on processing and analyzing digital data for business performance. Digital data analytics can be utilized to interpret consumer attitudes, examine the relationship between consumers and businesses, and to explore their satisfaction levels, among other factors. Students examine case studies illustrating the influences that digital data analytics may have on business performance, apply analytic tools for analyzing consumer digital data, and explore digital technology trends and their impact on consumer satisfaction.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 5123 - Personal and Social Life in the Digital World**
The course explores the interaction of technology, culture, and society, specifically how human development, actions, behaviors, and groups are influenced and shaped by media and technology. The impact of media and technology affects us throughout the life cycle—including childhood, adolescence, adulthood, and old age. In today’s high-tech world, just about every aspect of our lives—our educations, careers, and relationships—leave digital footprints. Accordingly, the importance of maintaining a high level of media and technology literacy is greater than ever before. Our increasingly technological world provides many opportunities and benefits; however, it also brings with it challenges and risks, such as digital victimization, breach of privacy and security, and human trafficking, among many others. It is up to each individual to take personal responsibility for the way they interact with media and technology. This course examines how to be a mindful consumer of technology and considers ways to harness it to effect positive social change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 5131 - Theories of Learning

An in-depth study of modern learning theory, its historical context, theoretical ideas, research, and applications in various learning environments are provided to students in this course. The theoretical ideas of the major paradigms of learning, such as behaviorism, gestalt, cognitivism, information processing, constructivism, and humanism, will be covered. Students in the course will also review current theories of cognitive processes such as language, memory, and intelligence and examine how differences in cognitive levels throughout the lifespan mediate learning of educational subject matters.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 5202 - Theories, Treatment, and Case Management of Addiction

Students in this course explore treatment intervention and case management strategies for addiction counseling, using various models of treatment, recovery, relapse prevention, and continuing care for addictive disorders. They learn treatment principles and philosophies of addiction-related programs, and they increase self-awareness as addiction counselors by assessing their own limitations; recognizing when they need additional resources and support; and knowing when and where to refer clients when appropriate. In addition, students examine substance abuse policies and regulatory processes that influence service delivery in addiction counseling.

PSYC 5203 - Psychopharmacology and Biopsychosocial Considerations
The potential for addictive disorders to present like a variety of medical and psychological disorders is common. In this course, students examine how to treat addictions that may coexist with depression, anxiety, bipolar disorder, obsessive-compulsive behavior, and other psychological disorders as described in the DSM-IV-TR. They survey a spectrum of psychotropic medications and their use in the treatment of mental, behavioral, and addictive disorders. Students also explore factors that increase the likelihood for a person, community, or group to be at risk for psychoactive substance use disorders. Through this course, students gain an understanding of the basic classifications, indications, and contraindications of commonly prescribed medications so that they make appropriate referrals within treatment teams.

PSYC 5204 - Assessment in Counseling and Addiction

Students in this course receive an overview of the different types of diagnostic and assessment tools used in addictions counseling based on professional standards for testing. Students engage in a comprehensive examination of psychometric properties used to develop and evaluate these instruments. They learn various models and approaches to clinical evaluations for addictive disorders and examine the appropriate use of assessments for addictions. Moreover, students learn how to assess for a biopsychosocial and spiritual history, and they address ethical, legal, and sociocultural issues, including cultural bias and fairness.

PSYC 5205 - History and Systems of Psychology

In this course, students focus on the historical and philosophical roots of psychology and counseling. Through conceptual and application-based assignments, students learn about structuralism, functionalism, behaviorism, psychoanalysis, gestaltism, and existentialism as well as contemporary perspectives, including evolutionary psychology, positive psychology, postmodernism, and feminist psychology. Students demonstrate and apply their knowledge through an integrative writing assignment in which they address the developmental history of a major area of study within a subdivision of psychology. Students also explore and consider themes of diversity and multiculturalism in psychology and counseling within each of the perspectives.

Note: To register for this course, please contact the Student Success Advising Team.

PSYC 5211 - Contemporary Issues in Psychology

Students in this course are provided with an advanced-level overview of the core areas, topics, and concepts in psychology as well as considerations for related contemporary issues. They engage in a variety of conceptual and application-based assignments on the
biological bases of behavior, learning and memory, cognition, motivation, lifespan development, theories of personality, stress and coping, psychological disorders, and social psychology. Students practice and develop critical-reading and analysis skills through reviews of journal articles and media publications. Through these reviews, students focus specifically on distinguishing facts and opinions, identifying bias in writing, and discovering the importance of data and evidence. Students use this knowledge in the analysis and composition of scientific writing. They also assess and incorporate themes of diversity in their study and assignments.

PSYC 5212 - Principles of Organizational Psychology and Development

(5 cr.)
Students in this course are provided with the theoretical foundation for organizational inquiry. Students build on their knowledge of the contemporary business environment to gain a deeper understanding of how organizations function as well as how strategic design can affect efficiency and productivity. Students explore change management; organizational culture, behavior, and development; group dynamics; and systems-level thinking. Sharpening critical-thinking and creative skills, students employ course concepts to identify organizational development opportunities based on an in-depth analysis of an organization. Through this project, students gain awareness of practical strategies for organizational development efforts.

Note: To register for this course, please contact the Student Success Advising Team.

PSYC 5214 - Consulting for Organizational Change♦

(5 cr.)
Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 5215 - Lifespan Development

(5 cr.)
Students in this course receive an advanced overview of development through the lifespan, including prenatal, childhood, adolescent, adult, and late adult phases. Basic
developmental processes and theories are examined and applied to developmental milestones that occur within these phases of development. Themes of diversity are highlighted throughout the course. Additional topics include ethics, research, global perspectives, and social change.

**PSYC 5216 - Dynamics of Contemporary, International, and Virtual Organizations♦**

(5 cr.)
Globalization, technological innovation, and market factors continually change the context of business, requiring professionals who understand how organizations function to work through challenges and harness opportunities for change. In this course, students explore the implications of the changing nature of organizations as well as the emergence of international and virtual organizations in a global economy. Through contextual and application-based assignments, students address the unique opportunities and challenges for government, for-profit, nonprofit, international, and virtual organizations. Applying acquired knowledge and skills, students provide a diagnosis and recommendations for a specific organization’s development efforts.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 5220 - Psychology of Personality**

(5 cr.)
Students in this course are introduced to the major theories of personality and personality assessment approaches. Research that supports various theories is presented. Basic concepts and principles of the various schools of thought are discussed. Major topics include psychoanalytic, biological, behaviorist, learning, social-cognitive, trait and skill, humanistic, and existential aspects of personality, as well as individual, cultural, and gender differences in personality. Themes of diversity are highlighted throughout the course.

**PSYC 5225 - Biopsychology♦**

(5 cr.)
An important branch of psychology, known as biopsychology, combines neuroscience with basic psychological models for the purpose of understanding how the brain and neurotransmitters influence human behavior. In this course, students examine the structure and functions of the central and peripheral nervous systems and explore the impact of neurobiology, endocrinology, and physiology on human behavior. They learn about brain functioning, including exploration of neural conduction; effects of neurotransmitters; sensory systems; and mechanisms of attention, memory, perception, and language. Students also explore literature addressing issues related to neuroplasticity, lateralization, and regeneration. Applying knowledge and skills gained throughout the course, students develop a final research paper through which they
synthesize biopsychology concepts, critically analyze related research, and demonstrate APA-writing ability.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 5235 - Cognitive Psychology**

(5 cr.)
The course is based in cognitive neuroscience, and students start with an overview of the history of the field and approaches used to study the mind. Students continue with an examination of the fundamentals of cognition. They examine various domains of cognitive psychology, including how information is acquired (i.e., basic learning processes, perception, and attention); fundamental issues of memory and representations of knowledge; language and understanding; thinking (e.g., reasoning, problem-solving, expertise and creativity, and judgment and decision making); and emotions. Additionally, students explore individual and cultural differences across domains. Students apply theories and concepts to analyze and report on the impact of cognitive psychological research on a contemporary issue of interest.

*Note:* To register for this course, please contact the Student Success Advising Team.

**PSYC 5240 - Human Motivation**

(5 cr.)
Students in this course receive an overview of physiological, psychological, and social aspects in the study of motivation and includes an exploration of historical and contemporary theories and perspectives. Students emphasize both conceptual understanding of theories associated with motivation and their applications to personal, professional, and social issues. Major topics include physiological, learned, cognitive, and emotional aspects of motivation. Themes of diversity are threaded throughout the course.

*Note:* To register for this course, please contact the Student Success Advising Team.

**PSYC 5242 - Changing Health Behavior: Theory and Practice**

(5 cr.)
Students in this course review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. They cover health-related issues, including dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, students examine the analysis of behavior change within specific populations (young, elderly, cognitively impaired, etc.) and factors that predict or serve as obstacles to lifestyle change and adherence.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*
PSYC 5245 - Social Psychology

(5 cr.)
In this course, you will use the lens of social psychology to examine both social cognitions and social behavior—nearly all phenomena that pertain to the individual in society. You will explore the topics of perceptions, attitudes, relationships and attraction, the motivation to help others, prejudice and aggression, conformity and obedience, group behavior, and the influence of culture, and consider how knowledge of these topics can be used to effect positive social change. Your application of what you learn in this course culminates in a final project in which you develop a plan for using social psychology research to address a significant social problem. Moreover, your learning in this course will extend to your personal and professional life, and truly enable you to effect positive social change as a scholar-practitioner committed to doing so.

PSYC 5296 - Social Cognition and Attitudes♦

(5 cr.)
In this course, students are oriented to key elements in social cognitive processing as a subspecialty of social psychology, including attribution theory, schema theory, social cognition relative to self, the role of attention/consciousness in social cognition, errors and biases in social thought, heuristics, person memory, affect and cognition, attitudes, social influence, and behavior relative to social cognition. Students investigate the structure and function of attitudes and how they are formed and maintained. They also examine the connection between attitudes and behavior and how attitudes are changed through the process of persuasion and cognitive dissonance.

Prerequisites
- PSYC 5245

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 5305 - Statistics 1

(5 cr.)
Psychology practitioners use statistics in a variety of professional undertakings, such as creating studies to assess human behavior or deciding which treatment approaches are most effective for a specific client. Students in this course are provided with a thorough analysis of basic descriptive and inferential statistical methods commonly used in the social sciences. Students work toward developing the skills with which to write, analyze, and critique social science research. They learn various methods, including computation and analysis of frequency distributions, measures of central tendency, and statistical hypothesis testing. Students also examine statistical tests (and underlying assumptions), including z-score; single-sample, independent-sample, and related-sample t-tests; analysis of variance; correlation, regression; and chi-square tests. Students in this course are also
introduced to the SPSS statistical software package.

Note: To register for this course, please contact the Student Success Advising Team.

**PSYC 5306 - Ethics and Legal Issues in Counseling**

(5 cr.)
Students in this course are provided with an introduction to the field of professional counseling and the foundations of counseling. Students explore the history, philosophy, cultural dynamics, and trends in professional counseling. They examine consultation as well as client and counselor advocacy, focusing on the counselor’s role as social change agent. Students also examine and apply ethical standards of the counseling profession, including the American Counseling Association (ACA) Code of Ethics and counselor ethical decision-making processes. Through a final reflective project designed to influence their future ethical framework, students define their ethical perspectives, including influences, values, and goals.

**PSYC 5310 - Research Design**

(5 cr.)
In this course, students have the opportunity to build a foundation in the design of qualitative, quantitative, and mixed-method approaches to psychological research. Students learn the strengths and limitations of each method and under what circumstances each approach would be the most appropriate research design. They also learn the importance of scholarly writing as well as how to identify a topic for research and how to conduct a literature search. Students gain hands-on practice developing a research proposal through which they address key elements, such as collecting and analyzing data, writing an introduction, stating a purpose for the study, identifying research questions and hypotheses, using theory, and defining the significance of the study. Additionally, students consider the legal and ethical issues associated with human subjects’ protection.

Prerequisites
- PSYC 4305

**PSYC 5315 - Tests and Measurement**

(5 cr.)
Students in this course are provided with an overview of the different types of tests used in clinical, educational, and organizational settings. Students engage in a comprehensive examination of psychometric properties used to develop and evaluate these instruments. They examine normative sampling and standardization, reliability and validity, test score interpretation, and test development. Students also consider related ethical, legal, and sociocultural issues, including cultural bias and fairness. Professional
standards for testing provide a foundation for the course.

Note: To register for this course, please contact the Student Success Advising Team.

PSYC 5316 - Techniques in Counseling

(5 cr.)
Personal attitudes, values, and beliefs often affect a counselor's ability to establish an appropriate relationship and rapport with clients. In this course, students learn to evaluate their personal attitudes and beliefs to positively influence their counseling approaches. They explore principles and skills related to interviewing and observation, and they examine related legal, ethical, and cultural issues. Students gain practice in conducting interviews, making behavioral observations, collecting and interpreting data during an interview, and developing written reports of findings. Synthesizing concepts, skills, and personal reflections, students demonstrate their ability to engage in a counseling session using techniques learned throughout the course.

Note: Students are required to have access to a video recording device, a tripod, and an audio recording device, which they will begin using the first week of class.

PSYC 5400 - Diversity in Child/Adolescent Development and Learning

(5 cr.)
Diversity can have a profound influence on children's and adolescents' development and learning. Students in this course explore areas of diversity, such as gender, culture, language, disability, and sexual orientation and how they influence developmental and learning needs of this particular population. Applying core concepts and theories of development and learning, psychology students engage in practical approaches through which they reflect on their own perspectives and preconceptions and learn the complex ways diversity influences development and learning of the children and teenagers. Moreover, using the latest research and resources, students work toward gaining knowledge and skills for improving developmental and learning outcomes for children and adolescents.

PSYC 5480 - Psychology of Organizational Behavior

(5 cr.)
Students in this course examine the application of behavioral theories in organizational settings. The focus is on individual, group, and organizational behavior. Topics include individual differences in employee motivation and job satisfaction, group development, team building, organizational leadership, and organizational design, culture, and development. Students acquire a broad knowledge base in organizational psychology, its research, and its applications.
PSYC 5540 - Strategic Planning, Management, and Leadership in a Global Context♦

(5 cr.)
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships between strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: thinking, acting, and leading strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 5573 - Child and Adolescent Health♦

(5 cr.)
Students in this course learn about diseases and disorders in children and adolescents. Topics include diabetes, anorexia, headaches, epilepsy, burn injuries, cystic fibrosis, asthma, addiction, and adolescent obesity. Health promotion for children and adolescents is discussed, including cardiovascular health, nutrition, and exercise. Also covered are insights into special issues such as post-traumatic stress disorder, daily stress, sexually transmitted diseases, sleep disorders, and ethical and legal issues in pediatric and adolescent health psychology.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 5701 - Culture and Psychology

(5 cr.)
Students in this course explore the cultural components, research, and theory of cross-cultural psychology. In addition to the previously listed goals, students focus on the impact that culture has on the field of psychology around the world. The scope of this course is broad, with the core theme being cross-cultural psychology (focusing on cultures representing different parts of the world) and comparing cultural influence on human psychology. Many of the topics addressed in the course are related to human development. Additionally, interactions between culture and social behaviors, health,
mental health, and mental illnesses are emphasized throughout the duration of this course.

**PSYC 5705 - Organizational Behavior Performance and Evaluation**

(5 cr.)
The focus of this organizational behavior and human capital development course is on organizational behavior, motivation, collaboration, and performance and evaluation of individuals and teams. Some of the questions that may be explored relate to how human resource managers motivate and build resiliency in their organizational culture. Students will also consider the influence of organizational structure behavior on individuals and teams, how behavior and motivation are impacted in a global virtual environment, and the impact of expert systems and artificial intelligence on the behavior of employees.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 5706 - Ethics and Standards of Industrial Organizational Psychology**

(5 cr.)
Students in this course examine the origins of professional codes of ethics and standards of scientific psychology. Topics include ethical issues in academics (research, teaching, supervision), various work settings (assessment, consulting), and ethics involved in working with diverse populations. Additionally, students are introduced to forensic psychology and ethical issues related to the legal system. Students also explore how cultural factors are addressed in various ethical codes and the implications for scholar-practitioners.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 5722 - Counseling and Psychotherapy Theories**

(5 cr.)
There are hundreds of therapeutic theories and techniques available to frame the practice of counseling and psychotherapy. An important skill for mental health counselors is to understand the strengths and limitations of these theories to determine which are most appropriate and work best in their own personal practice. In this course, students explore the history of counseling and psychotherapy theories. They examine the major approaches to counseling and psychotherapy in current use, including empirical foundations, advantages, and limitations. Students assess examples of theory-based applications and develop a personal theory of counseling based on theories and techniques assessed in the course.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PSYC 5723 - Multicultural Counseling♦

(5 cr.)
Students can increase their sensitivity, awareness and knowledge of, and skills related to multicultural counseling and working effectively with diverse clients in this course. Students explore how their own cultural development, biases, values, and strengths impact the development of their counseling approach. Embracing diversity and various client identity issues and their impact on the counseling relationship are foundational to the course. The application of traditional theoretical orientations and current multicultural theories to culturally diverse groups is also addressed. Topics include age, race, gender, sexual orientation, religious preference, physical disability, social class, ethnicity and culture, culturally sensitive diagnosis and assessment, and family patterns.
Prerequisites
• Counseling Residency I

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 5740 - Disaster, Crisis, and Trauma

(5 cr.)
Students in this course examine disaster, crisis, trauma, and their psychological impact on individuals, families, and communities. Students apply assessment and intervention strategies to a broad range of topics, including terrorism and genocide, combat and war, natural disasters, school crises, childhood trauma, and sexual assault and partner violence. The emphasis of the course is on the importance of culturally appropriate service delivery programs and interventions for individuals, families, and communities affected by disaster, crisis, and trauma.

PSYC 5741 - Psychology of Terrorism

(5 cr.)
Students in this course explore terrorism from a psychological perspective. Topics include types of terrorism; contributing factors related to the development of terrorists and terrorist organizations; counterterrorism agencies, laws, and regulations; the impact of terrorist events on individuals, families, and communities; prevention, intervention, and postvention with survivors; media coverage of terrorist events; human rights and ethical issues; and future trends related to the psychology of terrorism. Students examine the threat of terrorism in their own community; evaluate the potential impact; and apply prevention, intervention, and postvention strategies to promote resiliency among individual and families within the community.

PSYC 5745 - Health Psychology
Students in this course review the field of health psychology with a focus on the biopsychosocial model, and behavioral and biomedical theories are also discussed. Topics include the effect of psychological (personality), behavioral (health behaviors and coping), and social factors (stress and physician-patient relationships) on physical health and wellness. The course specifically addresses cardiovascular and immune health with a discussion of heart disease, stroke, cancer, and HIV/AIDS.

**PSYC 5750 - Leadership Development**

An understanding of the psychological principles of leader development often enhances leadership skills and ability to influence others to work toward common goals. In this course, students examine the psychology of leadership and leader development through cross-cultural, social, psychological, and political contexts. They identify and assess the psychological theories of leadership, leadership styles, qualities of great leaders, global leadership competencies, and instruments used to assess leadership and leadership potential. Students apply these psychological theories to assess and develop their own capacity for leadership.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 5755 - Leadership and Leader Development**

Leadership is complex and requires an exploration of the nuances, theories, and development required to be an effective leader. Students are provided with an extensive overview of leadership theories examining leadership from historical to more contemporary perspectives. Some of the more contemporary topics explored include strategic and global leadership, team leadership, emotional intelligence, and crisis leadership. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership. Students also examine various perspectives on leadership and the role of leadership in the achievement of organizational, group, and individual goals. Students engage in application assignments and discussions, focusing on effective leadership issues and practices. Ethical, cultural, and global aspects of leadership will be explored throughout the course. Leader development will be emphasized as students examine different leadership issues.

**PSYC 5760 - Psychology and the Media**

Students in this course examine different types of media and how each affects individuals, groups, and cultures. Topics include the psychological impact of the media as it relates to violence, prosocial behaviors, sex and pornography, advertising, news and
politics, special populations, and culture and the global community. Students also examine ethical and legal issues related to psychology and the media and the impact of the media on social change.

**PSYC 5765 - Educational Psychology**

(5 cr.)
In this course, students examine the variables related to teaching and learning to understand how educational psychologists contribute to teacher effectiveness, student motivation, and overall academic achievement. They assess teaching methods, learning environments, curriculum development, educational achievement, and characteristics of teachers and learners. They also explore educational assessment, environmental issues, and educational research techniques. Students complete an article summary through which they explain the rationale, methods, findings, and implications of a current research issue. Sharing their topical summaries with the class, students gain multiple perspectives and make connections within the field of educational psychology.

**PSYC 5781 - Psychopathology From a Clinical Perspective**

(5 cr.)
Students in this course are provided with an in-depth examination of current theory and research associated with major psychological disorders and their diagnosis. The primary classification systems are explored in terms of their applicability and limitations. The factors that impact the assessment, diagnosis, and treatment of disorders along a continuum of mental health are explored. Application of the diagnostic criteria in terms of case conceptualization is emphasized.

**PSYC 6001 - Foundations for Graduate Study in Psychology**

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals, and they develop a program of study, a professional development plan, and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

**PSYC 6002 - Foundations of Graduate Study in Psychology**

(3 cr.)
Students in this course are introduced to Walden University and to the requirements
for successful participation in an online curriculum. Students build a foundation for academic and professional success as social change agents. They assess the relationship of Walden’s mission and vision to professional goals. They establish connections with their peers and the broader Walden community. Students engage in course assignments focused on the practical application of scholarly writing, critical-thinking skills, academic integrity, ethics, and the promotion of professional and academic excellence within the field of psychology.

PSYC 6002A - Foundations for Graduate Study in Psychology

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students build a foundation for academic and professional success as social change agents. They assess the relationship of Walden’s mission and vision to professional goals. They establish connections with their peers and the broader Walden community. Students engage in course assignments focused on the practical application of scholarly writing, critical-thinking skills, academic integrity, ethics, and the promotion of professional and academic excellence within the field of psychology.

PSYC 6005 - Business Concepts for the Organizational Development Professional♦

(5 cr.)
Organizational success depends on many aspects, such as human and market factors. In this course, students explore these factors as well as the language of work, business, and management structures and processes. They also examine related topics, such as finance, marketing, accounting, strategic planning, organizational design, and quality and process improvement. Students apply concepts and theories to case study scenarios and real-life situations. They also demonstrate their knowledge through a health audit of an actual organization, for which they provide a synopsis of a variety of organization aspects, such as ethical and legal issues, organizational architecture, group relations, human factors, and accounting and financial factors, among others.

Note: To register for this course, please contact the Student Success Advising Team.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6121 - Development in the Digital Age♦

(5 cr.)
Students in this course examine the impact of social media and other digital technology on children, teens, and adults and at different stages of cognitive, social, and emotional development. They also examine how identity development, relationships, and socialization can be affected by the use of digital and social media. Students receive
a historic review of electronic media research, including the effect of violent television on viewer behavior, which provides a foundation to examine the current impact of digital media. Current issues such as sexting, online harassment, cyberbullying, and cyberstalking are explored, along with strategies for mitigating these issues. Similarly, positive impacts of social media, such as building social groups, finding communities, overriding generational gaps, seeking health and mental health support and resources, are also explored. Students also examine generational, socioeconomic, and cultural differences in access to and use of digital media. Digital media literacy and public policy are explored, with an emphasis on positive social change.

Prerequisites
- PSYC 6215
- PSYC 6701

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6122 - Understanding Digital Data in the Changing Economic Landscape♦

(5 cr.)
Digital technology has impacted all aspects of human life, including the economy. With the advent of e-commerce, the economic landscape has changed drastically in the 21st century. E-commerce businesses, such as Amazon, eBay, Uber, Airbnb, Tod's, and Starbucks have impacted the economic landscape at both micro- and macro-levels, ranging from people's personal finances to larger economic activities such as jobs, investments, and inflation. In this course, students examine consumer behaviors before, during, and after the purchase experience. With the proliferation of digital media, businesses have begun focusing more on processing and analyzing digital data for business performance. Digital data analytics can be utilized to interpret consumer attitudes, examine the relationship between consumers and businesses, and to explore their satisfaction levels, among other factors. Students examine case studies illustrating the influences that digital data analytics may have on business performance, apply analytic tools for analyzing consumer digital data, and explore digital technology trends and their impact on consumer satisfaction.

Prerequisites
- PSYC 6800 or RSCH 6210
- PSYC 6121
- PSYC 6123

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6123 - Personal and Social Life in the Digital World♦
The course explores the interaction of technology, culture, and society, specifically how human development, actions, behaviors, and groups are influenced and shaped by media and technology. The impact of media and technology affects us throughout the life cycle—including childhood, adolescence, adulthood, and old age. In today’s high-tech world, just about every aspect of our lives—our educations, careers, and relationships—leave digital footprints. Accordingly, the importance of maintaining a high level of media and technology literacy is greater than ever before. Our increasingly technological world provides many opportunities and benefits; however, it also brings with it challenges and risks, such as digital victimization, breach of privacy and security, and human trafficking, among many others. It is up to each individual to take personal responsibility for the way they interact with media and technology. This course examines how to be a mindful consumer of technology and considers ways to harness it to effect positive social change.

**Prerequisites**

- RSCH 6110

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6131 - Theories of Learning**

(5 cr.)

An in-depth study of modern learning theory, its historical context, theoretical ideas, research, and applications in various learning environments are provided to students in this course. The theoretical ideas of the major paradigms of learning, such as behaviorism, gestalt, cognitivism, information processing, constructivism, and humanism, will be covered. Students in the course will also review current theories of cognitive processes such as language, memory, and intelligence and examine how differences in cognitive levels throughout the lifespan mediate learning of educational subject matters.

**Prerequisites**

- RSCH 6110

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6145 - Crisis Management**

(5 cr.)

This course is designed to introduce students to the fundamentals of crisis management and crisis leadership principles and models, strategies, and tactics. In addition, students will demonstrate an understanding of the theories and principles of practice related to crisis, disasters, and other trauma causing events and the ethical and legal considerations in crisis and trauma response. At the end of this course, students will know models for
training and supporting other counselors the area of crisis response for community, national, and international crises.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6200 - Themes and Theories of Psychology

(5 cr.)
In this course, students are introduced to theories, research, and themes that form the tenets of psychology. Basic theoretical models are reviewed, including psychodynamic, cognitive, developmental, social learning/sociocognitive, behaviorist, learning and motivation, systems, biopsychosocial, and gender theories. Theories encompassing diverse populations, including cross-cultural and feminist theories, are also covered. Students critically examine the strengths and limitations of these theories and their utility in the field of psychology. Contemporary themes in psychology are explored, with an emphasis on application of theories designed to effect positive social change.
Prerequisites
- PSYC 6002

PSYC 6202 - Survey Research Methods

(5 cr.)
Participants in this course study in-depth a range of survey methods administered via in-person interview, self-report, phone interview, and the Internet. Topics will include survey design, administration, analysis, and addressing sources of bias. Students also review theoretical and empirical research on question and questionnaire effects. Students prepare in the practice of writing questions and designing questionnaires, both in general and in light of existing research.
Prerequisites
- RSCH 6110
- PSYC 6245

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6203 - Attitudes/Attitude Change

(5 cr.)
Students in this course cover classic and contemporary models of attitudes, their functions, and how they are formed and maintained. The connection between attitudes and behavior and how attitudes are changed through the process of persuasion and cognitive dissonance are also examined.
Students may take this as a non-degree course, which means they do not have to be enrolled in a
PSYC 6204 - Intergroup Relations

(5 cr.)
Students in this course study in-depth basic and applied research and theory on both group processes and group relations, including some of the following topics: prejudice, discrimination, stereotyping, social categorization, minority and majority influence, group decision making, leadership, group structure, group socialization, bargaining and negotiation, intergroup conflict and cooperation, collective action and cognition, collective self and identity, social identity, language and identity, ethnic and cultural relations, and social dilemmas.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6205 - History and Systems of Psychology

(5 cr.)
In this course, students focus on the historical and philosophical roots of psychology and counseling. Through conceptual and application-based assignments, students learn about structuralism, functionalism, behaviorism, psychoanalysis, gestaltism, and existentialism as well as contemporary perspectives, including evolutionary psychology, positive psychology, postmodernism, and feminist psychology. Students demonstrate and apply their knowledge through an integrative writing assignment in which they address the developmental history of a major area of study within a subdivision of psychology. Students also explore and consider themes of diversity and multiculturalism in psychology and counseling within each of the perspectives.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6211 - Contemporary Issues in Psychology

(5 cr.)
Students in this course are provided with an advanced-level overview of the core areas, topics, and concepts in psychology as well as considerations for related contemporary issues. They engage in a variety of conceptual and application-based assignments on the biological bases of behavior, learning and memory, cognition, motivation, lifespan development, theories of personality, stress and coping, psychological disorders, and social psychology. Students practice and develop critical-reading and analysis skills through reviews of journal articles and media publications. Through these reviews, students focus specifically on distinguishing facts and opinions, identifying bias in writing, and discovering the importance of data and evidence. Students use this knowledge in the analysis and composition of scientific writing. They also assess and incorporate themes
of diversity in their study and assignments.

 Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6214 - Consulting for Organizational Change♦

(5 cr.)
Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

 Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6215 - Lifespan Development♦

(5 cr.)
In this course, students are provided with an advanced overview of development through the lifespan, including prenatal, childhood, adolescent, adult, and late adult phases. Basic developmental processes and theories are examined and applied to developmental milestones that occur within these phases of development. Themes of diversity are highlighted throughout the course. Additional topics include ethics, research, global perspectives, and social change.

 Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6216 - Dynamics of Contemporary, International, and Virtual Organizations♦

(5 cr.)
Globalization, technological innovation, and market factors continually change the context of business, requiring professionals who understand how organizations function to work through challenges and harness opportunities for change. In this course, students explore the implications of the changing nature of organizations as well as the emergence of international and virtual organizations in a global economy. Through contextual and application-based assignments, students address the unique opportunities and challenges for government, for-profit, nonprofit, international, and virtual organizations. Applying acquired knowledge and skills, students provide a diagnosis and
recommendations for a specific organization's development efforts.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6220 - Psychology of Personality

(5 cr.)
Professionals study personality in a variety of contexts to better understand the factors that compose an individual's psychological framework, including feelings, thoughts, and motivations. Students in this course are introduced to the major theories of personality and personality assessment approaches. Students examine research that supports multiple theories as well as basic concepts and principles of the various schools of thought. They also explore and discuss related topics, such as various aspects of psychology, including psychoanalytic, biological, behaviorist, learning, social-cognitive, trait and skill, humanistic, and existential, in addition to individual, cultural, and gender differences in personality. Students consider themes of diversity throughout the course.

Prerequisites
- RSCH 6110

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6225 - Biopsychology

(5 cr.)
An important branch of psychology, known as biopsychology, combines neuroscience with basic psychological models for the purpose of understanding how the brain and neurotransmitters influence human behavior. In this course, students examine the structure and functions of the central and peripheral nervous systems and explore the impact of neurobiology, endocrinology, and physiology on human behavior. They learn about brain functioning, including exploration of neural conduction; effects of neurotransmitters; sensory systems; and mechanisms of attention, memory, perception, and language. Students also explore literature addressing issues related to neuroplasticity, lateralization, and regeneration. Applying knowledge and skills gained throughout the course, students develop a final research paper through which they synthesize biopsychology concepts, critically analyze related research, and demonstrate APA-writing ability.

Prerequisites
- PSYC 6781

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PSYC 6238 - Cognitive and Affective Bases of Behavior♦

(5 cr.)
Students in this course review core theories of cognition and affect and their roles in human functioning. Students review basic components of cognition, including knowledge acquisition, knowledge representation, language and various aspects of thinking, and emotions. There is also a focus on the multidimensional and interactive characteristics of human cognitive and affective functioning. A specific emphasis is placed on theories and research bearing on how cognition and affect interact in important areas of human functioning, such as emotional regulation, construction of reality, motivation, psychopathology, and health.

Prerequisites
- RSCH 6110

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6240 - Human Motivation♦

(5 cr.)
This course is an overview of physiological, psychological, and social aspects in the study of motivation, including an exploration of historical and contemporary theories and perspectives. In the course, both conceptual understanding of theories associated with motivation and their applications to personal, professional, and social issues are emphasized. Major topics include physiological, learned, cognitive, and emotional aspects of motivation. Themes of diversity are threaded throughout the course.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6242 - Changing Health Behavior: Theory and Practice♦

(5 cr.)
Students in this course review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. They cover health-related issues, including dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, students examine the analysis of behavior change within specific populations (young, elderly, cognitively impaired, etc.) and factors that predict or serve as obstacles to lifestyle change and adherence.

Prerequisites
- PSYC 6745

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PSYC 6245 - Social Psychology♦

(5 cr.)
In this course, students use the lens of social psychology to examine both social cognitions and social behavior—nearly all phenomena that pertain to the individual in society. Students explore the topics of perceptions, attitudes, relationships and attraction, the motivation to help others, prejudice and aggression, conformity and obedience, group behavior, and the influence of culture, and consider how knowledge of these topics can be used to effect positive social change. Students' application of what they learn in this course culminates in a final project in which they develop a plan for using social psychology research to address a significant social problem. Moreover, students' learning in this course will extend to their personal and professional lives and truly enable them to effect positive social change as a scholar-practitioner committed to doing so.

Prerequisites
- PSYC 6215
- PSYC 6701

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6250 - Group Process and Dynamics

(5 cr.)
Group work is an increasingly popular, effective counseling method that allows group members to share perspectives and provide useful feedback and information in a structured setting. Students are provided with a comprehensive review of counseling approaches to group therapy in this course. Students examine the theoretical bases of different approaches to group therapy, including psychoanalytic, existential, person-centered, gestalt, transactional, behavioral, rational-emotive, and reality therapy. They engage in a variety of practical application assignments and discussions, focusing on counseling of different types of groups, the efficacy of using group therapy as the treatment method with multicultural and diverse populations, and the stages of group development.

PSYC 6290 - Independent Readings

(1–5 cr.)
Students in this course are provided with an opportunity to examine a topic area of interest in greater depth than that which is provided in the course offerings. Students work with the course instructor to design a syllabus that guides the independent readings project. Content must include theoretical and empirical research literature that addresses implications related to diversity and professional practice. Students may only select this course once during their program of study and cannot use this course to
replace one that currently exists in the catalog.

Prerequisites
- Approved petition to Student Success Advising

PSYC 6296 - Social Cognition and Attitudes♦

(5 cr.)
In this course, students are oriented to key elements in social cognitive processing as a subspecialty of social psychology, including attribution theory, schema theory, social cognition relative to self, the role of attention/consciousness in social cognition, errors and biases in social thought, heuristics, person memory, affect and cognition, attitudes, social influence, and behavior relative to social cognition. Students investigate the structure and function of attitudes and how they are formed and maintained. They also examine the connection between attitudes and behavior and how attitudes are changed through the process of persuasion and cognitive dissonance.

Prerequisites
- PSYC 5245 or PSYC 6245

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6305 - Statistics 1♦

(5 cr.)
Psychology practitioners use statistics in a variety of professional undertakings, such as creating studies to assess human behavior or deciding which treatment approaches are most effective for a specific client. Students in this course are provided with a thorough analysis of basic descriptive and inferential statistical methods commonly used in the social sciences. Students work toward developing the skills with which to write, analyze, and critique social science research. They learn various methods, including computation and analysis of frequency distributions, measures of central tendency, and statistical hypothesis testing. Students examine statistical tests (and underlying assumptions), including z-score; single-sample, independent-sample, and related-sample t-tests; analysis of variance; correlation, regression; and chi-square tests. Students also receive an introduction to the SPSS statistical software package.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6307 - Multivariate Analysis♦

(5 cr.)
Students in this course are provided with an introduction to multivariate statistics and their uses in the social sciences. Students explore a variety of topics, including data
screening and cleaning, factorial ANOVA, analysis of covariance, multivariate analysis of variance (MANOVA), discriminant function analysis, multiple regression, logistic regression, path analysis, factor and principle components analysis, and structural equation modeling. Through contextual and application-based assignments, students focus on understanding theory and using SPSS to solve problems. 

Prerequisites
- RSCH 6210V or RSCH 6210Y or RSCH 6210
- RSCH 6260V

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 6315 - Tests and Measurement**

(5 cr.)

Students in this course are provided with an overview of the different types of tests used in clinical, educational, and organizational settings. Students engage in a comprehensive examination of psychometric properties used to develop and evaluate these instruments. They examine normative sampling and standardization, reliability and validity, test score interpretation, and test development. Students also consider related ethical, legal, and sociocultural issues, including cultural bias and fairness. Professional standards for testing provide a foundation for the course.

Prerequisites
- RSCH 6110 or RSCH 8100Y or RSCH 8100Z or RSCH 8101D or RSCH 8101E or RSCH 8101H or RSCH 8101M or RSCH 8101N or RSCH 8101R or RSCH 8101X or RSCH 8101Z or RSCH 8110A or RSCH 8110B or RSCH 8110C or RSCH 8110D or RSCH 8110E or RSCH 8110F or RSCH 8110H or RSCH 8110I or RSCH 8110J or RSCH 8110K or RSCH 6100L or RSCH 6110D or RSCH 7100D or RSCH 7110D or RSCH 8100A or RSCH 8100C or RSCH 8100D or RSCH 8100H or RSCH 8100I or RSCH 8100J or RSCH 8100L or RSCH 8100P or RSCH 8100U or RSCH 8100W or RSCH 8100X or RSCH 8110L or RSCH 8110M or RSCH 8110N or RSCH 8110O or RSCH 8110P or RSCH 8110R or RSCH 8110S or RSCH 8110T or RSCH 8110U or RSCH 8110V or RSCH 8110W or RSCH 8110X or RSCH 8110Y or RSCH 8110Z or RSCH 6110Y or RSCH 6110V or RSCH 6110l or RSCH 6110F
- PSYC 6781 or CPSY 6221 or CPSY 8781 or PSYC 8721 or PSYC 8781L or PSYC 6225 or CPSY 8226 or FPSY 6225 or PSYC 6010 or PSYC 8050 or PSYC 8226 or PSYC 8226L or PSYC 8226P or PSYC 6765 or DPSY 8760 or PSYC 8225 or PSYC 8760 or PSYC 6800 or RSCH 6210Y or RSCH 6210l or RSCH 6210D or RSCH 6210F or
PSYC 6333 - Crisis Vicarious Trauma and Compassion Fatigue

(5 cr.)
Through this course, students gain an understanding and awareness of vicarious trauma and compassion fatigue for trauma-response-helping professionals. They examine intervention strategies and models of treatment and prevention of vicarious trauma and compassion fatigue through the lens of counselor educators, supervisors, and clinicians. Applying course concepts, students gain hands-on practice conducting a needs assessment and examining the use of standardized instruments. They also propose social change recommendations related to vicarious trauma and compassion fatigue to promote informed and competent trauma-response-helping professionals. Students engage in course assignments that emphasize the ethical, legal, multicultural, and spiritual implications for wellness and self-care, including personal, professional, and organizational elements. As a final project, students interview a trauma-response-helping professional and develop an organizational wellness plan for their setting.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6342 - Psychotherapy Interventions I

(5 cr.)
In this course, students have the opportunity to acquire and demonstrate clinical and counseling skills in the context of empirically supported modes of intervention. Students explore and display intervention techniques related to the beginning, middle, and ending phase of therapy, focusing on a stage-of-change model and universal techniques. They apply skills in treatment-planning exercises, clinical vignettes, and face-to-face simulations of psychotherapy sessions. Note: Students must film and submit videos of mock therapy sessions; therefore, they must have access to a digital camcorder for this course.

PSYC 6393 - Capstone

(5 cr.)
Students are provided with the opportunity to synthesize knowledge and skills acquired throughout their program into a practical project designed to promote positive social change in a capstone project. During this course, students work on a capstone project in which they complete a major integrative paper on a topic related to their specialization, incorporating theoretical and practical knowledge as well as social scientific research skills acquired throughout the program. The instructor may approve
other capstone projects presented by students.

**Prerequisites**
- All prior coursework

**PSYC 6393A - Capstone**

(5 cr.)
Students are provided with the opportunity to synthesize knowledge and skills acquired throughout their program into a practical project designed to promote positive social change in a capstone project. During this course, students work on a capstone project in which they complete a major integrative paper on a topic related to their specialization, incorporating theoretical and practical knowledge as well as social scientific research skills acquired throughout the program. The instructor may approve other capstone projects presented by students.

**Prerequisites**
- Registration by the Student Success Advising Team

**PSYC 6393R - Capstone (Research)**

(5 cr.)
Students are provided with the opportunity to synthesize knowledge and apply literature research skills acquired throughout their program into a capstone research paper designed to promote positive social change. During this course, students will synthesize the literature, identify a gap in the literature, and generate a research problem statement related to a selected topic of study.

**Prerequisites**
- All prior coursework

**PSYC 6393TL - Capstone [Tempo Learning®-Specific Course]**

(5 cr.)
Students are provided with the opportunity to synthesize knowledge and skills acquired throughout their program into a practical project designed to promote positive social change in a capstone project. During this course, students work on a capstone project in which they complete a major integrative paper on a topic related to their specialization, incorporating theoretical and practical knowledge as well as social scientific research skills acquired throughout the program. The instructor may approve other capstone projects presented by students.

**Note:** This version of PSYC 6393 is only available as part of specific competency-based Tempo Learning® programs.

**PSYC 6400 - Diversity in Child/Adolescent Development and Learning**
Diversity can have a profound influence on children’s and adolescents’ development and learning. Students in this course explore areas of diversity, such as gender, culture, language, disability, and sexual orientation and how they influence developmental and learning needs of this particular population. Applying core concepts and theories of development and learning, psychology students engage in practical approaches through which they reflect on their own perspectives and preconceptions and learn the complex ways diversity influences development and learning of the children and teenagers. Moreover, using the latest research and resources, students work toward gaining knowledge and skills for improving developmental and learning outcomes for children and adolescents.

**PSYC 6401 - Principles/Conceptual Foundations of Behavior Analysis for Children and Adolescents**

(5 cr.)

Applied behavior analysis is a set of skills used in the assessment and treatment of individuals with a variety of behavioral problems and developmental delays, including autism spectrum disorders. Students in this course explore the concepts and principles of applied behavior analysis and gain an understanding and treatment of behavior problems of children and adolescents in applied settings. Students apply these concepts and principles in the development and implementation of data-based decision making using functional behavioral assessments and the creation of intervention procedures. Techniques in observation, use of reinforcement, and repeated measures are explored. These techniques are applied to develop intervention plans and to assess treatment effectiveness.

**PSYC 6465 - Foundations of Industrial/Organizational Psychology**

(5 cr.)

An understanding of the psychological principles of leader development often enhances leadership skills and ability to influence others to work toward common goals. In this course, students examine the psychology of leadership and leader development through cross-cultural, social, psychological, and political contexts. They identify and assess the psychological theories of leadership, leadership styles, qualities of great leaders, global leadership competencies, and instruments used to assess leadership and leadership potential. Students apply these psychological theories to assess and develop their own capacity for leadership.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6480 - Psychology of Organizational Behavior**
Students in this course examine the application of behavioral theories in organizational settings. The focus is on individual, group, and organizational behavior. Topics include individual differences in employee motivation and job satisfaction; group development; team building; organizational leadership; and organizational design, culture, and development. Students acquire a broad knowledge base in organizational psychology, its research, and its applications.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6510 - Career Counseling

Students in this course are provided with the opportunity to develop practical skills in career and vocational assessment as well as functional knowledge of how career assessment can assist in the exploration and understanding of the interrelationship among work, family, and life roles. They examine major sources of career and work information available on the Internet as well as through printed material and computer-based guidance systems. Gaining practical career counseling experience, students administer, score, and interpret printed and computer-based assessments of career interests, beliefs, and values. Students learn how to integrate career development theory and assessment results with career clinical interventions. They also examine clinical and assessment issues, devoting attention to computer-based applications and multicultural implications.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6551 - I/O Testing and Measurement

Students in this course study in-depth measurement theory and the tests used in organizational settings. They examine comprehensively the psychometric properties used to develop and evaluate these instruments, including classical test theory, item response theory (IRT), and item forensics approaches to testing. Topics include normative sampling and standardization, reliability and validity, test score interpretation, and test development. Students also address ethical, legal, and sociocultural issues, including cultural bias and fairness. Professional standards for testing provide a foundation for the course.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6552 - Psychology of Motivation at Work
(5 cr.)
Students in this course will study in depth the major topics in micro-level organizational behavior. Accountability, organization citizenship behaviors, forms of organizational attachment, motivation, goal theory, and issues of equity and justice will be covered.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6573 - Child and Adolescent Health♦

(5 cr.)
Students in this course learn about diseases and disorders in children and adolescents. Topics include diabetes, anorexia, headaches, epilepsy, burn injuries, cystic fibrosis, asthma, addiction, and adolescent obesity. Health promotion for children and adolescents is discussed, including cardiovascular health, nutrition, and exercise. Also covered are insights into special issues such as post-traumatic stress disorder, daily stress, sexually transmitted diseases, sleep disorders, and ethical and legal issues in pediatric and adolescent health psychology.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6574 - Women’s Health♦

(5 cr.)
Students in this course examine healthcare issues in women and girls. Topics include healthy development, trauma, coping, self-esteem, resilience, self-care, well-being, sexual health, relationships, roles, family, schooling, careers, motherhood, transitions, violence, security, bereavement, and positive aging.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6579 - Job Attitudes, Measurement, and Change♦

(5 cr.)
Students in this course learn in depth about major theories of job attitudes, as well as their antecedents, correlates, and consequences. Topics will include job satisfaction, organizational commitment, organizational citizenship behavior, withdrawal behavior, and counterproductive organizational behavior. Application of learning will be demonstrated through an applied attitude survey research project assignment.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6620 - Adult Learning♦
Students in this course explore the history and development of adult education as a distinct entity from child and/or adolescent learning. Students examine the various adult learning environments, including but not limited to professional training and online learning. They examine adult learning theory and how andragogy is applied via theoretical principles in multiple contexts. Special attention is paid to specific challenges and needs of the adult learner. Students in this course become familiar with current research in the field of adult education and generate a comprehensive analysis that synthesizes scholarly research in the area.

