Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle,
communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

CRJS 6111 - Informational Technology in Criminal Justice

(5 cr.)
In the 21st century, criminal justice organizations have evolved in the way they use records and data management systems to protect and gather evidence. While new technologies and the use of social media have increased and have assisted criminal justice professionals in tracking and apprehending criminals, there still are challenges for law enforcement, the courts, and prison systems. In this course, students will explore case studies related to challenges with protecting and collecting evidence as well as ethical dilemmas with the use of technology. Students examine how technology is used in criminal law, law enforcement, criminal procedures, or court procedures. In addition, students can look into the future of information technology as it relates to criminal justice.

CRJS 6136 - Criminal Behavior

(5 cr.)
Students in this course are provided with contemporary views, theories, and case-study analysis of maladaptive and criminal behavior, victimology, and victim-offender relationships. A broad conceptualization of criminal behavior, such as that woven from biological, sociological, and psychological perspectives is explored and evaluated. Theories of crime and the application of risk factors associated with criminal behavior are examined. Additionally, students will be exposed to specific offender groups, both violent and nonviolent, including psychopaths, serial and mass murderers, criminal paraphiliacs, arsonists, white-collar thieves, scam artists, domestic terrorists, and others.

CRJS 6137 - The Nature of Crime and Criminology

(5 cr.)
Students in this course are introduced to contemporary views and theories of maladaptive and criminal behavior. They examine a broad conceptualization of criminal behavior from an interdisciplinary perspective as well as theories and application of
criminal profiling. Students also explore specific views of criminal behavior germane to
groups, such as psychopaths, serial offenders, and sexually violent predators. At the end
of this course, students will have an understanding of the theories and practices that are
the foundations of the field of criminology.

**CRJS 6200 - Risk Assessment, Preparedness, and Disaster Mitigation**

(5 cr.)
Risk assessment and mitigation are key components to effective emergency management
and all-hazard planning and response. Students in this course focus on the methods and
techniques required to assess an organization or government's risk associated with the
protection of human life and capital assets. They study ways to evaluate the social
vulnerabilities to disaster and the special needs of at-risk populations, and they explore
methods to reduce vulnerabilities and build capacity through structural and
nonstructural mitigation. Additionally, students complete the FEMA Emergency
Management Institute course IS-393.a: Introduction to Hazard Mitigation as part of this
course.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

**CRJS 6201 - Psychological Aspects of Violent Crime**

(5 cr.)
Through this course, students explore the nature and extent of the psychological nexus
of criminal homicide across various environments to include serial, mass, spree,
workplace violence homicide, school shooter homicide, and child abduction homicide.
Students will examine the theories and trends of these types of violent crime regarding
offender and victim psychological and behavioral characteristics.

**CRJS 6202 - Human Trafficking**

(5 cr.)
Human trafficking is one of the most serious and widespread types of crime occurring at
both the national and international levels. Human trafficking is a complex and global
issue that is driven by economic, social, and political forces and has many direct impacts
at the regional, national, and international levels. In this course, students explore the
types (labor and sex trafficking), prevalence, risk factors, responses, and best practices
related to treatment in order to address this human rights issue. Students also complete
authentic assessments designed to simulate real-world professional tasks required in the
field. Students will develop critical-thinking skills and engage in reflective practice
regarding the law enforcement response to human trafficking and many impacts to
direct victims and communities.

**CRJS 6203 - Victimology**
(5 cr.)
What is the relationship between victims and those who commit crimes against them, and how does the criminal justice system protect and respond to victims of crime? In this course, students have the opportunity to answer such questions through a comprehensive assessment of victimology, a relatively new discipline in the field of criminal justice. Students examine victim patterns and tendencies and learn how victims interact with the police and the legal system. They also examine how factors of class, race, and sexual orientation affect the perception of the victim by different constituents, including the public, the court system, and the media. Students assess and discuss the concept of primary and secondary victims and gain practical insight on a range of services and resources available to all types of victims.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**CRJS 6204 - Sex Offender Behavior and Treatment**

(5 cr.)
In this course, students explore the traits and behaviors of both deviant and criminal sex offenders. Legal issues raised in both criminal and civil cases that involve sex offenses will be discussed. Students analyze the empirical evidence behind various assessment tools and treatment plans for sex offenders. They evaluate the risk for future sexual offense behavior and whether the protection of society outweighs the loss of civil liberty experienced by civil commitment for sex offenders.

**CRJS 6205 - Psychological Aspect of Cybercrimes**

(5 cr.)
In this course, students review the psychobehavioral factors of criminals who engage in criminal activities using digital social media and other online resources. Students analyze the types and trends of both domestic and global cybercrime. In addition, students will examine characteristics of cyber perpetrators and cyber victims. Students are also provided a foundational understanding of the origins and consequences of human trafficking; sexual exploitation of children from psychological, social, and legal perspectives; and how technology facilitates these types of crimes. Students in this course examine the best practices in preventing and responding to cybercrimes.

**CRJS 6207 - Comparative, International, and Global Justice**

(5 cr.)
Criminal justice systems vary by country and include different approaches for policing, prosecution, sentencing, and punishment. Understanding criminal justice systems and approaches in other countries can often lead to the implementation of new and more effective approaches in one's own country. In this course, students will explore crime and justice from a global perspective, identifying crimes and criminal proceedings that
affect multiple countries and promote global justice. Students will also compare crime rates and criminal justice systems between and among specific countries and evaluate the fairness and efficacy of different criminal justice systems, models, policing approaches, and punishments. As students progress through the course, they will be asked to consider evidence-based practices that could be applied universally to combat crime and how their learning during each module leads to a greater understanding of the criminal justice system and combatting crime in their own country.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6215 - Controversies in Criminal Justice

(5 cr.)
Justice is at the heart of the U.S. democratic system, yet opposing viewpoints surrounding and within the system often muddle interpretations of the law and the development of policies to promote and enforce justice. In this course, students examine events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act, for example, the terrorist acts of September 11, 2001. They learn how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties. Through discussion with peers, assessment of contemporary articles, and examination of Supreme Course cases, students have the opportunity to reflect on and potentially broaden their own opinions and perspectives on current criminal justice affairs in regard to issues of law enforcement, public perception, policy development, and ethics.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6216 - Criminal Justice Research

(5 cr.)
Criminal justice encompasses many roles and responsibilities, including responding to victims, punishing or rehabilitating criminals, and developing laws and policies. To carry out these tasks effectively and responsibly, taking into account current trends and ethical considerations, criminal justice professionals need to understand underlying factors, such as the root causes of crime and the impact of crime on communities. In this course, students examine a range of research methodologies, including quantitative and qualitative methods, that professionals use to collect data and analyze trends in criminal justice. They examine models, metrics, and tools used to evaluate criminal justice programs and policies, and they assess the strengths and limitations of research methods. Students also learn about threats to the validity of data and consider the legal and ethical issues associated with research and evaluation methods.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
CRJS 6217 - Technological Solutions and 21st-Century Crime*

(5 cr.)
In consideration of modern technological innovation and the spread of knowledge through digital means, the relationship between technology and criminal activity is increasing. In this course, students explore this relationship and gain a comprehensive view of cyber crime, including current trends. They learn how law enforcement agencies use technology to track and apprehend criminals. Through real-world scenarios, students examine legal responses to cyber crime and learn different approaches and techniques for solving cyber crimes and handling related challenges. Students also have the opportunity to gain a comprehensive understanding of building cases and prosecuting crimes through practical exercises in identification, data mining, and the protection and gathering of evidence.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6218 - Applied Communications*

(5 cr.)
Practitioners in the field of criminal justice must be adept in preparing communications for colleagues, supervisors, and the public. In this course, students have the opportunity to develop the skills needed to produce effective documents that criminal justice professionals use on a daily basis, such as court records, data analysis reports, and program-implementation plans. Students learn how to conduct interviews, gather background information, and use decision-making and critical-thinking skills to create clear, concise communications. They broaden their ability to write for a specific purpose and a highly defined audience as they incorporate criminal justice principles and practices into a variety of communication tools.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6245 - Social Psychology

(5 cr.)
In this course, students use the lens of social psychology to examine both social cognitions and social behavior—nearly all phenomena that pertain to the individual in society. Students explore the topics of perceptions, attitudes, relationships and attraction, the motivation to help others, prejudice and aggression, conformity and obedience, group behavior, and the influence of culture, and they consider how knowledge of these topics can be used to effect positive social change. The application of what students learn in this course culminates in a final project in which they develop a
plan for using social psychology research to address a significant social problem. Moreover, their learning in this course will extend to their personal and professional lives and truly enable students to effect positive social change as scholar-practitioners committed to doing so.

**CRJS 6280 - Policy and Politics in American Political Institutions**

(5 cr.)
Students in this course are introduced to the crafts of policymaking and policy analysis in the U.S. democratic system. They cover the policy process—setting agendas, using policy analysis tools, managing the political process, implementing policy, and providing evaluations and feedback. Students develop skills in policy and economic analyses as well as in determining the political feasibility of proposed policies. Regulation as a policy choice will be discussed. Students completing this course will enhance their abilities to develop alternatives and to assess strategies proposed to achieve certain policy objectives. Policy areas of interest to students form the foundation of this course and may include communications, immigration, social, transportation, housing, labor, arts, and environmental policies.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CRJS 6281 - Program Evaluation**

(5 cr.)
Students in this course receive an introduction to the tools used by policymakers and policy analysts to evaluate the impact of social programs. Topics include selecting programs to evaluate, crafting program descriptions, identifying stakeholders and their interests, developing logic models, framing evaluation questions, applying utilization-focused evaluation techniques, using quantitative and qualitative tools to complete formative and summative evaluations, and providing evaluation reports and feedback to decision makers. By the end of the course, each student will develop a program-evaluation design for a social program.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CRJS 6282 - Public Policy and Finance**

(5 cr.)
Students in this course cover microeconomic and macroeconomic models used in policy formulation, as well as how public finance influences policy choices and implementation alternatives. Students examine tax policies and tax incentive models, budgeting, public/private models, market influences on policy, the impact of government expenditures on income redistribution, and economic considerations of welfare, food
stamps, workers’ compensation, and Social Security. Students also examine outsourcing of public programs.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6300 - Disaster Response and Recovery♦

(5 cr.)
A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issues, including evacuation, relocation, and tactical and strategic decisions in the immediate aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework (NRF), and they can gain an understanding of how local, state, and federal policies mesh in response and recovery efforts. Through their exploration, they study how recovery begins once the immediate threat of the emergency wanes and the focus shifts to restoring disaster-affected areas. As part of this course, students complete the FEMA Emergency Management Institute course IS208.a: State Disaster Management.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6320 - Public Policy Implications of Terrorism Legislation and Policies

(5 cr.)
Students in this course receive a broad perspective on the history of the U.S. Patriot Act, similar terroristic legislation and immigration laws, and their policy implications on law enforcement, governmental entities, organizations, and individuals. Public administrators and public policy analysts who are charged with drafting and implementing public policy and enforcing and/or responding to potential terroristic threats build a basic foundation, while simultaneously upholding and protecting constitutional freedoms. Material for this course is drawn from contemporary texts, websites, case studies, and material representing international, national, and local governments and organizations. Learners critically review and analyze the U.S. Patriot Act and similar terroristic legislation and policies, and they participate in online discussions about these laws and their implications on U.S. constitutional freedoms.

CRJS 6321 - Terrorism: A Systemic Approach for Emergency Preparedness♦

(5 cr.)
Participants in this course receive an overview of terrorism—local, national, and international—and the need to develop a systemic approach for emergency preparedness. Topics include, but are not limited to, terrorism overview, terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications
for public health, and components of a systemic preparedness infrastructure. Course participants begin the development and/or analysis of a terrorism preparedness infrastructure and participate in online discussions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6322 - Critical Incident Planning and Leadership♦

(5 cr.)
Students in this course examine the principles of emergency planning, selection of leaders, specialized planning (e.g., schools, tourism), mutual aid, and leadership theories. Students build a basic foundation for public administrators to develop a critical incident plan and also understand leadership theories. Course participants critically analyze case studies, identifying weaknesses and potential solutions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6360 - Public Safety Issues♦

(5 cr.)
This is a comprehensive survey of the issues faced by public safety agencies and personnel at the local, state, and national level, including police and sheriff, emergency medical, and fire services and related organizations. Students emphasize communication and coordination between public safety organizations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6361 - Managing Public Safety Organizations♦

(5 cr.)
Students taking this course examine how public safety leaders find solutions to major issues confronting their operating systems, both organizations and communities, through research, analysis, planning, and decision making. Students adapt classic business management techniques and leadership principles to public safety operations. The concepts of "first planner" and "first responder" are introduced. Solutions and alternatives to varied situations confronting public safety managers are developed. Emphasis is on systems approaches, environmental analyses, contingency planning, implications for change, coordination, and controls.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6390 - Strategic Context of Public Management and Leadership♦
Students in this course engage in collaborative study of the changing strategic context of public administration. Students apply a systems perspective to construct a public enterprise model of the public organization of their choice as a way of understanding the strategic context for practical action and the stakeholder relations involved. This is an organization "mental model," which is similar to a traditional "business model," but that includes the three interrelated flows of money, knowledge, and influence. Emphasis in this course is on management and leading of the unknown—imagining and creating a future that works in a time of unprecedented and unpredictable change. Students apply strategic scenarios to organizational change for the public organization of special interest to them. Students also develop professional-action habits for pragmatic-action learning in the practice of public administration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6391 - Transformative Change in a Shared-Power World♦

Students in this course engage in collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students are taught a pragmatic action-learning process for studying the experience of transformative change in complex systems. The dynamics of complex adaptive systems are studied to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Appreciative inquiry and other selected methods of transformative change are studied and applied to a positive organizational change situation of special interest to the students. Students also develop professional-action habits for pragmatic-action learning in the practice of public administration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6392 - The Language of Leadership♦

In today's complex environment, leaders engaged in shaping public policy must know how to use the emotional as well as the intellectual power of language to motivate, inspire, and competently manage their organizations. Dynamic leadership requires understanding and use of techniques that affect both conscious and unconscious influences on human behavior. Effective communication connects at many different levels. Students in this course receive both theoretical and practical information; demonstrate the necessary components for making such connections; and show why stories, symbols, and metaphors are essential elements in the language of leadership.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
CRJS 6400 - Strategic Context of Management and Leadership

(5 cr.)
Students in this course engage in a collaborative study of the changing strategic context of criminal justice management and leadership. Students will understand the strategic context for stakeholder relations needed while resolving issues in criminal justice. They engage in readings and practical assignments that emphasize management and leadership in a time of unprecedented and unpredictable change. Students also work toward being able to apply data and statistics to engage communities and to design program evaluations.

CRJS 6405 - Ethics and Social Justice

(5 cr.)
Ethics is a foundational element of leadership. Leaders face increasingly complex social and political challenges as they seek to meet the needs of diverse constituents. Students in this course explore ethics and social justice related to economic disparity, power, and privilege. Students use demographic data and current social trends and themes to understand, analyze, and address ethical and social justice issues that impact service delivery in a global community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6420 - Organizational Management and Leadership

(5 cr.)
Public and nonprofit leaders require a deep understanding of their roles as directors and managers of diverse and complex organizations. Students in this course examine the distinction among leadership and management, organizational culture, change management, systems theories, and organizational development from a theoretical and applied perspective. Students apply principles to public, private, and nonprofit organizational settings.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6431 - Finance and Budgeting for the Public Sector

(5 cr.)
Sound financial practices are crucial to managing scarce funds in both public and nonprofit operations. Students in this course examine finance and budgeting concepts, policies and practices related to organizations, as well as the fiscal climate within which
they operate. Students gain an understanding of theories motivating major fiscal-policy debates; read, analyze, and construct budgets; and read and analyze financial statements and reports. Other topics include auditing practices, tax systems, financial management, budgetary reform, financial technology systems specific to government organizations, and the use of dashboards for financial reporting. Students apply what they learn to develop a budget and financial plan for either a public or private organization.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6435 - Human Resource Management: Building a Capable Workforce♦

(5 cr.)
The acquisition, development, and retention of talent are critical to the success of any organization. Students in this course examine theories, approaches, and systems related to the acquisition, management, development, and retention of employees in government and nonprofit organizations. Students explore topics including legal and ethical considerations; diversity, performance management, technology, and conflict management; and the establishment and implementation of policies through the use of case studies. Students apply principles learned in this course to situations encountered in public, private, and nonprofit organizations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination♦

(5 cr.)
In an increasingly complex world, leaders and managers in public and nonprofit organizations need to be strategic in their planning in order to fulfill the organizational mission and enhance stakeholder satisfaction. Students in this course explore the role and process of strategic planning with an appreciation for collaboration, cooperation, and coordination as these elements relate to the strategic planning process. Students apply these concepts to real-life situations and organizations and develop a strategic plan.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6511 - Special Populations♦

(5 cr.)
Students in this course are provided with an in-depth analysis of the treatment of women and people of color as professionals, litigants, victims, and offenders in the criminal justice system. Students examine the systemic outcomes of the intersections of race, class, sexual orientation, and gender for these groups as they relate to social
justice and social inequality. Through critical examination of readings and data analysis, students learn about the complexity of the historical relationship between these groups and the U.S. criminal justice system and broader social context.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

CRJS 6540 - Management and Leadership in a Global Context

(5 cr.)
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships among strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: "Thinking-Acting-and-Leading" strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

CRJS 6541 - Sustainable Development for Global Communities

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

CRJS 6542 - Transformative Change in a Global Environment
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

CRJS 6740 - Disaster, Crisis, and Trauma

Students taking this course define natural and human-made disasters such as war, violence, genocide, and terrorist activities, and review how they impact the psychology of individuals and groups. Topics include theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with the trauma. Students focus on the importance and development of culturally appropriate service delivery programs and interventions for individuals affected and traumatized by disaster(s).

CRJS 6741 - Psychology of Terrorism

Students in this course examine the history, philosophy, techniques, and countermeasures to terroristic threats to public safety. Topics include aspects of international and domestic terrorism with an emphasis on its roots viewed from the broadest possible political, sociological, and cultural perspectives; factors and catalysts attributed to the terrorism phenomena, including poverty, psychology (e.g., motivational factors, antisocial behaviors), social injustice, oppression, and religion; and impact of media and technology in aiding and countering terroristic activities.

CRJS 6742 - Conflict, Conflict Resolution, and Peace
Through this course, students engage in a study of conflict, conflict resolution, and peace from psychological and social psychological perspectives. Students examine the concept of conflict and methods of addressing it, including management, resolution, and transformation; theories related to conflict resolution; approaches to conflict resolution, including negotiation and third-party interventions; and social psychological factors that influence conflict and conflict resolution. They also consider the influence of culture in conflict and conflict resolution; the role of ethics; intractable and international conflicts; the concept of peace; and how third-party approaches can contribute to the peace process. Students apply conflict resolution approaches to conflicts at all levels, from interpersonal to those involving whole nations.

CRJS 6743 - Criminal Justice Strategies for Terrorism

As the field of criminal justice has evolved, it has become essential for its professions to develop strategies in response to terrorism. In this course, students will explore the history of terrorism to understand the historical trends and motivations. They will examine controversial policies and practices by debating issues with colleagues in the Discussion boards. Students will look at domestic and international perspectives on terrorism, the refugee crisis, ungoverned areas, and safe havens. They will explore cyber crime and its relationship to terrorism. Finally, students will examine the prevention of terrorism.

CRJS 6810 - Fundamentals of Law and Public Policy

Legal decisions and the law have an impact on the creation of public policy. Students in this course explore the relationship between laws and public policy and the impact court decisions have on policy and policy leaders. Topics include legal concepts and terminology, legal jurisdictions, case law, seminal cases, and the Supreme Court's roles and procedures. Students apply fundamental legal concepts and principles to case studies and contemporary problems.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

CRJS 6811 - Legal Research for Policy Practitioners

There is a wealth of vital legal knowledge available to public policy practitioners. In this course, students will be introduced to a number of print and electronic resources available for legal research, and they will gain an understanding of how the law is used to inform the creation of public policy. Topics include navigating legal libraries, citing cases, and using research to support public policy. Students apply legal research to case studies.
and contemporary issues.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6812 - Contemporary Cases and Issues in the Courts

(5 cr.)
Major issues in the Supreme Court have an impact on public policy at the state and local levels. In this course, students examine major past and current U.S. Supreme Court decisions and explore how these decisions affect public policy. Topics include individual rights, property rights, administrative law, immigration law, and foreign policy. Students apply legal research and verdicts to case studies and current issues.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6830 - Current Issues in Homeland Security

(5 cr.)
Since its inception, the Department of Homeland Security has profoundly impacted public policy and administration. Students in this course examine homeland security history, concepts, policies, and strategies of prevention and response. Topics include ethical issues, telecommunications, technology, threat assessment, contingency planning, and risk management. Students apply fundamental concepts and principles of homeland security to case studies and current issues.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6831 - Critical Incident Leadership and Planning

(5 cr.)
Strategic leadership is required to address the challenges and complexities of homeland security. To respond to critical incidents while and after they occur, leaders must plan tactically and understand how to obtain and mobilize resources. Students explore the roles of leaders in relation to activating or coordinating funding, personnel, jurisdictional issues, training, communication, information management, technology, and healthcare in order to create an effective response to homeland security needs. Course participants critically analyze case studies, identifying weaknesses and potential solutions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6832 - Terrorism: Legislation and Policy
The events of September 11, 2001, resulted in a new and intense focus on the issue of terrorism in the United States and abroad. Through traditional literature and a wealth of contemporary journal articles and media sources, students explore the history of terrorism, the evolution and international context of terrorist groups, and the causes of and motivations for terrorist acts. They learn about the laws, regulations, and legislation related to terrorism. They also analyze possible future trends in terrorism as well as the current role of the media, governmental agencies, and entities in the prevention of and response to terrorism. Students use concepts presented in the course and additional research to develop a proposal to change and improve an existing counterterrorism policy.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 6910 - Capstone: Criminal Justice Ethics and Social Justice

Ethical behavior is an essential element of leadership. In this course, students examine the philosophy of ethics as well as responsibility and social justice—the basic tenets of public service. Through a combination of seminal texts and contemporary case studies, students explore the complex social, political, and ethical challenges leaders face as they seek to meet the needs of diverse constituents. Course topics focus upon ethics and social justice involving economic disparity, political power, and social privilege. Students analyze current social trends related to the ethical and social justice issues of a global community. Throughout the course, students assess emerging or persistent ethical and social justice issues and make recommendations for resolving specific dilemmas.

CRJS 8002 - Foundations of Doctoral Study

Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as a scholar-practitioner and social change agent. They assess the relationship of mission and vision to professional goals and develop a program of study and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. Students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence as they relate to practice in public policy and administration.

CRJS 8100 - Critical Issues in Emergency Management

Students in this course examine the theories and concepts underpinning contemporary
emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS.). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

**CRJS 8115 - Writing a Quality Prospectus**

(5 cr.)
The prospectus is a brief paper, typically 5–10 pages in length, that helps students organize, delineate, and make decisions regarding their doctoral study and appropriate research methodology. Students create a prospectus to establish the background for the problem statement; the problem statement itself; a survey of the relevant literature (typically 25–75 references); and a research, implementation, and evaluation plan for the solution of the problem. Students in this 5-credit course focus specifically on the process of writing the dissertation prospectus. They employ their preliminary research plan to develop a problem statement for their dissertation. Students further refine the problem statement and carry out the planning and the library research that lends to the formulation of a dissertation prospectus.

**Prerequisites**
- RSCH 8110
- RSCH 8210
- RSCH 8310

**CRJS 8137 - The Nature of Crime and Criminology**

(5 cr.)
Students in this course are introduced to contemporary views and theories of maladaptive and criminal behavior. They examine a broad conceptualization of criminal behavior from an interdisciplinary perspective as well as theories and application of criminal profiling. Students also explore specific views of criminal behavior germane to groups, such as psychopaths, serial offenders, and sexually violent predators. At the end of this course, students will have an understanding of the theories and practices that are the foundations of the field of criminology.

**CRJS 8171 - Theories and Frameworks for Adult Learning**
To understand adult learning, one must ask and answer complex questions: Who is the adult learner? What is the social context of learning? What motivates adult learners? In this course, education professionals explore the theories and frameworks that inform the field of adult learning today. They identify, compare, and contrast foundational and emerging perspectives on adult learning with the aim of transforming theory into practice. They engage in an integrative course project through which they synthesize and apply various theories to real-world situations, including their own development; summarize how the idea of wisdom impacts their experiences as adult learners; interview an adult learner; and assess various perspectives in regard to educating diverse learners.

CRJS 8177 - Using Technology to Enhance Adult Learning

Emerging technologies are rapidly altering the field of adult education today. Innovative technologies are removing traditional boundaries to learning and encouraging a global perspective on school, work, and communications. New developments in software, multimedia applications, Internet technologies, and mobile computing are transforming the educational landscape and empowering learners around the world. Educators and students leverage these advances to enhance the learning process and improve outcomes in today’s digital information society.

CRJS 8200 - Risk Assessment, Preparedness, and Hazard Mitigation

Risk assessment and mitigation are key components to effective emergency management and all-hazard planning and response. Students in this course focus on the methods and techniques required to assess an organization or government's risk associated with the protection of human life and capital assets. They study ways to evaluate the social vulnerabilities to disaster and the special needs of at-risk populations, and they explore methods to reduce vulnerabilities and build capacity through structural and nonstructural mitigation. Additionally, students complete the FEMA Emergency Management Institute course IS-393.a: Introduction to Hazard Mitigation as part of this course.

CRJS 8203 - Victimology

What is the relationship between victims and those who commit crimes against them, and how does the criminal justice system protect and respond to victims of crime? In this course, students have the opportunity to answer such questions through a comprehensive assessment of victimology, a relatively new discipline in the field of criminal justice. Students examine victim patterns and tendencies and learn how victims
interact with the police and the legal system. They also examine how factors of class, race, and sexual orientation affect the perception of the victim by different constituents, including the public, the court system, and the media. Students assess and discuss the concept of primary and secondary victims and gain practical insight on a range of services and resources available to all types of victims.

**CRJS 8215 - Controversies in Criminal Justice**

(5 cr.)

In this course, students review recent events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act. Students analyze case studies to further explore relevant events, such as how the terrorist acts of September 11, 2001, have broadened the interpretation of certain areas of the law. Students heighten their understanding of how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties.

**CRJS 8217 - Technological Solutions and 21st-Century Crime**

(5 cr.)

In consideration of modern technological innovation and the spread of knowledge through digital means, the relationship between technology and criminal activity is increasing. In this course, students explore this relationship and gain a comprehensive view of cyber crime, including current trends. They learn how law enforcement agencies use technology to track and apprehend criminals. Through real-world scenarios, students examine legal responses to cyber crime and learn different approaches and techniques for solving cyber crimes and handling related challenges. Students also have the opportunity to gain a comprehensive understanding of building cases and prosecuting crimes through practical exercises in identification, data mining, and the protection and gathering of evidence.

**CRJS 8300 - Disaster Response and Recovery**

(5 cr.)

A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issue, including evacuation, relocation, and tactical and strategic decisions in the immediate aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework (NRF), and they can gain an understanding of how local, state, and federal policies mesh in response and recovery efforts. Through their exploration, they study how recovery begins once the immediate threat of the emergency wanes and the focus shifts to restoring disaster-affected areas. As part of this course, students complete the FEMA Emergency Management Institute course IS208.a: State Disaster Management.
CRJS 8320 - Public Policy Implications of Terrorism Legislation and Policies

(5 cr.)
Students in this course are provided with a broad perspective on the history of the U.S. Patriot Act, similar terroristic legislation and immigration laws, and their policy implications on law enforcement, governmental entities, organizations, and individuals. They receive a basic foundation upon which to build for those public administrators and public policy analysts who are charged with drafting and implementing public policy and enforcing and/or responding to potential terroristic threats, while simultaneously upholding and protecting constitutional freedoms. Material for this course is drawn from contemporary texts, websites, case studies, and material representing international, national, and local governments and organizations. Students critically review and analyze the U.S. Patriot Act and similar terroristic legislation and policies, and they participate in online discussions about these laws and their implications on U.S. constitutional freedoms.

CRJS 8321 - Terrorism: A Systemic Approach for Emergency Management

(5 cr.)
Students in this course are provided with an overview of terrorism—local, national, and international—and the need to develop a systemic approach for emergency preparedness. Topics include, but are not limited to, terrorism overview, terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Course participants begin the development and/or analysis of a terrorism preparedness infrastructure and participate in online discussions.

CRJS 8322 - Critical Incident Planning and Leadership

(5 cr.)
Students in this course examine the principles of emergency planning, selection of leaders, specialized planning (e.g., schools, tourism), mutual aid, and leadership theories. Public administrators receive a basic foundation to develop a critical incident plan and also understand leadership theories. Course participants critically analyze case studies, identifying weaknesses and potential solutions.

CRJS 8350 - History and Contemporary Issues in Criminal Justice

(5 cr.)
Students in this course look at the evolution of crime—from lone criminals to worldwide syndicates—using the scientific rigor built into the selected readings and discussions. Among the topics examined are the philosophy of community- and problem-oriented policing, transnational crime, terrorism, and the new nexus between them. Current and future leaders are equipped with the knowledge and depth of
understanding to assess and manage the opportunities, innovations, and challenges in their profession.

**CRJS 8351 - Policy and Analysis in Criminal Justice Systems**

(5 cr.)
Criminal justice professionals must understand the various factors that influence the development of criminal justice policy, and how to evaluate whether existing policy meets its objectives. In this course, students will examine the principles of policy analysis and the role that scientific information plays in the development of criminal justice policy. Topics explored include policing, corrections, and sentencing; juvenile justice; the relationship among drugs, race, and crime; deterrence as a crime control policy; and the use of public registries. Through further analysis of criminal justice policies, students determine how these policies have changed over time, gaining insight into possible future trends of policy development and analysis.

**CRJS 8352 - Leadership: Putting Theory into Practice in Criminal Justice Administration**

(5 cr.)
Students in this course are introduced to the problems that currently confront the administration of the criminal justice system, as well as problems predicted for the future. To be prepared to lead efforts to address these challenges, students acquire powerful models for strategic, critical, and reflective thinking. Students immerse themselves in discussion about the major components of effective justice administration: organizational thought and theory, leadership, human capital, policy development and implementation, and collaboration with other public safety and community organizations.

**CRJS 8381 - Program Evaluation**

(5 cr.)
Students in this course are introduced to the tools used by policymakers and policy analysts to evaluate the impact of social programs. Topics include selecting programs to evaluate, crafting program descriptions, identifying stakeholders and their interests, developing logic models, framing evaluation questions, applying utilization-focused evaluation techniques, using quantitative and qualitative tools to complete formative and summative evaluations, and providing evaluation reports and feedback to decision makers. By the end of the course, each student will develop a program-evaluation design for a social program.

**CRJS 8390 - Strategic Context of Public Management and Leadership**
(5 cr.)
Public policy implementation can take place in either a public organization, a private one, a nonprofit one, or a combined or networked one. Learners engage in a collaborative study of the changing strategic context of public administration as they apply a strategic planning and management approach to the implementation of public policy. Learners are introduced to planning, management, financial management, performance management, and contracting processes in the organization whose purpose it is to implement public policy.

CRJS 8391 - Transformative Change in a Shared Power World

(5 cr.)
Students in this course engage in collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students learn a pragmatic-action learning process for learning from the experience of transformative change in complex systems. The dynamics of complex adaptive systems are studied to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Appreciative inquiry and other selected methods of transformative change are studied and applied to a positive organizational change situation of special interest to the students. Students also develop professional-action habits for pragmatic-action learning in the practice of public administration.

CRJS 8392 - The Language of Leadership

(5 cr.)
In today's complex environment, leaders engaged in shaping public policy must know how to use the emotional as well as the intellectual power of language to motivate, inspire, and competently manage their organizations. Dynamic leadership requires understanding and use of techniques that affect both conscious and unconscious influences on human behavior. Effective communication connects at many different levels. Students gain both theoretical and practical information demonstrating the necessary components for making such connections and showing why stories, symbols, and metaphors are essential elements in the language of leadership.

CRJS 8400 - Strategic Context of Management and Leadership

(5 cr.)
Students in this course engage in a collaborative study of the changing strategic context of criminal justice management and leadership. Students will understand the strategic context for stakeholder relations needed while resolving issues in criminal justice. They engage in readings and practical assignments that emphasize management and leadership in a time of unprecedented and unpredictable change. Students also work toward being
able to apply data and statistics to engage communities and to design program evaluations.

**CRJS 8511 - Special Populations**

(5 cr.)
Students in this course are provided with an in-depth analysis of the treatment of women and people of color as professionals, litigants, victims, and offenders in the criminal justice system. Students examine the systemic outcomes of the intersections of race, class, sexual orientation, and gender for these groups as they relate to social justice and social inequality. Through critical examination of readings and data analysis, students learn about the complexity of the historical relationship between these groups and the U.S. criminal justice system and broader social context.

**CRJS 8540 - Management and Leadership in a Global Context**

(5 cr.)
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships between strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: thinking, acting, and leading strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

**CRJS 8541 - Sustainable Development for Global Communities**

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.
CRJS 8542 - Transformative Change in a Global Environment

(5 cr.)
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

CRJS 8763 - Principles of Instructional Design

(5 cr.)
Students in this course are presented with an overview of instructional design, including its historical foundations, theories, and models. Students analyze learning theories in relation to instructional design theories and their philosophy toward teaching. Students critically analyze and apply taxonomies, course outcomes, learning objectives, instructional strategies, and assessment and evaluation approaches. Students also analyze challenges and future trends in instructional design for higher education and consider their role as agents of positive social change.

CRJS 8764 - Instructional Design for Online Course Development

(5 cr.)
Students in this course explore instructional design for the development of online courses. Different types of online courses and the roles of online instructors are addressed. Students analyze learning theories and approaches for promoting community in online classrooms. Students analyze criteria for developing learning objectives and online instructional strategies in relation to diverse student populations. Issues related to technology, copyright compliance, fair use, and academic integrity are explored. Students analyze assessment and evaluation approaches and explore future trends in online higher education in relation to delivery of instruction and positive social change.

CRJS 8810 - Fundamentals of Law and Public Policy

(5 cr.)
Legal decisions and the law have an impact on the creation of public policy. Students in this course explore the relationship between laws and public policy and the impact court decisions have on policy and policy leaders. Topics include legal concepts and terminology, legal jurisdictions, case law, seminal cases, and the Supreme Court's roles.
and procedures. Students apply fundamental legal concepts and principles to case studies and contemporary problems.

**CRJS 8811 - Legal Research for Public Policy**

(5 cr.)
There is a wealth of vital legal knowledge available to public policy practitioners. In this course, students will be introduced to a number of print and electronic resources available for legal research and will gain an understanding of how the law is used to inform the creation of public policy. Topics include navigating legal libraries, citing cases, and using research to support public policy. Students apply legal research to case studies and contemporary issues.

**CRJS 8812 - Contemporary Cases and Issues in the Courts**

(5 cr.)
Major issues in the Supreme Court have an impact on public policy at the state and local levels. In this course, students examine major past and current U.S. Supreme Court decisions and explore how these decisions affect public policy. Topics include individual rights, property rights, administrative law, immigration law, and foreign policy. Students apply legal research and verdicts to case studies and current issues. Outsourcing of public programs is also examined.

**CRJS 9000 - Dissertation**

(5 cr. per term for a minimum of 4 quarters until completion)
Through this course, doctoral students have the opportunity to integrate their program of study into an in-depth exploration of an interest area that includes the completion of a research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation. Once students register for CRJS 9000, they will be registered each term until successful completion of the dissertation.
Students take this course for a minimum of 4 quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**CSEC 6005 - The Global Technology Environment**
(3 sem. cr.)
Students in this course are provided a critical "state-of-the-art" breadth-first review of the domain of information technology (IT). Designed to provide students with a wide-ranging introduction to topics such as software engineering, cybersecurity, and big data analytics, students completing the course have a comprehensive global view of the current IT landscape in the context of both commercial and noncommercial enterprises. The class blends both theory and practice to provide a solid foundation for future study. Students study the relationship between technological change, society and the law, and the powerful role that computers and computer professionals play in a technological society.

CSEC 6175 - Software Testing and Quality Assurance

(3 sem. cr.)
Students in this course are provided a general overview of software engineering in the context of testing and quality assurance, both of which are important facets of modern software engineering that have technical, financial, and ethical implications for organizations. Students explore focused topics, such as testing methods; developing tests at the unit, integration, and systems level; techniques for stress testing; complexity and test metrics; quality management standards; and configuration management. Students have the opportunity to develop a critical awareness and comprehensive understanding of software testing and quality assurance, and the capability to create successful testing and quality assurance processes to support the needs of modern software engineering projects.
Prerequisites
• CSEC 6005
• CSEC 6215

CSEC 6190 - Foundations of Intelligent Systems

(3 sem. cr.)
Students in this course are introduced to the concepts of artificial intelligence and emergent areas of intelligent systems. Students have the opportunity to gain a critical understanding of knowledge representation, reasoning, machine learning, and evolutionary techniques. Students are presented with real-world problems and have the opportunity to apply "intelligent" techniques to provide solutions to these problems.
Prerequisites
• CSEC 6005

CSEC 6210 - Cloud Computing

(3 sem. cr.)
Cloud computing has attained great commercial significance in recent years. As
companies seek to drive down the capital (and recurrent) costs of doing business, using cloud computing to reduce expenditure by outsourcing aspects of the organizations' IT infrastructure to external, web-accessible systems has become a critical goal. In this course, students study the key concepts, theories, techniques, and practices that underpin cloud computing, including the main abstraction, component and deployment models that characterize cloud computing. Students have the opportunity to critically appreciate issues and problems, as well as cutting-edge solutions, pertaining to cloud computing.

Prerequisites
- CSEC 6005

**CSEC 6215 - Security Risk Management**

(3 sem. cr.)
Threats to information security (IS) are becoming more sophisticated. Laws and regulations impose strict (cyber) security risk management requirements on all enterprises to prevent, or at least limit, the potential of cyberattacks. Course content is directed at providing a deep understanding of the mechanisms and techniques that can be used to identify and mitigate against security risk. Students in this course are provided with the theoretical and practical knowledge to deliver a formal, systematic, and in-depth approach to the application of the concepts, techniques, methods, approaches, and processes of (cyber) security risk management in a pragmatic manner and in the context of enterprises of all kinds.

Prerequisites
- CSEC 6005 (may be taken concurrently)

**CSEC 6255 - Cybercrime Prevention and Protection**

(3 sem. cr.)
Combatting cybercrime requires a deep understanding of the mechanisms and techniques that can be used to prevent or at least mitigate against it. In this course students consider the motivations for cybercrime and have the opportunity to develop a comprehensive understanding of the tools that can be used to prevent it, including the deployment of cybercrime prevention strategies. Students build an "ethical hacking" environment with which they can experiment. In addition, the course is directed at providing students with hands-on knowledge of cybercrime prevention for application in the workplace.

Prerequisites
- CSEC 6005

**CSEC 6270 - Cyber Forensics**
(3 sem. cr.)
In this course students are provided with knowledge and systematic understanding of the practice of extracting evidence from computers and digital storage media. Students are provided with the knowledge whereby they can identify, extract, document, interpret, and preserve computer media as digital evidence, as well as how to analyze the root cause of security breaches. Course content covers issues such as crypto-literacy, data hiding, and hostile code.
Prerequisites
  •  CSEC 6005

CSEC 6635 - Secure Coding

(3 sem. cr.)
In this course students are provided with an understanding of secure software development practices. Students have the opportunity to gain an understanding of how to integrate security into the application/software development process. Students also have the opportunity to study some of the techniques for writing secure code, language-based security models, and isolation techniques to protect data.
Prerequisites
  •  CSEC 6005
  •  CSEC 6670

CSEC 6670 - Security Engineering and Compliance

(3 sem. cr.)
Students in this course are provided with insight into information security principles, security policy models/protocols, industry standards for security compliance, and risk assessment. Students have the opportunity to acquire a critical understanding of how to use information security techniques to solve practical security problems. The course also allows students to acquire skills for designing/implementing security infrastructure and writing security/incident response polices. The course features practical, extensive, hands-on project work so that students are ready to apply their gained knowledge in the workplace.
Prerequisites
  •  CSEC 6005
  •  CSEC 6215

CSEC 6735 - Applied Cryptography

(3 sem. cr.)
In this course students are provided with insight into cryptographic algorithms and protocols. Students have the opportunity to acquire a critical understanding of how to
use cryptographic algorithms and protocols to solve practical security problems (confidentiality, integrity, authenticity, and so on). Students also have the opportunity to acquire a systematic understanding concerning open source tools to build secure applications and knowledge of how best to apply such tools.

Prerequisites
- CSEC 6005

DDBA 4990 - Business Essentials

(0 sem. cr.)
A background in the basics of business is often a key to making the most of a graduate business or management program. In this foundational course, students can build their business acumen in major functional areas that are essential to business success including business leadership and management, business ethics, the legal environment of business, accounting, finance, economics, quantitative methods and statistics, information systems management, global business, marketing, and strategic management.

DDBA 8006 - Contemporary Challenges in Business♦

(3 sem. cr.)
Students are provided with a foundation for academic and professional success specific to Walden University and to the requirements for successful participation in the Doctor of Business Administration degree program. The topics covered in this course include change management, crisis management, innovation, and disruptive technology. Students engage in discussion and analyze scholarly literature related to these topics, their personal and professional experiences, and areas of academic interest from a practitioner approach and from a social-change-agent viewpoint. The focus of the course assignments is on the practical application of writing and critical-thinking skills and the promotion of professional business practice and academic excellence. Through their assignments, students emphasize their personal and professional development, including the completion of a personal SWOT analysis and professional development plan.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DDBA 8100 - Doctoral Study Mentoring

(0 sem. cr.)
The purpose of this course is to assist doctoral students in making steady progress toward the DBA. Students use this course as a forum for ongoing exchange of ideas, input, and feedback with peers and their doctoral study chair. They engage in a variety of activities, providing the tools needed to complete the doctoral study capstone successfully. Students gain practice with various research methods and data-gathering techniques; determine best practices; explore the various resources, including the
Walden Library, Writing Center, and Research Center; and prepare a draft and final version of their doctoral study prospectus, which is required to proceed with the final doctoral study.

Note: The "instructor of record" for a section of the course is the chair of the student's doctoral study committee. Section participants are students who work with faculty members at various stages of their doctoral study.

**DDBA 8101 - Doctoral Study Mentoring**

(1 sem. cr.)
The purpose of this course is to assist doctoral independent scholars in making steady progress toward the DBA degree. Independent scholars use this course as a forum for ongoing exchange of ideas, input, and feedback with peers and their doctoral study chair. They engage in a variety of activities, providing the tools needed to complete the doctoral study capstone successfully. They gain practice with various research methods and data-gathering techniques; determine best practices; explore the various resources, including the Walden Library, Writing Center, and Research Center; and prepare a draft and final version of their doctoral study prospectus, which is required to proceed with the final doctoral study. Note: The instructor of record for a section of the course is the chair of the independent scholar's doctoral study committee. Section participants are independent scholars who work with faculty members at various stages of their doctoral study.

**DDBA 8101C - Doctoral Study Mentoring**

(1 sem. cr.)
The purpose of this course is to assist doctoral independent scholars in making steady progress toward the DBA degree. Independent scholars use this course as a forum for ongoing exchange of ideas, input, and feedback with peers and their doctoral study chair. They engage in a variety of activities, providing the tools needed to complete the doctoral study capstone successfully. They gain practice with various research methods and data-gathering techniques; determine best practices; explore the various resources, including the Walden Library, Writing Center, and Research Center; and prepare a draft and final version of their doctoral study prospectus, which is required to proceed with the final doctoral study. Note: The instructor of record for a section of the course is the chair of the independent scholar’s doctoral study committee. Section participants are independent scholars who work with faculty members at various stages of their doctoral study.

**DDBA 8101P - Doctoral Portfolio Capstone Mentoring**

(1 sem. cr.)
The purpose of this course is to assist doctoral independent scholars in making steady progress toward the DBA degree. Independent scholars use this course as a forum for
ongoing exchange of ideas, input, and feedback with peers and their portfolio chair. They engage in a variety of activities, providing the tools needed to complete the portfolio capstone successfully. They gain practice with various research methods and data-gathering techniques; determine best practices; explore the various resources, including the Walden Library, Writing Center, and Research Center; and prepare a draft and final version of their portfolio prospectus, which is required to proceed with the final portfolio research (program evaluation or quantitative secondary data analysis).

Note: The instructor of record for a section of the course is the chair of the independent scholar’s portfolio committee. Section participants are independent scholars who work with faculty members at various stages of their portfolio project.

**DDBA 8110 - Business Operations: Systems Perspectives in Global Organizations**

(3 sem. cr.)
Corporate social impact is of increasing interest because many organizations are moving from a profit-only outlook to a model of social responsibility. Students in this course are immersed in the ways business operates in a global environment, which provides the opportunity to widen professional perspectives. Students engage in variety of writing and creative assignments while exploring a variety of topics, such as supply chain management, process management, quality, innovation, and forecasting. Integrating professional practice at the doctoral level, they employ critical-thinking skills to analyze decision-making motives and techniques in a global operations environment.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**DDBA 8120 - Information Systems: Global Management Strategies and Technologies**

(3 sem. cr.)
Information technology and systems saturate every aspect of business, from small corner stores to global corporations. Students are provided with broad coverage of information systems management concepts and trends underlying current and future developments as well as principles for providing effective implementation of information systems management in this course. Students use business case studies to gain real-world insight on the impact of information systems on decision making, collaboration, and maintaining business relationships. They engage in discussions on a variety of topics, such as the advantages and disadvantages of global Internet commerce, the role of on- and off-shore workers in a company-wide information system, and the pros and cons of short-cycle time approaches to information systems development. Students develop and define their position and reasoning on a variety of information systems’ current issues as the course progresses. Students also focus on the practical application of writing and the integration of professional practice at the doctoral level.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DDBA 8130 - Marketing: Strategic Innovation in Globally Diverse Markets♦

(3 sem. cr.)
The current global environment is diverse, technologically reliant, and constantly changing; old skills and tools that were once effective may no longer be efficient for today’s market. In this course, independent scholars examine the global marketplace and identify, adapt, and apply skills and supporting tools that guide them to develop and create a globally competitive advantage in multiple and diverse scenarios and settings. They apply requisite knowledge of marketing concepts, such as the marketing mix, differentiation, and branding for focused markets as essentials for market audit data analysis. Through detailed case studies and marketing audits, independent scholars will develop market analysis skills to determine potential marketing strategies, with an emphasis on the importance of positive social change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DDBA 8140 - Finance: Fiscal Leadership in a Global Environment—Creating Competitive Responses and Building Corporate Opportunities♦

(3 sem. cr.)
Daily, there are risks of corporate challenges and insults ranging from local and national regulatory shifts and breaches to international complexities of emerging opportunities. These events require global business leaders to possess a variety of financial skills and sensibilities. Through case studies and analytical projects, students have the opportunity to build skills and knowledge for leading organizations with ethical integrity and social accountability. They explore the financial and monetary markets in the United States and abroad to gain an economic context to apply the concepts and tools necessary to assess an organization’s financial position and to explore alternatives to finance-organizational ventures. Students also engage in assignments focused on financial planning, budgeting, and other trends, such as balancing risks. Students prepare to be key ethical players who are effective in leading an organization’s financial capabilities based on sound financial and economic principles.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DDBA 8150 - Leadership: Building Sustainable Organizations♦

(3 sem. cr.)
Business leaders may take on a range of personalities, including charismatic, transformational, adaptive, or contextual. Regardless of style, one thing that they all have
in common is the ability to identify and develop leadership strategies that lend to the success and sustainability of a business. In this course, students examine these strategies as well as the role, attributes, and challenges of leaders in a global environment. Students assess current articles, engage in online discussions, and complete application assignments based on globalization, individual and group behaviors, organizational culture and change, systems thinking, innovation, social responsibility, and sustainability. They explore these basic dimensions of leadership and how they affect the employee, organization, community, and environment. Students focus on the practical application of writing, resourcefulness, critical thinking, and the integration of professional practice at the doctoral level as they develop sustainable solutions from the perspective of a global leader.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DDBA 8151 - Organizational Leadership: Doctoral Theory and Practice

(3 sem. cr.)
Successful business leaders create a positive organizational culture based on personal ethical behavior, ethical expectations, training, and transparency. Business leaders use a range of leadership styles, including transformational, transactional and servant leadership, based on the organizational situation. Regardless of leadership style, one thing that business leaders have in common is the ability to identify and develop leadership strategies that lend to the success and sustainability of their business. In this four-module course, students cover a wide range of different topics on business leadership. Students focus on the practical application of APA writing, critical thinking, and the integration of professional leadership practice at the doctoral level as they develop sustainable solutions from the perspective of a business leader. Students examine the relationship between leadership and management, evaluate the impact and utility of leadership styles assessments, and analyze different leadership styles. Additionally, students evaluate and investigate various leadership theories, sources of power, and motivation theories to gain a better understanding into the nature and practice of leadership. Students evaluate and assess ethical dilemmas, organizational stress, and craft an organizational strategy to shape a successful business culture. They assess current articles, engage in online discussions, and complete application assignments based on organizational culture, ethics, strategy, stress, and leadership theories.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DDBA 8160 - Business Strategy and Innovation

(3 sem. cr.)
Students in this course focus on development and implementation of business strategies
that enable competitive advantage and winning in the marketplace. They develop an understanding of why and how individuals and organizations must work together to create a sustainable business and global environment. Students apply methods for assessing the strengths and weaknesses of organizations and identify industry opportunities and threats resulting from forces shaping the marketplace. They also examine and apply concepts to assess the capability of industries to implement these strategies successfully. Students focus on practical business applications of writing and critical thinking and engage in a combination of essay discussions, research assignments, and papers to analyze, develop, and defend ideas for strategic and innovative business solutions for sustainability. Students also develop a problem statement to use in their doctoral study final capstone project through the synthesis of principles of sustainable strategic management and thinking.

**DDBA 8161 - Business Strategy and Innovation for Competitive Advantage**

(3 sem. cr.)

Students in this DBA strategy course concentrate on the creation and implementation of business strategies that maximize competitive advantage in the marketplace. Students develop an understanding of why and how individuals and business organizations work together creating sustainable businesses in the global marketplace. They apply models for assessing the strengths and weaknesses of business organizations and identify opportunities and threats resulting from forces shaping the marketplace. Students focus on practical business applications of writing, critical thinking, and classroom engagement in a combination of essay discussions, research assignments, and writing papers to analyze, develop, and defend ideas for strategic and innovative business solutions for sustainability.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**DDBA 8300 - Qualitative and Quantitative Methodology for Applied Business Research**

(4 sem. cr.)

In this course, independent scholars are introduced to quantitative and qualitative frameworks for inquiry. Quantitative designs covered include correlation, experimental and quasi-experimental, survey, and causal-comparative designs; qualitative designs include case study, phenomenology, grounded theory, and ethnography. Independent scholars work toward acquiring substantive, foundational knowledge of the philosophy of science as they construct, use, and critique concepts and theories. They learn to produce knowledge for practice as they examine ethical, social, and political aspects of conducting research. Demonstrating knowledge and the ability to solve problems, independent scholars engage in course assignments that emphasize the practical
application of writing and critical-thinking skills and the integration of professional practice at the doctoral level.

**DDBA 8303 - Qualitative and Case Study Methodology for Business Analysis Research**

*(4 sem. cr.)*
In this course, independent scholars have the opportunity to extend their research and general analysis skills as they further explore qualitative research methodology and design types—with emphasis on case-study research designs—that they may incorporate into their own doctoral study. Independent scholars learn to focus their analysis on efforts to improve the quality of business practice. They also focus on how to think in an action-oriented manner, as if they were business consultants, so that their own doctoral study work could be applied in action. Finally, they engage in an iterative process of writing their own prospectus application, incorporating feedback from peers and the course instructor.

**DDBA 8307 - Quantitative Business Data Analysis Using SPSS**

*(3 sem. cr.)*
In this course, independent scholars develop skills in descriptive statistics, statistical inference, and quantitative techniques, including t-tests, analysis of variance, correlation, multiple linear regression, and nonparametric methods (i.e., two-way contingency table analysis). They use quantitative data analysis and data-management techniques, and they learn to utilize SPSS software for data analysis. This course is not intended for independent scholars to become fully grounded in statistical methods; rather, they learn appropriate questions to ask about data analysis as well as how to defend their use of specific techniques in professional practice.

**DDBA 8307B - Quantitative Business Data Analysis Using SPSS**

*(4 sem. cr.)*
In this course, independent scholars develop skills in descriptive statistics, statistical inference, and quantitative techniques, including t-tests, analysis of variance, correlation, multiple linear regression, discriminant analysis, and nonparametric methods (i.e., two-way contingency table analysis). They use quantitative data analysis and data-management techniques, and they learn to utilize SPSS software for data analysis. This course is not intended for independent scholars to become fully grounded in statistical methods; rather, they learn appropriate questions to ask about data analysis as well as how to defend their use of specific techniques in professional practice.

**DDBA 8427 - Applied Research Methods—Qualitative and Quantitative**
In this course, students are provided with the opportunity to acquire substantive, foundational knowledge of the philosophy of science, including the construction, use, and critique of concepts and theories. Students examine qualitative and quantitative frameworks for inquiry as well as the ethical, social, and political aspects of conducting research. They learn about quantitative designs, such as experimental and quasi-experimental, survey, causal-comparative, evaluation, and existing action research. In regard to qualitative designs, students examine case study, phenomenology, grounded theory, and ethnography designs. Students complete application exercises to demonstrate their conceptual knowledge of applied research methods in preparation for their doctoral study as well as for problem-solving in professional practice. They also engage in the practical application of writing and critical thinking as they synthesize the relationship between research in management and the promulgation of social change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DDBA 8510 - Seminar in Global Supply Chain Management

As globalization integrates all regions of the planet, business has become multinational and multimodal. Regardless of the role—manufacturers, retailers, or service providers—doing business globally requires a thorough understanding of how products, services, and information products develop from ideas to deliverables. In studying global supply chain management, students learn about the systems required to identify sources of people and material as well as ways to ensure that the supply chain conforms to the highest expected business standards anywhere in the world. Students investigate potential opportunities for new research in the field and share their findings through a presentation. They sharpen their critical-thinking and communication skills as they give and provide feedback on research conclusions. Students accomplish the objectives of this seminar course by examining current information through extensive use of topical journal articles and papers as well as classic articles and papers related to the field of study.

DDBA 8511 - Seminar in Innovation Management

An essential, "make or break" aspect of today's organizational environment is innovation. Students in this seminar course are provided with the opportunity to position themselves for professional success in management through the study of concepts, processes, and tools needed to accelerate the rate, breadth, and depth of innovation within any organization. Students examine what innovation is and is not, as well as how to establish the organizational policies, processes, and employee-support infrastructure required to facilitate successful innovation throughout organizations. Students assess current information through extensive use of topical journal articles and papers as well
as classic articles and papers related to the field of study. They also disseminate their findings to their peers through group discussions.

DDBA 8512 - Seminar in IT for Competitive Advantage

(3 sem. cr.)
Though many aspects of information technology (IT) are becoming staples in the business toolbox, competitive advantage is still possible through the development of creative applications and the configuration of technology in ways unique to an organization. In this seminar course, students investigate this advantage through the evaluation of the frontier of IT in business and new ways of applying IT to cut costs, increase customer satisfaction, and open new business opportunities. Students explore social networking tools and Internet recognition strategies for potential business uses. They accomplish course objectives by examining current information through extensive use of recent journal articles and papers as well as classic articles and papers related to the field of study. Students also identify additional resources and disseminate their conclusions to their peers.

DDBA 8515 - Energy Production Analysis

(3 sem. cr.)
Energy is a primary enabler of business operations. Energy sources include nuclear power, fossil fuels, oil, natural gas, solar, wind, and flowing water (hydro). Energy is used in business to power machinery, heat factories, and propel vehicles to deliver goods and services. Independent scholars will analyze regional, national, and international energy production issues from a business leadership perspective. Issues include environmental regulations, legal requirements, and social conditions (e.g., building a production facility in a neighborhood). The conceptual analysis of managing emerging new energy sources is explored.

DDBA 8521 - Seminar in Change Management

(3 sem. cr.)
The only constant in today's business environment is change. However, implementing change alone is not sufficient. It is also necessary to identify and prioritize the key organizational issues requiring change and to implement the necessary changes successfully. Furthermore, change must be defined and aligned at the organizational, process, and employee levels. In this seminar course, students identify and focus on the key areas of an organization that should be prioritized for change initiatives and for the development and implementation of strategies that will increase the success rate of the key change initiatives. Students formulate an original research topic related to the course literature and present and debate their findings through a peer work group. They accomplish course objectives by examining current information, such as
foundational literature and theories, seminal works, and established models in the field of change management.

**DDBA 8522 - Seminar in Sustainability**

*(3 sem. cr.)*
The various environmental crises facing the planet threaten the human race. Therefore, the primary challenge for business is to conduct itself in a responsible manner through sustainable decisions. That means more than anticipating continuous profitability. Students in this seminar course explore what it means to be sustainable from an environmental perspective and examine the implications for business in terms of resource consumption, materials processing and disposal, and the impacts of the products made and distributed. Students analyze natural systems and how their condition influences doing business in a global economy. They also examine the long-term implications for conducting business globally. Students fine-tune critical-thinking skills by formulating an original research topic, which they discuss with their peers. They accomplish course objectives by examining current information through extensive use of recent journal articles and papers as well as classic articles and papers related to the field of study.

**DDBA 8523 - Seminar in Law and Compliance**

*(3 sem. cr.)*
Recent cases of corporate greed, bankruptcy, and fraud, as well as the collapse of the housing market and its fallout in the investment community, have prompted the need for new regulatory responses; these include laws, such as Sarbanes-Oxley, Dodd-Frank, and the Foreign Corrupt Practices Act, as well as whistleblower protection programs. Independent scholars in this seminar course examine these new ways of doing business in today's sociopolitical climate from a legal perspective, including identification of opportunities for new research in business law and compliance. They formulate an original research topic and assess the potential impact of their findings on the fields of business law and compliance. They also give and receive feedback through critiques for and by peers. Independent scholars accomplish course objectives by examining current information, such as foundational literature and theories, seminal works, and established models in the fields of business law and compliance.

**DDBA 8524 - Seminar in Multicultural Management**

*(3 sem. cr.)*
Growing cultural diversity within countries and expansion of organizations’ international initiatives has brought about the need to recognize, lead, and manage a broader cultural spectrum of workers, managers, and performance improvement teams. In this seminar course, students define the key organizational techniques and the potential benefits stemming from managing multicultural workforces. Students contextualize their study
through the examination and development of case studies of successful and unsuccessful attempts to realize the potential that can be derived from multicultural workforces and teams. Students accomplish course objectives by examining current information through extensive use of recent journal articles and papers as well as classic articles and papers related to the field of study. They also disseminate their findings to their peers through group discussions.

DDBA 8525 - Energy Delivery Analysis

(3 sem. cr.)
Energy is needed throughout the world for business operations. The end user of energy and the production source can be miles, countries, or oceans apart. Independent scholars will analyze regional, national, and international energy distribution issues from a business leader perspective. Issues include environmental regulations, legal requirements, and social conditions (a pipeline, power lines, or a local substation, for instance). The conceptual analysis of managing new means of energy delivery is explored.

DDBA 8531 - Seminar in B2B Marketing

(3 sem. cr.)
Business-to-business (B2B) marketing has emerged as its own discipline to meet the needs of other businesses. The challenge is to find new methods of enhancing marketability and value while maintaining important relationships with consumers. Students in this seminar course focus on B2B marketing techniques, strategies, customer acquisition, and relationship building. They explore the theory and conceptual challenges facing today's B2B marketing manager. Primarily, students learn aspects of online promotion and advertising, communications strategies to promote online initiatives, and creative ways of developing the B2B channel. They fine-tune critical-thinking skills by formulating an original research topic and debating with peers. Students accomplish course objectives by examining foundational literature and theories, seminal works, and established models in the field of B2B marketing.

DDBA 8532 - Seminar in Consumer Behavior

(3 sem. cr.)
The buyer decision-making process is one of the driving forces behind how, where, and when to market a product, which is why understanding consumer behavior is integral to successful businesses. In this seminar course, students focus on the characteristics of consumers from the perspective of why they purchase products and services as well as their expectations when doing business. More importantly, students study individual behavior and the psychology of choice, the motivation to buy, and how to maintain satisfaction after purchase. Because forces beyond individual control sometimes influence markets, niches, and segments, students also examine consumer behavior from
a cultural (and subcultural) perspective. Students engage in course activities and discussions that focus on how to manage the customer experience from attraction to a mutually rewarding relationship. Students accomplish course objectives by examining foundational literature and theories, seminal works, and established models in the field of consumer behavior.

**DDBA 8533 - Seminar in Marketing Research**

(3 sem. cr.)

Business leaders and decision makers need accurate information to introduce projects and services that create appeal and value in the mind of the consumer. In this seminar course, students explore the processes and methods of studying markets and focus on understanding the empirical research process. Students survey marketing research methods in the context of understanding competitive opportunities, new product development, and positioning a product or service in the marketplace. They examine the practices of utilizing public databases, spotting trends, and identifying opportunities for new research in the field. Students hone critical-thinking and analytical skills by formulating an original research topic related to the course literature, which they present and debate in a peer work group. Students accomplish course objectives by examining foundational literature and theories, seminal works, and established models in the field of marketing research.

**DDBA 8540 - Seminar in International Finance**

(3 sem. cr.)

International finance is a branch of economics that considers how capital investment is undertaken globally and how financial markets and global trade influence investment opportunities. Independent scholars taking this seminar course are provided with an overview of the historical context of globalization. Included in the discussions is an in-depth analysis of how organizations, emerging markets, and society benefit from globalization. Independent scholars examine how organizations manage risk in a global environment. Scholars also explore barriers to globalization. Independent scholars accomplish course objectives by examining foundational literature and theories, seminal works, and established models in the field of international finance. They also formulate an original research topic and synthesize findings and conclusions based on their literature review for a comprehensive and critical understanding of the discipline.

**DDBA 8541 - Seminar in Entrepreneurial Finance**

(3 sem. cr.)

Entrepreneurial finance is designed to help managers make accurate investments and business decisions in entrepreneurial settings. In this seminar course, students explore the development of a small business from startup to financial security. They examine the process and various sources of funding, including partnerships with venture capitalists,
conventional sources, and initial public offerings. Most importantly, students explore
how to construct funding as well as the trade-offs and benefits for each model. They
analyze entrepreneurial equity and how to negotiate any agreement with funding
sources. Students accomplish course objectives by examining foundational literature and
theories, seminal works, and established models in the field of entrepreneurial finance.
They also identify additional resources and disseminate research conclusions to their
peers.

**DDBA 8550 - Seminar in Managerial Accounting**

*(3 sem. cr.)*  
Using a theoretical approach, students in this seminar examine common concepts,
principles, and methods used in managerial decision making, including revenue
forecasting and cost prediction methods, break-even and cost-volume-profit analyses,
performance variance analysis, relevant cost analysis, project valuation, expected rates of
return, and discounted cash flow methods. They also explore opportunities for
optimizing methods. Additionally, students examine applied research methods in the
context of design and development of rational managerial decision-making systems.

**DDBA 8551 - Seminar in Accounting-Based Performance Evaluation Systems**

*(3 sem. cr.)*  
Students in this seminar examine theories of corporate governance and employee
performance evaluation, including the control and performance evaluation aspects of
pricing/contribution margin analysis, cost allocation, activity-based costing, throughput
accounting, key performance indicators, and balanced scorecard methods. They also
explore opportunities for optimizing methods. Additionally, students examine applied
research methods in the context of design and development of rational corporate
governance and employee performance evaluation systems.

**DDBA 8552 - Seminar in International Aspects of Managerial Accounting**

*(3 sem. cr.)*  
Through this seminar course, independent scholars have the opportunity to examine
international aspects of theories of managerial decision making, risk management, and
budgeting in the context of global, cross-cultural management. They also explore applied
research methods on the effects of import/export issues, foreign exchange rates,
controlled economies, social responsibility reporting, inflation accounting, and
international taxation.

**DDBA 8560 - Seminar in Healthcare Managerial Decision Making**

*(3 sem. cr.)*  
In this seminar, independent scholars examine the application of healthcare policy and
economic principles to managerial decision making, including policy development and implementation processes as well as how health policy changes over time. They also explore key policy initiatives related to cost, quality, ethics, and access, and they investigate stakeholders and interest groups involved in the health policy process. Independent scholars devote special attention to how economic principles, such as supply, demand, and market price determination, relate to the structure of the healthcare industry and the distribution of resources and services.

DDBA 8561 - Seminar in Managing Healthcare Delivery Systems

(3 sem. cr.)
Healthcare delivery is one of the largest industries in the United States. Students in this seminar focus on the components of the health services delivery system, including patients, organizations, professionals, public and private third-party payers, regulators, reimbursement and reimbursement methods, and technology. Students explore the nature of population illness and disease, and they examine the continuum of health services, such as hospitals and hospital systems, ambulatory care services, long-term care services, wellness/prevention services, and community/public health services. In addition, students analyze contextual factors and challenges that are linked to the healthcare delivery system management; they also explore the impact of these challenges on the delivery of services and healthcare management.

DDBA 8562 - Seminar in Law and Ethics in Healthcare Management

(3 sem. cr.)
Students in this seminar engage in an examination of the key laws, regulations, and court decisions related to healthcare operations, oversight of organizations and practitioners, and the rights and responsibilities of healthcare providers and patients. They study laws and regulations governing healthcare providers, the identification of organizational governance issues, fraud and enforcement, and the development of risk management processes and controls. Students also explore key ethical issues underpinning healthcare delivery and management, including patient rights and advocacy.

DDBA 8570 - Seminar in Program and Portfolio Management

(3 sem. cr.)
Independent scholars in this seminar course examine developments in the discipline of project-based program and portfolio management and the business competencies required to manage complex projects in dynamic, distributed, and global environments. Among the topics included are aligning project portfolios to organizational strategy and value, assessing project portfolio management successes and failures, measuring project portfolio performance, and stimulating organizational creativity and innovation.
DDBA 8571 - Seminar in Project Portfolio Performance and Organizational Effectiveness

(3 sem. cr.)
Managing an organization's portfolio of projects requires an understanding of project management process groups and the alternative approaches for selecting and managing a portfolio of projects. Independent scholars also examine how an effective project portfolio management infrastructure is built so that a formal approach to project management can be applied by balancing the need for structure with the need for flexibility. Issues of cultural and ethical diversity that affect management in a global environment are also explored.

DDBA 8572 - Seminar in Project-Based Strategic Leadership

(3 sem. cr.)
Independent scholars in this seminar course examine the forces of complexity and uncertainty and their impact (past, present, and future) on the project management profession. Topics include a retrospective analysis of research and practice over the past several decades and the examination of the increasing focus on the strategic value of projects and project leadership. Because the global business environment is characterized as increasingly complex and uncertain, and projects are directly linked to the organization's strategic goals and competitive position, project management practitioners and researchers also learn about leading the continued development and maturity of the project management profession.

DDBA 8580 - The New HR: The Savvy Strategic Partner

(3 sem. cr.)
The role of the human resources (HR) department as a strategic partner entails new and different functions that enable organizations to function as high-performing and cost-cognizant entities. To recognize the best way for organizations to grow in capability and capacity, students in this course detail the potential for involvement of HR in evaluating buy-build alternatives and B2B partnerships. They explore a range of alternatives, including service agreements, contract negotiations, and management of fully outsourced services. Graduates of this course will be able to analyze the impact of such decisions on the quality of the deliverables and the risk impact on both the HR department and the organization.

DDBA 8581 - Succession Planning: A Survival Tool of the Fittest

(3 sem. cr.)
In order to succeed in competitive environments, organizations must begin succession planning at the beginning of every initial interface—when an employee is added to the talent pool, when a leader is added to the knowledge capital, when the organization
reviews its successes and its challenges, and when corporations plan "to plan." The only sure way to do this well is to know where the gaps are in present-day resources and cast them repeatedly against future and emerging needs and trends facing the organization, then craft the strategies that will map the path for getting there. In this course, students are drawn into defining organizational capability using career mapping, opportunistic development, and technology to fulfill future strategic human and knowledge capital essential in optimizing organizational success.

**DDBA 8582 - An HR Plan for Organizational Agility**

(3 sem. cr.)
Graduates of this new human resources (HR) strategic partner course will be able to integrate several key HR concepts with organization-wide strategic planning to develop an evidence-based annual HR department/division operating plan critical to the for-profit or not-for-profit organizations. New HR professionals must be able to direct individual and organizational performance to deliver on value proposition, build sustainability, and impact positive social change.

**DDBA 8590 - Impact of Homeland Security Policies on Business Continuity**

(3 sem. cr.)
The term *business continuity management* is a unifying process and the umbrella under which multiple supporting functions, including crisis management and business continuity, operate and integrate. Terrorism represents a significant threat to global business leaders, since globalization and terrorism are inextricably linked. Events such as the September 11, 2001 terrorist attacks and the 2004 Madrid bombings had significant impact on business continuity management. From a business continuity perspective, learners in this course examine key questions and issues facing the U.S. intelligence community from a global viewpoint. What is its role in homeland security and how may these topics affect business continuity management? The emphasis of the course will be on issues affecting business continuity management policy, oversight, and intelligence support to homeland defense/security and global business decision making. The Intelligence Reform and Terrorism Prevention Act of 2004 is addressed, and the course is shaped to focus on homeland intelligence support business issues at the state, local, and tribal levels.

**DDBA 8591 - Homeland Security—Business Planning**

(3 sem. cr.)
A foundational tenet of terrorist activity is the destruction of business structures. Business leaders can do much to prepare for the impact of hazards faced with regard to technology-related hazards, terrorism, natural hazards, and human-caused hazards. From a business planning standpoint, the business leader will examine an *all hazards* approach. Learners, as part of an economical system, will get an overview of terrorism that
includes the definition, root causes, ideologies, historical and current perspectives, modus operandi and targets, radicalization and recruitment, terrorist group structures, domestic and international terrorist groups, state-sponsored terrorism, and counterterrorism inasmuch as all impact the business leader. Terrorism affects both the long-term and short-term segments of businesses around the world; therefore, the need for business continuity planning is investigated.

**DDBA 8592 - Business Infrastructure Vulnerability Analysis**

(3 sem. cr.)
Given the uncertainty of emerging terrorist and criminal threats, business leaders require a quick qualitative assessment of the vulnerability to existing business operations, personnel, facilities, and assets. From a business perspective, critical infrastructure protection is one of the cornerstones of homeland security. The National Strategy for Protection of Critical Infrastructure and Key Assets lists 11 critical sectors. Students in this course are introduced students to the Department of Homeland Security (DHS) risk-based resource allocation process. In the course, the fundamentals of business-related risk assessment are discussed, and the advantages and disadvantages of various risk assessment tools are examined. At the completion of the course, learners will be able to assess the value of various risk tools, apply those tools to any critical infrastructure within their multijurisdictional region, and derive optimal business strategies and draft policies to reduce the risk associated with future terrorist attacks and other hazards on their business interests.

**DDBA 8850 - The New HR: The Savvy Strategic Partner**

(3 sem. cr.)
The role of the human resources (HR) department as a strategic partner entails new and different functions that enable organizations to function as high-performing and cost-cognizant entities. To recognize the best way for organizations to grow in capability and capacity, students in this course detail the potential for involvement of HR in evaluating buy-build alternatives and B2B partnerships. They explore a range of alternatives, including service agreements, contract negotiations, and management of fully outsourced services. Graduates of this course will be able to analyze the impact of such decisions on the quality of the deliverables and the risk impact on both the HR department and the organization.

**DDBA 8852 - An HR Plan for Organizational Agility**

(3 sem. cr.)
Graduates of this new human resources (HR) strategic partner course will be able to integrate several key HR concepts with organization-wide strategic planning to develop an evidence-based annual HR department/division operating plan critical to the for-profit or not-for-profit organizations. New HR professionals must be able to direct individual
and organizational performance to deliver on value proposition, build sustainability, and impact positive social change.

**DDBA 9000 - Doctoral Study Completion**

*(4 sem. cr. per term for a minimum of five terms until completion)*

In the final doctoral study, independent scholars demonstrate their ability to examine, critique, and synthesize knowledge, theory, and experience so that new ideas can be tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. In all cases, independent scholars engage in rigorous inquiry that results in new knowledge, insight, or practice, demonstrating efficacy in the world of business and management. Through this course, independent scholars gain assistance in working through the process of the doctoral study. They design personal best practices for completing their study within a designated context. They also select their committee members, with whom they establish and maintain strong working relationships and on whom they rely to mentor and approve their proposal and final study. Ultimately, independent scholars completing the doctoral study make a fresh contribution to the field of practice in the professional business environment.

Students take this course for a minimum of five terms and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred.

**DDBA 9000P - Doctoral Portfolio Capstone Completion**

*(3 sem. cr. per term for a minimum of 5 terms = 15 sem. cr.)*

In the final doctoral portfolio capstone, independent scholars demonstrate their ability to examine, critique, and synthesize knowledge, theory, and experience. Through the capstone they provide evidence of new ideas tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. In all cases, independent scholars engage in rigorous inquiry that results in new knowledge, insight, or practice, demonstrating efficacy in the world of business and management. Through this course, independent scholars gain assistance in working through the process of the doctoral portfolio capstone. They design personal best practices for completing their portfolio capstone within a designated context. They also select their committee members, with whom they establish and maintain strong working relationships and on whom they rely to mentor and approve their proposal and final
study. Ultimately, independent scholars completing the portfolio make a fresh contribution to the field of practice in the professional business environment.

**DDBA 9001 - Doctoral Study Completion**

(continuous enrollment in 3 sem. cr. per term for a minimum of five terms until completion, with two 8-week terms taken per semester)

In the final doctoral study, independent scholars demonstrate their ability to examine, critique, and synthesize knowledge, theory, and experience so that new ideas can be tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. In all cases, independent scholars engage in rigorous inquiry that results in new knowledge, insight, or practice, demonstrating efficacy in the world of business and management. Through this course, independent scholars gain assistance in working through the process of the doctoral study. They design personal best practices for completing their study within a designated context. They also select their committee members, with whom they establish and maintain strong working relationships and on whom they rely to mentor and approve their proposal and final study. Ultimately, independent scholars completing the doctoral study make a fresh contribution to the field of practice in the professional business environment.

Students take this course for a minimum of five terms (two 8-week terms per semester) and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred.

**DDBA 9001C - Doctoral Study Completion**

(continuous enrollment in 3 sem. cr. per term for a minimum of five terms until completion, with two 8-week terms taken per semester)

In the final doctoral study, independent scholars demonstrate their ability to examine, critique, and synthesize knowledge, theory, and experience so that new ideas can be tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. In all cases, independent scholars engage in rigorous inquiry that results in new knowledge, insight, or practice, demonstrating efficacy in the world of business and management. Through this course, independent scholars gain assistance in working through the process of the doctoral study. They design personal best practices for completing their study within a designated context. They also select their committee members, with whom they establish and maintain strong working relationships and on whom they rely to mentor and approve their
proposal and final study. Ultimately, independent scholars completing the doctoral study make a fresh contribution to the field of practice in the professional business environment.

Students take this course for a minimum of five terms (two 8-week terms per semester) and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred.

**DDBA 9001P - Doctoral Portfolio Capstone Completion**

(continuous enrollment in 3 sem. cr. per term for a minimum of five terms until completion, with two 8-week terms taken per semester)

In the final doctoral portfolio capstone, independent scholars demonstrate their ability to examine, critique, and synthesize knowledge, theory, and experience. Through the capstone, they provide evidence of new ideas tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. In all cases, independent scholars engage in rigorous inquiry that results in new knowledge, insight, or practice, demonstrating efficacy in the world of business and management. Through this course, independent scholars gain assistance in working through the process of the doctoral portfolio capstone. They design personal best practices for completing their portfolio capstone within a designated context. They also select their committee members, with whom they establish and maintain strong working relationships and on whom they rely to mentor and approve their proposal and final study. Ultimately, independent scholars completing the portfolio make a fresh contribution to the field of practice in the professional business environment.

Students take this course for a minimum of five terms (two 8-week terms per semester) and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred.

**DDHA 8003 - Building a Multidisciplinary Approach to Health**

(3 cr.)

In this course, students explore the multidisciplinary nature and integration of professional practice in the health field. Students have the opportunity to utilize their
scholarly voice with diverse audiences and with academic integrity to ensure academic and professional success as a scholar-practitioner and social change agent. As leaders in their profession, students discuss critical public health and health services in the health field utilizing a response to a natural disaster, review of emerging issues in the health field, and what it means to be part of a multidisciplinary team to develop community partnerships with key stakeholders to address health issues impacting their communities, agencies, and/or organizations.

**DDHA 8006 - Doctor of Healthcare Administration Foundational Concepts**

(3 cr.)
In the DHA Doctoral Foundations course, students will examine various aspects of being a doctoral student. Students will be exposed to DHA program requirements, support resources, research requirements, healthcare administration professional domains, and networking activities. This course will also provide information about the doctoral capstone process at Walden, including major benchmarks and expectations. This course is required to be taken in the first term of the program for all students.

**DDHA 8011 - Doctor of Healthcare Administration Foundational Concepts**

(3 cr.)
In the DHA Doctoral Foundations course, students will examine various aspects of being a doctoral student. Students will be exposed to DHA program requirements, support resources, research requirements, healthcare administration professional domains, and networking activities. This course will also provide information about the doctoral capstone process at Walden, including major benchmarks and expectations. This course is required to be taken in the first term of the program for all students.

**DDHA 8050 - Global Health and Issues in Disease Prevention**

(5 cr.)
Students are provided with an in-depth review of how global health-based strategies are used in the prevention of disease and disability in diverse populations. They explore global health topics and disease prevention activities from the perspective of understanding the determinants of health. Using a cross-disciplinary approach, students examine how economics, social factors, cultural competency, health literacy, health policy, urbanization, globalization, the environment, and other factors influence disease. They consider how research in disease prevention, health determinants, cultural ecology, and global health applies to public and community health efforts.

**DDHA 8051 - The United States Healthcare Delivery System**

(5 cr.)
Healthcare delivery is one of the largest industries in the United States. Students in this
course are provided with the opportunity to gain thorough insight into the current structure and components of health services and delivery; they are also presented with an abbreviated history addressing the nature of population illness and disease. Students identify and describe components of the system, including patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods, and technology. They engage in activities and discussions focused on the continuum of services related to healthcare, such as hospitals and hospital systems, ambulatory care, and long-term care. Students also explore issues related to these services, such as wellness, prevention, and community and public health, for a comprehensive understanding of the system. Students contextualize their study through the examination of current factors and challenges as well as the impact these challenges have on delivery and management.

DDHA 8103 - Advanced Healthcare Quality and Risk Management

(5 cr.)
The focus of this course is on the analysis of quality and risk management trends, models, issues, and strategies. It begins with an examination of the differences between quality and risk in healthcare, as well as the interconnectedness of the two. Students will apply quality and risk management concepts to their selected HSO and use frameworks and models to perform critical analyses. The benefits of membership in professional healthcare associations are also discussed. Threaded throughout the course is the application of elements of an Integrative Review (IR), which is the basis of the DHA doctoral study. Through an analysis and appraisal of literature, students will evaluate quality and risk management issues and recommend strategies for improvement in a comprehensive final project.
Prerequisites
- DDHA 8203 or DDHA 8203A
- RESI 8601
- DDHA 9003
- RSCH 8110X

DDHA 8113 - Advanced Concepts in Healthcare Leadership

(5 cr.)
This course will introduce students to concepts related to understanding, measuring, implementing, and leading successful change initiatives. Students will examine organizational theories, systems thinking approaches, and behavioral strategies that support diversity, equity, inclusion and will explore topics related to knowledge management, problem solving, conflict resolution, and mediation. By the end of the course, students will have developed skills to enhance organizational effectiveness and promote innovation and positive social change within healthcare organizations.
Prerequisites
• RSCH 8210 or RSCH 8210A or RSCH 8201A or RSCH 8200H or RSCH 8201H or RSCH 8210H or RSCH 8200X or RSCH 8201X or RSCH 8210X
• DDHA 8130
• DDHA 8051
• DDHA 8300
• DDHA 8600
• DDHA 8603
• DDHA 8400

DDHA 8130 - Communications, Marketing, and Public Relations for Healthcare Administration Leaders

(5 cr.)
An overview of marketing and public relations principles as they relate to healthcare administration, highlighting theoretical concepts that are commonly used in healthcare administration research and practice, is provided to students in this course. Topics include principles of communication, social marketing techniques, public relations techniques, promoting health literacy, identifying key stakeholders and community partnerships, principles of culturally appropriate health services delivery, marketing healthcare services, and ethical practice in healthcare administration.

DDHA 8203 - Advanced Healthcare Operations Management

(5 cr.)
In this course, students analyze the important operations that take place in healthcare services organizations (HSOs). Students examine HSO performance improvement tools, criteria, and frameworks. Transitioning from volume-to-value-based healthcare will be examined as well as the impact on the HSO. Students select one HSO type on which to focus. Within this HSO type, students interview an administrator on leadership, analyze the impact of operational problems on various stakeholders, examine metrics and data to improve performance, and apply process improvement tools to operational problems. Students utilize doctoral research skills to complete a poster project that will examine a current issue in HSO operations. Students also engage in networking activities to build professional peer contacts and further career opportunities.

Prerequisites
Doctor of Healthcare Administration (DHA) Track I
• DDHA 8006 or DDHA 8011

Doctor of Healthcare Administration (DHA) Track II
• DDHA 8006 or DDHA 8011
• DDHA 8130
• DDHA 8051
• DDHA 8300
• DDHA 8600
• DDHA 8603
• DDHA 8400

DDHA 8246 - Advanced Application of Practice-based Research in Health

(5 cr.)
The goal of this course is to provide participants with an understanding of the methods and principles of applied research (quantitative, qualitative, and/or mixed-method designs) in health, focusing on cultural sensitivity, appropriate literacy levels, and Community-Based Participatory Research (CBPR). Students gain an appreciation of advantages and limitations of this approach, and skills necessary for participating effectively in CBPR projects. Additional topics include the role of funding in health research and principles of community health assessment. Students learn to identify and prioritize problems, then assess and utilize community resources to address these problems. Students also develop their Doctoral Study Premise.

DDHA 8300 - Healthcare Financial Management and Economics

(5 cr.)
In this course, students gain knowledge of economics principles such as cost, quality, and access as they relate to the healthcare world. The principles of healthcare financial management, including accounting and finance, are vitally important to the viability and ongoing operations of a healthcare business. Students have the opportunity to interpret and analyze the financial statements of a business, use and analyze financial ratios, utilize variance analysis, understand and implement operating and capital budgeting, and develop knowledge of the business planning process. Students create portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.

DDHA 8303 - Research Methods for Healthcare Administrators

(5 cr.)
In this course students will build on what they learned from their previous courses in preparation for their doctoral study. Students will examine the application of key performance indicators and related metrics in healthcare administration research. Students will evaluate research methodologies by reviewing published research, illustrating findings in descriptive and narrative format, and synthesizing the information in a practice-focused healthcare administration problem statement and research strategy.
Prerequisites
• DDHA 8503
• DDHA 9003
DDHA 8400 - Human Resource Management for Healthcare Administrators

(5 cr.)
In this course, students address the role of human resources in healthcare organizations as well as the recruitment, retention, management, and development of these resources. Students gain an understanding of the key roles of human resource personnel in establishing goals and expectations regarding organizational performance as well as how individuals contribute to effective performance in terms of controlling costs, improving quality, and providing excellent customer service. They explore major federal and state legislation that influences human resources, key management functions within workforce planning and recruitment, and functions within workforce retention. Students devote specific attention to the administrative, operational, and strategic aspects of managing human resources, focusing on managing clinical and direct-care practitioners whose perspectives and expectations differ from those of management. Other topics that students explore and discuss include employment and contract labor law; compensation strategies, including benefits and pay for performance; staffing models; labor relations; performance management; workforce retention; and strategies for ensuring employee engagement, motivation, and satisfaction.

DDHA 8426 - Advanced Application of Practice-based Research in Health

(5 cr.)
The goal of this course is to provide participants with an understanding of the methods and principles of applied research (quantitative, qualitative, and/or mixed-method designs) in health, focusing on cultural sensitivity, appropriate literacy levels, and Community-Based Participatory Research (CBPR). Students gain an appreciation of advantages and limitations of this approach, as well as the skills necessary for participating effectively in CBPR projects. Additional topics include the role of funding in health research and principles of community health assessment. Students learn to identify and prioritize problems, and then assess and utilize community resources to address these problems. Students also develop their doctoral study premise.

DDHA 8450 - Project and Resource Management in Integrated Systems

(5 cr.)
In this course, students focus on the strategic resource management process in an organizational setting. As leaders in the healthcare field, students explore resource management within the context of the healthcare mission, planning resource allocation,
program implementation, and program evaluation. Students have the opportunity to assess their organization’s current strategic position and apply relevant theoretical models in healthcare settings to adjust management practices in a changing healthcare environment. Students can also address the organizational dynamics and change management processes of integrated health systems and their networks of hospitals, nursing homes, group practices, and medical offices.

**DDHA 8500 - Health Leadership and Systems Thinking**

(5 cr.)
In this course, students explore leadership models and theories, the core principles of public health leadership, and the application of systems thinking to public health. They examine how to create strategies and solutions that efficiently utilize public health and healthcare resources. Students also discuss descriptive and prescriptive systems, focusing on the application of these processes to current public health issues and challenges at the organizational and community levels.

**DDHA 8503 - Strategic Management and System Thinking**

(5 cr.)
In this course, students explore strategic management theories and the application of systems thinking to healthcare administration. They examine how to create strategies and solutions that efficiently utilize healthcare resources. Students also discuss descriptive and prescriptive systems, focusing on the application of these processes to current health issues and challenges at the organizational and community levels. Students will learn strategies for communicating.

Prerequisites
- DDHA 8703
- DDHA 8203
- DDHA 8103

**DDHA 8600 - Governance, Law, and Policy for Healthcare Leaders**

(5 cr.)
Students in this course examine healthcare organization governance principles, health laws and mandates, and health policy issues and practice, which directly impact healthcare leaders. Using case studies and hypothetical situations, students assess leadership roles and key ethical principles and challenges underpinning healthcare organizations. Students apply an interdisciplinary approach that employs sociological, political, economic, and ethical perspectives to increase performance and assure quality in healthcare delivery. Topics include healthcare policy, advocacy, laws, mandates, contracts, and ethical obligations to provide quality healthcare by being stewards of their organization.
DDHA 8603 - Healthcare Informatics and Technology

(5 cr.)
Students in this course have the opportunity to learn how sustainable health information technologies and applications assist leaders in the execution of organizational strategies and the transformation of the health care environment. They can also learn how these complex systems help decision makers in the organization to improve patient care outcomes and performance. Topics include evolving technologies such as data analytics, eHealth, personalized medicine, and social media; using technology applications to manage population health; risk assessment, including legal and ethical issues in health information technology; and change management. Students are challenged by scenario-based discussions that analyze best information technology practices across multiple industries.
Prerequisites
- DDHA 8006 or DDHA 8011

DDHA 8700 - Healthcare Operations Management

(5 cr.)
In this course, students examine the factors that affect performance outcomes within healthcare organizations; methods to monitor, adjust, and improve performance; and techniques and tools of quantitative analysis of operations and decision support that assist in management of capacity issues, reengineering, staffing, scheduling, productivity, and supply chain. Other important concepts that students examine include understanding operational assessment; understanding patient care and related support-care processes through flowcharting of steps in the process; taking a systems perspective on the organization and delivery of services; identifying problems and improvement opportunities using analytical techniques; and monitoring performance data to identify trends and variation based on current operations and those resulting from changes and improvements.

DDHA 8703 - Advanced Health Analytics and Data-Driven Decision Making

(5 cr.)
To make informed decisions, healthcare administrators need to synthesize an abundant and wide variety of healthcare data. Students in this course are provided with techniques to transform healthcare data and analytical tools needed to make critical decisions. This course helps students understand healthcare analytics so they can make data-driven decision for the healthcare organization. Data mining, using operational data, methods for interpreting data, and the use of technology in the collection and application of data are explored. Students apply data-driven decision-making skills to practical application through the use of contemporary and practical case studies. They
also apply techniques for presenting data to stakeholders.

Prerequisites
- DDHA 8113

DDHA 8750 - Trends and Issues in Executive Level Management for Healthcare Administrators

(5 cr.)
Healthcare administrators, more than ever before, are facing challenges and opportunities, given the dynamic nature of the healthcare industry. In this seminar-style course, students address how executive-level managers leading complex health systems can use strategic planning, risk management, and innovative business practices to take advantage of healthcare trends, as well as the current social and economic forces that guide strategic planning of healthcare systems. Students explore ways to improve Board of Director relationships, address financial challenges, and implement healthcare reform measures. As a result of this course, healthcare leaders are better able to visualize and address the quickly changing landscape of healthcare delivery per the guidelines outlined in the Patient Protection and Affordable Care Act of 2010. Students also have the opportunity to address the cultural issues that are present in the healthcare environment.

Prerequisites
Doctor of Healthcare Administration (DHA): Students who started before August 31, 2021
- RESI 8601

Doctor of Healthcare Administration (DHA): Students who started August 31, 2021, and later

- RESI 8601
- DDHA 8203
- RSCH 8110
- DDHA 9003

DDHA 8800 - Data-Driven Decision Making

(5 cr.)
To make informed decisions, healthcare administrators need to synthesize an abundant and wide variety of data. Students in this course are provided with techniques to transform data into the information needed to make critical decisions. Data mining, using operational data, methods for interpreting data, and the use of technology in the collection and application of data are explored. Students apply data-driven decision-making skills to practical application through the use of contemporary and practical case studies. They also apply techniques for presenting data to stakeholders.

Prerequisites
- RSCH 8201
- RSCH 8210
DDHA 8900 - Healthcare Quality Management

(5 cr.)
The focus of this course is on the development of leadership strategies and competencies to support healthcare and organizational quality delivery of care. Emphasis is placed on a systems approach exploring the organizational structures that impact healthcare quality performance and, ultimately, patient outcomes. Using macro (enterprise-wide) and micro (individual and team performance) perspectives, students examine the leadership roles, which define, develop, and support decisions affecting quality strategies. Students in this course address how key organizational theories, principles, and concepts relate to achieving the effective and efficient delivery of safe healthcare services. Through the development of a quality program initiative, students demonstrate an understanding of the impact an initiative has on organizational structure, its environment, and the system's leadership.

Prerequisites
- RSCH 8201
- RSCH 8210

DDHA 8901 - Research Forum Companion

(0 cr.)
The purpose of this forum is to assist students with making initial progress toward earning a Doctor of Health Administration (DHA) degree. Students begin working on the prospectus with their chair and become familiar with the resources available for doctoral students. The course offers doctoral students the opportunity to integrate their program of study and demonstrate knowledge of an in-depth exploration of a healthcare administration issue or problem. Students will engage in regular scholarly discussions with a faculty chair and fellow doctoral students, submit Quarterly Plans, and progress toward completion of the DHA degree. Information and resources related to the doctoral study, residencies, research and writing, and doctoral program expectations are provided for guidance.

DDHA 9003 - Doctoral Study Seminar I

(1 cr.)
Doctoral Study Seminar I - the Journey to the Community of Scholars gets students prepared for the capstone process. Students are introduced to the Doctoral Degree Coach, helpful capstone resources, time management strategies, and potential topics relevant to their field of study. Students also examine exemplar capstones to better understand the journey they will be undertaking.

Prerequisites
• DDHA 8006 or DDHA 8011
• DRWA 8000 or 8000G

DDHA 9013 - Doctoral Study Seminar II

(1 cr.)
Doctoral Study Seminar Course 2 on the Journey to the Communities of Scholars represents the preboarding phase of the journey. Students learn how to use the library, develop doctoral-level writing strategies, and write a literature review. Students also examine how problems of interest drive scientific inquiry.
Prerequisites
• DDHA 9003
• RESI 8601

DDHA 9023 - Doctoral Study Seminar III

(1 cr.)
Doctoral Study Seminar III - the Journey to the Communities of Scholars has students take off into developing critical elements of a scientific study. Students distinguish the characteristics of strong practice-focused questions and evaluate conceptual and theoretical frameworks with respect to their alignment with a study. Students will engage in an iterative process of developing practice-focused questions through peer review and feedback.
Prerequisites
• DDHA 9013

DDHA 9033 - Doctoral Study Seminar IV

(1 cr.)
Dissertation Seminar IV - the Journey to the Communities of Scholars has students travel towards completing their prospectus by selecting sources of evidence to answer a practice-based questions as well as explain the nature and significance of a doctoral study. Students evaluate how to align various elements of a scientific study and ensure ethical concerns are addressed. Students end this course with a solid draft of their prospectus.
Prerequisites
• DDHA 9023

DDHA 9043 - Doctoral Study Seminar V
Doctoral Study Seminar V - the Journey to the Communities of Scholars culminates the student’s journey towards developing a prospectus. This course focuses on completing the Prospectus Form. Students deliver an asynchronous oral and visual presentation of their proposed doctoral study and get feedback from peers and the instructor.

Prerequisites
- DDHA 9033

DDHA 9100 - DHA Research Capstone

(5 cr. per term for a minimum of 4 quarters until completion)
In this capstone course, doctoral students have the opportunity to integrate their program of study and demonstrate their knowledge into an in-depth exploration of a healthcare administration issue or problem. Students complete an applied practice-based project independently, with the guidance of a capstone supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and carry out and analyze a research protocol and project.

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

DDHA 9200 - Doctoral Study Prospectus Completion

(5 cr.)
In this capstone course, doctoral students have the opportunity to integrate their program of study and demonstrate their knowledge into an in-depth exploration of a healthcare administration issue or problem. Students complete an applied practice-based project independently, with the guidance of a capstone supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and carry out and analyze a research protocol and project.

Prerequisites
- DDHA 8303
- RESI 8601
- RESI 8602
DDHA 9203 - Doctoral Study Proposal Completion

(5 cr.)
In this capstone course, doctoral students have the opportunity to integrate their program of study and demonstrate their knowledge into an in-depth exploration of a healthcare administration issue or problem. Students complete an applied practice-based project independently, with the guidance of a capstone supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and carry out and analyze a research protocol and project.
Prerequisites
• DDHA 9200

DDHA 9213 - Doctoral Study Completion

(5 cr.)
In this capstone course, doctoral students have the opportunity to integrate their program of study and demonstrate their knowledge into an in-depth exploration of a healthcare administration issue or problem. Students complete an applied practice-based project independently, with the guidance of a capstone supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and carry out and analyze a research protocol and project.
Prerequisites
• DDHA 9203

DDPA 8003 - Foundations in Doctoral Studies

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online doctoral program and learning environment. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals and develop best practices and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library, the Writing Center, and other Walden academic centers. Students engage in course assignments focused on the practical application of scholarly and professional writing, critical thinking, and the promotion of professional and academic excellence as they relate to practice in public policy and administration.

DDPA 8003I - Foundations in Doctoral Studies
Students in this course are introduced to Walden University and to the requirements for successful participation in an online doctoral program and learning environment. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals and develop best practices and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library, the Writing Center, and other Walden academic centers. Students engage in course assignments focused on the practical application of scholarly and professional writing, critical thinking, and the promotion of professional and academic excellence as they relate to practice in public policy and administration.

**DDPA 8101 - Critical Issues in Emergency Management**

Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System. Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

**DDPA 8111 - Leadership and Organizational Change**

Successful organizations in a rapidly changing and complex world require leaders who embrace change and are able to engage others in change. In this course, students use traditional literature, current articles, and interactive media to explore the qualities, characteristics, and skills of effective leaders as well as the theories, models, and relationships between leadership and organizational change. They assess the ethical issues and standards as well as the opportunities and challenges related to leading diverse organizations through change. Students also examine how current leaders employ leadership and organizational change to contribute to social change, and they consider how to use these lessons to make further positive changes within an organization or their own community.

**DDPA 8112 - Governance and Public Policy**
Students in this course engage in an in-depth analysis of how societies are governed and how public policies are formulated, evaluated, adjudicated, and implemented. Students examine governance and public policy from theoretical and practical perspectives using ancient and classical voices as well as more modern and critical literature. Advanced techniques and research tools for policy analysis are used to illustrate various contemporary policy issues. With the aid of these techniques and research tools, students develop a policy plan to address a significant public policy concern or social issue of personal interest. Students also explore their future role in the field of public policy and administration.

**DDPA 8137 - The Nature of Crime and Criminology**

Students in this course are introduced to contemporary views and theories of maladaptive and criminal behavior. They examine a broad conceptualization of criminal behavior from an interdisciplinary perspective as well as theories and application of criminal profiling. Students also explore specific views of criminal behavior germane to groups, such as psychopaths, serial offenders, and sexually violent predators. At the end of this course, students will have an understanding of the theories and practices that are the foundations of the field of criminology. Students may take this as a nondegree course, which means they do not have to be enrolled in a program.

**DDPA 8200 - Management Techniques for the Public Sector**

Students in this course are introduced to evidence-based practices and analytic techniques for decision making in the public sector. Learning focuses on building a toolkit of analytic methods related to budgeting, problem solving, and utilization of data to inform leaders of areas for improvement in the delivery of public goods and services.

**DDPA 8201 - Risk Assessment, Preparedness, and Disaster Mitigation**

Risk assessment and mitigation are key components to effective emergency management and all-hazard planning and response. Students in this course focus on the methods and techniques required to assess an organization or government’s risk associated with the protection of human life and capital assets. They study ways to evaluate the social vulnerabilities to disaster and the special needs of at-risk populations, and they explore methods to reduce vulnerabilities and build capacity through structural and nonstructural mitigation. Additionally, students complete the FEMA Emergency Management Institute course IS-393.a: Introduction to Hazard Mitigation as part of this course.
DDPA 8204 - Fundamentals of Mapping and Geographic Information Systems

(5 cr.)
Students in this course are introduced to the fundamentals of mapping with geographic information systems. Through course readings and activities, students build an understanding of geospatial data assembly and manipulation and use the principles of cartographic design.

DDPA 8205 - Spatial Analysis and Modeling

(5 cr.)
In this course, students are introduced to advanced geospatial data processing and analysis through a combination of readings and computer exercises. Topics include advanced feature and attribute editing, spatial database queries, basic geoprocessing of both raster and vector data, and geospatial model building.

DDPA 8206 - GIS Research Methodology

(5 cr.)
Students gain familiarity with the tools and methods of research in geographic information systems (GIS) by developing an intensive GIS project to solve a practical problem of student interest under guidance from the instructor.

DDPA 8210 - Analytics for Evidence-Based Decision-Making

(5 cr.)
Analytics, as used by government and public administrators, is the practice of using statistics and computer analysis together to manipulate and gain insight from very large datasets. Analytic processes addressed in this course include data mining, machine learning, the use of neural networks as a decision-making tool, and exploration into computer-simulated and generated models for public decision-making. Analytics are used to understand past events and predict future events. This course emphasizes the development of critical thinking and data literacy skills for public administrators. Students will further develop the capability to communicate the results of analytics to various stakeholders.
Prerequisites
  • DDPA 8200
  • RSCH 8210T

DDPA 8215 - Controversies in Criminal Justice

(5 cr.)
Justice is at the heart of the U.S. democratic system, yet opposing viewpoints surrounding and within the system often muddle interpretations of the law and the
development of policies to promote and enforce justice. In this course, students examine events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act, for example, the terrorist acts of September 11, 2001. They learn how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties. Through discussion with peers, assessment of contemporary articles, and examination of Supreme Court cases, students have the opportunity to reflect on and potentially broaden their own opinions and perspectives on current criminal justice affairs in regard to issues of law enforcement, public perception, policy development, and ethics.

**DDPA 8217 - Technological Solutions and 21st-Century Crime**

(5 cr.)
In consideration of modern technological innovation and the spread of knowledge through digital means, the relationship between technology and criminal activity is increasing. In this course, students explore this relationship and gain a comprehensive view of cyber crime, including current trends. They learn how law enforcement agencies use technology to track and apprehend criminals. Through real-world scenarios, students examine legal responses to cyber crime and learn different approaches and techniques for solving cyber crimes and handling related challenges. Students also have the opportunity to gain a comprehensive understanding of building cases and prosecuting crimes through practical exercises in identification, data mining, and the protection and gathering of evidence.

**DDPA 8300 - Writing Applied Research and Funding Proposals**

(5 cr.)
Students in this course propose an applied research project related to a specific field of study. Students focus on two objectives: first, to draft a Prospectus Form for the doctoral Professional Administrative Study (PAS); and second, to explore how research can be applied to solve problems in the practice of public administration. Students further gain exposure to funding opportunities to support public and nonprofit organizations.
Prerequisites
- DDPA 8210

**DDPA 8301 - Disaster Response and Recovery**

(5 cr.)
A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issues, including evacuation, relocation, and tactical and strategic decisions in the immediate
aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework, and they can gain an understanding of how local, state, and federal policies mesh in response and recovery efforts. Through their exploration, they study how recovery begins once the immediate threat of the emergency wanes and the focus shifts to restoring disaster-affected areas. As part of this course, students complete the FEMA Emergency Management Institute course IS208.a: State Disaster Management.

**DDPA 8310 - Fundamentals of Mapping and Geographic Information Systems**

(5 cr.)
Students in this course are exposed to a variety of instructional techniques to learn information regarding mapping fundamentals and the use of computers to produce maps and other graphic displays of data.

**DDPA 8315 - Spatial Analysis and Modeling**

(5 cr.)
Students in this course focus on the fundamental statistical methods and procedures relevant to geographic data and spatial analysis.

**DDPA 8320 - Public Policy Implications of Terrorism Legislation and Policies**

(5 cr.)
Students in this course are provided with the opportunity to develop a broad perspective on the history of the U.S. Patriot Act, terroristic legislation and immigration laws, and their policy implications on law enforcement, governmental entities, organizations, and individuals. Students gain a foundation to build the skills that public administrators and public policy analysts use to draft and implement public policy and enforce and/or respond to potential terroristic threats while simultaneously upholding and protecting constitutional freedoms. Students examine topics through a wide variety of resources, including contemporary texts, websites, case studies, and material representing international, national, and local governments and organizations. They critically review and analyze the U.S. Patriot Act and similar terroristic 297 legislation and policies, and they participate in discussions about these laws and their implications on U.S. constitutional freedoms.

**DDPA 8321 - Terrorism: A Systemic Approach for Emergency Preparedness**

(5 cr.)
Terrorism continues to be a constant threat to the American public, facilitating the need for accurate information, organized resources, and established approaches to respond to emergencies and keep the public informed. Students in this course examine terrorism and related public policy on a local, national, and international level. They also assess the
need and function of systemic approaches for emergency preparedness. Students explore and discuss topical issues, such as terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Using analytic skills and tools, students assess recommendations that policy makers use in decisions to prevent or respond to terrorism. They also gain hands-on experience initiating the development and/or analysis of a terrorism-preparedness infrastructure.

**DDPA 8322 - Critical Incident Planning and Leadership**

(5 cr.)
Who is responsible for emergency management, and what elements should be included in an emergency management plan? Students in this course have the opportunity to answer such questions as they examine the principles of emergency planning, selection of leaders, specialized planning (e.g., schools, tourism), mutual aid, and leadership theories. Students analyze case studies, identifying weaknesses in current methods as well as potential solutions. Through this analysis, students develop new strategies and perspectives in regard to responding to and planning for critical incidents. Public administrators or students planning to enter the field of public administration build a basic foundation to develop a critical incident plan and gain a thorough understanding of leadership models and methods.

**DDPA 8325 - GIS Research Methodology**

(5 cr.)
Students in this course familiarize themselves and practice with the tools and methods of research in geographic information systems in students’ areas of interest in practice and research.

**DDPA 8330 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness**

(5 cr.)
Professionals in all areas of public policy and administration work with individuals and organizations of different cultures on a daily basis; therefore, global consciousness is vital to effective communication and interaction in the field. In this course, students explore and analyze the cultural values and styles of communication, reasoning, and leadership unique to their home culture. Students apply these concepts to better understand the people, values, and policies of other cultures. They also identify and become familiar with challenges that American nonprofit organizations face as they work internationally or cross-culturally within the United States. Sharpening critical-thinking skills, students research and assess an organization within their own community that has international links; through this assessment, students gain further awareness of different cultures and the importance of cross-cultural ties.
DDPA 8331 - Crossing Borders: U.S. and International NGO Organizational Cultures and Environments

(5 cr.)
In this course, students study in depth the cultures, structures, and activities of nongovernmental organizations in select countries and compare their activities, organizational cultures, structures, and working environments with nonprofits in the United States.

DDPA 8332 - Placing NGOs in the Global Context

(5 cr.)
Modern public policy and administration professionals use knowledge of international culture to understand the operations and structure of nongovernmental organizations (NGOs) in different countries, thus leading to well-informed, globally responsible decisions. In this course, students engage in a comprehensive study of the cultures, structures, and activities of NGOs in select countries. Students compare the activities, organizational cultures, structures, and working environments of these countries with nonprofit organizations in the United States. Through discussions, research, and topical writing assignments, students identify and assess the values, actions, and beliefs of a selected culture to gain an in-depth understanding of that culture’s voluntary or NGO environment.

DDPA 8380 - Policy and Politics in American Political Institutions

(5 cr.)
Students in this course are introduced to the crafts of policymaking and policy analysis in the U.S. democratic system. Students examine the tasks involved in the policy process, including setting agendas, using policy analysis tools, managing the political process, implementing policy, and providing evaluations and feedback. Through this analysis, students work toward developing skills to conduct policy and economic analyses as well as to determine the political feasibility of proposed policies. They learn about regulation as a policy choice. They also work toward enhancing their ability to develop alternatives and to assess strategies proposed to achieve certain policy objectives. Students engage in scholarly writing assignments and discussions on policy areas of interest, such as communications, immigration, transportation, housing, labor, arts, and environmental policies.

DDPA 8381 - Public Policy and Evaluation

(5 cr.)
There are a variety of tools available to policymakers and policy analysts to evaluate the impact of social programs. In this course, students examine these tools and work toward gaining the skills needed to develop plans for evaluation and to assess social
programs effectively. Students engage in discussions and assignments designed to provide practical application of content on a variety of topics, such as selecting programs to evaluate, crafting program descriptions, identifying stakeholders and their interests, developing logic models, framing evaluation questions, applying utilization-focused evaluation techniques, using quantitative and qualitative tools to complete formative and summative evaluations, and providing evaluation reports and feedback to decision makers. Using concepts presented in the course, students gain hands-on experience developing an evaluation design for a social program.

**DDPA 8382 - Public Policy and Finance**

(5 cr.)
Public policymakers often rely on microeconomic and macroeconomic models to formulate new policies and reevaluate existing policies. In this course, students examine the use of such models in the public policy setting and assess how public finance influences policy choices as well as implementation alternatives. Through weekly analytical writing assignments and peer discussions, students explore tax policies and tax incentive models; budgeting; public/private models; market influences on policy; the impact of government expenditures on income redistribution; and economic considerations of welfare, food stamps, workers' compensation, Social Security, and outsourcing of public programs. Synthesizing course content and applying critical-thinking skills, students assess a local government jurisdiction, examine the decisions of policymakers, and recommend improvements based on economic models.

**DDPA 8390 - Strategic Context of Public Management and Leadership**

(5 cr.)
Students in this course engage in a collaborative study of the changing strategic context of public administration. Students apply a systems perspective to construct a public enterprise "mental" model of a public organization to understand the strategic context for practical action and the stakeholder relations involved. Students demonstrate their knowledge of the interrelated flows of money, knowledge, and influence as they weave these elements in their model. They engage in readings and practical assignments that emphasize management and leadership in a time of unprecedented and unpredictable change. Students also work toward developing professional-action habits for pragmatic action-learning in the practice of public administration.

**DDPA 8400 - Professional Administrative Study**

(5 cr. per term for a minimum of four terms until completion)
The Professional Administrative Study (PAS) results in a formal manuscript designed and written to address a problem in public administration practice. Each DPA student is required to complete a PAS. The PAS involves students completing an applied research study that addresses an actual administrative problem or need faced by a client
organization. Students complete the PAS independently, with the guidance of a supervisory committee chair, a committee member, and a University Research Reviewer (URR). Students complete a prospectus, proposal, research ethics review, and a final written PAS. Oral presentations are required both after the proposal and final projects are approved by the committee. The PAS paper takes the format of a consulting report and, at a minimum, includes the following sections:

- Abstract
- Introduction to the Problem
- Conceptual Approach and Background
- Data Collection Process and Analysis
- Evaluation and Recommendations
- Dissemination Plan

Prerequisites
- All prior coursework

Note: Students take this course for a minimum of four quarters and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval.

**DDPA 8401 - Public Health Leadership and Systems Thinking**

(5 cr.)
In this course, students explore leadership models and theories, the core principles of public health leadership, and the application of systems thinking to public health. They examine how to create strategies and solutions that efficiently utilize public health and healthcare resources. Students also discuss descriptive and prescriptive systems, focusing on the application of these processes to current public health issues and challenges at the organizational and community levels.

**DDPA 8405 - Ethics and Social Justice**

(5 cr.)
Ethics is a foundational element of leadership. In this course, students examine the philosophy of ethics as well as responsibility and social justice—basic tenets of public service. Students explore the complex social, political, and related ethical challenges leaders face as they seek to meet the needs of diverse constituents. They examine ethics and social justice related to economic disparity, power, and privilege. Students also assess demographic data and current social trends and themes to understand, analyze, and address ethical and social justice issues that impact service delivery in a global community. Applying concepts presented in the course, students engage in an in-depth assessment of an emerging or persistent ethical or social justice issue, through which they demonstrate their ability to make recommendations for improvement or
change.

Prerequisites

- MMPA 6116, NPMG 6116, PPAA 8000, PPAA 8000i, MMPA 6200, NPMG 6200, CRJS 6000, CRJS 6002, HUMN 8000, or HLTH 8003

DDPA 8410A - Research Forum Companion

(1 cr.)
The purpose of this forum is to assist students with making initial progress toward earning the Doctor of Public Administration (DPA) degree. Students begin working on the prospectus with their chair and become familiar with the resources available for doctoral students. Doctoral students are offered the opportunity to integrate their program of study and demonstrate knowledge of an in-depth exploration of a public administration issue or problem. Students will engage in regular scholarly discussions with a faculty chair and fellow doctoral students, submit Quarterly Plans, and progress toward completion of the DPA degree. Information and resources related to the doctoral study, residencies, research and writing, and doctoral program expectations are provided for guidance.

DDPA 8420 - Health Economics

(5 cr.)
Students in this course examine the application of economic principles to healthcare managerial decision making regarding the amount, structure, and distribution of healthcare resources and services. Because of the complexity and uncertainty of the healthcare system, as well as the scope of resources consumed by health and health-related organizations, managers must appreciate the economic implications of decisions regarding allocation of resources. Students advance their knowledge of economic principles as reflected in the population demand for health; the demand for healthcare and medical care; the supply of health organizations and practitioners; the role of insurance, moral hazard, and adverse selection; the practice of cost-shifting; the structure, competitive nature, and dynamics of markets; differing objectives of for-profit and nonprofit organizations; variation in consumer access to and utilization of services; roles of uncertainty and information asymmetry; strategies for consumer cost-sharing; and the challenges healthcare organizations face in the pricing, production, allocation, and distribution of health and medical services. Special attention is devoted to understanding how health services differ in a variety of competitive markets.

DDPA 8540 - Strategic Planning, Management, and Leadership in a Global Context

(5 cr.)
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and
leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships between strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: thinking, acting, and leading strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

**DDPA 8541 - Sustainable Development for Global Communities**

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change, assess community needs and resources, create community visions, promote stakeholder interest and participation, analyze community problems, and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

**DDPA 8542 - Transformative Change in a Global Environment**

(5 cr.)
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

**DDPA 8740 - Disaster, Crisis, and Trauma**

(5 cr.)
There is no shortage of natural and human-made disasters, such as war, violence, genocide, and terrorist activities. Individuals and communities impacted by such disasters
often need assistance from professionals who understand the social, cultural, and psychological complexities of crisis and trauma. Students in this course investigate how these incidents impact the psychology of individuals and groups. They assess traditional and current literature and complete practical exercises to learn about theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., posttraumatic stress disorder); and available resources to deal with trauma. Considering the various ways crisis professionals can promote positive social change, students devote special attention to the importance and development of culturally appropriate service-delivery programs and interventions for individuals affected and traumatized by disasters.

**DDPA 8741 - Psychology of Terrorism**

(5 cr.)
Many sources define terrorism as a type of psychological warfare, as it induces fear and feelings of vulnerability. Therefore, professionals need to understand all aspects of terrorism to help prevent further terroristic acts and respond to victims who have been affected psychologically. Students in this course explore terrorism from a psychological perspective. They examine types of terrorism; contributing factors related to the development of terrorists and terrorist organizations; counterterrorism agencies and laws; the impact of terrorist events on individuals, families, and communities; prevention, intervention, and postvention with survivors; media coverage of terrorist events; human rights and ethical issues; and future trends related to the psychology of terrorism. Students also examine the threat of terrorism in their own community and evaluate the potential impact. Using concepts presented in the course, they consider applications for preventative measures as well as strategies to promote resiliency among individual and families who may become victims of terrorism.

**DDPA 8810 - Fundamentals of Law and Public Policy**

(5 cr.)
Legal decisions and the law often have a major impact on the creation of public policy. In this course, students explore and discuss the relationship between laws and public policy and the impact that court decisions have on policy and policy leaders. They examine the role of administrative agencies in the creation and execution of law and public policy and the role of the courts in resolving challenges to agency rule making; conflicts between executive and legislative branches of government; and conflicts between and among federal, state, and local laws. Students have the opportunity to sharpen their critical-thinking and research-database skills as they search for real-world examples of how fundamental legal concepts and processes affect the creation and execution of law and public policy.

**DDPA 8811 - Legal Research for Policy Practitioners**
There is a wealth of vital legal knowledge available to public policy practitioners. In this course, students explore the many print and electronic resources available for legal research. Students examine how practitioners use the law to inform the creation of public policy. They engage in assignments designed to provide practical application of content to learn how to navigate legal libraries, cite cases, and employ research to support public policy. Students also gain experience in applying legal research to case studies and contemporary issues.

**DDPA 8812 - Contemporary Cases and Issues in the Courts**

There is a wealth of vital legal knowledge available to public policy practitioners. In this course, students explore the many print and electronic resources available for legal research. Students examine how practitioners use the law to inform the creation of public policy. They engage in assignments designed to provide practical application of content to learn how to navigate legal libraries, cite cases, and employ research to support public policy. Students also gain experience in applying legal research to case studies and contemporary issues.

**DDPA 8820 - Elements of Sustainable and Livable Communities**

Creating and maintaining sustainable and livable communities require leaders who understand the connections among the natural, built, and social environments and who can address these connections in a holistic and integrated fashion. Students in this course examine concepts of sustainability and livability and explore popular approaches to creating and maintaining communities that are more environmentally sound, economically prosperous, and socially equitable. They also focus on strategies to halt urban sprawl and to promote alternative modes of transportation. Students define and explore these concepts through case studies and examples drawn from local communities.

**DDPA 8821 - Tools for Sustainable Community Development**

Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change, assess community needs and resources, create community visions, promote stakeholder interest and participation, analyze community problems, and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and
models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

**DDPA 8822 - Current Issues in Regional and Local Public Policy**

(5 cr.)
Public decision makers must understand and address a variety of complex and interrelated issues, such as land use and transportation, energy and environment, housing and schools, and regional economic development. In this course, students learn how leaders attend to these issues in light of existing policies and contemporary social, economic, political, demographic, and technological trends. Students explore and discuss planning processes, tools, approaches, strategies, and policies used to create sustainable and livable communities through collaborative processes involving multiple stakeholders. Through the development of a policy-option written assignment, students assess critical issues and identify problem-solving strategies.

**DDPA 8832 - Terrorism: Legislation and Policy**

(5 cr.)
The events of September 11, 2001, resulted in a new and intense focus on the issue of terrorism in the United States and abroad. In this course students explore the history of terrorism; laws, regulations, and legislation related to terrorism; and the roles of the media, governmental agencies, and entities in the prevention of and response to terrorism. Students apply their knowledge to case studies and current trends related to terrorism.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**DDPA 8841 - Health Policy and Management**

(5 cr.)
In this course, students examine the factors that influence and improve health outcomes of individuals and populations, with attention to the goals of Healthy People 2010 and the main components and issues of organization, financing, and delivery of health services and public health systems in the United States. Topics include management theories and processes, systems thinking, strategic planning and partnerships, quality and performance improvement, leadership, and organizational behavior. The policy process is addressed, as well as the advocacy role of the public health professional in influencing local, state, and federal policy. The impact of global trends on public health practice, policy, and systems is also considered.

**DDPA 8850 - Introduction to the Nonprofit Sector**
Nonprofit organizations (NPOs) can serve to positively affect people’s lives through social change, but they require leaders who have a fundamental understanding of the nonprofit sector, including related ethical, legal, and global perspectives. Students in this course explore these viewpoints as well as the history, foundations, and types of NPOs. They also examine the diverse political, social, and economic contexts within which NPOs exist. Students explore and apply marketing, public relations, and communication concepts and strategies to case studies and contemporary situations. Gaining practical insight, students also apply theories presented in the course to the development of a concept paper guiding the development of a nonprofit organization.

**DDPA 8851 - Board Governance and Volunteer Management**

(5 cr.)
The success of nonprofit organizations (NPOs) is largely dependent on the effective management of program volunteers and board members—individuals who often serve as the lifeblood of NPOs. Students in this course explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation. They focus on methods that organizations use to create and maintain an effective board of directors to ensure that the board governs and guides the organization toward its mission. Students design a board development or volunteer management plan based on processes presented in the course and fundamental concepts acquired earlier in the program.

**DDPA 8852 - Resource Development**

(5 cr.)
All nonprofit organizations require financial resources. Obtaining philanthropic financial support is essential to program delivery and stability. Students in this course explore the concepts of philanthropy and development, identification of funding sources, donor/prospect cultivation and education, and solicitation and appreciation strategies. They focus on processes and strategies for creating an organizational philanthropic culture based on ethics and donor relationships. Using these strategies and other concepts presented in the course, students create a resource development plan for a nonprofit organization.

**DNRS 6052 - Essentials of Evidence Based Practice**

(5 cr.)
Nurses base practice on sound and tested evidence to ensure the safety, high quality, and cost-effectiveness of patient care. This course provides students the opportunity to gain a better understanding of evidence-based practice (EBP) and how it interacts and aligns with research and quality improvement. Students will examine how to use databases to discover evidence and how to apply their knowledge of research
methodologies to critically appraise literature. They will also examine opportunities to strengthen their synthesis and integration skills to determine whether a change in practice is needed, based on a body of evidence. Through exploration of implementation, evaluation, and dissemination strategies, students will explore the intricacies of leading and mentoring change within an organization to enhance nursing practice.

**DNRS 6211 - Finance and Economics in Healthcare Delivery**

*(5 cr.)*

Students in this course examine the fundamentals of finance and economics in healthcare delivery. They explore different ways to analyze financial data and interpret the results of those analyses. They explore budgeting and financial management tools in the context of the nurse leader's role in the management of operational and capital resources. They examine the influence of policies and budgetary assumptions on the provision of health services. Students also explore budget and resource decisions contributing to the achievement of organizational outcomes within the context of providing efficient and cost-effective quality care.

**DNRS 6501 - Advanced Pathophysiology♦**

*(5 cr.)*

Advanced practice nurses must be equipped with an in-depth understanding of pathophysiological disease processes across the lifespan. In this course, students focus on understanding the bio-physiological processes, the deviations from these processes, and an in-depth examination of the scientific concepts related to the biology of disease processes. Advanced practice nursing students build on their knowledge of normal organ systems functioning to help organ systems return to optimal homeostasis. Through knowledge of pathophysiological disease processes, students synthesize the information needed to develop appropriate treatment plans for patients across the lifespan. Students explore a variety of topics regarding organ system diseases.

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**DNRS 6512 - Advanced Health Assessment and Diagnostic Reasoning♦**

*(5 cr.)*

The physical and emotional well-being of patients and families can be complex and multifaceted. Advanced practice nurses need to have the knowledge and ability to provide safe, competent, and comprehensive physical health assessments. Students in this course focus on concepts and skills to assess patients across the lifespan. They learn to use diagnostic reasoning, advanced communication, and physical assessment skills to identify changes in health patterns. Students also will explore preventative health through risk evaluation of healthy individuals as a central theme of clinical practice in
addition to the assessment of patients with acute and chronic health problems. The advanced skills of suturing, reading 12 Lead EKGs, and interpreting X-rays will be covered. Course assignments emphasize risk assessment, diagnostic reasoning, and evidence-based assessment across the lifespan.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DNRS 6521 - Advanced Pharmacology

(5 cr.)
A solid foundation in the concepts and principles of drug therapy across the lifespan is essential to the work of advanced practice nurses. This course applies the advanced principles of pharmacology, including pharmacogenomics, pharmacokinetics, and pharmacodynamics, by analysis of common drug classes prescribed by advanced practice nurses across the life span. Factors influencing successful therapy, such as effectiveness, safety, acceptability, cost, genetic/environmental influences, complementary regimens, and patient behaviors are considered. Through this course, students prepare to examine complex decisions in the management and treatment of selected acute and chronic diseases across the life span through pharmacologic and non-pharmacologic agents. Advanced practice nursing students will have a more in-depth understanding of drug legislation and regulation for prescribing drugs.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DNRS 6630 - Psychopharmacologic Approaches to Treatment of Psychopathology

(5 cr.)
At times, psychotherapy is not enough to alleviate the emotional difficulties that some patients face. To that end, psychopharmacologic approaches are needed. Psychiatric nurse practitioners (PNPs) must have a strong basis in psychopharmacology, extending from a prior education in pharmacology, to make appropriate medication choices for their patients. Learners in this course consider psychopharmacologic approaches to major behavioral health disorders including but not limited to major depressive disorders, bipolar disorder, anxiety disorders, as well as psychotic disorders. Learners explore key considerations associated with medication selection, monitoring efficacy, and long-term management.

Prerequisites
- NURS 6501N or NURS 6501C or NURS 6501A or NURS 6501F or NURS 6501S
- NURS 6521N or NURS 6521C or NURS 6521A or NURS 6521F or NURS 6521S
- NURS 6512N or NURS 6512C or NURS 6512A or NURS 6512F or NURS 6512S
• NURS 6521N or NURS 6521C or NURS 6521A or NURS 6521F or NURS 6521S
• NURS 6512N or NURS 6512C or NURS 6512A or NURS 6512F or NURS 6512S

**DNRS 6800 - Advanced Pediatric Development and Behavior**

(5 cr.)
This introductory course, designed for pediatric advanced practice nurses, introduces students to pediatric development and behavior. The course focuses on developmental and behavioral milestones, family systems, parenting styles, screening, surveillance, and assessment of infants, children, and adolescents. Management strategies, referral options as well as legal, ethical, and policy issues are discussed for children with normal development and behavior. The course also focuses on strategies for promoting wellness through anticipatory guidance of the child and family at each stage of development.

**Prerequisites**
• NURS 6501N or NURS 6501C or NURS 6501A or NURS 6501F or NURS 6501S
• NURS 6521N or NURS 6521C or NURS 6521A or NURS 6521F or NURS 6521S
• NURS 6512N or NURS 6512C or NURS 6512A or NURS 6512F or NURS 6512S
• NURS 6521N or NURS 6521C or NURS 6521A or NURS 6521F or NURS 6521S
• NURS 6512N or NURS 6512C or NURS 6512A or NURS 6512F or NURS 6512S

**DNUR 6050 - Policy and Advocacy for Improving Population Health**

(5 cr.)
In today's rapidly changing healthcare delivery system, decisions made within the political arena impact the future of health delivery systems, healthcare professionals, and the populations they serve. In this course, students examine the policy process and its impact on healthcare delivery, cost, quality, and access. Students examine the importance of getting healthcare issues on federal and state agenda, investigate governmental response through legislation and regulation, and identify where they can advocate for positive outcomes in program/policy design, implementation, and evaluation. Global health issues are examined for their relevance and impact on the development of the nurse advocate. Through discussions, reflection, case studies, and the application of professional communications techniques as political tactics to
influence policy outcomes, students demonstrate integration of policy decision-making into professional nurse practice for the benefit of individuals and populations.

**DNUR 6052 - Essentials of Evidence-Based Practice**

(5 cr.)
Nurses base practice on sound and tested evidence to ensure the safety, high quality, and cost-effectiveness of patient care. This course provides students the opportunity to gain a better understanding of evidence-based practice (EBP) and how it interacts and aligns with research and quality improvement. Students will examine how to use databases to discover evidence and how to apply their knowledge of research methodologies to critically appraise literature. They will also examine opportunities to strengthen their synthesis and integration skills to determine whether a change in practice is needed, based on a body of evidence. Through exploration of implementation, evaluation, and dissemination strategies, students will explore the intricacies of leading and mentoring change within an organization to enhance nursing practice.

**DNUR 6201 - Leadership in Nursing and Healthcare**

(5 cr.)
This course sets the foundational stage for the Nurse Executive specialty track. Students focus on theoretical and practical aspects of leadership in healthcare contexts, and they discuss professional standards of practice for nursing leadership. They explore components of the redesign or reformation of healthcare delivery and performance. Through this course, students synthesize the responsibilities of the nurse leader in the achievement of healthcare outcomes.

**DNUR 6211 - Finance and Economics in Healthcare Delivery**

(5 cr.)
Students in this course examine the fundamentals of finance and economics in healthcare delivery. They explore different ways to analyze financial data and interpret the results of those analyses. They explore budgeting and financial management tools in the context of the nurse leader’s role in the management of operational and capital resources. They examine the influence of policies and budgetary assumptions on the provision of health services. Students also explore budget and resource decisions contributing to the achievement of organizational outcomes within the context of providing efficient and cost-effective quality care.

**DNUR 6221 - Managing Human Resources**

(5 cr.)
Nursing leadership is grounded firmly in managing our most important resource—
human capital. In this course, students address nurse executives' role and responsibilities in human resource management. Students explore recruitment and selection of human resources while ensuring current legal, ethical, professional, and practice systems and procedures align with organizational strategies, outcomes, policies and standards. They consider how to apply technology to support human resource functions. Additionally, students examine strategies to support positive organizational and nursing service goals. They also have the opportunity to gain an understanding of the importance of diversity and inclusion, staff engagement, and empowerment, as well as creating collaborative and supportive partnerships within organizations.

DNUR 6223 - Healthcare Quality Assurance and Risk Management in Healthcare Organizations

(5 cr.)
This course will examine health care quality assurance and risk management and the methods that are utilized to achieve improvements in health care organizations. Topics will include: the link between patient safety and legal and regulatory compliance; the role of accreditation organization requirements in patient safety; evidenced-based outcomes and standards of care; the development and archiving of reports, data and device evidence in medical error situations; and managing patient safety compliance through credentialing of health care professionals.

DNUR 6224 - Quality Assurance and Regulatory Compliance

(5 cr.)
This course will cover compliance regulations resulting from federal and state laws governing health care in various settings. Students will learn the essential elements of an effective compliance program and how to implement them. Topics will include: setting up and maintaining a compliance program, the role of the health care compliance officer, investigating, reporting, enforcement and discipline, and ethics in compliance management.

DNUR 6226 - Introduction to Healthcare Policy

(5 cr.)
In this course, students will consider the evolution of the U.S. healthcare system and health policy. Topics covered include current challenges in the delivery of healthcare and the future of the healthcare system. Perspectives for analyzing health and healthcare will be introduced with a focus on advocacy, activism, workplace influences, and the impact of technologies on healthcare, variations in medical practice, and quality of healthcare delivery.

DNUR 6227 - Current Issues in Health Policy
This course serves as an introduction to major health policy issues and examines the role of government in the health care system. The course will focus on the role of policy analysis in the formation and implementation of national and local health policy and the policy implications of how government pays for care. The role of the legal system with respect to adverse medical outcomes, economic rights, and individual rights is discussed. Proposals for health policy reform at the national and local level will be examined including potential reforms of Medicare and Medicaid. An overview of health program analysis and evaluation will also be discussed.

DNUR 6231 - Healthcare Systems and Quality Outcomes

The development of leadership strategies and competencies that support the healthcare organizational delivery of quality care is imperative to quality outcomes within healthcare systems. In this course, students use a systems approach to explore structures, processes, and outcomes that impact healthcare quality and ultimately improve patient experience and outcomes. Students learn how interdisciplinary collaboration is important to the development of quality and safety. Engaging in conceptual and application-based assignments, students focus on clinical and service quality planning and improvement initiatives; models, tools, and innovations for process improvement; and the importance and use of metrics in daily operations.

DNUR 6241 - Strategic Planning in Healthcare Organizations

Nurse leaders in healthcare organizations must be aware of and integrate strategic organizational goals. Students in this course use an interdisciplinary case study approach to address unmet organizational and/or professional needs through strategic planning processes. Students apply organizational, behavioral, political, leadership, and management knowledge and theory to planning, implementing, and evaluating strategically planned change. Through these applications, students learn to use a variety of administrative strategies within the context of supportive and collaborative interdisciplinary relationships to achieve desired health care outcomes that effect positive social change in patient and professional communities.

DNUR 6321 - Curriculum Development, Assessment, and Evaluation

The educational environment in higher education and health care settings is influenced by social, economic, regulatory, and technological transformations. Students in this course learn the theoretical foundations that drive curriculum development, assessment, and evaluation. They also focus on curriculum components, which include societal, professional, and educational trends that affect nursing education curricula.
DNUR 6331 - Teaching Learning Strategies: Integrating Technology Into Nursing Education

(5 cr.)
In this course, students explore how to plan instruction on a nursing topic, creating and adapting meaningful lessons and assessment/evaluation strategies for multiple learning environments and learner characteristics. Considering the diverse learning needs and ethical considerations of different learner groups (e.g., nursing students, staff, and patients/caregivers), students examine how to effectively integrate technology tools and develop lessons encompassing those needs. Students also explore evaluation strategies and outcome measurements related to their chosen topic and how technology can assist. A final project involves adapting a face-to-face lesson for a digital learning environment. Throughout the course, students apply innovative teaching approaches for effective nursing education.

DNUR 6370 - Foundational Skills for Nurse Educators in Academic and Healthcare Environments

(5 cr.)
In this course, students develop basic skills that are used by Nursing Professional Development Practitioners and Academic Nurse Educators in practice and academic environments, respectively. Foundational theories of learning are covered as they are applied to the Nursing Professional Development Practitioner and Academic Nurse Educator roles. An overview of the educational design process is examined. Standards and competencies for Nursing Professional Development Practitioners, Academic Nurse Educators, and Academic Clinical Nurse Educators are explored as well as concepts of organizational alignment and leadership.

DNUR 6710 - Public Health Nursing Theory and Practice

(5 cr.)
Public health nursing is shaped by social, behavioral, cultural, and demographic factors that impact health care at multiple levels. In this course, students will develop an understanding of the history of public health and public health nursing, public health law and ethics, system infrastructure, and issues related to health equity and health disparities. Students will analyze theories and research that will assist them to understand the social determinants of health and develop models to assess and deliver health care to populations to promote a culture of health.

DNUR 6730 - Public Health Nursing Leadership

(5 cr.: 3 cr. didactic, 2 cr. practicum)
The development of leadership strategies that supports the public health care system delivery of population health is imperative to quality outcomes. This course addresses
the application of principles of leadership and management in a public health setting. And the skills needed for nurses to provide effective leadership across agency partnerships at the community, state, national, and international levels. A special focus will be placed on developing collaborative partnerships, systems thinking, evidence-based decision-making, organizational problem-solving, public health finance, professional accreditation, emergency preparedness, and global health competencies. Students will complete a practicum with a public health-related agency focused on program evaluation and the use of management and leadership skills.

Prerequisites
- PUBH 6475

**DPSY 5111 - Themes and Theories of Developmental Psychology**

(5 cr.)
Students in this course are introduced to concepts, theories, and research methods relevant to understanding developmental psychology. Developmental theories will be reviewed, including psychoanalytic, behaviorist, cognitive, social, and ecological theory. Students will critically examine the strengths and limitations of each theory and the research that contributed to each theory. Contemporary applications of developmental theories will be explored, with an emphasis on applications designed to effect positive social change.

**DPSY 5121 - Development in the Digital Age**

(5 cr.)
Students in this course examine the impact of social media and other digital technology on children, teens, and adults and at different stages of cognitive, social, and emotional development. They also examine how identity development, relationships, and socialization can be affected by the use of digital and social media. Students receive a historic review of electronic media research, including the effect of violent television on viewer behavior, which provides a foundation to examine the current impact of digital media. Current issues such as sexting, online harassment, cyberbullying, and cyberstalking are explored, along with strategies for mitigating these issues. Similarly, positive impacts of social media, such as building social groups, finding communities, overriding generational gaps, seeking health and mental health support and resources, are also explored. Students also examine generational, socioeconomic, and cultural differences in access to and use of digital media. Digital media literacy and public policy are explored, with an emphasis on positive social change.

**DPSY 5218 - Gender and Human Development**

(5 cr.)
In this course, students examine biopsychosocial theories of sex differences and
conceptions of gender. Topics include history and theoretical perspectives on gender, differentiation of sex versus gender, gender similarities and differences, gender identity, and transgender psychology. Students will also learn about stereotypes, socialization and culture-appropriate social roles, and influence of socialization agents, such as family, schools, peers, and media on gender role development. Important developmental issues will be addressed as they relate to gender, such as body image, sexuality, emotion, communication, and cognition. Students also examine ethical considerations with regard to policy making and training on gender sensitivity.

**DPSY 6002 - Foundations for Graduate Study in Psychology**

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals, and they develop a program of study, a professional development plan, and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

**DPSY 6111 - Themes and Theories of Developmental Psychology**

(5 cr.)
Students in this course are introduced to concepts, theories, and research methods relevant to understanding developmental psychology. Developmental theories will be reviewed, including psychoanalytic, behaviorist, cognitive, social, and ecological theory. Students will critically examine the strengths and limitations of each theory and the research that contributed to each theory. Contemporary applications of developmental theories will be explored, with an emphasis on applications designed to effect positive social change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**DPSY 6114 - Language and Cognitive Development**

(5 cr.)
Students in this course are introduced to theories and research related to the development of cognition and language acquisition. Both normative and individual differences will be explored. In the course, students will examine basic concepts in cognitive development in addition to problem solving, decision making, and creativity. Piagetian cognitive theory will be examined, as well as sociocultural and neurobiological perspectives. Contemporary research and theory will be reviewed, including information
processing and theory of mind. Students will also learn about psycholinguistics, including the structure of language, stages of language acquisition, and multilingualism. Theories of language acquisition will be explored, including behaviorist and conditioning perspectives, Chomsky’s perspective, neural networks, and linguistic relativity. Through the course, students will examine atypical development, such as cognitive delay, language disorders, and autism.

DPSY 6121 - Development in the Digital Age♦

(5 cr.)
Students in this course examine the impact of social media and other digital technology on children, teens, and adults and at different stages of cognitive, social, and emotional development. They also examine how identity development, relationships, and socialization can be affected by the use of digital and social media. Students receive a historic review of electronic media research, including the effect of violent television on viewer behavior, which provides a foundation to examine the current impact of digital media. Current issues such as sexting, online harassment, cyberbullying, and cyberstalking are explored, along with strategies for mitigating these issues. Similarly, positive impacts of social media, such as building social groups, finding communities, overriding generational gaps, seeking health and mental health support and resources, are also explored. Students also examine generational, socioeconomic, and cultural differences in access to and use of digital media. Digital media literacy and public policy are explored, with an emphasis on positive social change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

DPSY 6214 - Consulting for Organizational Change

(5 cr.)
Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

DPSY 6215 - Lifespan Development

(5 cr.)
Students in this course are provided with an advanced overview of human development
through the lifespan, including prenatal, childhood, adolescent, adult, and late-adult phases. Students examine and apply basic processes and theories to developmental milestones that occur within these phases of development. They explore factors of heredity and environmental elements on human development, and they consider ethical issues, research considerations, and global perspectives as they assess strategies to promote optimal development. Students also engage in coursework and discussions that highlight themes of diversity and social change.

**DPSY 6217 - Social and Emotional Development**

(5 cr.)
Through this course, students review contemporary theory, research, and methods relevant to understanding social and emotional development through the lifespan and the way in which culture and context shape developmental processes. The focus of this course is on both normal and abnormal development and the emphasis on individual differences, and social and cultural diversity. Topics include early interaction, emotion and its expression and regulation, temperament, attachment through the lifespan, social cognition, family and peer relationships, prosocial and antisocial influences on human development, social identity, development of gender differences, and intimacy. Students will also explore topics in social-emotional development that are particular to middle and late adulthood, including the impact of retirement, changes in health, and dying and bereavement.

**DPSY 6218 - Gender and Human Development**

(5 cr.)
In this course, students examine biopsychosocial theories of sex differences and conceptions of gender. Topics include history and theoretical perspectives on gender, differentiation of sex versus gender, gender similarities and differences, gender identity, and transgender psychology. Students will also learn about stereotypes, socialization and culture-appropriate social roles, and influence of socialization agents, such as family, schools, peers, and media on gender role development. Important developmental issues will be addressed as they relate to gender, such as body image, sexuality, emotion, communication, and cognition. Students also examine ethical considerations with regard to policy making and training on gender sensitivity.

**DPSY 6224 - Psychology of Work**

(5 cr.)
The meaning of work is vast and comprises a wide array of images, ideas, values, and definitions, depending on age, gender, culture, and other factors. In this course, students examine the critical role of work and vocation from multicultural and global perspectives as well as from a developmental perspective spanning childhood through late adulthood. Students explore and integrate into coursework major theories of
vocational psychology. They also examine the meaning of work for individuals, groups, families, and societies as well as the interrelationship of work with family and other lifestyle roles, economic factors, and conditions. Additionally, students examine issues impacting work performance, such as crisis, substance abuse, and mental health challenges.

**DPSY 6227 - Development in an Era of Global Crisis**

(5 cr.)
In this course, students will review how recent international issues such as terrorism, civil war, mass migration, and refugee crises influence development and lives of human beings throughout their lifespan. Students will examine how extreme life stressors such as exposure to disaster, war, terrorism, displacement, genocide, instability, loss of family, and death influence health (e.g., sanitation, diseases, reproductive issues) and mental health issues (such as trauma, anxiety, depression, adjustment difficulties, debilitating mental illnesses) and also impact the psychosocial well-being and development of infants, children, young adults, adults, and elders within their specific contextual and cultural background. Students will also examine psychosocial support and intervention programs developed for health and mental health promotion of the affected individuals and how they impact positive social change.

**DPSY 6228 - International Perspectives on Human Development**

(5 cr.)
The focus of this course is on exploring human development from an international perspective and examination of how biological, cognitive, social, and emotional development of children, adolescents, and adults are viewed in an international context. Students will examine human development and behavior in an ecological, psychosocial, and sociocultural framework, with special emphasis on gender and culture. Topics will include cognitive functioning, language acquisition, individual and social identity formation, social-emotional development (such as the parent-child relationship, attachment, social relationships), and gender role development within an international, cross-cultural context and encompass normal as well as abnormal behaviors as valued and accepted in different cultures.

**DPSY 6242 - Changing Health Behavior: Theory and Practice**

(5 cr.)
Students in this course will review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. They will be provided information on health-related issues, including dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, students will examine the analysis of behavior change within specific populations (young, elderly, cognitively impaired, etc.) and factors that predict or serve as obstacles to lifestyle change and adherence.
DPSY 6361 - Human Sexuality

(5 cr.)
Students are provided with a framework for understanding human sexuality in the context of couple, marriage, and family counseling in this course. Students explore empirically supported counseling approaches related to sexual functioning, intimacy, gender, and sexual orientation. They use a systemic framework for understanding the role and impact of sexuality on couples, marriages, and families. Students also explore and discuss specific topics related to issues of sexual diversity, gender identity, sexual offending, trauma, and victimization. Legal and ethical issues related to addressing sexuality in counseling are addressed.

DPSY 6393 - Capstone

(5 cr.)
Students are provided with the opportunity to synthesize knowledge and skills acquired throughout their program into a practical project designed to promote positive social change in a capstone project. During this course, students work on a capstone project in which they complete a major integrative paper on a topic related to their specialization, incorporating theoretical and practical knowledge as well as social scientific research skills acquired throughout the program. The instructor may approve other capstone projects presented by students.

DPSY 6400 - Diversity in Child/Adolescent Development and Learning

(5 cr.)
Diversity can have a profound influence on children's and adolescents' development and learning. Students in this course explore areas of diversity, such as gender, culture, language, disability, and sexual orientation and how they influence developmental and learning needs of this particular population. Applying core concepts and theories of development and learning, psychology students engage in practical approaches through which they reflect on their own perspectives and preconceptions and learn the complex ways diversity influences development and learning of the children and teenagers. Moreover, using the latest research and resources, students work toward gaining knowledge and skills for improving developmental and learning outcomes for children and adolescents.

DPSY 6401 - Principles/Conceptual Foundations of Behavior Analysis for Children and Adolescents

(5 cr.)
Applied behavior analysis is a set of skills used in the assessment and treatment of individuals with a variety of behavioral problems and developmental delays, including autism spectrum disorders. Students in this course explore the concepts and principles
of applied behavior analysis and gain an understanding and treatment of behavior problems of children and adolescents in applied settings. Students apply these concepts and principles in the development and implementation of data-based decision making using functional behavioral assessments and the creation of intervention procedures. Techniques in observation, use of reinforcement, and repeated measures are explored. These techniques are applied to develop intervention plans and to assess treatment effectiveness.

**DPSY 6480 - Organizational Behavior**

(5 cr.)
Students in this course examine the application of behavioral theories in organizational settings. The focus is on individual, group, and organizational behavior. Topics include individual differences in employee motivation and job satisfaction; group development; team building; organizational leadership; and organizational design, culture, and development. Students acquire a broad knowledge base in organizational psychology, its research, and its applications.

**DPSY 6573 - Child and Adolescent Health**

(5 cr.)
Students in this course explore diseases and disorders in children and adolescents. Topics include diabetes, anorexia, headaches, epilepsy, burn injuries, cystic fibrosis, asthma, addiction, and adolescent obesity. Health promotion for children and adolescents is discussed, including cardiovascular health, nutrition, and exercise. Also covered are insights into special issues such as post-traumatic stress disorder, daily stress, sexually transmitted diseases, sleep disorders, and ethical and legal issues in pediatric and adolescent health psychology.

**DPSY 6574 - Women's Health**

(5 cr.)
Students in this course examine healthcare issues in women and girls. Topics include healthy development, trauma, coping, self-esteem, resilience, self-care, well-being, sexual health, relationships, roles, family, schooling, careers, motherhood, transitions, violence, security, bereavement, and positive aging.

**DPSY 6701 - Culture and Psychology**

(5 cr.)
Students in this course explore the cultural components, research, and theory of cross-cultural psychology. In addition to the previously listed goals, students focus on the impact that culture has on the field of psychology around the world. The scope of this course is broad, with the core theme being cross-cultural psychology (focusing on
cultures representing different parts of the world) and comparing cultural influence on human psychology. Many of the topics addressed are related to human development. Additionally, interactions among culture and social behaviors, health, mental health, and mental illnesses are emphasized throughout the duration of this course.

**DPSY 6719 - Developmental Psychopathology**

(5 cr.)
In this course, students explore formal psychopathology, including emotional and behavioral disorders and classification systems of infants, children, and adolescents. Students examine contrasting models of psychopathology, classification and epidemiology of childhood psychopathology, co-morbidity rates, differential issues from the current diagnostic manual's outcome of childhood disorders, therapeutic approaches and their efficacy, and developmental resilience. They examine and discuss literature and topics related to assessment, diagnosis, and treatment; a wide range of disorders and disruptive behaviors; and abuse and neglect. Applying course concepts, students assess case studies of diagnostic issues for a contemporary and practical understanding of psychopathology.

**DPSY 6745 - Health Psychology**

(5 cr.)
Health psychologists work toward positive change in healthcare and health behavior through the study of relationships between patients and providers, how individuals and groups adapt to illness, damaging health behaviors, health cognitions, and many other related issues. In this course, students explore the field of health psychology with a focus on the biopsychosocial model. They discuss behavioral and biomedical theories as well as the effect of psychological (personality), behavioral (health behaviors and coping), and social factors (stress and physician-patient relationships) on physical health and wellness. Through the examination of current literature and peer discussions, students explore and address issues related to cardiovascular and immune health, including heart disease, stroke, cancer, and HIV/AIDS. They demonstrate their understanding of course material and consider how topics apply to their personal and professional life through the development of taskforce papers, a health brochure, and a final essay.

**DPSY 6755 - Leadership and Leader Development**

(5 cr.)
Effective leadership requires the ability to facilitate positive change, lead others in efforts to effect similar change, and work through challenges when met with resistance to change. Students in this course are provided with an extensive overview of leadership theories. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership and change. Students also examine various perspectives on leadership and the role of leadership in the
achievement of organizational, group, and team goals. Students engage in practical assignments and discussions, focusing on effective leadership issues and practices during the process of organizational change.

**DPSY 6815 - Contemporary Gerontology and Geriatric Psychology**

(5 cr.)
Statistical data indicate that people are living longer and the number of older persons is continually increasing. As the population ages, society must prepare to address their needs. Students in this course are provided with a multidisciplinary approach to the study of aging in contemporary societies. Students examine the biological, psychological, social, and societal contexts of aging. They also explore the historical and cross-cultural perspectives on aging, social theories of aging, managing chronic diseases, cognitive changes associated with aging, mental health issues, sexuality, and social interactions. Through a series of taskforce reports on various topics, such as sexually transmitted diseases, substance abuse, and elder abuse, students apply course concepts and critically examine current issues in gerontology.

**DPSY 8002 - Foundations for Graduate Study in Psychology**

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals, and they develop a program of study, a professional development plan, and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

**DPSY 8111 - Themes and Theories of Developmental Psychology**

(5 cr.)
Students in this course are introduced to concepts and theories that form the basis of developmental psychology. Developmental theories will be reviewed, including psychoanalytic, behaviorist, cognitive, social, and ecological theory. Students will critically examine the strengths and limitations of each theory in the context of the psychologists and the research that contributed to each theory. Contemporary applications of developmental theories will be explored, with an emphasis on applications designed to produce positive social change.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist (1-866-492-5336 (U.S.); 1-443-627-7222 (toll)) for more information.
**DPSY 8115 - Writing a Quality Prospectus in Psychology**

(5 cr.)
Students in this course focus specifically on the process of writing the dissertation prospectus. Students develop a problem statement to be used in the dissertation. The prospectus is a brief paper, typically between 6 and 12 pages in length, that helps students articulate, organize, and begin to align the key steps in the academic argument for their proposed research. Students create a prospectus draft to establish the background for the problem statement, the problem statement itself, an initial survey of the relevant literature, and a research, implementation, and evaluation plan for the solution of the problem that will culminate in the formulation of a draft dissertation prospectus.

**DPSY 8116 - Development in an Era of Global Crisis**

(5 cr.)
In this course, students will review how recent international issues such as terrorism, civil war, mass migration, and refugee crises influence development and lives of human beings throughout their lifespan. Students will examine how extreme life stressors such as exposure to disaster, war, terrorism, displacement, genocide, instability, loss of family, and death influence health (e.g., sanitation, diseases, reproductive issues) and mental health issues (such as trauma, anxiety, depression, adjustment difficulties, debilitating mental illnesses) and also impact the psychosocial well-being and development of infants, children, young adults, adults, and elders within their specific contextual and cultural background. Students will also examine psychosocial support and intervention programs developed for health and mental health promotion of the affected individuals and how they impact positive social change.

**DPSY 8121 - Development in the Digital Age**

(5 cr.)
Students in this course examine the impact of social media and other digital technology on children, teens, and adults and at different stages of cognitive, social, and emotional development. They also examine how identity development, relationships, and socialization can be affected by the use of digital and social media. Students receive a historic review of electronic media research, including the effect of violent television on viewer behavior, which provides a foundation to examine the current impact of digital media. Current issues such as sexting, online harassment, cyberbullying, and cyberstalking are explored, along with strategies for mitigating these issues. Similarly, positive impacts of social media, such as building social groups, finding communities, overriding generational gaps, seeking health and mental health support and resources, are also explored. Students also examine generational, socioeconomic, and cultural differences in access to and use of digital media. Digital media literacy and public policy are explored, with an emphasis on positive social change.
DPSY 8185 - Writing a Quality Prospectus in Psychology

(5 cr.)
Students in this course focus specifically on the process of writing the dissertation prospectus. Students develop a problem statement to be used in the dissertation. The prospectus is a brief paper, typically between 6 and 12 pages in length, that helps students articulate, organize, and begin to align the key steps in the academic argument for their proposed research. Students create a prospectus draft to establish the background for the problem statement, the problem statement itself, an initial survey of the relevant literature, and a research, implementation, and evaluation plan for the solution of the problem that will culminate in the formulation of a draft dissertation prospectus.

DPSY 8202 - Survey Research Methods

(5 cr.)
An in-depth study of a range of survey methods administered via in-person interview, self-report, phone interview, and Internet administration is introduced in this course. Topics will include survey design, administration, analysis, and addressing sources of bias. In this course, students will also review theoretical and empirical research on question and questionnaire effects. Students are prepared in the practice of writing questions and designing questionnaires, both in general and in light of existing research.
Prerequisites
- RSCH 8100
- RSCH 8200

DPSY 8214 - Consulting for Organizational Change

(5 cr.)
Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

DPSY 8215 - Lifespan Development

(5 cr.)
Students in this course are provided with an advanced overview of human development
through the lifespan, including prenatal, childhood, adolescent, adult, and late-adult phases. Students examine and apply basic processes and theories to developmental milestones that occur within these phases of development. They explore factors of heredity and environmental elements on human development, and they consider ethical issues, research considerations, and global perspectives as they assess strategies to promote optimal development. Students also engage in coursework and discussions that highlight themes of diversity and social change.

DPSY 8218 - Gender and Development

(5 cr.)
Students in this course examine biopsychosocial theories of sex differences and conceptions of gender. Topics include history and theoretical perspectives on gender, differentiation of sex versus gender, gender similarities and differences, gender identity, and transgender psychology. Students will also learn about stereotypes, socialization and culture-appropriate social roles, and influence of socialization agents, such as family, schools, peers, and media on gender role development. Through the course, students will address important developmental issues as they relate to gender, such as body image, sexuality, emotion, communication, and cognition, and also examine ethical considerations with regard to policy making and training on gender sensitivity.

DPSY 8227 - Language and Cognitive Development

(5 cr.)
Students in this course are introduced to theories and research related to the development of cognition and language acquisition. Both normative and individual differences will be explored. Students will examine basic concepts in cognitive development in addition to problem solving, decision making, and creativity. Piagetian cognitive theory will be examined, as well as sociocultural and neurobiological perspectives. Students will also learn about psycholinguistics, including the structure of language, stages of language acquisition, and multilingualism. Theories of language acquisition will be reviewed, including behaviorist and conditioning perspectives, Chomsky's perspective, neural networks, and linguistic relativity. Students will examine atypical development, such as cognitive delay, language disorders, and autism.

DPSY 8228 - Social and Emotional Development

(5 cr.)
Students in this course review contemporary theory, research, and methods relevant to understanding social and emotional development through the lifespan and the way in which culture and context shape developmental processes. The focus of the course is on both normal and abnormal development and the emphasis on individual differences, and social and cultural diversity. Topics include early interaction, emotion and its expression and regulation, temperament, attachment through the lifespan, social
cognition, family and peer relationships, prosocial and antisocial influences on human development, social identity, development of gender differences, and intimacy. Students will also explore topics in social-emotional development that are particular to middle and late adulthood, including the impact of retirement, changes in health, and dying and bereavement.

DPSY 8229 - International Perspectives on Human Development

(5 cr.)
The focus of this course is on exploring human development from an international perspective and examining how biological, cognitive, social, and emotional development of children, adolescents, and adults are viewed in an international context. Students will examine human development and behavior in an ecological, psychosocial, and sociocultural framework, with special emphasis on gender and culture. Topics will include cognitive functioning, language acquisition, individual and social identity formation, social-emotional development (such as the parent-child relationship, attachment, social relationships), and gender role development within an international, cross-cultural context and encompass normal as well as abnormal behaviors as valued and accepted in different cultures.

DPSY 8242 - Changing Health Behavior: Theory and Practice

(5 cr.)
Students in this course will review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. Coverage of health-related issues includes dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, students will examine the analysis of behavior change within specific populations (young, elderly, cognitively impaired, etc.) and factors that predict or serve as obstacles to lifestyle change and adherence.
Prerequisites
- PSYC 6745/8745

DPSY 8245 - Social Psychology

(5 cr.)
Factors of cognitions and social behavior are at the root of nearly all experiences pertaining to individuals in society. In this course, students use the lens of social psychology to examine perceptions, attitudes, relationships and attraction, motivation to help others, prejudice and aggression, conformity and obedience, group behavior, and the influence of culture. Students apply knowledge and skills gained in the course to a final project in which they develop a plan for using social psychology research to address a significant social problem. Moreover, students consider ways to extend lessons
learned to their personal and professional lives to effect positive social change as scholar-practitioners.

**DPSY 8307 - Multivariate Analysis**

(5 cr.)
Univariate analyses, such as the t test, ANOVA and ANCOVA, chi square, correlation, multiple linear regression, and multiple binary logistic regression, are limited to the analysis of a single dependent variable and yield a single statistical solution. Students in this course in multivariate analysis are introduced to procedures to simultaneously analyze multiple independent and multiple dependent variables that yield more than one statistical solution. Covered in this course are several of the most common multivariate and data mining procedures, including MANOVA, discriminant analyses, factor analysis, canonical correlation, and cluster analysis. Students examine appropriate conditions for the use of each procedure and demonstrate understanding in applied discussion assignments, application assignments using IBM SPSS, and journal quality report of results.

**Prerequisites**
- PSYC 6304 or PSYC 8305

**DPSY 8400 - Diversity in Child/Adolescent Development and Learning**

(5 cr.)
Diversity can have a profound influence on children's and adolescents' development and learning. Students in this course explore areas of diversity, such as gender, culture, language, disability, and sexual orientation and how they influence developmental and learning needs of this particular population. Applying core concepts and theories of development and learning, developmental psychology students engage in practical approaches through which they reflect on their own perspectives and preconceptions and learn the complex ways diversity influences development and learning of children and teenagers. Moreover, using the latest research and resources, students work toward gaining knowledge and skills for improving developmental and learning outcomes for children and adolescents.

**DPSY 8401 - Principles/Conceptual Foundations of Behavior Analysis for Children and Adolescents**

(5 cr.)
Applied behavior analysis is a set of skills used in the assessment and treatment of individuals with a variety of behavioral problems and developmental delays, including autism spectrum disorders. Students in this course explore the concepts and principles of applied behavior analysis and gain an understanding and treatment of behavior problems of children and adolescents in applied settings. Students apply these concepts
and principles in the development and implementation of data-based decision making using functional behavioral assessments and the creation of intervention procedures. Techniques in observation, use of reinforcement, and repeated measures are explored. These techniques are applied to develop intervention plans and to assess treatment effectiveness.

**DPSY 8412 - Research Foundations**

(5 cr.)
Students in this course examine and receive support for student readiness regarding the use of quantitative and qualitative research approaches. They study research fundamentals, including the distinction between social problems and research problems, the functions of research problems versus research purpose statements, and the role of theory and conceptual framework in informing research. Students examine quantitative and qualitative concepts central to research methods, design, and analysis. They also study how research design, methods, and analyses properly align for both quantitative and qualitative approaches. Students demonstrate their knowledge by creating two research outlines, using quantitative and qualitative approaches, which they develop throughout the course. They determine appropriate conditions for the use of mixed-methods approaches and differentiate between types of mixed-methods research designs. Students engage in pre- and post-assessments of skills and knowledge.

**DPSY 8480 - Psychology of Organizational Behavior**

(5 cr.)
In this course, students examine the application of behavioral theories in organizational settings. The focus is on individual, group, and organizational behavior. Topics include individual differences in employee motivation and job satisfaction; group development; team building; organizational leadership; and organizational design, culture, and development. Students acquire a broad knowledge base in organizational psychology, its research, and its applications.

**DPSY 8573 - Child and Adolescent Health**

(5 cr.)
Students in this course cover diseases and disorders in children and adolescents. Topics include diabetes, anorexia, headaches, epilepsy, burn injuries, cystic fibrosis, asthma, addiction, and adolescent obesity. Health promotion for children and adolescents is discussed, including cardiovascular health, nutrition, and exercise. Also covered are insights into special issues such as post-traumatic stress disorder, daily stress, sexually transmitted diseases, sleep disorders, and ethical and legal issues in pediatric and adolescent health psychology.

Prerequisites

- PSYC 8745
DPSY 8574 - Womens Health

(5 cr.)
Students in this course examine healthcare issues in women and girls. Topics include healthy development, trauma, coping, self-esteem, resilience, self-care, well-being, sexual health, relationships, roles, family, schooling, careers, motherhood, transitions, violence, security, bereavement, and positive aging.
Prerequisites
- PSYC 8745

DPSY 8700 - Literature Review

(2 cr.)
The purpose of this course is to help students prepare to write a well-structured, soundly presented, critical literature review. Students will cover topic selection, research analysis, writing, and editing. Upon completing the course, students produce an annotated bibliography and outline of a literature review using a minimum of 10 self-selected research articles. This course is appropriate for doctoral students who are preparing for their dissertation research.

DPSY 8701 - Culture and Psychology

(5 cr.)
Culture often has a profound influence on individual beliefs, personality development, and social behavior. Therefore, mental health professionals must have a fundamental understanding of the impact and psychological implications of culture. In this course, students focus on core themes of cross-cultural psychology—specifically, cultures representing different parts of the world and cultural influences on human psychology. Students explore the cultural components, research, and theory of cross-cultural psychology, and they assess the overall impact of culture on the field of psychology around the world. Additionally, they engage in readings and practical assignments to gain a better understanding of human development and the interactions between culture and social behaviors, health, mental health, and mental illnesses.

DPSY 8703 - Ethics and Standards of Psychology

(5 cr.)
Students in this course examine the origins of professional codes of ethics and standards of scientific psychology. Topics include ethical issues in academics (research, teaching, supervision), various work settings (assessment, consulting), and ethics involved in working with diverse populations. Additionally, students are introduced to forensic psychology and ethical issues related to the legal system. They also explore how cultural
factors are addressed in various ethical codes and the implications for scholar-practitioners.

**DPSY 8718 - Psychology of the Exceptional Individual**

(5 cr.)
Students in this course examine the cognitive, social-emotional, and psychomotor characteristics of individuals significantly deviating from the norm in behavior and/or adjustment. They learn ways to understand and work with individuals with learning disabilities (including emotional, behavioral, and intellectual disorders; autism; brain injury; hearing and vision loss; physical disabilities; and health disorders) and those who are gifted and talented. Students explore topical issues, including inclusion, transition to adulthood, and multicultural diversity. Through this course, students work toward gaining the knowledge and skills for developing research-based educational and therapeutic interventions.

**DPSY 8719 - Developmental Psychopathology**

(5 cr.)
In this course, students learn about formal psychopathology, including emotional and behavioral disorders and classification systems of infants, children, and adolescents. Students examine contrasting models of psychopathology, classification and epidemiology of childhood psychopathology, co-morbidity rates, differential issues from the current diagnostic manual's outcome of childhood disorders, therapeutic approaches and their efficacy, and developmental resilience. They examine and discuss literature and topics related to assessment, diagnosis, and treatment; a wide range of disorders and disruptive behaviors; and abuse and neglect. Applying course concepts, students assess case studies of diagnostic issues for a contemporary and practical understanding of psychopathology.

**DPSY 8745 - Health Psychology**

(5 cr.)
Health psychologists work toward positive change in healthcare and health behavior through the study of relationships between patients and providers, how individuals and groups adapt to illness, damaging health behaviors, health cognitions, and many other related issues. In this course, students explore the field of health psychology with a focus on the biopsychosocial model. They discuss behavioral and biomedical theories as well as the effect of psychological (personality), behavioral (health behaviors and coping), and social factors (stress and physician-patient relationships) on physical health and wellness. Through the examination of current literature and peer discussions, students explore and address issues related to cardiovascular and immune health, including heart disease, stroke, cancer, and HIV/AIDS. They demonstrate their understanding of course
material and consider how topics apply to their personal and professional life through the development of taskforce papers, a health brochure, and a final essay.

**DPSY 8755 - Leadership and Leader Development**

(5 cr.)
Effective leadership requires the ability to facilitate positive change, lead others in efforts to effect similar change, and work through challenges when met with resistance to change. Students in this course are provided with an extensive overview of leadership theories. They explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership and change. Students also examine various perspectives on leadership and the role of leadership in the achievement of organizational, group, and team goals. They engage in practical assignments and discussions, focusing on effective leadership issues and practices during the process of organizational change.

**DPSY 8760 - Educational Psychology**

(5 cr.)
Students in this course examine the variables related to teaching and learning. Topics include teaching methods, educational achievement, learning environments, curriculum development, and characteristics of teachers and learners. Educational assessment, environmental issues, and educational research techniques are also explored.

**DPSY 8762 - Teaching of Psychology**

(5 cr.)
Students in this course examine theories, techniques, and issues related to teaching psychology at the college/university level, both online and in person. They focus primarily on teaching skills, developing rapport with students, managing the course, and managing the classroom. Classroom communication and ethical issues relevant to both faculty and students are also covered.

**DPSY 8763 - Principles of Instructional Design**

(5 cr.)
Students in this course are presented with an overview and critical analysis of various instructional methods and techniques, including their historical, psychological, and social foundations. Students analyze specific instructional applications in various settings and through multiple theories of learning, such as behavioral, cognitive, humanistic, and social-situational. They apply prior knowledge of learning, development, and cognition to understand these applications. Students also consider and discuss the major challenges affecting curriculum design as well as potential future trends. Demonstrating
understanding of course concepts, students critically analyze and present current issues in instructional design through collaborative projects.

DPSY 8764 - Instructional Design for Online Course Development

(5 cr.)
In this course, students explore instructional design and delivery of online courses, issues related to assessment, evaluation in a distance-learning environment, and appropriate and systematic use of technology in online learning venues. Addressing course objectives and discussion questions, students explore and assess issues related to learning styles and instructional strategies in the online environment as well as alternatives to the online lecture. Students gain hands-on experience developing components for online instruction using course concepts and best practices in the field. 
Prerequisites
• PSYC 8763

DPSY 8815 - Contemporary Gerontology/Geriatric Psychology

(5 cr.)
Statistical data indicate that people are living longer, and the number of older persons is continually increasing. As the population ages, society must prepare to address their needs. Students in this course are provided with a multidisciplinary approach to the study of aging in contemporary societies. Students examine the biological, psychological, social, and societal contexts of aging. They also explore the historical and cross-cultural perspectives on aging, social theories of aging, managing chronic diseases, cognitive changes associated with aging, mental health issues, sexuality, and social interactions. Through a series of taskforce reports on various topics, such as sexually transmitted diseases, substance abuse, and elder abuse, students apply course concepts and critically examine current issues in gerontology.

DPSY 8816 - Development in an Era of Global Crisis

(5 cr.)
Students in this course review how recent international issues such as terrorism, civil war, mass migration, and refugee crises influence development and lives of human beings throughout the lifespan. Students examine how extreme life stressors such as exposure to disaster, war, terrorism, displacement, genocide, instability, loss of family, and death influence health (e.g., sanitation, diseases, and reproductive issues) and mental health issues (such as trauma, anxiety, depression, adjustment difficulties, and debilitating mental illnesses). The impact on the psychosocial well-being and development of infants, children, young adults, adults, and elders within their specific contextual and cultural background is also explored. Students examine psychosocial support and intervention
programs developed for health and mental health promotion of the affected individuals and how they impact positive social change.

DPSY 8860 - Independent Research

(1–5 cr.)
Students in this course are provided with an opportunity to examine a topic area of interest in greater depth than that which is provided in the course offerings. Students work with the course instructor to design a syllabus that guides the independent readings project. Content must include theoretical and empirical research literature that addresses implications related to diversity and professional practice. Students may only select this course once during their program of study and cannot use this course to replace one that currently exists in the catalog.

Prerequisites
- Approved by program director

DPSY 9000 - Dissertation

(5 cr. per term for a minimum of 4 quarters until completion)
Doctoral students are provided with the opportunity to integrate their program of study into a research study through which they explore a specific area of interest in this course. Students complete the dissertation with the guidance of a chair and committee members through a learning platform classroom in which weekly participation is required. Students work with their dissertation chair to write the prospectus, complete an approved proposal (the first three chapters of the dissertation), complete an application for Institutional Review Board approval, collect and analyze data, and complete the dissertation. During the final quarter, students prepare the dissertation for final review by the university and conclude with an oral defense of their dissertation. Once students register for DPSY 9000, they are registered each term until successful completion of the dissertation for a minimum of four terms.

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Prerequisites
- Foundation courses
- Core courses
- Designation of an approved dissertation committee chairperson
• Students engaging in a qualitative or mixed-methods dissertation study must also complete PSYC 8310.
• Students completing a mixed-methods dissertation study are strongly encouraged to also complete PSYC 8320.

DRNP 6531 - Primary Care of Adults Across the Lifespan

(3 cr.)
In this course, students learn how nurse practitioners master the art and science of clinical decision making among adult populations across the lifespan. Students focus on the diagnosis and management of primary healthcare needs and problems of the adult across the lifespan. They engage in a variety of course assignments that focus on physical and behavioral disease processes central to diagnosing conditions as well as planning, implementing, and evaluating therapeutic treatment programs for acute illnesses commonly encountered in a primary healthcare setting.
Prerequisites
• DNRS 6501
• DNRS 6512
• DNRS 6521

DRNP 6540 - Advanced Practice Care of Older Adults

(3 cr.)
In this course, students focus on the complex healthcare and management needs of older adults by advanced nurse practitioners in acute and primary care settings. Students learn to plan, implement, and evaluate therapeutic regimens of older adults through the application of knowledge in multiple settings. Additionally, students examine content related to end-of-life care and caregiver issues to gain the knowledge and sensibilities needed to implement positive change for the quality of life available to this vulnerable population.
Prerequisites
• DNRS 6501
• DNRS 6512
• DNRS 6521

DRNP 6541 - Primary Care of Adolescents and Children

(3 cr.)
How can a nurse practitioner master the art and science of clinical decision making among pediatric populations? This course provides students with the opportunity to answer this question as they examine content related to the primary healthcare of
pediatric patients, from newborn through adolescence (up to age 21), while focusing on growth and development, health promotion, and common primary care health problems. Students learn how to identify, diagnose, and manage these problems. They also gain confidence in clinical experience in a primary healthcare setting that provides opportunities to assess, diagnose, plan, implement, and evaluate therapeutic regimens for acute and chronic illnesses commonly found in children and adolescents.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNP 6531

DRNP 6550 - Advanced Practice Care of Adults in Acute Care Settings II

(3 cr.)
This course is the second of four clinical courses in the Adult-Gerontology Acute Care curriculum. Students will plan, implement, and evaluate care for acutely/critically ill patients or patients experiencing an exacerbation of a chronic health problem. The clinical focus is on the role of the acute care nurse practitioner working with an interdisciplinary team across settings to facilitate the patient’s return to optimal health. Students will apply appropriate diagnostic procedures and relevant laboratory tests in developing appropriate treatment plans to address patient health needs in the acute care setting.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNP 6540
- DRNP 6566

DRNP 6552 - Advanced Nurse Practice in Reproductive Health Care

(3 cr.)
How can a nurse practitioner decide what is important to focus on in a 15–30 minute appointment with individuals seeking primary, prenatal, or postpartum care? Students in this course gain opportunities to teach and promote wellness in individuals through the process of screening for common gynecologic conditions, normal pregnancy, and other common health conditions that impact the individual’s health. Students learn to analyze data to interpret results for the benefit of the individual seeking assistance with planning healthy lifestyle behaviors. They also gain an understanding of working with individual’s sexual identity and sexual orientation with respect to, ethical decision making, and an unbiased approach to optimal care. Students will consider how this course will benefit
their clinical experience in a primary healthcare setting to increase competence in diagnosis, treatment, referrals, or follow-up care with a concentration on improving patient outcomes.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNP 6531
- DRNP 6540 or DRNP 6541

DRNP 6553 - Advanced Nursing Practice Care in Women's Health

(1 cr.)
This course provides students with foundational knowledge in the assessment and management of pregnant women. Common physiologic changes in pregnancy, complications, and postpartum care are discussed. Students analyze available data and plan appropriate interventions leading to positive outcomes for pregnant women and infants. Students develop competence in diagnosis, treatment, referral, and follow-up care.

Prerequisites
- NURS 6501
- NURS 6521
- NURS 6512

DRNP 6560 - Advanced Care of Adults in Acute Settings III

(3 cr.)
Students in this course will advance their clinical competence in the care of patients in acute care settings. Students will build confidence as they begin the transition from student to advanced practice nurse. Classroom activities and case studies will enable students to explore resources and support systems available to acutely ill adolescents, adults, and older adults. The application of knowledge in the management of patients and the collaboration between the advanced practice nurse and the patient, family, and multidisciplinary healthcare team are emphasized.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNP 6540
- DRNP 6566
- DRNP 6550
DRNP 6565 - Synthesis in Advanced Nursing Practice Care of Patients in Primary Care Settings

(3 cr.)
Students in this synthesis course focus on clinical competence in the care of adults in primary care settings by building on knowledge and skills gained in previous courses. Students build confidence as they continue to transition from the role of registered nurse to that of advanced practice nurse. Classroom activities and case studies enable students to explore the salient nurse practitioner practice issues involved in the delivery of safe, competent, high-quality, and cost-effective care of patients in a dynamic healthcare system. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized. This course is designed for nurse practitioner (NP) students to synthesize their knowledge and clinical skills to provide care to patients with complex health conditions.
Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNP 6531
- DRNP 6541
- DRNP 6551

DRNP 6566 - Advanced Practice Care of Adults in Acute Settings I

(3 cr.)
This course is the first of four clinical courses in the Adult-Gerontology Acute Care curriculum. Students will explore and integrate concepts of pathophysiology, pharmacology, assessment, and collaborative management of adolescents, adults, and older adults who are acutely/critically ill or experiencing an exacerbation of a chronic health problem. The clinical focus is on the role of the acute care nurse practitioner working with an interdisciplinary team across settings to facilitate the patient's return to optimal health. Topics include cardiac, pulmonary, and renal issues as well as common diagnostic test and procedures.
Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
DRNP 6568 - Synthesis in Advanced Nursing Practice of Patients in Family Care Settings

(3 cr.)
Students in this synthesis course focus on clinical competence in family settings by building on knowledge and skills gained in previous courses. Students build confidence as they continue to transition from the role of registered nurse to that of advanced practice nurse. Classroom activities and case studies enable students to explore the salient nurse practitioner practice issues involved in the delivery of safe, competent, high-quality, and cost-effective care of patients in a dynamic healthcare system. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized. This course is designed for nurse practitioner (NP) students to synthesize their knowledge and clinical skills to provide care to patients with complex health conditions.

DRNP 6635 - Psychopathology and Diagnostic Reasoning

(3 cr.)
Psychiatric-mental health nurse practitioners (PMHNPs) need to have the knowledge and skills to provide comprehensive mental health evaluations in a safe and competent manner. In this course, students can learn how to use knowledge of psychopathology and diagnostic reasoning for health promotion and psychiatric assessment, and to develop differential diagnosis for patients with psychiatric and substance use disorders across the life span.

DRNP 6645 - Psychotherapy With Multiple Modalities

(3 cr.)
Psychotherapy involves giving more than good advice. For the psychiatric mental health nurse practitioner (PMHNP) to be effective, deliberate approaches to therapy must be consistent with evidence-based practices. Learners in this course examine a variety of therapeutic techniques that can be used during psychotherapy sessions with individuals, families, and groups across the lifespan. Emphasis is placed on evidence-based applications of various therapeutic approaches for a wide range of psychiatric issues.

DRNP 6665 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan I

(3 cr.)
Working from a lifespan approach, this course brings together diagnosis and treatment planning in psychiatry. Topics include psychiatric assessment, application of diagnostic criteria, diagnostic formulation, differential diagnosis, psychopharmacology, and appropriate labs and diagnostics. The learner will select a combination of
psychotherapeutic modalities coupled with psychopharmacologic approaches to treat common psychiatric mental health conditions across the lifespan. Legal and ethical considerations for working with clients across the lifespan will be addressed. Students build confidence as they continue to transition from the role of registered nurse to that of advanced practice nurse.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNS 6630
- DRNP 6635
- DRNP 6645

DRNP 6675 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan II

(3 cr.)
Continuing from the lifespan approach, students in this final course for the psychiatric-mental health nurse practitioner (PMHNP) focus on clinical competence in mental health settings by building on content and skills from previous courses. Selection of assessment approaches for patients across the lifespan, as well as differential diagnosis, application of diagnostic criteria, appropriate diagnostic testing, and diagnostic case formulation will be undertaken. The learner will use both psychotherapeutic approaches coupled with psychopharmacologic approaches to treat common psychiatric mental health conditions. Classroom activities and case studies enable students to explore the salient nurse practitioner practice issues involved in the delivery of safe, competent, high-quality, and cost-effective care of patients in a dynamic healthcare system. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the patient, family, and interprofessional healthcare team are emphasized. This course is designed for nurse practitioner (NP) students to synthesize their knowledge and clinical skills to provide care to patients with complex health conditions.

Prerequisites
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DNRS 6630
- DRNP 6645
- DRNP 6665

DRNP 6810 - Primary Care Approaches for Children
(3 cr.)
This course is designed to provide the advanced practice nursing student with specialized knowledge needed for the well population of newborns to young adults. Course content also emphasizes common illnesses seen in the primary care office setting, health promotion, and evidence-based practice in the primary care setting.

**DRNP 6820 - Management of Complex Pediatric Conditions**

(3 cr.)
This course is designed to provide the pediatric advanced practice nursing student with specialized knowledge needed for the management of complex acute and chronic illnesses in children from birth to young adulthood. There is emphasis on evidence-based approaches to diagnose and treat complex and chronic illnesses in pediatric patients within the family and community systems. Students also integrate knowledge, theory, and clinical practice research from a variety of disciplines into age-appropriate assessment and treatment of children using culturally appropriate strategies for patient and family education.

**Prerequisites**
- DNRS 6501
- DNRS 6512
- DNRS 6521
- DRNP 6800
- DRNP 6810

**DRNP 6830 - Management of Specialized Populations**

(3 cr.)
This course is designed to provide the pediatric advanced practice nursing student with specialized knowledge needed when caring for specialized pediatric populations from birth to young adulthood. There is emphasis on what makes various subpopulations special and how best to provide evidence-based healthcare and disease management for special populations. This includes behavioral health issues, bullying, adolescent health, sexuality, contraception, eating disorders, LGBTQ+ youth, child abuse, mental health, and foster children.

**Prerequisites**
- DRNP 6800
- DRNP 6810
- DRNP 6820

**DRNP 6840 - Synthesis of Pediatric Primary Care**
This course is designed to prepare advanced practice nursing students with a combination of knowledge and skills that will help prepare them for the pediatric nurse practitioner primary care role. It also assists students to implement the pediatric nurse practitioner role in a collaborative model of practice.

**Prerequisites**
- DRNP 6800
- DRNP 6810
- DRNP 6820
- DRNP 6830

---

**DRWA 8000G - Doctoral Writing Assessment**

This course is part of Walden’s commitment to help prepare students to meet the university's expectations for writing in courses at the doctoral level. In this course, students write a short academic essay that will be scored by a team of writing assessors. Based on the essay score, students will be guided toward any further recommended or required writing support needed to meet writing proficiency standards. This required course is free. Students will be enrolled automatically in it after they complete their first term of their doctoral program.

---

**DRWA 8001G - Doctoral Writing Assessment**

This course is part of Walden’s commitment to help prepare students to meet the university's expectations for writing in courses at the doctoral level. In this course, students write a short academic essay that will be scored by a team of writing assessors. Based on the essay score, students will be guided toward any further recommended or required writing support needed to meet writing proficiency standards. This required course is free. Students will be enrolled automatically in it after they complete their first term of their doctoral program.

---

**DRWA 8880G - Doctoral Writing Assessment**

This course is part of Walden's commitment to help prepare students to meet the university's expectations for writing in courses at the doctoral level. In this course, students write a short academic essay that will be scored by a team of writing assessors. Based on the essay score, students will complete or be exempted from additional required writing support needed to meet writing proficiency standards. This required assessment course is free. Students will be enrolled automatically in it at the beginning of their doctoral program.
DRWA 8881G - Doctoral Writing Assessment

(o sem. cr.)
This course is part of Walden's commitment to help prepare students to meet the university's expectations for writing in courses at the doctoral level. In this course, students write a short academic essay that will be scored by a team of writing assessors. Based on the essay score, students will complete or be exempted from additional required writing support needed to meet writing proficiency standards. This required assessment course is free. Students will be enrolled automatically in it at the beginning of their doctoral program.

DRWI 8500 - Dissertation/Capstone Intensive

(o cr.)
The Dissertation Intensive has been designed to help students make progress in writing their dissertation proposals. This supportive experience provides an opportunity for students to work directly with faculty members who have extensive experience with qualitative, quantitative, and mixed methods research design. At least one of the members of the team is an experienced faculty member from the Walden University Writing Center who can help students strengthen skills required to write the dissertation. In addition, the Dissertation Intensive also provides an opportunity for students to network with other students who are at the same stage of the writing process and the potential to develop writing support groups.

DRWI 8504 - Consulting Skills Intensive

(o cr.)
The Consulting Skills Intensive (CSI) is a hands-on learning experience featuring role play, teamwork, observed integration, and real time feedback and coaching. The skills intensive provides intense and in-person immersion into the scenarios and case studies that directly relate to the day-to-day challenges and opportunities participants may encounter in their current and future workplaces. The retreat is a participant-centered environment in which there is ongoing collaboration and interaction through discussion, practice, feedback, reflection, integration, teamwork, and coaching.

DRWI 8507 - PsyD BHL Doc Project Virtual

(o cr.)
This virtual residency experience provides students in the Behavioral Health Leadership program with knowledge and practice skills necessary to successfully complete their capstone courses, resulting in their Doctoral Study. Students will review the Doctoral Study capstone requirements, the Baldridge Excellence Framework, role of research/researcher, and the elements of the Prospectus. At the end of the residency, an outline of the Prospectus should be submitted to gain credit for the residency. Also,
students are expected to submit a summary of their residency journal that documents their virtual residency experience. Participation in all sessions and submission of daily assignments is required in order to obtain credit. Each day will include a seminar where the chairperson covers selected topic(s). Students will create an outline of the prospectus and also set up times to work individually with the chairperson in scheduled mentoring sessions.

**DRWI 8508 - Coaching Skills Virtual Intensive**

**(0 cr.)**

In this intensive experience, students immerse themselves in the coaching context to practice and reinforce coaching skills acquired during IPSY 6753/8753 - Leadership Coaching: Theories, Concepts, and Processes. Students participate in live virtual coaching sessions through various roles: coach, client, and observer. Each synchronous coaching practice session emphasizes Board Certified Coach competencies and ethical guidelines as well as coaching best practices. Small groups work closely with faculty members for 4 days on a final project that requires synthesis of and reflection on skills learned during the intensive.

**Prerequisites**

- **MS in Industrial and Organizational (I/O) Psychology**
  - IPSY 6753
  - IPSY 6755

- **PhD in Industrial and Organizational (I/O) Psychology**
  - IPSY 8753
  - IPSY 8755

**DRWI 8508V - Coaching Skills Virtual Intensive**

**(0 cr.)**

In this intensive experience, students immerse themselves in the coaching context to practice and reinforce coaching skills acquired during IPSY 6753/8753 - Leadership Coaching: Theories, Concepts, and Processes. Students participate in live virtual coaching sessions through various roles: coach, client, and observer. Each synchronous coaching practice session emphasizes Board Certified Coach competencies and ethical guidelines as well as coaching best practices. Small groups work closely with faculty members for 4 days on a final project that requires synthesis of and reflection on skills learned during the intensive.

**Prerequisites**

- IPSY 6753/8753
- IPSY 6755/8755

**DSCI 2010 - Data Science Essentials**
The importance of data science cuts across nearly all major industries and companies. In this course, students explore the scope and multidisciplinary nature of data science with a focus on solving problems using data from across disciplines. Students will see how tools like Watson Analytics can be used to discover patterns and meaning in data. They consider ethical considerations related to data science applications, develop a questioning mindset, and explore a data science framework that can be applied to any industry, business, or organization.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

DSCI 2020 - Storytelling With Data: Visualization and Communication

(5 cr.)
Once all the data is collected and analyzed, data analysts need to be able to communicate implications of the data in a way that all stakeholders can understand. In this course, students use data visualization tools and techniques to tell a compelling story with data. Students apply principles of effective communication and share insights and implications of an authentic data analysis project.
Prerequisites
- DSCI 2010
- PSYC 3002 or STAT 2001 or STAT 2002 or STAT 3001 or STAT 3401

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

DSCI 3030 - Data Mining and Analysis

(5 cr.)
Data scientists add value to any enterprise by sorting through mountains of data, identifying patterns, and communicating important insights to stakeholders. In this course, students examine how data scientists prepare, cluster, and analyze data to solve real-world problems and predict future trends. Through real-world applications and examples, students analyze common data domains and tasks and apply principles of data analytics to solve problems from a variety of organizations and industries.
Prerequisites
- DSCI 2020

DSCI 3040 - Advanced Data Science Tools and Techniques

(5 cr.)
In this course, students walk through various problem-solving scenarios in which data scientists demonstrate the use of various data science tools and techniques and explain
approaches to querying data using different tools. Through clear, easy-to-understand tutorials, students practice and apply data science tools and techniques and demonstrate the value of using data science tools to solve problems.

Prerequisites
- DSCI 3030

DSCI 6005 - The Global Technology Environment

(3 sem. cr.)
Students in this course are provided a critical "state-of-the-art" breadth-first review of the domain of information technology (IT). Designed to provide students with a wide-ranging introduction to topics such as software engineering, cybersecurity, and big data analytics, students completing the course have a comprehensive global view of the current IT landscape in the context of both commercial and noncommercial enterprises. The class blends both theory and practice to provide a solid foundation for future study. Students study the relationship between technological change, society and the law, and the powerful role that computers and computer professionals play in a technological society.

DSCI 6190 - Foundations of Intelligent Systems

(3 sem. cr.)
Students in this course are introduced to the concepts of artificial intelligence and emergent areas of intelligent systems. Students have the opportunity to gain a critical understanding of knowledge representation, reasoning, machine learning, and evolutionary techniques. Students are presented with real-world problems and have the opportunity to apply "intelligent" techniques to provide solutions to these problems.

DSCI 6210 - Cloud Computing

(3 sem. cr.)
Cloud computing has attained great commercial significance in recent years. As companies seek to drive down the capital (and recurrent) costs of doing business, using cloud computing to reduce expenditure by outsourcing aspects of the organizations' IT infrastructure to external, web-accessible systems has become a critical goal. In this course, students study the key concepts, theories, techniques, and practices that underpin cloud computing, including the main abstraction, component and deployment models that characterize cloud computing. Students have the opportunity to critically appreciate issues and problems, as well as cutting-edge solutions, pertaining to cloud computing.

DSCI 6240 - Advanced Database Systems
In order to create a competitive advantage, organizations store and analyze information in a variety of formats. This course covers key areas of database systems, such as requirements, design, implementation, security, performance, and scalability. Through a hands-on approach and practical projects, students have an opportunity to design and build database systems using the latest database technologies.

**DSCI 6245 - Big Data**

(3 sem. cr.)
Students in this course are provided with a comprehensive understanding of big data tools and techniques, related issues, and the different kinds of big data ecosystems that can be used to support advanced data analytics. Students consider big data management frameworks in general, but with a focus on the Hadoop open source distributed data storage and processing platform and its underpinning subsystems. Additionally, the course content introduces students to the role of big data systems in data-driven decision-making.

**DSCI 6265 - Data Mining**

(3 sem. cr.)
In this course, students are provided with an in-depth understanding of the concepts of data mining, including the end-to-end processes involved and the major data mining tools and techniques in common usage. During the course, students have the opportunity to apply such tools and techniques to a variety of example data sets in order to gain a critical insight into their operation and an understanding of when and where such tools and techniques can best be applied. Students also have the opportunity, using the 'R' programming language, to implement several different kinds of data mining algorithms to gain a comprehensive understanding of their operation.

**DSCI 6401 - Statistical Concepts for Big Data**

(3 sem. cr.)
Statistical analysis supports quality management, drives decision making, enables forecasting and prediction, and provides a means for understanding many aspects of our world. Data is everywhere in today’s integrated technological society, and statistical analysis provides the means to access and interpret data. Students in this course are introduced to statistics focused on working with complex data sets and analyzing big data. Students synthesize theory with practical applications to learn the fundamentals of statistical reasoning, descriptive statistics, visual data display, regression, hypothesis testing, research design, anomaly detection, and advanced analysis practices. They have the opportunity to practice using a statistical software package to solve statistical problems. Students use a publicly available big data set to formulate their own study and complete a statistical analysis.
DSCI 6655 - Data Warehousing and Business Intelligence

(3 sem. cr.)
Students learn key approaches to the integration of enterprise-wide information to support business strategy and decision making. They cover issues in data acquisition, storage, retrieval, and analysis in this course. Topics include data warehouses; data marts; dashboards, key performance indicators, and scorecards; online analytical processing; and data visualization.

DSCI 6665 - Predictive Analytics for Decision Making

(3 sem. cr.)
Students in this course are provided with insight into how predictive analytics can be used within organizations. In completing this course, students have the opportunity to gain a comprehensive understanding of how results from predictive analytics can be used by organizations to grow their customer base and run operations more efficiently. This course is oriented toward the practical applications of predictive analytics.

DSCI 6685 - Data Visualization

(3 sem. cr.)
Big data normally refers to petabytes (1000 terabytes) or exabytes (one billion gigabytes) of unstructured data. This amount of data requires new methods to analyze, visualize, and present these data in a way that yields insight and understanding. Students in this course are introduced to elementary graphics programming, focusing primarily on two-dimensional vector graphics and the programming platforms for graphics. This infrastructure will also include lessons on the human side of visualization, studying human perception and cognition to gain a better understanding of the target of the data visualization.

ECON 1001 - Macroeconomics♦

(5 cr.)
This is an introductory course in macroeconomics that covers basic economic principles and their application to the macro economy. Topics covered include the principles of economic decision making; definition and measurement of gross domestic product, national income, employment, inflation, and other variables commonly used by economists; factors affecting economic growth; description and application of models used to evaluate the effects of policies and changes in external variables on the economy; the roles of fiscal and monetary policies; the banking system; and the effects of globalization and international trade.
Prerequisites
- MATH 1001 or 1002 or 1030 or 1040

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
ECON 1002 - Microeconomics♦

(5 cr.)
The principles of microeconomics explain how in a market economy the price system answers the following fundamental economic questions: What goods and services are produced and distributed as well as how and for whom? Students in this course examine the behaviors of households that supply factors of production—natural resources, labor, and capital—to firms and that purchase consumer goods and services from firms. They also investigate firms that maximize profit through their decisions about acquiring factors of production, controlling costs of production, choosing the optimal level of output, competing with other firms under different market structures, and making investment decisions about entering new markets.

Prerequisites
- MATH 1030 or MATH 1040

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ECON 2001 - International Economics♦

(5 cr.)
In this course, students examine analytical frameworks and empirical data to gain an understanding of the increasingly dynamic world economy. They engage in assignments that focus on economic analyses that are particularly important to business decision makers in a global economy and the economic conditions that impact firms’ decisions about capital allocation, pricing, and employment. Students also share perspectives and delve deeper into course content through discussions on a range of topics, including historical roots of international economics, neoclassical trade theory, tools that restrict or alter trade between countries, and U.S. trade policy history, among others.

Prerequisites
- ECON 1001
- ECON 1002

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDAD 7002 - Foundations: Administrator Leadership for Teaching and Learning

(6 sem. cr.)
The purpose of Foundations is to engage learners with the environment, expectations, and content of post-master's work in the Administrator Leadership for Teaching and
Learning program. Through participating in the course, learners will develop (a) facility with Walden University's online learning environment and understanding of the university's and the program's support systems and expectations and outcomes, and (b) knowledge about the field, synthesized with reflection on one's own experience.

**EDAD 7200 - Leadership for Today's Schools**

*(6 sem. cr.)*

Today's schools are dynamic places and demand leaders in all arenas, from the boardroom to the classroom. Leaders must understand how learning communities operate and thrive, and be prepared to deal with the demands of internal and external forces. The 21st-century leader who understands change theory will continually appraise the evolving needs of the learning community and apply a grounded knowledge base of theory and practical strategies supported by research. Leaders are empowered to explore current and future technology as they assess educational trends and issues. Learners will also analyze their own and others' paradigms and leadership styles, and determine best practices to promote positive social change.

**EDAD 7201 - Applied Research in Education**

*(6 sem. cr.)*

In this course, educators develop a broad understanding of theoretical frameworks and the appropriate use of qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

**EDAD 7202 - Leading to Promote Learning**

*(6 sem. cr.)*

Research has considerably expanded the knowledge of teaching and learning in recent years. These gains have resulted in a new paradigm for the design and assessment of learning experiences. In this course, educators advance their understanding of research methods as they examine literature about design and assessment. They also apply research-based principles, through technological means, to collect, analyze, and present data with the goal of solving a learning problem in their school or district.

**EDAD 7203 - Leading Professional Learning Communities**

*(6 sem. cr.)*

Through this course, educators explore how the role of leadership expands beyond the
classroom and school to the larger educational community. Educators work toward developing the knowledge, abilities, and dispositions required of an effective leadership role to participate in sustainable education reform. They explore a variety of topics, including creating professional partnerships, participating in collegial study teams, facilitating professional development of other educators, and adeptly using collegial and collaborative processes, such as coaching and mentoring educators and other leaders. An additional focus is the relationship between school and community stakeholders. Educators also investigate the legal, business, and/or political perspectives implications of these educational issues.

**EDAD 7900 - School Leadership Capstone: Trends, Issues, and Global Perspectives**

*(6 sem. cr.)*

Invariable advances in research and technology continue to change our current state of knowledge; therefore, it is necessary to function as lifelong learners. In this course, educators examine intriguing and potentially critical directions in adult learning, including brain research, new technologies, and the impact of globalization. Educators also have the opportunity to examine and reflect on the effects of these trends on their own areas of interest. The capstone concludes the program by providing a practical application of educators' learning. Working in a consultative role as a K–12 professional, educators engage in a real-world, problem-solving project within their work environment.

**EDAD 8040 - Foundations: Administrator Leadership for Teaching and Learning**

*(6 sem. cr.)*

The purpose of Foundations is to engage learners with the environment, expectations, and content of doctoral work in the Administrator Leadership for Teaching and Learning program. Through participating in the course, learners will develop: (a) facility with Walden University's online learning environment and understanding of the university's and the program's support systems and expectations and outcomes; (b) knowledge about the field, synthesized with reflection on one's own experience and goals; and (c) doctoral-level critical-thinking and writing skills.

**EDAD 8140 - Leadership for Today's Schools**

*(6 sem. cr.)*

Today's schools are dynamic places and demand leaders in all arenas, from the boardroom to the classroom. Leaders must understand how learning communities operate and thrive and be prepared to deal with the demands of internal and external forces. The 21st-century leader who understands change theory will continually appraise the evolving needs of the learning community and apply a grounded knowledge base of theory and practical strategies supported by research. Leaders are empowered to
explore current and future technology as they assess educational trends and issues. Learners will also analyze their own and others’ paradigms and leadership styles and determine best practices to promote positive social change.

EDAD 8141 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and the appropriate use of qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDAD 8142 - Leading to Promote Learning

(6 sem. cr.)
Research has considerably expanded the knowledge of teaching and learning in recent years. These gains have resulted in a new paradigm for the design and assessment of learning experiences. In this course, educators advance their understanding of research methods as they examine literature about design and assessment. They also apply research-based principles, through technological means, to collect, analyze, and present data with the goal of solving a learning problem in their school or district.

EDAD 8143 - Leading Professional Learning Communities

(6 sem. cr.)
Through this course, educators explore how the role of leadership expands beyond the classroom and school to the larger educational community. Educators work toward developing the knowledge, abilities, and dispositions required of an effective leadership role to participate in sustainable education reform. They explore a variety of topics, including creating professional partnerships, participating in collegial study teams, facilitating professional development of other educators, and adeptly using collegial and collaborative processes, such as coaching and mentoring educators and other leaders. Educators also focus on the relationship between school and community stakeholders. Educators also investigate the legal, business, and/or political perspectives implications of these educational issues.

EDAD 8144 - School Leadership: Trends, Issues, Global Perspectives

(6 sem. cr.)
Invariable advances in research and technology continue to change our current state of
knowledge; therefore, it is necessary to function as lifelong learners. In this course, educators examine intriguing and potentially critical directions in adult learning, including brain research, new technologies, and the impact of globalization. Educators also have the opportunity to examine and reflect on the effects of these trends on their own areas of interest.

**EDAD 8145 - Research in Practice**

(6 sem. cr.)
In this course, educators build on their knowledge of and experience with research design and methodology through a hands-on, in-depth study of specific data collection and analysis skills, which they need to become effective producers of research. Educators apply concepts and practice skills in research design, data collection, data analysis, and presentation of results. They complete practical exercises and engage in discussions that emphasize qualitative and quantitative research methods.

**EDDD 8002 - Leading the Future of Education**

(5 cr.)
As an advanced graduate student, you are about to embark on one of the most exciting journeys of your life. This practical course provides meaningful skills you will need to select your path, complete your degree, and become a successful leader of educational change in the 21st century. Networking and research skills, scholarly writing, critical thinking, use of Walden resources, and the three advanced graduate paths (e.g., PhD, EdD, EdS)—this course addresses all of these in a manner that provides a solid foundation of skill sets upon which to base your journey. You will find a balance of assignments (e.g., case studies, discussions, application assignments) that will ignite your passion for learning, allow you to collaborate with others, and guide your current and future work. This course is designed to reflect Walden's social change mission and provide you with meaningful tools for success as an advanced graduate student.

**EDDD 8003 - Tools for Doctoral Research Success (Companion 1)**

(2 cr.)
For the Doctor of Education degree, educators are required to make an original contribution to the field. The purpose of this course is to help educators begin that process by introducing them to the steps and components of the doctoral capstone, its timeline, and available resources. Education professionals examine and analyze existing research to identify research questions, the framework and methodology, and other key components necessary to create valid research. They also explore resources such as the Writing Center and Walden Library as well as specific tools they can use to complete the capstone.

**EDDD 8004 - Demystifying Doctoral Writing for Research (Companion 2)**
Education professionals expand their knowledge of the doctoral capstone by comparing the differences between the doctoral study and dissertation options. They identify their chosen format and review specific examples, with regard to alignment among the problem, purpose, framework, research question, and design. Education professionals review the appropriate rubrics and checklists for their type of doctoral capstone. They will use tools to narrow the focus of their research topic and begin to develop their prospectus.

EDDD 8005 - Organizational Perspectives and Implications for Leaders♦

There are many ways of seeing an organization and one's place in it. The assumptions students make about people, purpose, and profit will influence the way they manage. It is important to develop the skill required to read various situations and to understand what is between the lines to act with insight. Developing and utilizing various divergent perspectives on organizational dynamics enables a manager to devise appropriate actions by critically thinking about the way things can be (based on the way things are). In this way, leaders free themselves from conventions and can consider the knowledge management strategies, structures, and policies to succeed. Students will explore several metaphors of organizations from mechanistic to organic to network, among others. The students will look at organizations through several all-encompassing frames to understand how a leader can leverage these new perspectives to better manage processes, the implications of social change, and innovative strategies. Students will also continue building the skills required to succeed in the program and leverage those skills as they begin working on their dissertation topics. Students are asked to reflect each week on their learnings and how those learnings are shaping their specialization perspective. Students will deepen their understanding of APA, scholarly writing, and the importance of integrity in writing; they will also hone their analysis and evaluation skills.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDDD 8006 - Leading the Future of Education

As an advanced graduate student, you are about to embark on one of the most exciting journeys of your life. This practical course provides meaningful skills you will need to select your path, complete your degree, and become a successful leader of educational change in the 21st century. Networking and research skills, scholarly writing, critical thinking, use of Walden resources, and the three advanced graduate paths (e.g., PhD, EdD, EdS)—this course addresses all of these in a manner that provides a solid foundation of skill sets upon which to base your journey. You will find a balance of assignments (e.g., case studies, discussions, application assignments) that will ignite your passion for learning, allow you to collaborate with others, and guide your current and
future work. This course is designed to reflect Walden's social change mission and provide you with meaningful tools for success as an advanced graduate student.

**Note:** 6-week version

**EDDD 8009 - Organizational Decision Making and Judgment**

*(5 cr.)*

In today's highly complex organizations, rational and behavioral decision-making processes and models impact leadership, ethics, group dynamics, and risk assessment. Students will examine the ethical implications of organizational decisions based on the literature. Students will also explore, evaluate, and debate how judgments and decisions influence team dynamics and an organization's social responsibility decisions. Students will also develop a deeper appreciation for predictive and adaptive decision systems and the impact of artificial intelligence and autonomous systems on an organization's decision processes. Students will continue to develop their skills assessment plan and tie what they learn to their specialization and, ultimately, the dissertation process. Students will focus on developing their analysis capabilities of peer-reviewed literature related to their specialization, and decision making and judgment.

抛弃Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDDD 8010 - Collaborative Communication for Administrators**

*(5 cr.)*

Effective education leaders work to foster a community of collaboration in which all stakeholders strive to develop a shared understanding of and commitment to making sure that every student learns and succeeds. Education professionals in this course explore the characteristics of effective collaborative leaders, including the ability to foster collaborative problem solving and decision making. They learn how to model open and responsive communication as well as how to use tools to ensure that such collaboration is the common process within the school and throughout the school community. They also explore the role of schools in communicating with and drawing upon community resources of various types, including public agencies and organizations that serve youth and families. Through this course, education professionals work toward establishing the personal, ethical, and moral platforms to become effective leaders who model and promote ethical and productive civic behavior. Education professionals will develop and refine their skills as collaborative leaders in the school community.

抛弃Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDDD 8011 - School Organizational Dynamics: Policies and Law**
Educators in this course study selected general legal principles, case and statute law, and law-making agencies that impact leaders and their educational institutions. Key content areas include but are not limited to the legal status of the local school district; the role of federal, state, and local governments that may apply; governance of schools; and policies, rules, and regulations. Education professionals in the course will also cover and develop a practical understanding of the legal rights, responsibilities, and obligations of administrators, teachers, students, parents, and school boards; community education; civil rights; collective bargaining, torts and contracts, and legal research; as well as the development of policy to meet regulations and other provisions. School administrators have an opportunity to become more knowledgeable about finding resources to help them address legal matters as they evolve. Educators will gain the basic knowledge to help develop policy statements as related to their school and to the district as a whole.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist 1-866-492-5336 (U.S.); 1-443-627-7222 (toll) for more information.

EDDD 8012 - Understanding School Budgets and Allocating Resources

Research on effective schools provides guidance on the most productive ways to organize time, people, money, technology, and other resources. To use these resources most effectively, leaders need to have a strategy that defines the most important priorities, the overall educational design, and the organizational structures that best match the necessary goals for improvement. Education professionals will study and interpret budget documents as they relate to the district at large and then to their portion of the budget as a school. Education leaders will research about writing and seeking grants to enhance a school's or district's options to improve student learning. Effective leaders need to be able to link whole-school strategic plans to effective instructional practices and improved use of time and money. Educational leaders must focus on school improvement, improving teaching quality, and organizing and allocating staff and other resources in the most effective way to continuously improve student performance.

EDDD 8013 - Creating and Maintaining Safe, Effective, and Positive Learning Environments

Effective education leaders demonstrate and collaboratively develop capabilities to foster cultures for learning based on mutual respect among students, teachers, staff, parents, and the larger community. Strategies for fairly and effectively administering discipline and resolving conflict are addressed. This course is intended to help leaders understand and treat individual and group differences and potential conflict as opportunities for developing the dispositions, knowledge, and skills that result in social competencies essential to civic participation and interpersonal effectiveness in school.
and beyond. Education leaders will leave with the knowledge gained from a better understanding of how to address disruptive student behavior and how to deescalate conversations as well as confrontations that are an everyday reality in the school setting. Leaders will also study issues related to safety and violence in schools, considering both methods of prevention and ways to respond to unsafe and violent situations. They can learn how to call upon district and community resources to preserve safety and well-being of the school's population of students and personnel.

**EDDD 8014 - Recruiting and Retaining Effective School Personnel**

(5 cr.)
Education leaders study human resources policies and practices for recruiting, selecting, hiring, inducting, developing, evaluating, and retaining or dismissing school personnel. Identifying teachers' needs for professional growth is important, but leaders must also ensure that teachers have the opportunity and motivation to use their professional expertise and to participate in ongoing substantial professional development focused on enhancing the learning of every student. Education leaders have the opportunity to evaluate school personnel and ensure teachers are utilized in their areas of strength within the school, and that teachers also receive support and training in any needed areas to promote student learning. They can become knowledgeable about how to hire and retain their novice teachers in order to reduce teacher turnover. As well, school leaders must be able to identify characteristics of productive teacher evaluation processes and programs; distinguish between supervising teaching and supervising learning; and utilize a process and structure for evaluating school personnel that is productive and supportive, motivates improvement, results in retention of highly competent staff members, embodies standards of due process, and takes into account the provisions of the contractual agreements for staff.

**EDDD 8019 - Assessment, Evaluation, and Accountability: The Sociological, Political, and Economic Factors**

(5 cr.)
At the thought-leadership level, the context of sociological, political, and economic demands are primary to understanding the purpose of assessment and evaluation. This course will focus on the decision-making models that influence assessment, evaluation, and accountability systems. Topics include political astuteness; knowledge of sociological structures, including roles, status, power, rewards, and sanctions; as well as cost-benefit analyses, responsiveness to federal/state mandates, and organizational goals and objectives.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*
EDDD 8020 - Contemporary Issues and Trends in Higher Education and Adult Learning

(5 cr.)
A critical examination of the history, educational theories and practices, current initiatives, and future directions of higher education and adult learning are explored in this course. Educators will explore the philosophical and social issues that affect meaningful learning of adults in higher education. Education professionals will examine contemporary issues and trends within higher education and adult learning with focus on key topics such as transformative learning, self-directed learning, experiential learning, and critical reflective learning.

EDDD 8021 - Understanding the Adult Learner

(5 cr.)
Unique and distinctive skills are required to engage and teach adult learners. Education professionals will explore adult learning and developmental theory and the wide range of research that supports it, including andragogy and transformation, phase and stage developmental theories, and effects of gender and culture on adult learning. Educators will also be provided with the opportunity to reflect on the relationship of course material with their own experiences as adult learners. Education professionals complete a variety of realistic assignments through which they practice communicating and presenting complex concepts, critique the work of major theorists, apply adult learning and development theories to educational practice, and construct their own positions on adult learning as scholar-practitioners.

EDDD 8022 - Leadership of Higher Education Programs for Adult Learners

(5 cr.)
Effective leadership is the foundation of running a successful higher education or adult learning program. A leader is required to understand the organizational climate, consider the cognitive and social-cultural experience of teams, and effectively communicate a vision while meeting the programmatic goals. In this course, education professionals will learn techniques, tools, and resources to employ effective communication; manage everyday challenges; and address internal and external obstacles that impact program productivity and goals. Education professionals will examine various leadership and management strategies that support the ongoing negotiation and collaboration necessary to direct successful higher education and adult learning programs.

EDDD 8023 - Program Planning and Assessment

(5 cr.)
Higher education institutions and organizations design programs to address the needs of
their students, employees, and customers. To ensure the desired outcomes are met, education professionals must develop and implement realistic systems to monitor and assess the effectiveness of the program, determine areas of improvement, and implement the needed changes. Education professionals in this course will engage in the creation of goals and outcomes for a program, design and implement an assessment to determine if outcomes were met, communicate and present data and results to key stakeholders within the organization, and identify strategies for improvement.

**EDDD 8024 - Evaluating and Improving Programs, Organizations, and System**

(5 cr.)
Determining comprehensive value and worth of a curriculum, project, instructional method, institution, or policy is a complex endeavor. This course examines the process of determining the value, purpose, efficacy, and social implications for programs, organizations, and systems within a framework for continuous improvement. Supporting technical skills are integrated into the course, including quantitative, qualitative, and mixed-methods of data-gathering and analysis.

**EDDD 8025 - Building a Culture of Continuous Improvement**

(5 cr.)
Continuous improvement is a phrase that is applied in both business and educational settings. Operationalized, the term crosses fields that include leadership, organizational development, change theory, and evaluation and assessment. This course connects continuous improvement as referenced in these fields and moves beyond to include organizational culture, professionalism, social justice, and codes of ethics that support the formation and sustainability of this type of culture. The culminating project provides a platform for individualizing a plan with a self-chosen organization that incorporates evaluation, assessment, and a vision for social responsibility as part of creating a culture of continuous improvement.

**EDDD 8030 - Higher Education in the 21st Century**

(5 cr.)
Higher education is in a period of review as it responds to global issues and often shrinking resources. In this course, education professionals are provided with a foundational understanding of higher education and the origins of practices and problems of educational institutions. Education professionals investigate solutions to today's higher education issues and assess the relevance of current education models in relation to 21st-century needs.

**EDDD 8031 - Leading and Managing Instructional Change**
The politics of education come into play as leaders work to implement innovation and change within higher education organizations. Issues such as access, funding, speed of change, priorities of diverse stakeholders, the relation of work to education, the impact of technological change, and mobility of students are examined. Leaders examine change theory. Education professionals also investigate how internal and external forces impact change and consider the global challenges in leading and managing change.

EDDD 8032 - Strategic Planning and Program Evaluation in Higher Education

Effective leaders are expected to be creative thinkers, able to anticipate and react quickly to the ever-changing landscape of higher education. Strategic planning and program evaluation are necessary components for leading and managing successful higher education institutions. In this course, principles of effective change process are emphasized from both the macro- and micro-level perspectives. Developing collaborative educators in the evaluation and transformational process of strategic planning is a key objective of this course, with emphasis on in-depth analysis of the paradigms, processes, and components of change.

EDDD 8033 - The Politics of Higher Education: Policy Development and Implementation

This course is an introduction to the higher education politics and the policy-making process. In this course, education professionals survey the general nature of policy making with examples and readings from higher education. Key stakeholders, institutional structures, and processes in the federal, state, and local higher education policy arenas will be studied. The origins and consequences of key policy enactments affecting college access and success, instruction, performance accountability, and the economic development role of higher education are studied through scenarios and case studies.

EDDD 8034 - International Education and Development

In this course, education professionals examine theoretical approaches to the study of international education and the policy development of current topics in diverse global settings. Both case studies and practice blend in this course to prepare students to operate in the global education phenomena. Among the topics to be explored are international policy transfer, social stratification, the cultural transmission of knowledge, and the place of education in the global economy.

EDDD 8040 - The Community College—Historical Context and Critical Issues
The rise of community colleges following World War II added a new egalitarian dimension to higher education. In this course, educators explore how the various components of the community college history and mission changed the face of postsecondary education, giving rise to workforce development, developmental education, and continuing education, in addition to academic transfer programs. Best practices for governance of community colleges as well as contemporary issues such as the completion agenda, dual-credit courses for high school students, and articulations with 4-year institutions are explored.

EDDD 8041 - Transformational Leadership for Institutional Effectiveness in Community Colleges

Effective leadership in community colleges goes beyond managing or reacting to change; it anticipates change and seeks out opportunities for growth for the institution and its members while keeping the institution focused on its mission and goals for learning. Community college professionals in this course focus on key leadership skills, such as communication, negotiation, decision making, strategic planning, and conflict management. They research and discuss strategies for navigating the complex political environment of today’s colleges and universities, cultivating a culture of evidence, and developing the institution’s intellectual and human resources. They also practice analyzing, evaluating, and applying research methods appropriate to data-informed planning and decision making.

EDDD 8042 - Contemporary Issues, Challenges, and Trends in Community Colleges

Staying abreast of contemporary issues, challenges, and emerging trends is essential for institutional effectiveness in community colleges. The rapid expansion of online programs, which extends the reach of community colleges beyond the bounds of geography, while being a catalyst for change and development in the local communities, is just one of the challenges faced by 21st-century community college leaders. This course is designed to keep educators on the leading edge while exploring topics of technology, diversity of students, college readiness, access, and global awareness.

EDDD 8043 - Promoting Student Development and Success in Community Colleges

Community colleges are becoming increasingly accountable for providing diverse student populations with skills that prepare them for the future. Faculty and staff must be prepared to meet the needs of all students, including veterans, students from diverse
racial and ethnic backgrounds, academically underprepared students, or those who are the first in their families to attend college. The community college professional is often responsible for developing and implementing robust and proactive programs of academic and personal support to assist students in completing their programs and becoming successful. Included in this course is a focus on assessment and placement tools that assist in determining who might need resources such as remediation, developmental education, or counseling. In this course, educators can gain the tools needed to develop and measure resources that support student success. With an emphasis on outcomes, educators in this course focus on best practices for improving the engagement, retention, and educational achievement of today's community college student.

**EDDD 8044 - Leadership and Management for Change in Education**

(5 cr.)
Building on the core knowledge from earlier courses, educators will engage the emerging theories of leadership that reflect the current challenges in culturally responsive education, and the research on motivation and performance. The focus is on entrepreneurial and creative solutions, which reach across P–20 learning organizations to effect positive social change in education.

**EDDD 8050 - Curriculum, Instruction, and Assessment: A Systems Perspective**

(5 cr.)
Today's schools are dynamic organizations that require educators to take an iterative approach to designing curriculum, instruction, and assessment—one that responds to changing and diverse student needs, stakeholder perspectives, policies, accountability requirements, emerging technologies, family and community resources, and other internal and external forces. In this course, education professionals engage in active inquiry at the systems level and address real-world scenarios and problems. Learners can gain experience and expertise in promoting best practices in education, overcoming barriers to student learning and involving family and community partners, all while meeting and complying with relevant policies, laws, ethical practices, and standards. Education professionals explore key components of a successful learning community, the role of a leader within a dynamic system, professional dispositions, current educational trends and issues, and how technologies are creating new opportunities for organizational change and improved student performance.

**EDDD 8051 - Data-Driven Instruction and Assessment**

(5 cr.)
Using data to inform instruction, assessment, and evaluation promotes continuous improvement and student achievement. Instructional leaders must have the ability to ground current practice in data—a process that includes reviewing and discerning data,
evaluating current practices, setting an appropriate vision for the future, prioritizing the work, identifying measurable goals, developing an action plan, and then monitoring the results. Education professionals in this course examine the inextricable link between instruction and assessment. They engage in a diagnostic process designed to meet diverse student and systemic needs. They also examine the role of formative and summative assessments in making instructional decisions, the various forms and purposes of assessment, and how the ongoing use of assessment data can move curriculum and instruction beyond mediocrity to support rigorous learning for all students. The effective use of instructional practices such as blended learning, the "flipped" classroom, and the appropriate use of technology to support learning is also examined.

**EDDD 8052 - Curriculum Design to Promote Social Change**

(5 cr.)
Meaningful and engaging learning occurs when curriculum extends beyond the classroom to promote a climate for social change. In this course, education professionals will use a documentary case scenario to evaluate the use of service learning as a tool for connecting the curriculum to real-world experiences, while also supporting the community and its citizens. Educators will select an appropriate learner-centered curriculum model, design an interdisciplinary service project, and prepare a presentation for stakeholders' consideration, illustrating the potential of service learning as a catalyst for bringing a learner-centered curriculum, citizenship, and standards to life.

**EDDD 8060 - Issues and Trends in Reading and Literacy**

(5 cr.)
Literacy may be understood in multiple ways across various settings and populations. In this course, a foundation will be laid for educators to define literacy based on historical and contemporary perspectives, the sociopolitical landscape, the influence of social media and technological innovation, and influences coming from national, state, local, and Common Core standards. Educators will examine ways to overcome barriers to student literacy learning and develop techniques to improve communication and increase community and family involvement. Based on what they learn in this course and drawing on professional reading and curriculum standards, education professionals will develop a plan to gain stakeholder support for the improvement of curriculum and literacy programming at the systems level.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.*

**EDDD 8061 - Assessment and Data Analysis to Support Effective Literacy Programs**
Designing literacy programs that effectively promote and support high levels of literacy proficiency requires the use of data that accurately describe the status of student, teacher, and school performance. Education professionals in this course can examine a variety of assessment tools and validity issues for addressing individual and classroom needs as well as district and state mandates. Topics include a focus on data analysis for tiered intervention decision making and the interpretation of data to drive recommendations at a systemic level. Educators will develop skills to facilitate collaboration and stakeholder inclusion.

**EDDD 8062 - Collaborative Approach to Literacy Across the Content Areas**

(5 cr.)
Making academic content accessible and comprehensible for all learners requires specific strategies PreK–12 teachers need to know and be able to demonstrate. By focusing on academic language, content acquisition, and the appropriate use of technology, education professionals add to their repertoire of strategies to meet content standards for all students, including those with diverse needs, learning styles, and abilities. Education professionals can plan ways to collaborate and share knowledge with other educators within their professional setting and review and evaluate research to inform effective practices. Through this course, educators also address ways to develop programs that integrate both content and literacy objectives to better enhance the development of all learners throughout the content areas.

**EDDD 8070 - Special Education: Exploring Theory and Practice♦**

(5 cr.)
Special education is a dynamic field with a growing research base of best practices and changing implementation efforts for students who demonstrate a broad spectrum of adaptive and learning challenges. Special education professionals in this course explore how theoretical research in the field evolved and influenced emerging and prevalent practices in the field. Through the realistic lens of a case study, candidates will explore a range of research topics as well as investigate how research has influenced practice. Through their coursework, educators are supported in the development of skills and dispositions that will assist candidates as they envision and influence the future of special education.

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDDD 8071 - Leading Change in Special Education: Advocacy, Policy, and Law♦**

(5 cr.)
Leadership and advocacy go hand-in-hand when seeking to promote policies that support effective practices in education for ALL students. Through analysis and
reflection, candidates can examine the evolution of special education legislation and pivotal case law and can analyze the connections among advocacy, leadership, policy, and law as it plays out in realistic scenarios. Special education professionals will also investigate change theory and leadership styles, allowing them to reflect on their own and others' paradigms in order to determine best practices to promote positive educational and social changes. They must apply leadership, advocacy, self-evaluation, and social change skill sets to current practice as they will be called upon to do in future careers. Candidates can also engage in a culminating project through which they construct a professional plan for advocacy and leadership in an area of interest that includes issues of diversity and special needs.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDDD 8072 - Research Methodology for Special Education**

(5 cr.)
In this course, special educators examine research methodologies important and unique to the field of special education. Particular attention is given to single-subject research designs that are used to study behavioral change in individuals or small groups as a result of an intervention. Topics include reliable measurement, repeated measurement, description of conditions, baseline and treatment conditions, and single-variable rules. Candidates will apply the concepts studied in the course to the special education case study. By the end of this course, candidates will begin to delineate various special education research-based methodologies that may apply to an area of interest for their capstone projects.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDDD 8073 - Designing Specialized Instruction for Diverse Learners**

(5 cr.)
Whether practicing in a school, university, or other professional settings, special educators are called upon to implement data-driven assessments in order to plan and implement individualized instructional plans for students with diverse learning and social challenges. In this course, educators review research and practice specific to specialized instruction for students with disabilities in language, reading, writing, math, and content areas. Topics also include effective practices for instruction and evaluation for students with social-emotional and behavioral needs, including applied behavior analysis, positive behavioral interventions, and skill building. Related brain-based research will be examined, as well as assistive technologies and methods of delivery, whether in individual, small group, or inclusive settings.

**EDDD 8074 - Implementing Effective School-Wide Intervention Models**
Special educators must be prepared with valid and reliable assessment data in order to recommend and implement sound, research-based intervention models. In this course, educators examine problem-solving best practices for using data to identify students at risk of academic, social, or emotional difficulties. Candidates can also study methods of disability identification and monitoring student progress, and data-based decision making for instruction, universal instruction, and interventions useful for all students. Professional development for general and special education teachers and the role of caregivers (e.g., parents, families, guardians) will be explored. Functional behavioral assessment is examined as an evaluation tool for understanding behavior, and effective practices for school-wide positive behavioral support (SWPBS) are also explored.

EDDD 8075 - Sustaining and Supporting Effective Practices in Special Education

Effective special education leaders promote meaningful change for students with diverse learning and social needs, foster the use of effective practices, and sustain long-term program viability throughout diverse settings. Once effective practices are in place, they establish a clear plan for addressing program integrity and sustaining commitment to continuous improvement. Throughout this course, candidates can examine critical components to sustain change, including program evaluation, professionalism, culturally responsive practices, and policy to support continuous improvement.

EDDD 8080 - Child Development in the Critical Early Years

Effective early childhood professionals know that respectful relationships with families provide the foundation for supporting young children’s healthy development. Candidates examine key developmental stages, from prenatal experiences to the early school years. Education professionals explore child development theory, current research in neuroscience, and social-emotional development across the early childhood years, with a special emphasis on the significant role families play in fostering healthy development. Current thinking from the fields of psychology, science, and education are integrated with global perspectives on child development. Educators apply their knowledge to promote positive developmental outcomes for young children and their families.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDDD 8081 - The Language/Literacy Continuum From Birth Through Age 8

How does language affect the young child’s ability to think, communicate, and learn? In this course, educators explore the language and linguistic development of young children. Education professionals focus on theories of language acquisition; the nature
and function of language; the relationship between language and cognition; the developmental stages of language and literacy; and the critical role of families, communities, and educators in fostering language and literacy development from birth through age 8. Education professionals examine current research and ways early childhood professionals can support language and literacy learning for all children across the early childhood spectrum.

EDDD 8082 - Meaningful Learning Experiences in Supportive Environments

(5 cr.)
What does excellence look like in early childhood settings? What are varying perspectives on excellence in early childhood education throughout the world? What are the common elements of learning experiences and environments that provide meaning, inspire curiosity, offer safety, and encourage children to thrive? By examining the research, candidates explore current issues and trends in early childhood education such as the inclusion of national standards, project-based learning, looping, technology, and the role of play in fostering healthy development and learning. Education professionals also explore the role of families in supporting children's learning at home and in early childhood settings as well as how to build effective partnerships with families.

EDDD 8083 - Assessment Practices to Promote Healthy Development and Learning

(5 cr.)
How can early childhood professionals ensure that assessment not only evaluates development and learning but also promotes children’s growth? What kinds of assessments are appropriate and effective for very young children as well as those throughout the primary grades? Educators explore formative, summative, formal, and informal assessment as well as the use of these assessments to promote development and guide teaching and learning. Education professionals reflect on the many ways they use assessment on a daily basis, and discuss strategies for communicating assessment processes and results. Educators review current research regarding culturally responsive assessments, assistive technology, and international perspectives.

EDDD 8084 - Evaluating and Supporting Early Childhood Programs

(5 cr.)
Researchers indicate that high-quality early childhood programs result in long-term positive outcomes for children. Early childhood professionals have a deep understanding of the developmental domains and content areas of early childhood. Based on this understanding, educators use professional accreditation standards to evaluate the effectiveness of early childhood programs. Professionals learn how to evaluate programs for research-based, effective practices that promote healthy development and learning
from birth through age 8. Specific focus is placed on effective practice related to management policies and procedures, teacher qualifications, family engagement, and community involvement.

**EDDD 8085 - Inspired Leadership, Informed Advocacy, and Improved Policy**

(5 cr.)
What are the dispositions and responsibilities needed to be an effective professional in the early childhood field? Early childhood leaders exemplify the values and ethics of the field, act as advocates for children and families, and lead initiatives to improve policy and effect positive social change. In this course, education professionals study leadership theory, advocacy strategies, and early childhood policy systems. Educators explore multiple leadership roles in the early childhood field, analyze leadership qualities and traits, reflect on professional growth, and continue to refine research interests. Educators are challenged to be innovative and transformative future thinkers who are deeply committed to the well-being of young children and families.

**EDDD 8090 - Trends and Issues in Educational Technology**

(5 cr.)
Using new technologies in new ways sparks learning, creativity, and innovation. Trends and issues in educational technology are examined to discover how they influence learning and creativity in the workplace. Learners collaborate to demonstrate the evolution of a current technological trend, analyze its impact on learning and society, and evaluate the societal issues and problems caused by that trend.

**EDDD 8091 - Creating Digital Media**

(5 cr.)
The effective use of digital media in learning environments requires leaders in the field to be both consumers and creators of multimedia. Learners become knowledgeable developers of digital media by applying principles of instructional design and pedagogy to multimedia. Learners collaborate in the design and creation of digital and interactive media based on visual design principles.

**EDDD 8092 - Innovations and the Diffusion of Learning Technologies**

(5 cr.)
Social change resulting from the integration and adoption of technological innovations is the focus of this course. Learners explore Rogers' Diffusion of Innovations Theory through first-hand experience in a simulation. Learners explore research regarding the integration of technology in the workplace or education setting to determine strategies for becoming catalysts for change. Strategies for overcoming resistance and barriers to change are analyzed.
EDDD 8093 - Leading Change

(5 cr.)
Effective leaders direct the vision and goals for sustainable change initiatives in organizations. Based on the Human Performance and Training Model, learners explore strategies and tactics needed to bring about positive social change through an analysis of leadership, strategic planning, motivation, communication, and learning technologies. Problem solving skills are developed as learners effect change in the workplace focusing on a human performance issue. Components for successful grant writing are developed.

EDDD 8101 - Learner-Centered Curriculum

(5 cr.)
Designing curricula with rigor, relevance, and results requires broad understanding of the key concepts behind each of these attributes and a clear focus on how best to maximize the learning and potential of PreK–12 learners. In this course, education professionals examine what it means to design a learner-centered curriculum that enhances student engagement and involvement, provides a transformative experience for students, and creates conditions that facilitate deep learning. Education professionals examine the alignment of content standards and design models as well as the role of collaboration and community building, power sharing to foster learner autonomy, problem solving, material that is socially relevant, and ongoing assessment to meet the needs of an increasingly diverse student population. Authentic case-study scenarios provide opportunities for educators to see curriculum design in practice, use existing data to redesign and adapt curriculum, and create learning spaces that accommodate multiple learning needs.

EDDD 8102 - Promoting the Success of Diverse Learners

(5 cr.)
Student diversity comes in many different forms (e.g., linguistic, cultural, socioeconomic, academic, emotional, aesthetic), and effective educators have the knowledge, skills, and dispositions to value the richness this diversity brings and enhance learning in their education setting. By applying strategies and evaluating programs and initiatives to meet the diverse needs of all learners, educators can demonstrate an awareness of students' prior learning, language, culture, family, and community values to improve teaching and learning. Through real-world scenarios and applications, educators will assess strategies for promoting equitable access to high-quality learning experiences while recognizing their own personal beliefs and biases. Education professionals will also explore current and effective practices for working with diverse learners and providing productive learning environments for all students. Through the use of appropriate materials and technologies, educators will evaluate curriculum, instruction, and assessment, promoting learning for all students.
EDDD 8103 - eLearning

(5 cr.)
Educators explore the theories, paradigms, trends, and issues in the field of eLearning. Research on eLearning is critiqued and analyzed as an ecosystem, including an examination of K–12, higher education, corporate, and personal learning communities. Current social and geopolitical trends and their impact on eLearning are analyzed. Delivery methods, human presence, and sustainability of eLearning design are investigated. Through this course, educators are provided with design and development experience through the creation of multimedia presentations in an eLearning environment.

EDDD 8104 - Managing Resources in Higher Education

(5 cr.)
Managing resources—financial, technological, human, and intellectual—is one of the higher education leader's most significant concerns. Education professionals explore and apply principles that can help leaders in higher education effectively, plan, prioritize, allocate, and track the use of resources toward achieving learning-focused goals. Understanding efficiency, productivity, and sustainability in higher education is a key goal of the course as education professionals learn various ways to maximize resources across the institution. Activities include analysis of various budgeting, planning, and fundraising strategies and how these can be used to identify new and reallocated resources to enable growth and sustainability of quality programs.

EDDD 8105 - Education Law, Policy, and Governance

(5 cr.)
In this course, education professionals examine legal and ethical issues within the context of an educational setting. Supporting development of their legal reasoning skills, education professionals discuss the laws and statutes that inform policy and governance of educational organizations. They also engage in assignments that emphasize the ways ethics affect decision making, professional conduct, and educational policies when analyzing critical issues in educational leadership.

EDDD 8106 - Program Evaluation for Continuous Improvement

(5 cr.)
Effective educational leaders must have the knowledge, skills, and dispositions to evaluate programs and make data-driven decisions to promote continuous improvement for all learners. In this course, education professionals use available data points and tools to evaluate the design, implementation, and program outcomes to determine a program's impact on the learner, family, and community. The results of the program evaluation may lead educational professionals to develop action plans that include the
development of community outreach programs, grants, legislation/policy reform, professional development plans, or technology solutions. In this course, education professionals determine whether to recommend an improvement plan on an existing program or propose a new program or initiative.

**EDDD 8107 - Designing Instruction for eLearning**

(5 cr.)
Instructional design for eLearning involves understanding effective learning experiences in digital spaces. Educators apply the principles of the community of inquiry and the engagement of the digital learner as they design an eLearning course. Mobile technologies, collaborative learning, assessment, academic integrity, and meeting the needs of diverse and global students are addressed. Educators collaborate in the design and development of eLearning products and explore social change through eLearning.

**EDDD 8110 - The Art of Online Teaching**

(5 cr.)
Higher education is undergoing a radical paradigm shift with the rapid growth of online degree, program, and course offerings. Educators are provided with the foundational skills necessary to successfully facilitate learning in an online environment in this course. They have the opportunity to acquire the essential pedagogical competencies to provide targeted instruction and accurately assess student work in a virtual setting. Through the exploration of simulated classroom interactions and creative problem-solving scenarios, educators experience how online learning leverages technology to enhance knowledge and skill development. Upon successful completion of this course, educators can demonstrate professional skills to meet the growing demand for facilitators of online learning and the potential to positively influence a global population of learners.

**EDDD 8111 - Online Teaching Simulation**

(5 cr.)
In this simulation course, learners have an opportunity to practice the art of online teaching hands-on and to develop an online instructional presence that encourages positive student outcomes. In this unique practical experience, learners develop and reinforce the skills needed to succeed as an online instructor. Scholar-practitioners hone their online teaching skills by engaging in realistic classroom scenarios with guidance and feedback from experienced online faculty members and in collaboration with their peers. With careful oversight, mentoring, and coaching, learners practice and analyze online facilitation activities, including interacting though discussion boards, assessing student work, and posting announcements.

**EDDD 8113 - Tools for Doctoral Research Success**
Education professionals seeking the Doctor of Education (EdD) degree are required to make an original contribution to the field of education. The purpose of this course is to help educators begin that process by introducing them to the steps for developing the components of the dissertation—its timeline and available resources. Education professionals examine and analyze selected research to identify questions addressing a specific gap in the existing research literature, the framework and methodology, and other key components necessary to create scholarly research. They also explore resources such as the Writing Center and library, as well as specific tools they can use to complete the dissertation.

**EDDD 8114 - Demystifying Doctoral Writing for Research**

(3 cr.)
Education professionals expand their knowledge of the dissertation process by reviewing tools, resources, and sample dissertations as they focus on the alignment among the identified problem, purpose, framework, research question(s), and study design. Education professionals use tools, including the appropriate rubrics and checklists, to narrow the focus of their research topic, plan a comprehensive literature review, and begin to develop their prospectus.

**Prerequisites**
- EDDD 8113 or EDDD 8003
- RESI 8201
- RSCH 8310D or RSCH 8300 or RSCH 8300P or RSCH 8310C (may be taken concurrently)

**EDDD 8114L - Demystifying Doctoral Writing for Research**

(3 cr.)
Education professionals expand their knowledge of the dissertation process by reviewing tools, resources, and sample dissertations as they focus on the alignment among the identified problem, purpose, framework, research question(s), and study design. Education professionals use tools, including the appropriate rubrics and checklists, to narrow the focus of their research topic, plan a comprehensive literature review, and begin to develop their prospectus.

**Prerequisites**
- EDDD 8113 or EDDD 8003
- RESI 8201
- RSCH 8310D or RSCH 8300 or RSCH 8300P or RSCH 8310C

**EDDD 8116 - The Art of Online Teaching**
Higher education is undergoing a radical paradigm shift with the rapid growth of online degree, program, and course offerings. Educators are provided with the foundational skills necessary to successfully facilitate learning in an online environment in this course. They have the opportunity to acquire the essential pedagogical competencies to provide targeted instruction and accurately assess student work in a virtual setting. Through the exploration of simulated classroom interactions and creative problem-solving scenarios, educators experience how online learning leverages technology to enhance knowledge and skill development. Upon successful completion of this course, educators can demonstrate professional skills to meet the growing demand for facilitators of online learning and the potential to positively influence a global population of learners.

EDDD 8143 - Policy Development and Implementation

Education policy is crucial to educational improvement and renewal throughout the P–20 system of education. In this course, education professionals develop the skills for critical analysis of education policy at the local, state, national, and international levels. They discuss the definition and formulation of policies and they explore a wide range of topics, including the identification of and work with policy advocates, the processes of policy implementation and evaluation, and the use of logic models in the policy process.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDDD 8755 - Leadership and Leader Development

Effective leadership requires the ability to facilitate positive change, lead others in efforts to effect similar change, and work through challenges when met with resistance to change. Students in this course are provided with an extensive overview of leadership theories. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership and change. Students also examine various perspectives on leadership and the role of leadership in the achievement of organizational, group, and team goals. Students engage in practical assignments and discussions, focusing on effective leadership issues and practices during the process of organizational change.

EDDD 8900 - Completing the Prospectus

Nearly all doctoral-level programs require capstone projects that necessitate knowledge of conducting research, including how to develop an appropriate research plan. In this course, educators utilize knowledge from previous courses to develop their prospectus—a brief document that provides preliminary information about their
capstone research to serve as a plan for developing the research proposal. They engage in a logical progression from topic conception to prospectus completion. They learn how to take their individualized topic and identify the research problem, purpose of their study, conceptual framework, and appropriate research design, while also examining the concepts of feasibility and overall alignment of study components. Educators will practice evaluating their work using the same guides and rubrics used by faculty.

**EDDD 8910 - Completing the Prospectus**

(3 cr.)
Nearly all doctoral-level programs require capstone projects that necessitate knowledge of conducting research, including how to develop an appropriate research plan. In this course, educators utilize knowledge from previous courses to develop their prospectus—a brief document that provides preliminary information about their capstone research to serve as a plan for developing the research proposal. They engage in a logical progression from topic conception to prospectus completion. They learn how to take their individualized topic and identify the research problem, purpose of their study, conceptual framework, and appropriate research design, while also examining the concepts of feasibility and overall alignment of study components. Educators will practice evaluating their work using the same guides and rubrics used by faculty.

**Prerequisites**
- RSCH 8110
- RSCH 8210
- RSCH 8310

**EDDD 8990 - Completing the Doctoral Capstone**

(5 cr. per term for a minimum of 4 quarters until completion)
Nearly all doctoral-level programs require capstone projects that necessitate independent application of requisite knowledge on conducting research based on close interaction with, guidance from, and supervision by an institution-approved committee. Students in each EdD program specialization are supported in the completion of their doctoral capstone in this course. The EdD doctoral study process is composed of several stages and requires levels of approval—prospectus, proposal, IRB, final study, form and style, and chief academic officer (CAO). Students develop and support a doctoral-level research problem and review related literature to develop a framework for the study. They learn how to move from a research problem to the purpose of the study, the framework, and then an appropriate design while examining the concepts of feasibility and overall alignment of study components. Students consider ethical feasibility issues as related to their capstone development and proceed to data collection and
analysis. They finalize the capstone with an oral defense, appropriately presenting results and outcomes of the research, as well as implications for positive social change. Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Prerequisites
- EDDD 8910

EDPD 8002 - Leading the Future of Education

(5 cr.)
As an advanced graduate student, you are about to embark on one of the most exciting journeys of your life. This practical course provides meaningful skills you will need to select your path, complete your degree, and become a successful leader of educational change in the 21st century. Networking and research skills, scholarly writing, critical thinking, use of Walden resources, and the three advanced graduate paths (e.g., PhD, EdD, EdS)—this course addresses all of these in a manner that provides a solid foundation of skill sets upon which to base your journey. You will find a balance of assignments (e.g., case studies, discussions, application assignments) that will ignite your passion for learning, that will allow you to collaborate with others, and that will guide your current and future work. This course is designed to reflect Walden's social change mission and provide you with meaningful tools for success as an advanced graduate student.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8003 - Tools for Doctoral Research Success

(3 cr.)
Education professionals seeking the PhD in Education degree are required to make an original contribution to the field of education. The purpose of this course is to help educators begin that process by introducing them to the steps for developing the components of the dissertation—its timeline and available resources. Education professionals examine and analyze selected research to identify questions addressing a specific gap in the existing research literature, the framework and methodology, and other key components necessary to create scholarly research. They also explore
resources such as the Writing Center and Library, as well as specific tools they can use to complete the dissertation.

**EDPD 8004 - Demystifying Doctoral Writing for Research**

(3 cr.)
Education professionals expand their knowledge of the dissertation process by reviewing tools, resources, and sample dissertations as they focus on the alignment among the identified problem, purpose, framework, research question(s), and study design. Education professionals use tools, including the appropriate rubrics and checklists, to narrow the focus of their research topic, plan a comprehensive literature review, and begin to develop their prospectus.

**EDPD 8006 - Leading the Future of Education**

(5 cr.)
As an advanced graduate student, you are about to embark on one of the most exciting journeys of your life. This practical course provides meaningful skills you will need to select your path, complete your degree, and become a successful leader of educational change in the 21st century. Networking and research skills, scholarly writing, critical thinking, use of Walden resources, and the three advanced graduate paths (e.g., PhD, EdD, EdS)—this course addresses all of these in a manner that provides a solid foundation of skill sets upon which to base your journey. You will find a balance of assignments (e.g., case studies, discussions, application assignments) that will ignite your passion for learning, that will allow you to collaborate with others, and that will guide your current and future work. This course is designed to reflect Walden's social change mission and provide you with meaningful tools for success as an advanced graduate student.

Note: 6-week version

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**EDPD 8010 - Creativity and Innovation**

(5 cr.)
Creativity and critical thinking are driving forces behind human innovation and progress. In this course, you explore theories, models, and roles of creativity and innovation in society and learning environments. You reflect on the risks and rewards associated with creativity and critical thinking, while employing approaches for idea creation focusing on originality and inventiveness.

Prerequisites

- EDPD 8002 or EDPD 8006

Students may take this as a non-degree course, which means they do not have to be enrolled in a
EDPD 8011 - Authentic Assessment♦

(5 cr.)
Innovative learning requires creative assessment strategies to evaluate student learning within real-world and simulated environments. Through the use of reverse design, you will create authentic assessments for a learning culture that emphasizes creativity, innovation, and critical thinking. In addition, approaches for using assessment data to effect change will be explored. Methods of inquiry designed to inform and improve learning and instruction to address new trends, including the latest tools and technologies, will be examined.
Prerequisites
• EDPD 8010

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8012 - Innovative Curriculum♦

(5 cr.)
Innovative curriculum evolves and changes in anticipation of learner needs. This course will focus on research-based processes and a variety of models used to design innovative curriculum to support learning across the lifespan and within diverse contexts. Strategies for aligning strong content with formalized standards and goals within the learning environment will be explored. The contributing roles of instruction, technology, and globalization will set the context for this course of study.
Prerequisites
• RSCH 8110C

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8014 - Current Research in Learning, Instruction, and Innovation

(5 cr.)
Education professionals transition from receptive learning to productive scholarship as researchers in this course. Educators begin to build prospectuses that are organized around solid research questions, grounded in theory, that are relevant to important issues in the field, use appropriate methodology, and advance social change. The ideal time for education professionals to take this course is when they have a committee chairperson assigned and are beginning to plan their dissertation research.
Prerequisites
• RSCH 8100
EDPD 8020 - A New Vision of Organizational Research, Assessment, and Evaluation

(5 cr.)
The role of assessment and evaluation as a vehicle for positive change is recast in this course. The notion of accountability is supported by the concepts of social and ethical responsibility, and informs continual improvement efforts for individuals and organizations. Theory, trends, and systemic perspectives of the field are connected to changes required for enhancing performance and increasing effectiveness. Topics include evaluator credibility, national and international assessments and comparisons, and facilitation with individual and cultural values underpinning evaluation purposes, processes, and judgments.

Prerequisites
- EDPD 8002 or EDPD 8006

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8021 - Assessment, Evaluation, and Accountability: The Sociological, Political, and Economic Factors

(5 cr.)
At the thought-leadership level, the context of sociological, political, and economic demands are primary to understanding the purpose of assessment and evaluation. This course will focus on the decision-making models that influence assessment, evaluation, and accountability systems. Topics include political astuteness; knowledge of sociological structures, including roles, status, power, rewards, and sanctions; as well as cost-benefit analyses, responsiveness to federal/state mandates, and organizational goals and objectives.

Prerequisites
- EDPD 8020

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8022 - Assessing for Individual Growth

(5 cr.)
The value of performance assessment coupled with accountability systems can vary widely, depending on how resulting data are used to enhance learning. Students in this...
course examine the nature of personnel evaluation in multiple contexts including education, reward and acknowledgment systems, hiring, and dismissal case studies. Supporting technical skills are integrated into the course, including quantitative, qualitative, and mixed-methods of data-gathering and analysis.

**Prerequisites**
- RSCH 8110C

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EDPD 8023 - Evaluating and Improving Programs, Organizations, and Systems**

(5 cr.)
Determining comprehensive value and worth of a curriculum, project, instructional method, institution, or policy is a complex endeavor. This course examines the process of determining the value, purpose, efficacy, and social implications for programs, organizations, and systems within a framework for continuous improvement. Supporting technical skills are integrated into the course, including quantitative, qualitative, and mixed-methods of data-gathering and analysis.

**Prerequisites**
- EDPD 8022

**EDPD 8024 - Dynamics of Communication for Impact and Results**

(5 cr.)
Finesse and skill are needed to communicate complex information and findings from data analysis to particular stakeholders in ways that convey understanding, impart meaning, and stimulate a call to action. Students in this course focus on how to report results, consequences, options, and recommendations in compelling ways for multiple audiences. A wide variety of communication methods are explored that include presentation technology, Internet communications, technical writing, writing for publication, press releases, grant writing, and collaborative communication. Data compression is practiced as part of the communication and recommendation process.

**EDPD 8025 - Building a Culture of Continuous Improvement**

(5 cr.)
Continuous improvement is a phrase that is applied in both business and educational settings. Operationalized, the term crosses fields that include leadership, organizational development, change theory, and evaluation and assessment. This course connects continuous improvement as referenced in these fields and moves beyond to include organizational culture, professionalism, social justice, and codes of ethics that support the formation and sustainability of this type of culture. The culminating project provides
a platform for individualizing a plan with a self-chosen organization that incorporates evaluation, assessment, and a vision for social responsibility as part of creating a culture of continuous improvement.

Prerequisites
• RSCH 8310C

EDPD 8030 - Higher Education in the 21st Century♦

(5 cr.)
Higher education is in a period of review as it responds to global issues and often shrinking resources. This course provides educational professionals with a foundational understanding of higher education and the origins of practices and problems of educational institutions. Educational professionals investigate solutions to today's higher education issues and assess the relevance of current education models in relation to 21st-century needs.

Prerequisites
• EDPD 8002 or EDPD 8006

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8031 - Leading and Managing Instructional Change♦

(5 cr.)
The politics of education come into play as leaders work to implement innovation and change within higher education organizations. Issues such as access, funding, speed of change, priorities of diverse stakeholders, the relation of work to education, the impact of technological change, and mobility of students are examined. Leaders examine change theory. Educational professionals investigate how internal and external forces impact change and consider the global challenges in leading and managing change.

Prerequisites
• EDPD 8030

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8032 - Strategic Planning and Program Evaluation in Higher Education♦

(5 cr.)
Effective leaders are expected to be creative, out-of-the-box thinkers, able to anticipate and react quickly to the ever-changing landscape of higher education. Strategic planning and program evaluation are necessary components for leading and managing successful higher education institutions. Principles of effective change process are emphasized from
both the macro- and micro-level perspectives. Developing collaborative educators in the evaluation and transformational process of strategic planning is a key objective of this course, with emphasis on in-depth analysis of the paradigms, processes, and components of change.

**Prerequisites**
- RSCH 8110C

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EDPD 8033 - The Politics of Higher Education: Policy Development and Implementation**

(5 cr.)
This course is an introduction to the higher education politics and the policy-making process. In this course, education professionals survey the general nature of policy making with examples and readings from higher education. Key stakeholders, institutional structures, and processes in the federal, state, and local higher education policy arenas will be studied. The origins and consequences of key policy enactments affecting college access and success, instruction, performance accountability, and the economic development role of higher education are studied through scenarios and case studies.

**Prerequisites**
- EDPD 8032

**EDPD 8034 - International Education and Development**

(5 cr.)
In this course, education professionals examine theoretical approaches to the study of international education and the policy development of current topics in diverse global settings. Both case studies and practice blend in this course to prepare students to operate in the global education phenomena. Among the topics to be explored are international policy transfer, social stratification, the cultural transmission of knowledge, and the place of education in the global economy.

**Prerequisites**
- RSCH 8210C

**EDPD 8040 - Governance and Politics of Education**

(5 cr.)
In this course, education professionals develop an understanding of the political forces that shape the educational process. They engage in coursework that emphasizes
governance structures and the influences of federal, state, and local policies and decisions. They also discuss contemporary research on political power in decision-making and the role of educational leaders and managers in P–20 institutions.

Prerequisites
- EDPD 8002 or EDPD 8006

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8041 - The Economics of Education♦

(5 cr.)
Education is a critical component of individual economic success, and the P–20 education sector is a key contributor to the stability of local, state, national, and global economies. Addressing challenges related to these key ideas, education professionals in this course explore the financing and provision of education. They apply economic principles and econometrics to their understanding of educational practices and policies. They also identify research to create opportunities for improved efficiency and quality of education.

Prerequisites
- EDPD 8040

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8042 - Education Law, Policy, and Governance♦

(5 cr.)
In this course, education professionals examine legal and ethical issues within the context of an educational setting. Supporting development of their legal reasoning skills, education professionals discuss the laws and statutes that inform policy and governance of educational organizations. They also engage in assignments that emphasize the ways ethics affect decision making, professional conduct, and educational policies when analyzing critical issues in educational leadership.

Prerequisites
- EDPD 8030 or RSCH 8310C

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8043 - Policy Development and Implementation

(5 cr.)
Education policy is crucial to educational improvement and renewal throughout the P–
20 system of education. In this course, education professionals develop the skills for critical analysis of education policy at the local, state, national, and international levels. They discuss the definition and formulation of policies and they explore a wide range of topics, including the identification of and work with policy advocates, the processes of policy implementation and evaluation, and the use of logic models in the policy process.

Prerequisites
- EDPD 8044

EDPD 8044 - Leadership and Management for Change in Education

(5 cr.)
Building on the core knowledge from earlier courses, students will engage the emerging theories of leadership that reflect the current challenges in culturally responsive education, and the research on motivation and performance. The focus is on entrepreneurial and creative solutions, which reach across P–20 learning organizations to effect positive social change in education.

Prerequisites
- EDPD 8082 or EDPD 8040 or RSCH 8110C

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist (1-866-492-5336 (U.S.); 1-443-627-7222 (toll]] for more information.

EDPD 8045 - Capacity, Capability, and Sustainability

(5 cr.)
Students explore strategies to build capacity and commitment in P–20 education processes, within the context of their role as scholar-practitioners. The focus is on leadership and management for sustainable practices and policies that renew and re-energize the educational process. Included are topics that focus on group processes, grant-writing, planning models, readiness factors, implementation concerns and policies, and institutionalization issues.

Prerequisites
- RSCH 8210C

EDPD 8046 - P–20 Education Law, Policy, and Governance

(5 cr.)
In this course, education professionals examine legal and ethical issues within the context of a P–20 educational setting. Supporting development of their legal reasoning skills, education professionals discuss the laws and statutes that inform the operation of educational organizations. They also engage in assignments that emphasize the ways ethics affect decision-making, professional conduct, and educational policies when
analyzing critical issues in educational leadership.

Prerequisites
- EDPD 8082 or EDPD 8040 or RSCH 8310C

EDPD 8050 - Curriculum, Instruction, and Assessment: A Systems Perspective

(5 cr.)
Today's schools are dynamic organizations that require educators to take an iterative approach to designing curriculum, instruction, and assessment—one that responds to changing and diverse student needs, stakeholder perspectives, policies, accountability requirements, emerging technologies, family and community resources, and other internal and external forces. In this course, education professionals engage in active inquiry at the systems level and address real-world scenarios and problems. Educators can gain experience and expertise in promoting best practices in education, overcoming barriers to student learning, and involving family and community partners, all while meeting and complying with relevant policies, laws, ethical practices, and standards. Education professionals explore key components of a successful learning community, the role of a leader within a dynamic system, professional dispositions, current educational trends and issues, and how technologies are creating new opportunities for organizational change and improved student performance.

Prerequisites
- EDPD 8002 or EDPD 8006

EDPD 8051 - Data-Driven Instruction and Assessment

(5 cr.)
Using data to inform instruction, assessment, and evaluation promotes continuous improvement and student achievement. Instructional leaders must have the ability to ground current practice in data—a process that includes reviewing and discerning data, evaluating current practices, setting an appropriate vision for the future, prioritizing the work, identifying measurable goals, developing an action plan, and then monitoring the results. Education professionals in this course examine the inextricable link between instruction and assessment. They engage in a diagnostic process designed to meet diverse student and systemic needs. They also examine the role of formative and summative assessments in making instructional decisions, the various forms and purposes of assessment, and how the ongoing use of assessment data can move curriculum and instruction beyond mediocrity to support rigorous learning for all students. The effective use of instructional practices such as blended learning, the "flipped" classroom, and the appropriate use of technology to support learning is also examined.

Prerequisites
- EDPD 8050
EDPD 8052 - Evaluating Curriculum to Promote Positive Social Change

(5 cr.)
Evaluating and designing curriculum to promote positive social change requires a broad understanding of the philosophy, concerns, data, and current practices within the entire school environment. In this course, education professionals examine what it means to provide a transformative experience for students while creating conditions that facilitate deep learning. Education professionals will review and evaluate various curriculum approaches; examine the alignment of content standards; and consider the role of collaboration, community building, and power sharing to foster learner autonomy and meet the needs of an ever-increasing diverse student population. Through authentic case-study scenarios, education professionals are provided with opportunities to see the impact of curriculum design in practice. The application of a learner-centered approach to existing practice, as well as any recommendations and modifications to curriculum, learning spaces and technology, assessment, and the delivery of instruction will be applied to more effectively accommodate multiple learning needs and promote positive social change.

Prerequisites
- EDPD 8082 or EDPD 8040

 Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8053 - Program Evaluation for Continuous Improvement

(5 cr.)
Effective educational leaders must have the knowledge, skills, and dispositions to accurately and effectively evaluate programs that lead to making data-driven decisions and promote continuous improvement for all learners. In this course, education professionals use available data points and tools to evaluate the design, implementation, and program outcomes to determine a program’s impact on the learner, family, and community. The results of the program evaluation guide education professionals to develop action plans that may include the development of community outreach programs, grants, legislation/policy reform, professional development plans, or technology solutions. Through this course, education professionals build decision-making skills as they must determine whether to recommend an improvement plan of an existing program or propose a new program or initiative.

Prerequisites
- EDPD 8082 or EDPD 8040
EDPD 8054 - Examining Current Practices in Curriculum, Instruction, Assessment, and Evaluation

(5 cr.)
Effective educational leaders are well-versed in current practices of learner-centered teaching and effective learner-centered curriculum design. In this course, educators are provided with a forum for conducting and sharing in-depth content research, sharpening their doctoral-level skills, and discovering best practices and current trends for promoting effective curricular design and evaluation in the content areas. Educators are grouped by interest area and have the opportunity to collaborate with colleagues to build their content knowledge and guide their research interests. By conducting scholarly searches, evaluating dissertation and project study abstracts, and creating effective annotated bibliographies, educators will prepare for their own doctoral research and capstone project.
Prerequisites
• RSCH 8210C

EDPD 8055 - Research Development and Strategic Planning

(5 cr.)
In this course, educators examine and explore research methodologies important and unique to the field of curriculum, instruction, assessment, and evaluation. Education professionals develop skills in strategic planning; begin to align their interest area to appropriate research and evaluation methods, and select and gather appropriate methodological resources to support their interest area research. A goal of this course is for educators to delineate appropriate research-based methodologies that may apply to an area of interest for their capstone projects.
Prerequisites
• RSCH 8310C

EDPD 8060 - Issues and Trends in Reading and Literacy

(5 cr.)
Literacy may be understood in multiple ways across various settings and populations. This course is designed to lay a foundation for educators to define literacy based on historical and contemporary perspectives, sociopolitical landscape, the influence of social media and technological innovation, and influences coming from all national, state, local, and Common Core standards that influence literacy programs in P–12. Barriers to student literacy learning and ways to engage community and family involvement, as well as increasing communication, will be examined. Based on their learning in this course and drawing on professional reading and curriculum standards, education professionals will develop a plan to gain stakeholder support for improvement of curriculum and
literacy programming at the systems level.

Prerequisites
- EDPD 8002 or EDPD 8006

EDPD 8061 - Assessment and Data Analysis to Support Effective Literacy Programs

(5 cr.)
Designing literacy programs that effectively promote and support high levels of literacy proficiency requires the use of data that accurately describe the status of student, teacher, and school performance. Education professionals in this course will examine a variety of assessment tools and validity issues for addressing individual and classroom needs as well as district and state mandates. Topics include a focus on data analysis for tiered intervention decision making and the interpretation of data to drive recommendations at a systemic level. Skills of collaboration and stakeholder inclusion are examined.

Prerequisites
- EDPD 8060

EDPD 8062 - A Collaborative Approach to Literacy Across the Content Areas

(5 cr.)
Making academic content accessible and comprehensible for all learners requires specific strategies P–12 teachers need to know and be able to demonstrate. By focusing on academic language, content acquisition, and the appropriate use of technology, education professionals add to their repertoire of strategies to meet content standards for all students, including those with diverse needs, learning styles, and abilities. Education professionals will plan ways to collaborate and share knowledge with other educators within their professional setting and review and evaluate research to inform effective practices. Also addressed in this course are ways to develop programs that integrate both content and literacy objectives to better enhance the development of all learners throughout the content areas.

Prerequisites
- RSCH 8110C

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist (1-866-492-5336 (U.S.); 1-443-627-7222 (toll)) for more information.

EDPD 8063 - Reading Research Design: Analysis and Evaluation

(5 cr.)
Reading and literacy instructors use research in a variety of ways to improve schools,
student performance, and their own professional development and skills. In this course, education professionals will analyze and evaluate past and present research trends in literacy. They will study how to address relevant literacy issues and problems, become involved in collaborative inquiry, use data and research to inform their practice, improve student academic success, and contribute to positive social change in their classroom and school environments. Reading and literacy instructors will engage in effective communication of research for decision making in literacy at the program level and evaluate reflective practices as they analyze student reading research data and develop and implement data-informed decisions/actions to improve student learning and enhance professional growth.

Prerequisites
- EDPD 8062

EDPD 8064 - Literacy Interventions for Culturally and Linguistically Diverse Populations

(5 cr.)
Effective literacy instruction builds upon the cultural and linguistic backgrounds, ways of making meaning, and prior knowledge that all children bring to the classroom. For instruction to be successful, educators must spend time developing their understanding of literacy instruction as well as their awareness of their students' cultures, backgrounds, and experiences. Teachers can develop this understanding and awareness by acquiring specific knowledge bases relating to teaching in diverse classrooms. Through real-world scenarios and applications, educators will apply strategies and evaluate reading and literacy programs to meet the diverse needs of all learners enabling educators to demonstrate an awareness of students' prior learning, language, culture, family, and community values to improve teaching and learning in the area of literacy. Educators will analyze literacy theories and assess strategies for promoting equitable access to high-quality learning experiences while recognizing their own personal beliefs and biases. For instruction to be successful, educators must spend time developing their understanding of literacy instruction as well as their awareness of their students' cultures, backgrounds, and experiences.

Prerequisites
- RSCH 8210C

EDPD 8065 - Comprehensive Literacy Model for Student Improvement

(5 cr.)
Monitoring a school reading and literacy program is a systematic process of examining students' reading progress and one's instructional strategies to improve students' reading achievement. Continuous monitoring is an integral part of an effective literacy program because it enables educators to determine the most effective strategies for
teaching reading. Education professionals will analyze a variety of literacy models to determine which models best meet the needs of specific learners, families, and communities. In this course, literacy leaders will complete a literacy program evaluation and make research-based recommendations to the existing comprehensive literacy plan to include community outreach programs, professional development plans, technology solutions, grants, and/or legislation/policy reform.

Prerequisites
- RSCH 8310C

EDPD 8070 - Special Education: Exploring Theory and Practice

(5 cr.)
Special education is a dynamic field with a growing research base of best practices and changing implementation efforts for students who demonstrate a broad spectrum of adaptive and learning challenges. Special education professionals in this course explore how theoretical research in the field evolved and influenced emerging and prevalent practices in the field. Through the realistic lens of a case study, candidates will explore a range of research topics as well as investigate how research has influenced practice. Through their coursework, educators are supported in the development of skills and dispositions that will assist candidates as they envision and influence the future of special education.

Prerequisites
- EDPD 8002 or EDPD 8006

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8071 - Leading Change in Special Education: Advocacy, Policy, and Law

(5 cr.)
Leadership and advocacy go hand-in-hand when seeking to promote policies that support effective practices in education for ALL students. Through analysis and reflection, candidates can examine the evolution of special education legislation and pivotal case law and can analyze the connections among advocacy, leadership, policy, and law as it plays out in realistic scenarios. Special education professionals will also investigate change theory and leadership styles, allowing them to reflect on their own and others' paradigms in order to determine best practices to promote positive educational and social changes. They must apply leadership, advocacy, self-evaluation, and social change skill sets to current practice as they will be called upon to do in future careers. Candidates can also engage in a culminating project through which they construct a professional plan for advocacy and leadership in an area of interest that includes issues of diversity and special needs.

Prerequisites
• RSCH 8110C

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8072 - Assessment and Evaluation to Facilitate Healthy Development and Learning For All Children, Birth Through 8

(5 cr.)
To lead assessment and evaluation practices effectively for all children, birth through age 8, education professionals must be able to analyze and implement current research and practices to evaluate the effectiveness of early intervention assessment and evaluation models. Education professionals explore various types of assessment practices (i.e., formative, summative, formal, and informal assessment) as well as evaluate how they use data from these assessments to promote development, guide teaching, and monitor progress. Through an in-depth analysis of Part C regulations (birth to 3 years) and Part B requirements (3–21 years), a particular focus will be placed on assessing and evaluating children who come from cultural and linguistic diverse backgrounds as well as other external factors that need to be considered when working with children. As leaders in the field, education professionals reflect upon research and practice to foster collaborative partnerships with families and other professionals to positively influence the development of every child.
Prerequisites
• EDPD 8071

EDPD 8073 - Research Methodology: Evaluating Evidence-Based Practices in Early Childhood Special Education

(5 cr.)
Effective special education leaders must be able to reflect upon and transform research to implement effective evidence-based practices in early childhood special education. The focus is placed on practices that involve emotional, social, and behavioral strategies as well as literacy instruction. Special emphasis is given to the use of technology practices to facilitate assessment, evaluation, instruction, and professional development. Education professionals reflect on research involving culturally responsive teaching, inclusion, and family involvement. Particular attention is given to single-subject research designs that are used to study behavioral change in individuals or small groups as a result of an intervention. Topics include reliable measurement, repeated measurement, description of conditions, baseline and treatment conditions, and single-variable rules.
Prerequisites
• RSCH 8210C
EDPD 8074 - Evaluating and Sustaining Effective Practices in Early Childhood Special Education

(5 cr.)
Effectively early childhood special education leaders promote meaningful change for children with exceptionalities, foster the use of effective evidence-based practices, and sustain long-term program viability throughout diverse settings. Once effective practices are in place, they establish a clear plan for addressing program integrity and sustaining commitment to continuous improvement. Leaders need to facilitate the process of evaluating, modifying, and sustaining these effective practices. Throughout this course, education professionals examine critical components to sustain change including program evaluation, professionalism, culturally responsive practices, effective ways to work with families, and collaboration to support continuous improvement in early childhood settings.
Prerequisites
- RSCH 8310C

EDPD 8080 - Child Development in the Critical Early Years♦

(5 cr.)
Effective early childhood professionals know that respectful relationships with families provide the foundation for supporting young children’s healthy development. Candidates examine key developmental stages, from prenatal experiences to the early school years. Education professionals explore child development theory, current research in neuroscience, and social-emotional development across the early childhood years, with a special emphasis on the significant role families play in fostering healthy development. Current thinking from the fields of psychology, science, and education are integrated with global perspectives on child development. Candidates apply their knowledge to promote positive developmental outcomes for young children and their families.
Prerequisites
- EDPD 8002 or EDPD 8006

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8081 - The Language/Literacy Continuum From Birth Through Age 8♦

(5 cr.)
How does language affect the young child’s ability to think, communicate, and learn? In this course, educators explore the language and linguistic development of young children. Education professionals focus on theories of language acquisition, the nature and function of language, the relationship between language and cognition, the developmental stages of language and literacy, and the critical role of families,
communities, and educators in fostering language and literacy development from birth through age 8. Education professionals examine current research and ways early childhood professionals can support language and literacy learning for all children across the early childhood spectrum.

Prerequisites
- EDPD 8080

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8082 - Meaningful Learning Experiences in Supportive Environments

(5 cr.)
What does excellence look like in early childhood settings? What are varying perspectives on excellence in early childhood education throughout the world? What are the common elements of learning experiences and environments that provide meaning, inspire curiosity, offer safety, and encourage children to thrive? By examining the research, candidates explore current issues and trends in early childhood education such as the inclusion of national standards, project-based learning, looping, technology, and the role of play in fostering healthy development and learning. Education professionals also explore the role of families in supporting children’s learning at home and in early childhood settings as well as how to build effective partnerships with families.

Prerequisites
- EDPD 8002 or EDPD 8006

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8083 - Evaluating and Leading Effective Early Childhood Programs

(5 cr.)
What are the dispositions and responsibilities needed to be an effective professional in the early childhood field? Researchers indicate that high-quality early childhood programs result in long-term positive outcomes for children. Based on this understanding, education professionals use accreditation standards and knowledge of research-based effective practices to evaluate the effectiveness of early childhood programs. Education professionals explore multiple leadership roles in the early childhood field, analyze leadership qualities and traits, and reflect on professional growth. Specific focus is placed on effective practice related to management policies and procedures, teacher qualifications, family engagement, and community involvement.

Prerequisites
- EDPD 8082
EDPD 8084 - Early Childhood Advocacy, Policy Development, and Positive Social Change

(5 cr.)
Early childhood leaders exemplify the values and ethics of the field, act as advocates for children and families, and lead initiatives to improve policy and affect positive social change. In this course, education professionals review the history of early childhood policy changes as well as the origin of policy reform. Education professionals study the effects of global advocates and review advocacy strategies. Through the use of research, education professionals explore opportunities to become advocates in the field. They are challenged to be innovative and transformative future thinkers who are deeply committed to the well-being of young children and families.
Prerequisites
- RSCH 8210C

EDPD 8085 - Early Childhood Research Methodology

(5 cr.)
In this course, early childhood professionals examine research methodologies conducted frequently in early childhood. Particular attention is given to studies based on young children, especially those who cannot communicate. Education professionals read current research studies and dissertations to analyze methodology, paying particular attention to reliability and validity. They have the opportunity to apply the concepts studied in the course to the specific scenarios and their personal topics of interest. By the end of this course, education professionals will begin to delineate various early childhood research-based methodologies that may apply to an area of interest for their dissertations.
Prerequisites
- RSCH 8310C

EDPD 8090 - Trends and Issues in Educational Technology

(5 cr.)
Using new technologies in new ways sparks learning, creativity, and innovation. Trends and issues in educational technology are examined to discover how they influence learning and creativity in the workplace. Learners collaborate to demonstrate the evolution of a current technological trend, analyze its impact on learning and society, and evaluate the societal issues and problems caused by that trend.
Prerequisites
- EDPD 8002 or EDPD 8006

*Students may take this as a non-degree course, which means they do not have to be enrolled in a
EDPD 8091 - Creating Digital Media

(5 cr.)
The effective use of digital media in learning environments requires leaders in the field to be both consumers and creators of multimedia. Learners become knowledgeable developers of digital media by applying principles of instructional design and pedagogy to multimedia. Learners collaborate in the design and creation of digital and interactive media based on visual design principles.

Prerequisites
- RSCH 8110C

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8092 - Emerging and Future Technologies

(5 cr.)
The emergence of new technologies in the information age and beyond is dramatically changing the way people teach and learn in K–12 education, higher education, and corporations. Education professionals in this course explore new scholarship, collaborative tools, social networking, wireless and mobile technologies, creative commons, fair use, user-created content, and virtual worlds to become leaders in helping to diffuse these innovations. They also engage in a multimedia presentation to analyze obsolete technology, assess new technology, and explore projections regarding future technological movements. Through this project, education professionals are better able to conceive a world where technology is a seamless aspect of learning and work.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDPD 8093 - Leading Change

(5 cr.)
Education professionals explore topics related to leading change in an organizational setting. Human performance concerns are examined utilizing a variety of leadership approaches. Learners identify a performance gap, develop interventions, consider social change issues, and design assessments in order to develop a plan for improving performance.

Prerequisites
- EDPD 8012
EDPD 8094 - eLearning

(5 cr.)
Learners explore the theories, paradigms, trends, and issues in the field of eLearning. Research on eLearning is critiqued and analyzed as an ecosystem including an examination of K–12, higher education, corporate, and personal learning communities. Current social and geopolitical trends and their impact on eLearning are analyzed. Delivery methods, human presence, and sustainability of eLearning design are investigated. This course provides learners design and development experience through the creation of multimedia presentations in an eLearning environment.
Prerequisites
- RSCH 8210C

EDPD 8097 - Designing Instruction for eLearning

(5 cr.)
Instructional design for eLearning involves understanding effective learning experiences in digital spaces. Learners apply the principles of the community of inquiry and the engagement of the digital learner as they design an eLearning course. Mobile technologies, collaborative learning, authentic assessment, academic integrity, and meeting the needs of diverse and global students are addressed. Learners collaborate in the design and development of eLearning products and explore social change through eLearning.
Prerequisites
- EDPD 8192 or RSCH 8310C

EDPD 8098 - Current Research in Educational Technology

(5 cr.)
Learners transition from receptive learning to productive scholarship as researchers in educational technology. Learners begin to build prospectuses that are organized around solid research questions grounded in theory that are relevant to important issues in the field, use appropriate methodology, and advance social change. The ideal time to take this course is when learners have a committee chair and are beginning to plan their dissertation research.

EDPD 8113 - Tools for Doctoral Research Success

(3 cr.)
Education professionals seeking the PhD in Education degree are required to make an original contribution to the field of education. The purpose of this course is to help educators begin that process by introducing them to the steps for developing the components of the dissertation—its timeline and available resources. Education
professionals examine and analyze selected research to identify questions addressing a specific gap in the existing research literature, the framework and methodology, and other key components necessary to create scholarly research. They also explore resources such as the Writing Center and library, as well as specific tools they can use to complete the dissertation.

Prerequisites
- RSCH 8110C

**EDPD 8114 - Demystifying Doctoral Writing for Research**

(3 cr.)

Education professionals expand their knowledge of the dissertation process by reviewing tools, resources, and sample dissertations as they focus on the alignment among the identified problem, purpose, framework, research question(s), and study design. Education professionals use tools, including the appropriate rubrics and checklists, to narrow the focus of their research topic, plan a comprehensive literature review, and begin to develop their prospectus.

Prerequisites

Prerequisites may be taken concurrently.
- RESI 8402 or RESI 8402A
- RSCH 8210C or RSCH 8200C or RSCH 8210D or RSCH 8200D or RSCH 8201D
- RSCH 8310C or RSCH 8300 or RSCH 8300D or RSCH 8301N or RSCH 8310D or RSCH 8310F or RSCH 8310U

**EDPD 8192 - Innovations and the Diffusion of Learning Technologies**

(3 cr.)

Social change resulting from the integration and adoption of technological innovations is the focus of this course. Learners explore Rogers' Diffusion of Innovations Theory through first-hand experience in a simulation. Learners explore research regarding the integration of technology in the workplace or education setting to determine strategies for becoming catalysts for change. Strategies for overcoming resistance and barriers to change are analyzed.

Prerequisites
- EDPD 8091 or RSCH 8210C

**EDPD 8900 - Completing the Prospectus**

(2 cr.)

Educators in nearly all doctoral-level programs are required to complete dissertation
projects that necessitate requisite knowledge of conducting research, including the development of an appropriate research plan. In this course, education professionals utilize knowledge from previous courses to develop their prospectus—a brief document that provides preliminary information about their dissertation research to serve as a plan for developing the research proposal. They engage in a logical progression from topic conception to prospectus completion. They take their individualized topic and identify the research problem, purpose of their study, theoretical or conceptual framework, and appropriate research design, while also examining the concepts of feasibility and overall alignment of study components. Education professionals will practice evaluating their work using the same checklists and rubrics used by faculty.

**EDPD 8910 - Writing a Quality Prospectus**

(5 cr.)
Educators in nearly all doctoral-level programs are required to complete dissertation projects that necessitate requisite knowledge of conducting research, including the development of an appropriate research plan. In this course, education professionals utilize knowledge from previous courses to develop their prospectus—a brief document that provides preliminary information about their dissertation research to serve as a plan for developing the research proposal. They engage in a logical progression from topic conception to prospectus completion. They take their individualized topic and identify the research problem, purpose of their study, theoretical or conceptual framework, and appropriate research design, while also examining the concepts of feasibility and overall alignment of study components.

**Prerequisites**
- RESI 8403
- RSCH 8310C

**EDPD 8990 - Completing the Dissertation**

(5 cr. per term for a minimum of 4 quarters until completion)
Education professionals in nearly all doctoral-level programs are required to complete dissertation projects that necessitate independent application of requisite knowledge by conducting research based on close interaction with, guidance from, and supervision by an institution-approved dissertation committee. Students in each PhD program specialization are supported in the completion of their doctoral dissertation in this course. The PhD dissertation process is composed of several stages and requires levels of approval: prospectus, proposal, Institutional Review Board (IRB), Form and Style, abstract by Chief Academic Officer (CAO), and the final study. Education professionals develop and support a doctoral-level research problem and review related literature to develop a framework for their study. They move from a research problem to the purpose of the study, the framework, and then an appropriate design while examining the concepts of feasibility and overall alignment of study components. Education
professionals consider ethical feasibility issues as related to their dissertation development and proceed to data collection and analysis. They conduct an oral defense, appropriately presenting results and outcomes of the research, as well as implications for positive social change, a Walden hallmark.

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

EDSD 7002 - Leading the Future of Education

(5 cr.)
As an advanced graduate student, you are about to embark on one of the most exciting journeys of your life. This practical course provides meaningful skills you will need to select your path, complete your degree, and become a successful leader of educational change in the 21st century. Networking and research skills, scholarly writing, critical thinking, use of Walden resources, and the three advanced graduate paths (e.g., PhD, EdD, EdS)—this course addresses all of these in a manner that provides a solid foundation of skill sets upon which to base your journey. You will find a balance of assignments (e.g., case studies, discussions, application assignments) that will ignite your passion for learning, allow you to collaborate with others, and guide your current and future work. This course is designed to reflect Walden's social change mission and provide you with meaningful tools for success as an advanced graduate student.

EDSD 7006 - Leading the Future of Education♦

(5 cr.)
As an advanced graduate student, you are about to embark on one of the most exciting journeys of your life. This practical course provides meaningful skills you will need to select your path, complete your degree, and become a successful leader of educational change in the 21st century. Networking and research skills, scholarly writing, critical thinking, use of Walden resources, and the three advanced graduate paths (e.g., PhD, EdD, EdS)—this course addresses all of these in a manner that provides a solid foundation of skill sets upon which to base your journey. You will find a balance of assignments (e.g., case studies, discussions, application assignments) that will ignite your passion for learning, allow you to collaborate with others, and guide your current and future work. This course is designed to reflect Walden's social change mission and provide you with meaningful tools for success as an advanced graduate student.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
EDSD 7010 - Collaborative Communication for Administrators♦

(5 cr.)
Effective education leaders work to foster a community of collaboration in which all stakeholders strive to develop a shared understanding of and commitment to making sure that every student learns and succeeds. Education professionals in this course explore the characteristics of effective collaborative leaders, including the ability to foster collaborative problem solving and decision making. They learn how to model open and responsive communication as well as how to use tools to ensure that such collaboration is the common process within the school and throughout the school community. They also explore the role of schools in communicating with and drawing upon community resources of various types, including public agencies and organizations that serve youth and families. Through this course, education professionals work toward establishing the personal, ethical, and moral platforms to become effective leaders who model and promote ethical and productive civic behavior. Education professionals will develop and refine their skills as collaborative leaders in the school community.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDSD 7011 - School Organizational Dynamics: Policies and Law♦

(5 cr.)
Educators in this course study selected general legal principles, case and statute law, and law-making agencies that impact leaders and their educational institutions. Key content areas include but are not limited to the legal status of the local school district; the role of federal, state, and local governments that may apply; governance of schools; and policies, rules, and regulations. Education professionals in the course will also cover and develop a practical understanding of the legal rights, responsibilities, and obligations of administrators, teachers, students, parents, and school boards; community education; civil rights; collective bargaining, torts and contracts, and legal research; as well as the development of policy to meet regulations and other provisions. School administrators have an opportunity to become more knowledgeable about finding resources to help them address legal matters as they evolve. Educators will gain the basic knowledge to help develop policy statements as related to their school and to the district as a whole.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDSD 7012 - Understanding School Budgets and Allocating Resources♦

(5 cr.)
Research on effective schools provides guidance on the most productive ways to
organize time, people, money, technology, and other resources. To use these resources most effectively, leaders need to have a strategy that defines the most important priorities, the overall educational design, and the organizational structures that best match the necessary goals for improvement. Education professionals will study and interpret budget documents as they relate to the district at large and then to their portion of the budget as a school. Education leaders will research about writing and seeking grants to enhance a school's or district's options to improve student learning. Effective leaders need to be able to link whole-school strategic plans to effective instructional practices and improved use of time and money. Education leaders must focus on school improvement, improving teaching quality, and organizing and allocating staff and other resources in the most effective way to continuously improve student performance.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist (1-866-492-5336 (U.S.); 1-443-627-7222 (toll)) for more information.

EDSD 7013 - Creating and Maintaining Safe, Effective, and Positive Learning Environments

(5 cr.)
Effective education leaders demonstrate and collaboratively develop capabilities to foster cultures for learning based on mutual respect among students, teachers, staff, parents, and the larger community. Strategies for fairly and effectively administering discipline and resolving conflict are addressed. This course is intended to help leaders understand and treat individual and group differences and potential conflict as opportunities for developing the dispositions, knowledge, and skills that result in social competencies essential to civic participation and interpersonal effectiveness in school and beyond. Education leaders will leave with the knowledge gained from a better understanding of how to address disruptive student behavior and how to deescalate conversations as well as confrontations that are an everyday reality in the school setting. Leaders will also study issues related to safety and violence in schools, considering both methods of prevention and ways to respond to unsafe and violent situations. They can learn how to call upon district and community resources to preserve safety and well-being of the school's population of students and personnel.

EDSD 7014 - Recruiting and Retaining Effective School Personnel

(5 cr.)
Education leaders study human resources policies and practices for recruiting, selecting, hiring, inducting, developing, evaluating, and retaining or dismissing school personnel. Identifying teachers' needs for professional growth is important, but leaders must also ensure that teachers have the opportunity and motivation to use their professional expertise and to participate in ongoing substantial professional development focused on enhancing the learning of every student. Education leaders have the opportunity to
evaluate school personnel and ensure teachers are utilized in their areas of strength within the school, and that teachers also receive support and training in any needed areas to promote student learning. They can become knowledgeable about how to hire and retain their novice teachers in order to reduce teacher turnover. As well, school leaders must be able to identify characteristics of productive teacher evaluation processes and programs; distinguish between supervising teaching and supervising learning; and utilize a process and structure for evaluating school personnel that is productive and supportive, motivates improvement, results in retention of highly competent staff members, embodies standards of due process, and takes into account the provisions of the contractual agreements for staff.

EDSD 7040 - The Community College—Historical Context and Critical Issues

(5 cr.)
The rise of community colleges following World War II added a new egalitarian dimension to higher education. In this course, educators explore how the various components of the community college history and mission changed the face of postsecondary education, giving rise to workforce development, developmental education, and continuing education, in addition to academic transfer programs. Best practices for governance of community colleges as well as contemporary issues such as the completion agenda, dual-credit courses for high school students, and articulations with 4-year institutions are explored.

EDSD 7044 - Leadership and Management for Change in Education

(5 cr.)
Building on the core knowledge from earlier courses, students will engage the emerging theories of leadership that reflect the current challenges in culturally responsive education, and the research on motivation and performance. The focus is on entrepreneurial and creative solutions, which reach across P–20 learning organizations to effect positive social change in education.

EDSD 7050 - Curriculum, Instruction, and Assessment: A Systems Perspective

(5 cr.)
Today's schools are dynamic organizations that require educators to take an iterative approach to designing curriculum, instruction, and assessment—one that responds to changing and diverse student needs, stakeholder perspectives, policies, accountability requirements, emerging technologies, family and community resources, and other internal and external forces. In this course, education professionals engage in active inquiry at the systems level and address real-world scenarios and problems. Learners can gain experience and expertise in promoting best practices in education, overcoming barriers to student learning and involving family and community partners, all while meeting and complying with relevant policies, laws, ethical practices, and standards.
Education professionals explore key components of a successful learning community, the role of a leader within a dynamic system, professional dispositions, current educational trends and issues, and how technologies are creating new opportunities for organizational change and improved student performance.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EDSD 7051 - Data-Driven Instruction and Assessment**

(5 cr.)
Using data to inform instruction, assessment, and evaluation promotes continuous improvement and student achievement. Instructional leaders must have the ability to ground current practice in data—a process that includes reviewing and discerning data, evaluating current practices, setting an appropriate vision for the future, prioritizing the work, identifying measurable goals, developing an action plan, and then monitoring the results. Education professionals in this course examine the inextricable link between instruction and assessment. They engage in a diagnostic process designed to meet diverse student and systemic needs. They also examine the role of formative and summative assessments in making instructional decisions, the various forms and purposes of assessment, and how the ongoing use of assessment data can move curriculum and instruction beyond mediocrity to support rigorous learning for all students. The effective use of instructional practices such as blended learning, the "flipped" classroom, and the appropriate use of technology to support learning is also examined.

**EDSD 7052 - Curriculum Design to Promote Social Change**

(5 cr.)
Meaningful and engaging learning occurs when curriculum extends beyond the classroom to promote a climate for social change. In this course, education professionals will use a documentary case scenario to evaluate the use of service learning as a tool for connecting the curriculum to real-world experiences, while also supporting the community and its citizens. Educators will select an appropriate learner-centered curriculum model, design an interdisciplinary service project, and prepare a presentation for stakeholders' consideration, illustrating the potential of service learning as a catalyst for bringing a learner-centered curriculum, citizenship, and standards to life.

**EDSD 7060 - Issues and Trends in Reading and Literacy**

(5 cr.)
Literacy may be understood in multiple ways across various settings and populations. In this course, a foundation will be laid for educators to define literacy based on historical and contemporary perspectives, the sociopolitical landscape, the influence of social media and technological innovation, and influences coming from national, state, local,
and Common Core standards. Educators will examine ways to overcome barriers to student literacy learning and develop techniques to improve communication and increase community and family involvement. Based on what they learn in this course and drawing on professional reading and curriculum standards, education professionals will develop a plan to gain stakeholder support for the improvement of curriculum and literacy programming at the systems level.