Prerequisites
- RSCH 6110

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6640 - Applied Social Psychology**

Students are introduced to the goals and methods of applied social psychology. Topics explored include attitudes, social identity, social influence, attribution, social relations, diversity, and group dynamics in the context of educational, environmental, health, legal, and organizational settings as they relate to real-world social issues, practical problems, and the social domains of daily life. Emphasis is placed on exploring the contributions and contemporary applications of social psychological constructs, principles, theories, and interventions in these settings to promote positive social change.

Prerequisites
- RSCH 6110
- PSYC 6245

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6700 - Psychology and Social Change**

In this course, students analyze and evaluate theories of social and personal change. Students engage in a variety of conceptual and application assignments focused on power and social inequalities, ethnic inequalities, global environment, and issues related to gender and sexism, such as homophobia. In addition, students examine the impact of social change theories on children, families, and societies. They explore the concepts of change agent and change advocate as well as the role of the psychologist as change agent. Students also engage in an integrative written assignment to synthesize theories and analyze a current social problem in their community, for which they propose an action to address the issue and drive positive social change.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6701 - Culture and Psychology♦

(5 cr.)
Students in this course explore the cultural components, research, and theory of cross-cultural psychology. In addition to the previously listed goals, students focus on the impact that culture has on the field of psychology around the world. The scope of this course is broad, with the core theme being cross-cultural psychology (focusing on cultures representing different parts of the world) and comparing cultural influence on human psychology. Many of the topics addressed are related to human development. Additionally, interactions among culture and social behaviors, health, mental health, and mental illnesses are emphasized throughout the duration of this course.

Prerequisites
- PSYC 6200

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6704 - Ethics and Standards of Psychology♦

(5 cr.)
Students in this course examine the psychologist's principles of conduct, code of ethics, and standards of practice. The guidelines for practice in specific psychological services and with identified populations are explored. The ethical decision-making process is studied in depth. Topics include informed consent, confidentiality, duty to warn, mandated reporting, recordkeeping, the limits of competency, and dual relationships. Through this course, students also address issues of professional development, such as supervision, peer consultation, and continuing education.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6706 - Advanced Social Psychology♦

(5 cr.)
Students in this course are provided with an advanced analysis of social psychology, including a review of the historical context and cultural grounding of social psychological theory. Students devote special attention to sociocultural psychology and the broad base of knowledge related to history, research methods, and applications to social and cultural processes. They explore and discuss topics related to small-group processes and dynamics and shared cognition, attitude development and shifting, social cognition and emotion, self-concept and self-regulation, conformity, affiliation and independence in
groups, group performance, leadership, cross-cultural psychology, and biopsychosocial diversity. Students demonstrate their understanding of theories and concepts through a final analysis of a social problem occurring in their own community for which they propose an intervention to ameliorate the problem.

**Prerequisites**

- PSYC 6245 or PSYC 6305 or PSYC 6310 or PSY 8247 or PSYC 8304 or PSYC 8311 or RSCH 6100Y
- RSCH6200Y

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6717 - Foundation and Philosophy of Behavior Analysis**

*(5 cr.)*

Applied Behavior Analysis (ABA) is a set of skills used in the assessment and treatment of individuals with a variety of behavioral problems and developmental delays, including autism spectrum disorders. In this course, students explore the philosophy and theory of behaviorism and how these undergird applied behavior analysis. Students apply the theory and philosophy of behaviorism to the application of behavioral principles and concepts in the context of applied behavior analysis to impact social change.

This course covers tasks from the Board Certified Behavior Analyst® (BCBA®) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

**Prerequisites**

- PSYC 6002
- PSYC 6215

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6717A - Foundation and Philosophy of Behavior Analysis**

*(5 cr.)*

Applied Behavior Analysis (ABA) is a set of skills used in the assessment and treatment of individuals with a variety of behavioral problems and developmental delays, including autism spectrum disorders. In this course, students explore the philosophy and theory of behaviorism and how these undergird applied behavior analysis. Students apply the
theory and philosophy of behaviorism to the application of behavioral principles and concepts in the context of applied behavior analysis to impact social change. This course covers tasks from the Board Certified Behavior Analyst® (BCBA®) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites

- Admission into the Walden University MS in Psychology, Applied Behavior Analysis Specialization

**PSYC 6718 - Psychology of the Exceptional Individual**

(5 cr.)
Students in this course examine the cognitive, social-emotional, and psychomotor characteristics of individuals significantly deviating from the norm in behavior and/or adjustment. They learn ways to understand and work with individuals with learning disabilities (including emotional, behavioral, and intellectual disorders; autism; brain injury; hearing and vision loss; physical disabilities; and health disorders) and those who are gifted and talented. Students explore topical issues, including inclusion, transition to adulthood, and multicultural diversity. Through this course, students work toward gaining the knowledge and skills for developing research-based educational and therapeutic interventions.

**PSYC 6719 - Developmental Psychopathology**

(5 cr.)
In this course, students explore formal psychopathology, including emotional and behavioral disorders and classification systems of infants, children, and adolescents. Students examine contrasting models of psychopathology, classification and epidemiology of childhood psychopathology, co-morbidity rates, differential issues from the current diagnostic manual's outcome of childhood disorders, therapeutic approaches and their efficacy, and developmental resilience. They examine and discuss literature and topics related to assessment, diagnosis, and treatment; a wide range of disorders and disruptive behaviors; and abuse and neglect. Applying course concepts, students assess case studies of diagnostic issues for a contemporary and practical understanding of psychopathology.

**PSYC 6720 - Diagnosis and Assessment**
Students are provided with an overview of what is commonly referred to as abnormal psychology; however, students also consider factors constituting normalcy from multiple perspectives. Students explore the application of diagnostic criteria in various mental health work settings, such as schools, rehabilitation facilities, community agencies, and private practices. Using the scholar-practitioner model, students consider environmental and biological factors contributing to behavioral disorders. Students also examine techniques commonly used for the diagnosis and treatment of cognitive, emotional, and developmental disorders as well as for psychophysiological and psychosocial problems. Through coursework and discussions, students consider multicultural factors that complicate diagnosis as well as current trends and contemporary issues in clinical assessment and diagnosis.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6722 - Counseling and Psychotherapy Theories**

(5 cr.)

There are hundreds of therapeutic theories and techniques available to frame the practice of counseling and psychotherapy. An important skill for mental health counselors is to understand the strengths and limitations of these theories to determine which are most appropriate and work best in their own personal practice. In this course, students explore the history of counseling and psychotherapy theories. They examine the major approaches to counseling and psychotherapy in current use, including empirical foundations, advantages, and limitations. Students assess examples of theory-based applications and develop a personal theory of counseling based on theories and techniques assessed in the course.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6723 - Multicultural Counseling**

(5 cr.)

Students are provided with the opportunity to increase their knowledge of multicultural counseling and the delivery of psychological services as well as related skills needed in professional practice. Students explore diversity and identity issues and discuss their impact on the therapeutic relationship. They examine the application of traditional theoretical orientations and current multicultural theories to culturally diverse groups. Through a variety of assignments designed to provide practical application of content, students also investigate counseling concepts related to race and ethnicity, sex and gender, sexual orientation, social class, age, and ability.

Prerequisites

- Counseling Residency I
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6724 - Child Psychotherapy♦

(5 cr.)
What are some of the special considerations of therapeutic treatment approaches in children? In this course, students have the opportunity to answer this question as they explore the psychological treatment of children from an array of theories and techniques, including play therapy. Students examine and discuss fundamentals and contemporary issues related to playroom organization, intake interviews, psychological assessment, treatment, evaluation, and intervention. They also explore typical play behaviors of children at various levels of development, cross-cultural aspects of play and their meanings, and issues of cultural sensitivity and ethical practice. Students complete a final written assignment to synthesize course concepts and demonstrate their understanding of child psychotherapy.

Prerequisites
- PSYC 6215

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6728 - Substance Abuse Counseling♦

(5 cr.)
The impact of substance abuse on the lives of people with addictions, and the lives of their families, makes for a highly complex and challenging area of mental health counseling. Counselors working with these individuals must possess a comprehensive understanding of the background, controversies, and current approaches in regard to the treatment of substance abuse. In this course, students examine psychological aspects of addictions involving alcohol, prescription medications, and illegal substances. They also examine current research in the field of dependency and addiction. Students engage in a variety of conceptual and application-based assignments on diagnosing patients, choosing among models of treatment, planning treatment, using group and family treatment plans, and ensuring treatment efficacy. They also consider strategies to promote change, including the trans-theoretical model of behavior change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6731 - Concepts and Principles of Behavioral Analysis
Applied Behavior Analysis (ABA) is a set of skills used in the assessment and treatment of individuals with a variety of behavioral problems and developmental delays, including autism spectrum disorders. Students in this course will explore the concepts and principles of applied behavior analysis. They also examine the concepts and principles of behaviorism to the application of behavioral principles in the context of applied behavior analysis, including behavioral observation and measurement, functions of behavior, developing and maintaining behaviors, and related ethical considerations. Students explore the impact of promoting positive social change through the application of ABA. This course covers tasks from the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites

- PSYC 6717

**PSYC 6731A - Concepts and Principles of Behavior Analysis**

Applied Behavior Analysis (ABA) is a set of skills used in the assessment and treatment of individuals with a variety of behavioral problems and developmental delays, including autism spectrum disorders. Students in this course will explore the concepts and principles of applied behavior analysis. They also examine the concepts and principles of behaviorism to the application of behavioral principles in the context of applied behavior analysis, including behavioral observation and measurement, functions of behavior, developing and maintaining behaviors, and related ethical considerations. Students explore the impact of promoting positive social change through the application of ABA. This course covers tasks from the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

**PSYC 6733 - Ethical, Legal, and Professional Issues in Behavioral Analysis**

With a focus on the Ethics Code for Behavior Analysts issued by the Behavior Analyst
Certification Board, Inc.® (BACB®), students in this course review responsible conduct of behavior analysts, ethical responsibilities to clients and their welfare, and ethical responsibilities to other individuals (e.g., colleagues) and the BACB®. In addition, students examine professional and legal issues involved in providing services in different contexts and with different client groups.

This course covers tasks from the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites
- PSYC 6731

PSYC 6733A - Ethical, Legal, Professional Issues in Behavior Analysis

(5 cr.)

Applied Behavior Analysis (ABA) is a set of skills used in the assessment and treatment of individuals with a variety of behavioral problems and developmental delays, including autism spectrum disorders. Students in this course will explore the concepts and principles of applied behavior analysis. They also examine the concepts and principles of behaviorism to the application of behavioral principles in the context of applied behavior analysis, including behavioral observation and measurement, functions of behavior, developing and maintaining behaviors, and related ethical considerations. Students explore the impact of promoting positive social change through the application of ABA. This course covers tasks from the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites
- PSYC 6731

PSYC 6734 - Introduction to Behavioral Assessment and Intervention

(5 cr.)

With a focus on the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) issued by the Behavior Analyst Certification Board, Inc.® (BACB®), this course covers the
basic principles of behavioral assessment and applied behavior analysis. Course participants explore fundamental techniques leading to the implementation of behavioral procedures and behavioral programs. More specifically, instruction focuses on conducting functional assessments and functional analyses, developing and implementing intervention procedures based on the outcome of the assessments and analyses, and data-based decision-making.

This course covers tasks from the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites
- PSYC 6733

**PSYC 6734A - Introduction to Behavioral Assessment and Intervention**

(5 cr.)

With a focus on the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) issued by the Behavior Analyst Certification Board, Inc.® (BACB®), this course covers the basic principles of behavioral assessment and applied behavior analysis. Course participants explore fundamental techniques leading to the implementation of behavioral procedures and behavioral programs. More specifically, instruction focuses on conducting functional assessments and functional analyses, developing and implementing intervention procedures based on the outcome of the assessments and analyses, and data-based decision-making.

This course covers tasks from the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites
- PSYC 6717
- PSYC 6731

**PSYC 6735 - Research Methods for Behavioral Analysis**
This course covers a variety of methods for data collection, measurement data collection, data analysis, and experimental designs that are common to applied behavior analysis. In addition to the theoretical background for single-subject research, this course emphasizes practical applications of research methods from baseline measurement to treatment evaluation. Advantages and limitations of various single-subject research methods are examined. Students design a small-n research study based on a research question developed from the applied behavior analysis literature. In addition, they critically evaluate research studies for the appropriate research design and methodology.

This course covers tasks from the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites
- PSYC 6717
- PSYC 6731

(Co-requisites: Only PSYC 6734 can be a co-requisite.)

**PSYC 6735A - Research Methods for Behavioral Analysis**

This course covers a variety of methods for data collection, measurement data collection, data analysis, and experimental designs that are common to applied behavior analysis. In addition to the theoretical background for single subject research, this course will also emphasize practical applications of research methods from baseline measurement to treatment evaluation. Advantages and limitations of various single subject research methods will be examined. Students will also design a small-n research study based on a research question developed from the applied behavior analysis literature. In addition, they will critically evaluate research studies for the appropriate research design and methodology.

Prerequisites
- PSYC 6731
- PSYC 6733
- PSYC 6734 (PSYC 6734 may be taken concurrently.)

**PSYC 6736 - Advanced Behavioral Assessment and Intervention**
This course extends students’ knowledge of operationalizing behavior, behavioral assessment, developing interventions, functional analysis/assessment, and social validity concerns through the utilization of applied behavior analysis methodologies. Course content emphasizes the relationship between valid assessment data and socially relevant interventions. This course covers tasks from the Board Certified Behavior Analyst (BCBA) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites
- PSYC 6717
- PSYC 6731
- PSYC 6734

**PSYC 6736A - Advanced Behavioral Assessment and Intervention**

This course will extend students’ knowledge of operationalizing behavior, behavioral assessment, developing interventions, functional analysis/assessment, and social validity concerns through the utilization of applied behavior analysis methodologies. Emphasis will be placed on the relationship between valid assessment data and socially relevant interventions. Students will also examine case management skills and supervision strategies.

Prerequisites
- PSYC 6731
- PSYC 6733
- PSYC 6734
- PSYC 6735

**PSYC 6737 - Applications and Special Topics in Applied Behavioral Analysis**

Autism Spectrum Disorder (ASD) is a neurodevelopmental disorder with widely varying symptomatology that affects 1 in 68 children. It is also one of the primary client groups with whom behavior analysts provide services. Therefore, this course will include discussion of theory, research, and intervention in ASD. Topics will include the history of ASD, diagnostic issues, and treatment of autism. The emphasis will be on current
approaches to evidence-based intervention. Research on identification and intervention of all aspects of ASD will be included.

Prerequisites

- PSYC 6731
- PSYC 6733
- PSYC 6734
- PSYC 6735
- PSYC 6736

(Co-requisites: Only PSYC 6736 can be a co-requisite.)

PSYC 6738 - Applications and Special Topics in Applied Behavior Analysis: Supervision and Autism Spectrum Disorder

(5 cr.)

This course covers two separate but related topics within applied behavior analysis (ABA): personnel supervision and management and autism spectrum disorder (ASD). Personnel supervision and management includes case management, supervision goals and procedures, function-based supervision, and evaluation. Autism spectrum disorder (ASD) is a neurodevelopmental disorder with widely varying symptomatology and represents one of the primary client groups for whom behavior analysts provide services. Students examine ASD theory, research, and history as well as diagnostic issues and interventions for the treatment of autism.

This course covers tasks from the Board Certified Behavior Analyst® (BCBA®) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites

- PSYC 6717

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

PSYC 6738A - Applications and Special Topics in ABA: Supervision and Autism Spectrum Disorder

(5 cr.)

This course covers two separate but related topics within applied behavior analysis (ABA): personnel supervision and management and autism spectrum disorder (ASD). Personnel supervision and management includes case management, supervision
goals and procedures, function-based supervision, and evaluation. Autism spectrum disorder (ASD) is a neurodevelopmental disorder with widely varying symptomatology and represents one of the primary client groups for whom behavior analysts provide services. Students examine ASD theory, research, and history as well as diagnostic issues and interventions for the treatment of autism.

This course covers tasks from the Board Certified Behavior Analyst® (BCBA®) Task List (5th ed.) and includes knowledge and skills foundational for the BCBA examination. The course is part of a Verified Course Sequence (VCS) verified by the Association for Behavior Analysis International as meeting specific coursework requirements, content hours, and faculty standards and meets coursework eligibility criteria for BCBA Eligibility Pathway 2 coursework requirements as part of the application for Behavior Analyst Certification Board, Inc.® (BACB®) examinations.

Prerequisites
- PSYC 6717
- PSY 6731

PSYC 6740 - Disaster, Crisis, and Trauma

(5 cr.)
There is no shortage of natural and human-made disasters, such as war, violence, genocide, and terrorist activities. Individuals and communities impacted by such disasters often need assistance from professionals who understand the social, cultural, and psychological complexities of crisis and trauma. Students in this course investigate how these incidents impact the psychology of individuals and groups. They assess traditional and current literature and complete practical exercises to learn about theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with trauma. Considering the various ways crisis professionals can promote positive social change, students devote special attention to the importance and development of culturally appropriate, service-delivery programs and interventions for individuals affected and traumatized by disasters.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6741 - Psychology of Terrorism

(5 cr.)
Many sources define terrorism as a type of psychological warfare, as it induces fear and feelings of vulnerability. Therefore, professionals need to understand all aspects of terrorism to help prevent further terrorist acts and respond to victims who have been affected psychologically. Students in this course explore terrorism from a psychological perspective. They examine types of terrorism; contributing factors related to the
development of terrorists and terrorist organizations; counterterrorism agencies and laws; the impact of terrorist events on individuals, families, and communities; prevention, intervention, and postvention with survivors; media coverage of terrorist events; human rights and ethical issues; and future trends related to the psychology of terrorism.

Students also examine the threat of terrorism in their own community and evaluate the potential impact. Using concepts presented in the course, they consider applications for preventative measures as well as strategies to promote resiliency among individual and families who may become victims of terrorism.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6742 - Conflict, Conflict Resolution, and Peace

(5 cr.)
Through this course, students engage in a study of conflict, conflict resolution, and peace from psychological and social psychological perspectives. Students examine the concept of conflict and methods of addressing it, including management, resolution, and transformation; theories related to conflict resolution; approaches to conflict resolution, including negotiation and third-party interventions; and social psychological factors that influence conflict and conflict resolution. They also consider the influence of culture in conflict and conflict resolution; the role of ethics; intractable and international conflicts; the concept of peace; and how third-party approaches can contribute to the peace process. Students apply conflict resolution approaches to conflicts at all levels, from interpersonal to those involving whole nations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6745 - Health Psychology

(5 cr.)
Health psychologists work toward positive change in healthcare and health behavior through the study of relationships between patients and providers, how individuals and groups adapt to illness, damaging health behaviors, health cognitions, and many other related issues. In this course students explore the field of health psychology with a focus on the biopsychosocial model. They discuss behavioral and biomedical theories as well as the effect of psychological (personality), behavioral (health behaviors and coping), and social factors (stress and physician-patient relationships) on physical health and wellness.

Through the examination of current literature and peer discussions, students explore and address issues related to cardiovascular and immune health, including heart disease, stroke, cancer, and HIV/AIDS. They demonstrate their understanding of course material and consider how topics apply to their personal and professional life through the development of taskforce papers, a health brochure, and a final essay.

Prerequisites
- PSYC 6215
- PSYC 6701

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6747 - Psychoneuroimmunology♦

(5 cr.)
In this course, students examine the current theory and interdisciplinary (psychological and medical) research associated with psychoneuroimmunology (PNI). Topics include the mind/body interaction, its effects on overall health through modulation of the immune system, and mind/body interventions. Students explore recent advances in medical science that have contributed to the knowledge of biological processes and how the mind can be used as a potent force in modifying the biological mechanisms involved in wellness and illness.

Prerequisites
- PSYC 6225

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6748 - Stress and Coping♦

(5 cr.)
Students in this course examine contemporary theories on the perception of stress, appraisal of stressors, ways of coping, and the psychophysiological mechanisms involved in the stress response. They explore topical issues, including psychoneuroimmunology, behavioral nutrition, psychophysiology, traumatic stress, chronic pain, and stress-related psychophysiological and medical disorders as they relate to stress and coping. Students engage in discussions designed to provide practical application of course content. Demonstrating breadth and depth of knowledge and critical-thinking skills, students explore a topic of interest through a final research proposal and paper on a current issue related to course concepts.

Prerequisites
- PSYC 6225

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6750 - Leadership Development♦
An understanding of the psychological principles of leader development often enhances leadership skills and ability to influence others to work toward common goals. In this course, students examine the psychology of leadership and leader development through cross-cultural, social, psychological, and political contexts. They identify and assess the psychological theories of leadership, leadership styles, qualities of great leaders, global leadership competencies, and instruments used to assess leadership and leadership potential. Students apply these psychological theories to assess and develop their own capacity for leadership.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6752 - Leadership Coaching: Application**

(5 cr.)
The intent of leadership coaching is to facilitate psychological change that leads to goal attainment and enhanced performance. In this course, students apply evidence-based psychological approaches to coaching case studies. They assess coaching roles and settings; skills and competencies; models and frameworks; and current issues and future trends. Students employ critical-thinking skills and synthesize concepts learned in the course to develop a plan for implementing effective coaching in a real-world setting.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6753 - Leadership and Leader Development**

(5 cr.)
Leadership is complex and requires an exploration of the nuances, theories, and development required to be an effective leader. Students are provided with an extensive overview of leadership theories examining leadership from historical to more contemporary perspectives. Some of the more contemporary topics explored include strategic and global leadership, team leadership, emotional intelligence, and crisis leadership. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership. Students also examine various perspectives on leadership and the role of leadership in the achievement of organizational, group, and individual goals. Students engage in application assignments and discussions, focusing on effective leadership issues and practices. Ethical, cultural, and global aspects of leadership will be explored throughout the course. Leader development will be emphasized as students examine different leadership issues.

**PSYC 6754 - Personnel Psychology in the Workplace**

(5 cr.)
In this course, students explore the application of psychological theory and practice to
human resources activities in organizations. They examine related topics, including job
analysis and design, employee selection and placement, training and development,
performance management and appraisal, and legal and ethical considerations in human
resources management. Through a group project case study, students research, assess,
and share critical issues in personnel psychology. They also demonstrate their ability to
conduct effective research and review literature through a final research paper on a
topic of interest related to course content and theory.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

**PSYC 6755 - Leadership and the Process of Change**

(5 cr.)
Effective leadership requires the ability to facilitate positive change, lead others in efforts
to effect similar change, and work through challenges when met with resistance to
change. Students in this course are provided with an extensive overview of leadership
theories. Students explore definitions of leadership, major theoretical leadership models,
and contextual and situational factors related to leadership and change. Students also
examine various perspectives on leadership and the role of leadership in the
achievement of organizational, group, and team goals. Students engage in practical
assignments and discussions, focusing on effective leadership issues and practices during
the process of organizational change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

**PSYC 6762 - The Psychological Impact of the Internet and Mobile Technologies**

(5 cr.)
The Internet and mobile technologies have increased the immediacy and accessibility of
information and have provided a global platform for the expression of creativity and new
ideas. Students in this course explore how the Internet and mobile technologies affect
how people think, view the world, gain information, and record and interpret history.
They examine and discuss the use of the Internet and mobile technologies for
socialization, entertainment, news and information, terrorism, politics, commerce and
advertising, health, education, and work. Applying course concepts and theories,
students demonstrate knowledge through a final paper or presentation in which they
examine how the Internet and mobile technologies psychologically impact their personal
lives and the lives of their family and friends.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

**PSYC 6764 - Instructional Design for Online Course Development**

In this course, students explore instructional design and delivery of online courses, issues related to assessment, evaluation in a distance-learning environment, and appropriate and systematic use of technology in online learning venues. Addressing course objectives and discussion questions, students explore and assess issues related to learning styles and instructional strategies in the online environment as well as alternatives to the online lecture. Students gain hands-on experience developing components for online instruction using course concepts and best practices in the field. 

Prerequisites
- PSYC 6763

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6765 - Educational Psychology♦

In this course, students examine the variables related to teaching and learning to understand how educational psychologists contribute to teacher effectiveness, student motivation, and overall academic achievement. They assess teaching methods, learning environments, curriculum development, educational achievement, and characteristics of teachers and learners. They also explore educational assessment, environmental issues, and educational research techniques. Students complete an article summary through which they explain the rationale, methods, findings, and implications of a current research issue. Sharing their topical summaries with the class, students gain multiple perspectives and make connections within the field of educational psychology.

Prerequisites
- PSYC 6215
- PSYC 6701

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6766 - Teaching of Psychology♦

Students in this course examine techniques and issues related to teaching psychology at the college/university level. They examine aspects of the adult development process, teaching skills, rapport with students, and course and classroom management. Students also explore classroom communication and ethical issues relevant to both instructors and students. Demonstrating their knowledge and communicating perspectives, students complete writing assignments on topics related to teaching psychology. They also have the opportunity to gain practical experience and constructive feedback as they lead discussions, assign grades, and evaluate other student teachers.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6771 - Terrorism: A Systemic Approach for Emergency Preparedness

(5 cr.)
Terrorism continues to be a constant threat to the American public, which leads to facilitating the need for accurate information, organized resources, and established approaches to respond to emergencies and to keep the public informed. Students in this course examine terrorism and related public policy on a local, national, and international level. They also assess the need and function of systemic approaches for emergency preparedness. Students explore and discuss topical issues, such as terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Using analytic skills and tools, students assess recommendations that policymakers use in decisions to prevent or respond to terrorism. They also gain hands-on experience initiating the development and/or analysis of a terrorism-preparedness infrastructure.

PSYC 6775 - Strategic Context of Public Management and Leadership

(5 cr.)
Public policy implementation can take place in either a public organization, a private one, a nonprofit one, or a combined or networked one. Students in this course engage in a collaborative study of the changing strategic context of public administration as they apply a strategic planning and management approach to the implementation of public policy. Students are introduced to planning, management, financial management, performance management, and contracting processes in the organization whose purpose is to implement public policy.

PSYC 6776 - Transformative Change in a Shared-Power World

(5 cr.)
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

PSYC 6781 - Psychopathology From a Clinical Perspective
Students in this course are provided with an in-depth examination of current theory and research associated with major psychological disorders and their diagnosis. The primary classification systems are explored in terms of their applicability and limitations. The factors that impact the assessment, diagnosis, and treatment of disorders along a continuum of mental health are explored. Application of the diagnostic criteria in terms of case conceptualization is emphasized.

**Prerequisites**
- PSYC 6215
- PSYC 6701

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6785 - Prevention: Research and Practice**

In this course, students prepare for their roles as counselors in areas of prevention, intervention, and consultation with specific populations in different settings. Students assess these three areas of mental health counseling, including the relationships among them, methodological applications, and related ethical and legal considerations. They also discuss a variety of topics with their peers, such as applications for social change, needs of specific populations, iatrogenic harm, professional approaches and challenges, program evaluation, and future trends. Using an action-research model, students develop a blueprint for a project to address a contemporary mental health issue through the context of prevention, intervention, or consultation.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 6790 - Introduction to the Nonprofit Sector**

Nonprofit organizations (NPOs) can serve to positively affect people's lives through social change, but they require leaders who have a fundamental understanding of the nonprofit sector, including related ethical, legal, and global perspectives. Students in this course explore these viewpoints as well as the history, foundations, and types of NPOs. They also examine the diverse political, social, and economic contexts within which NPOs exist. Students explore and apply marketing, public relations, and communication concepts and strategies to case studies and contemporary situations. Gaining practical insight, students also apply theories presented in the course to the development of a concept paper guiding the development of a nonprofit organization.

**PSYC 6791 - Organizational Management and Leadership**

Public and nonprofit leaders in all areas of public administration require a thorough understanding of the expectations of their roles as leaders and managers of diverse and complex organizations. Students use theoretical and applied perspectives from which they study the intricacies of these roles, including the distinction between leadership and management, organizational culture, change management, systems theories, and organizational development. Students gain a practical understanding of these topics through the application of principles and concepts to public, private, and nonprofit organizational settings.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6793 - Board Governance and Volunteer Management

The success of nonprofit organizations (NPOs) is largely dependent on the effective management of program volunteers and board members—individuals who often serve as the lifeblood of NPOs. Students in this course explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation. They focus on methods that organizations use to create and maintain an effective Board of Directors to ensure that the board governs and guides the organization toward their mission. Students design a board development or volunteer management plan based on processes presented in the course and fundamental concepts acquired earlier in the program.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6800 - Applied Psychology Research Methods

In this research course, students are provided with core knowledge and skills for collecting, analyzing, and interpreting quantitative data at the graduate level. Students are provided practical skills in conducting applied research activities including methodological approaches, data collection, and management. They also explore basic exploratory, descriptive, and inferential analyses and apply statistical techniques to analyze data.

Prerequisites
• RSCH 6110

PSYC 6805 - Holistic Psychology

Holistic psychologists provide therapy to patients by incorporating all aspects of the
individual, including mental, physical, and spiritual. Students in this course are provided with a foundation in holistic psychology. Students examine topics in holistic and transpersonal psychology, as well as influences of theory and research in the areas of spirituality and mind/body relationships. While focusing on the integration of various perspectives, students also examine states of consciousness, emotional and psychosomatic disorders, spiritual emergencies, death and dying, and integral psychology. They share perspectives and assess current issues through discussions, and they demonstrate knowledge through a final written assignment on a major topic of choice related to holistic psychology.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6810 - Community Psychology

(5 cr.)
Through collaborative research and action, community psychologists work to enhance the well-being of individuals and community by understanding how communities function on many different levels. Students in this course explore the fundamental concepts and practice of community psychology. They examine guiding values and assumptions of the field, basic ecological concepts, and models of intervention. Evaluating traditional and topical research, students explore diversity in community psychology, strategies for social change, primary and secondary prevention, community mental health, empowerment, stress, and resiliency. They also have the opportunity to assess and discuss their personal and professional experiences, values, and cultural background and to consider how these factors are likely to influence their work as community psychologists.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6815 - Contemporary Gerontology/Geriatric Psychology

(5 cr.)
Statistical data indicate that people are living longer and the number of older persons is continually increasing. As the population ages, society must prepare to address their needs. Students in this course are provided with a multidisciplinary approach to the study of aging in contemporary societies. Students examine the biological, psychological, social, and societal contexts of aging. They also explore the historical and cross-cultural perspectives on aging, social theories of aging, managing chronic diseases, cognitive changes associated with aging, mental health issues, sexuality, and social interactions. Through a series of taskforce reports on various topics, such as sexually transmitted diseases, substance abuse, and elder abuse, students apply course concepts and critically examine current issues in gerontology.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
PSYC 6825 - Psychology of Gender♦

(5 cr.)
Gender has been the focus of many stereotypes developed over time; but how much does the biological sex of an individual actually influence one's behavior, development, or emotions? Students in this course are introduced to theories and research on gender role expectations and their influence on the psychosocial developmental experience of women, men, and children. Students apply current gender research to understanding achievement, work, relationships, sexuality, violence, and physical health and illness. They also engage in readings and assignments that emphasize the responses of women and men to life stresses, women as clients in psychotherapy, and the increasing role of gender research in the mental health professions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6830 - Psychology of Sexuality♦

(5 cr.)
In this course, students explore sexuality through a variety of frameworks, including historical, psychological, sociological, anthropological, biological, public health, and media and cultural studies. Using a variety of theoretical perspectives, including essentialist and constructivist notions of sex, sexuality, and sexual identity, students examine traditional understandings of sexuality, including male and female sexual anatomy, physiology, and response; variations across the lifespan; sexual communication; love and interpersonal attraction; and sexual disorders. They also explore and discuss different expressions of sexual identity, including heterosexuality, homosexuality, and bisexuality as well as different expressions of gender identity from cross-cultural and interdisciplinary viewpoints. Students complete an integrative final paper incorporating research, ideas, and peer feedback from discussions on a topic related to the psychology of sexuality.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6831 - Current Issues in Homeland Security♦

(5 cr.)
Since its inception, the Department of Homeland Security has profoundly impacted public policy and administration. Students are provided with an in-depth analysis of homeland security, including history, concepts, policies, and strategies of prevention and response. Students examine and discuss current, relevant topics, including ethical issues, telecommunications, technology, threat assessment, contingency planning, and risk management. Students hone their critical-thinking and analytic skills through the
application of fundamental concepts and principles of homeland security to case studies and current issues.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6832 - Terrorism: Legislation and Policy♦

(5 cr.)
The events of September 11, 2001, resulted in a new and intense focus on the issue of terrorism in the United States and abroad. Through traditional literature and a wealth of contemporary journal articles and media sources, students explore the history of terrorism, the evolution and international context of terrorist groups, and the causes of and motivations for terrorist acts. They learn about the laws, regulations, and legislation related to terrorism. They also analyze possible future trends in terrorism as well as the current role of the media, governmental agencies, and entities in the prevention of and response to terrorism. Students use concepts presented in the course and additional research to develop a proposal to change and improve an existing counterterrorism policy.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 6912 - Mental Health Law♦

(5 cr.)
Mental health counseling professionals in all areas, especially criminal forensic psychological practice, may encounter various conflicts regarding psychological and legal approaches to treatment. Therefore, it is important for counselors to have a firm understanding of mental health law to avoid conflicts, such as issues of liability and malpractice. Students in this course are provided with the opportunity to examine several different aspects of the law related to mental health issues, including those constituting forensic psychological practice, such as civil matters (personal injury and civil competency issues) and criminal matters (competency to stand trial, criminal responsibility, diminished capacity, and death-penalty issues). Students employ recent court decisions and laws, such as the Tarasoff ruling, mandated reporting, and the Health Insurance Portability and Accountability Act (HIPAA), to examine how mental health law influences the practice of psychology and mental health counseling.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8000 - Foundations for Graduate Study in Psychology

(6 cr.)
Students in this course are introduced to Walden University and to the requirements
for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals, and they develop a program of study, a professional development plan, and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

**PSYC 8002 - Foundations for Graduate Study in Psychology**

(5 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students build a foundation for academic and professional success as social change agents. They assess the relationship of Walden's mission and vision to professional goals. They establish connections with their peers and the broader Walden community. Students engage in course assignments focused on the practical application of scholarly writing, critical-thinking skills, academic integrity, ethics, and the promotion of professional and academic excellence within the field of psychology.

**PSYC 8002L - Foundations for Graduate Study in Clinical Psychology**

(5 cr.)
This course is an introduction to Walden University and to the profession of clinical psychology. Students receive a foundation for success in online education and for academic and professional success as scholar-practitioners and social change agents. The beginning of the course provides an overview of the mission and vision of Walden, the student’s program of study, and tools for success in the online program. The remainder of the course provides a systematic introduction to clinical psychology as a profession. Topics include varieties of clinical practice, professional competencies, ethical and multicultural competencies, emerging issues, and organizations within the profession and clinical psychology. Through course assignments, students focus on practical applications of writing and critical-thinking skills, self-reflection, and promotion of professional and academic excellence.

**PSYC 8003 - Foundations for Graduate Study in Counseling Psychology**

(5 cr.)
Students in this course are introduced to Walden University and to the profession of counseling psychology. A foundation for success in online education and for academic and professional success as a scholar-practitioner and social change agent is provided. Students have an overview of the mission and vision of Walden, the student’s program of study, and tools for success in the online program at the beginning of the course. The
remainder of the course is a systematic introduction to counseling psychology as a profession. Topics include varieties of counseling practice, professional competencies, ethical and multicultural competencies, emerging issues, and organizations within the profession and counseling psychology. Course assignments focus on practical application of writing and critical-thinking skills, self-reflection, and promotion of professional and academic excellence.

**PSYC 8004 - Foundations for Graduate Study in Psychology**

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals, and they develop a program of study, a professional development plan, and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

**PSYC 8111 - Development in the Digital Age**

(5 cr.)
Students in this course examine the impact of social media and other digital technology on children, teens, and adults and at different stages of cognitive, social, and emotional development. They also examine how identity development, relationships, and socialization can be affected by the use of digital and social media. Students receive a historic review of electronic media research, including the effect of violent television on viewer behavior, which provides a foundation to examine the current impact of digital media. Current issues such as sexting, online harassment, cyberbullying, and cyberstalking are explored, along with strategies for mitigating these issues. Similarly, positive impacts of social media, such as building social groups, finding communities, overriding generational gaps, seeking health and mental health support and resources, are also explored. Students also examine generational, socioeconomic, and cultural differences in access to and use of digital media. Digital media literacy and public policy are explored, with an emphasis on positive social change.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8113 - Ethical Issues and Professional Responsibilities in Forensic Psychology**

(5 cr.)
Students in this course acquire the contemporary knowledge needed to apply ethical
practice and professional responsibilities while working as a forensic psychologist. The American Psychological Association’s *Ethical Principles of Psychologists and Code of Conduct* as well as the American Psychology-Law Society’s *Specialty Guidelines for Forensic Psychology* are mainstays in this course. Additionally, the various roles and responsibilities of a forensic psychologist are covered.

**PSYC 8115 - Writing a Quality Prospectus**

(5 cr.)
This 5-credit course is focused specifically on the process of writing the doctoral study prospectus. Students will use their preliminary research plan, developed previously, and develop a problem statement, to be used in the doctoral study. They further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a doctoral study prospectus. The prospectus is a brief paper, typically 15–20 pages in length, that lays out the background for the problem statement, the problem statement itself, a survey of the relevant literature (typically 25–75 references), and a research, implementation, and evaluation plan for the solution of the problem.

**PSYC 8116 - Understanding Forensic Psychology Research**

(5 cr.)
Students in this course will better understand how to be astute consumers of forensic psychology research. Basic principles of statistics, such as reliability and validity, are covered. At the same time, students learn how to critically read forensic psychology research and how best to apply research results to forensic clinical settings.

**PSYC 8125 - Assessment in Forensic Psychology Settings**

(5 cr.)
Students in this course cover the varied assessment techniques and instruments used in the forensic psychology arena. Some of the assessment areas covered include risk assessment, juvenile evaluations, lie detection, custody evaluations, and many of the psychological tests and instruments that are used in these assessments. Students acquire a solid foundation of the knowledge of forensic psychology techniques and assessment, rather than specific skills, in administering and interpreting psychological tests.

**PSYC 8131 - Theories of Learning**

(5 cr.)
Participants in this course study in-depth modern learning theory, its historical context, theoretical ideas, research, and applications in various learning environments. The theoretical ideas of the major paradigms of learning, such as behaviorism, gestalt,
cognitivism, information-processing, constructivism, and humanism, will be covered. Students also review current theories of cognitive processes, such as language, memory, and intelligence, and how differences in cognitive level throughout the lifespan mediate learning of educational subject matters.

**Prerequisites**
- PSYC 8760

**PSYC 8135 - Criminal Behavior**

(5 cr.)
Students in this course survey contemporary views and theories of maladaptive and criminal behavior. A broad conceptualization of criminal behavior, such as that which comes from the sociological and anthropological perspectives, is discussed. Theories and application of criminal profiling will be discussed. Additionally, more specific views of criminal behavior germane to groups such as psychopaths, serial offenders, and sexually violent predators will be addressed.

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8185 - Writing a Quality Prospectus**

(5 cr.)
This five-credit course is focused specifically on the process of writing the doctoral study prospectus. Students will use their preliminary research plan, developed previously, and develop a problem statement, to be used in the doctoral study. They further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a doctoral study prospectus. The prospectus is a brief paper, typically 15–20 pages in length, that lays out the background for the problem statement, the problem statement itself, a survey of the relevant literature (typically 25–75 references), and a research, implementation, and evaluation plan for the solution of the problem.

**Prerequisites**
- RSCH 8110
- RSCH 8210

**PSYC 8202 - Survey Research Methods**

(5 cr.)
An in-depth study of a range of survey methods administered via in-person interview, self-report, phone interview, and Internet administration is introduced in this course. Topics will include survey design, administration, analysis, and addressing sources of bias. Students also review theoretical and empirical research on question and questionnaire
effects. Students prepare in the practice of writing questions and designing
questionnaires, both in general and in light of existing research.

Prerequisites
- RSCH 8110
- RSCH 8210

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8203 - Attitudes/Attitude Change♦

(5 cr.)
Students in this course cover classic and contemporary models of attitudes, their functions, and how they are formed and maintained. The connection between attitudes and behavior and how attitudes are changed through the process of persuasion and cognitive dissonance will also be examined.

Prerequisites
- PSYC 8247

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8204 - Intergroup Relations♦

(5 cr.)
Participants in this course study in depth basic and applied research and theory on both group processes and group relations, including some of the following topics: prejudice, discrimination, stereotyping, social categorization, minority and majority influence, group decision making, leadership, group structure, group socialization, bargaining and negotiation, intergroup conflict and cooperation, collective action and cognition, collective self and identity, social identity, language and identity, ethnic and cultural relations, and social dilemmas.

Prerequisites
- PSYC 8247

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8207 - History and Systems of Psychology♦

(5 cr.)
Students in this course focus on the historical and philosophical roots of psychology and counseling. Topics include structuralism, functionalism, behaviorism, psychoanalysis, gestalt, and existentialism, as well as contemporary perspectives including evolutionary
psychology, positive psychology, postmodernism, and feminist psychology. Themes of diversity and multiculturalism in psychology and counseling are highlighted within each of the perspectives.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8214 - Consulting for Organizational Change♦**

(5 cr.)
Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

Prerequisites
- PSYC 8412

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8215 - Lifespan Development♦**

(5 cr.)
Students in this course are provided with an advanced overview of human development through the lifespan, including prenatal, childhood, adolescent, adult, and late-adult phases. Students examine and apply basic processes and theories to developmental milestones that occur within these phases of development. They explore factors of heredity and environmental elements on human development, and they consider ethical issues, research considerations, and global perspectives as they assess strategies to promote optimal development. Students also engage in coursework and discussions that highlight themes of diversity and social change.

Prerequisites
PhD in Psychology Students Entering With a BS Degree
- PSYC 8004
- PSYC 8252

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PSYC 8216 - Dynamics of Contemporary, International, and Virtual Organizations♦

(5 cr.)
Globalization, technological innovation, and market factors continually change the context of business, requiring professionals who understand how organizations function to work through challenges and harness opportunities for change. In this course, students explore the implications of the changing nature of organizations as well as the emergence of international and virtual organizations in a global economy. Through contextual and application-based assignments, students address the unique opportunities and challenges for government, for-profit, nonprofit, international, and virtual organizations. Applying acquired knowledge and skills, students provide a diagnosis and recommendations for a specific organization’s development efforts.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8221 - Psychology of Personality♦

(5 cr.)
Professionals study personality in a variety of contexts to better understand the factors that compose an individual’s psychological framework, including feelings, thoughts, and motivations. Students in this course are introduced to the major theories of personality and personality assessment approaches. Students examine research that supports multiple theories as well as basic concepts and principles of the various schools of thought. They also explore and discuss related topics, such as various aspects of psychology, including psychoanalytic, biological, behaviorist, learning, social-cognitive, trait and skill, humanistic, and existential, in addition to individual, cultural, and gender differences in personality. Students consider themes of diversity throughout the course.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8226 - Biopsychology♦

(5 cr.)
An important branch of psychology, known as biopsychology, combines neuroscience with basic psychological models for the purpose of understanding how biology, including the brain and neurotransmitters, influence human behavior. In this course, students examine the structure and functions of the central and peripheral nervous systems and explore the impact of neurobiology, endocrinology, and physiology on human behavior. They examine brain functioning, including neural conduction; effects of neurotransmitters; sensory systems; and mechanisms of attention, memory, perception, and language. Students also explore literature addressing issues related to neuroplasticity and lateralization. Applying knowledge and skills from throughout the course, students develop a final research paper through which they synthesize
biopsychology concepts and critically analyze related research.