**EDSD 7061 - Assessment and Data Analysis to Support Effective Literacy Programs**

(5 cr.) Designing literacy programs that effectively promote and support high levels of literacy proficiency requires the use of data that accurately describe the status of student, teacher, and school performance. Education professionals in this course can examine a variety of assessment tools for addressing individual and classroom needs while meeting district and state mandates. Topics include data analysis for tiered intervention decision making and the interpretation of data to drive recommendations at a systemic level. Educators will develop skills to facilitate collaboration and stakeholder inclusion.

**EDSD 7062 - A Collaborative Approach to Literacy Across the Content Areas**

(5 cr.) Making academic content accessible and comprehensible for all learners requires specific strategies PreK–12 teachers need to know and be able to demonstrate. By focusing on academic language, content acquisition, and the appropriate use of technology, education professionals add to their repertoire of strategies to meet content standards for all students, including those with diverse needs, learning styles, and abilities. Education professionals can plan ways to collaborate and share knowledge with other educators within their professional setting and review and evaluate research to inform effective practices. Through this course, educators also address ways to develop programs that integrate both content and literacy objectives to better enhance the development of all learners throughout the content areas.

**EDSD 7070 - Special Education: Exploring Theory and Practice**

(5 cr.) Special education is a dynamic field with a growing research base of best practices and changing implementation efforts for students who demonstrate a broad spectrum of adaptive and learning challenges. Special education professionals in this course explore how theoretical research in the field evolved and influenced emerging and prevalent practices in the field. Through the realistic lens of a case study, candidates will explore a range of research topics as well as investigate how research has influenced practice. Through their coursework, educators are supported in the development of skills and dispositions that will assist candidates as they envision and influence the future of special
EDSD 7071 - Leading Change in Special Education: Advocacy, Policy, and Law

(5 cr.)
Leadership and advocacy go hand-in-hand when seeking to promote policies that support effective practices in education for ALL students. Through analysis and reflection, candidates can examine the evolution of special education legislation and pivotal case law and can analyze the connections among advocacy, leadership, policy, and law as it plays out in realistic scenarios. Special education professionals will also investigate change theory and leadership styles, allowing them to reflect on their own and others’ paradigms in order to determine best practices to promote positive educational and social changes. They must apply leadership, advocacy, self-evaluation, and social change skill sets to current practice as they will be called upon to do in future careers. Candidates can also engage in a culminating project through which they construct a professional plan for advocacy and leadership in an area of interest that includes issues of diversity and special needs.

EDSD 7072 - Research Methodology for Special Education

(5 cr.)
In this course, special educators examine research methodologies important and unique to the field of special education. Particular attention is given to single-subject research designs that are used to study behavioral change in individuals or small groups as a result of an intervention. Topics include reliable measurement, repeated measurement, description of conditions, baseline and treatment conditions, and single-variable rules. Candidates will apply the concepts studied in the course to the special education case study. By the end of this course, candidates will begin to delineate various special education research-based methodologies that may apply to an area of interest for their capstone projects.

EDSD 7073 - Designing Specialized Instruction for Diverse Learners

(5 cr.)
Whether practicing in a school, university, or other professional settings, special educators are called upon to implement data-driven assessments in order to plan and implement individualized instructional plans for students with diverse learning and social challenges. In this course, educators review research and practice specific to specialized instruction for students with disabilities in language, reading, writing, math, and content.
areas. Topics also include effective practices for instruction and evaluation for students with social-emotional and behavioral needs, including applied behavior analysis, positive behavioral interventions, and skill building. Related brain-based research will be examined, as well as assistive technologies and methods of delivery, whether in individual, small group, or inclusive settings.

EDSD 7074 - Implementing Effective School-Wide Intervention Models

(5 cr.)
Special educators must be prepared with valid and reliable assessment data in order to recommend and implement sound, research-based intervention models. In this course, educators examine problem-solving best practices for using data to identify students at risk of academic, social, or emotional difficulties. Candidates can also study methods of disability identification and monitoring student progress, and data-based decision making for instruction, universal instruction, and interventions useful for all students. Professional development for general and special education teachers and the role of caregivers (e.g., parents, families, guardians) will be explored. Functional behavioral assessment is examined as an evaluation tool for understanding behavior, and effective practices for school-wide positive behavioral support (SWPBS) are also explored.

EDSD 7075 - Sustaining and Supporting Effective Practices in Special Education

(5 cr.)
Effective special education leaders promote meaningful change for students with diverse learning and social needs, foster the use of effective practices, and sustain long-term program viability throughout diverse settings. Once effective practices are in place, they establish a clear plan for addressing program integrity and sustaining commitment to continuous improvement. Throughout this course, candidates can examine critical components to sustain change, including program evaluation, professionalism, culturally responsive practices, and policy to support continuous improvement.

EDSD 7080 - Child Development in the Critical Early Years♦

(5 cr.)
Effective early childhood professionals know that respectful relationships with families provide the foundation for supporting young children's healthy development. Candidates examine key developmental stages, from prenatal experiences to the early school years. Education professionals explore child development theory, current research in neuroscience, and social-emotional development across the early childhood years, with a special emphasis on the significant role families play in fostering healthy development. Current thinking from the fields of psychology, science, and education are integrated with global perspectives on child development. Educators apply their knowledge to promote positive developmental outcomes for young children and their families.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
EDSD 7081 - The Language/Literacy Continuum From Birth Through Age 8

(5 cr.)
How does language affect the young child’s ability to think, communicate, and learn? In this course, educators explore the language and linguistic development of young children. Education professionals focus on theories of language acquisition; the nature and function of language; the relationship between language and cognition; the developmental stages of language and literacy; and the critical role of families, communities, and educators in fostering language and literacy development from birth through age 8. Education professionals examine current research and ways early childhood professionals can support language and literacy learning for all children across the early childhood spectrum.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDSD 7082 - Meaningful Learning Experiences in Supportive Environments

(5 cr.)
What does excellence look like in early childhood settings? What are varying perspectives on excellence in early childhood education throughout the world? What are the common elements of learning experiences and environments that provide meaning, inspire curiosity, offer safety, and encourage children to thrive? By examining the research, candidates explore current issues and trends in early childhood education such as the inclusion of national standards, project-based learning, looping, technology, and the role of play in fostering healthy development and learning. Education professionals also explore the role of families in supporting children’s learning at home and in early childhood settings as well as how to build effective partnerships with families.

EDSD 7083 - Assessment Practices to Promote Healthy Development and Learning

(5 cr.)
How can early childhood professionals ensure that assessment not only evaluates development and learning but also promotes children’s growth? What kinds of assessments are appropriate and effective for very young children as well as those throughout the primary grades? Educators explore formative, summative, formal, and informal assessment as well as the use of these assessments to promote development and guide teaching and learning. Education professionals reflect on the many ways they use assessment on a daily basis, and discuss strategies for communicating assessment
processes and results. Educators review current research regarding culturally responsive assessments, assistive technology, and international perspectives.

**EDSD 7084 - Evaluating and Supporting Early Childhood Programs**

(5 cr.)
Researchers indicate that high-quality early childhood programs result in long-term positive outcomes for children. Early childhood professionals have a deep understanding of the developmental domains and content areas of early childhood. Based on this understanding, educators use professional accreditation standards to evaluate the effectiveness of early childhood programs. Professionals learn how to evaluate programs for research-based, effective practices that promote healthy development and learning from birth through age 8. Specific focus is placed on effective practice related to management policies and procedures, teacher qualifications, family engagement, and community involvement.

**EDSD 7085 - Inspired Leadership, Informed Advocacy, and Improved Policy**

(5 cr.)
What are the dispositions and responsibilities needed to be an effective professional in the early childhood field? Early childhood leaders exemplify the values and ethics of the field, act as advocates for children and families, and lead initiatives to improve policy and effect positive social change. In this course, education professionals study leadership theory, advocacy strategies, and early childhood policy systems. Educators explore multiple leadership roles in the early childhood field, analyze leadership qualities and traits, reflect on professional growth, and continue to refine research interests. Educators are challenged to be innovative and transformative future thinkers who are deeply committed to the well-being of young children and families.

**EDSD 7090 - Trends and Issues in Educational Technology♦**

(5 cr.)
Using new technologies in new ways sparks learning, creativity, and innovation. Trends and issues in educational technology are examined to discover how they influence learning and creativity in the workplace. Learners collaborate to demonstrate the evolution of a current technological trend, analyze its impact on learning and society, and evaluate the societal issues and problems caused by that trend.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDSD 7091 - Creating Digital Media♦**

(5 cr.)
The effective use of digital media in learning environments requires leaders in the field
to be both consumers and creators of multimedia. Learners become knowledgeable developers of digital media by applying principles of instructional design and pedagogy to multimedia. Learners collaborate in the design and creation of digital and interactive media based on visual design principles.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDSD 7092 - Innovations and the Diffusion of Learning Technologies♦

(5 cr.)
Social change resulting from the integration and adoption of technological innovations is the focus of this course. Learners explore Rogers' Diffusion of Innovations Theory through first-hand experience in a simulation. Learners explore research regarding the integration of technology in the workplace or education setting to determine strategies for becoming catalysts for change. Strategies for overcoming resistance and barriers to change are analyzed.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDSD 7093 - Leading Change

(5 cr.)
Education professionals explore topics related to leading technological change in an organizational setting. Human performance concerns are examined utilizing a variety of leadership approaches. Learners identify a performance gap, develop technological interventions, consider social change issues, and design assessments in order to develop a plan for improving performance.

EDSD 7101 - Learner-Centered Curriculum♦

(5 cr.)
Designing curricula with rigor, relevance, and results requires broad understanding of the key concepts behind each of these attributes and a clear focus on how best to maximize the learning and potential of PreK–12 learners. In this course, education professionals examine what it means to design a learner-centered curriculum that enhances student engagement and involvement, provides a transformative experience for students, and creates conditions that facilitate deep learning. Education professionals examine the alignment of content standards and design models as well as the role of collaboration and community building, power sharing to foster learner autonomy, problem solving, material that is socially relevant, and ongoing assessment to meet the needs of an increasingly diverse student population. Authentic case-study scenarios provide opportunities for educators to see curriculum design in practice, use existing data to redesign and adapt curriculum, and create learning spaces that accommodate
multiple learning needs.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDSD 7102 - Promoting the Success of Diverse Learners♦

(5 cr.)
Student diversity comes in many different forms (e.g., linguistic, cultural, socioeconomic, academic, emotional, aesthetic), and effective educators have the knowledge, skills, and dispositions to value the richness this diversity brings and enhance learning in their education setting. By applying strategies and evaluating programs and initiatives to meet the diverse needs of all learners, educators can demonstrate an awareness of students' prior learning, language, culture, family, and community values to improve teaching and learning. Through real-world scenarios and applications, educators will assess strategies for promoting equitable access to high-quality learning experiences while recognizing their own personal beliefs and biases. Education professionals will also explore current and effective practices for working with diverse learners and providing productive learning environments for all students. Through the use of appropriate materials and technologies, educators will evaluate curriculum, instruction, and assessment, promoting learning for all students.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDSD 7103 - eLearning

(5 cr.)
Educators explore the theories, paradigms, trends, and issues in the field of eLearning. Research on eLearning is critiqued and analyzed as an ecosystem, including an examination of K–12, higher education, corporate, and personal learning communities. Current social and geopolitical trends and their impact on eLearning are analyzed. Delivery methods, human presence, and sustainability of eLearning design are investigated. Through this course, educators are provided with design and development experience through the creation of multimedia presentations in an eLearning environment.

EDSD 7106 - Program Evaluation for Continuous Improvement

(5 cr.)
Effective educational leaders must have the knowledge, skills, and dispositions to evaluate programs and make data-driven decisions to promote continuous improvement for all learners. In this course, education professionals use available data points and tools to evaluate the design, implementation, and program outcomes to determine a program’s impact on the learner, family, and community. The results of the program
evaluation may lead educational professionals to develop action plans that include the development of community outreach programs, grants, legislation/policy reform, professional development plans, or technology solutions. Through this course, education professionals are helped to determine whether to recommend an improvement plan on an existing program or propose a new program or initiative.

**EDSD 7107 - Designing Instruction for eLearning**

(5 cr.)
Instructional design for eLearning involves understanding effective learning experiences in digital spaces. Educators apply the principles of the community of inquiry and the engagement of the digital learner as they design an eLearning course. Mobile technologies, collaborative learning, assessment, academic integrity, and meeting the needs of diverse and global students are addressed. Educators collaborate in the design and development of eLearning products and explore social change through eLearning.

**EDSD 7410 - Creativity and Innovation**

(5 cr.)
Creativity and critical thinking are driving forces behind human innovation and progress. In this course, educators explore theories, models, and roles of creativity and innovation in society and learning environments. They reflect on the risks and rewards associated with creativity and critical thinking, while employing approaches for idea creation focusing on originality and inventiveness.

**EDSD 7411 - Authentic Assessment**

(5 cr.)
Innovative learning requires creative assessment strategies to evaluate student learning within real-world and simulated environments. Through the use of reverse design, educators will create authentic assessments for a learning culture that emphasizes creativity, innovation, and critical thinking. In addition, approaches for using assessment data to effect change will be explored. Methods of inquiry designed to inform and improve learning and instruction to address new trends, including the latest tools and technologies, will be examined.

**EDSD 7412 - Innovative Curriculum**

(5 cr.)
Innovative curriculum evolves and changes in anticipation of learner needs. The focus of this course is on research-based processes and a variety of models used to design innovative curriculum to support learning across the lifespan and within diverse contexts. Strategies for aligning strong content with formalized standards and goals
within the learning environment will be explored. The contributing roles of instruction, technology, and globalization will set the context for this course of study.

EDSD 7900 - EdS Capstone Project: Creating and Supporting Effective Educational Practices

(5 cr.)
Effective education leaders promote meaningful change for all students, foster the use of effective practices, and sustain long-term program viability in diverse educational settings. Throughout the program course sequence, educators examine critical components to create and support continuous improvement. These skill sets are applied in this capstone course as educators create a project that promotes meaningful education and social change. Working in a consultative role as a school or district professional, the educator engages in a project to identify a problem within his or her academic and/or work environment and propose a solution in the form of draft recommendations for the school, district, or educational setting. Additionally, the educator projects how the proposed recommendations, if implemented, would be evaluated and sustained. A Capstone Project Rubric is used to guide in project development and evaluation.

EDUC 1001 - Introduction to Education♦

(5 cr.)
This course is an overview of the field of early care and education. Education professionals engage in assignments that emphasize the elements of high-quality programs, governing standards and regulations, and historical perspectives. They engage in peer discussions on a range of topics, such as the nature of infant care and education, learning through play, quality education and teaching, the definition of education, and current issues affecting education. Education professionals gain further insight into the profession of teaching and working with children through interviews with teachers of various age groups. Additionally, education professionals explore career options and consider what it means to be a professional in the field of early care and education.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 1002 - Pioneers and Philosophies of Education♦

(5 cr.)
Current perspectives on education and methods of teaching are rooted in history and philosophy as far back as the ancient Greeks. In this course, education professionals explore thinkers, philosophies, and educational programs that have influenced current ideas about effective practices in teaching, including tapping into different forms of intelligence and applying new methods for assessment. Education professionals critically examine educational philosophies and methods in light of current social, political, and
economic forces impacting children, families, and the field. Through coursework and discussions, education professionals begin to develop a reasoned, coherent personal philosophy of education as a basis for ethical and professional practice and decision making.

& Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 1003 - Educational Psychology♦

(5 cr.)
How might social class, ethnicity, and gender impact children's learning? Education professionals in this course have the opportunity to answer such questions through the exploration of psychological concepts and theories as they relate to the field of early care and education. Education professionals examine behavioral, cognitive, social, and constructivist views of learning. They engage in conceptual and applied assignments that emphasize research-based principles as well as implications of these principles on child development, learning, teaching, and assessment. Moreover, they share perspectives and delve deeper into content through weekly discussions on a variety of topics, such as helping children develop and learn, defining intelligence, fostering resilience, analyzing learning experiences, and using motivation theories and principles.

& Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 1004 - Child Development♦

(5 cr.)
In this course, education professionals have an overview of physical, cognitive/language, and social and emotional development in children from birth through adolescence. Education professionals examine prevailing philosophies and theories of child development and form their own child development philosophy. Through an exploration across various developmental domains and stages, education professionals investigate the latest research and thinking in regard to conditions that affect children's learning and development, such as risk factors, developmental variations, temperament, rate of maturation, innate abilities, culture, family, community, and societal influences.

& Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 1005 - Child Health, Safety, and Nutrition♦

(5 cr.)
Growth and development in young children are influenced by many factors, including nutrition, safety, and health. Education professionals in this course learn about these factors and examine the professional's role in supporting children's healthy development.
within the context of early childhood care and education as well as in family and community settings. They also assess and discuss the prevention of health problems common to young children, methods of promoting wellness and fitness, child safety, emergency preparedness and procedures, and child mental health.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 1005TL - Health and Safety for Young Children [Tempo Learning®-Specific Course]

(5 cr.)
Keeping children safe and promoting their healthy development—physically and emotionally—is both a privilege and responsibility of every early childhood professional. In this course, educators' time is well spent learning principles of healthy nutrition; factors that support physical and mental health; developmentally appropriate strategies to promote physical activity; guidelines and procedures to ensure children’s safety; and ways to promote wellness in children and families.

Note: This version of EDUC 1005 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 1006 - Child, Family, and Community Relationships

(5 cr.)
Complex events, such as divorce, child abuse and neglect, and illness and death of family members, are common occurrences in today’s society. This course is a survey of the ways in which professionals and families work together in supporting child and family resiliency within the context of these complex issues. Education professionals explore formal and informal communication strategies; family participation in group settings; family education; advocacy for families; and the impact of family, culture, and community on children’s development and learning within early childhood programs. Through this course, education professionals have the opportunity to gain the communication and conflict-management skills needed to prepare for future professional challenges in the field of education.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 1011 - Making Connections: The Early Childhood Field

(2 cr.)
In this course, education professionals explore the early childhood field and related themes, issues, and controversies. Education professionals make connections between key topics and their own personal experiences, interests, and aspirations; coursework; current research; real-world early childhood settings; and future trends, challenges, and
possibilities within the field of early care and education. They investigate professional organizations and research information on early childhood career opportunities. They also reflect on prior knowledge as well as knowledge gained throughout the course in regard to what it means to be a professional in the field of early education.

EDUC 1012 - Making Connections: The Developing Child

(2 cr.)
Education professionals in this course focus on the themes, issues, and controversies related to child development. They make connections between key topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, challenges, and possibilities related to the developing child. Education professionals research and analyze information on brain development, which they use to develop a presentation that could be used to inform stakeholders, such as parents and colleagues. Through this and other assignments designed to provide practical application of content, they summarize their understanding of the developing child, including areas in which they hope to learn more.

EDUC 1013 - Making Connections: The Well-Being of Children

(2 cr.)
Children’s overall well-being is related not only to their health and safety but also to quality relationships among early childhood professionals, family, and community members. In this course, education professionals examine themes, issues, and challenges related to the fostering of children's overall well-being. They make connections between key topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, developments, and possibilities related to healthy growth and development within early childhood, family, and community settings. Additionally, education professionals assess and discuss resources in the area of early childhood education to further their professional development.

EDUC 1014 - Understanding Today's Instructional Environments

(5 cr.)
Learning in the 21st century can take place anytime and anywhere. This course is an overview of the various settings in which teaching and learning occur. Education professionals explore the dynamics of traditional face-to-face, hybrid, and online instructional environments found in such areas as corporate training, higher education, K–12 education, government, healthcare, and nonprofit organizations. Applying course concepts and theories, education professionals construct a concept map of important categories and characteristics of learners. They also compare components of various learning environments and structure them for effective learning and engagement.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
EDUC 1015 - How People Learn♦

(5 cr.)
Humans are complex, and many factors influence the ways in which they learn. In this course, education professionals examine the major theories of how humans learn, including behaviorism, constructivism, and emerging theories based on brain research. They also explore the concepts of multiple intelligences and learning styles, as well as the influences of emotion, culture, and motivation on the learning process. Employing course concepts and principles, education professionals apply learning theories to learning experiences and analyze themselves as adult learners. They also discuss a variety of topics, such as the learning process, social learning theories and online learning, factors that affect online learning, and adult learners and online learning.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 1016 - Foundations of Educational Studies♦

(5 cr.)
Education is a core value in our society. The types of educational opportunities available, the manner in which they are made available, and the ways in which people participate have changed drastically over time. In this course, education professionals explore the structure and history of educational systems in the United States, the wide variety of settings in which learning occurs, and how the role of education in society has changed over time. They also explore the multiple career paths available to them in the field of education.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 1101TL - Becoming an Early Childhood Professional [Tempo Learning®-Specific Course]

(5 cr.)
Early childhood professionals are grounded in the historical and pedagogical foundation that built a field committed to fostering positive outcomes for young children and families. In this course educators explore the evolution of the field through theories and practitioners. They will also delve into the role, responsibilities, roles, ethics, resources, and current issues and trends that not only inform professional growth but also offer critical perspectives to inform their identities as early childhood professionals.

Note: This version of EDUC 1101 is only available as part of specific competency-based Tempo Learning® programs.
EDUC 1102TL - Early Childhood Development [Tempo Learning®-Specific Course]

(5 cr.)
A baby brightens when she hears a loving voice. A toddler takes a deep breath as he risks jumping into a pile of leaves. A preschooler writes her first word: me. How does development happen and what makes each child similar and unique? Content included in this course can increase educators’ knowledge of the milestones, unique qualities, and influencing factors that help determine who young children are and how caring adults can foster their healthy development and learning.

Note: This version of EDUC 1102 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 2001 - Language Development♦

(5 cr.)
In this course, education professionals focus on the theories of language acquisition and language development of young children from infancy through preschool. Education professionals explore how children acquire and develop language, and they gain an understanding of emergent reading and writing. They engage in coursework that emphasizes bilingualism, atypical speech and language development, and the impact of culture and environment on language. Additionally, education professionals make connections between course concepts and share ideas and perspectives through weekly discussions on a range of topics, such as language and the brain, adult roles in language development, early literacy, and challenges for second-language learners, among others.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 2002 - Children's Literature♦

(5 cr.)
Children's literature can delight and inspire young readers as well as promote respect for diversity. In this survey course, education professionals focus on the power and quality of children's literature from birth through adolescence. Education professionals explore a wide variety of genres and learn the characteristics of high-quality literature. They gain practical experience critically evaluating and selecting books from various genres for specific age groups. They also learn about prominent authors, illustrators, and book awards.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 2003 - Human Development♦

(5 cr.)
To fully appreciate and understand ourselves and others, we must have a basic
understanding of human cognitive, emotional, and social development. In this course, education professionals examine the basic developmental stages that all humans undergo throughout their lifespan, from infancy to adulthood. They explore these topics with consideration to issues of gender, ethnicity, social class, and culture. Applying course concepts and theories, education professionals engage in an integrative project through which they create a character for whom they map human development and progress benchmarks from infancy through early adulthood. Through this project, they gain a deeper understanding of life-span development and major theories used to view human development.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 2004 - Literacy in the 21st Century♦

(5 cr.)
The technology-centered and information-rich world in which we live and work requires an expanded definition of what it means to be literate. Education professionals in this course examine the skills and strategies necessary for success in a digital information society. They explore multimedia and Internet technologies that enhance learning by facilitating collaboration, communication, and problem solving. Education professionals apply 21st-century literacy skills through a collaborative project in which they research a topic within the current field of literacy; they communicate their findings in a multimedia presentation.

Prerequisites
- EDUC 1014

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 2011 - Making Connections: The Foundations of Literacy

(2 cr.)
Education professionals in this course explore the themes, issues, and developments in the foundations of literacy. They make connections between key topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, challenges, and possibilities within the fields of language development and children’s literature. Demonstrating knowledge of key concepts and theories, education professionals engage in written assignments designed to provide practical application of course content on a variety of topics, such as the benefits and impact of literacy, how literacy serves as a tool of social equity, and strategies to support family literacy and literacy programs.

EDUC 2012 - Understanding and Valuing Creativity♦

Walden University Catalog (March 2022)
Innovating and risk taking, critical thinking and problem-solving, and communicating and collaborating—all of these are essential skills for the 21st century, and all are intrinsically linked to creativity. Education professionals in this course explore the abundant meanings, value, and applications of creativity as they pertain to learning and life. They consider how encouraging and celebrating creativity in themselves, their colleagues, and today's learners can benefit society. They achieve understanding through an integrative, collaborative wiki project through which they develop a definition of creativity based on theories and philosophical viewpoints, determine how creativity develops throughout the lifespan, describe how to foster creativity in others, and develop creative techniques to solve problems and promote critical thinking.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 2102TL - Children With Exceptionalities [Tempo Learning®-Specific Course]

How can educators support the healthy development of every child? What do educators need to know to better understand what it means to have an exceptionality (or disability) at a very early age? This course offers insights into the legal and procedural requirements for supporting young children and their families; underscores the importance of early intervention; and explains the characteristics of children and services integral to fostering healthy development and learning.

Note: This version of EDUC 2102 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 2400 - The Professional Educator

Lifelong learning and professionalism are key components of effective teaching. As teacher candidates begin their professional program of study, they review the program requirements including field experience responsibilities and major assessments. Teacher candidates study the dimensions of teacher professionalism through the eyes of social change. After reviewing the code of ethics from a practitioner viewpoint, historical theorists, court cases, and trends in education, candidates focus on what is required to be successful in 21st century schools. This includes an analysis of multiple technological frameworks, and candidates use these frameworks in multiple ways throughout the course. Through readings, voices from the field, virtual field experiences, and reflective experiences, each candidate begins to consider his/her personal philosophy.

Prerequisites
- ENGL 1010
- Math-Algebra
EDUC 2401 - Diverse and Exceptional Learners in the Elementary Classroom

(5 cr.)
The dynamics of today's classroom are unique and challenging for teachers and learners. Education professionals in this course explore and analyze issues, complexities, and responsibilities associated with the field of education in the 21st century, including providing equal educational opportunities for all learners, regardless of their abilities and differences. They examine many factors influence learning, including individual experiences, abilities, talents, prior learning, language, culture, and family and community values. Education professionals study special education laws and policies; language diversity; and multiple intelligences. They also address learning theory, diverse learning styles, and practical instructional strategies, and they acquire theoretical and practical knowledge about today's classroom as well as the family and community contexts that influence children’s learning and development.

Prerequisites
• EDUC 2400

EDUC 2402 - Exploring Dimensions of Literacy K–6

(5 cr.)
In this course, education professionals learn theories, principles, practices, and strategies to support literacy development in the elementary grades. Candidates learn about early literacy development including phonological awareness, concepts of print, and phonics. Strategies for developing vocabulary, comprehension, fluency, writing, content-area literacy, and media literacy are also explored. Through course readings and virtual field experiences, candidates analyze literacy instruction and identify research-based principles that support the literacy and learning of all students, including English language learners. Candidates examine the role of formal and informal assessments in planning and modifying literacy instruction to meet the needs of a diverse student population. Topics include organizing the literacy classroom, differentiating literacy instruction, and involving families to support the literacy development of students.

Prerequisites
• EDUC 2400

EDUC 2403TL - Child, Family, and Community Relationships [Tempo Learning®-Specific Course]

(5 cr.)
Early childhood professionals know that children are deeply connected to their families in dynamic relationships that influence development and learning. With this awareness is mind, it becomes essential to develop and maintain supportive and caring relationships with significant adults in children's lives. The competencies in this course involve
educators in thinking about theories essential to understanding child, family, and community relationships and strategies for fostering caring, respectful relationships with families and communities that promote children's healthy development and learning.

Note: This version of EDUC 2403 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 3003 - Observation and Assessment of the Young Child♦

(5 cr.)
In this course, education professionals explore developmentally appropriate formal and informal assessments, including observational techniques for assessing young children's development and learning. Education professionals learn how to use specific tools and the data generated from them to inform effective decision making and instructional planning. They also consider and discuss ethical and legal considerations as well as other related issues and controversies. Applying course concepts, education professionals participate in an integrative child observation project through which they gain a deeper understanding of the process of assessment, the role of observation, and the importance of considering children as individuals.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3004 - Curriculum Design♦

(5 cr.)
In this course, education professionals have the opportunity to gain the fundamental skills needed for planning, designing, and delivering engaging learning experiences. They examine the elements of effective curriculum design, learn how to write measurable learning objectives, and explore tools, technologies, and resources for developing curriculum. They share perspectives and gain practical insight on course concepts through discussions on various topics, such as instructional designer responsibilities in creating effective curriculum, learning objective analysis, assessment formats, and curriculum design proposals. Additionally, education professionals reflect on learning and consider how they can use knowledge gained throughout the course in future personal, academic, and professional future endeavors.

Prerequisites
- EDUC 1014

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3005 - Evaluation and Assessment♦

(5 cr.)
Program evaluation and learner assessment are fundamental components to the process
of designing effective learning experiences. In this course, education professionals investigate major concepts, principles, and methodologies related to evaluation and assessment. They explore the selection of assessment tools, measurement of learning outcomes, and performance evaluation. Education professionals learn how to use information gained from assessments as a tool for improving learning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 3006 - Designing Curriculum♦

(5 cr.)
In this course, education professionals have the opportunity to gain the fundamental skills needed for planning, designing, and delivering effective learning experiences. They examine the elements of effective curriculum design, and they explore tools, technologies, and resources for developing curriculum. They also discuss the role of instructional designers, course goals and objectives, assessment techniques, and emerging issues in the field. Moreover, education professionals gain practical experience in applying Bloom and Fink taxonomies as well as writing goals and objectives, congruent assessments, learning plans, and instructional steps.

Prerequisites
• EDUC 1014

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 3007 - Assessment and Evaluation♦

(5 cr.)
Assessment and evaluation are fundamental to the process of designing effective learning experiences. In this course, education professionals investigate major concepts, principles, and methodologies related to evaluation and assessment. They explore the selection of assessment tools, measurement of learning outcomes, and evaluation of performance. Additionally, education professionals learn how to use information gained from assessments as a tool for improving practice.

Prerequisites
• EDUC 1015

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 3008 - Diversity in Education♦
People have different backgrounds, perspectives, and values; similarly, they have different approaches to learning. Individuals who work in educational environments and serve as agents of social change must recognize and honor these differences. Education professionals in this course examine how the need to serve people of differing social groups, cultures, and abilities offers challenges and opportunities in today's learning environments. They reflect on their attitudes, beliefs, and biases regarding diversity and learn approaches to help ensure equitable access and meaningful learning in a variety of educational settings.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3009 - Technology and Education♦

Technology is becoming a central aspect of our everyday lives and has a profound impact on the way we work, play, and learn. In this course, education professionals explore and discuss how our technology-rich world influences different generations of learners and their learning preferences. Through conceptual and application-based assignments, they also learn how to integrate technology into teaching and learning processes to meet the needs of diverse learners as well as how to harness Internet technologies to enhance the work of students by facilitating collaboration, communication, and problem solving.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3010 - 21st-Century Learning♦

Professionals in all areas of education, such as teaching, workforce training, and policy making, must be cognizant of the knowledge and skills required to adapt to 21st-century-specific change. In this course, education professionals explore the proficiencies essential to navigating the 21st-century learning landscape to position themselves for professional flexibility and success. They examine how the nature of knowledge, literacy, and learning is changing as a result of new technology. Education professionals gain a practical understanding of ways to learn and function effectively in this new, evolving environment through investigations and discussions on emerging research on learning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3011 - Making Connections: Managing and Leading Early Childhood Programs♦
Managing child development centers in the 21st century requires a complex array of leadership skills and dispositions. In this course, education professionals explore the various types, purposes, and theoretical foundations of child development programs, and they examine the National Association for the Education of Young Children (NAEYC) core competencies for directors. They engage in discussions and assignments that emphasize the leader's role in managing the organization as a whole, including overseeing regulatory and business concerns, establishing policies and procedures, and implementing the organization's mission and vision.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3012 - Making Connections: Fiscal and Personnel Management of Child Development Centers and Programs

A child development center is a business like any other; it must be operated and staffed with precision. In this course, child development center directors and managers prepare for the financial and human relations aspects of the job. Topics covered include constructing and managing a budget, maintaining accurate financial reports, fund-raising, staffing, personnel management, and professional development.

EDUC 3013TL - Culturally Responsive Practice [Tempo Learning®-Specific Course]

How does culture influence actions, relationships, preferences, language, customs, and even values and beliefs? Why is it vital that early childhood professionals understand the ramifications of bias and stereotyping on children’s identity development? As an early childhood professional, educators can use the information in these competencies to analyze how current policy issues impact diverse populations of children and families in early childhood settings; apply principles of culturally responsive curriculum to promote children’s healthy development and learning; recommend culturally responsible practices to promote meaningful relationships with families; and apply strategies to promote access, equity, and positive social change for young children, families, and the early childhood field.

Note: This version of EDUC 3013 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 3050 - Child Development, Motivation, and Learning

In this course, teacher candidates prepare to understand the social, physical, emotional, and intellectual growth and development of children as related to learning and
motivation in the elementary classroom. Teacher candidates explore philosophies and theories of child development and make connections between and among the key topics of development, learning and motivation, and social and cultural diversity. Learning environments and resources (including technology) that support the developmental needs of elementary children are identified and analyzed. In addition, teacher candidates explore the importance of family and community connections to support children’s learning; develop strategies for engaging families in the learning process of their children; and consider the role of children’s interests and personal experiences when planning instruction. Teacher candidates identify typical and atypical developmental patterns; analyze effectiveness of instructional strategies; and consider the role of specialists in supporting children’s growth and development.

Prerequisites

- EDUC 2401

EDUC 3051 - Collaboration to Support All Learners

(5 cr.)
In this course, candidates explore strategies for effective communication and collaboration with colleagues, specialists, families, and community agencies to provide support for all children. Candidates examine collaboration strategies that promote the growth and learning of all children in the elementary classroom, including those with exceptionalities, gifted and talented students, and English language learners. Candidates learn about the roles of all participants in collaborative teams, including coteaching and participating in the Individualized Education Program (IEP) process. Candidates examine the role of the school in supporting all learners within the larger community context. They identify factors in the students' environments that may affect their growth and learning and explore strategies for effective collaboration with diverse families.

Prerequisites

- EDUC 2402
- EDUC 3052

EDUC 3052 - Effective Practices: Planning, Instruction, and Assessment

(5 cr.)
To help ensure high levels of learning and achievement for all students, today’s educators must be knowledgeable about learners and learning and well-versed in effective teaching and assessment practices. In this course, education professionals examine the interrelationships between assessment, teaching, and learning as well as effective practices for applying and integrating these critical components in the K–6 classroom. They gain a historical perspective on the standards and accountability movement and examine standards in their state or local setting. They also explore learning theory in the context of today’s challenging educational goals and standards.
this course, education professionals learn and apply research-based practices in effective assessment, curriculum design, and instruction. Through on-site experiences and Virtual Field Experiences, they critically analyze and implement teaching and learning principles and practices that help ensure awareness of the individual and collective needs of students. This course requires a 15 hour field experience at a school approved by Walden University.

Prerequisites
- EDUC 2401

EDUC 3053 - Community Building for Effective Classroom Management

(5 cr.)
In this course, education professionals learn to create safe, supportive, and respectful learning environments that promote social-emotional development, self-responsibility, and character to optimize learning for all students. Teachers will learn how to foster a sense of community in the classroom and develop positive relationships with and among students. Age-appropriate skills and strategies for managing dynamic and flexible grouping structures and for teaching conflict resolution will be presented. The course also provides strategies for building positive relationships, fostering motivation, and engaging in effective communication and problem solving with parents and families. This course requires a 15-hour field experience at a school approved by Walden University.

Prerequisites
- EDUC 2401

EDUC 3054 - Literacy K–6: Instruction and Assessment

(5 cr.)
Reading, listening, speaking, and writing are skills essential to success in school and in life. In this course, teacher candidates can examine a wide range of effective instructional and assessment practices that support the development of reading, oral language, and written communication for K-6 students. Teacher candidates use research-based approaches to literacy instruction while implementing a variety of assessment tools to identify students' difficulties. Teacher candidates use assessment data to create engaging literacy learning experiences at diverse developmental levels. Topics include the incorporation of technology to support and enrich literacy learning, family involvement, and integrating literacy and learning into the content areas. This course requires a 15-hour field experience at a school approved by Walden University.

Prerequisites
- EDUC 2402
- EDUC 3052
EDUC 3055 - Social Studies and the Arts K–6: Instruction and Assessment

(5 cr.)
In this course, candidates prepare to become effective educators of social studies and the arts. As they plan and implement instruction, candidates integrate the major concepts, themes, and modes of inquiry from social studies and the arts. Emphasis is on developing strategies to help students become effective citizens of a democratic and culturally diverse society. Candidates focus on building connections across disciplines and using the arts to foster student engagement and communication and promote their abilities to construct and apply knowledge. Candidates use multiple assessments to measure student progress and modify instruction to address the needs of all learners in diverse classrooms. This course requires a 15-hour field experience at a school approved by Walden University.

Prerequisites
- EDUC 3053
- EDUC 3054
- EDUC 3056
- EDUC 4010
- EDUC 4020
- American or World History

EDUC 3056 - Integrating Content and Technology to Enhance Learning

(5 cr.)
In this course, teacher candidates explore strategies for integrating technology across content areas in order to plan units and lessons that support developmental and curricular goals for elementary students. Candidates create learning experiences that promote student motivation and engagement; support exploration, problem solving, and critical thinking; provide opportunities for collaborative and self-directed learning; and foster content area literacy. Candidates explore a wide variety of technology resources, infusing them in instructional planning to help students learn content and become proficient in the use of technology. Candidates examine effective teaching practices, including formative/authentic assessments and scaffolding techniques to support diverse learners. This course requires a 15-hour field experience at a school approved by Walden University.

Prerequisites
- EDUC 3054

EDUC 3101 - Professionalism and Advocacy in the Early Childhood Field

(5 cr.)
The landscape of early care and education is constantly changing. Education
professionals in this course examine these changes, focusing on the roles and responsibilities of the early childhood teaching professional in infant/toddler and preschool settings. Education professionals explore the complexities of developmentally appropriate practice and learn what it means to be an advocate for children, their families, and the profession itself. They engage in discussions and assignments that emphasize the importance of keeping up with current research in the field and engaging in professional activities and organizations to ensure continual professional growth and learning.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3103 - Guiding Young Children’s Behavior

(5 cr.)
Proactive guidance and positive, safe learning environments promote healthy child development and learning. Education professionals in this course focus on understanding and fostering social and emotional development in preschool-age children, and they learn strategies for establishing classroom communities in which all children feel safe, valued, and respected. They explore a range of topics, including teaching social skills, routines, and procedures; collaborating with families; preventing and working with challenging behaviors; developing problem-solving abilities; and organizing the classroom setting to support learning, cooperation, and social and emotional growth.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3111 - Making Connections: Foundations of Preschool Teaching

(2 cr.)
Professionalism, advocacy, and preschool education provide the focus of the themes, issues, and challenges that education professionals examine in this course. Education professionals make connections between key topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, controversies, and possibilities related to working in the early childhood field with preschool-age children and their families. Applying course concepts, education professionals consider and explain the role and benefits of play for children and adults, and they summarize their thinking in regard to cultivating healthy development and learning in children through connections with nature.

EDUC 3112 - Making Connections: Effective Learning Environments

(2 cr.)
The development of optimal preschool learning environments and related themes,
issues, and challenges provide the framework for this course. Education professionals make connections between the topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, controversies, and possibilities associated with establishing effective preschool learning environments. Through a case study scenario, they apply their knowledge of preschool children as well as concepts learned in the course to describe components that they believe are essential to optimal preschool environments. They also consider and summarize the importance of creativity, how creativity has affected their own lives, and how they would go about fostering creativity in the learning environment.

EDUC 3202 - Quality Programs for Infants and Toddlers♦

(5 cr.)
In this course, education professionals have the opportunity to focus on the breadth and depth of the field of infant/toddler care and education, emphasizing characteristics of quality infant/toddler programs. Education professionals learn the foundations of infant/toddler development, the integral role of the infant/toddler professional in fostering children’s growth and ensuring family involvement, and theoretical frameworks key to quality programs. They also explore the components of high-quality environments and what it means to be an advocate for young children, their families, and the profession.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3203 - Infant/Toddler Mental Health♦

(5 cr.)
Positive developmental progress in infants/toddlers depends on many factors, including the overall promotion of mental health, prevention of occurrence or escalation of mental health problems, and the effective treatment of mental health needs. Education professionals in this course explore current research in the field of infant/toddler mental health, through which they gain practical insight on protective and risk factors in family environments; social and emotional developmental challenges; developmentally appropriate infant/toddler screening and assessment; diagnostic classification systems for infant/toddler mental health; effective intervention strategies; and collaborative services approaches. Moreover, education professionals apply course concepts through practical assignments, such as the development of a fact sheet designed to educate child development professionals about the importance of the field of infant/toddler mental health.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
EDUC 3204 - Family Cultures of Infants and Toddlers♦

(5 cr.)
In this course, education professionals experience an overview of the way culture impacts typical conceptions of infant/toddler development and interactions. Education professionals focus on the ability to form healthy working relationships and respectful partnerships with the families of infants and toddlers across a range of cultures. They investigate the meaning of various child-rearing behaviors and how they relate to family expectations and cultural traditions, with the goal of developing culturally appropriate practices. Education professionals also make connections and share perspectives through discussions on related topics, such as cultural differences in caregiving practices, attachment and separation, perspectives on play, and effective communication, among others.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3211 - Making Connections: Foundations of Infant/Toddler Care and Education

(2 cr.)
An important role of the child development professional is to understand how to use support services and programs to aid the healthy development and learning of young children and their families. In this course, education professionals examine themes, issues, and controversies central to the field of infant/toddler care and education, and they critically analyze ways to support the healthy development and learning of infants and toddlers through food and nutrition programs, vaccinations, and early intervention services. Education professionals make connections between the topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, challenges, and possibilities that infant/toddler professionals must understand.

EDUC 3212 - Making Connections: Healthy Infant/Toddler Growth and Development

(2 cr.)
Education professionals in this course focus on healthy infant/toddler growth and development as well as related themes, issues, and challenges. They make connections between key topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, controversies, and possibilities associated with the overall well-being of very young children. Applying course concepts and gaining deeper insight on topics, education professionals also engage in practical writing activities, such as the development of a resource sheet for child development professionals that includes
information on factors promoting healthy growth and development.
(Co-requisites: EDUC 3203 and EDUC 3204)

EDUC 3301 - School-Age and Adolescent Development♦

(5 cr.)
Education professionals in this course gain a fundamental understanding of how school-age children and adolescents develop and learn. They examine typical and atypical cognitive, physical, and social-emotional development as well as the relationship among these developmental domains. They also compare theories of development; develop a presentation that identifies and explains specific strategies, methods, or activities for the promotion of health and well-being in middle childhood; engage in a field study to gain real-world insight on the affective and social development of children between the ages of 6 and 12; and complete an integrative research paper on critical, topical issues related to school-age and adolescent development.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 3302 - Making Connections: Professions in the Field of School-Age and Adolescent Development

(2 cr.)
In this course, education professionals have an overview of the practices and professions in the field of school-age and adolescent development, including topics such as careers; interpersonal and professional skills; and ethical/legal guidelines needed for working with school-age children and adolescents, families, and other professionals. Education professionals explore a variety of organizations that are devoted to fostering the healthy development of school-age children and adolescents. They also have the opportunity to investigate a profession of their choice to learn the responsibilities and tasks it entails. Additionally, education professionals describe what they perceive to be the professional relationship between ethical and legal obligations as well as the significance of law and ethics in the field of school-age and adolescent development.

EDUC 3303 - Motivating and Guiding School-Age Children and Adolescents♦

(5 cr.)
Educators have a responsibility to guide and motivate as well as to foster self-esteem and resilience in school-age children and adolescents. Education professionals in this course address a continuum of effective strategies needed for working with school-age children and adolescents in group and classroom settings. Such strategies include effective communication, positive guidance, modeling/mentoring, intrinsic and extrinsic motivation, fostering self-esteem, promoting resilience, and problem-solving and conflict-resolution skills. They learn to apply theory to practice as they critically analyze several theoretical constructs and consider their implications for working with school-
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 3304 - Making Connections: Effective Learning Environments for School-Age Children and Adolescents

(2 cr.)
Often times, the setting in which learning occurs is equally important as the material taught and method of teaching. In this course, education professionals examine effective learning environments for school-age children and adolescents. They make connections between key topics and their personal experiences, interests, and aspirations; other coursework; current research; real-world settings; and future trends, challenges, and possibilities related to the healthy development and learning of school-age children and adolescents. Demonstrating knowledge and applying concepts, education professionals consider and describe how their definition of an effective learning environment has changed as a result of their learning. They also gain real-world insight into how to design effective learning environments by interviewing a professional in the field.

EDUC 3401TL - Social-Emotional Development and Positive Guidance [Tempo Learning®-Specific Course]

(5 cr.)
Early childhood professionals understand how deeply social-emotional development influences children during childhood and for the rest of their lives. In this course early childhood professionals delve into the unique characteristics of the social emotional developmental continuum, explore how to build responsive relationships that foster healthy social-emotional development, immerse themselves in positive guidance strategies to help children become independent and fair problem solvers as members of positive classroom communities, and study how to truly support young children as they practice, learn, and grow to be strong and healthy in their relationships with themselves and with others.

Note: This version of EDUC 3401 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 3402TL - Effective Practices for Quality Programs Serving Young Children [Tempo Learning®-Specific Course]

(5 cr.)
If education professionals were asked to define quality as it pertains to practices and programs serving young children and families, what would they say? This course provides essential information about how the principles of developmentally appropriate practice, early childhood program standards, pedagogical and organizational models, and effective teaching and leadership practices inform quality programs and family
partnerships.

Note: This version of EDUC 3402 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 3403TL - Early Literacy [Tempo Learning®-Specific Course]

(5 cr.)
From the meaningful relationships that build when sharing stories to the empowering feeling of writing a first word, early literacy is an adventure and an accomplishment. It is essential that early childhood professionals understand developmentally appropriate ways to foster early literacy and literacy learning for children from birth through third grade. In this course, educators also can become proficient at evaluating children’s literature and analyzing issues and strategies related to the appropriate use of technology to promote literacy learning in young children.

Note: This version of EDUC 3403 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 3404TL - Observation, Assessment, and Planning [Tempo Learning®-Specific Course]

(5 cr.)
Developing meaningful learning experiences requires understanding children’s specific strengths and challenges. What kinds of assessment methods and strategies will help educators learn this vital information? What do educators need to know about communicating and collaborating with families and other stakeholders to promote meaningful assessment practices? Through the course content, educators can ground themselves in the wisdom and practicality of developmentally appropriate assessment for young children.

Note: This version of EDUC 3404 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 4001 - Capstone

(7 cr.)
In this course, education professionals have the opportunity to integrate theories of child development, principles of effective early childhood practice, and methods of working with young children and their families. Education professionals engage in projects that demonstrate synthesis and application of this knowledge. Through these projects, they consider the knowledge and skills gained throughout the program and how they can apply them to future work in the early childhood/child development field. They also have the opportunity to research a position in early education, interview a professional in the field, develop a resume and cover letter, and reflect on professional competencies and areas for professional growth.

Prerequisites
• Completion of all other required coursework

EDUC 4004 - Children With Special Needs

(5 cr.)
Educators understand that all individuals are unique with varying abilities and needs. In this course, education professionals have an overview of exceptionalities in children from birth through adolescence. They engage in coursework that highlights early identification, referral, intervention, inclusion, and the related psychosocial needs of children and their families. They discuss complexities related to labeling children, inclusion, and challenging myths and stereotypes. In addition, education professionals explore federal and state legislation that guides educational requirements.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4005 - Cultural and Linguistic Diversity

(5 cr.)
An emphasis in this course is the importance of being responsive to the languages and cultures of individual children and their families and communities to support learning and development effectively. Education professionals broaden their understanding of culture as a framework that includes not only language and ethnicity but also gender, socioeconomic status, exceptionalities, family configuration, sexual orientation, personal interests, and many other aspects of one’s individuality. In addition, education professionals reflect on their own cultural frameworks and examine personal attitudes and beliefs.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4006 - Making Connections: Operating Child Development Centers and Programs

(2 cr.)
Operating a child development center requires the wearing of multiple hats. The focus in this course is on the day-to-day operational duties that managers and directors must perform to keep the facility running safely and smoothly. Topics include marketing and public relations; facilities management to ensure proper health, nutrition, and safety conditions; and family communication and support. Legal and ethical issues in working with children and families are also explored.

EDUC 4010 - Mathematics K–6: Instruction and Assessment
This coherent and rigorous approach to teaching and learning K–6 mathematics focuses on conceptual understanding, procedural skills, and application of mathematical knowledge. Coursework also focuses on helping teacher candidates promote problem-solving and communication skills as the core for teaching numbers and operations, algebra, data analysis, probability, measurement, geometry, and the use of manipulatives across math strands. Themes threaded throughout the course include technology, real-world applications, integrating math with other content areas, and building on the strengths and overcoming the challenges of diverse learners. This course includes 15 hours of field experience.

Prerequisites
- EDUC 3054

EDUC 4011 - Making Connections: The Individuality of Children

In this course, education professionals address themes, issues, and controversies related to the special needs and individuality of children. They make connections between key topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, challenges, and possibilities associated with understanding and meeting the needs of individual children and their families. Through written assignments designed to provide practical application of content, education professionals analyze topical sources focused on disability culture and autism and then make connections, describe how their thinking has changed as a result of their analysis, and summarize new perspectives.

EDUC 4012 - Making Connections: Living in a Diverse World

Education professionals in this course examine themes, issues, and challenges specific to living in a diverse society. They make connections between key topics and their own personal experiences, interests, and aspirations; other coursework; current research and controversies; real-world early childhood settings; and future trends and possibilities related to the areas of social responsibility and cultural and linguistic diversity. They delve deeper into content and share ideas and perspectives through discussions on a range of topics, such as methods to strengthen communities and strategies and challenges of international adoption.

EDUC 4013 - Motivation and Learning♦

Motivation is an important precursor to learning; yet, what motivates people of different ages and different backgrounds to participate and persist in learning opportunities varies
widely. In this course, education professionals explore foundational theories of motivation and how these impact learning. They investigate applications of theories of motivation to understand what occurs in different learning environments. They also explore how to use these theories to help those who work in educational environments make effective decisions about their practice.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4014 - Legal and Ethical Issues in Education♦

(5 cr.)
An understanding of legal and ethical issues that impact the lives and interests of learners is critical to those who work in all types of educational settings. In this course, education professionals examine issues surrounding state and national educational policy; constitutional issues concerning equal opportunity, privacy, and access; and the legal requirements of working with children and adults from different backgrounds. Through activities and discussions, education professionals practice ethical decision making and consider their own beliefs and biases about ethical issues in education.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4015 - Educational Studies Capstone

(5 cr.)
Through the capstone experience, education professionals have the opportunity to integrate their understanding of educational concepts and processes learned throughout the program. They complete an integrative project that demonstrates their ability to apply this knowledge to the real world. Education professionals identify professional opportunities in the field of education and make connections between program learning outcomes and their job of interest, thus demonstrating how fulfilling learning outcomes provided them the skills, knowledge, and qualifications required for the position.

Prerequisites
• Completion of all other program coursework

EDUC 4019TL - Play, Creativity, and the Arts [Tempo Learning®-Specific Course]

(5 cr.)
Play, creative expression, and the arts offer children opportunities to learn about who they are—to express and explore their individuality and to flourish together. The competencies in this course allow educators to explore the value and practice of fostering play, creativity, and the creative arts with children preschool through third grade. Educators also analyze the role child-centered learning and teaching play in fostering children’s creative thinking and creative involvement in the arts.
Note: This version of EDUC 4019 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 4020 - Science K–6: Instruction and Assessment

(5 cr.)
In this course, education professionals explore teaching and learning in science, based on the latest research on the most effective methods for teaching appropriate science curriculum from Kindergarten through grade 6. Candidates focus on ways to use developmentally appropriate strategies to promote modes of inquiry and analytical skills in science education. They also explore instructional and assessment strategies to develop children’s conceptual understanding of science, particularly relating to the standards for physical, life, and earth and space sciences. Candidates examine and apply integration of science with reading, math, social studies, and technology. Candidates consider their own science content knowledge and explore local professional development opportunities. This course requires a 15-hour field experience at a school approved by Walden University.

Prerequisites
- EDUC 3054
- Lab Science requirement

EDUC 4030 - Demonstration Teaching/Seminar: Professional Ethics, Communication, and Collaboration in Elementary Education

(10 cr.)
Demonstration teaching is the culminating experience in the teacher preparation program and is an opportunity to apply knowledge and skills. Education professionals participate in orientation activities and then gradually assume complete teaching responsibility of an elementary classroom. Education professionals take full control for 4 consecutive weeks over a 12-week placement, gaining real-world experience and the opportunity to translate theory into practice. Candidates demonstrate the various roles of an elementary educator. Education professionals work closely with, and are evaluated by, their Walden University supervisor, classroom cooperating teacher, and Walden faculty member. During demonstration teaching, all professionals complete the Education Teacher Performance Assessment (edTPA), participate in weekly discussions, and complete a collaboration based major assessment. This course requires a 12-week full-time classroom experience at a school approved by Walden University.

Prerequisites
- Completion of all other required coursework
EDUC 4102 - Play and Learning for the Preschool Child♦

(5 cr.)
In this course, education professionals address an essential question in early childhood education: Why is play integral to children’s development and learning? They learn the theory, methods, and materials needed to support and enhance children’s play and learning in preschool settings, and they gain an understanding of the vital role of play in fostering growth in each of the developmental domains. They also explore how to arrange developmentally appropriate environments; provide opportunities for high-quality, productive play, and learning experiences; and assess development and learning through observation of play-based activities and learning experiences.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4104 - Inclusive Practices in Classroom Communities♦

(5 cr.)
All children have the right to develop and learn in classroom communities that support diverse, individual needs. In this course, education professionals explore the ways in which preschool teachers can build inclusive environments that exemplify developmentally appropriate practice. Education professionals learn strategies that support inclusion, meet identified needs, and foster a sense of classroom community. They also engage in coursework focused on observation and assessment, partnership development with families, collaboration with support resources, legal regulations and issues, and the roles of reflection and evidence-based decision making.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4105 - Early Literacy♦

(5 cr.)
In this course, education professionals explore current research on the most effective methods of promoting literacy development in preschool children. Using the "five pillars" of reading—phonemic awareness, phonics, fluency, vocabulary, and comprehension—as an organizational framework, education professionals explore the characteristics of emergent readers and writers. They also learn about developmentally appropriate assessments, materials, and strategies for instruction, including developing literacy through play and effectively using current technologies. They also engage in coursework that highlights the integral role of literacy across the curriculum.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4106 - Teaching Across Content Areas in Preschool♦
Teaching within and across specific content areas in the preschool curriculum requires practices that are engaging, meaningful, and developmentally appropriate. Education professionals in this course learn how to develop significant and enduring early childhood learning experiences in mathematics, social studies, science, language and literacy, health and physical education, and the visual and performing arts. They engage in practical applications and discussions on planning and implementing child-centered, age-appropriate curriculum and assessment as well as strategies for integrating content areas, including the project approach.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4112 - Making Connections: Interdisciplinary Teaching and Learning

In this course, education professionals examine the themes, issues, and challenges related to developmentally appropriate teaching and learning at the preschool level. Education professionals make connections between key topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, controversies, and possibilities associated with interdisciplinary preschool teaching and learning. Using a case study scenario, education professionals demonstrate their understandings of the project approach by developing a short overview explaining its function as well as how it represents developmentally appropriate practice. They also assess examples of project-based learning and evaluate what children can learn from such experiences.

EDUC 4120TL - Effective Practices for Infants and Toddlers [Tempo Learning®-Specific Course]

A caregiver gazes deeply and warmly into the eyes of an infant as she continues to intentionally foster their attachment. How do responsive, respectful relationships like these begin? How do they grow? And how do they support young children's growth and development? In this course, educators explore how early childhood professionals can foster healthy development and learning in infant and toddlers through relationships, play, routines, transitions, and supportive environments. Educators also take part in field experience, developing a meaningful experience for infants or toddlers and working with young children and their teacher to make this experience come alive with learning for all.

Note: This version of EDUC 4120 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 4121TL - Meaningful Learning Experiences [Tempo Learning®-Specific Course]
(10 cr.)
How do early childhood teachers nurture children's curiosity, interests, and wonder, while providing them with opportunities to actively engage with ideas, content areas, and each other? In this course, educators get to know the context—children, families, community—of the classroom where they are completing their field experience. As well, educators ground themselves in the standards, strands, and themes that underpin key content areas that children are learning about all the time. And then, educators collaborate with their host teacher to design, implement, and evaluate a unit of study that effectively integrates content areas to provide opportunities for children to engage in meaningful learning experiences.

Note: This version of EDUC 4121 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 4122TL - Learning and Teaching in Inclusive Early Childhood Settings
[Tempo Learning®-Specific Course]

(5 cr.)
How can an early childhood professional help to ensure that every child thrives in the early childhood setting? In this course, educators delve into the foundation of high-quality early childhood inclusion programs. As well as studying practical strategies for working with children and partnering with families and other professionals, educators also apply evidence-based advocacy approaches to support high-quality inclusive programming in early care and education settings.

Note: This version of EDUC 4122 is only available as part of specific competency-based Tempo Learning® programs.

EDUC 4205 - Developmentally Appropriate Practices in Infant Settings♦

(5 cr.)
Through this course, education professionals engage in an in-depth exploration of infant growth and development. They examine the role of the caregiver; components of high-quality caregiver-child relationships; and strategies for ensuring developmentally appropriate, individually appropriate, and culturally appropriate practice. They also explore methods to understand and work with families, observation skills, attachment, separation, continuity of care, brain development, and the creation of nurturing environments for very young children and their families. Demonstrating their understanding of course content, education professionals apply concepts through practical assignments, such as the development of a newsletter that provides information on the influence of infant settings on supporting young children and their families.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4206 - Developmentally Appropriate Practices in Toddler Settings♦
Education professionals in this course engage in an in-depth exploration of toddler growth and development. They explore the role of the toddler caregiver/teacher; the components of high-quality adult-child relationships; and strategies for ensuring developmentally appropriate, individually appropriate, and culturally appropriate practice. Education professionals engage in readings and course assignments focused on observation skills, attachment, separation, working with families, and creating inspiring and supportive environments for young children and their families. They also share perspectives and make connections through discussions on related topics, such as cultural values and beliefs, separations and reunions, play and the environment, and identity formation and cultural responsiveness, among others.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 4211 - Making Connections: Effective Programs for Infants and Toddlers

In this course, education professionals focus on themes and issues related to the challenge of developing and maintaining high-quality infant/toddler settings. They make connections between key topics and their own personal experiences, interests, and aspirations; other coursework; current research; real-world early childhood settings; and future trends, controversies, and possibilities related to effective programs for infants and toddlers. Through practical exercises, they describe how infants and toddlers exhibit prosocial behavior as well as why it is important for infant/toddler programs to foster such behavior. Education professionals also compose an article conveying the importance of applying brain research to policies, programs, and/or families to foster lifelong healthy development and learning.

EDUC 4220TL - Early Childhood Professionalism [Tempo Learning®-Specific Course]

Throughout this program, educators have been preparing to embrace their role as an early childhood professional grounded in evidence-based practice, the collaborative nature of the work, and a commitment to fostering positive outcomes for young children and their families. During the competencies that make up this course—the capstone experience—educators update their professional profile, core beliefs, and professional resume; hone their interview proficiency; and create an advocacy plan based on an issue that resonates with their professional goals. During the final competency, educators assess and plan for their ongoing professional development and commitment to working for positive social change for young children, families, and the early childhood field.

Note: This version of EDUC 4220 is only available as part of specific competency-based Tempo Learning® programs.
EDUC 4301 - School-Age Children and Adolescence in a Multicultural Society♦

(5 cr.)
In today's multicultural society, educators must be cognizant of the ways in which they teach culturally diverse values and social attitudes to school-age children and adolescents. Education professionals in this course examine these values and attitudes as well as ways to transmit such concepts in the classroom. They explore topics of ethnicity, language, gender, sexual orientation, and socioeconomic status. They also examine how each of these areas of diversity affects school-age children and adolescents as well as how they relate to stereotyping and bias.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4302 - Home, School, and Community♦

(5 cr.)
Education professionals in this course explore the spheres of influence on school-age children and adolescents and the techniques needed to facilitate positive relationships among homes, schools, and communities to foster healthy development and learning. They explore and discuss the definition of home, school, and community; research on the benefits of partnerships; home visits and shared decision making; expectations and accountability; and examples of successful educational partnerships. Applying course concepts, education professionals engage in an integrative project through which they develop a handbook of best practices for forming home, school, and community partnerships, including challenges, strategies, and potential legal and ethical issues.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4303 - Trends and Issues in School-Age Children♦

(5 cr.)
By understanding the relationship between children's health, culture, and socioeconomic status, in addition to related trends and issues, professionals who work with school-age children are in a better position to address and respond to these issues and related challenges effectively. Education professionals in this course critically examine selected issues and trends related to school-age children, such as technology/media, bullying, gender, abuse prevention, drugs/alcohol, obesity/eating disorders, stress, peer relationships, and school success. They demonstrate their understanding of course concepts through various applications, including the creation of an informative brochure for the purpose of explaining topical issues on health and wellness to parents and other stakeholders.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
EDUC 4304 - Trends and Issues in Adolescence

(5 cr.)
Physical changes and social pressures make adolescence a challenging time for many teens; therefore, it is important for professionals to be aware of current trends and critical issues that affect the mental and physical well-being of this age group. Education professionals in this course examine and discuss selected issues and trends related to adolescents, such as technology/media, cyber bullying, gender, sexual orientation, drugs/alcohol, obesity/eating disorders, depression, self-injury, suicide, teenage pregnancy, and school success. Applying course concepts, education professionals engage in practical exercises, such as research analyses through which they explore the connections between topical issues and the larger world as they affect adolescents and their transition into adulthood.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 4305 - Making Connections: The Role of the Professional

(2 cr.)
In this course, education professionals explore the role of the professional as advocate, interventionist, family liaison, and public policymaker. They make connections between key topics and their personal experiences, interests, and aspirations; other coursework; current research; real-world settings; and future trends, challenges, and possibilities related to the development of the whole child. They engage in various discussions and activities related to the responsibilities of educators, such as the development of action plans detailing how they would organize and participate in interventions in response to specific situations. Education professionals also consider how they might engage in advocacy as part of their current or future profession.

EDUC 4500 - Capstone

(7 cr.)
In this course, education professionals have the opportunity to integrate knowledge of child development; principles and methods of working with school-age children and adolescents; and current research, issues, and trends that affect this age group. They create an integrative project that demonstrates synthesis and application of this knowledge. They consider professional goals while reflecting on research, issues, and trends explored throughout the program. Education professionals research a variety of positions in the field based on interests gained from learning experiences, and they develop a resume and cover letter to distinguish themselves competitively. Additionally, they complete a professional development plan through which they set goals and
consider areas for further professional development.

Prerequisites

- Completion of all other required coursework

EDUC 5005 - Foundations: Early Childhood Studies

(5 cr.)
Students in this course focus on the study of leadership and professionalism in the early childhood field, examining current research, ethical considerations, and multiple theories of child development, teaching, and learning. Students will be introduced to the foundation of evidence-based research and decision making, which will be interwoven throughout the program. Students will also build their understanding of the philosophy, requirements, and community of Walden University, The Richard W. Riley College of Education and Human Services, and the master's degree program in Early Childhood Studies.

EDUC 5105 - Organizations, Innovation, and Change

(5 cr.)
Understanding the fundamentals of organizational behavior and change management are essential for facilitating innovation in any organization. In this course, students examine the role the instructional designer can play in managing change within an organization. Students evaluate leadership qualities and practices that foster and sustain innovation in settings such as corporations, higher education, K–12 education, government, healthcare, and nonprofit organizations. Topics include the resistance to change and barriers to innovation, as well as problem-solving techniques that promote competitive advantage.

EDUC 5115 - Learning Theories and Instruction

(5 cr.)
Effective instructional design begins with an understanding of the learning process. Students in this course examine behaviorist, cognitive, constructivist, and social learning theories, and their relationship to instructional practices and course design. Factors that influence learning, such as learning styles, motivation, and engagement, are also explored.

Prerequisites

- EDUC 5105

EDUC 5160 - Early Childhood Development

(5 cr.)
Students in this course look closely at typical and atypical physical, cognitive/language,
and social and emotional development. Attention will be paid to the powerful and important role cultural and linguistic diversity play in the development of children prenatal through age 8. Students will observe children in a variety of settings, learn how adults can support healthy development, and study new findings related to the factors that foster and impede healthy development and learning.

Prerequisites
- EDUC 5005

EDUC 5161 - Effective Programs and Practices

(5 cr.)
Research states that long-term benefits from early childhood programs result only when the programs are of high quality. Students in this course focus on the components essential to program effectiveness, including planning for, improving, and evaluating program quality. Students will learn research-based, effective practices for promoting learning and development across developmental domains and subject matter areas from birth through age 8.

Prerequisites
- EDUC 5160

EDUC 5162 - Issues and Trends in the Early Childhood Field

(5 cr.)
Leaders in the early childhood field must have in-depth understanding of the critical issues and trends affecting young children, their families, and the field. Students will study such topics as the impact of changing demographics; the influence of politics and economics on programmatic funding streams; current debates related to school success, the achievement gap, and effective assessment; and the impact of brain research on early development, care, and education from both a historical and current perspective.

Prerequisites
- EDUC 5161

EDUC 6001 - MSED Resource Toolkit

(0 sem. cr.)
The purpose of this zero-credit course is to assist students with making steady progress toward earning an MS in Education degree. Information and resources related to action research, scholarly writing, major assessments, program expectations, and other topics are provided for candidates to help them become successful graduate students, scholarly practitioners, and educators who effect positive social change. This course is meant to provide items that are essential to success while not repeating what candidates receive from other areas of Walden support.
Note: This course is offered for no credit and the candidate will receive no grade.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6002 - Foundations: Educational Leadership and Administration

(3 sem. cr.)
Candidates start this course by building on their understanding of the philosophy, requirements, and community of Walden University, The Richard W. Riley College of Education and Human Services, and the program. Candidates complete a pre-assessment and develop an individual learning plan.

Following this essential introductory work, candidates begin their study of school leadership by focusing on the structures of school organizations and leadership styles.

EDUC 6003 - Foundations of Early Childhood Professionalism

(3 sem. cr.)
What does it mean to be a professional in the diverse and dynamic early childhood field? Why is considering the dignity, worth, and uniqueness of every child, family, and colleague integral to professionalism as well as healthy growth and development? How are early childhood professionals making a difference as advocates and leaders? Early childhood professionals in this course begin a rich and complex journey examining the breadth and depth of the field; what it means to be a professional guided by a code of ethical conduct; and the critical role research plays in illuminating how early childhood professionals can work as leaders and advocates to help young children, families, and the field grow and thrive.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6005 - Foundations: Early Childhood Studies

(3 sem. cr.)
In this course, education professionals focus on leadership and professionalism in the early childhood field; analysis of current research; ethical considerations; and multiple theories of child development, teaching, and learning. Education professionals are introduced to the foundation of evidence-based research and decision making, which is interwoven throughout the program. Education professionals also build understanding of the philosophy, requirements, and community of Walden University, the Richard W. Riley College of Education and Human Services, and the MS in Early Childhood Studies program.

EDUC 6010 - Mathematics K–6: Instruction and Assessment
This coherent and rigorous approach to teaching and learning K–6 mathematics focuses on conceptual understanding, procedural skills, and application of mathematical knowledge. Coursework also focuses on helping teacher candidates promote problem-solving and communication skills as the core for teaching numbers and operations, algebra, data analysis, probability, measurement, geometry, and the use of manipulatives across math strands. Themes threaded throughout the course include technology, real-world applications, integrating math with other content areas, and building on the strengths and overcoming the challenges of diverse learners. This course includes 15 hours of field experience.

**Prerequisites**
- EDUC 6054

**EDUC 6020 - Science K–6: Instruction and Assessment**

This course, education professionals explore teaching and learning in science, based on the latest research on the most effective methods for teaching appropriate science curriculum from kindergarten through Grade 6. Candidates focus on ways to use developmentally appropriate strategies to promote modes of inquiry and analytical skills in science education. They also explore instructional and assessment strategies to develop children's conceptual understanding of science, particularly relating to the standards for physical, life, and earth and space sciences. Candidates examine and apply integration of science with reading, math, social studies, and technology. Candidates consider their own science content knowledge and explore local professional development opportunities. This course requires a 15-hour field experience at a school approved by Walden University.

**Prerequisites**
- EDUC 6054

**EDUC 6030 - Demonstration Teaching/Seminar: Professional Ethics, Communication, and Collaboration in Elementary Education**

Demonstration teaching is the culminating experience in the teacher preparation program and is an opportunity to apply knowledge and skills. Education professionals participate in orientation activities and then gradually assume complete teaching responsibility of an elementary classroom. Education professionals take full control for 4 consecutive weeks over a 12-week placement, gaining real-world experience and the opportunity to translate theory into practice. Candidates demonstrate the various roles of an elementary educator. Education professionals work closely with, and are evaluated by, their Walden University
supervisor, classroom cooperating teacher, and Walden faculty member. During demonstration teaching, all professionals complete the Education Teacher Performance Assessment (edTPA), participate in weekly discussions, and complete a collaboration based major assessment. This course requires a 12-week full-time classroom experience at a school approved by Walden University.

Prerequisites

- Completion of all other required coursework

EDUC 6050 - Child Development, Motivation, and Learning

(5 cr.)
In this course, teacher candidates prepare to understand the social, physical, emotional, and intellectual growth and development of children as related to learning and motivation in the elementary classroom. Teacher candidates explore philosophies and theories of child development and make connections between and among the key topics of development, learning and motivation, and social and cultural diversity. Learning environments and resources (including technology) that support the developmental needs of elementary children are identified and analyzed. In addition, teacher candidates explore the importance of family and community connections to support children's learning; develop strategies for engaging families in the learning process of their children; and consider the role of children's interests and personal experiences when planning instruction. Teacher candidates identify typical and atypical developmental patterns; analyze effectiveness of instructional strategies; and consider the role of specialists in supporting children's growth and development.

Prerequisites

- EDUC 6401

EDUC 6051 - Collaboration to Support All Learners

(5 cr.)
In this course, candidates explore strategies for effective communication and collaboration with colleagues, specialists, families, and community agencies to provide support for all children. Candidates examine collaboration strategies that promote the growth and learning of all children in the elementary classroom, including those with exceptionalities, gifted and talented students, and English language learners. Candidates learn about the roles of all participants in collaborative teams, including coteaching and participating in the Individualized Education Program (IEP) process. Candidates examine the role of the school in supporting all learners within the larger community context. They identify factors in the students' environments that may affect their growth and learning and explore strategies for effective collaboration with diverse families.

Prerequisites

- EDUC 6402
EDUC 6052 - Effective Practices: Planning, Instruction, and Assessment

(5 cr.)
To help ensure high levels of learning and achievement for all students, today's educators must be knowledgeable about learners and learning and well-versed in effective teaching and assessment practices. In this course, education professionals examine the interrelationships between assessment, teaching, and learning as well as effective practices for applying and integrating these critical components in the K–6 classroom. They gain a historical perspective on the standards and accountability movement and examine standards in their state or local setting. They also explore learning theory in the context of today's challenging educational goals and standards. In this course, education professionals learn and apply research-based practices in effective assessment, curriculum design, and instruction. Through on-site experiences and Virtual Field Experiences, they critically analyze and implement teaching and learning principles and practices that help ensure awareness of the individual and collective needs of students. This course requires a 15-hour field experience at a school approved by Walden University.
Prerequisites
  • EDUC 6401

EDUC 6053 - Community Building for Effective Classroom Management

(5 cr.)
In this course, education professionals learn to create safe, supportive, and respectful learning environments that promote social-emotional development, self-responsibility, and character to optimize learning for all students. Teachers will learn how to foster a sense of community in the classroom and develop positive relationships with and among students. Age-appropriate skills and strategies for managing dynamic and flexible grouping structures and for teaching conflict resolution will be presented. The course also provides strategies for building positive relationships, fostering motivation, and engaging in effective communication and problem solving with parents and families. This course requires a 15-hour field experience at a school approved by Walden University.
Prerequisites
  • EDUC 6401

EDUC 6054 - Literacy K–6: Instruction and Assessment

(5 cr.)
Reading, listening, speaking, and writing are skills essential to success in school and in
life. In this course, teacher candidates can examine a wide range of effective instructional and assessment practices that support the development of reading, oral language, and written communication for K–6 students. Teacher candidates use research-based approaches to literacy instruction while implementing a variety of assessment tools to identify students' difficulties. Teacher candidates use assessment data to create engaging literacy learning experiences at diverse developmental levels. Topics include the incorporation of technology to support and enrich literacy learning, family involvement, and integrating literacy and learning into the content areas. This course requires a 15-hour field experience at a school approved by Walden University.

**Prerequisites**
- EDUC 6402
- EDUC 6052

**EDUC 6055 - Social Studies and the Arts K–6: Instruction and Assessment**

(5 cr.)
In this course, candidates prepare to become effective educators of social studies and the arts. As they plan and implement instruction, candidates integrate the major concepts, themes, and modes of inquiry from social studies and the arts. Emphasis is on developing strategies to help students become effective citizens of a democratic and culturally diverse society. Candidates focus on building connections across disciplines and using the arts to foster student engagement and communication and promote their abilities to construct and apply knowledge. Candidates use multiple assessments to measure student progress and modify instruction to address the needs of all learners in diverse classrooms. This course requires a 15-hour field experience at a school approved by Walden University.

**Prerequisites**
- EDUC 6053
- EDUC 6054
- EDUC 6056
- EDUC 6010
- EDUC 6020

**EDUC 6056 - Integrating Content and Technology to Enhance Learning**

(5 cr.)
In this course, teacher candidates explore strategies for integrating technology across content areas in order to plan units and lessons that support developmental and curricular goals for elementary students. Candidates create learning experiences that promote student motivation and engagement; support exploration, problem-solving, and critical thinking; provide opportunities for collaborative and self-directed learning; and foster content area literacy. Candidates explore a wide variety of technology resources,
infusing them in instructional planning to help students learn content and become proficient in the use of technology. Candidates examine effective teaching practices, including formative/authentic assessments and scaffolding techniques to support diverse learners. This course requires a 15-hour field experience at a school approved by Walden University.

Prerequisites
- EDUC 6054

EDUC 6101 - The Developing Brain and the Young Child♦

(3 sem. cr.)
Research on how the brain develops in utero and throughout early childhood provides insights and guidance critical to young children’s healthy development. As brains develop, early experiences affect brain architecture in ways that promote or impede healthy relationships, self-concepts, growth, and learning. Early childhood professionals, as leaders and advocates in the field, study current, fascinating research on brain architecture, child mental health, and the ways toxic stress, trauma, and resilience influence child development across domains.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6102 - Family and Community Partnerships♦

(3 sem. cr.)
Traditions, cultures, structures, interactions, and values all influence the developing child. Understanding family context, at the heart of which is respecting each family’s dignity, worth, and uniqueness, is key to developing partnerships that help young children thrive. However, building partnerships with families is not a simple, one-size-fits-all process. In this course, early childhood professionals study the components and nuances of family context and ways to build and sustain culturally responsive, reciprocal relationships with families. Such relationships foster effective family collaboration within early childhood settings and in efforts to partner with community organizations to foster children’s healthy development and learning.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6103 - Play and Creativity♦

(3 sem. cr.)
Play is a time when children explore, discover, and imagine; they express themselves, lose themselves, and find themselves all over again. Creativity may involve seeing the world in new ways, finding new ways to solve problems, and giving birth to ideas based on who each child is, what they feel, and how they learn, think, and interact. Early
childhood professionals recognize that both play, and creativity are integral to healthy human development. And, both flourish in environments where children feel respected, are encouraged to take risks, and have time to live in what they are experiencing. In this course, early childhood professionals, as leaders of and advocates for effective practice, study international research and perspectives on the value of play and creativity and how to advocate for the infusion of play and creativity into early childhood teaching and learning.

do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6104 - Engaging Environments

(3 sem. cr.)

Early childhood environments have the power to invite learning, foster curiosity, and empower meaning-making. Such environments offer spaces for children to be quiet and introspective as well as interact in robust play. The aesthetics of early childhood environments can nurture children's appreciation of the many aspects of beauty, while the soul and feel of environments can help children and families be comfortable with who they are. In this course, early childhood professionals analyze the role of the environment as the third teacher, the ways early childhood environments support community and belonging, and the value of leading early childhood teams to create effective early childhood environments that nurture discovery, wonder, and awe. (This course requires 10 hours of field experience focused on developing and taking part in meaningful learning experiences in an infant/toddler, preschool or K-3 setting.)

Prerequisites

- EDUC 6003
- EDUC 6101
- EDUC 6102
- EDUC 6103

EDUC 6105 - Organizations, Innovation, and Change

(3 sem. cr.)

Understanding the fundamentals of organizational behavior and change management are essential for facilitating innovation in any organization. In this course, education professionals examine the role of instructional designers in managing change within an organization. They evaluate leadership qualities and practices that foster and sustain innovation in various settings, such as corporations, higher education, K–12 education, government, healthcare, and nonprofit organizations. They also explore the resistance to change and barriers to innovation as well as problem-solving techniques that promote competitive advantage.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
EDUC 6106 - Meaningful Curriculum P–3♦

(3 sem. cr.)
In order to design and implement meaningful learning experiences for and with young children, early childhood professionals must understand the principle content strands that comprise each academic discipline as well as the key concepts and methods of inquiry across academic disciplines. This course supports professionals, as advocates of meaningful curriculum, in leading efforts to apply knowledge of content and pedagogy to designing learning experiences that are engaging and challenging, and that reflect children’s individual, cultural, and linguistic diversity.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6107 - Observation and Assessment 0–8

(3 sem. cr.)
Early childhood professionals understand that observation is a critical method of assessment in early childhood settings. Thoughtful, ongoing observation and documentation are authentic approaches that provide a holistic picture of children and help to guide developmentally appropriate planning, interactions, and instruction. In this course, early childhood professionals consider their roles as leaders and advocates of effective observation and assessment practices who model and mentor the process of analyzing assessment strategies, methods, and data to support children’s healthy development and learning. They are challenged to critically examine and lead effective collaboration with families and other professionals to promote ethical and meaningful assessment practices, including early intervention.

(This course requires 10 hours of field experience focused on developing and taking part in meaningful learning experiences in an infant/toddler or preschool setting.)

Prerequisites

- EDUC 6104
- EDUC 6106

EDUC 6108 - Intentional and Responsive Practice in the Content Areas P–3♦

(3 sem. cr.)
Early childhood professionals understand that positive and supportive interactions with young children rightly place the young child at the heart of the learning and teaching process. In this course, early childhood professionals analyze developmentally appropriate approaches that reflect knowledge of how children develop and learn. In the role of leaders, they advocate and mentor by applying this knowledge to the planning of
differentiated learning experiences that are responsive to young children's individual strengths and needs as well as their family and cultural contexts. They examine concepts and evaluate models of quality inclusive care and education for young children. They build awareness throughout the field of the vital importance of reflective, responsive, and intentional practice to support and nurture the healthy growth and learning of each individual child.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6109 - Meaningful Learning Experiences: P–3

(3 sem. cr.)
Early childhood professionals employ a broad repertoire of skills and strategies that are appropriate for the young children in their settings. In this course, they apply their knowledge of young children's characteristics, needs, strengths, and family and cultural contexts to planning and instruction in an authentic P–3 classroom setting. They intentionally plan differentiated learning experiences to ensure challenge and meaning for each child as well as for the group. As they engage in the planning, learning and teaching, and assessment cycle, early childhood professionals collaborate with host teachers and other colleagues to sharpen their instructional skills, deepen reflection on their own practice, and lead professional development to promote effective practice in P–3 settings.
(This course requires 20 hours of field experience focused on developing and taking part in meaningful learning experiences in a preschool or K - 3 setting.)
Prerequisites

- EDUC 6107
- EDUC 6108

EDUC 6110 - Effective Leadership for Early Childhood Settings♦

(3 sem. cr.)
Effective leaders in early childhood settings develop and maintain programs that are grounded in ethical principles and exemplify healthy organizational culture. This effort takes an abundance of skill particularly related to modeling and applying ethical standards and legal requirements; building respectful relationships with—and between—staff, families, and children; and stewarding the program's mission and vision. Leadership is deeply challenging, rewarding, and dynamic. This course helps early childhood professionals in search of leadership skills, tools, and insights, become the program leaders they hope to be.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
EDUC 6111 - Effective Management for Early Childhood Settings♦

(3 sem. cr.)
Consider the needs and challenges of early childhood programs. How might knowledge of and skills related to budgeting, allocating resources, and obtaining additional funding help an early childhood professional develop and maintain a high-quality program? Creating successful grant proposals, having the tools to effectively market the program, and continuously working with staff to productively manage a facility with financial skill is key to program success as well as the ability to serve the best interests of children and families. This course provides early childhood professionals with a strong foundation in the key areas of grant writing, budgeting, and making strategic decisions about funding.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6115 - Learning Theories and Instruction♦

(3 sem. cr.)
Effective instructional design begins with an understanding of the learning process. The behaviorist, cognitive, constructivist, and social learning theories and their relationship to instructional practices and course design are also examined. Factors that influence learning, such as learning styles, motivation, and engagement, are also explored.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6125 - Foundations of Research♦

(3 sem. cr.)
An introduction to the principles and processes of research is provided in this course. Education professionals explore the various steps and considerations of the research process. They develop an understanding of basic research methodologies and statistical analyses, learn how to formulate research problems and questions, conduct a literature review, and critique and evaluate research. Additionally, they consider the ethical responsibilities of the researcher.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6135 - Distance Learning♦

(3 sem. cr.)
Online education could be the driving force that transforms education and training practices in the 21st century. Through this lens, education professionals explore the current trends impacting the field of distance education and their implications for the design and development of distance-learning programs. They examine the different
models, theories, and technologies used in the development and delivery of online education and training programs. They also explore the implications and considerations of designing instruction for blended, fully online, instructor-led, and self-paced learning environments.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6145 - Project Management in Education and Training♦

(3 sem. cr.)
Purposeful and careful planning is a key element to the success of any program. In this course, education professionals explore the systematic approaches to project management. Education professionals learn to use various project management tools, procedures, and methodologies, which they apply to projects in a real-world education or training environment. They also analyze the interrelated nature of the triple constraints of time, cost, and scope as well as their influence on the overall quality of the project.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6155 - Understanding Higher Education

(3 sem. cr.)
Historical perspectives on the development of higher education are useful in understanding the characteristics of our current system and future trends. The social, political, and economic context in which 4-year colleges, community colleges, and universities operate is introduced in this course. Education professionals explore how institutions of higher education apply business principles to renew their commitment to student learning and achieve their mission and goals effectively. They also become familiar with the philosophy, requirements, and community of Walden University, The Richard W. Riley College of Education and Human Services, and the M.S. in Higher Education program.

EDUC 6156 - Understanding Students: Learning, Development, and Diversity♦

(3 sem. cr.)
The success of any business is tied directly to its ability to serve its customers effectively. In higher education, those customers are students. In this course, education professionals examine fundamental principles of student learning and development as well as the implications of these principles for adult learners from a variety of backgrounds who have diverse needs and are in different stages of the educational process. They investigate and discuss factors affecting students' educational goals and aspirations, their ability to stay in college, and the impact of their educational
experiences on their learning and development; through this exploration and discussion, education professionals gain a better understanding of the ways leaders can improve these outcomes.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6157 - Understanding Institutions: Organizational Behavior and Culture♦

(3 sem. cr.)
Effective leadership within colleges and universities depends on the ability to identify important aspects of an organization’s structure and culture as well as to adapt one’s behavior to that culture. In this course, education professionals examine patterns of organization, governance, and culture in higher education, and they assess strategies for working effectively within governance structures and organizational cultures to achieve desired goals. They engage in readings and assignments that emphasize the organization’s ability to learn and change in response to internal and external factors, including the ever-changing use of technology in academic programs and services.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6158 - Using Research and Data to Drive Decision Making♦

(3 sem. cr.)
Making good decisions in higher education requires the effective use of an array of information sources. In this course, education professionals investigate strategies for implementing data-informed, decision-making processes, including critiquing and evaluating research findings, locating and interpreting appropriate data sources and making credible arguments based on current industry trends and institutional data. They also complete learning activities through which they focus on determining the implications of research and data for key institutional issues and using this knowledge to drive quality improvement.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6160 - Early Childhood Development

(3 sem. cr.)
Education professionals in this course critically examine typical and atypical physical, cognitive/language, and social and emotional development. They examine the powerful and important influence of cultural and linguistic diversity on the development of children from the prenatal stage through age 8. They also examine new findings related to the factors that foster and impede healthy development and learning, and they explore how adults can support healthy development. Additionally, education
professionals have the opportunity to observe children in a variety of settings to gain practical insight on the developing child in the real world.

EDUC 6161 - Effective Programs and Practices♦

(3 sem. cr.)
Researchers indicate that long-term benefits from early childhood programs result only when the programs are of high quality. In this course, education professionals explore the components essential to program effectiveness, including planning for, improving, and evaluating program quality. They learn research-based, effective practices for promoting learning and development across developmental domains and subject matter areas in children from birth through age 8. Education professionals transfer new knowledge and skills to an authentic context through practical assignments, such as reflective blog posts and real-world observations of professionals in the field.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6162 - Issues and Trends in the Early Childhood Field♦

(3 sem. cr.)
Leaders in the early childhood field must have in-depth understanding of the critical issues and trends affecting young children, their families, and the field. Education professionals in this course explore changing demographics; political and economic influence on programmatic funding streams; current debates related to school success, effective assessment and the achievement gap; and brain research influence on early development, care, and education from a historical and current perspective. Sharing perspectives and making connections with the professional world, educational professionals post blogs to establish contacts with early childhood professionals; reach out to international contacts in the field to gain an understanding of poverty issues in different regions, issues related to excellence at the forefront of professional discussions, and insights on further development opportunities; and share web resources, such as websites and e-newsletters.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6163 - Building Research Competencies♦

(3 sem. cr.)
Nearly all professionals benefit from the ability to understand, evaluate, and use research effectively. In this course, education professionals prepare to be knowledgeable consumers of research, understand the language of research, and apply research and inquiry skills to the early childhood field. They engage in a variety of conceptual and application-based assignments focused on building skills in analyzing trends, critically
assessing emerging knowledge, and using a variety of tools to access and evaluate research. They also have the opportunity to practice and apply course concepts and theories through research on early childhood research topics of personal or professional interest.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6164 - Perspectives on Diversity and Equity♦

(3 sem. cr.)
Understanding and respecting the diversity and individuality of every child and family is central to effective practice and at the heart of the early childhood field. Education professionals in this course examine family cultures and their impact on children and programs, and they investigate issues related to access, equity, and social justice. Through assignments designed to provide practical application of content, they also work toward developing an in-depth understanding of the intricacies of diversity, scrutinizing their own biases to effectively work with and advocate for all children and families.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6165 - Communicating and Collaborating in the Early Childhood Field♦

(3 sem. cr.)
Professionals in the field of early childhood education must engage often with other colleagues, families, agencies, and government officials; therefore, communication and collaboration skills are essential to effective and productive work in the field. Education professionals in this course explore the use of tools and strategies to collaborate with others, such as building relationships, teaming, negotiating, problem-solving, resolving conflicts, and building consensus. They engage in coursework that emphasizes effective practices for working with diverse families, collaboration with colleagues to improve programs and services for children and families, and communication skills needed to advocate and work effectively with agencies and government officials. Through this course, education professionals learn and practice techniques essential to effective one-on-one interactions and group work while deepening their understanding of how cultural responsiveness influences successful communication and collaboration.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6166 - Developing People and Leading Teams♦

(3 sem. cr.)
The success of any manager is largely dependent on the leadership they provide their
staff. Students in this course explore the roles and responsibilities of directors and/or administrators in effectively managing individuals and leading teams for early childhood programs. Education professionals in this course focus on staff recruitment, evaluation, and development, and they identify the skills and knowledge required to create positive environments and achieve individual and organizational goals. In this course, the educator will be challenged to consider the ethical, legal, and cultural implications of working with a diverse staff, with emphasis given to the importance of effective communication in maintaining productive relationships.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6167 - Budgeting and Allocating Resources♦

(3 sem. cr.)
Administrators of early childhood programs must be able to effectively budget and allocate resources. Education professionals in this course explore the role of the administrator in budgeting and handling resource allocation for early childhood programs. They examine processes for effectively managing budgets and explore strategies designed to help them understand and communicate budgets to stakeholders. Education professionals also explore the various sources of funding and plan a budget for an early childhood education program.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6168 - Planning and Managing Early Childhood Programs♦

(3 sem. cr.)
Effective early childhood directors/administrators are responsible for planning, implementing, and evaluating programs to ensure quality experiences for the children and families they serve. In this course, effective administrators focus on the wide range of roles in which they must excel, including developing and maintaining the program’s mission and vision, understanding regulatory and accreditation requirements, marketing, and providing all children proper nutrition and safety while in their care. Education professionals in this course also examine the importance of engaging in meaningful communication with parents, families, and communities.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6170 - Dynamics of Adult Teaching and Learning♦

(3 sem. cr.)
The field of adult learning is multifaceted; adult learners are also complex, bringing diverse backgrounds, experiences, and perspectives into the classroom. This course is a
foundation for understanding this dynamic field. Education professionals examine what it means to be a leader in a fast-paced, changing environment. They explore and discuss key topics, including the conceptual base of the field, adult learner motivation, settings and contexts of practice, forms and processes of adult learning, best practices that support adult learning, and major issues and controversies in the field today. Applying course concepts, education professionals develop a personal philosophy of adult education to use as a guide in their current or future practice as an adult educator. They also become familiar with the philosophy, requirements, and community of Walden University, The Richard W. Riley College of Education and Human Services, and the MS in Adult Learning program.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6171 - Theories and Frameworks for Adult Learning♦

(3 sem. cr.)
To understand adult learning, one must ask and answer complex questions: Who is the adult learner? What is the social context of learning? What motivates adult learners? In this course, education professionals explore the theories and frameworks that inform the field of adult learning today. They identify, compare, and contrast foundational and emerging perspectives on adult learning with the aim of transforming theory into practice. They engage in an integrative course project through which they synthesize and apply various theories to real-world situations, including their own development; summarize how the idea of wisdom impacts their experiences as adult learners; interview an adult learner; and assess various perspectives in regard to educating diverse learners.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6172 - Cultural Diversity and Motivation♦

(3 sem. cr.)
Today’s diverse, multicultural world dictates that adult learners are not treated as a homogenous group but rather as distinct individuals, each with his or her own intrinsic motivations. Education professionals in this course learn the importance of culturally responsive teaching methods that promote respect, relevance, engagement, and academic success. They engage in readings and assignments focused on inclusive approaches that promote cross-cultural communication, and they explore and discuss a range of topics, such as race, ethnicity, gender, sexual orientation, nontraditional learners, and linguistic diversity.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
EDUC 6173 - Building Research Competencies in Adult Education

(3 sem. cr.)
Understanding, evaluating, and using research effectively are critical skills for adult learning professionals. In this course, education professionals work toward gaining the knowledge required to be critical consumers of research, understand the language of research, and apply research and inquiry skills to the field of adult learning. Through various conceptual and practical course assignments, they build competence in analyzing trends, assess emerging knowledge, and learn to use a variety of tools to access and evaluate quantitative and qualitative research.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6174 - Developing a Repertoire of Effective Teaching Practices

(3 sem. cr.)
A number of best practices in adult teaching and learning have been identified based on decades of research and experience. Education professionals in this course examine these evidence-based practices to build their skills and gain strategies to facilitate learning in a variety of settings. They also explore promising new ideas and emerging trends in the field of adult learning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6175 - Planning, Assessing, and Improving Adult Learning

(3 sem. cr.)
Given the wide variety of settings in which adult learning takes place, it is no small challenge to plan and implement robust learning experiences that can be effectively evaluated. Education professionals in this course examine the ingredients essential to promote learning successfully, including multiple needs assessment models, approaches to program design, implementation strategies, and models of evaluation and assessment.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6176 - Facilitating Collaboration and Group Process

(3 sem. cr.)
Research shows that adults learn best in a social environment. Through collaboration and idea exchange, a supportive "community of practice" is generated where learners co-create their experience in socially meaningful ways. This may take the form of discussions, peer-to-peer activities, small-group work, and student-centered assignments, among other approaches. Education professionals in this course
examine the mechanics of collaboration and identify facilitation practices that lead to student success. Also addressed are issues of consensus and decision making, trust-building, collaborative teaching, and group process online.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6177 - Using Technology to Enhance Adult Learning♦

(3 sem. cr.)
Emerging technologies are rapidly altering the field of adult education today. Innovative technologies are removing traditional boundaries to learning and encouraging a global perspective on school, work, and communications. New developments in software, multimedia applications, Internet technologies, and mobile computing are transforming the educational landscape and empowering learners around the world. Education professionals explore how educators and students can leverage these advances to enhance the learning process and improve outcomes in today’s digital information society.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6178 - Organizations, Systems, and Change♦

(3 sem. cr.)
Adult learning takes place in a wide variety of formal and informal settings. Each of these environments has its own organizational structure, or "system," that must be understood and considered when designing and implementing learning strategies. Understanding the fundamentals of organizational behavior, systems theory, and change management is essential for facilitating innovation and performance enhancement. In this course, key issues such as policy, advocacy, complexity, change, organizational development, and group dynamics are addressed in the context of developing transformational experiences for adult learners.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6179 - Online Instructional Strategies for Adult Learners♦

(3 sem. cr.)
Effective instruction in an online setting requires strategies that leverage the unique characteristics of distance learners and online environments. In this course, students analyze, select, and design instructional strategies that are most effective for engaging and teaching adult online learners. Students learn methods for managing and delivering online instruction, with the goal of integrating effective strategies with course management tools and multimedia technologies in both synchronous and asynchronous
EDUC 6180 - Assessments in Online Environments for Adult Learners

(3 sem. cr.)
The online environment provides instructors with the opportunity to reach beyond traditional practices and explore new ways of assessing student learning outcomes. In this course, students apply their knowledge of learning theory and assessment practices to the development of assessment strategies in online education and training environments. Students review research and practical strategies for assessing student learning in both synchronous and asynchronous environments.

EDUC 6181 - Developmental Education: Theory and Practice

(3 sem. cr.)
The need for developmental education in community colleges and 4-year institutions continues to grow, as does the need for developmental educators who are prepared to help this population of students achieve success. In this course, students examine developmental education from a historical perspective and will explore the theoretical frameworks, political and economic issues, and key research surrounding developmental education. Students also learn common organizational approaches to offering developmental education and the characteristics of developmental education student populations, courses, and programs.

EDUC 6182 - Strategies for Success in Developmental Education

(3 sem. cr.)
Meeting learners’ needs for developmental education requires creativity and perseverance as well as a willingness to learn from the experiences of other institutions. Students in this course examine approaches to developmental education that have proven successful in a variety of contexts, including strategies for intake and placement, advising, teaching, and assessment. Students also investigate best practices in curriculum design and the use of technology in developmental education, programs to support student retention and persistence, and ways of facilitating collaboration between academic and student affairs in support of developmental education.
EDUC 6183 - Performance Improvement in the Workplace

(3 sem. cr.)
Education professionals in this course survey the research, models, and issues associated with improving human performance in workplace settings. They explore methods and techniques for recognizing and analyzing performance gaps, conducting needs assessments, determining appropriate instructional and performance support interventions, and measuring the results of implemented solutions. Emphasis is placed on determining whether adult education or performance improvement interventions are appropriate for addressing identified needs. Education professionals also use results from analyses to inform the design of job aids, instruction, and other performance support systems.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6184 - Training and Development Systems

(3 sem. cr.)
The ability to manage and deliver training is an essential skill for human resource and performance improvement professionals working with adult learners. In this course, students study models, techniques, and best practices for managing and delivering training systems and modules. Topics include managing the learning environment, selecting appropriate materials and assessments, and tracking learner performance and completion. Students also explore technologies that support the planning, presenting, and managing of instructor-led and self-directed courses and training systems in both face-to-face and virtual environments.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6185 - Fundamentals of Teaching Adults English as a Second Language

(3 sem. cr.)
Students in this course are introduced to the fundamentals of teaching English as a second language to adult learners. The vocabulary and acronyms relevant to the field are introduced, and the essential theories and concepts of second language acquisition are explored. The diversity of adult learners and their motivations, as well as the variety of formal and informal teaching settings, both in the United States and abroad, are examined. Professionalism and respect for differences in language, culture, and belief systems are emphasized.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6186 - Methods of Teaching Adults English as a Second Language
(3 sem. cr.)
A variety of instructional methodologies for teaching English as a second language to adult learners are introduced. The basic principles, current trends, and established techniques of second language instruction are examined, with an emphasis on the communicative language teaching (CLT) approach. Best practices in reading/writing and speaking/listening instruction are given special attention, while challenges such as community building and managing the learning environment are also addressed.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6187 - Planning, Assessment, and Evaluation for Teaching Adults English as a Second Language♦

(3 sem. cr.)
Students are introduced to the basics of planning lessons, designing assessments, and evaluating adult learners in English as a second language settings. Strategies for creating meaningful, authentic lessons and materials for a variety of contexts are explored; the various approaches to testing and assessing language needs and competencies are analyzed; and best practices in evaluation and placement are examined with the goal of creating the most conducive and effective environments for language learning possible.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6190 - Capstone: Practical Application in Adult Learning

(3 sem. cr.)
In this course education professionals are provided with the opportunity to integrate and apply the theories, concepts, and practices learned in previous coursework to real-world issues and problems. The capstone experience, in which education professionals are asked to select a specific adult learning situation of personal relevance for study, serves as the culmination of the program. Education professionals conduct a detailed analysis and offer solutions to a problem or suggest interventions to improve current practice.

EDUC 6200 - Teaching and Learning for School Leaders

(3 sem. cr.)
Effective educational leaders influence the quality of teaching by understanding how to recognize outstanding teaching and facilitate improvement by communicating how and why learner-centered teaching enhances the learning outcomes of every student. Candidates in this course are introduced to the latest research on education, teaching, and learning, and they develop an understanding of how research informs effective approaches to instruction.
EDUC 6201 - Communication and Collaboration for Leaders

(3 sem. cr.)
Effective educational leaders work to foster shared understanding of and commitment to making sure that every student learns and succeeds; this requires the ability to communicate and the capacity to create conditions and processes that foster collaborative problem solving and decision making. Education professionals in this course explore the characteristics of effective leaders. They learn how to model open and responsive communication as well as how to create time and use tools to ensure that such interactions are common within the school and throughout the school community. They also explore the role of schools in communicating with and drawing upon community resources of various types, including public agencies and organizations that serve youth and families. Through this course, education professionals work toward establishing the personal, ethical, and moral platforms to become effective leaders who model and promote ethical and productive civic behavior.

EDUC 6202 - Ensuring Quality Education for Students With Diverse Needs

(3 sem. cr.)
Education professionals in this course explore and analyze the issues, complexities, responsibilities, and opportunities associated with leading schools with diverse student populations. By acknowledging differences among learners, as well as biases, discrimination, prejudices, and stereotypes, school leaders can identify diversity as a dynamic contributing factor to a rich learning environment in which individual differences are honored and respected. A focus of the course is also on one of the most challenging tasks facing schools today: to substantially increase the achievement of students placed at risk because of limited facility with English, and physical, mental, and emotional disability. Candidates will study diverse and inclusive approaches that have proven most effective in supporting all language learners and students with special needs to reach high standards of performance.

EDUC 6203 - Policy and Law in School Organizations

(3 sem. cr.)
Educators in this course study selected general legal principles, case and statute law, and law-making agencies that impact leaders and their educational institutions. Key content areas include but are not limited to the legal status of the local school district; the role of federal, state, and local governments that may apply; governance of schools; and policies, rules, and regulations. Educators in the course will also cover the legal rights, responsibilities, and obligations of administrators, teachers, students, parents, and school boards, community education, civil rights, collective bargaining, torts and contracts, and legal research, as well as the development of policy to meet regulations and other provisions.
EDUC 6204 - Using Data to Strengthen Schools

(3 sem. cr.)
Education leaders must use data extensively to guide them in defining needs, setting and prioritizing goals, monitoring and evaluating progress, and identifying effective strategies for improvement. The continuing analysis of the gaps between student performance and student learning goals defines the actions of effective school leaders. Decision-makers must understand the array of data that are needed for school improvement. They must know the principles and techniques of measurement, evaluation, and data analysis. They must use a multitude of strategies to analyze data to propel teaching and learning and school improvement. They should use technology to support the collection and use of data. They need to engage the school community (teachers, parents, and students) in understanding and supporting data to guide the analysis of strengths, weaknesses, threats, and opportunities in the ongoing pursuit of school improvement.

EDUC 6205 - Budgeting and Allocating Resources

(3 sem. cr.)
Research on effective schools provides guidance on the most productive ways to organize time, people, money, technology, and other resources. To use these resources most effectively, leaders need to have a strategy that defines the most important priorities, the overall educational design, and the organizational structures that best match the necessary goals for improvement. Effective leaders need to be able to (1) link whole-school strategic plans to effective instructional practices and improved use of time and money; (2) ensure individualized attention where needed in subject areas; (3) evaluate alternative paths to school improvement; (4) invest wisely in improving teaching quality; and (5) organize staff and use other resources in new ways that allow focused investment in teaching and learning.

EDUC 6206 - Creating Positive, Safe, and Effective Learning Environments

(3 sem. cr.)
Effective educational leaders develop capabilities to foster cultures for learning based on mutual respect among students, teachers, staff, parents, and the larger community. Strategies for fairly and effectively administering discipline and resolving conflict are addressed. This course is intended to help leaders understand and treat individual and group differences and potential conflict as opportunities for developing the dispositions, knowledge, and skills that result in social competencies essential to civic participation and interpersonal effectiveness in school and beyond. Candidates also study issues related to safety and violence in schools, considering both methods of prevention and ways to respond to unsafe and violent situations.

EDUC 6207 - Leading Curriculum Initiatives: Literacy and Math
To be effective, school leaders must understand the foundational principles of teaching—curriculum, instruction, and assessment. Education professionals in this course also focus on the considerations with which they need to engage as they plan for the adoption and implementation of a new or substantially revised program to enhance student learning in a content domain. Literacy and math are two content areas that are problematic in many schools, especially those serving diverse students and students who are underperforming. Thus, while the lessons are applicable to other subjects, the focus here is on how to ensure that content standards, curriculum materials, assessment, instruction, professional development, and parental and community involvement, among other initiatives, are aligned in ways that foster student achievement in literacy and math.

**EDUC 6208 - Recruiting, Evaluating, and Retaining School Personnel**

Candidates study human resources policies and practices for recruiting, selecting, hiring, inducting, developing, evaluating, and retaining or dismissing school personnel. Identifying teachers’ needs for professional growth is important, but leaders must also ensure that teachers have the opportunity and motivation to use their professional expertise and to participate in ongoing professional development focused on enhancing the learning of every student. As well, school leaders must be able to identify characteristics of productive teacher evaluation processes and programs; distinguish between supervising teaching and supervising learning; and utilize a process and structure for evaluating school personnel that is productive and supportive, motivates improvement, results in retention of highly competent staff members, embodies standards of due process, and takes into account the provisions of the contractual agreements for staff.

**EDUC 6209 - Collaboration to Support All Learners**

In this course, candidates explore strategies for effective communication and collaboration with colleagues, specialists, families, and community agencies to provide support for all children. Candidates examine collaboration strategies that promote the growth and learning of all children, including those with exceptionalities. Candidates learn about the roles of all participants in collaborative teams such as Individualized Education Program (IEP) team, professional learning communities (PLCs), and co-teaching teams. Candidates examine the role of the school in supporting all learners within the larger community context. They identify factors in the students' environments that may impact their growth and learning and explore strategies for effective collaboration with diverse families.

**Prerequisites**
- EDUC 6605
- EDUC 6607
• EDUC 6627

(Co-requisites: EDUC 6688)

EDUC 6210 - Online Instructional Strategies

(3 sem. cr.)
Effective instruction in an online setting requires strategies that leverage the unique characteristics of distance learners and online environments. In this course, educators apply their knowledge of instructional design and distance learning to analyze, select, and design instructional strategies that are most effective for engaging and teaching online learners. They learn methods for managing and delivering online instruction, with the goal of integrating effective strategies with course management tools and multimedia technologies in synchronous and asynchronous environments.

EDUC 6211 - Assessments in Online Environments

(3 sem. cr.)
Instructors are provided with the opportunity to reach beyond traditional practices and explore new ways of assessing student learning outcomes in the online environment. In this course, educators apply their knowledge of learning theory, assessment practices, and instructional design principles to the development of assessment strategies in online education and training environments. They review research and practical strategies for assessing student learning in synchronous and asynchronous environments.

EDUC 6225 - Foundations of Research

(3 sem. cr.)
An introduction to the principles and processes of research is provided in this course. Education professionals explore the various steps and considerations of the research process. They develop an understanding of basic research methodologies and statistical analyses, learn how to formulate research problems and questions, conduct a literature review, and critique and evaluate research. Additionally, they consider the ethical responsibilities of the researcher.

EDUC 6260 - Managing Resources for Organizational Success: Human Resources

(3 sem. cr.)
Faculty members and staff are the most important resource in any higher education institution. In this course, education professionals focus on strategies for human resource management in higher education, including recruitment and staffing, professional development, compensation, performance evaluation, and legal considerations. They investigate issues specific to faculty members, including promotion and tenure, collective bargaining, and collaboration with adjunct faculty members. They
also examine the skills needed to coach, support, motivate, and facilitate collaboration among staff, enabling the organization to move toward desired outcomes.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6261 - Managing Resources for Organizational Success: Finance♦

(3 sem. cr.)
As costs escalate and resources dwindle, the effective, ethical, and socially responsible management of financial resources becomes an increasingly important skill in higher education. Education professionals are introduced to the fundamentals of financial administration in 4-year colleges, community colleges, and universities in this course. They explore financial issues specific to higher education, such as budget management, asset management, state appropriations, administration of financial planning, and fundraising. They also engage in practical learning activities through which they develop and assess strategies for deploying and managing resources to achieve established goals.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6262 - Optimizing Quality and Productivity♦

(3 sem. cr.)
Optimizing quality and productivity in a higher education organization requires the ability to initiate and support positive change efforts. In this course, education professionals explore and discuss best practices for analyzing and evaluating organizational performance; identifying opportunities for improvement; and leveraging available resources, including technological resources, to support productive change initiatives. They also investigate strategies for achieving quality and productivity goals in the context of accountability, including defining outcomes aligned with the institution's strategic plan, establishing credible outcome measures, and demonstrating how to use outcomes data to improve programs and services.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6263 - Best Practices for Student Success♦

(3 sem. cr.)
Student success depends not only on the quality of the institution's academic programs but also on the quality and availability of student services. In particular, the growing need to help increasingly diverse student populations succeed in college requires innovative approaches to retention and support initiatives. In this course, education professionals explore strategies to plan, organize, and manage student services and programs effectively as well as for ensuring that these programs meet legal and regulatory
requirements. They also engage in coursework that emphasizes the design and deployment of programs and services, which enables students from diverse backgrounds to achieve their educational goals.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6264 - Program Planning and Assessment♦

(3 sem. cr.)
Higher education institutions achieve their goals primarily through instructional programs as well as through student support programs and services. Stakeholders at all levels within and outside the organization, including students, administrators, employers, legislators, and the public, expect institutions to demonstrate that their programs accomplish desired goals and that processes are in place to support data-driven improvement. In this course, education professionals engage in the cyclical process of program planning and assessment, including establishing goals and outcomes, creating and implementing an assessment plan, sharing results and determining strategies for improvement, and involving faculty, staff, and students in the assessment process.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6271 - Theories and Frameworks for Adult Learning♦

(3 sem. cr.)
To understand adult learning, one must ask and answer complex questions: Who is the adult learner? What is the social context of learning? What motivates adult learners? In this course, education professionals explore the theories and frameworks that inform the field of adult learning today. They identify, compare, and contrast foundational and emerging perspectives on adult learning with the aim of transforming theory into practice. They engage in an integrative course project through which they synthesize and apply various theories to real-world situations, including their own development; summarize how the idea of wisdom impacts their experiences as adult learners; interview an adult learner; and assess various perspectives in regard to educating diverse learners.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6274 - Developing a Repertoire of Effective Practices

(3 sem. cr.)
A number of best practices in adult teaching and learning have been identified based on decades of research and experience. Education professionals in this course examine these evidence-based practices to build their skills and gain strategies to facilitate
learning in a variety of settings. They also explore promising new ideas and emerging trends in the field of adult learning.

**EDUC 6275 - Planning, Assessing, and Improving Learning Experiences**

(3 sem. cr.)

Given the wide variety of settings in which adult learning takes place, it is no small challenge to plan and implement robust learning experiences that can be effectively evaluated. In this course, education professionals examine the ingredients essential to successfully promote learning, including multiple needs assessment models, approaches to program design, implementation strategies, and models of evaluation and assessment.

**EDUC 6276 - Facilitating, Collaboration & Group Process**

(3 sem. cr.)

According to research, adults learn best in a social environment. Through collaboration and idea exchange, a supportive "community of practice" is generated where learners co-create their experience in socially meaningful ways. This may take the form of discussions, peer-to-peer activities, small-group work, and student-centered assignments, among other approaches. In this course, education professionals examine the mechanics of collaboration and identify facilitation practices that lead to student success. Also addressed are issues of consensus and decision making, trust-building, collaborative teaching, and group process online.

**EDUC 6277 - Using Technology to Enhance Adult Learning**

(3 sem. cr.)

Emerging technologies are rapidly altering the field of adult education today. Innovative technologies are removing traditional boundaries to learning and encouraging a global perspective on school, work, and communications. New developments in software, multimedia applications, Internet technologies, and mobile computing are transforming the educational landscape and empowering learners around the world. In this course, educators and students explore how to leverage these advances to enhance the learning process and improve outcomes in today's digital information society.

**EDUC 6357 - Diversity, Development, and Learning**

(3 sem. cr.)

Diversity can have a profound influence on children's development and learning. Education professionals in this course explore areas of diversity, including developmental and learning needs, such as English-language learners, children on the autism spectrum, and children with developmental delays. They also address the impact of living in poverty and experiencing stress/violence/trauma in the context of families, early childhood settings, and school classrooms. Applying course concepts, education
professionals engage in practical exercises through which they reflect on their own perspectives and biases and learn the complex ways families influence their children. Moreover, they learn the importance of using current research and resources to improve developmental and learning outcomes for every child.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6358 - Strategies for Working With Diverse Children♦

(3 sem. cr.)
Working with children and families who have diverse developmental and learning needs requires not only a deep understanding of and respect for the individual child but also research-based knowledge of effective practices, strategies, and services. Through this course, education professionals develop and assess practical strategies and tools needed in educational settings to plan curriculum, teach, assess, and, if necessary, refer young children. They learn to use knowledge of children's unique characteristics to help create respectful, supportive, and challenging environments and experiences that foster healthy development and learning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6360 - How Adults Learn♦

(3 sem. cr.)
The early childhood field offers a variety of opportunities for early childhood professionals to teach and work with adults. These professionals must understand the principles of adult learning. Education professionals in this course explore the major theories of adult learning and motivation to prepare to work in such roles as higher education faculty, community trainers, technical assistance providers, parent educators, coaches, mentors, professional developers, and Child Development Associate (CDA) trainers. They share ideas and perspectives with peers through discussions on a variety of topics, including traditional learning theories and andragogy, theories of cognitive development, and adult learning models, among others. Additionally, education professionals synthesize and apply various theories to real-world situations, including their own development; summarize how the idea of wisdom impacts their experiences as adult learners; interview an adult learner; and assess various perspectives in regard to educating diverse learners.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6361 - Instructional Strategies for Adult Learners♦
In this course, education professionals focus on strategies and techniques integral to working effectively with adults in the early childhood field in such roles as higher education faculty, community trainers, technical assistance providers, parent educators, coaches, and mentors. Education professionals gain practical experience in planning learning experiences, assessing and modifying instruction, and incorporating technology in teaching geared specifically to the unique strengths and needs of the adult learner. Additionally, they examine the distinctions between teaching in the early childhood field at a community college or university, and they explore ways to provide professional development for early childhood practitioners and support to adults working with young children and families in community settings.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6400 - The Professional Educator

(5 cr.)
Lifelong learning and professionalism are key components of effective teaching. As teacher candidates begin their professional program of study, they review the program requirements including field experience responsibilities and major assessments. Teacher candidates study the dimensions of teacher professionalism through the eyes of social change. After reviewing the code of ethics from a practitioner viewpoint, historical theorists, court cases, and trends in education, candidates focus on what is required to be successful in 21st century schools. This includes an analysis of multiple technological frameworks, and candidates use these frameworks in multiple ways throughout the course. Through readings, voices from the field, virtual field experiences, and reflective experiences, each candidate begins to consider their personal philosophy.

EDUC 6401 - Diverse and Exceptional Learners in the Elementary Classroom

(5 cr.)
The dynamics of today’s classroom are unique and challenging for teachers and learners. Education professionals in this course explore and analyze issues, complexities, and responsibilities associated with the field of education in the 21st century, including providing equal educational opportunities for all learners, regardless of their abilities and differences. They examine many factors influence learning, including individual experiences, abilities, talents, prior learning, language, culture, and family and community values. Education professionals’ study special education laws and policies; language diversity; and multiple intelligences. They also address learning theory, diverse learning styles, and practical instructional strategies, and they acquire theoretical and practical knowledge about today’s classroom as well as the family and community contexts that influence children’s learning and development.

Prerequisites
- EDUC 6400
EDUC 6402 - Exploring Dimensions of Literacy K–6

(5 cr.)
In this course, education professionals learn theories, principles, practices, and strategies to support literacy development in the elementary grades. Candidates learn about early literacy development including phonological awareness, concepts of print, and phonics. Strategies for developing vocabulary, comprehension, fluency, writing, content-area literacy, and media literacy are also explored. Through course readings and virtual field experiences, candidates analyze literacy instruction and identify research-based principles that support the literacy and learning of all students, including English language learners. Candidates examine the role of formal and informal assessments in planning and modifying literacy instruction to meet the needs of a diverse student population. Topics include organizing the literacy classroom, differentiating literacy instruction, and involving families to support the literacy development of students.
Prerequisites
- EDUC 6400
- EDUC 6401

EDUC 6570 - Distance Education♦

(3 sem. cr.)
Online education could be the catalyst that transforms education in the 21st century. Through this lens, education professionals explore the current trends impacting the field of distance education and their implications for K–12 teachers. They examine the different models, theories, and technologies used in the development and delivery of online learning. They also explore the implications and considerations of designing instruction for blended, fully online, teacher-led, self-paced learning environments. Practicing essential skills required to teach K–12 students successfully online, education professionals develop, facilitate, and assess a lesson for their students using an online platform.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6571 - Online Instruction♦

(3 sem. cr.)
Online education could be the catalyst that transforms education in the 21st century. Through this lens, education professionals explore the current trends impacting the field of distance education and their implications for K–12 teachers. They examine the different models, theories, and technologies used in the development and delivery of online learning. They also explore the implications and considerations of designing
instruction for blended, fully online, teacher-led, self-paced learning environments. Practicing essential skills required to teach K–12 students successfully online, education professionals develop, facilitate, and assess a lesson for their students using an online platform.

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6572 - Online Assessment♦

(3 sem. cr.)
The online environment provides teachers the opportunity to reach beyond traditional practices and explore new ways of assessing student learning outcomes. In this course, education professionals apply their knowledge of learning theory, assessment practices, and instruction to the development of assessment strategies in online environments. They also review research and practical strategies for assessing student learning in synchronous and asynchronous learning experiences.

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6573 - Trends and Issues in K–12 Online Learning♦

(3 sem. cr.)
Online education presents teachers and students with both opportunities and challenges. In this course, teachers will explore several trends and issues in online instruction, such as differentiation for diverse populations including students with special needs and English-language learners, and motivating and engaging the online student. Teachers will learn how to manage the online classroom and explore the ethical, legal, and safety issues related to teaching students in an online K–12 environment. Teachers also will examine strategies for communicating effectively with parents and collaborating with colleagues online.

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6600 - Program Portfolio

(0 cr.)
Candidates who are working on their ePortfolio are registered for this non-course requirement. The portfolio brings together work from all the courses in the master’s degree program and demonstrates that the candidate has acquired both the knowledge (scholar) and the ability to apply (practitioner) it; in other words, it demonstrates that the degree completion yields the scholar-practitioner. A portfolio assessor works with candidates on an individual basis to ensure that each artifact required in the portfolio is
adequately completed. Once the ePortfolio and all other program requirements are met, the Master of Science degree can be awarded.

**EDUC 6602 - Designing Curriculum, Instruction, and Assessment (Accelerating)**

(3 sem. cr.)

Education professionals ensure continuous improvement for student learning through attention to the relationship among classroom curriculum, instruction, and assessment in standards-based educational systems. They explore learning theory, learner variables, and the need for differentiation to meet diverse learning needs. Education professionals design educational experiences for P–12 students using data-informed practices in order to promote student learning, critical thinking, and real-world application of knowledge and skills in technology-rich environments.

**Note:** This course offered in an accelerating format.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDUC 6603 - Action Research for Educators (Accelerating)**

(3 sem. cr.)

Educators are provided with a structured approach to the practice of action research in this course. They have the opportunity to learn how to address relevant problems, become involved in collaborative inquiry, and use data and research to inform their practice, improve student academic success, and contribute to positive change in their classroom and school environments. Educators engage in reflective practices as they collect and analyze student data and develop and implement data-informed decisions/actions to improve student learning and enhance their professional growth.

**Note:** This course offered in an accelerating format.

**EDUC 6604 - Creating an Effective Classroom Learning Environment (Accelerating)**

(3 sem. cr.)

Education professionals have the opportunity to learn to create safe, supportive, and respectful learning environments that promote social-emotional development, self-responsibility, and character, in order to optimize learning for all students. They can learn how to foster a sense of community in the classroom and develop positive relationships with and among students. Skills and strategies for managing dynamic and flexible classroom structures and for teaching conflict resolution are presented. Educators are also provided with strategies for building positive relationships and engaging in effective communication and problem solving with parents and families.

**Note:** This course offered in an accelerating format.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6605 - Teacher as Lifelong Learner and Professional Educator

(3 sem. cr.)
Lifelong learning and professionalism are key components of teaching. Education professionals in this course are oriented to the skills, understandings, strategies, and knowledge necessary to become successful learners while establishing the foundations for becoming professional educators, including knowledge of child development. Course instructors help education professionals become comfortable in the online learning environment, enabling them to clarify program expectations; create support networks and learning communities with colleagues and instructors; and establish a personal professional philosophy to promote social change. Upon completion of this course, education professionals demonstrate understanding of resources and expectations, initiate an electronic professional portfolio, and determine strategies for success as professional educators. 
(Pre-requisites: EDUC 6606)

EDUC 6606 - Today's Classroom and the Diverse Learner

(3 sem. cr.)
The dynamics of today's classroom are unique and challenging for teachers and learners. Education professionals in this course explore and analyze issues, complexities, and responsibilities associated with the field of education in the 21st century, including providing equal educational opportunities for all learners, regardless of their differences. They come to understand that many factors influence learning, including individual experiences, talents, prior learning, language, culture, and family and community values. Additionally, education professionals gain an understanding of the Minnesota-based American Indian tribal government, history, language, and culture. They engage in discussions and reflections on issues of diversity through which they have the opportunity to articulate, defend, and/or challenge current issues. They also address learning theory, diverse learning styles, and practical instructional strategies, and they acquire theoretical and practical knowledge about today's classroom as well as the family and community contexts that influence children's learning and development. 
(Pre-requisites: EDUC 6605)

EDUC 6607 - Effective Practices: Assessment, Teaching, and Learning

(3 sem. cr.)
To help ensure high levels of learning and achievement for all students, today's educators must be knowledgeable about learners and learning and well-versed in effective teaching and assessment practices. In this course, education professionals examine the interrelationships between assessment, teaching, and learning as well as effective practices for applying and integrating these critical components in the P–12
classroom. They gain a historical perspective on the standards and accountability movement, and they examine standards in their state or local setting. They also explore learning theory in the context of today’s challenging educational goals and standards. Education professionals learn and apply research-based practices in effective assessment, curriculum design, and instruction. Through on-site and Virtual Field Experience (VFE®), they critically analyze and implement teaching and learning principles and practices that help ensure awareness of individual and collective needs of students.

Prerequisites
- EDUC 6628

(Co-requisites: EDUC 6608 and EDUC 6636)

EDUC 6608 - Classroom Management

(3 sem. cr.)
Education professionals are helped to create safe, supportive, and respectful learning environments that promote social-emotional development, self-responsibility, and character to optimize learning for all students in this course. Education professionals learn how to foster a sense of community in the classroom and develop positive relationships with and among students. They explore age-appropriate skills and strategies for managing dynamic and flexible grouping structures and teaching conflict resolution. They also examine strategies for building positive relationships, fostering motivation, and engaging in effective communication and problem-solving with parents and families. Education professionals apply course concepts through the development of a hands-on, age-appropriate learning activity to implement within a classroom field experience.

Prerequisites
- EDUC 6628

(Co-requisites: EDUC 6607 and EDUC 6636)

EDUC 6609 - Seminar: Professional Ethics, Communication, and Collaboration: Special Education (Special Education)

(1 sem. cr.)
This seminar is an opportunity for education professionals to fine-tune their skills, strategies, and knowledge. They complete the requirements for their ePortfolio and determine strategies for success as professional educators. The seminar allows for problem-solving among colleagues; group and individual reflective practice; and support and feedback for current events in demonstration teaching districts, schools, and classrooms. Education professionals engage in practical seminar topics, such as collaboration, ethics, professional development, and family and community engagement, to support their transition from the program of study into employment in the field as professional educators.
Note: Education professionals take this course concurrently with EDUC 6698 - Demonstration Teaching: Special Education.

EDUC 6610 - Teacher as Professional♦

(3 sem. cr.)
Effective teachers are leaders who make a positive difference in classrooms, schools, and society. Education professionals explore what it means to be a teacher leader in today's diverse and changing educational landscape, while gaining expertise in current research-based educational advancements. They examine their values, beliefs, vision, and mission, and they explore teacher effectiveness in relation to their role in the larger context of the teaching profession. They collaborate in professional learning communities and advocate for students and other educators in order to promote positive social change. They synthesize their learning throughout the course and use this knowledge to enhance professional growth and development.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6611 - Seminar: Professional Ethics, Communication, and Collaboration: Early Childhood Education

(1 sem. cr.)
This seminar is an opportunity for education professionals to fine-tune their skills, strategies, and knowledge. They complete the requirements for their ePortfolio and determine strategies for success as professional educators. The seminar allows for problem-solving among colleagues; group and individual reflective practice; and support and feedback for current events in demonstration teaching districts, schools, and classrooms. Education professionals engage in practical seminar topics, such as collaboration, ethics, professional development, and family and community engagement, to support their transition from the program of study into employment in the field as professional educators.

Note: Education professionals take this course concurrently with EDUC 6687 - Demonstration Teaching: Early Childhood Education.

EDUC 6616 - Enhancing Learning for Diverse Populations (Accelerating)♦

(3 sem. cr.)
Education professionals examine the value of adapting the learning environment for multiple diverse populations within the classroom. They explore their attitudes, beliefs, and biases regarding diverse students, families, and communities, and they learn approaches for working together to ensure high levels of learning for all students. Through real-world application, they assess and implement high-quality learning experiences that provide equitable access to promote positive social change. Education professionals incorporate their students' background experiences and differentiate
instruction using effective practices so all P–12 students have the opportunities and resources to learn.

**Note:** This course offered in an accelerating format.

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDUC 6617 - Teacher Leadership in the Classroom: Increasing Learning and Achievement (Accelerating)♦**

*(3 sem. cr.)*
The focus of teacher leadership expands from self to students, increasing the sphere of influence of the teacher leader to the classroom context in this course. Education professionals concentrate on advancing their expertise in the field of teaching by increasing their knowledge and skills in three key areas: knowledge of learners and learning; knowledge of subject matter and curriculum goals; and knowledge of effective teaching models, strategies, and practices. They learn to apply this expertise in the classroom in ways that directly affect the learning and achievement of their students.

**Note:** This course is offered in an accelerating format.

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDUC 6618 - Teacher Leadership in Professional Learning Communities (Accelerating)♦**

*(3 sem. cr.)*
The sphere of influence for education professionals is extended from working with peers to engaging with stakeholders throughout the greater school community in this course. Education professionals learn the processes, benefits, and challenges of building and working in learning communities to identify issues and solve problems that affect student learning and achievement. They consider professional growth and development as an integral part of various types of school improvement processes. Additionally, they engage in a variety of practical assignments, such as an analysis of their own school’s development of mission, vision, values, goals, and communication elements as a professional learning community.

**Note:** This course is offered in an accelerating format.

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDUC 6619 - Designing Curriculum, Instruction, and Assessment for Students with Special Needs (Accelerating)♦**

*(3 sem. cr.)*
This course emphasizes the need for all students, including students with special needs,
to achieve high academic standards. Education professionals in this course examine the learning challenges of students who by definition of federal law have disabilities, as well as those of students who have significant difficulty with learning but do not qualify for special education services. Educators learn how to adapt curriculum, instruction, and assessment to maximize learning for students with special needs.

Note: This course is offered in an accelerating format.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6621 - Educational Research: Foundations

(3 sem. cr.)
An underlying theory in the field of education is that research can improve classroom practice. Education professionals in this course are provided with an introduction to the fundamentals of research. They examine contemporary educational research and develop knowledge and skills in applications of theoretical frameworks; quantitative, qualitative, and action research methodologies; development of research questions; and compliance with ethical responsibilities of the researcher. Education professionals also complete an initial review of literature relevant to an identified research question.

EDUC 6622 - Educational Research: Practical Applications

(3 sem. cr.)
Education professionals in this applied research course expand their knowledge and skills through the use of tools and information gained in EDUC 6621 - Educational Research: Foundations, in the design of a timely and practical educational research project. They engage in a variety of activities, such as developing and refining research questions or needs assessments; determining appropriate research methodologies and instrumentation; collecting and analyzing data, if possible; evaluating validity; and presenting analysis and implications. In addition, education professionals link their research proposal to the social change mission of the university.

EDUC 6625 - Habits of Mind: Thinking Skills to Promote Self-Directed Learning♦

(3 sem. cr.)
Education professionals in this course are helped to develop skills and strategies to prepare students for living and learning productively in today's society. They complete a variety of assignments designed to provide practical application of course content, such as designing a lesson in which they integrate habits of mind with other instructional elements to achieve multiple outcomes. They also create a rubric that allows students to demonstrate learning in each area of the lesson. Additionally, they reflect on the theories, concepts, and strategies learned in the course and consider the influence of new knowledge on future personal and professional endeavors. Through this course, education professionals learn how to help students manage, motivate, and modify their
own learning as a continuing lifelong process.

★ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6626 - Foundations of Special Education

(3 sem. cr.)
What do special educators need to know and be able to do to support students with exceptionalities and address their unique learning needs? In this course, education professionals examine historical, legal, and philosophical foundations that inform teaching and learning for students with exceptionalities. Education professionals explore issues related to identification, eligibility criteria, and delivery of services for students across multiple disability areas. Through course assignments and discussions with colleagues, education professionals develop the knowledge and skills necessary to build collaborative relationships with families and other stakeholders to help provide appropriate services to students.
Prerequisites
- EDUC 6606

★ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information. (Co-requisites: EDUC 6627 and EDUC 6628)

EDUC 6627 - Foundations of Literacy

(3 sem. cr.)
An important role of all educators is helping students develop the literacy skills they need to succeed in school and in life. In this course, education professionals build foundational knowledge in literacy principles, practices, and strategies so that they can effectively engage and enhance students’ reading, writing, listening, and speaking. Education professionals learn about early literacy development including phonological awareness, concepts of print, and phonics. They explore strategies to help developing readers, including ways to promote vocabulary, comprehension, fluency, writing, and content-area literacy. Education professionals identify research-based principles that support the literacy and learning of all students, including English language learners. Through field experience assignments, education professionals develop and implement literacy instruction and assessments with students in K–12 classrooms. Topics include organizing the literacy classroom, differentiating literacy instruction, and involving families to support the literacy development of all students.
Prerequisites
- EDUC 6606

(Co-requisites: EDUC 6626 and EDUC 6628)
EDUC 6628 - Individualizing Education Programs for Learners With Exceptionalities

(3 sem. cr.)
All learners possess unique characteristics, interests, and abilities. One of the most important responsibilities of special educators is to consider the individual strengths and needs of students with exceptionalities and to collaborate with families and other stakeholders to individualize their education appropriately. In this course, education professionals learn about the Individualized Education Program (IEP) process, including referral, eligibility, and the importance of using research-based interventions. They explore stakeholder responsibilities, consider assessments and other forms of data that inform program planning, and develop an IEP for a case study student. Education professionals consider the benefits of assistive technology and the role of transition planning in developing individualized education for learners with exceptionalities.

Prerequisites
- EDUC 6606

(Co-requisites: EDUC 6626 and EDUC 6627)

EDUC 6631 - Foundations of Reading: Theory, Research, and Practice♦

(3 sem. cr.)
An effective reading teacher possesses comprehensive knowledge of the components of reading and applies this knowledge to instructional practice. Education professionals will explore the domains of development as they pertain to K–12 literacy instruction and research and explore the impact of research-based practices on literacy development. Language development and its relationship to the progression of reading development, including variations related to cultural, linguistic, and academic diversity, will be examined. Education professionals will investigate current issues in literacy education, including the reading achievement gap, brain research, standards and accountability, and new perspectives on 21st-century skills and digital literacy learning.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6632 - Assessment and Instruction to Promote Literacy Development♦

(3 sem. cr.)
Literacy development is a complex process involving a profusion of skills and strategies in several critical areas: phonemic awareness, phonics, vocabulary, comprehension, fluency, and writing. Education professionals focus on assessment and instruction to promote literacy development in these areas. Education professionals learn how to use a variety of assessments to determine the literacy needs of emergent, beginning, developing, intermediate, and advanced readers, taking into consideration linguistic, cultural, and academic diversity. They will also examine a multitude of research-based
EDUC 6633 - Reading, Writing, and Critical Thinking in Content Disciplines♦

(3 sem. cr.)
Reading for information in expository text is essential for learning—in school, in the workplace, and in life. The focus of this course is on developing literacy across the disciplines through a wide range of instructional methods, materials, and practices, including flexible grouping, and the selection of texts and other materials, such as digital tools and online resources that match the cognitive, cultural, and linguistic needs of literacy learners. Education professionals learn strategies for promoting disciplinary literacy across developmental levels, proficiencies, and cultural and linguistic backgrounds. High-quality literature that meets the interests and needs of all readers and represents various cultures, genres, and text structures, and assists students in making connections and bringing relevance to content courses across disciplines will be examined. The integration of information and communication technologies and 21st century literacy skills will be highlighted.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6634 - Assessment and Intervention for Students With Reading Difficulties♦

(3 sem. cr.)
The ability to effectively diagnose reading difficulties and determine appropriate interventions is at the heart of what it means to be a reading teacher. Education professionals learn about the purposes, strengths, and limitations of a wide variety of assessment instruments in this course. Education professionals learn how to select and administer appropriate tools for diagnosis and progress monitoring, and they interpret results related to individual students, class/groups, and school. Assessment data are used to plan differentiated instruction for students at different developmental stages and from different cultural and linguistic backgrounds. Education professionals use assessment data to develop interventions that target specific student needs and select materials, instructional strategies, and other resources needed to implement appropriate interventions. Effective practices for communicating assessment results to students, parents/caregivers, colleagues, and administrators are addressed.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
EDUC 6636 - Characteristics of Learners With Exceptionalities

(3 sem. cr.)
Special educators must understand each category of exceptionality as well as the abilities and needs of individual learners. In this course, education professionals examine the characteristics and instructional implications of specific learning disabilities, emotional and behavioral disabilities, autism spectrum disorders, intellectual disabilities, other health impairments, and giftedness. They explore accommodations and modifications for students with exceptionalities and consider how to foster effective and positive relationships with all stakeholders to support student success. In their field experience, education professionals apply course content by completing a child study project, in which they conduct an intensive case study of a single student with exceptionalities in a K–12 classroom.

Prerequisites
•  EDUC 6628

(Co-requisites: EDUC 6607 and EDUC 6608)

EDUC 6637 - Literacy Assessment and Intervention to Support Student Learning

(3 sem. cr.)
Learners with exceptionalities often experience difficulties in literacy, which, in turn, negatively affect their learning and achievement. What can educators do to prepare these students for academic success? The focus of this course is on designing, implementing, monitoring and adjusting, and assessing literacy development to promote achievement across the curriculum. Education professionals use literacy assessments and interventions with students in K–12 classrooms to foster language development and to promote phonemic awareness, phonics, vocabulary development, fluency, and comprehension. Candidates explore the impact of reading and writing disabilities on learning, and consider literacy practices and strategies for developing students' academic language and supporting their diverse learning needs. In addition, candidates examine assessment data and other evidence to inform literacy instruction and incorporate assistive and other technology-based interventions.

Prerequisites
•  EDUC 6636

(Co-requisites: EDUC 6638 and EDUC 6639)

EDUC 6638 - Behavior Management to Support Learners With Exceptionalities

(3 sem. cr.)
Helping students to develop the necessary skills for positive behavior is critical to creating an educational environment where all students can learn. In this course, education professionals develop data-informed practical behavior management strategies from three different perspectives—individual behavior management, classroom
management, and school-wide behavior support. Education professionals apply behavior management strategies to create and implement an individualized behavior management plan in a K–12 classroom with a target student.

Prerequisites
- EDUC 6636

(Co-requisites: EDUC 6637 and EDUC 6639)

EDUC 6639 - Instructional Strategies for Learners With Exceptionalities

(3 sem. cr.)
How can special educators help students with exceptionalities reach their full potential? In this course, education professionals develop lesson-planning skills and apply research-based instructional strategies to promote the academic and social development of students with exceptionalities. Education professionals complete a lesson-planning project by collaborating with school personnel to design, adapt, and implement lessons in diverse K–12 classrooms.

Prerequisites
- EDUC 6636

(Co-requisites: EDUC 6637 and EDUC 6638)

EDUC 6640 - Designing Curriculum, Instruction, and Assessment♦

(3 sem. cr.)
In this course, education professionals examine classroom curriculum, instruction, and assessment in the context of standards and accountability. The importance of alignment of these components and resulting impact on student learning are emphasized. Educators explore learning theory, learner variables, and the need for differentiation to meet diverse learning needs. Multiple purposes and methods of assessment as well as effective approaches to grading and reporting will be discussed. Using their state or district standards, educators engage in a process for designing standards-driven classroom curriculum, instruction, and assessment that will meet the diverse learning needs of their students.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6647 - Dynamic Teacher Leadership♦

(3 sem. cr.)
Education professionals are introduced to the concept of teacher leadership and its value in the field of education today in this course. They engage in personal assessment and analysis so that they may cultivate the dispositions and attitudes of a teacher leader for the purpose of effecting positive change in their learning communities. They also learn the critical importance of expanding their knowledge of educational research and
theory to guide leadership decisions that effectively address today’s educational challenges. Education professionals complete coursework that emphasizes self-examination and self-perceptions with regard to teacher leadership.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6648 - Demonstration Teaching

(4 sem. cr.)
Demonstration teaching is the culminating experience in the teacher preparation program and is an opportunity to apply knowledge and skills and to demonstrate required competencies. During demonstration teaching, education professionals will participate in orientation activities then gradually assume complete teaching responsibility of the special education classroom for 4 consecutive weeks over a 12-week placement, gaining real-world experience and the opportunity to translate theory into practice. Candidates demonstrate the various roles of the special educator. Education professionals work closely with, and are evaluated by, their university supervisor, classroom cooperating teacher, and Walden instructor. During demonstration teaching, all special education professionals are assessed on the Teacher Performance Assessment (edTPA) and the Demonstration Teaching Evaluation. This course runs concurrently with EDUC 6649 - Seminar for Professional Educators.
Prerequisites
- All required core and specialization courses

(Co-requisites: EDUC 6649)

EDUC 6649 - Seminar for Professional Educators

(3 sem. cr.)
Taken concurrently with EDUC 6648 - Demonstration Teaching, this seminar allows education professionals to consolidate their knowledge and fine-tune their skills as they reflect on and share experiences from the districts, schools, and classrooms in which they are completing their demonstration teaching assignments. Candidates complete requirements for their ePortfolio and develop strategies for success as professional educators. The seminar promotes reflection, problem-solving among colleagues, group and individual reflection, and collaborative feedback to support professional practice. Seminar topics focus on promoting success as candidates transition from the program of study (POS) into the special education profession.
Prerequisites
- All required core and specialization courses

(Co-requisites: EDUC 6648)

EDUC 6650 - Enhancing Learning for Diverse Populations♦
In this course, education professionals explore the value of linguistic and cultural diversity and the powerful learning opportunities it affords today's classrooms and schools. They examine their attitudes, beliefs, and biases regarding linguistically and culturally diverse students, families, and communities, and they learn approaches for working together to ensure high levels of learning for all students. Through real-world observations, they assess strategies for ensuring equitable access to high-quality learning experiences. Education professionals also explore effective practices, such as cultural responsiveness, anti-bias curriculum, differentiated instruction, and academic vocabulary development.

Prerequisites
- Endorsement candidates must complete special education endorsement courses and receive a cumulative GPA of 3.0 or higher prior to moving into MS in Education courses.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6651 - Teacher Leadership in the Classroom: Increasing Learning and Achievement♦

The focus of teacher leadership expands from self to students, increasing the sphere of influence of the teacher leader to the classroom context in this course. Education professionals concentrate on advancing their expertise in the field of teaching by increasing their knowledge and skills in three key areas: knowledge of learners and learning; knowledge of subject matter and curriculum goals; and knowledge of effective teaching models, strategies, and practices. They learn to apply this expertise in the classroom in ways that directly affect the learning and achievement of their students.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6655 - Teacher Leadership: Mentoring, Coaching, and Collaboration With Colleagues♦

Education professionals address teacher leadership in the context of advancing the expertise and leadership of peers, thereby expanding education professionals' spheres of influence beyond the walls of the classroom. They explore mentoring and coaching models designed to promote the professional growth of their colleagues. They learn and apply skills for mentoring novice teachers and for engaging in coaching relationships with peers at all stages of the teacher development cycle. Through conceptual and application-based activities, education professionals address various forms of
collaboration with colleagues, focusing on interpersonal and communication skills.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6657 - Creating an Effective Classroom Learning Environment♦

(3 sem. cr.)
Education professionals have the opportunity to learn to create safe, supportive, and respectful learning environments that promote social-emotional development, self-responsibility, and character, in order to optimize learning for all students. They can learn how to foster a sense of community in the classroom and develop positive relationships with and among students. Skills and strategies for managing dynamic and flexible classroom structures and for teaching conflict resolution are presented. Educators are also provided with strategies for building positive relationships and engaging in effective communication and problem solving with parents and families.

Prerequisites
- Endorsement candidates must complete special education endorsement courses and receive a cumulative GPA of 3.0 or higher prior to moving into MS in Education courses.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6659 - Teacher Leadership in Professional Learning Communities♦

(3 sem. cr.)
The sphere of influence for education professionals is extended from working with peers to engaging with stakeholders throughout the greater school community in this course. Education professionals learn the processes, benefits, and challenges of building and working in learning communities to identify issues and solve problems that affect student learning and achievement. They consider professional growth and development as an integral part of various types of school improvement processes. Additionally, they engage in a variety of practical assignments, such as an analysis of their own school's development of mission, vision, values, goals, and communication elements as a professional learning community.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6663 - Integrating Technology in the Curriculum, Part I (Self-Directed)♦

(3 sem. cr.)
Educators in this course explore the use of technology with their students. The shift in pedagogy introduced in EDUC 6661 is further explored, with particular focus placed on
how technology can support multiple modes of learning. Educators investigate specific models for integrating the Internet into their curriculum, including WebQuests, telecollaborative projects, Internet workshops, and research or inquiry projects. After exploring and evaluating ready-made examples of each, educators try their hand at designing their own.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6668 - The Effective STEM Scholar-Practitioner

(3 sem. cr.)
STEM scholar-practitioners analyze current trends, challenges, issues, and career opportunities related to promoting STEM education. They explore research-based strategies and their application in both the classroom and the surrounding community. STEM educators engage in professional discourse about pedagogical models designed to inspire innovative thinking and learn how STEM principles can be used to advocate for social change.

EDUC 6671 - Designing Curriculum, Instruction, and Assessment, Part I♦

(3 sem. cr.)
Educators in this course are introduced to curriculum, instruction, and assessment in the context of standards and accountability and their relationships to student learning. They explore interrelationships among curriculum, instruction, and assessment: the importance of alignment, connection to learning theory and learner variables, and need for differentiation to meet diverse student needs. Educators examine and make sense of their academic standards and investigate the history, roles, and types of curricula and instruction. They analyze, evaluate, modify, and/or design curriculum and instruction for specific content and purposes.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6674 - Designing Curriculum, Instruction, and Assessment for Students With Special Needs♦

(3 sem. cr.)
Educators must recognize the importance for all students, including students with special needs, to achieve high academic standards. In this course, education professionals examine the learning challenges of students who, by definition of federal law, have disabilities as well as those of students who have significant difficulty with learning but do not qualify for special education services. Education professionals learn how to adapt curriculum, instruction, and assessment to maximize learning for students with special needs. They also have the opportunity to evaluate and describe activities and
experiences through the perspective of a student with a learning disability, thus gaining empathy and a deeper understanding of how to work with students with special needs.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6681 - Early Childhood Education: Past, Present, and Future

(3 sem. cr.)
In this course, education professionals examine the historical and philosophical foundations of early childhood care and education while exploring a variety of early childhood programs, from child care centers to preschools and primary-grade classrooms. Through this exploration, education professionals acquire a range of professional insights and opportunities regarding effective practice. They use this course to continue the development of a reasoned, coherent philosophy of education as a basis for ethical and professional practice and decision making in diverse settings. They consider the importance in establishing developmentally appropriate and culturally responsive learning environments and maintaining effective partnerships with families. Education professionals also have the opportunity to review early childhood learning and developmental theory as well as the knowledge needed to support and enhance the development and learning of all children from birth through grade 3.

EDUC 6682 - Teaching Reading, P–3

(3 sem. cr.)
Education professionals taking this course learn about research-based methods for developing literacy, including reading, writing, listening, speaking, viewing, and visually representing, in grades P–3. Education professionals gain an historical perspective on teaching reading and explore various purposes and types of literacy assessments. They explore strategies for creating an effective literacy environment and for working with parents and families. They also learn effective strategies for developing phonemic awareness, phonics skills, vocabulary, comprehension, fluency, and writing. Through field experiences, education professionals plan and implement assessment-driven, developmentally appropriate classroom lessons in various areas, addressing the diverse needs of individual children.

EDUC 6683 - Developmentally Appropriate Practices for Infants and Toddlers

(3 sem. cr.)
What constitutes high-quality care and education for infants and toddlers? Through this course, education professionals have the opportunity to answer this question as they examine developmentally appropriate practices that promote children’s total well-being and that guide development in each of the domains—physical, social, emotional, and cognitive/language. They also gain a practical overview of infant and toddler growth and development, and they explore a variety of related issues, such as health and safety,
early mental health, brain development, creative development, respectful and responsive adult-child relationships, and family involvement. Through field experience and practical applications, education professionals learn to design and evaluate environments that enrich the development and learning of infants and toddlers.

EDUC 6684 - Play and Learning for the Preschool Child

(3 sem. cr.)
Playtime for children is an opportunity for growth and discovery as well as a time to develop life skills and to learn about themselves and other children. Education professionals are offered an in-depth look at the development, learning, and play experiences of preschoolers in this course. Education professionals focus on developmentally appropriate theory, practices, and environments that enhance children’s development and learning in each of the domains—physical, social, emotional, and cognitive/language. They explore and discuss the integral roles of play and creativity in children’s learning; the role of observation as it relates to establishing a child-centered approach to planning curriculum and assessing young children; the promotion of pro-social, anti-bias learning communities; and the importance of being responsive to and inclusive of children’s family members. Through field experience, education professionals apply knowledge gained throughout the course to authentic contexts in which they demonstrate their growth and development as teaching professionals.

EDUC 6685 - Teaching Mathematics, P–3

(3 sem. cr.)
Education professionals in this course explore instructional and assessment strategies, including the best use of materials and technology, to develop children's conceptual understanding of mathematics. They engage in coursework that emphasizes real-world problem solving and incorporates content and process standards of The National Council of Teachers of Mathematics (NCTM). They assess and apply the latest research on the most effective methods for teaching developmentally appropriate mathematics curriculum from preschool through grade 3. Applying course concepts, education professionals complete various field experience assignments, such as developing various lessons on computation, algebra, data analysis, and probability.

EDUC 6686 - Teaching Across the Content Areas, P–3

(3 sem. cr.)
An important skill for early childhood educators is to recognize the benefits and work through the challenges of implementing an integrated approach to curriculum and instruction. In this course, education professionals focus on standards-based, data-driven, developmentally appropriate teaching, learning, and assessment within and across content areas in preschool through grade 3. They learn the importance of integrating literacy and mathematics in meaningful and relevant ways, and they engage in practical
assignments that focus primarily on teaching in content areas of science, social studies, and the arts. Education professionals examine standards; apply effective methods and strategies to plan instruction, including approaches to meet diverse needs; and develop ideas for integrating multiple content areas.

EDUC 6687 - Demonstration Teaching: Early Childhood Education

(6 sem. cr.)
Demonstration teaching is the culminating experience in the Teacher Preparation Program with an MAT; education professionals have the opportunity to apply knowledge and skills and to demonstrate required competencies. Demonstration teaching occurs in two different classroom settings throughout the semester. During demonstration teaching, education professionals gradually assume complete teaching responsibility of the classroom, gaining real-world experience and the opportunity to translate theory into practice. The university supervisor and classroom cooperating teacher work closely with students and evaluate their performance.

Note: The first 5 weeks of demonstration teaching run concurrently with EDUC 6686 - Teaching Across the Content Areas, P–3. The remainder of demonstration teaching runs concurrently with EDUC 6611 - Seminar: Professional Ethics, Communication, and Collaboration: Early Childhood Education.

EDUC 6688 - Action Research

(3 sem. cr.)
This course provides a structured approach to the practice of action research. Education professionals learn how to address relevant problems, become involved in collaborative inquiry, and use data and research to inform their practice. Education professionals engage in reflective practices as they plan data-informed actions to improve student learning, contribute to positive change in school environments, and enhance their professional growth.
Prerequisites
- EDUC 6605
- EDUC 6607
- EDUC 6627

(Co-requisites: EDUC 6209)

EDUC 6689 - Guiding and Supporting School Literacy Environments

(3 sem. cr.)
The reading teacher serves as a knowledgeable resource throughout the school or district. In this course, education professionals acquire the knowledge and skills to work with staff, students, and others to create a vibrant literacy environment that promotes a vision of literacy for all children building upon their linguistic, cultural, and academic
diversity. Education professionals learn how to use school assessment data to determine appropriate supports for students and staff, including Response to Intervention (RTI), leadership activities, and intervention programs that incorporate foundational knowledge and effective practices. Approaches to providing teacher professional development and to managing and improving school-wide literacy initiatives, including the integration of technology tools and resources, will be emphasized.

EDUC 6706 - The Beginning Reader, PreK–3+

(3 sem. cr.)
Building a strong foundation of literacy skills and experiences in young children is critical to their success in school and life. In this course, education professionals take a developmental approach to literacy instruction and provide practical research-based approaches to help students in preschool through third grade achieve the literacy goals of the Common Core State Standards (CCSS) and/or other state standards. The characteristics of emergent and beginning readers and writers are explored, focusing on essential literacy components, including oral language, phonological awareness, concepts of print, phonics, fluency, vocabulary, and comprehension. Education professionals evaluate the role of motivation in learning to read, and they explore writing and multiple text genres. Education professionals plan and implement developmentally appropriate assessment and instruction, including technology tools, to support the literacy development of all learners in preschool through third grade.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6707 - The Developing Reader, Grades 4–6+

(3 sem. cr.)
The intermediate grades present unique challenges and opportunities for literacy learning, including complexity of text, students' use of technology, student motivation to learn, and student identity development. Education professionals have opportunities to evaluate research-based instructional and assessment practices to help students in grades 4–6 actively engage in literacy learning and achieve the literacy goals of the Common Core State Standards (CCSS) and other state standards. Education professionals examine the role of literacy in content area learning, explore ways to teach close reading of complex texts, and consider how to incorporate different levels, types, and genres of text to support all students' learning and literacy development. Through coursework, education professionals focus on effective strategies to support writing about text, academic vocabulary, listening and speaking, and the effective use of technology tools to support content area reading.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
EDUC 6708 - Literacy Development in a Culturally and Linguistically Diverse Classroom

(3 sem. cr.)
Today’s classrooms reflect the rich cultural and linguistic diversity of the world outside of school. Through this course, education professionals work toward establishing a culturally responsive classroom where literacy development can flourish for all students. Education professionals learn and apply strategies to scaffold and support English-language learners at all levels of language acquisition. They examine the second-language acquisition process and methods to assess second-language and literacy proficiencies. Additionally, they learn to select culturally sensitive and relevant instructional materials and work with parents, community members, and other colleagues to support student success.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6709 - Literacy Development in an Academically Diverse Classroom

(3 sem. cr.)
Today’s inclusive classrooms require teachers to become competent and confident in working with students who struggle with reading and writing. Education professionals in this course focus on accelerating the literacy development of students with reading difficulties, including students who have specific learning disabilities, and addressing the needs of students considered gifted. They use diagnostic assessments, apply research-based strategies, and work with reading specialists/coaches and special educators to support academically diverse needs within the larger classroom context. They also explore and discuss a variety of topics, including informal and formal assessment, methods to differentiate and scaffold instruction, progress monitoring, leveling books, intervention strategies, and use of motivating texts. Additionally, education professionals learn the importance of collaboration with support resources.

Note: This course offered in an accelerating format.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6710 - Understanding the Impact of Technology on Education, Work, and Society

(3 sem. cr.)
As new and emerging technologies transform the landscape of education, the possibilities for learning and discovery grow exponentially. Through this course, education professionals examine the history and evolution of technology in society and its influence on education. Education professionals explore technology as a vehicle for broad access, and they employ a variety of digital-age tools, including social networking,
interactive learning tools, and collaboration software, to inspire and motivate today’s learners. They also explore and discuss ethical considerations, responsible use, and cyber safety issues. Through practical applications, such as designing a lesson that incorporates blogs, wikis, or podcasts, they gain hands-on experience integrating technology into the classroom.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6711 - Bridging Learning Theory, Instruction, and Technology♦

(3 sem. cr.)
Education professionals in this course explore various learning theories and research on how the brain processes information as well as how they can use this knowledge to support the use of technology in the classroom. They explore and evaluate various technologies, such as computer-mediated instruction and virtual learning environments, as means to foster learner-centered classrooms where students are motivated. Education professionals also learn how to support and enhance instructional practices using technology and how to integrate developmentally appropriate practices in teaching and learning with the latest digital resources available. Applying course concepts, they revise a lesson plan to support and facilitate student engagement using technology-based cognitive tools.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6712 - Supporting Information Literacy and Online Inquiry in the Classroom♦

(3 sem. cr.)
In this course, education professionals develop a new, expanded definition of what it means to be literate in today's technology-rich world. Education professionals explore the use and application of multimedia and Internet technologies that enhance learning and support collaborative problem-solving in a digital information society. They learn strategies for how to prepare students across the grade levels for the complex challenges related to reading, critical thinking, researching, and communicating in the 21st century. Synthesizing course concepts, they assess curriculum standards in their area and develop an inquiry-based unit plan designed to develop their students’ information and visual literacy skills and meet a specific learning outcome or standard in their subject area.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6713 - Integrating Technology Across the Content Areas♦
In this course, education professionals expand their focus of technology use in the classroom by exploring instructional strategies and digital tools that facilitate content area literacy and learning. Education professionals learn how to design technology-infused projects that motivate students and help them meet specific curricular standards. They also explore developmentally appropriate ways of using multimedia and Internet technologies to bring discipline-specific concepts to life and foster interdisciplinary connections that enhance learning across the curriculum.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6714 - Reaching and Engaging All Learners Through Technology♦

(3 sem. cr.)
Education professionals in this course learn to apply various technologies to enable and empower learners with diverse backgrounds, learning preferences, and ability levels. They employ digital-age solutions for differentiating instruction to meet varying needs, including assistive technologies that facilitate learning in students with special needs, programs that support English-language learners, and projects that engage and motivate gifted students. Through this course, they learn to harness the power of leading-edge technologies to increase learning and achievement for all students.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6715 - New and Emerging Technologies♦

(3 sem. cr.)
Through this course, education professionals consider the future of teaching and learning, discover promising trends in technology, and investigate opportunities to become leaders in the field of technology and learning. They consider how to address school-wide challenges, such as limited resources and resistance to change, and they explore skills and strategies, such as grant writing and leading change. Additionally, they complete a capstone project that demonstrates their ability and willingness to become advocates and change agents who use technology to address challenges and create opportunities within the field of education.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6716 - Clinical Experience 1

(1 sem. cr.)
This is an 8-week course taken concurrently with the methods course EDUC 6632 - Assessment and Instruction to Promote Literacy Development. Both courses align to
Minnesota Reading Teacher standards. Education professionals read and view standards-based learning resources, and discuss and apply learning objectives in the methods course. Concurrently, they implement the Literacy Assessment and Instructional Plan (LAIP) project in their clinical setting. The LAIP is designed to bring the course learning and weekly application of the learning into focus via implementation of various assessments with different learners and creation of an instructional plan.

EDUC 6717 - Clinical Experience 2

(1 sem. cr.)
This is an 8-week course taken concurrently with the methods course EDUC 6633 - Reading, Writing, and Critical Thinking in Content Disciplines. Both courses are aligned to Minnesota Reading Teacher standards. Education professionals read and view standards-based learning resources and discuss and apply learning objectives in the methods course. Concurrently, they implement the Literacy Assessment and Instructional Plan (LAIP) project in their clinical setting. The LAIP is designed to bring the course learning and weekly application of the learning into focus via implementation of various assessments with different learners and creation of an instructional plan.

EDUC 6718 - Clinical Experience 3

(1 sem. cr.)
This is an 8-week course taken concurrently with the methods course EDUC 6634 - Assessment and Intervention for Students With Reading Difficulties. Both courses are aligned to Minnesota Reading Teacher standards. Education professionals read and view standards-based learning resources, and they discuss and apply learning objectives in the methods course. Concurrently, they implement the Struggling Reader Case Study (SRCS) project in their clinical setting. The SRCS is designed to bring the course learning and weekly application of the learning into focus via implementation of various assessments with one learner who struggles with reading tasks and creation of an intervention plan.

EDUC 6719 - Clinical Experience 4

(1 sem. cr.)
This is an 8-week course taken concurrently with the methods course EDUC 6689 - Guiding and Supporting School Literacy Environments. Both courses are aligned to Minnesota Reading Teacher standards. Education professionals read and view standards-based learning resources, and they discuss and apply learning objectives in the methods course. Concurrently, they develop the Schoolwide Literacy Plan (SLP) Project in their clinical setting. The SLP Project is designed to bring the course learning and weekly application of the learning into focus via creation of a school-wide literacy improvement...
plan, collaborative review of the plan with key stakeholders, and evaluation of the impact of the project as a whole on professional growth and student learning.

EDUC 6720 - The Special Educator as Instructional Leader♦

(3 sem. cr.)
Powerful internal and external forces affect the leadership capacity and influence potential of special educators. In this course, education professionals examine internal variables, such as their emotional, spiritual, mental, and physical health. They also consider external variables, including current trends and issues related to medicine, neuroscience, research, law and governance, and technology. Moreover, education professionals explore the influence of these variables on teaching, learning, and enhancing their leadership capacity.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6721 - The Impact of Disabilities on Learning and Teaching♦

(3 sem. cr.)
Special educators understand the breadth and depth of each disability, and they continually expand their knowledge and skills related to the impact of cognition, behavior, sensory input, and physical/health issues on learning and teaching. Education professionals in this course examine disabilities beyond the surface level of definitions, characteristics, and common understandings to a deeper, life-encompassing, and future-planning perspective. Through this course, education professionals further their ability to advocate for individuals with disabilities and for the field of special education.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6722 - Strategic Collaboration in Special Education♦

(3 sem. cr.)
Teaming, partnerships, and collaboration are practices that special educators must embrace and continually hone and refine. Education professionals in this course explore the attitudes, skills, and dispositions that foster healthy and productive collaborative relationships, which are essential for working with teams to provide services for individuals with disabilities. They also examine the benefits and challenges of collaborating with others to maximize the learning potential of every student.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6723 - Advanced Instructional Strategies in Special Education♦
Providing accommodations and differentiating instruction are essential practices for special educators. In this course, education professionals learn advanced research-based approaches for designing, adapting, prescribing, and delivering instruction in the content areas, with special emphasis on progress monitoring. They also examine content-area standards and curriculum, focusing on the goal of designing standards-based, individualized instruction that is functional, appropriate, and systematic.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6724 - Literacy Interventions in Special Education

Reading, writing, and communicating are literacy competencies that impact the quality of life for all people, especially individuals with disabilities; however, learning and behavioral disabilities often have a major influence on literacy development, thus requiring special educators who are well-versed in this area of learning and teaching. In this course, education professionals learn to identify reading and writing disabilities and collaborate with others to devise appropriate and effective interventions, including the use of assistive technologies. They engage in a variety of conceptual and application-based assignments that emphasize progress monitoring and ongoing assessment of literacy skills, strategies, and dispositions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6725 - Advanced Behavioral Interventions in Special Education

Behavior impacts human development at all ages and stages of life and is typically a matter of concern for individuals with disabilities. Education professionals in this course focus on understanding, assessing, managing, teaching, and monitoring behavior. They also review classroom and school management strategies, and they explore in greater depth individual functional analysis and individual behavior management plans, focusing on the goal of transition planning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6726 - Understanding the English Language Learner

In this course, education professionals gain a historical and cultural perspective of K–12 English-language learners. They explore concepts, theories, research, and first and second language acquisition differences to understand and teach this diverse group
of students. Education professionals also examine their own attitudes, beliefs, and biases and learn the importance of developing culturally responsive learning environments. They also learn the value of working collaboratively with families and school staff to support the needs of all students in the general classroom.

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDUC 6727 - Strategies for Teaching English as a Second Language**

(3 sem. cr.)

Education professionals in this course learn effective instructional skills and strategies to teach English as a second language in the K–12 classroom. Through conceptual and practical discussions and activities, they learn strategies and techniques to help students develop listening, speaking, reading, writing, and vocabulary skills in a variety of English-language learning environments. They also examine a range of language-learning programs, such as dual language immersion, transitional bilingual education, and structured English immersion. Additionally, education professionals learn to apply theories of second-language learning, literacy development, and standards-based teaching strategies to provide productive learning environments for English-language learners in general classroom settings.

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDUC 6728 - Strategies for Teaching Content to English-Language Learners**

(3 sem. cr.)

Making academic content accessible and comprehensible for English-language learners requires specific strategies that K-12 teachers need to know and be able to do. By focusing on academic language, content acquisition, the use of adaptive technology, and English language models including Specifically Designed Academic Instruction in English (SDAIE), teachers learn practical ways to meet content standards for students with diverse needs, learning styles, and abilities. Education professionals address ways to prepare lessons that integrate both content and literacy objectives to better enhance the English language development of their English-language learners.

- Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EDUC 6729 - Assessment and the English-Language Learner**

(3 sem. cr.)

Education professionals taking this course are introduced to a variety of formative and summative assessment tools to inform instruction and identify and evaluate language proficiency levels of English-language learners in K-12 classrooms. Education
professionals utilize assessment strategies designed to measure listening, speaking, reading, and writing skills. Topics include an overview of the challenges and issues teachers face, including language bias and testing, the inappropriate placement of English-language learners, and the role of standards and high-stakes testing. Education professionals will be able to interpret quantitative and qualitative assessment data results of both formal and informal assessments.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6730 - Curriculum Design for Learning♦

(3 sem. cr.)
Professional educators must have the knowledge and skill to make important decisions regarding what students learn and how they will learn it to ensure student success. In this course, education professionals engage in a research-based process for designing and mapping curriculum that motivates students and promotes academic success. Beginning with the end in mind, education professionals identify clear learning goals and big ideas, create authentic assessments, and develop essential questions to guide effective instructional planning and ongoing assessments using their district or state standards and/or benchmarks. They also apply the curriculum design process to a subject area they teach, keeping in mind the influence of learning environment, family involvement, and social development on the design process.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6731 - Assessment for Student Learning♦

(3 sem. cr.)
Education professionals in this course examine the historical and contemporary perspectives on assessment, including trends in high-stakes assessment and accountability. They learn types and purposes of assessment as well as how to use assessments effectively. Education professionals also analyze strengths and weaknesses of various assessment methods and use ongoing assessments to guide decisions that will improve student performance. They explore and discuss data collecting and analysis, grading, record-keeping, and reporting. Additionally, they learn the importance of student self-assessment and the best ways to support their students in monitoring learning and reflecting on how to improve personal performance.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

EDUC 6732 - Differentiated Instruction♦
The practice of differentiating instruction is a way for educators to meet diverse learning needs and preferences without having to individualize instruction for every student. In this course, education professionals learn how to differentiate five instructional elements—content, product, process, affect, and learning environment—according to students' interests, readiness, and learning profile. They explore flexible grouping and managing the differentiated classroom. Using their classroom curriculum, they plan and implement differentiated lessons and align them to important learning goals, essential questions, and formative and summative assessments while ensuring that their instruction includes meaningful applications of knowledge. Education professionals also learn how to draw on resources, such as staff, community members, and educators to support the "whole" child in the learning process.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6733 - Action Research for Educators♦

(3 sem. cr.)

Education professionals use action research in a variety of ways to positively impact P–12 student learning. They examine, design, and implement action research. They address relevant problems, become involved in collaborative inquiry, use data and research to inform their practice, improve P–12 student academic success, and contribute to positive social change in their classrooms and school environments. Education professionals collect and analyze student data, develop and implement data-informed decisions to guide instructional planning, and engage in reflective practices to ensure continuous improvement and enhance professional growth.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6734 - Differentiated Instruction (Accelerating)

(3 sem. cr.)

The practice of differentiating instruction is a way for educators to meet diverse learning needs and preferences without having to individualize instruction for every student. In this course, education professionals learn how to differentiate five instructional elements—content, product, process, affect, and learning environment—according to students' interests, readiness, and learning profile. They explore flexible grouping and managing the differentiated classroom. Using their classroom curriculum, they plan and implement differentiated lessons and align them to important learning goals, essential questions, and formative and summative assessments while ensuring that their instruction includes meaningful applications of knowledge. Education professionals also learn how to draw on resources, such as staff, community members, and educators, to
support the "whole" child in the learning process.

Note: This course is offered in an accelerating format.

EDUC 6735 - Habits of Mind: Thinking Skills to Promote Self-Directed Learning (Accelerating)

(3 sem. cr.)
Education professionals in this course are helped to develop skills and strategies to prepare students for living and learning productively in today's society. They complete a variety of assignments designed to provide practical application of course content, such as designing a lesson in which they integrate habits of mind with other instructional elements to achieve multiple outcomes. They also create a rubric that allows students to demonstrate learning in each area of the lesson. Additionally, they reflect on the theories, concepts, and strategies learned in the course and consider the influence of new knowledge on future personal and professional endeavors. Through this course, education professionals learn how to help students manage, motivate, and modify their own learning as a continuing lifelong process.

Note: This course is offered in an accelerating format.

EDUC 6737 - Strategies for Teaching English as a Second Language (Accelerating)

(3 sem. cr.)
Education professionals in this course learn effective instructional skills and strategies to teach English as a second language in the K–12 classroom. Through conceptual and practical discussions and activities, they learn strategies and techniques to help students develop listening, speaking, reading, writing, and vocabulary skills in a variety of English-language learning environments. They also examine a range of language-learning programs, such as dual language immersion, transitional bilingual education, and structured English immersion. Additionally, education professionals learn to apply theories of second-language learning, literacy development, and standards-based teaching strategies to provide productive learning environments for English-language learners in general classroom settings.

Note: This course is offered in an accelerating format.

EDUC 6740 - Qualities of Effective Professional Development

(3 sem. cr.)
Effective professional development is foundational in improving a school system's ability to raise student achievement. Education professionals in this course examine the history and research that supports the need for ongoing professional learning for teachers, principals, and all adults who interact with students in P–12 schools. They use case studies of schools and districts that have achieved results to learn the standards of exemplary professional-development programs and analyze the attributes necessary for
success. Education professionals also have the opportunity to explore the roles and responsibilities of professional developers inside and outside the classroom as well as career paths for developing leadership skills in the area of adult and student learning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6741 - Designing Professional Development

(3 sem. cr.)
Professional development that ensures quality teaching for all students is based on a model of continuous improvement that is data-driven and grounded in research-based practices. In this course, education professionals examine a variety of professional-development models and select and plan the most appropriate approach to support their goal. Using adult-learning theory as a foundation, education professionals explore models of adult learning, change, and cycles of improvement. They also design strategies to build strong professional-development programs that include planning, delivering, following-up, and evaluating influence on teacher practices and student learning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6742 - Implementing Professional Development

(3 sem. cr.)
Delivering and sustaining professional development requires an understanding of culture and change. In this course, education professionals develop skills to set expectations, facilitate professional learning, support individual growth, and build collaborative teams. Using change theory, they learn to monitor and support adult learning by organizing professional learning communities that focus on student needs and school goals. They explore strategies for delivering and providing continuous follow-up and support of professional learning. Education professionals also learn how to use collaboration, facilitation, coaching, and mentoring skills to involve colleagues, staff, families, and other key stakeholders in making decisions that are based on research-based practices and support a culture of learning that involves educators, students, parents, and community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6743 - Evaluating Professional Development

(3 sem. cr.)
Evaluating the influence of professional-development efforts is crucial to ongoing success. Education professionals in this course explore systemic and comprehensive approaches for linking professional learning to student learning and using data to make informed decisions on how to improve the practices of educators and assess the
influence on student learning. Using logic theories, they learn how to collect and analyze data from student work and teacher practice to make informed decisions that lead to continuous improvement. They engage in coursework that emphasizes communicating and disseminating results to multiple constituents within the school system. They also focus on system approaches that promote shared leadership in continuing, improving, and sustaining effective professional development at the district, school, and classroom levels.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6751 - Creating Supportive Learning and Service Environments♦

(3 sem. cr.)
Supporting and retaining students until graduation are central to the mission of all institutions of higher education. In this course, education professionals investigate strategies for increasing student success throughout their college experience, from admission to graduation. They explore the ways in which faculty and staff throughout the institution can work collaboratively and leverage resources, such as emerging technologies, to create positive learning experiences. Educators focus on the interplay between academic and student support programs as well as how to design and implement such programs to maximize opportunities for student success.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6752 - Leading Change in Student Support Programs♦

(3 sem. cr.)
In this course, education professionals explore strategies for leading change in programs and services to support student success and retention. Education professionals engage in research and discussion on a variety of issues, such as assessing needs, developing programs, and seeking resources through fundraising and grant writing. They also engage in activities that focus on ways that change efforts can support an institution’s mission and strategic goals, such as increasing the participation of traditionally underrepresented populations in key program areas and building more inclusive communities of learners.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6753 - Planning and Program Development for Online and Distance Learning♦

(3 sem. cr.)
Learning technologies continue to advance and diversify; therefore, a critical task in education is to ensure that such technologies are used in a manner that works for the
institution and its students. Education professionals in this course are introduced to the process of planning and developing online and distance-learning programs. Education professionals investigate best practices in program structure and approach; steps in the planning process; requirements for accreditation and accountability; and emerging trends in integrating online technologies into a variety of learning environments. Through an integrative course project, they apply course concepts as they develop a project management toolkit that integrates specific steps and requirements associated with planning and developing an online program.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6754 - Administration and Assessment in Online and Distance Learning♦

(3 sem. cr.)
Implementing a high-quality online or distance-learning program requires careful planning and attention to a range of issues affecting the program's operational effectiveness, productivity, and ability to support and retain students. In this course, education professionals explore strategies for staffing, scheduling, and supporting students as well as methods for assessing the effectiveness of these strategies in achieving program goals. They engage in discussions and critical analyses of approaches to program management, assessment, and continuous improvement, focusing on the goal of ensuring that online and distance-learning programs maintain their competitive edge.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6755 - Principles of Marketing and Enrollment Management♦

(3 sem. cr.)
In an increasingly competitive market, colleges and universities must develop strategies for attracting and retaining students according to their missions and the needs of the community. In this course, professionals learn fundamental principles of marketing, institutional promotion, and enrollment management in a higher education context, including branding, differentiating and positioning, forecasting, and communicating with the public and alumni. They engage in discussions on a variety of issues related to strategic enrollment management processes, including legal and regulatory considerations related to student recruitment, financial aid, diversity issues, and methods to align marketing and recruitment efforts with institutional mission and goals. Demonstrating understanding of course concepts, education professionals complete an institutional case study to examine institutional approaches to enrollment management and marketing as well as related challenges.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
EDUC 6756 - Emerging Trends in Marketing, Recruitment, and Institutional Promotion

(3 sem. cr.)
New technologies that can support an institution's efforts to recruit and retain students are emerging every day. These technologies can be powerful tools for promoting and increasing awareness of an institution's products and services. Education professionals in this course explore applications of online social networking systems, digital media, and other communications tools. They also examine traditional media and public relations strategies, which leaders at all levels of an institution can use to attract, engage, and retain students and to generate institutional awareness. Additionally, they gain practical experience developing a marketing and communication plan in which they incorporate strategies and media tools to refine an institutional message.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6757 - Planning for Learning

(3 sem. cr.)
Effective learning experiences start with a clear plan. Decisions about what to teach, how to teach, and how to ensure students are achieving important learning goals confront every college instructor. Education professionals are introduced to concepts of planning curriculum and courses, establishing goals and outcomes, aligning outcomes with professional or disciplinary standards, prioritizing content, and planning for student engagement and active learning in this course. They engage in discussions and activities that emphasize the development of decision-making processes, which they can use to create effective plans for learning. Through an integrative course project, education professionals apply course concepts as they develop a learning plan that incorporates learning goals and teaching and assessment strategies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6758 - Creating Engaging Learning Experiences

(3 sem. cr.)
A growing body of literature on effective practices in higher education highlights the importance of student engagement in the learning process. In this course, education professionals explore principles and processes for creating meaningful, student-centered learning experiences in a variety of educational contexts, including ways of using technology to support learning. They focus on how they can address the needs of diverse learners using active learning strategies, share responsibility for learning with their students, and empower their students to become more self-directed. Education professionals also learn to anticipate and address the challenges that self-directed
approaches might create for students who are more familiar with traditional learning environments.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6759 - Assessing for Learning

(3 sem. cr.)
Assessment in college teaching involves several critical processes: giving students meaningful tasks that allow them to demonstrate their learning; providing feedback that enables students to improve their performance; and using data about student learning to continually improve teaching. Education professionals are provided with opportunities to design and discuss approaches to evaluation and assessment that support learner motivation and development, track progress toward outcomes, and gain information they can use to inform their own practice, including ways that technology can augment these approaches. Through this course, education professionals can learn what it means to engage in teaching scholarship—the process of investigating their teaching and sharing demonstrably effective approaches with their peers.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6760 - Facilitating Learning Online

(3 sem. cr.)
Online learning represents the fastest growing sector of higher education and is used in a variety of contexts. Education professionals in this course analyze how online learning can serve as a supplement to textbooks and traditional classroom instruction, a substitute for face-to-face time in blended or hybrid classes, and the exclusive method of learning in fully online courses and programs. They explore how online learning presents special opportunities as well as challenges to faculty and students. Through the development of an online learning experience, education professionals practice strategies for planning, facilitating, and assessing learning online, and they gain a better understanding of how to use online learning technologies to enhance learning and motivate students.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6761 - Globalization in Higher Education

(3 sem. cr.)
Globalization is a phenomenon affecting almost every aspect of society, from politics to commerce to entertainment. Higher education is no exception; technology and social mobility increasingly lead to opportunities for collaboration and competition among
Institutions globally. In this course, education professionals investigate trends and issues in higher education worldwide, including ways in which institutions serve the needs of an increasingly mobile student population. Through assignments designed to provide practical application of course content, education professionals consider globalization through a variety of contexts, such as in their personal and professional lives, student experiences, and challenges and opportunities. They also explore international differences in institutional organization and governance, operations and services, accountability, and articulation; they use this knowledge to inform later study of program development and administration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6762 - Administering International Higher Education Programs

(3 sem. cr.)
Leaders in academic programs and student services have a growing number of opportunities to provide their students with educational experiences that take place in one or more international contexts. Education professionals in this course address strategies for international student recruitment and support; development and administration of cooperative programs, such as study abroad; implementation of technology applications to support international experiences; and other approaches to entering and enhancing their position in the global higher education market.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6765 - Early Childhood Systems

(3 sem. cr.)
Involvement in public policy and advocacy efforts help foster the well-being of young children and families as well as the field of early childhood education. Effective involvement in the field of early childhood education, however, requires a foundational understanding of the system, its functions, and all its parts. In this course, education professionals examine the complexities of the early childhood infrastructure from local, state, national, and international perspectives. They explore, discuss, and blog about a variety of topics, such as public opinion with regard to the value and importance of providing quality services; parent, family, and community engagement; influence of current sociocultural, economic, and political contextual factors; and personal perspectives and reflections on the bonds of a collaborative learning community. Education professionals also analyze case studies to understand policy formation; connections between policies, politics, government; and allocation of funds.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
EDUC 6766 - Tools for Policymakers and Advocates♦

(3 sem. cr.)
Early childhood professionals must be skilled advocates to effect change positively. Education professionals are provided with the opportunity to gain the necessary tools, strategies, and insights to influence policy and advocate for young children, families, and the profession. Education professionals explore grant writing as well as family and political advocacy and research practices integral to effective leadership roles. Through a variety of conceptual and application-based assignments, they gain practical insight on building coalitions, developing communications plans, and designing effective public policies and advocacy initiatives.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6771 - Bridging Learning Theory, Instruction, and Technology (Accelerating)

(3 sem. cr.)
Education professionals in this course explore various learning theories and research on how the brain processes information as well as how they can use this knowledge to support the use of technology in the classroom. They explore and evaluate various technologies, such as computer-mediated instruction and virtual learning environments, as a means to foster learner-centered classrooms where students are motivated. Education professionals also learn how to support and enhance instructional practices using technology and how to integrate developmentally appropriate practices in teaching and learning with the latest digital resources available. Applying course concepts, they revise a lesson plan to support and facilitate student engagement using technology-based cognitive tools.

Note: This course offered in an accelerating format.

EDUC 6772 - Supporting Information Literacy and Online Inquiry in the Classroom (Accelerating)♦

(3 sem. cr.)
In this course, education professionals develop a new, expanded definition of what it means to be literate in today's technology-rich world. Education professionals explore the use and application of multimedia and Internet technologies that enhance learning and support collaborative problem-solving in a digital information society. They learn strategies for how to prepare students across the grade levels for the complex challenges related to reading, critical thinking, researching, and communicating in the 21st century. Synthesizing course concepts, they assess curriculum standards in their area and develop an inquiry-based unit plan designed to develop their students' information and visual literacy skills and meet a specific learning outcome or standard in their subject area.
EDUC 6775 - New and Emerging Technologies (Accelerating)

(3 sem. cr.)
Through this course, education professionals consider the future of teaching and learning, discover promising trends in technology, and investigate opportunities to become leaders in the field of technology and learning. They consider how to address school-wide challenges, such as limited resources and resistance to change, and they explore skills and strategies, such as grant writing and leading change. Additionally, they complete a capstone project that demonstrates their ability and willingness to become advocates and change agents who use technology to address challenges and create opportunities within the field of education.

Note: This course offered in an accelerating format.

EDUC 6780 - Exploring Leadership, Collaboration, and Consultation

(3 sem. cr.)
Leadership and collaboration are essential skills for working with teams to provide effective services for individuals with exceptionalities. These are practices that special educators must embrace and continually refine. Educators in this course will analyze the skills and dispositions that build healthy leadership styles and produce positive collaborative relationships. They will also examine the benefits and challenges of leading and collaborating with others to maximize the learning potential of every student.

Note: Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6781 - Special Education: Honoring Due Process

(3 sem. cr.)
Special education teachers are constantly confronted with ever-changing rules and regulations. In order to effectively lead and collaborate with teachers, families, and other professionals, special education teachers must have a thorough knowledge of the history and current practices related to special education advocacy, policy, and law. When presented with real-life scenarios, candidates will create practical solutions grounded in law and policy.

EDUC 6782 - Supporting Effective Evaluation and Assessment Practices

(3 sem. cr.)
Special educators in today's schools are responsible for working with a team to evaluate and assess to determine eligibility, create educational plans, and evaluate progress.
order to do this, they must be aware of and be able to implement culturally responsive, valid, and reliable practices. In this course, candidates will synthesize formal and informal assessments to monitor progress and analyze achievement to drive instructional strategies and assistive technologies for students with exceptionalities.

**EDUC 6783 - Creating Effective Behavior Interventions**

*(3 sem. cr.)*
Behavior greatly impacts all students’ ability to learn. Special educators are the most frequently called-upon professionals to evaluate, assess, and create behavior interventions whether a student is in a self-contained classroom or an inclusive setting. Candidates will be presented with a case study and reflect together on the behavior by identifying the antecedents and consequences presented. Furthermore, they will develop intervention strategies and share resources of evidence-based practices for improving behavior.

**EDUC 6784 - Adapting Instruction Using Evidence-Based Strategies**

*(3 sem. cr.)*
Providing accommodations and differentiating instruction are essential practices for special educators. In this course, special education professionals will apply research-based strategies for designing, delivering, and adapting instruction for students with exceptionalities. Candidates will be presented with real-life scenarios and must debate appropriate research-based instructional strategies to optimize learning for all students.

**EDUC 6785 - Implementing Literacy-Based Instructional Interventions**

*(3 sem. cr.)*
Reading, writing, and communication are literacy competencies that impact the quality of life for all people, especially individuals with exceptionalities. Special education professionals will devise appropriate and effective interventions for individuals with exceptionalities. Candidates will engage in a variety of conceptual and application-based assignments that emphasize ongoing assessment of literacy skills, strategies, and dispositions. Additional areas of emphasis include cultural and linguistic diversity, assistive technologies, and inclusive environments.

**EDUC 6791 - Special Education: Honoring Due Process (Accelerating)**

*(3 sem. cr.)*
Special education teachers are constantly confronted with ever-changing rules and regulations. In order to effectively lead and collaborate with teachers, families, and other professionals, special education teachers must have a thorough knowledge of the history and current practices related to special education advocacy, policy, and law. When presented with real-life scenarios, candidates will create practical solutions grounded in
law and policy.

Note: This course offered in an accelerating format.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 6793 - Creating Effective Behavioral Interventions (Accelerating)

(3 sem. cr.)

Behavior greatly impacts all students' ability to learn. Special educators are the most frequently called upon professionals to evaluate, assess, and create behavior interventions whether a student is in a self-contained classroom or an inclusive setting. Candidates will be presented with a case study and reflect together on the behavior by identifying the antecedents and consequences presented. Furthermore, they will develop intervention strategies and share resources of evidence-based practices for improving behavior.

Note: This course offered in an accelerating format.

EDUC 6795 - Implementing Literacy-Based Instructional Interventions (Accelerating)

(3 sem. cr.)

Reading, writing, and communication are literacy competencies that impact the quality of life for all people, especially individuals with exceptionalities. Special education professionals will devise appropriate and effective interventions for individuals with exceptionalities. Candidates will engage in a variety of conceptual and application-based assignments that emphasize ongoing assessment of literacy skills, strategies, and dispositions. Additional areas of emphasis include cultural and linguistic diversity, assistive technologies, and inclusive environments.

Note: This course offered in an accelerating format.

EDUC 6801 - Field Experience

(1 sem. cr.)

Through field experiences, principal candidates have authentic opportunities to apply what they have learned in courses and expand what they know and are able to do. All principal candidates in the program are required to spend a total of 240 hours in three settings (elementary school, middle or junior high school, and high school) mentored by licensed and practicing school principals. Field experience must include at least 160 hours in the candidate’s preferred level or primary teaching experience and 40 hours at each of the other two levels.

EDUC 6802 - Field Experience
Through field experiences, principal candidates have authentic opportunities to apply what they have learned in courses and expand what they know and are able to do. All principal candidates in the program are required to spend a total of 240 hours in three settings (elementary school, middle or junior high school, and high school) mentored by licensed and practicing school principals. Field experience must include at least 160 hours in the candidate’s preferred level or primary teaching experience and 40 hours at each of the other two levels.

**EDUC 6803 - Field Experience**

(1 sem. cr.)

Through field experiences, principal candidates have authentic opportunities to apply what they have learned in courses and expand what they know and are able to do. All principal candidates in the program are required to spend a total of 240 hours in three settings (elementary school, middle or junior high school, and high school) mentored by licensed and practicing school principals. Field experience must include at least 160 hours in the candidate’s preferred level or primary teaching experience and 40 hours at each of the other two levels.

**EDUC 6804 - Field Experience**

(1 sem. cr.)

Through field experiences, principal candidates have authentic opportunities to apply what they have learned in courses and expand what they know and are able to do. All principal candidates in the program are required to spend a total of 240 hours in three settings (elementary school, middle or junior high school, and high school) mentored by licensed and practicing school principals. Field experience must include at least 160 hours in the candidate’s preferred level or primary teaching experience and 40 hours at each of the other two levels.

**EDUC 6805 - Field Experience**

(1 sem. cr.)

Through field experiences, principal candidates have authentic opportunities to apply what they have learned in courses and expand what they know and are able to do. All principal candidates in the program are required to spend a total of 240 hours in three settings (elementary school, middle or junior high school, and high school) mentored by licensed and practicing school principals. Field experience must include at least 160 hours in the candidate’s preferred level or primary teaching experience and 40 hours at each of the other two levels.

**EDUC 6806 - Field Experience**
Through field experiences, principal candidates have authentic opportunities to apply what they have learned in courses and expand what they know and are able to do. All principal candidates in the program are required to spend a total of 240 hours in three settings (elementary school, middle or junior high school, and high school) mentored by licensed and practicing school principals. Field experience must include at least 160 hours in the candidate’s preferred level or primary teaching experience and 40 hours at each of the other two levels.

**EDUC 6880 - Social Entrepreneurship and Innovation: A Global Perspective**

(3 sem. cr.)
Social entrepreneurs are gaining international attention motivated by the desire for change and to see the world as it can be, not as it is. Students in the course will learn how social entrepreneurs have developed creative solutions to address social problems. The intention of the course is to develop knowledge, appreciate of the role of social entrepreneurs who create social change, deepen students’ understanding of the world around them, and inspire them to use their skills and knowledge to be, as Gandhi said, "the change you wish to see in the world."

Students in this course will gain knowledge about social entrepreneurs and how they are creating solutions to address societal problems, learn how to develop creative solutions to address social problems, and empower students to see social entrepreneurship as a force for social change. The course is designed for those who want to gain valuable tools to prepare them to make an impact on the lives of others. This course will be housed in the School of Public Policy and Administration for future upgrades and course maintenance.

**EDUC 6881 - Grant Writing**

(3 sem. cr.)
Grant writing is the method by which external funding can be secured by educational institutions, community organizations, and nonprofit agencies to provide services to the community. In this course, students will understand processes and gain basic skills needed for successful grant writing. These processes and skills consist of developing a project idea, identifying a funding agency, writing a compelling needs statement with goals and measurable objectives, developing a budget, collaborating with other people, submitting the grant application, understanding the grant review process, responding to the review, and managing the grant award. Course assignments allow students to apply and practice grant writing skills by developing a grant proposal based on an actual Request for Proposal (RFP).

**EDUC 6918 - Capstone: Leadership and Advocacy in the Early Childhood Field**
The master’s capstone experience provides the opportunity to integrate and apply program learning to real-world situations in the early childhood field. Early childhood professionals identify and research issues or problems that impact young children and families in their local communities. In collaboration with families, colleagues, and/or community partners, they design projects that demonstrate their leadership and advocacy skills in the early childhood arena. The capstone experience culminates with implementing the projects, in whole or in part, and reflecting on how these projects represent growth as early childhood professionals, leaders, and advocates.

Prerequisites
- EDUC 6109

EDUC 6960 - Capstone: Master's Project

Through the master's capstone experience, education professionals have the opportunity to integrate and apply their learning to real-world issues or problems. Education professionals research and create a product that addresses a critical issue in a particular institution or area of higher education. Examples of such products include a design for a program or service that could be implemented at a particular institution, a professional development program or resource, or a position paper that addresses a particular issue in depth. Education professionals choose an issue or problem that is of sufficient scope to enable them to apply theories, concepts, and practices gained from multiple areas of prior coursework.

Prerequisites
- All other courses

EDUC 6990 - Capstone: Practical Application in the Early Childhood Field

Through the master's capstone experience, education professionals are provided an opportunity to integrate and apply learning to real-world situations, issues, or problems. Education professionals choose a field project, issue, or problem related to their specialization that is of sufficient scope to enable them to apply theories, concepts, and practices from across their prior coursework.

Prerequisites
- All other courses

EDUC 7000 - Leading the Future of Education

Advanced graduate students are about to embark on one of the most exciting journeys
of their lives. This practical course provides meaningful skills students will need to select their path, complete their degree, and become a successful leader of educational change in the 21st century. Networking and research skills, scholarly writing, critical thinking, use of Walden resources, and the three advanced graduate paths (e.g., Ph.D., Ed.D., Ed.S.)—this course addresses all of these in a manner that provides a solid foundation of skill sets upon which students can base their journey. Students will find a balance of assignments (e.g., case studies, discussions, application assignments) that will ignite their passion for learning, that will allow students to collaborate with others, and that will guide their current and future work. This course is designed to reflect Walden’s social change mission and provide students with meaningful tools for success as an advanced graduate student.

**EDUC 7002 - Foundations: Educational Leadership and Administration**

(3 sem. cr.)
This course begins by building candidates understanding of the philosophy, requirements, and community of Walden University, The Richard W. Riley College of Education and Human Services, and the program. Candidates complete a pre-assessment, and develop an individual learning plan. Following this essential introductory work, candidates begin their study of school leadership by focusing on the structures of school organizations and leadership styles.

**EDUC 7004 - Foundations: Teacher Leadership**

(6 sem. cr.)
Education professionals in this course are introduced to the environment, expectations, and content of post-master's work in the Ed.S. in Teacher Leadership program. Through participation in the course, education professionals develop facility with Walden University’s online learning environment, and they gain an understanding of the university’s and the program’s support systems, expectations, and outcomes. They also gain knowledge about the field, which they synthesize with reflection on their own experience and goals.

**EDUC 7005 - Foundations: EdS in Curriculum, Instruction, and Professional Development**

(3 sem. cr.)
In this introductory course, education professionals explore the connection between curriculum, instruction, assessment, and professional development as well as the importance of each on student achievement. Education professionals examine leadership, in addition to change and systems theory, within the context of developing and implementing a shared vision for student learning that is embraced by all educators and families within a school community. Additionally, education professionals are
introduced to Walden University’s Richard W. Riley College of Education and Human Services and the requirements of the Education Specialist (EdS) program.

EDUC 7006 - Foundations: Assessment, Evaluation, and Accountability

(4 cr.)
In this foundational course, educators are prepared for joining the academic community with a focus on acquiring common language for the field of assessment, evaluation, and accountability within the context of educational organizational effectiveness. Key issues in the field are explored while learning the process for how to successfully complete the education specialist degree, with Walden support in developing (a) facility with Walden University’s online learning environment; (b) understanding of the university’s and the programs support systems, expectations, and outcomes; and (c) advanced graduate-level critical-thinking, research, and writing skills.

EDUC 7010 - Foundations: The Changing Context of Postsecondary and Adult Teaching and Learning♦

(6 sem. cr.)
Learning in adulthood is imperative for individuals to realize the opportunities of 21st-century workplaces, technology, and society. Providing these learning experiences requires committed and responsive adult and postsecondary education leaders. In this course, education professionals investigate contemporary trends and issues in teaching and learning in postsecondary and adult education settings. The course also provides education professionals with an introduction to the expectations of graduate work in Adult Education and College Teaching and Learning programs. Education professionals learn to work effectively within Walden University’s online learning environment and develop an understanding of university and program support systems, expectations, and outcomes.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 7011 - How Adults Learn: Theory and Research♦

(6 sem. cr.)
Working effectively with learners in any postsecondary setting, from traditional college classrooms to workplace training, requires a sound understanding of how adults learn. In this course, candidates examine key concepts in adult learning theory, focusing on developmental theory and the wide range of research that supports it. Candidates explore adult learning theories from andragogy to transformation, including phase and stage developmental theories, and they examine effects of gender and culture on adult learning. They also have the opportunity to reflect on the relationship of this material to their own learning or teaching experiences.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
EDUC 7012 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and of the appropriate use of both qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 7013 - Designing and Assessing Learning Experiences

(6 sem. cr.)
Research has considerably expanded knowledge of adult learning and development in recent years. These gains have resulted in a new paradigm for the design and assessment of learning experiences. In this course, candidates 1) advance their understanding of research methods as they examine literature about design and assessment; and 2) apply research-based principles to design a project that develops learning experiences for a specific population of adults, whether on-site, online, or through a blended hybrid model.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 7014 - Facilitating Adult Learning

(6 sem. cr.)
Grounded in research and theory about learning differences, this course explores the repertoire of practices that facilitate adult learning from both the teaching and learning perspectives. These practices range from mentoring and coaching to collaborative engagement and reflective practices. Learners deepen their understanding of research methods both through critiquing articles and by designing research studies to investigate specific learning practices.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 7015 - Adult Education Capstone: Trends, Issues, and Global Perspectives
New research and technological innovations continue to change the current state of knowledge; therefore, it is necessary that everyone functions as a lifelong learner. In this course, education professionals examine intriguing and potentially critical directions in adult learning, including new technologies and the impact of globalization. The concluding capstone project provides education professionals with the opportunity to demonstrate the ability to apply theories, concepts, and skills gained throughout the program. Working in a consultative role as an adult education professional, candidates engage in a real-world, problem-solving project within their work environment.

EDUC 7102 - Principles of Distance Education

Different theories, paradigms, and the history of distance education will be explored. Learners critique current research and assess online learning programs including hybrid and fully online delivery. Accessibility issues, open source, best practices to facilitate learning, global trends, and the move from elite to mass higher education will be analyzed. Synchronous versus asynchronous platforms will be contrasted.

EDUC 7103 - Leading and Managing Educational Technology

Education professionals in this course explore issues related to leadership regarding the integration of technology in business and in education at any level, including K–12 schools, community colleges, teacher education, or higher education. They explore such areas as leadership, strategic planning, systems acquisition, coordination, implementation, technology management and its implications for teaching and learning, and administrative functions. Moreover, they share perspectives through discussions on policies that affect human resource development, staff development, information access, security, management control, and evaluation.

EDUC 7104 - Designing Instruction for Distance Education

Instructional design for distance education involves understanding educational experiences, what makes these experiences effective, and the ways in which students learn in the online environment. This course provides education professionals with the opportunity to gain a practical understanding of these topics through the examination of learning styles, learning theory, social networking and collaborative group influences, assessment, global perspectives, and diversity. They also analyze effective online educational experiences from education and the workplace. Focusing on the design and delivery of distance education, education professionals engage in applied assignments that emphasize developing, field testing, and revising a web-based unit. They also explore ways to employ engaging instructional electronic strategies to enhance design and
development.

Prerequisites

• EDUC 8842 or EDUC 7102

EDUC 7105 - Learning Theory and Educational Technology

(4 cr.)

In this course, education professionals extend their knowledge of learning theory, including behaviorism, cognitivism, and constructivism, to the application of educational technology as they explore ways to translate theory to practice. Education professionals explore instructional interventions and their potential improvement through the application of technology. They also use a variety of theories, such as multiple intelligences, constructivism, computers as mind tools, brain-based learning, and connectivism to learn how technology facilitates learning. Through a collaborative constructivist activity, education professionals critically analyze constructivist learning theorists to determine how their principles apply to educational technology. Using knowledge gained from these analyses, education professionals identify and explain related challenges regarding the use of constructivist and collaborative activities for learning as well as solutions for overcoming these barriers.

EDUC 7115 - Assessment and Accountability in Education

(4 cr.)

Increasingly, educators at all levels are asked to document the impact of the educational process on learners and to make research-based decisions. This course provides educators with grounding in assessing and evaluating student learning, developmental outcomes, and educational programs. They also examine the purposes for collecting student data, acquire key evaluation concepts, and examine the distinctions among various approaches to assessing learning.

EDUC 7117 - Educational Organizations and Contexts

(4 cr.)

Research efforts to support the educational process and effective leadership demand an understanding of schools and academic institutions as complex systems and units of change. Education professionals examine theories of organizational functioning and apply these insights to the functioning of individuals and groups within educational systems. Topics include systems thinking, assuring organizational effectiveness that supports teaching and learning, and conflict management.

Prerequisites

• EDUC 7006
• EDUC 7115
EDUC 7200 - Teaching and Learning for School Leaders

(3 sem. cr.)
Effective educational leaders influence the quality of teaching by understanding how to recognize outstanding teaching and facilitate improvement by communicating how and why learner-centered teaching enhances the learning outcomes of every student. This course introduces candidates to the latest research on education, teaching, and learning, and fosters the development of an understanding of how effective approaches to instruction are informed by research.

EDUC 7201 - Communication and Collaboration for Leaders

(3 sem. cr.)
Effective educational leaders work to foster shared understanding of and commitment to making sure that every student learns and succeeds; this requires the ability to communicate and the capacity to create conditions and processes that foster collaborative problem solving and decision making. Education professionals in this course explore the characteristics of effective leaders. They learn how to model open and responsive communication as well as how to create time and use tools to ensure that such interactions are common within the school and throughout the school community. They also explore the role of schools in communicating with and drawing upon community resources of various types, including public agencies and organizations that serve youth and families. Through this course, education professionals work toward establishing the personal, ethical, and moral platforms to become effective leaders who model and promote ethical and productive civic behavior.

EDUC 7202 - Ensuring Quality Education for Students With Diverse Needs

(3 sem. cr.)
Education professionals in this course explore and analyze the issues, complexities, responsibilities, and opportunities associated with leading schools with diverse student populations. By acknowledging differences among learners, as well as biases, discrimination, prejudices, and stereotypes, school leaders can identify diversity as a dynamic contributing factor to a rich learning environment in which individual differences are honored and respected. A focus of the course is also on one of the most challenging tasks facing schools today: to substantially increase the achievement of students placed at risk because of limited facility with English, and physical, mental, and emotional disability. Candidates will study diverse and inclusive approaches that have proven most effective in supporting all language learners and students with special needs to reach high standards of performance.

EDUC 7203 - Policy and Law in School Organizations
This course includes a study of selected general legal principles, case and statute law, and law-making agencies that impact leaders and their educational institutions. Key content areas include but are not limited to the legal status of the local school district; the role of federal, state, and local governments that may apply; governance of schools; and policies, rules, and regulations. Educators in the course will also cover the legal rights, responsibilities, and obligations of administrators, teachers, students, parents, and school boards, community education, civil rights, collective bargaining, torts and contracts, and legal research, as well as the development of policy to meet regulations and other provisions.

EDUC 7204 - Using Data to Strengthen Schools

Education leaders must use data extensively to guide them in defining needs, setting and prioritizing goals, monitoring and evaluating progress, and identifying effective strategies for improvement. The continuing analysis of the gaps between student performance and student learning goals defines the actions of effective school leaders. Decision-makers must understand the array of data that are needed for school improvement. They must know the principles and techniques of measurement, evaluation, and data analysis. They must use a multitude of strategies to analyze data to propel teaching and learning and school improvement. They should use technology to support the collection and use of data. They need to engage the school community (teachers, parents, and students) in understanding and supporting data to guide the analysis of strengths, weaknesses, threats, and opportunities in the ongoing pursuit of school improvement.

EDUC 7205 - Budgeting and Allocating Resources

Research on effective schools provides guidance on the most productive ways to organize time, people, money, technology, and other resources. To use these resources most effectively, leaders need to have a strategy that defines the most important priorities, the overall educational design, and the organizational structures that best match the necessary goals for improvement. Effective leaders need to be able to (1) link whole-school strategic plans to effective instructional practices and improved use of time and money; (2) ensure individualized attention where needed in subject areas; (3) evaluate alternative paths to school improvement; (4) invest wisely in improving teaching quality; and (5) organize staff and use other resources in new ways that allow focused investment in teaching and learning.

EDUC 7206 - Creating Positive, Safe, and Effective Learning Environments

Effective educational leaders develop capabilities to foster cultures for learning based on
mutual respect among students, teachers, staff, parents, and the larger community. Strategies for fairly and effectively administering discipline and resolving conflict are addressed. This course is intended to help leaders understand and treat individual and group differences and potential conflict as opportunities for developing the dispositions, knowledge, and skills that result in social competencies essential to civic participation and interpersonal effectiveness in school and beyond. Candidates also study issues related to safety and violence in schools, considering both methods of prevention and ways to respond to unsafe and violent situations.

EDUC 7207 - Leading Curriculum Initiatives: Literacy and Math

(3 sem. cr.)
To be effective, school leaders must understand the foundational principles of teaching—curriculum, instruction, and assessment. Education professionals in this course also focus on the considerations with which they need to engage as they plan for the adoption and implementation of a new or substantially revised program to enhance student learning in a content domain. Literacy and math are two content areas that are problematic in many schools, especially those serving diverse students and students who are underperforming. Thus, while the lessons are applicable to other subjects, the focus here is on how to ensure that content standards, curriculum materials, assessment, instruction, professional development, and parental and community involvement, among other initiatives, are aligned in ways that foster student achievement in literacy and math.

EDUC 7208 - Recruiting, Evaluating, and Retaining School Personnel

(3 sem. cr.)
Candidates study human resources policies and practices for recruiting, selecting, hiring, inducting, developing, evaluating, and retaining or dismissing school personnel. Identifying teachers’ needs for professional growth is important, but leaders must also ensure that teachers have the opportunity and motivation to use their professional expertise and to participate in ongoing professional development focused on enhancing the learning of every student. As well, school leaders must be able to identify characteristics of productive teacher evaluation processes and programs; distinguish between supervising teaching and supervising learning; and utilize a process and structure for evaluating school personnel that is productive and supportive, motivates improvement, results in retention of highly competent staff members, embodies standards of due process, and takes into account the provisions of the contractual agreements for staff.

EDUC 7210 - Leadership for Today's Schools

(6 sem. cr.)
Today’s schools are dynamic places and require leaders who understand how learning communities operate and thrive and are prepared to deal with the demands of internal
and external forces. In this course, education professionals make connections between change theory and the continual appraisal of evolving needs of the learning community and application of a grounded knowledge base of theory and practical strategies supported by research. Education professionals are empowered to explore current and future technology as they assess educational trends and issues. Education professionals also analyze their own and others' paradigms and leadership styles, and they determine best practices to promote positive social change.

Students who successfully complete both EDAD 6805 - Facilitating Productive Working Relationships and School Culture to Enhance Student Learning (3 sem. cr.) and EDAD 6809 - Implementing Continuous School Improvement (3 sem. cr.) from the MS in Education specialization in Educational Leadership (Non-Licensure) (Grades K–12) program with a "B" or better may transfer out of this course. Students who successfully complete both EDUC 6647 - Dynamic Teacher Leadership (3 sem. cr.) and EDUC 6651 - Teacher Leadership in the Classroom: Increasing Learning and Achievement (3 sem. cr.) from the MS in Education specialization in Teacher Leadership program with a "B" or better may transfer out of this course.

EDUC 7211 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and the appropriate use of qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDUC 7212 - Teaching and Learning: Theory and Research

(6 sem. cr.)
Research has considerably expanded the knowledge of teaching and learning in recent years. A new paradigm for the design and assessment of learning experiences is a result of these gains. In this course, education professionals advance their understanding of research methods as they examine literature about design and assessment. They also apply research-based principles, via technological means, to collect, analyze, and present data with the goal of solving a learning problem in their school or district.

EDUC 7213 - Collegial Interactions and Professional Development

(6 sem. cr.)
This course expands the role of teacher leadership from the classroom to the school community. Education professionals in this course focus on the development of
knowledge, abilities, and dispositions necessary for effective and productive leadership in effecting professional partnerships, participating in collegial study teams, facilitating professional development of other educators, and adeptly using collegial and collaborative processes, such as coaching and mentoring.

EDUC 7220 - Leading Effective Curriculum Design

(3 sem. cr.)
Curriculum design is effective when it aligns with a district's beliefs about teaching and learning. In this course, education professionals examine current research on learning theory, and they consider how to use various curriculum design models to bring such theory to action. They learn how to develop curriculum initiatives that align with standards, contextualize content, and focus on the needs of diverse learners across all grades levels. Education professionals also engage in coursework that emphasizes the importance of building capacity among school leaders by launching learning communities that can lead, monitor, and support successful implementation of curriculum plans.

EDUC 7221 - Leading Research-Based Instructional Practices

(3 sem. cr.)
Content expertise, classroom instruction, and assessment play a vital role in the successful implementation of a system's curriculum plan. Through this course, educators explore how to lead a system of school leaders who can implement research-based instructional practices that result in student success. Participants will engage in a process of analyzing achievement data, identifying concerns, and matching appropriate instructional strategies to meet student needs. They will learn how to lead others in making instructional decisions that are intentional, content-specific, differentiated to meet diverse student needs, and result in rigorous learning for all students. This course also includes the design of instructional interventions for struggling students, English language learners, and students who lack prior knowledge.

EDUC 7223 - Using Assessment and Data for School Improvement

(3 sem. cr.)
In an age of accountability, leaders must be able to use multiple forms of data to inform curricular and instructional decisions. In this course, education professionals examine the inextricable link between curricular content, instruction, and assessment within a system. They examine the role of formative and summative assessments in making decisions and the various forms and purposes of assessment. Education professionals learn how the ongoing use of assessment data can move curriculum and instruction beyond mediocrity to support rigorous learning for all students. Through conceptual and applied assignments, they explain how to use data to lead school reform, and they examine how to select curricular programs that support struggling students and how to articulate a system’s assessment targets to the larger educational community.
EDUC 7304 - Effective College Teaching: Engaging Diverse Learners

(6 sem. cr.)
As colleges and universities broaden their missions to serve new groups of learners, and as more people pursue a college education, college educators must strive to engage increasingly diverse student populations. At the same time, changing workplace needs and growing demands for accountability require that college educators must be able to help demonstrate that learners have met important learning goals. In this course, education professionals will investigate the research-based teaching and assessment strategies that can support all learners. Education professionals also assess methods for critically reflecting upon their own practice, engaging in education scholarship, and collaborating with colleagues on the continuous improvement of learning experiences and environments.

EDUC 7306 - Effective College Teaching: Using Technology to Support Learning

(6 sem. cr.)
Technology is a tool that can support student engagement and the development of critical knowledge and skills. College educators must learn how to harness the growing number of new technologies for constructive use in diverse learning contexts. This course provides education professionals with the opportunity to demonstrate a practical application of theories, concepts, and skills gained throughout the program. Education professionals consider how to stay abreast of available technologies and related research as well as how to use these tools and research most effectively in face-to-face, hybrid, and online environments. Through a real-world, problem-solving project within their work environment, education professionals demonstrate their ability to make critical decisions on when and how to implement technological solutions, how to assess the value of these tools for students in particular learning contexts, and how to maximize the power of technology for learning in a global environment.

EDUC 7308 - Principles of Social Change

(4 cr.)
Consistent with the mission of Walden University, this course “sets the stage” for the remainder of the program, by providing students with a framework for their work as scholars and as agents of positive social change in education. Students examine foundational theories of education, while looking toward their future role in the discipline. Students also begin developing their skills as scholarly writers.

EDUC 7309 - Social Change in Education

(4 cr.)
The choice to effect positive social change in education demands that scholar-practitioners have the requisite skills and abilities to take responsibility for generating
new knowledge, conserving the values of education, and communicating that information to others. In this second course on social change, students examine these key principles of disciplinary stewardship, while building strategies to engage the scholarship in education.

Prerequisites
- EDUC 7307
- EDUC 7308

EDUC 7312 - Innovation and Change in Education

(4 cr.)
Understanding the impact of new innovations and change has emerged as a field of theory and research in education. Building on the theories and research from previous courses, along with the principles of social change, students examine the challenges inherent in initiating and managing change in educational organizations. The role of "change agent" is explored, as well the influences of technological innovations on the academic process.

Prerequisites
- EDUC 7311

EDUC 7314 - Capstone: Leadership for Social Change in Education

(6 cr.)
This is the final course in the Ed.S. in Leadership for Social Change in Education program and gives students an opportunity to individualize the content of the courses by integrating the concepts and principles learned in the program in a meaningful way. Acting as change agents or change advocates, students will identify a problem within their individual organizations; present data illustrating the nature of the problem, and make recommendations, based on relevant social change theory, concepts, and principles, that will lead to an improvement of the human and social conditions in their organizations. To extend the learning experience, students will collect feedback on the viability of their individual plans from at least 10 stakeholders, compare and contrast the views, and cite revisions that should be made to their original plans to improve the efficacy of the project.

Prerequisites
- All other courses

EDUC 7341 - Trends and Issues in Educational Technology

(5 cr.)
Using new technologies in new ways sparks learning, creativity, and innovation. Trends and issues in educational technology are examined to discover how they influence
learning and creativity in the workplace. Learners collaborate to demonstrate the evolution of a current technological trend, analyze its impact on learning and society, and evaluate the societal issues and problems caused by that trend.

EDUC 7343 - Creating Digital Media

(5 cr.)
The effective use of digital media in learning environments requires leaders in the field to be both consumers and creators of multimedia. Learners become knowledgeable developers of digital media by applying principles of instructional design and pedagogy to multimedia. Learners collaborate in the design and creation of digital and interactive media based on visual design principles.

EDUC 7344 - Innovations and the Diffusion of Learning Technologies

(5 cr.)
Thought leaders instigate change in the workplace. Learners explore Rogers’s diffusion of innovations theory, research effective practices for integrating technology and overcoming resistance to change, and apply methods for being a catalyst for change. Playing a diffusion simulation game enables learners to analyze the power of gaming in instructional environments. Learners analyze the needs of an organization and demonstrate their skills of persuasion to convince key stakeholders to adopt a technological innovation in their workplace.

EDUC 7345 - eLearning

(5 cr.)
Learning continues to change globally through the availability of a wide variety of electronic devices. Principles of distance education, mobile learning, MOOCs, virtual schooling, global collaboration, and online teaching and learning are the foci of this course. Learners create a digital video on a topic related to eLearning, by applying problem-solving and critical-thinking skills to determine the most appropriate tools and learning environments for their workplaces.

EDUC 7346 - Leading Change

(5 cr.)
Effective leaders direct the vision and goals for sustainable change initiatives in organizations. Based on the Human Performance and Training Model, learners explore strategies and tactics needed to bring about positive social change through an analysis of leadership, strategic planning, motivation, communication, and learning technologies. Problem-solving skills are developed as learners effect change in the workplace focusing on a human performance issue. Components for successful grant writing are developed.

EDUC 7347 - Designing Instruction for eLearning
Opportunities for learning have expanded as a result of eLearning technologies. Learners evaluate MOOCs, blended environments, mobile devices, and online learning as means for delivering content and providing collaboration and global connectivity. Instructional design principles are applied to effectively design and create an online eLearning module that engages students in learning beyond the walls of the classroom.

EDUC 7352 - Assessing for Individual Growth

(4 cr.)
The value of performance assessment coupled with accountability systems can vary widely, depending on how resulting data are used to enhance learning. Students in this course examine the nature of individual evaluation in multiple educational contexts. Students will examine the use of data for measuring learner progress, data-based decision making, and personnel evaluation. Supporting technical skills are integrated into the course, including quantitative, qualitative, and mixed-methods of data gathering and analysis.
Prerequisites
- EDUC 7350
- RSCH 7100D
- RSCH 7200D

EDUC 7353 - Evaluating and Improving Programs, Organizations, and Systems

(4 cr.)
Determining comprehensive value and worth of a curriculum, project, instructional method, institution, or policy is a complex endeavor. In this course, educators examine the process of determining the value, purpose, efficacy, and social implications for programs, organizations, and systems within a framework for continuous improvement. Supporting technical skills are integrated into the course, including quantitative, qualitative, and mixed methods of data gathering and analysis.
Prerequisites
- EDUC 7350
- EDUC 7250

EDUC 7354 - Dynamics of Communication for Impact and Results

(4 cr.)
Finesse and skill are needed to communicate complex information and findings from data analysis to particular stakeholders in ways that convey understanding, impart meaning, and stimulate a call to action. The focus of this course is on how to report results, consequences, options, and recommendations in compelling ways for multiple
audiences. A wide variety of communication methods will be explored that include presentation technology, Internet communications, technical writing, writing for publication, press releases, grant writing, and collaborative communication. Data compression is practiced as part of the communication and recommendation process.

Prerequisites
- EDUC 7353

EDUC 7355 - Capstone: Building a Culture of Continuous Improvement

(5 cr.)

Continuous improvement is a phrase that is applied in both business and educational settings. Operationalized, the term crosses fields that include leadership, organizational development, change theory, and evaluation and assessment. In this course education professionals connect continuous improvement as referenced in these fields and move beyond to include organizational culture, professionalism, social justice, and codes of ethics that support the formation and sustainability of this type of culture. The culminating project provides a platform for individualizing a plan with a self-chosen organization that incorporates evaluation, assessment, and a vision for social responsibility as part of creating a culture of continuous improvement.

Prerequisites
- EDUC 7354
- EDUC 7355 must be the last course taken in the program.

EDUC 7411 - Foundations for Curriculum, Instruction, and Assessment

(6 sem. cr.)

Providing systemic leadership at the district, regional, state, or federal level in curriculum, instruction, and assessment is a complex, challenging process. This course is a foundation for education professionals to navigate this process and lead so that they can promote the success of all K–12 students within their organizations by developing quality educational programs. Education professionals examine the critical elements of a framework for leading for excellence, including curriculum, instruction, and assessment; data-driven instructional improvement; professional learning time for improvement; and leadership skills that produce results. They also learn the process for completing their doctoral degree successfully by examining how Walden University supports them in developing facility with Walden’s online learning environment; understanding of the university's and the program's support systems, expectations, and outcomes and doctoral-level critical-thinking, research, and writing skills.

EDUC 7412 - Leadership for Today's Schools
(6 sem. cr.)
Today’s schools are dynamic places and require leaders who understand how learning communities operate and thrive and are prepared to deal with the demands of internal and external forces. In this course, education professionals make connections between change theory and the continual appraisal of evolving needs of the learning community and application of a grounded knowledge base of theory and practical strategies supported by research. Education professionals are empowered to explore current and future technology as they assess educational trends and issues. Education professionals also analyze their own and others’ paradigms and leadership styles, and they determine best practices to promote positive social change.

EDUC 7450 - Systemic Curriculum Design: Rigor, Relevance, and Results

(6 sem. cr.)
Designing curriculum with rigor, relevance, and results requires broad understanding of the key concepts behind each of these attributes. In this course, education professionals examine the contribution of learning theory to what defines rigor as they explore alignment of standards and design models as well as the role of collaboration between educators and the needs of an ever-increasing diverse student population, including English-language learners, special education educators, gifted students, and students of poverty. As leaders of learning, education professionals examine the connection between relevant curriculum and global trends, social-emotional, and character development, and the integration of technology for student engagement. In addition, they gain an understanding of what constitutes results that acknowledge the demands of accountability from multiple constituents, such as parents, community members, school administrators, and government oversight. They also gain practice analyzing, evaluating, and applying quantitative research methods appropriate to data-driven planning and decision making.

EDUC 7451 - Data-Driven Instruction and Assessment

(6 sem. cr.)
Instructional leaders must have the ability to diagnose by reviewing data and practices, set a vision for where they want to go, prioritize the work by utilizing relevant data, identify measurable goals, develop an action plan, and then monitor their results. Education professionals in this course examine this inextricable link between instruction and assessment. They engage in a diagnostic process designed to meet diverse student and systemic needs. They also examine the role of formative and summative assessments in making decisions, the various forms and purposes of assessment, and how the ongoing use of assessment data can move curriculum and instruction beyond mediocrity to support rigorous learning for all students. Additionally, they explore qualitative research methods appropriate to understanding institutions, programs, and stakeholder interests.
EDUC 7452 - Capstone: Effective Professional Development

(6 sem. cr.)
Effective professional development is foundational to improving a school system's ability to raise student achievement. Using adult learning theory as a foundation, education professionals in this course explore models that look at adult learning strategies and skills that build strong professional development opportunities promoting new knowledge and skills that affect teacher practice and student learning. Educators will learn how to use collaboration, facilitation, coaching, and mentoring that support a culture of learning that involves students, educators, parents, and community. As evaluating the impact of professional development efforts is crucial to ongoing success, leaders learn to collect and analyze data from student work and teacher practice to make informed decisions that lead to continuous improvement. Communicating and disseminating results to multiple constituents within the school system will be emphasized. Educators will also investigate mixed-methodology research approaches appropriate to planning and resource management.

EDUC 7541 - Foundations in Reading and Literacy Leadership

(6 sem. cr.)
Literacy may be understood in multiple ways across various settings and populations. This course will lay a foundation for leaders to define literacy based on sociopolitical landscape, the influence of social media and technological innovation, and influences coming from Common Core standards that influence literacy programs in P-20 and beyond. As part of this foundational course, candidates will also learn the process for how to succeed as a graduate student at Walden University, understanding how Walden supports students in developing (a) facility with Walden University's online learning environment; (b) understanding of the university and the program support systems, expectations, and outcomes; and (c) graduate-level critical thinking, research, and writing skills.

EDUC 7542 - Literacy Leadership for Today's Schools

(6 sem. cr.)
The field of literacy education demands leaders who are not only knowledgeable in this subject area but who can articulate a dynamic vision that motivates collaboration, creativity, and positive social change. This course, grounded in knowledge about literacy professional standards of practice, examines the high-stakes nature of literacy acquisition in the context of limited financial and human resources. Leadership skills explored include decision making to solve complex problems, facilitation for reaching goals, mentoring, and the building of staff capacity for literacy infusion across content areas. Candidates study leadership and change theory at both the research and application levels.
EDUC 7543 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and of the appropriate use of both qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDUC 7544 - Learners and the Changing Literacy Landscape

(6 sem. cr.)
Literacy is essential for individual learning and is also a means by which an individual participates in the intellectual, social, and commercial life of the community. Students in this course examine language development within the context of culture, the value placed on literacy within the community, and diversity of learner ability. Topics include the developmental nature of literacy competencies from early childhood to the adult learner, potential barriers to literacy that learners of all ages must overcome, theoretical research, and approaches to curriculum and instruction that facilitate literacy across settings. Specific attention is given to the challenges second language learners face in school. Candidates will practice analyzing, evaluating, and applying research methods appropriate to data-driven planning and decision making.

EDUC 7545 - Assessment and Data Analysis to Support Systemic Literacy Programs

(6 sem. cr.)
Designing systems that effectively promote and support high levels of literacy proficiency requires the use of data that accurately describe the status of student, teacher, and school performance. This course will examine a variety of assessment tools and validity issues for addressing individual and classroom needs as well as district and state mandates. Topics include a focus on data analysis for tiered intervention decision making and the interpretation of data to drive recommendations at a systemic level. Skills of collaboration and stakeholder inclusion are examined. Quantitative and qualitative methods appropriate to understanding institutions, programs, and stakeholder interests are also explored.

EDUC 7547 - Capstone: Program Development and Professional Development

(6 sem. cr.)
As research and technology continue to provide new perspectives on literacy,
educational leaders are charged with the responsibility for leading the selection or development and implementation of innovative programs that support high levels of literacy achievement for all learners. This course emphasizes program development, monitoring, and evaluation for continuous improvement of literacy teaching and learning. It integrates the important role the literacy leader plays in supporting effective professional development. Topics also include the creation of a literacy environment and the use of technology to promote both student learning and the professional development of teachers. Research highlights current issues in the field of literacy as they relate to program development, evaluation, and professional development. This course culminates with the EdS Capstone Project.

EDUC 7740 - Qualities of Effective Professional Development

(3 sem. cr.)
Effective professional development is foundational in improving a school system’s ability to raise student achievement. Education professionals in this course examine the history and research that supports the need for ongoing professional learning for teachers, principals, and all adults who interact with students in P–12 schools. They use case studies of schools and districts that have achieved results to learn the standards of exemplary professional development programs and analyze the attributes necessary for success. Education professionals are also provided with the opportunity to explore the roles and responsibilities of professional developers inside and outside the classroom as well as career paths for developing leadership skills in the area of adult and student learning.

EDUC 7741 - Designing Professional Development♦

(3 sem. cr.)
Professional development that ensures quality teaching for all students is based on a model of continuous improvement that is data-driven and grounded in research-based practices. In this course, education professionals examine a variety of professional-development models and select and plan the most appropriate approach to support their goal. Using adult-learning theory as a foundation, they explore models of adult learning and change as well as cycles of improvement. They also design strategies to build strong professional-development programs that include planning, delivering, following-up, and evaluating impact on teacher practices and student learning.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 7742 - Implementing Professional Development

(3 sem. cr.)
Delivering and sustaining professional development requires an understanding of culture and change. In this course, education professionals develop skills to set expectations,
facilitate professional learning, support individual growth, and build collaborative teams. Using change theory, education professionals learn to monitor and support adult learning by organizing professional learning communities that focus on student needs and school goals. They explore strategies for delivering and providing continuous follow-up and support of professional learning. They also learn how to use collaboration, facilitation, coaching, and mentoring skills to involve colleagues, staff, families, and other key stakeholders in making decisions grounded in research-based practices and support a culture of learning that involves educators, students, parents, and community.

EDUC 7743 - Evaluating Professional Development

(3 sem. cr.)
Evaluating the influence of professional-development efforts is crucial to ongoing success. Education professionals in this course explore systemic and comprehensive approaches for linking professional learning to student learning and using data to make informed decisions on how to improve the practices of educators and assess the impact on student learning. Using logic theories, education professionals learn how to collect and analyze data from student work and teacher practice to make informed decisions that lead to continuous improvement. They engage in coursework that emphasizes communicating and disseminating results to multiple constituents within the school system. They also focus on system approaches that promote shared leadership in continuing, improving, and sustaining effective professional development at the district, school, and classroom levels.

EDUC 7745 - Applied Research in Education, Part I

(3 sem. cr.)
Being a knowledgeable consumer of research requires the ability to understand and process the philosophies, core components, and designs and methodologies in educational research and scholarship. In this course, education professionals develop the skills to analyze and interpret research studies with a critical eye as well as to communicate or implement the findings. They work toward becoming consumers of research who confidently assess the reliability and validity of a study, interpret the study, and articulate and/or implement the findings of the study into practice. In addition, they engage in practical assignments focused on quantitative methods of design and analysis.

EDUC 7746 - Applied Research in Education, Part II

(3 sem. cr.)
Education professionals in this course build upon the concepts learned in EDUC 7745 - Applied Research in Education, Part I, synthesizing acquired knowledge with a quantitative methodology application project. Through this project, education professionals develop an understanding of research design and methodology, focusing beyond quantitative approaches to include qualitative design and analysis, including
mixed methodology. They learn to function as consumers of research, gaining skills for reporting and contextualizing research.

Prerequisites
- EDUC 7745

EDUC 7760 - Foundations: Special Education

(6 sem. cr.)
Special education as a field is dynamic, with a growing research base of best practices and changing implementation efforts that seek to balance effective and efficient education for students with disabilities. Education professionals in this course explore evolving trends that reflect this balance and a range of related topics, such as issues of equity, assistive technology, collaborative instruction between regular and special educators, delivery approaches with and without student categorization, and ethical practice. As part of this foundational course, education professionals learn the process of how to complete their doctoral or education specialist degree successfully. They gain facility with Walden University’s online learning environment; knowledge of the university’s and the program’s support systems, expectations, and outcomes; and advanced, graduate-level critical-thinking, research, and writing skills.

EDUC 7761 - Leadership, Advocacy, Policy, and Law

(6 sem. cr.)
Leadership and advocacy go hand-in-hand when seeking to promote policies that support effective practices in education for early childhood and school-age students. In this course, education professionals analyze the connections among advocacy, leadership, and policy by examining the evolution of education legislation and pivotal case law in the United States. They examine change theory and leadership styles, allowing them to reflect on their own and others’ paradigms and to determine best practices to promote positive social change. They also engage in a culminating project through which they construct a professional plan for advocacy and leadership in an area of interest that includes issues of diversity and special needs.

EDUC 7762 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and of the appropriate use of both qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally,
educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

**EDUC 7763 - Specialized Instruction**

(6 sem. cr.)
A growing body of research exists around evidenced-based instructional practices in special education. This course reviews the literature specific to specialized instruction for students with disabilities in language, reading, writing, math, and content areas. Topics also include effective practices for instruction and evaluation for students with social-emotional and behavioral needs, including applied behavior analysis and positive behavioral interventions and skill building. Related brain research will be examined, as well as assistive technology and methods of delivery, whether in isolation, small group, or inclusive settings.

**EDUC 7764 - Research Methodology and Special Education**

(6 sem. cr.)
To document the effectiveness of practices in special education, different research questions are needed that call for different types of methodologies. This course examines four types of research methodologies important to special education: experimental group, correlation, single-subject, and qualitative designs. Particular attention is given to single-subject research designs that are used to study behavioral change in an individual or group as a result of an intervention. Topics include reliable measurement, repeated measurement, description of conditions, baseline and treatment conditions, and single-variable rules.

**EDUC 7765 - School-Wide Intervention Models**

(6 sem. cr.)
Response to intervention (RTI) is a school-wide approach that integrates assessment and intervention within a multitiered prevention system to maximize student achievement and to reduce behavioral problems. This course examines RTI research and other problem-solving processes for best practices for using data to identify students at risk of academic, social, or emotional failure; methods of disability identification and monitoring student progress; and data-based decision making for instruction, universal instruction, and interventions useful for all students. Professional development of regular and special education teachers and the role of parents will be explored. Functional behavioral assessment is examined as an evaluation tool for understanding behavior and effective practices for school-wide positive behavioral support is also explored.

**EDUC 7766 - Sustaining and Supporting Effective Practices in Special Education (Capstone)**
Once effective practices for special education are in place, a clear plan is needed for implementation fidelity that addresses program integrity and sustains commitment within the professional learning community. Candidates will examine critical contributing components such as program evaluation, professionalism, cultural resonance, and policy to support continuous improvement.

Prerequisites
- All other courses

EDUC 7801 - Field Experience

Field experiences provide education professionals with authentic opportunities to apply learning as well as to expand understanding and ability. Building knowledge, skills, and dispositions for field experiences, education professionals also participate in two residencies in which they have the opportunity to meet face-to-face with faculty members to learn and hone skills, develop dispositions, and discuss ways to ensure productive and successful field experiences and meet the demands of the profession they are studying. The program requires a minimum of 320 hours or 40 eight-hour days (across 12 consecutive months) in elementary school, middle or junior high school, and high school settings as an administrative aide to a licensed and practicing school principal. Field experience must include at least 40 hours or 1 week at each level that is not a part of education professionals' primary teaching experience.

EDUC 7802 - Field Experience

Field experiences provide education professionals with authentic opportunities to apply learning as well as to expand understanding and ability. Building knowledge, skills, and dispositions for field experiences, education professionals also participate in two residencies in which they have the opportunity to meet face-to-face with faculty members to learn and hone skills, develop dispositions, and discuss ways to ensure productive and successful field experiences and meet the demands of the profession they are studying. The program requires a minimum of 320 hours or 40 eight-hour days (across 12 consecutive months) in elementary school, middle or junior high school, and high school settings as an administrative aide to a licensed and practicing school principal. Field experience must include at least 40 hours or 1 week at each level that is not a part of education professionals' primary teaching experience.

EDUC 7803 - Field Experience

Field experiences provide education professionals with authentic opportunities to apply learning as well as to expand understanding and ability. Building knowledge, skills, and dispositions for field experiences, education professionals also participate in two residencies in which they have the opportunity to meet face-to-face with faculty members to learn and hone skills, develop dispositions, and discuss ways to ensure productive and successful field experiences and meet the demands of the profession they are studying. The program requires a minimum of 320 hours or 40 eight-hour days (across 12 consecutive months) in elementary school, middle or junior high school, and high school settings as an administrative aide to a licensed and practicing school principal. Field experience must include at least 40 hours or 1 week at each level that is not a part of education professionals' primary teaching experience.
learning as well as to expand understanding and ability. Field experience must include at least 40 hours or 1 week at each level that is not a part of education professionals' primary teaching experience.

EDUC 7804 - Field Experience

(1 sem. cr.) Field experiences provide education professionals with authentic opportunities to apply learning as well as to expand understanding and ability. Building knowledge, skills, and dispositions for field experiences, education professionals also participate in two residencies in which they have the opportunity to meet face-to-face with faculty members to learn and hone skills, develop dispositions, and discuss ways to ensure productive and successful field experiences and meet the demands of the profession they are studying. The program requires a minimum of 320 hours or 40 eight-hour days (across 12 consecutive months) in elementary school, middle or junior high school, and high school settings as an administrative aide to a licensed and practicing school principal. Field experience must include at least 40 hours or 1 week at each level that is not a part of education professionals' primary teaching experience.

EDUC 7805 - Field Experience

(1 sem. cr.) Field experiences provide education professionals with authentic opportunities to apply learning as well as to expand understanding and ability. Building knowledge, skills, and dispositions for field experiences, education professionals also participate in two residencies in which they have the opportunity to meet face-to-face with faculty members to learn and hone skills, develop dispositions, and discuss ways to ensure productive and successful field experiences and meet the demands of the profession they are studying. The program requires a minimum of 320 hours or 40 eight-hour days (across 12 consecutive months) in elementary school, middle or junior high school, and high school settings as an administrative aide to a licensed and practicing school principal. Field experience must include at least 40 hours or 1 week at each level that is not a part of education professionals' primary teaching experience.

EDUC 7806 - Field Experience
Field experiences provide education professionals with authentic opportunities to apply learning as well as to expand understanding and ability. Building knowledge, skills, and dispositions for field experiences, education professionals also participate in two residencies in which they have the opportunity to meet face-to-face with faculty members to learn and hone skills, develop dispositions, and discuss ways to ensure productive and successful field experiences and meet the demands of the profession they are studying. The program requires a minimum of 320 hours or 40 eight-hour days (across 12 consecutive months) in elementary school, middle or junior high school, and high school settings as an administrative aide to a licensed and practicing school principal. Field experience must include at least 40 hours or 1 week at each level that is not a part of education professionals’ primary teaching experience.

EDUC 7850 - Foundations in Early Childhood: Developing a Shared Vision

Early childhood, as a field, refers to young children (prenatally through 8 years old) as well as to those adults, programs, and agencies that have a significant impact on children's development and learning. It is a field ripe with current research and opportunities to contribute to positive social change. Education professionals in this course explore the integrative and collaborative richness of the field from its history, values, and ethics to current issues and trends. As part of this foundational course, early childhood professionals learn the process of how to successfully complete their doctoral (EdD) or education specialist (EdS) degree, understanding how Walden supports them in developing (a) facility with Walden University’s online learning environment; (b) understanding the university’s and the program’s support systems, expectations, and outcomes; and (c) advanced graduate-level critical-thinking, research, and writing skills.

EDUC 7851 - Global Perspectives on Development and Learning

Why is the well-being of young children vital to learning and later success in life? Research continues to indicate that early influences are critical to the development of children's brains and lifelong health. Scientific evidence also indicates that there is intrinsic value for young children in experiencing the joy and discovery of childhood. Such experiences not only generate later positive outcomes to society, but they also contribute to viewing life with optimism, learning social skills, and coping with stress. In this course, early childhood professionals study current national and international thinking with regard to early childhood development. Course content also includes global perspectives related to designing, implementing, and evaluating experiences for every child. Special attention is paid to brain research; factors that promote and impede development and learning; and effective assessment of development, learning, and teaching/programmatic practices.
EDUC 7852 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and of the appropriate use of both qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDUC 7853 - Influences of Family, Culture, and Society in Early Childhood

(6 sem. cr.)
Early childhood professionals understand that building reciprocal relationships with children’s families and community members is essential to promoting positive outcomes for children. Whether early childhood professionals intend to impact positive social change by working with children and families in early childhood settings or in related professions, understanding the complexities of such relationships and the skills of relationship building are essential. The focus of this course is on research-based knowledge of family dynamics and the vital role relationships play in children’s lives. Special attention is paid to relationship building through the lens of cultural responsiveness and by studying how identities are defined and evolve related to ethnicity, race, economic class, gender, and sexual orientation. Education professionals are challenged to delve deep into issues related to risk factors such as trauma, poverty, bias, stereotyping, and homelessness as well as to study factors that support resilience.

EDUC 7854 - Dynamics of Early Childhood Policies and Systems

(6 sem. cr.)
Healthy development of children from prenatal stages throughout early childhood does not depend on one group of people, one type of agency, or even a continuum of quality early childhood education. Rather, public policy, government processes, funding streams, and research from disciplines such as medicine, psychology, and public health all have an impact—positive and negative—on whether children and families thrive. In this course, educators examine existing early childhood systems—how they function and how they interact—with the goal of improving services for young children and families. Education professionals research and evaluate case studies to develop a deep understanding of the ways that systems are impacted by funding and public policy, determine services, function in today’s society, and ultimately affect the lives of young children and families.

EDUC 7856 - Capstone: Advocacy and Leadership for Positive Social Change
What knowledge, skills, and dispositions should early childhood leaders exemplify? The field needs leaders who (a) know the history and understand the values and ethics of the field; (b) who approach the present and the future as critical and creative thinkers committed to positive change; and (c) who are advocates, researchers, relationship builders, data-driven decision makers, and managers of change with a keen understanding of diversity, humane interaction, organizational development, and system-oriented thinking. In this course, professionals engage in the study of leadership for positive social change in the early childhood field, which culminates in a capstone project that requires participants to apply the knowledge, skills, and dispositions of a leader to effect change in an early childhood setting of their choice.

**EDUC 7902 - Teacher Leadership Capstone: Trends, Issues and Global Perspectives**

(6 sem. cr.)
The current state of knowledge is guaranteed to change as research and technological innovations continue; therefore, it is necessary to function as lifelong learners. In this course, education professionals examine intriguing and potentially critical directions in teaching and learning, including brain research, new technologies, and globalization influences. They examine and reflect on effects of these trends on their own areas of interest. This capstone course concludes the program by providing education professionals the opportunity to engage in a practical application of knowledge and skills gained throughout the program. Working in a consultative role as a K–12 teacher, education professionals engage in a real-world, problem-solving project within their work environment.

**EDUC 7905 - Capstone: EdS in Curriculum, Instruction, and Professional Development**

(3 sem. cr.)
Education professionals conclude their program with this capstone course in which they are provided the opportunity to apply knowledge and skills gained throughout the program to an actual educational environment. Serving as consultants, education professionals examine a school or district’s curriculum plans against a set of data and make recommendations for improvement and reform.

**Prerequisites**
- All other courses

**EDUC 8002 - Leading the Future of Education**

(5 cr.)
As an advanced graduate student, you are about to embark on one of the most exciting journeys of your life. This practical course provides meaningful skills you will need to
select your path, complete your degree, and become a successful leader of educational change in the 21st century. Networking and research skills, scholarly writing, critical thinking, use of Walden resources, and the three advanced graduate paths (e.g., Ph.D., Ed.D., Ed.S.)—this course addresses all of these in a manner that provides a solid foundation of skill sets upon which to base your journey. You will find a balance of assignments (e.g., case studies, discussions, application assignments) that will ignite your passion for learning, that will allow you to collaborate with others, and that will guide your current and future work. This course is designed to reflect Walden’s social change mission and provide you with meaningful tools for success as an advanced graduate student.

EDUC 8005 - Foundations: The Changing Context of Postsecondary and Adult Teaching and Learning

(6 sem. cr.)
Learning in adulthood is imperative for individuals to realize the opportunities of 21st-century workplaces, technology, and society. Providing these learning experiences requires committed and responsive adult and postsecondary education leaders. In this course, education professionals investigate contemporary trends and issues in teaching and learning in postsecondary and adult education settings. The course also provides education professionals with an introduction to the expectations of graduate work in Adult Education and College Teaching and Learning programs. Education professionals learn to work effectively within Walden University’s online learning environment and develop an understanding of university and program support systems, expectations, and outcomes.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 8011 - Foundations for Doctoral Study in Curriculum, Instruction, and Assessment

(6 sem. cr.)
Providing systemic leadership at the district, regional, state, or federal level in curriculum, instruction, and assessment is a complex, challenging process. This course is a foundation for education professionals to navigate this process and lead so that they can promote the success of all K–12 students within their organizations by developing quality educational programs. Education professionals examine the critical elements of a framework for leading for excellence, including curriculum, instruction, and assessment; data-driven instructional improvement; professional learning time for improvement; and leadership skills that produce results. They also learn the process for completing their doctoral degree successfully by examining how Walden University supports them in developing facility with Walden’s online learning environment; understanding of the
university’s and the program’s support systems, expectations, and outcomes; and doctoral-level critical-thinking, research, and writing skills.

EDUC 8012 - Leadership for Today’s Schools

(6 sem. cr.)
Today’s schools are dynamic places and require leaders who understand how learning communities operate and thrive and are prepared to deal with the demands of internal and external forces. In this course, education professionals make connections between change theory and the continual appraisal of evolving needs of the learning community and application of a grounded knowledge base of theory and practical strategies supported by research. Education professionals are empowered to explore current and future technology as they assess educational trends and issues. Education professionals also analyze their own and others’ paradigms and leadership styles, and they determine best practices to promote positive social change.

EDUC 8021 - Understanding the Adult Learner

(5 cr.)
Unique and distinctive skills are required to engage and teach adult learners. Education professionals will explore adult learning and developmental theory and the wide range of research that supports it, including andragogy and transformation, phase and stage developmental theories, and effects of gender and culture on adult learning. Educators will also be provided with the opportunity to reflect on the relationship of course material with their own experiences as adult learners. Education professionals complete a variety of realistic assignments through which they practice communicating and presenting complex concepts, critique the work of major theorists, apply adult learning and development theories to educational practice, and construct their own positions on adult learning as scholar-practitioners.

EDUC 8040 - Foundations: Teacher Leadership

(6 sem. cr.)
The purpose of this foundations course is to engage education professionals with the environment, expectations, and content of doctoral work in the Teacher Leadership specialization. Education professionals develop facility with Walden University’s online learning environment; understanding of the university’s and the program’s support systems and expectations and outcomes; knowledge about the field, which they synthesize with reflection on their own experience and goals; and doctoral-level, critical-thinking and writing skills.

EDUC 8081 - Completing the Prospectus
The prospectus is a brief document that helps education professionals organize, delineate, and make decisions regarding their doctoral study and appropriate research methodology. In this course, education professionals design the prospectus in collaboration with their committee members. Education professionals learn best practices for developing the prospectus and analyze past examples. They refine their doctoral study questions and explore research methods and project types that they may incorporate into their study. Finally, they engage in the iterative process of writing the prospectus, incorporating feedback from peers and committee members. Ultimately, the prospectus is offered by education professionals as a document for review for consideration by potential mentors for their doctoral study, which is completed during EDUC 8090 - Doctoral Study Intensive.

**EDUC 8090 - Doctoral Study Intensive**

*(12 sem. cr. -- 6 sem. cr. per term for 2 terms)*

Students demonstrate in the doctoral study their scholarly abilities to examine, critique, and synthesize knowledge so that new ideas can be tested; best practices identified, established, and verified; or theoretical or policy constructs evaluated and advanced. In all cases, the doctoral study is to be a rigorous, original inquiry that results in new knowledge, demonstrating its efficacy in the world of practice. The goal of the doctoral study is for the education professional to conduct an investigation that focuses on learning, teaching, and leading within a designated community.

**Prerequisites**
- All other course requirements and the residency must be completed prior to registration in EDUC 8090.

**Note:** EDUC 8090 must be taken for a minimum of two terms for a total of 12 semester credits. If more time is needed to complete the doctoral study, additional terms of EDUC 8090 will be required to use university services and support. Additional credits for EDUC 8090 are not reflected in the overall credit requirements needed for graduation, but these additional credits will appear on the transcript.

**EDUC 8101 - How Adults Learn: Theory and Research**

*(6 sem. cr.)*

Adult learning is similar to and different from learning at any other age. In this course, education professionals examine these similarities and differences, focusing on adult learning and developmental theory and the wide range of research that supports it. Education professionals explore adult learning theories, including andragogy and transformation; phase and stage developmental theories; and effects of gender and culture on adult learning. They also have the opportunity to reflect on the relationship of this material to their own experiences. Education professionals complete a variety of written application assignments through which they practice communicating and
presenting complex concepts, critique the work of a major theorist, apply adult learning and development theories to educational practice, and construct their own positions on adult learning as scholar-practitioners.

EDUC 8102 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and the appropriate use of qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDUC 8103 - Designing and Assessing Learning Experiences

(6 sem. cr.)
Research has considerably expanded the knowledge of adult learning and development in recent years. These gains have resulted in a new paradigm for the design and assessment of learning experiences. In this course, education professionals advance their understanding of research methods as they examine literature about design and assessment. They also apply research-based principles in the design of a project to develop learning experiences for a specific population of adults using on-site, online, or hybrid models.

EDUC 8104 - Facilitating Adult Learning

(6 sem. cr.)
Using research and theory on differences in learning, education professionals in this course explore the repertoire of practices that facilitate adult learning from a teaching and learning perspective. These practices range from mentoring and coaching to collaborative engagement and reflective practices. Education professionals deepen their understanding of research methods by critiquing articles and designing research studies to investigate specific learning practices.

EDUC 8105 - Adult Learning: Trends, Issues, Global Perspectives

(6 sem. cr.)
Invariable advances in research and technology continue to change the current state of knowledge; therefore, it is necessary to function as lifelong learners. In this course, education professionals examine intriguing and potentially critical directions in adult learning, including brain research, new technologies, and the impact of globalization.
They also have the opportunity to examine and reflect on the effects of these trends in their own areas of interest.

EDUC 8106 - Research in Practice

(6 sem. cr.)
In this course, educators build on their knowledge of and experience with research design and methodology through a hands-on, in-depth study of specific data collection and analysis skills, which they need to become effective producers of research. Educators apply concepts and practice skills in research design, data collection, data analysis, and presentation of results. They complete practical exercises and engage in discussions that emphasize qualitative and quantitative research methods.

EDUC 8110 - Development of the Scholar-Practitioner

(4 cr.)
Building on the Carnegie Foundation's metaphor of "stewards of the discipline," education professionals in this course explore the role of the scholar-practitioner and the expectations and responsibilities inherent in obtaining a PhD in Education. Using this understanding, education professionals develop a professional development plan to guide their progress through the program. They assess the relationship of mission and vision to professional goals and develop strategies for online success. They also explore resources used throughout the program and engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.
Note: Taken concurrently with EDUC 8111.

EDUC 8111 - Principles of Social Change

(4 cr.)
Consistent with the mission of Walden University, this course is a foundation for the remainder of the program. Through this course, education professionals acquire a framework for their work as scholar-practitioners and agents of positive social change in education. Education professionals examine foundational theories of education while considering their future role in the discipline. Through an integrative process of developing an essay comparing theories of social change, they also begin to hone their skills as scholarly writers.
Note: Taken concurrently with EDUC 8110.

EDUC 8112 - Social Change in Education

(4 cr.)
The choice to effect positive social change in education demands that scholar-practitioners have the requisite skills and abilities to take responsibility for generating
new knowledge, conserving the values of education, and communicating information to others. In this course, education professionals examine these key principles of disciplinary stewardship while building strategies to effect positive social change. Demonstrating their understanding of course concepts, they develop a social change proposal that fills an area of need in their organization, workplace, or community. Through this proposal, they analyze prospective requirements, challenges, and effects of their proposed plan of action.

Prerequisites
- EDUC 8110
- EDUC 8111

Note: Taken concurrently with RSCH 8100.

EDUC 8113 - The Learner Across the Lifespan

(4 cr.)
Educational scholars recognize the important role of human development in the educational process. In this course, education professionals gain an understanding of the theories and frameworks relevant to the development and experiences of individuals from birth through old age. They engage in coursework that emphasizes application of this knowledge to educational settings, and they discuss a range of topics, such as personal teaching experiences, theory-based approaches to a contemporary problem, influences of moral development, and intergenerational relationships, among others. Education professionals also explore different strands of development across the lifespan as well as how they relate to the individual as a learner.

Prerequisites
- EDUC 8111

EDUC 8114 - Learning and Instruction

(4 cr.)
The processes of teaching and learning are central to the educational enterprise. In this course, education professionals examine learning from a variety of perspectives, focusing on supporting academic and co-curricular success in education. They explore curriculum theory and design, with emphasis on the theoretical, practical, and political aspects of curricula. Through a variety of written and applied assignments, they investigate learned societies; make connections to research; develop a course proposal, including a course outline that identifies learning objectives; analyze the influence of technology on education; review and reflect on the importance of the curriculum development process and the role of curriculum to guide instruction and assessment; and develop their own approach to instruction and learning.

Prerequisites
- EDUC 8112
EDUC 8115 - Assessment and Accountability in Education

(4 cr.)
Increasingly, schools and educational committees ask educators at all levels to account for the influence of the educational process on learners and to make research-based decisions. In this course, education professionals build on their knowledge of theories of development and learning as they gain foundational skills in assessing and evaluating student learning, developmental outcomes, and educational programs. Acquiring key evaluation concepts, they also examine the purposes for collecting student data as well as the distinctions among various approaches to assessing learning.
Prerequisites
- EDUC 8112

EDUC 8116 - Leadership in a Global Society

(4 cr.)
Leadership roles in education take a wide range of forms, from the teacher in the kindergarten classroom to the president of a university. Academic leaders recognize the interplay between local challenges and national and global influences as well as the unique societal pressures on the educational process. Education professionals in this course explore these challenges and influences to gain an understanding of the skills and sensibilities needed to lead in a global society. They examine leadership theories and research as well as the principles of leadership within educational communities. They also have the opportunity to analyze their own leadership skills in the context of these theories and principles.
Prerequisites
- EDUC 8114

EDUC 8117 - Educational Organizations and Contexts

(4 cr.)
Research efforts to support the educational process and effective leadership demand an understanding of schools and academic institutions as complex systems and units of change. In this course, education professionals examine theories of organizational functioning and apply these insights to the behaviors of individuals and groups within educational systems. They also explore systems thinking and organizational effectiveness that supports teaching and learning. Education professionals engage in assignments designed to provide practical application of course content through which they analyze ethical behavior in organizational development; summarize, test, and evaluate theories; construct an organizational development scenario; evaluate a case study related to
organizational development; and assess their own educational organization.

**Prerequisites**
- EDUC 8115

**EDUC 8118 - Innovation and Change in Education**

(4 cr.)
Understanding the impact of new innovations and change has emerged as a field of theory and research in education. Education professionals in this course build on the principles of social change as well as research and theories of leadership and organizational functioning as they focus on the challenges inherent in initiating and managing change in educational organizations. They explore the role of change agents as well as the influences of technological innovations on the academic process. Applying course concepts, education professionals design plans to implement and evaluate new programs to support change.

**Prerequisites**
- EDUC 8116
- EDUC 81117 or EDUC 8841

**EDUC 8140 - Leadership for Today’s Schools**

(6 sem. cr.)
Today’s schools are dynamic places and require leaders who understand how learning communities operate and thrive and are prepared to deal with the demands of internal and external forces. In this course, education professionals make connections between change theory and the continual appraisal of evolving needs of the learning community and application of a grounded knowledge base of theory and practical strategies supported by research. Education professionals are empowered to explore current and future technology as they assess educational trends and issues. Education professionals also analyze their own and others’ paradigms and leadership styles, and they determine best practices to promote positive social change.

**EDUC 8141 - Applied Research in Education**

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and the appropriate use of qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on
and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDUC 8142 - Teaching and Learning: Theory and Research

(6 sem. cr.)
Research has considerably expanded the knowledge of teaching and learning in recent years. A new paradigm for the design and assessment of learning experiences is a result of these gains. In this course, education professionals advance their understanding of research methods as they examine literature about design and assessment. They also apply research-based principles, via technological means, to collect, analyze, and present data with the goal of solving a learning problem in their school or district.

EDUC 8143 - Collegial Interactions and Professional Development

(6 sem. cr.)
In this course, the role of teacher leadership expands from the classroom to the school community. Education professionals in this course focus on the development of knowledge, abilities, and dispositions necessary for effective and productive leadership in effecting professional partnerships, participating in collegial study teams, facilitating professional development of other educators, and adeptly using collegial and collaborative processes, such as coaching and mentoring.

EDUC 8144 - Teacher Leadership: Trends, Issues, and Global Perspectives

(6 sem. cr.)
Invariably, advances in research and technology continue to change the current state of knowledge; therefore, it is necessary to function as lifelong learners. In this course, education professionals examine intriguing and potentially critical directions in adult learning, including brain research, new technologies, and the impact of globalization. They also have the opportunity to examine and reflect on the effects of these trends in their own areas of interest.

EDUC 8145 - Research in Practice

(6 sem. cr.)
In this course, educators build on their knowledge of and experience with research design and methodology through a hands-on, in-depth study of specific data collection and analysis skills, which they need to become effective producers of research. Educators apply concepts and practice skills in research design, data collection, data analysis, and presentation of results. They complete practical exercises and engage in discussions that emphasize qualitative and quantitative research methods.

EDUC 8304 - Effective College Teaching: Engaging Diverse Learners
As colleges and universities broaden their missions to serve new groups of learners, and as more people pursue a college education, college educators must strive to engage increasingly diverse student populations. At the same time, changing workplace needs and growing demands for accountability require that college educators must be able to help demonstrate that learners have met important learning goals. In this course, education professionals will investigate the research-based teaching and assessment strategies that can support all learners. Education professionals also assess methods for critically reflecting upon their own practice, engaging in education scholarship, and collaborating with colleagues on the continuous improvement of learning experiences and environments.

**EDUC 8306 - Effective College Teaching: Using Technology to Support Learning**

Technology is a tool that can support student engagement and the development of critical knowledge and skills. College educators must learn how to harness the growing number of new technologies for constructive use in diverse learning contexts. In this course, education professionals consider how to stay abreast of available technologies and related research as well as how to use these tools and research most effectively in face-to-face, hybrid, and online environments. Through a variety of contextual and application-based assignments, education professionals practice making critical decisions on when and how to implement technological solutions, how to assess the value of these tools for students in particular learning contexts, and how to maximize the power of technology for learning in a global environment.

**EDUC 8342 - Emerging and Future Technologies**

Conceive of a world where emerging and future technologies are a seamless facet of learning and work. Learners explore this world through social networking, mobile technologies, gaming and simulations, collaborative tools and strategies, and more, to become thought leaders in their field. Critical thinking and decision-making skills are developed to analyze obsolete technologies, assess new technologies, and predict future technological movements. Insights are examined from the view of a futurist, guiding learners as they become experts in the evaluation and use of emerging and future technologies.

**EDUC 8343 - Creating Digital Media**

The effective use of digital media in learning environments requires leaders in the field to be both consumers and creators. Learners become knowledgeable developers of digital media by applying principles of instructional design and pedagogy to multimedia.
Learners collaborate in the design and creation of digital and interactive media based on visual design principles.

**EDUC 8344 - Innovations and the Diffusion of Learning Technologies**

(5 cr.)
Thought leaders instigate change in the workplace. Learners explore Rogers's diffusion of innovations theory, research effective practices for integrating technology and overcoming resistance to change, and apply methods for being a catalyst for change. Playing a diffusion simulation game enables learners to analyze the power of gaming in instructional environments. Learners analyze the needs of an organization and demonstrate their skills of persuasion to convince key stakeholders to adopt a technological innovation in their workplace.

**EDUC 8470 - Applied Research in Education**

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and the appropriate use of qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

**EDUC 8541 - Foundations in Reading and Literacy Leadership**

(6 sem. cr.)
Literacy may be understood in multiple ways across various settings and populations. Candidates taking this course lay a foundation for leaders to define literacy based on the sociopolitical landscape, the influence of social media and technological innovation, and influences coming from Common Core standards that influence literacy programs in P–20 and beyond. As part of this foundational course, candidates also learn the process for how to succeed as a graduate student at Walden University, understanding how Walden supports students in developing (a) facility with Walden University's online learning environment; (b) understanding of the university and the program support systems, expectations, and outcomes; and (c) graduate-level critical thinking, research, and writing skills.

**EDUC 8542 - Literacy Leadership for Today's Schools**

(6 sem. cr.)
The field of literacy education demands leaders who are not only knowledgeable in this...
subject area but who can articulate a dynamic vision that motivates collaboration, creativity, and positive social change. Candidates taking this course, grounded in knowledge about literacy professional standards of practice, examine the high-stakes nature of literacy acquisition in the context of limited financial and human resources. Leadership skills explored include decision making to solve complex problems, facilitation for reaching goals, mentoring, and the building of staff capacity for literacy infusion across content areas. Candidates study leadership and change theory at both the research and application levels.

EDUC 8543 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and of the appropriate use of both qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDUC 8544 - Learners and the Changing Literacy Landscape

(6 sem. cr.)
Literacy is essential for individual learning and is also a means by which an individual participates in the intellectual, social, and commercial life of the community. Students in this course examine language development within the context of culture, the value placed on literacy within the community, and diversity of learner ability. Topics include the developmental nature of literacy competencies from early childhood to the adult learner, potential barriers to literacy that learners of all ages must overcome, theoretical research, and approaches to curriculum and instruction that facilitate literacy across settings. Specific attention is given to the challenges second language learners face in school. Candidates will practice analyzing, evaluating, and applying research methods appropriate to data-driven planning and decision making.

EDUC 8545 - Assessment and Data Analysis to Support Systemic Literacy Programs

(6 sem. cr.)
Designing systems that effectively promote and support high levels of literacy proficiency requires the use of data that accurately describe the status of student, teacher, and school performance. Students in this course examine a variety of assessment tools and validity issues for addressing individual and classroom needs as well as district and state mandates. Topics include a focus on data analysis for tiered intervention decision making.
and the interpretation of data to drive recommendations at a systemic level. Skills of collaboration and stakeholder inclusion are examined. Quantitative and qualitative methods appropriate to understanding institutions, programs, and stakeholder interests are also explored.

EDUC 8546 - Research in Practice

(6 sem. cr.)
Candidates build on their prior explorations of research design and methodology by providing hands-on, in-depth study of specific data collection and analysis skills needed to become producers of research. Candidates apply concepts and practice skills in research design, data collection, data analysis, and presentation of results. By completing practical exercises and participating in discussion, candidates emphasize both qualitative and quantitative research methods.

EDUC 8547 - Program Development and Professional Development

(6 sem. cr.)
As research and technology continue to provide new perspectives on literacy, educational leaders are charged with the responsibility for leading the selection or development and implementation of innovative programs that support high levels of literacy achievement for all learners. In this course, educational leaders emphasize program development, monitoring, and evaluation for continuous improvement of literacy teaching and learning. They integrate the important role the literacy leader plays in supporting effective professional development. Topics also include the creation of a literacy environment and the use of technology to promote both student learning and the professional development of teachers. Research highlights current issues in the field of literacy as they relate to program development, evaluation, and professional development.

EDUC 8640 - The Learning-Centered Institution

(6 sem. cr.)
Institutions of higher education exist to create learning that is achieved by students, pursued through scholarship, and developed in the daily practice of faculty members and staff. The concepts of the learning institution, which place learning at the center of all of its programs, services, and operations, are introduced in this course. Through the exploration of the learning-centered institution, education professionals gain a foundation for the EdD with a specialization in Higher Education Leadership. Through participation in course activities, they develop facility with Walden University’s online learning environment and understanding of the university’s and the program’s support systems, expectations, and outcomes; knowledge about the field, which they synthesize with reflection on their own experience and goals; and doctoral-level critical-thinking and writing skills.
EDUC 8641 - The New Higher Education Enterprise

(6 sem. cr.)
Creating and sustaining learning-centered institutions in today's global economy is no small feat. Leaders of today's colleges and universities must embrace their role in the enterprise of higher education and engage in new entrepreneurial, collaborative practices to promote, develop, and ensure the quality and sustainability of their programs and services. In this course, education professionals examine the current landscape of higher education, emerging trends and issues that require new types of leadership, and the historical and philosophical foundations of these issues. They investigate the social role of postsecondary education in promoting educational attainment, civic engagement, and globalization, as well as policy issues that are raising the stakes for accountability and quality assurance. They engage in activities and discussions to explore strategies for leveraging resources, achieving sustainability, and supporting new initiatives in this environment.

EDUC 8642 - Transformative Leadership in Higher Education

(6 sem. cr.)
Effective leadership in higher education goes beyond managing or reacting to change; it anticipates change and seeks out opportunities for growth for the institution and its members while keeping the institution focused on its mission and goals for learning. Education professionals in this course focus on key leadership skills, such as communication, negotiation, decision making, strategic planning, and conflict management. They research and discuss strategies for navigating the complex political environment of today's colleges and universities, cultivating a culture of evidence, and developing the institution's intellectual and human resources. They also practice analyzing, evaluating, and applying research methods appropriate to data-driven planning and decision making.

EDUC 8643 - Achieving Coherence in Complex Institutions

(6 sem. cr.)
Higher education, as an enterprise, as well as individual institutions, grow more complex every day. Meeting the needs of diverse stakeholder groups, operating within an increasingly convoluted legal and regulatory environment, and adapting to changes in society can lead to fragmentation and divisiveness within institutions. In this course, education professionals examine ways in which leaders can bridge traditional gaps between academic affairs, student affairs, business and external affairs, and community partners to promote collaboration on learning-centered goals. They investigate strategies for leading change within and across different parts of the institution to implement new requirements, seize opportunities, or plan responses to crises and challenges. Moreover, education professionals explore the use of research methods appropriate to understanding institutions, programs, and stakeholder interests.
EDUC 8644 - Research in Practice

(6 sem. cr.)
In this course, educators build on their knowledge of and experience with research design and methodology through a hands-on, in-depth study of specific data collection and analysis skills, which they need to become effective producers of research. Educators apply concepts and practice skills in research design, data collection, data analysis, and presentation of results. They complete practical exercises and engage in discussions that emphasize qualitative and quantitative research methods.

EDUC 8645 - Managing Resources to Drive Change in Higher Education

(6 sem. cr.)
Managing resources—financial, technological, human, and intellectual—is higher education leaders' most significant concern. In this course, participants focus on how leaders in higher education can effectively plan, prioritize, allocate, and track the use of resources toward achieving learning-focused goals. Candidates research and discuss the meaning of efficiency, productivity, and sustainability in higher education and ways to maximize these across the institution. Activities include analysis of various budgeting, planning, and fund-raising strategies and how these can be used to identify new and reallocated resources to enable growth and sustainability of quality programs. Candidates will also investigate research approaches appropriate to planning and resource management.

EDUC 8745 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and of the appropriate use of both qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDUC 8750 - Systemic Curriculum Design: Rigor, Relevance, and Results

(6 sem. cr.)
Designing curriculum with rigor, relevance, and results requires broad understanding of the key concepts behind each of these attributes. In this course, education professionals examine the contribution of learning theory to what defines rigor as they explore alignment of standards and design models as well as the role of collaboration between educators and the needs of an ever-increasing diverse student population, including
English-language learners, special education educators, gifted students, and students of poverty. As leaders of learning, education professionals examine the connection between relevant curriculum and global trends, social-emotional, and character development, and the integration of technology for student engagement. In addition, they gain an understanding of what constitutes results that acknowledge the demands of accountability from multiple constituents, such as parents, community members, school administrators, and government oversight. They also gain practice analyzing, evaluating, and applying quantitative research methods appropriate to data-driven planning and decision making.

**EDUC 8751 - Data-Driven Instruction and Assessment**

*(6 sem. cr.)*

Instructional leaders must have the ability to diagnose by reviewing data and practices, set a vision for where they want to go, prioritize the work by utilizing relevant data, identify measurable goals, develop an action plan, and then monitor their results. Education professionals in this course examine this inextricable link between instruction and assessment. They engage in a diagnostic process designed to meet diverse student and systemic needs. They also examine the role of formative and summative assessments in making decisions, the various forms and purposes of assessment, and how the ongoing use of assessment data can move curriculum and instruction beyond mediocrity to support rigorous learning for all students. Additionally, they explore qualitative research methods appropriate to understanding institutions, programs, and stakeholder interests.

**EDUC 8752 - Effective Professional Development**

*(6 sem. cr.)*

Effective professional development is foundational to improving a school system's ability to raise student achievement. Using adult learning theory as a foundation, educators explore models that look at adult learning strategies and skills that build strong professional development opportunities promoting new knowledge and skills that affect teacher practice and student learning. Educators learn how to use collaboration, facilitation, coaching, and mentoring that support a culture of learning that involves students, educators, parents, and community. As evaluating the impact of professional development efforts is crucial to ongoing success, leaders learn to collect and analyze data from student work and teacher practice to make informed decisions that lead to continuous improvement. Communicating and disseminating results to multiple constituents within the school system are emphasized. Educators also investigate mixed-methodology research approaches appropriate to planning and resource management.

**EDUC 8753 - Research in Practice**
(6 sem. cr.)
In this course, educators build on their knowledge of and experience with research design and methodology through a hands-on, in-depth study of specific data collection and analysis skills, which they need to become effective producers of research. Educators apply concepts and practice skills in research design, data collection, data analysis, and presentation of results. They complete practical exercises and engage in discussions that emphasize qualitative and quantitative research methods.

EDUC 8760 - Foundations: Special Education
(6 sem. cr.)
Special education as a field is dynamic, with a growing research base of best practices and changing implementation efforts that seek to balance effective and efficient education for students with disabilities. Education professionals in this course explore evolving trends that reflect this balance and a range of related topics, such as issues of equity, assistive technology, collaborative instruction between regular and special educators, delivery approaches with and without student categorization, and ethical practice. As part of this foundational course, education professionals learn the process of how to complete their doctoral or education specialist degree successfully. They gain facility with Walden University’s online learning environment; knowledge of the university’s and the program’s support systems, expectations, and outcomes; and advanced, graduate-level critical-thinking, research, and writing skills.

EDUC 8761 - Leadership, Advocacy, Policy, and Law
(6 sem. cr.)
Leadership and advocacy go hand-in-hand when seeking to promote policies that support effective practices in education for early childhood and school-age students. In this course, education professionals analyze the connections among advocacy, leadership, and policy by examining the evolution of education legislation and pivotal case law in the United States. They examine change theory and leadership styles, allowing them to reflect on their own and others’ paradigms and to determine best practices to promote positive social change. They also engage in a culminating project through which they construct a professional plan for advocacy and leadership in an area of interest that includes issues of diversity and special needs.

EDUC 8762 - Applied Research in Education
(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and of the appropriate use of both qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research
and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDUC 8763 - Specialized Instruction

(6 sem. cr.)
A growing body of research exists around evidence-based instructional practices in special education. Educators in this course review the literature specific to specialized instruction for students with disabilities in language, reading, writing, math, and content areas. Topics also include effective practices for instruction and evaluation for students with social-emotional and behavioral needs, including applied behavior analysis and positive behavioral interventions and skill building. Related brain research will be examined, as well as assistive technology and methods of delivery, whether in isolation, small group, or inclusive settings.

EDUC 8764 - Research Methodology and Special Education

(6 sem. cr.)
To document the effectiveness of practices in special education, different research questions are needed that call for different types of methodologies. Educators examine four types of research methodologies important to special education: experimental group, correlation, single-subject, and qualitative designs. Particular attention is given to single-subject research designs that are used to study behavioral change in an individual or a group as a result of an intervention. Topics include reliable measurement, repeated measurement, description of conditions, baseline and treatment conditions, and single-variable rules.

EDUC 8765 - School-Wide Intervention Models

(6 sem. cr.)
Response to intervention (RTI) is a school-wide approach that integrates assessment and intervention within a multitiered prevention system to maximize student achievement and to reduce behavioral problems. Educators examine RTI research and other problem-solving processes for best practices for using data to identify students at risk of academic, social, or emotional failure; methods of disability identification and monitoring student progress; and data-based decision making for instruction, universal instruction, and interventions useful for all students. Professional development of regular and special education teachers and the role of parents will be explored. Functional behavioral assessment is examined as an evaluation tool for understanding behavior, and effective practices for school-wide positive behavioral support (SWPBS) are also explored.

EDUC 8766 - Research in Practice
In this course, educators build on their knowledge of and experience with research design and methodology through a hands-on, in-depth study of specific data collection and analysis skills, which they need to become effective producers of research. Educators apply concepts and practice skills in research design, data collection, data analysis, and presentation of results. They complete practical exercises and engage in discussions that emphasize qualitative and quantitative research methods.

**EDUC 8767 - Sustaining and Supporting Effective Practices in Special Education**

(6 sem. cr.)
Once effective practices for special education are in place, a clear plan is needed for implementation fidelity that addresses program integrity and sustains commitment within the professional learning community. Candidates will examine critical contributing components such as program evaluation, professionalism, cultural resonance, and policy to support continuous improvement.

**Prerequisites**
- All other courses

**EDUC 8800 - Research Forum**

(6 cr.)
The purpose of this forum is to assist students with making steady progress toward earning a Doctor of Philosophy (PhD) degree. Students prepare a plan of action, engage in regular scholarly discussion with a faculty mentor and fellow doctoral students, and submit a personal progress report. Students submit drafts of Learning Agreements, Knowledge Area Modules (KAMs), and dissertations to the faculty mentor for feedback. Information and resources related to KAMs, dissertations, residencies, research and writing, courses, and doctoral program expectations are provided for guidance.

**EDUC 8842 - Principles of Distance Education**

(4 cr.)
Different theories, paradigms, and the history of distance education will be explored. Learners critique current research and assess online learning programs including hybrid and fully online delivery. Accessibility issues, open source, best practices to facilitate learning, global trends, and the move from elite to mass higher education will be analyzed. Synchronous versus asynchronous platforms will be contrasted.

**Prerequisites**
- EDUC 8118
- RSCH 8200
- RSCH 8300

*(Co-requisites: EDUC 8900)*
EDUC 8843 - Leading and Managing Educational Technology

(4 cr.)
Education professionals in this course explore issues related to leadership regarding the integration of technology in business and in education at any level, including K–12 schools, community colleges, teacher education, or higher education. They explore such areas as leadership, strategic planning, systems acquisition, coordination, implementation, technology management and its implications for teaching and learning, and administrative functions. Moreover, they share perspectives through discussions on policies that affect human resource development, staff development, information access, security, management control, and evaluation.

EDUC 8844 - Designing Instruction for Distance Education

(4 cr.)
Instructional design for distance education involves understanding educational experiences, what makes these experiences effective, and the ways in which students learn in the online environment. Education professionals have the opportunity to gain a practical understanding of these topics through the examination of learning styles, learning theory, social networking and collaborative group influences, assessment, global perspectives, and diversity. They also analyze effective online educational experiences from education and the workplace. Focusing on the design and delivery of distance education, education professionals engage in applied assignments that emphasize developing, field testing, and revising a web-based unit. They also explore ways to employ engaging instructional electronic strategies to enhance design and development.

Prerequisites
- EDUC 8842 or EDUC 7102

EDUC 8850 - Foundations in Early Childhood: Developing a Shared Vision

(6 sem. cr.)
Early childhood, as a field, refers to young children (prenatally through 8 years old) as well as those adults, programs, and agencies that have a significant impact on children’s development and learning. It is a field ripe with current research and opportunities to contribute to positive social change. Educators explore the integrative and collaborative richness of the field from its history, values, and ethics to current issues and trends. As part of this foundational course, early childhood professionals learn the process of how to successfully complete their doctoral (EdD) or education specialist (EdS) degrees, understanding how Walden supports them in developing (a) facility with Walden University’s online learning environment; (b) understanding the university’s and the program’s support systems, expectations, and outcomes; and (c) advanced graduate-level critical-thinking, research, and writing skills.
EDUC 8851 - Global Perspectives on Development and Learning

(6 sem. cr.)
Why is the well-being of young children vital to learning and later success in life? Research continues to indicate that early influences are critical to the development of children's brains and lifelong health. Scientific evidence also indicates that there is intrinsic value for young children in experiencing the joy and discovery of childhood. Such experiences not only generate later positive outcomes to society, but they also contribute to viewing life with optimism, learning social skills, and coping with stress. In this course, early childhood professionals study current national and international thinking with regard to early childhood development. Course content also includes global perspectives related to designing, implementing, and evaluating experiences for every child. Special attention is paid to brain research, factors that promote and impede development and learning, and effective assessment of development, learning, and teaching/programmatic practices.

EDUC 8852 - Applied Research in Education

(6 sem. cr.)
In this course, educators develop a broad understanding of theoretical frameworks and of the appropriate use of both qualitative and quantitative methods. Educators focus on methods designed specifically for studying human development and how individuals learn. They explore these methods through the examination of the philosophy of research and particular research strategies, review of literature in the field, and research and analysis of additional literature relating to individual interests. Additionally, educators reflect on and discuss ways in which research can lead to the promotion of social change on the job or in their community.

EDUC 8853 - Influences of Family, Culture, and Society in Early Childhood

(6 sem. cr.)
Early childhood professionals understand that building reciprocal relationships with children’s families and community members is essential to promoting positive outcomes for children. Whether early childhood professionals intend to impact positive social change by working with children and families in early childhood settings or in related professions, understanding the complexities of such relationships and the skills of relationship building are essential. The focus of this course is on research-based knowledge of family dynamics and the vital role relationships play in children’s lives. Special attention is paid to relationship building through the lens of cultural responsiveness and by studying how identities are defined and evolve related to ethnicity, race, economic class, gender, and sexual orientation. Education professionals are challenged to delve deep into issues related to risk factors such as trauma, poverty, bias, stereotyping, and homelessness as well as to study factors that support resilience.
EDUC 8854 - Dynamics of Early Childhood Policies and Systems

(6 sem. cr.)
Healthy development of children from prenatal stages throughout early childhood does not depend on one group of people, one type of agency, or even a continuum of quality early childhood education. Rather, public policy, government processes, funding streams, and research from disciplines such as medicine, psychology, and public health all have an impact—positive and negative—on whether children and families thrive. In this course, educators examine existing early childhood systems—how they function and how they interact—with the goal of improving services for young children and families. Education professionals research and evaluate case studies to develop a deep understanding of the ways that systems are impacted by funding and public policy, determine services, function in today’s society, and ultimately affect the lives of young children and families.

EDUC 8855 - Research in Practice

(6 sem. cr.)
Educators build on their prior explorations of research design and methodology by studying in depth the hands-on specific data collection and analysis skills needed to become producers of research. Education professionals apply concepts and practice skills in research design, data collection, data analysis, and presentation of results. Practical exercises and discussion will emphasize both qualitative and quantitative research methods.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EDUC 8856 - Advocacy and Leadership for Positive Social Change

(6 sem. cr.)
What knowledge, skills, and dispositions should early childhood leaders exemplify? The field needs leaders who (a) know the history and understand the values and ethics of the field; (b) approach the present and the future as critical and creative thinkers committed to positive change; and (c) are advocates, researchers, relationship builders, data-driven decision makers, and managers of change with a keen understanding of diversity, humane interaction, organizational development, and system-oriented thinking. In this course, professionals engage in the study of leadership for positive social change in the early childhood field, which culminates in a capstone project that requires participants to apply the knowledge, skills, and dispositions of a leader to effect change in an early childhood setting of their choice.

EDUC 8900 - Dissertation Companion

(0 cr.)
The purpose of this dissertation companion course is to assist education professionals in
making steady progress toward completing their degrees. This course is a companion that education professionals use as a forum for ongoing exchange of ideas, input, and feedback between them and the dissertation chair as they complete coursework for their PhD in Education degree and prepare to begin their dissertation. The instructor of record for a section of the companion is the chair of the dissertation committee. Section participants are education professionals working with the faculty mentor at the early stages of their dissertation.

Prerequisites
- All required courses

**EDUC 9001 - Dissertation**

**(20 cr.)**

During the first quarter in which they have active dissertation committees, doctoral students are automatically enrolled in this dissertation status course. In this course, students have the opportunity to integrate their program of study by conducting an in-depth exploration of a topic of interest and by completing an original research study, called a dissertation, on that topic. With the guidance of a chair and committee members, students develop an approved prospectus, an approved proposal (the first three dissertation chapters), and an application for Institutional Review Board approval. They then collect and analyze data and, afterward, finalize their approved dissertation. During the final quarter, students prepare their dissertations for final review by the university and conclude with an oral defense of their dissertation.

Prerequisites
- All required courses

**EDUC 9002 - Research Forum**

**(4 cr.)**

The purpose of this forum is to assist students with making steady progress toward earning a Doctor of Philosophy (PhD) degree. Students prepare a plan of action, engage in regular scholarly discussion with a faculty mentor and fellow doctoral students, and submit a personal progress report. Students submit drafts of Learning Agreements, Knowledge Area Modules (KAMs), and dissertations to the faculty mentor for feedback. Information and resources related to KAMs, dissertations, residencies, research and writing, courses, and doctoral program expectations are provided for guidance.

**EIDT 2001 - Technology and Learning**

**(5 cr.)**

Technology today facilitates and supports learning in ways never before possible. In this course, students learn how education professionals use computers, multimedia tools,
and other educational technologies to differentiate the learning experience, provide access, and meet the needs of diverse learners. Students examine current trends and gain an understanding of the appropriate integration of technology and instruction.

**Prerequisites**
- EDUC 1014

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EIDT 2002 - Web Design I**

(5 cr.)
In this course, students learn the fundamental techniques and principles of effective web design. Students learn the basics of building websites that incorporate good functionality and design elements to meet the needs of a diverse audience. They explore a range of topics, including introductory hypertext markup language (HTML), common graphic and web publishing standards, web publication protocols, and basic principles of website layout and design.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EIDT 2003 - Introduction to Distance Education**

(5 cr.)
While distance learning is not a new concept, advances in technology and the Internet have been a catalyst for the rapid expansion of distance education to meet a variety of learning needs. Students in this course encounter a comprehensive overview of distance education. Students examine the field to gain a historical perspective and an understanding of current trends. They also learn basic concepts, models, and technologies of distance learning.

**Prerequisites**
- EDUC 1014

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EIDT 2004 - Instructional Design I**

(5 cr.)
The instructional designer plays a key role in developing education and training programs in the public and private sectors. Students in this course are introduced to the field of instructional design. They gain an understanding of the role of instructional designers in constructing the learning experience. Students also explore the essential job
functions and career paths available in this field.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EIDT 3002 - Multimedia Tools**

(5 cr.)
Multimedia tools allow instructional designers to be creative and develop innovative learning environments. Students in this course are introduced to the design, production, and evaluation of multimedia for instructional purposes. Students experiment with tools commonly used for the creation of multimedia elements and learn how to create basic multimedia components incorporating audio, video, and visual graphics.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EIDT 3003 - Ethical and Fair Use of Instructional Materials**

(5 cr.)
Instructional designers are faced with the challenge of finding and using materials from various resources. In this course, students examine the issues related to the use of licensed and copyrighted content in the development of instructional materials. Students also explore the legal and ethical implications of copyright, fair use, and Creative Commons licenses when designing materials for nonprofit and for-profit entities.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EIDT 3004 - Instructional Design II**

(5 cr.)
This course is a continuance of the principles learned in Instructional Design I. Students explore the basic elements of commonly used instructional design theories and models and compare the processes and procedures of these models. They gain a working knowledge of the instructional design process, including how to identify learning and performance gaps and how to design and implement instructional solutions.

Prerequisites
- EIDT 2004
- EDUC 3004

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**EIDT 4001 - Instructional Design and Technology Capstone**
(5 cr.)
Students in this capstone course have the opportunity to showcase their skills and creativity by applying their knowledge of instructional design, learning environments, and multimedia tools to an authentic task. Connecting theory to practice, students work with a client or explore a case study to identify an instructional need and construct an appropriate solution.

Prerequisites
- Completion of all other program coursework

EIDT 4002 - Web Design II

(5 cr.)
This is a project-based course in which students build on their basic knowledge of web design to learn more advanced design and development skills. Students apply their knowledge of web design, multimedia tools, and principles of visual literacy to the creation of a website. Students engage in assignments that emphasize the development of websites that incorporate multimedia elements for education and training.

Prerequisites
- EIDT 2002
- EIDT 3002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EIDT 4004 - Instructional Design III

(5 cr.)
In this course, students apply the principles of instructional design to a learning situation. They also apply their knowledge of the instructional design process to define learning goals and outcomes as well as to create instructional materials and evaluate the effectiveness of those materials.

Prerequisites
- EIDT 3004

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EIDT 5100 - Instructional Design

(5 cr.)
In this course, students learn the foundational principles and elements of the instructional systems development process, from analysis through evaluation. Students explore commonly used instructional design models, such as ADDIE, and learn how to
apply them in an education or training environment. They gain an understanding of the preliminary phases of instructional design models, such as writing instructional objectives and conducting analyses. Students also focus on incorporating sound instructional strategies into the design and development of instructional systems and into the development of prototypes in real-world instructional settings.

**Prerequisites**
- EDUC 5105

**EIDT 5110 - Advanced Instructional Design**

(5 cr.)
Through this course students' knowledge will extend to application of the instructional design process. Students gain a deeper understanding of best practices for the implementation and evaluation of education and training programs. Emphasis is placed on delivery of instruction and the various strategies for assessing student learning both during and after instruction. Students demonstrate their learning by solving a real-world instructional or performance improvement problem.

**Prerequisites**
- EIDT 5100

**EIDT 6100 - Instructional Design**

(3 sem. cr.)
In this course, educators learn the foundational principles and elements of the instructional systems development process, from analysis through evaluation. They explore commonly used instructional design models, such as ADDIE, and they learn how to apply them in an education or training environment. They gain an understanding of the preliminary phases of instructional design models, such as writing instructional objectives and conducting analyses. Educators also focus on incorporating sound instructional strategies into the design and development of instructional systems and into the development of prototypes in real-world instructional settings.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EIDT 6110 - Advanced Instructional Design**

(3 sem. cr.)
This course is designed to extend educators' knowledge and application of the instructional design process. Educators gain a deeper understanding of best practices for implementing and evaluating education and training programs. They engage in a variety of assignments that emphasize the delivery of instruction and the various strategies for assessing student learning both during and after instruction. Educators demonstrate
their understanding of course concepts by solving a real-world instructional or performance improvement problem.

Prerequisites
- Intended to be taken after EIDT 6100

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EIDT 6115 - Learning Theories and Instruction

(3 sem. cr.)
Effective instructional design begins with an understanding of the learning process. In this course, the behaviorist, cognitive, constructivist, and social learning theories, and their relationship to instructional practices and course design, are examined. Factors that influence learning, such as learning strategies, motivation, and engagement, are also explored.

EIDT 6120 - Multimedia Design and Development

(3 sem. cr.)
In this course, educators take a systematic approach to the design and development of multimedia for instruction. They combine their knowledge of effective instructional strategies with the basic principles of visual literacy, web design, and multimedia design to develop effective and usable learning objects. Applying concepts learned in the course, educators gain practical experience creating an interactive learning experience, which they beta test in a learning management system.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EIDT 6121 - Multimedia Design and Development I

(3 sem. cr.)
In this first of two multimedia courses, students take a systematic approach to the design and development of multimedia for instruction. Specifically, students will explore various applications within the Adobe Creative Cloud. Applying basic principles of visual literacy, students gain practical experience with text, graphics, and web design for the creation of interactive learning experiences.