Prerequisites

- PSYC 8004

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8238 - Cognitive and Affective Bases of Behavior

(5 cr.)

Students in this course review core theories of cognition and affect and their roles in human functioning. Students review basic components of cognition, including knowledge acquisition, knowledge representation, language and various aspects of thinking, and emotions. Participants also focus on the multidimensional and interactive characteristics of human cognitive and affective functioning. A specific emphasis is placed on theories and research bearing on how cognition and affect interact in important areas of human functioning such as emotional regulation, construction of reality, motivation, psychopathology, and health.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8241 - Human Motivation

(5 cr.)

What are the factors that drive human behavior and in what ways can professionals harness this information to help individuals achieve their goals? Through the exploration of historical and contemporary theories and perspectives, students in this course have the opportunity to answer such questions and gain foundational knowledge of the study of human motivation. Students examine the physiological, psychological, learned, social, cognitive, and emotional aspects of motivation. They work toward developing a conceptual understanding of theories associated with motivation, which they apply to personal, professional, and contemporary social issues. Students engage in readings and assignments that incorporate themes of diversity as they relate to human motivation.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8242 - Changing Health Behavior: Theory and Practice

(5 cr.)

Students in this course review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. Coverage of health-related issues includes dietary needs, tobacco and drug use, safer sexual practices, and stress management. Students examine behavior change within specific populations (e.g.,
older adults, those with disability, different races/cultures/ethnicities) and factors that predict or serve as obstacles to lifestyle change and adherence. Additionally, students complete a grant-style proposal for a behavior change program of their design.

Prerequisites
- PSYC 8745

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8247 - Social Psychology♦

(5 cr.)
Factors of cognitions and social behavior are at the root of nearly all experiences pertaining to individuals in society. In this course, students use the lens of social psychology to examine perceptions, attitudes, relationships and attraction, motivation to help others, prejudice and aggression, conformity and obedience, group behavior, and the influence of culture. Students apply knowledge and skills gained in the course to a final project in which they develop a plan for using social psychology research to address a significant social problem. Moreover, students consider ways to extend lessons learned to their personal and professional lives to effect positive social change as scholar-practitioners.

Prerequisites
- PSYC 8004

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8252 - Themes and Theories of Psychology

(5 cr.)
In this course, students are introduced to theories, research, and themes that form the tenets of psychology. Basic theoretical models will be reviewed, including psychodynamic, cognitive, developmental, social learning/socio-cognitive, behaviorist, learning and motivation, systems, biopsychosocial, and gender theories. Theories encompassing diverse populations, including cross-cultural and feminist theories, will also be examined. Students will critically examine the strengths and limitations of these theories and their utility in the field of psychology. Contemporary themes in psychology will be explored, with an emphasis on application of theories designed to effect positive social change.

PSYC 8281 - Psychology Practicum I

(3 cr.)
This course is the first of the four-course, year-long practicum sequence. Students are
able to engage in a supervised experience that integrates theory and research with practice. As students work in collaboration with their site supervisor and course instructor, their practicum experience includes guided development of intermediate conceptual, assessment, intervention, and evaluation skills; awareness of professional and ethical issues; professional and interpersonal growth; development of cultural competence; and effective use of supervision.

Prerequisites
- Successful completion of AYR

**PSYC 8283 - Psychology Practicum II**

(3 cr.)
This course is the second of the four-course, year-long practicum sequence. Students continue their practicum applying the principles and methods of empirically supported treatments and approaches learned from their coursework. Working in collaboration with their site supervisor and course instructor, the practicum experience includes guided development of intermediate conceptual, assessment, intervention, and evaluation skills; awareness of professional and ethical issues; professional and interpersonal growth; development of cultural competence; and effective use of supervision.

**PSYC 8284 - Psychology Practicum III**

(3 cr.)
This course is the third of the four-course, year-long practicum sequence. Students continue their practicum, applying the principles and methods of empirically supported treatments and approaches learned from their coursework. Students bring closure to their work on real-world problems that they developed with their preceptors. Students evaluate and complete their practicum project and present their project in the workplace and in the online classroom.

**PSYC 8285 - Psychology Practicum IV**

(3 cr.)
This course is the fourth of the four-course, year-long practicum sequence. Students continue their practicum, applying the principles and methods of empirically supported treatments and approaches learned from their coursework. Students bring closure to their work on real-world problems that they developed with their preceptors. Students evaluate and complete their practicum project and present their project in the workplace and in the online classroom.

**PSYC 8292 - Clinical Psychology Internship I**
The internship course is taken in conjunction with a supervised clinical experience and is intended to prepare clinical psychology students for readiness to enter practice. After completion of the practicum sequence, students take this course, which is designed to develop intermediate intervention and assessment skills, integrate professional knowledge and skills with evidence-based practices, and continue focused development in specialization areas. A minimum of 2,000 clock hours with at least 900 clock hours of direct client contact must be documented.

**PSYC 8293 - Clinical Psychology Internship II**

The internship course is taken in conjunction with a supervised clinical experience and is intended to prepare clinical psychology students for readiness to enter practice. After completion of the practicum sequence, students take this course, which is designed to develop intermediate intervention and assessment skills, integrate professional knowledge and skills with evidence-based practices, and continue focused development in specialization areas. A minimum of 2,000 clock hours with at least 900 clock hours of direct client contact must be documented.

**PSYC 8294 - Clinical Psychology Internship III**

The internship course is taken in conjunction with a supervised clinical experience and is intended to prepare clinical psychology students for readiness to enter practice. After completion of the practicum sequence, students take this course, which is designed to develop intermediate intervention and assessment skills, integrate professional knowledge and skills with evidence-based practices, and continue focused development in specialization areas. A minimum of 2,000 clock hours with at least 900 clock hours of direct client contact must be documented.

**PSYC 8295 - Clinical Psychology Internship IV**

The internship course is taken in conjunction with a supervised clinical experience and is intended to prepare clinical psychology students for readiness to enter practice. After completion of the practicum sequence, students take this course, which is designed to develop intermediate intervention and assessment skills, integrate professional knowledge and skills with evidence-based practices, and continue focused development in specialization areas. A minimum of 2,000 clock hours with at least 900 clock hours of direct client contact must be documented.

**PSYC 8296 - Social Cognition and Attitudes**
(5 cr.)
In this course, students are oriented to key elements in social cognitive processing as a subspecialty of social psychology, including attribution theory, schema theory, social cognition relative to self, the role of attention/consciousness in social cognition, errors and biases in social thought, heuristics, person memory, affect and cognition, attitudes, social influence, and behavior relative to social cognition. Students investigate the structure and function of attitudes and how they are formed and maintained. They also examine the connection between attitudes and behavior and how attitudes are changed through the process of persuasion and cognitive dissonance.

Prerequisites
- PSYC 6245/8247 Social Psychology

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8304 - Statistics 1*

(5 cr.)
Psychology practitioners use statistics in a variety of professional undertakings, such as creating studies to assess human behavior or deciding which treatment approaches are most effective for a specific client. Students in this course are provided with a thorough analysis of basic descriptive and inferential statistical methods commonly used in the social sciences. Students work toward developing the skills with which to write, analyze, and critique social science research. They learn various methods, including computation and analysis of frequency distributions, measures of central tendency, and statistical hypothesis testing. Students also examine statistical tests (and underlying assumptions), including z-score; single-sample, independent-sample, and related-sample t-tests; analysis of variance; correlation, regression; and chi-square tests. Students are introduced to the SPSS statistical software package.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8305 - Statistics 2*

(5 cr.)
In this course, students review and expand on statistical techniques mastered in Statistics 1, such as the t-test, correlation analysis, ANOVA, and chi-square tests. Students explore underlying assumptions and applications of factorial, repeated measures (within groups), mixed-design ANOVA, multiple regression, and logistic regression. They learn statistical and analytical applications as well as how to critically read and write about psychological research—skills and techniques needed to complete the doctoral dissertation. Students also engage in analyses involving the use of the SPSS statistical software package.

Prerequisites
• PSYC 6305 or PSYC 8304

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8307 - Multivariate Analysis

(5 cr.)
Univariate analyses, such as the t test, ANOVA and ANCOVA, chi square, correlation, multiple linear regression, and multiple binary logistic regression, are limited to the analysis of a single dependent variable and yield a single statistical solution. Students in this course in multivariate analysis are introduced to procedures to simultaneously analyze multiple independent and multiple dependent variables that yield more than one statistical solution. Covered in this course are several of the most common multivariate and data mining procedures, including MANOVA, discriminant analyses, factor analysis, canonical correlation, and cluster analysis. Students examine appropriate conditions for the use of each procedure and demonstrate understanding in applied discussion assignments, application assignments using IBM SPSS, and journal quality report of results.

Prerequisites
• PSYC 8004

PSYC 8311 - Research Design

(5 cr.)
In this course, students have the opportunity to build a foundation in the design of qualitative, quantitative, and mixed-method approaches to psychological research. Students learn the strengths and limitations of each method and under what circumstances each approach would be the most appropriate research design. They also learn the importance of scholarly writing as well as how to identify a topic for research and how to conduct a literature search. Students gain hands-on practice developing a research proposal through which they address key elements, such as collecting and analyzing data, writing an introduction, stating a purpose for the study, identifying research questions and hypotheses, using theory, and defining the significance of the study. Additionally, students consider the legal and ethical issues associated with human subjects’ protection.

Prerequisites
• PSYC 6305 or PSYC 8304

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PSYC 8315 - Program Evaluation
(5 cr.)
The skills required to assess research and work effectively with stakeholders are among the many proficiencies required of professionals who evaluate and develop programs. In this course, students examine these skill sets as well as the history, theory, and major approaches underlying program evaluation. Students learn how to select appropriate quantitative and/or qualitative models and techniques to perform evaluations, demonstrate program effectiveness, and disseminate results. Additionally, students explore the procedures and techniques involved in offering their evaluation services to a specific group or organization. They also examine strategies to gain stakeholder interest in developing appropriate standards, research progress, and evaluation outcomes. Students acquire practical experience evaluating a program of interest through which they outline organizational structure, identify stakeholders, employ evaluation models, explain steps in planning, and predict possible challenges or stakeholder fears, for which they recommend solutions.
Prerequisites
  - RSCH 8260
  - PSYC 8214

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8316 - Tests and Measurement
(5 cr.)
Students in this course are provided with an overview of the different types of tests used in clinical, educational, and organizational settings. Students engage in a comprehensive examination of psychometric properties used to develop and evaluate these instruments. They examine normative sampling and standardization, reliability and validity, test score interpretation, and test development. Students also consider related ethical, legal, and sociocultural issues, including cultural bias and fairness. Professional standards for testing provide a foundation for the course.
Prerequisites
  - PSYC 8304 or RSCH 8210

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8343 - Psychotherapy Interventions 2
(5 cr.)
Students in this course learn methods of applying empirically supported treatment and interventions to client issues ranging from living problems to severe mental disorders in
selected populations. Students gain hands-on experience implementing intervention models, including cognitive-behavioral therapy, person-centered therapy, short-term dynamic psychotherapy, and integrative psychotherapy. They engage in topical readings and course assignments that emphasize culturally competent interventions within an ethical framework for clinical practice.

Prerequisites
- PSYC 8344

**PSYC 8344 - Interventions I**

(5 cr.)
The focus of this course is on the acquisition and demonstration of clinical and counseling skills in the context of empirically supported modes of intervention. Students apply skills in treatment-planning exercises, clinical vignettes, and face-to-face simulations of psychotherapy sessions.

**PSYC 8356 - Marriage, Couple, and Family Therapy**

(5 cr.)
Students in this course receive a foundation in the theoretical perspectives and empirical framework necessary for marriage, couple, and family therapy. The theoretical perspective includes general systems theory and its applications, as well as psychosocial, psychodynamic, transgenerational, strategic, cognitive-behavioral, and social constructionist models. Students learn to conceptualize presenting issues within a systemic perspective and context. Empirically based techniques for assessment and intervention of marriages, couples, and families are reviewed and analyzed.

**PSYC 8393 - MS in Psychology Capstone**

(5 cr.)
Students are provided with the opportunity to synthesize knowledge and skills acquired throughout their program into a practical project designed to promote positive social change in a capstone project. During this course, students work on a capstone project in which they complete a major integrative paper on a topic related to their specialization, incorporating theoretical and practical knowledge as well as social scientific research skills acquired throughout the program. The instructor may approve other capstone projects presented by students.

**PSYC 8412 - Research Foundations**

(5 cr.)
Students in this course examine and receive support for student readiness regarding the use of quantitative and qualitative research approaches. They study research fundamentals, including the distinction between social problems and research problems,
the functions of research problems versus research purpose statements, and the role of theory and conceptual framework in informing research. Students examine quantitative and qualitative concepts central to research methods, design, and analysis. They also study how research design, methods, and analyses properly align for both quantitative and qualitative approaches. Students demonstrate their knowledge by creating two research outlines, using quantitative and qualitative approaches, which they develop throughout the course. They determine appropriate conditions for the use of mixed-methods approaches and differentiate between types of mixed-methods research designs. Students engage in pre- and post-assessments of skills and knowledge.

Prerequisites
- RSCH 8210

**PSYC 8511 - Treatment of Forensic Populations**

(5 cr.)
Students in this course receive the basic knowledge necessary to evaluate and subsequently treat many different forensic populations. Various forensic populations such as sex offenders, substance abusers, victims of crime, and employee assistance to law enforcement personnel will be covered. The use of traditional forms of intervention, such as individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice, will be addressed.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 8521 - Police Psychology**

(5 cr.)
The focus of this course is directed at the various roles a psychologist might have when working within a police department. Issues such as officer selection and training, stress management, critical incident stress debriefing, and upper-management consultation are mainstays of the police psychologist and will be covered. Additionally, less-well-known roles such as training in hostage negotiations and the selection of special operations officers (S.W.A.T., snipers, tactical commanders) will be reviewed.

**PSYC 8522 - Psychology in the Courts**

(5 cr.)
Students in this course cover the major roles that a forensic psychologist could have within the court system. Issues such as expert testimony, jury selection, eyewitness testimony, and consultation with attorneys will be covered. Additionally, practical skills such as documentation and report writing will be addressed.

**PSYC 8551 - I/O Tests and Measurement**
Students in this course are provided with an in-depth study of measurement theory and the tests used in organizational settings. They review a comprehensive examination of psychometric properties used to develop and evaluate these instruments, including classical test theory, item response theory (IRT), and item forensics approaches to testing. Topics include normative sampling and standardization, reliability and validity, test score interpretation, and test development. Students also address ethical, legal, and sociocultural issues, including cultural bias and fairness. Professional standards for testing provide a foundation for the course.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8552 - Psychology of Motivation at Work**

Participants in this course study in depth major topics in micro-level organizational behavior. Accountability, organization citizenship behaviors, forms of organizational attachment, motivation, goal theory, and issues of equity and justice will be covered.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8573 - Child and Adolescent Health**

Students in this course cover diseases and disorders in children and adolescents. Topics include diabetes, anorexia, headaches, epilepsy, burn injuries, cystic fibrosis, asthma, addiction, and adolescent obesity. Health promotion for children and adolescents is discussed, including cardiovascular health, nutrition, and exercise. Also covered are insights into special issues such as post-traumatic stress disorder, daily stress, sexually transmitted diseases, sleep disorders, and ethical and legal issues in pediatric and adolescent health psychology.

Prerequisites
- PSYC 8745

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8574 - Women's Health**

Students in this course examine healthcare issues in women and girls. Topics include healthy development, trauma, coping, self-esteem, resilience, self-care, well-being, sexual health, relationships, roles, family, schooling, careers, motherhood, transitions, violence,
security, bereavement, and positive aging.

Prerequisites
- PSYC 8745

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8576 - Advanced Personnel Psychology◊

(5 cr.)
Students explore advanced selection validation models and techniques, performance measurement approaches, and talent management systems as well as underlying legal implications and policy issues. In this course, students prepare as future scholar-practitioners to conduct and apply research in the field of personnel psychology.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8579 - Job Attitudes, Measurement, and Change

(5 cr.)
Participants in this course study in depth major theories of job attitudes, as well as their antecedents, correlates, and consequences. Topics will include job satisfaction, organizational commitment, organizational citizenship behavior, withdrawal behavior, and counterproductive organizational behavior. Application of learning will be demonstrated through an applied-attitude survey research project.

PSYC 8620 - Adult Learning Theory and Application

(5 cr.)
Students in this course explore the history and development of adult education as a distinct entity from child and/or adolescent learning. Students examine the various adult learning environments, including but not limited to professional training and online learning. They examine adult learning theory and how andragogy is applied via theoretical principles in multiple contexts. Special attention is paid to specific challenges and needs of the adult learner. Students in this course become familiar with current research in the field of adult education and generate a comprehensive analysis that synthesizes scholarly research in the area.

PSYC 8630 - Theories of Learning and Motivation

(5 cr.)
Students explore classic and contemporary learning and motivation theory in the context of educational settings. The theoretical ideas of the major paradigms of learning, such as behaviorism, gestalt, cognitivism, information processing, constructivism, and
humanism as well as cognitive processes, such as language, memory, and intelligence, will be covered. Students examine the physiological, psychological, learned, social, cognitive, and emotional aspects of motivation as they apply to learning. They apply constructs such as culture and technology to their understanding of learning theory and student motivation to develop their own philosophy of teaching. Of particular focus is the application of theoretical concepts of learning and motivation to practical, real-world challenges found in present-day educational settings.

Prerequisites
- PSYC 8004

PSYC 8640 - Applied Social Psychology

(5 cr.)
Students are introduced to the goals and methods of applied social psychology. Topics explored include attitudes, social identity, social influence, attribution, social relations, diversity, and group dynamics in the context of educational, environmental, health, legal, and organizational settings as they relate to real-world social issues, practical problems, and the social domains of daily life. Emphasis is placed on exploring the contributions and contemporary applications of social psychological constructs, principles, theories, and interventions in these settings to promote positive social change.

Prerequisites
- PSYC 8247

PSYC 8700 - Psychology and Social Change

(5 cr.)
In this course, students analyze and evaluate theories of social and personal change. Students engage in a variety of conceptual and application assignments focused on power and social inequalities, ethnic inequalities, global environment, and issues related to gender and sexism, such as homophobia. In addition, students examine the impact of social change theories on children, families, and societies. They explore the concepts of change agent and change advocate as well as the role of the psychologist as change agent. Students also engage in an integrative written assignment to synthesize theories and analyze a current social problem in their community, for which they propose an action to address the issue and drive positive social change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8701 - Culture and Psychology

(5 cr.)
Culture often has a profound influence on individual beliefs, personality development,
and social behavior. Therefore, mental health professionals must have a fundamental understanding of the impact and psychological implications of culture. In this course, students focus on core themes of cross-cultural psychology—specifically, cultures representing different parts of the world and cultural influences on human psychology. Students explore the cultural components, research, and theory of cross-cultural psychology, and they assess the overall impact of culture on the field of psychology around the world. Additionally, they engage in readings and practical assignments to gain a better understanding of human development and the interactions between culture and social behaviors, health, mental health, and mental illnesses.

Prerequisites
PhD in Psychology Students Entering With a BS Degree
- PSYC 8252

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8702 - Dissertation Literature Review Lab

(2 cr.)
The purpose of this course is to help students prepare to write a well-structured, soundly presented critical literature review. Students taking this course cover topic selection, research analysis, writing, and editing. Upon completing the course, students produce an annotated bibliography and an outline of a literature review using a minimum of 10 self-selected research articles. This course is appropriate for doctoral students who are preparing for their dissertation research.

PSYC 8703 - Ethics and Standards of Psychology◆

(5 cr.)
In this course, students examine the origins of professional codes of ethics and standards of scientific psychology. Topics include ethical issues in academics (research, teaching, supervision), various work settings (assessment, consulting), and ethics involved in working with diverse populations. Additionally, students are introduced to forensic psychology and ethical issues related to the legal system. Students also explore how cultural factors are addressed in various ethical codes and the implications for scholar-practitioners.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8705 - Ethics and Standards of Professional Practice◆

(5 cr.)
What constitutes fraudulent practice, and how can psychologists avoid it? In this course, students have the opportunity to answer questions such as this as they examine the
psychologist's principles of conduct, code of ethics, and standards of practice. They identify and analyze the guidelines for practice in specific psychological services and with identified populations, and they assess the ethical decision-making process. Students engage in weekly discussions on topical issues, including informed consent, confidentiality, duty to warn, mandated reporting, record keeping, the limits of competency, and dual relationships. They also consider the function of professional development, such as supervision, peer consultation, and continuing education, in reaching career goals and acquiring more diverse skill sets.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8706 - Advanced Social Psychology**

(5 cr.)

Students in this course are provided with an advanced analysis of social psychology, including a review of the historical context and cultural grounding of social psychological theory. Students devote special attention to sociocultural psychology and the broad base of knowledge related to history, research methods, and applications to social and cultural processes. They explore and discuss topics related to small-group processes and dynamics and shared cognition, attitude development and shifting, social cognition and emotion, self-concept and self-regulation, conformity, affiliation and independence in groups, group performance, leadership, cross-cultural psychology, and biopsychosocial diversity. Students demonstrate their understanding of theories and concepts through a final analysis of a social problem occurring in their own community for which they propose an intervention to ameliorate the problem.

Prerequisites

- PSYC 8247

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8718 - Psychology of the Exceptional Individual**

(5 cr.)

Students in this course examine the cognitive, social-emotional, and psychomotor characteristics of individuals significantly deviating from the norm in behavior and/or adjustment. They learn ways to understand and work with individuals with learning disabilities (including emotional, behavioral, and intellectual disorders; autism; brain injury; hearing and vision loss; physical disabilities; and health disorders) and those who are gifted and talented. Students explore topical issues, including inclusion, transition to adulthood, and multicultural diversity. Through this course, students work toward gaining the knowledge and skills for developing research-based educational and therapeutic interventions.
PSYC 8719 - Developmental Psychopathology

(5 cr.)
In this course, students learn about formal psychopathology, including emotional and behavioral disorders and classification systems of infants, children, and adolescents. Students examine contrasting models of psychopathology, classification and epidemiology of childhood psychopathology, co-morbidity rates, differential issues from the current diagnostic manual's outcome of childhood disorders, therapeutic approaches and their efficacy, and developmental resilience. They examine and discuss literature and topics related to assessment, diagnosis, and treatment; a wide range of disorders and disruptive behaviors; and abuse and neglect. Applying course concepts, students assess case studies of diagnostic issues for a contemporary and practical understanding of psychopathology.

PSYC 8720 - Diagnosis and Assessment

(5 cr.)
Students are provided with an overview of what is commonly referred to as abnormal psychology; however, students also consider factors constituting normalcy from multiple perspectives. Students explore the application of diagnostic criteria in various mental health work settings, such as schools, rehabilitation facilities, community agencies, and private practices. Using the scholar-practitioner model, students consider environmental and biological factors contributing to behavioral disorders. Students also examine techniques commonly used for the diagnosis and treatment of cognitive, emotional, and developmental disorders as well as for psychophysiological and psychosocial problems. Through coursework and discussions, students consider multicultural factors that complicate diagnosis as well as current trends and contemporary issues in clinical assessment and diagnosis.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8721 - Advanced Psychopathology

(5 cr.)
In this course, students engage in an in-depth examination of current theory and research associated with major psychological disorders and their diagnoses. Students explore the primary classification systems in terms of their applicability and limitations as well as the factors that impact the assessment, diagnosis, and treatment of disorders along a continuum of mental health. Students engage in practical assignments, focusing on applications of the diagnostic criteria in terms of case conceptualization.
Prerequisites
• PSYC 8221

Students may take this as a non-degree course, which means they do not have to be enrolled in a
PSYC 8723 - Multicultural Counseling ♦

(5 cr.)
Students are provided with the opportunity to increase their knowledge of multicultural counseling and the delivery of psychological services as well as related skills needed in professional practice. Students explore diversity and identity issues and discuss their impact on the therapeutic relationship. They examine the application of traditional theoretical orientations and current multicultural theories to culturally diverse groups. Through a variety of assignments designed to provide practical application of content, students also investigate counseling concepts related to race and ethnicity, sex and gender, sexual orientation, social class, age, and ability.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8724 - Child Psychotherapy

(5 cr.)
What are some of the special considerations of therapeutic treatment approaches in children? In this course, students have the opportunity to answer this question as they explore the psychological treatment of children from an array of theories and techniques, including play therapy. Students examine and discuss fundamentals and contemporary issues related to playroom organization; intake interviews; and psychological assessment, treatment, evaluation, and intervention. They also explore typical play behaviors of children at various levels of development, cross-cultural aspects of play and their meanings, as well as issues of cultural sensitivity and ethical practice. Students complete a final written assignment to synthesize course concepts and demonstrate their understanding of child psychotherapy.

Prerequisites
• PSYC 8215

PSYC 8725 - Group Therapy

(5 cr.)
Students in this course are provided with a comprehensive review of clinical and counseling approaches to group therapy. Students examine the theoretical bases of different approaches to group therapy, including psychoanalytic, existential, person-centered, gestalt, transactional, behavioral, rational-emotive, and reality therapy. Through an in-depth literature review as well as weekly discussions and written assignments, students focus on various types of groups, the efficacy of using group
therapy as the treatment method with various multicultural populations, the stages of group development, and related professional and ethical considerations.

**PSYC 8726 - Couples and Family Counseling**

(5 cr.)
An important skill for clinicians is to have a fundamental understanding of the dynamics and functioning of couples and families. Students in this course are introduced to concepts and applications in theoretical perspectives and techniques, classical schools of thought, and recent developments in couples and family therapy. Students explore culture, gender, and ethnicity factors in family development. They also review and compare theoretical frameworks in couples and family therapy, including psychosocial, psychodynamic, transgenerational, strategic, cognitive-behavioral, and social constructionist models. Additionally, students assess the roles of culture, spirituality, and values in understanding families.

**PSYC 8728 - Substance Abuse Counseling**

(5 cr.)
The impact of substance abuse on the lives of people with addictions, and the lives of their families, makes for a highly complex and challenging area of mental health counseling. Counselors working with these individuals must possess a comprehensive understanding of the background, controversies, and current approaches in regard to the treatment of substance abuse. In this course, students examine psychological aspects of addictions involving alcohol, prescription medications, and illegal substances. They also examine current research in the field of dependency and addiction. Students engage in a variety of conceptual and application-based assignments on diagnosing patients, choosing among models of treatment, planning treatment, using group and family treatment plans, and ensuring treatment efficacy. They also consider strategies to promote change, including the trans-theoretical model of behavior change.

**PSYC 8740 - Disaster, Crisis, and Trauma♦**

(5 cr.)
There is no shortage of natural and human-made disasters, such as war, violence, genocide, and terrorist activities. Individuals and communities impacted by such disasters often need assistance from professionals who understand the social, cultural, and psychological complexities of crisis and trauma. Students in this course investigate how these incidents impact the psychology of individuals and groups. They assess traditional and current literature and complete practical exercises to learn about theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with trauma. Considering the various ways crisis professionals can promote positive social change, students devote special attention to the importance and
development of culturally appropriate, service-delivery programs and interventions for individuals affected and traumatized by disasters.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8741 - Psychopharmacology♦

(5 cr.)
Psychopharmacology is the study of how drugs affect the mind and behavior. This course is designed to provide a foundation in psychopharmacology for health psychology students. Students will cover pharmacokinetics, pharmacodynamics, structure of the nervous system, and neurotransmitters. The focus will be on medications used in the treatment of mental illness and on illicit drug use. Special populations will include age-based groups as well as those with pre-existing conditions.

Prerequisites
• PSYC 8226

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8742 - Conflict, Conflict Resolution, and Peace♦

(5 cr.)
Through this course, students engage in a study of conflict, conflict resolution, and peace from psychological and social psychological perspectives. Students examine the concept of conflict and methods of addressing it, including management, resolution, and transformation; theories related to conflict resolution; approaches to conflict resolution, including negotiation and third-party interventions; and social psychological factors that influence conflict and conflict resolution. They also consider the influence of culture in conflict and conflict resolution; the role of ethics; intractable and international conflicts; the concept of peace; and how third-party approaches can contribute to the peace process. Students apply conflict resolution approaches to conflicts at all levels, from interpersonal to those involving whole nations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8743 - Psychology of Terrorism♦

(5 cr.)
Many sources define terrorism as a type of psychological warfare, as it induces fear and feelings of vulnerability. Therefore, professionals need to understand all aspects of terrorism to help prevent further terroristic acts and respond to victims who have been affected psychologically. Students in this course explore terrorism from a psychological
They examine types of terrorism; contributing factors related to the development of terrorists and terrorist organizations; counterterrorism agencies and laws; the impact of terrorist events on individuals, families, and communities; prevention, intervention, and postvention with survivors; media coverage of terrorist events; human rights and ethical issues; and future trends related to the psychology of terrorism. Students also examine the threat of terrorism in their own community and evaluate the potential impact. Using concepts presented in the course, they consider applications for preventative measures as well as strategies to promote resiliency among individual and families who may become victims of terrorism.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

PSYC 8745 - Health Psychology♦

(5 cr.)
Health psychologists work toward positive physical, psychosocial, and behavioral outcomes for individuals, groups, and organizations. Health psychologists study health behavior in individuals and groups, relationships between patients and providers, how individuals and groups adapt to illness, damaging health behaviors, health cognitions, and many other related issues. In this course, students explore the biopsychosocial and social ecological models of health psychology, among others, as well as behavioral and biomedical theories, using them to study health in individuals and groups. Students examine the effects of psychological, behavioral, and social factors on physical health and wellness. Students also explore key health enhancing and compromising behaviors and how they are connected to chronic health conditions. Through the examination of seminal publications and current literature, students synthesize research on these issues in relation to various chronic health conditions.

Prerequisites
- PSYC 8004

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

PSYC 8747 - Psychoneuroimmunology

(5 cr.)
Students in this course examine current theory and interdisciplinary (psychological and medical) research associated with psychoneuroimmunology (PNI). Topics include the mind/body interaction, the holistic effects on overall health through modulation of the immune system, and mind/body interventions. Students explore recent advances in medical science that have contributed to the knowledge of biological processes and how the mind can be used as a potent force in modifying the biological mechanisms involved.
in wellness and illness.

**Prerequisites**
- PSYC 6225 or PSYC 8226
- PSYC 6748 or PSYC 8748

**PSYC 8748 - Stress and Coping**

(5 cr.)
Students in this course examine contemporary theories on the perception of stress, appraisal of stressors, ways of coping, and the psychophysiological mechanisms involved in the stress response. They explore topical issues, including psychoneuroimmunology, behavioral nutrition, psychophysiology, traumatic stress, chronic pain, and stress-related psychophysiological and medical disorders as they relate to stress and coping. Students engage in discussions designed to provide practical application of course content. Demonstrating breadth and depth of knowledge and critical-thinking skills, students explore a topic of interest through a final research proposal and paper on a current issue related to course concepts.

**Prerequisites**
- PSYC 8226

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 8749 - Leadership Development**

(5 cr.)
An understanding of the psychological principles of leader development often enhances leadership skills and ability to influence others to work toward common goals. In this course, students examine the psychology of leadership and leader development through cross-cultural, social, psychological, and political contexts. They identify and assess the psychological theories of leadership, leadership styles, qualities of great leaders, global leadership competencies, and instruments used to assess leadership and leadership potential. Students apply these psychological theories to assess and develop their own capacity for leadership.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 8750 - Foundations of Industrial/Organizational Psychology**

(5 cr.)
An understanding of the psychological principles of leader development often enhances leadership skills and ability to influence others to work toward common goals. In this course, students examine the psychology of leadership and leader development through
cross-cultural, social, psychological, and political contexts. They identify and assess the psychological theories of leadership, leadership styles, qualities of great leaders, global leadership competencies, and instruments used to assess leadership and leadership potential. Students apply these psychological theories to assess and develop their own capacity for leadership.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8752 - Psychology of Organizational Behavior**

(5 cr.) Effective leadership coaches must be fully capable of working with clients immersed in different organizational cultures that present unique challenges. In this course, students apply models, approaches, and frameworks; individual and team coaching strategies; and ethical guidelines to multiple case studies related to coaching for leadership development. Students gain practical insight on the characteristics, factors, and conditions that influence coaching efficacy, assessment, and evaluation. In addition, students consider diversity, ethics, and professional issues and challenges in the context of leadership coaching.

Prerequisites
- PSYC 8750

**PSYC 8753 - Career Counseling**

(5 cr.) Students in this course are provided with the opportunity to develop practical skills in career and vocational assessment as well as functional knowledge of how career assessment can assist in the exploration and understanding of the interrelationship among work, family, and life roles. They examine major sources of career and work information available on the Internet as well as through printed material and computer-based guidance systems. Gaining practical career counseling experience, students administer, score, and interpret printed and computer-based assessments of career interests, beliefs, and values. Students learn how to integrate career development theory and assessment results with career clinical interventions. They also examine clinical and assessment issues, devoting attention to computer-based applications and multicultural implications.

**PSYC 8754 - Personnel Psychology in the Workplace**

(5 cr.) In this course, students explore the application of psychological theory and practice to human resources activities in organizations. They examine related topics, including job analysis and design, employee selection and placement, training and development,
performance management and appraisal, and legal and ethical considerations in human resources management. Through a group project case study, students research, assess, and share critical issues in personnel psychology. They also demonstrate their ability to conduct effective research and review literature through a final research paper on a topic of interest related to course content and theory.

**Prerequisites**
- PSYC 8745

---

**PSYC 8755 - Leadership and the Process of Change**

(5 cr.)
Effective leadership requires the ability to facilitate positive change, lead others in efforts to effect similar change, and work through challenges when met with resistance to change. Students in this course are provided with an extensive overview of leadership theories. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership and change. Students also examine various perspectives on leadership and the role of leadership in the achievement of organizational, group, and team goals. Students engage in practical assignments and discussions, focusing on effective leadership issues and practices during the process of organizational change.

**Prerequisites**
- PSYC 8750 or PSYC 8752

---

**PSYC 8757 - Leadership Coaching: Application**

(5 cr.)
The intent of leadership coaching is to facilitate psychological change that leads to goal attainment and enhanced performance. In this course, students apply evidence-based psychological approaches to coaching case studies. They assess coaching roles and settings; skills and competencies; models and frameworks; and current issues and future trends. Students employ critical-thinking skills and synthesize concepts learned in the course to develop a plan for implementing effective coaching in a real-world setting.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

---

**PSYC 8759 - Psychology and the Media**

(5 cr.)
In an age of technological innovation and virtual spread of knowledge, there are many different types of media, which often affect individuals, groups, and cultures. Students in this course explore the psychological impact of the media as it relates to violence, prosocial behaviors, sex and pornography, advertising, news and politics, special
populations, and culture and the global community. They also examine legal and ethical issues related to psychology and the media as well as the impact of the media on social change. Students engage in assignments designed to provide practical application of content on media psychology, the effects of media violence and pornography, the impact of advertising, news manipulation, global disasters, and other applicable topics.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8760 - Educational Psychology♦

(5 cr.)
In this course, students examine the variables related to teaching and learning. Topics include teaching methods, educational achievement, learning environments, curriculum development, and characteristics of teachers and learners. Educational assessment, environmental issues, and educational research techniques are also explored.
Prerequisites
- PSYC 8004

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8762 - Teaching of Psychology♦

(5 cr.)
Students in this course examine theories, techniques, and issues related to teaching psychology at the college/university level, both online and in person. They focus primarily on teaching skills, developing rapport with students, managing the course, and managing the classroom. Classroom communication and ethical issues relevant to both faculty and students are also covered.
Prerequisites
- RSCH 8110

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8763 - Principles of Instructional Design♦

(5 cr.)
Students in this course are presented with an overview and critical analysis of various instructional methods and techniques, including their historical, psychological, and social foundations. Students analyze specific instructional applications in various settings and through multiple theories of learning, such as behavioral, cognitive, humanistic, and social-situational. They apply prior knowledge of learning, development, and cognition to
understand these applications. Students also consider and discuss the major challenges affecting curriculum design as well as potential future trends. Demonstrating understanding of course concepts, students critically analyze and present current issues in instructional design through collaborative projects.

**Prerequisites**
- PSYC 8762

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 8764 - Instructional Design for Online Course Development**

(5 cr.)
In this course, students explore instructional design and delivery of online courses, issues related to assessment, evaluation in a distance-learning environment, and appropriate and systematic use of technology in online learning venues. Addressing course objectives and discussion questions, students explore and assess issues related to learning styles and instructional strategies in the online environment as well as alternatives to the online lecture. Students gain hands-on experience developing components for online instruction using course concepts and best practices in the field.

**Prerequisites**
- PSYC 8762

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 8765 - The Psychological Impact of the Internet and Mobile Technologies**

(5 cr.)
The Internet and mobile technologies have increased the immediacy and accessibility of information and have provided a global platform for the expression of creativity and new ideas. Students in this course explore how the Internet and mobile technologies affect how people think, view the world, gain information, and record and interpret history. They examine and discuss the use of the Internet and mobile technologies for socialization, entertainment, news and information, terrorism, politics, commerce and advertising, health, education, and work. Applying course concepts and theories, students demonstrate knowledge through a final paper or presentation in which they examine how the Internet and mobile technologies psychologically impact their personal lives and the lives of their family and friends.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PSYC 8781 - Psychopathology From a Clinical Perspective**
Students in this course are provided with an in-depth examination of current theory and research associated with major psychological disorders and their diagnosis. The primary classification systems are explored in terms of their applicability and limitations. The factors that impact the assessment, diagnosis, and treatment of disorders along a continuum of mental health are explored. Application of the diagnostic criteria in terms of case conceptualization is emphasized.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8782 - Psychopathology From a Counseling Perspective**

Students in this course are provided with an in-depth examination of current theory and research associated with major psychological disorders and their diagnosis. The primary classification systems are explored in terms of their applicability and limitations. The factors that impact the assessment, diagnosis, and treatment of disorders along a continuum of mental health are explored. Application of the diagnostic criteria in terms of case conceptualization is emphasized.

**PSYC 8785 - Prevention: Research and Practice**

In this course, students prepare for their roles as counselors in areas of prevention, intervention, and consultation with specific populations in different settings. Students assess these three areas of mental health counseling, including the relationships among them, methodological applications, and related ethical and legal considerations. They also discuss a variety of topics with their peers, such as applications for social change, needs of specific populations, iatrogenic harm, professional approaches and challenges, program evaluation, and future trends. Using an action-research model, students develop a blueprint for a project to address a contemporary mental health issue through the context of prevention, intervention, or consultation.

**PSYC 8805 - Holistic Psychology♦**

Holistic psychologists provide therapy to patients by incorporating all aspects of the individual, including mental, physical, and spiritual. Students in this course are provided with a foundation in holistic psychology. Students examine topics in holistic and transpersonal psychology, as well as influences of theory and research in the areas of spirituality and mind/body relationships. While focusing on the integration of various perspectives, students also examine states of consciousness, emotional and psychosomatic disorders, spiritual emergencies, death and dying, and integral psychology. They share perspectives and assess current issues through discussions, and
they demonstrate knowledge through a final written assignment on a major topic of choice related to holistic psychology.

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PSYC 8810 - Community Psychology**

(5 cr.)
Through collaborative research and action, community psychologists work to enhance the well-being of individuals and community by understanding how communities function on many different levels. Students in this course explore the fundamental concepts and practice of community psychology. They examine guiding values and assumptions of the field, basic ecological concepts, and models of intervention. Evaluating traditional and topical research, students explore diversity in community psychology, strategies for social change, primary and secondary prevention, community mental health, empowerment, stress, and resiliency. They also have the opportunity to assess and discuss their personal and professional experiences, values, and cultural background and consider how these factors are likely to influence their work as community psychologists.

**PSYC 8815 - Contemporary Gerontology/Geriatric Psychology**

(5 cr.)
Statistical data indicate that people are living longer and the number of older persons is continually increasing. As the population ages, society must prepare to address their needs. Students in this course are provided with a multidisciplinary approach to the study of aging in contemporary societies. Students examine the biological, psychological, social, and societal contexts of aging. They also explore the historical and cross-cultural perspectives on aging, social theories of aging, managing chronic diseases, cognitive changes associated with aging, mental health issues, sexuality, and social interactions. Through a series of taskforce reports on various topics, such as sexually transmitted diseases, substance abuse, and elder abuse, students apply course concepts and critically examine current issues in gerontology.

**PSYC 8825 - Psychology of Gender**

(5 cr.)
Gender has been the focus of many stereotypes developed over time; but how much does the biological sex of an individual actually influence one's behavior, development, or emotions? Students in this course are introduced to theories and research on gender role expectations and their influence on the psychosocial developmental experience of women, men, and children. Students apply current gender research to understanding achievement, work, relationships, sexuality, violence, and physical health and illness. They also engage in readings and assignments that emphasize the responses of women
and men to life stresses, women as clients in psychotherapy, and the increasing role of
gender research in the mental health professions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

PSYC 8830 - Psychology of Sexuality♦

(5 cr.)

In this course, students explore sexuality through a variety of frameworks, including
historical, psychological, sociological, anthropological, biological, public health, and media
and cultural studies. Using a variety of theoretical perspectives, including essentialist and
constructivist notions of sex, sexuality, and sexual identity, students examine traditional
understandings of sexuality, including male and female sexual anatomy, physiology, and
response; variations across the lifespan; sexual communication; love and interpersonal
attraction; and sexual disorders. They also explore and discuss different expressions of
sexual identity, including heterosexuality, homosexuality, and bisexuality as well as
different expressions of gender identity from cross-cultural and interdisciplinary
viewpoints. Students complete an integrative final paper incorporating research, ideas,
and peer feedback from discussions on a topic related to the psychology of sexuality.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

PSYC 8860 - Independent Reading

(1–5 cr.)

Students in this course are provided with an opportunity to examine a topic area of
interest in greater depth than that which is provided in the course offerings. Students
work with the course instructor to design a syllabus that guides the independent
readings project. Content must include theoretical and empirical research literature that
addresses implications related to diversity and professional practice. Students may only
select this course once during their program of study and cannot use this course to
replace one that currently exists in the catalog.

Prerequisites

• Approved petition to Student Success Advising

PSYC 8871 - Practicum

(6 cr. minimum—3 cr. per term for minimum 2 terms)

The practicum is the opportunity for students to engage in a supervised experience that
integrates theory and research with practice. Through the practicum, students work
toward developing intermediate conceptual, assessment, intervention, and evaluation
skills; awareness of professional and ethical issues; professional and interpersonal
growth; development of cultural competence; and the ability to effectively use
supervision and feedback. Students must secure a practicum appropriate to their specialization, and the practicum must meet the current requirements of the state psychology board to which students intend to apply. Students design the PhD in Psychology practicum for a period of no fewer than 750 hours, which they must complete over a minimum of 2 terms. Students also participate in an online classroom experience.

Prerequisites
- Completion of the practicum application
- Approval of the field placement coordinator
- Completion of the Academic Year in Residence

Note: Post-doctoral certificate students may complete the practicum in one term, but may register for an additional term if they need more time.

**PSYC 8882 - Internship**

(12—3 cr. per term for 4 terms cr.)
The internship is a supervised training experience that prepares students to successfully function in the role of a professional psychologist and/or counselor. Internship experiences emphasize the integration of theory and research through applied practice in a variety of settings and situations. Supervising psychologists mentor interns through a professional relationship. Students learn how to effectively use and understand a supervisory relationship, engage in critical thinking, conduct assessments, implement evidence-based interventions, evaluate intervention efficacy, engage in professional consultation, and function within professional ethical standards. Interns also participate in didactic training. Internship is the final component of advanced applied professional training for students in licensure specializations prior to graduation. Students must secure internships appropriate to their specialization, and the internship must meet the current requirements of the state psychology board to which the student intends to apply. A total of 2,000 hours is required. Internships may be designed as a part-time or a full-time experience (minimum of 15 hours per week) but must be completed within a 2-year time frame. Students also participate in an online classroom experience.