EIDT 6122 - Multimedia Design and Development II

(3 sem. cr.)
In this second of two multimedia courses, students take a systematic approach to the design and development of multimedia for instruction. Specially, students will continue to explore the various applications within the Adobe Creative Cloud, as well as Adobe
Captivate. Applying basic principles of visual literacy, students gain practical experience with audio, video, and screen capturing for the creation of interactive learning experiences.

**EIDT 6130 - Program Evaluation**

*(3 sem. cr.)*

Program evaluation is the final step in an effective systematic approach to instructional design. In this course, educators explore the models, principles, and practices employed in conducting effective and thorough evaluations of instructional and performance improvement programs. They learn how to select an evaluation approach; develop an evaluation plan; design or select data collection tools; and collect, analyze, and interpret data related to authentic cases.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EIDT 6210 - Online Instructional Strategies**

*(3 sem. cr.)*

Effective instruction in an online setting requires strategies that leverage the unique characteristics of distance learners and online environments. In this course, educators apply their knowledge of instructional design and distance learning to analyze, select, and design instructional strategies that are most effective for engaging and teaching online learners. They learn methods for managing and delivering online instruction, with the goal of integrating effective strategies with course management tools and multimedia technologies in synchronous and asynchronous environments.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EIDT 6211 - Assessments in Online Environments**

*(3 sem. cr.)*

Instructors are provided with the opportunity to reach beyond traditional practices and explore new ways of assessing student learning outcomes in the online environment. In this course, educators apply their knowledge of learning theory, assessment practices, and instructional design principles to the development of assessment strategies in online education and training environments. They review research and practical strategies for assessing student learning in synchronous and asynchronous environments.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EIDT 6500 - Performance Improvement**
In this course, educators survey the research, models, and issues associated with improving human performance in workplace settings. They explore methods and techniques for recognizing and analyzing performance gaps, conducting needs assessments, determining appropriate instructional and performance support interventions, and measuring the results of implemented solutions. They engage in assignments that emphasize how to determine whether instructional or other performance support interventions are appropriate for addressing identified needs. Educators also use results from analyses to inform the design of job aids, instruction, and other performance support systems.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EIDT 6501 - Training and Development**

*3 sem. cr.*

The ability to manage and deliver training is an essential skill for human resource and performance improvement professionals. In this course, educators explore models, techniques, and best practices for managing and delivering training systems and modules. They focus on a range of topics, including managing the learning environment, selecting appropriate materials and assessments, and tracking learner performance and completion. Educators also explore technologies that support the planning, presenting, and managing of instructor-led and self-directed courses and training systems in face-to-face and virtual environments.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EIDT 6510 - Online Instructional Strategies**

*3 sem. cr.*

Effective instruction in an online setting requires strategies that leverage the unique characteristics of distance learners and online environments. In this course, educators apply their knowledge of instructional design and distance learning to analyze, select, and design instructional strategies that are most effective for engaging and teaching online learners. They learn methods for managing and delivering online instruction, with the goal of integrating effective strategies with course management tools and multimedia technologies in synchronous and asynchronous environments.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**EIDT 6511 - Assessments in Online Environments**
Instructors are provided with the opportunity to reach beyond traditional practices and explore new ways of assessing student learning outcomes in the online environment. In this course, educators apply their knowledge of learning theory, assessment practices, and instructional design principles to the development of assessment strategies in online education and training environments. They review research and practical strategies for assessing student learning in synchronous and asynchronous environments.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

EIDT 6910 - Capstone: Practical Application of Instructional Design

This course is the culminating experience for the program. Educators are provided with the opportunity to exhibit their knowledge, skills, and creativity in an authentic situation. They demonstrate their ability to integrate instructional design principles and practical skills and apply them to a real-world learning or performance problem. Educators work with a client in a consultative capacity or explore a case study that may include front-end analyses; design, development, and implementation of performance support and instructional materials; and/or evaluation of an instructional or performance support program.

Prerequisites
  - Completion of all other program coursework

EMBA 6010 - Leading in a Dynamic Era

An Executive Master of Business Administration (EMBA) program is a journey of personal and professional transformation. As with a physical journey, this one begins "where you are" (in this case, as a leader and manager). Two of the key goals for this first course of the EMBA Program, then, include determining each person's status and setting the trajectory for the transformational journey. To help candidates begin, in this course, each student will develop the skills for critical reflection by asking questions like:

- What are each student's strengths and weaknesses and what is missing?
- What are each student's responsibilities as a leader now and tomorrow?
- How does the student make decisions as a manager/leader?
- What are the values that shape the student's behavior?
- How does the student deal with difficult problems?
- What are the student's aspirations?

Another important theme of this course is being a leader in turbulent times. Being an effective and genuine leader in a dynamic era requires an understanding of leadership concepts, how leaders think and act, and how various management styles impact
situations and relationships within an organization. Yet, being an effective leader also demands a strong set of competencies such as motivating self and others, leading creativity in an organization, cultural intelligence, and navigating through ambiguity. Through a self-reflective process, work with an executive mentor, and accompanied by the study of key leadership concepts, each student will begin to craft a Personal and Professional Development Plan that will be utilized and further developed throughout the EMBA Program. This plan will serve as the road map for developing the leadership posture and competencies critical for success; and students will take their first steps toward applying the plan to their career during this course.

EMBA 6020 - Economic Decision Making

(3 sem. cr.)
Global markets are increasingly turbulent, and understanding how these markets work is critical to the student's success as a business leader. The course is designed to show how the student can use economic theory to frame the challenges associated with operating a firm in a competitive environment. To facilitate this understanding, students in this course integrate concepts of both micro- and macroeconomics. From a micro perspective, students study managerial decisions, particularly in terms of demand, supply, opportunity costs, profitability, and competitive strategies. Students also analyze real-world industries, markets, and firms using the key concepts of microeconomics. From a macro perspective, students develop the skills to create a basic model of the macro economy emphasizing real-world data and relationships. By the end of the course, students can evaluate and resolve economic problems in real time.

EMBA 6030 - Creativity, Innovation, and Foresight

(3 sem. cr.)
In the first course of the Executive MBA, students were introduced to the notion of being a leader in an era of disruptive change. Students take this course to continue the discussion on disruptive change by focusing on the importance of innovation in achieving business success. Innovation is not an end result. Rather, through creativity and foresight, it is a way of thinking that enables individuals and organizations to define critical problems, identify possible solutions, and foster positive change more effectively. In particular, students in this course focus on increasing their abilities as creative leaders, those who can readily apply imagination to resolve complex problems and who can unleash the creative talents of others by establishing a work environment that facilitates creative thinking. The ultimate goal of this course is to provide students with a set of proven creativity methods, skills, and strategies that enable innovative breakthroughs to occur in a much more deliberate and predictable manner.

To accomplish this task, students describe why creativity and innovation are considered crucial 21st-century skills; learn to manage their judgment, so that they become more flexible, tolerant of ambiguity, and open to new ideas and possibilities; employ a variety
of creative thinking tools useful in resolving problems that do not have easy answers; apply design thinking principles aimed at user empathy and rapid prototyping; identify what creative leaders do to promote innovation in their teams and organizations; and recognize how a systematic approach to creativity enhances the probability of innovative breakthroughs.

EMBA 6040 - Accounting Measurement for Leaders

(3 sem. cr.)
Accounting is a measurement process. Leaders are required to create meaningful measures. To do that they need to know what to measure, how to measure, and what the consequences of the measurement might be. Students in this course take a rigorous stakeholder approach and integrate fundamental managerial accounting topics with strategic analysis. By the end of the course, students are able to use accounting information within a firm to make effective business decisions, design control systems, and evaluate the impact on various stakeholder groups.

EMBA 6050 - Managing People and Teams in Globally Diverse Organizations

(3 sem. cr.)
Contemporary business environments are increasingly competitive, global, fast paced, and knowledge intensive. In these environments, effective use of human capital is crucial to an enterprise’s success and survival. In this course, students have the opportunity to learn practical issues such as planning and executing staffing strategies, creating and sustaining teams, maintaining influence in the organization, managing a global workforce, managing programs for productivity improvement, and planning and managing the human side of organizational change. This course will be especially useful for those planning careers as general managers as well as management consultants.

EMBA 6060 - Money and the Firm

(3 sem. cr.)
The focus of this course is on the utilization of financial information for internal decision-making purposes. The course is designed for the executive who will be using, rather than producing, financial information. Students will cover a range of contemporary topics and techniques relevant to sound and ethical financial decision making using a stakeholder-analysis framework. This framework requires decision makers to develop an array of possible financial decisions and evaluate the advantages and disadvantages of each. The tradeoffs and consequences of each alternative are considered in terms of satisfying stakeholders’ interests while maximizing firm value. Students in this course will rely on critical-thinking skills to apply and, at times, challenge traditional financial theory, while balancing various stakeholder interests in the financial decision-making process.
EMBA 6070 - Leveraging Systems and Operations for Performance

(3 sem. cr.)
One of the most critical challenges for leadership in maintaining organizational performance is identifying core strengths and weaknesses within the organization and across the more general value creation landscape. Students in this course explore systems thinking as a process whereby problems are viewed as individual components within a larger system. A framework is provided for analyzing relationships within a system and for avoiding the risks associated with viewing problems in isolation. Learners will use systems-thinking tools to model single-, double-, and multiple-loop feedback systems, both at the micro and macro levels of analysis. In addition, students are introduced to scenario building and will examine how the practice of systems thinking lays the foundation for creating sustainable outcomes for organizations and society.

EMBA 6080 - Competing in the Global Marketplace

(3 sem. cr.)
A fundamental shift in the world economy is underway and is accelerating. No longer are national economic interests and business operations largely confined within well-defined geographic borders. Phenomena such as enhanced communication technologies, outsourcing, and the reduction in political barriers to cross-border trade have all contributed to the creation of a truly global economy.

Students in this course focus on the global environment of business and explore how the international sociocultural, political, legal, economic, physical, and historical environments impact business practices and policies. A key goal of the course is to provide students with the skills and methodologies required for developing business strategies on a global scale. In particular, students will identify the internal and external forces impacting an organization’s ability to compete in the international marketplace.

EMBA 6090 - Establishing and Cultivating Customer Markets

(3 sem. cr.)
When students see a highly successful product they may wonder whether the product was itself truly innovative or whether the product was unremarkable, but the marketing program was exceptional. Not surprisingly, a clear understanding of the importance of marketing, as well as a grasp of effective marketing practices, is essential for anyone who wishes to achieve a position of leadership. In this course, students gain a working knowledge of both marketing theory and the practical application of innovative marketing strategies. Students also come to understand how product, price, place, and promotion contribute to the marketing mix as they explore research-based insights into consumer behavior.

EMBA 6100 - Capstone: Business Strategy for Sustainable Competitive Advantage
The purpose of this capstone course is to facilitate the integration of what students have experienced during their Executive MBA program. First, working with an executive mentor, students complete a Personal and Professional Development Plan that has both charted their transformational journey thus far and will serve as the starting point of the next phase of their career development. Second, students seek to integrate the knowledge they have gained through the program using the "lens" of developing business strategies capable of achieving sustainable competitive advantage.

To help students think in an integrative fashion, they will take the perspective of the CEO throughout the course. Students whose primary experience has been in one of the functional areas of management (e.g., finance, marketing) have opportunities to relate their experience to the contents of other functional areas and to develop the multifunctional perspective required of the general manager.

The most important outcome of the course is that students are able to think and act in a strategic (rather than a tactical) fashion. Overall, the course aims to improve the actual practice of management; i.e., the students' ability to manage a variety of strategic and operational situations. These situations may be complex, and students should be able to cope with a considerable amount of ambiguity.

**ENGL 1000 - Academic Writing**

Students in this course are introduced to the basic elements of academic writing. Students' primary focus is on gaining fundamental skills necessary for writing college-level essays and research papers. They engage in weekly writing assignments for iterative practice with grammar, punctuation, and the formation of sentences and paragraphs. Through these assignments and a final reflective essay, students demonstrate effective academic writing and the skills requisite to ENGL 1001 - English Composition.

*Note: This course will be considered an elective.*

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ENGL 1001 - English Composition**

Students explore subject areas through different perspectives, make convincing arguments, and support research findings in a clear, scholarly manner. In this course, students develop the skills necessary for persuasive and research-based writing at the college level. Students focus on the use of rhetoric, argument, and supporting evidence. They also study the use of the *Publication Manual of the American Psychological Association* (APA) guidelines to cite sources and examine the steps involved in conducting research. Through practice of the planning, writing, and revision process, students gain skills necessary to write effective academic persuasive essays with supporting evidence.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ENGL 1010 - Writing With Confidence and Purpose

(5 cr.)
Writing is a process. In this course, students experience the writing process by authoring a variety of activities and essays. This course enables students to practice writing with confidence and purpose in academic settings and the workplace. They explore fundamental aspects of writing, including audience, purpose, style, tone, and point of view, and they write in multiple genres, exploring personal, professional, source-driven, and reflection writing. Students build upon their personal, professional, and academic experiences to analyze and respond to various prompts using quotes, summarizing, and paraphrasing evidence. In a series of linked assignments that move from a personal narrative to a source-driven Career Narrative Essay, they explore conventions for personal, professional, and academic writing.

Prerequisites
• HMNT 1001A

ENGL 1010A - Writing With Confidence and Purpose

(5 cr.)
Writing is a process. In this course, students experience the writing process by authoring a variety of activities and essays. This course enables students to practice writing with confidence and purpose in academic settings and the workplace. They explore fundamental aspects of writing, including audience, purpose, style, tone, and point of view, and they write in multiple genres, exploring personal, professional, source-driven, and reflection writing. Students build upon their personal, professional, and academic experiences to analyze and respond to various prompts using quotes, summarizing, and paraphrasing evidence. In a series of linked assignments that move from a personal narrative to a source-driven Career Narrative Essay, they explore conventions for personal, professional, and academic writing.

ENGL 2002 - Professional Writing for Successful Communication

(5 cr.)
Clear and persuasive writing is a fundamental professional skill. In this course, students learn the basic tenets of written communication in a professional setting, including the importance of understanding audience and the purpose of the communication, as well as choices of modality, timing, and idiom. Students examine examples of professional communication, such as business letters, résumés, briefing memos, newsletters, and
proposals and requests for proposals, among others. Applying course concepts, students also engage in a range of applied assignments that reinforce fundamental writing skills, such as grammar and sentence structure, punctuation, style, citation, and word choice.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ENGL 2002A - Professional Writing for Successful Communication

(5 cr.)
Clear and persuasive writing is a fundamental professional skill. In this course, students learn the basic tenets of written communication in a professional setting, including the importance of understanding audience and the purpose of the communication, as well as choices of modality, timing, and idiom. Students examine examples of professional communication, such as business letters, résumés, briefing memos, newsletters, and proposals and requests for proposals, among others. Applying course concepts, students also engage in a range of applied assignments that reinforce fundamental writing skills, such as grammar and sentence structure, punctuation, style, citation, and word choice.

Prerequisites
- HIST 2050A

ENGL 2050C - Women's Literature and Social Change

(5 cr.)
Students examine a variety of historical and contemporary literary works written by women in the form of essays, short fiction, drama, and poetry/lyrics. Topics include social change as it relates to women’s experiences of work, family and community, health and well-being, education, and the future. Students use critical-thinking, reading, and writing skills to articulate an understanding of course themes.

Prerequisites
ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ENGL 2110 - Creative Writing: Fundamentals of Short Fiction♦

(5 cr.)
Storytelling was a way for our ancestors to pass on values, spiritual beliefs, and history. One of the ways in which we continue this heritage today is through short fiction. In this course, students encounter the processes and concepts of creative writing through short fiction. Students examine established authors, narrative techniques, and structures, which they use as a guide to write short stories that model voice, purpose, and elements of story writing. Through this course, students gain critical-thinking and analytical skills in writing, revising, and publishing creative fiction.

Prerequisites
- ENGL 1001 or ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ENGL 3110 - Creative Writing: Contemporary Nonfiction and Poetry♦

(5 cr.)
In this course, students explore the creation of poetry and nonfiction writing for children and adults. Students analyze various forms of creative writing, including memoirs, personal essays, nature essays, prose poems, and poetry, by reading the works of established authors and modeling writing techniques in preparation for publication. They acquire essential skills in critical and analytical thinking to be able to write and revise creative works for adults and children.

Prerequisites
- ENGL 1001 or ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ENGL 3110C - Creative Writing: Nonfiction and Poetry♦

(5 cr.)
In this course, students explore the creation of poetry and nonfiction writing for children and adults. Students analyze various forms of creative writing, including memoirs, personal essays, nature essays, prose poems, and poetry, by reading the works of established authors and modeling writing techniques in preparation for publication.
They acquire essential skills in critical and analytical thinking to be able to write and revise creative works for adults and children.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FNCE 3001 - Financial Management**

(5 cr.)
All organizations must collect and analyze financial information to make important decisions regarding operations, such as payments, budgeting, and investing in new business. Students in this course learn to use financial and managerial finance theory, concepts, and tools to make better financial management decisions as well as to conduct sound financial analysis. They examine the principles of finance from an applied perspective through the examination of difficult strategic and operational decisions that exist in the business environment. Students gain hands-on financial management experience as they compile financial statements, analyze and report financial results, and calculate elements of time value of money for single or multiple cash flows.

**Prerequisites**
BS in Accounting
- ACCT 1001 or ACCT 1003 or ACCT 1004S

BS in Business Administration
- ACCT 1001 or ACCT 1003 or ACCT 1004S

All Other Programs
- ACCT 1003 or 1004S

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FNCE 4101 - Corporate Finance**

(5 cr.)
Managers in all types of corporations must make vital financial decisions on a daily basis, such as choosing between competing investment opportunities, valuing assets, measuring risk and return, financing a firm’s operations, making dividend policy and capital structure decisions, and valuing financial instruments. Students in this course learn the basics of finance and can gain the tools needed to create long- and short-term planning decisions. They collaborate with their peers through a group case study project to gain real-world insight into the corporate finance arena. Students add to their portfolio by completing a project assignment in which they demonstrate concepts learned in the course through a specific contextual application.

**Prerequisites**
- FNCE 3001
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 4102 - Financial Institutions and Markets♦

(5 cr.)
One of the main causes of economic failure in the United States is the assumption of too much financial risk, including overspending and bad investments. The best way to mitigate risk factors is for financial managers to understand the impact of spending on financial markets. In this course, students investigate the implications of these risk factors and examine various aspects of financial markets, including money, bond, mortgage, stock, foreign exchange, and derivative security. Students learn about the operation and regulation of commercial banks, thrift institutions, insurance companies, securities firms, investment banks, finance companies, mutual funds, and pension funds. Through this course, students have the opportunity to gain the skills and knowledge that financial managers use to predict and manage risk and future trends.

Prerequisites
- FNCE 4101

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 4103 - International Finance♦

(5 cr.)
To maintain a competitive advantage, organizations must engage in business and financial investing on a global scale and financial managers must understand the challenges, risks, and methods of dealing with firms in the global economy. In this course, students learn about the nuances, concepts, and principles in the field of international finance. Primarily, students engage in assignments focused on international financial markets and the macroeconomics of international financial flows. They examine specific topics, including foreign exchange, international securities markets, and international banking. Through this course, students have the opportunity to acquire the tools needed to make important international financial decisions based on existing financial principles and current factors in the market.

Prerequisites
- FNCE 3001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 4990 - Business Essentials
A background in the basics of business is often a key to making the most of a graduate business or management program. In this foundational course, students can build their business acumen in major functional areas that are essential to business success including business leadership and management, business ethics, the legal environment of business, accounting, finance, economics, quantitative methods and statistics, information systems management, global business, marketing, and strategic management.

**FNCE 6000 - Decision-Making Tools for Today's Financial Professional**

(3 sem. cr.)

Today’s effective finance professionals use a variety of financial management tools as they seek to evaluate alternatives and make sound financial recommendations. Students will gain practical experience of a financial professional's role by using financial modeling tools such as breakeven and cost-volume-profit analysis for model pricing and cost sensitivity; forecasting and cost prediction; variance cost analysis; relevant cost analysis; project valuation; and prioritization using payback, rates of return, and discounted cash flow methods. Students’ increased diagnostic critical-thinking skills will help them to construct effective, ethical, fact-based arguments, which are among the fundamental capabilities required for financial decision-making. Using relevant management articles, case studies, and topic analyses, students also examine how to align business needs with fact-based solutions, how to identify new opportunities, and how to manage and enhance an organization’s competitive position.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FNCE 6010 - Analysis and Communication for the Financial Professional**

(3 sem. cr.)

An essential skill for nearly all financial professionals is the ability to effectively communicate with the organization to manage internal and external relationships. The importance of communication in finance is emphasized, and students are presented with the opportunity to practice using the tools required for effectual and efficient presentation of information while gaining critical-thinking, reading, and scholarly writing skills. Students explore various written and presentational forms of communication that financial professionals use within organizational and managerial settings. Students examine techniques for developing and presenting white papers, memoranda used to communicate issues and recommendations to management, and financial and nonfinancial information. They learn about concepts in balanced communication coverage and how to adapt to constantly changing modes of communication, including social networking, blogging, and using professional organizations and training programs to their advantage. Through these activities, students gain a better understanding of the roles and responsibilities of the financial professional as well as the ethical methodologies required to maintain a professional obligation to the community and
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 6020 - Legal and Ethical Issues in Accounting and Finance♦

(3 sem. cr.)
In the news, it is too often that we hear about cases of financial fraud and misconduct involving major corporations. It is a social and professional obligation of financial professionals to be concerned and knowledgeable on topics involving legal and ethical issues in accounting and financial reporting. In this course, students learn to appreciate this role and explore the various legal and professional responsibilities of which financial professionals must be aware when developing financial statements and reports. They examine a variety of issues, such as the differences between statute and regulation and between common and statutory law. Students also assess the role of bankruptcy and its impact on business relationships. Through the extensive use of current and seminal case studies, students take a practical approach to examining the best practices of doing business in today's sociopolitical climate from a legal and ethical perspective.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 6030 - Managerial Finance♦

(3 sem. cr.)
Today’s companies are challenged to constantly do more with less. Effective managers know how to deploy scarce financial resources in ways to achieve optimum returns on these resources. Students will discover the latest financial tools and analytic methods to strengthen the capital investment decision-making process. Students will use critical-thinking skills to apply and, at times, challenge traditional financial theory, while balancing various stakeholder interests in the financial decision-making process. Students will examine a range of contemporary issues and techniques relevant to sound and ethical financial decision making.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 6600 - Managing Operational and Financial Business Risks♦

(3 sem. cr.)
Accountants and business managers must be astute and proactive in managing a business to combat the inevitable threat of operational and financial risks, including those involving credit, market, liquidity, reputation, technology, and legality. In this course, students assess the tools used by accountants and managers in managing these risks. They explore the various processes used to identify, analyze, and assess risks, and they
learn the appropriate use of financial and operational controls to mitigate such risks. Additionally, students examine ways to implement techniques, such as developing a risk control matrix and using the concepts of the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework to improve an organization’s enterprise risk management.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 6610 - Managing Regulatory Compliance♦

(3 sem. cr.)
Regulatory compliance involves the policies and processes that organizations use to ensure that they follow the rules and regulations in place by the firms that control financial activity in a given jurisdiction. In this course, students explore the facets of regulatory compliance, focusing on the role of accounting with respect to corporate governance within an organizational setting. They also focus on how organizations build transparency into their governance and compliance systems. Students review and explore the responsibilities of management in terms of compliance and auditing and explore the complex processes of checks and balances that comprise compliance systems. Students further develop their understanding of regulatory compliance through a review of the Foreign Corrupt Practices Act and the Sarbanes-Oxley Act, in addition to an evaluation of decisions made by the Securities and Exchange Commission and the Public Corporation Accounting Oversight Board.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 6630 - Tax Analysis and Decision Making♦

(3 sem. cr.)
Students in this course are provided with an overview of current topics in taxation strategies for individuals and corporations. They learn about the Internal Revenue Service Code on tax differences, including book and tax accounting, inclusions, exclusions, deductions, credits, and tax aspects of property transactions. Students employ a "walk-through" technique through which they gain first-hand experience in the use of tax research services. Students also explore how economic, social, and cultural forces influence tax policy.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 6635 - Financial Budgeting and Forecasting Analysis♦

(3 sem. cr.)
Managers are continually faced with the complexities of budgeting and forecasting their
business operations. Complexities include many factors, such as one-time and ongoing expenses; investments; and risk related to investment proposals, time periods, and other financial considerations. Students will explore budgeting and forecasting along with related processes within the organizational context. Students will also review the implications of budgeting and forecasting as well as methods to plan for and prioritize the use of scarce resources, while considering ethical issues related to sustainability.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FNCE 6640 - Advanced Managerial Finance**

(3 sem. cr.)
The focus of this course is on how students use financial information for internal decision-making purposes. It is designed for the leader who will be using, rather than producing, financial information. Decision making is an art. Good decision makers need to be able to anticipate the alternatives, evaluate the advantages and disadvantages of each, and recognize the tradeoffs inherent in each alternative. Students in this course will approach financial decision making using this framework that also overtly includes rigorous stakeholder analysis and implications. Stakeholder analysis sometimes leads to controversial decision alternatives, but it is this exercise that will develop the students' talents for challenging the traditional and finding the balance between stakeholder expectations and creating opportunity for the organization. The objective of this course is for students to apply finance theory and principles to the analysis of important business problems. Specific topics will include capital budgeting, cost of capital, real options, capital structure, payout policy, and enterprise valuation.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FNCE 6643 - Applications in Corporate Finance I**

(3 sem. cr.)
Corporate finance managers use a variety of financial management tools when identifying possible alternatives for recommendations on financial management decision-making. Students in this course use the tools of finance to help managers maximize their firm's value. Topics include the time value of money, net present value, internal rate of return, capital budgeting, capital structure, working capital management, multinational concepts, and dividend policy.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FNCE 6647 - Applications in Corporate Finance II**
(3 sem. cr.)
Students in this course build on what they learned in Corporate Finance I and focus more deeply on contemporary issues and optimal financial decision-making. Students participate with hands-on demonstrations of how to become more skillful in various financial management environments. Topics include valuation, advanced capital budgeting, cost of capital, risk, standard deviation, variance, covariance, capital asset pricing model, and beta. Additional topics include multinational concepts, leasing, option pricing, derivatives, hedging, and other advanced financial applications.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FNCE 6650 - Insurance Planning

(3 sem. cr.)
Insurance coverage is an important element on ensuring financial security. Students in this course will examine risk management and insurance decisions for financial planning. Topics for this course include insurance for life, health, disability, property, and liability risks, as well as annuities, group insurance, and long-term care.

FNCE 6655 - Investment Theory and Portfolio Management

(3 sem. cr.)
Investments and portfolio management is a combination of different investment assets for the purpose of achieving investor goals while minimizing overall investment risk. Students in this course examine capital markets with an emphasis on securities valuation. Topics covered in this course include fixed-income markets, measuring risk with alphas and betas, asset pricing, portfolio management strategies, equity markets, and derivatives markets.

FNCE 6660 - Derivatives and Risk

(3 sem. cr.)
Derivatives are financial contracts with values that are derived from the behavior of something else, such as interest rates, stock indexes, mortgages, commodities, or even the weather. Students in this course examine the types of market risk managers face in their day-to-day operations and the use of financial derivatives. The students focus on the theory and practice of the valuation of derivative securities such as forward contracts, futures contracts, swaps, and options and how they are used to mitigate risk. They also examine the risks faced by the market's underlying properties of each of these instruments and their use in managing the various risks faced by market participants.

FNCE 6665 - Retirement and Estate Planning
Retirement and estate planning allows not only for individuals to have a successful retirement, but also contribute to the lives of one’s children or grandchildren. Students in this course focus on estate planning and the efficient conservation and transfer of wealth. They explore legal, tax, financial, and nonfinancial aspects of estate planning. Topics also include trusts, wills, probate, advanced directives, charitable giving, wealth transfers, and related taxes.

**FNCE 6685 - Creating Sustainable Solutions Through Systems Thinking**

(3 sem. cr.)

Students in this course explore systems thinking as a process whereby problems are viewed as individual components within a larger system. Students are provided a framework for analyzing relationships within a system and for avoiding the risks associated with viewing problems in isolation. Students will use systems-thinking tools to model single-, double-, and multiple-loop feedback systems, both at the micro and macro levels of analysis. In addition, students will be introduced to scenario building and will examine how the practice of systems thinking lays the foundation for creating sustainable outcomes for organizations and society.

**FNCE 6781 - Information Security Governance**

(3 sem. cr.)

Students in this course cover information security issues in an organizational context, recognizing the increasing stakes in keeping systems safe from tampering and disclosure. Topics include management structures and processes for enterprise information security; information security in the supply chain; legal, regulatory, audit, and policy issues; risk management; and the business case for information security. 

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**FNCE 6900 - CFA Capstone**

(3 sem. cr.)

In this course, students review content from prior Chartered Financial Analyst (CFA) exams on a variety of topics, including ethics and professional standards, corporate finance, financial reporting and analysis, quantitative methods, alternative investments, derivatives, equity investment, and fixed income. Students conduct research, discuss with peers, and analyze the answers to actual CFA exam items to gain a thorough understanding of the format, concepts, and principles on which exam questions are based, gaining confidence and preparedness for taking the CFA exam.

**FNCE 6905 - Financial Planning Capstone**
In this course, students review content based on prior Certified Financial Planner™ (CFP®)* Certification exams on a variety of topics, including financial and insurance planning, investment planning and strategies, income taxes, and retirement planning. Students conduct research, discuss with peers, and analyze the answers to actual CFP® Certification exam items to gain a thorough understanding of the format, concepts, and principles on which exam questions are based, gaining confidence and preparedness for taking the CFP® Certification exam.

* CERTIFIED FINANCIAL PLANNER™ and CFP® are certification marks owned by Certified Financial Planner Board of Standards, Inc. (CFP Board).

FPLB 631L - Pre-Practicum 1

By participating in a Walden Pre-Practicum, students gain skills in their development as scholar-practitioners. Through their Pre-Practicum experiences, students expand their network of peers and faculty members while developing their professional skills and identity. In Pre-Practicum 1, students begin to apply the core skills and techniques introduced in their Techniques course. Students begin to develop the multicultural competencies needed for counseling. Per program requirements, there is a synchronous experience in this course. Students will continue to expand their knowledge of counselor credentialing.

FPLB 632L - Pre-Practicum 2

In Pre-Practicum 2, students continue to develop core skills from Pre-Practicum 1 and integrate advanced skills in their development as scholar-practitioners. Through their Pre-Practicum experiences, students expand their network of peers and faculty members while continuing to develop their professional skills and identity. In Pre-Practicum 2, students begin to develop group leadership skills, integrate counseling theory, and continue to demonstrate cultural competency skills. Students engage in developing their upcoming field experience plan and continue credentialing skills activities.

Prerequisites
For Those in Addiction Counseling; Marriage, Couple, and Family Counseling; and Clinical Mental Health Counseling Programs
- GRPL 6100
- COUN 6250

For Those in School Counseling Program
- GRPL 6100
- COUN 6320
FPSY 2005 - Social Influences on Behavior

It has been said that no person is an island; meaning, in part, that people are influenced by others and by the social situations in which they find themselves. Students in this course focus on the basic concepts and applications of social psychology, includes topics such as attitudes, beliefs, and behavior; stereotyping; prejudice and discrimination; interpersonal relationships; group behavior; and the effect of environmental stress on behavior. Students apply principles learned in case studies and to situations in daily life.

Prerequisites
- PSYC 1001 or PSYC 1002 or PSYC 1003

FPSY 2101 - Introduction to Forensic Psychology♦

(5 cr.)
Students in this course explore a wide range of adult, juvenile, family, and community topics of interest to students, practitioners, and administrators. Topics include the uses of psychological assessments in court, issues of criminal responsibility, criminal profiling, predicting dangerousness, jury processes and decision making, eyewitness testimony, the use of psychological knowledge in prisons, and the psychology of criminal behavior.

Prerequisites
- PSYC 1001

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 4102 - The Criminal Mind♦

(5 cr.)
What makes the criminal unique? Criminal justice professionals confront criminal behavior in many forms. Students taking this course explore theories and research that provide cognitive, behavioral, and psychological explanations of criminal behavior. Knowledge of these theories enhances the student’s ability to interact effectively with offenders.

Prerequisites
- CRJS 1001

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 4111 - Forensic Interviewing and Investigation♦

(5 cr.)
The basic procedures for interviewing both witnesses and suspects are provided in this
course. Students have the opportunity to learn the difference between accusatory and non-accusatory interview strategies. In addition, effective behavioral observation strategies are identified. Methods for effectively recording information from interviews and observations are covered, and best practices for preparing forensic reports are presented.

Prerequisites
- PSYC 1001
- FPSY 2101 or PSYC 2101

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**FPSY 4112 - Forensic Assessment**

(5 cr.)
This course is designed to provide students with an overview of the basic knowledge and skills required to select appropriate assessment instruments used in the field of forensic psychology with children and adults. Types of assessments include child custody evaluations, juvenile assessment, expert witness assessment, fitness to stand trial, civil commitment assessment, and substance abuse assessment.

Prerequisites
- PSYC 1001
- FPSY 2101 or PSYC 2101

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**FPSY 4920 - Capstone**

(5 cr.)
In this course, students gain the contemporary knowledge needed to apply ethical practice and professional responsibilities while working in the field of forensic psychology. The American Psychological Society’s Ethical Principles of Psychologists and Code of Conduct as well as the American Psychology-Law Society’s Specialty Guidelines for Forensic Psychology are mainstays in this course. Additionally, the various roles and responsibilities of a forensic psychologist are covered.

Prerequisites
- PSYC 1001
- FPSY 2101 or PSYC 2101

*Note: This must be the last class taken.*

**FPSY 5101 - Introduction to Forensic Psychology**
Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They learn how forensic psychology links to the criminal justice system as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the field.

FPSY 5102 - Intersection of Crime, Psychology, and the Law

Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They have the opportunity to learn how forensic psychology links to legal systems as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students can acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the fields.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 5115 - Understanding Forensic Psychology Research

In this course, students will better understand how to be an astute consumer of forensic psychology research. Basic principles of statistics, such as reliability and validity, are covered. At the same time, emphasis in this course is placed on teaching the student how to read forensic psychology research critically and how best to apply research results to forensic clinical, correctional, court, public policy, and police settings.

FPSY 5125 - Assessment in Forensic Psychology Settings

Professionals in forensic psychology use assessments to gather data from different sources to arrive at conclusions and make decisions involving cases or issues. In this course, students examine assessments in various areas, including violence risk potential, competency to stand trial, insanity, pathology, and child custody. They examine the varied assessment instruments and procedures used in forensic settings with adults and juveniles. They also assess factors impacting assessments and related challenges, such as ethical issues and multicultural considerations. Students are provided with a foundation
in the knowledge of forensic assessment rather than specific skills in administering forensic assessment instruments and interpreting results. Students demonstrate their knowledge as they apply concepts presented in the course to assess a forensic situation case study.

**FPSY 5126 - Understanding Violence, Risk, and Threat Assessment**

(5 cr.)
Students in this course explore the various assessment techniques and instruments used within the forensic psychology arena. Some of the assessment areas covered include risk assessment, juvenile evaluations, child custody evaluations, and capital punishment, as well as the various psychological instruments that are used in these types of evaluations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 5135 - Criminal Behavior**

(5 cr.)
Students in this course are provided with a foundation in historical and contemporary biological, psychological, and sociological theories of criminal behavior. Students consider two important questions in forensic psychology: “Who is a criminal?” and “Is criminal behavior a mental illness?” Students explore theoretical issues that result from attempts to explain criminal behavior in forensic populations. They examine groups of offenders, including mentally disordered offenders, sex offenders, violent offenders, and juvenile offenders. Students apply ethical guidelines and standards to the study and research of criminal behavior. They also use concepts and theories to assess the behavior of criminal offenders in case study scenarios.

**FPSY 5136 - Criminal Behavior**

(5 cr.)
Students in this course are provided with a foundation in historical and contemporary biological, psychological, and sociological theories of criminal behavior. Students consider two important questions in forensic psychology: “Who is a criminal?” and “Is criminal behavior a mental illness?” Students explore theoretical issues that result from attempts to explain criminal behavior in forensic populations. They examine groups of offenders, including mentally disordered offenders, sex offenders, violent offenders, and juvenile offenders. Students apply ethical guidelines and standards to the study and research of criminal behavior. They also use concepts and theories to assess the behavior of criminal offenders in case study scenarios.

**FPSY 5145 - Ethical Issues and Professional Responsibilities in Forensic Psychology**
A fundamental responsibility of forensic psychologists is to provide treatment, assessment, research, and training in an ethical manner. Through this course, students have the opportunity to acquire contemporary knowledge needed to apply ethical practice and professional responsibilities while working as forensic psychologists. Students explore the various roles and responsibilities of forensic psychologists. They examine the American Psychological Association’s Ethical Principles of Psychologists and Code of Conduct as well as the American Psychology-Law Society’s Specialty Guidelines for Forensic Psychology. Students apply these guidelines as well as critical-thinking and scholarly writing skills to describe the ethical dilemmas, professional challenges, and approaches to overcome these issues within a professional forensic psychology role of their choice.

FPSY 5511 - Treatment of Forensic Populations

In this course, students gain the foundational knowledge necessary to evaluate and subsequently treat many different forensic populations, such as sex offenders, substance abusers, and white-collar criminals. Students analyze the use of traditional forms of intervention, including individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice. Applying concepts and theories learned in the course, students develop a project scenario in which they feature an offender and describe treatment approaches as well as related ethical, legal, and multicultural factors that may impact treatment. Reflecting on the course, students also consider and discuss professional identity and goals.

FPSY 5720 - Abnormal Behavior

Understanding the characteristics and causes of atypical thoughts and actions—commonly known in mental health professions as abnormal behavior—is essential in determining accurate diagnoses, answering forensic referral questions, and planning effective treatment programs. In this course, students examine the history and evolution of abnormal psychology and how practitioners use contemporary diagnostic criteria of abnormal behavior in various settings, such as schools, rehabilitation facilities, community agencies, and forensic situations. They examine specific techniques for the diagnosis, assessment, and/or treatment of cognitive, emotional, and developmental disorders, as well as for psychophysiological and psychosocial problems. Using the scholar-practitioner model, students consider environmental and biological factors contributing to behavioral disorders. Students also investigate and discuss current and future trends, legal and ethical issues, and multicultural factors that complicate diagnosis and clinical assessment.

FPSY 6001 - Foundations for Graduate Study
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals, and they develop a program of study, a professional development plan, and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

FPSY 6002 - Foundations of Graduate Studies in Psychology

Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students build a foundation for academic and professional success as social change agents. They assess the relationship of Walden's mission and vision to professional goals. They establish connections with their peers and the broader Walden community. Students engage in course assignments focused on the practical application of scholarly writing, critical-thinking skills, academic integrity, ethics, and the promotion of professional and academic excellence within the field of psychology.

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 6100 - Critical Issues in Emergency Management

Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

FPSY 6101 - Introduction to Forensic Psychology
Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They learn how forensic psychology links to the criminal justice system as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the field.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

FPSY 6102 - Intersection of Crime, Psychology, and the Law*

(5 cr.)
Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They have the opportunity to learn how forensic psychology links to legal systems as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students can acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the fields.

Prerequisites
- FPSY 6002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

FPSY 6115 - Understanding Forensic Psychology Research*

(5 cr.)
Forensic psychologists, and others in the field, often rely on psychological research for a variety of functions; for example, to extract empirical data about psychological tests or to determine the efficacy of different interrogation techniques. Through this course, students work toward becoming astute consumers of forensic psychology research, acquiring skills needed to understand and interpret data. Students assess the relevance of research as well as the significance of incorporating ethics into practice. They examine basic principles of statistics, such as reliability and validity. Students also learn how to critically read forensic psychology research and how best to apply research results to forensic situations in clinical, correctional, court, public policy, and police settings.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
FPSY 6125 - Assessment in Forensic Psychology Settings

(5 cr.)
Professionals in forensic psychology use assessments to gather data from different sources to arrive at conclusions and make decisions involving cases or issues. In this course, students examine assessments in various areas, including violence risk potential, competency to stand trial, insanity, pathology, and child custody. They examine the varied assessment instruments and procedures used in forensic settings with adults and juveniles. They also assess factors impacting assessments and related challenges, such as ethical issues and multicultural considerations. Students are provided with a foundation in the knowledge of forensic assessment rather than specific skills in administering forensic assessment instruments and interpreting results. Students demonstrate their knowledge as they apply concepts presented in the course to assess a forensic situation case study.

FPSY 6126 - Understanding Violence, Risk, and Threat Assessment

(5 cr.)
Students in this course explore the various assessment techniques and instruments used within the forensic psychology arena. Some of the assessment areas covered include risk assessment, juvenile evaluations, child custody evaluations, and capital punishment, as well as the various psychological instruments that are used in these types of evaluations.

FPSY 6135 - Criminal Behavior♦

(5 cr.)
Students in this course are provided with contemporary views, theories, and case-study analysis of maladaptive and criminal behavior, victimology, and victim-offender relationships. A broad conceptualization of criminal behavior, such as that woven from biological, sociological, and psychological perspectives is explored and evaluated. Theories of crime and the application of risk factors associated with criminal behavior are examined. Additionally, students will be exposed to specific offender groups, both violent and non-violent, including psychopaths, serial and mass murderers, criminal paraphiliacs, arsonists, white-collar thieves, scam artists, domestic terrorists, and others.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 6137 - The Nature of Crime and Criminology

(5 cr.)
Students in this course are introduced to contemporary views and theories of maladaptive and criminal behavior. They examine a broad conceptualization of criminal
behavior from an interdisciplinary perspective as well as theories and application of criminal profiling. Students also explore specific views of criminal behavior germane to groups, such as psychopaths, serial offenders, and sexually violent predators. At the end of this course, students will have an understanding of the theories and practices that are the foundations of the field of criminology.

**FPSY 6145 - Ethical Issues and Professional Responsibilities in Forensic Psychology**

(5 cr.)
A fundamental responsibility of forensic psychologists is to provide treatment, assessment, research, and training in an ethical manner. Through this course, students have the opportunity to acquire contemporary knowledge needed to apply ethical practice and professional responsibilities while working as forensic psychologists. Students explore the various roles and responsibilities of forensic psychologists. They examine the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct as well as the American Psychology-Law Society’s Specialty Guidelines for Forensic Psychology. Students apply these guidelines as well as critical-thinking and scholarly-writing skills to describe the ethical dilemmas, professional challenges, and approaches to overcome these issues within a professional forensic psychology role of their choice.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**FPSY 6201 - Psychological Aspects of Violent Crime**

(5 cr.)
Through this course, students explore the nature and extent of the psychological nexus of criminal homicide across various environments to include serial, mass, spree, workplace violence homicide, school shooter homicide, and child abduction homicide. Students will examine the theories and trends of these types of violent crime regarding offender and victim psychological and behavioral characteristics.

**FPSY 6202 - Criminal Investigative Analysis and Profiling**

(5 cr.)
In this course, students take on the role of the criminal investigative analyst/profiler as they delve into a criminal case. They explore a structured process of analyzing case file information from investigative, scientific, and behavioral perspectives utilized in assisting in the investigation and prosecution of violent criminal offenses. Within this process, they learn how to organize and analyze case file material; common profiling concepts relating to the offense, the victim, and the offender; various forms of logic, reasoning, or arguments used in analyses; and how to convey conclusions in a written report.
FPSY 6203 - Victimology

(5 cr.)
What is the relationship between victims and those who commit crimes against them, and how does the criminal justice system protect and respond to victims of crime? In this course, students have the opportunity to answer such questions through a comprehensive assessment of victimology, a relatively new discipline in the field of criminal justice. Students examine victim patterns and tendencies and learn how victims interact with the police and the legal system. They also examine how factors of class, race, and sexual orientation affect the perception of the victim by different constituents, including the public, the court system, and the media. Students assess and discuss the concept of primary and secondary victims and gain practical insight on a range of services and resources available to all types of victims.

FPSY 6204 - Sex Offender Behavior and Treatment

(5 cr.)
In this course, students explore the traits and behaviors of both deviant and criminal sex offenders. Legal issues raised in both criminal and civil cases that involve sex offenses will be discussed. Students analyze the empirical evidence behind various assessment tools and treatment plans for sex offenders. They evaluate the risk for future sexual offense behavior and whether the protection of society outweighs the loss of civil liberty experienced by civil commitment for sex offenders.

FPSY 6205 - Psychological Aspect of Cyber Crimes

(5 cr.)
In this course, students review the psychobehavioral factors of criminals who engage in criminal activities using digital social media and other online resources. Students analyze the types and trends of both domestic and global cyber crime. In addition, students will examine characteristics of cyber perpetrators and cyber victims. Students are also provided a foundational understanding of the origins and consequences of human trafficking; sexual exploitation of children from psychological, social, and legal perspectives; and how technology facilitates these types of crimes. Students in this course examine the best practices in preventing and responding to cyber crimes.

FPSY 6206 - Family Violence

(5 cr.)
In this course, students review the victims and the perpetrators of crimes involving intimate partner violence, child maltreatment and abuse, and elderly abuse. Students in this course focus on addressing the growing literature related to the psychological damage caused by these traumatic events, including the role of mental illness and how it impacts issues involving the criminal, civil, family, and juvenile law areas.
FPSY 6215 - Controversies in Criminal Justice

(5 cr.)
Justice is at the heart of the U.S. democratic system, yet opposing viewpoints surrounding and within the system often muddle interpretations of the law and the development of policies to promote and enforce justice. In this course, students examine events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act, for example, the terrorist acts of September 11, 2001. They learn how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties. Through discussion with peers, assessment of contemporary articles, and examination of Supreme Court cases, students have the opportunity to reflect on and potentially broaden their own opinions and perspectives on current criminal justice affairs in regard to issues of law enforcement, public perception, policy development, and ethics.

FPSY 6217 - Technological Solutions and 21st Century Crime

(5 cr.)
In consideration of modern technological innovation and the spread of knowledge through digital means, the relationship between technology and criminal activity is increasing. In this course, students explore this relationship and gain a comprehensive view of cyber crime, including current trends. They learn how law enforcement agencies use technology to track and apprehend criminals. Through real-world scenarios, students examine legal responses to cyber crime and learn different approaches and techniques for solving cyber crimes and handling related challenges. Students also have the opportunity to gain a comprehensive understanding of building cases and prosecuting crimes through practical exercises in identification, data mining, and the protection and gathering of evidence.

FPSY 6220 - Sex Offender Behavior

(5 cr.)
This course is designed to provide an oversight of sex-offending behavior. Legal issues raised in both criminal and civil cases that involve sex offending will be discussed, as will psychological interventions that have been determined according to empirical evidence in helping reduce sex-offending behavior. Students will be expected to learn about the sex-offender assessment tools used by psychologists to conduct legal and psychological research.

FPSY 6245 - Social Psychology♦

(5 cr.)
In this course, students use the lens of social psychology to examine both social
cognitions and social behavior—nearly all phenomena that pertain to the individual in society. Students explore the topics of perceptions, attitudes, relationships and attraction, the motivation to help others, prejudice and aggression, conformity and obedience, group behavior, and the influence of culture, and they consider how knowledge of these topics can be used to effect positive social change. The application of what students learn in this course culminates in a final project in which they develop a plan for using social psychology research to address a significant social problem. Moreover, their learning in this course will extend to their personal and professional lives and truly enable students to effect positive social change as scholar-practitioners committed to doing so.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 6300 - Disaster Response and Recovery**

(5 cr.)
A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issues, including evacuation, relocation, and tactical and strategic decisions in the immediate aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework (NRF), and they can gain an understanding of how local, state, and federal policies mesh in response and recovery efforts. Through their exploration, they study how recovery begins once the immediate threat of the emergency wanes and the focus shifts to restoring disaster-affected areas. As part of this course, students complete the FEMA Emergency Management Institute course IS208.a: State Disaster Management.

**FPSY 6314 - Program Evaluation**

(5 cr.)
The skills required to assess research and work effectively with stakeholders are among the many proficiencies required of professionals who evaluate and develop programs. In this course, students examine these skill sets as well as the history, theory, and major approaches underlying program evaluation. Students learn how to select appropriate quantitative and/or qualitative models and techniques to perform evaluations, demonstrate program effectiveness, and disseminate results. Additionally, students explore the procedures and techniques involved in offering their evaluation services to a specific group or organization. They also examine strategies to gain stakeholder interest in developing appropriate standards, research progress, and evaluation outcomes. Students acquire practical experience evaluating a program of interest through which they outline organizational structure, identify stakeholders, employ evaluation models, explain steps in planning, and predict possible challenges or stakeholder fears, for which they recommend solutions.

Prerequisites
• FSY 6305

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FSY 6333 - Vicarious Trauma and Compassion Fatigue

(5 cr.)
Through this course, students gain an understanding and awareness of vicarious trauma and compassion fatigue for trauma-response-helping professionals. They examine intervention strategies and models of treatment and prevention of vicarious trauma and compassion fatigue through the lens of counselor educators, supervisors, and clinicians. Applying course concepts, students gain hands-on practice conducting a needs assessment and examining the use of standardized instruments. They also propose social change recommendations related to vicarious trauma and compassion fatigue to promote informed and competent trauma-response-helping professionals. Students engage in course assignments that emphasize the ethical, legal, multicultural, and spiritual implications for wellness and self-care, including personal, professional, and organizational elements. As a final project, students interview a trauma-response-helping professional and develop an organizational wellness plan for their setting.

FSY 6393 - Capstone

(5 cr.)
Students are provided with the opportunity to synthesize knowledge and skills acquired throughout their program into a practical project designed to promote positive social change in a capstone project. During this course, students work on a capstone project in which they complete a major integrative paper on a topic related to their specialization, incorporating theoretical and practical knowledge as well as social scientific research skills acquired throughout the program. The instructor may approve other capstone projects presented by students.
Prerequisites
• All prior coursework

FSY 6401 - Trauma, Crisis, and Stress with Military Personnel

(5 cr.)
The specific focus of this course is on combat trauma, crisis, and stress experiences and responses of military personnel—both wartime and post-war. Students develop an understanding of the short-term and long-term impact of post-traumatic stress and vicarious trauma. In addition to focusing on how combat and wartime experiences impact individual military personnel, students also explore the effects on families. As a
result, students will be better prepared to provide services and mental health support to military personnel dealing with trauma, crisis, and stress.

**FPSY 6404 - Military Culture**

(5 cr.)
This course is designed to provide students with an understanding of military culture. The focus of this course is on understanding the world of work for military personnel; the sociocultural identity development of military personnel; the experience of military families; support for military personnel and their families; and socioeconomic and other lifestyle challenges for military personnel. As a result of this course, students will be more informed about the mental health and social support needs of these populations.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**FPSY 6510 - Special Populations**

(5 cr.)
Students in this course are provided with an in-depth analysis of the treatment of women and people of color as professionals, litigants, victims, and offenders in the criminal justice system. Students examine the systemic outcomes of the intersections of race, class, sexual orientation, and gender for these groups as they relate to social justice and social inequality. Through critical examination of readings and data analysis, students learn about the complexity of the historical relationship between these groups and the U.S. criminal justice system and broader social context.

**FPSY 6511 - Treatment of Forensic Populations**

(5 cr.)
In this course, students gain the foundational knowledge necessary to evaluate and subsequently treat many different forensic populations, such as sex offenders, substance abusers, and white-collar criminals. Students analyze the use of traditional forms of intervention, including individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice. Applying concepts and theories learned in the course, students develop a project scenario in which they feature an offender and describe treatment approaches as well as related ethical, legal, and multicultural factors that may impact treatment. Reflecting on the course, students also consider and discuss professional identity and goals.

**FPSY 6512 - Juvenile Justice, Delinquency, and Development**

(5 cr.)
In this course, students focus on the various aspects of the juvenile justice system and the population that it serves. As such, the course provides students with an overview of
development theories, such as biological, cognitive, social-emotional, and social. Students apply these theories to cases of juvenile delinquency to determine appropriate prevention, treatment, and intervention strategies. They examine juvenile justice codes, case law, and effective methods for reporting offenses. Students also explore the changing landscape of the juvenile justice field based on current research of its population. Using theories presented in the course, students develop a delinquency-prevention or treatment program for their community, focusing on the underlying goal of social justice and change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 6520 - Psychology in the Courts♦

(5 cr.)
Forensic psychology professionals play a vital role in the court system, providing consultation, expert testimony, and recommendations for treatment. In this course, students have the opportunity to acquire the knowledge and skills used by forensic psychology professionals working in the courts. Students examine major roles of psychology professionals, their responsibilities, and required proficiencies, such as oral and written communication skills. Through application-based exercises, students engage in practical exercises, such as in writing reports, planning evaluations, and preparing witnesses for testimony. Students also consider contemporary challenges, ethical and legal issues, and the impact of technology on courts in the United States.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 6521 - Police Psychology♦

(5 cr.)
Students in this course learn about the various roles and responsibilities of forensic psychology professionals working with and in police departments, the structures and organizations in which they work, and the skills needed to perform daily functions, such as counseling and supporting police. Students analyze and discuss common issues and challenges, including crisis situations, psychological risks of police work, and stress management. They also explore less common roles of psychology professionals working with police, such as training in hostage negotiations and the selection of special officers (SWAT, snipers, and tactical commanders). Engaging in assignments designed to provide application of content, students gain practical insight on a variety of topics, such as diversity issues and training, community impact, and forensic psychology operations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 6522 - Forensic Psychology in the Legal System
In this course, students explore the major roles that a forensic psychology professional could have within the court system. Issues such as consultation with attorneys, case conceptualization based on psychology, jury selection, eyewitness testimony, witness preparation, and expert testimony will be covered. Additionally, practical skills such as testifying in court during both direct and cross examination will be addressed.

FPSY 6530 - Forensic Applications in Community Settings

Professionals must devote considerable attention to forensic psychology perspectives and approaches to address issues such as the overpopulation of prisons; decrease in healthcare availability; and cases in which courts remand treatment in community settings. Students in this course examine forensic psychology theories and perspectives, and then they apply these concepts to various community settings. They engage in practical assignments and topical readings that focus on working with offenders upon re-entry to the community and offenders who receive nonincarceration community placements. In addition, students explore less-common applications, such as restorative justice and community crime prevention. They also analyze the impact of personal perspectives and setting on the application of forensic psychology.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 6701 - Culture and Psychology

Students in this course explore the cultural components, research, and theory of cross-cultural psychology. In addition to the previously listed goals, students focus on the impact that culture has on the field of psychology around the world. The scope of this course is broad, with the core theme being cross-cultural psychology (focusing on cultures representing different parts of the world) and comparing cultural influence on human psychology. Many of the topics addressed are related to human development. Additionally, interactions among culture and social behaviors, health, mental health, and mental illnesses are emphasized throughout the duration of this course.

FPSY 6720 - Abnormal Behavior

Understanding the characteristics and causes of atypical thoughts and actions—commonly known in mental health professions as abnormal behavior—is essential in determining accurate diagnoses, answering forensic referral questions, and planning effective treatment programs. In this course, students examine the history and evolution of abnormal psychology and how practitioners use contemporary diagnostic criteria of abnormal behavior in various settings, such as schools, rehabilitation facilities,
community agencies, and forensic situations. They examine specific techniques for the
diagnosis, assessment, and/or treatment of cognitive, emotional, and developmental
disorders, as well as for psychophysiological and psychosocial problems. Using the
scholar-practitioner model, students consider environmental and biological factors
contributing to behavioral disorders. Students also investigate and discuss current and
future trends, legal and ethical issues, and multicultural factors that complicate diagnosis
and clinical assessment.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

FPSY 6723 - Multicultural Counseling♦

(5 cr.)
Students are provided with the opportunity to increase their knowledge of multicultural
counseling and the delivery of psychological services as well as related skills needed in
professional practice. Students explore diversity and identity issues and discuss their
impact on the therapeutic relationship. They examine the application of traditional
theoretical orientations and current multicultural theories to culturally diverse groups.
Through a variety of assignments designed to provide practical application of content,
students also investigate counseling concepts related to race and ethnicity, sex and
gender, sexual orientation, social class, age, and ability.
Prerequisites
- Counseling Residency I

Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

FPSY 6728 - Substance Abuse Counseling♦

(5 cr.)
The impact of substance abuse on the lives of people with addictions, and the lives of
their families, makes for a highly complex and challenging area of mental health
counseling. Counselors working with these individuals must possess a comprehensive
understanding of the background, controversies, and current approaches in regard to
the treatment of substance abuse. In this course, students examine psychological aspects
of addictions involving alcohol, prescription medications, and illegal substances. They
also examine current research in the field of dependency and addiction. Students engage
in a variety of conceptual and application-based assignments on diagnosing patients,
choosing among models of treatment, planning treatment, using group and family
treatment plans, and ensuring treatment efficacy. They also consider strategies to
promote change, including the trans-theoretical model of behavior change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.
FPSY 6740 - Disaster, Crisis, and Trauma

(5 cr.)
There is no shortage of natural and human-made disasters, such as war, violence, genocide, and terrorist activities. Individuals and communities impacted by such disasters often need assistance from professionals who understand the social, cultural, and psychological complexities of crisis and trauma. Students in this course investigate how these incidents impact the psychology of individuals and groups. They assess traditional and current literature and complete practical exercises to learn about theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with trauma. Considering the various ways crisis professionals can promote positive social change, students devote special attention to the importance and development of culturally appropriate, service-delivery programs and interventions for individuals affected and traumatized by disasters.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 6741 - Psychology of Terrorism

(5 cr.)
Many sources define terrorism as a type of psychological warfare, as it induces fear and feelings of vulnerability. Therefore, professionals need to understand all aspects of terrorism to help prevent further terroristic acts and respond to victims who have been affected psychologically. Students in this course explore terrorism from a psychological perspective. They examine types of terrorism; contributing factors related to the development of terrorists and terrorist organizations; counterterrorism agencies and laws; the impact of terrorist events on individuals, families, and communities; prevention, intervention, and postvention with survivors; media coverage of terrorist events; human rights and ethical issues; and future trends related to the psychology of terrorism. Students also examine the threat of terrorism in their own community and evaluate the potential impact. Using concepts presented in the course, they consider applications for preventative measures as well as strategies to promote resiliency among individual and families who may become victims of terrorism.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 6742 - Conflict, Conflict Resolution, and Peace

(5 cr.)
Through this course, students engage in a study of conflict, conflict resolution, and peace from psychological and social psychological perspectives. Students examine the concept of conflict and methods of addressing it, including management, resolution, and
transformation; theories related to conflict resolution; approaches to conflict resolution, including negotiation and third-party interventions; and social psychological factors that influence conflict and conflict resolution. They also consider the influence of culture in conflict and conflict resolution; the role of ethics; intractable and international conflicts; the concept of peace; and how third-party approaches can contribute to the peace process. Students apply conflict resolution approaches to conflicts at all levels, from interpersonal to those involving whole nations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 6748 - Stress and Coping

(5 cr.)
Students in this course examine contemporary theories on the perception of stress, appraisal of stressors, ways of coping, and the psychophysiological mechanisms involved in the stress response. They explore topical issues, including psychoneuroimmunology, behavioral nutrition, psychophysiology, traumatic stress, chronic pain, and stress-related psychophysiological and medical disorders as they relate to stress and coping. Students engage in discussions designed to provide practical application of course content. Demonstrating breadth and depth of knowledge and critical-thinking skills, students explore a topic of interest through a final research proposal and paper on a current issue related to course concepts.
Prerequisites
  - PSYC 6225

FPSY 6771 - Terrorism: A Systemic Approach for Emergency Preparedness

(5 cr.)
Terrorism continues to be a constant threat to the American public, which leads to facilitating the need for accurate information, organized resources, and established approaches to respond to emergencies and keep the public informed. Students in this course examine terrorism and related public policy on a local, national, and international level. They also assess the need and function of systemic approaches for emergency preparedness. Students explore and discuss topical issues, such as terrorism and public health, bioterrorism, biosecurity, cyberterrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Using analytic skills and tools, students assess recommendations that policymakers use in decisions to prevent or respond to terrorism. They also gain hands-on experience initiating the development and/or analysis of a terrorism-preparedness infrastructure.

FPSY 6785 - Prevention: Research and Practice
In this course, students prepare for their roles as counselors in areas of prevention, intervention, and consultation with specific populations in different settings. Students assess these three areas of mental health counseling, including the relationships among them, methodological applications, and related ethical and legal considerations. They also discuss a variety of topics with their peers, such as applications for social change, needs of specific populations, iatrogenic harm, professional approaches and challenges, program evaluation, and future trends. Using an action-research model, students develop a blueprint for a project to address a contemporary mental health issue through the context of prevention, intervention, or consultation.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 6810 - Community Psychology**

(5 cr.)
Through collaborative research and action, community psychologists work to enhance the well-being of individuals and community by understanding how communities function on many different levels. Students in this course explore the fundamental concepts and practice of community psychology. They examine guiding values and assumptions of the field, basic ecological concepts, and models of intervention. Evaluating traditional and topical research, students explore diversity in community psychology, strategies for social change, primary and secondary prevention, community mental health, empowerment, stress, and resiliency. They also have the opportunity to assess and discuss their personal and professional experiences, values, and cultural background and consider how these factors are likely to influence their work as community psychologists.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 6812 - Contemporary Cases and Issues in the Courts**

(5 cr.)
Major issues in the Supreme Court have an impact on public policy at the state and local levels. Students taking this course examine major past and current U.S. Supreme Court decisions and explore how these decisions affect public policy. Topics include individual rights, property rights, administrative law, immigration law, and foreign policy. Students apply legal research and verdicts to case studies and current issues.

**FPSY 6813 - Fundamentals of Law and Public Policy**

(5 cr.)
Legal decisions and the law have an impact on the creation of public policy. Students in this course explore the relationship between laws and public policy and the impact
court decisions have on policy and policy leaders. Topics include legal concepts and terminology, legal jurisdictions, case law, seminal cases, and the Supreme Court's roles and procedures. Students apply fundamental legal concepts and principles to case studies and contemporary problems.

**FPSY 6830 - Current Issues in Homeland Security**

(5 cr.)
Since its inception, the Department of Homeland Security has profoundly impacted public policy and administration. Students in this course examine homeland security history, concepts, policies, and strategies of prevention and response. Topics include ethical issues, telecommunications, technology, threat assessment, contingency planning, and risk management. Students apply fundamental concepts and principles of homeland security to case studies and current issues.

**FPSY 6910 - Legal Issues and Social Change in Forensic Psychology**

(5 cr.)
Students in this course critically examine the effects of recent legislation, case law, and national policies on social change and on consultation and research in forensic psychology. Students will have opportunities to explore and discuss contemporary and controversial issues such as the ethics of civil commitment, the death penalty, police use of force, investigative practices to curtail terrorism, hate crimes, and transfer of juveniles to adult criminal court. They can investigate how related legal issues affect forensic psychology and society in general. They will analyze ethical issues that often arise for forensic psychology professionals who are working in these areas.

**FPSY 6912 - Mental Health Law**

(5 cr.)
Mental health counseling professionals in all areas, especially criminal forensic psychological practice, may encounter various conflicts regarding psychological and legal approaches to treatment. Therefore, it is important for counselors to have a firm understanding of mental health law to avoid conflicts, such as issues of liability and malpractice. Students in this course are provided with the opportunity to examine several different aspects of the law related to mental health issues, including those constituting forensic psychological practice, such as civil matters (personal injury and civil competency issues) and criminal matters (competency to stand trial, criminal responsibility, diminished capacity, and death-penalty issues). Students employ recent court decisions and laws, such as the Tarasoff ruling, mandated reporting, and the Health Insurance Portability and Accountability Act (HIPAA), to examine how mental health law influences the practice of psychology and mental health counseling.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
FPSY 6915 - Field Experience

(5 cr.)
Students engage in a 12-week practical field experience at a site specific to students' degree program and their anticipated employment setting or service population. Students work 60 hours on site, interact with peers, and share their experiences and perspectives. Gaining hands-on, practical experience, they apply concepts and theories learned throughout the program to the responsibilities encountered in their field experience setting.

FPSY 8002 - Foundations of Graduate Study in Psychology

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students build a foundation for academic and professional success as social change agents. They assess the relationship of Walden's mission and vision to professional goals. They establish connections with their peers and the broader Walden community. Students engage in course assignments focused on the practical application of scholarly writing, critical-thinking skills, academic integrity, ethics, and the promotion of professional and academic excellence within the field of psychology.

FPSY 8100 - Critical Issues in Emergency Management

(5 cr.)
Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS.). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

FPSY 8101 - Introduction to Forensic Psychology

(5 cr.)
Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of
forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They learn how forensic psychology links to the criminal justice system as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the field.

**FPSY 8102 - Intersection of Crime, Psychology, and the Law**

(5 cr.)
Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They have the opportunity to learn how forensic psychology links to legal systems as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students can acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the fields.

**FPSY 8115 - Writing a Quality Prospectus in Psychology**

(5 cr.)
This five-credit course is focused specifically on the process of writing the doctoral study prospectus. Students will use their preliminary research plan, developed previously, and develop a problem statement, to be used in the doctoral study. They further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a doctoral study prospectus. The prospectus is a brief paper, typically 15–20 pages in length, that lays out the background for the problem statement, the problem statement itself, a survey of the relevant literature (typically 25–75 references), and a research, implementation, and evaluation plan for the solution of the problem.

**FPSY 8116 - Understanding Forensic Psychology Research**

(5 cr.)
Forensic psychologists, and others in the field, often rely on psychological research for a variety of functions; for example, to extract empirical data about psychological tests or to determine the efficacy of different interrogation techniques. Through this course, students work toward becoming astute consumers of forensic psychology research, acquiring skills needed to understand and interpret data. Students assess the relevance of research as well as the significance of incorporating ethics into practice. They examine basic principles of statistics, such as reliability and validity. Students also learn how to critically read forensic psychology research and how best to apply research
results to forensic situations in clinical, correctional, court, public policy, and police settings.

**FPSY 8126 - Understanding Violence, Risk, and Threat Assessment**

(5 cr.)

Students in this course explore the various assessment techniques and instruments used within the forensic psychology arena. Some of the assessment areas covered include risk assessment, juvenile evaluations, child custody evaluations, and capital punishment, as well as the various psychological instruments that are used in these types of evaluations. Students are provided a solid foundation of the knowledge of forensic psychology techniques and assessment rather than specific skills in administering and interpreting psychological tests.

**FPSY 8135 - Criminal Behavior**

(5 cr.)

Students in this course are provided with contemporary views, theories, and case-study analysis of maladaptive and criminal behavior, victimology, and victim-offender relationships. A broad conceptualization of criminal behavior, such as that woven from biological, sociological, and psychological perspectives, is explored and evaluated. Theories of crime and the application of risk factors associated with criminal behavior are examined. Additionally, students will be exposed to specific offender groups, both violent and nonviolent, including psychopaths, serial and mass murderers, criminal paraphiliacs, arsonists, white-collar thieves, scam artists, domestic terrorists, and others.

**FPSY 8171 - Theories and Frameworks for Adult Learning♦**

(5 cr.)

To understand adult learning, one must ask and answer complex questions: Who is the adult learner? What is the social context of learning? What motivates adult learners? In this course, education professionals explore the theories and frameworks that inform the field of adult learning today. They identify, compare, and contrast foundational and emerging perspectives on adult learning with the aim of transforming theory into practice. They engage in an integrative course project through which they synthesize and apply various theories to real-world situations, including their own development; summarize how the idea of wisdom impacts their experiences as adult learners; interview an adult learner; and assess various perspectives in regard to educating diverse learners.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 8177 - Using Technology to Enhance Adult Learning♦**
Emerging technologies are rapidly altering the field of adult education today. Innovative technologies are removing traditional boundaries to learning and encouraging a global perspective on school, work, and communications. New developments in software, multimedia applications, Internet technologies, and mobile computing are transforming the educational landscape and empowering learners around the world. Educators and students leverage these advances to enhance the learning process and improve outcomes in today’s digital information society.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 8185 - Writing a Quality Prospectus in Psychology

This five-credit course is focused specifically on the process of writing the doctoral study prospectus. Students will use their preliminary research plan, developed previously, and develop a problem statement, to be used in the doctoral study. They further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a doctoral study prospectus. The prospectus is a brief paper, typically 15–20 pages in length, that lays out the background for the problem statement, the problem statement itself, a survey of the relevant literature (typically 25–75 references), and a research, implementation, and evaluation plan for the solution of the problem.

Prerequisites
PhD in Forensic Psychology Students Entering With a BS Degree
- FPSY 8700
- RSCH 8260
- RSCH 8360

PhD in Forensic Psychology Students Entering With an MS Degree
- FPSY 8700
- RSCH 8260
- RSCH 8360
- FPSY 8412

FPSY 8200 - Risk Assessment, Preparedness, and Hazard Mitigation

Risk assessment and mitigation are key components to effective emergency management and all-hazard planning and response. Students in this course focus on the methods and techniques required to assess an organization or government’s risk associated with the protection of human life and capital assets. They study ways to evaluate the social vulnerabilities to disaster and the special needs of at-risk populations, and they explore...
methods to reduce vulnerabilities and build capacity through structural and nonstructural mitigation. Additionally, students complete the FEMA Emergency Management Institute course IS-393.a: Introduction to Hazard Mitigation as part of this course.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 8201 - Psychological Aspects of Violent Crime**

(5 cr.)
Through this course, students explore the nature and extent of the psychological nexus of criminal homicide across various environments to include serial, mass, spree, workplace violence homicide, school shooter homicide, and child abduction homicide. Students will examine the theories and trends of these types of violent crime regarding offender and victim psychological and behavioral characteristics.

**FPSY 8202 - Criminal Investigative Analysis and Profiling**

(5 cr.)
Law enforcement officials characterize serial murder among one of the most abhorrent of all criminal behaviors. In this course, students examine the interest in serial and mass murder in popular culture and explore typologies and theories of criminal behavior. They assess and discuss the history and evolution of profiling; roles, goals, and responsibilities of profilers; the use of profiling in criminal investigations; and populations victimized by serial and mass murderers. Students also apply typologies and criminal theories to real-world case scenarios. This course is designed to provide an overview of theory and research in the core areas of forensic psychology, as it pertains to the interdisciplinary behavioral science that provides psychological profiling and assessments of political leaders and individuals in a variety of situations.

**FPSY 8203 - Victimology**

(5 cr.)
What is the relationship between victims and those who commit crimes against them, and how does the criminal justice system protect and respond to victims of crime? In this course, students have the opportunity to answer such questions through a comprehensive assessment of victimology, a relatively new discipline in the field of criminal justice. Students examine victim patterns and tendencies and learn how victims interact with the police and the legal system. They also examine how factors of class, race, and sexual orientation affect the perception of the victim by different constituents, including the public, the court system, and the media. Students assess and discuss the concept of primary and secondary victims and gain practical insight on a range of services and resources available to all types of victims.
FPSY 8204 - Sex Offender Behavior and Treatment

(5 cr.)
This course is designed to provide an oversight of sex-offending behavior. Legal issues raised in both criminal and civil cases that involve sex offenses will be discussed. Psychological interventions have been determined to have empirical evidence in helping to reduce sex-offending behavior. Students will be expected to learn about the sex-offender assessment tools used by psychologists to conduct legal and psychological research.

FPSY 8205 - Psychological Aspect of Cyber Crimes

(5 cr.)
In this course, students review the psychobehavioral factors of criminals who engage in criminal activities using digital social media and other online resources. Students analyze the types and trends of both domestic and global cyber crime. In addition, students will examine characteristics of cyber perpetrators and cyber victims. Students are also provided a foundational understanding of the origins and consequences of human trafficking; sexual exploitation of children from psychological, social, and legal perspectives; and how technology facilitates these types of crimes. Lastly, the students in this course examine the best practices in preventing and responding to cyber crimes.

FPSY 8206 - Family Violence

(5 cr.)
In this course, students review the victims and the perpetrators of crimes involving intimate partner violence, child maltreatment and abuse, and elder abuse. Students address the growing literature related to the psychological damage caused by these traumatic events, including the role of mental illness and how it impacts issues involving the criminal, civil, family, and juvenile law areas.

FPSY 8214 - Consulting for Organizational Change

(5 cr.)
Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.
FPSY 8215 - Controversies in Criminal Justice

(5 cr.)
Justice is at the heart of the U.S. democratic system, yet opposing viewpoints surrounding and within the system often muddle interpretations of the law and the development of policies to promote and enforce justice. In this course, students examine events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act, for example, the terrorist acts of September 11, 2001. They learn how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties. Through discussion with peers, assessment of contemporary articles, and examination of Supreme Course cases, students have the opportunity to reflect on and potentially broaden their own opinions and perspectives on current criminal justice affairs in regard to issues of law enforcement, public perception, policy development, and ethics.

FPSY 8217 - Technological Solutions and 21st-Century Crime♦

(5 cr.)
In consideration of modern technological innovation and the spread of knowledge through digital means, the relationship between technology and criminal activity is increasing. In this course, students explore this relationship and gain a comprehensive view of cyber crime, including current trends. They learn how law enforcement agencies use technology to track and apprehend criminals. Through real-world scenarios, students examine legal responses to cyber crime and learn different approaches and techniques for solving cyber crimes and handling related challenges. Students also have the opportunity to gain a comprehensive understanding of building cases and prosecuting crimes through practical exercises in identification, data mining, and the protection and gathering of evidence.

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 8245 - Family Violence

(5 cr.)
In this course, students review the victims and the perpetrators of crimes involving intimate partner violence, child maltreatment and abuse, and elder abuse. Students address the growing literature related to the psychological damage caused by these traumatic events, including the role of mental illness and how it impacts issues involving the criminal, civil, family, and juvenile law areas.

FPSY 8247 - Social Psychology♦
Factors of cognitions and social behavior are at the root of nearly all experiences pertaining to individuals in society. In this course, students use the lens of social psychology to examine perceptions, attitudes, relationships and attraction, motivation to help others, prejudice and aggression, conformity and obedience, group behavior, and the influence of culture. Students apply knowledge and skills gained in the course to a final project in which they develop a plan for using social psychology research to address a significant social problem. Moreover, students consider ways to extend lessons learned to their personal and professional lives to effect positive social change as scholar-practitioners.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist 1-866-492-5336 (U.S.); 1-443-627-7222 (toll) for more information.

FPSY 8252 - Themes and Theories of Psychology

In this course, students are introduced to theories, research, and themes that form the tenets of psychology. Basic theoretical models will be reviewed, including psychodynamic, cognitive, developmental, social learning/socio-cognitive, behaviorist, learning and motivation, systems, biopsychosocial, and gender theories. Theories encompassing diverse populations, including cross-cultural and feminist theories, will also be examined. Students will critically examine the strengths and limitations of these theories and their utility in the field of psychology. Contemporary themes in psychology will be explored, with an emphasis on application of theories designed to effect positive social change.

FPSY 8300 - Disaster Response and Recovery

A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issue, including evacuation, relocation, and tactical and strategic decisions in the immediate aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework (NRF), and they can gain an understanding of how local, state, and federal policies mesh in response and recovery efforts. Through their exploration, they study how recovery begins once the immediate threat of the emergency wanes and the focus shifts to restoring disaster-affected areas. As part of this course, students complete the FEMA Emergency Management Institute course IS208.a: State Disaster Management.

FPSY 8310 - Research Design

In this course, students have the opportunity to build a foundation in the design of
qualitative, quantitative, and mixed-method approaches to psychological research. Students learn the strengths and limitations of each method and under what circumstances each approach would be the most appropriate research design. They also learn the importance of scholarly writing as well as how to identify a topic for research and how to conduct a literature search. Students gain hands-on practice developing a research proposal through which they address key elements, such as collecting and analyzing data, writing an introduction, stating a purpose for the study, identifying research questions and hypotheses, using theory, and defining the significance of the study. Additionally, students consider the legal and ethical issues associated with human subjects’ protection.

Prerequisites
• FPSY 6305

Note: To register for this course, please contact the Student Success Advising Team.

FPsy 8314 - Program Evaluation

(5 cr.)
The skills required to assess research and work effectively with stakeholders are among the many proficiencies required of professionals who evaluate and develop programs. In this course, students examine these skill sets as well as the history, theory, and major approaches underlying program evaluation. Students learn how to select appropriate quantitative and/or qualitative models and techniques to perform evaluations, demonstrate program effectiveness, and disseminate results. Additionally, students explore the procedures and techniques involved in offering their evaluation services to a specific group or organization. They also examine strategies to gain stakeholder interest in developing appropriate standards, research progress, and evaluation outcomes. Students acquire practical experience evaluating a program of interest through which they outline organizational structure, identify stakeholders, employ evaluation models, explain steps in planning, and predict possible challenges or stakeholder fears, for which they recommend solutions.

Prerequisites
• RSCH 8210

FPsy 8320 - Public Policy Implications of Terrorism Legislation and Policies+ (5 cr.)

Students in this course are provided with a broad perspective on the history of the U.S. Patriot Act, similar terroristic legislation and immigration laws, and their policy implications on law enforcement, governmental entities, organizations, and individuals. They receive a basic foundation upon which to build for those public administrators and public policy analysts who are charged with drafting and implementing public policy and enforcing and/or responding to potential terroristic threats, while simultaneously
upholding and protecting constitutional freedoms. Material for this course is drawn from contemporary texts, websites, case studies, and material representing international, national, and local governments and organizations. Students critically review and analyze the U.S. Patriot Act and similar terroristic legislation and policies, and they participate in online discussions about these laws and their implications on U.S. constitutional freedoms.

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 8321 - Terrorism: A Systemic Approach for Emergency Management❖

(5 cr.)
Students in this course are provided with an overview of terrorism—local, national, and international—and the need to develop a systemic approach for emergency preparedness. Topics include, but are not limited to, terrorism overview, terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Course participants begin the development and/or analysis of a terrorism preparedness infrastructure and participate in online discussions.

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 8322 - Critical Incident Planning and Leadership❖

(5 cr.)
Students in this course examine the principles of emergency planning, selection of leaders, specialized planning (e.g., schools, tourism), mutual aid, and leadership theories. Public administrators receive a basic foundation to develop a critical incident plan and also understand leadership theories. Course participants critically analyze case studies, identifying weaknesses and potential solutions.

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 8333 - Vicarious Trauma and Compassion Fatigue

(5 cr.)
Through this course, students gain an understanding and awareness of vicarious trauma and compassion fatigue for trauma-response-helping professionals. They examine intervention strategies and models of treatment and prevention of vicarious trauma and compassion fatigue through the lens of counselor educators, supervisors, and clinicians. Applying course concepts, students gain hands-on practice conducting a needs assessment and examining the use of standardized instruments. They also propose social change recommendations related to vicarious trauma and compassion fatigue to
promote informed and competent trauma-response-helping professionals. Students engage in course assignments that emphasize the ethical, legal, multicultural, and spiritual implications for wellness and self-care, including personal, professional, and organizational elements. As a final project, students interview a trauma-response-helping professional and develop an organizational wellness plan for their setting.

**FPSY 8391 - Transformative Change in a Shared Power World**

(5 cr.)
Students in this course engage in collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students learn a pragmatic-action learning process for learning from the experience of transformative change in complex systems. The dynamics of complex adaptive systems are studied to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Appreciative inquiry and other selected methods of transformative change are studied and applied to a positive organizational change situation of special interest to the students. Students also develop professional-action habits for pragmatic-action learning in the practice of public administration.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**FPSY 8392 - The Language of Leadership**

(5 cr.)
In today’s complex environment, leaders engaged in shaping public policy must know how to use the emotional as well as the intellectual power of language to motivate, inspire, and competently manage their organizations. Dynamic leadership requires understanding and use of techniques that affect both conscious and unconscious influences on human behavior. Effective communication connects at many different levels. Students gain both theoretical and practical information demonstrating the necessary components for making such connections and showing why stories, symbols, and metaphors are essential elements in the language of leadership.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**FPSY 8400 - Advanced Issues in Forensic Psychology**

(5 cr.)
In this course, students are allowed to examine current trends and issues in forensic psychology through the lens of developing their own expertise and forming a consultative group with fellow doctoral students. Students develop skills and expertise necessary as forensic consultants and expert witnesses and in criminal investigative
Students in this seminar-style course, students apply problem-based learning to cases and scenarios such as juvenile delinquency, terrorism, and human trafficking. They address the ethical challenges faced by forensic psychologist professionals and analyze the role of restorative justice for positive social change.

Prerequisites

PhD in Forensic Psychology Students Entering With a BS Degree

- FPSY 8002
- FPSY 8720
- FPSY 8135
- FPSY 8116
- FPSY 8126
- FPSY 8762
- FPSY 8314
- RSCH 8260
- RSCH 8360
- FPSY 8700

PhD in Forensic Psychology Students Entering With an MS Degree

- FPSY 8002

- FPSY 8700

**FPSY 8401 - Strategic Context of Management and Leadership**

(5 cr.)

Students in this course engage in a collaborative study of the changing strategic context of criminal justice management and leadership. Students will understand the strategic context for stakeholder relations needed while resolving issues in criminal justice. They engage in readings and practical assignments that emphasize management and leadership in a time of unprecedented and unpredictable change. Students also work toward being able to apply data and statistics to engage communities and to design program evaluations.

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 8412 - Research Foundations**
Students in this course examine and receive support for student readiness regarding the use of quantitative and qualitative research approaches. They study research fundamentals, including the distinction between social problems and research problems, the functions of research problems versus research purpose statements, and the role of theory and conceptual framework in informing research. Students examine quantitative and qualitative concepts central to research methods, design, and analysis. They also study how research design, methods, and analyses properly align for both quantitative and qualitative approaches. Students demonstrate their knowledge by creating two research outlines, using quantitative and qualitative approaches, which they develop throughout the course. They determine appropriate conditions for the use of mixed-methods approaches and differentiate between types of mixed-methods research designs. Students engage in pre- and post-assessments of skills and knowledge.

FPSY 8480 - Psychology of Organizations

Students in this course examine the application of behavioral theories in organizational settings. The focus is on individual, group, and organizational behavior. Topics include individual differences in employee motivation and job satisfaction, group development, team building, organizational leadership and organizational design, culture, and development. Students acquire a broad knowledge base in organizational psychology, its research, and its applications.

FPSY 8511 - Treatment of Forensic Populations

In this course, students gain the foundational knowledge necessary to evaluate and subsequently treat many different forensic populations, such as sex offenders, substance abusers, and white-collar criminals. Students analyze the use of traditional forms of intervention, including individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice. Applying concepts and theories learned in the course, students develop a project scenario in which they feature an offender and describe treatment approaches as well as related ethical, legal, and multicultural factors that may impact treatment. Reflecting on the course, students also consider and discuss professional identity and goals.

FPSY 8512 - Juvenile Justice, Delinquency, and Development

In this course, students focus on the various aspects of the juvenile justice system and the population that it serves. As such, the course provides students with an overview of development theories, such as biological, cognitive, social-emotional, and social. Students apply these theories to cases of juvenile delinquency to determine appropriate
prevention, treatment, and intervention strategies. They examine juvenile justice codes, case law, and effective methods for reporting offenses. Students also explore the changing landscape of the juvenile justice field based on current research of its population. Using theories presented in the course, students develop a delinquency-prevention or treatment program for their community, focusing on the underlying goal of social justice and change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 8520 - Psychology in the Courts**

(5 cr.)
Forensic psychology professionals play a vital role in the court system, providing consultation, expert testimony, and recommendations for treatment. In this course, students have the opportunity to acquire the knowledge and skills used by forensic psychology professionals working in the courts. Students examine major roles of psychology professionals, their responsibilities, and required proficiencies, such as oral and written communication skills. Through application-based exercises, students engage in practical exercises, such as in writing reports, planning evaluations, and preparing witnesses for testimony. Students also consider contemporary challenges, ethical and legal issues, and the impact of technology on courts in the United States.

**FPSY 8521 - Police Psychology**

(5 cr.)
Students in this course learn about the various roles and responsibilities of forensic psychology professionals working with and in police departments, the structures and organizations in which they work, and the skills needed to perform daily functions, such as counseling and supporting police. Students analyze and discuss common issues and challenges, including crisis situations, psychological risks of police work, and stress management. They also explore less common roles of psychology professionals working with police, such as training in hostage negotiations and the selection of special officers (SWAT, snipers, and tactical commanders). Engaging in assignments designed to provide application of content, students gain practical insight on a variety of topics, such as diversity issues and training, community impact, and forensic psychology operations.

**FPSY 8522 - Psychology in the Legal System**

(5 cr.)
Students in this course cover the major roles that a forensic psychologist could have within the court system. Issues such as expert testimony, jury selection, eyewitness testimony, and consultation with attorneys will be covered. Additionally, practical skills such as documentation and report writing will be addressed.
FPSY 8530 - Forensic Applications in Community Settings

(5 cr.)
Professionals must devote considerable attention to forensic psychology perspectives and approaches to address issues such as the overpopulation of prisons; decrease in healthcare availability; and cases in which courts remand treatment in community settings. Students in this course examine forensic psychology theories and perspectives, and then they apply these concepts to various community settings. They engage in practical assignments and topical readings that focus on working with offenders upon re-entry to the community and offenders who receive nonincarceration community placements. In addition, students explore less-common applications, such as restorative justice and community crime prevention. They also analyze the impact of personal perspectives and setting on the application of forensic psychology.

FPSY 8540 - Management and Leadership in a Global Context

(5 cr.)
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships between strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: thinking, acting, and leading strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 8541 - Sustainable Development for Global Communities

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment,
stakeholder involvement, and development planning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 8542 - Transformative Change in a Global Environment**

(5 cr.)
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**FPSY 8700 - Dissertation Literature Review Lab**

(2 cr.)
The purpose of this course is to help students prepare to write a well-structured, soundly presented, critical literature review. Students in the course cover topic selection, research analysis, writing, and editing. Upon completing the course, students produce an annotated bibliography and outline of a literature review using a minimum of 10 self-selected research articles. This course is appropriate for doctoral students who are preparing for their dissertation research.

**FPSY 8701 - Literature Review Lab**

(2 cr.)
The purpose of this course is to help students prepare to write a well-structured, soundly presented, critical literature review. Students in the course cover topic selection, research analysis, writing, and editing. Upon completing the course, students produce an annotated bibliography and outline of a literature review using a minimum of 10 self-selected research articles. This course is appropriate for doctoral students who are preparing for their dissertation research.

**FPSY 8720 - Abnormal Behavior**

(5 cr.)
Understanding the characteristics and causes of atypical thoughts and actions—
commonly known in mental health professions as abnormal behavior—is essential in determining accurate diagnoses, answering forensic referral questions, and planning effective treatment programs. In this course, students examine the history and evolution of abnormal psychology and how practitioners use contemporary diagnostic criteria of abnormal behavior in various settings, such as schools, rehabilitation facilities, community agencies, and forensic situations. They examine specific techniques for the diagnosis, assessment, and/or treatment of cognitive, emotional, and developmental disorders, as well as for psychophysiological and psychosocial problems. Using the scholar-practitioner model, students consider environmental and biological factors contributing to behavioral disorders. Students also investigate and discuss current and future trends, legal and ethical issues, and multicultural factors that complicate diagnosis and clinical assessment.

**FPSY 8740 - Disaster, Crisis, and Trauma**

(5 cr.)
There is no shortage of natural and human-made disasters, such as war, violence, genocide, and terrorist activities. Individuals and communities impacted by such disasters often need assistance from professionals who understand the social, cultural, and psychological complexities of crisis and trauma. Students in this course investigate how these incidents impact the psychology of individuals and groups. They assess traditional and current literature and complete practical exercises to learn about theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with trauma. Considering the various ways crisis professionals can promote positive social change, students devote special attention to the importance and development of culturally appropriate, service-delivery programs and interventions for individuals affected and traumatized by disasters.

**FPSY 8748 - Stress and Coping**

(5 cr.)
Students in this course examine contemporary theories on the perception of stress, appraisal of stressors, ways of coping, and the psychophysiological mechanisms involved in the stress response. They explore topical issues, including psychoneuroimmunology, behavioral nutrition, psychophysiology, traumatic stress, chronic pain, and stress-related psychophysiological and medical disorders as they relate to stress and coping. Students engage in discussions designed to provide practical application of course content. Demonstrating breadth and depth of knowledge and critical-thinking skills, students explore a topic of interest through a final research proposal and paper on a current issue related to course concepts.

**FPSY 8755 - Leadership and Leader Development**
Forensic psychologists and others in the field often rely on psychological research for a variety of functions; for example, to extract empirical data about psychological tests or to determine the efficacy of different interrogation techniques. Through this course, students work toward becoming astute consumers of forensic psychology research, acquiring skills needed to understand and interpret data. Students assess the relevance of research as well as the significance of incorporating ethics into practice. They examine basic principles of statistics, such as reliability and validity. Students also learn how to critically read forensic psychology research and how best to apply research findings.

FPSY 8762 - Teaching of Psychology

Students in this course examine techniques and issues related to teaching psychology at the college and/or university level. The primary focus is on teaching skills, developing rapport with students, managing the course, and managing the classroom. Classroom communication and ethical issues relevant to both faculty and students are also covered.

FPSY 8764 - Instructional Design for Online Course Development♦

Students in this course explore instructional design for the development of online courses. Different types of online courses and the roles of online instructors are addressed. Students analyze learning theories and approaches for promoting community in online classrooms. Students analyze criteria for developing learning objectives and online instructional strategies in relation to diverse student populations. Issues related to technology, copyright compliance, fair use, and academic integrity are explored. Students analyze assessment and evaluation approaches and explore future trends in online higher education in relation to delivery of instruction and positive social change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

FPSY 8785 - Prevention: Research and Practice♦

In this course, students prepare for their roles as counselors in areas of prevention, intervention, and consultation with specific populations in different settings. Students assess these three areas of mental health counseling, including the relationships among them, methodological applications, and related ethical and legal considerations. They also discuss a variety of topics with their peers, such as applications for social change, needs of specific populations, iatrogenic harm, professional approaches and challenges, program evaluation, and future trends. Using an action-research model, students develop a blueprint for a project to address a contemporary mental health issue through
the context of prevention, intervention, or consultation.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

FPSY 8809 - Fundamentals of Law and Public Policy♦

(5 cr.)
Legal decisions and the law have an impact on the creation of public policy. Students in this course explore the relationship between laws and public policy and the impact court decisions have on policy and policy leaders. Topics include legal concepts and terminology, legal jurisdictions, case law, seminal cases, and the Supreme Court’s roles and procedures. Students apply fundamental legal concepts and principles to case studies and contemporary problems.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

FPSY 8810 - Community Psychology

(5 cr.)
Through collaborative research and action, community psychologists work to enhance the well-being of individuals and community by understanding how communities function on many different levels. Students in this course explore the fundamental concepts and practice of community psychology. They examine guiding values and assumptions of the field, basic ecological concepts, and models of intervention. Evaluating traditional and topical research, students explore diversity in community psychology, strategies for social change, primary and secondary prevention, community mental health, empowerment, stress, and resiliency. They also have the opportunity to assess and discuss their personal and professional experiences, values, and cultural background and consider how these factors are likely to influence their work as community psychologists.

FPSY 8811 - Legal Research for Public Policy♦

(5 cr.)
There is a wealth of vital legal knowledge available to public policy practitioners. In this course, students will be introduced to a number of print and electronic resources available for legal research and will gain an understanding of how the law is used to inform the creation of public policy. Topics include navigating legal libraries, citing cases, and using research to support public policy. Students apply legal research to case studies and contemporary issues.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.
FPSY 8812 - Contemporary Cases and Issues in the Courts

(5 cr.)
Major issues in the Supreme Court have an impact on public policy at the state and local levels. In this course, students examine major past and current U.S. Supreme Court decisions and explore how these decisions affect public policy. Topics include individual rights, property rights, administrative law, immigration law, and foreign policy. Students apply legal research and verdicts to case studies and current issues. Outsourcing of public programs is also examined.

FPSY 8910 - Legal Issues and Social Change in Forensic Psychology

(5 cr.)
Students in this course critically examine the effects of recent legislation, case law, and national policies on social change and on consultation and research in forensic psychology. Students have opportunities to explore and discuss contemporary and controversial issues such as the ethics of civil commitment, the death penalty, police use of force, investigative practices to curtail terrorism, hate crimes, and transfer of juveniles to adult criminal court and how related legal issues affect forensic psychology and society in general. They also analyze ethical issues that often arise for forensic psychology professionals who are working in these areas.

FPSY 8912 - Mental Health Law

(5 cr.)
Mental health counseling professionals in all areas, especially criminal forensic psychological practice, may encounter various conflicts regarding psychological and legal approaches to treatment. Therefore, it is important for counselors to have a firm understanding of mental health law to avoid conflicts, such as issues of liability and malpractice. Students in this course are provided with the opportunity to examine several different aspects of the law related to mental health issues, including those constituting forensic psychological practice, such as civil matters (personal injury and civil competency issues) and criminal matters (competency to stand trial, criminal responsibility, diminished capacity, and death-penalty issues). Students employ recent court decisions and laws, such as the Tarasoff ruling, mandated reporting, and the Health Insurance Portability and Accountability Act (HIPAA), to examine how mental health law influences the practice of psychology and mental health counseling.

FPSY 8915 - Field Experience

(5 cr.)
Students engage in a 12-week practical field experience at a site specific to students' degree program and their anticipated employment setting or service population. Students work a specified amount of time on site, interact with peers, and share their
experiences and perspectives. Gaining hands-on, practical experience, they apply concepts and theories learned throughout the program to the responsibilities encountered in their field experience setting.

**FPSY 9000 - Dissertation**

(5 cr. per term for a minimum of 4 quarters until completion)

Doctoral students in this course are provided with the opportunity to integrate their Program of Study into a research study through which they explore a specific area of interest. Students complete the dissertation with the guidance of a chair and committee members through a learning platform classroom in which weekly participation is required. Students work with their dissertation chair to write the prospectus, complete an approved proposal (the first three chapters of the dissertation), complete an application for Institutional Review Board approval, collect and analyze data, and complete the dissertation. During the final quarter, students prepare the dissertation for final review by the university and conclude with an oral defense of their dissertation. Once students register for FPSY 9000, they are registered each term until successful completion of the dissertation for a minimum of four terms. Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**Prerequisites**

- All prior coursework

**GEOG 1001 - World Regional Geography**

(5 cr.)

This course is designed to introduce students to the geographic method of inquiry used to examine, describe, explain, and analyze the human and physical environments of the major regions of the world. Topics include spatial and geographic perspective, as well as cultural, organizational, and environmental properties of geography. Upon completion, students will be able to identify the human and physical features that give uniqueness and diversity to world regional patterns on Earth’s surface.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)]] for more information.*
GRPL 6100 - Group Lab

(0 cr.)
This is an experiential lab in which students learn by doing (i.e., participate in a small group activity). This lab is provided to students as part of their program requirements set forth by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). To maintain CACREP accreditation, all students must participate in a minimum of 10 hours of small group activity over the course of one academic term (CACREP, 2016, 2.F.6.h.).

HINF 6100 - Introduction to Health Informatics

(3 sem. cr.)
This course is a broad historical, technological, and theoretical framework for the study of health informatics. Students consider the past, present, and future of this rapidly evolving discipline, and they explore the critical issues and challenges within the field as well as potential applications, benefits, and opportunities for improving the management of healthcare through information technology. They explore a variety of related topics, including the development of virtual and interactive healthcare through technology; the interoperability, standardization, safety, and risks associated with the implementation of the electronic health record; the emergence and adoption of new information technologies; and a global perspective of trends and issues in the field. Students investigate the professional roles related to managing health information technology as well as organizations that promote health informatics. They conduct an in-depth investigation on a specific health informatics position to learn the responsibilities, essential skills sets, and professional and educational requirements of the job.

HINF 6115 - U.S. Health System♦

(3 sem. cr.)
The structure and function of the U.S. healthcare delivery system consists of multiple components, including policies, programs, and organizations. Healthcare professionals must understand how these components integrate and affect the access, cost, quality, and safety of health services. In this course, students explore the components of the system, including patients, organizations, healthcare professionals, public and private third-party payers, regulators, reimbursement, and technology as well as the continuum of health services, such as hospital systems and services, including ambulatory care, long-term care, wellness and prevention, and community and public health. Engaging in written-application assignments, students gain a practical understanding of factors and challenges linked to the delivery and management of services, including the U.S. health policy-making process, quality and patient safety initiatives, expenditures and sources of funds, among others.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
HINF 6120 - Contemporary Topics in the U.S. Healthcare Delivery System

(3 sem. cr.)
Students in this course assess the causes and consequences of historical events on health and medical care in the United States. They appraise the impact of barriers related to cost, quality, and access to health and medical care. Students analyze unique and complex aspects of subsystems and differentiate vertical and horizontal integrated healthcare delivery systems. They compare characteristics of healthcare and medical care in the United States with healthcare and medical care systems in other countries. Students also evaluate current and future issues, trends, and forces in healthcare and medical care reform.

HINF 6130 - Information Systems Management

(3 sem. cr.)
An effective healthcare information system is one that provides value by addressing the requirements of an organization and the needs of the individuals who will use the system. Such a system requires knowledgeable, ongoing management at each step within the complex process. Students in this course explore the technical aspects of information systems management, including key issues of systems design and development as well as system support and maintenance. Focusing on the systems development life cycle (SDLC) approach, students analyze and describe necessary steps in the cycle, such as identifying and selecting appropriate systems technology and data standards, creating requirements, evaluating security, and accommodating human factors in design and use. Additionally, students learn terminology, functions, and standards as well as the basics of information architecture and systems infrastructure.

HINF 6145 - Nature, Structure, and Representation of Health Information

(3 sem. cr.)
Consistency in health data standards and appropriate identification and selection of these standards is important for many reasons, including supporting electronic data interchange and enhancing interoperability across information systems. Students in this course explore and discuss these concepts, including the structure of medical and health information through effective knowledge representation as well as the practice of knowledge management and the incorporation of evidence-based best practices. Students examine the diverse vocabularies, terminology, ontology, acronyms, coding, and classification systems employed by information systems users and by those who design and maintain the systems. They also consider related topics, such as data communication, the development and advancement of eHealth technologies, and future federal initiatives to digitalize health data. Students sharpen their critical-thinking and written-communication skills through case scenarios to distinguish among standards, an explication of the most commonly used clinical classification systems, and a multi-stage
scenario focused on improving patient health through standardized representations of health information.

**HINF 6160 - Legal, Regulatory, and Ethical Issues**

(3 sem. cr.)
The nature of healthcare imposes a host of legal, regulatory, and ethical considerations for which providers and organizations must be aware. Students in this course are provided with an overview of these considerations. Students explore state, federal, and international privacy laws and regulations as well as the government agencies and regulatory bodies charged with creating and upholding these laws and regulations, devoting particular consideration to the Health Insurance Portability and Accountability Act (HIPAA) of 1996. Applying course concepts, students complete application-based assignments through which they consider key topics, including privacy, confidentiality, licensing, liability, compliance, accreditation, and professional ethics. Students also examine the impact of information technology on patient safety and the potential opportunities and risks of electronic health record systems.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HINF 6175 - Quality Assessment and Improvement**

(3 sem. cr.)
Healthcare organizations are increasingly concerned about providing high-quality and safe services. Students in this course are introduced to the basis for quality and patient safety, and they receive an overview of healthcare quality, methods of assessing quality, and techniques for improving quality. They can learn key terminology and concepts, including defining quality care; measuring quality in terms of the structure-process-outcomes model; distinguishing between clinical and customer service quality; identifying techniques to avoid adverse clinical events; and exploring customer service quality in terms of defining, measuring, and improving patient satisfaction. Students also explore and discuss the roles of governmental agencies in promoting and reporting quality information regarding hospitals and other health organizations, accrediting bodies, and recent performance initiatives of government and private payers. They apply course concepts to current issues of improving clinical and service quality in healthcare organizations, with special consideration of the 5 Million Lives Campaign—a national effort initiated by the Institute for Healthcare Improvement designed to improve medical care in the United States.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HINF 6190 - Project Management**
Through this course, students work toward gaining the knowledge and skills to implement a health information technology solution through the systems development life cycle (SDLC) using Project Management Institute-defined processes drawn from the Institute's Project Management Body of Knowledge (PMBOK) guide. Within the context of recognized PMBOK-project management standards, students learn to assess organizational need and readiness for a health information system, to engage in strategic and tactical planning for that technology, and to apply critical-path analysis. Students also explore preparation of the request for proposal (RFP) and evaluation of vendor responses as a part of an overall health information technology project management process. Through an integrative, collaborative project, students engage in a hypothetical health information technology project in which they develop a project schedule and charter, apply project management principles and concepts, work through project challenges, and reflect on lessons learned as part of their project closeout.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)]] for more information.

HINF 6205 - Research Methods and Quantitative Analysis♦

Healthcare professionals often rely on research to make informed decisions on critical issues affecting programs, policy, and practice. In this course, students examine the logic underlying scientific research; study design; sampling; identification of variables; methods of data collection and analysis; concepts in measurement, including reliability and validity; program evaluation; and research ethics. They explore numeric methods for data description; the Donabedian model of program evaluation; data modeling and research; data mining; and information system assessment. Through statistics software exercises, students learn basic research methods, strategies, and skills for presentation of research results; they also become familiar with statistical software used to support research. Note: There is a special technology requirement for this course for accessing required interactive tutorials. PC: Students using a PC platform must have a minimum of Windows 2000, Internet Explorer 6.0, and 1GB of RAM. Mac: Students using a Mac platform must have a minimum of an Intel® Mac with OS X version 10.4.11, 1GB of RAM, and Windows 2000. Mac users who do not already have Windows 2000 on their Macs must purchase one or two Mac add-ons from an outside vendor to access the interactive tutorials. For details on which add-ons to purchase and how to purchase them at discount pricing, please contact a member of Walden's Customer Care Team at 1-800-925-3368 or 1-612-925-3368, option 2.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)]] for more information.

HINF 6220 - Leadership, Organizational Behavior, and Change Management♦
The structure of healthcare organizations is complex and unique, and the behaviors within these organizations often have a direct impact on their success. Students in this course examine organizational behavior as well as the roles and responsibilities of management within healthcare organizations through the macro (organization-wide) perspective and micro (individual and team performance) perspective. Students also focus on understanding organizational values, mission, and vision; management and leadership principles to help navigate change; and effective delivery of services in an increasingly global environment. Students also learn and apply theories of organizational design, governance, and alternative organizational structures, and they consider the theory and practice of managing individuals and groups through motivation, communication, teamwork, leadership, organizational change, coalition building, negotiation, and conflict management and resolution. Through group assignments and personal assessments, students work toward developing self-awareness and effective management styles and strategies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HINF 6235 - Healthcare Information Technology, Business, and Finance**

Through this course, students learn key business and financial aspects of developing health information technology solutions, and they analyze the technological impact on patient safety and healthcare liability. They explore functions of analyzing the cost benefit of health information technology, assessing the return on investment (ROI) of implementing an information technology system, engaging in vendor evaluation and negotiations, and facilitating the acquisition of health information technology systems with consideration of global opportunities. Students also engage in assignments designed to provide practical application of course concepts, including financial scenarios through which they perform monetary value calculations. Additionally, students explore human resources management issues; expand on their knowledge of project management, delving deeper into the request for proposal process; and reflect on information technology industry trends that will impact the future of healthcare delivery and access.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HINF 6950 - Practicum**

Through the practicum, students have an opportunity to apply and integrate the knowledge and skills acquired throughout the MS in Health Informatics program of study and further develop key professional competencies. Students engage in a supervised field experience, which they align to their academic and professional goals.
Supervision by an on-site preceptor involved in the planning or conduct of a clinical research study is a critical component of the practicum. The on-site supervisor and the course instructor monitor and evaluate students’ performance throughout the entire practicum experience. Students are required to complete 120 hours of practicum work. They must also participate in an accompanying online seminar course and begin to develop an ePortfolio based on assigned professional development activities.

HINF 6960 - Scholarly Project

(3 sem. cr.)
Students in this course are provided with an opportunity to demonstrate mastery of the principles, concepts, and content addressed throughout the MS in Health Informatics program of study. Students choose from a selection of overarching themes and topical areas reflecting the breadth of subjects covered in the program. Guided by their faculty advisor, students identify a particular area of interest and produce a substantive written paper and presentation in an area of health informatics. Students also engage in group discussions through which they consider their career development plan, share information on their paper topic and process, and exchange feedback on project presentations.

HIST 2005 - World History 1900–1945♦

(5 cr.)
Students in this course are introduced to the history of the modern world from 1900 to 1945. Students explore and discuss major historical events and global conflicts that shaped the development of the world from the Era of Imperialism through the end of World War II. Through assignments designed to provide practical application of course content, students compose short essays on such topics as the essential elements to make a nation thrive, such as political policies and alliances; the impact of culture and technology on society; and the strengths and weaknesses of monumental historical documents. Students in this course learn to use a historical perspective to evaluate global events and key changes that shaped the first half of the 20th century.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HIST 2006 - World History 1945–2000♦

(5 cr.)
Students in this course are introduced to the history of the contemporary world from 1945 to 2000. They explore and discuss major historical events that shaped the development of the world from post-World War II decolonization through the post-Cold War era. Students consider elements introduced in this era, such as scientific advancements, technological innovations, and political policies, and then they write about the elements that they believe are most important in influencing contemporary
Students also learn to use a historical perspective to evaluate global events and key changes that shaped the second half of the 20th century.

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HIST 2050A - History Through the Lens of Social Change

(5 cr.)
Social change defines the values Americans share, how society reflects those values, and increasingly, how those values play out in different cultures around the nation. Since the earliest days of the nation, the history of the United States has been shaped and reshaped by social change movements as Americans have consistently fought for freedom; civil, political, and gender rights; improved standards of living; and other forms of social, political, and economic equality. Students in this course examine the leaders, the activists, and the grassroots organizations that forged these social movements as well as the historical interplay between the movements and federal, state, and local government agencies. Within a U.S. historical context, students examine how social movements have played out at different points in history and explore how lessons drawn from that history can be applied today. Through readings, collaborative discussions, reflective essays, journal entries, authentic assessments, and a final project, students examine the organizational structures, objectives, outcomes, and historical evolution of social change movements in America since the 19th century. Through this historical lens, students are exposed to the tradition of social change that continues to impact lives through recent social movements such as the WTO, the Tea Party, and Black Lives Matter.
Prerequisites
- BIOL 1001A

HIST 2050C - U.S. History Through the Lens of Social Change

(5 cr.)
Social change defines the values Americans share, how society reflects those values, and increasingly, how those values play out in different cultures around the nation. Since the earliest days of the nation, the history of the United States has been shaped and reshaped by social change movements as Americans have consistently fought for freedom; civil, political, and gender rights; improved standards of living; and other forms of social, political, and economic equality. Students in this course examine the leaders, the activists, and the grassroots organizations that forged these social movements as well as the historical interplay between the movements and federal, state, and local government agencies. Within a U.S. historical context, students examine how social movements have played out at different points in history and explore how lessons drawn from that history can be applied today. Through readings, collaborative
discussions, reflective essays, journal entries, authentic assessments, and a final project, students examine the organizational structures, objectives, outcomes, and historical evolution of social change movements in America since the 19th century. Through this historical lens, students are exposed to the tradition of social change that continues to impact lives through recent social movements such as the WTO, the Tea Party, and Black Lives Matter.

★ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 1000 - Concepts of Health Promotion★

(5 cr.)
Initiatives to prevent illness and promote healthy lifestyles are often more effective and cost efficient than efforts to intervene or treat disease, which is why health promotion is an increasingly popular trend in the field of healthcare. In this course, students formulate a definition of health and discuss the many influences that shape our individual and collective perceptions of health. Students consider the health-wellness continuum, including a number of factors, such as behavioral, demographic, psychological, and social forces. They also examine evidence-based methodologies for interventions to promote health and enhance wellness, and they evaluate health information found online to determine credibility and accuracy. Additionally, students reflect on ways to shape their future career in health and to promote positive change.

★ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 1005 - Context of Healthcare Delivery★

(5 cr.)
Students in this course describe the causes and consequences of historical events on health and medical care in the United States. They explain barriers related to cost, quality, and access to health and medical care. Students examine unique and complex aspects of subsystems and classify vertical and horizontal integrated healthcare delivery systems. They compare characteristics of healthcare in the U.S. with healthcare systems in other countries. Students also identify current and future issues, trends, and forces in healthcare reform.

★ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 2110 - Behavioral and Cultural Issues in Healthcare★

(5 cr.)
Many factors influence the health behavior and wellness of individuals and populations. Understanding these factors helps healthcare professionals reduce health disparities and
address healthcare access issues for vulnerable populations. Students in this course examine the cultural and behavioral factors and issues that influence the management and delivery of healthcare services. Students develop a framework for assessing the effect of culture and behavior in a variety of settings and situations. They identify health disparities attributable to diverse cultural and behavioral factors and discuss their implications for healthcare policy. Students also engage in application-based writing assignments to further examine the goals and objectives of addressing health disparities as well as obstacles for confronting vulnerable populations.

Prerequisites

BS in Health Studies
- HLTH 2500

BS in Public Health
- HLTH 2500

All Other Programs
- None

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 2115 - Aging Across the Lifespan♦

(5 cr.)
In this course, students experience an overview of the effects of aging on health and development across the entire human lifespan. Students examine the physical, social, emotional, and cognitive milestones in childhood, adolescence, adulthood, and old age, with a particular emphasis on the significant changes that occur toward the end of life. Students engage in weekly discussions on various scenarios related to socioemotional development, as well as on topics such as attitudes on aging, environmental risk factors, and cognitive development. Demonstrating knowledge and synthesizing course concepts, students critically analyze a specific socioemotional issue and explain how it manifests in the various developmental stages.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 2120 - Health Informatics♦

(5 cr.)
The focus of this course is on the application and use of information technology to support clinical and managerial decision making in healthcare. Emphasis is placed on information technology that supports the delivery of services, including the collection, storage, retrieval, and communication of data; information systems safeguards; ethical and legal issues; and information management to promote patient safety and quality of
Information literacy and basic hardware and software concepts are addressed. Fundamental software applications, including spreadsheets and healthcare databases, are considered.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 2500 - Theories of Health Behavior
(5 cr.)
Students in this course are introduced to established and emerging health behavior, health education, and health promotion theories and models. Students can develop the knowledge and skills necessary to apply various theoretical frameworks and models related to psychosocial, cultural, and environmental factors influencing health behavior and behavior change. Throughout this course, students will focus on the role of theories and models in planning, implementing, and evaluating health interventions in a variety of settings.

HLTH 3100 - Ethical and Legal Issues in Healthcare♦
(5 cr.)
The nature of health services, such as personal evaluations, clinical research, invasive surgeries, and end of life care, facilitates a host of ethical and legal considerations of which professionals must be aware. In this course, students examine the legal and ethical issues that are fundamental to the practice of healthcare and the conduct of health-related research. They explore a historical overview of events and milestones that have shaped the contemporary regulatory landscape. They also investigate and assess issues of privacy and confidentiality, informed consent, licensing, and malpractice, among others. Additionally, students consider ethical, decision-making models for assuring the quality, safety, and appropriateness of healthcare and services. They also apply ethical principles and legal considerations to real-world scenarios.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 3105 - Interprofessional Teamwork in Healthcare♦
(5 cr.)
Students in this course are introduced to a patient-centered interprofessional model for healthcare delivery in which individual practitioners collaborate as members of a team. Students examine the benefits of this interprofessional approach for patients and providers, focusing on how it can lead to improved outcomes. They also explore and discuss professional challenges and institutional barriers, such as delineation of responsibilities, reimbursement, and licensing. Students have the opportunity to gain practical experience with the patient-centered model through the analysis of a patient
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 3105TL - The Interprofessional Healthcare Team [Tempo Learning®-Specific Course]**

(5 cr.)
Students in this course are introduced to a patient-centered interprofessional model for healthcare delivery in which individual practitioners collaborate as members of a team. Students examine the benefits of this interprofessional approach for patients and providers, focusing on how it can lead to improved outcomes. They also explore and discuss professional challenges and institutional barriers, such as delineation of responsibilities, reimbursement, and licensing. Students have the opportunity to gain practical experience with the patient-centered model through the analysis of a patient case study, a hypothetical interprofessional healthcare team, and an appropriate treatment plan. They also consider the benefits of such a model on the future of healthcare.

**Note:** This version of HLTH 3105 is only available as part of specific competency-based Tempo Learning® programs.

**HLTH 3110 - Current Issues in Healthcare Policy and Practice**

(5 cr.)
Many factors, such as access, affordability, insurance, quality, safety, and technology, affect the delivery of healthcare and the development of policies. In this course, students examine the nature of healthcare facilities, major factors influencing the quality of care, and the impact of policy initiatives on all stakeholders, including providers and consumers. They explore the major issues in acute and long-term healthcare policy and practice from the perspective of the patient and the provider. Students devote special attention to the social, institutional, economic, and regulatory contexts in which providers deliver services. Using concepts and issues addressed in the course, students complete a variety of application-based activities, such as a comparison of healthcare facilities in their region and an analysis of the practical role of policy.

**Note:** Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 3115 - Public and Global Health**

(5 cr.)
Through this course, students widen their perspectives of promoting health and
preventing disease as they examine health issues that transcend national borders, class, race, ethnicity, and culture. Students discuss the role of the healthcare provider in preserving and promoting health among diverse populations as well as their role in illness prevention and health promotion, protection, and maintenance of targeted populations. They explore principles of epidemiology and the influencing sociopolitical factors that impact health and well-being of humankind. Students also engage in assignments designed to provide practical application of content on topical issues, such as infant mortality rates in the United States and abroad, infectious or communicable disease, and implications of global climate change on health, among others.

\[\text{Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.}\]

**HLTH 3510 - Health Insurance and Reimbursement**

(5 cr.)

Students in this course will examine the history of third-party reimbursement, the culture of patient expectations for healthcare, and Medicare and Medicaid reimbursement funding and management. Students will consider how healthcare policy, insurance, and reimbursement impact quality and population health.

**HLTH 4000 - Introduction to Healthcare Management**

(5 cr.)

In this course, students examine management concepts and theories designed to influence and improve the performance of healthcare organizations. They identify and examine the external and internal environments of organizations as well as key management functions, roles, and responsibilities. Exploring essential aspects of healthcare management, students engage in a variety of conceptual and practical activities, such as profiling a healthcare manager, assessing the value of leadership in decision making, and comparing strategic plans. Students delve deeper into content through weekly discussions on a variety of topics, such as emotional intelligence, applications of financial management, issues of quality and safety, the purpose of strategic planning, and challenges in human resources.

\[\text{Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.}\]

**HLTH 4050 - Introduction to Disaster and Emergency Management**

(5 cr.)

Natural and human-caused catastrophes, including acts of terrorism, continue to abound in the United States, necessitating professionals who are skilled in building disaster-resilient communities as well as leading response and recovery efforts. This course provides an introduction to the historical development and evolution of disaster and
emergency management. Students address the roles and responsibilities of local, regional, and national agencies as well as interagency coordination and collaboration. Through application-based writing exercises, students examine and apply phases of disaster and emergency management, including planning, preparedness, response, and recovery. They also discuss the public health system’s role in critical events, such as outbreaks of infectious disease, natural disasters, industrial emergencies, and terrorist and bioterrorist attacks.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 4100 - Healthcare Organization Theory and Behavior

(5 cr.)
The individual and group behaviors within healthcare organizations often have a direct impact on organizational success and the ability to deliver quality care. In this course, students examine the theories of behavior of healthcare organizations at the macro (organization-wide) level and micro (individual and team performance) level. Students explore factors that influence an organization’s behavior and performance, including the role of culture, group processes, and interactions. Sharpening analytic skills, students apply theories of motivation to assess a hypothetical situation. They also investigate famous leaders to analyze leadership traits, including the ability to implement and lead others through change.

Prerequisites
• HLTH 4000

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 4105 - Healthcare Finance and Economics

(5 cr.)
An unstable economy and inflating cost of healthcare affects nearly everyone, from individuals to entire hospitals, making sound financial management increasingly important. This course provides students with a foundation for economic evaluation and financial management in delivery of healthcare services, including principles of supply and demand. Students explore the financial, political, and economic aspects of universal healthcare, and they learn the purpose and methods of financial reporting, such as using financial statements and balance sheets. They also examine financial risk and insurance principles and mechanisms for healthcare reimbursement, including Medicare, Medicaid, and other payor programs. Through written applications and other practical exercises, students gain foundational skills in fiscal evaluation and financial management, which they can apply to personal or professional financial decision making.

Prerequisites
- HLTH 4000
- MATH 1030 or ACCT 1003 or STAT 3001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 4110 - Healthcare Quality and Safety♦

(5 cr.)
A lack of quality service in healthcare, including medical errors, unnecessary surgery, and neglect, accounts for preventable deaths and a continual increase in the cost of delivery. Students in this course explore major quality and safety issues within healthcare organizations. They also examine methods of assessing quality and techniques to improve quality as well as opportunities to prevent adverse and never events, devoting special attention to the 5 Million Lives Campaign. Students examine current requirements for reporting indicators of quality and pay-for-performance initiatives to reward quality. They analyze weekly topics and share perspectives through discussions and case studies on critical issues, such as medical error, the patient perspective, quality and safety measurement, and improvement approaches, among others.

Prerequisites
- HLTH 4000

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 4115 - Strategic Planning and Marketing in Healthcare♦

(5 cr.)
Key concepts related to strategic planning, including the relationship of the plan to the organization's mission, values, and vision, are presented in this course. Students examine and apply assessment techniques and methodologies for evaluating the strengths, weaknesses, opportunities, and threats (SWOT analysis) of a healthcare organization. They also explore the relationship between strategic planning, marketing, and organizational performance. Through a review of mixed-media resources and interactive discussions, students assess a variety of topics, such as values, vision, and mission statements; the differences between goals and objectives; and applications of healthcare promotion and social change.

Prerequisites
- HLTH 4000

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
HLTH 4120 - Managing the Healthcare Workforce♦

(5 cr.)
Healthcare organizations are able to provide quality care to patients only when their workforce is productive, satisfied, organized, and well-trained. Organizations rely on the human resource (HR) department to provide employees with support, while focusing on the needs and goals of the organization. Students in this course explore and discuss the role of HR in healthcare organizations as related to the recruitment, retention, and management of the healthcare workforce. They examine workforce development models, employee benefits, and compensation strategies. Students also explore methods used by HR professionals to develop goals and expectations for evaluating employee performance and promoting effective employee relations, and they investigate HR problem-solving strategies, such as conflict resolution, collective bargaining, and arbitration methods. Through application-based activities, students analyze effective development of position descriptions; assess practices of hiring based on organizational fit; gain real-world insight on strategies of successful organizations; and develop plans for attaining long-term professional goals.

Prerequisites
- HLTH 4000

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

HLTH 4121 - Human Resource Management in Healthcare♦

(5 cr.)
Healthcare organizations are able to provide quality care to patients only when their workforce is productive, satisfied, organized, and well-trained. Organizations rely on the human resource (HR) department to provide employees with support, while focusing on the needs and goals of the organization. Students in this course explore and discuss the role of HR in healthcare organizations as related to the recruitment, retention, and management of the healthcare workforce. They examine workforce development models, employee benefits, and compensation strategies. Students also explore methods used by HR professionals to develop goals and expectations for evaluating employee performance and promoting effective employee relations, and they investigate HR problem-solving strategies, such as conflict resolution, collective bargaining, and arbitration methods. Through application-based activities, students analyze effective development of position descriptions; assess practices of hiring based on organizational fit; gain real-world insight on strategies of successful organizations; and develop plans for attaining long-term professional goals.

Prerequisites
- HMNT 1001
- HLTH 4000
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 4200 - Principles of Epidemiology

(5 cr.)
Students in this course focus on the principles governing the study and practice of epidemiology. Consideration is given to the various methods available to health professionals for selecting and measuring factors of interest, describing their distribution, detecting associations, and identifying populations at risk. The features, advantages, and limitations of common epidemiologic research designs are addressed.
Prerequisites
- MATH 1002/1030 or MATH 1040 or STAT 3001

Note: Students who wish to pursue graduate school should consider taking STAT 3001 in addition to MATH 1002.

HLTH 4205 - Introduction to Research Methods and Analysis

(5 cr.)
In this course, students examine the basic components required for the conduct of health-related research and provides students with the analytic tools needed to understand and assess research methods described in the scientific literature. Basic research methods are described, including surveys, observational studies, experimental and quasi-experimental design, use of primary and secondary data, and statistical techniques for analyzing and interpreting data.
Prerequisites
BS in Healthcare Management
- HLTH 4000
All Other Programs
- None

HLTH 4300 - Personal Health and Wellness+

(5 cr.)
This course is an introduction for students to the essential factors that promote or challenge the development of personal health and healthy lifestyles, including nutrition, physical fitness, stress management, mental and emotional health, sexuality and relationships, violence and injury, and substance abuse. Students examine how cultural and socioeconomic factors influence people's perception of their health as well as their health behavior. Students review tools for assessing health and risk and have the opportunity to assess their own health and behavior using a health risk appraisal.
HLTH 4320 - Nutrition Across the Lifespan

(5 cr.)
Human nutritional requirements change over the course of the lifespan. Students in this course examine the fundamentals of nutrition and the variation of nutritional needs at different life stages, including pregnancy, lactation, infancy, childhood, adolescence, adulthood, and old age. Students discuss issues such as obesity and eating disorders as well as the link between diet and disease. Students conduct a personal dietary assessment and analyze the relationship between food choices and health status in their own lives.

HLTH 4340 - Fit and Well: Core Concepts in Exercise Science

(5 cr.)
Physical fitness is an important component of overall health and quality of life. In this course, students focus on the fundamental concepts and principles of physical fitness, including flexibility, cardiovascular health, muscular strength, muscular endurance, and body composition as well as the physiological and psychological processes through which exercise influences health. Students create a personalized fitness program and explore the health advantages of a physically active lifestyle, including the mental, social, and psychological benefits. They also examine the harmful effects of a sedentary lifestyle, particularly with regard to the risk of chronic disease.

HLTH 4360 - Stress Management and Wellness

(5 cr.)
Students in this course learn about a holistic approach to stress management. They address the emotional and physical dimensions of stress as well as scientific foundations and physiological pathways. Students explore the mind-body connection, and they study fundamental principles, theories, and relaxation techniques—including cognitive and physical behavior change interventions—that can help people effectively manage personal stress.

HLTH 4380 - Strategies for Health Communication and Wellness
The principles and theories of health communication and their application to health promotion and behavior change are the foci of this course. Students examine how to design and deliver health messages to various audiences while remaining sensitive to cultural, socioeconomic, and educational factors influencing the audience. Students evaluate important dimensions of intercultural and intracultural communication and study how to make scholarly writing accessible to the general population. They also explore the use of emerging technologies and social media in marketing and communications.

**Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.**

**HLTH 4520 - Healthcare Finance**

(5 cr.) Students engage in the foundations for financial management in delivery of healthcare services. Students in this course can learn about the purpose and methods of financial reporting, such as financial statements, balance sheets, and operational and capital budgets, in addition to financial risk, variances, and an overview of insurance principles. Students also explore the financial, political, and economic aspects of universal healthcare.

Prerequisites
- HLTH 4000
- MATH 1030 or MATH 1040 or STAT 3001

**HLTH 4530 - Healthcare Economics From a Population Health Perspective**

(5 cr.) Students are provided with the foundation for economic evaluation from a population health approach. Students can develop an understanding of healthcare as a market, compare supply-and-demand principles in healthcare versus a typical business, discuss how economic losses or gains impact healthcare policy changes, sectors of the population, physician staffing, nursing staffing, and stability. Students in the course also explore epidemiological, social, global, and future economic impact of healthcare.

Prerequisites
- HLTH 4000
- MATH 1030 or MATH 1040 or STAT 3001

**HLTH 4900 - Capstone**

(5 cr.) This capstone course provides students with the opportunity to synthesize knowledge
and skills acquired throughout their program into a practical, integrative literature review of a selected topic specific to their area of concentration and personal interest. Through this project, students gain experience in refining their résumé, locating and assessing professional literature, and presenting arguments and findings. Students also engage in weekly discussions on networking, professional organizations, and the promotion of positive social change. They also reflect on their learning experience throughout the program and consider how they can use these experiences to enrich future professional endeavors.

Prerequisites
- All prior health core and concentration courses completed. This course must be taken in the student's final quarter.

HLTH 5005 - Perspectives on Health and the Developing Professional

(5 cr.)
Students in this course cover the origins and evolution of the concept of health, including some of the important health problems that face the world today and emerging concerns for the future. This foundational course introduces learners to key events in history as well as some of the health systems and issues that a modern health practitioner may encounter. Strategies for success as a graduate-level scholar and a health practitioner are integrated in a way that provides meaningful context to learners. Students discuss key concepts with peers, and the course culminates with a reflection paper designed to help learners evaluate their professional goals and how to progress as a scholar-practitioner and social change agent. Students explore careers in various public health and health education settings and experience a virtual health department in order to learn about various functions and personnel.

HLTH 5110 - Exploring Health Education in the 21st Century

(5 cr.)
What does it mean to be a health educator in the 21st century? Students in this foundation course explore the field of health education: historical milestones, current issues, and future opportunities and challenges. They examine settings for practice, professional competencies, inter-professional collaborations, credentialing, professional organizations, use of technology, and ethical issues pertaining to health education. Students will also analyze current issues in the field by reviewing scholarly publications and research pertaining to health education practice. Course assignments also include an introduction to commonly used health education theories and models, and students will have the opportunity to develop a philosophy statement for health education practice in the new millennium.

Steady students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
HLTH 5205 - Assessing Community Needs for Health Education

(5 cr.)
It is important for health educators and other health professionals to understand the unique characteristics and health needs of a community in order to provide effective and relevant health education and services. Students in this course will be introduced to the principles and processes of needs assessment and community capacity-building as a first step in the program planning process. Students will learn about individual, small-group, and community-based assessments as well as quantitative and qualitative approaches. Students will directly apply what they are reading and discussing in class to their own communities by conducting a assessment unique to their community. Other topics covered include use of primary and secondary data; selection and development of instrumentation to collect community data; interpretation and analysis of data; and prioritization of health education needs. Community mapping tools and other technology used in the assessment process will also be explored.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 5412 - Health Education and Communication Strategies

(5 cr.)
Effective communication plays a vital role in the diffusion of a health behavior or innovation. Students in this course are introduced as health educators to a wide range of health communication strategies. Assignments will allow students to apply and evaluate the use of health education delivery methods for various populations and practice settings (e.g., community, clinical, worksite, global, schools). Principles and theories of health communication and behavior change will be applied to a variety of health education case studies. Students will also demonstrate how to design and communicate culturally tailored health information to an audience of their choice. They will also explore the use of emerging technologies and social media in delivering and promoting health education.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6005 - Perspectives on Health and the Developing Professional

(5 cr.)
Students in this course cover the origins and evolution of the concept of health, including some of the important health problems that face the world today and emerging concerns for the future. In this foundational course, students are introduced to key events in history as well as some of the health systems and issues that a modern health practitioner may encounter. Strategies for success as graduate-level scholars and health practitioners are integrated in a way that provides meaningful context to learners.
Students discuss key concepts with peers, and the course culminates with a reflection paper designed to help learners evaluate their professional goals and how to progress as scholar-practitioners and social change agents. Students explore careers in various public health and health education settings and experience a virtual health department to learn about various functions and personnel.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 6031 - Public Health Administration and Leadership**

(5 cr.)
Students in this course acquire the foundational understanding of the administrative, managerial, and organizational practices of public health and healthcare delivery systems. Students examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. They engage in a variety of contextual and practical assignments focused on management theories, policy processes, systems thinking, strategic planning and partnerships, quality and performance improvement, leadership, and organizational behavior. Students also consider the impact of global trends on public health practice, policy, and systems.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 6038 - Health Behavior Theory**

(5 cr.)
Students in this course are introduced to concepts necessary for promoting positive health-behavior change by examining the most commonly used theories and models in public health and health education and promotion. Coursework focuses on the identification and application of theories and models for promoting and designing effective health behavior programs and interventions. Students explore individual, interpersonal, and community theories and modules to determine the most appropriate application.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 6051 - Diversity, Human Rights, and Social Justice**

(5 cr.)
Students in this foundational course broadly address race and ethnicity, socioeconomic status and class, culture, religion, gender, sexual orientation, ability and disability, and environment in an effort to better understand social identity. Throughout this course, students benefit from course assignments, discussions, and course materials that address the role of power and privilege and oppression and marginalization on the development
of clients. Students specifically focus on activities that help them recognize systems that support or foster power inequities, oppression, and underutilization of human talent and skills. In addition, students engage in self-awareness activities that foster their understanding of their role in the hierarchy of power and privilege. At the completion of this course, students understand the importance of social workers developing competence in providing evidence-based, contextually and culturally relevant assessments and interventions for individuals, families, groups, and communities.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HLTH 6100 - Critical Issues in Emergency Management**

(5 cr.)

Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HLTH 6110 - Exploring Health Education in the 21st Century**

(5 cr.)

What does it mean to be a health educator in the 21st century? Students in this foundation course explore the field of health education: historical milestones, current issues, and future opportunities and challenges. They examine settings for practice, professional competencies, interprofessional collaborations, credentialing, professional organizations, use of technology, and ethical issues pertaining to health education. Students analyze current issues in the field by reviewing scholarly publications and research pertaining to health education practice. Course assignments include an introduction to commonly used health education theories and models, and students have the opportunity to develop a philosophy statement for health education practice in the new millennium.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program.*
HLTH 6111 - Leadership and Organizational Change♦

(5 cr.)
Successful public sector organizations require high-caliber leaders who are accountable to multiple constituencies. A rapidly accelerating rate of change and blurring of organizational boundaries contribute to the need for leaders who are equipped to meet the challenge. In this course, students explore the theoretical underpinnings of leadership and the important role of the leader in organizational change. By exploring leadership theory, current research, and practice within an area of public administration or nonprofit/nongovernmental organizations, students will demonstrate their understanding leadership in organizations that are increasingly complex in nature. Ethical dimensions, boundary-spanning functions, and how leaders influence positive social change are key factors of this course. Students in this course draw on historical and current events and their personal experiences to examine the demands of leadership.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6112 - Governance and Public Policy♦

(5 cr.)
Democratic principles are the foundation of modern life. Students in the course receive an overview of democratic governance in public administration, public policy, or nonprofit/nongovernmental organizations in modern society. Students examine the theoretical underpinnings of democratic governance and public policy in their chosen area of specialization necessary for doctoral-level research. Students review fundamental theories of governance, research current literature on a specialized topic, and apply best practices within the area of specialization. The emphasis is on the context in which public and nonprofit leaders function and the social institutions that influence public policy and guide administrative decision making.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6200 - Risk Assessment, Preparedness, and Disaster Mitigation♦

(5 cr.)
Risk assessment and mitigation are key components to effective all-hazards emergency management. In this course, students focus on the methods and techniques required to assess a community’s risk and what measures are needed to protect human life and capital assets. Students can learn ways to evaluate the social vulnerability and identify special needs of populations who may be at greater risk during an emergency or disaster. Students then explore methods to reduce risk and build capacity through
preparedness and mitigation techniques. In addition, as part of this course, students complete the FEMA Emergency Management Institute course IS-393.a: Introduction to Hazard Mitigation.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

HLTH 6205 - Assessing Community Needs for Health Education♦

(5 cr.)
It is important for health educators and other health professionals to understand the unique characteristics and health needs of a community in order to provide effective and relevant health education and services. Students in this course are introduced to the principles and processes of needs assessment and community capacity-building as a first step in the program planning process. Students learn about individual, small-group, and community-based assessments as well as quantitative and qualitative approaches. Students directly apply what they are reading and discussing in class to their own communities by conducting a assessment unique to their community. Other topics covered include use of primary and secondary data; selection and development of instrumentation to collect community data; interpretation and analysis of data; and prioritization of health education needs. Community mapping tools and other technology used in the assessment process are also explored. 
Prerequisites
- HLTH 6005
- HLTH 6110

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

HLTH 6207 - Grant Writing♦

(5 cr.)
Grant writing is a highly marketable skill that requires many non-profit, educational and community organizations to secure external funding in order to provide needed services to the community. In this course, students will explore the basic skills needed for grant writing including identifying potential funding sources, creating objectives and a need statement, preparing and justifying a budget, identifying appropriate assessment plans, and writing an executive summary. Course assignments will allow students to directly apply what they are reading and discussing by writing a full grant proposal based on an actual Request for Proposal (RFP).
Prerequisites
- HLTH 6005
- HLTH 6110
- HLTH 6205

Walden University Catalog (March 2022) 1396
HLTH 6038

HLTH 6475

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6245 - Applied Research in Public Health

(5 cr.)
Public health professionals use the results of research in many ways, including in the development of programs and interventions designed to enhance the health of communities as well as to demonstrate the efficacy of programs to stakeholders who provide funding. In this course, students will engage in an examination of the research that informs public health programs, policy, and practice. Specific topics to be covered include study designs, sampling, identification of variables, methods of data collection and analysis, key concepts in measurement (including reliability and validity), program evaluation, and research ethics. As a major assignment in this course, students will engage in an integrative literature review and begin to develop what may become their capstone project.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6246 - Introduction to Research in Health Education and Health Promotion

(5 cr.)
Health education and health promotion practitioners use research skills to develop programs and interventions that enhance the health of communities and demonstrate the efficacy of programs. This course will provide students an opportunity to explore various research methods in the fields of health education and health promotion. Concepts include literature reviews, ethics, quantitative, qualitative, and mixed methods, methodology selection processes, sampling, and writing for publication and presentation. An emphasis in utilizing research methods to impact local, regional, national, and global health education and health promotion issues will be presented. This course will culminate in the development of a research poster presentation suitable for presentation at a professional conference within the fields of health education and health promotion.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6280 - Policy and Politics in American Political Institutions

(5 cr.)
Students in this course are introduced to the crafts of policymaking and policy analysis in
the U.S. democratic system. Students examine the tasks involved in the policy process, including setting agendas, using policy analysis tools, managing the political process, implementing policy, and providing evaluations and feedback. Through this analysis, students work toward developing skills to conduct policy and economic analyses as well as to determine the political feasibility of proposed policies. They learn about regulation as a policy choice. They also work toward enhancing their ability to develop alternatives and to assess strategies proposed to achieve certain policy objectives. Students engage in scholarly-writing assignments and discussions on policy areas of interest, such as communications, immigration, transportation, housing, labor, arts, and environmental policies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6300 - Disaster Response and Recovery♦

(5 cr.)
A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issues, including evacuation, relocation, and tactical and strategic decisions in the immediate aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework (NRF), and they can gain an understanding of how local, state, and federal policies mesh in response and recovery efforts. Through their exploration, they study how recovery begins once the immediate threat of the emergency wanes and the focus shifts to restoring disaster-affected areas. As part of this course, students complete the FEMA Emergency Management Institute course IS208.a: State Disaster Management.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6362 - Sexual Health and Well-Being

(3 cr.)
Students are provided with a framework for understanding human sexuality in the context of couples, marriage, and family counseling in this course. Students explore empirically supported counseling approaches related to sexual functioning, intimacy, gender, and sexual orientation. They use a systemic framework for understanding the role and impact of sexuality on couples, marriages, and families. Students also explore and discuss specific topics related to issues of sexual diversity and gender identity.

Prerequisites
- HLTH 6005
- HLTH 6110
- HLTH 6205
- HLTH 6038
HLTH 6405 - Ethics and Social Justice •

(5 cr.)
Ethics is a foundational element of leadership. Leaders face increasingly complex social and political challenges as they seek to meet the needs of diverse constituents. Students in this course explore ethics and social justice related to economic disparity, power, and privilege. Students use demographic data, current social trends, and themes to understand, analyze, and address ethical and social justice issues that impact service delivery in a global community.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6412 - Health Education and Communication Strategies •

(5 cr.)
Effective communication plays a vital role in the diffusion of a health behavior or innovation. This course is designed to introduce the health educator to a wide range of health communication strategies. Assignments allow students to apply and evaluate the use of health education delivery methods for various populations and practice settings (i.e., community, clinical, workplace, global, schools). Principles and theories of health communication and behavior change are applied to a variety of health education case studies. Students also demonstrate how to design and communicate culturally tailored health information to an audience of their choice. They explore the use of emerging technologies and social media in delivering and promoting health education.

Prerequisites
• HLTH 6005
• HLTH 6110
• HLTH 6205
• HLTH 6038
• HLTH 6475

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6475 - Program Planning, Implementation, and Evaluation •

(5 cr.)
The focus of this course is on the competencies required of the public health professional in planning for the design, development, implementation, and evaluation of community health promotion and disease prevention initiatives. Attention is given to
needs assessment, logic models, and collaboration with stakeholders. Strategic approaches to planning, implementation, and evaluation with particular attention to study design and sampling are addressed. Health behavior theories are considered in the development of health promotion programs, the application of evaluation findings, and prioritization of community concerns and resources.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

HLTH 6510 - Essentials of the U.S. Healthcare Delivery System and Population Health

(5 cr.)
Students in this course will analyze health and the healthcare systems from a population health perspective. Emphasis includes the role of health education and health administration, workforce, public health foundations, and technological developments in improving health from local, national, and global perspectives. Various approaches used historically to improve population health and health equity in the United States will be explored. Current and emerging U.S. health transformation efforts, including steps to reduce cost and improve prevention strategies, and quality of care will be considered. Students will also consider the provider, payment, and public health perspectives in improving health outcomes and explore various perspectives and trends such as international settings and lessons currently being taken from these settings and developments in the use of technology. Investigation and analysis of the coordination among various stakeholders who play a role in prevention, health, and healthcare systems will be addressed.

HLTH 6530 - Disease Prevention and Care Management

(5 cr.)
Students in this course explore evidence-based population health programs and how they assist in addressing and promoting best practices in disease and preventive care management. In this course, students will learn how population health interventions teach individuals and populations how to manage chronic diseases and take responsibility for understanding how to best care for themselves. Students will also explore health administrator and health educator leadership strategies and interventions to manage and prevent chronic disease.

HLTH 6540 - Population Health Management Applications

(5 cr.)
Students in this course will apply the skills needed to manage population health programs and initiatives to enhance the health of a defined population. Students focus on health behaviors, public and business influences, health policy, economic forces, and other related healthcare system issues in health promotion and disease prevention.
HLTH 6740 - Disaster, Crisis, and Trauma

(5 cr.)
Students taking this course define natural and human-made disasters such as war, violence, genocide, and terrorist activities, and they review how they impact the psychology of individuals and groups. Topics include theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with the trauma. Students focus on the importance and development of culturally appropriate service delivery programs and interventions for individuals affected and traumatized by disaster(s).

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6771 - Terrorism: A Systematic Approach for Emergency Preparedness

(5 cr.)
Students in this course are provided with an overview of terrorism—local, national, and international—and the need to develop a systemic approach for emergency preparedness. Topics include terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Students participate in online discussions and begin the development and/or analysis of a terrorism preparedness infrastructure.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6800 - Health Education and Promotion Capstone

(5 cr.)
The capstone course is intended to be taken last in the MS in Health Education and Promotion program. Students have an opportunity to synthesize knowledge and skills acquired throughout the program by completing a capstone project focused on social change. The MS in Health Education and Promotion Capstone project is designed to empower students with the skills necessary to secure external grant funding through grant proposal writing. Students will integrate theoretical and practical knowledge as well as scientific research to prepare a grant proposal for funding a health education program that addresses a pressing health need in their community. Emphasis is placed on grant sources and resources, the grant proposal process, grant management, and sustainability.

Prerequisites
- HLTH 6005
- HLTH 6110
- HLTH 6205
HLTH 6400 - Health Policy and Management

(5 cr.)
Students in this course examine the factors that influence and improve health outcomes of individuals and populations, with attention to the goals of Healthy People 2010 and the main components and issues of organization, financing, and delivery of health services and public health systems in the United States. Topics include management theories and processes, systems thinking, strategic planning and partnerships, quality and performance improvement, leadership, and organizational behavior. The policy process is addressed, as well as the advocacy role of the public health professional in influencing local, state, and federal policy. The impact of global trends on public health practice, policy, and systems is also considered.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 6880 - Social Entrepreneurship and Innovation: A Global Perspective

(5 cr.)
Social entrepreneurs are gaining international attention motivated by the desire for change and to see the world as it can be, not as it is. Students in the course will learn how social entrepreneurs have developed creative solutions to address social problems. The intention of the course is to develop knowledge, appreciate of the role of social entrepreneurs who create social change, deepen students' understanding of the world around them, and to inspire them to use their skills and knowledge to be, as Gandhi said, "the change you wish to see in the world."

Students in this course will gain knowledge about social entrepreneurs and how they are creating solutions to address societal problems, learn how to develop creative solutions to address social problems, and empower students to see social entrepreneurship as a force for social change. The course is designed for those who want to gain valuable tools to prepare them to make an impact on the lives of others. This course will be housed in the School of Public Policy and Administration for future upgrades and course maintenance.

HLTH 6882 - Improving Healthcare Performance Through Social Entrepreneurship
Social entrepreneurship is a dynamic approach to problem solving that individuals, entrepreneurs, or scholar-practitioners can use to address societal needs and problems related to healthcare. In this course, students select a healthcare issue and develop an entrepreneurial project to address it. Students will define beneficiaries and stakeholders and develop tactics to identify and address opponents, allies, and the ambivalent. Students will test, evaluate, and identify both opportunities and potential weaknesses of their proposed entrepreneurial solutions. By the end of the course, students will have experienced the process of developing concept statements supported by research, articulating business propositions, defining the market and competition, and addressing the sociopolitical landscape. Finally, students will evaluate the feasibility of their proposed entrepreneurial healthcare solutions.

HLTH 8003 - Building a Multidisciplinary Approach to Health

(3 cr.)
In this course, students will explore the multidisciplinary nature and integration of professional practice in the health field. Students will have the opportunity to utilize their scholarly voice with diverse audiences and with academic integrity to assure academic and professional success as a scholar-practitioner and social change agent. As leaders in their profession, students will discuss critical health services in the health field utilizing a response to a natural disaster, review of emerging topics in the health field, and what it means to be part of a multidisciplinary team to develop community partnerships with key stakeholders to address health issues impacting their communities, agencies, and/or organizations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8030 - Socioecological Perspectives on Health

(5 cr.)
In this course, students will identify social and ecological approaches to public health at the individual, interpersonal, organizational, community and environmental, and policy levels. Students will explore and apply the socioecological model (SEM) and other theoretical frameworks to address public health issues and to eliminate health disparities in morbidity and mortality. Students will demonstrate an understanding of course concepts through peer discussion and research on specific health issues in special populations, identifying contributing factors, and proposing appropriate interventions.

HLTH 8031 - Public Health Administration and Leadership

(5 cr.)
Students in this course are provided with a foundational understanding of the administrative, managerial, and organizational practices of public health and healthcare
delivery systems. They examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. Students engage in a variety of contextual and practical assignments focused on management theories, policy processes, systems thinking, strategic planning and partnerships, quality and performance improvement, leadership, and organizational behavior. They also consider the impact of global trends on public health practice, policy, and systems.

**Prerequisites**
- RESI 8401

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 8032 - SPSS Revealed**

(5 cr.)
This is a laboratory-type course where students learn the skills needed to use the statistical computer package SPSS in public health practice and research. Topics include importation of data, management of various types of data, creation and exportation of tables and graphs, and computation of basic statistical tests using SPSS.

**HLTH 8033 - Interpretation and Application of Public Health Data**

(5 cr.)
Students in this course learn about biostatistical methods and concepts used in public health practice and research. Emphasis is placed on interpretation and application of concepts rather than statistical calculations. Major topics include identification of types of data, creation and interpretation of narrative and graphical descriptive statistics, conceptualization of statistical inference and probability, and interpretation of common nonparametric tests, analysis of variance, and simple linear regression models. Students are required to use the statistical computer package SPSS.

**HLTH 8034 - Environmental Health: Local to Global**

(5 cr.)
This course provides a comprehensive overview of environmental factors that affect the health and safety of 21st century communities. Students examine associations and interrelationships between chemical, physical, and biological hazards in the environment and their impact on human health. Concepts cover food, water, air, waste, radiation, noise, pests, population growth, and climate change. Students analyze and discuss current local and global problems and solutions and consider new ways to address environmental issues.

**HLTH 8035 - Epidemiology: Decoding the Science of Public Health**
Epidemiology is the science concerned with controlling and preventing disease in communities. Students in this course are provided with an epidemiological approach to the study of the incidence, prevalence, and patterns of disease and injury in populations, and the application of this study to the control of public health problems. Key sources of data for epidemiological purposes are identified, and principles and limitations of public health screening programs are addressed. Students learn to calculate basic epidemiological measures and to draw appropriate inferences from epidemiological data and reports.

Prerequisites

- PUBH 6125

HLTH 8038 - Health Behavior Theory

Students in this course are introduced to concepts necessary for promoting positive health-behavior change by examining the most commonly used theories and models in public health and health education and promotion. Coursework focuses on the identification and application of theories and models for promoting and designing effective health behavior programs and interventions. Students explore individual, interpersonal, and community theories and modules to determine the most appropriate application.

HLTH 8040 - Advanced Public Health Policy and Advocacy

In this course, students examine the role of federal, state, and local government in the assurance of public health through health policy and law. Consideration is given to contemporary policy, law and regulatory issues arising in public health practice, as well as to the economics and financing of public health programs. The advocacy, political, and creative process in the formulation, implementation, and modification of health policy are examined and discussed. Students also learn how to structure and write a health policy brief which will provide students with experience integrating scientific information, legal and regulatory approaches, ethical frameworks and varied stakeholder interests in policy development and analysis.

HLTH 8048 - Research Application of Public Health and Behavior

This course presents a comprehensive look at public health and behavior change theoretical and conceptual models that apply to public health research and practice. Students review and assess predominant social and behavioral principles at the individual, interpersonal, and community levels. Students learn to integrate knowledge
on different public health theoretical and conceptual frameworks, research approaches, methods, values and potential contributions from multiple professions and systems in addressing public health problems. Finally, students learn to apply theories to public health quantitative, qualitative and mixed methods research and practice.

**HLTH 8050 - Global Health and Issues in Disease Prevention**

(5 cr.)
An in-depth review of how population-based strategies are used in the prevention of disease and disability is provided to students in this course. Students explore the topics of population health and disease prevention from the perspective of understanding the determinants of health. Using a cross-disciplinary approach, students examine how economics, social factors, health policy, urbanization, globalization, the environment, and other factors influence disease. Students consider how research in disease prevention, health determinants, and population health apply to public and community health efforts.

**Prerequisites**
- RESI 8401

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 8051 - Contemporary Topics in the U.S. Healthcare Delivery**

(5 cr.)
Students in this course are provided with the opportunity to gain thorough insight into the current structure and components of health services and delivery. Students identify and describe components of the system, including patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods, and technology. They engage in activities and discussions focused on the continuum of services related to healthcare, such as hospitals and hospital systems, ambulatory care, and long-term care. Students also explore issues related to these services, such as wellness, prevention, and community and public health, for a comprehensive understanding of the system. Students contextualize their study through the examination of current factors and challenges as well as the impact these challenges have on delivery and management.

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 8052 - Advanced Issues in Global Public Health**

(5 cr.)
This course provides an in-depth review and analysis of the leading global health problems, and the primary methods used to measure those problems. Students analyze the social and environmental determinants of global health problems, including
urbanization, global industrialization, environmental pollution, and their role in health inequalities within and between populations. In addition, students evaluate population-based approaches to improving global public health, including culturally inclusive and sensitive primary health care, and policies that promote health literacy, health equity and positive social change. Emphasis is placed on strategies to advance inclusion, cultural humility and health equity in public health research, policies and programs. The course takes a cross-disciplinary, ecological approach, enabling students to examine the complex inter-relationships between economic, social and environmental factors, and health.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 8110 - Exploring Health Education in the 21st Century**

(5 cr.)
What does it mean to be a health educator in the 21st century? Students in this foundation course explore the field of health education: historical milestones, current issues, and future opportunities and challenges. They examine settings for practice, professional competencies, interprofessional collaborations, credentialing, professional organizations, use of technology, and ethical issues pertaining to health education. Students also analyze current issues in the field by reviewing scholarly publications and research pertaining to health education practice. Course assignments also include an introduction to commonly used health education theories and models, and students will have the opportunity to develop a philosophy statement for health education practice in the new millennium.

**Prerequisites**
- HLTH 8003

**HLTH 8111 - Leadership and Organizational Change♦**

(5 cr.)
Successful organizations in a rapidly changing and complex world require leaders who embrace change and are able to engage others in change. In this course, students use traditional literature, current articles, and interactive media to explore the qualities, characteristics, and skills of effective leaders as well as the theories, models, and relationships between leadership and organizational change. They assess the ethical issues and standards as well as the opportunities and challenges related to leading diverse organizations through change. Students also examine how current leaders employ leadership and organizational change to contribute to social change, and they consider how to use these lessons to make further positive changes within an organization or their own community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
HLTH 8112 - Governance and Public Policy♦

(5 cr.)
Democratic principles are the foundation of modern life. Students in this course are provided with an overview of democratic governance in public administration, public policy, or nonprofit or nongovernmental organizations in modern society. Students examine the theoretical underpinnings of democratic governance and public policy in their chosen area of specialization necessary for doctoral-level research. Students examine the context in which public and nonprofit leaders function and the social institutions that influence public policy and guide administrative decision making. Students also review fundamental theories of governance, research current literature on a specialized topic, and apply best practices as they relate concepts to complete practical application assignments and a final case scenario project.
♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8127 - Public Health Policy, Politics and Progress♦

(5 cr.)
In this course, students examine the role of federal, state, and local government in the assurance of public health through health policy and law. Consideration is given to contemporary policy, law, and regulatory issues arising in public health practice, as well as to the economics and financing of public health programs. The advocacy, political, and creative process in the formulation, implementation, and modification of health policy are examined and discussed. Students also learn how to write and structure a health policy analysis.
♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8129 - Communications, Marketing, and Public Relations for Public Health Leaders♦

(5 cr.)
This course provides an overview of marketing and public relations principles as they relate to public health, highlighting theoretical concepts that are commonly used in health communications research. Topics include using social marketing techniques, promoting health literacy, developing community partnerships, and creating culturally sensitive and appropriate promotional materials. Students focus on using social media to identify and advance public health interests and ethical principles. Through case studies, students examine how they can use marketing practices to translate health research into social action and behavioral change.
HLTH 8129E - Global Perspectives on Health

(5 cr.)
Students in this course learn about current public health issues and problems affecting individuals and communities around the globe, with particular emphasis on etiology, impact, and possible intervention strategies. Students also learn about organizations that work to support and advance health care locally and internationally. Topics of focus include maternal and child health, food security, hunger and nutrition, global water shortage, HIV/AIDS, malaria, tuberculosis, emerging infectious diseases, selected chronic illnesses and injuries, poverty, human rights, and health equality. Students complete an extensive review of a specific global health issue.

HLTH 8130 - Communications, Marketing, and Public Relations for Public Health Leaders

(5 cr.)
Students in this course receive an overview of marketing and public relations principles as they relate to public health, highlighting theoretical concepts that are commonly used in health communications research. Topics include using social marketing techniques, promoting health literacy, developing community partnerships, community-based participatory engagement and research, and creating culturally sensitive and appropriate promotional materials. Students focus on using social media to identify and advance public health interests and ethical principles. Through case studies, students examine how they can use marketing practices to translate health research into social action and behavioral change.

HLTH 8136 - Leadership, Professionalism, and Ethics in Public Health Practice

(5 cr.)
Critical issues, such as infectious diseases, inadequate healthcare access, and an aging population, require leaders who have a diverse skill set as well as the professional and ethical sensibilities needed to lead efforts that improve quality of life for individuals and communities. In this course, students examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. They explore ethical choices, values, professionalism, opportunities for advocacy, and the application of principles of social justice implicit in public health decisions and practice. Students learn how to employ collaborative methods for working with and motivating diverse communities and constituencies, and they consider methods and develop new strategies for evaluating and solving current problems in healthcare.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
HLTH 8142 - Communication and Social Marketing Strategies for Public Health Leaders♦

(5 cr.)
This course provides to students an overview of communication and social marketing strategies as they relate to public health, highlighting theoretical concepts that are commonly used in health communications and research. Topics include using communication theory, social marketing techniques, promoting health literacy, developing community partnerships, and creating culturally sensitive and appropriate promotional materials. Students focus on developing, implementing, and evaluating an abbreviated Public Health Communication Campaign by applying basic social marketing principles, such as the use of social media techniques, to identify and advance public health interests and address public health problems. Through their Public Health Communication Campaign, which is this course’s Scholar Practitioner Project, students examine how they can use marketing and communication practices to translate health research into social action and behavioral change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

HLTH 8150 - The Art of Online Teaching

(5 cr.)
Higher education is undergoing a radical paradigm shift with the rapid growth of online degree, program, and course offerings. Educators are provided with the foundational skills necessary to successfully facilitate learning in an online environment in this course. They have the opportunity to acquire the essential pedagogical competencies to provide targeted instruction and accurately assess student work in a virtual setting. Through the exploration of simulated classroom interactions and creative problem-solving scenarios, educators experience how online learning leverages technology to enhance knowledge and skill development. Upon successful completion of this course, educators can demonstrate professional skills to meet the growing demand for facilitators of online learning and the potential to positively influence a global population of learners.

HLTH 8151 - Understanding the Adult Learner

(5 cr.)
Unique and distinctive skills are required to engage and teach adult learners. Education professionals will explore adult learning and developmental theory and the wide range of research that supports it, including andragogy and transformation, phase and stage developmental theories, and effects of gender and culture on adult learning. Educators will also be provided with the opportunity to reflect on the relationship of course
material with their own experiences as adult learners. Education professionals complete a variety of realistic assignments through which they practice communicating and presenting complex concepts, critique the work of major theorists, apply adult learning and development theories to educational practice, and construct their own positions on adult learning as scholar-practitioners.

HLTH 8152 - eLearning

(5 cr.)
Educators explore the theories, paradigms, trends, and issues in the field of eLearning. Research on eLearning is critiqued and analyzed as an ecosystem, including an examination of K-12, higher education, corporate, and personal learning communities. Current social and geopolitical trends and their impact on eLearning are analyzed. Delivery methods, human presence, and sustainability of eLearning design are investigated. Through this course, educators are provided with design and development experience through the creation of multimedia presentations in an eLearning environment.

HLTH 8153 - Online Teaching Simulation

(5 cr.)
In this simulation course, learners have an opportunity to practice the art of online teaching hands-on and to develop an online instructional presence that encourages positive student outcomes. In this unique practical experience, learners develop and reinforce the skills needed to succeed as an online instructor. Scholar-practitioners hone their online teaching skills by engaging in realistic classroom scenarios with guidance and feedback from experienced online faculty members and in collaboration with their peers. With careful oversight, mentoring, and coaching, learners practice and analyze online facilitation activities, including interacting through discussion boards, assessing student work, and posting announcements.

HLTH 8175 - Health Policy and Management

(5 cr.)
Methods for influencing and improving health outcomes of individuals and populations are at the forefront of health policy and management. With this in mind, the Department of Health and Human Services launched a national, comprehensive plan—Healthy People 2010—designed to promote health and prevent disease. Students in this course expand on these goals to develop a solid foundation for understanding the need for effective health policy and management and the role of the public health professional charged with influencing local, state, and federal policy. Students identify and assess components of organization, financing, and delivery of health services and systems in the United States. They engage in a variety of contextual and practical assignments focused on management theories, policy processes, systems thinking, strategic planning and
partnerships, quality and performance improvement, leadership, and organizational behavior. Students also consider the impact of global trends on public health practice, policy, and systems.

**HLTH 8201 - Principles of Population Health in Healthcare Administration**

(5 cr.)
An increasing need exists for healthcare administrators to address population-wide health issues. Developing evidence-based health programs enables healthcare to be addressed on a preventive basis at the community or service area level. In this course, students utilize clinical datasets and combine this knowledge with public health datasets concerning socioeconomic and behavioral influencers of health. Students analyze these influencers to determine effective, appropriate services, programs, and solutions to benefit the population as a whole. They discover health issues facing special populations, respond to case studies, and create program plans to improve population disease outcomes.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HLTH 8202 - Survey Research Methods**

(5 cr.)
An in-depth study of a range of survey methods administered via in-person interview, self-report, phone interview, and Internet administration is introduced in this course. Topics will include survey design, administration, analysis, and addressing sources of bias. In this course, students will also review theoretical and empirical research on question and questionnaire effects. Students are prepared in the practice of writing questions and designing questionnaires, both in general and in light of existing research.

Prerequisites
- RSCH 8100
- RSCH 8200

**HLTH 8203 - Attitudes/Attitude Change**

(5 cr.)
Students in this course cover classic and contemporary models of attitudes, their functions, and how they are formed and maintained. The connection between attitudes and behavior and how attitudes are changed through the process of persuasion and cognitive dissonance are also examined.

Prerequisites
- HLTH 8247
HLTH 8205 - Assessing Community Needs for Health Education

(5 cr.)
It is important for health educators and other health professionals to understand the unique characteristics and health needs of a community in order to provide effective and relevant health education and services. Students in this course learn about the principles and processes of needs assessment and community capacity-building as a first step in the program planning process. Students learn about individual, small-group, and community-based assessments as well as quantitative and qualitative approaches. Students directly apply what they are reading and discussing in class to their own communities by conducting an assessment unique to their community. Other topics covered include use of primary and secondary data; selection and development of instrumentation to collect community data; interpretation and analysis of data, and prioritization of health education needs. Community mapping tools and other technology used in the assessment process are also explored.

HLTH 8207 - Grant Writing

(5 cr.)
Grant writing is a highly marketable skill that requires many nonprofit, educational, and community organizations to secure external funding in order to provide needed services to the community. In this course, students will explore the basic skills needed for grant writing including identifying potential funding sources, creating objectives and a need statement, preparing and justifying a budget, identifying appropriate assessment plans, and writing an executive summary. Course assignments will allow students to directly apply what they are reading and discussing by writing a full grant proposal based on an actual Request for Proposal (RFP).

Prerequisites
- RESI 8401

HLTH 8215 - Lifespan Development

(5 cr.)
Students in this course are provided with an advanced overview of human development through the lifespan, including prenatal, childhood, adolescent, adult, and late-adult phases. Students examine and apply basic processes and theories to developmental milestones that occur within these phases of development. They explore factors of heredity and environmental elements on human development, and they consider ethical issues, research considerations, and global perspectives as they assess strategies to promote optimal development. Students also engage in coursework and discussions that highlight themes of diversity and social change.
HLTH 8219 - Health Promotion and Educational Interventions in Diverse Populations

(5 cr.)
Through this course, students explore the planning and organization of health promotion programs for underserved, economically disadvantaged, and underrepresented populations. Students learn to design health promotion programs that consider the social, economic, and medical conditions influencing the health status of diverse populations. Throughout the course, students develop a health promotion project for a specific population, based on the intervention mapping process. Through this project, students analyze and integrate principles of social change and empowerment, summarize research that supports the decision-making process, and critique institutional and social systems. Students also have the opportunity to assess and discuss the future of health promotion, considering projections of needs over the next two decades.
Prerequisites
  • Foundational and core curricula

HLTH 8241 - Human Motivation

(5 cr.)
What are the factors that drive human behavior and in what ways can professionals harness this information to help individuals achieve their goals? Through the exploration of historical and contemporary theories and perspectives, students in this course have the opportunity to answer such questions and gain foundational knowledge of the study of human motivation. Students examine the physiological, psychological, learned, social, cognitive, and emotional aspects of motivation. They work toward developing a conceptual understanding of theories associated with motivation, which they apply to personal, professional, and contemporary social issues. Students engage in readings and assignments that incorporate themes of diversity as they relate to human motivation.

HLTH 8242 - Changing Health Behavior: Theory and Practice

(5 cr.)
Students in this course review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. Students cover health-related issues, including dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, they examine the analysis of behavior change within specific populations (young, elderly, cognitively impaired, etc.), and factors that predict or serve as obstacles to lifestyle change and adherence.
Prerequisites
  • HLTH 8745
HLTH 8247 - Social Psychology

(5 cr.)
Students in this course receive an overview of classic and contemporary topics in social psychology with a focus on how social contexts influence and shape individual behavior. Topics covered include research methods in social psychology, the relation of self and culture, person perception, attitudes and their relation to behavior, attribution theory, persuasion, conformity and obedience, interpersonal attraction, prejudice, aggression, group dynamics, intergroup relations, and multiculturalism. The course is presented with a focus on cross-cultural similarities and variations in the impact of context on behavior.
Prerequisites
- HLTH 8745

HLTH 8270 - Health Informatics and Surveillance

(5 cr.)
By addressing current trends and future applications in public health research, students develop advanced competency in health informatics and surveillance in this course. The key issues of data standards and integration, vocabularies and data transmission protocols, health information technology, surveillance systems, and the application of geographical information systems to situation awareness are addressed. Other topics include information architecture, public health records, electronic medical records, electronic health records, health information exchange, and database design, as well as information storage, security, and privacy.

HLTH 8300 - Law, Ethics, and Policy in Healthcare Administration♦

(5 cr.)
The rapidly evolving healthcare system presents the healthcare administrator with complex challenges and risks. Healthcare administrators must possess the skills needed to assess external and internal healthcare policies to influence organizational design and delivery of healthcare services. Students assess and discuss key policy initiatives from the diverse perspectives of policymakers, interest groups, and other stakeholders. Coursework focuses on required knowledge of laws and regulations developed by policymakers that impact the healthcare organizations and students will review key laws that govern patient care delivery, employee relations, contracts, and fraud. Emphasis will be placed on legal and regulatory failure points that administrators must avoid in designing and implementing policies and practices within the healthcare organization. To help frame these concepts, students examine the ethical underpinnings and principles that healthcare organizations and administrators follow in the delivery of services to patients.
♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
HLTH 8317 - Financing Public Health Systems

(5 cr.)
In this course, students will discover the importance in inter-organizational collaboration in the identification and resolution of public health concerns within communities. To this end, students will demonstrate the ability to integrate knowledge, approaches, methods, values and potential contributions from multiple professions and systems in addressing public health problems. Going a step further, the students will propose an inter-professional team approach to improving public health. The importance of ensuring strategic alignment with public health programs and services will be covered. Students will become familiar with sources of grant funding, common grant jargon and acronyms, types of grants, and best practices and red flags in grant writing. Students will apply a systematic approach to grant writing, which will culminate in the drafting of a public health Mock Grant Proposal. The proposal will address human, fiscal, and other resource needs to achieve strategic goals while creating new resources and revenue streams for the grantee.

HLTH 8331 - Crossing Borders: U.S. and International NGO Organizational Cultures and Environments

(5 cr.)
In this course, students study in depth the cultures, structures, and activities of NGOs in select countries and compare their activities, organizational cultures, structures, and working environments with nonprofits in the United States.
Prerequisites
- A course or direct experience in nonprofit management is strongly advised.

HLTH 8361 - Human Sexuality

(5 cr.)
Students are provided with a framework for understanding human sexuality in the context of couples, marriage, and family counseling in this course. Students explore empirically supported counseling approaches related to sexual functioning, intimacy, gender, and sexual orientation. They use a systemic framework for understanding the role and impact of sexuality on couples, marriages, and families. Students also explore and discuss specific topics related to issues of sexual diversity, and gender identity.

HLTH 8362 - Sexual Health and Well-Being

(5 cr.)
Students are provided with a framework for understanding human sexuality in the context of couples, marriage, and family counseling in this course. Students explore empirically supported counseling approaches related to sexual functioning, intimacy, gender, and sexual orientation. They use a systemic framework for understanding the
role and impact of sexuality on couples, marriages, and families. Students also explore and discuss specific topics related to issues of sexual diversity and gender identity.

HLTH 8392 - The Language of Leadership♦

(5 cr.)
In today's complex environment, leaders engaged in shaping public policy must know how to use the emotional as well as the intellectual power of language to motivate, inspire, and competently manage their organizations. In this course, students examine techniques, such as effective communication, used in dynamic leadership that affect conscious and unconscious influences on human behavior. Through discussions, group assignments, and individual projects, students apply theoretical and practical course content to demonstrate the necessary components for making effective human connections. Students also learn why stories, symbols, and metaphors are essential elements in the language of leadership.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8400 - Public Health Leadership and Systems Thinking

(5 cr.)
Students in this course focus on leadership models and theories, the core principles of public health leadership, and the application of systems thinking to public health. Students examine how to create strategies and solutions from a systems and ecological perspective that efficiently utilize public health and healthcare resources. Students discuss descriptive and prescriptive systems, focusing on the application of these processes to current public health issues and challenges at the organizational and community levels.

HLTH 8401 - Healthcare Financial Management and Economics♦

(5 cr.)
In this course, students gain knowledge of economics principles such as cost, quality, and access as they relate to the healthcare world. The principles of healthcare financial management, including accounting and finance, are vitally important to the viability and ongoing operations of a healthcare business. Students have the opportunity to interpret and analyze the financial statements of a business, use and analyze financial ratios, utilize variance analysis, understand and implement operating and capital budgeting, and develop knowledge of the business planning process. Students create portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
HLTH 8402 - Applied Leadership and Multicultural Perspectives in Public Health

(5 cr.)
In this course, students explore various definitions of public health leadership versus public health management. Students apply insights to current and future public health leadership roles, examine the strengths and limitations of the various theories and models of leadership, and consider which most resonates with their personal leadership philosophy. They reflect on the importance of cultural proficiency, apply a multicultural perspective for leadership in public health, consider negotiation and conflict resolution methods and reflect on the value of diversity in research. Students apply a systems thinking approach to public health leadership, and in doing so analyze their own personal leadership characteristics, values, and behaviors, assessing their own attitudes, beliefs, and implicit bias. They explore the importance of ethical decision making for effective public health leadership, engage in professional development planning, and apply public health leadership theory to design a system-level intervention.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8405 - Ethics and Social Justice

(5 cr.)
Ethics is a foundational element of leadership. In this course, students examine the philosophy of ethics as well as responsibility and social justice—basic tenets of public service. Students explore the complex social, political, and related ethical challenges leaders face as they seek to meet the needs of diverse constituents. They examine ethics and social justice related to economic disparity, power, and privilege. Students also assess demographic data and current social trends and themes to understand, analyze, and address ethical and social justice issues that impact service delivery in a global community. Applying concepts presented in the course, students engage in an in-depth assessment of an emerging or persistent ethical or social justice issue, through which they demonstrate their ability to make recommendations for improvement or change.

HLTH 8410 - U.S. Healthcare Delivery System

(5 cr.)
Healthcare delivery is one of the largest industries in the United States. Students are provided with the opportunity to gain thorough insight into the current structure and components of health services and delivery; they are also presented with an abbreviated history addressing the nature of population illness and disease. Students identify and describe components of the system, including patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods, and technology. They engage in activities and discussions focused on the continuum of services related to healthcare, such as hospitals and hospital systems, ambulatory care, and long-term
Students also explore issues related to these services, such as wellness, prevention, and community and public health, for a comprehensive understanding of the system. Students contextualize their study through the examination of current factors and challenges as well as the impact these challenges have on delivery and management.

**HLTH 8412 - Health Education and Communication Strategies**

*(5 cr.)*

Effective communication plays a vital role in the diffusion of a health behavior or innovation. In this course, the health educator is introduced to a wide range of health communication strategies. Assignments will allow students to apply and evaluate the use of health education delivery methods for various populations and practice settings (i.e., community, clinical, worksite, global, schools). Principles and theories of health communication and behavior change will be applied to a variety of health education case studies. Students will also demonstrate how to design and communicate culturally tailored health information to an audience of their choice. They will also explore the use of emerging technologies and social media in delivering and promoting health education.

**Prerequisites**
- HLTH 8003
- HLTH 8110
- HLTH 8205
- RESI 8401

**HLTH 8415 - Organizational Development and Leadership**

*(5 cr.)*

The structure of healthcare organizations is complex and unique, and the behaviors within these organizations often have a direct impact on their success. Students in this course examine organizational behavior as well as the roles and responsibilities of management within healthcare organizations through the macro (organization-wide) perspective and micro (individual and team performance) perspective. Students also focus on understanding organizational values, mission, and vision; management and leadership principles to help navigate change; and effective delivery of services in an increasingly global environment. Students also learn and apply theories of organizational design, governance, and alternative organizational structures, and they consider the theory and practice of managing individuals and groups through motivation, communication, teamwork, leadership, organizational change, coalition building, negotiation, and conflict management and resolution. Through group assignments and personal assessments, students work toward developing self-awareness and effective management styles and strategies.

**HLTH 8420 - Health Economics**
Because of the complexity and uncertainty of the healthcare system, as well as the scope of resources consumed by health and health-related organizations, managers must appreciate the economic implications of decisions regarding allocation of resources. Students in this course examine the application of economic principles to managerial decision making regarding the amount, structure, and distribution of healthcare resources and services. Through discussions and application-based assignments, students build on their knowledge of economic principles as they examine the population’s demand for healthcare; the supply of organizations and practitioners; the role of insurance, moral hazard, and adverse selection; the practice of cost shifting; the structure, competitive nature, and dynamics of markets; differing objectives of for-profit and nonprofit organizations; variation in consumer access to and use of services; roles of uncertainty and information asymmetry; strategies for consumer cost sharing; and challenges that healthcare organizations face in pricing, producing, allocating, and distributing health services. Students also devote special attention to understanding how health services differ in a variety of competitive markets.

HLTH 8425 - Health Policy

The health of individuals as well as access to and delivery of health services in the United States depend on policy makers who make authoritative decisions based on legal standards, carried out at the federal, state, and local levels. Students in this course examine the process for developing and implementing policy at the various levels of the legal system, key stakeholders and interest groups involved in the health policy process, and how U.S. health policy changes over time. They also explore and discuss key health policy initiatives that address health issues in the United States, including Medicare and Medicaid; access to care and the uninsured; disease-specific efforts, such as HIV/AIDS and organ transplantation programs; emerging and re-emerging infectious diseases; terrorism and emergency preparedness; and funding issues associated with health policy. Applying course concepts, students complete practical assignments focused on various topical issues, such as stakeholder influence on the policy-making process, access to insurance and care, and pay-for-performance policies, among others.

HLTH 8430 - Healthcare Financial Management

This course is an introduction to the terminology, theory, concepts, and techniques used in the accounting and finance functions in healthcare organizations. Students gain an understanding of the important role of finance in healthcare organizations, and they learn various techniques to develop, manage, and control finances. Using an applied approach, students also learn how to develop, apply, and interpret various financial tools, including budgets, sources of revenue/reimbursement by payer, income statements, balance sheets, dashboards, statements of cash flow, pro formas, return on
investment analysis, financial ratios, capital budgeting, debt service and borrowing, depreciation, and cost allocation and cost accounting techniques. Additionally, students develop portions of a business/financial plan using these techniques and analyze the viability of their business/financial plan using accepted financial management tools.

HLTH 8431 - Finance and Budgeting for the Public Sector

(5 cr.)
Sound financial practices are crucial to managing scarce funds in both public and nonprofit operations. Students in this course examine finance and budgeting concepts, policies, and practices related to organizations as well as the fiscal climate within which they operate. They assess theories for motivating major fiscal-policy debates, and they explore and discuss auditing practices, tax systems, financial management, budgetary reform, financial technology systems, the use of dashboards for financial reporting, and the impact of globalization on finance and budget. Students read and analyze budgets, financial statements, and reports. They contextualize their learning as they apply knowledge gained from their analysis to develop a new budget and financial plan for either a public or private organization.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8435 - Health Law and Ethics

(5 cr.)
Students in this course are provided with an overview of law, regulation, and court decisions that affect healthcare organizations, as well as ethical underpinnings and principles that healthcare organizations follow in the delivery of services. Students explore and discuss a variety of topics, including key federal and state laws; regulatory oversight and licensing of facilities and practitioners; credentialing requirements and processes; scope of practice for practitioners; admission and discharge processes; privacy and confidentiality of patient information; patient protection, including advanced directives; organizational liability; conflict of interest legislation; antitrust law; contract law governing relationships with employed physicians and other providers; risk management; and organizational governance issues, among others. Using case studies and hypothetical situations, students assess management roles and key ethical principles and challenges underpinning healthcare organizations.
oversight and licensing of facilities and practitioners; credentialing requirements and processes; scope of practice for practitioners; admission and discharge processes; privacy and confidentiality of patient information; patient protection, including advanced directives; organizational liability; conflict of interest legislation; antitrust law; contract law governing relationships with employed physicians and other providers; risk management; and organizational governance issues, among others. Using case studies and hypothetical situations, students assess management roles and key ethical principles and challenges underpinning healthcare organizations.

**HLTH 8440 - Application of Public Health and Behavior Change Theories**

(5 cr.)
Students in this course are presented with a comprehensive look at public health and behavior change theories that apply to community health education. Students review and assess predominant social and behavioral principles at the individual, interpersonal, and community levels. They discuss examples of how others have harnessed social marketing and communication technology to effect positive health behavior change in individuals and communities. Students learn to apply theories to public health research and practice.

**Prerequisites**
- RESI 8401

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HLTH 8450 - Community Health Assessment**

(5 cr.)
Community health assessment and its application to program planning are covered in this course. Students learn to identify and prioritize problems, then assess and utilize community resources to address these problems. Topics include measuring selected determinants of community health status and health services use, classifying community assets, identifying data sources, and applying certain methods to maximize community participation. Students synthesize the results of a community health assessment to create a community diagnosis that serves as the basis for program planning and research design.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HLTH 8451 - Public Policy Analysis**

(5 cr.)
Government officials, research programs, and NGOs are increasingly expected to make better and more transparent use of evidence in producing viable policy options within
highly complex policy environments that are heavily influenced by power and politics. Public policy analysis has been described as the art and craft of speaking truth to power (Wildavsky, 1987) in seeking ways to promote positive social change in these complex environments. Policy analysis within this context requires several distinct skill sets: an understanding of the policy context, technical knowledge and analytical tools to identify and apply evidence ethically and with professional judgment, an appreciation and engagement of the concerns and contributions of diverse stakeholders, and the ability to develop and communicate practical policy advice.

This course is framed around Bardach and Patashnik’s eightfold path, which lays out a series of iterative, not necessarily sequential, steps to follow when analyzing a policy issue and uses design thinking to guide the process. Students examine key concepts of public policy analysis through evidence-based research to locate issues in relation to theory and current trends. This course provides project-based opportunities to practice and gain the skills and knowledge to use evidence to shape policy more effectively.

Prerequisites

- MMPA 6116 or HUMN 8000 or HUMN 6000 or HUMN 8001 or SOCW 8002 or SOCW 8002W or MMHA 6000 or MMHA 6000A or HLTH 8003A or HLTH 8003 or HLTH 8003E or HLTH 8003B or NURS 8003

HLTH 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination•

(5 cr.)
In an increasingly complex world, leaders and managers in public, private, and nonprofit organizations need to be strategic in planning and creating effective, collaborative programs and services. Students in this course explore the role and process of strategic planning, with an emphasis on collaboration, cooperation, and coordination within and among organizations. Students apply these concepts to real-life situations and organizations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8475 - Advanced Program Implementation and Evaluation

(5 cr.)
Students in this this course focus on the competencies required of the public health professional in planning for the design, development, implementation, and evaluation of community health promotion and disease prevention initiatives. Attention is given to needs assessment, logic models, and collaboration with stakeholders. Strategic approaches to planning, implementation, and evaluation with particular attention to study design and sampling are addressed. Health behavior theories are considered in the development of health promotion programs, the application of evaluation findings, and
prioritization of community concerns and resources.

Prerequisites

- RESI 8401

HLTH 8500 - Human Resources Management and Organizational Development and Leadership for Healthcare Administrators

(5 cr.)
Students in this course examine organizational behavior as well as the roles and responsibilities of management and leadership within healthcare organizations through the macro (organization-wide) and micro (individual and team performance) perspectives. Students also focus on understanding organizational values, mission, and vision; management and leadership principles to help manage change; and effective delivery of services in an increasingly global environment. They also learn and apply theories of organizational design, governance, and alternative organizational structures, and they consider the theory and practice of managing individuals and groups through motivation, communication, teamwork, leadership, organizational change, coalition building, negotiation, and conflict management and resolution. Through group assignments and personal assessments, students work toward developing self-awareness and effective management styles and strategies.

<> Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8545 - Advanced Analysis of Community Health Data and Surveillance in Public Health

(5 cr.)
Students in this course cover the application of community health assessment, secondary data analysis, and the use of health informatics and surveillance for program planning. Students learn to identify and prioritize problems, and then assess and utilize community resources to address these problems. Topics include measuring selected determinants of community health status and health services use, classification of community assets, identification of data sources, simple and complex sampling designs, and application of certain methods to maximize community participation. Students will develop an understanding of statistical and epidemiological methodology to utilize secondary data to synthesize the results of a community health assessment and limitations to create a community diagnosis that serves as the basis for program planning and research design.

HLTH 8550 - Writing a Quality Prospectus

(5 cr.)
The focus of this course is on the process of writing the doctoral dissertation premise
and prospectus. The premise will guide students through their committee selection process. The prospectus will guide students through the stages of writing a dissertation—conducting a literature review, developing a problem statement and research questions, and evaluating research designs, methods, and types of analysis. The premise and prospectus that students write for this course will be for a possible dissertation topic. This exercise is the cornerstone of this course and will prepare students for working with their chosen dissertation topic.

**HLTH 8551 - Preparing for Dissertation**

(5 cr.)
The focus of this course is on the process of writing the doctoral dissertation premise and prospectus. The premise will guide students through their committee selection process. The prospectus will guide students through the stages of writing a dissertation—conducting a literature review, developing a problem statement and research questions, and evaluating research designs, methods, and types of analysis. The premise and prospectus that students write for this course will be for a possible dissertation topic. This exercise is the cornerstone of this course and will prepare students for working with their chosen dissertation topic.

**Prerequisites**
- RESI 8402

**HLTH 8573 - Child and Adolescent Health Issues**

(5 cr.)
Students in this course cover diseases and disorders in children and adolescents. Topics include diabetes, anorexia, headaches, epilepsy, burn injuries, cystic fibrosis, asthma, addiction, and adolescent obesity. Health promotion for children and adolescents is discussed, including cardiovascular health, nutrition, and exercise. Also covered are insights into special issues such as posttraumatic stress disorder, daily stress, sexually transmitted diseases, sleep disorders, and ethical and legal issues in pediatric and adolescent health psychology.

**Prerequisites**
- HLTH 8745

**HLTH 8574 - Women's Health Issues**

(5 cr.)
Students in this course cover diseases and disorders in children and adolescents. Topics include diabetes, anorexia, headaches, epilepsy, burn injuries, cystic fibrosis, asthma, addiction, and adolescent obesity. Health promotion for children and adolescents is discussed including cardiovascular health, nutrition, and exercise. Also covered are
insights into special issues such as post-traumatic stress disorder, daily stress, sexually transmitted diseases, sleep disorders, and ethical and legal issues in pediatric and adolescent health psychology.

Prerequisites
- HLTH 8745

HLTH 8701 - Cultural Psychology

(5 cr.)
Culture often has a profound influence on individual beliefs, personality development, and social behavior. Therefore, mental health professionals must have a fundamental understanding of the impact and psychological implications of culture. In this course, students focus on core themes of cross-cultural psychology—specifically, cultures representing different parts of the world and cultural influences on human psychology. Students explore the cultural components, research, and theory of cross-cultural psychology, and they assess the overall impact of culture on the field of psychology around the world. Additionally, they engage in readings and practical assignments to gain a better understanding of human development and the interactions between culture and social behaviors, health, mental health, and mental illnesses.

HLTH 8745 - Health Psychology

(5 cr.)
Health psychologists work toward positive change in healthcare and health behavior through the study of relationships between patients and providers, how individuals and groups adapt to illness, damaging health behaviors, health cognitions, and many other related issues. In this course students explore the field of health psychology with a focus on the biopsychosocial model. They discuss behavioral and biomedical theories as well as the effect of psychological (personality), behavioral (health behaviors and coping), and social factors (stress and physician-patient relationships) on physical health and wellness. Through the examination of current literature and peer discussions, students explore and address issues related to cardiovascular and immune health, including heart disease, stroke, cancer, and HIV/AIDS. They demonstrate their understanding of course material and consider how topics apply to their personal and professional life through the development of taskforce papers, a health brochure, and a final essay.

HLTH 8750 - Trends and Issues in Executive Level Management for Healthcare Administrators

(5 cr.)
Healthcare administrators, more than ever before, are facing challenges and opportunities, given the dynamic nature of the healthcare industry. In this seminar-style course, students address how executive-level managers leading complex health systems
can use strategic planning, risk management, and innovative business practices to take advantage of healthcare trends, as well as the current social and economic forces that guide strategic planning of healthcare systems. Students explore ways to improve Board of Director relationships, address financial challenges, and implement healthcare reform measures. As a result of this course, healthcare leaders are better able to visualize and address the quickly changing landscape of healthcare delivery per the guidelines outlined in the Patient Protection and Affordable Care Act of 2010. Students also have the opportunity to address the cultural issues that are present in the healthcare environment.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8800 - Marketing Management and Business Communication♦

(5 cr.)
Students in this course analyze the four Ps of marketing—product, price, place, and promotion and how they affect the five Ps of healthcare marketing—physicians, patients, payers, public, and politics. The interrelationship of a healthcare organization’s strategic plan, business plan, and marketing plan is analyzed and social marketing will also be an area of focus. Students will practice effective oral and written business communication skills.
Prerequisites
- RESI 8402

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HLTH 8815 - Contemporary/Gerontology/Geriatric Psychology

(5 cr.)
Statistical data indicate that people are living longer and the number of older persons is continually increasing. As the population ages, society must prepare to address their needs. Students in this course are provided with a multidisciplinary approach to the study of aging in contemporary societies. Students examine the biological, psychological, social, and societal contexts of aging. They also explore the historical and cross-cultural perspectives on aging, social theories of aging, managing chronic diseases, cognitive changes associated with aging, mental health issues, sexuality, and social interactions. Through a series of taskforce reports on various topics, such as sexually transmitted diseases, substance abuse, and elder abuse, students apply course concepts and critically examine current issues in gerontology.

HLTH 8825 - Psychology of Gender
Gender has been the focus of many stereotypes developed over time; but how much does the biological sex of an individual actually influence one’s behavior, development, or emotions? Students in this course are introduced to theories and research on gender role expectations and their influence on the psychosocial developmental experience of women, men, and children. Students apply current gender research to understanding achievement, work, relationships, sexuality, violence, and physical health and illness. They also engage in readings and assignments that emphasize the responses of women and men to life stresses, women as clients in psychotherapy, and the increasing role of gender research in the mental health professions.

**HLTH 8830 - Psychology of Sexuality**

In this course, students explore sexuality through a variety of frameworks, including historical, psychological, sociological, anthropological, biological, public health, and media and cultural studies. Using a variety of theoretical perspectives, including essentialist and constructivist notions of sex, sexuality, and sexual identity, students examine traditional understandings of sexuality, including male and female sexual anatomy, physiology, and response; variations across the lifespan; sexual communication; love and interpersonal attraction; and sexual disorders. They also explore and discuss different expressions of sexual identity, including heterosexuality, homosexuality, and bisexuality as well as different expressions of gender identity from cross-cultural and interdisciplinary viewpoints. Students complete an integrative final paper incorporating research, ideas, and peer feedback from discussions on a topic related to the psychology of sexuality.

**HLTH 8840 - Health Policy and Management**

In this course, students examine the factors that influence and improve health outcomes of individuals and populations, with attention to the goals of Healthy People 2010 and the main components and issues of organization, financing, and delivery of health services and public health systems in the United States. Topics include management theories and processes, systems thinking, strategic planning and partnerships, quality and performance improvement, leadership, and organizational behavior. The policy process is addressed, as well as the advocacy role of the public health professional in influencing local, state, and federal policy. The impact of global trends on public health practice, policy, and systems is also considered.

**HLTH 9001 - Health Services Dissertation**

In this course, doctoral students have the opportunity to integrate their program of study into an in-depth exploration within an interest area through the completion of a
research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members. They must also participate in an accompanying online course and complete a prospectus, proposal, Institutional Review Board application, and final dissertation paper and presentation. Once students register for HLTH 9001, they are registered each term until successful completion of the dissertation.

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**Prerequisites**

- Foundational and core curricula
- Appointment of an approved dissertation committee chair
- RESI 8403

**HLTH 9101 - Dissertation**

*(5 cr. per term for a minimum of 4 quarters until completion)*

In this course, doctoral students have the opportunity to integrate their Program of Study into an in-depth exploration of an interest area that includes the completion of a research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members, in a learning platform classroom in which weekly participation is required. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation. Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**Prerequisites**

- RESI 8403
HMNT 1001 - Living and Learning in the Technological World

(6 cr.)
Imagine life without cell phones, television, or the internet. Recent technological developments have significantly altered all aspects of human life: at work; in play; and in personal, family, and social interactions. In this course, students examine the advantages, disadvantages, and controversies of living and learning in an ever-changing technological environment. By exploring multiple perspectives, students discover how technology is changing media, culture, business, health, human behavior, and overall access to information. In a dynamic, reflective, and engaging classroom environment, students use a variety of audio, visual, literary, and artistic resources, to engage in open dialogue. Students are also introduced to the tools essential to success at Walden. Students complete the course with a personalized success plan that provides a customized roadmap and tools that they can use immediately on their journey toward the completion of their bachelor’s degree.

Note: Virtual, cyber, digital, and asynchronous are used to describe online environments in this course.

Note about required first courses: Required first term course.

HMNT 1001A - Living and Learning in the Technological World

(6 cr.)
Imagine life without cell phones, television, or the internet. Note: Virtual, cyber, digital, and asynchronous are used to describe online environments in this course.

HMNT 1050 - Humanities Through the Arts

(5 cr.)
Students in this course survey central themes of the humanities through the arts. They examine the interconnectedness of the arts, as well as a general overview of the philosophy and activities of such art forms as painting, photography, sculpture, literature, and architecture. In addition to participating in class discussions, completing short
exercises, and writing short essays, students are required to complete a term-long research project concerning a specific art form. The topic of the research project is to be chosen in consultation with the Instructor.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HMNT 1050C - Humanities Through the Arts♦

(3 cr.)
Students in this course survey central themes of the humanities through the arts. They examine the interconnectedness of the arts, as well as a general overview of the philosophy and activities of such art forms as painting, photography, sculpture, literature, and architecture. In addition to participating in class discussions, completing short exercises, and writing short essays, students are required to complete a term-long research project concerning a specific art form. The topic of the research project is to be chosen in consultation with the instructor.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HMNT 3001 - Modern Popular Culture♦

(3 cr.)
The study of popular culture is a way to understand the current values, beliefs, and cultural norms of modern society. In this course, students analyze the artistic and philosophical impact of contemporary media and popular culture. They explore graphic novels, film, advertising, television, cyber culture, and popular music. Demonstrating their understanding of course concepts in a final written project, students compare and contrast how different genres within a media type address specific issues. Students learn to analyze the ways in which social, political, and economic issues are evident in artistic and creative forms of expression in popular culture.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HMNT 3001C - Modern Popular Culture♦

(3 cr.)
The study of popular culture is a way to understand the current values, beliefs, and cultural norms of modern society. In this course, students analyze the artistic and philosophical impact of contemporary media and popular culture. They explore graphic novels, film, advertising, television, cyber culture, and popular music. Demonstrating their understanding of course concepts in a final written project, students compare and contrast how different genres within a media type address specific issues. Students learn to analyze the ways in which social, political, and economic issues are evident in artistic
and creative forms of expression in popular culture.

HMNT 3099 - What is Popular Culture?

(1 cr.)
Modern popular culture is a field of studies that analyzes the role of popular culture in society, how it affects social and political issues, and how those same issues influence the creation of popular culture. The communication of social issues through popular culture is called social issue messaging. As with any field of studies, or new endeavor, there are terms that may have one meaning in general discussion but have very different and specific meanings within the field. Without an understanding of these common terms and the ideas behind them, it is impossible to have a clear understanding, analysis, or communication with colleagues. In this course, students are introduced to the language and terms, along with key concepts, used to describe ideas within popular culture studies.

Note: Students who have previously taken HMNT 3001 - Modern Popular Culture will not receive credit for this course.

HRMG 3001 - Human Resource Management

(5 cr.)
This course is a comprehensive overview of human resource management for students. They discuss the role of human resources managers as strategic partners who focus on the mission and goals of an organization. Students examine traditional topics, such as job analysis and design, recruitment, selection, performance appraisal, training, staffing, career management, compensation, benefits, health and safety, and employee relations. They also evaluate technology-based resources that aid contemporary HR processes and responsibilities. Through case studies and practical exercises, students work toward gaining the skills that enable them to develop important employment policies and procedures, such as those addressing ethical and equal opportunity issues in regard to legal and environmental regulations.

Prerequisites
BS in Business Administration
- BUSI 1001 or BUSI 1002
All Other Programs
- BUSI 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HRMG 4200 - Strategic Human Resource Management
Despite common misperceptions, human resource (HR) managers are tasked with more than hiring, firing, and managing employee benefits. In this course, students learn why it important for a company to adjust to the varying needs of both domestic and international clients as well as how HR management helps to ensure this happens through various activities, including sourcing in a global environment. Students examine how HR management functions and activities can be the key to long-term business success, strategically aligning corporate goals with those of stakeholders and all major areas of a business, including marketing, finance, technology, and operations. They compare and contrast HR management strategies, such as incentive cash and/or stock compensation programs, employee ownership, and nonmonetary rewards. Students also evaluate the impact such strategies have on employee motivation and retention.

Prerequisites
- HRMG 3001

HRMG 4201 - Strategic Human Resource Management

Despite common misperceptions, human resource (HR) managers are tasked with more than hiring, firing, and managing employee benefits. In this course, students learn why it important for a company to adjust to the varying needs of both domestic and international clients as well as how HR management helps to ensure this happens through various activities, including sourcing in a global environment. Students examine how HR management functions and activities can be the key to long-term business success, strategically aligning corporate goals with those of stakeholders and all major areas of a business, including marketing, finance, technology, and operations. They compare and contrast HR management strategies, such as incentive cash and/or stock compensation programs, employee ownership, and nonmonetary rewards. Students also evaluate the impact such strategies have on employee motivation and retention.

Prerequisites
- HRMG 3001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HRMG 4202 - Human Resource Development and Change

Growth and innovation are important aspects of all organizations. To achieve this, companies must provide an environment conducive to diversity and change. They must also provide the opportunity for employees to learn the goals and mission of the organization. In this course, students learn how to promote and maintain such an environment through the process of human resources development and organizational
change, including training and development, leadership development, and performance improvement. Students engage in discussions, reflections, and group case studies, which focus on a variety of topics, such as learning principles, interventions, employee orientation and socialization, performance management and coaching, and diversity.

Prerequisites
BS in Business Administration
- HRMG 4201

All Other Programs
- HRMG 4201 or HRMG 4200

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HRMG 4203 - Human Resource Management: Analysis and Problems♦

(5 cr.)
Human resource (HR) managers possess a dual role with the responsibility of ensuring wellbeing of employees while maintaining the goals of company. To fulfill this role, HR managers must have a thorough understanding of the federal laws and regulations governing the workplace as well as compliance guidelines regarding employee regulations. In this course, students examine and discuss the role of federal regulations, including equal opportunity, sexual harassment, discrimination, and other employee-related regulations. They also explore the role of human resource management in regard to performance appraisal systems, compensation, and labor-management issues.

Prerequisites
- HRMG 4202

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 1010 - The Human Service Professional in a Changing World

(5 cr.)
Human services is a field that provides rewarding as well as challenging situations as professionals support a diverse range of clients in solving problems and working through difficult situations. Students in this course explore the historical development of the human services field, human services theories, the systems approach to human services, and the role of the human service professional. They examine a range of roles and areas of specialization available to those in the profession as well as related challenges, such as ethical and diversity issues when working with people in different populations. Applying foundational concepts, students also investigate trends in the field of human services, such as medical and mental health breakthroughs and changes in client populations.

Prerequisites
• PSYC 1001 or PSYC 1002 or PSYC 1003
• SOCI 1001

HUMN 1020 - The Humanitarian Professional in a Changing World♦

(5 cr.)
The social service and humanitarian services field provides rewarding and challenging situations as professionals support diverse populations in an effort to change the lives of individuals, families, and communities. Students in this course explore the profession and the role of a humanitarian professional in this increasingly diverse and complex world. As students explore the range of humanitarian efforts, they self-assess their own aspirations, abilities, skills, characteristics, ethics, and cultural identity in preparation for their future in the humanitarian profession. Students examine a range of roles, responsibilities, and social change efforts of humanitarian professionals. Students also explore ethical issues that can arise when working in diverse cultures around the globe. Applying foundational concepts, students also investigate current trends in the field of humanitarian service.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 1030 - The Human Services Professional Practitioner: The Humanitarian in Practice♦

(5 cr.)
The human services field provides rewarding and challenging situations as professionals support diverse populations in an effort to change the lives of individuals, families, and communities. Students in this course explore the profession and the role of a human services professional practitioner as a humanitarian in this increasingly diverse and complex world. As students explore the range of humanitarian efforts, they self-assess their own aspirations, abilities, skills, characteristics, ethics, and cultural identity in preparation for their future in the human services. Students also explore ethical issues that can arise when working in diverse cultures around the globe. Applying foundational concepts, students also investigate current trends in the field of human and humanitarian service.

Prerequisites
• HMNT 1001

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 2003 - Human Development: Adulthood♦
Adulthood represents a rich developmental experience including many significant life transitions. In this course, students explore the key theories, transitions, and applications of adult development. They examine the social, biological, and cognitive maturation processes that define development of adulthood into older age. Students engage in assignments designed to provide practical application of theories to specific transitions and topical issues, such as career changes, attachment and marital satisfaction, personality, retirement, and cognition. Applying concepts presented in the course, students discuss cross-cultural issues in development, emotional development, adult roles, memory, and physical aging.

**Prerequisites**
- PSYC 1001 or PSYC 1002 or PSYC 1003

★ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 2004 - Motivation and Emotion★**

(5 cr.)
What drives people to do what they do? In this course students have the opportunity to answer this question as they explore basic theories of motivation and emotion. They also explore bodily needs, such as hunger, thirst, and sex, that drive people to action; concepts in motivation, such as achievement, altruism, and conflict; and concepts related to emotion, including happiness, hormonal influences, and mood. Students assess content and share different perspectives through peer discussions on related topics, such as sources of motivation, hunger and eating, need for power, extraversion, goals, and decision making.

★ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 2005 - Social Influences on Behavior★**

(5 cr.)
Individuals are often influenced by others and by the social situations in which they find themselves. Students in this course examine the basic concepts and applications of social psychology, including attitudes, beliefs, and behavior; stereotyping; prejudice and discrimination; interpersonal relationships; group behavior; and the effect of environmental stress on behavior. They also learn how bias can sway objective conclusions as well as how ethical factors influence research in social psychology. Students apply principles and theories presented in the course to case studies and situations in daily life, including instances of stereotyping and discrimination. They also use these theories to understand strategies for helping others and reducing aggressive behavior.

**Prerequisites**
• PSYC 1001 or PSYC 1002 or PSYC 1003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 2006 - Introduction to Addiction

(5 cr.)
Students in this course are introduced to the nature of addiction and the impairment in individuals who suffer from addictions. In this course, students review theories on substance disorders and approaches to identification, prevention, and treatment. Topics include historical perspectives, diagnoses, types of addictive behaviors, treatment, and current research.

HUMN 2007 - Developing the Helping Relationship

(5 cr.)
Human services professional practitioners must be able to demonstrate helping skills and approaches that lead to productive relationships with service users, no matter the context. These skills include basic communication skills, active listening, empathy, trust building, and cultural humility. Students in this course examine their existing skill set and then build on it through a series of written exercises, reflections, and interactive video-based responses to human services scenarios. They also receive instruction on holistic appraisal, collaborative advocacy, and goal setting as key activities in the helping relationship. The course culminates with students filming and evaluating themselves in the role of a practitioner engaging with a service user.
Prerequisites
• HUMN 1010 or HUMN 1020 or HUMN 1030

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 2010 - Introduction to Human Services Administration

(5 cr.)
Human services is a field that provides rewarding as well as challenging situations as professionals support a diverse range of clients in solving problems and working through difficult situations. Students in this course explore the historical development of the human services field, human services theories, the systems approach to human services, and the role of the human service professional. They examine a range of roles and areas of specialization available to those in the profession as well as related challenges, such as ethical and diversity issues when working with people in different populations. Applying foundational concepts, students also investigate trends in the field of human services,
such as medical and mental health breakthroughs and changes in client populations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 2015 - Understanding the Ability in Disability♦

(5 cr.)
Working with people with disabilities represents an exciting and evolving opportunity for human services professional practitioners. In this introductory course, students use their practitioner lens to explore disability in the context of community inclusion and human rights. Students examine and debunk common myths related to disabilities before going on to trace the history of the disability system, including the abuse and neglect that occurred in 20th-century institutions. Students research different types of disabilities and the characteristics, challenges, and abilities inherent in them. Applied assignments involving simulations, legislative advocacy, and outreach to nonprofit leaders highlight the role of human services professional practitioners as partners and advocates. Students can come away from the course with a foundation for continuing their disability studies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 2016 - Disabilities and Family♦

(5 cr.)
Working with an individual is only part of the human services professional practitioner's role. People with disabilities often have family members who support, grow, and learn alongside them. This course celebrates the human services professional practitioner as family partner. As such, students explore the family experience across the lifespan of the individual with disabilities, from diagnosis through transitions in services to adulthood and future planning. Throughout the course, students apply skills, strategies, and tools to two cases involving family members with different types of disabilities, family structures, and dynamics. They also become familiar with family-focused planning materials they can use in future practice.

Prerequisites
- HUMN 2015

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 2050 - Understanding Urban Culture and Community Assessment♦

(5 cr.)
Human services professional practitioners must understand the communities in which
they live and work, as well as the state of the financial and human assets and limitations of their organizations, in order to respond to needs and provide services. This course gives students a foundation in historical and sociological perspectives on urban environments and the people who inhabit them. Students trace demographic and economic shifts across time and explore wealth inequality. This background informs the needs and issues students will see every day as human services professional practitioners, no matter whether they practice in rural, urban, or suburban areas. Students then explore innovative solutions with which to address identified needs in their communities.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 3010 - Crisis and Positive Intervention

(5 cr.)
In this course, students examine situational procedures and techniques necessary in defusing situations identified as crises. Students work toward gaining skills to evaluate crisis experiences by combining active listening with an understanding of crisis patterns. Through class activities, such as case studies and comparative analyses, they learn how to work through difficult emotional, social, and health crises. Students also assess concepts and share perspectives through peer discussion on related topics, such as intervention models and strategies; system crisis intervention; collaboration; countertransference; secondary traumatic stress disorder and vicarious trauma; burnout prevention; and referral resources.

Prerequisites
- HUMN 1010 or HUMN 1020 or HUMN 1030

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 3011 - Addictions Assessment

(5 cr.)
The focus of this course is learning a systematic, multidisciplinary approach to the assessment and interpretation of data collected from clients with addictions. The most current screening, assessment, and documentation approaches will be reviewed.

HUMN 3012 - Prevention and Treatment of Addiction

(5 cr.)
Models and theories of addiction are covered, as well as various treatment approaches. Prevention in various settings is addressed, including the etiology, patterns, and risk factors of addiction, as well as strategies for prevention. Treatment methodology,
treatment planning, goal setting, and evaluation are also addressed. The multicultural context of addiction and client diversity are included.

**HUMN 3013 - Person-Centered Planning and Case Management**

(5 cr.)
This course is designed to provide students with practical skills for organizing and brokering community resources in the human services case manager role. Throughout the course, students work with diverse service users to develop a person-centered service plan. As such, they engage in needs assessment, goal setting, advocacy, and service coordination while also considering the ethical and legal responsibilities of the case management relationship. They then justify their plan based on the unique needs and sociocultural factors of the service user.

**Prerequisites**
- HUMN 1010 or HUMN 1020 or HUMN 1030
- HUMN 2007

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 3015 - Child and Family Relationships**

(5 cr.)
In the 21st century, human services professional practitioners must be adept at working with a diverse range of families to assess their needs and connect them with appropriate resources. In this course, students explore the skills needed to build relationships with families, as well as the cultural, ethical, and legal considerations inherent in those relationships. Students directly apply their knowledge and skills to family scenarios and ultimately generate an in-depth plan for one fictional family. Students also consider human services careers associated with children and families that they may work toward.

**Prerequisites**
- HUMN 1030
- HUMN 2007

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 3017 - Proactive Intervention Strategies for People With Disabilities**

(5 cr.)
Students in this course explore proactive intervention strategies to prevent undesirable behaviors and promote goal behaviors in people with intellectual and developmental disabilities. While acknowledging reactive strategies, the course focuses on proactive
strategies to manage behavior and support independence. Emphasis is placed on understanding why certain behaviors occur in order to appropriately move toward the goal behavior. Other topics include how to operationally define and measure behavior; how to identify antecedents, consequences, and functions of behavior; and how to use a person-centered approach when developing a behavior support plan. For the final project, students generate a behavior support plan based on a fictional case and consider methods for implementing, monitoring, and adapting the plan over time.

**Prerequisites**
- HUMN 2016

>C aution: Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**HUMN 3018 - American Sign Language and Communication Behavior**

(5 cr.)
Learning to communicate in another language takes practice. American Sign Language is the language used by the Deaf and hard of hearing community. Students in this course have the opportunity to learn the basics of American Sign Language, including fingerspelling, ASL vocabulary, emergency signs, counting, and how to communicate everyday needs. Students also explore communication behavior, including facial grammar and body shifting. Students will examine the origins of sign language and develop an understanding of the Deaf community.

>C aution: Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**HUMN 4001 - Case Management for Persons in Need**

(5 cr.)
This course is designed to provide students with practical skills for organizing and brokering community resources for human service clients. This will include emphasis on needs assessment for different client communities, developing plans for comprehensive care services, and utilizing formal and informal networks to maximize client access to services. Emphasis will be placed on interagency coordination as well as human service community resource building to achieve success in service delivery.

>C aution: Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**HUMN 4002 - Effective Human Services Interviewing**

(5 cr.)
This course is designed to provide students with basic skills for directly interfacing with a diverse community of clients. This will include emphasis on active listening,
paraphrasing and summarizing, and respecting clients’ cultural backgrounds in all aspects of information gathering. Emphasis will be placed on understanding the roles of different types of interviews, and the differing functions of open or closed questions for addressing distinct problems in living and areas of need that clients present.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4003 - Measuring Effectiveness of Human Services Delivery♦

(5 cr.)
Human service professionals engage clients with a variety of needs. How can students be certain, though, that their services are effective in preventing recidivism in a population of drug-addicted persons, or that they have provided the necessary life skills training for a homeless person to transition into the workplace? This course is designed to provide skills for community needs assessment, program development, design, implementation, and evaluation across a variety of human services domains. Specific focus will be given to planning quality measures that demonstrate a program's effectiveness to all key stakeholders.

Prerequisites
- PSYC 2010 or HUMN 1010 or HUMN 1020 or HUMN 1030

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4004 - Brain and Behavior♦

(5 cr.)
The study of the brain and how it functions has contributed significantly to the understanding of how people react and adapt to their environments. In this course, students examine basic brain physiology and learn how the brain functions to control behavior. Students explore specific applications of brain structure to memory and attention, sensation and perception, development, socialization, motivation and emotion, and socialization. They apply concepts and theories about the brain to psychological health and well-being.

Prerequisites
- PSYC 1001 or PSYC 1002 or PSYC 1003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4005 - Case Management and Addictions♦
Students in this course explore the definitions and methodologies of case management services. The course is designed to provide students with the most up-to-date research and clinical applications of services management in the practice of addictions counseling.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4008 - Intergroup Conflict and Peace Building♦

In a world encumbered with conflict, tension, and injustice, strategies for building peace are essential. In this course, students assess theories and principles of conflict management and resolution. They examine and employ theories and applications of intergroup dynamics; principles and underlying philosophies of non-violence; and social science principles to understand conflict and promote peace. Students gain practical experience applying principles of peace building to proposing solutions for contemporary, individual, and social issues.

Prerequisites
- PSYC 1001 or PSYC 1002 or PSYC 1003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4009 - Cultural Humility and Diversity♦

Learning to work effectively with diverse individuals and communities requires a clear understanding of one’s own culture, status, and power in society, as well as the values and beliefs of others. In this course, students recognize, reconstruct, and analyze the unique cultural setting out of which they themselves developed. Students then apply this self-awareness to their interactions, both within the course and in their personal and professional lives. Through directed journaling and applied assignments, students explore how to recognize bias, oppression, and power imbalances as they exist in our everyday lives and gain a broad understanding of the importance of cultural humility. Students leave the course with an action plan for how best to continue their own growth as well as apply their new understandings as social change agents engaged in multicultural practice.

Prerequisites
- HUMN 1010 or HUMN 1020 or HUMN 1030

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
HUMN 4010 - Mental Health Crisis Response♦

(5 cr.)
The ability to effectively respond to people in mental health and substance use crisis is especially important for professionals on the front lines of human services. In this course, students study how to identify the signs and symptoms of mental health and substance use disorders in adults. They then analyze and apply approaches to deescalate scenarios involving various mental health problems and contexts. By the end of the course, students have a set of guidelines to follow and referral resources to use in the practice of mental health crisis response in their own communities and workplaces.

Prerequisites
- HUMN 1010 or HUMN 1020 or HUMN 1030

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4015 - Advocacy, Policy, and Disability Law♦

(5 cr.)
Human services professional practitioners who assist individuals and families in need of disability services must navigate complex federal, state, and local laws, as well as the regulations and policies that govern those who receive disability services. Students in this course explore the laws and policies that ensure equal access to services for those who have varying disabilities. Students examine legal cases, identify areas within disability services that require support and advocacy, and explore how this drives policy. Students examine the intersectionality of advocacy, policy, and disability law to help meet the needs of those who require disability services and those who work in the field of disabilities.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4020 - Advocacy in the Global Community♦

(5 cr.)
Students in this course explore how groups and organizations are making a difference by serving the global community. Students examine the function, operation, and relationship between organizations that address global issues, such as disaster relief, HIV, hunger, education, women’s rights, and healthcare; such organizations include intergovernmental organizations (IGOs) and nongovernmental organizations (NGOs). Students examine the strategies and techniques that successful organizations use in responding to global challenges. They also consider current issues that have potential to become global crises, and they discuss the future of public service in the global community. Applying concepts of service and related governance issues, students
complete a final research project on a major issue currently affecting the global society.

Prerequisites
- HUMN 1010 or HUMN 1020 or HUMN 1030

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4030 - Mental Health Crisis Response for Children and Adolescents♦

(5 cr.)
[Under development]
Prerequisites
- HUMN 1030
- HUMN 2007

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4303 - Trends and Issues in School-Age Children♦

(5 cr.)
By understanding the relationship between children’s health, culture, and socioeconomic status, in addition to related trends and issues, professionals who work with school-age children are in a better position to address and respond to these issues and related challenges effectively. Education professionals in this course critically examine selected issues and trends related to school-age children, such as technology/media, bullying, gender, abuse prevention, drugs/alcohol, obesity/eating disorders, stress, peer relationships, and school success. They demonstrate their understanding of course concepts through various applications, including the creation of an informative brochure for the purpose of explaining topical issues on health and wellness to parents and other stakeholders.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4304 - Trends and Issues in Adolescence♦

(5 cr.)
Physical changes and social pressures make adolescence a challenging time for many teens; therefore, it is important for professionals to be aware of current trends and critical issues that affect the mental and physical well-being of this age group. Education professionals in this course examine and discuss selected issues and trends related to adolescents, such as technology/media, cyber-bullying, gender, sexual orientation, drugs/alcohol, obesity/eating disorders, depression, self-injury, suicide, teenage pregnancy, and school success. Applying course concepts, education professionals
engage in practical exercises, such as research analyses through which they explore the connections between topical issues and the larger world as they affect adolescents and their transition into adulthood.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 4402 - Planning and Budgeting

(5 cr.)
Planning and applying effective budgeting strategies are critical elements in managing corporate and government criminal justice organizations. In this course, students have the opportunity to gain fundamental skills for effective management while focusing on short- and long-term financial analysis as well as on policy and budget creation. They complete practical application assignments, focusing on issues of plan development, grant sources, and different tasks and challenges related to budgeting. Students also engage in discussions with peers on a variety of topics, such as the public and private budgets, strategies, financing, forecasting, and ethical issues related to public budgeting.

HUMN 4920 - Capstone

(5 cr.)
In this course, students synthesize information and experiences gathered over the course of the Bachelor of Science in Human Services program. Students will identify a human service gap in their local area and develop a detailed proposal for addressing the needs of the client population who are affected. This will include a background literature review, description of the problem area and the history of the community's response, and a detailed plan for addressing the gap with attention given to multicultural considerations. In accordance with Walden University's mission, students will be expected to demonstrate clearly the social change implications of the plan that they develop.

Prerequisites
- All required core and concentration courses

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 5011 - Interviewing and Case Management in Human and Social Services

(5 cr.)
The first step in helping individuals, families, organizations, and communities is to form effective helping relationships. These relationships are characterized by the ability to connect with clients and those around them through demonstrating empathic caring, respect for people and institutions, and genuineness that leads to perceived trustworthiness. Just as an ERG is a unit of energy in physics, Empathy, Respect, and
Genuineness (ERG) is the unit of energy in helping relationships. In this course, students will learn how to talk with people in ways that demonstrate empathy, respect, and genuineness while obtaining the kind of information required to help clients identify their unmet needs and participate in finding ways to meet them. Students will participate in mock interviews and will participate in critiques of their own work along with their instructor. Students in this course will also focus on the essential functions of case management including how to write up important case notes appropriately with special attention to ethical and legal issues. While the basic principles underlying an effective helping relationship may be close to universal (ERG), the actual process of demonstrating them could vary greatly across cultures or countries; therefore, student will explore how this might differ in a different setting and among different professions.

**HUMN 5100 - Introduction to Mental Health Counseling**

(5 cr.)
Students are introduced to the mental health counseling profession in this course. The history, philosophy, and theoretical foundations of the profession, and the scope of practice, credentialing, and other professional issues are explored. In this course, the focus is on the student as a future mental health counselor, and students receive an overview of the mental health counseling program, the profession, and professional competencies.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HUMN 5103 - Introduction to Addiction**

(5 cr.)
Students in this course are introduced to aspects of professional functioning as an addiction counselor, including but not limited to: role setting of addiction counselors; history, philosophy, and trends in addictions counseling; professional standards for addictions counselors; effects of crises and trauma-causing events on persons with addictions; self-care; and ethical and culturally sensitive practice of addiction counseling. Students also explore competencies, credentialing, and other professional issues. The student explores the future as an addiction counselor and an overview of the addiction counseling profession.

**HUMN 5150 - Helping Individuals, Organizations, and Communities**

(5 cr.)
This course is designed for students to receive a doctoral-level foundation in the history and development of the various human services professions. Students integrate information from various specializations, in areas such as counseling, social work, psychology, family studies, and criminal justice. Examining both the strengths and weaknesses of the human services delivery systems, students will review the origins of
the profession as well as its various responses to the changing needs of society. Students can begin to develop their identities as leaders, researchers, and best practices informants in the area of human services. They do this through critical literature reviews related to research, policy, and practice; discussions about human services and contemporary society; and course assignments. The focus of this course is on the competencies and ethics of human services professionals.

HUMN 5152 - Human Services Administration

(5 cr.)
Diminishing resources are compounding the societal challenges facing human services agencies today. In this course, students will examine the core competencies that human services administrators need to address these challenges and make a greater difference in the communities they serve. A broad range of skills and innovative approaches will be discussed, including cross-agency collaboration, stakeholder communication, supervision of people and processes, creation and implementation of policies, and strategic planning and management. Through course discussions, applications, and critical literature reviews, students can demonstrate knowledge and skills that are directly translatable to their current work environment. In addition, they will explore how administration of Human Services organizations would differ across different cultures or societies. In addition to using case studies and access to a virtual city to bring life to the readings by giving students a chance to apply the material in complex situations, students will also use part 2 of a graphic novel that started in a prior course to help them see the transition from a focus on individuals and families to a focus on organizations and communities. In addition, students will participate in group activities that don't require synchronous communications as each student will be responsible for their own project, but they will also participate in feedback and critiques of group members’ presentations and final projects.

HUMN 5160 - The Advanced Human Services Practitioner in a Changing World

(5 cr.)
As leaders, advanced human services professional practitioners can inhabit many roles: generalist, planner, advanced case manager, advocate, humanitarian, and outreach worker. Throughout this course, students try on these roles in response to authentic human services scenarios in settings within a fictional community. In each scenario, they observe advanced human services professional practitioners applying role-specific strategies, approaches, and theories to help service users. Students also assess their current knowledge, skills, and abilities in relation to each role, as well as the values and experiences they bring to the profession. By the end of the course, students develop and refine a professional identity statement as a leader in the human services profession and examine self-care strategies relevant to the work of an advanced human services professional practitioner.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
HUMN 5161 - Assessment, Triage, and Motivational Interviewing♦
(5 cr.)
Advanced human services professional practitioners frequently work with service users who are experiencing crisis and are in need of assessment to determine their level of care and to assist them with establishing and achieving goals. In this course, students develop motivational interviewing skills to help service users identify and self-motivate to achieve the goals they desire. Students apply motivational interviewing skills, such as open-ended questioning, affirming, reflective listening, and summarizing, to authentic human services case studies in the context of assessment. Students also have an opportunity to develop supervisory skills by providing constructive feedback on their peers’ motivational interviewing and assessment skills.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 5162 - Cultural Humility and Diversity♦
(5 cr.)
Students in this course examine the theory, philosophy, and practice of working with diverse populations, with a focus on the interplay between individual and unique cultures within societies and organizations attempting to move toward equality and cultural humility. They explore cultural issues and ethics related to economic disparity, power, privilege, and social justice. Students also explore the complex social, political, and related ethical challenges advanced human services professional practitioners face as they seek to meet the needs of diverse populations. Applying concepts presented in the course, students engage in in-depth assessments of emerging or persistent ethical or social justice issues, through which they demonstrate their ability to empower, support, and connect service users with community resources. Throughout the course, students engage in readings, case studies, and practical assignments to build skills to work in multicultural environments and participate in an immersive experience with a specific culture to further develop their cultural humility.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 5200 - Cross-Cultural Ethics in Human Social Services
(5 cr.)
In this course students will examine the philosophy of ethics and social justice, with a focus on the interplay among race, religion, and culture within and between different societies and organizations. Students will explore the complex social, political, and related ethical challenges Human Services professionals face as they seek to meet the
needs of diverse populations. They will examine ethics and social justice related to economic disparity, power, and privilege. Applying concepts presented in the course, students will engage in an in-depth assessment of an emerging or persistent ethical or social justice issue, through which they will demonstrate their ability to make recommendations for improvement or change. They will engage in readings, case studies, and practical assignments to gain a better understanding of the interactions between culture, ethics, and social behaviors.

**HUMN 5202 - Theories, Treatment, and Case Management of Addiction**

(5 cr.)
Students in this course explore treatment intervention and case management strategies for addiction counseling, using various models of treatment, recovery, relapse prevention, and continuing care for addictive disorders. They learn treatment principles and philosophies of addiction-related programs, and they increase self-awareness as addiction counselors by assessing their own limitations; recognizing when they need additional resources and support; and knowing when and where to refer clients when appropriate. In addition, students examine substance abuse policies and regulatory processes that influence service delivery in addiction counseling.

**HUMN 5203 - Psychopharmacology and Biopsychosocial Considerations**

(5 cr.)
The potential for addictive disorders to present like a variety of medical and psychological disorders is common. In this course, students examine how to treat addictions that may coexist with depression, anxiety, bipolar disorder, obsessive-compulsive behavior, and other psychological disorders as described in the DSM-IV-TR. They survey a spectrum of psychotropic medications and their use in the treatment of mental, behavioral, and addictive disorders. Students also explore factors that increase the likelihood for a person, community, or group to be at risk for psychoactive substance use disorders. Through this course, students gain an understanding of the basic classifications, indications, and contraindications of commonly prescribed medications so that they make appropriate referrals within treatment teams.

**HUMN 5204 - Assessment in Counseling and Addiction**

(5 cr.)
Students in this course receive an overview of the different types of diagnostic and assessment tools used in addictions counseling based on professional standards for testing. Students engage in a comprehensive examination of psychometric properties used to develop and evaluate these instruments. They learn various models and approaches to clinical evaluations for addictive disorders and examine the appropriate use of assessments for addictions. Moreover, students learn how to assess for a
biopsychosocial and spiritual history, and they address ethical, legal, and sociocultural
issues, including cultural bias and fairness.

HUMN 5205 - Introduction to the Nonprofit Sector

(5 cr.)
Nonprofit organizations (NPOs) can serve to positively affect people's lives through
social change, but they require leaders who have a fundamental understanding of the
nonprofit sector, including related ethical, legal, and global perspectives. Students in this
course explore these viewpoints as well as the history, foundations, and types of NPOs.
They also examine the diverse political, social, and economic contexts within which
NPOs exist. Students explore and apply marketing, public relations, and communication
concepts and strategies to case studies and contemporary situations. Gaining practical
insight, students also apply theories presented in the course to the development of a
concept paper guiding the development of a nonprofit organization.

HUMN 5210 - Management and Leadership Development in Human Services

(5 cr.)
Public and nonprofit leaders in all areas of public administration require a thorough
understanding of the expectations of their roles as leaders and managers of diverse and
complex organizations. Students use theoretical and applied perspectives from which
they study the intricacies of these roles, including the distinction between leadership and
management, organizational culture, change management, systems theories, and
organizational development. Students gain a practical understanding of these topics
through the application of principles and concepts to public and nonprofit organizational
settings in different cultures and societies depicted in case studies, a virtual city
environment, and through relevant material provided by students themselves. Students
will also explore how to promote interprofessional collaboration within and among
organizations.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

HUMN 5215 - Lifespan Development

(5 cr.)
Students in this course have an overview of development through the lifespan, including
childhood, adolescence, adulthood, and aging experiences. Physical, social, emotional,
and cognitive issues are covered, as well as the expected developmental milestones
during each of these phases of development. The latest research in attachment theory,
brain research, and aging is included, and themes of diversity issues related to
developmental research are highlighted throughout the course.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a
HUMN 5316 - Techniques of Counseling

(5 cr.)
Students in this course focus on principles and skills related to interviewing and observation as well as related legal, ethical, and cultural issues. Students gain practice in conducting interviews, making behavioral observations, collecting and interpreting data during an interview, and developing written reports of findings.

Note: In addition to the course materials listed by the university bookstore, this course also requires that students have access to a video recording device, a tripod, and an audio recording device, which they will begin using the first week of class.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 5722 - Theories of Counseling

(5 cr.)
This course introduces theories of counseling and psychotherapy to prepare students to conceptualize problems and respond with appropriate, evidence-based interventions and techniques. Students will become familiar with the origin, key concepts, and interventions and techniques of each of the theories presented. Students will develop an awareness of how counseling theories drive the treatment process and apply theories to diverse case studies. A major focus of this course is to support students as they develop their personal theoretical orientation.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 5723 - Multicultural Counseling

(5 cr.)
Students can increase their sensitivity, awareness and knowledge of, and skills related to multicultural counseling and working effectively with diverse clients in this course. Students explore how their own cultural development, biases, values, and strengths impact the development of their counseling approach. Embracing diversity and various client identity issues and their impact on the counseling relationship are foundational to the course. The application of traditional theoretical orientations and current multicultural theories to culturally diverse groups is also addressed. Topics include age, race, gender, sexual orientation, religious preference, physical disability, social class, ethnicity and culture, culturally sensitive diagnosis and assessment, and family patterns.

Prerequisites
- Counseling Residency I
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 6000 - Foundation of Graduate Study in Human Services

(3 cr.)
The purpose of this course is to introduce students to Walden University and to the requirements for successful participation in an online curriculum. It provides a foundation for academic and professional success as a scholar-practitioner and as a social change agent. Topics include the relation of the mission and vision to professional goals; development of the program of study and Professional Development Plan; strategies for online success; introduction to the online library; and introduction to critical thinking, professional writing, and academic integrity. Course assignments focus on practical application of writing and critical-thinking skills and the promotion of academic excellence.

HUMN 6011 - Interviewing and Case Management in Human and Social Services♦

(5 cr.)
The first step in helping individuals, families, organizations, and communities is to form effective helping relationships. These relationships are characterized by the ability to connect with clients and those around them through demonstrating empathic caring, respect for people and institutions, and genuineness that leads to perceived trustworthiness. Just as an ERG is a unit of energy in physics, Empathy, Respect, and Genuineness (ERG) is the unit of energy in helping relationships. In this course, students learn how to talk with people in ways that demonstrate empathy, respect, and genuineness while obtaining the kind of information required to help clients identify their unmet needs and participate in finding ways to meet them. Students will participate in mock interviews and critiques of their own work along with their instructor. Students in this course also focus on the essential functions of case management, including how to write up important case notes appropriately with special attention to ethical and legal issues. While the basic principles underlying an effective helping relationship may be close to universal (ERG), the actual process of demonstrating them could vary greatly across cultures or countries; therefore, students explore how this might differ in a different setting and among different professions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 6100 - Introduction to Research and Evaluation in Human and Social Services♦
To be effective professional helpers, practitioners need to have a working knowledge of how research informs practice. This is becoming even more important as the emphasis on evidenced-based practice increases across all fields that provide human and social services. Students will explore different approaches to research and evaluation and will demonstrate the ability to find, critically read, and integrate relevant research articles from trustworthy sources. In addition, they will use case studies, discussions, and readings to help see the connections between theory, research, and practice and how applications might differ in different cultures and across different professions. They will also identify important ethical considerations related to conducting and reporting research results, especially in the context of program evaluations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 6111 - Leadership and Organizational Change

(5 cr.)
Successful organizations in a rapidly changing and complex world require leaders who embrace change and are able to engage others in change. Students examine theories and models of leadership and organizational change, as well as consider the relationship between leadership and organizational change. They explore qualities, characteristics, and skills of effective leaders, ethical issues and standards, opportunities and challenges related to leading diverse organizations through change, and the contribution of leadership and organizational change to social change.

HUMN 6145 - Crisis Management

(5 cr.)
In this course, counselor educators learn the fundamentals of crisis management and crisis leadership. In addition, students develop an understanding of the theories and models related to crises, disasters, and other trauma-causing events. Students also learn about ethical, legal, and diversity considerations in crisis and trauma response. By the end of the course, students understand models for training and supporting other counselors in the areas of crisis response applicable to community, national, and international crises. Students develop a crisis management plan for their own community.

HUMN 6150 - Helping Individuals, Organizations, and Communities: Introduction to Human Services

(5 cr.)
This course is designed to provide a doctoral-level foundation in the history and development of the various human services professions. Students integrate information from various specializations, in areas such as counseling, social work, psychology, family
studies, and criminal justice. Examining both the strengths and weaknesses of the human services delivery systems, students review the origins of the profession as well as its various responses to the changing needs of society. Students can begin to develop their identities as leaders, researchers, and best practices informants in the area of human services. They do this through critical literature reviews related to research, policy, and practice; discussions about human services and contemporary society; and course assignments. The focus of this course is on the competencies and ethics of human services professionals.

**HUMN 6152 - Human Services Administration**

(5 cr.)
Diminishing resources are compounding the societal challenges facing human services agencies today. In this course, students will examine the core competencies that human services administrators need to address these challenges and make a greater difference in the communities they serve. A broad range of skills and innovative approaches will be discussed, including cross-agency collaboration, stakeholder communication, supervision of people and processes, creation and implementation of policies, and strategic planning and management. Through course discussions, applications, and critical literature reviews, students can demonstrate knowledge and skills that are directly translatable to their current work environment.

**HUMN 6160 - The Advanced Human Services Professional Practitioner in a Changing World**

(5 cr.)
As leaders, advanced human services professional practitioners can inhabit many roles: generalist, planner, advanced case manager, advocate, humanitarian, and outreach worker. Throughout this course, students try on these roles in response to authentic human services scenarios in settings within a fictional community. In each scenario, they observe advanced human services professional practitioners applying role-specific strategies, approaches, and theories to help service users. Students also assess their current knowledge, skills, and abilities in relation to each role, as well as the values and experiences they bring to the profession. By the end of the course, students develop and refine a professional identity statement as a leader in the human services profession and examine self-care strategies relevant to the work of an advanced human services professional practitioner.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HUMN 6161 - Assessment and Motivational Interviewing**

(5 cr.)
Advanced human services professional practitioners frequently work with service users
who are experiencing crisis and are in need of assessment to determine their level of care and to assist them with establishing and achieving goals. In this course, students develop motivational interviewing skills to help service users identify and self-motivate to achieve the goals they desire. Students apply motivational interviewing skills, such as open-ended questioning, affirming, reflective listening, and summarizing, to authentic human services case studies in the context of assessment. Students also have an opportunity to develop supervisory skills by providing constructive feedback on their peers’ motivational interviewing and assessment skills.

Prerequisites
- HUMN 6000
- HUMN 6160

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**HUMN 6162 - Cultural Humility and Diversity**

*(5 cr.)*

Students in this course examine the theory, philosophy, and practice of working with diverse populations, with a focus on the interplay between individual and unique cultures within societies and organizations attempting to move toward equality and cultural humility. They explore cultural issues and ethics related to economic disparity, power, privilege, and social justice. Students also explore the complex social, political, and related ethical challenges advanced human services professional practitioners face as they seek to meet the needs of diverse populations. Applying concepts presented in the course, students engage in in-depth assessments of emerging or persistent ethical or social justice issues, through which they demonstrate their ability to empower, support, and connect service users with community resources. Throughout the course, students engage in readings, case studies, and practical assignments to build skills to work in multicultural environments and participate in an immersive experience with a specific culture to further develop their cultural humility.

- HUMN 6160
- HUMN 6161

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**HUMN 6164 - Crisis and Family Interventions**

*(5 cr.)*

Students in this course study the fundamentals of crisis management and crisis leadership. They develop an understanding of the theories and models related to crises,
disasters, and other trauma-causing events. Students also learn about ethical, legal, and diversity considerations in crisis and trauma response. By the end of the course, students understand models for training and supporting other counselors in the areas of crisis response applicable to community, national, and international crises, and they develop a crisis management plan for their own community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 6200 - Cross-Cultural Ethics in Human and Social Services

(5 cr.)
In this course, students will examine the philosophy of ethics and social justice, with a focus on the interplay among race, religion, and culture within and between different societies and organizations. Students will explore the complex social, political, and related ethical challenges Human Services professionals face as they seek to meet the needs of diverse populations. They will examine ethics and social justice related to economic disparity, power, and privilege. Applying concepts presented in the course, students will engage in an in-depth assessment of an emerging or persistent ethical or social justice issue, through which they will demonstrate their ability to make recommendations for improvement or change. They will engage in readings, case studies, and practical assignments to gain a better understanding of the interactions among culture, ethics, and social behaviors.

HUMN 6203 - Introduction to the Nonprofit Sector

(5 cr.)
Nonprofit organizations (NPOs) can serve to positively affect people's lives through social change, but they require leaders who have a fundamental understanding of the nonprofit sector, including related ethical, legal, and global perspectives. Students in this course explore these viewpoints as well as the history, foundations, and types of NPOs. They also examine the diverse political, social, and economic contexts within which NPOs exist. Students explore and apply marketing, public relations, and communication concepts and strategies to case studies and contemporary situations. Gaining practical insight, students also apply theories presented in the course to the development of a concept paper guiding the development of a nonprofit organization.

HUMN 6204 - Intergroup Relations

(5 cr.)
Students in this course will be provided with an in-depth study of basic and applied research and theory on both group processes and group relations. Some topics that could be included: prejudice, discrimination, stereotyping, social categorization, minority and majority influence, group decision-making, leadership, group structure, group socialization, bargaining and negotiation, intergroup conflict and cooperation, collective
action and cognition, collective self and identity, social identity, language and identity, ethnic and cultural relations, and social dilemmas.

**HUMN 6207 - Grant Writing**

*(5 cr.)*

Grant writing is a highly marketable skill that requires many nonprofit, educational, and community organizations to secure external funding to provide needed services to the community. In this course, students will explore the basic skills needed for non-research grant writing, including identifying potential funding sources, creating objectives and a need statement, preparing and justifying a budget, identifying appropriate assessment plans, and writing an executive summary. Through course assignments, students directly apply what they are reading and discussing by writing a full grant proposal based on an actual Request for Proposal (RFP).

**Prerequisites**
- HUMN 6160
- HUMN 6480

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HUMN 6210 - Management and Leadership Development in Human Services**

*(5 cr.)*

Public and nonprofit leaders in all areas of public administration require a thorough understanding of the expectations of their roles as leaders and managers of diverse and complex organizations. Students use theoretical and applied perspectives from which they study the intricacies of these roles, including the distinction between leadership and management, organizational culture, change management, systems theories, and organizational development. Students gain a practical understanding of these topics through the application of principles and concepts to public and nonprofit organizational settings in different cultures and societies depicted in case studies, a virtual city environment, and through relevant material provided by students themselves. Students will also explore how to promote interprofessional collaboration within and among organizations.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HUMN 6237 - Advanced Program Evaluation**

*(5 cr.)*

Doctoral level practitioners are often called upon to conduct rigorous evaluations of programs and the results of their evaluations often determine the fate of the programs...
they evaluate and the clients served by those programs. Therefore, it is important that students learn how to conduct both formative and summative evaluations and how to evaluate the fidelity of program implementation prior to evaluating program outcomes. In this way, program evaluation also tests the theory or logic model on which the program is based. Students will use hands-on activities to develop their ability to develop evaluation plans, provide constructive critical critiques of other students' projects, and accept constructive, critical feedback from others. They will also connect with other professionals engaged in evaluation research through various professional forums (e.g., listservs, blogs, and professional associations). In addition, they will explore how the process, pressures, and outcomes of evaluation research could differ in a different culture and across different professions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 6242 - Changing Health Behavior: Theory and Practice**

(5 cr.)

Students in this course will review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. Coverage of health-related issues includes dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, students will examine the analysis of behavior change within specific populations (young, elderly, cognitively impaired, etc.) and factors that predict or serve as obstacles to lifestyle change and adherence.

**HUMN 6336 - Crisis, Trauma, and Disaster Response**

(5 cr.)

This course is designed to provide students with an understanding of the personal and systemic impact of crises, disasters, and other trauma-causing events on individuals, couples, families, and communities. Students examine theories and response models as they relate to sexual trauma, crisis in individuals and families, crisis in the community, and crisis in the nation and in the world. They explore topics including crisis assessment, counselor competencies, vicarious trauma and countertransference, specific related diagnoses, and advocacy. Students consider cultural, legal, and ethical issues related to crisis, trauma, and disaster events and response.

**HUMN 6339 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness**

(5 cr.)

Professionals in all areas of public policy and administration work with individuals and organizations of different cultures on a daily basis; therefore, global consciousness is vital to effective communication and interaction in the field. In this course, students explore and analyze the cultural values and styles of communication, reasoning, and leadership.
unique to their home culture. Students apply these concepts to better understand the people, values, and policies of other cultures. They also identify and become familiar with challenges that American nonprofit organizations face as they work internationally or cross-culturally within the United States. Sharpening critical-thinking skills, students research and assess an organization within their own community that has international links; through this assessment, students gain further awareness of different cultures and the importance of cross-cultural ties.

Prerequisites

- A course or direct experience in nonprofit management is strongly advised.

**HUMN 6340 - Crossing Borders: U.S. and International NGO Cultures and Environments**

(5 cr.)
In this course, students study in depth the cultures, structures, and activities of NGOs in select countries and compare their activities, organizational cultures, structures, and working environments with nonprofits in the United States.

**HUMN 6350 - Historical and Contemporary Issues in Criminal Justice**

(5 cr.)
Students investigate the evolution of crime—from lone criminals to worldwide syndicates—using the scientific rigor built into the selected readings and discussions. Among the topics examined are the philosophy of community- and problem-oriented policing, transnational crime, terrorism, and the new nexus between them. Current and future leaders are equipped with the knowledge and depth of understanding to assess and manage the opportunities, innovations, and challenges in their profession.

**HUMN 6356 - Marriage, Couple, and Family Therapy**

(5 cr.)
Students in this course are provided with a foundation in the theoretical perspectives and empirical framework necessary for marriage, couple, and family therapy. The theoretical perspective includes general systems theory and its applications, as well as psychosocial, psychodynamic, transgenerational, strategic, cognitive-behavioral, and social constructionist models. Students learn to conceptualize presenting issues within a systemic perspective and context. Empirically based techniques for assessment and intervention of marriages, couples, and families are reviewed and analyzed.

**HUMN 6361 - Human Sexuality**

(5 cr.)
In this course, students are provided with a framework for understanding human sexuality in the context of couple, marriage, and family counseling. Students in this
course explore empirically supported counseling approaches related to sexual functioning, intimacy, gender, and sexual orientation. Students are exposed to a systemic framework for understanding the role and impact of sexuality on couples, marriages, and families. Students will explore specific topics related to issues of sexual diversity, gender identity, sexual offending, trauma, and victimization. Legal and ethical issues related to addressing sexuality in counseling are tackled.

**HUMN 6401 - Trauma, Crisis, and Stress With Military Personnel**

(5 cr.)
The specific focus of this course is on combat trauma, crisis, and stress experiences and responses of military personnel—both wartime and post-war. Students develop an understanding of the short-term and long-term impact of post-traumatic stress and vicarious trauma. In addition to focusing on how combat and wartime experiences impact individual military personnel, students also explore the effects on families. As a result, students will be better prepared to provide services and mental health support to military personnel dealing with trauma, crisis, and stress.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 6402 - Working with Military Spouses, Families, and Children**

(5 cr.)
The nature of military work responsibilities impacts not only military personnel but their families as well. Frequent family relocations, extensive deployments, parent-child separation, and high-risk jobs all contribute to unique family dynamics. This course is designed to educate students about the experience and unique support needs of military personnel and their families.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 6403 - Military Culture**

(5 cr.)
This course is designed to provide students with an understanding of military culture. The focus of this course is on understanding the world of work for military personnel; the sociocultural identity development of military personnel; the experience of military families; support for military personnel and their families; and socioeconomic and other lifestyle challenges for military personnel. As a result of this course, students will be more informed about the mental health and social support needs of these populations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
HUMN 6405 - Ethics and Social Justice

(5 cr.)
Ethics is a foundational element of leadership. Leaders face increasingly complex social and political challenges as they seek to meet the needs of diverse constituents. Students in this course explore ethics and social justice related to economic disparity, power, and privilege. Students use demographic data, current social trends, and themes to understand, analyze, and address ethical and social justice issues that affect the delivery of human services in a global community.

HUMN 6451 - Public Policy Analysis

(5 cr.)
Government officials, research programs, and NGOs are increasingly expected to make better and more transparent use of evidence in producing viable policy options within highly complex policy environments that are heavily influenced by power and politics. Public policy analysis has been described as the art and craft of speaking truth to power (Wildavsky, 1987) in seeking ways to promote positive social change in these complex environments. Policy analysis within this context requires several distinct skill sets: an understanding of the policy context, technical knowledge and analytical tools to identify and apply evidence ethically and with professional judgment, an appreciation and engagement of the concerns and contributions of diverse stakeholders, and the ability to develop and communicate practical policy advice.
This course is framed around Bardach and Patashnik’s eightfold path, which lays out a series of iterative, not necessarily sequential, steps to follow when analyzing a policy issue and uses design thinking to guide the process. Students examine key concepts of public policy analysis through evidence-based research to locate issues in relation to theory and current trends. This course provides project-based opportunities to practice and gain the skills and knowledge to use evidence to shape policy more effectively.
Prerequisites
- MMPA 6116 or HUMN 8000 or HUMN 6000 or HUMN 8001 or SOCW 8002 or SOCW 8002W or MMHA 6000 or MMHA 6000A or HLTH 8003A or HLTH 8003 or HLTH 8003E or HLTH 8003B or NURS 8003

HUMN 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination

(5 cr.)
In an increasingly complex world, leaders and managers in public and nonprofit organizations need to be strategic in their planning in order to fulfill the organizational mission and enhance stakeholder satisfaction. Students in this course explore the role and process of strategic planning with an appreciation for collaboration, cooperation,
and coordination as they relate to the strategic planning process. Students will apply these concepts to real-life situations and organizations and develop a strategic plan.

**HUMN 6480 - Applied Research and Evaluation Methods**

*(5 cr.)*
Organizational credibility, community trust, and fund-raising are increasingly dependent upon demonstration of program effectiveness and success. Students in this course are introduced to research and evaluation methods in the public and nonprofit sectors. They examine the strengths, limitations, and threats to validity; models, quantitative metrics, and tools used to evaluate programs and policies; and legal and ethical issues associated with research and evaluation methods. Students are asked to critically evaluate sample research using these parameters.

Prerequisites
- HUMN 6161
- HUMN 6162

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HUMN 6511 - Treatment of Forensic Populations**

*(5 cr.)*
In this course, students are provided with the basic knowledge necessary to evaluate and subsequently treat many different forensic populations. Various forensic populations, such as sex offenders, substance abusers, victims of crime, and employee assistance to law enforcement personnel, will be covered. The use of traditional forms of intervention, such as individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice, will be addressed.

**HUMN 6530 - Forensic Applications in Community Settings**

*(5 cr.)*
Students in this course concentrate on the application of forensic psychology to various community settings. An emphasis is placed on working with offenders upon re-entry to the community and offenders who receive non-incarceration community placements. However, students will also explore less common applications, such as restorative justice and community crime prevention.

**HUMN 6651 - Board Governance and Volunteer Management**

*(5 cr.)*
Volunteers are the "lifeblood" of many nonprofit organizations. These organizations rely heavily on their volunteer board of directors to govern and guide them toward their
mission. The success of nonprofit organizations is largely dependent on the effective management of program volunteers and board members. In this course, students explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation, with an emphasis on creating and maintaining an effective board of directors. Students design a board development or volunteer management plan based on the concept paper they developed in the Introduction to the Nonprofit Sector course.

HUMN 6660 - Social Change, Leadership, and Advocacy for Human Services Professional Practitioners

(5 cr.)
This capstone course is the culmination of the MS in Human Services program. In this course, students demonstrate senior case management skills and their understanding of the responsibility and leadership of the advanced human services professional practitioner to advocate for social change with service users, organizations, communities, and the human services profession. Students also demonstrate methods of advanced human services practice within local, national, and international organizations. Students continue to enhance their professional development plans by preparing for professional opportunities.

HUMN 6701 - Culture and Psychology

(5 cr.)
Students in this course explore the cultural components, research, and theory of cross-cultural psychology. In addition to the previously listed goals, students focus on the impact that culture has on the field of psychology around the world. The scope of this course is broad, with the core theme being cross-cultural psychology (focusing on cultures representing different parts of the world) and comparing cultural influence on human psychology. Many of the topics addressed are related to human development. Additionally, interactions among culture and social behaviors, health, mental health, and mental illnesses are emphasized throughout the duration of this course.

HUMN 6702 - Introduction to the Dynamics of Conflict and Negotiation

(5 cr.)
In this course, students are introduced to the seminal theories and practices of alternative dispute resolution (ADR). They will explore conflict analysis, negotiation, and mediation strategies. Through a series of case studies, virtual role plays, and simulation exercises, students gain insight into the practice of ADR and will have the opportunity to develop some effective negotiation and mediation skills. Students will gain a greater understanding of the differences between principled and positional negotiation and mediation, including such professional concepts as fairness, integrity, trust, and confidentiality.
HUMN 6741 - Psychology of Terrorism

(5 cr.)
Students in this course examine the history, philosophy, and techniques of terrorism as well as countermeasures to terroristic threats to public safety. Topics include aspects of international and domestic terrorism with an emphasis on terrorism's roots, viewed from the broadest possible political, sociological, and cultural perspectives; factors and catalysts attributed to the terrorism phenomenon—including poverty, psychology (e.g., motivational factors, antisocial behaviors), social injustice, oppression, and religion; and the impact of media and technology in aiding and countering terroristic activities.

HUMN 6742 - Conflict, Conflict Resolution, and Peace

(5 cr.)
Through this course, students engage in a study of conflict, conflict resolution, and peace from psychological and social psychological perspectives. Students examine the concept of conflict and methods of addressing it, including management, resolution, and transformation; theories related to conflict resolution; approaches to conflict resolution, including negotiation and third-party interventions; and social psychological factors that influence conflict and conflict resolution. They also consider the influence of culture in conflict and conflict resolution; the role of ethics; intractable and international conflicts; the concept of peace; and how third-party approaches can contribute to the peace process. Students apply conflict resolution approaches to conflicts at all levels, from interpersonal to those involving whole nations.

HUMN 6785 - Social Change in Action

(5 cr.)
In this course, students prepare for their roles as change agents in the human services profession. Throughout the course, students focus on a specific social problem they are passionate about and plan for a community needs assessment to address the problem. As they do so, they examine how prevention, advocacy, and consultation are used to effect positive social change. Students also discuss a variety of social change topics with their peers, such as the language of social change, the use of systems thinking to better understand and address social problems, the emergence and progress of social justice issues, and the strategies for effecting global social change.

HUMN 6810 - Fundamentals of Law and Public Policy

(5 cr.)
Legal decisions and the law have an impact on the creation of public policy. Students in this course explore the relationship between law and public policy and the significance of court decisions on law and public policy. They examine the role of administrative agencies in the creation and execution of law and public policy and the role of the
courts in resolving challenges to agency rulemaking; conflicts between executive and legislative branches of government; and conflicts between and among federal, state, and local laws. Students apply fundamental legal concepts and processes to the creation and execution of law and public policy.

**HUMN 6811 - Community Psychology**

(5 cr.)
In this course, students are introduced to the basic concepts and practice of community psychology. Guiding values and assumptions of the field, basic ecological concepts, and models of intervention are examined. Topics include diversity in community psychology, social change, primary and secondary prevention, community mental health, empowerment, stress, and resiliency.

**HUMN 6815 - Introduction to Dimensions of Contemporary Aging**

(5 cr.)
Great improvements in medicine, public health, science, and technology enable today's older adults to live healthier, longer lives. In this course, students explore theories and practices for providing services to older adults who remain independent and vibrant members of their families and communities. Students delve into models of aging in place, including ways of assessing health, social and economic needs, and identifying and prioritizing options in physical, mental, emotional, and intellectual health promotion activities and programs.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HUMN 6912 - Mental Health Law**

(5 cr.)
Mental health counseling professionals in all areas, especially criminal forensic psychological practice, may encounter various conflicts regarding psychological and legal approaches to treatment. Therefore, it is important for counselors to have a firm understanding of mental health law to avoid conflicts, such as issues of liability and malpractice. Students in this course are provided with the opportunity to examine several different aspects of the law related to mental health issues, including those constituting forensic psychological practice, such as civil matters (personal injury and civil competency issues) and criminal matters (competency to stand trial, criminal responsibility, diminished capacity, and death-penalty issues). Students employ recent court decisions and laws, such as the Tarasoff ruling, mandated reporting, and the Health Insurance Portability and Accountability Act (HIPAA), to examine how mental health law influences the practice of psychology and mental health counseling.

**HUMN 8000 - Foundations of Graduate Study in Human Services**
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals and develop a program of study and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. Students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

**HUMN 8001 - Keys to Doctoral Studies Success**

(3 cr.)
Research is possible with the right skills, attitude, and knowledge. How do you successfully complete an online research-intensive program? In this course, students are introduced to Walden University resources and they prepare to become independent learners in an online environment. Students can gain mastery of the online classroom and technological tools needed at Walden University, and they can learn skills for success in the human services program, including scholarly voice in discussions and writing, library search skills, and skills for reading and writing a literature review.

**HUMN 8001D - Keys to Doctoral Studies Success♦**

(3 cr.)
As leaders, advanced human services professional practitioners can inhabit many roles: generalist, planner, advanced case manager, advocate, humanitarian, and outreach worker. Throughout this course, students try on these roles in response to authentic human services scenarios in settings within a fictional community. In each scenario, they observe advanced human services professional practitioners applying role-specific strategies, approaches, and theories to help service users. Students also assess their current knowledge, skills, and abilities in relation to each role, as well as the values and experiences they bring to the profession. By the end of the course, students develop and refine a professional identity statement as a leader in the human services profession and examine self-care strategies relevant to the work of an advanced human services professional practitioner.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 8005 - The Changing Context of Postsecondary and Adult Teaching and Learning♦**

(5 cr.)
Learning in adulthood is imperative for individuals to realize the opportunities of 21st-
century workplaces, technology, and society. Providing these learning experiences requires committed and responsive adult and postsecondary education leaders. In this course, education professionals investigate contemporary trends and issues in teaching and learning in postsecondary and adult education settings. The course also provides education professionals with an introduction to the expectations of graduate work in Adult Education and College Teaching and Learning programs. Education professionals learn to work effectively within Walden University’s online learning environment and develop an understanding of university and program support systems, expectations, and outcomes.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8011 - Interviewing and Case Management in Human and Social Services

(5 cr.)
The first step in helping individuals, families, organizations, and communities is to form effective helping relationships. These relationships are characterized by the ability to connect with clients and those around them through demonstrating empathic caring, respect for people and institutions, and genuineness that leads to perceived trustworthiness. Just as an ERG is a unit of energy in physics, Empathy, Respect, and Genuineness (ERG) is the unit of energy in helping relationships. In this course, students will learn how to talk with people in ways that demonstrate empathy, respect, and genuineness while obtaining the kind of information required to help clients identify their unmet needs and participate in finding ways to meet them. Students will participate in mock interviews and will participate in critiques of their own work along with their instructor. Students in this course will also focus on the essential functions of case management including how to write up important case notes appropriately with special attention to ethical and legal issues. While the basic principles underlying an effective helping relationship may be close to universal (ERG), the actual process of demonstrating them could vary greatly across cultures or countries; therefore, students will explore how this might differ in a different setting and among different professions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8100 - Introduction to Research and Evaluation in Human and Social Services

(5 cr.)
In order to be effective professional helpers, practitioners need to have a working knowledge of how research informs practice. This is becoming even more important as the emphasis on evidenced-based practice increases across all fields that provide human and social services. Students will explore different approaches to research and evaluation and will demonstrate the ability to find, critically read, and integrate relevant
research articles from trustworthy sources. In addition, they will use case studies, discussions, and readings to help see the connections between theory, research, and practice and how applications might differ in different cultures and across different professions. They will also identify important ethical considerations related to conducting and reporting research results, especially in the context of program evaluations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 8110 - Advanced Social Work Theory and Practice**

(5 cr.)
One of the primary focuses of social work is to promote social justice within a diverse society. In this course, students focus on an advanced exploration of traditional and contemporary clinical social work theories for providing culturally and contextually relevant services to individuals and families. Students examine social work theories in a way that informs clinical practice, and they discuss the role of the social worker in social issues at the macro and micro levels. Students evaluate existing practices and policies with the goal of designing and implementing more effective practices and policies that positively impact the individual, the community, and society at large.

**HUMN 8111 - Leadership and Organizational Change**

(5 cr.)
Successful organizations in a rapidly changing and complex world require leaders who embrace change and are able to engage others in change. In this course, students use traditional literature, current articles, and interactive media to explore the qualities, characteristics, and skills of effective leaders as well as the theories, models, and relationships between leadership and organizational change. They assess the ethical issues and standards as well as the opportunities and challenges related to leading diverse organizations through change. Students also examine how current leaders employ leadership and organizational change to contribute to social change, and they consider how to use these lessons to make further positive changes within an organization or their own community.

**HUMN 8145 - Crisis Management**

(5 cr.)
In this course, counselor educators learn the fundamentals of crisis management and crisis leadership. In addition, students develop an understanding of the theories and models related to crises, disasters, and other trauma-causing events. Students also learn about ethical, legal, and diversity considerations in crisis and trauma response. By the end of the course, students understand models for training and supporting other counselors in the areas of crisis response applicable to community, national, and
international crises. Furthermore, students develop a crisis management plan for their own community.

HUMN 8150 - Helping Individuals, Organizations, and Communities: Introduction to Human Services

(5 cr.)
This course is designed to provide students with a doctoral foundation in the history and development of the various human services professions. Students engage in coursework that integrates content from various specializations, in areas such as counseling, social work, psychology, family studies, and criminal justice. Examining both the strengths and weaknesses of the human services delivery systems, students review the origins of the profession as well as its various responses to the changing needs of society. Through critical literature reviews related to research, policy, and practice; discussions about human services and contemporary society; and practical assignments, students begin to develop their identities as leaders, researchers, and informants in the area of human services. Students focus on the competencies and ethics of human services professionals.

HUMN 8152 - Human and Social Services Administration

(5 cr.)
Diminishing resources compound societal challenges facing contemporary human services agencies. In this course, students examine the core competencies required of human service administrators to address these challenges and make a greater difference in the communities they serve. Students discuss a broad range of skills and innovative approaches, including cross-agency collaboration, stakeholder communication, supervision of people and processes, creation and implementation of policies, and strategic planning and management. Through course discussions and practical applications, students demonstrate knowledge and skills of human services administration, which they can translate into current work environments.

HUMN 8160 - The Advanced Human Services Practitioner in a Changing World

(5 cr.)
As leaders, advanced human services professional practitioners can inhabit many roles: generalist, planner, advanced case manager, advocate, humanitarian, and outreach worker. Throughout this course, students try on these roles in response to authentic human services scenarios in settings within a fictional community. In each scenario, they observe advanced human services professional practitioners applying role-specific strategies, approaches, and theories to help service users. Students also assess their current knowledge, skills, and abilities in relation to each role, as well as the values and experiences they bring to the profession. By the end of the course, students develop and refine a professional identity statement as a leader in the human services profession.
and examine self-care strategies relevant to the work of an advanced human services professional practitioner.

Prerequisites
- HUMN 8001
- HUMN 8785

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8161 - Assessment and Motivational Interviewing♦

(5 cr.)
Advanced human services professional practitioners frequently work with service users who are experiencing crisis and are in need of assessment to determine their level of care and to assist them with establishing and achieving goals. In this course, students develop motivational interviewing skills to help service users identify and self-motivate to achieve the goals they desire. Students apply motivational interviewing skills, such as open-ended questioning, affirming, reflective listening, and summarizing, to authentic human services case studies in the context of assessment. Students also have an opportunity to develop supervisory skills by providing constructive feedback on their peers’ motivational interviewing and assessment skills.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8162 - Cultural Humility and Diversity♦

(5 cr.)
Students in this course examine the theory, philosophy, and practice of working with diverse populations, with a focus on the interplay between individual and unique cultures within societies and organizations attempting to move toward equality and cultural humility. They explore cultural issues and ethics related to economic disparity, power, privilege, and social justice. Students also explore the complex social, political, and related ethical challenges advanced human services professional practitioners face as they seek to meet the needs of diverse populations. Applying concepts presented in the course, students engage in in-depth assessments of emerging or persistent ethical or social justice issues, through which they demonstrate their ability to empower, support, and connect service users with community resources. Throughout the course, students engage in readings, case studies, and practical assignments to build skills to work in multicultural environments and participate in an immersive experience with a specific culture to further develop their cultural humility.

Prerequisites
- HUMN 8785
- HUMN 8160
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8164 - Crisis and Family Interventions

(5 cr.)
Students in this course study the fundamentals of crisis management and crisis leadership. They develop an understanding of the theories and models related to crises, disasters, and other trauma-causing events. Students also learn about ethical, legal, and diversity considerations in crisis and trauma response. By the end of the course, students understand models for training and supporting other counselors in the areas of crisis response applicable to community, national, and international crises, and they develop a crisis management plan for their own community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8171 - Theories and Frameworks for Adult Learning

(5 cr.)
To understand adult learning, one must ask and answer complex questions: Who is the adult learner? What is the social context of learning? What motivates adult learners? In this course, education professionals explore the theories and frameworks that inform the field of adult learning today. They identify, compare, and contrast foundational and emerging perspectives on adult learning with the aim of transforming theory into practice. They engage in an integrative course project through which they synthesize and apply various theories to real-world situations, including their own development; summarize how the idea of wisdom impacts their experiences as adult learners; interview an adult learner; and assess various perspectives in regard to educating diverse learners.

HUMN 8177 - Using Technologies to Enhance Adult Learning

(5 cr.)
Emerging technologies are rapidly altering the field of adult education today. Innovative technologies are removing traditional boundaries to learning and encouraging a global perspective on school, work, and communications. New developments in software, multimedia applications, Internet technologies, and mobile computing are transforming the educational landscape and empowering learners around the world. In this course, educators and students explore how they can leverage these advances to enhance the learning process and improve outcomes in today’s digital information society.

HUMN 8203 - Introduction to the Nonprofit Sector
Nonprofit organizations (NPOs) can serve to positively affect people’s lives through social change, but they require leaders who have a fundamental understanding of the nonprofit sector, including related ethical, legal, and global perspectives. Students in this course explore these viewpoints as well as the history, foundations, and types of NPOs. They also examine the diverse political, social, and economic contexts within which NPOs exist. Students explore and apply marketing, public relations, and communication concepts and strategies to case studies and contemporary situations. Gaining practical insight, students also apply theories presented in the course to the development of a concept paper guiding the development of a nonprofit organization.

**HUMN 8204 - Survey Research Methods**

(5 cr.)
An in-depth study of a range of survey methods administered via in-person interview, self-report, phone interview, and Internet administration is introduced in this course. Topics will include survey design, administration, analysis, and addressing sources of bias. In the course, students will also review theoretical and empirical research on question and questionnaire effects. Students are prepared in the practice of writing questions and designing questionnaires, both in general and in light of existing research.

**HUMN 8205 - Cross-Cultural Ethics in Human and Social Services**

(5 cr.)
In this course, students examine the philosophy of ethics and social justice, with a focus on the interplay among race, religion, and culture within and between different societies and organizations. Students explore the complex social, political, and related ethical challenges that Human Services professionals face as they seek to meet the needs of diverse populations. They examine ethics and social justice related to economic disparity, power, and privilege. Applying concepts presented in the course, students engage in an in-depth assessment of an emerging or persistent ethical or social justice issue, through which they will demonstrate their ability to make recommendations for improvement or change. Students engage in readings, case studies, and practical assignments to gain a better understanding of the interactions among culture, ethics, and social behaviors.

**HUMN 8206 - The World of Human Services: Reimagined**

(5 cr.)
As human and social problems increase across the globe, human services professional practitioners must be prepared to work in a variety of fields with many different populations. In this course, students examine their own calling to be a human services professional practitioner and connect their passion to leading positive social change. Students explore the value of human services and the challenges that professional
practitioners face in the field today. The course covers human services ethics of professional practice, along with key skills every human services professional practitioner must master to be prepared to work anywhere in the world. Course content exposes new concepts and trends in human services, and students analyze and propose reimagined practices in some areas, including interviewing, assessment, and referral; understanding and applying research in the field; the role of program evaluations; interprofessional networking; and transnational practice.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8206D - The World of Human Services: Reimagined♦

(5 cr.)
As human and social problems increase across the globe, human services professional practitioners must be prepared to work in a variety of fields with many different populations. In this course, students examine their own calling to be a human services professional practitioner and connect their passion to leading positive social change. Students explore the value of human services and the challenges that professional practitioners face in the field today. The course covers human services ethics of professional practice, along with key skills every human services professional practitioner must master to be prepared to work anywhere in the world. Course content exposes new concepts and trends in human services, and students analyze and propose reimagined practices in some areas, including interviewing, assessment, and referral; understanding and applying research in the field; the role of program evaluations; interprofessional networking; and transnational practice.

HUMN 8207 - Grant Writing♦

(5 cr.)
Grant writing is a highly marketable skill that requires many nonprofit, educational, and community organizations to secure external funding to provide needed services to the community. In this course, students will explore the basic skills needed for non-research grant writing including identifying potential funding sources, creating objectives and a needs statement, preparing and justifying a budget, identifying appropriate assessment plans, and writing an executive summary. Course assignments will allow students to directly apply what they are reading and discussing by writing a full grant proposal based on an actual Request for Proposal (RFP).

Prerequisites
- HUMN 8304 or RSCH 8210

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8207D - Grant Writing♦

(5 cr.)
Grant writing is a highly marketable skill that requires many non-profit, educational and community organizations to secure external funding in order to provide needed services to the community. In this course, students will explore the basic skills needed for non-research grant writing including identifying potential funding sources, creating objectives and a need statement, preparing and justifying a budget, identifying appropriate assessment plans, and writing an executive summary. Course assignments will allow students to directly apply what they are reading and discussing by writing a full grant proposal based on an actual request for proposal (RFP).

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8208 - Teaching in Human Services♦

(5 cr.)
Human services professional practitioners who hold a PhD often work in post-secondary education. Students in this course prepare to become competent teachers in human services education through the examination of various adult learning theories and methods for working effectively with different learning styles, cultural dynamics, and diversity. Human services educators-in-training will have the opportunity to learn how to help human services students acquire and apply knowledge and skills, and they will examine methods to evaluate learning outcomes. Students also have the opportunity to evaluate effectiveness within their personal teaching practice. Incorporating knowledge, skills, and professional dispositions learned throughout the course, students have opportunities to design curriculum, practice teaching in online situations, evaluate work, and receive feedback as human services educators-in-training.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8209 - Human Services Theory♦

(5 cr.)
Seeing social issues from other viewpoints is the pinnacle of the human services practitioner profession, and it is critical in human services research. In this course, students examine the step-by-step skills of Kurt Lewin's force field analysis research to analyze the problems encountered by families, communities, and organizations. Force field analysis is a tool for understanding how human behavior (e.g., beliefs, attitudes, and cultural norms) influence actions and decisions. Course content outlines how to identify a problem, how to collect data and measure the driving forces and restraining forces
that help and hinder the situation, and how to use the data strategically for informing decision makers on possible interventions and strategies toward solving the problem. Students can use their own experiences and areas of focus in this course as a basis for choosing a topic and developing a study plan that they will use in their capstone study.

**Prerequisites**
- RSCH 8110

♦ *Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HUMN 8210 - Management and Leadership Development in Human and Social Services♦**

(5 cr.)
Public and nonprofit leaders in all areas of public administration require a thorough understanding of the expectations of their roles as leaders and managers of diverse and complex organizations. Students use theoretical and applied perspectives from which they study the intricacies of these roles, including the distinction between leadership and management, organizational culture, change management, systems theories, and organizational development. Students gain a practical understanding of these topics through the application of principles and concepts to public and nonprofit organizational settings in different cultures and societies depicted in case studies, a virtual city environment, and through relevant material provided by students themselves. Students will also explore how to promote interprofessional collaboration within and among organizations.

♦ *Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**HUMN 8210D - Management and Leadership in Human Services♦**

(5 cr.)
Public and nonprofit leaders in all areas of public administration require a thorough understanding of the expectations of their roles as leaders and managers of diverse and complex organizations. Students use theoretical and applied perspectives from which they study the intricacies of these roles, including the distinction between leadership and management, organizational culture, change management, systems theories, and organizational development. Students gain a practical understanding of these topics through the application of principles and concepts to public and nonprofit organizational settings in different cultures and societies depicted in case studies, a virtual city environment, and through relevant material provided by students themselves. Students will also explore how to promote inter-professional collaboration within and among organizations.

♦ *Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 8211D - Consulting to Human Services Organizations**

(5 cr.)
Leaders of human services organizations may seek consultants to support organizational planning, funding, or program evaluation. In this course, students explore consultation practices that will help build relationships with human services organizations and be an effective consultant. Students address specific consulting situations including: vision and mission statement development, grant funding, project plans, data collection, and reporting. In this course, students will participate in a simulated initial interview with a human services organization leader. The application project includes a project plan outline and engagement letter.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 8215 - Lifespan Development**

(5 cr.)
Students in this course are provided with an overview of development through the lifespan, including childhood, adolescence, adulthood, and aging experiences. Physical, social, emotional, and cognitive issues are covered, as well as the expected developmental milestones during each of these phases of development. The latest research in attachment theory, brain research, and aging is included, and themes of diversity issues related to developmental research are highlighted throughout the course.

**HUMN 8237 - Advanced Program Evaluation**

(5 cr.)
Doctoral level practitioners are often called upon to conduct rigorous evaluations of programs, and the results of their evaluations often determine the fate of the programs they evaluate and the clients served by those programs. Therefore, it is important that students learn how to conduct both formative and summative evaluations and how to evaluate the fidelity of program implementation prior to evaluating program outcomes. In this way, program evaluation also tests the theory or logic model on which the program is based. Students will use hands-on activities to develop their ability to develop evaluation plans, provide constructive critical critiques of other students' projects, and accept constructive, critical feedback from others. They will also connect with other professionals engaged in evaluation research through various professional forums (e.g., listservs, blogs, and professional associations). In addition, they will explore how the process, pressures, and outcomes of evaluation research could differ in a different culture and across different professions.
HUMN 8237D - Advanced Program Evaluation♦

(5 cr.)
Doctoral level practitioners are often called upon to conduct rigorous evaluations of programs and the results of their evaluations often determine the fate of the programs they evaluate and the clients served by those programs. Therefore, it is important that students learn how to conduct both formative and summative evaluations and how to evaluate the fidelity of program implementation prior to evaluating program outcomes. In this way, program evaluation also tests the theory or logic model on which the program is based. Students will use hands-on activities to develop their ability to develop evaluation plans, provide constructive critical critiques of other students' projects, and accept constructive, critical feedback from others. They will also connect with other professionals engaged in evaluation research through various professional forums (e.g., listservs, blogs, and professional associations). In addition, they will explore how the process, pressures, and outcomes of evaluation research could differ in a different culture and across different professions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8240 - Human Motivation

(5 cr.)
Students in this course receive an overview of physiological, psychological, and social aspects in the study of motivation, including an exploration of historical and contemporary theories and perspectives. Students focus on both conceptual understanding of theories associated with motivation and their applications to personal, professional, and social issues. Major topics include physiological, learned, cognitive, and emotional aspects of motivation. Themes of diversity are threaded throughout the course.

HUMN 8241D - Who Do You Call Family? Contemporary Family Issues♦

(5 cr.)
[Under development]

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8242 - Changing Health Behavior: Theory and Practice

(5 cr.)
Students in this course will review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. Coverage of health-related issues includes dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, students will examine the analysis of behavior change
within specific populations (young, elderly, cognitively impaired, etc.) and factors that predict or serve as obstacles to lifestyle change and adherence.

**HUMN 8243D - Push and Pull of Understanding Human Services Problems: Force Field Analysis**

(5 cr.)
[Under development]
Prerequisites
- HUMN 8206D or HUMN 8206

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 8244D - Champions for Change: Action Research for Advocacy**

(5 cr.)
Human Services professional practitioners and leaders often participate in advocacy on behalf of the needs of a group, a community, or a population. Action research is a form of collaborative inquiry, with the full participation of members of the group to collect and analyze the information needed to support advocacy, which creates positive social change. In this course, students evaluate action research as a tool used for advocacy in human services. Using an example of action research, students analyze and evaluate the planning process, data collection, and use the findings to create a communication to stakeholders and other audiences as a method of advocacy. Students also consider how to include action research in their doctoral capstone project.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**HUMN 8275 - Multicultural Counseling**

(5 cr.)
Students are provided with the opportunity to increase their knowledge of multicultural counseling and the delivery of psychological services as well as related skills needed in professional practice. Students explore diversity and identity issues and discuss their impact on the therapeutic relationship. They examine the application of traditional theoretical orientations and current multicultural theories to culturally diverse groups. Through a variety of assignments designed to provide practical application of content, students also investigate counseling concepts related to race and ethnicity, sex and gender, sexual orientation, social class, age, and ability.

**HUMN 8304 - Data as Evidence**
Human services professional practitioners use statistics in a variety of professional undertakings, such as creating studies to assess human behavior or deciding which programs are most effective for meeting clients' needs. Students in this course study basic descriptive and inferential statistical methods commonly used in the social sciences, and they work toward developing the skills to write, analyze, and critique social science research. Students explore various methods, including computation and analysis of frequency distributions, measures of central tendency, and statistical hypothesis testing. Students also examine statistical tests (and underlying assumptions), including z-score; single-sample, independent-sample, and related-sample t tests; analysis of variance; correlation; regression; and chi-square tests. This course also provides an introduction to the SPSS statistical software package.

✩ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8304D - Data as Evidence

Human services professional practitioners use statistics in a variety of professional undertakings, such as creating studies to assess human behavior or deciding which programs are most effective for meeting clients' needs. Students in this course study basic descriptive and inferential statistical methods commonly used in the social sciences, and they work toward developing the skills to write, analyze, and critique social science research. Students explore various methods, including computation and analysis of frequency distributions, measures of central tendency, and statistical hypothesis testing. Students also examine statistical tests (and underlying assumptions), including z-score; single-sample, independent-sample, and related-sample t tests; analysis of variance; correlation; regression; and chi-square tests. This course also provides an introduction to the SPSS statistical software package.

✩ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8306 - Ethics and Legal Issues in Counseling

Students in this course are provided with an introduction to the field of professional counseling and the foundations of counseling. Students explore the history, philosophy, cultural dynamics, and trends in professional counseling. They examine consultation as well as client and counselor advocacy, focusing on the counselor's role as social change agent. Students also examine and apply ethical standards of the counseling profession, including the American Counseling Association (ACA) Code of Ethics and counselor ethical decision-making processes. Through a final reflective project designed to
influence their future ethical framework, students define their ethical perspectives, including influences, values, and goals.

HUMN 8327 - Research and Program Evaluation

(5 cr.)
Students in this course are introduced to evaluation research as well as build a foundation in the design of qualitative, quantitative, and mixed-method approaches to counseling research and evaluation. Students learn the strengths and limitations of each method and under what circumstances each approach would be the most appropriate research design. Students learn how to identify a topic for research, how to conduct a literature search, and the importance of scholarly writing. Other topics include the history and theory underlying program evaluation, approaches to evaluation, procedures and techniques for entering a group for which one would provide evaluation services, and techniques used to perform the evaluation, strategies for getting gatekeepers to be invested in the development of the research and in the outcomes, demonstration of program effectiveness, and dissemination of results to stakeholders. Students learn to write a research proposal, addressing the following key elements: researching, writing an introduction, stating a purpose for the study, identifying research questions and hypotheses, using theory, defining the significance of the study, and collecting and analyzing data. Students are exposed to legal and ethical issues associated with human subjects' protection.

HUMN 8337 - Techniques in Counseling

(5 cr.)
Students in this course focus on developing counseling techniques and skills. They practice and receive feedback on their demonstration of techniques and skills such as opening and closing a counseling session, attending, paraphrasing, confrontation, and self-disclosure, among others, including the use of creative techniques. Students also evaluate the appropriate use of counseling techniques and skills.
Note: Students are required to have access to a video recording device, a tripod, and an audio recording device, which they begin using during the second week of class and four more times throughout the term.

HUMN 8338 - Crisis, Trauma, and Disaster Response

(5 cr.)
This course is designed to provide students with an understanding of the personal and systemic impact of crises, disasters, and other trauma-causing events on individuals, couples, families, and communities. Students examine theories and response models as they relate to sexual trauma, crisis in individuals and families, crisis in the community, and crisis in the nation and in the world. They explore and discuss topics related to counselor competencies, vicarious trauma and counter transference, specific diagnoses,
and advocacy. Students also engage in assignments designed to provide practical application of crisis assessment. Through contemporary articles and case studies, they consider and discuss cultural, legal, and ethical issues related to crisis, trauma, and disaster events and response.

**HUMN 8339 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness**

(5 cr.)
Professionals in all areas of public policy and administration work with individuals and organizations of different cultures on a daily basis; therefore, global consciousness is vital to effective communication and interaction in the field. In this course, students explore and analyze the cultural values and styles of communication, reasoning, and leadership unique to their home culture. Students apply these concepts to better understand the people, values, and policies of other cultures. They also identify and become familiar with challenges that American nonprofit organizations face as they work internationally or cross-culturally within the United States. Sharpening critical-thinking skills, students research and assess an organization within their own community that has international links; through this assessment, students gain further awareness of different cultures and the importance of cross-cultural ties.

**Prerequisites**
- A course or direct experience in nonprofit management is strongly advised.

**HUMN 8339D - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness**

(5 cr.)
Professionals in all areas of public policy and administration work with individuals and organizations of different cultures on a daily basis; therefore, global consciousness is vital to effective communication and interaction in the field. In this course, students explore and analyze the cultural values and styles of communication, reasoning, and leadership unique to their home culture. Students apply these concepts to better understand the people, values, and policies of other cultures. They also identify and become familiar with challenges that American nonprofit organizations face as they work internationally or cross-culturally within the United States. Sharpening critical-thinking skills, students research and assess an organization within their own community that has international links; through this assessment, students gain further awareness of different cultures and the importance of cross-cultural ties.

**Prerequisites**
- A course or direct experience in nonprofit management is strongly advised.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*
HUMN 8340 - Crossing Borders: U.S. and International NGO Cultures and Environments

(5 cr.)
In this course, students study in depth the cultures, structures, and activities of NGOs in select countries and compare their activities, organizational cultures, structures, and working environments with nonprofits in the United States.

HUMN 8350 - Historical and Contemporary Issues in Criminal Justice

(5 cr.)
Decision- and policymakers must possess a fundamental understanding of crime theory, including the history of crime development, to be able to address knowledgeably and effectively modern issues of crime. In this course, students explore the evolution of crime and punishment, including lone criminals to worldwide syndicates, using the scientific rigor built into selected readings, peer discussions, and practical assignments. They examine the philosophy of community- and problem-oriented policing, transnational crime, terrorism, and the new nexus between them. Employing quantitative and qualitative research methods, students continue their assessment of contemporary issues of crime. They also learn to use existing information to consider new methods of addressing crime. In this class, students who are current leaders or those hoping to enter a leadership role establish a framework upon which to build the knowledge and depth of understanding to assess and manage the opportunities, innovations, and challenges in their profession.

HUMN 8351 - Policy Analysis in the Criminal Justice System

(5 cr.)
Criminal justice professionals must understand the various factors that influence the development of criminal justice policy, and how to evaluate whether existing policy meets its objectives. In this course, students will examine the principles of policy analysis and the role that scientific information plays in the development of criminal justice policy. Topics explored include policing, corrections, and sentencing; juvenile justice; the relationship among drugs, race, and crime; deterrence as a crime control policy; and the use of public registries. Through further analysis of criminal justice policies, students determine how these policies have changed over time, gaining insight into possible future trends of policy development and analysis.

HUMN 8352 - Leadership: Putting Theory Into Practice in Criminal Justice Administration

(5 cr.)
There are many challenges plaguing the criminal justice system, from economic hardship to growing threats of terrorism. Leaders in the system must be adept in problem-
solving, and they must possess the ability to think critically and proactively. Through this course, students are introduced to the problems that currently confront the criminal justice system administration as well as problems predicted for the future. Students prepare to lead efforts to address these challenges by engaging in practical assignments focusing on powerful models for strategic, critical, and reflective thinking. Students also engage in discussions about the major components of effective justice administration, including organizational thought and theory, leadership, human capital, policy development and implementation, and collaboration with other public safety and community organizations.

**HUMN 8353 - Forensic Applications in Community Settings**

(5 cr.)
Professionals must devote considerable attention to forensic psychology perspectives and approaches to address issues such as the overpopulation of prisons; decrease in healthcare availability; and cases in which courts remand treatment in community settings. Students in this course examine forensic psychology theories and perspectives, and then they apply these concepts to various community settings. They engage in practical assignments and topical readings that focus on working with offenders upon re-entry to the community and offenders who receive nonincarceration community placements. In addition, students explore less-common applications, such as restorative justice and community crime prevention. They also analyze the impact of personal perspectives and setting on the application of forensic psychology.

**HUMN 8356 - Theories and Techniques in Marriage, Couple, and Family Counseling**

(5 cr.)
Students in this course achieve an advanced understanding of theories and techniques for working with couples, marriages, and families. The focus of this course is on empirically supported treatments and techniques for addressing prevention; intervention; development; and wellness of marriages, couples, and families. Systemic implications for conceptualization, assessment, treatment planning, and interventions will be addressed. Students will be exposed to procedures for critically evaluating relevant research and to methods for applying findings to their counseling with these groups. Methods of adapting models to meet the needs of a diverse society as well as legal and ethical issues related to working in this specialty area will be explored.

**HUMN 8361 - Human Sexuality**

(5 cr.)
Students in this course build a framework for understanding human sexuality in the context of couple, marriage, and family counseling. They explore empirically supported counseling approaches related to sexual functioning, intimacy, gender, and sexual
orientation. Students are exposed to a systemic framework for understanding the role and impact of sexuality on couples, marriages, and families. Students explore specific topics related to issues of sexual diversity, gender identity, sexual offending, trauma, and victimization. Legal and ethical issues related to addressing sexuality in counseling are addressed.

HUMN 8390 - Strategic Context of Public Management and Leadership

(5 cr.)
Students in this course engage in a collaborative study of the changing strategic context of public administration. Students apply a systems perspective to construct a public enterprise “mental” model of a public organization to understand the strategic context for practical action and the stakeholder relations involved. Students demonstrate their knowledge of the interrelated flows of money, knowledge, and influence, as they weave these elements in their model. They engage in readings and practical assignments that emphasize management and leadership in a time of unprecedented and unpredictable change. Students also work toward developing professional-action habits for pragmatic-action learning in the practice of public administration.

HUMN 8392 - The Language of Leadership

(5 cr.)
In today's complex environment, leaders engaged in shaping public policy must know how to use the emotional as well as the intellectual power of language to motivate, inspire, and competently manage their organizations. Dynamic leadership requires understanding and use of techniques that affect both conscious and unconscious influences on human behavior. Effective communication connects at many different levels. Students acquire both theoretical and practical information that demonstrates the necessary components for making such connections and that shows them why stories, symbols, and metaphors are essential elements in the language of leadership.

HUMN 8401 - Trauma, Crisis, and Stress With Military Personnel♦

(5 cr.)
The specific focus of this course is on combat trauma, crisis, and stress experiences and responses of military personnel—both wartime and post-war. Students develop an understanding of the short-term and long-term impact of post-traumatic stress and vicarious trauma. In addition to focusing on how combat and wartime experiences impact individual military personnel, students also explore the effects on families. As a result, students will be better prepared to provide services and mental health support to military personnel dealing with trauma, crisis, and stress.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.
HUMN 8402 - Working with Military Spouses, Families, and Children

(5 cr.)
The nature of military work responsibilities impacts not only military personnel but their families as well. Frequent family relocations, extensive deployments, parent-child separation, and high-risk jobs all contribute to unique family dynamics. This course is designed to educate students about the experience and unique support needs of military personnel and their families.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8403 - Military Culture

(5 cr.)
This course is designed to provide students with an understanding of military culture. The focus of this course is on understanding the world of work for military personnel; the sociocultural identity development of military personnel; the experience of military families; support for military personnel and their families; and socioeconomic and other lifestyle challenges for military personnel. As a result of this course, students will be more informed about the mental health and social support needs of these populations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8405 - Ethics and Social Justice

(5 cr.)
Ethics is a foundational element of leadership. In this course, students examine the philosophy of ethics as well as responsibility and social justice—basic tenets of public service. Students explore the complex social, political, and related ethical challenges leaders face as they seek to meet the needs of diverse constituents. They examine ethics and social justice related to economic disparity, power, and privilege. Students also assess demographic data and current social trends and themes to understand, analyze, and address ethical and social justice issues that impact service delivery in a global community. Applying concepts presented in the course, students engage in an in-depth assessment of an emerging or persistent ethical or social justice issue, through which they demonstrate their ability to make recommendations for improvement or change.

HUMN 8431 - Finance and Budgeting for the Public Sector

(5 cr.)
Sound financial practices are crucial to managing scarce funds in both public and nonprofit operations. Students in this course examine finance and budgeting concepts, policies, and practices related to organizations as well as the fiscal climate within which
they operate. They assess theories for motivating major fiscal-policy debates, and they explore and discuss auditing practices, tax systems, financial management, budgetary reform, financial technology systems, the use of dashboards for financial reporting, and the impact of globalization on finance and budget. Students read and analyze budgets, financial statements, and reports. They contextualize their learning as they apply knowledge gained from their analysis to develop a new budget and financial plan for either a public or private organization.