Prerequisites
- PSYC 8871
- Completion of the internship application
- Approval of the field training coordinator

**PSYC 8912 - Mental Health Law**

(5 cr.)
Mental health counseling professionals in all areas, especially criminal forensic psychological practice, may encounter various conflicts regarding psychological and legal approaches to treatment. Therefore, it is important for counselors to have a firm
understanding of mental health law to avoid conflicts, such as issues of liability and malpractice. Students in this course are provided with the opportunity to examine several different aspects of the law related to mental health issues, including those constituting forensic psychological practice, such as civil matters (personal injury and civil competency issues) and criminal matters (competency to stand trial, criminal responsibility, diminished capacity, and death-penalty issues). Students employ recent court decisions and laws, such as the Tarasoff ruling, mandated reporting, and the Health Insurance Portability and Accountability Act (HIPAA), to examine how mental health law influences the practice of psychology and mental health counseling.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PSYC 8920R - Research Practicum

Students engaging in the research practicum participate as researchers in a project designed and supervised by faculty members. The students receive ethics training and consider ethical implications of research projects. They read literature concerning the project, collect data, analyze and interpret the quantitative and qualitative data that have been collected, and write a final paper on the project.

PSYC 8920T - Teaching Practicum

(5 cr.)
Students in this course can develop advanced skills necessary to become effective and ethical higher education instructors. They will engage in simulations to practice instructional skills and tasks and will evaluate their instructional and communication skills through practice in video and virtual classroom environments. Substantial reflection and instructor and peer feedback will enhance learning and development of skills. Students will refine the portfolios they developed in the Teaching of Psychology course.

PSYC 9000 - Dissertation

(5 credits per quarter for a minimum of 4 quarters until completion)
Doctoral students are provided with the opportunity to integrate their program of study into a research study through which they explore a specific area of interest in this course. Students complete the dissertation with the guidance of a chair and committee members through a learning platform classroom in which weekly participation is required. Students work with their dissertation chair to write the prospectus, complete an approved proposal (the first three chapters of the dissertation), complete an application for Institutional Review Board approval, collect and analyze data, and complete the dissertation. During the final quarter, students prepare the dissertation for final review by the university and conclude with an oral defense of their dissertation.
Once students register for PSYC 9000, they are registered each term until successful completion of the dissertation for a minimum of four terms. Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**Prerequisites**

- Foundation courses
- Core courses
- Designation of an approved dissertation committee chairperson
- Students engaging in a qualitative or mixed-methods dissertation study must also complete PSYC 8310.
- Students completing a mixed-methods dissertation study are strongly encouraged to also complete PSYC 8320

**PSYR 8117 - Writing a Quality Prospectus in Psychology**

*(5 cr.)*

This five-credit course is focused specifically on the process of writing the dissertation prospectus. Students can use their preliminary research plan, developed previously, and develop a problem statement to be used in the dissertation. They can further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a dissertation prospectus. The prospectus is a brief paper, typically 15–20 pages in length, that lays out the background for the problem statement, the problem statement itself, a survey of the relevant literature, typically 25–75 references, and a research, implementation, and evaluation plan for the solution of the problem. This course is provided in-residence, which means that students divide their time between online activities and activities completed in-residence, with the majority of the instruction occurring face-to-face during the in-residence class meetings.

**PSYR 8214 - Consulting for Organizational Change**

*(5 cr.)*

Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an
OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

**PSYR 8232 - Consultation and Supervision in Psychology**

(5 cr.) Students in this course examine the history, theory, process, and methods in the fields of psychological consultation and clinical supervision. Students can gain theoretical and empirical knowledge as well as the relevant practical skills needed to function as consultants and supervisors. Ethical and legal issues in providing consultation and supervision will be addressed. This course is provided in-residence, which means that students will be dividing their time between online assignments and assignments completed in-residence, with the majority of the instruction occurring face-to-face during the in-residence class meetings. This format will allow students the opportunity to integrate the online didactic learning experience with hands-on skills demonstration.

**PSYR 8240 - Cognitive Behavioral Therapy**

(5 cr.) Students in this course will examine the historical and theoretical underpinnings of Cognitive-Behavioral Therapy (CBT)/Rational Emotive Behavior Therapy (REBT). Students will demonstrate the use of case conceptualization from a CBT perspective and will integrate and apply the therapeutic skills and techniques of CBT in the solution of life problems to mental health disorders. In examining ethical responsibility, students will analyze the appropriateness of using CBT with diverse populations, discussed within the context of empirically supported interventions. During the in-residence portion of the class, students will demonstrate and practice the skills of CBT/REBT. This course is provided in-residence, which means that students divide their time between online activities and activities completed in-residence, with the majority of the instruction occurring face-to-face during the in residence class meetings. This format allows the student to integrate the online didactic learning experience with hands-on skills demonstration.

**Prerequisites**
- PSYR 8704
- PSYR 8346
- PSYR 8117L
- PSYR 8421

**PSYR 8340 - Cognitive Assessment**
Students in this course are introduced to historical and current theories of intellectual functioning. Students can critically analyze issues related to cognitive ability and achievement and develop competency in the administration, scoring, and interpretation of various standardized instruments designed to assess cognitive and intellectual functioning. Students review and prepare written reports that summarize, interpret, and integrate assessment results with recommendations for prevention and intervention. There is an emphasis on ethical test use in a diverse society and linking assessment results to appropriate interventions and practice. This course is provided in-residence, which means that students divide their time between online activities and activities completed in-residence, with the majority of the instruction occurring face-to-face during the in-residence class meetings.

Prerequisites

- PSYR 8704
- PSYR 8346
- PSYR 8117L
- PSYR 8421
- PSYR 8232L
- PSYR 8240

PSYR 8345 - Interventions II

Students in this course explore the application of empirically supported treatment and interventions to client problems ranging from problems in living to severe mental disorders in selected populations. Students demonstrate the implementation of intervention models, including cognitive-behavioral therapy, person-centered therapy, short-term dynamic psychotherapy, and integrative psychotherapy, in the online and face-to-face classrooms. Culturally competent interventions are emphasized within an ethical framework for clinical or counseling practice. This course is provided in-residence, which means that students divide their time between online activities and activities completed in-residence, with the majority of the instruction occurring face-to-face during the in-residence class meetings.

PSYR 8346 - Clinical Psychopharmacology

Students in this course survey basic neuropharmacology, the effects of various psychotropic drugs, and the actions of drugs used to treat mental disorders. Basic principles of neuropharmacology, distribution and elimination of drugs, drug-receptor interactions and dose-response relationships, structure of neurons, neurophysiological mechanisms involved in synaptic activity, and the distribution of specific neurotransmitter systems are covered. Students also learn the actions of specific drugs,
their effects on behavior, and their uses in biological psychiatry. This course is provided in-residence, which means that students divide their time between online activities and activities completed in-residence, with the majority of the instruction occurring face-to-face during the in-residence class meetings.

**PSYR 8350 - Personality Assessment**

(5 cr.)
This course is designed to introduce students to the theory and concepts relevant to objective personality assessment as well as to build the skills needed to administer, score, and interpret specific measures of personality and social-emotional functioning in a professionally and ethically responsible manner. The course is also designed to develop students’ skills in selection of assessment methods, integration of all assessment data, case formulation, psychodiagnosis, report writing, and treatment planning based on assessment findings. This course has a skill-based, face-to-face required in-residence component, which is designed to be hands-on, intensive, and cumulative to promote learning and skill building that will generalize to "real-world" practice. Students can gain experience in integrative report writing and begin to develop evidence-based consultation and test-interpretation feedback skills. Satisfactory completion of this demanding course is seen as an essential component of the core Professional Psychology curriculum. It will be important for students to demonstrate mastery of course requirements considered essential in the professional practice of psychology (professional knowledge, skills, and attitudes) at the required in-residence. This course is provided in-residence, which means that students divide their time between online activities and activities completed in-residence, with the majority of the instruction occurring face-to-face during the in-residence class meetings.

**Prerequisites**
- PSYR 8704
- PSYR 8346
- PSYR 8117L
- PSYR 8421
- PSYR 8232L
- PSYR 8240

**PSYR 8421 - Multicultural Psychology**

(5 cr.)
This course is designed to provide a foundation in the theory and skills necessary for multicultural counseling and the delivery of psychological services to diverse populations. Students explore cross-cultural issues and their impact on the therapeutic relationship. Specific populations include those related to race, ethnicity, sex, gender, sexual orientation, social class, economic status, age, religion, and disability. The effects
of oppression and its prevention are also discussed in terms of social justice. This course is designed to be provided in-residence, which means that students will be dividing their time between online activities and activities completed in-residence, with the majority of the instruction occurring face-to-face during the in-residence class meetings. With this format, the student has the opportunity to integrate the online didactic learning experience with hands-on skills demonstration. This course is provided in-residence, which means that students divide their time between online activities and activities completed in-residence, with the majority of the instruction occurring face-to-face during the in-residence class meetings.

Prerequisites
- PSYR 8704
- PSYR 8346

**PSYR 8704 - Ethics and Standards of Psychological Practice**

(5 cr.)
The guidelines for practice in specific psychological services and with identified populations are explored. The ethical decision-making process is studied in depth. Topics include informed consent, confidentiality, duty to warn, mandated reporting, record keeping, the limits of competency, and dual relationships. Students in the course also address issues of professional development such as supervision, peer consultation, and continuing education. This course is provided in-residence, which means that students divide their time between online activities and activities completed in-residence, with the majority of the instruction occurring face-to-face during the in-residence class meetings.

Prerequisites
- CPSY 8245
- CPSY 8247
- RSCH 8210
- CPSY 8316
- CPSY 8215
- CPSY 8226
- RSCH 8310

**PSYR 8752 - Psychology of Organizational Behavior**

(5 cr.)
Students in this course examine the application of behavioral theories in organizational settings. The focus is on individual, group, and organizational behavior. Topics include individual differences in employee motivation and job satisfaction, group development, team building, organizational leadership, and organizational design, culture, and
development. Students acquire a broad knowledge base in organizational psychology, its research, and its applications.

**PUBH 1000 - Foundations of Public Health♦**

(5 cr.)
This course is an introduction to the principles and practice of safeguarding and improving the health of populations. Students examine the philosophies, goals, history, and organization of the field of public health. They discuss the role of the government in improving the health and well-being of its citizens. Students explore key concepts of public health, including morbidity and mortality, infectious and chronic disease, social determinants of health, and health disparities within populations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 3000 - Environmental Health♦**

(5 cr.)
Human interaction has a major influence on the natural world, resulting in outcomes that can impact human and environmental health. In this course, students learn the principles of environmental health and examine the short- and long-term effects of environmental hazards on human health. Students consider their own interactions with natural and human-made environments to assess the impact of chemical, physical, biological, and social elements on their health. They also explore the potential impact of climate change on population health, emerging global health threats related to the environment, and environmental factors involved in the etiology and transmission of both communicable and non-infectious disease. Using concepts and methods presented in the course, students conduct an environmental risk assessment to determine the health of home environments. They also conduct a written analysis to report their findings, identifying actions to improve inspection results.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 3100 - Human Disease and Prevention♦**

(5 cr.)
Through this course, students explore the historical milestones concerning human disease and prevention, morbidity and mortality rates associated with various diseases, and the biological effects of infectious and chronic disease on the human body. Students discuss the general characteristics of disease transmission, symptoms, treatment, prevention, and control among various populations. They also examine psychosocial and behavioral factors that influence human disease.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PUBH 4000 - Public Health Education and Communication

(5 cr.)
Effective delivery of health education and communication often leads to improved health literacy and positive changes in behavior among populations. In this course, students receive an overview of health education and its role in improving the health of individuals as well as populations. Students review the philosophical, historical, ethical, and theoretical foundations of health education as well as effective principles for the delivery of healthcare. They also examine the primary responsibilities and competencies of health educators, trends in the field, professional organizations, national certification, and the code of ethics.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 4030 - Planning Public Health Programs

(5 cr.)
Planning culturally relevant and effective public health programs is essential to improving the health of populations. In this course, students are introduced to public health program planning and design, including the process of needs assessment. Students examine and apply various models and theoretical frameworks of program planning. They also explore fundamental competencies relating to planning, such as writing goals and objectives, selecting strategies, developing budgets, and planning for specific populations. Students learn about concepts related to program implementation, management, and evaluation as these relate to the planning process.

Prerequisites
BS in Health Studies
  • HLTH 3115 or HLTH 3115S
BS in Public Health
  • HLTH 3115 or HLTH 3115S
All Other Programs
  • HLTH 3115

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 4100 - Evaluating Public Health Programs

(5 cr.)
How do public health professionals know when a program is working? This course
provides an introduction to evaluating public health programs. It examines various types of program evaluations, including formative, process, outcome, and impact evaluations. Students apply concepts for designing and conducting practical, ethical, and effective program evaluations that determine whether program goals are achieved. Students also explore ways to appropriately disseminate program evaluation results.

Prerequisites
- PUBH 4030

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 4200 - Public Health Policy for Social Change

(5 cr.)
Students in this course examine one of the most influential factors shaping the health of populations: public policy. Public health policy impacts the public's health at the local, state, and federal levels. Students explore the institutional, economic, social, ethical, and political factors that impact public policy. Students examine how public policy is developed and discuss issues relating to health advocacy within the framework of social justice.

Prerequisites
- BS in Public Health
  - HLTH 3115 or HLTH 3115S
- All Other Programs
  - HLTH 3115

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 4900 - Capstone in Public Health

(5 cr.)
In this capstone course, students have the opportunity to examine contemporary global public health issues, as well as to evaluate and synthesize the key concepts and skills they have gained from this program of study. Students complete a final capstone project based on service learning, field observations, or a review of literature.

Prerequisites
- All required core and concentration courses, if applicable, within the BS in Public Health

PUBH 5005 - Perspectives on Health and the Developing Scholar-Practitioner
Students in this course cover the origins and evolution of the concept of health, including some of the important health problems that face the world today and emerging concerns for the future. Students taking this foundational course are introduced to key events in history, as well as some of the health systems and issues that a modern health practitioner may encounter. Strategies for success as a graduate-level scholar and a health practitioner are integrated in a way that provides meaningful context to learners. Students discuss key concepts with peers, and the course culminates with a reflection paper designed to help learners evaluate their professional goals and how to progress as a scholar-practitioner and social change agent. Students explore careers in various public health and health education settings and experience a virtual health department in order to learn about various functions and personnel.

Note about required first courses: Students in the MPH program must receive a B or better in this course.

**PUBH 5030 - Socioecological Perspectives on Health**

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 5127 - Public Health Policy, Politics and Progress**

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
Students cover the origins and evolution of the concept of health, including some of the important health problems that face the world today and emerging concerns for the future. In this foundational course, students are introduced to key events in history as well as some of the health systems and issues that a modern health practitioner may encounter. Strategies for success as a graduate-level scholar and a health practitioner are integrated in a way that provides meaningful context to learners. Students discuss key concepts with peers, and the course culminates with a reflection paper designed to help learners evaluate their professional goals and how to progress as scholar–practitioners and social change agents. Students explore careers in various public health and health education settings and experience a virtual health department to learn about various functions and personnel.

Note about required first courses: Students in the MPH program must receive a B or better in this course.

PUBH 6030 - Socioecological Perspectives on Health

In this course, students identify and discuss social and ecological perspectives of public health including individual, interpersonal, organizational, community, societal, and public policy factors. Students explore and apply the socioecological model (SEM) and other theoretical frameworks that aim to address current public health problems and reduce health disparities, morbidity, and mortality. Students demonstrate understanding of course concepts through peer discussion and through researching and describing a specific health issue in a community, discussing the contributing factors, and proposing an appropriate intervention.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6031 - Public Health Administration and Leadership

In this course, students are provided with a foundational understanding of the administrative, managerial, and organizational practices of public health and healthcare delivery systems. Students examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. They engage in a variety of contextual and practical assignments focused on management theories, policy processes, systems thinking, strategic planning and partnerships, public health financing, human resource management, public health informatics, quality and performance improvement, leadership, and organizational behavior. Students also consider the impact of global trends on public health.

Prerequisites

- PUBH 6005
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 6032 - SPSS Revealed**

(1 cr.)
This is a laboratory-type course where students learn the skills needed to use the statistical computer package SPSS in public health practice and research. Topics include importation of data, management of various types of data, creation and exportation of tables and graphs, and computation of basic statistical tests using SPSS.

Prerequisites
- PUBH 6005

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 6033 - Interpretation and Application of Public Health Data**

(5 cr.)
Students in this course learn about biostatistical methods and concepts used in public health practice and research. Emphasis is placed on interpretation and application of concepts rather than statistical calculations. Major topics include identification of types of data, creation and interpretation of narrative and graphical descriptive statistics, conceptualization of statistical inference and probability, and interpretation of common nonparametric tests, analysis of variance, and simple linear regression models. Students are required to use the statistical computer package SPSS.

Prerequisites
- PUBH 6032 or PUBH 6032P

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 6034 - Environmental Health: Local to Global**

(5 cr.)
This course provides a comprehensive overview of environmental factors that affect the health and safety of 21st century communities. Students examine associations and interrelationships between chemical, physical, and biological hazards in the environment and their impact on human health. Concepts cover food, water, air, waste, radiation, noise, pests, population growth, and climate change. Students analyze and discuss current local and global problems and solutions and consider new ways to address environmental issues.
Prerequisites

MSN: Public Health Nursing Specialization

- NURS 6002 or NURS 6003
- PUBH 6127
- NURS 6051
- NURS 6052
- NURS 6053

All Other Programs

- PUBH 6005

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6035 - Epidemiology: Decoding the Science of Public Health♦

(5 cr.)

Students in this course are provided with an epidemiological approach to the study of the incidence, prevalence, and patterns of disease and injury in populations, and the application of this study to the control of public health problems. Key sources of data for epidemiological purposes are identified, and principles and limitations of public health screening programs are addressed. Students learn to calculate basic epidemiological measures and to draw appropriate inferences from epidemiological data and reports.

Prerequisites

- (PUBH 6033 and PUBH 6032) or (PUBH 6033P and PUBH 6032P)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6038 - Health Behavior Theory♦

(5 cr.)

Students in this course are introduced to concepts necessary for promoting positive health-behavior change by examining the most commonly used theories and models in public health and health education and promotion. Coursework focuses on the identification and application of theories and models for promoting and designing effective health behavior programs and interventions. Students explore individual, interpersonal, and community theories and modules to determine the most appropriate application.

Prerequisites

- PUBH 6005

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
PUBH 6127 - Public Health Policy, Politics and Progress♦

(5 cr.)
In this course, students examine the role of federal, state, and local government in the assurance of public health through health policy and law. Consideration is given to contemporary policy, law and regulatory issues arising in public health practice, as well as to the economics and financing of public health programs. The advocacy, political, and creative process in the formulation, implementation, and modification of health policy are examined and discussed. Students also learn how to structure and write a health policy analysis.

Prerequisites
MSN Public Health Nursing Specialization
- NURS 6002 or NURS 6003

All Other Programs
- PUBH 6005

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6128 - Biological Foundations of Public Health♦

(5 cr.)
This course provides learners with a foundation in the basic science and critical thinking that informs the core areas of public health. Students explore the biological and physical underpinnings of the human body in health and disease states, and they investigate the microbiological, physical, behavioral, and environmental causes of common diseases from a public health perspective.

Prerequisites
- PUBH 6005

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6129 - Global Perspectives on Health♦

(5 cr.)
Students are introduced to current public health issues and challenges affecting vulnerable populations around the globe. Particular emphasis is given to the social and economic determinants of health and possible intervention strategies for addressing the global burden of diseases. Students learn about organizations that work to support and advance health locally and internationally and compare health systems around the globe. Students also analyze global health ethics, examine international health-related goals, and explore health communication and other strategies for social change.

Prerequisites
• PUBH 6005

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6135 - Leadership, Professionalism, and Ethics in Public Health Practice♦

(4 cr.)
Critical issues, such as infectious diseases, inadequate healthcare access, and an aging population, require leaders who have a diverse skill set as well as the professional and ethical sensibilities needed to lead efforts that improve quality of life for individuals and communities. In this course, students examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. They explore ethical choices, values, professionalism, opportunities for advocacy, and the application of principles of social justice implicit in public health decisions and practice. Students learn how to employ collaborative methods for working with and motivating diverse communities and constituencies, and they consider methods and develop new strategies for evaluating and solving current problems in healthcare.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6145 - Epidemiology♦

(4 cr.)
Students in this course are provided with an epidemiological approach to the study of the incidence, prevalence, and patterns of disease and injury in populations, and the application of this study to the control of public health problems. Key sources of data for epidemiological purposes are identified, and principles and limitations of public health screening programs are addressed. Students learn to calculate basic epidemiological measures and to draw appropriate inferences from epidemiological data and reports.

Prerequisites
  • PUBH 6125

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6155 - Research in Public Health♦

(4 cr.)
Public health professionals use the results of research in many ways, including in the development of programs and interventions designed to enhance the health of communities as well as to demonstrate the efficacy of programs to stakeholders who provide funding. Students in this course engage in an examination of the research that
informs public health programs, policy, and practice. Students examine the logic that underlies scientific research; study design; sampling; identification of variables; methods of data collection and analysis; key concepts in measurement, including reliability and validity; program evaluation; and research ethics. Students also explore the methods of participatory research as well as statistical software used to support research. Gaining practical experience, students develop a research manuscript through which they engage in an integrative literature review and analyze and apply various components of research, including data sets; study designs, variables and measurements, participants; data analysis; and strategies and skills for presentation of research.

Prerequisites
- PUBH 6125
- PUBH 6145

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6227 - Health Informatics❖

(4 cr.)
Information technology (IT) in public health practice has many functions, one of which is the dissemination of important information about disease and disease prevention, which organizations use in the management of critical issues in public health. Students in this course examine the various applications of IT in public health practice to access, interpret, and evaluate data that supports decision making and effective communication. They examine legal and ethical principles in the dissemination of information in public health settings as well as the use of informatics methods and resources as strategic tools to promote public health. Students also explore the collaborative approach to the design, implementation, and evaluation of informatics programs. Through the analysis of various case studies, students sharpen their critical-thinking and decision-making skills while gaining an understanding of the various phases of informatics project development, information architecture, and immunization registry. They also engage in practical exercises on information systems evaluation, IT personnel management, and procurement and requests for proposals (RFPs).

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6245 - Applied Research in Public Health❖

(5 cr.)
The goal of this course is to provide participants with an understanding of theories, principles, strategies, and alternative methods of applied research (quantitative, qualitative, and/or mixed-method designs) in public health focusing on culturally sensitive, appropriate literacy level and appropriate community engagement through
participatory action research and collaborative inquiry of community-based participatory research, an appreciation of advantages and limitations of this approach, and skills necessary for participating effectively in CBPR projects.

**Prerequisites**
- PUBH 6005

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 6260 - Legal and Regulatory Aspects of Public Health♦**

(2 cr.)
A major responsibility of public health professionals is to maintain balance between individual rights and the wellbeing of communities. To do this, they must understand the ethical, social, and legal issues surrounding the public health arena. Students in this course explore these concepts while examining the role of federal, state, and local government in the assurance of public health through legislation and regulation. Students investigate contemporary legal and regulatory issues arising in public health practice and emergencies, and they assess public health security and preparedness in response to bioterrorism and disasters. They also discuss the impact of cost, benefits, legal factors, and other considerations on ethical research and practice. Through the application of theories and concepts assessed in the course, students propose potential solutions to current public health issues.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 6475 - Program Planning, Implementation, and Evaluation♦**

(5 cr.)
The focus of this course is on the competencies required of the public health professional in planning for the design, development, implementation, and evaluation of community health promotion and disease prevention initiatives. Attention is given to needs assessment, logic models, and collaboration with stakeholders. Strategic approaches to planning, implementation, and evaluation with particular attention to study design and sampling are addressed. Health behavior theories are considered in the development of health promotion programs, the assignment of evaluation findings, and prioritization of community concerns and resources.

**Prerequisites**
**MSN: Public Health Nursing Specialization**
- NURS 6002 or NURS 6003
- PUBH 6127
- NURS 6051
- NURS 6052
• NURS 6053
All Other Programs
• PUBH 6005

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 6635 - Practicum I: Field Experience in Public Health

(4 cr.)
Students in the practicum are provided with the opportunity to apply and integrate the knowledge and skills acquired throughout their program of study and to further develop key professional competencies. Students engage in a field experience in a select public health setting, which they align to their academic and professional goals. Supervision by an on-site preceptor is a critical component of the practicum. The on-site supervisor and the course instructor monitor and evaluate students' performance throughout the entire practicum experience. Students are required to complete 240 hours of practicum work. They must also participate in an accompanying online seminar course and begin to develop an ePortfolio based on assigned professional development activities.

PUBH 6636 - Practicum II: Capstone Experience in Public Health

(4 cr.)
This course is the continuation of PUBH 6635 - Practicum I: Field Experience in Public Health. The capstone experience is an opportunity for students to demonstrate their mastery of principles, concepts, and content presented throughout the program and through their practicum field experience. In this course, students complete their ePortfolio based on their field experience and develop a substantive written paper or project. Students also engage in group discussions during which they consider career development plans, reflect on the promotion of social change, and exchange feedback on final portfolio work and lessons learned.

PUBH 6638 - Practicum I: Field Experience in Public Health

(3 cr.)
Students in the practicum are provided with the opportunity to apply and integrate the knowledge and skills acquired throughout their program of study and to further develop key professional competencies. Students engage in a field experience in an approved public health setting, which they align to their academic and professional goals. Supervision by an on-site preceptor is a critical component of the practicum. The on-site supervisor and the course instructor monitor and evaluate students' performance throughout the entire practicum experience. In this first course of the two-part practicum, students are required to complete a minimum 100 of the total 200 required
hours of practicum work. Students also participate in the accompanying online course and begin to develop an eportfolio based on assigned professional development activities.

Prerequisites
- PUBH 6005
- PUBH 6038
- PUBH 6127
- PUBH 6128
- PUBH 6032
- PUBH 6129
- PUBH 6033
- PUBH 6031
- PUBH 6035
- PUBH 6475
- PUBH 6034
- PUBH 6245

**PUBH 6639 - Practicum II: Field Experience and Applied Project in Public Health**

(3 cr.)

This course is the continuation and extension of PUBH 6638 - Practicum I: Field Experience in Public Health. Students complete the remainder of their required 200 hours of practicum work, participate in the accompanying online course, and complete the eportfolio of their field experience. Students also develop their applied public health project (see PUBH 6245 course description for further explanation of the project).

Prerequisites
- PUBH 6638

*Note:* Time spent on developing the project is expected to be above and beyond the 200 hours devoted to actual practicum work.

**PUBH 6640 - Applied Project in Public Health**

(2 cr.)

As a culminating experience, MPH students are provided the opportunity to demonstrate their ability to synthesize and integrate advanced knowledge and skills acquired throughout the program and to apply theory and principles in a public health project focused on social change. For this project, students write a grant proposal for a public health initiative or create a community health program plan. The project must address the need(s) of a specific population in the student’s field site community. Students are also required to describe how the MPH program competencies/learning outcomes were demonstrated while carrying out the project as well as how their
project relates to social change.

Prerequisites
- PUBH 6245

(Co-requisites: PUBH 6639)

**PUBH 8003 - Building a Multidisciplinary Approach to Health**

(3 cr.)
In this course, students will explore the multidisciplinary nature and integration of professional practice in the health field. Students will have the opportunity to utilize their scholarly voice with diverse audiences and with academic integrity to ensure academic and professional success as scholar-practitioners and social change agents. As leaders in their profession, students will discuss critical public health and health services in the health field. They use a response to a natural disaster, review of emerging issues in the health field, and what it means to be part of a multidisciplinary team to develop community partnerships with key stakeholders. This way they can address health issues impacting their communities, agencies, and/or organizations.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PUBH 8004 - Foundations of Doctoral Success in Public Health**

(5 cr.)
In this course, students will explore the field of public health and analyze foundational components of the discipline, including philosophies and values, from the viewpoint of what it means to become a scholar-practitioner in the field. They will also examine literature in public health including information on emerging issues and trends and technologies used. Students will learn about the public health doctoral programs and the resources that are available to improve scholarly voice, writing, and communication. In addition, students will examine the skills that are needed to complete a doctoral study program with regards to time management, self-discipline, and academic integrity.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PUBH 8007 - Public Health Essentials**

(0 cr.)
In this self-paced modular course, students will be exposed to foundational public health knowledge. Public health history, philosophy, and values will be addressed, along with its core functions and essential services. Data-driven methods for describing and assessing a population’s health will be explored, as well as the importance of science in prevention and advancing public health knowledge. Factors affecting public health will be addressed, including those that are biological, genetic, behavioral, psychological, and environmental.
Contributors to health inequities, including social, political, and economic factors, as well as globalization, will be explored. Connections between human, animal, and ecosystem health will also be addressed.

**Note:** This self-paced modular course must be completed within the first two quarters of enrollment.

**PUBH 8030 - Socioecological Perspectives on Health**

(5 cr.)
Students in this course will identify social and ecological approaches to public health at the individual, interpersonal, organizational, community and environment, and policy levels. They will explore and apply the socioecological model (SEM) and other theoretical frameworks to address public health issues and reduce health disparities in morbidity and mortality. Students demonstrate an understanding of course concepts through peer discussion and research on specific health issues in special populations, identifying contributing factors and proposing appropriate interventions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8031 - Public Health Administration and Leadership**

(5 cr.)
In this course, students are provided with a foundational understanding of the administrative, managerial, and organizational practices of public health and healthcare delivery systems. Students examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. They engage in a variety of contextual and practical assignments focused on management theories, policy processes, systems thinking, strategic planning and partnerships, public health financing, human resource management, public health informatics, quality and performance improvement, leadership, and organizational behavior. Students also consider the impact of global trends on public health.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8032 - SPSS Revealed**

(1 cr.)
In this laboratory course, students can learn the skills needed to use the statistical computer package SPSS (Software Package for the Social Sciences) in public health practice and research. Topics include importation of data, management of various types of data, creation and exportation of tables and graphs, and computation of basic statistical tests using SPSS.

**Note:** Lab
PUBH 8033 - Interpretation and Application of Public Health Data

(5 cr.)
Students in this course learn about biostatistical methods and concepts used in public health practice and research. Emphasis is placed on interpretation and application of concepts rather than statistical formulas. Major topics include identification of levels of measurement, interpretation of narrative and graphical descriptive statistics, conceptualization of statistical inference and probability, and interpretation of commonly used statistical tests such as t tests, analysis of variance, correlation and regression, comparing proportions, contingency tables, and chi-square tests. Students are required to use the statistical computer package SPSS.

Prerequisites
- PHLT 8006 or PHLT 8011 or PUBH 8004
- PUBH 8032

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8034 - Environmental Health: Local to Global

(5 cr.)
A comprehensive overview of environmental factors that affect the health and safety of 21st century communities is provided in this course. Students examine associations and interrelationships among chemical, physical, and biological hazards in the environment and their impact on human health. Concepts cover food, water, air, waste, radiation, noise, pests, population growth, and climate change. Students analyze and discuss current local and global problems and solutions and consider new ways to address environmental issues.

Prerequisites
- PUBH 8035

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8035 - Epidemiology: Decoding the Science of Public Health

(5 cr.)
Public health officials frequently use epidemiologic research to develop educational strategies and intervention programs to improve the overall health of communities. Using an epidemiological approach, students in this course examine the incidence, prevalence, and patterns of disease and injury in populations and learn how to apply these concepts to the control of public health problems. Students identify key sources of data for epidemiological purposes and address principles and limitations of public health screening programs. Students calculate basic epidemiological measures and draw
appropriate inferences from epidemiological data and reports. Through this course, students gain a deeper understanding of the various research designs and methodologies professionals use in public health research.

Prerequisites
- PUBH 8032
- PUBH 8033

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8038 - Health Behavior Theory♦

(5 cr.)
Students in this course are introduced to concepts necessary for promoting positive health-behavior change by examining the most commonly used theories and models in public health and health education and promotion. Coursework focuses on the identification and application of theories and models for promoting and designing effective health behavior programs and interventions. Students explore individual, interpersonal, and community theories and modules to determine the most appropriate application.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8040 - Advanced Public Health Policy and Advocacy♦

(5 cr.)
In this course, students examine the role of federal, state, and local government in the assurance of public health through health policy and law. Consideration is given to contemporary policy, law, and regulatory issues arising in public health practice, as well as to the economics and financing of public health programs. The advocacy, political, and creative process in the formulation, implementation, and modification of health policy are examined and discussed. Students also learn how to structure and write a health policy brief, which will provide students with experience integrating scientific information, legal, and regulatory approaches, ethical frameworks, and varied stakeholder interests in policy development and analysis.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8044 - Advanced Program Evaluation♦

(5 cr.)
The course provides students interested in pursuing a public health doctoral-level degree with the advanced competencies necessary to evaluate public health programs.
This course will emphasize public health practice and is designed to assist students in understanding how to plan, conduct, and report on a program evaluation. Students will learn the importance of abiding by the program evaluation standards and evaluator guiding principles. These are fundamental to ensure students complete evaluations with integrity and utility. Students will learn the importance of evaluation theory and the relationship between evaluation theory, program theory, and public health change theories.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8048 - Research Applications of Theories, Models, and Conceptual Frameworks in Public Health**

(5 cr.)
This course presents a comprehensive look at public health and behavior change theoretical and conceptual models that apply to public health research and practice. Students review and assess predominant social and behavioral principles at the individual, interpersonal, and community levels. Students learn to integrate knowledge on different public health theoretical and conceptual frameworks, research approaches, methods, values and potential contributions from multiple professions and systems in addressing public health problems. Finally, students learn to apply theories to public health quantitative, qualitative and mixed methods research and practice.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8051 - Advanced Issues in Global Public Health**

(5 cr.)
This course provides an in-depth review and analysis of the leading global health problems, and the primary methods used to measure those problems. Students analyze the social and environmental determinants of global health problems, including urbanization, global industrialization, environmental pollution, and their role in health inequalities within and between populations. In addition, students evaluate population-based approaches to improving global public health, including culturally inclusive and sensitive primary health care, and policies that promote health literacy, health equity and positive social change. Emphasis is placed on strategies to advance inclusion, cultural humility and health equity in public health research, policies and programs. The course takes a cross-disciplinary, ecological approach, enabling students to examine the complex inter-relationships between economic, social and environmental factors, and health.

**PUBH 8132 - Communication and Social Marketing Strategies for Public Health Leaders**
This course provides to students an overview of communication and social marketing strategies as they relate to public health, highlighting theoretical concepts that are commonly used in health communications and research. Topics include using communication theory, social marketing techniques, promoting health literacy, developing community partnerships, and creating culturally sensitive and appropriate promotional materials. Students focus on developing, implementing, and evaluating an abbreviated Public Health Communication Campaign by applying basic social marketing principles, such as the use of social media techniques, to identify and advance public health interests and address public health problems. Through their Public Health Communication Campaign, which is this course’s Scholar Practitioner Project, students examine how they can use marketing and communication practices to translate health research into social action and behavioral change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8135 - Leadership, Professionalism, and Ethics in Public Health Practice

Critical issues, such as infectious diseases, inadequate healthcare access, and an aging population, require leaders who have a diverse skill set as well as the professional and ethical sensibilities needed to lead efforts that improve quality of life for individuals and communities. In this course, students examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. They explore ethical choices, values, professionalism, opportunities for advocacy, and the application of principles of social justice implicit in public health decisions and practice. Students learn how to employ collaborative methods for working with and motivating diverse communities and constituencies, and they consider methods and develop new strategies for evaluating and solving current problems in healthcare.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8211 - Research Methods for Public Health

In this research course, students are provided with the opportunity to develop core knowledge and skills for designing and carrying out quantitative, qualitative, and mixed methods public health research at the doctoral level. Students explore ecological and systems approaches to public health problems at the individual, group, organization, community and population levels. They also explore and learn to apply commonly used methods for developing research questions, research designs and approaches, data collection and data analysis, including statistical tests used in public health research. Students explore the ethical and rigorous conduct of research and consider the public
health practice implications of conducting research.

Prerequisites
- RSCH 8110
- PUBH 8512
- RESI 8501

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8220 - Health Promotion and Education Interventions in Diverse Populations♦

(5 cr.)
Through this course, students explore the planning and organization of health promotion programs for underserved, economically disadvantaged, and underrepresented populations. Students learn to design health promotion programs that consider the social, economic, and medical conditions influencing the health status of diverse populations. Throughout the course, students develop a health promotion project for a specific population, based on the intervention mapping process. Through this project, students analyze and integrate principles of social change and empowerment, summarize research that supports the decision-making process, and critique institutional and social systems. Students also have the opportunity to assess and discuss the future of health promotion, considering projections of needs over the next two decades.

Prerequisites
- Foundational and core curricula

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8225 - Design and Analysis of Community Trials♦

(5 cr.)
In this course, students investigate randomized, controlled trials of health promotion and education programs as well as disease-prevention interventions, using communities as the units of analysis. Students engage in an in-depth exploration of techniques for randomization, multicenter coordination, data management, team building, statistical analysis, models for community assessment, publication, and ethics. Through case studies, students assess the univariate, bivariate, and multivariate statistical techniques used in the studies to analyze data. Students also gain practical experience developing a grant proposal for a research project focused on contemporary public health education/promotion.

Prerequisites
- Foundational and core curricula

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8245 - Applied Research in Public Health**

(5 cr.)
Health professionals use research skills to develop programs and interventions that enhance the health of communities and demonstrate the efficacy of programs to community partners. In this course, students engage in practical application of research methods that inform health programs, policy, and practice. Specific topics covered include study designs, sampling, identification of variables, methods of data collection and analysis, key concepts in measurement (including reliability and validity), program evaluation, culturally appropriate community-based participatory research, funding sources, and research ethics. As a major assignment in this course, students develop a proposal for a community health intervention.

Prerequisites
- PUBH 8032
- PUBH 8033
- PUBH 8035

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8246 - Advanced Application of Practice-Based Research in Public Health**

(5 cr.)
The goal of this course is to provide participants with an understanding of theories, principles, strategies, and alternative methods of applied research (quantitative, qualitative, and/or mixed-method designs) in public health focusing on culturally sensitive, appropriate literacy level and appropriate community engagement through participatory action research and collaborative inquiry of community-based participatory research, an appreciation of advantages and limitations of this approach, and skills necessary for participating effectively in CBPR projects.

Prerequisites
- RSCH 8101
- RSCH 8201

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8248 - Advanced Research Methods in Public Health Practice**
The goal of this course is to provide an understanding of public health approaches to complex problems at multiple levels (individual, group, organization, community, and population), including advanced quantitative, qualitative, and mixed-methods research methods. Students undertake a scholar-practitioner project to plan a Community Health Assessment, and they cover the stages of this project, including ethical and cultural considerations, community participation, data collection and analysis, and using data to plan and develop programs, in this course.

**Prerequisites**
- PUBH 8211
- PUBH 8546
- PUBH 8514

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8315 - Economics and Financing of Public Health Systems**

(5 cr.)
In this course, students investigate the provision of resources for the delivery of public health services and the application of economic theories to health policy issues. Students explore how organizational characteristics interact with economic forces to produce systems performance outcomes, as well as how fiscal policy can influence the performance of public health systems. Students analyze grant-writing strategies and the advantages and disadvantages of various financing options. Other topics include methods of economic evaluation and their usefulness in determining appropriate financing mechanisms for public health systems.

**Prerequisites**
- RESI 8401

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8317 - Financing Public Health Systems**

(5 cr.)
In this course, students will discover the importance in inter-organizational collaboration in the identification and resolution of public health concerns within communities. To this end, students will demonstrate the ability to integrate knowledge, approaches, methods, values and potential contributions from multiple professions and systems in addressing public health problems. Going a step further, the students will propose an inter-professional team approach to improving public health. The importance of ensuring strategic alignment with public health programs and services will be covered. Students
will become familiar with sources of grant funding, common grant jargon and acronyms, types of grants, and best practices and red flags in grant writing. Students will apply a systematic approach to grant writing, which will culminate in the drafting of a public health Mock Grant Proposal. The proposal will address human, fiscal, and other resource needs to achieve strategic goals while creating new resources and revenue streams for the grantee.

Prerequisites
- PUBH 8004 or PUBH 8003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8410 - Fundamentals of Leadership, System Evaluation, and Interventions in Public Health

(5 cr.)
In this course, students learn how to describe a system and identify its core components, how to assess system effectiveness and efficiency, how to identify system deficiencies and gaps, and how to design system-level interventions to address a public health issue and create organizational change strategies. The role of multicultural leadership and systems thinking in addressing public health problems is explored in detail. Students assess their own strengths and weaknesses in leadership capacities, including cultural proficiency and discuss shared decision-making through negotiation and consensus-building methods.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8450 - Community Health Assessment

(5 cr.)
Students in this course cover community health assessment and its application to program planning. They learn to identify and prioritize problems, then assess and utilize community resources to address these problems. Topics include measuring selected determinants of community health status and health services use, classifying community assets, identifying data sources, and applying certain methods to maximize community participation. Students synthesize the results of a community health assessment to create a community diagnosis that serves as the basis for program planning and research design.

Prerequisites
- RSCH 8101
- RSCH 8201
- RSCH 8301
- RESI 8401
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8475 - Advanced Program Implementation and Evaluation♦

(5 cr.)
Competency in program design, implementation, and evaluation is promoted in this course. Students have an overview of public health program planning and development, as well as needs and assets assessment. They focus on the methods required to implement programs and evaluate their efficacy. Students discuss the administration and coordination of public health program interventions and activities, and they explore the variety of methods used to facilitate public health research.
Prerequisites
- PUBH 8440
- RESI 8402

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8500 - Advanced Biostatistics♦

(5 cr.)
Students in this course cover the advanced biostatistics methods needed to prepare for conducting future research, as well as for critically reviewing the statistical methods incorporated in public health literature. Students learn to use statistical methodologies such as covariance and repeated measures, longitudinal data analysis, life tables and survival analysis, multiple regression, logistic regression, Poisson regression, and the Cox proportional hazards regression model. In this course, students use SPSS statistical software for advanced data management, manipulation, analysis, and the use of graphical techniques.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 8510 - Doctoral Seminar I♦

(1 cr.)
This seminar introduces students to the doctoral study and its components, providing information about the doctoral study process and expectations at Walden. Resources available for completion of the doctoral study and appropriate scholarly topics will be discussed. Students will also examine success strategies including time management.
Prerequisites
- PUBH 8004
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8512 - Doctoral Seminar II**

(1 cr.)
This seminar continues the discussion on appropriate topics for the doctoral study from the previous seminar, and introduces the basic elements of a research study, including the literature review, problem statement, purpose of the study, research question(s), methodology, alignment, and ethical considerations. Using this information, students will begin drafting their DrPH Prospectus Form. This course is taken with Research, Theory, Design and Methods (RSCH8110) so that students may apply learning to their own research design ideas as they develop.

Prerequisites
- PUBH 8004
- PUBH 8510

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8514 - Doctoral Seminar III**

(1 cr.)
This seminar will focus on presenting research ideas, receiving and responding to academic feedback, and working collaboratively in an academic research setting. This course is taken after successful completion of Research Methods for Public Health (PUBH 8211) so that students may apply learning when further refining research methods design for the Doctor of Public Health (DrPH) doctoral study. Students will submit a draft DrPH Prospectus Form during this seminar.

Prerequisites
- PUBH 8512
- PUBH 8211

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8516 - Doctoral Seminar IV**

(1 cr.)
In Course 4, students will review how to use the library, develop doctoral-level writing strategies, and write a literature review. Students also examine how social problems drive scientific inquiry. Finally, students will analyze conceptual and theoretical
frameworks as they apply to the Capstone Phase of their research.

**Prerequisites**
- PUB 8004
- PUBH 8514

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8518 - Doctoral Seminar V**

(1 cr.)
Course 5 culminates the student's journey towards developing a prospectus. This course focuses on completing the Prospectus Form. Students deliver an asynchronous oral presentation of their Prospectus and get feedback from peers and the instructor. They also develop an academic CV and plan for communicating with a mentor/chair.

**Prerequisites**
- PUBH 8004
- PUBH 8516

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8520 - Advanced Epidemiology Methods**

(5 cr.)
The principles of epidemiologic design, analysis, and interpretation at an advanced level are integrated in this course. Students discuss data sources, assessment of dependent and independent variables, measurement error, confounding, and bias. They explore methodological issues in epidemiology, including factors critical to public health research, such as missing data, intermediate variables, confounding, complex study designs, meta-analysis, and questionnaire design. The concepts and applications in survival analysis, analysis of incidence rates, life tables, and parametric and nonparametric approaches are covered in this course.