HUMN 8451 - Public Policy Analysis

(5 cr.)
Government officials, research programs, and NGOs are increasingly expected to make better and more transparent use of evidence in producing viable policy options within highly complex policy environments that are heavily influenced by power and politics. Public policy analysis has been described as the art and craft of speaking truth to power (Wildavsky, 1987) in seeking ways to promote positive social change in these complex environments. Policy analysis within this context requires several distinct skill sets: an understanding of the policy context, technical knowledge and analytical tools to identify and apply evidence ethically and with professional judgment, an appreciation and engagement of the concerns and contributions of diverse stakeholders, and the ability to develop and communicate practical policy advice.
This course is framed around Bardach and Patashnik's eightfold path, which lays out a series of iterative, not necessarily sequential, steps to follow when analyzing a policy issue and uses design thinking to guide the process. Students examine key concepts of public policy analysis through evidence-based research to locate issues in relation to theory and current trends. This course provides project-based opportunities to practice and gain the skills and knowledge to use evidence to shape policy more effectively.
Prerequisites

- MMPA 6116 or HUMN 8000 or HUMN 6000 or HUMN 8001 or SOCW 8002 or SOCW 8002W or MMHA 6000 or MMHA 6000A or HLTH 8003A or HLTH 8003 or HLTH 8003E or HLTH 8003B or NURS 8003

HUMN 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination

(5 cr.)
In an increasingly complex world, leaders and managers in public and nonprofit organizations plan strategies to fulfill the organizational mission and enhance stakeholder satisfaction. Students in this course explore the role and process of strategic planning, including collaboration, cooperation, and coordination. They also examine the benefits, challenges, and pitfalls of strategic planning, in addition to the impact of globalization. Students apply these concepts to real-life scenarios and develop a strategic plan for a nonprofit or public organization.
HUMN 8511 - Treatment of Forensic Populations

(5 cr.)
In this course, students gain the foundational knowledge necessary to evaluate and subsequently treat many different forensic populations, such as sex offenders, substance abusers, and white-collar criminals. Students analyze the use of traditional forms of intervention, including individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice. Applying concepts and theories learned in the course, students develop a project scenario in which they feature an offender and describe treatment approaches as well as related ethical, legal, and multicultural factors that may impact treatment. Reflecting on the course, students also consider and discuss professional identity and goals.

HUMN 8513 - Juvenile Justice, Delinquency, and Development

(5 cr.)
In this course, students focus on the various aspects of the juvenile justice system and the population that it serves. Students receive an overview of development theories, such as biological, cognitive, social-emotional, and social. Students apply these theories to cases of juvenile delinquency to determine appropriate prevention, treatment, and intervention strategies. They examine juvenile justice codes, case law, and effective methods for reporting offenses. Students also explore the changing landscape of the juvenile justice field based on current research of its population. Using theories presented in the course, students develop a delinquency-prevention or treatment program for their community, focusing on the underlying goal of social justice and change.

HUMN 8550 - Preparing for Dissertation

(5 cr.)
Students in this course focus specifically on the process of writing the dissertation prospectus. Students use their preliminary research plan, developed previously, and develop a problem statement, to be used in the dissertation. They further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a dissertation prospectus. The prospectus is a brief paper, typically 15–20 pages in length, that lays out the background for the problem statement, the problem statement itself, a survey of the relevant literature, typically 25–75 references, and a research, implementation, and evaluation plan for the solution of the problem.
Prerequisites
- RSCH 8110
- RSCH 8210
- RSCH 8310
HUMN 8651 - Board Governance and Volunteer Management♦

(5 cr.)
Volunteers are the "lifeblood" of many nonprofit organizations. These organizations rely heavily on their volunteer board of directors to govern and guide them toward their mission. The success of nonprofit organizations is largely dependent on the effective management of program volunteers and board members. In this course, students explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation, with an emphasis on creating and maintaining an effective board of directors. Students design a board development or volunteer management plan based on the concept paper they developed in the Introduction to the Nonprofit Sector course.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8651D - Board Governance and Volunteer Management♦

(5 cr.)
Volunteers are the lifeblood of many nonprofit organizations. These organizations rely heavily on their volunteer board of directors to govern and guide them toward their mission. The success of nonprofit organizations is largely dependent on the effective management of program volunteers and board members. This course explores the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation, with an emphasis on creating and maintaining an effective board of directors. Students design a board development or volunteer management plan based on the concept paper they developed in the Introduction to the Nonprofit Sector course.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8660 - Social Change, Leadership, and Advocacy for Human Services Professional Practitioners

(5 cr.)
This capstone course is the culmination of the MS in Human Services program. In this course, students have the opportunity to demonstrate senior case management skills and their understanding of the responsibility and leadership of the advanced human services professional practitioner to advocate for social change with service users, organizations, communities, and the human services profession. Students also demonstrate methods of advanced human services practice within local, national, and international organizations. Students continue to enhance their professional
development plans by preparing for professional opportunities.

Prerequisites
- HUMN 8785
- HUMN 8160
- HUMN 8162

HUMN 8662 - Psychology and Social Change

(5 cr.)
In this course, students analyze and evaluate theories of social and personal change. Students engage in a variety of conceptual and application assignments focused on power and social inequalities, ethnic inequalities, global environment, and issues related to gender and sexism, such as homophobia. In addition, students examine the impact of social change theories on children, families, and societies. They explore the concepts of change agent and change advocate as well as the role of the psychologist as change agent. Students also engage in an integrative written assignment to synthesize theories and analyze a current social problem in their community, for which they propose an action to address the issue and drive positive social change.

HUMN 8700 - Psychology and Social Change

(5 cr.)
Students in this course focus on the theories of social and personal change. Topics include power and social inequalities, ethnic inequalities, global environment and social change, issues related to gender and sexism, and homophobia. In addition, students are presented with impact of social change theories on children, families, and societies. The concepts of change agent and change advocate are explored, as well as the role of the psychologist as change agent.

HUMN 8701 - Culture and Psychology

(5 cr.)
Students in this course explore the cultural components, research, and theory of cross-cultural psychology. In addition to the previously listed goals, students focus on the impact that culture has on the field of psychology around the world. The scope of this course is broad, with the core theme being cross-cultural psychology (focusing on cultures representing different parts of the world) and comparing cultural influence on human psychology. Many of the topics addressed in the course are related to human development. Additionally, interactions between culture and social behaviors, health, mental health, and mental illnesses are emphasized throughout the duration of this course.

HUMN 8702 - Introduction to the Dynamics of Conflict and Negotiation
(5 cr.)
In this course, students are introduced to the seminal theories and practices of alternative dispute resolution (ADR). They explore conflict analysis, negotiation, and mediation strategies. Through a series of case studies, virtual role plays, and simulation exercises, students gain insight into the practice of ADR, and they have the opportunity to develop some effective negotiation and mediation skills. Students gain a greater understanding of the differences between principled and positional negotiation and mediation, including such professional concepts as fairness, integrity, trust, and confidentiality.

**HUMN 8723 - Theories of Counseling**

(5 cr.)
This course introduces theories of counseling and psychotherapy to prepare students to conceptualize problems and respond with appropriate, evidence-based interventions and techniques. Students will become familiar with the origin, key concepts, and interventions and techniques of each of the theories presented. Students will develop an awareness of how counseling theories drive the treatment process and apply theories to diverse case studies. A major focus of this course is to support students as they develop their personal theoretical orientation.

**HUMN 8729 - Substance Abuse Counseling**

(5 cr.)
The impact of substance abuse on the lives of people with addictions, and the lives of their families, makes for a highly complex and challenging area of mental health counseling. Counselors working with these individuals must possess a comprehensive understanding of the background, controversies, and current approaches in regard to the treatment of substance abuse. In this course, students examine psychological aspects of addictions involving alcohol, prescription medications, and illegal substances. They also examine current research in the field of dependency and addiction. Students engage in a variety of conceptual and application-based assignments on diagnosing patients, choosing among models of treatment, planning treatment, using group and family treatment plans, and ensuring treatment efficacy. They also consider strategies to promote change, including the trans-theoretical model of behavior change.

**HUMN 8741 - Psychology of Terrorism**

(5 cr.)
Many sources define terrorism as a type of psychological warfare, as it induces fear and feelings of vulnerability. Therefore, professionals need to understand all aspects of terrorism to help prevent further terroristic acts and respond to victims who have been affected psychologically. Students in this course explore terrorism from a psychological perspective. They examine types of terrorism; contributing factors related to the
development of terrorists and terrorist organizations; counterterrorism agencies and laws; the impact of terrorist events on individuals, families, and communities; prevention, intervention, and postvention with survivors; media coverage of terrorist events; human rights and ethical issues; and future trends related to the psychology of terrorism. Students also examine the threat of terrorism in their own community and evaluate the potential impact. Using concepts presented in the course, they consider applications for preventative measures as well as strategies to promote resiliency among individual and families who may become victims of terrorism.

HUMN 8742 - Conflict, Conflict Resolution, and Peace

(5 cr.)
Through this course, students engage in a study of conflict, conflict resolution, and peace from psychological and social psychological perspectives. Students examine the concept of conflict and methods of addressing it, including management, resolution, and transformation; theories related to conflict resolution; approaches to conflict resolution, including negotiation and third-party interventions; and social psychological factors that influence conflict and conflict resolution. They also consider the influence of culture in conflict and conflict resolution; the role of ethics; intractable and international conflicts; the concept of peace; and how third-party approaches can contribute to the peace process. Students apply conflict resolution approaches to conflicts at all levels, from interpersonal to those involving whole nations.

HUMN 8750 - Leadership Development

(5 cr.)
An understanding of the psychological principles of leader development often enhances leadership skills and ability to influence others to work toward common goals. In this course, students examine the psychology of leadership and leader development through cross-cultural, social, psychological, and political contexts. They identify and assess the psychological theories of leadership, leadership styles, qualities of great leaders, global leadership competencies, and instruments used to assess leadership and leadership potential. Students apply these psychological theories to assess and develop their own capacity for leadership.

HUMN 8751 - Leadership Coaching: Process and Practice

(5 cr.)
The intent of leadership coaching is to facilitate psychological change that leads to goal attainment and enhanced performance. In this course, students apply evidence-based psychological approaches to coaching case studies. They assess coaching roles and settings; skills and competencies; models and frameworks; and current issues and future trends. Students employ critical-thinking skills and synthesize concepts learned in the course to develop a plan for implementing effective coaching in a real-world setting.
HUMN 8756 - International/Cross-Cultural Issues in Organizations

(5 cr.)
International and cross-cultural factors often influence organizational, group, and team processes and functions. Students in this course examine workplace issues arising from diverse cultural contexts. Students explore international and cultural comparisons of work motivation, communication, leadership, and decision making as well as organizational structures and characteristics. They examine sources, management of conflict, and conflict resolution strategies. Students also have the opportunity to gain practical insight as they assess and present to the class an international or cross-cultural issue in an organization.

HUMN 8764 - Instructional Design for Online Course Development

(5 cr.)
Students in this course explore instructional design for the development of online courses. Different types of online courses and the roles of online instructors are addressed. Students analyze learning theories and approaches for promoting community in online classrooms. Students analyze criteria for developing learning objectives and online instructional strategies in relation to diverse student populations. Issues related to technology, copyright compliance, fair use, and academic integrity are explored. Students analyze assessment and evaluation approaches and explore future trends in online higher education in relation to delivery of instruction and positive social change.

HUMN 8784D - Crisis Management and Leadership♦

(5 cr.)
[Under development]
♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

HUMN 8785 - Social Change in Action: Prevention, Consultation, and Advocacy

(5 cr.)
In this course, students prepare for their roles as change agents in the human services profession. Throughout the course, students focus on a specific social problem they are passionate about and plan for a community needs assessment to address the problem. As they do so, they examine how prevention, advocacy, and consultation are used to effect positive social change. Students also discuss a variety of social change topics with their peers, such as the language of social change, the use of systems thinking to better understand and address social problems, the emergence and progress of social justice issues, and the strategies for effecting global social change.

HUMN 8786D - A Project for Advocacy in Prevention, Intervention, and Social Change♦
Advocacy at its best means promoting social change through unified voices of the community, needs-based decision-making, and protection of the rights and interests of the community. For advanced human services professional practitioners, advocacy is critical in supporting individuals, families, communities, and organizations in driving social change. Human services professional practitioners are often called on by the community to be the voice for those who need one. In this course, students explore the critical role of advocacy in social change, how to be an advocate, and how to create community-based, actionable change. In preparation for the capstone project, students examine the value of a white paper in driving change and construct an outline for a white paper that will become part of their capstone.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

HUMN 8809 - Fundamentals of Law and Public Policy

(5 cr.)
Legal decisions and the law often have a major impact on the creation of public policy. In this course, students explore and discuss the relationship between laws and public policy and the impact that court decisions have on policy and policy leaders. They examine the role of administrative agencies in the creation and execution of law and public policy and the role of the courts in resolving challenges to agency rule making; conflicts between executive and legislative branches of government; and conflicts between and among federal, state, and local laws. Students have the opportunity to sharpen their critical-thinking and research-database skills as they search for real-world examples of how fundamental legal concepts and processes affect the creation and execution of law and public policy.

HUMN 8810 - Community Psychology

(5 cr.)
Students in this course are introduced to the basic concepts and practice of community psychology. Guiding values and assumptions of the field, basic ecological concepts, and models of intervention are examined. Topics include diversity in community psychology, social change, primary and secondary prevention, community mental health, empowerment, stress, and resiliency.

HUMN 8815 - Introduction to Dimensions of Contemporary Aging

(5 cr.)
Great improvements in medicine, public health, science, and technology enable today’s older adults to live healthier, longer lives. In this course, students will explore theories and practices for providing services to older adults who remain independent and vibrant members of their families and communities. Students will delve into models of aging in
place, including ways of assessing health and social and economic needs, as well as identifying and prioritizing options in physical, mental, emotional, and intellectual health promotion activities and programs.

HUMN 8821 - Tools for Sustainable Community Development

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

HUMN 8831 - Critical Incident Leadership and Planning

(5 cr.)
Strategic leadership and planning are required to effectively prevent, respond to, and recover from critical incidents that threaten homeland security. Students in this course explore the role and importance of leadership and planning in critical incident management and the application of tools, strategies, and systems to specific critical incidents. Through the evaluation of case students, students examine the impact of critical incidents on individuals and communities as well as roles of government agencies and nongovernment organizations in managing such incidents. Using concepts and theories presented in the course, students develop a critical incident management plan for their community through which they consider new strategies and perspectives in regard to critical incident leadership and planning.

HUMN 8852 - Resource Development

(5 cr.)
All nonprofit organizations require financial resources. Obtaining philanthropic financial support is essential to program delivery and stability. Students explore the concepts of philanthropy and development, identification of funding sources, donor/prospect cultivation and education, and solicitation and appreciation strategies. An emphasis is placed on creating an organizational philanthropic culture based on ethics and donor relationships. Students create a resource development plan for the organization designed in the Introduction to the Nonprofit Sector course.

HUMN 8862 - Psychology and Social Change
In this course, students analyze and evaluate theories of social and personal change. Students engage in a variety of conceptual and application assignments focused on power and social inequalities, ethnic inequalities, global environment, and issues related to gender and sexism, such as homophobia. In addition, students examine the impact of social change theories on children, families, and societies. They explore the concepts of change agent and change advocate as well as the role of the psychologist as change agent. Students also engage in an integrative written assignment to synthesize theories and analyze a current social problem in their community, for which they propose an action to address the issue and drive positive social change.

HUMN 8912 - Mental Health Law

Students in this course examine several different aspects of the law related to mental health issues. Laws and court decisions that affect the practice of psychology—such as the Tarasoff ruling, mandated reporting, and the Health Insurance Portability and Accountability Act (HIPAA)—are addressed, as are the many areas of law that constitute forensic psychological practice, including civil matters (such as personal injury and civil competency issues) and criminal matters (such as competency to stand trial, criminal responsibility, diminished capacity, and death penalty issues).

HUMN 9001 - Dissertation

Through this course, doctoral students have the opportunity to integrate their Program of Study into an in-depth exploration of an interest area that includes the completion of a research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation. Once students register for HUMN 9001, they are registered each term until successful completion of the dissertation. Students take this course for a minimum of three quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Prerequisites

- All prior coursework
HUMN 9001A - Communities of Practice and Research 1

(1 cr.)
This course is the first part of the capstone journey. The community created here becomes part of the student's program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. As a human services professional practitioner at the doctoral level, students are preparing to be leaders in applying research to practice in the field. This community of practice and research can prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden's resources that support human services field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.
Note: Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

HUMN 9001D - Communities of Practice and Research 1

(1 cr.)
This course is the first part of the capstone journey. The community created here becomes part of the student's program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. As a human services professional practitioner at the doctoral level, students are preparing to be leaders in applying research to practice in the field. This community of practice and research can prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden's resources that support human services field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.
Note: Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

HUMN 9002A - Communities of Practice and Research 2

(1 cr.)
This course is the next part of the capstone journey. The community created here becomes part of the student's program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community
classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. As a human services professional practitioner at the doctoral level, students are preparing to be leaders in applying research to practice in the field. This community of practice and research can prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden’s resources that support human services field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.

**Prerequisites**
- HUMN 9001A

**Note:** Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

**HUMN 9002D - Communities of Practice and Research 2**

(1 cr.)
This course is the next part of the capstone journey. The community created here becomes part of the student’s program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. As a human services professional practitioner at the doctoral level, students are preparing to be leaders in applying research to practice in the field. This community of practice and research can prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden’s resources that support human services field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.

**Prerequisites**
- HUMN 9001A or HUMN 9001D

**Note:** Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

**HUMN 9003A - Communities of Practice and Research 3**

(1 cr.)
This course is the next part of the capstone journey. The community created here becomes part of the student's program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. As a human services
professional practitioner at the doctoral level, students are preparing to be leaders in applying research to practice in the field. This community of practice and research can prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden’s resources that support human services field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.

Prerequisites
- HUMN 9002A

Note: Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

HUMN 9003D - Communities of Practice and Research 3

(1 cr.)
This course is the next part of the capstone journey. The community created here becomes part of the student’s program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. As a human services professional practitioner at the doctoral level, students are preparing to be leaders in applying research to practice in the field. This community of practice and research can prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden’s resources that support human services field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.

Prerequisites
- HUMN 9002A or HUMN 9002D

Note: Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

HUMN 9004A - Communities of Practice and Research 4

(1 cr.)
This course is the next part of the capstone journey. The community created here becomes part of the student’s program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. As a human services professional practitioner at the doctoral level, students are preparing to be leaders in applying research to practice in the field. This community of practice and research can
prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden's resources that support human services field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.

Prerequisites
- HUMN 9003A

Note: Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

HUMN 9004D - Communities of Practice and Research 4

(1 cr.)
This course is the next part of the capstone journey. The community created here becomes part of the student's program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. As a human services professional practitioner at the doctoral level, students are preparing to be leaders in applying research to practice in the field. This community of practice and research can prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden's resources that support human services field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.

Prerequisites
- HUMN 9003A or HUMN 9003D

Note: Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

HUMN 9005A - Communities of Practice and Research 5

(1 cr.)
This course is the next part of the capstone journey. The community created here becomes part of the student's program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. As a human services professional practitioner at the doctoral level, students are preparing to be leaders in applying research to practice in the field. This community of practice and research can prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden's resources that support human services
field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.

Prerequisites

- HUMN 9004A

Note: Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

HUMN 9005D - Communities of Practice and Research 5

(1 cr.)
This course is the next part of the capstone journey. The community created here becomes part of the student’s program for five quarters, and the goal is to prepare for the dissertation study—the culminating work in the program. In this community classroom, students meet their doctoral mentor and other students. They discuss ideas related to applied research, writing, and project planning. This community of practice and research can prepare students to develop an applied study in a human services area important to them. Students become familiar with Walden’s resources that support human services field research development, strategies to organize research, research methods and resources, and finding a research question for their study. In the fifth quarter, students draft their prospectus in preparation to conduct their study.

Note: Students are continuously registered in the Communities of Practice and Research course (1–5) for five terms.

HUMN 9100D - DHS Capstone

(5 cr.)
The final doctoral capstone/project demonstrates students’ scholarly ability to examine, critique, and synthesize knowledge and experience, so that new ideas can be tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. Doctoral students can integrate their program of study into an in-depth exploration of an interest area, culminating in the completion of their capstone/project in this course. Students complete the capstone/project independently, with the guidance of a Supervisory Committee Chair and committee members. Students complete a Prospectus, Proposal, Research Ethics Review (IRB), and a final written capstone/project and oral presentation. The order and format of the various steps vary based on the professional doctoral program and capstone/project type. Be sure to follow the guidance in the appropriate capstone/project Guidebook and use the checklists, rubric, and writing templates for your program and your specific capstone/project type.

Prerequisites
• All coursework including Communities of Practice and Research courses must be completed.

HUMN 9110D - Capstone: Prevention, Intervention, and Consultation

(5 cr.)
[Under development]
Prerequisites
• All coursework including Communities of Practice and Research courses must be completed.

IDST 1035 - Self in Society: An Interdisciplinary Approach♦

(5 cr.)
In this course, students examine how self-perception is created by personal, societal, and educational influences. Topics studied will include family, community, work, education, and other related topics. By looking at how the "self" evolves, students will be able to see themselves within a larger social context. Students will also focus on how the study of self applies to the interdisciplinary process.
Prerequisites
• ENGL 1001 or ENGL 1010

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IDST 1050 - Interdisciplinary Experience: Identity in a Global Society♦

(5 cr.)
The aim of this course is to sensitize students to the role of a global society in the development of identity. Students collaborate to explore multiple perspectives derived from the social and natural sciences and the humanities. Subject matter is treated as unresolved issues to be explored rather than defined knowledge to be learned. Upon completion, students will be able to articulate how sense of self cannot rely on authority or status alone.
Prerequisites
• ENGL 1001 or ENGL 1010

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IDST 1050C - Interdisciplinary Experience: Identity in a Global Society
The aim of this course is to sensitize students to the role of a global society in the development of identity. Students collaborate to explore multiple perspectives derived from the social and natural sciences and the humanities. The subject matter is treated as unresolved issues to be explored rather than defined knowledge to be learned. Upon completion, students will be able to articulate how sense of self cannot rely on authority or status alone.

Prerequisites
- ENGL 1001 or ENGL 1010

**IDST 2050 - Interdisciplinary Experience: Sustaining Quality of Life in the City**

In light of global urbanization, students in this course discuss the components that contribute to a meaningful life in the city and the ways in which urban communities strive to achieve it. Students collaborate to explore multiple perspectives derived from the social and natural sciences and the humanities. Upon completion, students will understand the factors that contribute to improving quality of life in an urban environment.

Prerequisites
- ENGL 1001 or ENGL 1010

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**IDST 2050C - Interdisciplinary Experience: Sustaining Quality of Life in the City**

In light of global urbanization, students in this course discuss the components that contribute to a meaningful life in the city and the ways in which urban communities strive to achieve it. Students collaborate to explore multiple perspectives derived from the social and natural sciences and the humanities. Upon completion, students will understand the factors that contribute to improving quality of life in an urban environment.

Prerequisites
- ENGL 1001 or ENGL 1010

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**IDST 3050 - Interdisciplinary Experience: Change and Population Movements Across Borders**
(5 cr.)
Explore the changes—both real and perceived—experienced by immigrants and the members of an existing community. Students collaborate to explore multiple perspectives derived from the social and natural sciences and the humanities. Subject matter is treated as unresolved issues to be explored rather than defined knowledge to be learned. Upon completion, students will be able to identify how population movements affect individuals and communities.

Prerequisites
- IDST 1001 or IDST 3035 or PSYC 1002
- PSYC 1003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IDST 4001 - Seminar in Interdisciplinary Research

(5 cr.)
Students deepen interdisciplinary investigation by participating in a unique experience within a community of learners. Students identify an issue to investigate, utilize interdisciplinary research skills, and interact with peers to reflect on the process. Upon completion, students will improve their skills in interdisciplinary integration and develop a broader perspective of the issue through a collaborative online experience.

Prerequisites
- IDST 3050

IDST 4002 - Seminar in Public Service♦

(5 cr.)
As a supplement to students' approved service learning placement, students in this seminar course gain interdisciplinary research skills with applications to the service of others. Activities include creating action plans for service, interviews with an audience, examination of multiple viewpoints, and reflection. Upon completion, students will integrate their experience gained from the service learning opportunity with theory to articulate multiple perspectives.

Prerequisites
- ENGL 1001 or ENGL 1010

Note: This course is delivered over a 6-week term, but is equated to IDST 4002E, which is delivered over a 12-week term.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IDST 4003 - Seminar With Internship♦
As part of students' approved internship placement, this seminar course is an opportunity for students to apply their disciplinary focus and interdisciplinary process in real-life settings. Activities include creating an action plan for internship, interviews with an audience, examination of multiple viewpoints, and reflection. Upon completion, students will integrate their experience gained from the internship opportunity with theory to articulate multiple perspectives.

Prerequisites
  - ENGL 1001 or ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IDST 4004 - Seminar With Study Abroad

In conjunction with students' study abroad experience, students taking this course have the opportunity to engage with other cultures and integrate their experiences abroad with their disciplinary focus utilizing interdisciplinary process. Activities include creating an action plan for study abroad, examination of multiple viewpoints, and reflection. Upon completion, students will integrate their experience gained from the study abroad opportunity with theory to articulate multiple perspectives.

Prerequisites
  - ENGL 1001 or ENGL 1010

Note: This course is also available in a 12-week option.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IDST 4080 - Capstone—Interdisciplinary Methodology

Students are required to demonstrate breadth and depth of their disciplines' content and methods to address a complex problem. Students will engage in collaboration, critiquing, individual research, and integration. Upon completion, students will use creative thinking and decision-making to draw on interdisciplinary insights.

Prerequisites
  - Completion of all other coursework with the exception of IDST 4081

IPSY 5100 - Themes and Theories of I/O Psychology

In this course, students are introduced to theories, research, and themes that form the
tenets of psychology. Basic theoretical models will be reviewed, including psychodynamic, cognitive, developmental, social learning/socio-cognitive, behaviorist, learning and motivation, systems, biopsychosocial, and gender theories. Theories encompassing diverse populations, including cross-cultural and feminist theories, will also be examined. Students will critically examine the strengths and limitations of these theories and their utility in the field of psychology. Contemporary themes in psychology will be explored, with an emphasis on application of theories designed to effect positive social change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**IPSY 6002 - Foundations of Graduate Study in Psychology**

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students build a foundation for academic and professional success as social change agents. They assess the relationship of Walden's mission and vision to professional goals. They establish connections with their peers and the broader Walden community. Students engage in course assignments focused on the practical application of scholarly writing, critical-thinking skills, academic integrity, ethics, and the promotion of professional and academic excellence within the field of psychology.

**IPSY 6005 - Business Concepts for the Organizational Development Professional**

(5 cr.)
Today's business environment is characterized by increasing levels of complexity, competition, and change. Therefore, organizations must be designed to adapt quickly in order to survive. In this course, students apply business concepts and strategies to the design of organizations and the improvement of core business functions (e.g., operations management, marketing, finance and accounting, and information technology), in response to a rapidly changing external environment. In doing so, students consider the importance of aligning the design of an organization's strategy, structure, culture, processes, and human resources practices to achieve organizational success. Students also explore topics such as product portfolio management, business process management, employer branding, quality management, and change management.

**Prerequisites**
- IPSY 6200

**IPSY 6101 - Introduction to Forensic Psychology**

(5 cr.)
Students in this course are provided with an expansive overview of forensic psychology,
including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They learn how forensic psychology links to the criminal justice system as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the field.

**IPSY 6200 - Themes and Theories of I/O Psychology**

(5 cr.)
In this course, students are introduced to theories, research, and themes that form the tenets of psychology. Basic theoretical models will be reviewed, including psychodynamic, cognitive, developmental, social learning/socio-cognitive, behaviorist, learning and motivation, systems, biopsychosocial, and gender theories. Theories encompassing diverse populations, including cross-cultural and feminist theories, will also be examined. Students will critically examine the strengths and limitations of these theories and their utility in the field of psychology. Contemporary themes in psychology will be explored, with an emphasis on application of theories designed to effect positive social change.

**IPSY 6200TL - Themes and Theories in Industrial and Organizational Psychology [Tempo Learning®-Specific Course]**

(5 cr.)
Students in this course are introduced to the field of industrial/organizational psychology. The major focus is on industrial/organizational psychology, themes, models, and theories, as well as practical implications to individuals, groups, and organizations in a variety of workplace settings. Students evaluate and apply research, models, and theories related to practice in areas such as selection, training, and performance, as well as leadership, team dynamics, organizational development, and change.

*Note:* This version of IPSY 6200 is only available as part of specific competency-based Tempo Learning® programs.

**IPSY 6214 - Consulting for Organizational Change**

(5 cr.)
Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development;
strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

Prerequisites
- IPSY 6200

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IPSY 6214TL - Consulting for Organizational Development and Change [Tempo Learning®-Specific Course]

(5 cr.)
Students in this course have the opportunity to learn how to promote and implement organizational development and change by using fundamental techniques of change management. They examine and apply these tools, including consulting competencies, approaches, and organizational change models. Students explore methods for improving individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

Prerequisites
- IPSY 6200TL

Note: This version of IPSY 6214 is only available as part of specific competency-based Tempo Learning® programs.

IPSY 6216 - Dynamics of Contemporary, International, and Virtual Organizations

(5 cr.)
Globalization, technological innovation, and market factors continually change the context of business, requiring professionals who understand how organizations function to work through challenges and harness opportunities for change. In this course, students explore the implications of the changing nature of organizations as well as the emergence of international and virtual organizations in a global economy. Through contextual and application-based assignments, students address the unique opportunities and challenges for government, for-profit, nonprofit, international, and virtual organizations. Applying acquired knowledge and skills, students provide a diagnosis and recommendations for a specific organization’s development efforts.

Prerequisites
- IPSY 6200
IPSY 6333 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness

(5 cr.)
Students in this course have an opportunity to explore and understand the cultural values and styles of communication, reasoning, and leadership unique to their home culture. Students apply their increased understanding to other cultures. They also identify and become familiar with the challenges American nonprofits face as they work internationally or cross-culturally within the United States.

IPSY 6393 - Capstone

(5 cr.)
Students are provided with the opportunity to synthesize knowledge and skills acquired throughout their program into a practical project designed to promote positive social change in a capstone project. During this course, students work on a capstone project in which they complete a major integrative paper on a topic related to their specialization, incorporating theoretical and practical knowledge as well as social scientific research skills acquired throughout the program. The instructor may approve other capstone projects presented by students.
Prerequisites
- All prior coursework

IPSY 6480 - Psychology of Organizational Behavior

(5 cr.)
Students in this course examine the application of behavioral theories in organizational settings. The focus is on individual, group, and organizational behavior. Topics include individual differences in employee motivation and job satisfaction, group development, team building, organizational leadership, and organizational design, culture, and development. Students acquire a broad knowledge base in organizational psychology, its research, and its applications.
Prerequisites
- IPSY 6200

IPSY 6519 - Human Factors

(5 cr.)
Industrial and Organizational (I/O) psychologists need to understand how people and systems interact. This course provides students with a working knowledge/understanding of human factors design concepts, principles, and guidelines based on the unique psychological and physical characteristics of people. Students explore the impact of human system interaction with the system interface, workspace,
and environment. Course content also introduces cognitive engineering, ergonomic design, and performance assessment in human-systems integration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IPSY 6520 - Police Psychology

(5 cr.)
Students in this course learn about the various roles and responsibilities of forensic psychology professionals working with and in police departments, the structures and organizations in which they work, and the skills needed to perform daily functions, such as counseling and supporting police. Students analyze and discuss common issues and challenges, including crisis situations, psychological risks of police work, and stress management. They also explore less common roles of psychology professionals working with police, such as training in hostage negotiations and the selection of special officers (SWAT, snipers, and tactical commanders). Engaging in assignments designed to provide application of content, students gain practical insight on a variety of topics, such as diversity issues and training, community impact, and forensic psychology operations.

IPSY 6521 - Psychology in the Courts

(5 cr.)
Forensic psychology professionals play a vital role in the court system, providing consultation, expert testimony, and recommendations for treatment. In this course, students have the opportunity to acquire the knowledge and skills used by forensic psychology professionals working in the courts. Students examine major roles of psychology professionals, their responsibilities, and required proficiencies, such as oral and written communication skills. Through application-based exercises, students engage in practical exercises, such as in writing reports, planning evaluations, and preparing witnesses for testimony. Students also consider contemporary challenges, ethical and legal issues, and the impact of technology on courts in the United States.

IPSY 6522 - Occupational Health and Safety♦

(5 cr.)
The course examines the application of psychological theory and principles in protecting and promoting the health, safety, and well-being of workers and improving the quality of their work life. The focus is on identifying workplace interventions to reduce workers’ exposure to hazards, while promoting individual interventions to equip workers with knowledge and resources to control and mitigate hazards in the work environment. Issues such as workplace stress, bullying, and violence are also considered along with the more traditional emphasis on accident investigation and accident prevention tied to safety management.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
IPSY 6540 - Strategic Planning, Management, and Leadership in a Global Context

(5 cr.)
Public policy implementation can take place in various types of organizations. Students in this course engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships between strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: thinking, acting, and leading strategically. They apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Through this course, students are offered a hands-on approach that tests students’ ability to make effective and timely management and leadership decisions in complex and uncertain conditions.
Prerequisites
• IPSY 6200

IPSY 6551 - I/O Testing and Measurement♦

(5 cr.)
Students in this course learn in depth about measurement theory and the tests used in organizational settings. They study a comprehensive examination of psychometric properties used to develop and evaluate these instruments, including classical test theory, item response theory (IRT), and item forensics approaches to testing. Topics include normative sampling and standardization, reliability and validity, test score interpretation, and test development. Students also address ethical, legal, and sociocultural issues, including cultural bias and fairness. A foundation for the course is professional standards for testing.
♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IPSY 6552 - Psychology of Motivation at Work♦

(5 cr.)
Students in this course receive an in-depth study of major topics in micro-level organizational behavior. Accountability, organization citizenship behaviors, forms of organizational attachment, motivation, goal theory, and issues of equity and justice will be covered.
♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IPSY 6700 - Psychology of Social Change

(5 cr.)
In this course, students analyze and evaluate theories of social and personal change. Students engage in a variety of conceptual and application assignments focused on power and social inequalities, ethnic inequalities, global environment, and issues related to gender and sexism, such as homophobia. In addition, students examine the impact of social change theories on children, families, and societies. They explore the concepts of change agent and change advocate as well as the role of the psychologist as change agent. Students also engage in an integrative written assignment to synthesize theories and analyze a current social problem in their community, for which they propose an action to address the issue and drive positive social change.

IPSY 6701 - Culture and Psychology

(5 cr.)
Students in this course explore the cultural components, research, and theory of cross-cultural psychology. In addition to the previously listed goals, students focus on the impact that culture has on the field of psychology around the world. The scope of this course is broad, with the core theme being cross-cultural psychology (focusing on cultures representing different parts of the world) and comparing cultural influence on human psychology. Many of the topics addressed are related to human development. Additionally, interactions among culture and social behaviors, health, mental health, and mental illnesses are emphasized throughout the duration of this course.

IPSY 6705 - Organizational Behavior Performance and Evaluation♦

(5 cr.)
The focus of this organizational behavior and human capital development course is on organizational behavior, motivation, collaboration, and performance and evaluation of individuals and teams. Some of the questions that may be explored relate to how human resource managers motivate and build resiliency in their organizational culture. Students will also consider the influence of organizational structure behavior on individuals and teams, how behavior and motivation are impacted in a global virtual environment, and the impact of expert systems and artificial intelligence on the behavior of employees.

Prerequisites
• IPSY 6200

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IPSY 6706 - Ethics and Standards of Industrial Organizational Psychology♦
Students in this course examine the origins of professional codes of ethics and standards of scientific psychology. Topics include ethical issues in academics (research, teaching, supervision), various work settings (assessment, consulting), and ethics involved in working with diverse populations. Additionally, students are introduced to forensic psychology and ethical issues related to the legal system. Students also explore how cultural factors are addressed in various ethical codes and the implications for scholar-practitioners.

Prerequisites
- IPSY 6200

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**IPSY 6706TL - Ethics, Values, and Legal Issues in I/O Psychology [Tempo Learning®-Specific Course]**

(5 cr.)
Ethical behavior is an essential component of psychological practice for industrial and organizational (I/O) psychology psychologists. The focus of this course is on understanding and applying the American Psychological Association’s Ethical Principles of Psychologists and Code of Conduct. Through a combination of seminal texts, journal articles, contemporary case studies, and media resources students explore the complexities and ethical challenges encountered by I/O psychologists in today's global society. In this course, students are introduced to conceptual tools and models that will help them clarify ethical dilemmas, professional values, and analyze decision-making strategies. In addition to studying the ethical decision-making process in depth, students explore ethical topics relevant to the I/O psychologist. Topics examined include the impact of technology and social media, ethics in consulting, research, academic, multinational business, legal issues, and organizational settings. Special attention is given to the ethics of corporate sustainability and social responsibility and the role I/O psychology can play in contributing to positive social change. The course also has students address their own professional and personal development from the perspective of an I/O psychologist-in-training.

Prerequisites
- IPSY 6200TL

Note: This version of IPSY 6706 is only available as part of specific competency-based Tempo Learning® programs.

**IPSY 6715 - Human Resource Strategy, Legal, and Ethical Considerations♦**

(5 cr.)
In this course students focus on strategic planning that supports labor relations,
succession planning, retention of both tacit and explicit knowledge, as well as the strategic role of information technology in human resources management. Students will also consider the regulatory requirements for global organizations as well as establishment of a positive social and ethical environment.

Prerequisites
- IPSY 6200

Courses

**IPSY 6720 - Strategic Thinking for Effective Human Resource Management**

(4 cr.)

One of the main responsibilities of human resource managers and organizational leaders is to employ human resources (HR) to align with an organization’s needs and goals, moving the organization toward competitive advantage and sustainable success. Students in this course are introduced to advanced research topics in the strategic management of HR within a systems thinking and metrics-based performance measurement context. Students engage in a variety of group activities, discussions, and writing assignments on the analysis of resource-based theories of organizational performance; strategic management; and HR strategy, planning, and management (including succession planning). Students also discuss the role of metrics, knowledge management, and human resource information systems in supporting HR and organizational strategies in global markets. Through extensive reading and literature review, students explore global and ethical dimensions of course topics and identify potential HR research topics for their dissertation.

**IPSY 6725 - Human Resource Talent Management**

(5 cr.)

Managing organizational talent in the 21st century requires organizations to fully engage their workforce to optimize motivation, commitment, and productivity. Leadership and management of the organizational talent strategy to optimize use of global talent is a current organizational necessity, which requires talent management leaders to consider new workforce strategies for selection, recruitment, and retention of the workforce. Topics to be considered include information technology impact on talent management, recognition and reward systems, compensation and benefits, as well as the need to engage an agile workforce.

Prerequisites
- IPSY 6200

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
IPSY 6730 - The Development of Human Capital Within Organizations

(4 cr.)
How do organizational leaders determine who to hire and in what ways do they ensure that capable employees are sustained and managed in a way that guarantees high performance and organizational achievement? Students in this course have the opportunity to answer such questions through the examination of advanced research topics, including the development and management of human capital within organizations. Students engage in group activities, discussions, and writing assignments on human resource concepts related to training and development, rewards and compensation, individual performance management, the role of human resources with individuals for global positions, and organization-wide succession planning. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

IPSY 6740 - The Legal, Ethical, and Cultural Environment of Human Resource Management

(4 cr.)
Considering global-level expansion, issues of diversity, and traditional ethical issues, nearly all organizations must follow a host of laws and regulations; it is the responsibility of managers to know these guidelines for the welfare of employees and stability of the company. Students in this course explore advanced research topics that address the legal, ethical, and cultural environment, both internal to organizations and more broadly. They engage in group activities, discussions, and writing assignments on the analysis of the regulatory environment in which human resource (HR) professionals must operate, HR management's role in communications, management of diversity and inclusion, and promotion of justice within organizations. Through extensive reading and literature review, students engage actively in identifying potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

IPSY 6750 - Human Resource Management and Its Role in Labor Relations, Negotiation, and Conflict Resolution

(4 cr.)
Human resource (HR) managers bridge the gap between employees and management, creating a challenging relationship requiring the ability to recognize and assess conflict, communicate strategically and effectively, and negotiate for resolutions. Students in this course explore this relationship and examine advanced research topics in labor relations, negotiation, and conflict resolution. They engage in group activities, discussions, and writing assignments on a variety of topics, including the HR role in designing and managing conflict resolution processes beginning with mediation and
negotiating with labor and other major human resource constituencies. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

**IPSY 6752 - Leadership Coaching: Application**

(5 cr.)
The intent of leadership coaching is to facilitate psychological change that leads to goal attainment and enhanced performance. In this course, students apply evidence-based psychological approaches to coaching case studies. They assess coaching roles and settings; skills and competencies; models and frameworks; and current issues and future trends. Students employ critical-thinking skills and synthesize concepts learned in the course to develop a plan for implementing effective coaching in a real-world setting.

**IPSY 6753 - Leadership Coaching: Theories, Concepts, and Processes**

(6 cr.)
The intent of leadership coaching is to facilitate psychological change that leads to goal attainment and enhanced performance. In this course, students apply evidence-based psychological approaches to coaching case studies focusing on coaching competencies and ethical practices. They assess coaching roles and settings; skills and competencies; models and frameworks; and current issues and future trends. Students employ critical-thinking skills and synthesize concepts learned in the course to develop a plan for implementing effective coaching in a real-world setting. Students will also engage in hands-on coaching competency and skill development through Voice to Voice training sessions. (This course includes a practice lab).

**IPSY 6754 - Personnel Psychology in the Workplace**

(5 cr.)
In this course, students explore the application of psychological theory and practice to human resources activities in organizations. They examine related topics, including job analysis and design, employee selection and placement, training and development, performance management and appraisal, and legal and ethical considerations in human resources management. Through a group project case study, students research, assess, and share critical issues in personnel psychology. They also demonstrate their ability to conduct effective research and review literature through a final research paper on a topic of interest related to course content and theory.

**Prerequisites**
* IPSY 6200
IPSY 6754TL - Personnel Psychology in the Workplace [Tempo Learning®-Specific Course]

(5 cr.)
In this course, students explore the application of psychological theory and practice to human resource activities in organizations. They examine related topics, including job analysis and design, employee selection and placement, training and development, performance management and appraisal, and legal and ethical considerations in human resource management. Students research, assess, and share critical issues in personnel psychology.

Prerequisites
- IPSY 6200TL

Note: This version of IPSY 6754 is only available as part of specific competency-based Tempo Learning® programs.

IPSY 6755 - Leadership and Leader Development

(5 cr.)
Effective leadership requires the ability to facilitate positive change, lead others in efforts to effect similar change, and work through challenges when met with resistance to change. Students in this course are provided with an extensive overview of leadership theories. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership and change. Students also examine various perspectives on leadership and the role of leadership in the achievement of organizational, group, and team goals. Students engage in practical assignments and discussions, focusing on effective leadership issues and practices during the process of organizational change.

Prerequisites
- IPSY 6200

IPSY 6755TL - Leadership and Leader Development [Tempo Learning®-Specific Course]

(5 cr.)
Leadership is complex and requires an exploration of the nuances, theories, and development required to be an effective leader. Students are provided with an extensive overview of leadership theories examining leadership from historical to more contemporary perspectives. Some of the more contemporary topics students explore include strategic and global leadership, team leadership, emotional intelligence, and crisis leadership. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership. Students also examine various perspectives on leadership and the role of leadership in the
achievement of organizational, group, and individual goals. Students engage in application assignments and discussions, focusing on effective leadership issues and practices. Ethical, cultural, and global aspects of leadership are explored throughout the course. Leader development is emphasized as students examine different leadership issues.

Prerequisites
- IPSY 6200TL

Note: This version of IPSY 6755 is only available as part of specific competency-based Tempo Learning® programs.

IPSY 6756 - Leadership Coaching: Practices and Applications

(6 cr.)
Effective leadership coaches must be fully capable of working with clients immersed in different organizational cultures that present unique challenges. In this course, students apply models, approaches, and frameworks; individual and team coaching strategies; and ethical guidelines to case studies focusing on coaching competencies and ethical practices. Students also examine characteristics, factors, and conditions that influence the effectiveness of coaching; assessment and evaluation; diversity considerations; and professional issues and challenges. Students will also engage in hands-on coaching competency and skill development through Voice to Voice training sessions. (This course includes a practice lab).

Prerequisites
- IPSY 6753
- IPSY 6755

IPSY 6776 - Transformative Change in a Shared-Power World

(5 cr.)
Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

IPSY 8000 - Foundations for Graduate Study in Psychology
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals, and they develop a program of study, a professional development plan, and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

IPSY 8002 - Foundations of Graduate Studies in Psychology

Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students build a foundation for academic and professional success as social change agents. They assess the relationship of Walden’s mission and vision to professional goals. They establish connections with their peers and the broader Walden community. Students engage in course assignments focused on the practical application of scholarly writing, critical-thinking skills, academic integrity, ethics, and the promotion of professional and academic excellence within the field of psychology.

IPSY 8004 - Foundations of Graduate Study in Psychology

Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They assess the relationship of mission and vision to professional goals, and they develop a program of study, a professional development plan, and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. They engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

IPSY 8005 - Business Concepts for the Organizational Development Professional

Today’s business environment is characterized by increasing levels of complexity, competition, and change. Therefore, organizations must be designed to adapt quickly in order to survive. In this course, students apply business concepts and strategies to the design of organizations and the improvement of core business functions (e.g., operations management, marketing, finance and accounting, and information technology), in
response to a rapidly changing external environment. In doing so, students consider the importance of aligning the design of an organization's strategy, structure, culture, processes, and human resources practices to achieve organizational success. Students also explore topics such as product portfolio management, business process management, employer branding, quality management, and change management. 

Prerequisites
For Students Entering With a BS Degree Only
- IPSY 8252

IPSY 8101 - Introduction to Forensic Psychology

(5 cr.)
Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They learn how forensic psychology links to the criminal justice system as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the field.

IPSY 8115 - Writing a Quality Prospectus in Psychology

(5 cr.)
This five-credit course is focused specifically on the process of writing the doctoral study prospectus. Students will use their preliminary research plan, developed previously, and develop a problem statement, to be used in the doctoral study. They further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a doctoral study prospectus. The prospectus is a brief paper, typically 15-20 pages in length, that lays out the background for the problem statement, the problem statement itself, a survey of the relevant literature (typically 25-75 references), and a research, implementation, and evaluation plan for the solution of the problem.

IPSY 8185 - Writing a Quality Prospectus in Psychology

(5 cr.)
This five-credit course is focused specifically on the process of writing the doctoral study prospectus. Students will use their preliminary research plan, developed previously, and develop a problem statement, to be used in the doctoral study. They further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a doctoral study prospectus. The prospectus is a brief paper, typically 15–20 pages in length, that lays out the background for the
problem statement, the problem statement itself, a survey of the relevant literature (typically 25–75 references), and a research, implementation, and evaluation plan for the solution of the problem.

Prerequisites
- IPSY 8412
- RSCH 8260
- RSCH 8360

IPSY 8202 - Survey Research Methods

(5 cr.)
An in-depth study of a range of survey methods administered via in-person interview, self-report, phone interview, and Internet administration is introduced in this course. Topics include survey design, administration, analysis, and addressing sources of bias. Students also review theoretical and empirical research on question and questionnaire effects. Students prepare through the practice of writing questions and designing questionnaires, both in general and in light of existing research.

Prerequisites
- IPSY 8551
- RSCH 8110

IPSY 8214 - Consulting for Organizational Change

(5 cr.)
Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

Prerequisites
- IPSY 8252

IPSY 8216 - Dynamics of Contemporary, International, and Virtual Organizations

(5 cr.)
Globalization, technological innovation, and market factors continually change the
context of business, requiring professionals who understand how organizations function to work through challenges and harness opportunities for change. In this course, students explore the implications of the changing nature of organizations as well as the emergence of international and virtual organizations in a global economy. Through contextual and application-based assignments, students address the unique opportunities and challenges for government, for-profit, nonprofit, international, and virtual organizations. Applying acquired knowledge and skills, students provide a diagnosis and recommendations for a specific organization’s development efforts.

Prerequisites

For Students Entering With a BS Degree Only
- IPSY 8252

IPSY 8252 - Themes and Theories of I/O Psychology

(5 cr.)
In this course, students are introduced to theories, research, and themes that form the tenets of psychology. Basic theoretical models will be reviewed, including psychodynamic, cognitive, developmental, social learning/socio-cognitive, behaviorist, learning and motivation, systems, biopsychosocial, and gender theories. Theories encompassing diverse populations, including cross-cultural and feminist theories, will also be examined. Students will critically examine the strengths and limitations of these theories and their utility in the field of psychology. Contemporary themes in psychology will be explored, with an emphasis on application of theories designed to effect positive social change.

IPSY 8333 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness

(5 cr.)
Students in this course have an opportunity to explore and understand the cultural values and styles of communication, reasoning, and leadership unique to their home culture. Students apply their increased understanding to other cultures. They also identify and become familiar with the challenges American nonprofits face as they work internationally or cross-culturally within the United States.

IPSY 8412 - Research Foundations

(5 cr.)
Students in this course examine and receive support for student readiness regarding the use of quantitative and qualitative research approaches. They study research fundamentals, including the distinction between social problems and research problems, the functions of research problems versus research purpose statements, and the role of theory and conceptual framework in informing research. Students examine quantitative and qualitative concepts central to research methods, design, and analysis. They also
study how research design, methods, and analyses properly align for both quantitative and qualitative approaches. Students demonstrate their knowledge by creating two research outlines, using quantitative and qualitative approaches, which they develop throughout the course. They determine appropriate conditions for the use of mixed-methods approaches and differentiate between types of mixed-methods research designs. Students engage in pre- and post-assessments of skills and knowledge.

**IPSY 8480 - Psychology of Organizational Behavior**

(5 cr.)
Students taking this course examine the application of behavioral theories in organizational settings. The focus is on individual, group, and organizational behavior. Topics include individual differences in employee motivation and job satisfaction, group development, team building, organizational leadership, and organizational design, culture, and development. Students acquire a broad knowledge base in organizational psychology, its research, and its applications.

**Prerequisites**
- IPSY 8252

**IPSY 8519 - Human Factors**

(5 cr.)
Industrial and Organizational (I/O) psychologists need to understand how people and systems interact. This course provides students with a working knowledge/understanding of human factors design concepts, principles, and guidelines based on the unique psychological and physical characteristics of people. Students explore the impact of human system interaction with the system interface, workspace, and environment. Course content also introduces cognitive engineering, ergonomic design, and performance assessment in human-systems integration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**IPSY 8520 - Police Psychology**

(5 cr.)
Students in this course learn about the various roles and responsibilities of forensic psychology professionals working with and in police departments, the structures and organizations in which they work, and the skills needed to perform daily functions, such as counseling and supporting police. Students analyze and discuss common issues and challenges, including crisis situations, psychological risks of police work, and stress management. They also explore less common roles of psychology professionals working with police, such as training in hostage negotiations and the selection of special officers (SWAT, snipers, and tactical commanders). Engaging in assignments designed to provide
application of content, students gain practical insight on a variety of topics, such as diversity issues and training, community impact, and forensic psychology operations.

**IPSY 8521 - Psychology in the Courts**

(5 cr.)
Forensic psychology professionals play a vital role in the court system, providing consultation, expert testimony, and recommendations for treatment. In this course, students have the opportunity to acquire the knowledge and skills used by forensic psychology professionals working in the courts. Students examine major roles of psychology professionals, their responsibilities, and required proficiencies, such as oral and written communication skills. Through application-based exercises, students engage in practical exercises, such as in writing reports, planning evaluations, and preparing witnesses for testimony. Students also consider contemporary challenges, ethical and legal issues, and the impact of technology on courts in the United States.

**IPSY 8522 - Occupational Health and Safety**

(5 cr.)
The course examines the application of psychological theory and principles in protecting and promoting the health, safety, and well-being of workers and improving the quality of their work life. The focus is on identifying workplace interventions to reduce workers' exposure to hazards, while promoting individual interventions to equip workers with knowledge and resources to control and mitigate hazards in the work environment. Issues such as workplace stress, bullying, and violence are also considered along with the more traditional emphasis on accident investigation and accident prevention tied to safety management.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**IPSY 8540 - Strategic Planning, Management, and Leadership in a Global Context**

(5 cr.)
Public policy implementation can take place in various types of organizations. Students in this course engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships between strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: thinking, acting, and leading strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. The hands-on approach of this
course tests students’ ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

Prerequisites
For Students Entering With a BS Degree Only
- IPSY 8252

**IPSY 8551 - I/O Tests and Measurement**

(5 cr.)
Students in this course study in-depth measurement theory and the tests used in organizational settings. Included are a comprehensive examination of psychometric properties used to develop and evaluate these instruments, including classical test theory, item response theory (IRT), and item forensics approaches to testing. Topics include normative sampling and standardization, reliability and validity, test score interpretation, and test development. Students also address ethical, legal, and sociocultural issues, including cultural bias and fairness. Professional standards for testing provide a foundation for the course.

Prerequisites
For Students Entering With a BS Degree Only
- IPSY 8252

**IPSY 8552 - Psychological Motivation at Work**

(5 cr.)
Participants in this course study in depth major topics in micro-level organizational behavior. Accountability, organization citizenship behaviors, forms of organizational attachment, motivation, goal theory, and issues of equity and justice will be covered.

Prerequisites
For Students Entering With a BS Degree Only
- IPSY 8252

**IPSY 8576 - Advanced Personnel Psychology**

(5 cr.)
Participants in this course study in depth advanced topics in personnel psychology, including competency modeling, succession planning, talent management, alternative approaches to validation of selection tests, adverse impact, return on investment, and application of multiple linear regression analysis.

Prerequisites
- IPSY 8754

**IPSY 8579 - Job Attitudes, Measurement, and Change**
Participants in this course study in depth major theories of job attitudes, as well as their antecedents, correlates, and consequences. Topics include job satisfaction, organizational commitment, organizational citizenship behavior, withdrawal behavior, and counterproductive organizational behavior. Application of learning is demonstrated through an applied-attitude survey research project.

**Prerequisites**

- For Students Entering With a BS Degree
  - IPSY 8252
  - IPSY 8551
- For Students Entering With an MS Degree
  - IPSY 8551

**IPSY 8700 - Psychology of Social Change**

(5 cr.)
In this course, students analyze and evaluate theories of social and personal change. Students engage in a variety of conceptual and application assignments focused on power and social inequalities, ethnic inequalities, global environment, and issues related to gender and sexism, such as homophobia. In addition, students examine the impact of social change theories on children, families, and societies. They explore the concepts of change agent and change advocate as well as the role of the psychologist as change agent. Students also engage in an integrative written assignment to synthesize theories and analyze a current social problem in their community, for which they propose an action to address the issue and drive positive social change.

**IPSY 8701 - Culture and Psychology**

(5 cr.)
In this course, students explore the cultural components, research, and theory of cross-cultural psychology. In addition to the previously listed goals, students focus on the impact that culture has on the field of psychology around the world. The scope of this course is broad, with the core theme being cross-cultural psychology (focusing on cultures representing different parts of the world) and comparing cultural influence on human psychology. Many of the topics addressed in the course are related to human development. Additionally, interactions between culture and social behaviors, health, mental health, and mental illnesses are emphasized throughout the duration of this course.

**IPSY 8702 - Dissertation Literature Review Lab**

(2 cr.)
The purpose of this course is to help students prepare to write a well-structured,
soundly presented critical literature review. In this course, students cover topic selection, research analysis, writing, and editing. Upon completing the course, students produce an annotated bibliography and outline of a literature review using a minimum of 10 self-selected research articles. This course is appropriate for doctoral students who are preparing for their dissertation research.

Prerequisites

For Students Entering With a BS Degree
- RSCH 8110

For Students Entering With an MS Degree
- IPSY 8412

IPSY 8705 - Organizational Behavior Performance and Evaluation

(5 cr.)
The focus of this organizational behavior and human capital development course is on organizational behavior, motivation, collaboration, and performance and evaluation of individuals and teams. Some of the questions that may be explored relate to how human resource managers motivate and build resiliency in their organizational culture. Students will also consider the influence of organizational structure behavior on individuals and teams, how behavior and motivation are impacted in a global virtual environment, and the impact of expert systems and artificial intelligence on the behavior of employees.

Prerequisites
- IPSY 8754

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IPSY 8706 - Ethics and Standards of I/O Psychology

(5 cr.)
Students in this course examine the origins of professional codes of ethics and standards of scientific psychology. Topics include ethical issues in academics (research, teaching, supervision), various work settings (assessment, consulting), and ethics involved in working with diverse populations. Additionally, students are introduced to forensic psychology and ethical issues related to the legal system. Students also explore how cultural factors are addressed in various ethical codes and the implications for scholar-practitioners.

Prerequisites

For Students Entering With a BS Degree Only
- IPSY 8252

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
IPSY 8715 - Human Resource Strategy, Legal, and Ethical Considerations

(5 cr.)
In this course students focus on strategic planning that supports labor relations, succession planning, retention of both tacit and explicit knowledge, as well as the strategic role of information technology in human resources management. Students will also consider the regulatory requirements for global organizations as well as establishment of a positive social and ethical environment.
Prerequisites
- IPSY 8754

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IPSY 8720 - Strategic Thinking for Effective Human Resource Management

(4 cr.)
One of the main responsibilities of human resource managers and organizational leaders is to employ human resources (HR) to align with an organization's needs and goals, moving the organization toward competitive advantage and sustainable success. Students in this course are introduced to advanced research topics in the strategic management of HR within a systems thinking and metrics-based performance measurement context. Students engage in a variety of group activities, discussions, and writing assignments on the analysis of resource-based theories of organizational performance; strategic management; and HR strategy, planning, and management (including succession planning). Students also discuss the role of metrics, knowledge management, and human resource information systems in supporting HR and organizational strategies in global markets. Through extensive reading and literature review, students explore global and ethical dimensions of course topics and identify potential HR research topics for their dissertation.

IPSY 8725 - Human Resource Talent Management

(5 cr.)
Managing organizational talent in the 21st century requires organizations to fully engage their workforce to optimize motivation, commitment, and productivity. Leadership and management of the organizational talent strategy to optimize use of global talent is a current organizational necessity, which requires talent management leaders to consider new workforce strategies for selection, recruitment, and retention of the workforce. Topics to be considered include information technology's impact on talent management, recognition and reward systems, compensation and benefits, as well as the need to engage an agile workforce.
Prerequisites
- IPSY 8754
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

IPSY 8730 - The Development of Human Capital Within Organizations

(4 cr.)
How do organizational leaders determine who to hire and in what ways do they ensure that capable employees are sustained and managed in a way that guarantees high performance and organizational achievement? Students in this course have the opportunity to answer such questions through the examination of advanced research topics, including the development and management of human capital within organizations. Students engage in group activities, discussions, and writing assignments on human resource concepts related to training and development, rewards and compensation, individual performance management, the role of human resources with individuals for global positions, and organization-wide succession planning. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

IPSY 8740 - The Legal, Ethical, and Cultural Environment of Human Resource Management

(4 cr.)
Considering global-level expansion, issues of diversity, and traditional ethical issues, nearly all organizations must follow a host of laws and regulations; it is the responsibility of managers to know these guidelines for the welfare of employees and stability of the company. Students in this course explore advanced research topics that address the legal, ethical, and cultural environment, both internal to organizations and more broadly. They engage in group activities, discussions, and writing assignments on the analysis of the regulatory environment in which human resource (HR) professionals must operate, HR management's role in communications, management of diversity and inclusion, and promotion of justice within organizations. Through extensive reading and literature review, students engage actively in identifying potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

IPSY 8750 - Human Resource Management and Its Role in Labor Relations, Negotiation, and Conflict Resolution

(4 cr.)
Human resource (HR) managers bridge the gap between employees and management, creating a challenging relationship requiring the ability to recognize and assess conflict, communicate strategically and effectively, and negotiate for resolutions. Students in this
course explore this relationship and examine advanced research topics in labor relations, negotiation, and conflict resolution. They engage in group activities, discussions, and writing assignments on a variety of topics, including the HR role in designing and managing conflict resolution processes beginning with mediation and negotiating with labor and other major human resource constituencies. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

**IPSY 8752 - Leadership Coaching: Application**

(5 cr.)
The intent of leadership coaching is to facilitate psychological change that leads to goal attainment and enhanced performance. In this course, students apply evidence-based psychological approaches to coaching case studies. They assess coaching roles and settings; skills and competencies; models and frameworks; and current issues and future trends. Students employ critical-thinking skills and synthesize concepts learned in the course to develop a plan for implementing effective coaching in a real-world setting.

**IPSY 8753 - Leadership Coaching: Theories, Concepts, and Processes**

(6 cr.)
The intent of leadership coaching is to facilitate psychological change that leads to goal attainment and enhanced performance. In this course, students apply evidence-based psychological approaches to coaching case studies focusing on coaching competencies and ethical practices. They assess coaching roles and settings; skills and competencies; models and frameworks; and current issues and future trends. Students employ critical-thinking skills and synthesize concepts learned in the course to develop a plan for implementing effective coaching in a real-world setting. Students will also engage in hands-on coaching competency and skill development through Voice to Voice training sessions.
Prerequisites
For Students Entering With a BS Degree Only
  * IPSY 8755

**IPSY 8754 - Personnel Psychology in the Workplace**

(5 cr.)
In this course, students explore the application of psychological theory and practice to human resources activities in organizations. They examine related topics, including job analysis and design, employee selection and placement, training and development, performance management and appraisal, and legal and ethical considerations in human resources management. Through a group project case study, students research, assess,
and share critical issues in personnel psychology. They also demonstrate their ability to conduct effective research and review literature through a final research paper on a topic of interest related to course content and theory.

Prerequisites
For Students Entering With a BS Degree Only
- IPSY 8252

**IPSY 8755 - Leadership and Leader Development**

(5 cr.)
Effective leadership requires the ability to facilitate positive change, lead others in efforts to effect similar change, and work through challenges when met with resistance to change. Students in this course are provided with an extensive overview of leadership theories. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership and change. Students also examine various perspectives on leadership and the role of leadership in the achievement of organizational, group, and team goals. Students engage in practical assignments and discussions, focusing on effective leadership issues and practices during the process of organizational change.

Prerequisites
For Students Entering With a BS Degree Only
- IPSY 8252

**IPSY 8756 - Leadership Coaching: Practices and Applications**

(6 cr.)
Effective leadership coaches must be fully capable of working with clients immersed in different organizational cultures that present unique challenges. In this course, students apply models, approaches, and frameworks; individual and team coaching strategies; and ethical guidelines to case studies focusing on coaching competencies and ethical practices. Students also examine characteristics, factors, and conditions that influence the effectiveness of coaching; assessment and evaluation; diversity considerations; and professional issues and challenges. Students will also engage in hands-on coaching competency and skill development through Voice to Voice training sessions.

Prerequisites
- IPSY 8753
- IPSY 8755

**IPSY 8776 - Transformative Change in a Shared-Power World**

(5 cr.)
Students in this course are engaged in a collaborative study of the nature and methods
of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

IPSY 9000 - Dissertation

(5 cr. per term for a minimum of 4 quarters until completion)
Doctoral students in this course are provided with the opportunity to integrate their Program of Study into a research study through which they explore a specific area of interest. Students complete the dissertation with the guidance of a chair and committee members through a learning platform classroom in which weekly participation is required. Students work with their dissertation chair to write the prospectus, complete an approved proposal (the first three chapters of the dissertation), complete an application for Institutional Review Board approval, collect and analyze data, and complete the dissertation. During the final quarter, students prepare the dissertation for final review by the university and conclude with an oral defense of their dissertation. Once students register for IPSY 9000, they are registered each term until successful completion of the dissertation for a minimum of four terms. Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.
Prerequisites

- Foundation courses
- Core courses
- Designation of an approved dissertation committee chairperson

ISYS 3001 - Information Systems in Enterprise♦

(5 cr.)
All businesses rely on systems to process, collect, share, and store important
information. The most effective way to help an organization achieve its goals is to understand how to leverage information systems and emerging technology. In this course, students have the opportunity to gain skills needed to employ such leverage in the professional arena. Students examine the characteristics of information systems and their role in organizations. They also assess and discuss the impact that information systems have on the enterprise as a whole, in addition to their current architectures, enabling tools, and project cycles.

**Prerequisites**

- **BS in Business Administration**
  - BUSI 1001 or BUSI 1002
- **BS in Computer Information Systems**
  - BUSI 1001 or BUSI 1002
- **BS in Communication**
  - BUSI 1001 or BUSI 1002
- **All Other Programs**
  - BUSI 1002

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

### ISYS 4301 - Business Process Design♦

(5 cr.)

Students in this course have the opportunity to gain working knowledge of the requisite skills, concepts, and methodologies that managers and team members use to conduct a business process redesign (BPR). Through weekly readings of literature and contemporary articles, students learn about the manager’s role in the business process as well as the function of BPR. They examine the function of information systems as enablers for business process design. They also learn how to analyze business processes and redesign them for dramatic results. Reinforcing the practical application of concepts, students demonstrate their critical-thinking and problem-solving skills through a case study assignment in which they solve a real-world problem using BPR.

**Prerequisites**

- ISYS 3001

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

### ISYS 4302 - Management of Technology♦

(5 cr.)

The efficiency and success of most organizations today depends on the ability of leaders
to integrate technology and business functions through activities such as supply chain management, outsourcing, and e-business practice. Students in this course examine the key concepts in management of information technology and the role of technology managers. They analyze the management of technology from both a process and system perspective and investigate major technical issues involved in innovation and implementation. Students engage in weekly discussions on a variety of topics, such as advanced databases, business intelligence, artificial intelligence systems, wireless technology, and outsourcing.

Prerequisites
- ISYS 4301

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ISYS 4303 - Case Study: Project Management

(5 cr.)
The process of creation, from conception through completion, requires a diverse set of management skills, including the ability to make strategic plans. In this course, students learn the theory, tools, and techniques needed to manage technology projects successfully throughout a project lifecycle. Students in this course focus on the project management process and development of the project team as key to the successful achievement of information systems projects. They analyze the role of the project manager as an integral administrator overseeing the execution, progress, and interaction of all parties involved. Students also assess and discuss effective project management styles, critical factors for project success, organizational support systems that enhance projects, project authority, and ethics in project execution.

Prerequisites
- ISYS 4302

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 1005 - The Profession and Practice of Information Technology

(5 cr.)
This course provides students a foundation for successful study and professional practice in information technology (IT). Students explore a variety of IT careers and develop a foundational understanding of the components of information systems. Students develop key skills for academic and professional success with communications, analysis, and social responsibility.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
ITEC 1010 - IT Infrastructure

(5 cr.)
Information technology (IT) is essential to the function and success of nearly all businesses. Businesses whose systems are lacking or experience failure are at risk of significant loss; therefore, there will always be a need for IT support and innovation. In this course, students are introduced to fundamental concepts of the IT infrastructure to prepare for a role in the field of IT. Students learn about the structure and purpose of hardware components (computers, networks, and interface devices) and software components (operating systems, middleware, applications, and system software). They examine key issues of capacity, performance, reliability, scale, and obsolescence through the evaluation of IT’s role in supporting business and individuals. Students take a practical approach to understanding how IT infrastructure can relate to personal goals as they examine the various career options within the field.

ITEC 1015 - Introduction to Computer Systems+

(5 cr.)
In this course, students are introduced to the fundamental concepts of computer systems to prepare for a role in the field of IT. Students learn about the structure and purpose of hardware components (computers, networks, and interface devices) and software components (operating systems, middleware, applications, and system software). The course includes the essential domain aspects for platform technologies and incorporates emerging technologies.
Prerequisites
• ITEC 1005

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 1020 - Networking Fundamentals+

(5 cr.)
Corporations, small businesses, and even individuals rely upon robust communication networks that secure local resources while connecting into worldwide infrastructure. This course provides students with the opportunity to develop and administrate a small business network through hands-on lab exercises. They examine physical and logical local network components as well as protocols and connections for internet services and applications. Hands-on labs exercises provide experience with network configuration and settings.
Prerequisites
• ITEC 1010 or ITEC 1015

Students may take this as a non-degree course, which means they do not have to be enrolled in a
ITEC 1030 - Introduction to Programming

(5 cr.)
The cornerstone of modern software design is object-oriented programming (OOP), which is a methodology that uses objects to represent complex relationships and simplifies the development and management of information systems. This course provides students with introductory information on OOP and other prevailing techniques in programming. Students begin by studying foundational concepts and terminology of OOP. They examine programming paradigms, algorithmic thinking, and problem-solving techniques in OOP. Students engage in coursework on computer program design, constraints, variables, functions, procedures, logic and code control, error trapping, error handling, and interactive coding techniques. They gain hands-on, practical experience on compiling and running applications, reading data interactively, and debugging.

Prerequisites
- ITEC 1010 or ITEC 1015
- MATH 1040

ITEC 2010 - Data Structures

(5 cr.)
A data structure is a specialized layout for organizing and storing data. This is an integral part of the information technology arena; programmers work with many different types of data structures. Using fundamental programming knowledge, such as object-oriented programming (OOP), students continue their practice with OOP and have the opportunity to gain knowledge of advanced data structures, including lists, stacks, queues, hashmaps, trees, and the functions of each. They also learn how to choose data structures that are appropriate for various types of information. They engage in discussions to work through ideas and gain various perspectives on topical issues, such as OO inheritance and polymorphism, arrays, and data collections. Students gain hands-on experience as they solve complex problems by writing a program and using tools to create, compile, debug, and run interactive OO programs with data structures.

Prerequisites
- ITEC 1030

ITEC 2020 - IT Theory Fundamentals

(5 cr.)
Did you ever wonder how many different valid passwords a computer system allows? Or perhaps you need to know how to encrypt a message so that only the intended
recipient can decipher it. To answer such questions, programmers use discrete mathematics, which allows them to study sets and numbers, linear algebra, combinatorics, graphs, and probability. Students in this course are introduced to discrete mathematics concepts and techniques used in information technology (IT). Students examine each concept in action and geared toward a specific application in IT. They engage in various application assignments focusing on elements of graph theory, coding, and probability.

**Prerequisites**
- ITEC 1010
- MATH 1040

**ITEC 2025 - Discrete Structures**

(5 cr.)
Mathematics underpins much of Information Technology. Programming loops, web searches, data encryption, database queries, and network routing all have a mathematical foundation. This course introduces students to discrete mathematics concepts with focus on applications in Information Technology. Concepts include logic operators, recursive and iterative loops, sets, discrete probability, functions, trees, and graphs. Applications include complexity analysis, programming algorithms, network routing, and protecting and validating data. This course provides a mathematical foundation for applications across IT disciplines.

**Prerequisites**
- ITEC 1030

**ITEC 2030 - Platform Technologies and Operating Systems**

(5 cr.)
There are many important benefits from studying the different types of operating systems, such as administering computers efficiently and structuring code more effectively, which lend to best practices in writing code. This course provides students with an overview of the concepts of computer operating systems, including the main functions, similarities, and differences. They explore a variety of topics, including configuration, file systems, security, administration, interfacing, multitasking, and performance analysis. Students contextualize their learning experience through hands-on activities, such as performing basic administrative tasks on different operating systems, including configuring networking parameters, administering user accounts and groups, setting access and application permissions, and locating and analyzing log files.

**Prerequisites**
- BS in Business Administration
- ITEC 1005

**BS in Computer Information Systems Cyber Security for Information Systems Concentration**
ITEC 2040 - Systems Analysis

(5 cr.)
There are many roles involved in creating and managing an organization’s information system, including the systems analyst. The analyst helps to ensure the software development process is successful by understanding its purpose, scope, and resource requirements. This course provides students with the prospect of understanding the field from the perspective of a systems analyst. Students focus on the definition and examination of system requirements, both functional and nonfunctional, for an information system (IS) project. Through the systems analysis process students learn about the identification of stakeholders, techniques for requirement elicitation, representation, and life cycles. Students sharpen their communication and practical skills by working on an information system development project.

Prerequisites
BS in Computer Information Systems
- ITEC 1010 or ITEC 1015 or CMIS 1002 or ITEC 1005
BS in Information Technology
- ITEC 1010 or ITEC 1015 or CMIS 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 2050 - Systems Design

(5 cr.)
This course provides an introduction to Agile system development and various methodologies that support Agile development. Students explore the discipline of implementing system requirements and developing structural and functional designs that model organizational information technology solutions. They examine conceptual modeling and application frameworks. Students learn the basics of modeling, design representations, and the use of design tools. The course also examines planning and implementation issues.

Prerequisites
- ITEC 2040 or CMIS 3003

Students may take this as a non-degree course, which means they do not have to be enrolled in a
ITEC 2055 - Technical Problem-Solving and Project Management

(5 cr.)
The process of creation, from conception through completion, is complicated and requires a diverse set of management skills. This course combines the fundamental skills in problem-solving with project management skills. Students are introduced to the knowledge, tools, and techniques needed to successfully manage information technology (IT) projects throughout a project life cycle. Students in this course focus on the IT project management process and development of the project team as key to the successful achievement of IT projects. Students analyze the role of the project manager as an integral administrator overseeing the execution, progress, and interaction of all parties involved. Students learn the intricacies of managing projects and programs that may span multiple organizations. They engage in coursework through which they examine the project management cycle, sourcing strategy, third-party provider selection, and management of third-party providers.

Prerequisites
- ITEC 2050 or CMIS 3004

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 2060 - Database Management Systems

(5 cr.)
All businesses rely on computerized systems to manage their data and to keep that data secure, accurate, and reliable. A database is a system designed to do just this as well as to simplify the processes of data entry, search, and retrieval. In this course, students learn about database management through the examination of the life cycle of a database. They focus on the representation and manipulation of information in relational database management systems and learn how to map real-world data to relational representations and how to manipulate data through relational queries to implement data-intensive applications. Students also discuss related issues, such as database storage, data validation, sorting, grouping, and nesting data. Students learn to use a core subset of the Structured Query Language (SQL) as well as the fundamentals of database administration.

Prerequisites
- ITEC 2055 or ITEC 3040 or CMIS 3004

ITEC 2070 - User Experience Design
This course introduces user experience design in the context of user experience, how a product behaves and is used for real-world applications. It includes an overview of human perception and cognitive performance, computer processes, and system design approaches to facilitate positive user experiences. Topics include social and emotional interaction, the process of user experience design, how to capture requirements, and construction and evaluation approaches. 

Prerequisites
- ITEC 2055 or ITEC 3040 or CMIS 3004

ITEC 2080 - Web Programming

Every day we are learning to adapt to 21st-century technology. More importantly, we are beginning to rely on it for daily needs, such as obtaining the news, shopping, communicating, banking, and full-scale education. There is a high demand for developers of static and dynamic web pages of all kinds. In this course, students consider factors such as optimization, accessibility, and appeal in the design and development of web applications. They also examine the tools and techniques needed to develop and manage these applications. Through discussions and application assignments, students explore dynamic web page implementations, elements of client-server and server-side processing, data validation, and concurrency issues. 

Prerequisites
- ITEC 1030

ITEC 3010 - Web and Mobile Technologies

Mobile computing was developed in the early 1990's with the introduction of laptop computers. Since then, devices have become smaller, more intuitive and accessible, and have worked their way into businesses, homes, hospitals, and children's backpacks. The basic principles of system design for such technologies are not entirely different from larger-scale development, but designers must make different considerations and use special techniques for web and mobile technologies. In this course, students examine the technical, business, legal, and sociocultural benefits and challenges of mobile devices and wireless communication technologies. Through discussion and written assignments, students explore wireless protocols and business and consumer applications, such as mobile computing, communication, and multimedia devices; and intelligent and context-aware services. 

Prerequisites
- ITEC 2055
- ITEC 2080
ITEC 3020 - Information Assurance and Security

(5 cr.)
Insecure security systems can cause major risks and vulnerabilities for companies. Breaches in personal employee information, financial information, or company secrets can elicit the downfall of an organization. In this course, students learn the importance of such concerns as well as key concepts of computer and information security, including technical, privacy, organizational, social, and policy issues. They examine fundamental notions of authentication, authorization, and encryption. Students learn about economic and human impact issues through the analysis of case studies of security and privacy breaches. Through discussions and assignments, students also examine risk management, informal system security methods, and corporate governance.

Prerequisites
BS in Business Administration
- ITEC 2030
BS in Information Technology
- ITEC 2055 or ITEC 3040 or CMIS 1002 or ITEC 2030
All Other Programs
- ITEC 2055 or ITEC 3040 or CMIS 1002

ITEC 3030 - Business Architecture and Process♦

(5 cr.)
All companies have goals, but depending on the organization’s size or purpose, these goals may differ. Some may be to improve efficiency and immediate profit and others might be long-term sustainability or customer satisfaction. Regardless of specific goals, leaders must understand the organization as a whole, including its structure, processes, applications, and systems, so that the company can make informed decisions, avoiding risks and instability. Students in this course examine the structure and operations of organizations from an information processing point-of-view. Students work toward gaining skills in analyzing, designing, and improving operations as they engage in coursework focusing on fundamental business structures; business process design, management, and optimization; decision support and automation; enterprise resource planning; and integration. Using current ligature and simulations, students evaluate specific techniques designed to manage change in a company as well as to measure and maintain process advancement and value.

Prerequisites
- ITEC 2050

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a
ITEC 3040 - IT Project Management

(5 cr.)
The process of creation, from conception through completion, is complicated and requires a diverse set of management skills. Students in this course are introduced to the knowledge, tools, and techniques needed to successfully manage information technology (IT) projects throughout a project life cycle. Students in this course focus on the IT project management process and development of the project team as key to the successful achievement of IT projects. Students analyze the role of the project manager as an integral administrator overseeing the execution, progress, and interaction of all parties involved. Students learn the intricacies of managing projects and programs that may span multiple organizations. They engage in coursework through which they examine the project management cycle, sourcing strategy, third-party provider selection, and management of third-party providers.
Prerequisites
- ITEC 2050 or CMIS 3004

ITEC 3101 - Systems Software Security

(5 cr.)
Information security specialists oversee enterprise operations that follow industry best practices for security and data integrity to ensure that systems are free from external threats and risks that may jeopardize or harm the organization. Students in this course investigate the responsibilities of the security specialist, including the security of operating systems and other system software. Through a variety of assignments, including hands-on lab work, students explore components of a networked operating system, architectural designs for secure usage, system administration tasks, and tools for security. Students examine the real effects that security threats have on systems. They address such threats through exercises in administrative tasks using tools vital for implementing security policies.
Prerequisites
- ITEC 3020 or CMIS 4101

ITEC 3201 - Database-Driven Web Applications

(5 cr.)
In this course, students gain the skills necessary to develop and administer database-backed dynamic web applications. Demand for developers who can create cutting-edge, fully-interactive, dynamic websites is increasing as organizations compete for web presence. Students explore contemporary development tools for database-driven web
applications, the use of multitier architecture to separate business logic and presentation, and data storage and management. They also examine server and application configuration to ensure site security, session management, and user authentication. In this course, students have the opportunity to enhance their communication and critical-thinking skills as they engage in peer discussions on topical issues, such as web hosting, website operations, security, and database management.

Prerequisites
- ITEC 2060
- ITEC 2080

ITEC 3202 - Data Centers

5 cr.
Effective data center operation involves efficient operating practices in an environmentally responsible manner. Students in this course encounter an overview of data center principles and operational issues, including environmental controls, power supplies, backup, data communications, and security standards to assure business continuity. Students discuss emerging trends and technologies in areas including cloud computing, virtualization, middleware, databases, data centers, green grids, and corporate and environmental social responsibility.

Prerequisites
- ITEC 2050

ITEC 3301 - IT Service Management

5 cr.
Technology is the catalyst of innovation which is often utilized to create and expand organizational and business value. In this course, students explore the integration of technology and organizational imperatives in a holistic manner. The purpose of this course is to provide students with an understanding of the management of information technology (IT) including the relationships of parties involved, the tools for IT process improvement, and best practices involved in the field. Students focus on the relationships within an IT organization, with external business customers, and end-users. They explore the customer's perspective of IT's contribution to the organization and they learn how to communicate effectively with stakeholders. Students use case studies, current articles, and industry standard frameworks to examine a variety of topics, including operations architecture, IT governance, and utilization of relevant management strategies. Students also examine relationships of IT service management to process improvement movements, for example, Six Sigma improvement methodology, total quality management (TQM), business process management (BPM), and Capability Maturity Model Integration (CMMI) standards.

Prerequisites
• ITEC 2055 or ITEC 3040

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 3402 - Server-Side and Multi-Tier Programming

(5 cr.)
Life in the 21st century is fast paced, and the public demands information that is expeditious, accurate, and appealingly presented. Students in this course have the opportunity to acquire the knowledge and skills needed to create the types of practical, well designed, dynamic web pages that can provide people with the information they need at the pace they want. Students examine the configuration of web server software, the function of server-side programming, and the use of scripting languages. They learn about techniques for enhancing performance through examination of multi-tier locality and parallelism. They also practice methods of access control and secured transmissions in server-side programming. Students have the opportunity to gain hands-on experience through a course-long project in which they build on skills acquired in each unit to transform a static website into a fully functional, dynamic website.

Prerequisites
• ITEC 2080

ITEC 3501 - Web and Mobile Application Design

(5 cr.)
Developers have to keep usability, accessibility, and cross-device compatibility in mind when creating applications for multiple platforms. In this course, students analyze and evaluate the critical elements of the development lifecycle of these applications, including visual design, information architecture design, and interaction design as well as the work-products that developers produce.

Prerequisites
BS in Computer Information Systems Web and Mobile Applications Design Concentration
• ITEC 3010 or ITEC 2080

BS in Information Technology Web and Mobile Applications Development Concentration
• ITEC 3010 or ITEC 2080

All Other Programs
• ITEC 3010

ITEC 4010 - Network Administration
Students explore the role of a network administrator, the many considerations of operating a modern system, and the tools and technologies that are available to meet the requirements and demands of an organization’s network. They acquire an understanding of the hardware and software components that make up the internet and examine protocols, routers, and client/server architecture related to configuring network services. Students study software platforms, control, shared resources, and security from a practical perspective. Through a series of hands-on assignments, students practice administrative tasks using applications as network tools for routing, securing ports, configuring network address translations, and confirming reconfigurations.

Prerequisites
- ITEC 1020
- ITEC 2055 or ITEC 3040

**ITEC 4020 - Quality Management Standards for IT**

Organizations in all sectors, including small businesses, government departments, and educational institutions, employ the use of quality management in information systems for a variety of reasons, such as meeting consumer’s requirements, complying with regulations, and reaching environmental goals. Students in this course explore the history of the quality revolution and the practices and standards used by today’s information technology organizations to ensure quality. Students engage in exercises, analyses, and discussions on total quality management (TQM) guidelines, Six Sigma improvement methodology, International Organization for Standardization (ISO) quality standards, Capability Maturity Model Integration (CMMI) standards, personal software process (PSP), team software process (TSP), and the metrics used to measure success of quality initiatives. Students also learn to use tools and techniques to analyze a quality problem to make recommendations for improvement.

Prerequisites
- ITEC 2050

**ITEC 4030 - Systems Integration**

Students in this course examine the systems integration approaches used by today’s organizations to learn what makes them more effective, efficient, and competitive. They explore the potential of enterprise application integration (EAI) using traditional and cloud-based platform environments. Through a hands-on approach, students learn to solve an integration problem by designing an appropriate architecture.

Prerequisites
ITEC 4101 - Network Security

(5 cr.)
Technological innovation has led us to store all types of information on the web, such as medical records, financial data, and personal communications. We rely on this information to be safe from external attacks. Preventing such threats is a vital role in the field of information technology. Students in this course have an overview of network security defense techniques and countermeasures. Students sharpen their communication and analytical skills through the discussion and debate of a variety of topics, such as cryptanalysis and attacks, safety of wireless connections, intrusion detection methods, and access control. They engage in assignments designed to provide them with practical applications of content, such as the design and configuration of firewalls, traffic analysis and filtering, intrusion detection, statistical anomaly detection, and wireless security.

Prerequisites
BS in Computer Information Systems
- ITEC 3020
All Other Programs
- ITEC 4010
- ITEC 3020 or CMIS 4102

ITEC 4102 - Application Software Security

(5 cr.)
In the past, security measures were merely supplemental to software design. But with the increasing threat of hackers who manipulate applications and steal or modify important data, countermeasures are vital to protect applications from vulnerability. This course provides students with an overview of best practices in developing secure software applications and the tools for investigating anomalies and vulnerabilities in application software. Students engage in a variety of course assignments focusing on related topics, including buffer overflow, structured query language (SQL) injections, selected programming and scripting languages, and the security of web applications on both the client and server side.

Prerequisites
- ITEC 2080
- ITEC 3020

ITEC 4103 - Computer Forensics
As we adapt to the digital revolution, an increasing number of cases, both civil and high-profile, rely on data identification, recovery, and preservation of digital evidence. We also rely on computer forensics for the prevention and prosecution of criminal activity, such as child pornography, financial fraud, and personal identify theft. In this course, students learn procedures and tools for collecting and investigating evidence from illegal or inappropriate computer use. They also engage in a range of assignments and activities focusing on the legal, ethical, and policy implications of various forensic techniques and monitoring practices.

Prerequisites
- ITEC 3101
- ITEC 4101
- ITEC 4102

ITEC 4201 - Database Administration

The database administrator plays an integral role in ensuring that the information on which organizations rely is organized, efficient, and secure. In this course, students identify the range of tasks a database administrator performs, including disaster recovery, performance analysis and tuning, data dictionary maintenance, data modeling and optimization, and database and user management and monitoring. They also assess the techniques, tools, and best practices used in managing a relational database. Students apply concepts presented in the course to practical exercises involving installation, management, performance monitoring, creation of users and user privileges, backup, and recovery.

Prerequisites
- ITEC 2060

ITEC 4202 - Advanced Database Topics

Mathematics underpins much of Information Technology. Programming loops, web searches, data encryption, database queries, and network routing all have a mathematical foundation. This course introduces students to discrete mathematics concepts with focus on applications in Information Technology. Concepts include logic operators, recursive and iterative loops, sets, discrete probability, functions, trees, and graphs. Applications include complexity analysis, programming algorithms, network routing, and protecting and validating data. This course provides a mathematical foundation for applications across IT disciplines.

Prerequisites
- ITEC 4201
ITEC 4203 - Fault-Tolerant Systems

(5 cr.)
Businesses rely on stable, secure systems to run their organizational operations. If a system is disrupted or encounters problems, it may result in loss of money, time, or customer faith. Effective data center operation helps to provide assurance that the integrity and functionality of a system is at low risk of disruption or threat. Students in this course explore the study and application of the principles of fault-tolerant systems (failsafe) and networks, which are used to ensure systems continue to operate appropriately, even if one or more components fail. They learn about a variety of topics, including design; modeling; analysis; and integration of hardware, software, and redundancy techniques to achieve dependable systems. Students also examine performance and reliability evaluation techniques, system diagnosis, disaster recovery planning, backup strategies for data and hardware, virus monitoring, and associated security and administration issues.
Prerequisites
• (ITEC 2025 and ITEC 2055) or (ITEC 2020 and ITEC 3040)

ITEC 4302 - Network Planning and Maintenance

(5 cr.)
Before a business can establish a new network or service, they must ensure that the system or service meets their specific needs and requirements. Once a system is in place, they must continue to ensure that the network is optimized, connected appropriately, and free of critical threats, such as viruses and spyware. In this course, students get hands-on about the specifics of planning, maintaining, and auditing data communications and networks in an organization. Students engage in assignments and hand-on activities focusing on long- and short-term business planning, operations, maintenance, and forecasting. They also explore topological design, network synthesis, and network realization.
Prerequisites
• ITEC 2020 or ITEC 2025
• ITEC 4010

ITEC 4401 - Software QA Testing and Test Tools

(5 cr.)
Nearly all organizations engage in software testing to ensure system stability and prevent future problems. Sometimes testing is the responsibility of individuals; other times, an entire team composed of testers and developers work together to test a
system and evaluate the results. Regardless of the approach, testing is an integral process in business and requires the use of specialized techniques and tools. In this course, students learn about software quality and the components of software quality assurance systems before, during, and after software development. They examine metrics and models for software quality as a product, in process, and in maintenance. Students also learn about the testing tools used to automate the process, including related challenges and limitations.

Prerequisites
- STAT 3401

ITEC 4402 - User Interface Evaluation, Design, and Development

(5 cr.)
How do we design interfaces for optimal efficiency and appeal? Before we can answer this question, we must first understand the goals, needs, and skills of the user. In this course, students consider these factors and learn methods for evaluating, designing, and improving human-computer interfaces. Students engage in exercises, discussions, and other assignments to explore a variety of topics, such as user-interface evaluation methods, requirements analysis, and user-interface design methodologies, including rapid prototyping and iteration.

Prerequisites
- ITEC 2070

ITEC 4501 - Web and Mobile User Experience Design

(5 cr.)
Designers strive to optimize the interaction between the user and the system to create a smooth and productive user experience. Students in this course focus on the particular challenges of creating user-centered mobile applications. They also investigate the design process deliverables used to communicate with clients, technical leads, and stakeholders.

Prerequisites
- ITEC 2070

ITEC 4502 - Implementing Effective Mobile Web Applications

(5 cr.)
Successful mobile web applications have interfaces that support effective interactions and inspire user allegiance. In this course, students use current web development tools and technologies to design, develop, and evaluate intuitive and attractive mobile web applications.

Prerequisites
ITEC 4501

ITEC 4503 - Developing Mobile Native Applications

(5 cr.)
Building mobile applications that operate on a variety of devices poses a unique set of challenges that the developer must consider and address at each stage of the development lifecycle. In this course, students will use current development tools and techniques to design, develop, and evaluate intuitive and attractive mobile native applications.
Prerequisites
  • IT 4502

ITEC 4902 - IT Senior Seminar

(5 cr.)
In this capstone course, students review the work they have collected in their portfolios and reflect on their educational experience. They revisit the career priorities they expressed upon entry into the program and consider their professional goals in the context of their education. They also develop plans for continued learning and career development in the context of their personal objectives and priorities.
Prerequisites
  • All core courses

ITEC 4999 - IT Capstone Project

(5 cr.)
In this capstone project course, students complete an integrative IT project that combines multiple aspects of their information technology program. The project requires collaboration with a team of students to manage, analyze, design, implement, and evaluate a computer-based information system. The system development process is initiated with a case study included within the course structure. Students will develop a project charter that will guide them through the discovery of functional and nonfunctional requirements, the creation of a system design based on those requirements, and the development and testing of a functional computer application. Students will develop a management presentation to describe the project design and justify the continuation of the project. In addition, students will create or update their professional development plan, using the plan as a starting point for a job search or career upgrade based on the experience and professional skills they have developed while completing their educational program.
Prerequisites
  • All required core and concentration courses
ITEC 6020 - Core Web Technologies♦

(3 sem. cr.)
Through this course, students learn key technologies and design principles for interactive web applications as well the professional, individual, organizational, societal, and regulatory implications thereof. Students learn how pages are designed and how they interact with external servers to deliver information—important concepts underlying how computers enable communication among Internet users and allow enterprises to conduct business online. They develop and manage Web-based applications using a selection of fundamental tools and techniques, such as XHTML and cascading style sheets.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 6030 - Principles of Programming♦

(3 sem. cr.)
The discipline of software development demands a variety of skills. Students in this course assess the fundamental practices and principles of designing and constructing object-oriented programs. They engage in substantial hands-on practice, reinforcing algorithmic thinking, logical design, precise coding, and careful attention to quality.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 6040 - Systems Analysis and Design♦

(3 sem. cr.)
Students in this course examine the role a systems analyst plays in developing large-scale software systems and explore the phases of the software development life cycle. A systems analyst is responsible for designing the new system, ensuring the new system will meet the organization’s needs, and ensuring that the correct staffing is available to create the new system. A systems analyst must also be able to resolve conflicts of interests. In this course, students focus on the definition of system requirements, both functional and nonfunctional, for an information system (IS). Students also investigate how to model requirements, data, and processes to meet business needs.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 6111 - Information Technology in the Organization
(3 sem. cr.)
Through a review of modern computer systems and the social and economic issues related to their use, students in this course are introduced to the conceptual foundations for designing, developing, and deploying large-scale management information systems. Students investigate the role of information technology in an organization—particularly the collection, storage, and distribution of information for operations, planning, and decision making.

ITEC 6115 - Computer Networking and Operating Systems

(3 sem. cr.)
Within this course, students can learn the concepts of computer operating systems, including the main functions, similarities, and differences. Students can explore a variety of topics, including configuration, file systems, security, administration, interfacing, multitasking, and performance analysis. In addition, they can further their understanding of computers through the study of computer networks by learning key networking concepts, components, and the design of information and communication infrastructure solutions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 6120 - Operating System and Network Architecture

(3 sem. cr.)
The infrastructures of operating systems and networks are the fundamental technologies that support enterprise information systems. Students in this course examine the components of computer systems, their underlying operating systems, and their data communications networks. They critically investigate the services these components provide and draw implications for the large-scale enterprise. Students sharpen communication and critical-thinking skills through weekly discussions on related topics, such as modularity, abstraction, threading, virtual memory, Internet protocol, atomicity, and concurrency control.

ITEC 6130 - Advanced Software Development

(3 sem. cr.)
Contemporary software development principles continue to evolve. In this course, students explore contemporary software development concepts and tools. Through application assignments designed to contextualize theories presented in the course, students apply object-oriented techniques, usability principles, and design for reuse. Students have the opportunity to acquire knowledge requisite to the development of sound, maintainable, and extensible software.
Prerequisites
- ITEC 6030
ITEC 6145 - Enterprise Database Design

(3 sem. cr.)
In this course, students discuss the design, implementation, and operation of databases using a principal relational database management system (DBMS). Many fundamental topics are covered in this course including: data modeling using entity-relationship diagrams; data storage, manipulation, and queries using structured query language (SQL); functional dependencies, normalization concepts, data warehouse architectures, data warehouse modeling, and data analytics.

ITEC 6150 - Principles of Software Engineering

(3 sem. cr.)
The principles of software engineering and software design allow for the methodical construction and controlled development of complex software systems. Students in this course survey the evolution and current practices of software engineering through the entire software life cycle, with emphasis on the elements that significantly affect software system quality.
Prerequisites
- ITEC 6145

ITEC 6160 - Enterprise Systems Architecture

(3 sem. cr.)
Large-scale enterprise systems often rely on architectural frameworks that define their main components as well as the interactions among these components. Students in this course survey the principal design strategies and tools for constructing the modern information system. They identify common vendor and open-source components, illustrating how these elements can create and integrate robust web- and cloud-based services and applications.

ITEC 6170 - Fundamentals of Information Assurance

(3 sem. cr.)
The principles of confidentiality, integrity, and availability of data while it is being stored, processed, or communicated guide the policies and practices of information assurance. In this course, students investigate the theory of information security and data protection, study common system risks and vulnerabilities, and follow best practices to protect computer and data assets. These practices address organizational policies, access controls, software and network design, and logging and auditing.

ITEC 6401 - Statistical Concepts for Big Data
Statistical analysis supports quality management, drives decision making, enables forecasting and prediction, and provides a means for understanding many aspects of our world. Data is everywhere in today's integrated technological society, and statistical analysis provides the means to access and interpret data. Students in this course are introduced to statistics focused on working with complex data sets and analyzing big data. Students synthesize theory with practical applications to learn the fundamentals of statistical reasoning, descriptive statistics, visual data display, regression, hypothesis testing, research design, anomaly detection, and advanced analysis practices. They have the opportunity to practice using a statistical software package to solve statistical problems. Students use a publicly available big data set to formulate their own study and complete a statistical analysis.

ITEC 6600 - Foundations of Health Informatics

In this course, students are provided with a broad historical, technological, and theoretical framework for the study of health informatics. Consideration is given to the past, present, and future of this rapidly evolving discipline, with exploration of critical issues and challenges within the field, as well as potential applications, benefits, and opportunities for improving the management of healthcare through information technology. Special topics to be considered include the development of virtual and interactive healthcare through technology; the interoperability, standardization, safety, and risks associated with the implementation of the electronic health record; and the emergence and adoption of new information technologies. Professional roles and responsibilities related to managing health information technology are described, as well as organizations that promote health informatics. A global perspective of trends and issues in health informatics is provided.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 6610 - Information Assurance and Risk Management

Students in this course learn about the security governance structure that organizations employ to manage risks. Various laws, regulations, and organizational objectives are typically mapped to organizational policies and translated into procedures, practices, standards, and guidelines. Students examine appropriate organizational structures for providing oversight and managing security throughout the enterprise.

ITEC 6620 - Information and Systems Security

Participants in this course study in-depth techniques for defending IT infrastructure.
against attack. Students explore tools for configuring and testing system and network security, and they examine administrative and operational countermeasures. Students discuss a range of active responses to a security breach.

**ITEC 6630 - Computer Law, Crime, and Investigation**

(3 sem. cr.)
Security professionals need to understand the legal context of their work: Many laws apply to IT crimes, and botched investigations can have serious consequences. Students learn about the types of offenses and their consequences under the law. Investigations of breaches must be conducted methodically and with great care. Students examine the various types of cyber offenses and techniques for investigating them, as well as ethical uses of information and computing resources in organizations.

**ITEC 6631 - Information Systems Management**

(3 sem. cr.)
Students learn key approaches to the integration of enterprise-wide information to support business strategy and decision making. They cover issues in data acquisition, storage, retrieval, and analysis. Topics include data warehouses; data marts; dashboards, key performance indicators, and scorecards; online analytical processing; and data visualization.

**ITEC 6640 - Topics in High-Assurance Computing**

(3 sem. cr.)
Individual, group, and organizational behavior can have an enormous effect on safety and security. Because security professionals often observe that security is more dependent on people than on technology, they must have a clear understanding of human factors. Students examine advanced topics in the practice of information assurance, such as using social psychology to implement security.

**ITEC 6645 - Representation of Health Information♦**

(3 sem. cr.)
In this course, students examine the need for consistency in health data standards and the importance of appropriate identification and selection of these standards. The structure of medical and health information through effective knowledge representation is presented, with an emphasis on the practice of knowledge management and the incorporation of evidence-based best practices. The diverse terminology, ontology, acronyms, coding, and classification systems used in health information technology, both by information systems users and by those who design and maintain those systems, are examined. Topics include data communication, the development and advancement of e-health technologies, and future federal initiatives to digitalize health data.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
ITEC 6650 - Software Systems Engineering and Requirements Management

(3 sem. cr.)
Students in this course place software engineering in the context of systems engineering. Students discuss the role of software engineering in analyzing user needs and examine how to develop solutions while building systems involving various components. Students receive a broad perspective of the system engineering lifecycle, including requirements, design, integration, transition, operation, maintenance, and support. They focus on issues of requirements engineering such as the elicitation of requirements, analysis, specification, validation, and change management.
Prerequisites
   • ITEC 6150

ITEC 6655 - Data Warehousing and Business Intelligence

(3 sem. cr.)
Students learn key approaches to the integration of enterprise-wide information to support business strategy and decision making. They cover issues in data acquisition, storage, retrieval, and analysis in this course. Topics include data warehouses; data marts; dashboards, key performance indicators, and scorecards; online analytical processing; and data visualization.

ITEC 6660 - Software Design and Construction

(3 sem. cr.)
Software architects design software to meet desired quality attributes. They must minimize complexity while following heuristics and standards, even as they anticipate change. In this course, students explore the fundamentals of software design. They examine key issues such as concurrency, event handling, interaction, and fault tolerance.
Prerequisites
   • ITEC 6150

ITEC 6661 - Business Analytics and Data Mining

(3 sem. cr.)
Students learn and apply techniques for inference and discovery in large data sets. Topics include statistical inference, exploratory data analysis, data mining, text mining, and machine learning for predictive modeling.

ITEC 6670 - Software Quality and Testing
Competitive organizations demand high-quality software. IT professionals employ software management techniques to measure, control, and ensure software quality. Students in this course cover software quality management processes, with a special focus on software testing.

Prerequisites

- ITEC 6650

**ITEC 6675 - Introduction to Big Data Analytics**

The amount of data available to organizations to help them create a competitive advantage is growing exponentially. These data sets are so large and complex that traditional data modeling and data analysis processes are inadequate. In this course, students are guided through basic approaches to querying and exploring data using higher level tools built on top of a Hadoop Platform. Students will walk through query interfaces, environments, and the canonical situations for tools like HBASE, HIVE, Pig, as well as more open source tools like HUE.

**ITEC 6680 - Software Engineering Management and Processes**

Enterprise managers are keenly interested in implementing efficient and effective software development processes. Developments in the application of software engineering to help managers gain control over the production of software, including processes that measure progress, quality, and cost at the project and organizational levels, are covered in this course.

Prerequisites

- ITEC 6145

**ITEC 6685 - Data Visualization**

Big Data normally refers to petabytes (1000 terabytes) or exabytes (one billion gigabytes) of unstructured data. This amount of data requires new methods to analyze, visualize, and present these data in a way that yields insight and understanding. Students in this course are introduced to elementary graphics programming, focusing primarily on two-dimensional vector graphics and the programming platforms for graphics. This infrastructure will also include lessons on the human side of visualization, studying human perception and cognition to gain a better understanding of the target of the data visualization.

**ITEC 6700 - Psychology of Social Change**
In this course, students analyze and evaluate theories of social and personal change. Students engage in a variety of conceptual and application assignments focused on power and social inequalities, ethnic inequalities, global environment, and issues related to gender and sexism, such as homophobia. In addition, students examine the impact of social change theories on children, families, and societies. They explore the concepts of change agent and change advocate as well as the role of the psychologist as change agent. Students also engage in an integrative written assignment to synthesize theories and analyze a current social problem in their community, for which they propose an action to address the issue and drive positive social change.

ITEC 6712 - Business Architecture and Process

(3 cr.)
Students in this course examine the structure and operations of organizations from an information-processing point of view and develop their skills in analyzing, designing, and improving operations. Topics include fundamental business structures; business process design, management, and optimization; decision support and automation; and enterprise resource planning and integration.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 6713 - Business Strategy for Competitive Advantage

(3 sem. cr.)
The focus of this course is on the development and implementation of business strategies that enable competitive advantage, with an emphasis on understanding the current environment in which the organization competes and forecasting how that environment may change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 6721 - Organizational and Social Dimensions of Information Systems

(3 sem. cr.)
In this course, students place their technical and process work in a human context, focusing on issues and effects in a broader domain. Topics include organizational behavior and change; intellectual property issues; ethics, professionalism, and social impact; and privacy and security.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 6900 - IT Capstone
(3 sem. cr.)
Students in this capstone course have an opportunity to synthesize concepts and skills in a reflective project. They build a bridge from the academic experience to the workforce. In the context of a specific IT problem, students evaluate appropriate technologies and design a solution.

**ITEC 8000 - Foundations and Communications for Information Technology**

(3 sem. cr.)
This course introduces students to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. They develop presentation and written communications skills geared toward developing a high level of competence in professional communication with colleagues, clients, novices, and IT experts. Additionally, students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence. They also have the opportunity to prepare their Professional Development Plan and program of study.

**ITEC 8010 - Fundamentals of Information Systems♦**

(3 sem. cr.)
The principles of computer hardware, software, and networks underlie the techniques and practices of information systems professionals. Students in this course survey the fundamental aspects of computing and prepare to use computers effectively for problem solving. Through a variety of application assignments, students delve into the types and construction of hardware, software, networks, and tools for data management. They learn ways to create an algorithm, represent data, and express their designs in a programming language. Through this course students are encouraged to become active and influential professionals by applying concepts and principles to real-world practice.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ITEC 8030 - Principles of Programming♦**

(3 sem. cr.)
The discipline of software development demands a variety of skills. Students in this course assess the fundamental practices and principles of designing and constructing object-oriented programs. They engage in substantial hands-on practice, reinforcing algorithmic thinking, logical design, precise coding, and careful attention to quality.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ITEC 8040 - Systems Analysis and Design♦**
(3 sem. cr.)
Students in this course examine the role a systems analyst plays in developing large-scale software systems and explore the phases of the software development life cycle. A systems analyst is responsible for designing the new system, ensuring the new system will meet the organization's needs, and ensuring that the correct staffing is available to create the new system. A systems analyst must also be able to resolve conflicts of interests. In this course, students focus on the definition of system requirements, both functional and nonfunctional, for an information system (IS). Students also investigate how to model requirements, data, and processes to meet business needs.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 8100 - Doctoral Study Mentoring

(0 sem. cr.; five 8-week terms of enrollment to be taken along with the specialization seminar/leadership courses)
The purpose of this course is to assist doctoral students in making steady progress toward their doctorate in information technology. The "instructor of record" for a section of the course is the chair of the doctoral study committee. Section participants are the students working with the faculty member at various stages of their doctoral study. Students in this course have a forum for ongoing exchange of ideas, input, and feedback between them and their doctoral study chair as students complete the coursework for the degree.

ITEC 8115 - Computer Networking and Operating Systems♦

(3 sem. cr.)
Within this course, students can learn the concepts of computer operating systems, including the main functions, similarities, and differences. Students can explore a variety of topics, including configuration, file systems, security, administration, interfacing, multitasking, and performance analysis. In addition, they can further their understanding of computers through the study of computer networks by learning key networking concepts, components, and the design of information and communication infrastructure solutions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 8120 - Operating System and Network Architecture♦

(3 sem. cr.)
The infrastructures of operating systems and networks are the fundamental technologies that support enterprise information systems. Students in this course examine the components of computer systems, their underlying operating systems, and their data communications networks. Students critically investigate the services these components
provide and draw implications for the large-scale enterprise.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 8130 - Advanced Software Development

(3 sem. cr.)
Contemporary software development principles continue to evolve. In this course, students explore contemporary software development concepts and tools. Through application assignments designed to contextualize theories presented in the course, students apply object-oriented techniques, usability principles, and design for reuse. Students have the opportunity to acquire knowledge requisite to the development of sound, maintainable, and extensible software.

ITEC 8145 - Enterprise Database Design

(3 sem. cr.)
In this course, students discuss the design, implementation, and operation of databases using a principal relational database management system (DBMS). Many fundamental topics are covered in this course including: data modeling using entity-relationship diagrams; data storage, manipulation, and queries using structured query language (SQL); functional dependencies, normalization concepts, data warehouse architectures, data warehouse modeling, and data analytics.

ITEC 8150 - Principles of Software Engineering

(3 sem. cr.)
The principles of software engineering and software design allow for the methodical construction and controlled development of complex software systems. Students in this course survey the evolution and current practices of software engineering through the entire software life cycle, with emphasis on the elements that significantly influence software system quality.

ITEC 8160 - Enterprise Systems Architecture♦

(3 sem. cr.)
Large-scale enterprise systems often rely on architectural frameworks that define their main components as well as the interactions among these components. Students in this course survey the principal design strategies and tools for constructing the modern information system. They identify common vendor and open-source components, illustrating how they can create and integrate robust web- and cloud-based services and applications.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
ITEC 8170 - Fundamentals of Information Assurance

(3 sem. cr.)
The principles of confidentiality, integrity, and availability of data while it is being stored, processed, or communicated guide the policies and practices of information assurance. In this course, students investigate the theory of information security and data protection, study common system risks and vulnerabilities, and follow best practices to protect computer and data assets. These practices address organizational policies, access controls, software and network design, and logging and auditing.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 8201 - IT Leadership Simulator: Integrating Diverse Systems and Leading Technology

(3 sem. cr.)
In this information technology (IT) leadership course, students delve into a problem-based learning scenario focused on an organizational merger situation. Students investigate which technology set best supports the newly merged organization’s IT infrastructure. They also plan for and manage how changes to the new IT infrastructure will address the needs of the organization and its employees across countries, cultures, and diverse business areas.

ITEC 8202 - IT Leadership Simulator: Developing Proactive and Reactive Security Plans

(3 sem. cr.)
In this information technology (IT) leadership course, students delve into a problem-based learning scenario focused on an organization that has experienced a security breach. Students examine relevant IT governance, security, and privacy issues that are essential to the organization. They gain practical experience in formulating comprehensive proactive and reactive system security plans. Students also explore sound IT management principles in decision making and implementation of broad-scale change.

ITEC 8203 - IT Leadership Simulator: Leading IT in a Dynamic Environment

(3 sem. cr.)
In this information technology (IT) leadership course, students delve into a problem-based learning scenario in which they confront an impending or proposed disruptive legislative or policy change. Students work through the scenario under the assumption that the dynamic change has a direct societal influence and will affect IT accessibility and/or use. They anticipate effects, examine the societal values driving different choices,
determine priorities, and develop a plan to positively influence the formation and implementation of policies for issues in which IT features prominently.

ITEC 8225 - Technology Innovation and Change Management

(3 sem. cr.)
Students in this course are provided with a comprehensive understanding of change models and the impact of change related to technology innovation, adoption, and implementation. Students are presented with both the theoretical and practical perspectives required to manage the design and use of technology to foster growth, innovation, and change within organizations. Course content focuses on how innovation can act as a change enabler and the importance of building readiness for change within organizations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 8240 - Advanced Database Systems

(3 sem. cr.)
In order to create a competitive advantage, organizations store and analyze information in a variety of different formats. This course covers key areas of database systems, such as requirements, design, implementation, security, performance, and scalability. Through a hands-on approach and practical projects, students have an opportunity to design and build database systems using the latest database technologies.

ITEC 8250 - Requirements and Quality Engineering

(3 sem. cr.)
In this course students examine requirements of engineering and quality engineering in the context of software engineering. Students are presented with topics on the system engineering life cycle, including requirements, design, integration, transition, operation, maintenance, support, and quality management standards. Course content focuses on issues of requirements and quality engineering, such as the elicitation of requirements, analysis, specification, validation, and change management.

ITEC 8255 - Cyber Crime Prevention and Protection

(3 sem. cr.)
Combatting cybercrime requires a deep understanding of the mechanisms and techniques that can be used to prevent or at least mitigate against it. In this course students consider the motivations for cybercrime and have the opportunity to develop a comprehensive understanding of the tools that can be used to prevent it, including the deployment of cybercrime prevention strategies. Students build an "ethical hacking" environment with which they can experiment. In addition, the course is directed at
providing students with hands-on knowledge of cybercrime prevention for application in the workplace.

**ITEC 8425 - Strategic Technology Management**

(3 sem. cr.)
Students in this course are provided with a detailed understanding of how technology becomes an enabler for business. Students study how information technology (IT) strategies support organizational goals, and how IT strategies can help to create a sustained competitive advantage in business. Students evaluate IT strategies and how best to deploy such strategies in the context of systems or business applications.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**ITEC 8427 - Applied Research Methods—Qualitative and Quantitative**

(3 sem. cr.)
Students in this course are introduced to qualitative, quantitative, and mixed-methods frameworks for inquiry. Quantitative designs that are covered in the course include experimental and quasiexperimental, survey, causal-comparative, evaluation, and existing action research; qualitative designs include case study, phenomenology, grounded theory, and ethnography; and mixed-methods strategies include sequential and concurrent strategies. Students work toward acquiring substantive, foundational knowledge of the philosophy of science as they construct, use, and critique concepts and theories. They can learn to produce knowledge for practice as they examine ethical, social, and political aspects of conducting research. By demonstrating knowledge and the ability to solve problems and test hypotheses, students engage in course assignments that emphasize the practical application of writing and critical-thinking skills and the integration of professional practice at the doctoral level.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**ITEC 8437 - Quantitative Decision Making for Strategic Analysis**

(3 sem. cr.)
In this course, students develop skills in descriptive statistics, statistical inference, and quantitative techniques, including correlation, t-tests, ANOVA, regression, and various non-parametric methods. Students use quantitative data reduction and analysis and data management techniques, and they learn to utilize software for data analysis. This course is not intended for students to become fully grounded in statistical methods; rather, students learn appropriate questions to ask about data analysis, as well as how to defend their use of specific techniques in professional practice.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program.*
ITEC 8447 - Qualitative and Case Study Research for Strategic Analysis

(4 sem. cr.)
Students taking this course have the opportunity to extend their research and general analysis skills as they further explore research methods and project types—specifically, qualitative and case study research methods—that they may incorporate into their own doctoral study. Students explore ways of improving the quality and strategic analysis of organizational information technology (IT). They also focus on how to think in an action-oriented manner, as if they were consultants, so that their own doctoral study work could be applied in action. Finally, students begin to plan their doctoral study by engaging in an iterative process to develop their premise and a draft prospectus that incorporates feedback from peers and the course instructor. Ultimately, students offer the prospectus as a document for review and consideration by potential mentors for their doctoral study.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ITEC 8501 - Seminar in Information Security

(3 sem. cr.)
Students in this doctoral seminar focus on the scholarly and practice-oriented literature related to information security. Students explore major theoretical approaches and practices that define the discipline and the strategic and organizational implications of information security, such as secure data, secure networks, vulnerabilities, and computer forensics. During the majority of the seminar, students work with colleagues, including faculty members, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. They also have the opportunity to lead their colleagues as well as to participate in academic discourse.

ITEC 8502 - Seminar in IT Systems, Software, and Management

(3 sem. cr.)
Students in this doctoral seminar focus on the scholarly and practice-oriented literature related to IT systems, software, and management. Students explore major theoretical approaches and practices that define the discipline as well as strategic and organizational implications of IT systems, software, and management, such as system architecture, software development, and system management. During the majority of the seminar, students will work with colleagues, including faculty, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. Students have the opportunity to lead their colleagues as well as to participate in academic discourse.
ITEC 8503 - Seminar in Project Management

(3 sem. cr.)
Students in this doctoral seminar focus on the scholarly and practice-oriented literature related to project management of information technology (IT) projects. Students explore major theoretical approaches and practices that define the discipline and the strategic and organizational implications of project management of IT projects, such as knowledge management, requirements management, and current project management tools and techniques, all within an IT framework. During the majority of the seminar, students work with colleagues, including faculty members, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. They also have the opportunity to lead their colleagues as well as to participate in academic discourse.

ITEC 8504 - Seminar in Cloud and Grid Computing

(3 sem. cr.)
In this doctoral seminar, students focus on the scholarly and practice-oriented literature related to cloud and grid computing. Students explore major theoretical approaches and practices that define the discipline and strategic and organizational implications of grid and cloud computing, such as security, availability, architecture, and ownership. During the majority of the seminar, students work with colleagues, including faculty members, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. They also have the opportunity to lead their colleagues as well as to participate in academic discourse.

ITEC 8506 - IoT Security and Forensics Seminar

(3 sem. cr.)
In this doctoral seminar, students focus on the scholarly and practice-oriented literature related to security and forensics in the context of the Internet of Things (IoT). Students explore major theoretical approaches and practices that define the discipline and strategic and organizational implications of security and forensics in the context of IoT. During the majority of the seminar, students work with colleagues, including faculty members, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. They also have the opportunity to lead their colleagues as well as to participate in academic discourse.

ITEC 8507 - Blockchain in Cybersecurity Seminar

(3 sem. cr.)
In this doctoral seminar, students focus on the scholarly and practice-oriented literature related to blockchain technology in the context of cybersecurity. Students explore major theoretical approaches and practices that define the discipline and strategic and
organizational implications of blockchain technology in the context of cybersecurity. During the majority of the seminar, students work with colleagues, including faculty members, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. They also have the opportunity to lead their colleagues as well as to participate in academic discourse.

ITEC 8509 - Multivariate Analysis Seminar

(3 sem. cr.)
In this doctoral seminar, students focus on the scholarly and practice-oriented literature related to multivariate analysis. Students explore major theoretical approaches and practices that define the discipline and strategic and organizational implications of multivariate analysis. During the majority of the seminar, students work with colleagues, including faculty members, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. They also have the opportunity to lead their colleagues as well as to participate in academic discourse.

ITEC 8510 - Modeling, Optimization, and Application in Data Science Seminar

(3 sem. cr.)
In this doctoral seminar, students focus on the scholarly and practice-oriented literature related to modeling, optimization, and application in data science. Students explore major theoretical approaches and practices that define the discipline and strategic and organizational implications of modeling, optimization, and application in data science. During the majority of the seminar, students work with colleagues, including faculty members, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. They also have the opportunity to lead their colleagues as well as to participate in academic discourse.

ITEC 8513 - Middleware for Networked and Distributed Systems Seminar

(3 sem. cr.)
In this doctoral seminar, students focus on the scholarly and practice-oriented literature related to middleware for networked and distributed systems. Students explore major theoretical approaches and practices that define the discipline and strategic and organizational implications of middleware for networked and distributed systems. During the majority of the seminar, students work with colleagues, including faculty members, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. They also have the opportunity to lead their colleagues as well as to participate in academic discourse.

ITEC 8514 - Requirements and Quality Engineering Seminar
(3 sem. cr.)
In this doctoral seminar, students focus on the scholarly and practice-oriented literature related to requirements and quality engineering. Students explore major theoretical approaches and practices that define the discipline and strategic and organizational implications of requirements and quality engineering. During the majority of the seminar, students work with colleagues, including faculty members, to identify threads and tendencies for further reading and discussion in a true doctoral seminar format. They also have the opportunity to lead their colleagues as well as to participate in academic discourse.

ITEC 8665 - Predictive Analytics for Decision Making

(3 sem. cr.)
Students in this course are provided with insight into how predictive analytics can be used within organizations. In completing this course, students have the opportunity to gain a comprehensive understanding of how results from predictive analytics can be used by organizations to grow their customer base and run operations more efficiently. This course is oriented toward the practical applications of predictive analytics.

ITEC 8721 - Organizational and Social Dimensions of Information Systems

(3 sem. cr.)
In this course, students place their technical and process work in a human context, focusing on issues and effects in a broader domain. Topics include organizational behavior and change; intellectual property issues; ethics, professionalism, and social impact; and privacy and security.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist (1-866-492-5336 (U.S.); 1-443-627-7222 (toll)) for more information.

ITEC 9000 - Doctoral Study Completion

(continuous enrollment in 3 sem. cr. per term for a minimum of five terms until completion, with two 8-week terms taken per semester)
Students demonstrate a scholarly ability to examine, critique, and synthesize knowledge, theory, and experience in the final doctoral study. They show how new ideas can be tested; best practices identified, established, and verified; and theoretical, practice or policy constructs evaluated and advanced. In all cases, the doctoral study is a rigorous inquiry that results in new knowledge, insight, or practice, demonstrating its efficacy in the world of information technology. This course is a forum and structure for doctoral students to interact with the chair of their doctoral study committee, as well as other students assigned to the same chair, in order to make steady progress on their individual doctoral study research.
Students take this course for a minimum of five terms and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred.

**LDRS 1001 - Personal and Organizational Leadership**

(6 cr.)

Personal goals, values, and purpose represent the foundations of effective personal leadership. In this introductory course, students explore this concept of personal leadership in their own work and community roles. Through the application of self-assessment tools, students can gain insights into their leadership strengths as well as those areas representing opportunities for improvement. The roles of emotional intelligence and social intelligence are introduced to provide a more comprehensive model of personal leadership. Students also investigate the alignment of Walden's mission of social change with broader societal issues in the workplace, including the relationship between personal and organizational leadership.

**MATH 1010 - Intermediate College Math**

(5 cr.)

Students in this course have the opportunity to gain fundamental skills needed for College Math. Through weekly lab assignments, students engage in problem-solving, use of formulas, number operations and notations, exponents and exponential expressions, variation, linear and nonlinear equations and graphs, polynomials, rational and radical expressions, and basic geometry. They also collaborate with peers through discussions in which they complete solutions to more challenging math problems.

*Note:* This course is considered an elective.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MATH 1020 - Intermediate Algebra**

(5 cr.)

In this course, students have the opportunity to gain requisite skills needed for College Algebra Concepts. Through weekly lab assignments, students work through algebra problems involving exponents and exponential functions, linear and absolute value equations and inequalities, quadratic and polynomial functions and their graphs, rational and radical equations, and systems of linear equations. The course also provides
students with an introduction to complex numbers.

Note: This course is considered an elective.

 Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MATH 1030 - College Math

(5 cr.)
Students in this course are provided with accessible mathematical tools to analyze and solve real-world problems. Using these tools, students build skills in critical thinking and numerical, logical, and statistical reasoning as applied to workplace, academic, professional, and personal topics. They engage in conceptual and applied assignments on such topics as inequalities, statistics, and financial literacy. Through this course, students gain the knowledge and skill to apply inductive and deductive reasoning to real-world problems in mathematics.

 Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MATH 1030A - College Math

(5 cr.)
Students in this course are provided with accessible mathematical tools to analyze and solve real-world problems. Using these tools, students build skills in critical thinking and numerical, logical, and statistical reasoning as applied to workplace, academic, professional, and personal topics. They engage in conceptual and applied assignments on such topics as inequalities, statistics, and financial literacy. Through this course, students gain the knowledge and skill to apply inductive and deductive reasoning to real-world problems in mathematics.

Prerequisites
- ENGL 1010A

MATH 1040 - College Algebra Concepts

(5 cr.)
Students in this course learn a solid foundation in key algebra skills. Students gain a thorough understanding of algebra concepts through the iterative process of working through a range of problems, including solving and graphing linear, quadratic, and polynomial functions; composing and inverting functions; analyzing rational and radical functions; modeling exponential and logarithmic data; and solving systems of equations and inequalities. Through individual lab work, collaborative activities, and discussions, students in this course cultivate perspectives and analytical skills required for efficient use, appreciation, and understanding of algebraic concepts.

 Students may take this as a non-degree course, which means they do not have to be enrolled in a
MATH 6551 - Understanding Number Systems and Operations♦

(3 sem. cr.)
Understanding rational numbers is the foundation for understanding other critical mathematic concepts and their application to everyday life. In this course, middle-level mathematics teachers explore exciting ideas to help students determine appropriate operations for solving problems and becoming more proficient in working with factors, multiples, fractions, decimals, percents, and negative numbers. Teachers develop problem-based activities to engage students in using common algorithms and other mathematical reasoning and sense-making strategies for adding, subtracting, multiplying, and dividing rational numbers. Strategies for estimation and using the number line to represent and solve problems are also provided in this course.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MATH 6552 - Geometric Thinking and Measurement♦

(3 sem. cr.)
Understanding the relationship among geometry and measurement and solving problems using day-to-day real life experiences can motivate and guide students’ thinking and reasoning around these concepts. In this course, middle mathematics teachers learn strategies to connect geometric thinking and measurement to other topics and develop their own conceptual understanding of geometry and measurement by learning what it means to estimate and measure attributes of objects and how to develop fundamental measurement concepts and skills. In this course educators are challenged and supported as they engage in opportunities to foster students' mathematical processes, proficiencies, and habits of mind around the concepts of shape, spatial relationships, and measurement, including estimation.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MATH 6553 - Algebraic Reasoning, Functions, and Equations♦

(3 sem. cr.)
Algebra builds on a strong understanding of arithmetic and its properties in the real number system. Middle mathematics teachers have opportunities to move beyond the traditional teaching of algebra to the idea of algebraic thinking as an important component of all mathematics and everyday life. The use of tools, such as manipulative materials, calculators, and other emerging technological resources, provides educational professionals with concrete examples of how to incorporate the Common Core Standards for Mathematical Practice into their teaching. The goal of this course is to deepen
educators' understandings of the role algebra plays in problem-solving and decision making so that they can apply this knowledge to support their students in developing similar knowledge and understandings. Educators explore a range of topics, including reasoning and sense-making; various types of functions; multiple uses of variables; pattern recognition; mathematical modeling; estimation; and the development of linear functions from rates, ratios, and proportional reasoning.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MATH 6554 - Data, Probability, and Statistical Reasoning

(3 sem. cr.)
Understanding data, probability, and statistics is critical to making sense of the vast amounts of information available in today's world. Educators taking this course have authentic contexts for collecting, representing, and interpreting data, and they reinforce essential number concepts in promoting students' ability to think statistically. Middle mathematics teachers focus on using data as a context for developing a variety of mathematical topics and as an important step toward understanding statistical ideas and processes. The goal of this course is to develop educators' understanding and pedagogical practices so that they can promote their students' ability to use data, probability, and statistics to better understand real-world issues and to solve a wide range of relevant and engaging problems in many contexts.

MATH 6561 - Learning and Teaching Mathematics

(3 sem. cr.)
To foster high levels of learning and achievement in math, teachers must first have a deep understanding of mathematical concepts and know how best to teach them. In this course, teachers of K—8 mathematics are introduced to exciting ideas and practices to address their own learning and teaching of mathematics. Authentic and engaging mathematics experiences, including modeling, representing mathematical ideas in multiple ways, and identifying and addressing student misconceptions, are emphasized. Educators engage in effective practices for fostering students' ability to reason, analyze conceptual relationships, and persist in solving challenging problems. Connections across mathematics topics, skills, and levels as well as educational policies that impact the learning and teaching of mathematics are emphasized in this course. The Common Core State Standards for Mathematics, including the Standards for Mathematical Practice, and the National Council for Teachers of Mathematics (NCTM) practices are frameworks for addressing fundamental principles and skills.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MATH 6562 - The Base Ten Number System and Operations: Addition/Subtraction♦

(3 sem. cr.)
Effective elementary mathematics instruction requires a deep understanding of numbers and operations, the real-world situations in which these arise, and how children learn these ideas. In this course, teachers refine their knowledge of the structure of the base-ten number system and how it is used in addition and subtraction. They examine various methods of multi-digit calculations, including methods commonly created by students and variations of standard algorithms. Teachers extend their own conceptual understanding by modeling mathematics visually and explaining relationships between visual representations and mathematical notation. Teachers also learn how to develop appropriate interventions by diagnosing common student misconceptions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MATH 6563 - The Base Ten Number System and Operations: Multiplication/Division♦

(3 sem. cr.)
Developing students' mathematical habits of mind and leading them to become mathematical thinkers is an important goal of elementary mathematics education. In this course, educators extend their own understanding of the base ten number system and the relationships among addition, subtraction, multiplication, and division. Educators explore various interpretations and meanings of these operations while working with properties of multiplication, division, and proportionality. They investigate students' misconceptions and struggles and develop effective intervention strategies. Educators further develop their own mathematical habits of mind as they engage in challenging tasks and solve real-world mathematical problems.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MATH 6564 - Measurement, Data, and Geometric Thinking♦

(3 sem. cr.)
Measurement and geometry are often challenging topics for elementary students, but they represent some of the most visible uses of mathematics in students' day-to-day lives. In this course, educators learn strategies for connecting these topics to other mathematical concepts, including fractions, decimals, and the number system. In geometry, educators move beyond strategies for developing a familiarity with basic shapes and their properties to explore higher-order tasks that involve geometric thinking, measurement concepts, and proportional relationships. Using data as a context to support students' learning of these mathematical ideas, educators have the
opportunity to explore real-world problems and collect, represent, and interpret data.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MATH 6565 - Understanding Rational Numbers and Proportional Reasoning♦

(3 sem. cr.)
Understanding fraction concepts is a critical foundation for learning about proportional relationships and developing algebraic concepts. In this course, educators learn how to extend students' knowledge of whole numbers and basic operations—addition, subtraction, multiplication, division—to fractions and decimals. Educators learn instructional practices to help students understand, represent, develop, and engage in rational number operations with meaning, proficiency, and precision. They also investigate ways to foster deep conceptual understandings of ratios, rates, and proportional relationships, thus building in students the critical skill of proportional reasoning. Educators consider how proportional reasoning builds a bridge to the study of other important mathematical topics, including geometry, measurement, and data as well as the use of proportionality as a connecting thread throughout the elementary and middle math curriculum.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MATH 6663 - The Base Ten Number System and Operations: Multiplication/Division (Accelerating)

(3 sem. cr.)
Developing students' mathematical habits of mind and leading them to become mathematical thinkers are important goals of elementary mathematics education. In this course, teachers extend their own understanding of the base ten number system and the relationships among addition, subtraction, multiplication, and division. Teachers explore various interpretations and meanings of these operations while working with properties of multiplication, division, and proportionality. They investigate students' misconceptions and struggles and develop effective intervention strategies. Teachers further develop their own mathematical habits of mind as they engage in challenging tasks and solve real-world mathematical problems.

MEDC 3001 - Communicating Through Media and Technology♦

(5 cr.)
Technology provides a competitive advantage to those who utilize it most successfully. In this course, students learn that technology can be a valuable tool in optimizing communications for appeal and impact when combined with the use of media. Students explore all aspects of existing and newly emerging social media and its relationship to
business communication. They apply their knowledge of the dynamics of effective communications to sequenced components of a portfolio project using both media and technology for enhanced outcomes. Through this course, students work toward gaining the skills necessary to develop an effective social media plan.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MEDC 4101 - Leveraging Emerging Media for Mass Communication♦

(5 cr.)
Blogging, podcasting, social networks, wikis, web conferencing and broadcasting, and mobile messaging have become integrated means of expressing and sharing our thoughts. Students in this course will delve into these and other new technologies, developing an appreciation of their usefulness, their best applications, and their overall utility in a variety of settings. They assess and discuss a variety of topics related to social media, such as how to harness it to create demand for products, reach the intended audience, and broadcast ideals and values. Students in this course have the opportunity to develop the knowledge and ability to build a social media strategy as well as a professional website incorporating social media.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MEDC 4102 - Emerging Media and Global Communication♦

(5 cr.)
As with the use of digital media in domestic business, expanded markets—especially global markets—benefit from their use as well. Students in this course investigate how to use these new tools to establish a type of universal "language" that cannot be established in other ways. They examine new media in a variety of global contexts, such as politics, economics, and education. Students apply concepts from the course in a project through which they practice employing new media tools to effectively reach a global arena, enhancing their own capacity and marketability.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MEDC 4103 - Emerging Media Design♦

(5 cr.)
Technology and new media continue to evolve, primarily due to interest coupled with new-found capabilities derived from 21st-century know-how. With this invitation to create, students apply their understanding of new media as a set of effective tools in the practice of communications to design a conceptual prototype appropriate to enhancing mass communications. Students learn to test, refine, and appraise their product, taking
into account visual components, audience information, and user feedback. They also discuss topics of new media design with their peers and reflect on its implications in modern business.

Prerequisites
- MEDC 3001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 4100 - International Business Operations

(5 cr.)
The need for businesses to extend their operations beyond domestic borders is growing continually. This shift to globalization brings both advantages and disadvantages. Students in this course explore the major aspects of international business environments and operations and focus on the strategic and operational issues that firms face when they do business abroad. Students engage in a variety of application exercises and written assignments involving key themes, such as the political, legal, and economic challenges of operating in a global environment; the design, implementation, and control of international business operations; and the socio-cultural aspects of doing business globally. They also discuss and reflect on current issues in international business to share ideas and gain varying perspectives from their peers.

Prerequisites
- BUSI 2003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 4109 - Management and Organizational Behavior

(5 cr.)
In this course, students have the opportunity to gain an understanding of the concepts of human and organizational functioning, while focusing on the managerial problems and solutions in both domestic and transnational settings. Students examine individual perception and learning, differences in personality, career development, motivating employees, and making effective decisions. They explore the ethical issues faced by domestic and transnational organizations and managers, social responsibility, communications, motivation, and leadership. Students examine the impact national culture has on leadership and management as well as the day-to-day operational issues, such as the management of diversity in the workplace. Through a diagnostic approach employing text readings, individual and case analyses, application exercises, and a final individual organizational plan, students learn course concepts and contextualize theoretical content. Ideally, this course is suited to individuals either currently operating
in an international environment or contemplating doing so.

Prerequisites
- BUSI 1001 or BUSI 1002

MGMT 4400 - Organizational Behavior and Management♦

(5 cr.)
Students address concepts of human and organizational functioning, while focusing on managerial problems and solutions in organizational settings. Topics include individual perception and learning, career development, employee motivation, effective decision making, management of diversity, ethical issues faced by organizations and managers, communications, and the impact of organizational culture on leadership and management.

Prerequisites
BS in Communication
- COMM 1010
All Other Programs
- BUSI 1001 or BUSI 1002 or COMM 3001

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 4401 - Management and Organizational Behavior♦

(5 cr.)
In this course, students have the opportunity to gain an understanding of the concepts of human and organizational functioning, while focusing on the managerial problems and solutions in both domestic and transnational settings. Students examine individual perception and learning, differences in personality, career development, employee motivation, and effective decision making. They explore the ethical issues faced by domestic and transnational organizations and managers, social responsibility, communications, motivation, and leadership. Students examine the impact national culture has on leadership and management as well as the day-to-day operational issues, such as the management of diversity in the workplace. Through a diagnostic approach employing text readings, individual and case analyses, application exercises, and a final individual organizational plan, students learn course concepts and contextualize theoretical content. Ideally, this course is suited to individuals either currently operating in an international environment or contemplating doing so.

Prerequisites
BS in Psychology Workplace Psychology Concentration
- BUSI 1001 or BUSI 1002
All Other Programs
- BUSI 1001 or BUSI 1002 or COMM 3001
MGMT 4990M - Business Essentials

(0 cr.)
A background in the basics of business is often a key to making the most of a graduate business or management program. In this foundational course, students can build their business acumen in major functional areas that are essential to business success including business leadership and management, business ethics, the legal environment of business, accounting, finance, economics, quantitative methods and statistics, information systems management, global business, marketing, and strategic management.

MGMT 6000 - Dynamic Leadership

(3 sem. cr.)
Being an effective leader is essential in business and demands that an individual has a strong set of competencies, including the ability to understand one’s self, motivate others, understand organizational culture, and manage ambiguity. In this course, students begin their personal and professional transformation by closely examining their current strengths and weaknesses, values, decision-making processes, and approaches to dealing with difficult problems. Students also explore leadership in turbulent times by examining how effective leaders think as well as how various management styles impact situations and relationships within an organization.

MGMT 6010 - Managing People and Promoting Collaboration

(3 sem. cr.)
Contemporary business environments are increasingly competitive, global, fast paced, and knowledge intensive. In these environments, effective use of human capital is vital to an enterprise's success and survival. In this course, students will explore practical issues related to developing individuals and managing collaboration and will examine the skills and strategies necessary to address them effectively. Students will examine ethical and legal implications of managing a diverse workforce including issues that arise from cross-cultural differences and virtual work settings. The importance of communication as a tool to manage internal and external relationships is emphasized as it relates to the effectiveness of managing people to achieve organizational goals.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MGMT 6100 - Managing and Leading: A Contemporary Approach

(3 sem. cr.)
Students in this course explore contemporary management concepts and practices to gain a foundation for building the skills and knowledge necessary to be effective and ethical managers in a global and interconnected environment. Students examine and contrast management and leadership theories and practice. They also explore keys to success in the program, including setting goals; establishing priorities; managing time; communicating effectively and working in online settings; and giving, receiving, and using constructive feedback and reflection. Students are also provided with a brief introduction to Walden University, graduate studies at Walden and related processes and policies, the MS in Management program, and the essentials of scholarly writing.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6101 - Managing First Things First

(3 sem. cr.)
Effective managers know how to identify, prioritize, and act upon the most important items of the myriad of tasks that can potentially distract them on any given day. Students will explore the qualities of effective managers and various management styles to identify those which resonate. They will examine critical skills that are imperative to successful management, including organizing and handling priorities; communicating effectively; motivating, empowering, and developing people; resolving issues and challenges; and managing oneself. Students will gain valuable skills and knowledge that they can apply immediately.