**Prerequisites**
- PUBH 8500

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**PUBH 8540 - Epidemiology Topics Seminar**

(5 cr.)
In this seminar, students are exposed to current research and special topics of interest
in epidemiology. They choose from a wide range of discussion topics, including infectious disease, non-endemic communicable disease, chronic disease, global health, maternal and child health, social and behavioral concerns, environmental issues, genetic factors, and other emerging topics of interest. Students perform a critical review of the research literature, providing them further insight into topics of epidemiology.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

PUBH 8545 - Advanced Analysis of Community Health Data and Surveillance in Public Health

(5 cr.)
In this course, students cover the application of secondary data analysis, and the use of health informatics and biosurveillance for program planning. Topics include measuring identifying data sources, analysis of data on selected determinants of community health status and health services use, sampling, and power calculations. Students can develop an understanding of statistical methodology to utilize secondary data and review the use of Geographic Information Systems data in public health.

Prerequisites
- RSCH 8101
- RSCH 8201

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

PUBH 8546 - Advanced Analysis of Community Health Data and Surveillance in Public Health

(5 cr.)
In this course, students cover the application of secondary data analysis, and the use of health informatics and biosurveillance for program planning. Topics include measuring and identifying data sources, analysis of data on selected determinants of community health status and health services use, complex sampling, and power calculations. As students address health issues in their research, they will learn to analyze, interpret, and explain quantitative surveillance data by combining individual and group level variables to analyze multilevel regression modeling. Students will develop an understanding of statistical methodology to utilize secondary data and review the use of Geographic Information Systems data in public health.

PUBH 8551 - Preparing for Dissertation

(5 cr.)
The focus of this course is on the preparation for the dissertation phase of training. In this course, students identify a dissertation topic and potential dissertation committee
members; begin to conduct a literature review; develop a problem statement and research questions; and evaluate research designs, methods, and types of analyses to use for their dissertation. Students also complete their initial premise in this course and an annotated outline of their prospectus.

Prerequisites
- RESI 8402

**PUBH 8560 - Advanced Analysis of Secondary Data**

(5 cr.)
Through this course, students develop an advanced understanding of statistical and epidemiological methodology and the use of biomedical and secondary data sources. Students explore how to design research to make appropriate use of available secondary data sources. The strengths and limitations of using secondary data are also addressed in this course.

Prerequisites
- PUBH 8500
- PUBH 8520

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**PUBH 8900 - Research Forum**

(0 cr.)
The purpose of this forum is to assist students in making steady progress toward earning a doctoral degree. Doctoral students are offered the opportunity to synthesize knowledge of their program of study and complete an in-depth exploration of a practice, issue, or problem within their discipline. Students will engage in regular scholarly discussions with a faculty chair and fellow doctoral students and submit Quarterly Plans and products toward completion of the doctoral degree. Information and resources related to the doctoral study, residencies, research, writing, and doctoral program expectations are provided for guidance.

**PUBH 8990 - DrPH Applied Practice Experience**

(2 cr.)
Students in the applied practice experience are provided with the opportunity to apply and integrate the knowledge and skills acquired throughout their program of study and to further develop key professional and leadership competencies. Students engage in a field experience in an approved public health setting, which they align to their professional goals. Throughout the course, students explore pertinent workplace topics including safety, sexual harassment, emotional intelligence, cultural humility, leadership
traits, and social change. Supervision by an on-site preceptor is a critical component of the applied practice experience. The on-site supervisor and the course instructor monitor and evaluate students' performances throughout the applied practice experience. Students also participate in the accompanying online course and develop an ePortfolio based on five agreed-upon competencies. One of the five competencies must be related to leadership, management, and governance. Students are required to complete at least one project that is meaningful for the organization and advances public health practice. Students are required to complete a minimum of 80 hours of applied practice work.

Prerequisites

- PUBH 8132
- PUBH 8514
- PUBH 8546
- PUBH 8317
- PUBH 8048
- PUBH 8044
- PUBH 8040
- PUBH 8051

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 9000 - Public Health Dissertation

(6 cr. per term for minimum of five terms until completion)

Doctoral students are offered the opportunity to integrate their program of study into an in-depth exploration within an interest area through the completion of a research study in this course. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members. They must also participate in an accompanying online course and complete a prospectus, proposal, Institutional Review Board application, and final dissertation paper and presentation. Once students register for PUBH 9000, they are registered each term until successful completion of the dissertation. Students take this course for a minimum of five terms and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Prerequisites
• Foundational and core curricula
• Appointment of an approved dissertation committee chair

PUBH 9001 - Dissertation

(5 cr. per term for a minimum of 4 quarters until completion)  
Through this course, doctoral students have the opportunity to integrate their program of study into an in-depth exploration of an interest area that includes the completion of a research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation. Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Prerequisites

• RESI 8403

PUBH 9010 - Prospectus Development Forum ♦

(1 cr.)
The final doctoral capstone/project demonstrates students' scholarly ability to examine, critique, and synthesize knowledge and experience, so that new ideas can be tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. Doctoral students can integrate their program of study into an in-depth exploration of an interest area, culminating in the completion of their capstone/project in this course. Students complete the capstone/project independently, with the guidance of a Supervisory Committee Chair and committee members. Students complete a Prospectus, Proposal, Research Ethics Review (IRB), and a final written capstone/project and oral presentation. The order and format of the various steps vary based on the professional doctoral program and capstone/project type. This course is designed to be a DrPH Integrative Learning Experience. The doctoral study component of this course is considered an integrative learning experience. DrPH candidates are required to generate field-based products consistent with advanced practice designed to influence programs, policies, or systems addressing
public health. The products must demonstrate synthesis of foundational and concentration-specific competencies. Students are required to produce a high-quality written product. The integrative learning experience is completed at or near the end of the program of study.

Prerequisites
- PUBH 8514
- PUBH 8211

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

PUBH 9100 - Public Health Capstone

(5 cr. per term for a minimum of 3 quarters until completion)

The purpose of this forum is to assist students in making steady progress toward earning a doctoral degree. Doctoral students are offered the opportunity to synthesize knowledge of their program of study and complete an in-depth exploration of a practice, issue, or problem within their discipline. Students will engage in regular scholarly discussions with a faculty chair and fellow doctoral students and submit Quarterly Plans and products toward completion of the doctoral degree. Information and resources related to the doctoral study, residencies, research, writing, and doctoral program expectations are provided for guidance.

Students take this course for a minimum of three quarters and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred. Learn more about the doctoral study process in the Doctoral Study Guidebook.

Prerequisites
- All other courses in the Doctor of Public Health program

READ 6583 - Technology and Literacy in the Content Areas, Grades 6-12

(3 sem. cr.)
In this course, educators integrate technology into research-based instructional models and strategies to develop higher levels of literacy and facilitate more effective content area learning. Educators develop and assess activities designed to expand the learning community across boundaries through the application of information literacy skills, such
as Internet searching and critically evaluating online resources. They also collaborate with other educators to develop an Internet workshop to engage students in using information literacy skills. Educators have the opportunity to reflect on theories, concepts, and strategies presented in the course to determine how they can most effectively use this knowledge to benefit their students and further their professional development.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6584 - Supporting Struggling Readers, Grades 6–12♦

(3 sem. cr.)
Educators learn and use strategies to help improve middle level and secondary students’ reading, writing, test-taking, and study skills as a way to increase their learning and achievement in the content areas.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6601 - Adolescent Literacy and Learning Today

(3 sem. cr.)
Adolescents today construct their identity by creating and engaging with multiple texts and media for a variety of purposes. Education professionals in this course explore how literacy inside and outside of school can be used to support adolescent learning and prepare students in grades 6–12 for college and career. By considering the research behind literacy policies and practices, education professionals evaluate the role of literacy in content-area classrooms including assessment opportunities and disciplinary approaches. Through coursework, education professionals have an opportunity to examine what it means to be literate and why literacy is important in all disciplines, including English language arts, mathematics, science, and literature.

READ 6602 - Reading to Learn in the Content Areas, Grades 6–12♦

(3 sem. cr.)
To learn and achieve in the content areas, students must comprehend and engage with grade-appropriate and disciplinary-specific texts. In this course, education professionals examine how text changes across disciplines (including social studies, literature study, mathematics, sciences, and other technical subjects) and explore instructional practices to support close reading of complex text as required by the Common Core State Standards and other state standards. Education professionals apply evidence-based instructional and assessment practices to support all students’ achievement in literacy and learning. Through coursework, education professionals have opportunities to apply concepts and strategies within specific disciplines to provide a relevant learning
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6603 - Writing to Learn in the Content Areas Grades 6–12

(3 sem. cr.)
Writing is a multifaceted process and a powerful tool to support student learning. Through writing, adolescents may demonstrate learning, analyze ideas, or develop arguments based on information from a text. Education professionals in this course explore the importance of writing for college and career readiness and examine the nuances of written communication relative to specific disciplines, including mathematics, physical education, literature, and other disciplines. Through coursework, education professionals have opportunities to engage in discourse modes, including informational, literary, and persuasive writing, and to use short writing (such as journals) and longer composition processes to enhance disciplinary learning. Education professionals consider the types and purposes of writing, explore writing in digital environments, analyze the relationships between reading and writing, and apply instructional practices to support writing to learn in the content areas for all students.

READ 6604 - Supporting Struggling Adolescent Readers

(3 sem. cr.)
Adolescents today must engage with increasingly complex texts in the content areas. Education professionals need the knowledge, skills, and dispositions to help all students meet these literacy demands, especially those who struggle with reading and literacy tasks. In this course, education professionals learn formal and informal ways to assess students' literacy development and learning achievement and use that assessment data to inform instruction. Through coursework, education professionals have opportunities to examine progress monitoring practices and Response to Intervention (RTI) implementation. Education professionals explore the role of motivation in literacy and learning and consider the importance of academic language for learning, college, and career.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6605 - Adolescent Learners and the Digital Literacy Environment

(3 sem. cr.)
Just as adolescents must adapt to ever-changing digital literacy environments, so, too, must their teachers. In this course, education professionals explore digital tools and texts to support literacy teaching and learning in a digital environment. Through inquiry and research online, education professionals analyze digital environments, evaluate the
role of information literacy, and design appropriate and engaging instructional activities using digital and other texts for learning. Course discussions focus on current trends and issues that inform literacy and learning today including attention to visual and social media, and technology as a mediating influence between and within cultures, families, and communities.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6609 - Literacy in Academically Diverse Classrooms (Accelerating)

(3 sem. cr.)
Today’s classrooms require teachers to become competent and confident in supporting both students who struggle with reading and writing and those who excel. Education professionals in this course focus on accelerating the literacy development of students with reading difficulties, including students who have specific learning disabilities, and on addressing the needs of gifted students. Through coursework, education professionals have opportunities to examine informal and formal assessments, the use of data to inform instruction, and practical guidelines for implementing the Response to Intervention (RTI) model. Education professionals explore concepts and strategies, including collaboration with support resources, methods to differentiate and scaffold instruction, progress monitoring, leveling books, intervention strategies, and the use of motivating texts and technology tools to support student learning.

READ 6705 - Reading and Literacy Today♦

(3 sem. cr.)
To support the reading and literacy development of all students, education professionals need to understand the factors that may influence literacy learning including language development, educational research and policies, and instructional practices to promote the development of phonemic awareness, phonics, fluency, vocabulary, and comprehension. In this course, education professionals explore theoretical and historical perspectives on literacy education and consider the influence of cognitive, linguistic, sociocultural, and psychological development on the literacy learning of PreK-6 students. Education professionals have the opportunity to examine current educational policies and initiatives including the Common Core State Standards (CCSS) and other state standards. Education professionals consider the role of research in informing literacy instruction and apply effective instructional practices including practical approaches for implementing the Response to Intervention (RTI) model and incorporating new literacies and technology tools to support literacy instruction.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6706 - Literacy Development P–3♦
Building a strong foundation of literacy skills and experiences in young children is critical to their success in school and life. In this course, educators take a developmental approach to reading and literacy instruction and are provided practical research-based approaches to help P-3 students achieve the literacy goals of the Common Core State Standards (CCSS) and other state standards. The characteristics of emergent and beginning readers are explored, focusing on phonological awareness, phonics, fluency, vocabulary, and comprehension. Education professionals evaluate the role of motivation in learning to read and analyze the use of progress monitoring and Response to Intervention (RTI) to support all learners. Through their coursework, educators are provided with opportunities to explore writing, close reading, print concepts, and multiple text genres. Education professionals plan and implement developmentally appropriate assessment and instruction, including technology tools, to support the literacy development of all learners in preschool through third grade.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6707 - Reading and Literacy Growth Grades 4–6♦

The intermediate grades present unique challenges to literacy learning including complexity of text, students’ use of technology, student motivation to learn, and explicit and implicit gender issues exhibited in the classroom. Education professionals are provided with opportunities to evaluate research-based instructional and assessment practices to help students in grades 4–6 to actively engage in literacy learning and achieve the literacy goals of the Common Core State Standards (CCSS) and other state standards. Education professionals examine the role of literacy in content area learning, explore ways to teach close reading of complex texts, and consider how to incorporate different levels, types, and genres of text to support all students’ learning and literacy development. The focus of the coursework is on effective strategies to support writing about text, content-area specialization vocabulary, listening and speaking, and the effective use of technology tools to support content area reading.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6708 - Literacy in Culturally and Linguistically Diverse Classrooms♦

Today’s classrooms reflect the rich cultural and linguistic diversity of the world outside of school. Educators explore how to establish a responsive classroom where literacy development flourishes for all students, including second language learners and speakers of nonstandard dialects. Education professionals analyze the reading and literacy challenges experienced by culturally and linguistically diverse learners including text
complexity, academic vocabulary, and appropriateness of texts and materials. The focus of the coursework is on ways to scaffold and support all literacy learners, including English Language Learners.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6709 - Literacy in Academically Diverse Classrooms♦

(3 sem. cr.)
Today's classrooms require competent and confident teachers to support both students who struggle with reading and those who excel. Education professionals in this course focus on accelerating the literacy development of students with reading difficulties, including students who have specific learning disabilities, and addressing the needs of high-achieving students. Through coursework, education professionals have opportunities to examine informal and formal assessments, the use of data to inform instruction, and practical guidelines for implementing the Response to Intervention (RTI) model. Education professionals explore concepts and strategies, including collaboration with support resources, methods to differentiate and scaffold instruction, progress monitoring, leveling books, intervention strategies, and the use of motivating texts and technology tools to support student learning.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

READ 6718 - Literacy in Culturally and Linguistically Diverse Classrooms (Accelerating)♦

(3 sem. cr.)
Today's classrooms reflect the rich cultural and linguistic diversity of the world outside of school. Educators explore how to establish a responsive classroom where literacy development flourishes for all students, including second language learners and speakers of nonstandard dialects. Education professionals analyze the reading and literacy challenges experienced by culturally and linguistically diverse learners including text complexity, academic vocabulary, and appropriateness of texts and materials. The focus of the coursework is on ways to scaffold and support all literacy learners, including English Language Learners.

RELG 2001 - World Religions♦

(5 cr.)
In this course, students engage in an exploration of the tenets and sacred texts of the religions of the world. They explore Hinduism, Buddhism, Islam, Confucianism, Christianity, Judaism, and Primal religions (e.g., American Indian, African). Students demonstrate their understanding of course concepts and principles through a final comparative essay in which they make connections among religions and analyze how followers use religion to make sense of the world around them. Through this project and other weekly, applied assignments, students gain the knowledge needed to identify the origins, history, beliefs, and practices of the major world religions.

Prerequisites
• ENGL 1001 or ENGL 1010

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

RELG 2001C - World Religions♦

(5 cr.)
In this course, students engage in an exploration of the tenets and sacred texts of the religions of the world. RESI 6651 - Master of Social Work Residency I

(0 cr.)
Students attending this residency have the opportunity to engage in supervised clinical practice in preparation for the foundation field experience. This clinical residency is designed to provide students with the opportunity to practice the essential skills required of social workers. Throughout this residency, students can demonstrate their skills in ethical practice, case conceptualization, and oral communication. In addition to familiarizing students with the Master of Social Work (MSW) program and the profession itself, faculty members will work with students throughout the residency and identify specific clinical development needs for each student to address prior to their first field experience.

Prerequisites
- SOCW 6000
- SOCW 6101

RESI 6652 - Master of Social Work Residency II

(0 cr.)
This residency is designed to complement the advanced curriculum. In this residency, students continue to develop their clinical skills and are required to demonstrate competency in ethical practice, case conceptualization, and evidence-based practice. Students also have the opportunity to strengthen their supervision and consultation skills through applied practice. Successful completion of this residency indicates that the student has demonstrated proficiency in the prescribed areas and is ready to interact with the public as a clinical social worker in training.

RESI 8201 - EdD Required Residency

(0 cr.)
The purpose of the EdD Residency is to socialize new students into the Walden doctoral community of scholar practitioners. Topics include doctoral competency development, orientation to academic support services and networking, community building, writing at the doctoral level and using American Psychological Association (APA) style, library search skill building, and an introduction to alignment and design of scholarly research. Each session meets measurable outcomes that describe what students should be able to do by the end of the session that demonstrates their mastery of the topic. Upon completion, students produce the initial draft of the EdD Doctoral Committee Assignment Form (DCAF) and identify goals for continual development of the skills and practices required of new doctoral students.

RESI 8202 - EdD Advanced Residency
The purpose of the EdD Advanced residency is to develop skills in reviewing and performing scholarly research. Topics include refinement of research questions, research question and methodology alignment, and literature critique and synthesis. Upon completion, students will have developed key components of a research plan. Each session meets measurable outcomes that describe what students should be able to do by the end of the session that demonstrates their mastery of the topic.

RESI 8214 - DSW Residency

In this residency, students continue to develop their clinical skills and are required to demonstrate competency in ethical practice, action research skills, and evidence-based practice. Students also have the opportunity to practice their own supervision and consultation skills through the supervision of MSW students. Successful completion of this residency indicates that the student has demonstrated proficiency in the prescribed areas and is ready to begin work on the action research capstone project.

RESI 8301 - DBA Residency 1

The purpose of Residency 1 is to socialize new students into the Walden University doctoral community of scholar-practitioners and to meet with Walden University faculty, staff, and students. Doctoral students attend required seminar topics that include orientation to academic support services, writing at the doctoral level using American Psychological Association (APA) style, library search skill building, and professional development.

RESI 8302 - DBA Residency 2

The purpose of Residency 2 is to further socialize students into the Walden University doctoral community of scholar-practitioners. Doctoral students attend required seminars that include doctoral study development, academic support services, research and critical thinking skills, advanced APA Style, and professional development. Doctoral students will attend other seminars that include advising, research methodologies, doctoral study proposal writing resources, and writing skills sessions.

RESI 8401 - PhD Residency 1

The purpose of Residency 1 is to socialize new students into the Walden doctoral community of scholar-practitioners. Topics include doctoral competency development, orientation to academic support services and networking, community building, writing at the doctoral level and using American Psychological Association (APA) style, library
search skill building, and professional development. Upon completion, students will have completed a self-assessment and identified goals for continual development of the skills and practices required of new doctoral students.

**RESI 8401I - PhD Residency 1 IPSY 4 Day**

(0 cr.)
The purpose of Residency 1 is to socialize new students into the Walden doctoral community of scholar-practitioners. Topics include doctoral competency development, orientation to academic support services and networking, community building, writing at the doctoral level and using American Psychological Association (APA) style, library search skill building, and professional development. Upon completion, students will have completed a self-assessment and identified goals for continual development of the skills and practices required of new doctoral students.

**RESI 8402 - PhD Residency 2**

(0 cr.)
The purpose of Residency 2 is to develop skills in reviewing and performing scholarly research. Topics include refinement of research questions, research question and methodology alignment, and literature critique and synthesis. Upon completion, students will have developed key components of a research plan.

**RESI 8402I - PhD Residency 2 IPSY 4 Day**

(0 cr.)
The purpose of Residency 2 is to develop skills in reviewing and performing scholarly research. Topics include refinement of research questions, research question and methodology alignment, and literature critique and synthesis. Upon completion, students will have developed key components of a research plan.

**RESI 8403 - PhD Residency 3**

(0 cr.)
The purpose of Residency 3 is to continue developing research skills that will lead to the development of the prospectus or dissertation proposal. Topics include qualitative, quantitative, and mixed research designs; data collection, management, and analysis considerations; and development of the prospectus. Upon completion, students will have completed a research alignment tool to inform and guide their dissertation research planning.

**RESI 8404 - PhD Residency 4**

(0 cr.)
The purpose of Residency 4 is to build students' capacity in representing themselves as
scholar-practitioners. Curriculum tracks are available for student self-selection. Tracks include proposal writing; methods and data collection: qualitative; methods and data collection: quantitative; publishing and presenting; and an all-encompassing track. Upon completion, students will have the requisite skills to continue their doctoral research.

RESI 8501 - DrPH Residency 1

(0 cr.)
The purpose of Residency 1 is to orient students to the program, socialize with faculty and doctoral students to become part of the Walden doctoral community of scholar-practitioners, provide a program overview and discussions relating to requirements and expectations, and develop an understanding of the doctoral study requirements for DrPH students. Students will have the opportunity to meet with peers, faculty members, and academic advisors and other staff advisors. Topics include skills and resources for success, critical thinking for doctoral scholarship, library search strategies, tools for organizing and analyzing literature, scholarly writing, and APA Style. Students begin to develop initial ideas for their doctoral study and learn how to move from social programs to research problems and then to research questions. For the required final assignment, students reflect on each session to identify key points learned, specific resources needed for their study, and next steps needed.

RESI 8502 - DrPH Residency 2

(0 cr.)
The purpose of Residency 2 is to continue to build research knowledge that will support the successful development of students’ doctoral study prospectus, proposal, and final study. Topics include the Walden doctoral study process, research design and methods, alignment of research components, feasibility, and the literature review. For the required final assignment, students write a reflection journal for each session, including application to their doctoral study process, resources they will need, and next steps they need to move forward with research and doctoral study development. In this residency, students build their capacity to complete the doctoral study proposal and the sections that make up the completed doctoral study.

RESI 8551 - DPA Residency 1

(0 cr.)
The purpose of Residency 1 is to participate in a problem-solving charrette exercise that will build problem-solving skills and research knowledge. It will support the successful development of students’ Professional Administrative Study prospectus and proposal. Topics include participation in a problem-solving charrette project, an overview of the PAS, and the feasibility of students’ research ideas. For the required final assignment, students write a reflection paper about the charrette process and initial PAS ideas. They also reflect on the doctoral study process, resources they will need, and next steps they
need to move forward with PAS development. In this residency, students build their capacity to complete the PAS prospectus and proposal.

RESI 8552 - DPA Residency 2

(o cr.)
The focus of this residency is to support engaging in the Professional Administrative Study to include exploration of topics that include tips on working with client organizations, developing technical writing skill, protection of human subjects participants in applied research, assessing study feasibility, and research design and methods. In this residency students build their capacity to engage in the development of the Professional Administrative Study and move forward with the next steps in the applied capstone process.

RESI 8601 - DHA Residency 1

(o cr.)
The purpose of Residency 1 is to orient students to the program, socialize with faculty and doctoral students to become part of the Walden doctoral community of scholar-practitioners, provide a program overview and discussions relating to requirements and expectations, and develop an understanding of the doctoral study requirements for DHA students. Students have the opportunity to meet with peers, faculty members, and academic advisors and other staff advisors. Topics include skills and resources for success, critical thinking for doctoral scholarship, library search strategies, tools for organizing and analyzing literature, scholarly writing, and APA Style. Students begin to develop initial ideas for their doctoral study and learn how to move from social programs to research problems and then to research questions. For the required final assignment, students reflect on each session to identify key points learned, specific resources needed for their study, and next steps needed.

RESI 8602 - DHA Residency 2

(o cr.)
The purpose of Residency 2 is to continue to build research knowledge that will support the successful development of the doctoral study prospectus, proposal, and final study. Topics include the Walden doctoral study process, research design and methods, alignment of research components, feasibility, and the literature review. For the required final assignment, students write a reflection journal for each session, including application to their doctoral study process, resources they will need, and next steps they need to move forward with research and doctoral study development. In this residency, students build their capacity to complete the doctoral study proposal and the sections that make up the completed doctoral study.

Prerequisites

- RESI 8601
RESI 8701 - DIT Residency 1

(0 cr.)
The purpose of Residency 1 is to socialize new students into the Walden University doctoral community of scholar-practitioners and meet with Walden University faculty, staff, and students. Doctoral students attend required seminar topics which include orientation to academic support services, writing at the doctoral level using American Psychological Association (APA) style, library search skill building, and professional development. Doctoral students attend elective seminars which include advising, research methodologies, and library research techniques. Upon completion, students will have completed a self-assessment and identified goals for continual development of the skills and practices required of new doctoral students.

RESI 8702 - DIT Residency 2

(0 cr.)
The purpose of Residency 2 is to further socialize students into the Walden University doctoral community of scholar-practitioners. Doctoral students attend required seminars which include doctoral study development, academic support services, research and critical thinking skills, advanced APA Style, and professional development. Doctoral students attend elective seminars which include advising, research methodologies, doctoral study proposal writing resources, and writing skills sessions. Upon completion, students will have completed a self-assessment and identified goals for continual development of the skills and practices required of new doctoral students.

RESI 8801C - CES Residency

(0 cr.)
Residency 1 socializes new students into the Walden doctoral community of scholar-practitioners. Topics include doctoral competency development, orientation to academic support services and networking, community building, writing at the doctoral level, using APA Style, library search skill building, and professional development. At the close of the residency, students will complete a self-assessment and identify goals for continued development of their skills and practices.

RSCH 6100 - Research Theory, Design, and Methods

(4 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative,
qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**RSCH 6100L - Research Theory, Design, and Methods**

(4 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**RSCH 6100Y - Research Theory, Design, and Methods**

(4 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**RSCH 6110 - Research Theory, Design, and Methods**

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**RSCH 6110A - Research Theory, Design, and Methods**

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative,
qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

RSCH 6110I - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

RSCH 6110L - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

RSCH 6110Y - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

RSCH 6200 - Quantitative Reasoning and Analysis

(4 cr.)
Students in this research course acquire core knowledge and skills for designing
quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

RSCH 6200Y - Quantitative Reasoning and Analysis

(4 cr.)
Students in this research course receive core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics and interpret and present results. Students apply and synthesize their knowledge and skills by developing a quantitative research plan.

RSCH 6210 - Quantitative Reasoning and Analysis

(5 cr.)
Students in this research course build core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. In this course, students approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 6110

RSCH 6260 - Advanced Quantitative Reasoning and Analysis

(5 cr.)
Students in this research course build upon knowledge and skills acquired in the prerequisite quantitative reasoning course and are presented with opportunities to
apply them. They are provided with more specialized knowledge and skills for conducting quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts, such as factorial ANOVA, mediation, moderation, logistic regression, ANCOVA, and MANOVA. Students explore existing datasets and apply suitable statistical tests to answer research questions with social change implications. In this course, they approach statistics from a problem-solving perspective with emphasis on selecting the appropriate statistical tests for more complex research questions and social problems. Students use statistical software to perform analyses and interpret and present results. They will apply and synthesize their knowledge and skills by carrying out a quantitative research project.

Prerequisites

- RSCH 6110V or RSCH 6110Y or RSCH 6110
- RSCH 6210V or RSCH 6210Y or RSCH 6210

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist 1-866-492-5336 (U.S.); 1-443-627-7222 (toll) for more information.

**RSCH 6300Y - Qualitative Reasoning and Analysis**

(4 cr.)

Students in this research course are provided with core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. Students use software to code data and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

**RSCH 7100 - Research Theory, Design, and Methods**

(5 cr.)

In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**RSCH 7100D - Research Theory, Design, and Methods**
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**RSCH 7110 - Research Theory, Design, and Methods**

(5 cr.)

Students in this research course are provided with the opportunity to develop core knowledge and skills for understanding, analyzing, and designing research at the doctoral level. Students explore the philosophy of science, the importance of theory in research, and research processes. The course also introduces students to the quantitative, qualitative, and mixed-method research designs and methods. Students devote special attention to understanding the ethical and social change implications of conducting research and engaging in scholarship. They apply their knowledge and skills by developing elements of simple research plans for quantitative, qualitative, and mixed-methods studies.

**RSCH 7200D - Quantitative Reasoning and Analysis**

(4 cr.)

Education professionals are provided with core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts in this course. They explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. Education professionals approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. They use statistical software to calculate statistics and interpret and present results. Education professionals will apply and synthesize their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 7100D

**RSCH 7250 - Advanced Quantitative Reasoning and Analysis**

(4 cr.)

In this research course, educators build on knowledge and skills acquired in RSCH 8200: Quantitative Reasoning and Analysis and are provided with experience applying them.
Educators are provided with more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. They explore comprehensive quantitative research designs and suitable statistical tests, the importance of quality assurance, and ethical considerations and social change implications of conducting quantitative research and producing knowledge. Educators approach statistics from a problem-solving perspective, with emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. They use statistical software to perform analyses and interpret and present results. Educators apply and synthesize their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 7200D

**RSCH 8100 - Research Theory, Design, and Methods**

(4 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed-methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**Prerequisites**
- A Foundation course or first course in a program
- RESI 8401

**RSCH 8100C - Research Theory, Design, and Methods**

(4 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**Prerequisites**
- Foundation course or first course in a program
RSCH 8100D - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

Prerequisites
- Foundation course or first course in a program

RSCH 8100H - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

Prerequisites
- A Foundation course or first course in a program
- RESI 8401

RSCH 8100I - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

RSCH 8100P - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore
the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

Prerequisites
- A Foundation course or first course in a program

RSCH 8100X - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

Prerequisites
- A Foundation course or first course in a program

RSCH 8100Y - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed-methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

Prerequisites
- A Foundation course or first course in a program

RSCH 8100Z - Research Theory, Design, and Methods

(5 cr.)
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed-methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore
ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**Prerequisites**

For KAM or Mixed-Model Specializations
- AMDS 8008 or SBSF 8005

For Course-Based Specializations
- MGMT 8010

**RSCH 8101M - Research Theory, Design, and Methods**

(5 cr.)

In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed-methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**Prerequisites**

For KAM or Mixed-Model Specializations
- AMDS 8008 or SBSF 8005

For Course-Based Specializations
- MGMT 8010 or MGMT 8045

**RSCH 8101Z - Research Theory, Design, and Methods**

(5 cr.)

In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed-methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**Prerequisites**

For KAM or Mixed-Model Specializations
- AMDS 8008 or SBSF 8005

For Course-Based Specializations
- MGMT 8010

**RSCH 8110 - Research Theory, Design, and Methods**
In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed-methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**Prerequisites**
- RSCH 8110 prerequisites by program

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**RSCH 8110O - Research Theory, Design, and Methods**

In this research course, students are provided with core knowledge and skills for understanding, analyzing, and designing research at the graduate level. Students explore the philosophy of science, the role of theory, and research processes. Quantitative, qualitative, and mixed methods research designs and data collection methods are introduced. The alignment of research components is emphasized. Students also explore ethical and social change implications of designing and conducting research. Students demonstrate their knowledge and skills by developing an annotated bibliography.

**Prerequisites**
- A Foundation course or first course in a program

**RSCH 8200 - Quantitative Reasoning and Analysis**

Students taking this research course are provided with the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 8100D
- RESI 8401
RSCH 8200C - Quantitative Reasoning and Analysis

(4 cr.)
Students in this research course have the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.
Prerequisites
• RSCH 8100C

RSCH 8200H - Quantitative Reasoning and Analysis

(4 cr.)
Students in this research course have the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.
Prerequisites
• RSCH 8100H
• RESI 8401 or RESI 8401A

RSCH 8200I - Quantitative Reasoning and Analysis

(4 cr.)
Students in this research course receive core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical
software to calculate statistics and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

**RSCH 8200P - Quantitative Reasoning and Analysis**

(4 cr.)
Students in this research course have the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 8100P

**RSCH 8200X - Quantitative Reasoning and Analysis**

(4 cr.)
Students in this research course have the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 8100X

**RSCH 8200Y - Quantitative Reasoning and Analysis**

(4 cr.)
Students in this research course have the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with emphasis
on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8100Y

RSCH 8200Z - Quantitative Reasoning and Analysis

(4 cr.)
Students in this research course have the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and the ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with an emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.

Prerequisites
For KAM or Mixed-Model Specializations
- SBSF 7100

For Course-Based Specializations
- MGMT 8440
- MGMT 8540
- MGMT 8640 or MGMT 8740
- MGMT 8990

RSCH 8201 - Quantitative Reasoning and Analysis

(4 cr.)
Students in this research course are provided with core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8100
RSCH 8201M - Quantitative Reasoning and Analysis

(4 cr.)

Students in this research course have the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and the ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8101M

RSCH 8201Z - Quantitative Reasoning and Analysis

(4 cr.)

Students in this research course have the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and the ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with an emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.

Prerequisites
- For KAM or Mixed-Model Specializations
  - SBSF 7100
- For Course-Based Specializations
  - MGMT 8440
  - MGMT 8540
  - MGMT 8640 or MGMT 8740
  - MGMT 8990

RSCH 8210 - Quantitative Reasoning and Analysis

(5 cr.)

In this research course, students are provided with the opportunity to develop core knowledge and skills for designing and carrying out quantitative research at the doctoral level, including the application of statistical concepts and techniques. Students explore
classical common statistical tests, the importance of the logic of inference, and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to derive statistics from quantitative data and interpret and present results.

**Prerequisites**
- RSCH 8210 prerequisites by program

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**RSCH 8210O - Quantitative Reasoning and Analysis**

(5 cr.)
Students taking this research course are provided with the opportunity to develop core knowledge and skills for designing quantitative research at the doctoral level, including understanding data analysis and applying statistical concepts. Students explore classical quantitative research designs and common statistical tests, the importance of quality assurance, and ethical and social change implications of conducting quantitative research and producing knowledge. They approach statistics from a problem-solving perspective with emphasis on selecting appropriate statistical tests for a research design. Students use statistical software to calculate statistics data and interpret and present results. Students apply their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 8100O

**RSCH 8250O - Advanced Quantitative Reasoning and Analysis**

(4 cr.)
Students in this research course build upon the knowledge and skills acquired in RSCH 8200 - Quantitative Reasoning and Analysis and experience applying them. Students gain more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests, the importance of quality assurance, and ethical considerations and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. Students use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 8200U or SBSF 7100
RSCH 8250C - Advanced Quantitative Reasoning and Analysis

(4 cr.)
Students taking this research course build upon knowledge and skills acquired in RSCH 8200C - Quantitative Reasoning and Analysis and receive experience applying them. Students gain more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests; the importance of quality assurance; and the ethical considerations and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with an emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. Students use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8200C

RSCH 8250D - Advanced Quantitative Reasoning and Analysis

(4 cr.)
Students build upon the knowledge and skills acquired in RSCH 8200 - Quantitative Reasoning and Analysis and have experience applying them in this course. They develop more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests, the importance of quality assurance, and ethical considerations and social change implications of conducting quantitative research and producing knowledge. In this course, students approach statistics from a problem-solving perspective with emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. They use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8200 or EDUC 8800 or EDUC 8900

RSCH 8250I - Advanced Quantitative Reasoning and Analysis

(4 cr.)
Students build upon the knowledge and skills acquired in RSCH 8200 - Quantitative
Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests; the importance of quality assurance; and ethical considerations and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. Students use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8200

**RSCH 8250P - Advanced Quantitative Reasoning and Analysis**

(4 cr.)
Students taking this research course build upon knowledge and skills acquired in RSCH 8200P - Quantitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests; the importance of quality assurance; and the ethical considerations and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with an emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. Students use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8200P

**RSCH 8250X - Advanced Quantitative Reasoning and Analysis**

(4 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8200X - Quantitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests; the importance of quality assurance; and ethical considerations and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. Students use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8200X
assurance; and the ethical considerations and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. Students use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8200X

**RSCH 8250Y - Advanced Quantitative Reasoning and Analysis**

(4 cr.)

Students in this research course build upon knowledge and skills acquired in RSCH 8200Y - Quantitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests; the importance of quality assurance; and the ethical considerations and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with an emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8200Y

**RSCH 8250Z - Advanced Quantitative Reasoning and Analysis**

(4 cr.)

Students in this research course build upon knowledge and skills acquired in RSCH 8200Z - Quantitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests, the importance of quality assurance, and the ethical considerations and social change implications of conducting quantitative research and producing knowledge. This course approaches statistics from a problem-solving perspective with an emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. Students
use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 8200Z or AMDS 8437
- RSCH 8300Z or AMDS 8427
- Residency 3

**RSCH 8251M - Advanced Quantitative Reasoning and Analysis**

**(4 cr.)**

Students in this research course build upon knowledge and skills acquired in RSCH 8200Z = Quantitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests, the importance of quality assurance, and the ethical considerations and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting the appropriate research design and statistical tests for more complex research questions or problems. Students use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 8201M
- RSCH 8301M
- RESI 8401
- RESI 8402 or RESI 8402D or RESI 8402E

**RSCH 8251Z - Advanced Quantitative Reasoning and Analysis**

**(4 cr.)**

Students in this research course build upon knowledge and skills acquired in RSCH 8200Z = Quantitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests, the importance of quality assurance, and the ethical considerations and social change implications of conducting quantitative research and producing knowledge. In this course, students approach statistics from a problem-solving perspective with emphasis on selecting the
appropriate research design and statistical tests for more complex research questions or problems. Students use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

**Prerequisites**
- RSCH 8200Z or AMDS 8437
- RSCH 8300Z or AMDS 8427
- Residency 3
- RESI 8401
- RESI 8402 or RESI 8402D or RESI 8402E

**RSCH 8260 - Advanced Quantitative Reasoning and Analysis**

(5 cr.)
Students in this research course build upon knowledge and skills acquired in the prerequisite quantitative reasoning course and are presented with opportunities to apply them. They are provided with more specialized knowledge and skills for conducting quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts, such as factorial ANOVA, mediation, moderation, logistic regression, ANCOVA, and MANOVA. Students explore existing datasets and apply suitable statistical tests to answer research questions with social change implications. In this course, they approach statistics from a problem-solving perspective with emphasis on selecting the appropriate statistical tests for more complex research questions and social problems. Students use statistical software to perform analyses and interpret and present results. They will apply and synthesize their knowledge and skills by carrying out a quantitative research project.

**Prerequisites**
- RSCH 8260 prerequisites by program

**RSCH 8261 - Advanced Quantitative Reasoning and Analysis**

(5 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8201 - Quantitative Reasoning and Analysis and are provided experience applying them. Through this course, students are provided with more specialized knowledge and skills for designing quantitative research at the doctoral level, including understanding multivariate data analysis and applying more advanced statistical concepts. Students explore comprehensive quantitative research designs and suitable statistical tests; the importance of quality assurance; and ethical considerations and social change implications of conducting quantitative research and producing knowledge. Students approach statistics from a problem-solving perspective with emphasis on selecting the
appropriate research design and statistical tests for more complex research questions or problems. They use statistical software to perform analyses and interpret and present results. Students will apply and synthesize their knowledge and skills by developing a quantitative research plan.

Prerequisites
- RSCH 8201
- RESI 8402

RSCH 8300 - Qualitative Reasoning and Analysis

(4 cr.)
Students in this research course are provided with the opportunity to develop basic knowledge and skills for conducting qualitative research at the doctoral level. Students explore the nature of qualitative inquiry, how theory and theoretical and conceptual frameworks uniquely apply to qualitative research, data collection procedures and analysis strategy, and how the role of the researcher is expressed in the ethical and rigorous conduct of qualitative research. Students practice collecting, organizing, analyzing, and presenting data, and they develop a detailed premise for conducting a qualitative study.

Prerequisites
- RSCH 8100U
- RESI 8401

RSCH 8300C - Qualitative Reasoning and Analysis

(4 cr.)
Students in this research course are provided with the opportunity to develop core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8100C

RSCH 8300D - Qualitative Reasoning and Analysis

(4 cr.)
Students in this research course are provided with the opportunity to develop core
knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8100D

RSCH 8300H - Qualitative Reasoning and Analysis

(4 cr.)
Students in this research course are provided with the opportunity to develop core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8100H
- RESI 8401

RSCH 8300I - Qualitative Reasoning and Analysis

(5 cr.)
Students in this research course are provided with the opportunity to develop core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8100P

RSCH 8300P - Qualitative Reasoning and Analysis
Students in this research course are provided with the opportunity to develop core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

**Prerequisites**
- RSCH 8100P

**RSCH 8300X - Qualitative Reasoning and Analysis**

Students in this research course are provided with the opportunity to develop core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

**Prerequisites**
- RSCH 8100X

**RSCH 8300Y - Qualitative Reasoning and Analysis**

Students in this research course are provided with the opportunity to develop core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

**Prerequisites**
- RSCH 8100Y

**RSCH 8300Z - Qualitative Reasoning and Analysis**
Students in this research course are provided with the opportunity to develop core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

Prerequisites
For KAM or Mixed-Model Specializations
- SBSF 7100
For Course-Based Specializations
- MGMT 8410
- MGMT 8420 or MGMT 8510
- MGMT 8520 or MGMT 8610
- MGMT 8620 or MGMT 8710
- MGMT 8720

RSCH 8301M - Qualitative Reasoning and Analysis

Students in this research course are provided with the opportunity to develop core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8101M

RSCH 8301Z - Qualitative Reasoning and Analysis

Students in this research course are provided with the opportunity to develop core knowledge and skills for designing qualitative research at the doctoral level, including understanding data analysis. Students explore the nature of qualitative inquiry; fieldwork strategies and the nature of observation; theoretical approaches to qualitative research; the importance of quality assurance; and the ethical, legal, and social change implications of conducting qualitative research and producing knowledge. They use software to code
data and interpret and present results. Students apply their knowledge and skills by developing a qualitative research plan.

Prerequisites
For KAM or Mixed-Model Specializations
- SBSF 7100
For Course-Based Specializations
- MGMT 8410
- MGMT 8420 or MGMT 8510
- MGMT 8520 or MGMT 8610
- MGMT 8620 or MGMT 8710
- MGMT 8720

RSCH 8310 - Qualitative Reasoning and Analysis

(5 cr.)
Students in this research course are provided with the opportunity to develop basic knowledge and skills for conducting qualitative research at the doctoral level. Students explore the nature of qualitative inquiry, how theory and theoretical and conceptual frameworks uniquely apply to qualitative research, data collection procedures and analysis strategy, and how the role of the researcher is expressed in the ethical and rigorous conduct of qualitative research. Students practice collecting, organizing, analyzing, and presenting data, and they develop a detailed research topic for conducting a qualitative study.

Prerequisites
- RSCH 8310 prerequisites by program

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

RSCH 8310O - Qualitative Reasoning and Analysis

(5 cr.)
Students in this research course are provided with the opportunity to develop basic knowledge and skills for conducting qualitative research at the doctoral level. Students explore the nature of qualitative inquiry, how theory and theoretical and conceptual frameworks uniquely apply to qualitative research, data collection procedures and analysis strategy, and how the role of the researcher is expressed in the ethical and rigorous conduct of qualitative research. Students practice collecting, organizing, analyzing, and presenting data, and they develop a detailed premise for conducting a qualitative study.

Prerequisites
- RSCH 8100O
RSCH 8350 - Advanced Qualitative Reasoning and Analysis

(4 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8300 - Qualitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8300

RSCH 8350C - Advanced Qualitative Reasoning and Analysis

(4 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8300C - Qualitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8300C

RSCH 8350D - Advanced Qualitative Reasoning and Analysis

(4 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8300Z - Qualitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge.
qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8200D or SBSF 7100

**RSCH 8350I - Advanced Qualitative Reasoning and Analysis**

(4 cr.)
Students in this research course build upon their established qualitative research proficiencies and gain practical experience in application. Students are also provided with the opportunity to develop specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. They apply their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8300P

**RSCH 8350P - Advanced Qualitative Reasoning and Analysis**

(4 cr.)
Students in this research course builds upon knowledge and skills acquired in RSCH 8300P - Qualitative Reasoning and Analysis and gain experience applying them. Students gain more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8300P

**RSCH 8350X - Advanced Qualitative Reasoning and Analysis**

(4 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8300X - Qualitative Reasoning and Analysis and gain experience applying them. Students gain more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more
complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8200X or SBSF 7100

RSCH 8350Y - Advanced Qualitative Reasoning and Analysis

(4 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8300Y - Qualitative Reasoning and Analysis and gain experience applying them. Students gain more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8300Y

RSCH 8350Z - Advanced Qualitative Reasoning and Analysis

(4 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8300Z - Qualitative Reasoning and Analysis and gain experience applying them. Students gain more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

Prerequisites
- RSCH 8200Z or AMDS 8437
- RSCH 8300Z or AMDS 8427
- Residency 3

RSCH 8351M - Advanced Qualitative Reasoning and Analysis
Students in this research course builds upon knowledge and skills acquired in RSCH 8300Z - Qualitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

**Prerequisites**
- RSCH 8201M
- RSCH 8301M
- RESI 8401
- RESI 8402 or RESI 8402D or RESI 8402E

**RSCH 8351Z - Advanced Qualitative Reasoning and Analysis**

(4 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8300Z - Qualitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

**Prerequisites**
- RSCH 8200Z or AMDS 8437
- RSCH 8300Z or AMDS 8427
- Residency 3
- RESI 8401
- RESI 8402 or RESI 8402D or RESI 8402E

**RSCH 8360 - Advanced Qualitative Reasoning and Analysis**

(5 cr.)
Students build upon the knowledge and skills acquired in RSCH 8310 - Qualitative Reasoning and Analysis. and have experience applying them. Students develop a more sophisticated understanding of the theoretical antecedents and practical applications of eight contemporary qualitative approaches. Students gain experience developing
qualitative interview guides, collecting data, and managing the process from transcription through analysis. The unique challenges of confidentiality and ethical issues are explored as well as implications for social change. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan using a topic relevant to their capstone.

**Prerequisites**

- RSCH 8360 prerequisites by program

**Note:** This course was previously RSCH 8350.

**RSCH 8360O - Advanced Qualitative Reasoning and Analysis**

(5 cr.)

Students in this research course build upon knowledge and skills acquired in RSCH 8300 - Qualitative Reasoning and Analysis and gain experience applying them. Students acquire more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

**Prerequisites**

- RSCH 8300O

**RSCH 8361 - Advanced Qualitative Reasoning and Analysis**

(5 cr.)

Students in this research course build upon knowledge and skills acquired in RSCH 8350 - Qualitative Reasoning and Analysis and are provided experience applying them. Through this course students are provided with more specialized knowledge and skills within each of the common qualitative traditions for designing qualitative research at the doctoral level. Students explore more complex qualitative research designs and analyses; multiple approaches to coding and organizing data; core components of a qualitative write-up; the importance of quality assurance; and the ethical considerations and social change implications of conducting qualitative research and producing knowledge. Students will apply and synthesize their knowledge and skills by developing a qualitative research plan.

**Prerequisites**

- RSCH 8360
- RESI 8402
- RESI 8802
RSCH 8450 - Advanced Mixed-Methods Reasoning and Analysis

(4 cr.)
Students in this research course build upon their established qualitative and quantitative research proficiencies. They are also provided with the opportunity to develop specialized knowledge and skills for designing mixed-methods research at the doctoral level. Students gain an understanding of the types of mixed-methods designs and how to select the most appropriate approach for the research question. They engage in assignments that emphasize the integration of quantitative and qualitative elements into true mixed-methods studies, focusing on reliability and validity in mixed-methods approaches. They also practice data analysis and integration of qualitative and quantitative data within a research write-up leading to proposal development. Students apply their knowledge and skills by developing a mixed-methods research plan that appropriately incorporates qualitative and quantitative elements.
Prerequisites
  • RSCH 8200P
  • RSCH 8300P

RSCH 8450I - Advanced Mixed-Methods Reasoning and Analysis

(4 cr.)
Students in this research course build upon their established qualitative and quantitative research proficiencies. Students are also provided with the opportunity to develop specialized knowledge and skills for designing mixed-methods research at the doctoral level. Students gain an understanding of the types of mixed-methods designs and how to select the most appropriate approach for the research question. Students engage in assignments that emphasize the integration of quantitative and qualitative elements into true mixed-methods studies, focusing on reliability and validity in mixed-methods approaches. They also practice data analysis and integration of qualitative and quantitative data within a research write-up leading to proposal development. Students apply their knowledge and skills by developing a mixed-methods research plan that appropriately incorporates qualitative and quantitative elements.
Prerequisites
  • RSCH 8200P
  • RSCH 8300P

RSCH 8450P - Advanced Mixed-Methods Reasoning and Analysis

(4 cr.)
Students taking this research course build upon knowledge and skills acquired in RSCH 8200P - Quantitative Reasoning and Analysis and RSCH 8300 - Qualitative Reasoning and Analysis. Students acquire more specialized knowledge and skills for designing
mixed-methods research at the doctoral level. Students gain an understanding of the types of mixed-methods designs and how to select the most appropriate approach for the research question. Students emphasize integrating quantitative and qualitative elements into true mixed-methods studies, practicing data analysis, and integrating qualitative and quantitative data within a research write-up. Reliability and validity in mixed-methods approaches will be highlighted. Students will apply and synthesize their knowledge and skills by developing a truly mixed-methods research plan that appropriately incorporates qualitative and quantitative elements.

Prerequisites
- RSCH 8200P
- RSCH 8300P

RSCH 8450Z - Advanced Mixed-Methods Reasoning and Analysis

(4 cr.)
Students taking this research course build upon knowledge and skills acquired in RSCH 8200 - Quantitative Reasoning and Analysis and RSCH 8300 - Qualitative Reasoning and Analysis. Students acquire more specialized knowledge and skills for designing mixed-methods research at the doctoral level. Students gain an understanding of the types of mixed-methods designs and how to select the most appropriate approach for the research question. Students emphasize integrating quantitative and qualitative elements into true mixed-methods studies, practicing data analysis, and integrating qualitative and quantitative data within a research write-up. Reliability and validity in mixed-methods approaches will be highlighted. Students will apply and synthesize their knowledge and skills by developing a truly mixed-methods research plan that appropriately incorporates qualitative and quantitative elements.

Prerequisites
- RSCH 8200Z or AMDS 8437
- RSCH 8300Z or AMDS 8427
- Residency 3

RSCH 8451M - Advanced Mixed-Methods Reasoning and Analysis

(4 cr.)
Students taking this research course build upon knowledge and skills acquired in RSCH 8200 - Quantitative Reasoning and Analysis and RSCH 8300 - Qualitative Reasoning and Analysis. Students acquire more specialized knowledge and skills for designing mixed-methods research at the doctoral level. Students gain an understanding of the types of mixed-methods designs and how to select the most appropriate approach for the research question. Students emphasize integrating quantitative and qualitative elements into true mixed-methods studies, practicing data analysis, and integrating qualitative and quantitative data within a research write-up. Reliability and validity in mixed-methods
approaches will be highlighted. Students will apply and synthesize their knowledge and skills by developing a true mixed-methods research plan that appropriately incorporates qualitative and quantitative elements.

Prerequisites
- RSCH 8201M
- RSCH 8301M
- RESI 8401
- RESI 8402 or RESI 8402D or RESI 8402E

RSCH 8451Z - Advanced Mixed-Methods Reasoning and Analysis

(4 cr.)
Students taking this research course build upon knowledge and skills acquired in RSCH 8200 - Quantitative Reasoning and Analysis and RSCH 8300 - Qualitative Reasoning and Analysis. Students acquire more specialized knowledge and skills for designing mixed-methods research at the doctoral level. Students gain an understanding of the types of mixed-methods designs and how to select the most appropriate approach for the research question. Students emphasize integrating quantitative and qualitative elements into true mixed-methods studies, practicing data analysis, and integrating qualitative and quantitative data within a research write-up. Reliability and validity in mixed-methods approaches will be highlighted. Students will apply and synthesize their knowledge and skills by developing a true mixed-methods research plan that appropriately incorporates qualitative and quantitative elements.

Prerequisites
- RSCH 8200Z or AMDS 8437
- RSCH 8300Z or AMDS 8427
- Residency 3
- RESI 8401
- RESI 8402 or RESI 8402D or RESI 8402E

RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

(5 cr.)
Students build upon knowledge and skills acquired in RSCH 8210 - Quantitative Reasoning and Analysis and RSCH 8310 - Qualitative Reasoning and Analysis for more specialized knowledge and skills to design mixed-methods research at the doctoral level. Students are provided with more specialized knowledge and skills for designing mixed-methods research at the doctoral level. They gain an understanding of the types of mixed-methods designs and how to select the most appropriate approach for the research question(s). The emphases of this course are on integrating quantitative and qualitative elements into true mixed-methods studies, practice in data analysis, and integration of qualitative and quantitative data within a research write-up. Students will
apply and synthesize their knowledge and skills by developing a mixed-methods research plan that incorporates qualitative and quantitative elements appropriately.

Prerequisites
- RSCH 8460 prerequisites by program

Note: This course was previously RSCH 8450.

RSCH 8460O - Advanced Mixed-Methods Reasoning and Analysis

(5 cr.)
Students in this research course build upon their established qualitative and quantitative research proficiencies. They are also provided with the opportunity to develop specialized knowledge and skills for designing mixed-methods research at the doctoral level. Students gain an understanding of the types of mixed-methods designs and how to select the most appropriate approach for the research question. They engage in assignments that emphasize the integration of quantitative and qualitative elements into true mixed-methods studies, focusing on reliability and validity in mixed-methods approaches. They also practice data analysis and integration of qualitative and quantitative data within a research write-up leading to proposal development. Students apply their knowledge and skills by developing a mixed-methods research plan that appropriately incorporates qualitative and quantitative elements.

Prerequisites
- RSCH 8200O
- RSCH 8300O

RSCH 8461 - Advanced Mixed-Methods Reasoning and Analysis

(5 cr.)
Students in this research course build upon knowledge and skills acquired in RSCH 8260 - Quantitative Reasoning and Analysis and RSCH 8360 - Qualitative Reasoning and Analysis. Through this course, students are provided with more specialized knowledge and skills for designing mixed-methods research at the doctoral level. Students gain an understanding of the types of mixed-methods designs and how to select the most appropriate approach for the research question. In this course, students emphasize integrating quantitative and qualitative elements into true mixed-methods studies; practice in data analysis; and integration of qualitative and quantitative data within a research write-up. Reliability and validity in mixed-methods approaches will be highlighted. Students will apply and synthesize their knowledge and skills by developing a truly mixed-methods research plan that appropriately incorporates qualitative and quantitative elements.

Prerequisites
- RSCH 8260
- RSCH 8360
RESI 8402
RESI 8802

SBSF 7100 - Research Forum

(6 cr.)
The purpose of this dissertation companion course is to assist education professionals in making steady progress toward completing their degree. The companion provides a forum for ongoing exchange of ideas, input, and feedback between education professionals and the dissertation chair as education professionals complete coursework for their PhD in Education and prepare to begin their dissertation. The instructor of record for a section of the companion is the chair of the dissertation committee. Section participants are education professionals working with the faculty mentor at the early stages of their dissertation.

SBSF 8110 - Theories of Social Change

(4 cr.)
There is no specific course description in this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

SBSF 8111 - Theories of Social Change (Operations Research)

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

SBSF 8120 - Current Research in Social Change

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program.
program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8125 - Current Research in Social Change and Educational Technology**

(5 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8130 - Professional Practice and Social Change**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8135 - Professional Practice, Social Change, and Education Technology**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8210 - Theories of Human Development**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized
program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8220 - Current Research in Human Development**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8225 - Current Research in Human Development and Educational Technology**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8230 - Professional Practice and Human Development**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8235 - Professional Practice, Human Development, and Educational Technology**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows
students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8310 - Theories of Organizational and Social Systems**

(4 cr.)
There are no specific course descriptions for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8320 - Current Research in Organizational and Social Systems**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8325 - Current Research in Social Systems and Educational Technology**

(5 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8330 - Professional Practice and Organizational and Social Systems**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows
students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SBSF 8335 - Professional Practice, Social Systems, and Educational Technology**

(4 cr.)
There is no specific course description for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**SCIE 6660 - The Nature of Science**

(3 sem. cr.)
Education professionals can investigate the nature and history of science and the role science plays in 21st-century life. They can discover unifying themes across all areas of science such as scientific inquiry, systems and energy, models and scale, constancy and change, ecology and the environment, and form and function. Education professionals can explore environmental science and apply the scientific tools of inquiry, discovery, hypothesis, and theory to facilitate their own learning in science and to foster engaging and motivating scientific learning in their students.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**SCIE 6661 - Exploring the Physical World**

(3 sem. cr.)
Education professionals can examine various physical phenomena (e.g., light, sound, heat, magnetism, and motion) in this course. They engage in authentic, active learning experiences that advance their knowledge about these phenomena and model creative teaching approaches that can be used to engage their students in powerful learning about the physical sciences. The practical application of theories and concepts will be emphasized.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**SCIE 6662 - Investigating the Living World**

*Walden University Catalog (March 2022)*
Education professionals take a journey of discovery and explore the components of the living world, including plants, animals, fungi, and other organisms as well as their ecology in this course. They can learn about the controversy that persists in the scientific community about what makes an organism alive and discover how organisms interact with each other and their environments. Education professionals use inquiry methods to develop learning experiences to engage their own students in exploring these ideas in the classroom.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**SCIE 6663 - Exploring the Earth and Beyond**

Education professionals can investigate timeless questions about how the Earth fits into time and space. Explorations will span from ocean depths to the breadth of the universe in this course. They examine earthly and other-world phenomena, such as weather, climate, volcanoes, earthquakes, planetary systems, and supernovae, and explore the similarities and differences between this world and other worlds. Transferring this scientific knowledge to classroom instruction will be emphasized.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**SCIE 6664 - Looking Into the Future of Science and Education**

Education professionals take a future-focused view of science while developing their skills in science education during this course. Trends, issues, challenges, and opportunities related to science and its role in schools, society, and the workplace will be explored. Topics include genetic engineering, biotechnologies, environmental issues such as climate change and global warming, and the call for education in STEM (science, technology, engineering, and mathematics). Education professionals engage in professional discourse to grapple with uncertainties and learn how scientific principles can be used to advocate for authentic social change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**SCLB 0651 - Skills Lab I**

The Social Work Skills Lab is a 1-credit, 6-week hybrid class that includes 3 weeks of online content, followed by a 4-day synchronous residential component, and then closes with 2 weeks of online content. Students in the Social Work Skills Lab I reinforce the
content covered in the Second Year MSW courses with an emphasis on clinical skills development and advanced topics in diversity and inclusion, evidence-based practice, ethics, and development of the professional self. Material covered includes practice labs focused on clinically informed individual engagement and assessment, group development and leadership, and an understanding of how to advocate within organizations and communities. A key component of the skills lab is to prepare and assess students for their readiness to enter the field.

Prerequisites
- SOCW 6002
- Advanced Standing students do not attend Skills Lab I.

SCLB 0652 - Skills Lab II

(1 cr.)
The Social Work Skills Lab II is a 1-credit, 6-week hybrid class that includes 3 weeks of online content, followed by a 4-day synchronous residential component, and then closes with 2 weeks of online content. Students in the Social Work Skills Lab II reinforce the content covered in the Second Year MSW courses with an emphasis on clinical skills development and advanced topics in diversity and inclusion, evidence-based practice, ethics, and development of the professional self. Material covered includes practice labs focused on clinically informed individual engagement and assessment, group development and leadership, and an understanding of how to advocate within organizations and communities. A key component of the skills lab is to prepare and assess students for their readiness to enter the field.

Prerequisites
- SOCW 6002
- SOCW 6510

SCLB 0652A - Social Work Skills Lab IIA – Advanced Standing

(1 cr.)
The Social Work Skills Lab II and IIA is a 1-credit 6-week hybrid class that includes 3 weeks of online content, followed by a 4-day synchronous residential component and then closes with 2 weeks of online content. The Social Work Skills Lab II/IIA serves to reinforce the content covered in the Second Year MSW courses with an emphasis on clinical skills development, and advanced topics in diversity and inclusion, evidence-based practice, ethics, and development of the professional self. Material covered includes practice labs focused on clinically informed individual engagement and assessment, group development and leadership, and an understanding of how to advocate within
organizations and communities. A key component of the skills lab is to prepare and assess students for their readiness to enter field.

**SCNC 4001 - Analyzing Contemporary Scientific Controversies**

(5 cr.)
In this course, students critically examine controversies in science. They explore topics including pseudoscience, human cloning, stem cell research, genetically modified foods, and climate change. Students learn to articulate sound arguments for the validity of scientific claims as well as demonstrate an understanding of the reasons why popular beliefs in unsubstantiated claims persist.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**SCNC 4001C - Analyzing Contemporary Scientific Controversies**

(5 cr.)
In this course, students critically examine controversies in science. They explore topics including pseudoscience, human cloning, stem cell research, genetically modified foods, and climate change. Students learn to articulate sound arguments for the validity of scientific claims as well as demonstrate an understanding of the reasons why popular beliefs in unsubstantiated claims persist.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**SENG 6005 - The Global Technology Environment**

(3 sem. cr.)
Students in this course are provided a critical "state-of-the-art" breadth-first review of the domain of information technology (IT). Designed to provide students with a wide-ranging introduction to topics such as software engineering, cybersecurity, and big data analytics, students completing the course have a comprehensive global view of the current IT landscape in the context of both commercial and noncommercial enterprises. The class blends both theory and practice to provide a solid foundation for future study. Students study the relationship between technological change, society and the law, and the powerful role that computers and computer professionals play in a technological society.

**SENG 6155 - Software Engineering and System Architecture**

(3 sem. cr.)
Students in this course are provided with systematic knowledge concerning the current techniques, technologies, and tools of software engineering. Emphasis is on the problem-solving elements of software engineering and on the software system architectures that
result. Project management and configuration management issues are also discussed. The course affords students the ability to practice many of the software engineering techniques considered, using state-of-the-art tools, either individually or in groups.

SENG 6175 - Software Testing and Quality Assurance

(3 sem. cr.)
Students in this course are provided a general overview of software engineering in the context of testing and quality assurance, both of which are important facets of modern software engineering that have technical, financial, and ethical implications for organizations. Students explore focused topics, such as testing methods; developing tests at the unit, integration, and systems level; techniques for stress testing; complexity and test metrics; quality management standards; and configuration management. Students have the opportunity to develop a critical awareness and comprehensive understanding of software testing and quality assurance, and the capability to create successful testing and quality assurance processes to support the needs of modern software engineering projects.

SENG 6190 - Foundations of Intelligent Systems

(3 sem. cr.)
Students in this course are introduced to the concepts of artificial intelligence and emergent areas of intelligent systems. Students have the opportunity to gain a critical understanding of knowledge representation, reasoning, machine learning, and evolutionary techniques. Students are presented with real-world problems and have the opportunity to apply "intelligent" techniques to provide solutions to these problems.

SENG 6215 - Security Risk Management

(3 sem. cr.)
Threats to information security (IS) are becoming more sophisticated. Laws and regulations impose strict (cyber) security risk management requirements on all enterprises to prevent, or at least limit, the potential of cyberattacks. Course content is directed at providing a deep understanding of the mechanisms and techniques that can be used to identify and mitigate against security risk. Students in this course are provided with the theoretical and practical knowledge to deliver a formal, systematic, and in-depth approach to the application of the concepts, techniques, methods, approaches, and processes of (cyber) security risk management in a pragmatic manner and in the context of enterprises of all kinds.

SENG 6240 - Advanced Database Systems

(3 sem. cr.)
In order to create a competitive advantage, organizations store and analyze information
in a variety of formats. This course covers key areas of database systems, such as requirements, design, implementation, security, performance, and scalability. Through a hands-on approach and practical projects, students have an opportunity to design and build database systems using the latest database technologies.

**SENG 6250 - Requirements and Quality Engineering**

(3 sem. cr.)
In this course students examine requirements of engineering and quality engineering in the context of software engineering. Students are presented with topics on the system engineering life cycle, including requirements, design, integration, transition, operation, maintenance, support, and quality management standards. Course content focuses on issues of requirements and quality engineering, such as the elicitation of requirements, analysis, specification, validation, and change management.

**SENG 6260 - Software Modeling and Design**

(3 sem. cr.)
In this course students explore a range of modeling techniques and design tools used within the context of software development projects, such as object-oriented design tools and techniques. A number of standard notations for design representation will be included, as will different software development methodologies and life cycles in the context of the various design techniques that cover the development process, from feasibility studies to software implementation. Students work both individually and in groups and are provided opportunities to apply the knowledge gained in the course to real-world software design scenarios. Throughout the course, students have the opportunity to acquire a range of software modeling and design skills ready for application in the workplace.

**SENG 6630 - Algorithms and Computation**

(3 sem. cr.)
In this course students examine the role and importance of algorithms, algorithms used to solve a given computational problem, and the process of designing algorithms where no suitable existing algorithm is available. Students have the opportunity to analyze algorithm behavior, and correctness and complexity based on both time and memory requirements. Students have the opportunity to gain an in-depth knowledge of a range of algorithms that are in common usage and/or are of historical significance within the IT industry, including sorting algorithms, searching algorithms, graph algorithms, and pathfinding algorithms.

**SENG 6635 - Secure Coding**
In this course students are provided with an understanding of secure software development practices. Students have the opportunity to gain an understanding of how to integrate security into the application/software development process. Students also have the opportunity to study some of the techniques for writing secure code, language-based security models, and isolation techniques to protect data.

**SHMN 3001 - Modern Popular Culture**

(5 cr.)
The study of popular culture is a way to understand the current values, beliefs, and cultural norms of modern society. In this course, students analyze the artistic and philosophical impact of contemporary media and popular culture. They explore graphic novels, film, advertising, television, cyber culture, and popular music. Demonstrating their understanding of course concepts in a final written project, students compare and contrast how different genres within a media type address specific issues. Students learn to analyze the ways in which social, political, and economic issues are evident in artistic and creative forms of expression in popular culture.

**SLDR 1001 - Leverage Your Leadership Skills**

(5 cr.)
Understanding one’s own personal leadership strengths helps them to have a greater impact. Personal goals, values, and purpose are the foundation of effective personal leadership. In this course, students explore the personal leadership in their everyday lives. Completing self-assessment tools, they can gain insights into their leadership strengths and areas for improvement. Understanding the impact of emotional and social intelligence can add to their personal and professional leadership skills. Students also consider broader societal issues found in the workplace, including the relationship between personal and organizational leadership.

(Pre-requisites: SSOC 1001)

**SOCI 1001 - Introduction to Sociology**

(5 cr.)
Students in this course have the opportunity to think critically about society and their own lives from a wide range of classical and contemporary perspectives. They explore and apply major theoretical perspectives to evaluate chosen social issues, consider the concept of self in relation to global perspectives, and examine the influence of social norms and social institutions on individual and group behavior. Through their study of sociology, students sharpen their critical-thinking skills and develop a sociological imagination, which they can use throughout their personal and professional lives to understand the complex nature of social structure and social change.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a*
SOCI 1001A - Introduction to Sociology

(5 cr.)
Students in this course have the opportunity to think critically about society and their own lives from a wide range of classical and contemporary perspectives. They explore and apply major theoretical perspectives to evaluate chosen social issues, consider the concept of self in relation to global perspectives, and examine the influence of social norms and social institutions on individual and group behavior. Through their study of sociology, students sharpen their critical-thinking skills and develop a sociological imagination, which they can use throughout their personal and professional lives to understand the complex nature of social structure and social change.

Prerequisites
• MATH 1030A

SOCI 1001C - Introduction to Sociology♦

(5 cr.)
Students have the opportunity, in this course, to think critically about society and their own lives from a wide range of classical and contemporary perspectives. Students engage in assignments that balance theory with current research findings and emphasize social policy. They explore and apply major theoretical perspectives to evaluate chosen topics, analyze culture and society through the exploration of holidays and celebrations, consider the idea of self in relation to global perspectives, and compare and contrast social institutions. Through their study of sociology, students sharpen their critical-thinking skills and develop a sociological imagination, which they can use throughout their personal and professional lives to understand social structure and behavior.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

SOCI 1001S - Introduction to Sociology♦

(5 cr.)
Students have the opportunity, in this course, to think critically about society and their own lives from a wide range of classical and contemporary perspectives. Students engage in assignments that balance theory with current research findings and emphasize social policy. They explore and apply major theoretical perspectives to evaluate chosen topics, analyze culture and society through the exploration of holidays and celebrations, consider the idea of self in relation to global perspectives, and compare and contrast social institutions. Through their study of sociology, students sharpen their critical-thinking skills and develop a sociological imagination, which they can use throughout
their personal and professional lives to understand social structure and behavior.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**SOCI 2001 - Multicultural Dimensions of Society**

(5 cr.)
As globalism increasingly affects all facets of society, including school, work, and situations in everyday life, our country is growing ever more diverse. In this course, students gain a framework to understand, respect, and value diversity through real-life experiences and reflections. Students explore concepts of teamwork, leadership, communication, and conflict management among people with diverse life experiences. They complete a range of short writing assignments on such topics as prejudice, cultural bias, and discrimination; religious freedom; and diversity. Through this course, students gain the knowledge and sensibilities to develop appropriate, flexible approaches for identifying and managing diversity issues in the workplace.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**SOCI 2001C - Multicultural Dimensions of Society**

(5 cr.)
As globalism increasingly affects all facets of society, including school, work, and situations in everyday life, our country is growing increasingly diverse. In this course, students acquire a framework to understand, respect, and value diversity through real-life experiences and reflections. Students explore concepts of teamwork, leadership, communication, and conflict management among people with diverse life experiences. They complete a range of short writing assignments on topics such as prejudice, cultural bias, and discrimination; religious freedom; and diversity. Through this course, students gain the knowledge and sensibilities to develop appropriate, flexible approaches for identifying and managing diversity issues in the workplace.

**SOCI 4080 - Social Responsibility**

(5 cr.)
Technological advancements, globalization, and other 21st-century dynamics that bring individuals together provide a means and a responsibility to work collectively for the common good. In this course, students gain an interdisciplinary synthesis of learning through the lens of civic engagement and social responsibility. Students engage in assignments that emphasize problem solving in contemporary society. They explore the history of social responsibility and issues related to social change, civic engagement, and the media. In this course, students develop awareness and skills to sustain and advance the communities in which they live.

Prerequisites
All other required general education courses completed

Note: This course is delivered over a 6-week term but is equated to SOCI 4080E, which is delivered over a 12-week term.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

SOCI 4080C - Social Responsibility

(5 cr.)
Technological advancements, globalization, and other 21st-century dynamics that bring individuals together provide a means and a responsibility to work collectively for the common good. Students in this course receive an interdisciplinary synthesis of learning through the lens of civic engagement and social responsibility. Students engage in assignments that emphasize problem solving in contemporary society. They explore the history of social responsibility and issues related to social change, civic engagement, and the media. Students develop awareness and skills to sustain and advance the communities in which they live.

SOCW 2001 - Introduction to Social Work

(5 cr.)
This course is designed to introduce students to the social work profession. Students in the course explore the history of the profession, the characteristics of generalist practice, social work practice settings, and professional values and ethics. Students also develop knowledge of current issues and directions for the profession, and the requirements and challenges of being a professional social worker.

SOCW 2002 - Basic Skills for Social Work Practice

(5 cr.)
This course is designed to develop the basic practice skills necessary for BSW students to begin professional social work practice. Students in the course receive an overview of the knowledge, skills, values, and ethics that a generalist social worker must possess to work effectively with a client. Concepts underlying social work practice, such as the helping process—intake and assessment; basic interviewing skills for the beginning social work professional; engagement; and best practices—are addressed. The practice content to be explored includes understanding self-awareness and confidentiality. While the major emphasis of the course is on basic interviewing skills, a strengths perspective within a systems framework is incorporated in the course.

Prerequisites
- SOCW 2001
SOCW 2003 - Introduction to the Welfare State

(5 cr.)
This course is designed to provide students with the knowledge to analyze, formulate, and advocate for social policies that advance individual and social well-being. Students explore various methods of policy analysis and develop advocacy plans that involve collaboration with colleagues and communities to address policy issues. There is a special emphasis on policies that impact human rights and advance social and economic justice.
Prerequisites
- SOCW 2001

SOCW 3001 - Diversity and Multiculturalism

(5 cr.)
The purpose of this course is to introduce students to multicultural social work practice and the importance of cultural competence. During the course, students are encouraged to assess their own level of self-awareness and their ability to engage in critical thinking on the issues of diversity and social justice. Grounded within the professional Code of Ethics, students learn about concepts and theory related to social, economic, and environmental justice. In this course, students analyze and reflect on the impact of oppression and discrimination on diverse groups. They learn how to engage evidence-informed practice, as well as advocate on behalf of others, particularly vulnerable populations. Throughout the course, students learn about various cultural groups and apply their learning to a different population each week. By the end of the course, students will be prepared with the foundational knowledge and skills for social work practice with culturally diverse and vulnerable populations.
Prerequisites
- SOCW 2001
- SOCW 2002

SOCW 3002 - Human Behavior in the Social Environment I

(5 cr.)
This course is designed to provide students with an understanding of the intersection between the social environment and the healthy lifespan development of individuals, families, groups, and communities. Throughout this course, students enhance their understanding of how the environment and social context serve to mediate or intersect with the healthy development of each individual, family, group, or community. Students are introduced to the ways gender, socioeconomic status, sexual orientation, race and ethnicity, and disability impact human development. Students also explore human behavior through the lens of human development, environment, and social context.
Prerequisites
SOCW 3003 - Human Behavior in the Social Environment II

(5 cr.)
This course is designed to prepare students for clinical social work practice that reflects an advanced understanding of lifespan development and sociopsychological identity development in individuals, families, groups, and communities. Throughout this course, students will use their learning around lifespan development and sociopsychological identity development to understand human behavior and, particularly, individual and family functioning within the environmental context.
Prerequisites
- SOCW 2001
- SOCW 2002
- SOCW 2003
- SOCW 3002

SOCW 3004 - Social Work Research I

(5 cr.)
This course is designed to develop students' understanding of the importance of research to social work practice. Students are introduced to basic principles of scientific method and to various research methods within the quantitative, qualitative, and mixed-methods research. This course is designed to introduce students to ethical standards as they relate to research, particularly as it relates to social work. Students explore research that addresses diverse populations. This basic course is the first of two courses designed to prepare students to use research to inform their ethical social work practice.
Prerequisites
- SOCW 2001
- SOCW 2002
- SOCW 2003
- SOCW 3001

SOCW 4001 - Policy and Advocacy

(5 cr.)
This course is designed to provide students with the knowledge to analyze, formulate, and advocate for social policies that advance individual and social well-being. Students explore various methods of policy analysis and develop advocacy plans that involve
collaboration with colleagues and communities to address policy issues. There is a special emphasis on policies that impact human rights and advance social and economic justice. Students will develop skills in the policy analysis process, including the values that influence policy, the legislative process, and the roles of advocacy and lobbying organizations.

Prerequisites
- SOCW 2001
- SOCW 2002
- SOCW 2003
- SOCW 3001
- SOCW 3002
- SOCW 3003

**SOCW 4002 - Social Work Research II**

(5 cr.)
This course is designed to support students' development as generalist social workers. Students will identify and apply research that can be used to advance social work practice, including social welfare, advocacy, and policy. Throughout the course, students are provided with resources and activities designed to help them develop as critical consumers of research for the sake of ethical, evidenced-based social work practice. Students in this course have the opportunity to select research utilizing the various research methods and evaluate research design, research methods, and applicability of results to diverse populations.

Prerequisites
- SOCW 2001
- SOCW 2002
- SOCW 2003
- SOCW 3001
- SOCW 3004

**SOCW 4003 - Generalist Practice I—Individuals/Families**

(5 cr.)
This first practice course is designed to provide students with the knowledge and skills to utilize in their social work practice with individuals and families. The focus of this course is on preparing students to practice with clients from diverse cultural backgrounds and marginalized or oppressed populations. Students demonstrate therapeutic skills to engage individuals and families, to define and prioritize issues, to set mutually developed goals, and to commit to the change process.

Prerequisites
- SOCW 2001
• SOCW 2002
• SOCW 2003
• SOCW 3001
• SOCW 3002
• SOCW 3003

SOCW 4004 - Generalist Practice II—Groups

(5 cr.)
This practice course is designed to provide students with the knowledge and skills to apply social work services when working with groups. Students in this course will concentrate on the application of evidence-based practice theories and group work models consistent with empowerment and ecological perspectives. This course is particularly focused on groups from diverse cultural backgrounds and marginalized or oppressed populations. The focus is on the influence of social work professional values in working with families and on group work practice.

Prerequisites
• SOCW 2001
• SOCW 2002
• SOCW 2003
• SOCW 3001
• SOCW 3002
• SOCW 3003
• SOCW 4003

SOCW 4005 - Generalist Practice III—Organizations and Communities

(5 cr.)
This advanced course is designed to prepare students for their roles as supervisors, leaders, and administrators in social work organizations and communities. Students receive academic preparation focused on leadership theory and strategies for leadership development, ethical practice as supervisors, and roles of administrators in social work organizations and as community leaders. Students participate in activities that develop their skills in critical decision making to address some of the complex problems that are common to organizations and communities in social work.

Prerequisites
• SOCW 2001
• SOCW 2002
• SOCW 2003
• SOCW 3001
• SOCW 3002
• SOCW 3003
• SOCW 4003

SOCW 4100 - Field Seminar I

(10 cr.)
This is the first course in the field practicum sequence. Students are required to complete 200 hours in an approved social services agency under the supervision of a professional social worker. Students gain an introduction to the roles of a professional social worker in the practicum experience. Students have the opportunity to demonstrate skills in maintaining social work boundaries and ethics while interacting in a professional manner with clients. Students participate in weekly synchronous hour-long seminars with their instructor and peers. In the weekly seminar, students demonstrate their integration of classroom knowledge with the professional practice skills.

Prerequisites
• SOCW 2001
• SOCW 2002
• SOCW 3001
• SOCW 3002
• SOCW 3003
• SOCW 3004
• SOCW 4001
• SOCW 4002
• SOCW 4003
• SOCW 4004
• SOCW 4005

SOCW 4110 - Field Seminar II

(10 cr.)
This is the second field course in the field practicum sequence. Students are required to complete 200 hours in an approved social services agency under the supervision of a professional social worker. Students have the opportunity to develop and demonstrate skills in engaging clients, developing mutually agreed-upon goals, identifying client’s strengths and needs, completing assessments, and completing professional documentation in this practicum experience. Students also identify policies at the organizational, local, state, or national level that impact the client system. Students participate in weekly synchronous hour-long seminars with their instructor and peers. In the weekly seminar, students demonstrate their integration of classroom knowledge with the professional practice skills.

Prerequisites

(5 cr.)
This foundation course is designed to introduce students to the social work profession. Students explore the history of the profession, the characteristics of advanced generalist practice, social work practice settings, and professional values and ethics. Students develop knowledge of current issues and directions for the profession, and the requirements and challenges of being a professional social worker.

(3 cr.)
This is a foundation course designed to introduce students to the social work profession. Students explore the history of the profession, the characteristics of generalist practice, social work practice settings, and professional values and ethics. Students also develop knowledge of current issues and directions for the profession, and the requirements and challenges of being a professional social worker.

SOCW 6051 - Diversity, Human Rights, and Social Justice

(5 cr.)
This is a foundation course in which students broadly address race and ethnicity, nationality, gender and sexuality, socioeconomic status and class, spirituality and religion, ability, and age in an effort to better understand social identity. Throughout this course, students complete discussions and applied assignments to explore the role of power, privilege, oppression, and marginalization on the social development of clients. In addition, students engage in reflective journals and activities to foster self-awareness of their own role in the hierarchy of power and privilege. At the completion of this course, students will have a personalized, digital Diversity Portfolio showcasing their developing competence in providing evidence-based contextually and culturally relevant assessments and interventions for individuals, families, groups, and communities.

Prerequisites
- SOCW 6002
- SOCW 6101

SOCW 6060 - Social Work Theory and Clinical Practice

(5 cr.)
This course is designed to provide students with an overview of theories, models, and intervention methods for clinically informed advanced generalist social work practice. Students explore the theories and models for application to working with clients. The
emphasis of the course is to understand the assumptions of theories and models and how they guide social work assessment, intervention, and practice evaluation. In addition, students evaluate the strengths and limitations of the various theories, with specific consideration to compatibility of a theory with a client’s diverse background and to social work values. Students integrate multiple sources of knowledge to critically evaluate a theory or model’s applicability to social work practice.

Prerequisites

**Master of Social Work (MSW) Traditional and Traditional Fast Track Options** *(Also for Students Entering Standard and Accelerated Options Prior to May 31, 2021)*

- SOCW 6500

**Master of Social Work (MSW) Advanced Standing**

- None

**SOCW 6070 - Supervision, Leadership, and Administration in Social Work Organizations**

*(5 cr.)*

Students in this advanced course prepare for roles as supervisors, leaders, and administrators in clinical social work. Students examine leadership theory and strategies for leadership development, ethical practice as clinical supervisors, and the roles of administrators in social work organizations. Students participate in activities that develop their skills in critical decision making to address some of the complex problems that face leaders and administrators in social work. As a result of this course, students will understand the competencies of social work supervisors, leaders, and administrators and will identify a plan for their own continued development in these areas.

Prerequisites

- SOCW 6111
- SOCW 6361
- SOCW 6090
- SOCW 6215C or SOCW 6205

**SOCW 6090 - Psychopathology and Diagnosis for Social Work Practice**

*(5 cr.)*

Students in this course are prepared to identify mental disorders and to understand the necessary professional evaluations needed to formulate a DSM-5 diagnosis in a culturally sensitive and ethical manner. Students are sensitized to the risks and benefits of using diagnosis, with an emphasis on minimizing stigma. Throughout this course, students learn about the most common DSM-5 diagnoses and integrate that knowledge with the use of established diagnostic procedures. In developing a "working diagnosis," students learn to consider differential diagnosis,
individualize and capture missing dimensions of an illness (mental status, severity, cultural idioms, and other details) as well as adapting interventions to various ages, races, genders, and cultures. Students learn how to incorporate DSM-5 requirements into a holistic biopsychosocial approach that includes the use of evidence-based assessments to systematically resolve ambiguities in diagnosis and strengthen diagnostic accuracy. Students also practice communicating and coding DSM-5 diagnoses and their supporting evidence to peers. The course uses case materials for direct skill-building.

Prerequisites

- SOCW 6111

SOCW 6101 - Essential Skills for Social Work Practice

(5 cr.)
This course is designed for students to gain foundation-level social work skills on the micro, mezzo, and macro levels of social work practice. Students in the course explore how to set professional boundaries and exhibit professional demeanor conducive to social work practice. They further examine appropriate ethical conduct, client engagement, active listening, empathetic responses, and interviewing skills. Students also apply the Generalist Intervention Model in a culturally competent manner through engagement, assessment, planning, implementation, evaluation, termination, and follow-up with individuals, families, groups, organizations and communities.

SOCW 6103 - Introduction to Addictions

(5 cr.)
Students gain an overview of the addiction counseling profession in this course. They are introduced to aspects of professional functioning as an addiction counselor, including but not limited to: role setting; history, philosophy, and trends in addictions counseling; professional standards; the effects of crises and trauma-causing events on persons with addictions; self-care; and ethical and culturally sensitive practices. Students also explore competencies, credentialing, and other professional issues.
Prerequisites

- SOCW 6111

SOCW 6111 - Advanced Clinical Social Work Practice I

(5 cr.)
This is an advanced course designed to provide students with the knowledge and skills to apply clinical social work services. Students in this course focus on the application of evidence-based theories and other intervention methods with individuals and families. There is a particular focus on individuals and families from diverse cultural backgrounds and marginalized or oppressed populations in this course. Students demonstrate
therapeutic skills to engage clients, to define and prioritize issues, to set mutually
developed goals, and to commit to the change process. Students select, implement,
monitor, and evaluate interventions.

Prerequisites

Master of Social Work (MSW) Traditional and Traditional Fast Track Options

- 6510

Master of Social Work (MSW) for Students Entering Prior to May 31, 2021: Standard and Standard
Accelerated Options

- SOCW 6500
- SOCW 6510
- SOCW 6060

Master of Social Work (MSW) Advanced Standing

- SOCW 6060

SOCW 6121 - Advanced Clinical Social Work Practice II

(5 cr.)
In this advanced course, students gain knowledge and skills to apply research-based
models, theories, and intervention methods to groups and organizations. The focus of
the course is on therapeutic factors in group process and the tasks and skills of the
clinical social worker in forming, planning, facilitating, documenting, and evaluating
groups. A special emphasis is placed on cultural and gender-sensitive application of social
work group practice. There is an added emphasis on empowerment of groups,
organizations, and communities. Students explore the structure, role, goals, and impact
of organizations, including culturally sensitive management, and the impact of
organizations on social welfare and the delivery of human services. Students effectively
engage, assess, develop, implement, and evaluate research-based interventions with
groups and organizations.

Prerequisites

- SOCW 6111

SOCW 6135 - Criminal Behavior

(5 cr.)
Students in this course are provided with a foundation in historical and contemporary
biological, psychological, and sociological theories of criminal behavior. Students
consider two important questions in forensic psychology: "Who is a criminal?" and "Is
criminal behavior a mental illness?" Students explore theoretical issues that result from
attempts to explain criminal behavior in forensic populations. They examine groups of
offenders, including mentally disordered offenders, sex offenders, violent offenders, and
juvenile offenders. Students apply ethical guidelines and standards to the study and
research of criminal behavior. They also use concepts and theories to assess the behavior of criminal offenders in case-study scenarios.

Prerequisites
- SOCW 6111

SOCW 6145 - Crisis Management

(5 cr.)
By studying the fundamentals of crisis management and crisis leadership, students develop an understanding of the theories and models related to crises, disasters, and other trauma-causing events. Students also explore ethical, legal, and diversity considerations in crisis and trauma response. At the end of the course, students will understand models for training and supporting other counselors in the areas of crisis response applicable to community, national, and international crises. Furthermore, students develop a crisis management plan for their own community.

Prerequisites
- SOCW 6111

SOCW 6200 - Human Behavior and the Social Environment I

(5 cr.)
Students in this foundation course are provided with an understanding of the intersection between the social environment and the healthy lifespan development of individuals, families, groups, and communities. Throughout the course, students examine the dynamics of human behavior including biological, psychological, and social systems from birth to young adulthood. They also analyze case studies for the ways in which gender, socioeconomic status, sexual orientation, race and ethnicity, and disability impact human development. Overall, students explore human behavior through the lens of human development, the environment, and social context.

Prerequisites
- SOCW 6002
- SOCW 6101

SOCW 6202 - Treatment of Addictions

(5 cr.)
Students in this course are provided with an understanding of theories, treatments, and interventions for addiction. The focus of the course is to introduce various models of treatment, recovery, relapse prevention, and continuing care for addictive disorders. In addition, students understand the treatment principles and philosophies of addiction-related programs. Students increase their self-awareness as helping professionals by understanding their own limitations, recognizing when they need additional resources.
and support, and knowing when and where to refer clients. In addition, students examine substance abuse policies and regulatory processes that influence service delivery in addiction counseling.

Prerequisites
- SOCW 6111

SOCW 6204 - Medical Social Work I

(5 cr.)
This course is designed to provide students with an advanced understanding of the roles and competencies of social workers in medical settings. Students' knowledge of medical terminology, crisis intervention, medical aftercare and discharge planning, mental health evaluations and chemical dependency evaluations, community resources, and medical treatment teams is enhanced. At the end of this course, students will also understand ethical practice with regard to medical social work.

Prerequisites
- SOCW 6111

SOCW 6205 - Medical Social Work II

(5 cr.)
In this course, students are provided with knowledge and skills for supporting vulnerable populations, including individuals and families dealing with acute, chronic, and terminal illness, disability, or the challenges of aging. Students extend their knowledge of support and resources for those dealing with organ transplants; psychosocial aspects of illness and health, grief and loss, and end-of-life decision making. Students enhance their knowledge of ethical group and individual interventions for these vulnerable populations.

Prerequisites
- SOCW 6204
- SOCW 6111

SOCW 6206 - Interdisciplinary Healthcare Practice

(5 cr.)
Interdisciplinary teams in healthcare are positioned to address not only the physical health of patients but also mental health and social service needs, drawing on the expertise of a social worker. This course is designed to provide students with an advanced understanding of the roles, competencies, and applied skills of social workers within such teams. Specifically, students explore how common goals in patient treatment can affirm the strengths of social work interventions. They build skills in assessment, intervention planning, communication, conflict management, and cultural competence while engaging with a variety of patient care issues as part of an
interdisciplinary healthcare team. By the end of the course, students will have increased awareness of the complexities of healthcare settings as well as the nuanced and important role of social workers within teams.

Prerequisites
- SOCW 6111

SOCW 6210 - Human Behavior and the Social Environment II

(5 cr.)
This advanced course is designed to prepare students for clinical social work practice that reflects an advanced understanding of life-span development and socio-psychological identity development with individuals from young adulthood through later adulthood, their families, within groups, and communities. Throughout this course, students will use their learning around life-span development and socio-psychological identity development to understand human behavior and, particularly, individual and family functioning within the environmental context. With an emphasis on ethical practice in social work, this course gives students the opportunity to use this information to inform their assessments, evaluations, interventions, and advocacy for their clients.

Prerequisites
- SOCW 6200

SOCW 6212 - Social Work Practice With Military Populations

(5 cr.)
This is an advanced practice course designed to provide students with the knowledge and skills to apply clinical social work services when working with military members, military families, and veterans. Students in this course will concentrate on the application of evidence-based practice theories and group work models consistent with empowerment and ecological perspectives. The particular focus of this course is on military groups from diverse cultural backgrounds. Students will demonstrate clinical practice skills in the assessment, intervention, and evaluation of military systems and groups. Students in this course will focus on the influence of social work professional values in practice in working with military members, their families, and veterans. Students will learn to use the problem-solving process to develop mutually agreed goals and objectives, mediate, and facilitate the treatment process.

Prerequisites
- SOCW 6111

SOCW 6214 - Social Work Practice with Medical Populations

(5 cr.)
This is an advanced practice course designed to provide students with the knowledge
and skills to apply clinical social work services with medical populations. Students in this course will concentrate on the application of evidence-based practice theories and group work models consistent with empowerment and ecological perspectives. A particular focus of this course is on client populations facing medical/healthcare issues. Students will demonstrate clinical practice skills in the assessment, intervention, and evaluation with clients from diverse cultural backgrounds. Students in this course will examine the influence of professional social work values in healthcare settings. They will learn to use the problem-solving process to develop mutually agreed goals and objectives, mediate, and facilitate the treatment process.

**SOCW 6215 - Advanced Social Work Practice With Children and Family Services**

(5 cr.)
This is an advanced practice course designed to provide students with opportunities to examine social work practice with diverse child and family systems, using an ecological-developmental framework. Through case studies, videos, and interactive media, students learn to apply social work skills of collaboration, assessment, child and family therapy, and multilevel interventions designed to build on strengths that exist within individuals and in the social contexts (e.g., family, school, work, neighborhoods, and communities) where children and families live. Students learn how to foster child and family success in their social environments, especially those challenged by stress, poverty, violence, disorganization, and/or oppression. Additionally, students critically evaluate legal and ethical issues related to working in this specialization.

**Prerequisites**
- SOCW 6111

**SOCW 6301 - Social Work Practice Research I**

(5 cr.)
This foundation course is designed to develop students' understanding of the importance of research to social work practice. Students are introduced to basic principles of scientific method including quantitative, qualitative, and mixed methods research. While exploring the research process, they analyze associated ethical and cultural considerations, evaluate existing literature, and build a research proposal on a topic of interest. This is the first of two courses designed to prepare students as scholar-practitioners who use research to inform their ethical, culturally competent social work practice.

**Prerequisites**

Master of Social Work (MSW) Traditional and Traditional Fast Track Options
- None

Master of Social Work (MSW) for Students Entering Prior to May 31, 2021: Standard and Standard Accelerated Options
- SOCW 6002
• SOCW 6101
• SOCW 6200
• SOCW 6051
• SOCW 6351

SOCW 6311 - Social Work Practice Research II
(5 cr.)
This advanced course is designed to support students' development as scholar-practitioners in clinical social work. Students identify and apply research that can be used to advance their practice, including social welfare, advocacy, and policy. Throughout the course, students are provided resources and activities designed to help them become critical consumers of research for the sake of ethical, evidence-based clinical social work practice. Students in this course have the opportunity to evaluate research design, research methods, and the applicability of results to diverse populations.

Prerequisites
Master of Social Work (MSW) Traditional and Traditional Fast Track Options (Also for Students Entering Standard and Accelerated Options Prior to May 31, 2021)
• SOCW 6510
• SOCW 6111
• SOCW 6301

Master of Social Work (MSW) Advanced Standing
• SOCW 6111
• SOCW 6361

SOCW 6333 - Vicarious Trauma and Compassion Fatigue
(5 cr.)
To gain an understanding and awareness of vicarious trauma and compassion fatigue for trauma-response-helping professionals, students examine intervention strategies and models for treating and preventing vicarious trauma and compassion fatigue through the lens of counselor educators, supervisors, and clinicians. Applying course concepts, students gain hands-on practice conducting a needs assessment and examining the use of standardized instruments. They also recommend social change related to vicarious trauma and compassion fatigue to inform and better prepare trauma-response-helping professionals. Students engage in course assignments that emphasize the ethical, legal, multicultural, and spiritual implications for wellness and self-care, including personal, professional, and organizational elements. As a final project, students interview a trauma-response-helping professional and develop an organizational wellness plan for their setting.

Prerequisites
SOCW 6336 - Crisis, Trauma, and Disaster Response

(5 cr.)
Students in this course gain an understanding of the personal and systemic impact of crises, disasters, and other trauma-causing events on individuals, couples, families, and communities. Students examine theories and response models as they relate to sexual trauma, crisis in individuals and families, crisis in the community, and crisis in the nation and in the world. They explore and discuss topics related to counselor competencies, vicarious trauma and countertransference, specific diagnoses, and advocacy. Students also engage in assignments designed to provide practical application of crisis assessment. Through contemporary articles and case studies, they consider and discuss cultural, legal, and ethical issues related to crisis, trauma, and disaster events and response.
Prerequisites
• SOCW 6111

SOCW 6337 - Trauma-Informed Practice: Neurobiology of Trauma

(5 cr.)
Social workers often work with individual clients who have experienced trauma. To engage with these clients appropriately, social workers must understand the connection between trauma and the brain. Using a trauma-informed lens, students explore the organization, functioning, and development of the brain; adverse childhood experiences; dysregulation of the nervous system; the role of relationships as protective factors; and epigenetics. Students apply these topics to a client case, ultimately developing trauma-informed interventions and a treatment plan. Through their learning, students begin to consider trauma-informed practice not only at the micro level but at the macro level as well.
Prerequisites
• SOCW 6111

SOCW 6350 - Forensic Applications in Community Settings

(5 cr.)
Professionals must devote considerable attention to forensic psychology perspectives and approaches to address issues such as mass incarceration, the decrease in healthcare availability, and cases in which courts remand treatment in community settings. Students in this course examine forensic psychology theories and perspectives, and then they apply these concepts to various community settings. They are provided with practical assignments and topical readings that focus on working with individuals re-entering the
community after incarceration as well as people with a criminal charge who receive community placements rather than incarceration. In addition, students explore less-common applications, such as restorative justice and community crime prevention. They also analyze the impact of personal perspectives and setting on the application of forensic psychology.

Prerequisites
- SOCW 6111

SOCW 6351 - Social Policy, Welfare, and Change

(5 cr.)
Students in this foundation course are provided with an overview of the professional social worker's role in the development, delivery, and implementation of social welfare policies, programs, and services in the U.S. The students explore the history of social welfare and current policies and programs, including those addressing poverty, healthcare (including mental health), child welfare, and disabilities. Students develop policy knowledge and skills to assist them in influencing policy development.

Prerequisites
- SOCW 6002
- SOCW 6101

SOCW 6361 - Social Policy: Analysis and Advocacy

(5 cr.)
Students are provided with the knowledge to analyze, formulate, and advocate for social policies that advance individual and social well-being in this course. Students explore various methods of policy analysis and develop advocacy plans that involve collaboration with colleagues and communities to address policy issues. There is a special emphasis on policies that impact human rights and advance social and economic justice. Students develop skills in the policy analysis process, including the values that influence policy, the legislative process, and the roles of advocacy and lobbying organizations.

Prerequisites

Master of Social Work (MSW) Traditional and Traditional Fast Track Options
- SOCW 6351

Master of Social Work (MSW) for Students Entering Prior to May 31, 2021: Standard and Standard Accelerated Options
- SOCW 6111

Master of Social Work (MSW) Advanced Standing
- None

SOCW 6362 - Human Sexuality
Students are provided with a framework for understanding human sexuality in the context of couples, marriage, and family counseling in this course. Students explore empirically supported counseling approaches related to sexual functioning, intimacy, gender, and sexual orientation. They use a systemic framework for understanding the role and impact of sexuality on couples, marriages, and families. Students also explore and discuss specific topics related to issues of sexual diversity and gender identity.

Prerequisites
- SOCW 6111

**SOCW 6400 - Military Culture**

In this course, students are provided with an overview of military culture. The focus of this course is on understanding the world of work for military personnel, the sociocultural identity development of military personnel, the experience of military families, support for military personnel and their families, and socioeconomic and other lifestyle challenges for military personnel. After completing this course, students will be more informed about the mental health and social support needs of these populations.

**SOCW 6401 - Trauma, Crisis, and Stress With Military Personnel**

The specific focus of this course is on combat trauma, crisis, and stress experiences and responses of military personnel—both wartime and post-war. Students develop an understanding of the short-term and long-term impact of post-traumatic stress and vicarious trauma. In addition to focusing on how combat and wartime experiences impact individual military personnel, students also explore the effects on families. As a result, students will be better prepared to provide services and mental health support to military personnel dealing with trauma, crisis, and stress.

**SOCW 6410 - Military Culture for Social Workers**

This course is designed to provide students with an understanding of military culture. The focus of this course is on understanding the world of work for military personnel; the sociocultural identity development of military personnel; the experience of military families; support for military personnel and their families; and socioeconomic and other lifestyle challenges for military personnel. As a result of this course, students will be more informed about the mental health and social support needs of these populations.

Prerequisites
- SOCW 6111
SOCW 6411 - Social Work in Trauma, Crisis, and Stress With Military Personnel

(5 cr.)
The specific focus of this course is on the wartime and post-war and combat trauma, crisis, and stress experiences and responses of military personnel. Students in this course will develop an understanding of the short-term and long-term impact of post-traumatic stress and vicarious trauma. In addition to understanding how combat and war-time experiences impact individual military personnel, students will also focus on these individuals' families. As a result of learning in this course, students will be better prepared to provide services and mental health support to trauma, crisis, and stress of military personnel.
Prerequisites
  •  SOCW 6111

SOCW 6412 - Working With Military Spouses, Families, and Children

(5 cr.)
The nature of military work responsibilities impacts not only military personnel but their families as well. Frequent relocations, extended deployments, parent-child separation, and high-risk jobs all contribute to unique family dynamics. This course is designed to educate students about the experience and unique support needs of military personnel and their families.
Prerequisites
  •  SOCW 6111

SOCW 6443 - Psychopharmacology and Biopsychosocial Considerations for Social Workers

(5 cr.)
The potential for addictive disorders to present like a variety of medical and psychological disorders is common. In this course, students examine how to treat addictions that may coexist with depression, anxiety, bipolar disorder, obsessive-compulsive behavior, and other psychological disorders as described in the DSM-IV-TR. They survey a spectrum of psychotropic medications and their use in the treatment of mental, behavioral, and addictive disorders. Students also explore factors that increase the likelihood for a person, community, or group to be at risk for psychoactive substance use disorders. Through this course, students gain an understanding of the basic classifications, indications, and contraindications of commonly prescribed medications so that they make appropriate referrals within treatment teams.
Prerequisites
  •  SOCW 6111
SOCW 6446 - Social Work Practice With Children and Adolescents

(5 cr.)
In this course, students examine empirically supported theories and techniques for working with children and adolescents in the counseling process. Students work toward enhancing their theoretical and practical understanding of the systemic interplay among children, adolescents, families, and the stakeholders in their lives. They engage in coursework and readings focused on a family-systems view of intervention, and they devote special attention to developmental, cognitive, behavioral, educational, multicultural, and environmental issues. Students assess a distinct group of empirically supported interventions aimed at improving individual and family functioning. They also explore legal and ethical issues related to counseling children and adolescents.
Prerequisites
- SOCW 6111

SOCW 6456 - Social Work Practice With Couples and Family Systems

(5 cr.)
The focus of this course is on gaining an advanced understanding of theories and techniques for working with couples, married individuals, and families, as well as to acquire skills for theory integration and theory-based treatment. Through video demonstrations and other topical materials, students witness and examine empirically supported treatments and techniques in prevention, intervention, development, and promoting the well-being of marriages, couples, and families. They explore systemic implications for conceptualization, assessment, treatment planning, and interventions. Students also learn how to assess procedures for critically evaluating relevant research and how to apply these findings to their counseling practices. Additionally, they explore methods of adapting models to meet the needs of a diverse society and the legal and ethical issues related to working in this specialty area.
Prerequisites
- SOCW 6111

SOCW 6500 - Social Work Field Education I

(3 cr.)
This is the first foundation course in the four-part field practicum sequence. Students are required to complete 200 hours in an approved social services agency under the supervision of a professional social worker. Through the practicum experience, students are introduced to the role of a professional social worker. Students demonstrate skills in maintaining boundaries and ethics while interacting in a professional manner with clients. Through their participation in a weekly hour-long seminar with their instructor and peers, students demonstrate their integration of classroom knowledge with
professional practice skills.

Prerequisites

- SOCW 6002
- SOCW 6101
- SOCW 6200
- SWLB 0651
- SOCW 6210
- SOCW 6051

SOCW 6510 - Social Work Field Education II

(3 cr.)
This is the second foundation course in the four-part field practicum sequence. As in SOCW 6500, students are again required to complete 200 hours in an approved social services agency under the supervision of a professional social worker. Students have the opportunity to develop and demonstrate skills in engaging clients, developing mutually agreed-upon goals, identifying clients' strengths and needs, completing assessments, and providing professional documentation during the field practicum experience. Students also identify policies at the organizational, local, state, or national level, which impact the client system. Through their participation in a weekly hour-long seminar with their instructor and peers, students demonstrate their integration of classroom knowledge with professional practice skills.

Prerequisites

- SOCW 6301
- SOCW 6500

SOCW 6511 - Treatment of Forensic Populations

(5 cr.)
In this course, students gain the foundational knowledge necessary to evaluate and subsequently treat many different forensic populations, such as individuals who have committed sex offenses, used illegal substances, or engaged in white-collar crime. Students analyze the use of traditional forms of intervention, including individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice. Applying the concepts and theories learned in the course, students develop a project scenario in which they feature an offender and describe treatment approaches as well as related ethical, legal, and multicultural factors that may impact treatment. Students also consider and discuss professional identity and goals.

Prerequisites

- SOCW 6111
SOCW 6520 - Social Work Field Education III

(3 cr.)
This is the third course in the field practicum sequence. It is an advanced course. Students are required to complete 250 (20–24 hours per week) hours in an approved social services agency under the supervision of a professional social worker. There is a focus on agencies that serve clients from diverse populations and/or marginalized or oppressed groups. In this course, students focus on recognizing the importance of clinical social work practice and demonstrating the ability to negotiate and advocate with and on behalf of client systems to enhance client well-being and ensure social and economic justice. Students demonstrate the ability to critically examine research available on interventions, make an appropriate selection, and follow through with the implementation. A seminar is included in which students demonstrate the integration of classroom knowledge with the professional practice skills.

Prerequisites
Master of Social Work (MSW) Traditional and Traditional Fast Track Options (Also for Students Entering Standard and Accelerated Options Prior to May 31, 2021)
- SOCW 6510
- SOCW 6060
- SOCW 6111
- SOCW 6090
- SOCW 6361
- SOCW 6121
- SWLB 0652
- First specialization/elective course

Master of Social Work (MSW) Advanced Standing
- SOCW 6002 (This course is a required prerequisite only for students who began the program prior to August 30, 2021.)
- SOCW 6060
- SOCW 6111
- SOCW 6090
- SOCW 6361
- SOCW 6121
- Skills Lab II / SWLB 0652
- First specialization/elective course

SOCW 6530 - Social Work Field Education IV

(3 cr.)
This is the final course in the four-part field practicum sequence. As in SOCW 6500, SOCW 6510, and SOCW 6520, students in this course are also required to complete 250 hours in an approved social services agency under the supervision of a professional social worker. There is a focus on agencies that serve clients from diverse populations and/or marginalized or oppressed groups. In this course, students focus on recognizing the importance of clinical social work practice and demonstrating the ability to negotiate and advocate with and on behalf of client systems to enhance client well-being and ensure social and economic justice. Students demonstrate the ability to critically examine research available on interventions, make an appropriate selection, and follow through with the implementation. A seminar is included in which students demonstrate the integration of classroom knowledge with the professional practice skills.
social worker. Through the practicum experience, students are provided with the opportunity to monitor and evaluate therapeutic outcomes and engage in research-based practice. Students demonstrate the ability to provide services to a client or client system, from intake to termination or transfer. Students demonstrate skills in termination; evaluating interventions and outcomes; and disseminating these results and analysis to colleagues, peers, and other practitioners. A seminar is included in which students demonstrate the integration of classroom knowledge with the professional practice skills.

Prerequisites
- All coursework must be completed with the exception of SOCW 6311, second specialization/elective, and third specialization/elective prior to enrollment in SOCW 6530.

SOCW 6652 - Residency II

(5 cr.)
This residency is designed to complement the advanced curriculum. In this residency, students continue to develop their clinical skills and are required to demonstrate competency in ethical practice, case conceptualization, and evidence-based practice. In addition, students have the opportunity to practice their own supervision and consultation skills. Successful completion of this residency will result in an evaluation that indicates students have demonstrated proficiency in the prescribed areas and are ready to interface with the public as a clinical social worker in training.

SOCW 8000 - Foundations for Graduate Study

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar practitioners and social change agents. They assess the relationship of mission and vision to professional goals and develop a program of study, a Professional Development Plan, and strategies for online success. Students also explore resources used throughout the program, such as academic writing support from Walden University's Online Writing Center. Students engage in course assignments focused on the practical application of professional writing, critical thinking skills, and the promotion of professional and academic excellence and integrity.

SOCW 8002 - Foundations of Graduate Study

(3 cr.)
The purpose of this course is to introduce students to Walden University and to the requirements for successful participation in an online curriculum. Through this course,
students gain a foundation for academic and professional success as scholar-practitioners and social change agents. Course assignments focus on practical application of writing and critical-thinking skills and promote professional and academic excellence. Major assignments include the preparation of the Professional Development Plan and Program of Study.

**SOCW 8103 - Introduction to Addiction**

(5 cr.)
Students in this course are introduced to aspects of functioning as a professional as an addiction counselor, including but not limited to role setting of addiction counselors; history, philosophy, and trends in addiction counseling; professional standards for addiction counselors; effects of crises and trauma-causing events on persons with addictions; self-care; and ethical and culturally sensitive practice of addiction counseling. Students also explore competencies, credentialing, and other professional issues. Students explore the future as addiction counselors with an overview of the addiction counseling profession.

**SOCW 8110 - Advanced Social Work Theory and Practice**

(5 cr.)
In this foundational doctoral course, students are provided with an overview of the ways of knowing diverse contemporary theories in social work and the social sciences. Students will be able to understand how the assumptions of various epistemological paradigms (i.e., ways of knowing) inform research. Students will also explore how theories inform social work practice, policy, and research, and they will discuss the role of the social worker in social issues at the micro, mezzo, and macro levels. In addition, there is an emphasis on the delivery of culturally sensitive and ethical services.

**SOCW 8112 - Social Work Scholarship**

(5 cr.)
To be responsible scholar-practitioners and stewards in the social work profession, students must understand social problems within the broader intellectual landscape: that is, the social construction of the social problem and the role it plays in the public’s perception of the social problem. Additionally, students must be prepared to locate the historical context of the problem and the social welfare responses. Using critical reading and evaluation skills, tools, and techniques, students begin to evaluate the lay and empirical literature of a social problem underlying their future capstone or dissertation topic to prepare for the literature review process.

**Prerequisites**
- SOCW 8110W or SOCW 8110

Walden University Catalog (March 2022) 2136
SOCW 8114 - Advanced Social Work Scholarship Community

(5 cr.)
[Under development]
Prerequisites
- SOCW 8752 or SOCW 8752W or SOCW 8574 or SOCW 8574W
- SOCW 8112W or SOCW 8112

SOCW 8116 - History and Development of Social Work

(5 cr.)
This course is designed to provide a doctoral foundation in the history and philosophy of clinical social work and social welfare. Students can explore the strengths and weaknesses of the social work delivery systems. They can review the origins of the profession as well as its various responses to the changing needs of society. Students can begin to develop their identities as leaders, researchers, and best-practices informants in the area of social work through critical literature reviews related to research, policy, and practice; discussions about social work and contemporary society; and course assignments. Students in this course also focus on the competencies and ethics of social work and social welfare professionals.

SOCW 8117 - Diversity and Multiculturalism

(5 cr.)
As a social work scholar-practitioner, it is important to being prepared to serve populations with different lived experiences is important. Understanding the makeup of society, including undercurrents of prejudice and bias that can influence trauma, while being careful not to make broad assumptions about any individual or group, is a crucial skill for a leader in the social work community. In this course, students use historical and current events to consider how policy, systems, and public opinion influence the ability to meet the needs of diverse and marginalized populations. Students examine intersections of identity characteristics and apply contemporary theory to better understand societal manifestations of power, oppression, access, and opportunity. Additionally, students will consider how to apply their knowledge of diversity and multiculturalism to better lead communities, institutions, employees, and agencies in the continuous pursuit of social justice, fairness, and equity.

SOCW 8137 - Contemporary Issues, Social Change, and Social Policy

(5 cr.)
How can students prepare for ethical leadership in social work practice, administration, and advocacy? In this course, students can enhance their understanding of the responsibility of social workers in advanced practice to foster social change for their community, clients, and profession through practice, policy, and advocacy. Students can
use current research to analyze and evaluate policy and identify how community, national, and international issues affect the social work profession. In addition, students examine opportunities to learn how to influence policy as a response to the changing needs of a diverse population. Students also can gain an understanding of how to ethically initiate advocacy and social change processes.

Prerequisites
- SOCW 8110 or SOCW 8110W

SOCW 8138 - Program and Practice Evaluation

(5 cr.)
Using models of evaluation derived from social science and social work theory and research, students can learn to apply research in social work to inform practice, future research, policy, and advocacy. Topics include the history and theory underlying program and practice evaluation, approaches to evaluation, selection of appropriate quantitative and/or qualitative models and techniques used to perform the evaluation, strategies for getting gatekeepers to be invested in the development of the research and in the outcomes, demonstration of program effectiveness, and dissemination of results to stakeholders. Students can gain an understanding of how to address dimensions of diversity (race, ethnicity, age, socioeconomic status, sexual identity, gender, etc.) in their program and practice evaluations in an effort to ensure equity and fairness in program delivery and advocacy.

Prerequisites
- SOCW 8110 or SOCW 8110W

SOCW 8145 - Crisis Management

(5 cr.)
In this course, counselor educators can learn the fundamentals of crisis management and crisis leadership. In addition, they can develop an understanding of the theories and models related to crises, disasters, and other trauma-causing events. Students also explore ethical, legal, and diversity considerations in crisis and trauma response. By the end of the course, students understand models for training and supporting other counselors in the areas of crisis response applicable to community, national, and international crises. Furthermore, students develop a crisis management plan for their own community.

SOCW 8152 - Human Services Administration

(5 cr.)
Diminishing resources are compounding the societal challenges facing human services agencies today. In this course, students will examine the core competencies that human
service administrators need in order to address these challenges and make a greater difference in the communities they serve. A broad range of skills and innovative approaches will be discussed, including cross-agency collaboration, stakeholder communication, supervision of people and processes, creation and implementation of policies, and strategic planning and management. Through course discussions, applications, and critical literature reviews, students can demonstrate knowledge and skills that are directly translatable to their current work environment.

**SOCW 8203 - Treatment of Addictions**

(5 cr.)

Students in this course are introduced to theories, treatment intervention, and case management strategies for addiction counseling. Students are introduced to various models of treatment, recovery, relapse prevention, and continuing care for addictive disorders. In addition, students explore the treatment principles and philosophies of addiction-related programs. Students increase their self-awareness by understanding their own limitations as addiction counselors; recognizing when they need additional resources and support; and knowing when and where to refer clients when appropriate. In addition, students examine substance abuse policies and regulatory processes that influence service delivery in addiction counseling.

**SOCW 8204 - Medical Social Work I**

(5 cr.)

Designed to provide students with an advanced understanding of roles and competencies of social workers in medical settings, this course is developed to enhance students’ knowledge of medical terminology, crisis intervention, medical after-care and discharge planning, mental health evaluations, chemical dependency evaluations, community resources, and medical treatment teams. At the end of this course, students can also understand ethical practice with regard to medical social work.

**SOCW 8205 - Medical Social Work II**

(5 cr.)

The course is designed to provide students with the knowledge and skills for supporting vulnerable populations. Those populations include individual clients or patients and families with acute, chronic, and terminal illness; disabilities; and challenges of age. Students can extend their knowledge of support and resources for families around organ transplants; psychosocial aspects of illness and health for individuals and families; support skills for individuals and families around grief and loss; and end-of-life decision making. Students enhance their knowledge of ethical group and individual interventions for these vulnerable populations.

Prerequisites
- SOCW 8204
SOCW 8210 - Survey Research Methods

(5 cr.)
Participants in this course study in-depth a range of survey methods administered via in-person interview, self-report, phone interview, and Internet administration. Topics include survey design, administration, analysis, and addressing sources of bias. Students also review theoretical and empirical research on question and questionnaire effects. Students prepare in the practice of writing questions and designing questionnaires, both in general and in light of existing research.

SOCW 8333 - Vicarious Trauma and Compassion Fatigue

(5 cr.)
This course is designed to provide students with an understanding and awareness of vicarious trauma and compassion fatigue for first responders. Students examine intervention strategies and models of treatment and prevention of vicarious trauma and compassion fatigue through the lens of a counselor educator, supervisor, and clinician. Assignments include conducting a needs assessment and examining the use of standardized instruments. Students propose social change recommendations related to vicarious trauma and compassion fatigue to promote informed and competent trauma-response helping professionals. In this course, an emphasis is placed on the ethical, legal, multicultural, and spiritual implications for wellness and self-care, including personal, professional, and organizational elements. As a final project, students interview a first responder and develop an organizational wellness plan for his or her setting.

SOCW 8346 - Child and Adolescent Counseling

(5 cr.)
In this course, students are provided with an overview of empirically supported theories and techniques for working with children and adolescents in the counseling process. The course is designed to enhance students' theoretical and practical understanding of the systemic interplay among children, adolescents, families, and the stakeholders in their lives. Emphasis is given to a family systems view of intervention, with specific attention to developmental, cognitive, behavioral, educational, multicultural, and environmental issues. Students will be exposed to a distinct group of empirically supported interventions aimed at improving individual and family functioning. Legal and ethical issues related to counseling children and adolescents will be explored.

SOCW 8350 - Historical and Contemporary Issues in Criminal Justice

(5 cr.)
Students in this course look at the evolution of crime—from lone criminals to
worldwide syndicates—using the scientific rigor built into the selected readings and discussions. Among the topics examined are the philosophy of community- and problem-oriented policing, transnational crime, terrorism, and the new nexus between them. Current and future leaders are equipped with the knowledge and depth of understanding to assess and manage the opportunities, innovations, and challenges in their profession.

**SOCW 8351 - Policy Analysis in the Criminal Justice System**

*(5 cr.)*

Students in this course review key court decisions and explore the tension between constitutionally guaranteed individual rights and crime-prevention and public-safety efforts. Students also cover policy analysis and planning in the criminal justice field and offer an understanding of the policy context in which the criminal justice system functions.

**SOCW 8356 - Theories and Techniques in Marriage, Couple, and Family Counseling**

*(5 cr.)*

Students in this course are provided with an advanced understanding of theories and techniques for working with couples, marriages, and families. The focus of this course is on empirically supported treatments and techniques for addressing prevention, intervention, development, and wellness of marriages, couples, and families. Systemic implications for conceptualization, assessment, treatment planning, and interventions will be addressed. Students will be exposed to procedures for critically evaluating relevant research and to methods for applying findings to their counseling with these groups. Methods of adapting models to meet the needs of a diverse society as well as legal and ethical issues related to working in this specialty area will be explored.

**SOCW 8451 - Public Policy Analysis**

*(5 cr.)*

Government officials, research programs, and NGOs are increasingly expected to make better and more transparent use of evidence in producing viable policy options within highly complex policy environments that are heavily influenced by power and politics. Public policy analysis has been described as the art and craft of speaking truth to power (Wildavsky, 1987) in seeking ways to promote positive social change in these complex environments. Policy analysis within this context requires several distinct skill sets: an understanding of the policy context, technical knowledge and analytical tools to identify and apply evidence ethically and with professional judgment, an appreciation and engagement of the concerns and contributions of diverse stakeholders, and the ability to develop and communicate practical policy advice.
This course is framed around Bardach and Patashnik's eightfold path, which lays out a series of iterative, not necessarily sequential, steps to follow when analyzing a policy issue and uses design thinking to guide the process. Students examine key concepts of public policy analysis through evidence-based research to locate issues in relation to theory and current trends. This course provides project-based opportunities to practice and gain the skills and knowledge to use evidence to shape policy more effectively.

Prerequisites

- MMPA 6116 or HUMN 8000 or HUMN 6000 or HUMN 8001 or SOCW 8002 or SOCW 8002W or MMHA 6000 or MMHA 6000A or HLTH 8003A or HLTH 8003 or HLTH 8003E or HLTH 8003B or NURS 8003

**SOCW 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination**

(5 cr.)

In an increasingly complex world, leaders and managers in public and nonprofit organizations need to be strategic in their planning to fulfill the organizational mission and enhance stakeholder satisfaction. Students in this course explore the role and process of strategic planning with an appreciation for collaboration, cooperation, and coordination as they relate to the strategic planning process. Students will apply these concepts to real-life situations and organizations and develop a strategic plan.

**SOCW 8550 - Preparing for Dissertation**

(5 cr.)

The focus of this course is specifically on the process of writing the dissertation prospectus. Students will use their preliminary research plan, developed previously, and develop a problem statement, to be used in the dissertation. They will further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a dissertation prospectus. The prospectus is a brief paper, typically 15–20 pages in length, that lays out the background for the problem statement; the problem statement itself; a survey of the relevant literature, typically 25–75 references; and a research, implementation, and evaluation plan for the solution of the problem.

Prerequisites

- RSCH 8260W or RSCH 8360W or RSCH 8460W or RSCH 8260K or RSCH 8360K or RSCH 8460K

**SOCW 8570 - Social Work Supervision**

(5 cr.)

Social work supervisors are integral to the success of emerging and developing social workers. The foundations of their work with their supervisees influence quality of care,
outcomes achievement, community engagement, funding, future supervisor comprehension, and more. Thus, their efforts ripple throughout the complex ecosystem of an agency. In this course, students consider the makeup of the supervisor role, including the theoretical underpinnings that provide a framework for positive supervision experiences, as well as the practical skills needed to convert supervision theory into successful practice. Students use practical supervision scenarios to explore the ecosystem of an agency from the supervisor's perspective. Additionally, students explore legal, regulatory, and diversity considerations when interacting with various stakeholders. Understanding the role of the supervisor—whether planning to give or receive supervision—provides a broader view of the social work setting and highlights the potential impact of supervisor training on future developments in the field.

Prerequisites
- SOCW 8110W or SOCW 8110

SOCW 8571 - Treatment of Forensic Populations

(5 cr.)
Students in this course are provided with the basic knowledge necessary to evaluate and subsequently treat many different forensic populations. Various forensic populations, such as sex offenders, substance abusers, and victims of crime, and employee assistance to law enforcement personnel will be covered. The use of traditional forms of intervention, such as individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice, will be addressed.

SOCW 8572 - Adult Learning and Instructional Design

(5 cr.)
Graduates of a doctoral program are looked to as leaders and experts in their respective fields. As such, they have an added responsibility beyond their contribution to critical research and practice contexts; they must also be prepared to share their knowledge in a deliberate and audience-appropriate way, one that inspires others to not just listen, but to act. Though teaching and learning can take place in many situations—for example, agency or clinical supervision, research project leadership, and informal mentoring—graduates of social work doctoral programs may find themselves in the position to teach in a college or university setting, an opportunity to positively impact countless emerging scholars and practitioners. In this course, students consider critical applications of teaching and learning in higher education through a course-long scenario, in which they assume the role of faculty who have been charged with reenvisioning the design and delivery of an Introduction to Social Work course.

Prerequisites
- SOCW 8110W or SOCW 8110
SOCW 8574 - Advanced Clinical Instruction and Supervision

(5 cr.)
[Under development]
Prerequisites
Doctor of Social Work
  • Advanced Clinical Practice and Supervision: SOCW 8570 or SOCW 8570W
    OR
  • Social Work Education: SOCW 8572 or SOCW 8572W
PhD in Social Work
  • SOCW 8570 or SOCW 8570W or SOCW 8572 or SOCW 8572W

SOCW 8601 - Building Doctoral Socialization and Competency 1

(1 cr.)
[Under development]
Prerequisites
  • SOCW 8002 or SOCW 8002W

SOCW 8602 - Building Doctoral Socialization and Competency 2

(1 cr.)
[Under development]
Prerequisites
  • SOCW 9001A or SOCW 8601

SOCW 8603 - Building Doctoral Socialization and Competency 3

(1 cr.)
[Under development]
Prerequisites
  • SOCW 9002A or SOCW 8602

SOCW 8604 - Building Doctoral Socialization and Competency 4

(1 cr.)
[Under development]
Prerequisites
  • SOCW 9003A or SOCW 8603

SOCW 8605 - Building Doctoral Socialization and Competency 5
SOCW 8610 - Capstone Research Project

(5 cr. per term for a minimum of four terms until completion)

The purpose of this research forum is to assist and guide students in completing the Doctor of Social Work (DSW) capstone project study. Modules 1–3 are individual stages of the doctoral process that are a requirement for the completion of the capstone project. At the beginning of each quarter, students will submit a quarterly plan that outlines a proposed schedule for completing the module and the final project. Within this forum, students will engage in regular scholarly discussions with the doctoral study committee and fellow doctoral students. This forum will include resources related to the capstone project, residencies, research, writing, and doctoral program expectations.

Prerequisites
- All courses and residency completed

SOCW 8750 - Leadership Development

(5 cr.)

Great leadership is enhanced by an understanding of the psychological principles of leader development. The purpose of this course is to introduce students to the psychology of leadership and leader development. Topics include psychological theories of leadership, leadership styles, qualities of great leaders, and instruments used to assess leadership and leadership potential. Students apply psychological theories to understanding their own capacity for leadership.

SOCW 8752 - Executive Leadership With Impact

(5 cr.)

Social work doctoral students in this course have the opportunity to apply adaptive executive leadership, address needs within their areas of interest, and realize opportunities for innovation. Students explore the innovation projects within the domains of social work scholarship called the Grand Challenges. The course focuses on activities that allow students to understand the Grand Challenge contexts and engage in multiple types of specified research such as academic, experiential, web-based, and social. In addition, students partake in new mental models and collaboration that aim to meet dynamic needs and challenges not necessarily bound by convention. Students build professional relationship supports, work outside of traditional frameworks, employ entrepreneurial/intrapreneurial practices, integrate multiple sources of knowledge,
employ leadership acumen, and create an innovation project addressing a needed improvement to society.

Prerequisites

- SOCW 8750W or SOCW 8750

SOCW 8785 - Social Change in Action: Prevention, Consultation, and Advocacy

(5 cr.)
This course is designed to prepare students for their roles as counselors in prevention, intervention, and consultation endeavors with specific populations in specific settings. Using an action-research model, students will prepare a blueprint for a prevention, intervention, or consultation project for a community, agency, or organization.

SOCW 8786 - Strategic Context of Public Management and Leadership

(5 cr.)
Public policy implementation can take place in either a public, private, or nonprofit organization or a combined or networked one. Students are engaged as learners in a collaborative study of the changing strategic context of public administration as they apply a strategic planning and management approach to the implementation of public policy. Learners are introduced to planning, general management, financial management, performance management, and contracting processes in organizations whose purpose is to implement public policy.

SOCW 8802 - Clinical Seminar I

(5 cr.)
Doctoral students taking this first clinical seminar receive a comprehensive overview of the history, development, and evolution of clinical social work knowledge and practice with individual and family clients.

SOCW 8809 - Fundamentals of Law and Public Policy

(5 cr.)
Legal decisions and the law have an impact on the creation of public policy. Students in this course explore the relationship between law and public policy and the significance of court decisions on law and public policy. Students examine the role of administrative agencies in the creation and execution of law and public policy and the role of the courts in resolving challenges to agency rule-making; conflicts between executive and legislative branches of government; and conflicts between and among federal, state, and local laws. Students apply fundamental legal concepts and processes to the creation and execution of law and public policy.

SOCW 8815 - Introduction to Dimensions of Contemporary Aging
Statistical data indicate that people are living longer and the number of older persons is continually increasing. As the population ages, society must prepare to address their needs. Students in this course are provided with a multidisciplinary approach to the study of aging in contemporary societies. Students examine the biological, psychological, social, and societal contexts of aging. They also explore the historical and cross-cultural perspectives on aging, social theories of aging, managing chronic diseases, cognitive changes associated with aging, mental health issues, sexuality, and social interactions. Through a series of taskforce reports on various topics, such as sexually transmitted diseases, substance abuse, and elder abuse, students apply course concepts and critically examine current issues in gerontology.

**SOCW 9000 - Dissertation**

(5 credits per quarter for a minimum of 4 quarters until completion)

Doctoral students are offered the opportunity to integrate their program of study into an in-depth exploration of an interest area that includes the completion of a research study in this course. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation. Once students register for SOCW 9000, they are registered each term until successful completion of the dissertation.

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain approval at the final stage by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**Prerequisites**

- RSCH 8100
- RSCH 8200
- RSCH 8300

**SOCW 9001A - Building Doctoral Socialization and Competency 1**

(1 cr.)

[Under development]

**Prerequisites**

- SOCW 8002 or SOCW 8002W
SOCW 9002A - Building Doctoral Socialization and Competency 2

(1 cr.)
[Under development]
Prerequisites
  • SOCW 9001A or SOCW 8601

SOCW 9003A - Building Doctoral Socialization and Competency 3

(1 cr.)
[Under development]
Prerequisites
  • SOCW 9002A or SOCW 8602

SOCW 9004A - Building Doctoral Socialization and Competency 4

(1 cr.)
[Under development]
Prerequisites
  • SOCW 9003A or SOCW 8603

SOCW 9005A - Building Doctoral Socialization and Competency 5

(1 cr.)
[Under development]
Prerequisites
  • SOCW 9004A or SOCW 8604

SPHL 2001 - Ethics

(3 cr.)
Students are introduced to the nature and foundations of moral judgments and applications to contemporary moral issues in this course. Students explore an overview of ethical constraints from the prevailing philosophical and religious perspectives. Using a range of moral theories, students assess their beliefs, values, and perspectives on various ethical scenarios. Through this course, students gain the knowledge needed to formulate solutions to problems of professional and private life against the backdrop of ethical theory.
Prerequisites
  • ENGL 1010

SPLB 671L - Pre-Practicum 1
By participating in a Walden Pre-Practicum, students gain skills in their development as scholar-practitioners. Through their Pre-Practicum experiences, students expand their network of peers and faculty members while developing their professional skills and identity. In Pre-Practicum 1, students begin to apply the core skills and techniques introduced in their Techniques course. Students begin to develop the multicultural competencies needed for counseling. Per program requirements, there is a synchronous experience in this course. Students continue to expand their knowledge of counselor credentialing.

SPLB 672L - Pre-Practicum 2

In Pre-Practicum 2, students continue to develop core skills from Pre-Practicum 1 and integrate advanced skills in their development as scholar-practitioners. Through their Pre-Practicum experiences, students expand their network of peers and faculty members while continuing to develop their professional skills and identity. In Pre-Practicum 2, students begin to develop group leadership skills, integrate counseling theory, and continue to demonstrate cultural competency skills. Students engage in developing their upcoming field experience plan and continue credentialing skills activities.

Prerequisites
For Those in Addiction Counseling; Marriage, Family, and Couple Counseling; and Clinical Mental Health Counseling Programs
- GRPL 6100
- COUN 6250
For Those in School Counseling Programs
- GRPL 6100
- COUN 6350

SSOC 1001 - Living and Learning in an Intercultural World

In this course, students explore their individual and social identities, as well as social group memberships of diverse others. They explore the influence of their cultural identities and explore and discuss these identities. To understand the foundations of effective advocacy for social justice and change, students examine various forms of social systems that influence individual and interpersonal behaviors, intergroup relations, institutional structures, and societal norms.

(SSOC 2000 - Social Problems

(Co-requisites: SLDR 1001)
In this course, students think critically about society and their own lives from a wide range of classical and contemporary perspectives. Students engage in assignments that balance theory with current research findings and emphasize social policy. They explore and apply major theoretical perspectives to evaluate chosen topics, and they consider the idea of self in relation to global perspectives and social institutions. Through their study of sociology, students sharpen their critical-thinking skills and develop a sociological imagination, which they can use throughout their personal and professional lives to understand social structure and behavior.

**Prerequisites**
- SSOC 1001
- SLDR 1001

*(Co-requisites: SSTA 1001)*

**SSTA 1001 - Statistics for Decision Making**

This course provides a real-world introduction to statistical concepts and reasoning, placing emphasis on statistical interpretation and intuition rather than on mathematical rigor. Data increasingly surrounds us, in business and in personal life. It is increasingly important to be able to make sense of that data by interpreting it properly and applying it in a variety of circumstances. Students examine everyday statistics found in business and in society regarding trends, meaningful differences, and whether a change is something they need to care about, with an eye toward interpretation of data and biases in data to allow better, more confident decision making.

**Prerequisites**
- SLDR 1001
- SSOC 1001

*(Co-requisites: SSOC 2000)*

**STAT 2001 - Statistics**

In this course, students examine the fundamentals of probability and descriptive and inferential statistics. Students learn concepts of hypothesis testing, simple regression, and correlation analysis, focusing on the application of these techniques to business decision making. Applying these concepts to analyze hypothetical case scenarios, students learn practical ways that they can use statistics in their daily life. Students also have the opportunity to share insight and gain new perspectives on these topics through weekly discussions.

**Prerequisites**
- MATH 1030 or MATH 1040
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

STAT 2002 - Business Statistics♦

(5 cr.)
In this course, students examine the fundamentals of probability and descriptive and inferential statistics. Students learn concepts of hypothesis testing, simple regression, and correlation analysis, focusing on the application of these techniques to business decision making. Applying these concepts to analyze hypothetical case scenarios, students can learn practical ways that they can use statistics in their daily life. Students also have the opportunity to share insight and gain new perspectives on these topics through weekly discussions.

Prerequisites
- MATH 1030 or MATH 1040

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

STAT 3001 - Statistical Methods and Applications♦

(5 cr.)
Students in this course gain a foundation in statistical methodology as well as ways to use critical judgment in analyzing data sets. Through technology applications and hands-on lab work, students learn concepts of descriptive statistics, hypothesis testing, confidence intervals, t-test, one-way analysis of variance, correlation, and non-parametric methods (e.g., chi-square tests). Students gain the knowledge and skill to be able to analyze and apply statistics to research problems and everyday life situations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

STAT 3401 - Statistics for Data Analytics

(5 cr.)
Statistical analysis is a key information technology tool. Quality assurance, data mining, and performance monitoring all employ extensive statistical analysis. Other applications incorporate various aspects of probability and statistics. This course provides students with an introduction to statistics for data analytics. Within an analytics framework, students synthesize theory with practical applications to learn the fundamentals of statistical reasoning, and the use of numeric and graphical descriptive statistics, statistical comparison, correlations, and other methods. Throughout, students also have the
opportunity to use statistical software to solve problems.

Prerequisites
- MATH 1030 or MATH 1040

SWLB xxx - Social Work Skills Lab II

(1 cr.)
The Social Work Skills Lab II is a 1-credit, 6-week hybrid class that includes 3 weeks of online content, followed by a 4-day face-to-face residential component, and then closes with 2 weeks of online content. Students in the Social Work Skills Lab II reinforce the content covered in the Second Year MSW courses with an emphasis on clinical skills development and advanced topics in diversity and inclusion, evidence-based practice, ethics, and development of the professional self. Material covered includes practice labs focused on clinically informed individual engagement and assessment, group development and leadership, and an understanding of how to advocate within organizations and communities. A key component of the skills lab is to prepare and assess students for their readiness to enter the field.

SWLB 0651 - Skills Lab I

(1 cr.)
The Social Work Skills Lab I is a 1-credit, 6-week hybrid class that includes 3 weeks of online content, followed by a 3-day face-to-face intensive/residential component and then closes with 2 weeks of online content. The Social Work Skills Lab I course reinforces the content covered in the MSW Foundation Year courses with an emphasis on generalist skills development, diversity and inclusion, evidence-based practice, ethics, and development of the professional self. Material covered includes practice labs focused on individual engagement and assessment, group development and leadership, and an understanding of how to advocate within organizations and communities. A key component of the skills lab is to prepare and assess students for their readiness to enter the field.

Prerequisites
- SOCW 6002

SWLB 0652 - Skills Lab II

(1 cr.)
The Social Work Skills Lab II is a 1-credit, 6-week hybrid class that includes 3 weeks of online content, followed by a 4-day synchronous residential component, and then closes with 2 weeks of online content. Students in the Social Work Skills Lab II reinforce the content covered in the Second Year MSW courses with an emphasis on clinical skills development and advanced topics in diversity and inclusion, evidence-based practice,
ethics, and development of the professional self. Material covered includes practice labs focused on clinically informed individual engagement and assessment, group development and leadership, and an understanding of how to advocate within organizations and communities. A key component of the skills lab is to prepare and assess students for their readiness to enter the field.

Prerequisites

Master of Social Work (MSW) Traditional and Traditional Fast Track Options (Also for Students Entering Standard and Accelerated Options Prior to May 31, 2021)

- SOCW 6510
- SOCW 6111

Master of Social Work (MSW) Advanced Standing

- SOCW 6111

SWLB 0652A - Social Work Skills Lab IIA – Advanced Standing

(1 cr.)
The Social Work Skills Lab II and IIA is a 1-credit 6-week hybrid class that includes 3 weeks of online content, followed by a 4-day synchronous residential component and then closes with 2 weeks of online content. The Social Work Skills Lab II/IIA serves to reinforce the content covered in the Second Year MSW courses with an emphasis on clinical skills development, and advanced topics in diversity and inclusion, evidence-based practice, ethics, and development of the professional self. Material covered includes practice labs focused on clinically informed individual engagement and assessment, group development and leadership, and an understanding of how to advocate within organizations and communities. A key component of the skills lab is to prepare and assess students for their readiness to enter field.

Prerequisites

- SOCW 6002

WLDN 2010 - What’s Your Problem?♦

(5 cr.)
Life can be viewed as a series of problems to solve and questions to answer. Students in this course will build a foundation for developing and applying practical problem-solving skills to questions that are relevant in today's world. They will identify a problem, gather information, analyze and interpret the information collected, and ultimately present a proposed solution to various audiences. These problem-solving skills can be applied to academic, personal, and professional situations. As a result of taking this course, students will develop knowledge and skills for approaching everyday life events in a more effective manner.

Prerequisites

- ENGL 1001 or ENGL 1010
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**WLDN 2050 - Developing a Prior Learning Portfolio**

(5 cr.)
Learning takes place in a variety of settings, not simply in a classroom. On-the-job experience, volunteer work, corporate training, military service, and rigorous independent study provide opportunities for authentic learning that often equates to college-level, academic credit. In this course, students align their prior learning with current Walden University course and program outcomes. Students design an academic work product in the form of a portfolio to demonstrate mastery of academically relevant, college-level learning. They have the option to submit this portfolio for credit consideration toward an undergraduate degree.

**WMBA 4990 - Business Essentials**

(0 sem. cr.)
A background in the basics of business is often a key to making the most of a graduate business or management program. In this foundational course, students can build their business acumen in major functional areas that are essential to business success including business leadership and management, business ethics, the legal environment of business, accounting, finance, economics, quantitative methods and statistics, information systems management, global business, marketing, and strategic management.

**WMBA 4991 - Business Essentials**

(0 sem. cr.)
A background in the basics of business is often a key to making the most of a graduate business or management program. In this foundational course, students can build their business acumen in major functional areas that are essential to business success including business leadership and management, business ethics, the legal environment of business, accounting, finance, economics, quantitative methods and statistics, information systems management, global business, marketing, and strategic management.

**WMBA 5000 - Dynamic Leadership**

(5 cr.)
Being an effective leader is essential in business and demands that an individual has a strong set of competencies including the ability to understand one’s self, motivate others, understand organizational culture, and manage ambiguity. In this course, students begin their personal and professional transformation by closely examining their current strengths and weaknesses, values, decision-making processes, and approaches to dealing
with difficult problems. Students also explore leadership in turbulent times by examining how effective leaders think as well as how various management styles impact situations and relationships within an organization. Topics include key leadership concepts with applications to authentic situations; personal leadership and competency assessment; personal and professional development planning; and ethical values-based leadership decision making.

**WMBA 5010 - Managing People and Promoting Collaboration**

(5 cr.)

Contemporary business environments are increasingly competitive, global, fast paced, and knowledge intensive. In these environments, effective use of human capital is vital to an enterprise's success and survival. In this course, students will explore practical issues related to developing individuals and managing collaboration and will examine the skills and strategies necessary to address them effectively. Students will examine ethical and legal implications of managing a diverse workforce including issues that arise from cross-cultural differences and virtual work settings. The importance of communication as a tool to manage internal and external relationships is emphasized as it relates to the effectiveness of managing people to achieve organizational goals. Topics include planning and executing staffing strategies, developing individuals, fostering positive work environments, creating and sustaining teams, maintaining influence in the organization, managing a global workforce, managing programs for productivity improvement, and planning and managing the human side of organizational change.

**WMBA 5020 - Fostering a Culture of Innovation**

(5 cr.)

In today's complex and uncertain environment, innovation is important to achieving business success. In this course, students will examine how to be an effective creative leader who can readily apply imagination to resolve complex problems. Additionally, students explore methods to establish a work environment conducive to creative thinking. Students will gain a set of proven methods, skills, and strategies that enable innovative breakthroughs to occur in a much more deliberate and predictable manner. Topics include: an overview of the concepts of creativity, foresight, and innovation; the diversity of different creative thinking styles; the "design thinking" process for business problem solving; work environments that stimulate creativity; characteristics of leaders who exemplify creativity that often leads to innovation; and the application of creativity and innovation concepts in organization settings.

**WMBA 5030 - Managing Business Information Systems**

(5 cr.)

The need for information and dependence on information systems and enabling technologies are ubiquitous in business. Businesses use information systems to collect,
process, store, and manage data, which can be aggregated and disseminated in the form of information to support effective decision making. Students in this course explore how to realize optimum benefit from information systems and technology to support and improve business decisions, processes, and services at all levels of business in alignment with business goals to achieve competitive advantage and sustainable business performance. Topics include cost, selection, implementation, and use of information systems; quality, reliability, and process standards; and use of information systems to drive strategic advantage.

**WMBA 5060 - Marketing for Competitiveness**

(5 cr.)
Effective managers know that a clear understanding of the role of marketing, as well as a grasp of effective marketing practices, is essential for organizations to succeed in today's fast-paced, competitive environment. In this course, students gain a working knowledge of both marketing theory and the practical application of innovative marketing tools and strategies. Students also explore how product, price, place, promotion, and people contribute to the marketing mix as they explore research-based insights into consumer behavior.

**WMBA 6000 - Dynamic Leadership**

(3 sem. cr.)
Being an effective leader is essential in business and demands that an individual has a strong set of competencies including the ability to understand one's self, motivate others, understand organizational culture, and manage ambiguity. In this course, students begin their personal and professional transformation by closely examining their current strengths and weaknesses, values, decision-making processes, and approaches to dealing with difficult problems. Students also explore leadership in turbulent times by examining how effective leaders think as well as how various management styles impact situations and relationships within an organization.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**WMBA 6000A - Dynamic Leadership**

(3 sem. cr.)
Being an effective leader is essential in business and demands that an individual has a strong set of competencies including the ability to understand one's self, motivate others, understand organizational culture, and manage ambiguity. In this course, students begin their personal and professional transformation by closely examining their current strengths and weaknesses, values, decision-making processes, and approaches to dealing with difficult problems. Students also explore leadership in turbulent times by examining how effective leaders think as well as how various management styles impact situations
and relationships within an organization.

Note: This course is only available as part of specific competency-based Tempo Learning® programs.

WMBA 6010 - Managing People and Promoting Collaboration♦

(3 sem. cr.)
Contemporary business environments are increasingly competitive, global, fast paced, and knowledge intensive. In these environments, effective use of human capital is vital to an enterprise’s success and survival. In this course, students will explore practical issues related to developing individuals and managing collaboration and will examine the skills and strategies necessary to address them effectively. Students will examine ethical and legal implications of managing a diverse workforce including issues that arise from cross-cultural differences and virtual work settings. The importance of communication as a tool to manage internal and external relationships is emphasized as it relates to the effectiveness of managing people to achieve organizational goals.

Prerequisites
- WMBA 6000

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6010A - Managing People and Promoting Collaboration

(3 sem. cr.)
Contemporary business environments are increasingly competitive, global, fast paced, and knowledge intensive. In these environments, effective use of human capital is vital to an enterprise’s success and survival. In this course, students will explore practical issues related to developing individuals and managing collaboration and will examine the skills and strategies necessary to address them effectively. Students will examine ethical and legal implications of managing a diverse workforce including issues that arise from cross-cultural differences and virtual work settings. The importance of communication as a tool to manage internal and external relationships is emphasized as it relates to the effectiveness of managing people to achieve organizational goals.

Prerequisites
- WMBA 6000A

WMBA 6020 - Fostering a Culture of Innovation♦

(3 sem. cr.)
In today’s complex and uncertain environment, innovation is important to achieving
business success. In this course, students will examine how to be an effective creative leader who can readily apply imagination to resolve complex problems. Additionally, students explore methods to establish a work environment conducive to creative thinking. Students will gain a set of proven methods, skills, and strategies that enable innovative breakthroughs to occur in a much more deliberate and predictable manner.

Prerequisites
• WMBA 6000

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

Note: This course is only available as part of specific competency-based Tempo Learning® programs.

WMBA 6030 - Managing Business Information Systems*

(3 sem. cr.)
The need for information and dependence on information systems and enabling technologies are ubiquitous in business. Businesses use information systems to collect, process, store, and manage data, which can be aggregated and disseminated in the form of information to support effective decision making. Students in this course explore how to realize optimum benefit from information systems and technology to support and improve business decisions, processes, and services at all levels of business in alignment with business goals to achieve competitive advantage and sustainable business performance.

Prerequisites
• WMBA 6000

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6030A - Managing Business Information Systems

Students in this course explore how to realize optimum benefit from information systems and technology to support and improve business decisions, processes, and services at all levels of business in alignment with business goals to achieve competitive advantage and sustainable business performance.

**Prerequisites**
- WMBA 6000

**Note:** This course is only available as part of specific competency-based Tempo Learning® programs.

**WMBA 6040 - Improving Business Performance**

(3 sem. cr.)
One of the most critical challenges in maintaining and improving organizational performance is identifying core strengths and weaknesses within the organization and across the more general value creation landscape. The focus of this course is on the challenges and opportunities for managers to create value and to increase organizational performance through the effective deployment of systems thinking and change management skills. Students in the course explore systems thinking as a process whereby problems are viewed as individual components within a larger system and explore how various operational and systems thinking frameworks can be utilized to optimize organizational performance in both industrial and service settings.

**Prerequisites**
- WMBA 6000

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*
optimize organizational performance in both industrial and service settings.

- WMBA 6000A

Note: This course is only available as part of specific competency-based Tempo Learning® programs.

WMBA 6050 - Accounting for Management Decision Making

(3 sem. cr.)
Accounting is the language of business. Managers must understand and be able to effectively use this language to create meaningful measures upon which to make appropriate decisions. They must know what to measure, how to measure, and what the consequences of the measurement might be. This course takes a rigorous stakeholder approach that integrates fundamental managerial accounting topics with strategic business analysis. Students will explore the use of accounting information to make effective business decisions; analysis of the impact of decisions on various stakeholder groups; and the development of sustainable solutions based on the information that is measured, analysis of various types of budgets, strategic planning, and forecasting as well as communicating accounting information effectively to various stakeholders.

Prerequisites

- WMBA 6000

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6050A - Accounting for Management Decision Making

(3 sem. cr.)

WMBA 6060 - Marketing for Competitiveness♦

(3 sem. cr.)
Effective managers know that a clear understanding of the role of marketing, as well as a grasp of effective marketing practices, is essential for organizations to succeed in today's fast-paced, competitive environment. In this course, students gain a working knowledge of both marketing theory and the practical application of innovative marketing tools and strategies. Students also explore how product, price, place, promotion, and people contribute to the marketing mix as they explore research-based insights into consumer behavior.
Prerequisites
• WMBA 6000

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6060A - Marketing for Competitiveness

(3 sem. cr.)
Effective managers know that a clear understanding of the role of marketing, as well as a grasp of effective marketing practices, is essential for organizations to succeed in today's fast-paced, competitive environment. In this course, students gain a working knowledge of both marketing theory and the practical application of innovative marketing tools and strategies. WMBA 6070 - Managerial Finance♦

(3 sem. cr.)
Today's companies are challenged to constantly do more with less. Effective managers know how to deploy scarce financial resources in ways to achieve optimum returns on these resources. Students will discover the latest financial tools and analytic methods to strengthen the capital investment decision-making process. Students will use critical-thinking skills to apply and, at times, challenge traditional financial theory, while balancing various stakeholder interests in the financial decision-making process. Students will examine a range of contemporary issues and techniques relevant to sound and ethical financial decision making.
Prerequisites
WMBA 6000

WMBA 6050

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6201 - Individual and Organizational Performance Management♦

(3 sem. cr.)

Performance management involves the ongoing activities of employee evaluation and development focused on achieving the organization’s short- and long-term goals. Performance management also is required to meet ethical and statutory requirements. Looking at the continuous nature of performance management underscores the importance of identifying and supporting talent development. Students assess performance management systems within the context of the defined system metrics supporting the organization’s goals, and they assess the role of performance management in strengthening the organization through diversity and inclusion.

Prerequisites

- WMBA 6000

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6401 - Human Resource Analytics♦

(3 sem. cr.)

Understanding the value of an organization’s human capital is crucial to its continuing success. Human resource (HR) management metrics provide the tools both for measuring value and for managing an organization’s human resources. Students in this
course explore HR analytics and metrics as tools for organizational and individual performance improvement. These tools establish a foundation for the effective deployment of performance metrics as part of the recruitment, talent development, and retention of human resources. They also facilitate alignment of the HR strategy with the business strategy. Students examine the power of analytics and an HR metrics dashboard. In addition, students investigate the role of human resource information systems (HRIS) and the importance of working with internal business partners from areas such as information technology, finance, and the executive team.

Prerequisites
- WMBA 6201

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6501 - Conflict Management and Negotiation♦

(3 sem. cr.)
Negotiation and conflict management are core responsibilities of human resource (HR) professionals and having the HR function as the conflict resolution facilitator is critical to employee/employer relationships. Taking a leadership role in facilitating conflict is critical to assuring employment law and regulatory compliance. In organizations with unionized workforces, the HR role in conflict resolution tactics may be constrained by collective bargaining agreements. Students in this course explore the challenges of conflict and dispute and work toward developing skills to identify different types of conflict solutions. Students engage in hands-on, practical exercises in negotiation and bargaining strategies as well as communication styles.

Prerequisites
- WMBA 6201

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6600 - U.S. Healthcare Delivery System

(3 sem. cr.)
Healthcare delivery is one of the largest industries in the United States. Students in this course are provided with the opportunity to gain thorough insight into the current structure and components of health services and delivery; they are also presented with an abbreviated history addressing the nature of population illness and disease. Students identify and describe components of the system, including patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods, and technology. They engage in activities and discussions focused on the continuum of services related to healthcare, such as hospitals and hospital systems, ambulatory care,
and long-term care. Students also explore issues related to these services, such as wellness, prevention, and community and public health, for a comprehensive understanding of the system. Students contextualize their study through the examination of current factors and challenges as well as the impact these challenges have on delivery and management.

WMBA 6601 - Managing First Things First

(3 sem. cr.)
Effective managers know how to identify, prioritize, and act upon the most important items of the myriad of tasks that can potentially distract them on any given day. Students will explore the qualities of effective managers and various management styles to identify those which resonate. Students will examine critical skills that are imperative to successful management including organizing and handling priorities; communicating effectively; motivating, empowering, and developing people; resolving issues and challenges; and managing oneself. Students will gain valuable skills and knowledge that they can apply immediately.

Prerequisites
- WMBA 6000

WMBA 6602 - Contemporary Topics in the U.S. Healthcare Delivery System♦

(3 sem. cr.)
Students in this course assess the causes and consequences of historical events on health and medical care in the United States. They appraise the impact of barriers related to cost, quality, and access to health and medical care. Students analyze unique and complex aspects of subsystems and differentiate vertical and horizontal integrated healthcare delivery systems. They compare characteristics of healthcare and medical care in the United States with healthcare and medical care systems in other countries. Students also evaluate current and future issues, trends, and forces in healthcare and medical care reform.

Prerequisites
- WMBA 6000

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6603 - Health Policy and Economics

(3 sem. cr.)
Managers in healthcare must possess the skills needed to assess economic principles and policies to make important decisions regarding healthcare and services. In this course, students examine the application of health policy and economic principles in regard to
managerial decision making. They learn about the process for policy development and implementation, key stakeholders and interest groups involved in the health policy process, and how health policy changes over time within the United States. Students assess and discuss key policy initiatives related to cost, quality, and access. They also engage in assignments designed to advance their understanding of and ability to apply economic principles, such as supply, demand, and the determination of market price.

**WMBA 6604 - Law, Ethics, and Policy in Healthcare Administration**

(3 sem. cr.)
The rapidly evolving healthcare system presents the healthcare administrator with complex challenges and risks. Healthcare administrators must possess the skills needed to assess external and internal healthcare policies to influence organizational design and delivery of healthcare services. Students assess and discuss key policy initiatives from the diverse perspectives of policymakers, interest groups, and other stakeholders. Through coursework, students focus on required knowledge of laws and regulations developed by policymakers that impact the healthcare organizations, and they review key laws that govern patient care delivery, employee relations, contracts, and fraud. Emphasis will be placed on legal and regulatory failure points that administrators must avoid in designing and implementing policies and practices within the healthcare organization. To help frame these concepts, students examine the ethical underpinnings and principles that healthcare organizations and administrators follow in the delivery of services to patients.

**Prerequisites**
- WMBA 6000

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**WMBA 6605 - Finding Your Inner Leader**

(3 sem. cr.)
Being an effective, authentic, and trustworthy leader requires considerable self-awareness based on commitment to candid self-reflection and the wisdom to recognize how to best serve others through creating shared vision for a better future. In this course, students examine their values, experiences, skills, capabilities, preferences, and knowledge in context of their leadership aspirations. Students examine factors that affect their ability to influence and inspire others and create plans to strengthen these leadership skills. Students learn strategies to navigate in turbulent, changing environments that often pose difficult choices and discover how leaders rise to meet challenges and opportunities.

**Prerequisites**
- WMBA 6000
WMBA 6607 - Financial Management

(3 sem. cr.)
Students in this course are introduced to the terminology, theory, concepts, and techniques used in the accounting and finance functions in healthcare organizations. They explore the important role of finance in healthcare organizations, in addition to the various techniques to develop, manage, and control finances. Using an applied approach to healthcare finance, students learn how to develop, apply, and interpret various financial tools, including budgets, sources of revenue/reimbursement by payer, income statements, balance sheets, dashboards, statements of cash flow, pro formas, return on investment analysis, financial ratios, capital budgeting, debt service and borrowing, depreciation, and cost allocation and cost accounting techniques. Students develop portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.

WMBA 6608 - Healthcare Financial Management and Economics

(3 sem. cr.)
In this course, students gain knowledge of economics principles such as cost, quality, and access as they relate to the healthcare world. The principles of healthcare financial management, including accounting and finance, are vitally important to the viability and ongoing operations of a healthcare business. Students have the opportunity to interpret and analyze the financial statements of a business, use and analyze financial ratios, utilize variance analysis, understand and implement operating and capital budgeting, and develop knowledge of the business planning process. Students create portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.
Prerequisites
- WMBA 6000

(ID Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6610 - Talent Management

(3 sem. cr.)
One of the most important assets of an organization is its talent, in other words, its human capital. However, too often there is little planning or strategy applied to the creation and management of this huge asset. In this course, students have the opportunity to develop the skills and knowledge to create and work effectively within a talent management and planning process. They explore recruiting strategies within a human capital development context and focus on building specific skills in managing an organization's talent through position planning, talent selection and placement, and retention. Using industry best practices, students also engage in applications and group
projects to practice developing initiatives that align with organizational strategies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6613 - Human Resource Metrics

(3 sem. cr.)
Understanding the specific value of the human resource (HR) capital of an organization is crucial. Metrics for HR management provide the tools for both measuring human capital value and for overseeing and managing an organization’s human resources. Students in this course explore HR metrics as tools for organizational and individual performance improvement. They work toward establishing a foundation for the effective deployment of performance metrics as part of the recruitment, training and development, and retention of human resources. Students learn which metrics to employ and how to manage the results — a pivotal responsibility of HR managers. Students in this course are provided with the tools to make informed decisions required to create, apply, interpret, and manage results of appropriate metrics as an HR professional.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6615 - Building Organizational Culture: Leaders as Architects

(3 sem. cr.)
Organizational leaders act as partners in shaping, and are shaped by, the organizational cultures they seek to influence. Students in this course learn to recognize the elements that make up an organization’s culture as well as ways to harness these for positive change and organizational success. They explore perspectives on how to make conceptual sense of the cultural landscape of organizations and examine the implications for leading and building effective communities at various levels of application. Students assess and discuss a variety of topics, such as tools of self-development, the reciprocal nature of leadership, and cultural components.

Prerequisites

- WMBA 6000

WMBA 6617 - Performance Management

(3 sem. cr.)
Performance management is a set of practices and processes that creates career opportunities to attract appropriate resources, establishes an environment that nurtures individual productivity and development, and smoothly transitions individuals to their next position or organization. Students in this course are provided with the opportunity to address these three key sets of processes. They practice writing job descriptions,
selecting the right employees, developing skill-based performance standards, effecting relevant onboarding programs, and implementing educational and training programs intended to drive the success of employees and the organization as a whole. They explore how to maximize employee productivity through structured feedback, coaching, reflective performance development conversations, effective compensation models, employee recognition programs, and career development paths. Students also examine ways to improve performance management systems by integrating feedback from the exit interviews of valued employees.

 Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6620 - Practices in Project Management♦

(3 sem. cr.)
Students in this course are introduced to the knowledge, skills, tools, and techniques needed to successfully manage projects throughout the life of a project, known as the project life cycle. By learning about the project management Knowledge Areas and Process Groups as well as the distinguishing characteristics of each, students gain an appreciation for how these two dimensions of project management interact in initiating, planning, executing, monitoring and controlling, and closing a project.

Prerequisites
- WMBA 6000

 Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6623 - Enterprise and Project Risk Management♦

(3 sem. cr.)
Project management involves an ongoing, and nearly inevitable, variation of risks to which managers must be attuned and ready to mitigate. In this course, students learn how to plan, analyze, respond to, and control qualitative and quantitative risk in projects. They examine the internal risks associated with managing projects and the external risks associated with customer behavior, the supply chain, transportation and distribution channels, and acts of nature within the framework of the organization’s overall risk strategy. Assessing real-world examples of project risks, students learn about strategies for working with project stakeholders to identify and respond to risk within defined ethical and legal standards.

Prerequisites
- WMBA 6000

 Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
WMBA 6627 - Stakeholder Management and Organizational Behavior

(3 sem. cr.)
One role of the project manager is to lead teams in complex and diverse organizational settings while concurrently communicating with all stakeholders. In this course, students analyze this dual role and examine how individual and group behavior impacts organizational effectiveness. They discover how using influence, rather than organizational power, leads to more successful project management. Students learn ways to design projects to support organizational goals and how to build and engage organizational capital (intellectual, human, physical, financial, and structural). They also apply stakeholder management practices to engage in and manage relationships with the community of project stakeholders.

Prerequisites
- WMBA 6000

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6633 - Personal Leadership: Mentoring and Coaching

(3 sem. cr.)
Mentoring requires an understanding and integration of many theories, including leadership, interaction, and communication, that support the development of effective leaders. Students in this course understand and apply skills of effective mentoring, such as active listening, learning, empowering, and enabling change. Students engage in practical exercises, such as using feedback to create interactive dialogue and asking questions to acquire a deeper understanding of mentoring and coaching processes. In consideration of modern and virtual environments, students explore the challenges of mentoring or coaching individuals in a virtual or team setting.

Prerequisites
- WMBA 6000

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6635 - Harnessing the Power of Data and Information

(3 sem. cr.)
Effectively using data and information can make the difference in whether the best decisions are made or problems are solved correctly. There are multiple approaches to practical managerial problem solving that are rooted in the systematic collection, analysis, and display of relevant data and information. In this course, students examine the importance of data, beginning with the process of transforming data into information, and then focusing on the best methods for presenting that information in
support of sound and ethical decision making. Students evaluate common misinterpretations or errors in working with data and determine how to detect data and information presented in a deceptive manner. Students explore current paradigms in data-based decision making and problem solving. They learn how they can use these analytical-thinking practices to improve their general managerial decision-making skills.

Prerequisites
- WMBA 6000

WMBA 6640 - Advanced Managerial Finance♦

(3 sem. cr.)
The focus of this course is on how students use financial information for internal decision-making purposes. It is designed for the leaders who will be using, rather than producing, financial information. Decision making is an art. Good decision makers need to be able to anticipate the alternatives, evaluate the advantages and disadvantages of each, and recognize the tradeoffs inherent in each alternative. Students in this course will approach financial decision making using this framework that also overtly includes rigorous stakeholder analysis and implications. Stakeholder analysis sometimes leads to controversial decision alternatives, but it is this exercise that will develop the students’ talents for challenging the traditional and finding the balance between stakeholder expectations and creating opportunity for the organization. The objective of this course is for students to apply finance theory and principles to the analysis of important business problems. Specific topics will include capital budgeting, cost of capital, real options, capital structure, payout policy, and enterprise valuation.

Prerequisites
- WMBA 6070

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6643 - Applications in Corporate Finance I♦

(3 sem. cr.)
Corporate finance managers use a variety of tools when identifying possible alternatives for recommendations on financial management decision making. Students in this course use the tools of finance to help managers maximize their firm's value. Topics include the time value of money, net present value, internal rate of return, capital budgeting, capital structure, working capital management, multinational concepts, and dividend policy.

Prerequisites
- WMBA 6070

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
WMBA 6647 - Applications in Corporate Finance II♦

(3 sem. cr.)
Students taking this course build on WMBA 6643 and focus more deeply on contemporary issues and optimal financial decision making. Students participate in hands-on demonstrations of how to become more skillful in various financial management environments. Topics include valuation, advanced capital budgeting, cost of capital, risk, standard deviation, variance, covariance, capital asset pricing model, and beta. Additional topics include multinational concepts, leasing, option pricing, derivatives, hedging, and other advanced financial applications.
Prerequisites
• WMBA 6070

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6650 - The Impact of Entrepreneurship♦

(3 sem. cr.)
In this course, students continue to build their entrepreneurial skills and knowledge base by addressing problems drawn from real-world organizations. Students analyze how the organization contributes to society (local, national, or international), how entrepreneurship and commercial activities affect the environment, and how the potential of forming "glocalities" (a combination of individuals, business organizations, and political agencies) becomes more significant in the future in terms of working in unison to better society.
Prerequisites
• WMBA 6000

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6653 - New Venture Creation and Entrepreneurship♦

(3 sem. cr.)
Students in this course focus on the emerging trend of business organizations moving from a profit-only mentality to one in which they utilize their profits and other resources to enhance society. Students explore entrepreneurial concepts and processes that apply to startup enterprises as well as those that are well established with an innovative focus or entrepreneurial spirit. Topics such as market opportunity, risk management, change management, innovation, product development, financing and raising capital, intellectual property, and commercialization are covered. Students apply these and related concepts to problems common to real-world organizations.
Prerequisites
WMBA 6000

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6657 - Managing a Sustainable Small Business♦

(3 sem. cr.)
Small businesses make up a large majority of all businesses in the United States. Students in this course are presented with the fundamentals of successfully establishing a sustainable small business enterprise. They address small business organization, operation, management, and sustainability. Business topics in the areas of planning, accounting, finance, and marketing are analyzed through the lens of the small business organization. Students analyze the unique relationships between government and small businesses. Topics include how to identify what determines the status of being a small business with local, state, and federal government agencies as well as how small businesses apply sustainable practices to be profitable. Students investigate the crucial role that technology plays in managing small business operations and evaluate popular software applications for efficiently managing those functions.

Prerequisites
- WMBA 6000

WMBA 6660 - Communicating Using Social and Digital Media♦

(3 sem. cr.)
While some companies may still be asking, "Why should we care about social media?," most are now asking, "How can we leverage the power of social media?" In this course, students examine how social media has changed the way consumers interact with brands and apply elements of storytelling to develop a social media strategy for an organizational scenario. In addition, students explore issues of ethics, privacy, and media law that are heightened by social media and digital communication distribution. Topics include types of social media, audience appropriateness, reputation management, social media strategy, evaluation methods, and the communications regulatory environment, including media law and privacy.

Prerequisites
- WMBA 6060

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
WMBA 6663 - Market Research and Customer Insights♦

(3 sem. cr.)
Understanding consumer behavior is essential for developing and effectively marketing products and services. In this course, students can learn how to use customer data and insights to improve strategic marketing decisions and improve performance. Students have the opportunity to analyze factors that influence buyer behavior during all stages of the purchasing process and to consider how learnings can be translated into product strategy and related marketing decisions. Additionally, students will study market segmentation and targeting practices as a key means of differentiation.

Prerequisites
- WMBA 6060

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6667 - From Marketing Strategy to Execution♦

(3 sem. cr.)
How can a marketing plan help a business meet its goals and objectives? How can a marketing plan help capitalize on consumer insights and trends? How can the latest innovations and communication strategies be used to reach the target audience? In this course, students will be immersed in all aspects of developing a comprehensive 3-year marketing plan that aligns with an organization’s business strategy and helps marketers make better decisions about their products, services, customers, brand, and competition. Students can learn to apply best practices for market segmentation, consumer insights, competitive analysis, brand positioning and strategy, and consumer acquisition and retention strategies, as well as developing tactical ideas for each strategy, and providing financial justification for the plan.

Prerequisites
- WMBA 6060

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6670 - Applications in Global Business♦

(3 sem. cr.)
A fundamental shift is occurring in today’s business environment as international borders become less of a barrier to trade and investment. Successful businesses recognize the importance of a global mindset and a strong understanding of the global forces affecting them. In this course, students will examine the forces and institutions that are shaping international trade and investment flows, explore the many options for "going global," and evaluate the complex challenges that organizations face when moving into new and
diverse cultural, political, business, and economic environments. Topics include: an overview of multinational institutions; alternative methods for entering global markets; the effects of regional integration on multinational businesses; risks faced by multinational organizations; supply chain and Research and Development (R&D) considerations; sustainability in a global environment; and financial management and ethics.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6673 - Case Studies in Global Business

(3 sem. cr.)
In this course, international business topics are explored in depth and in context through real-world case studies. Students analyze the success and failure of international business ventures across a wide range of industries, developing their analytical skills in the process.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6675 - Critical Thinking for Effective Management

(3 sem. cr.)
Managers encounter a variety of challenges on a daily basis, which require the ability to employ existing tools and strategies to strategically communicate with individuals and the organization at large and to understand the different types of attitudes and values of others. Individuals with these skills are most successful when their efforts are coupled with the ability to think critically and analytically. Students are provided with the opportunity to improve their overall critical-thinking and reasoning skills within a managerial context. Using relevant management articles, case studies, and current topics analyses, students sharpen their diagnostic-reading skills and learn to construct effective, ethical, evidence-based arguments, which are fundamental capabilities of effective managers. They also examine common fallacies in thinking and reasoning as well as the rhetorical use of language to formulate convincing and effective arguments.

Prerequisites
- WMBA 6000

WMBA 6677 - Competing in the Global Economy

(3 sem. cr.)
Over the last few decades, a fundamental shift in the world economy has been underway. No longer are national economic interests and business operations largely confined within well-defined geographic borders. Phenomena such as the explosion of the Internet, global sourcing, and the reduction in barriers to cross-border trade have
all contributed to the creation of a truly global economy. Students in this course focus on the global environment of business and explore how the international sociocultural, political, legal, economic, physical, and historical environments affect business practices and policies. Students will learn the skills and methodologies required for market analysis and business strategizing on a global scale. In particular, students identify the internal and external forces affecting an organization's ability to compete both domestically and globally.

**Prerequisites**

- WMBA 6000

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**WMBA 6681 - Decision-Making Tools for Today's Financial Professional**

*(3 sem. cr.)*

Today's effective finance professionals use a variety of financial management tools as they seek to evaluate alternatives and make sound financial recommendations. Students will gain practical experience of a financial professional's role by using financial modeling tools such as breakeven and cost-volume-profit analysis for model pricing and cost sensitivity, forecasting and cost prediction, variance cost analysis, relevant cost analysis, project valuation and prioritization using payback, rates of return, and discounted cash flow methods. Students' increased diagnostic critical-thinking skills will help them to construct effective, ethical, fact-based arguments, which are among the fundamental capabilities required for financial decision making. Using relevant management articles, case studies, and topic analyses, students also examine how to align business needs with fact-based solutions, how to identify new opportunities, and how to manage and enhance an organization's competitive position.

**Prerequisites**

- WMBA 6050

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**WMBA 6683 - Managerial Accounting for Organizational Performance**

*(3 sem. cr.)*

One of the primary functions of the accountant's role is preparing internal accounting information that can be used by management for effective decision making and organizational performance. Students can gain a practical perspective into this role through case study review and analysis of pricing and contribution margin analysis, cost management and allocation, activity-based costing and throughput accounting, and inventory management. Students assess performance measurements, including key
performance indicators, balanced scorecard, and forecasting. They explore operating and capital budgeting and financial planning techniques and become familiar with quantitative models and approaches used in management accounting. Through this course, students learn about the different departments and operating divisions within an organization and how they work individually and collaboratively to handle accounting responsibilities.

Prerequisites
- WMBA 6050

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6687 - Managing Operational and Financial Business Risks

(3 sem. cr.)
Accountants and business managers must be astute and proactive in managing a business to combat the inevitable threat of operational and financial risks, including those involving credit, market, liquidity, reputation, technology, and legality. In this course, students assess the tools used by accountants and managers in managing these risks. They explore the various processes used to identify, analyze, and assess risks, and they learn the appropriate use of financial and operational controls to mitigate such risks. Additionally, students examine ways to implement techniques, such as developing a risk control matrix and using the concepts of the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework to improve an organization’s enterprise risk management.

Prerequisites
- WMBA 6050

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6690 - Message Design, Audience, and Evaluation

(3 sem. cr.)
Using reputable sources lends credibility to a message. But how does a communication professional determine which supporting information is appropriate to help craft a message, gain audience insight, choose a communication channel, or evaluate the impact of a message? In this course, students examine research approaches that are common to the field of communication and appropriate for answering questions about audiences and evaluating messages. Topics include simple quantitative analysis and qualitative research approaches such as focus groups, interviewing, and surveys, as well as basic metrics such as cost of media, cost per sale, return on investment, and web analytics.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
WMBA 6693 - Interpersonal Communication♦

(3 sem. cr.)
The ability to communicate with others influences success in both professional and personal settings. As communities and places of work become increasingly diverse, the intersections of interpersonal and intercultural communication also increase, and communicators need to be aware that the cultural diversity of their audiences should affect the way they convey information. Students in this course examine interpersonal and intercultural intersections and study the influence of cultural diversity on interpersonal communication. By examining theory, students develop an approach to practice and hone individual strategies for communicating successfully in diverse interpersonal situations. Topics include interpersonal communication theory, intercultural communication theory, individual communication competence, nonverbal channels, person perception, conflict resolution, and listening and communication barriers.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6695 - Communication for Leaders and Managers♦

(3 sem. cr.)
Effective communication is frequently cited as one of the most important factors in managerial and organizational success—as well as one of the areas of greatest dissatisfaction. In this course, students take a close look at the components of effective communication and hone strategies for communication success. They explore how self-perception and perception of others affect communication and will develop skills for communicating more effectively with diverse audiences. Topics include the communication process, interpersonal communication, self-awareness in communication, communication channels and mediums, and communicating across and beyond the organization.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

WMBA 6697 - Creative Strategy and Execution: From Brief to Presentation♦

(3 sem. cr.)
Students in this course leverage a wide range of knowledge and skills to conceive and execute a global communications campaign that uses traditional and digital media. Students have the opportunity to develop and review a creative or innovative brief grounded in concepts of integrated marketing communication. Students generate solutions for that brief across the phases of the creative process, present and defend
solutions, and evaluate solutions using metrics. Topics include the creative process, integrated marketing communication, selecting appropriate channels, pitching and selling ideas, and evaluation metrics.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**WMBA 6698 - Public Relations Concepts and Strategy**

(3 sem. cr.)
To successfully build and manage the relationship between an organization and the public in today's increasingly global community, a strategic communications plan requires the use of both traditional and new technology. Students in this course explore, from a global perspective, the needs of various public relations stakeholders, including the customer, the press, and the investor. Topics include how to change behaviors, advocate for causes, design messages for specific audiences, select appropriate communication channels, and evaluate results of public relations campaigns. Students also consider the potential legal and ethical aspects of the practice of public relations.

**WMBA 6880 - Social Entrepreneurship and Innovation: A Global Perspective**

(3 sem. cr.)
Social entrepreneurs are gaining international attention motivated by the desire for change and to see the world as it can be, not as it is. Students in the course will learn how social entrepreneurs have developed creative solutions to address social problems. The intention of the course is to develop knowledge, appreciate of the role of social entrepreneurs who create social change, deepen students' understanding of the world around them, and to inspire them to use their skills and knowledge to be, as Gandhi said, "the change you wish to see in the world."
Students in this course will gain knowledge about social entrepreneurs and how they are creating solutions to address societal problems, learn how to develop creative solutions to address social problems, and empower students to see social entrepreneurship as a force for social change. The course is designed for those who want to gain valuable tools to prepare them to make an impact on the lives of others. This course will be housed in the School of Public Policy and Administration for future upgrades and course maintenance.

**WMBA 6881 - Grant Writing**

(3 sem. cr.)
Grant writing is the method by which external funding can be secured by educational institutions, community organizations, and nonprofit agencies to provide services to the community. In this course, students will understand processes and gain basic skills needed for successful grant writing. These processes and skills consist of developing a project idea, identifying a funding agency, writing a compelling needs statement with
goals and measurable objectives, developing a budget, collaborating with other people, submitting the grant application, understanding the grant review process, responding to the review, and managing the grant award. Course assignments allow students to apply and practice grant writing skills by developing a grant proposal based on an actual Request for Proposal (RFP).

WMBA 6882 - Initiating and Managing Change

(3 sem. cr.)
Today’s business environment is constantly evolving to accommodate changes in economy, leadership, new regulations, and internal reduction and growth. Organizations require leaders who know how to work through barriers to effect positive and efficient organizational change. Students in this course learn about situations that constitute and require such change. They engage in a variety of assignments through which they explore effective strategies for initiating change and anchoring change into corporate culture to achieve organizational goals as well as for managing unplanned or unwelcome change. Students explore a variety of approaches and methods to transition individuals and organizations within evolving environments. They distinguish between reactive responses and proactive responses to change and examine the implications of culture, inertia, and uncertainty. Additionally, students explore the importance of understanding motivation and effective communication in mitigating negative reactions to change and facilitating the change process itself.

WMBA 6883 - New and Emerging Technologies

(3 sem. cr.)
Through this course, education professionals consider the future of teaching and learning, discover promising trends in technology, and investigate opportunities to become leaders in the field of technology and learning. They consider how to address school-wide challenges, such as limited resources and resistance to change, and they explore skills and strategies, such as grant writing and leading change. Additionally, they complete a capstone project that demonstrates their ability and willingness to become advocates and change agents who use technology to address challenges and create opportunities within the field of education.

WMBA 6884 - Issues and Trends in the Early Childhood Field

(3 sem. cr.)
Leaders in the early childhood field must have in-depth understanding of the critical issues and trends affecting young children, their families, and the field. Education professionals in this course explore changing demographics; political and economic influence on programmatic funding streams; current debates related to school success, effective assessment and the achievement gap; and brain research influence on early development, care, and education from a historical and current perspective. Sharing
perspectives and making connections with the professional world, educational professionals post blogs to establish contacts with early childhood professionals; reach out to international contacts in the field to gain an understanding of poverty issues in different regions, issues related to excellence at the forefront of professional discussions, and insight on further development opportunities; and share web resources, such as websites and e-newsletters.

**WMBA 6990 - Capstone: Sustainable Business Practices and Strategies**

(3 sem. cr.)
The purpose of the capstone course is to integrate the knowledge and concepts students have gained through the MBA program. Students will practice their skills and employ their knowledge by evaluating business strategies capable of achieving sustainable competitive advantage. Students in this course will be required to identify and address challenges and opportunities found in today's complex and often uncertain business environment. Students complete their transformational journey through the program by reflecting on their learning and will consider the next phase of their career development. The aim of the course is to improve the students' ability to manage in an environment requiring both strategic and operational knowledge.

**Prerequisites**
- All required core and concentration courses

**WMBA 6990A - Capstone: Sustainable Business Practices and Strategies**

(3 sem. cr.)
The purpose of the capstone course is to integrate the knowledge and concepts students have gained through the MBA program. Students will practice their skills and employ their knowledge by evaluating business strategies capable of achieving sustainable competitive advantage. Students in this course will be required to identify and address challenges and opportunities found in today's complex and often uncertain business environment. Students complete their transformational journey through the program by reflecting on their learning and will consider the next phase of their career development. The aim of the course is to improve the students' ability to manage in an environment requiring both strategic and operational knowledge.

**Prerequisites**
- All required core and concentration courses/competencies

**Note:** This course is only available as part of specific competency-based Tempo Learning® programs.

**WSRO 1002D - Doctoral Student Readiness Orientation**
The Doctoral Student Readiness Orientation (SRO) is a self-paced course that includes resources on time management and conducting research. In the orientation's practice environment, doctoral students will follow a student avatar through exploring doctoral coursework, learning about participating in residencies, and becoming an independent scholar-practitioner. Students will take a quiz that measures their understanding of the material in the SRO. Students will have access to this orientation course in their Walden portal for 1 year after enrollment so that they can refer to its resources as needed.

**WSRO 1002M - Master's Student Readiness Orientation**

The Master's Student Readiness Orientation (SRO) is a self-paced course that includes a tour of the online classroom. In the orientation's practice environment, master's students will follow a student avatar through creating a discussion post and working on an assignment. Students will take a quiz that measures their understanding of the material in the SRO. Students will have access to this orientation course in their Walden portal for 1 year after enrollment so that they can refer to its resources as needed.

**WSRO 1002U - Undergraduate Student Readiness Orientation**

The Undergraduate Student Readiness Orientation (SRO) is a self-paced course that includes a tour of the online classroom. In the orientation's practice environment, undergraduate students will follow a student avatar through creating a discussion post and working on an assignment. Students will take a quiz that measures their understanding of the material in the SRO. Students will have access to this orientation course in their Walden portal for 1 year after enrollment so that they can refer to its resources as needed.

**WWOW 1000D - Doctoral Walden Orientation and Welcome**

In the orientation's practice environment, doctoral students explore classroom navigation and assignment submission, time management and study skills, Walden's network of support resources, specific information about resources for doctoral students, and many other topics. Students take Pulse Check and Post-Check assessments that help them identify areas they would like to learn more about. Students have access to this orientation course in their Walden portal for 180 days after enrollment so that they can refer to its resources as needed.

**WWOW 1000M - Graduate Walden Orientation and Welcome**

In the orientation's practice environment, students explore classroom navigation and
assignment submission, time management and study skills, Walden's network of support resources, and many other topics. Students take Pulse Check and Post-Check assessments that help them identify areas they would like to learn more about. Students have access to this orientation course in their Walden portal for 180 days after enrollment so that they can refer to its resources as needed.

**WWOW 1000U - Undergraduate Walden Orientation and Welcome**

(0 cr.)
In the orientation's practice environment, students explore classroom navigation and assignment submission, time management and study skills, Walden's network of support resources, and many other topics. Students take Pulse Check and Post-Check assessments that help them identify areas they would like to learn more about. Students have access to this orientation course in their Walden portal for 180 days after enrollment so that they can refer to its resources as needed.

**WWOW 1003D - PhD Counseling Walden Orientation and Welcome**

(0 cr.)
In the orientation's practice environment, PhD in Counselor Education and Supervision students explore classroom navigation and assignment submission, time management and study skills, Walden's network of support resources, specific information about resources for doctoral students, and many other topics. Students take Pulse Check and Post-Check assessments that help them identify areas they would like to learn more about. Students have access to this orientation course in their Walden portal for 180 days after enrollment so that they can refer to its resources as needed.

**WWOW 1003M - MS Counseling Walden Orientation and Welcome**

(0 cr.)
In the orientation's practice environment, master's level counseling students explore classroom navigation and assignment submission, time management and study skills, Walden's network of support resources, and many other topics. Students take Pulse Check and Post-Check assessments that help them identify areas they would like to learn more about. Students have access to this orientation course in their Walden portal for 180 days after enrollment so that they can refer to its resources as needed.