MGMT 6110 - Critical Thinking for Effective Management

(3 sem. cr.)
Managers encounter a variety of challenges on a daily basis, which require the ability to employ existing tools and strategies to strategically communicate with individuals and the organization at large and to understand the different types of attitudes and values of others. Individuals with these skills are most successful when their efforts are coupled with the ability to think critically and analytically. Students are provided with the opportunity to improve their overall critical-thinking and reasoning skills within a managerial context. Using relevant management articles, case studies, and current topics analyses, students sharpen their diagnostic-reading skills and learn to construct effective, ethical, evidence-based arguments, which are fundamental capabilities of effective managers. They also examine common fallacies in thinking and reasoning as well as the rhetorical use of language to formulate convincing and effective arguments.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MGMT 6115 - Communication for Leaders and Managers♦

(3 sem. cr.)
Effective communication is frequently cited as one of the most important factors in managerial and organizational success—as well as one of the areas of greatest dissatisfaction. In this course, students take a close look at the components of effective communication and hone strategies for communication success. They explore how self-perception and perception of others affect communication and will develop skills for communicating more effectively with diverse audiences. Topics include the communication process, interpersonal communication, self-awareness in communication, communication channels and mediums, and communicating across and beyond the organization.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6120 - Negotiation and Conflict Resolution♦

(3 sem. cr.)
Effective business practice requires the ability to handle important negotiations, from internal disputes to international mergers, as well as the knowledge of methods and tools to prevent, manage, and break inherent conflict. Students in this course explore the challenges of managing people in times of perceived conflict and dispute, and they work toward developing skills to identify different types of conflict situations. They engage in hands-on, practical exercises in general contingency thinking and action approaches, negotiation and bargaining strategies, and communication styles designed to help them resolve conflicts and move toward win-win outcomes.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6130 - Developing People and Managing Teams♦

(3 sem. cr.)
Business managers possess an important role in developing the people for whom they are responsible and in creating and sustaining effective teams in complex and diverse organizational settings. Students in this course explore this role while focusing on developing skills and knowledge required to obtain the best performance from individuals in order to achieve goals and create positive environments. They also consider and discuss the ethical and legal implications of managing individuals and teams. Students examine the challenges of managing a diverse workforce, including issues that arise from cross-cultural differences and virtual work settings. Through this course, students learn the importance of communication as a tool to manage internal and external relationships and practice their communication skills to prepare for an effective role in management.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6135 - Harnessing the Power of Data and Information♦

(3 sem. cr.)
Effectively using data and information can make the difference in whether the best decisions are made or problems are solved correctly. There are multiple approaches to practical managerial problem solving that are rooted in the systematic collection, analysis, and display of relevant data and information. In this course, students examine the importance of data, beginning with the process of transforming data into information, and then focusing on the best methods for presenting that information in support of sound and ethical decision making. Students evaluate common misinterpretations or errors in working with data and determine how to detect data and information presented in a deceptive manner. Students explore current paradigms in data-based decision making and problem solving. They learn how they can use these analytical-thinking practices to improve their general managerial decision-making skills.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6140 - Initiating and Managing Change♦

(3 sem. cr.)
Today’s business environment is constantly evolving to accommodate changes in economy, leadership, new regulations, and internal reduction and growth. Organizations require leaders who know how to work through barriers to effect positive and efficient organizational change. Students in this course learn about situations that constitute and require such change. They engage in a variety of assignments through which they explore effective strategies for initiating change and anchoring change into corporate culture to achieve organizational goals as well as for managing unplanned or unwelcome change. Students explore a variety of approaches and methods to transition individuals and organizations within evolving environments. They distinguish between reactive responses and proactive responses to change and examine the implications of culture, inertia, and uncertainty. Additionally, students explore the importance of understanding motivation and effective communication in mitigating negative reactions to change and facilitating the change process itself.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6150 - Creating Sustainable Solutions Through Systems Thinking♦

(3 sem. cr.)
Leaders in business must often take creative approaches to solve problems. Systems
thinking is a popular method of problem-solving because it allows leaders to see how problems interrelate and influence one another, which often leads to optimal, sustainable solutions. Students in this course can expand their perception of problem-solving and stimulate positive social change on important global issues by exploring systems thinking as a process whereby problems are viewed as individual components within a larger system. Students in this course use a framework for analyzing relationships within a system and for avoiding the risks associated with viewing problems in isolation. Students use systems thinking tools to model single-, double-, and multiple-loop feedback systems, at the micro and macro levels of analysis. In addition, students learn about scenario building and examine how the practice of systems thinking provides a foundation for creating sustainable outcomes for organizations and society.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6160 - Using Data and Information to Solve Problems**

*(3 sem. cr.)*

There are multiple approaches to practical managerial problem-solving that are rooted in the systematic collection, analysis, and display of relevant data and information. In this course, students examine the importance of data, beginning with the process of transforming information into data, and then focusing on the best methods for presenting data. Students evaluate common misinterpretations or errors in working with data and determine how to detect data presented in a deceptive manner. Students explore the basic tools used by quality, Six Sigma, and lean-method practitioners. They learn how they can use these analytical-thinking practices to improve their general managerial decision-making skills. They also practice their communication skills through small group discussions on a variety of topics, such as the relationship between data and information, effective problem-solving attitudes and capabilities, production processes, data deception, and survey sampling.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6170 - Budgeting and Resource Allocation**

*(3 sem. cr.)*

Managing business processes often involves careful planning and forecasting, taking into account many factors, such as expenses, investments, and, often times, unforeseen financial obligations. Students in this course explore the role of budgeting and resource allocation along with related processes within the organizational context. They examine processes related to managing budgets and strategies to read and communicate effectively the often complex financial information related to unit and organizational performance. Students also explore and discuss the implications of resource availability as well as methods to plan for and prioritize the use of resources, while considering
ethical issues related to sustainability and resource scarcity.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6175 - Managing, Mediating, and Resolving Conflict♦**

(3 sem. cr.)
Managers and leaders must be skilled in conflict management including the capability to mediate or resolve conflict at the interpersonal through organizational levels. Students in this course explore the challenges of managing people in times of perceived conflict and dispute, and they work toward developing skills to identify different types of conflict situations. Students will gain the knowledge of methods and tools to prevent, manage, and break inherent conflict. Students also consider the implications of emotion and the multifaceted array of conflict-management styles—factors for which professionals must account. They engage in hands-on, practical exercises in general contingency thinking and action approaches and communication styles designed to help them resolve conflicts and move toward win-win outcomes.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6180 - Managing Organizational Performance♦**

(3 sem. cr.)
In this course, students focus on the challenges and opportunities for managers to create value and to increase organizational performance. Building on concepts, such as skill-based strategy and human capital development, the theory of constraints, and value innovation, students explore and exercise various strategic-thinking perspectives and tools designed to improve and sustain organization-wide performance. Students also evaluate the different stages through which organizations transition to failure and examine methods for recognizing and halting negative trends.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6201 - Individual and Organizational Performance Management♦**

(3 sem. cr.)
Performance management involves the ongoing activities of employee evaluation and development focused on achieving the organization's short- and long-term goals. Performance management also is required to meet ethical and statuary requirements. Looking at the continuous nature of performance management underscores the importance of identifying and supporting talent development. Students assess performance management systems within the context of the defined system metrics supporting the organization’s goals, and they assess the role of performance
management in strengthening the organization through diversity and inclusion.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6401 - Human Resource Analytics♦

(3 sem. cr.)
Understanding the value of an organization's human capital is crucial to its continuing success. Human resource (HR) management metrics provide the tools both for measuring value and for managing an organization's human resources. Students in this course explore HR analytics and metrics as tools for organizational and individual performance improvement. These tools establish a foundation for the effective deployment of performance metrics as part of the recruitment, talent development, and retention of human resources. They also facilitate alignment of the HR strategy with the business strategy. Students examine the power of analytics and an HR metrics dashboard. In addition, students investigate the role of human resource information systems (HRIS) and the importance of working with internal business partners from areas such as information technology, finance, and the executive team.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6600 - Introduction to Human Resource Management♦

(4 sem. cr.)
Students in this course focus on the links between human resource management and the business/strategic issues important to organizations. Topics include human resources' strategic role and measured outcomes; employment law; recruitment and selection; workforce planning and talent management; performance appraisal and feedback; compensation, benefits, and total rewards; occupational health, safety, and security; employee and labor relations; and human resource information systems.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6601 - Strategic Human Resource Management

(5 cr.)
Despite common misperceptions, human resource (HR) managers are tasked with more than hiring, firing, and managing employee benefits. In this course, students learn why it important for a company to adjust to the varying needs of both domestic and international clients as well as how HR management helps to ensure this happens through various activities, including sourcing in a global environment. Students examine how HR management functions and activities can be the key to long-term business success, strategically aligning corporate goals with those of stakeholders and all major
areas of a business, including marketing, finance, technology, and operations. They compare and contrast HR management strategies, such as incentive cash and/or stock compensation programs, employee ownership, and nonmonetary rewards. Students also evaluate the impact such strategies have on employee motivation and retention.

MGMT 6602 - Contemporary Topics in the U.S. Healthcare Delivery System♦

(3 sem. cr.)
Students in this course assess the causes and consequences of historical events on health and medical care in the United States. They appraise the impact of barriers related to cost, quality, and access to health and medical care. Students analyze unique and complex aspects of subsystems and differentiate vertical and horizontal integrated healthcare delivery systems. They compare characteristics of healthcare and medical care in the United States with healthcare and medical care systems in other countries. Students also evaluate current and future issues, trends, and forces in healthcare and medical care reform.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6604 - Law, Ethics, and Policy in Healthcare Administration♦

(3 sem. cr.)
The rapidly evolving healthcare system presents the healthcare administrator with complex challenges and risks. Healthcare administrators must possess the skills needed to assess external and internal healthcare policies to influence organizational design and delivery of healthcare services. Students assess and discuss key policy initiatives from the diverse perspectives of policymakers, interest groups, and other stakeholders. Through coursework, students focus on required knowledge of laws and regulations developed by policymakers that impact the healthcare organizations, and they review key laws that govern patient care delivery, employee relations, contracts, and fraud. Emphasis will be placed on legal and regulatory failure points that administrators must avoid in designing and implementing policies and practices within the healthcare organization. To help frame these concepts, students examine the ethical underpinnings and principles that healthcare organizations and administrators follow in the delivery of services to patients.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6605 - Finding Your Inner Leader

(3 sem. cr.)
Being an effective authentic and trustworthy leader requires considerable self-awareness based on commitment to candid self-reflection and the wisdom to recognize how one can best serve others through creating shared vision for a better future. In this course,
students examine their values, experiences, skills, capabilities, preferences, and knowledge in context of their leadership aspirations. Students will examine factors that affect their ability to influence and inspire others and create plans to strengthen these leadership skills. Students will learn strategies to navigate in turbulent, changing environments that often pose difficult choices and discover how leaders rise to meet challenges and opportunities.

MGMT 6608 - Healthcare Financial Management and Economics

(3 sem. cr.)
In this course, students gain knowledge of economics principles such as cost, quality, and access as they relate to the healthcare world. The principles of healthcare financial management, including accounting and finance, are vitally important to the viability and ongoing operations of a healthcare business. Students have the opportunity to interpret and analyze the financial statements of a business, use and analyze financial ratios, utilize variance analysis, understand and implement operating and capital budgeting, and develop knowledge of the business planning process. Students create portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6611 - Business Operations: Systems Perspectives in Global Organizations

(3 sem. cr.)
Students in this course immerse themselves in the ways in which business operates in a global environment. Topics include supply chain management, process management, quality, innovation, forecasting, and decision making in a global operations environment. Through course assignments, students focus on the practical application of writing, creative, and critical-thinking skills and the integration of professional practice at the doctoral level.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6612 - Talent Management

(3 sem. cr.)
One of the most important assets of an organization is its talent, in other words, its human capital. However, too often there is little planning or strategy applied to the creation and management of this huge asset. In this course, students have the opportunity to develop the skills and knowledge to create and work effectively within a talent management and planning process. They explore recruiting strategies within a
human capital development context and focus on building specific skills in managing an organization's talent through position planning, talent selection and placement, and retention. Using industry best practices, students also engage in applications and group projects to practice developing initiatives that align with organizational strategies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6613 - Human Resource Metrics

(3 sem. cr.)
Understanding the specific value of the human resource (HR) capital of an organization is crucial. Metrics for HR management provide the tools for both measuring human capital value and for overseeing and managing an organization's human resources. Students in this course explore HR metrics as tools for organizational and individual performance improvement. They work toward establishing a foundation for the effective deployment of performance metrics as part of the recruitment, training and development, and retention of human resources. Students learn which metrics to employ and how to manage the results—a pivotal responsibility of HR managers.

Students in this course are provided with the tools to make informed decisions required to create, apply, interpret, and manage results of appropriate metrics as HR professionals.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6615 - Building Organizational Culture: Leaders as Architects

(3 sem. cr.)
Organizational leaders act as partners in shaping, and are shaped by, the organizational cultures they seek to influence. Students in this course learn to recognize the elements that make up an organization's culture as well as ways to harness these for positive change and organizational success. They explore perspectives on how to make conceptual sense of the cultural landscape of organizations and examine the implications for leading and building effective communities at various levels of application. Students assess and discuss a variety of topics, such as tools of self-development, the reciprocal nature of leadership, and cultural components.

MGMT 6617 - Performance Management

(3 sem. cr.)
Performance management is a set of practices and processes that creates career opportunities to attract appropriate resources, establishes an environment that nurtures individual productivity and development, and smoothly transitions individuals to their next position or organization. Students in this course are provided with the opportunity
to address these three key sets of processes. They practice writing job descriptions, selecting the right employees, developing skill-based performance standards, effecting relevant onboarding programs, and implementing educational and training programs intended to drive the success of employees and the organization as a whole. They explore how to maximize employee productivity through structured feedback, coaching, reflective performance development conversations, effective compensation models, employee recognition programs, and career development paths. Students also examine ways to improve performance management systems by integrating feedback from the exit interviews of valued employees.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6618 - Aligning Human Resources With Business Operations♦**

(3 sem. cr.)

Contemporary organizations typically strive to align human resources with their functional strategies and business units, lending to the fulfillment of the short- and long-term goals of the organization. In this course, students explore the role of effective human resource (HR) professionals, who engage with colleagues that lead these operating areas and develop HR solutions that support their success. Students identify and discuss the key drivers and metrics that managers in accounting, finance, information systems, sales, marketing, distribution, regulatory, supply chain, and other operating areas within the organization employ to craft their functional-level strategies. Students discover that this knowledge is what provides HR professionals the credibility to be valued partners with functional management figures, thus helping to prepare students for the inherent challenges of the HR manager role.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6621 - Personal Leadership: Mentoring and Coaching♦**

(3 sem. cr.)

Students in this course will understand and apply skills of effective mentoring such as active listening, learning, empowering, enabling change, and using feedback to create interactive dialogue and deeper understanding. Mentoring requires an understanding and integration of many leadership, interaction, and communication theories that support the development of effective leaders.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6622 - Practices in Project Management**
Students in this course are introduced to the knowledge, skills, tools, and techniques needed to successfully manage projects throughout the life of a project, known as the project life cycle. By learning about the project management Knowledge Areas and Process Groups as well as the distinguishing characteristics of each, students gain an appreciation for how these two dimensions of project management interact in initiating, planning, executing, monitoring and controlling, and closing a project.

**MGMT 6623 - Enterprise and Project Risk Management**

(3 sem. cr.)

Project management involves an ongoing, and nearly inevitable, variation of risks to which managers must be attuned and ready to mitigate. In this course, students learn how to plan, analyze, respond to, and control qualitative and quantitative risk in projects. They examine the internal risks associated with managing projects and the external risks associated with customer behavior, the supply chain, transportation and distribution channels, and acts of nature within the framework of the organization's overall risk strategy. Assessing real-world examples of project risks, students learn about strategies for working with project stakeholders to identify and respond to risk within defined ethical and legal standards.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6627 - Stakeholder Management and Organizational Behavior**

(3 sem. cr.)

One role of the project manager is to lead teams in complex and diverse organizational settings while concurrently communicating with all stakeholders. In this course, students analyze this dual role and examine how individual and group behavior impacts organizational effectiveness. They discover how using influence, rather than organizational power, leads to more successful project management. Students learn ways to design projects to support organizational goals and how to build and engage organizational capital (intellectual, human, physical, financial, and structural). They also apply stakeholder management practices to engage in and manage relationships with the community of project stakeholders.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6630 - Strategies for Advancing Innovation and Technology**

(4 sem. cr.)

Students in this course address important management challenges that are typical in today's technology-based businesses. Students emphasize topics such as how to align business needs with technology solutions, how to identify new opportunities or
applications for technology, and how to manage the related processes to ensure that technology solutions enhance an organization's competitive position.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6631 - Strategies for Implementing Innovation and Technology

(4 sem. cr.)
Students in this course focus on innovation and technology management and supporting processes. In addition, students examine how technology solutions are affected when the context is global in scope.

MGMT 6635 - Fostering a Culture of Innovation♦

(3 sem. cr.)
In today's complex and uncertain environment, innovation is important to achieving business success. In this course, students will examine how to be effective, creative leaders who can readily apply imagination to resolve complex problems. Additionally, students explore methods to establish a work environment conducive to creative thinking. Students will gain a set of proven methods, skills, and strategies that enable innovative breakthroughs to occur in a much more deliberate and predictable manner.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6641 - Applications in International Business♦

(4 sem. cr.)
Students in this course are introduced to how institutions, organizations, and culture shape uniqueness in regional market and business practices. Students are exposed to the functioning of global organizations that shape the global business climate. Students explore the drivers of internationalization, barriers and pitfalls, and best practices in international business.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6645 - Improving Business Performance♦

(3 sem. cr.)
One of the most critical challenges in maintaining and improving organizational performance is identifying core strengths and weaknesses within the organization and across the more general value creation landscape. The focus of this course is on the challenges and opportunities for managers to create value and to increase organizational performance through the effective deployment of systems thinking and change
management skills. Students in the course explore systems thinking as a process whereby problems are viewed as individual components within a larger system and explore how various operational and systems thinking frameworks can be utilized to optimize organizational performance in both industrial and service settings.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6650 - Foundations in Project Management

(4 sem. cr.)
Students in this course are introduced to the art and science of project management as applied to different types of project situations. Topics such as project life-cycle management; project organizations and leadership; project team building; requests for proposal (RFPs), proposals, and contracts; techniques for project scope definition, work definition, estimating, scheduling, risk management, control, and closeout; the Project Management Organization; project management methodology; and project selection/portfolio management are covered. Students explore these concepts in the context of real-world problems.

Note: There is a special technology requirement for this course requiring the use of Microsoft Project. The software will be provided in trial form, but there is not a Mac version of this software available. Students in this course are required to use Microsoft Windows, XP, or Server 2003 or later. Because Mac users may experience difficulty using the software, we recommend the following: (a) Mac users should be prepared to use a PC during this course or (b) Mac users should purchase the appropriate software or hardware to be able to replicate the Windows environment on their Mac.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6651 - Project Management Skills for Managers

(4 sem. cr.)
The "soft" skills of project management are increasingly recognized as key to improving its practice. Students in this course explore best practices and research results on the best methods to practice project management in today’s organizations in the context of real-world problems. Students also examine how project management applies in a global context.

Prerequisites

- MGMT 5540

Note: There is a special technology requirement for this course requiring the use of Microsoft Project. The software will be provided in trial form, but there is not a Mac version of this software available. Students in this course are required to use Microsoft Windows, XP, or Server 2003 or later. Because Mac users may experience difficulty
using the software, we recommend the following: (a) Mac users should be prepared to use a PC during this course or (b) Mac users should purchase the appropriate software or hardware to be able to replicate the Windows environment on their Mac.

**MGMT 6655 - Marketing Communications, Storytelling, and Persuasion**

(3 sem. cr.)

Whether one is addressing a customer, an audience, or a jury, the aim is to use the tools of persuasion to influence individuals to take action. Especially in social media, it is critically important to establish an appropriate tone, voice, and personality. Tying these strategies to the overall brand positioning is even more important. It has been found that storytelling is one of the most effective tools of persuasion. Rather than simply stating the facts, the story puts facts into a meaningful context, so that the consumer can understand and empathize with the characters in the story and, therefore, identify with the brand’s social media personality. In this course, students explore the elements of the story and the approaches used to develop content. Understanding the impact of individual channels on a strategy for integrated marketing communications and positioning allows the marketer to allocate budgets more effectively and efficiently.

**MGMT 6659 - Marketing for Competitiveness♦**

(3 sem. cr.)

Effective managers know that a clear understanding of the role of marketing, as well as a grasp of effective marketing practices, is essential for organizations to succeed in today’s fast-paced, competitive environment. In this course, students gain a working knowledge of both marketing theory and the practical application of innovative marketing tools and strategies. Students also explore how product, price, place, promotion, and people contribute to the marketing mix as they explore research-based insights into consumer behavior.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6661 - Applied Research Methods—Qualitative and Quantitative**

(3 sem. cr.)

Students in this course focus on acquisition of substantive, foundational knowledge of the philosophy of science, including the construction, use, and critique of concepts and theories. Qualitative and quantitative frameworks for inquiry are introduced. Ethical, social, and political aspects of conducting research and producing knowledge for practice are examined. Quantitative designs covered include experimental and quasi-experimental, survey, causal-comparative, evaluation, and existing action research. Qualitative designs include case study, phenomenology, grounded theory, and ethnography. Assignments consist of knowledge demonstration and problem solving for professional practice. Through course assignments, students focus on the practical
application of writing and critical-thinking skills and the integration of professional practice at the doctoral level.

MGMT 6662 - Communicating Using Social and Digital Media♦

(3 sem. cr.)
While some companies may still be asking, "Why should we care about social media?" most are now asking, "How can we leverage the power of social media?" In this course, students examine how social media has changed the way consumers interact with brands and apply elements of storytelling to develop a social media strategy for an organizational scenario. In addition, students explore issues of ethics, privacy, and media law that are heightened by social media and digital communication distribution. Topics include types of social media, audience appropriateness, reputation management, social media strategy, evaluation methods, and the communications regulatory environment, including media law and privacy.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6663 - Market Research and Customer Insights♦

(3 sem. cr.)
Understanding consumer behavior is essential for developing and effectively marketing products and services. In this course, students can learn how to use customer data and insights to improve strategic marketing decisions and improve performance. Students have the opportunity to analyze factors that influence buyer behavior during all stages of the purchasing process and to consider how learnings can be translated into product strategy and related marketing decisions. Additionally, students will study market segmentation and targeting practices as a key means of differentiation.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6670 - Applications in Global Business♦

(3 sem. cr.)
This course is an introduction for students to learn how institutions, organizations, and culture shape uniqueness in regional market and business practices. Students are exposed to the functioning of global organizations that shape the global business climate. Students explore drivers for internationalization, barriers and pitfalls, and best practices in international business.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6673 - Case Studies in Global Business♦
In this course, international business topics are explored in depth and in context through real-world case studies. Students analyze the success and failure of international business ventures across a wide range of industries, developing their analytical skills in the process.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6677 - Competing in the Global Economy

(3 sem. cr.)

Over the last few decades, a fundamental shift in the world economy has been underway. No longer are national economic interests and business operations largely confined within well-defined geographic borders. Phenomena such as the explosion of the Internet, global sourcing, and the reduction in barriers to cross-border trade have all contributed to the creation of a truly global economy. Students in this course focus on the global environment of business and explore how the international sociocultural, political, legal, economic, physical, and historical environments affect business practices and policies. Students will learn the skills and methodologies required for market analysis and business strategizing on a global scale. In particular, students identify the internal and external forces affecting an organization's ability to compete both domestically and globally.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6681 - Social/Environmental Entrepreneurship and Sustainable Development

(4 sem. cr.)

In this course, students explore and evaluate opportunities to create value through the development of new organizations that respond in sustainable ways to the needs of both the micro-level community and the world at large. Students prepare to build new organizations that solve problems within a systems context and to build into their approach to planning, operations, and decision making a global awareness that begins within their local community and extends far beyond. New venture plan outlines are drafted, focusing on social and environmental entrepreneurship issues.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6689 - Message Design, Audience, and Evaluation

(3 sem. cr.)

Using reputable sources lends credibility to a message. But how does a communication
professional determine which supporting information is appropriate to help craft a message, gain audience insight, choose a communication channel, or evaluate the impact of a message? In this course, students examine research approaches that are common to the field of communication and appropriate for answering questions about audiences and evaluating messages. Topics include simple quantitative analysis and qualitative research approaches such as focus groups, interviewing, and surveys, as well as basic metrics such as cost of media, cost per sale, return on investment, and web analytics.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6690 - U.S. Healthcare Delivery System♦**

*(3 sem. cr.)*
Healthcare delivery is one of the largest industries in the United States. Students in this course are provided with the opportunity to gain thorough insight into the current structure and components of health services and delivery; they are also presented with an abbreviated history addressing the nature of population illness and disease. Students identify and describe components of the system, including patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods, and technology. They engage in activities and discussions focused on the continuum of services related to healthcare, such as hospitals and hospital systems, ambulatory care, and long-term care. Students also explore issues related to these services, such as wellness, prevention, and community and public health, for a comprehensive understanding of the system. Students contextualize their study through the examination of current factors and challenges as well as the impact these challenges have on delivery and management.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6692 - Financial Management♦**

*(3 sem. cr.)*
Students in this course are introduced to the terminology, theory, concepts, and techniques used in the accounting and finance functions in healthcare organizations. They explore the important role of finance in healthcare organizations, in addition to the various techniques to develop, manage, and control finances. Using an applied approach to healthcare finance, students learn how to develop, apply, and interpret various financial tools, including budgets, sources of revenue/reimbursement by payer, income statements, balance sheets, dashboards, statements of cash flow, pro formas, return on investment analysis, financial ratios, capital budgeting, debt service and borrowing, depreciation, and cost allocation and cost accounting techniques. Students develop portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6693 - Interpersonal Communication♦

(3 sem. cr.)
The ability to communicate with others influences success in both professional and personal settings. As communities and places of work become increasingly diverse, the intersections of interpersonal and intercultural communication also increase, and communicators need to be aware that the cultural diversity of their audiences should affect the way they convey information. Students in this course examine interpersonal and intercultural intersections and study the influence of cultural diversity on interpersonal communication. By examining theory, students develop an approach to practice and hone individual strategies for communicating successfully in diverse interpersonal situations. Topics include interpersonal communication theory, intercultural communication theory, individual communication competence, nonverbal channels, person perception, conflict resolution, and listening and communication barriers.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 6695 - Health Policy and Economics

(3 sem. cr.)
Managers in healthcare must possess the skills needed to assess economic principles and policies to make important decisions regarding healthcare and services. In this course, students examine the application of health policy and economic principles in regard to managerial decision making. They learn about the process for policy development and implementation, key stakeholders and interest groups involved in the health policy process, and how health policy changes over time within the United States. Students assess and discuss key policy initiatives related to cost, quality, and access. They also engage in assignments designed to advance their understanding of and ability to apply economic principles, such as supply, demand, and the determination of market price.

MGMT 6697 - Creative Strategy and Execution: From Brief to Presentation♦

(3 sem. cr.)
Students in this course leverage a wide range of knowledge and skills to conceive and execute a global communication campaign that uses traditional and digital media. Students have the opportunity to develop and review a creative or innovative brief grounded in concepts of integrated marketing communication. Students generate solutions for that brief across the phases of the creative process, present and defend solutions, and evaluate solutions using metrics. Topics include the creative process,
integrated marketing communication, selecting appropriate channels, pitching and selling ideas, and evaluation metrics.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 6698 - Public Relations Concepts and Strategy**

*(3 sem. cr.)*

To successfully build and manage the relationship between an organization and the public in today's increasingly global community, a strategic communications plan requires the use of both traditional and new technology. Students in this course explore, from a global perspective, the needs of various public relations stakeholders, including the customer, the press, and the investor. Topics include how to change behaviors, advocate for causes, design messages for specific audiences, select appropriate communication channels, and evaluate results of public relations campaigns. Students also consider the potential legal and ethical aspects of the practice of public relations.

**MGMT 6900 - Capstone: Practicing Managerial Decision Making**

*(3 sem. cr.)*

Students in this course are provided with the opportunity to synthesize management content, theory, and practice to create their personal visions and goals. Students assess existing research and methods, reflect on their current approach to management, and purposefully plan for a future as a management professional who affects positive change. Students produce individual treatises that include essays on their values, beliefs, strengths, and weaknesses, which serve as a foundation for continued professional growth and development; thus, students become better equipped to meet the management challenges of an uncertain tomorrow.

**MGMT 6905 - Capstone: Integrating Management Theory and Practice for Individual Action**

*(3 sem. cr.)*

Students in this course are provided with the opportunity to synthesize management content, theory, and practice to create their personal visions and goals. Students assess existing research and methods, reflect on their current approach to management, and purposefully plan for a future as a management professional who affects positive change. Students produce individual treatises that include essays on their values, beliefs, strengths, and weaknesses, which serve as a foundation for continued professional growth and development; thus, students become better equipped to meet the management challenges of an uncertain tomorrow.

**MGMT 6990 - Capstone: Sustainable Business Practices and Strategies**
(3 sem. cr.)
The purpose of the capstone course is to integrate the knowledge and concepts students have gained through the MBA program. Students will practice their skills and employ their knowledge by evaluating business strategies capable of achieving sustainable competitive advantage. Students in this course will be required to identify and address challenges and opportunities found in today's complex and often uncertain business environment. Students complete their transformational journey through the program by reflecting on their learning and will consider the next phase of their career development. The aim of the course is to improve the students' ability to manage in an environment requiring both strategic and operational knowledge.

**MGMT 8003M - Gateway to Doctoral Management Studies**

(5 cr.)
Students begin their journeys as scholar-practitioners in this doctoral management gateway course. Students will learn what it means to earn a doctorate and a Walden PhD degree. No organization can succeed without being led and managed. Students will graduate with a unique perspective on organizational success. They will develop a personal navigational tool, the skills development and an assessment plan (SDAP) to identify their goals, assess the skills they will need to develop, and begin to consider the importance of managing their time as they deepen their journey into the program. Through this course, students will then be prepared for the journey that will take them from absorbing knowledge to becoming creators of knowledge. During this orientation course, students will grapple with some of the biggest questions facing the management profession. While engaging in these and other questions regarding the future of management, students will be introduced to the full spectrum of Walden resources and become familiarized with Walden's academic support systems. Designed to make them better critical thinkers and scholarly writers, these resources include the Writing Center, the Walden Library, the Academic Skills Center, and the Center for Research Quality. Students also focus on beginning their development of critical reading, writing, and questioning, and reflective skills, all of which are needed to succeed as scholar-practitioners.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8005M - Organizational Perspectives and Implications for Leaders**

(5 cr.)
There are many ways of seeing an organization and one's place in it. The assumptions students make about people, purpose, and profit will influence the way they manage. It is important to develop the skill required to read various situations and to understand what is between the lines to act with insight. Developing and utilizing various divergent perspectives on organizational dynamics enables a manager to devise appropriate actions by critically thinking about the way things can be (based on the way things are). In this
way, leaders free themselves from conventions and can consider the knowledge management strategies, structures, and policies to succeed. Students will explore several metaphors of organizations from mechanistic to organic to network, among others. The students will look at organizations through several all-encompassing frames to understand how a leader can leverage these new perspectives to better manage processes, the implications of social change, and innovative strategies. Students will also continue building the skills required to succeed in the program and leverage those skills as they begin working on their dissertation topics. Students are asked to reflect each week on their learnings and how those learnings are shaping their specialization perspective. Students will deepen their understanding of APA, scholarly writing, and the importance of integrity in writing; they will also hone their analysis and evaluation skills.

Prerequisites
- MGMT 8003M

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8007M - Complexity and Systems Thinking Dynamics♦

(5 cr.)
Organizations are increasingly a reflection of the confluence of dynamic influences and pressures to compete in an uncertain environment. Leaders need to stimulate creative and innovative approaches to products, services, and operations. Yet, organizations also need to have predictable control systems to enable the efficient utilization of resources. Students in this course cover some basic to intermediate concepts, models, and theories from general systems theory, systems thinking, network theory, complex adaptive systems theory, complexity leadership theory, and evolutionary systems theory with applications to social organizations. Students use a provided template to model, describe, and apply these concepts to an organization of their choice such as society-at-large or a subset of society; a community, city, county, state, or country; or a corporation, a nonprofit, government agency, an educational institution, or a military organization as this course starts from abstract systems and moves to concrete instances. Throughout this course, students will improve their understanding of systems, organizations, and leadership or management decision-making capabilities.

Prerequisites
- MGMT 8003M

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8009M - Organizational Decision Making and Judgment♦
In today’s highly complex organizations, rational and behavioral decision-making processes and models impact leadership, ethics, group dynamics, and risk assessment. Students will examine the ethical implications of organizational decisions based on the literature. Students will also explore, evaluate, and debate how judgments and decisions influence team dynamics and an organization’s social responsibility decisions. Students will also develop a deeper appreciation for predictive and adaptive decision systems and the impact of artificial intelligence and autonomous systems on an organization's decision processes. Students will continue to develop their skills assessment plan and tie what they learn to their specialization and, ultimately, the dissertation process. Students will focus on developing their analysis capabilities of peer-reviewed literature related to their specialization, and decision making and judgment.

**Prerequisites**
- MGMT 8003M

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8015 - Gateway to Doctoral Studies♦**

(5 cr.)
The journey for a doctoral student to the domains of the scholar-practitioner begins with this course. No organization can succeed without being managed, and students will be exposed to a unique perspective on organizational success. Students have the opportunity to develop a personal navigational tool—the Skills Development and Assessment Plan (SDAP)—to identify goals and how the program will unfold to help students meet those goals. In this course, students are prepared for the journey that will take them from absorbing knowledge to becoming creators of knowledge. During this orientation, students grapple with some of the biggest questions facing the management profession: How have the demands on management and leadership shifted with the digital age? What are the implications of a global 24/7 world? How will the student, as a scholar-practitioner, contribute to positive social change after graduation? While engaging them in these and other questions regarding the future of management, students will be guided through the full spectrum of Walden resources and become familiar with those academic support systems designed to help students become better critical thinkers and scholarly writers: the Writing Center, the Library, the Academic Skills Center, and the Center for Research Quality.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8020 - Managing Organizational Systems and Complexity♦**
Effective managers in complex organizations often use core concepts of systems theory to analyze and execute change within their organizations. Students in this course examine these concepts, including both seminal and current approaches to systems thinking, self-organizing systems, and complexity. Using processes of systems thinking, mental models, mind mapping, analysis of assumptions and limitations, and relationship mapping, students engage in hands-on application assignments through which they analyze existing organizations and develop plans for change. Students also have the opportunity to reflect on the concepts presented in the course and to contemplate how they can apply this information to effect complex adaptive change in their field.

**Prerequisites**
- RSCH 8100Z or RSCH 8101Z

---

**MGMT 8025 - Perspectives on Organizations and Their Implications for Leaders**

(5 cr.)
There are many ways of seeing an organization and one's place in it. The assumptions one makes about people, purpose, and profit will influence the way a person manages. It is important to develop the skill required to "read" various situations and to understand what is "between the lines" in order to act with insight. Developing and utilizing various divergent perspectives on organizational dynamics enables a manager to devise appropriate actions by critically thinking about the way things can be (based on the way things are). In this way, leaders free themselves from conventions and are able to invent unique tools, structures, and policies to succeed. Specifically in this course, students have the opportunity to explore several metaphors of organizations from "mechanistic" to "organic" to "network," among others. Further, they can look at organizations through several all-encompassing "frames" to understand how a leader can leverage these new perspectives to better manage processes and change.

**Prerequisites**
- MGMT 8015 (may be taken concurrently)

---

**MGMT 8030 - Management of Decision Making**

(8 cr.)
Often times, the tools used to make complex managerial decisions are the same resources employed in everyday decision making. Understanding these tools and practicing the skills needed to make effective, timely decisions with sustainable results is a valuable outcome of this course. Students examine and discuss competing paradigms...
of individual and group decision making, which include both seminal and current research related to rational and behavioral decision-making theories, among others. Students also explore how these approaches differ in their impact on ethics, group dynamics, risk assessment, and leadership responsibilities.

**Prerequisites**

- MGMT 8020

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8035 - Complexity and Applied Systems Thinking**

(5 cr.)
Organizations are increasingly a reflection of the confluence of dynamic influences and pressures to compete in an uncertain environment. Leaders need to stimulate creative and innovative approaches to products, services, and operations. Yet, organizations also need to have predictable control systems to enable the efficient utilization of resources. This tension between chaos and order demands new approaches to structuring organizations and decision making. Using processes of systems thinking, mental modeling, and relational dynamics, students have the opportunity to analyze organizations and develop tools to better understand complex systems dynamics.

**Prerequisites**

- MGMT 8025 (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8045 - Mechanics of Individual and Group Decision Making**

(5 cr.)
In today's highly complex organizations, rational and behavioral decision-making processes and models impact leadership, ethics, group dynamics, and risk assessment. Students can examine these factors and the underlying competing paradigms of individual and group decision making and how these approaches differ in their impact on the personal, leadership, and organizational levels of analysis; and, in some cases, how decisions impact society.

**Prerequisites**

- MGMT 8035 (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8100 - Dissertation Mentoring**
The purpose of this course is to assist doctoral students in making steady progress toward their degree. Students use this course as a forum for ongoing exchange of ideas, input, and feedback with peers and their faculty mentor. Gaining tools needed for success in completion of their dissertation, students practice with various research methods and data-gathering techniques; determine best practices; and explore the various resources, including the Walden University Library, Writing Center, and Research Center. On a quarterly basis, students also prepare a progress plan and submit a progress report to help stay on track for successful completion of their degree.

Prerequisites
- RSCH 8201M or RSCH 8301M (may be taken concurrently)
- MGMT 8990

**MGMT 8405M - Challenging Conventional Leadership and Influence**

(5 cr.)
A desirable trait of modern managers and leaders is the ability to assess multiple perspectives and the confidence to assert change, if needed. Leaders are also influenced by the function of power. Students will consider the full spectrum of leadership behavior from autocracy to emergent consensus and how rights and powers are distributed to people to achieve their responsibilities in an organization. The power structure also challenges conventional views of organizational structures and influences leadership behaviors.

Students in this course are provided with the opportunity to diverge from conventional leadership ideology and behavior through exploration of alternative models and lessons related to power and authority structures. Students will explore ways to reinvent the leadership and organizational structures based on unconventional organizational models. Students analyze and develop new and promising methods, principles, and systems about how new structures and leadership can support the needs of a global environment.

Prerequisites
- MGMT 8003M
- MGMT 8005M
- MGMT 8007M
- MGMT 8009M
- RSCH 8110

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8410 - Leadership, Influence, and Power**
Power is often thought of as the lifeblood of leadership. Students in this course review the varieties of power and their functions. They analyze and synthesize research, focusing on how leaders influence others through the tools they have at their disposal, including aspects of personality and character that serve to help effectively influence others. Students also explore the full spectrum of leadership behavior from autocracy to emergent consensus and how rights and powers are distributed to people in order to achieve their responsibilities in an organization. Practicing doctoral-level skills, students also engage in scholarly writing assignments, such as the preparation of a literature review, lending to a significant research topic, problem, and research question.

Prerequisites
- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8415M - Socially Conscious Leader♦

Socially conscious leadership involves the use of widely diverse psycho- and sociographic sensitivities regarding stakeholder interests and those of the larger society. In this course, students learn how to harness such awareness and examine the pursuit and distribution of profit, the mission of the organization, the methods of management, and organizational growth and restructuring to achieve new strategic objectives. They explore the nature of sustainability management including environment, supply chain, social justice, and profit. They also study the nature of formal and informal relationships among people and between an organization and the supply chain in which the organization does business. Students are presented with the opportunity to gain skills necessary to understand the motives as well as the impact of organization and leadership failure.

Prerequisites
- MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8420 - Challenging Conventional Leadership♦

A desirable trait of modern managers and leaders is the ability to assess multiple perspectives and the confidence to assert change if needed. Conventional organizational structures and leadership behavior represent one, albeit the dominant, set of expectations based on widely understood assumptions and practices. Students in this
course are provided with the opportunity to diverge from conventional leadership ideology and behavior through exploration of alternative models and lessons from a full spectrum of human organizations, such as utopians and reformers as well as intentional organizations and social experiments. Students analyze these organizations on a global level for new and promising methods, principles, and systems that may be applied and add value to local organizations.

Prerequisites
- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8425M - Responding to Behavior and Change as a Multicultural Leader♦

(5 cr.)
Leadership in a global context with transnational organizations requires an understanding of the differences that exist among people as employees, colleagues, and customers. Students in this course are introduced to advanced research topics in leadership and organizational behavior as well as ways in which leaders respond to change within an organization as they relate to the challenges of leading in internationalized, cross-cultural, and diverse contexts. Students analyze theories of cross-cultural practice, diversity in thinking, culture and belief systems, and stakeholder management as well as strategic and change management theories. Students also use traditional leadership methods and strategies to explore how the need for change is perceived, understood, and managed, and how change manifests itself from external and internal sources. They actively engage in identifying potential research topics for their dissertation and explore the behavioral and strategic dimensions of the topics under study.

Prerequisites
- MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8430 - The Changing Face of Leadership—Diverse Perspectives♦

(4 cr.)
Leadership in a global context with transnational organizations requires an understanding of the differences that exist among people as employees, colleagues, and customers. Students in this seminar course are introduced to advanced research topics in leadership and organizational behavior as they relate to the challenges of leading in internationalized, cross-cultural, and diverse contexts. Students analyze theories of
cross-cultural practice, diversity in thinking, culture and belief systems, and stakeholder management. They actively engage in identifying potential research topics for their dissertation and explore the ethical and social change dimensions of the topics under study.

**Prerequisites**
- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8440 - The Socially Conscious Leader**

(4 cr.)
Socially conscious leadership involves the use of widely diverse psycho- and socio- graphic sensibilities regarding stakeholder interests and those of the larger society. In this course, students learn how to harness such awareness and examine the pursuit and distribution of profit, the mission of the organization, the methods of management, and organizational growth and restructuring to achieve new strategic objectives. They explore the nature of leadership in the context of a stakeholder environment with "triple bottom line" responsibilities—profit, sustainability, and social justice. They also study the nature of formal and informal relationships among people and between an organization and the community(s) in which the organization does business. Students have an opportunity to gain skills necessary to understand the motives as well as the impact of organization and leadership failure.

**Prerequisites**
- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8450 - Crafting and Responding to Change**

(4 cr.)
What are some of the advantages of various change models, how do organizations employ these to respond to change, and why is change important to an organization? Students in this course have the opportunity to answer such questions as well as to develop original ideas for change management and response. Students use traditional leadership methods and strategies to explore how the need for change is perceived, understood, and managed, and how change manifests itself from external and internal sources. They also learn ways that that they can use change techniques to mobilize an organization to make effective transitions. Engaging in scholarly inquiry, students use a whole systems and network perspective in relating change to internal and external contingencies.

**Prerequisites**
• RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8505M - IT Security and Compliance♦

(5 cr.)
Security and compliance are critical topics in all businesses that engage in internal information technology (IT) and external commerce-producing digital products and services. All organizations need to consider the multifaceted aspects of IT security and standard compliance. Each specialization course is designed to encourage students to select two topics and develop an article that is ready for publication.

Prerequisites
• MGMT 8003M
• MGMT 8005M
• MGMT 8007M
• MGMT 8009M
• RSCH 8110

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8510 - Managing E-Commerce Management Information Systems♦

(4 cr.)
Students in this course are provided with broad coverage of information systems management concepts and trends underlying current and future developments as well as principles for providing effective implementation of information technology. Students assess strategies associated with both sides of the electronic commerce world: e-commerce solutions for existing companies and e-business concept development for venture startups. Assessing a variety of case studies, students contextualize their study through the evaluation of emerging theories and practices of e-commerce strategies. As the course progresses, students develop and define their position on a variety of current issues in e-commerce information systems and then engage in online discussions to share and defend their analysis.

Prerequisites
• RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8515M - Strategic IT Leadership and System Architecture♦
Strategic information technology (IT) leadership and systems architecture is a core domain of the information systems technology for the professional and scholar. There are many new forms of emerging architectures being used by organizations that are innovating their infrastructure. For instance, many are considering the multiagent systems (mas) application and services architecture that considers the need for mobile, connected things, social media, and partners to interact with those apps autonomously and collectively. Students will also be able to canvas topics such as digital disruptive innovation trends as well as how IT teams work together in a digital environment. Organizations need to develop a strategic and far-reaching vision for their architecture and the leadership of a digital workforce as a key way to engage.

**Prerequisites**
- MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8520 - Organizational Performance Improvement**

*(4 cr.)*

What is business process redesign, and how can it be used to achieve improvements in performance measures? Students in this course are provided with the opportunity to investigate such questions and survey a wide array of current literature from experts in the field. Students learn about the concepts of performance improvement and process re-engineering. They work toward achieving high-level improvements in organizational performance through redesigned business processes and the use of information technology to re-engineer an organization. Students analyze the data required for organizational performance improvement and then develop and present a report or case study of an organizational setting in the context of performance analysis and improvement. Students also engage in discussion assignments to share ideas and perspectives with peers and to reflect on weekly topics.

**Prerequisites**
- RSCH 8101M (may be taken concurrently)

⚠️ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8525M - Big Data Decision Making and Management**

*(5 cr.)*

Decision making is only as good as the information and the context of the information received. Most information systems technology professionals understand that individuals are awash with data. Big data is vast, yet harnessing such data is not as simple as
conducting a search. All big data and decision making needs to consider both analytics as well and the ethics and context development of the searching strategy.

Prerequisites

- MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8530 - Managing Projects in Complex Environments♠

(4 cr.)
In consideration of the growing complexities of the global business environment, there is a pressing need for leaders with diverse skill sets who know how to see a project through a multitude of challenges in a rapidly changing business environment. Students in this course explore the theory and practice of how to manage projects in such environments. Through extensive reading and literature review, students assess effective project management styles, critical factors for project success, organizational support systems that enhance projects, earned value analysis, the maturity of modern project management, and ethics in project execution. They also examine critical issues of budgeting, schedules, technical planning, and control methods, and they investigate the function of project management software in anticipating and managing the challenges of complex environments.

Prerequisites

- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8540 - Systems Analysis, Design, and Implementation♠

(4 cr.)
Students in this course are provided with the opportunity to examine the analysis, design, and development of computer-based information systems to enhance their knowledge base in software engineering. They compare the key characteristics of object-oriented methodologies with traditional methods for an understanding of how various types of systems require different software engineering techniques. Students learn about the lifecycle concept and related activities, including information requirements determination, prototyping, detailed systems design, development, testing, and implementation strategies. Collaborating with peers, students sharpen analytical and communication skills as they engage in weekly discussions on a variety of topics, such as software processes, design and implementation, dependability and security, and general issues related to software engineering.

Prerequisites
• RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8550 - Security Management and Risk Assessment♦

(4 cr.)
Reliable, secure transfer of information is vital to the operation and management of all businesses. The information transfer process, however, has presented a series of challenges as modern technology and the Internet have transformed the way business is conducted. Students in this course examine the need for security measures, policies, and careful assessment to ensure data integrity in electronic commerce. They explore management aspects of information security from a business perspective as well as the implications of information security risks faced by organizations. Students learn ways to identify threats and implement safeguards on corporate networks and the Internet. They also explore topics on return on security investment, business continuity planning, development of security policies, and information security auditing.

Prerequisites
• RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8551 - Preparing for Dissertation

(5 cr.)
The focus of this course is on the preparation for the dissertation phase of training. In this course, students identify a dissertation topic and potential dissertation committee members; begin to conduct a literature review; develop a problem statement and research questions; and evaluate research designs, methods, and types of analyses to use for their dissertation. Students also complete their initial premise in this course and an annotated outline of their prospectus.

MGMT 8605M - Financial Risk Management and Decision Making for Organizations♦

(5 cr.)
All responsible leaders consider the fiscal implications of the decisions they make on a daily basis, such as those involving growth, sustainability, and employee issues. In this course, students are provided with a survey of fundamental concepts in financial decision making. Students examine core principles, such as the time value of money, decision making under conditions of uncertainty, valuation, risk management, mergers and acquisitions, and capital budgeting. They also explore the legal, ethical, and global
dimensions of financial economic decision-making theories and practices. Students will also consider the impact and limitations of financial markets in society, and how risk and return for firms is mediated and moderated by agency effects, information asymmetries, and both rational and irrational aspects of market behavior.

Topics that students are encouraged to explore include risk management, financial decision making, uncertainty valuations, mergers and acquisitions, global ethical decision making, managing growth and sustainability, legal and ethical decision making in finance, managing economic growth and sustainability, and time value of money and the capital structure puzzle. As scholars, students will need to work independently to develop their understanding about the various topics the class has selected for the discussions.

Prerequisites

- MGMT 8003M
- MGMT 8005M
- MGMT 8007M
- MGMT 8009M
- RSCH 8110

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8610 - Financial Decision Making for Individuals and Firms♦

(4 cr.)

All responsible leaders consider the fiscal implications of the decisions they make on a daily basis, such as those involving growth, sustainability, and employee issues. In this course, students are provided with a survey of fundamental concepts in financial decision making, primarily at the individual and firm level. Students examine core principles, such as the time value of money, decision making under conditions of uncertainty, valuation, and capital budgeting. They also explore the legal, ethical, and global dimensions of individual- and firm-level financial economic decision-making theories and practices. Students gain hands-on practice using modern financial tools to evaluate case study scenarios and collaborate with peers to practice conducting and presenting research on a specific topic.

Prerequisites

- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8615M - Financial Corporate Social Responsibility and Ethics♦
Financial ethics is a crucial topic for today’s corporate financial leaders and managers. The financial benefits of ethical compliance and corporate social responsibility globally are considered in this course. Students will discuss and analyze the role of ethics compliance reporting as well as antitrust reporting in a corporate environment. Students will also debate the ramifications of controlling compliance risks, how ethical behavior adds value to organizations financially, how organization structures impact financial ethics, and corporate social responsibility. Alternative operationalization and measurement approaches for the corporate social responsibility and corporate financial performance concepts that have been deployed in empirical literature are also discussed.

**Prerequisites**
- MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8620 - Financial Markets: Risk and Return, Capital Structure, and International Dimensions of Finance**

(4 cr.)
Students are provided with the opportunity to augment their core financial knowledge base through a survey of fundamental concepts in financial decision making in which markets affect firm decisions and societal outcomes. Through a variety of practical application assignments, students learn about the role, impact, and limitations of financial markets in society and how risk and return for firms are mediated and moderated by agency effects, information asymmetries, and both rational and irrational aspects of market behavior. Students examine the structure of international capital markets. They also explore and discuss the legal, ethical, and global dimensions of firm- and market-level financial economic decision-making theories and practices.

**Prerequisites**
- RSCH 8101M (may be taken concurrently)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8625M - Leadership Through Changing Financial Organizational Structures**

(5 cr.)
Financial managers need specific understanding about organizational structures and how to deal with startups, benefit corporations, nonprofits, and other organizational structures. Students will also discuss the financial issues in mergers and acquisitions
(M&A) and investor financing. In both M&A and investor financing, tangible and intangible assets need consideration. Financial managers also need to consider economic sustainability, profitability, and managing the effects of innovation. There are also other financial realities that are becoming more relevant that financial leaders and managers need to consider, such as alternative currencies and how that will impact investments, research and development, and an organization’s relationship with the conventional banking system. How will alternative currencies change the way startups manage their finances? These are some of the important questions students will explore and around which they will develop theoretical hypotheses.

Prerequisites
- MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8630 - Corporate Financial Management♦

(4 cr.)
How do corporate managers decide which investments add the most value to their company? Using previously acquired knowledge of financial analysis and decision making, in addition to new concepts presented in this course, students have the opportunity to answer this question, as well as to understand the reasoning behind such valuation. Students engage in a variety of group activities, discussions, and writing assignments on advanced research topics related to corporate finance, including the sourcing and deployment of capital, corporate risk management, short- and long-term financing, and product-market interactions. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the legal, ethical, and global dimensions of corporate finance theories and practices.

Prerequisites
- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8640 - Valuation of Assets, Entities, and Opportunities♦

(4 cr.)
Experienced investors and managers understand that market prices may be misleading; therefore, they often use valuation theories and methodologies to help them determine the intrinsic value of assets. Students in this course are introduced to advanced research topics related to the valuation of assets, entities, and general opportunities. Students engage in group activities, discussions, and writing assignments on the valuation elements
of mergers and acquisitions; options; international asset pricing; valuation of intangible assets, such as human resources; and capital budgeting and valuation with leverage. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the legal, ethical, and global dimensions of valuation in finance theories and practices.

Prerequisites
- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8650 - Financial Analysis, Planning, and Forecasting**

(4 cr.)
Competitive advantage and corporate sustainability depend profoundly on the financial decisions managers make. These decisions are based on information processed and evaluated using established theories. These theories, as well as the forecasting models used by contemporary financial planners and investors, are introduced to students. Students engage in a variety of group activities, discussions, and writing assignments on advanced research topics related to financial management planning, forecasting, and decision making. They explore econometric and time series analysis, cash flow, inventory, supply chains, sales forecasting, and both short- and long-range financial planning modeling. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the legal, ethical, and global dimensions of forecasting and financial planning and analysis.

Prerequisites
- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8705M - Organizational Behavior Performance and Evaluation**

(5 cr.)
The focus of this organizational behavior and human capital development course is on organizational behavior, motivation, collaboration, and performance and evaluation of individuals and teams. Some of the questions that may be explored relate to how human resource managers motivate and build resiliency in their organizational culture. Students will also consider the influence of organizational structure behavior of individuals and teams, how behavior and motivation are impacted in a global virtual environment, and the impact of expert systems and artificial intelligence on the behavior of employees.

Prerequisites
- MGMT 8003M
- MGMT 8005M
• MGMT 8007M
• MGMT 8009M
• R SCH 8110

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8710 - Organizational Behavior and Effective Human Resource Management♦

(4 cr.)
Human resources are the heart of an organization; therefore, their behavior, expectations, and needs should be among the factors at the forefront of managers' interests. Students in this course explore advanced research topics in organizational behavior, including the implications for effective human resource management with a focus on individual, group, and organizational behavior. They engage in group activities, discussions, and writing assignments on individual differences in employee motivation and job satisfaction; group development; team building; organizational leadership; and organizational design, change, culture, and development. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

Prerequisites
• RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8715M - Human Resource Strategy, Legal, and Ethical Considerations♦

(5 cr.)
The focus of this course is on strategic planning that supports labor relations, succession planning, retention of both tacit and explicit knowledge, as well as the strategic role of information technology in human resources management. Students will also consider the regulatory requirements for global organizations as well as establishment of a positive social and ethical environment.

Prerequisites
• MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8720 - Strategic Thinking for Effective Human Resource Management♦
One of the main responsibilities of human resource managers and organizational leaders is to employ human resources (HR) to align with an organization's needs and goals, moving the organization toward competitive advantage and sustainable success. Students in this course are introduced to advanced research topics in the strategic management of HR within a systems thinking and metrics-based performance measurement context. Students engage in a variety of group activities, discussions, and writing assignments on the analysis of resource-based theories of organizational performance; strategic management; and HR strategy, planning, and management (including succession planning). Students also discuss the role of metrics, knowledge management, and human resource information systems in supporting HR and organizational strategies in global markets. Through extensive reading and literature review, students explore global and ethical dimensions of course topics and identify potential HR research topics for their dissertation.

**Prerequisites**
- RSCH 8101M (may be taken concurrently)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8725M - Human Resource Talent Management**

(5 cr.)
Managing organizational talent in the 21st century requires organizations to fully engage their workforce to optimize their motivation, commitment, and productivity. Leadership and management of the organizational talent strategy to optimize the global talent is a current organizational necessity, which requires talent management leaders to consider new workforce strategies for selection, recruitment, and retention of the workforce.
Topics to be considered include information technology impact on talent management, recognition and reward systems, compensation and benefits, as well as the need to engage an agile workforce.

**Prerequisites**
- MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8730 - The Development of Human Capital Within Organizations**

(4 cr.)
How do organizational leaders determine who to hire, and in what ways do they ensure that capable employees are sustained and managed in a way that guarantees high performance and organizational achievement? Students in this course have the
opportunity to answer such questions through the examination of advanced research topics, including the development and management of human capital within organizations. Students engage in group activities, discussions, and writing assignments on human resource concepts related to training and development, rewards and compensation, individual performance management, the role of human resources with individuals for global positions, and organization-wide succession planning. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

**Prerequisites**
- RSCH 8101M (may be taken concurrently)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8740 - The Legal, Ethical, and Cultural Environment of Human Resource Management**

(4 cr.)
Considering global-level expansion, issues of diversity, and traditional ethical issues, nearly all organizations must follow a host of laws and regulations; it is the responsibility of managers to know these guidelines for the welfare of employees and the stability of the company. Students in this course explore advanced research topics that address the legal, ethical, and cultural environment, both internal to organizations and more broadly. They engage in group activities, discussions, and writing assignments on the analysis of the regulatory environment in which human resource (HR) professionals must operate, HR management's role in communications, management of diversity and inclusion, and promotion of justice within organizations. Through extensive reading and literature review, students engage actively in identifying potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

**Prerequisites**
- RSCH 8101M (may be taken concurrently)

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8750 - Human Resource Management and Its Role in Labor Relations, Negotiation, and Conflict Resolution**

(4 cr.)
Human resource (HR) managers bridge the gap between employees and management, creating a challenging relationship requiring the ability to recognize and assess conflict,
communicate strategically and effectively, and negotiate for resolutions. Students in this course explore this relationship and examine advanced research topics in labor relations, negotiation, and conflict resolution. They engage in group activities, discussions, and writing assignments on a variety of topics, including the HR role in designing and managing conflict resolution processes beginning with mediation and negotiating with labor and other major human resource constituencies. Through extensive reading and literature review, students identify potential research topics for their dissertation and explore the global and ethical dimensions pertaining to course subject matter.

**Prerequisites**
- RSCH 8101M (may be taken concurrently)

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8805M - Agile and Disruptive Innovation Management**

(5 cr.)
Agile and disruptive innovation is a reality for every business, and as such, managers must be prepared to incorporate innovation theories into practice. In this class students discuss the many aspects and theories of innovation management. Topics such as disruptive and open innovation, innovation strategies, product and service management through analytics, and agile innovation are discussed. These topics are covered in depth to better prepare students for the cutting-edge innovation fields.

**Prerequisites**
- MGMT 8003M
- MGMT 8005M
- MGMT 8007M
- MGMT 8009M
- RSCH 8110

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MGMT 8815M - Managing by Design Theory**

(5 cr.)
Managing by design and management ambidexterity focus on the design and then the efficiency of an innovation. There is a need for design thinking for those undertaking innovation activities in products or organizationally. Design thinking focuses on human, environmental, and ethics-centric innovative considerations and intangible issues. Also identified are models and frameworks that support the development of innovative culture, including the voice of the customer in product and service requirements and
the power of a customer-centric perspective, whether in an organizational innovation, product, or service.

Prerequisites
- MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8825M - Ethics of Artificial Intelligence and Autonomous Systems♦

(5 cr.)
Students discuss the ethical and social implications of artificial intelligence (AI) based on the AI design standards that focus on ethically coordinated design criteria. Organizations and leaders who are considering any type of AI or autonomous system within the workplace or for customer applications should consider the ethical dilemma this new environment may cause.

Prerequisites
- MGMT 8405M or MGMT 8505M or MGMT 8605M or MGMT 8705M or MGMT 8805M

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8900M - Prospectus Development and Alignment

(3 cr.)
The prospectus is a brief document that is critical to articulate the general topic under consideration for a dissertation. Students will align, organize, delineate, and make decisions regarding their dissertation and appropriate research methodology. Students in this course are provided with the opportunity to design the prospectus in collaboration with program colleagues and mentorship from a course instructor. Students learn preferred practices for developing the prospectus and analyze examples of past documents. Students refine their problem and purpose statements along with their research questions. Then they finalize their decisions about the research method and design that may be incorporated into their dissertation. Finally, students engage in the iterative process of writing the prospectus, integrating feedback from peers and the course instructor. Students will incorporate all the skills learned throughout the program and apply them in the development of their prospectus.

Prerequisites
- MGMT 8003M
- MGMT 8005M
- MGMT 8007M
• MGMT 8009M
• RSCH 8110
• RSCH 8210
• RSCH 8310
• Residency 1
• Residency 2
• Specialization Courses 1, 2, and 3

MGMT 8910M - Dissertation Development Process

(3 cr.)
There are two major gates in the dissertation process that students must be aware of: the development of the proposal and the research phase. In this course, students are provided with an overview of the dissertation development process. The prospectus is further developed into the proposal and then into the final study. Students will understand the dissertation development process, how to work with feedback, how to manage their dissertation process, and how to collaborate with their committee members. Students will cover the major dissertation gates they will need to have, including the development of the proposal, the role of the University Research Reviewer (URR), preparing for the Institutional Review Board (IRB), collecting data, analyzing data, developing results, and articulating findings. They will develop a time management plan to have a realistic understanding of what will be required with respect to their educational, personal, and work commitment balance as they move to their dissertation course. Students will review all the skills developed throughout the program and see how those skills apply to the dissertation development process.
Prerequisites
• Residency 1
• Residency 2
• MGMT 8900M
• MGMT 8920M
• RSCH 8260 or RSCH 8360 or RSCH 8460

MGMT 8920M - Developing the Content Literature Review and Research Method and Design

(3 cr.)
The dissertation has two literature reviews. The first literature review is developed for the content (Chapter 2), and the second literature review is related to the method and design (Chapter 3). Students will begin to formalize the development of both components for the proposal. This course is an opportunity for students to focus on the development of their literature review and begin to compose a draft of their Chapter 2
and part of their Chapter 3 for their proposal. Students are encouraged to leverage all the literature they have amassed throughout their program of study and begin to analyze and synthesize the topics that are relevant to the content, method, and design. The focus of this course will be on advanced-level skills development in analysis, synthesis, and reflection.

Prerequisites

- MGMT 8003M
- MGMT 8005M
- MGMT 8007M
- MGMT8009M
- RSCH 8110
- RSCH 8210
- RSCH 8310
- Specialization Course 1

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MGMT 8990 - Developing a Prospectus

(2 cr.)
The prospectus is a brief document that helps students organize, delineate, and make decisions regarding their final dissertation and appropriate research methodology. Students in this course are provided with the opportunity to design the prospectus in collaboration with program colleagues and mentorship from a course instructor. Students learn best practices for developing the prospectus and analyze examples of past documents. Students refine their doctoral study questions and explore research methods and project types that they may incorporate into their dissertation. Finally, students engage in the iterative process of writing the prospectus, incorporating feedback from peers and the course instructor. Ultimately, the prospectus is offered by students as a document for review for consideration by potential mentors for their dissertation.

Prerequisites

- RSCH 8301M or RSCH 8201M

MGMT 8991 - Writing a Proposal

(4 cr.)
The proposal is the first three chapters of a dissertation; it establishes the rationale for conducting the study, includes a review and analysis of relevant literature, and describes the study's design and methodology. All previous work throughout the program is integrated, providing students with the opportunity to design a proposal in collaboration.
with members of their dissertation committee and committee chair. The development of a proposal feeds the final dissertation, allowing students to incorporate feedback from the course into the completion of their dissertation. Students often prepare multiple revisions of their proposal, requiring approval from Walden's Institutional Review Board (IRB). Students present their final proposal to their committee via an oral presentation. Prerequisites

- RSCH 8250 or RSCH 8251 or RSCH 8350 or RSCH 8351 or RSCH 8450 or RSCH 8451
- MGMT 8990

**MGMT 9000B - Doctoral Dissertation**

*(5 cr. per term for a minimum of 4 terms; taken continuously until completion)*

The final dissertation demonstrates students’ scholarly ability to examine, critique, and synthesize knowledge, theory, and experience, so that new ideas can be tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. In all cases, the dissertation is a rigorous inquiry that results in new knowledge, insight, or practice, demonstrating its efficacy in the world of management. Students design personal best practices for completing their dissertation within a designated context. They also select their committee members with whom they establish and maintain strong working relationships and on whom they rely to mentor and approve their proposal and final paper. Ultimately, every dissertation should make a fresh contribution to the field of practice in the management environment.

**MGMT 9000M - Doctoral Dissertation**

*(continuous enrollment in 5 credits per quarter for a minimum of 4 quarters until completion)*

In the final Dissertation, independent scholars demonstrate their ability to examine, critique, and synthesize knowledge, theory, and experience so that new ideas can be tested; best practices identified, established, and verified; and theoretical, practice, or policy constructs evaluated and advanced. In all cases, independent scholars engage in rigorous inquiry that results in new knowledge, insight, or practice, demonstrating efficacy in the world of business and management. Through this course, independent scholars gain assistance in working through the process of the dissertation. They design personal best practices for completing their study within a designated context. They also select their committee members, with whom they establish and maintain strong working relationships and on whom they rely to mentor and approve their proposal and final study. Ultimately, independent scholars completing the dissertation make a fresh contribution to the field of practice in the professional business environment. Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.
To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Prerequisites

- MGMT 8991 or MGMT 8991M or MGMT 8920M
- RESI 8401
- RESI 8402 or RESI 8402D or RESI 8402E

MHRM 6101 - Foundations of Human Resource Management♦

(3 sem. cr.)
Students are offered a comprehensive overview of human resource management (HRM) as a strategic function, laying a foundation for the detailed course study that follows. Students explore the role of human resource professionals as strategic partners who focus on the mission and goals of an organization. Students examine traditional topics, such as organizational effectiveness and development, workforce management, employee and labor relations, and technology management. They also explore transformational topics such as HRM in a global context, diversity and inclusion, risk management, corporate social responsibility, and U.S. employment law. The course also includes an examination of talent acquisition, employee engagement and retention, learning and development, and total rewards in the context of the employee life cycle.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6110 - Talent Management♦

(3 sem. cr.)
One of the most important assets of an organization is its talent, in other words, its human capital. However, too often there is little planning or strategy applied to the creation and management of this huge asset. In this course, students have the opportunity to develop the skills and knowledge to create and work effectively within a talent management and planning process. They explore recruiting strategies within a human capital development context and focus on building specific skills in managing an organization's talent through position planning, talent selection and placement, and retention. Using industry best practices, students also engage in applications and group projects to practice developing initiatives that align with organizational strategies.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MHRM 6120 - Human Resource Metrics

(3 sem. cr.)
Understanding the specific value of the human resource (HR) capital of an organization is crucial. Metrics for HR management provide the tools for both measuring human capital value and for overseeing and managing an organization’s human resources. Students in this course explore HR metrics as tools for organizational and individual performance improvement. They work toward establishing a foundation for the effective deployment of performance metrics as part of the recruitment, training and development, and retention of human resources. Students learn which metrics to employ and how to manage the results—a pivotal responsibility of HR managers. Students in this course are provided with the tools to make informed decisions required to create, apply, interpret, and manage results of appropriate metrics as an HR professional.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6130 - Negotiation and Conflict Resolution

(3 sem. cr.)
Effective business practice requires the ability to handle important negotiations, from internal disputes to international mergers, as well as the knowledge of methods and tools to prevent, manage, and break inherent conflict. Students in this course explore the challenges of managing people in times of perceived conflict and dispute, and they work toward developing skills to identify different types of conflict situations. They engage in hands-on, practical exercises in general contingency thinking and action approaches, negotiation and bargaining strategies, and communication styles designed to help them resolve conflicts and move toward win-win outcomes.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6140 - Budgeting and Resource Allocation

(3 sem. cr.)
Students in this course explore the role of budgeting and resource allocation along with related processes within the organizational context. Students examine processes related to managing budgets and strategies to effectively read, interpret, and communicate the often complex financial information related to both unit and organizational performance. Students also explore the implications of resource availability as well as methods to plan for and prioritize the use of resources, while considering ethical issues related to sustainability and resource scarcity.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MHRM 6201 - Individual and Organizational Performance Management

(3 sem. cr.)
Performance management involves the ongoing activities of employee evaluation and development focused on achieving the organization’s short- and long-term goals. Performance management also is required to meet ethical and statutory requirements. Looking at the continuous nature of performance management underscores the importance of identifying and supporting talent development. Students assess performance management systems within the context of the defined system metrics supporting the organization’s goals, and they assess the role of performance management in strengthening the organization through diversity and inclusion.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6301 - Legal and Regulatory Environment

(3 sem. cr.)
Successful organizations leverage the unique understanding of the legal and regulatory environments held by the human resource (HR) department to guide and advise the organization. In this course, students explore the laws that define and regulate multiple dimensions of the employer-employee relationship and the compliance requirements of the organization. This includes ethical behavior, employment agreements, pay structures, personnel policies, equity, access, dispute resolution protocol, hiring practices, and discrimination policies.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6401 - Human Resource Analytics

(3 sem. cr.)
Understanding the value of an organization’s human capital is crucial to its continuing success. Human resource (HR) management metrics provide the tools both for measuring value and for managing an organization’s human resources. Students in this course explore HR analytics and metrics as tools for organizational and individual performance improvement. These tools establish a foundation for the effective deployment of performance metrics as part of the recruitment, talent development, and retention of human resources. They also facilitate alignment of the HR strategy with the business strategy. Students examine the power of analytics and an HR metrics dashboard. In addition, students investigate the role of human resource information systems (HRIS) and the importance of working with internal business partners from areas such as information technology, finance, and the executive team.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MHRM 6501 - Conflict Management and Negotiation♦

(3 sem. cr.)
Negotiation and conflict management are core responsibilities of human resource (HR) professionals and having the HR function as the conflict resolution facilitator is critical to employee/employer relationships. Taking a leadership role in facilitating conflict is critical to assuring employment law and regulatory compliance. In organizations with unionized workforces, the HR role in conflict resolution tactics may be constrained by collective bargaining agreements. Students in this course explore the challenges of conflict and dispute and work toward developing skills to identify different types of conflict solutions. Students engage in hands-on, practical exercises in negotiation and bargaining strategies as well as communication styles.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6510 - Personal Leadership: Mentoring and Coaching♦

(3 sem. cr.)
Mentoring requires an understanding and integration of many theories, including leadership, interaction, and communication, that support the development of effective leaders. Students in this course understand and apply skills of effective mentoring, such as active listening, learning, empowering, and enabling change. Students engage in practical exercises, such as using feedback to create interactive dialogue and asking questions to acquire a deeper understanding of mentoring and coaching processes. In consideration of modern and virtual environments, students explore the challenges of mentoring or coaching individuals in a virtual or team setting.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6600 - Performance Management♦

(3 sem. cr.)
Performance management is a set of practices and processes that creates career opportunities to attract appropriate resources, establishes an environment that nurtures individual productivity and development, and smoothly transitions individuals to their next position or organization. Students in this course are provided with the opportunity to address these three key sets of processes. They practice writing job descriptions, selecting the right employees, developing skill-based performance standards, effecting relevant onboarding programs, and implementing educational and training programs intended to drive the success of employees and the organization as a whole. They explore how to maximize employee productivity through structured feedback, coaching, reflective performance development conversations, effective compensation models, employee recognition programs, and career development paths. Students also examine
ways to improve performance management systems by integrating feedback from the exit interviews of valued employees.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6601 - Benefits, Compensation, and Resource Allocation

(3 sem. cr.)
An organization deploys compensation and benefits as part of its total rewards strategy to build relationships with employees and increase their engagement, which can help the organization to sustain a competitive advantage. At the same time, competitive pressures may result in the total rewards strategy becoming a cost issue for the organization. In this course, students explore both the technical and strategic aspects of overall compensation. Students examine legally required and discretionary benefits at the individual and group level as well as the societal implications of the total rewards strategy. With compensation and benefits representing the largest components of the human resource (HR) budget, students also explore the role of budgeting and resource allocation along with related processes within an organizational context.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6605 - Strategic Human Resource Management

(3 sem. cr.)
In today’s organization, human resource management plays an important strategic role and increasingly contributes to its competitiveness. Students will explore how a more proactive and systemic approach to human resources addresses strategic business challenges throughout the organization—market positioning, talent acquisition, innovation, product development, quality, customer service, and operating functions. Students will see how results-based performance management is tied to the organization’s strategic agenda. Students will compare different theoretical perspectives of strategic human resource management and see the value of preparing employees of the future today to create sustainable competitive advantage.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6610 - Aligning Human Resources With Business Operations

(3 sem. cr.)
Contemporary organizations typically strive to align human resources with their functional strategies and business units, lending to the fulfillment of the short- and long-term goals of the organization. In this course, students explore the role of effective human resource (HR) professionals, who engage with colleagues that lead these
operating areas and develop HR solutions that support their success. Students identify and discuss the key drivers and metrics that managers in accounting, finance, information systems, sales, marketing, distribution, regulatory, supply chain, and other operating areas within the organization employ to craft their functional-level strategies. Students discover that this knowledge is what provides HR professionals the credibility to be valued partners with functional management figures, thus helping to prepare students for the inherent challenges of the HR manager role.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6611 - Managing People and Promoting Collaboration♦

(3 sem. cr.)
Contemporary business environments are increasingly competitive, global, fast paced, and knowledge intensive. In these environments, effective use of human capital is vital to an enterprise's success and survival. In this course, students will explore practical issues related to developing individuals and managing collaboration and will examine the skills and strategies necessary to address them effectively. Students will examine ethical and legal implications of managing a diverse workforce including issues that arise from cross-cultural differences and virtual work settings. The importance of communication as a tool to manage internal and external relationships is emphasized as it relates to the effectiveness of managing people to achieve organizational goals.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6615 - Legal and Regulatory Environment of Human Resource Management

(3 sem. cr.)
Successful organizations leverage their knowledge of the legal and regulatory environment to proactively develop their human resources strategy. In this course, students explore the laws that define multiple dimensions of the employer-employee relationship, including employment agreements, pay structures, personnel policies, equity, access, and dispute resolution protocol. Engaging in a variety of assignments designed to help students apply course content to real-world issues, they work toward developing business intelligence skills to track the dynamic legal environment and work with legal partners in the organization to implement human resource strategies globally.

MHRM 6625 - Building Human Capital Through Training and Development♦

(3 sem. cr.)
Training and development provides an organization’s workforce the tools it needs to contribute to success. Students explore the processes of conducting a needs assessment and developing a training proposal that builds the business case for a training
intervention for both individuals and groups, creating the basis for an annual training and development plan. Integrating adult and workplace learning theory into the development of training solutions, students learn how to design, implement, and evaluate the effectiveness of a training solution.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6630 - Benefits and Compensation♦

(3 sem. cr.)
An organization can employ its benefits and compensation strategy to build relationships with employees and increase employee engagement, enabling the organization to sustain a competitive advantage. In this course, students explore both the technical and strategic aspects of benefits and their role in overall compensation. They learn about legally required and discretionary benefits at the individual and group level. Students also explore and discuss program structures that address global considerations, and they examine societal implications of benefits and compensation that lead to supporting sustainable business practices.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6635 - Managing Business Partner Relationships♦

(3 sem. cr.)
Human resource departments are increasingly becoming networked organizations. Students in this course will learn the skills needed to evaluate build-or-buy alternatives for meeting human resource needs, negotiate contracts with service providers, develop service-level agreements, and track progress of ongoing contracts. Students will examine how the human resource professional can leverage systems to integrate vendor-supplied services, such as training, consulting, recruiting, assessment, coaching, and information systems.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6640 - The Role of Human Resources in Mergers and Acquisitions♦

(3 sem. cr.)
An integral component of the value created in mergers and acquisitions (M&A) is through human resources. Human resource professionals partner with senior management to support the organization before, during, and after an M&A event. Students in this course work toward developing the skills to analyze how cultural fit between organizations can impact M&A success, manage redundancy, recommend appropriate organizational structures, assess IT implications of combined payroll and
benefits systems, design reward systems, and map professional development paths to retain valued resources. Students engage in a variety of application-based assignments to learn how to design and implement the communications strategy that is necessary to facilitate all M&A activities in a structured time frame.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6645 - Building Organizational Capacity Through Succession Planning♦

(3 sem. cr.)
Organizations need to identify strategic talent today for their future success. In this course, students explore the processes that define an organization's future human resource needs, identify the gaps between today's resource requirements and future needs of the organization, and develop strategies to meet these needs. Through interactive discussion and practical exercises, students learn how to develop internal talent profiles, define career management tracks, conduct internal recruiting, develop comprehensive succession planning strategies, and use information technology to support these activities.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6677 - Competing in the Global Economy♦

(3 sem. cr.)
Over the last few decades, a fundamental shift in the world economy has been underway. No longer are national economic interests and business operations largely confined within well-defined geographic borders. Phenomena such as the explosion of the Internet, global sourcing, and the reduction in barriers to cross-border trade have all contributed to the creation of a truly global economy. Students in this course focus on the global environment of business and explore how the international sociocultural, political, legal, economic, physical, and historical environments affect business practices and policies. Students will learn the skills and methodologies required for market analysis and business strategizing on a global scale. In particular, students identify the internal and external forces affecting an organization's ability to compete both domestically and globally.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MHRM 6701 - Strategic Positioning and Social Change♦

(3 sem. cr.)
In today's organizations, human resource management (HRM) plays an important strategic role and increasingly contributes to organizations' competitiveness and global
Students explore how more proactive and systemic human resource practices address strategic business challenges and opportunities throughout an organization. This may include talent acquisition and retention, innovation, and social change. Students build theory-based but strategic perspectives of HRM’s organizational role and impact in creating a sustainable competitive advantage in a global economy.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MHRM 6751 - Global and Cultural Effectiveness**

(3 sem. cr.)
The global landscape touches every organization in some manner, either directly through its employees and products or indirectly through its supply chain, strategic partners, and customers. The reality of a global workforce strengthens yet challenges an organization because of its diversity in areas such as cultures, social norms, practices, and beliefs. The human resource (HR) function works on behalf of the organization, its employees, and its leadership to achieve a unified and inclusive work environment by understanding and addressing the unique challenges of a globally diverse workforce, including legal and regulatory constraints. Students in this course analyze the potential for building an integrated, globally-diverse workforce that will effectively improve the organization’s capacity and ability to thrive within this unique global landscape.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MHRM 6801 - Organizational Effectiveness and Leadership**

(3 sem. cr.)
Achieving measurable progress toward the organization's goals, or the degree to which the outcomes are achieved, is the meaning of organizational effectiveness. It is a key responsibility of human resource (HR) departments to plan for and support the organization’s ability (both in terms of capacity and agility) to achieve the goals. HR has a leadership position in building organizational effectiveness, since capacity is directly proportionate to people and talent, and agility is directly related to how well an organization and a team responds to the need for change. Having the right people in the right positions and anticipating and filling gaps in key talent areas collectively lead to an organization’s success. This course prepares the student with the skills to design and lead key organizational initiatives that both build its capacity and competitively position it for success.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MHRM 6900 - Capstone: Human Resource Planning in Action**
MHRM 6901 - Capstone: Strategic Human Resource Management

(3 sem. cr.)
The human resource (HR) management function has evolved into a strategic-partner role due to its broad organizational impact and potential for strategically advancing the organization's business agenda. As a strategic partner, the HR function is a part of the executive strategic planning team and can drive elements of the strategic plan. In this course students can develop a strong understanding of strategic planning as a key process and have the opportunity to develop critical knowledge and tools for understanding the organizational challenges for which the HR function can develop support. Students also explore how to align ethics and values with the strategy formulation process, align human resource strategies to the organization’s strategies, and drive organizational success by helping create a competitive advantage.

MHRM 6902 - Capstone: Meeting SHRM Competencies

(3 sem. cr.)
In this capstone course, students evaluate the human resource (HR) content outlined in the SHRM Body of Competency and Knowledge (BoCK)®. The capstone challenges students to demonstrate proficiency in all SHRM competencies within the four SHRM Certified Professional modules: HR Competencies, People, Organization, and Workplace. Within each of these four professional modules, students critically examine issues related to HR's strategic role and responsibilities in a global environment. Specifically, students focus on laws and regulations, talent recruitment, management, retention, and rewards, as well as corporate social responsibility in the context of Walden’s positive social change commitment. The capstone course content covers all of the SHRM competencies. Assessments include discussions, written assignments, and sample exams reflecting actual SHRM certification examinations.

MMBA 5501 - Managing and Leading: A Contemporary Approach
Students in this course explore contemporary management concepts and practices to provide a foundation for building the skills and knowledge necessary to be an effective and ethical manager in a global and interconnected environment. Students examine and contrast management and leadership theories and practice. Students also explore keys to success in the program, including setting goals and establishing priorities, time management, the basics of effective communication, the importance of giving and receiving constructive feedback, how to use feedback and reflection, and the fundamentals of working in groups in virtual settings. Students are also provided a brief introduction to Walden University, graduate studies at Walden University and related processes and policies, and the essentials of scholarly writing.

**MMBA 5510 - Leading People**

(4.5 sem. cr.)
Students in this course focus on the human dimension of business, including individual and group behaviors and organizational culture. Students explore some of the basic dimensions of human resource management as those dimensions affect the organization and the employee. Students also explore contemporary thinking about leadership and its importance in today's business world.

**Prerequisites**
- MMBA 5505

**MMBA 5520 - Business Operations in the U.S. and Abroad**

(4.5 sem. cr.)
Students in this course immerse themselves in how business works in the United States and other regions of the world. Students focus on how organizations are structured and designed. Students consider various components of business, examining how functions fit together and support the organization's mission and goals.

**Prerequisites**
- MMBA 5510

**MMBA 5530 - Marketing**

(4.5 sem. cr.)
Students in this course achieve an understanding of marketing and its relationship to the successful management of today's business organizations. They focus on how managers assess the environment and make business decisions based on available evidence or in the face of incomplete market information and rapidly changing markets. Students also examine how to develop marketing strategies that drive profitability, such as choosing a market segment to target and deciding how to differentiate products or services from the competition's. Finally, students receive an overview of marketing-mix decisions, such
as how to price, distribute, and promote products or services in a way that is consistent with the selected target market and desired positioning.

Prerequisites
- MMBA 5540

**MMBA 5540 - Innovation and Technology**

(4.5 sem. cr.)
Students in this course focus on how managers can make sure that they leverage technology in every possible way to achieve competitive advantages in the global marketplace. Students explore the role of information and information technology in business and learn how to identify and analyze emerging technologies including and beyond the scope of information technology. The course also focuses on the importance of technology and innovation in today's competitive environment. Students examine strategies to nurture innovation and cultivate technology development. Students conclude the course with a section about developing and implementing a technology strategy that assures an organization’s readiness and success in the future.

Prerequisites
- MMBA 5510

**MMBA 6251 - International Trade**

(4 cr.)
Students in this course investigate the relationship of microeconomics and the special characteristics of trade. They cover trade policy, politics, emerging considerations among developed and developing countries, and the analyses of trade and investment decisions.

**MMBA 6252 - International Finance**

(4 cr.)
Students in this course address open economy, macroeconomic models, and policies. They cover the asset approach to foreign exchange rates, implications for economic policies of fixed and flexible exchange rate systems, current examples of alternative exchange rate regimes, corporate risk management, optimum currency areas, the euro, exposure to developing countries, financial crises, and international debt-forgiveness policies.

Prerequisites
- MMBA 6251

**MMBA 6253 - Case Study: International Business Strategy**
Students in this course investigate case studies of multinational corporate management issues, including choices related to international and global competition, strategies for international entry to manufacturing, service and entrepreneurial industries, alliances, partnerships, global marketing, research and development, human resources, and acquisitions.

**Prerequisites**

- MMBA 6252

**MMBA 6540 - Innovation and Technology**

(3 sem. cr.)
Modern managers must know how to leverage technology in every possible way to achieve competitive advantage in the global marketplace. Students in this course explore the role of information and information technology in business and learn how to identify and analyze emerging technologies, including and beyond the scope of information technology. Students also focus on the importance of technology and innovation in today’s competitive environment. They examine strategies to nurture innovation and cultivate technology development. Students use concepts and theories presented in the course to develop and implement a technology strategy designed to help assure an organization’s readiness and success in the future.

**MMBA 6550 - Accounting for Business Management**

(3 sem. cr.)
Managers do not have to be accountants to effectively lead, but they should understand the impact of their financial decisions. Students are prepared to use the language of accounting and understand the fundamentals of making decisions regarding the financial aspects of a business in this course. They learn to examine financial statements to check the company’s profitability, liquidity, solvency, and return to shareholders. They also learn to use accounting data to make business decisions, such as product pricing, cost cutting, equipment acquisition, and enterprise startup. Students examine accounting in a global context and assess the ways that global business environment impacts financial analysis and decision making. Students employ analytic and group communication skills in a final project through which they conduct research and defend a position on a current accounting topic.

**MMBA 6560 - Financial Management**

(3 sem. cr.)
In corporate financial management, change is constant. Thus, managers must understand the fundamentals and explore the latest trends and thinking. Students in this course examine important financial concepts and tools that every manager should understand.
They explore the financial and monetary markets in the United States and abroad to gain an economic context. They also learn the concepts and tools necessary to assess an organization’s financial position and explore a variety of alternatives that organizations use to finance their ventures. Students engage in application assignments, discussions, and practical exercises on financial planning, budgeting, and other activities, such as balancing risks.

**MMBA 6570 - Business Strategy for Competitive Advantage**

*(3 sem. cr.)*

Managers must not only focus on current issues of stability, they must also strategize to facilitate growth and reinvestment while keeping in mind that competitors are doing the same. In this course, students focus on the development and implementation of business strategies that enable competitive advantage. They learn to assess the current environment in which the organization competes and forecast how that environment may change. Students engage in the development of business plans, creating new perspectives and strategies. Through weekly discussions, they share these ideas with their peers and consider ways to implement strategies to promote growth and value, providing competitive advantage in their business or future industry.

**MMBA 6620 - Applications in Marketing**

*(4 sem. cr.)*

Students are provided with the opportunity to review fundamental marketing principles and to employ them in the investigation of marketing concepts in the context of real-world problems in this course. They incorporate into their examination a variety of topics, such as market segmentation, marketing channels, competitive intelligence, integrated marketing, product development and commercialization, consumer behavior, and product and services marketing. Students apply these and other concepts to develop marketing solutions commonly required in real-world enterprises. They also assess and discuss 21st-century concerns related to the market, such as electronic delivery.

**Prerequisites**

- MMBA 6530

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.***

**MMBA 6661 - Advanced Leadership**

*(4 sem. cr.)*

Globalization, developments in technology, and the continued blurring of organizational boundaries are important factors contributing to the pressing need for leaders who can handle 21st-century change and who are willing to advance and/or revise their skill sets.
In this course, students explore leadership principles and practices in the context of real-world problems that are increasingly complex in nature. Students learn about aspects of moral leadership, teamwork, and incorporating culture and values into leadership strategies. They work toward enhancing personal leadership skills by reflecting on course content, self assessment, and their own or shared professional experiences.

Prerequisites
- MMBA 6660

**MMBA 6672 - Field Study**

*(4 sem. cr.)*

Students have the opportunity to develop an independent research project based on individual goals in this course. Students propose a research project that aligns with Walden’s MBA program and their own professional objectives. They also conduct applicable research under the guidance of a Walden instructor and present their findings to that instructor.

Prerequisites
- Prior academic approval is required.

**MMBA 6673 - Applications in International Business**

*(4 sem. cr.)*

Market and business practices are often shaped by many factors, such as institutional or organizational culture specific to a region. Students in this course explore these determining factors as they examine the functions of global organizations that shape the global business climate. Using case studies and topical literature, students explore contemporary issues in the global market for a real-world understanding of what drives globalization, in addition to the challenges, pitfalls, and best practices of international business. Students also sharpen their analytic and communication skills through peer discussions on a variety of topics, such as foreign direct investments, capital mobility, sustainability, and other issues related to globalization.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMBA 6674 - Case Studies in International Business**

*(4 sem. cr.)*

There are many factors affecting the outcomes of international business endeavors, such as cultural differences, changes in currency, and the political climate of the nations involved. Students in this course explore these factors in context through real-world case studies. They have the opportunity to gain skills needed to make important
decisions regarding international business as they analyze the successes and failures of actual international business ventures across a wide range of industries, developing their analytical skills in the process. Through these case studies, students debate current issues on the specifics of international business, such as outsourcing, sustainability, the global supply chain, and ethical and legal concerns.

**MMBA 6680 - Individual and Organizational Commitment to Social Responsibility**

*(4 sem. cr.)*

Taking into account global concerns, such as human rights, the environment, and factors of sustainability, individuals and organizations alike have incorporated a business model with a vision of change and a mission to positively influence society. In this course, students explore multiple approaches to understanding and improving the systemic relationships and obligations that exist among individuals, organizations, and the larger set of connected communities. Through assessment of past and current corporate practices of successful organizations, students gain practical insight on effective and non-effective strategies, in addition to related ethical considerations. Through application and reflection, students consider the role they can play in implementing change and growth without doing harm through unintended byproducts and outcomes, developing the ability to practice social responsibility as part of their daily work.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMBA 6690 - U.S. Healthcare Delivery System**

*(3 sem. cr.)*

Healthcare delivery is one of the largest industries in the United States. Students in this course are provided with the opportunity to gain thorough insight into the current structure and components of health services and delivery; they are also presented with an abbreviated history addressing the nature of population illness and disease. Students identify and describe components of the system, including patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods, and technology. They engage in activities and discussions focused on the continuum of services related to healthcare, such as hospitals and hospital systems, ambulatory care, and long-term care. Students also explore issues related to these services, such as wellness, prevention, and community and public health, for a comprehensive understanding of the system. Students contextualize their study through the examination of current factors and challenges as well as the impact these challenges have on delivery and management.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMBA 6692 - Financial Management**
Students in this course are introduced to the terminology, theory, concepts, and techniques used in the accounting and finance functions in healthcare organizations. They explore the important role of finance in healthcare organizations, in addition to the various techniques to develop, manage, and control finances. Using an applied approach to healthcare finance, students learn how to develop, apply, and interpret various financial tools, including budgets, sources of revenue/reimbursement by payer, income statements, balance sheets, dashboards, statements of cash flow, pro formas, return on investment analysis, financial ratios, capital budgeting, debt service and borrowing, depreciation, and cost allocation and cost accounting techniques. Students develop portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.

**MMBA 6693 - Quality Assessment and Improvement**

(3 sem. cr.)
Healthcare organizations increasingly are concerned about providing high quality and safe services. Students in this course are introduced to the basis for quality and patient safety and provides an overview of healthcare quality, methods of assessing quality, and techniques for improving quality. They can learn key terminology and concepts, including defining quality care; measuring quality in terms of the structure-process-outcomes model; distinguishing between clinical and customer service quality; identifying techniques to avoid adverse clinical events; and exploring customer service quality in terms of defining, measuring, and improving patient satisfaction. Students also explore and discuss the roles of governmental agencies in promoting and reporting quality information regarding hospitals and other health organizations, accrediting bodies, and recent performance initiatives of government and private payers. They apply course concepts to current issues of improving clinical and service quality in healthcare organizations, with special consideration of the 5 Million Lives Campaign—a national effort initiated by the Institute for Healthcare Improvement designed to improve medical care in the United States.

**MMBA 6694 - Health Informatics and Technology**

(3 sem. cr.)
There is an increasing need for improvement in the quality of patient care and healthcare management practices, which organizations can now address through the use of information systems and information technology. Through the review of traditional and topical resources, students in this course learn how integrated, computer-based information systems can enable the assessment and documentation of costs and quality. They also learn how these systems can inform decisions that improve care, allow for better management of medical records, enhance supply inventory and management, and improve vendor contracting and management. Students engage in weekly discussions and assignments designed to provide practical applications of content, focusing on
electronic medical records and computerized physician order entry, linked information systems across episodes of care, integrated financial and clinical information systems, linkages among electronic information access systems, web-based systems for increasing consumer knowledge, confidentiality of information systems, organizational compliance, and data sets.

**MMBA 6695 - Health Policy and Economics**

(3 sem. cr.)
Managers in healthcare must possess the skills needed to assess economic principles and polices to make important decisions regarding healthcare and services. In this course, students examine the application of health policy and economic principles in regard to managerial decision making. They learn about the process for policy development and implementation, key stakeholders and interest groups involved in the health policy process, and how health policy changes over time within the United States. Students assess and discuss key policy initiatives related to cost, quality, and access. They also engage in assignments designed to advance their understanding of and ability to apply economic principles, such as supply, demand, and the determination of market price.

**MMBA 6700 - Introduction to Human Resource Management**

(4 sem. cr.)
Students are provided with a comprehensive overview of human resource (HR) management in this course. Students explore the role of HR managers as strategic partners who focus on the mission and goals of an organization. Within the strategic and legal framework, they examine the remaining areas of HR management functions, including workforce planning and employment; human resource development; total rewards of compensation, benefits, and rewards; risk management of health, safety, and well-being; and employee and labor relations. Students examine the use of technology as a tool in providing HR metrics to measure outcomes. They also work toward gaining the skills that enable them to develop important employment- and HR-related policies and procedures, responsibilities inherent in HR functions, programs, and activities.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMBA 6701 - Strategic Human Resource Management**

(4 sem. cr.)
In this course, students adopt a strategic view of human resource management programs in evaluating their alignment with organizational strategic goals for two real-world problems. Students explore such concepts as issues involved with mergers and acquisitions, global management of human resources, and high performance systems required to achieve competitive advantage.

**Prerequisites**
• MMBA 6700

MMBA 6710 - Applications in Corporate Finance

(4 sem. cr.)
Managers who understand the fundamental financial aspects of their company are able to make informed decisions and lead their organization through times of global expansion and economic volatility. Students in this course learn to employ the tools of finance that help managers maximize their firm’s value. Students engage in practical exercises on the value of money, net present value, internal rate of return, capital budgeting, capital structure, working capital management, multinational concepts, and dividend policy. They also share new ideas and perspectives with peers through discussions on a variety of topics, such as model construction, stock value, investment decisions, capital structure, and international operations.

MMBA 6711 - Advanced Corporate Finance

(4 sem. cr.)
While fundamental financial knowledge and management skills are requisite to the role of a business leader, managers must also know how to use existing financial models and formulas, which can aid their ability to make complex decisions. After a brief review of selected topics in finance, students in this course learn how to become operational and marketable in financial management. They gain practice making decisions that can benefit a company financially while using concepts of valuation, intense capital budgeting, cost of capital, risk, standard deviation, variance, covariance, Capital Asset Pricing Model (CAPM), and beta. They also have the opportunity to assess and discuss multinational concepts, leasing, option pricing, derivatives, hedging, and other advanced financial theories.
Prerequisites
• MMBA 6610

MMBA 6721 - International Marketing♦

(4 sem. cr.)
In consideration of the 21st-century shift to globalization, businesses often need to adopt a global vision and extend their services beyond domestic borders to gain and maintain a competitive advantage. In this course, students explore the cultural, ethical, political, legal, and financial aspects that drive marketing practices within a multinational framework. In addition, students learn to apply the tools of the marketing management process, such as those for international pricing, to the global environment. Students collaborate in teams to develop a comprehensive international marketing plan and work toward gaining the strategic decision-making skills that professionals use to compete in
the global marketplace.

Prerequisites

- MMBA 6620

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMBA 6730 - Strategies for Advancing Innovation and Technology**

(4 sem. cr.)

Major fluctuations in the economy often force managers to make important, timely decisions that harness existing resources within their organization, leading to new developments and strategic advantage. In this course, students address important management challenges that are typical in today's technology-based businesses. They learn ways to align business needs with technological solutions and identify new opportunities or applications for technology. Students have the opportunity to gain the requisite skills to manage processes that ensure technology solutions enhance an organization's competitive position.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMBA 6731 - Strategies for Implementing Innovation and Technology**

(4 sem. cr.)

In light of rapidly evolving technology, there are many factors involved in ensuring that businesses remain successful. Such factors involve understanding new technological capabilities and aligning them with the goals of a company and the needs of customers. Students in this course explore these factors and examine how managers make decisions to help ensure their company remains innovative and technologically adept. They examine the processes and tools involved in implementing new technologies and formulate solutions to overcome related challenges. In addition, students examine and discuss how technology solutions are affected when the context is global in scope.

Prerequisites

- MMBA 6630

**MMBA 6740 - Entrepreneurship and New Venture Creation**

(4 sem. cr.)

An important trend of which managers must be aware involves business organizations moving from a profit-only mentality to one in which they utilize their profits and other resources to enhance society. Students in this course explore entrepreneurial concepts and processes that apply to startup enterprises as well as those that are well-established with an innovative focus or entrepreneurial spirit. Students engage in coursework...
focused on market opportunity, risk management, change management, innovation, product development, financing and raising capital, intellectual property, and commercialization. They have the opportunity to apply these and related concepts to problems common in contemporary organizational contexts.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMBA 6741 - Building and Funding an Entrepreneurship Venture**

*(4 sem. cr.)*

In this course, students continue to build their entrepreneurial skills and knowledge by addressing problems drawn from real-world organizations. Students analyze how the organization contributes to society (local, national, or international), how entrepreneurship and commercial activities affect the environment, and how the potential of forming "glocalities" (a combination of individuals, business organizations, and political agencies) becomes more significant in the future in terms of working in unison to better society. Students also use case studies and other practical exercises to evaluate innovative funding sources and investigate the challenges involved in maintaining growth and sustainability.

**Prerequisites**
- MMBA 6640

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMBA 6750 - Foundations in Project Management**

*(4 sem. cr.)*

Students are introduced to the art and science of project management as applied to different types of project situations. They learn about the tools, techniques, and methodologies used to lead a project successfully throughout the project life cycle. They analyze the role of the project manager as an integral administrator overseeing the execution, progress, and interaction of all parties involved. They explore the function of the project management office (PMO), project organizations, team building, project selection, and portfolio management. Exploring context through real-world problems, students learn how managers employ the scope of work, work definition, scheduling, risk management, control, and closeout throughout the course of a project. In addition, students learn how project managers use request for proposals (RFPs), proposals, and contracts to define a project clearly and safeguard their company.

**Note:** There is a special technology requirement for this course, requiring the use of Microsoft Project. The software will be provided in trial form, but there is not a Mac version available in this software. Students in this course are required to use Microsoft Windows, XP, or Server 2003 or later. Since Mac users may experience difficulty using
the software, we recommend the following: (a) Mac users should be prepared to use a PC during this course, or (b) Mac users should purchase the appropriate software or hardware to be able to replicate the Windows environment on their Mac.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMBA 6751 - Project Management Skills for Managers

(4 sem. cr.)
As organizations continue to grow in scope and size, so do their projects, requiring individuals with a unique and diverse set of management skills who are able to see a product through from conception to distribution. In this course, students delve deeper into the realm of project management to assess its impact on the business environment in a domestic and global context. Students examine the "soft" skills of project management as the keys to improving its practice. In the context of real-world problems, they assess research and engage in practical simulations to determine best practices of project management in today's organizations.

Prerequisites
- MMBA 6650

Note: There is a special technology requirement for this course, requiring the use of Microsoft Project. The software will be provided in trial form, but there is not a Mac version available in this software. Students in this course are required to use Microsoft Windows XP, Server 2003, or later. Considering Mac users may experience difficulty using the software, we recommend the following: (a) Mac users should be prepared to use a PC during this course, or (b) Mac users should purchase the appropriate software or hardware to be able to replicate the Windows environment on their Mac.

MMBA 6760 - Leadership Practice and Application

(4 sem. cr.)
Responsible leaders in the 21st century must be open to new frameworks and perspectives, which can lend to effective leadership practices and decisions applicable to modern trends, such as globalization. In this course, students explore these ideas in the context of problems pulled from real organizations. They investigate many of the current theories and best practices to determine which may work best in a given situation. Students also examine how leadership practices impact the business environment from a global perspective. Through evaluation of course content and peer discussions, students have the opportunity to reflect on personal and shared experiences to assess and enhance their own leadership abilities.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MMBA 6780 - Capstone: Becoming a World-Class Manager

(4 sem. cr.)
Students begin this course with an emphasis on reflective management practice in the global business environment. Students assess concepts and principles learned throughout their program from a variety of perspectives, including technological, operational, strategic, financial, and marketing. They explore contemporary management thinking and examine their own management style and experience. In the latter part of this course, students have the opportunity to complete their program-level project through the synthesis of their MBA experiences and to discover how their thinking and perspectives have changed as a result of knowledge gained.

MMBA 6782 - Financial Management Tools for Decision Making♦

(3 sem. cr.)
Effective business managers use a variety of financial management tools as they seek to evaluate alternatives and make sound decisions. In this course, students analyze these tools, including the breakeven and cost-volume-profit analysis for model pricing and cost sensitivity, forecasting and cost prediction, variance cost analysis, relevant cost analysis, project valuation and prioritization using payback, rates of return, and discounted cash flow methods. Students sharpen their diagnostic critical-thinking skills and learn to construct effective, ethical, fact-based arguments, which are among the fundamental capabilities required for managerial decision making. Using relevant management articles, case studies, and topic analyses, students also examine how to align business needs with fact-based solutions, how to identify new opportunities, and how to manage and enhance an organization's competitive position.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMBA 6783 - Managerial Accounting for Organizational Performance♦

(3 sem. cr.)
One of the primary functions of the accountant's role is preparing internal accounting information that can be used by management for effective decision making and organizational performance. Students can gain a practical perspective into this role through case study review and analysis of pricing and contribution margin analysis, cost management and allocation, activity-based costing and throughput accounting, and inventory management. Students assess performance measurements, including key performance indicators, balanced scorecard, and forecasting. They explore operating and capital budgeting and financial planning techniques and become familiar with quantitative models and approaches used in management accounting. Through this course, students learn about the different departments and operating divisions within an organization and how they work individually and collaboratively to handle accounting responsibilities.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMBA 6784 - Managing Operational and Financial Business Risks**

(3 sem. cr.)

Accountants and business managers must be astute and proactive in managing a business to combat the inevitable threat of operational and financial risks, including those involving credit, market, liquidity, reputation, technology, and legality. In this course, students assess the tools used by accountants and managers in managing these risks. They explore the various processes used to identify, analyze, and assess risks, and they learn the appropriate use of financial and operational controls to mitigate such risks. Additionally, students examine ways to implement techniques, such as developing a risk control matrix and using the concepts of the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework to improve an organization’s enterprise risk management.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMHA 5050 - U.S. Healthcare Delivery System**

(5 cr.)

Through this course, students are helped to understand the structure and components of health services and the health services delivery system in the United States. The components of the system, including patients, organizations, healthcare professionals, public and private third-party payers, regulators, reimbursement and reimbursement methods, and technology are identified and described, including the continuum of healthcare services such as hospitals and hospital systems, ambulatory care services, long-term care services, wellness/prevention services, and community/public health services. In addition, in the course, students are provided with an abbreviated history of health and health services in the United States and address the nature of population illness and disease. Contextual factors and challenges that are linked to the healthcare delivery system are addressed, and the impact of these challenges on the delivery of services and healthcare management are explored.

**MMHA 5050TL - Contemporary Topics in U.S. Healthcare Delivery [Tempo Learning®-Specific Course]**

(5 cr.)

Students in this course are provided with the opportunity to gain thorough insight into the current structure and components of health services and delivery. Students identify and describe components of the system, including patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods, and
technology. They engage in activities and discussions focused on the continuum of services related to healthcare, such as hospitals and hospital systems, ambulatory care, and long-term care. Students also explore issues related to these services, such as wellness, prevention, and community and public health, for a comprehensive understanding of the system. Students contextualize their study through the examination of current factors and challenges as well as the impact these challenges have on delivery and management.

Note: This version of MMHA 5050 is only available as part of specific competency-based Tempo Learning® programs.

**MMHA 5200 - Principles of Population Health in Healthcare Administration**

(5 cr.)
An increasing need exists for healthcare administrators to address population-wide health issues. Developing evidence-based health programs enables healthcare to be addressed on a preventive basis at the community or service area level. In this course, students utilize clinical data sets and combine this knowledge with public health data sets concerning socioeconomic and behavioral influencers of health. Students analyze these influencers to determine effective and appropriate services, programs, and solutions to benefit the population as a whole. They discover health issues facing special populations, respond to case studies, and create program plans to improve population disease outcomes.

**MMHA 5300 - Law, Ethics, and Policy in Healthcare Administration**

(5 cr.)
The rapidly evolving healthcare system presents the healthcare administrator with complex challenges and risks. Healthcare administrators must possess the skills needed to assess external and internal healthcare polices to influence organizational design and delivery of healthcare services. Students assess and discuss key policy initiatives from the diverse perspectives of policymakers, interest groups, and other stakeholders. Students focus on required knowledge of laws and regulations developed by policymakers that impact the healthcare organizations in their coursework, and they will review key laws that govern patient care delivery, employee relations, contracts, and fraud. Emphasis will be placed on legal and regulatory failure points that administrators must avoid in designing and implementing policies and practices within the healthcare organization. To help frame these concepts, students examine the ethical underpinnings and principles that healthcare organizations and administrators follow in the delivery of services to patients.

**MMHA 5500 - Human Resource Management and Organizational Development and Leadership for Healthcare Administrators**
Students in this course examine organizational behavior as well as the roles and responsibilities of management and leadership within healthcare organizations through the macro (organization-wide) and micro (individual and team performance) perspectives. Students also focus on understanding organizational values, mission, and vision; management and leadership principles to help manage change; and effective delivery of services in an increasingly global environment. They also learn and apply theories of organizational design, governance, and alternative organizational structures, and they consider the theory and practice of managing individuals and groups through motivation, communication, teamwork, leadership, organizational change, coalition building, negotiation, and conflict management and resolution. Through group assignments and personal assessments, students work toward developing self-awareness and effective management styles and strategies.

Prerequisites
BS in Healthcare Management
- HLTH 4000

MMHA 5900 - Healthcare Quality Management♦

Students in this course are introduced to the basis for quality and patient safety and are provided an overview of healthcare quality, methods of assessing quality, and techniques for improving quality. They can learn key terminology and concepts, including defining quality care; measuring quality in terms of the structure-process-outcomes model; distinguishing between clinical and customer service quality; identifying techniques to avoid adverse clinical events; and exploring customer service quality in terms of defining, measuring, and improving patient satisfaction. Students also explore and discuss the roles of governmental agencies in promoting and reporting quality information regarding hospitals and other health organizations, accrediting bodies, and recent performance initiatives of government and private payers. They apply course concepts to current issues of improving clinical and service quality in healthcare organizations, with special consideration of the 5 Million Lives Campaign—a national effort initiated by the Institute for Healthcare Improvement designed to improve medical care in the United States.

Prerequisites
BS in Healthcare Management
- HLTH 4000
All Other Programs
- None

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
In this course, students work toward increasing their knowledge of key contextual and environmental factors affecting the practice of healthcare administration, including the importance of culture, communication, and diversity. This course is an introduction for students to healthcare stakeholders in a variety of settings within the field of healthcare as well as key health and medical terms, including basic health, wellness, and disease information. They consider professional behaviors, such as setting goals and managing time, as well as the attitudes and motivation required for success as a healthcare manager. In addition, students work toward developing the competencies needed for success within an online environment as well as critical thinking, written, verbal, and interpersonal communication skills.

**MMHA 6015 - Foundations of Healthcare Administration**

In this course, students work toward increasing their knowledge of key contextual and environmental factors affecting the practice of healthcare administration, including the importance of culture, communication, and diversity. This course is an introduction for students to stakeholders in a variety of settings within the field of healthcare as well as key health and medical terms, including basic health, wellness, and disease information. They consider professional behaviors, such as setting goals and managing time, as well as the attitudes and motivation required for success as a healthcare manager. In addition, students begin building their portfolios, and they work toward developing the competencies needed for success within an online environment as well as critical-thinking, written, verbal, and interpersonal communication skills.

**MMHA 6030 - Socioecological Perspectives on Health**

In this course, students identify and discuss social and ecological perspectives of public health including individual, interpersonal, organizational, community, societal, and public policy factors. Students explore and apply the socioecological model (SEM) and other theoretical frameworks that aim to address current public health problems and reduce health disparities, morbidity, and mortality. Students demonstrate understanding of course concepts through peer discussion and through researching and describing a specific health issue in a community, discussing the contributing factors, and proposing an appropriate intervention.

**MMHA 6038 - Health Behavior Theory**

Students in this course are introduced to concepts necessary for promoting positive health-behavior change by examining the most commonly used theories and models in public health and health education and promotion. Coursework focuses on the
identification and application of theories and models for promoting and designing effective health behavior programs and interventions. Students explore individual, interpersonal, and community theories and modules to determine the most appropriate application.

Prerequisites
- MMHA 6999

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMHA 6050 - Contemporary Topics in the U.S. Healthcare Delivery System**

(5 cr.)
Students in this course assess the causes and consequences of historical events on health and medical care in the United States. They appraise the impact of barriers related to cost, quality, and access to health and medical care. Students analyze unique and complex aspects of subsystems and differentiate vertical and horizontal integrated health care delivery systems. They compare characteristics of health care and medical care in the United States with health care and medical care systems in other countries. Students also evaluate current and future issues, trends, and forces in health care and medical care reform.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMHA 6050TL - Contemporary Topics in U.S. Healthcare Delivery [Tempo Learning®-Specific Course]**

(5 cr.)
Students in this course are provided with the opportunity to gain thorough insight into the current structure and components of health services and delivery. Students identify and describe components of the system, including patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods, and technology. They engage in activities and discussions focused on the continuum of services related to healthcare, such as hospitals and hospital systems, ambulatory care, and long-term care. Students also explore issues related to these services, such as wellness, prevention, and community and public health, for a comprehensive understanding of the system. Students contextualize their study through the examination of current factors and challenges as well as the impact these challenges have on delivery and management.

Note: This version of MMHA 6050 is only available as part of specific competency-based Tempo Learning® programs.

**MMHA 6100 - U.S. Healthcare Delivery System**
Healthcare delivery is one of the largest industries in the United States. Students in this course are provided with the opportunity to gain thorough insight into the current structure and components of health services and delivery; they are also presented with an abbreviated history addressing the nature of population illness and disease. Students identify and describe components of the system, including patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods, and technology. They engage in activities and discussions focused on the continuum of services related to healthcare, such as hospitals and hospital systems, ambulatory care, and long-term care. Students also explore issues related to these services, such as wellness, prevention, and community and public health, for a comprehensive understanding of the system. Students contextualize their study through the examination of current factors and challenges as well as the impact these challenges have on delivery and management.

**MMHA 6111 - Leadership and Organizational Change**

(5 cr.)
Successful organizations in a rapidly changing and complex world require leaders who embrace change and are able to engage others in change. In this course, students use traditional literature, current articles, and interactive media to explore the qualities, characteristics, and skills of effective leaders as well as the theories, models, and relationships between leadership and organizational change. They assess the ethical issues and standards as well as the opportunities and challenges related to leading diverse organizations through change. Students also examine how current leaders employ leadership and organizational change to contribute to social change, and they consider how to use these lessons to make further positive changes within an organization or their own community.

**Prerequisites**
- MMHA 6999

**MMHA 6115 - Research Methods and Quantitative Analysis**

(3 sem. cr.)
Healthcare professionals often rely on research to make informed decisions on critical issues affecting programs, policy, and practice. In this course, students examine the logic underlying scientific research; study design; sampling; identification of variables; methods of data collection and analysis; concepts in measurement, including reliability and validity; program evaluation; and research ethics. They explore numeric methods for data description; the Donabedian model of program evaluation; data modeling and research; data mining; and information system assessment. Through statistics software exercises,
students learn basic research methods, strategies, and skills for presentation of research results; they also become familiar with statistical software used to support research. **Note:** There is a special technology requirement for this course for accessing required interactive tutorials. **PC:** Students using a PC platform must have a minimum of Windows 2000, Internet Explorer 6.0, and 1 GB of RAM. **Mac:** Students using a Mac platform must have a minimum of an Intel® Mac with OS X version 10.4.11, 1 GB of RAM, and Windows 2000. Mac users who do not already have Windows 2000 on their Macs must purchase one or two Mac add-ons from an outside vendor to access the interactive tutorials. For details on which add-ons to purchase and how to purchase them at discount pricing, please contact a member of Walden’s Customer Care Team at 1-800-925-3368 or 1-612-925-3368, option 2.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMHA 6135 - Health Policy and Economics**

(3 sem. cr.) Managers in healthcare must possess the skills needed to assess economic principles and policies to make important decisions regarding healthcare and services. In this course, students examine the application of health policy and economic principles in regard to managerial decision making. They learn about the process for policy development and implementation, key stakeholders and interest groups involved in the health policy process, and how health policy changes over time within the United States. Students assess and discuss key policy initiatives related to cost, quality, and access. They also engage in assignments designed to advance their understanding of and ability to apply economic principles, such as supply, demand, and the determination of market price.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMHA 6160 - Financial Management**

(3 sem. cr.) Students in this course are introduced to the terminology, theory, concepts, and techniques used in the accounting and finance functions in healthcare organizations. They explore the important role of finance in healthcare organizations, in addition to the various techniques to develop, manage, and control finances. Using an applied approach to healthcare finance, students learn how to develop, apply, and interpret various financial tools, including budgets, sources of revenue/reimbursement by payer, income statements, balance sheets, dashboards, statements of cash flow, pro formas, return on investment analysis, financial ratios, capital budgeting, debt service and borrowing, depreciation, and cost allocation and cost accounting techniques. Students develop portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.
MMHA 6190 - Organizational Development and Leadership♦

(3 sem. cr.)
The structure of healthcare organizations is complex and unique, and the behaviors within these organizations often have a direct impact on their success. Students in this course examine organizational behavior as well as the roles and responsibilities of management within healthcare organizations through the macro (organization-wide) perspective and micro (individual and team performance) perspective. Students also focus on understanding organizational values, mission, and vision; management and leadership principles to help navigate change; and effective delivery of services in an increasingly global environment. Students also learn and apply theories of organizational design, governance, and alternative organizational structures, and they consider the theory and practice of managing individuals and groups through motivation, communication, teamwork, leadership, organizational change, coalition building, negotiation, and conflict management and resolution. Through group assignments and personal assessments, students work toward developing self-awareness and effective management styles and strategies.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMHA 6200 - Principles of Population Health in Healthcare Administration♦

(5 cr.)
An increasing need exists for healthcare administrators to address population-wide health issues. Developing evidence-based health programs enables healthcare to be addressed on a preventive basis at the community or service area level. In this course, students utilize clinical data sets and combine this knowledge with public health data sets concerning socioeconomic and behavioral influencers of health. Students analyze these influencers to determine effective and appropriate services, programs, and solutions to benefit the population as a whole. They discover health issues facing special populations, respond to case studies, and create program plans to improve population disease outcomes.

Prerequisites
- MMHA 6000

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMHA 6205 - Health Law and Ethics♦

(3 sem. cr.)
Students in this course receive with an overview of law, regulation, and court decisions that affect healthcare organizations, as well as ethical underpinnings and principles that
healthcare organizations follow in the delivery of services. Students explore and discuss a variety of topics, including key federal and state laws; regulatory oversight and licensing of facilities and practitioners; credentialing requirements and processes; scope of practice for practitioners; admission and discharge processes; privacy and confidentiality of patient information; patient protection, including advanced directives; organizational liability; conflict of interest legislation; antitrust law; contract law governing relationships with employed physicians and other providers; risk management; and organizational governance issues, among others. Using case studies and hypothetical situations, students assess management roles and key ethical principles and challenges underpinning healthcare organizations.

 região Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**MMHA 6220 - Human Resource Management**

(3 sem. cr.)
The strength and success of healthcare organizations lie within their workforce. In this course, students address the role of human resources in healthcare organizations as well as the recruitment, retention, management, and development of these resources. Students gain an understanding of the key roles of human resource personnel in establishing goals and expectations regarding organizational performance as well as how individuals contribute to effective performance in terms of controlling costs, improving quality, and providing excellent customer service. They explore major federal and state legislation that influences human resources, key management functions within workforce planning and recruitment, and functions within workforce retention. Students devote specific attention to the administrative and strategic aspects of managing human resources, focusing on managing clinical and direct-care practitioners whose perspectives and expectations differ from those of management. Other topics that students explore and discuss include employment and contract labor law; job pricing and compensation strategies, including benefits and pay for performance; staffing models; labor relations; performance appraisals; turnover management; and strategies for ensuring employee engagement, motivation, and satisfaction.

 região Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**MMHA 6235 - Operations Analysis**

(3 sem. cr.)
To improve performance outcomes, healthcare organizations often rely on operations management to identify sources of inefficiency, inefficacy, and problems in coordination and delivery of care. In this course, students examine the factors that affect performance outcomes within healthcare organizations; methods to monitor, adjust, and improve performance; and techniques and tools of quantitative analysis of operations and
decision support that assist in management of capacity issues, reengineering, staffing, scheduling, productivity, and supply chain. Other important concepts that students examine include understanding operational assessment; understanding patient care and related support-care processes through flowcharting of steps in the process; taking a systems perspective on the organization and delivery of services; identifying problems and improvement opportunities using analytical techniques; and monitoring performance data to identify trends and variation based on current operations and those resulting from changes and improvements.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMHA 6250 - Quality Assessment and Improvement♦**

(3 sem. cr.)
Healthcare organizations increasingly are concerned about providing high quality and safe services. Students in this course are introduced to the basis for quality and patient safety and provides an overview of healthcare quality, methods of assessing quality, and techniques for improving quality. They can learn key terminology and concepts, including defining quality care; measuring quality in terms of the structure-process-outcomes model; distinguishing between clinical and customer service quality; identifying techniques to avoid adverse clinical events; and exploring customer service quality in terms of defining, measuring, and improving patient satisfaction. Students also explore and discuss the roles of governmental agencies in promoting and reporting quality information regarding hospitals and other health organizations, accrediting bodies, and recent performance initiatives of government and private payers. They apply course concepts to current issues of improving clinical and service quality in healthcare organizations, with special consideration of the 5 Million Lives Campaign—a national effort initiated by the Institute for Healthcare Improvement designed to improve medical care in the United States.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMHA 6265 - Health Informatics and Technology♦**

(3 sem. cr.)
There is an increasing need for improvement in the quality of patient care and healthcare management practices, which organizations can now address through the use of information systems and information technology. Through the review of traditional and topical resources, students in this course learn how integrated, computer-based information systems can enable the assessment and documentation of costs and quality. They also learn how these systems can inform decisions that improve care, allow for better management of medical records, enhance supply inventory and management, and improve vendor contracting and management. Students engage in weekly discussions
and assignments designed to provide practical applications of content, focusing on electronic medical records and computerized physician order entry, linked information systems across episodes of care, integrated financial and clinical information systems, linkages among electronic information access systems, web-based systems for increasing consumer knowledge, confidentiality of information systems, organizational compliance, and data sets.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMHA 6280 - Strategic Planning and Implementation**

(3 sem. cr.)

Strategic planning, including aligning key activities with an organization’s mission and vision, often leads to a strong competitive position. Through this course, students gain an understanding of the importance and process of formulating, implementing, and evaluating a strategic plan. They examine the role of strategic planning in achieving organizational performance as well as the notion of planning as a cyclical process within the healthcare organization. Students also explore key concepts in strategic planning, including identifying the relationship of the plan to the organization’s mission, values, and vision; assessing the competition; identifying external influences and resources; forecasting trends in organizational performance; setting goals; selecting strategies; implementing marketing actions; identifying implications of the strategic plan on organizational finances and human resources; and evaluating the plan’s progress. Students apply course concepts, including strengths, weaknesses, opportunities, and threats (SWOT) analysis, as they research and develop components of a strategic plan for a specific healthcare organization.

**MMHA 6300 - Law, Ethics, and Policy in Healthcare Administration**

(5 cr.)

The rapidly evolving healthcare system presents the healthcare administrator with complex challenges and risks. Healthcare administrators must possess the skills needed to assess external and internal healthcare policies to influence organizational design and delivery of healthcare services. Students assess and discuss key policy initiatives from the diverse perspectives of policymakers, interest groups, and other stakeholders. In their coursework, students focus on required knowledge of laws and regulations developed by policymakers that impact the healthcare organizations, and students will review key laws that govern patient care delivery, employee relations, contracts, and fraud. Emphasis will be placed on legal and regulatory failure points that administrators must avoid in designing and implementing policies and practices within the healthcare organization. To help frame these concepts, students examine the ethical underpinnings and principles that healthcare organizations and administrators follow in the delivery of services to patients.

**Prerequisites**
• MMHA 6000

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMHA 6392 - The Language of Leadership

(5 cr.)
In today’s complex environment, leaders engaged in shaping public policy must know how to use the emotional as well as the intellectual power of language to motivate, inspire, and competently manage their organizations. In this course, students examine techniques, such as effective communication, used in dynamic leadership that affect conscious and unconscious influences on human behavior. Through discussions, group assignments, and individual projects, students apply theoretical and practical course content to demonstrate the necessary components for making effective human connections. Students also learn why stories, symbols, and metaphors are essential elements in the language of leadership.
Prerequisites
• MMHA 6999

MMHA 6400 - Healthcare Financial Management and Economics

(5 cr.)
In this course, students gain knowledge of economics principles such as cost, quality, and access as it relates to the healthcare world. The principles of healthcare financial management including accounting and finance are vitally important to the viability and ongoing operations of a healthcare business. Students have the opportunity to interpret and analyze the financial statements of a business, use and analyze financial ratios, utilize variance analysis, understand and implement operating and capital budgeting, and develop knowledge of the business planning process. Students create portions of a business/financial plan using these techniques and analyze the viability of their plan using accepted financial management tools.
Prerequisites
• MMHA 6200
• MMHA 6300

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMHA 6451 - Public Policy Analysis

(5 cr.)
Government officials, research programs, and NGOs are increasingly expected to make
better and more transparent use of evidence in producing viable policy options within highly complex policy environments that are heavily influenced by power and politics. Public policy analysis has been described as the art and craft of speaking truth to power (Wildavsky, 1987) in seeking ways to promote positive social change in these complex environments. Policy analysis within this context requires several distinct skill sets: an understanding of the policy context, technical knowledge and analytical tools to identify and apply evidence ethically and with professional judgment, an appreciation and engagement of the concerns and contributions of diverse stakeholders, and the ability to develop and communicate practical policy advice.

This course is framed around Bardach and Patashnik's eightfold path, which lays out a series of iterative, not necessarily sequential, steps to follow when analyzing a policy issue and uses design thinking to guide the process. Students examine key concepts of public policy analysis through evidence-based research to locate issues in relation to theory and current trends. This course provides project-based opportunities to practice and gain the skills and knowledge to use evidence to shape policy more effectively.

**Prerequisites**
- MMPA 6116 or HUMN 8000 or HUMN 6000 or HUMN 8001 or SOCW 8002 or SOCW 8002W or MMHA 6000 or MMHA 6000A or HLTH 8003A or HLTH 8003 or HLTH 8003E or HLTH 8003B or NURS 8003

**MMHA 6452 - Board Governance and Volunteer Management**

(5 cr.)
The success of nonprofit organizations (NPOs) is largely dependent on the effective management of program volunteers and board members—individuals who often serve as the lifeblood of NPOs. Students in this course explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation. They focus on methods that organizations use to create and maintain an effective Board of Directors to ensure that the board governs and guides the organization toward their mission. Students design a board development or volunteer management plan based on processes presented in the course and fundamental concepts acquired earlier in the program.

**Prerequisites**
- MMHA 6999

**MMHA 6475 - Program Planning, Implementation, and Evaluation**

(5 cr.)
Students in this course promote competency in strategic planning; program planning; and design, implementation, and evaluation. They receive an overview of public health program planning and development, as well as needs and assets assessment.
Students focus on the methods required to develop a strategic plan, linking it to implementing programs and evaluating their efficacy. Students discuss the administration and coordination of public health program interventions and activities, and they explore the variety of methods used to facilitate public health research (quantitative, qualitative, and/or mixed-methods) in practice settings.

Prerequisites

- MMHA 6999

**MMHA 6500 - Human Resource Management and Organizational Development and Leadership for Healthcare Administrators**

(5 cr.)

Students in this course examine organizational behavior as well as the roles and responsibilities of management and leadership within healthcare organizations through the macro (organization-wide) and micro (individual and team performance) perspectives. Students also focus on understanding organizational values, mission, and vision; management and leadership principles to help manage change; and effective delivery of services in an increasingly global environment. They also learn and apply theories of organizational design, governance, and alternative organizational structures, and they consider the theory and practice of managing individuals and groups through motivation, communication, teamwork, leadership, organizational change, coalition building, negotiation, and conflict management and resolution. Through group assignments and personal assessments, students work toward developing self-awareness and effective management styles and strategies.

Prerequisites

- MMHA 6200
- MMHA 6300

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMHA 6510 - Essentials of the U.S. Healthcare Delivery System and Population Health**

(5 cr.)

Students in this course will analyze health and the healthcare systems from a population health perspective. Emphasis includes the role of health education and health administration, workforce, public health foundations, and technological developments in improving health from local, national, and global perspectives. Various approaches used historically to improve population health and health equity in the United States will be explored. Current and emerging U.S. health transformation efforts, including steps to reduce cost and improve prevention strategies, and quality of care will be considered. Students will also consider the provider, payment, and public health perspectives in
improving health outcomes and explore various perspectives and trends such as international settings and lessons currently being taken from these settings and developments in the use of technology. Investigation and analysis of the coordination among various stakeholders who play a role in prevention, health, and healthcare systems will be addressed.

**MMHA 6520 - Health Informatics and Population Health Analytics**

(5 cr.)
Students in this course explore health informatics strategies to enhance and promote population health initiatives, new forms of data to be used to measure healthcare delivery, and improve patient outcomes. In this introductory course, participants explore the value propositions for population health clinical integration and the role of analytics, big data, and predictive medicine in supporting a data-driven population health-driven healthcare system.

**Prerequisites**
- MMHA 6200
- MMHA 6999

**MMHA 6530 - Disease Prevention and Care Management**

(5 cr.)
Students in this course explore evidence-based population health programs and how they assist in addressing and promoting best practices in disease and preventive care management. In this course, students will learn how population health interventions teach individuals and populations how to manage chronic diseases and take responsibility for understanding how to best care for themselves. Students will also explore health administrator and health educator leadership strategies and interventions to manage and prevent chronic disease.

**Prerequisites**
- MMHA 6200
- MMHA 6999

**MMHA 6540 - Population Health Management Applications**

(5 cr.)
Students in this course will apply the skills needed to manage population health programs and initiatives to enhance the health of a defined population. Students focus on health behaviors, public and business influences, health policy, economic forces, and other related healthcare system issues in health promotion and disease prevention.

**Prerequisites**
- MMHA 6200
MMHA 6999

MMHA 6550 - Practicum

(3 sem. cr.)
Students in the practicum have the opportunity to apply and integrate the knowledge and skills acquired throughout the MHA program and to further develop key professional competencies. Students engage in a field experience in a select public health setting, which they align to their academic and professional goals. Supervision by an on-site preceptor is a critical component of the practicum. The on-site supervisor and the course instructor monitor and evaluate students’ performance throughout the entire practicum experience. Students are required to complete 120 hours of practicum work. They must also participate in an accompanying online course and begin to develop an ePortfolio based on assigned professional development activities.

MMHA 6560 - Capstone

(3 sem. cr.)
This capstone course is the continuation of the practicum. The capstone experience is an opportunity for students to demonstrate their mastery of principles, concepts, and content presented throughout the program and through their practicum field experience. In this course, students complete their ePortfolio based on their field experience, and they develop a substantive written paper or project. Students also engage in group discussions during which they consider career development plans, reflect on the promotion of social change, and exchange feedback on final portfolio work and lessons learned.

MMHA 6600 - Healthcare Informatics and Technology Management♦

(5 cr.)
Students in this course have the opportunity to learn how sustainable health information technologies and applications inform organizational strategies and transformation in the healthcare environment. They can also learn how these complex systems help organizational decision makers to improve patient care outcomes and organizational behaviors. Topics include evolving technologies such as data analytics, eHealth, and social media; using technology applications to manage population health; and personalized medicine. Students are challenged by scenario-based discussions that analyze best information technology practices across multiple industries.
Prerequisites
- MMHA 6400
- MMHA 6500

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
MMHA 6699 - Strategic Planning in Healthcare Administration

(5 cr.)
Through this course, students gain an understanding of the importance and process of formulating, implementing, and evaluating a strategic plan. They examine the role of strategic planning in achieving organizational performance as well as the notion of planning as a cyclical process within the healthcare organization. Students also explore key concepts in strategic planning, including identifying the relationship of the plan to the organization’s mission, values, and vision; assessing the competition; identifying external influences and resources; forecasting trends in organizational performance; setting goals; selecting strategies; implementing marketing actions; identifying implications of the strategic plan on organizational finances and human resources; and evaluating the plan’s progress. Students apply course concepts, including strengths, weaknesses, opportunities, and threats (SWOT) analysis, as they research and develop components of a strategic plan for a specific healthcare organization.

MMHA 6700 - Healthcare Operations Management♦

(5 cr.)
In this course, students examine the factors that affect performance outcomes within healthcare organizations; methods to monitor, adjust, and improve performance; and techniques and tools of quantitative analysis of operations and decision support that assist in management of capacity issues, reengineering, staffing, scheduling, productivity, and supply chain. Other important concepts that students examine include understanding operational assessment; understanding patient care and related support-care processes through creating flowcharts of steps in the process; taking a systems perspective on the organization and delivery of services; identifying problems and improvement opportunities using analytical techniques; and monitoring performance data to identify trends and variation based on current operations and those resulting from changes and improvements.

Prerequisites
- MMHA 6400
- MMHA 6500

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMHA 6800 - Marketing Management and Business Communication for Healthcare Administrators♦
Students in this course apply principles, theories, and relevant contemporary concepts of healthcare marketing. They evaluate the effectiveness of healthcare marketing tools, such as advertisement campaigns and social media, develop data collection tools for marketing research, and create a marketing plan for a healthcare organization. The interrelationship of a healthcare organization’s strategic plan, business plan, marketing plan, and healthcare consumerism is analyzed. Students will apply best practices of business communications as they practice effective oral and written business communication skills.

**Prerequisites**

- MMHA 6600
- MMHA 6700

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMHA 6880 - Social Entrepreneurship and Innovation: A Global Perspective**

(5 cr.)

Social entrepreneurs are gaining international attention motivated by the desire for change and to see the world as it can be, not as it is. Students in the course will learn how social entrepreneurs have developed creative solutions to address social problems. The intention of the course is to develop knowledge, appreciate of the role of social entrepreneurs who create social change, deepen students' understanding of the world around them, and to inspire them to use their skills and knowledge to be, as Gandhi said, "the change you wish to see in the world."

Students in this course will gain knowledge about social entrepreneurs and how they are creating solutions to address societal problems, learn how to develop creative solutions to address social problems, and empower students to see social entrepreneurship as a force for social change. The course is designed for those who want to gain valuable tools to prepare them to make an impact on the lives of others. This course will be housed in the School of Public Policy and Administration for future upgrades and course maintenance.

**Prerequisites**

- MMHA 6999

**MMHA 6881 - Grant Writing**

(5 cr.)

Grant writing is a highly marketable skill that requires many nonprofit, educational, and community organizations to secure external funding in order to provide needed services to the community. In this course, students will explore the basic skills needed for grant
writing including identifying potential funding sources, creating objectives and a needs statement, preparing and justifying a budget, identifying appropriate assessment plans, and writing an executive summary. Course assignments will allow students to directly apply what they are reading and discussing by writing a full grant proposal based on an actual Request for Proposal (RFP).

Prerequisites

- MMHA 6999

**MMHA 6882 - Improving Healthcare Performance Through Social Entrepreneurship**

(5 cr.)

Social entrepreneurship is a dynamic approach to problem solving that individuals, entrepreneurs, or scholar-practitioners can use to address societal needs and problems related to healthcare. In this course, students select a healthcare issue and develop an entrepreneurial project to address it. Students will define beneficiaries and stakeholders and develop tactics to identify and address opponents, allies, and the ambivalent. Students will test, evaluate, and identify both opportunities and potential weaknesses of their proposed entrepreneurial solutions. By the end of the course, students will have experienced the process of developing concept statements supported by research, articulating business propositions, defining the market and competition, and addressing the sociopolitical landscape. Finally, students will evaluate the feasibility of their proposed entrepreneurial healthcare solutions.

Prerequisites

- MMHA 6999

**MMHA 6900 - Healthcare Quality Management**

(5 cr.)

Students in this course are introduced to the basis for quality and patient safety and are provided an overview of healthcare quality, methods of assessing quality, and techniques for improving quality. They can learn key terminology and concepts, including defining quality care; measuring quality in terms of the structure-process-outcomes model; distinguishing between clinical and customer service quality; identifying techniques to avoid adverse clinical events; and exploring customer service quality in terms of defining, measuring, and improving patient satisfaction. Students also explore and discuss the roles of governmental agencies in promoting and reporting quality information regarding hospitals and other health organizations, accrediting bodies, and recent performance initiatives of government and private payers. They apply course concepts to current issues of improving clinical and service quality in healthcare organizations, with special consideration of the 5 Million Lives Campaign—a national effort initiated by the Institute
for Healthcare Improvement designed to improve medical care in the United States.

Prerequisites
- MMHA 6600
- MMHA 6700

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMHA 6999 - Strategic Planning in Healthcare Administration

(5 cr.)
Throughout this course, students review and apply the phases of strategic planning, integrating the principles and practices presented throughout the Master of Healthcare Administration program. They examine the role of strategic planning in achieving organizational performance excellence, as well as the notion of planning as a cyclical process within the healthcare organization. Students submit a comprehensive strategic plan and recommend courses of action that help healthcare organizations address their strategic and tactical needs and the needs of their communities.

Prerequisites
- MMHA 6400
- MMHA 6900

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 5200 - Principles of Public Administration

(5 cr.)
Public administrators work to increase the efficacy of public organizations on a local, regional, national, and international level. In this course, students actively collaborate on a team final project that facilitates their use of real-world tools, technologies, and communication formats needed in the profession of public administration. They engage in hands-on practice to enhance their aptitude in professional skills (e.g., research, critical reasoning, creative and flexible problem-solving, technology, responsible leadership, intercultural awareness, negotiation/conflict resolution, and collaboration). They explore the diverse political, social, and economic contexts within which public administrators carry out their responsibilities. Spring boarding from the American democratic model, students examine emerging topics and trends in global public administration, including governance, fiscal issues, ethics, and positive social change. They also examine the history, foundations, and theories of public administration as well as public policy and organizational environments.

Prerequisites
- HMNT 1001
MMPA 5405 - Ethics and Social Justice

(5 cr.)
Ethics is a fundamental element of leadership. In this course, students consider some of the leading philosophical bases of ethics as well as foundational social justice themes upon which public service rests. The course uses seminal texts and case studies to illuminate the tasks leaders face as they seek to serve diverse constituents. Students confront the challenge of ethical decision making and moral action in a world characterized (among other things) by economic disparity, power imbalances, social privilege, and division due to race and/or religion. Applying concepts presented in the course, students engage in an in-depth assessment of emerging or persistent ethical and social justice issues, with the objective of demonstrating an ability to make recommendations which lead to positive social change.

MMPA 5420 - Organizational Management and Leadership

(5 cr.)
Public and nonprofit leaders require a deep understanding of their roles as leaders and managers of diverse and complex organizations. Students in this course examine the distinction between leadership and management, organizational culture, change management, systems theories, and organizational development from theoretical and applied perspectives. Students apply principles to public, private, and nonprofit organizational settings.

MMPA 5431 - Finance and Budgeting for the Public Sector

(5 cr.)
Sound financial practices are crucial to managing scarce funds in both public and nonprofit operations. Students in this course examine finance and budgeting concepts, policies, and practices related to organizations as well as the fiscal climate within which they operate. They assess theories for motivating major fiscal-policy debates, and they explore and discuss auditing practices, tax systems, financial management, budgetary reform, financial technology systems, the use of dashboards for financial reporting, and the impact of globalization on finance and budget. Students read and analyze budgets, financial statements, and reports. They contextualize their learning as they apply knowledge gained from their analysis to develop a new budget and financial plan for either a public or private organization.

MMPA 5435 - Human Resource Management: Building a Capable Workforce

(5 cr.)
The acquisition, development, and retention of talent are critical elements in the success
of any organization. In this course, students examine theories, approaches, and systems related to hiring, managing, training, and retaining employees in government and nonprofit organizations. Through the use of case studies, students explore topics that include legal and ethical considerations, diversity, performance management, the establishment and implementation of policy, technology, and conflict management. Students apply principles and concepts learned in this course to real-world situations encountered in public, private, and nonprofit organizations.

**MMPA 5451 - Public Policy Analysis**

(5 cr.)

Contemporary public administrators work in a dynamic, partisan environment with unprecedented access to public policy data—conditions leading to extraordinary opportunities and, often times, severe constraints. Students in this course thoroughly examine key stakeholders involved in the public policy process and devote special attention to their function, impact, and constraint on policy development. In addition, students explore professional ethics related to the role of the policy analyst and consider the significant social outcomes of public policy. They examine the theories and strategies used by policy makers and policy analysts to develop, implement, execute, evaluate, and promulgate public policy. They also assess the impact and consequences of public policy and evaluate it though a social justice framework. Using critical-thinking and communication skills, students craft a policy memorandum regarding a current public policy problem, for which they consider and evaluate competing policy alternatives.

**MMPA 5480 - Applied Research and Evaluation Methods**

(5 cr.)

Organizational credibility, community trust, and fundraising are increasingly dependent upon demonstration of program effectiveness and success. Students in this course are introduced to research and evaluation methods in the public and nonprofit sectors to learn ways to measure and assess a program’s effectiveness and potential success as well as to address problems or issues in the field. Students examine the strengths, limitations, and threats to validity; models, quantitative metrics, and tools used to evaluate programs and policies; and legal and ethical issues associated with research and evaluation methods. Using these parameters and other concepts presented in the course, students critically evaluate sample research, consider ways to communicate results to an intended audience, and reflect on trends and challenges that could affect future program evaluation.

**MMPA 6101 - Critical Issues in Emergency Management**

(5 cr.)

Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-
caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6115 - Foundations for Graduate Study

(3 cr.)
To promote strategies for academic success, course instructors explain the requirements for successful participation in an online curriculum and the rules of academic integrity. They help students explore the resources available at the Walden University Library, the Writing Center, and other Walden services. By gaining practice in scholarly writing and critical thinking through course discussions and assignments, students have the opportunity to relate Walden's mission and vision to their professional goals and build a foundation for future success as scholar-practitioners.

MMPA 6116 - Foundations of Graduate Study

(3 cr.)
This course introduces students to graduate-level expectations and protocols for scholarly research and academic writing. Reflecting Walden's mission and vision of promoting positive social change, this course helps students build a foundation for success as scholar-practitioners and social change agents. Course assignments focus upon students' professional goals, strategies for online student success, research skills, and academic integrity. Assignments are designed to build critical thinking skills and provide opportunities to apply academic lessons to real-world practice. Students are encouraged to take advantage of Walden's wealth of student support systems, especially the Walden Library and the Writing Center.

MMPA 6137 - The Nature of Crime and Criminology

(5 cr.)
Students in this course are introduced to contemporary views and theories of maladaptive and criminal behavior. They examine a broad conceptualization of criminal behavior from an interdisciplinary perspective as well as theories and application of
criminal profiling. Students also explore specific views of criminal behavior germane to
groups, such as psychopaths, serial offenders, and sexually violent predators. At the end
of this course, students will have an understanding of the theories and practices that are
the foundations of the field of criminology.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

MMPA 6200 - Principles of Public Administration♦

(5 cr.)
Public administrators work to increase the efficacy of public organizations on a local,
regional, national, and international level. In this course, students actively collaborate on
a team final project that facilitates their use of real-world tools, technologies, and
communication formats needed in the profession of public administration. They engage
in hands-on practice to enhance their aptitude in professional skills (e.g., research,
critical reasoning, creative and flexible problem-solving, technology, responsible
leadership, intercultural awareness, negotiation/conflict resolution, and collaboration).
They explore the diverse political, social, and economic contexts within which public
administrators carry out their responsibilities. Spring boarding from the American
democratic model, students examine emerging topics and trends in global public
administration, including governance, fiscal issues, ethics, and positive social change.
They also examine the history, foundations, and theories of public administration as well
as public policy and organizational environments.
Prerequisites
  • MMPA 6116

Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

MMPA 6201 - Risk Assessment, Preparedness, and Disaster Mitigation♦

(5 cr.)
Risk assessment and mitigation are key components to effective emergency management
and all-hazard planning and response. Students in this course focus on the methods and
techniques required to assess an organization or government's risk associated with the
protection of human life and capital assets. They study ways to evaluate the social
vulnerabilities to disaster and the special needs of at-risk populations, and they explore
methods to reduce vulnerabilities and build capacity through structural and
nonstructural mitigation. Additionally, students complete the FEMA Emergency
Management Institute course IS-393.a: Introduction to Hazard Mitigation as part of this
course.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.
MMPA 6215 - Controversies in Criminal Justice♦

(5 cr.)
Justice is at the heart of the U.S. democratic system, yet opposing viewpoints surrounding and within the system often muddle interpretations of the law and the development of policies to promote and enforce justice. In this course, students examine events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act, for example, the terrorist acts of September 11, 2001. They learn how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties. Through discussion with peers, assessment of contemporary articles, and examination of Supreme Court cases, students have the opportunity to reflect on and potentially broaden their own opinions and perspectives on current criminal justice affairs in regard to issues of law enforcement, public perception, policy development, and ethics.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6217 - Technological Solutions and 21st-Century Crime♦

(5 cr.)
In consideration of modern technological innovation and the spread of knowledge through digital means, the relationship between technology and criminal activity is increasing. In this course, students explore this relationship and gain a comprehensive view of cyber crime, including current trends. They learn how law enforcement agencies use technology to track and apprehend criminals. Through real-world scenarios, students examine legal responses to cyber crime and learn different approaches and techniques for solving cyber crimes and handling related challenges. Students also have the opportunity to gain a comprehensive understanding of building cases and prosecuting crimes through practical exercises in identification, data mining, and the protection and gathering of evidence.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6301 - Disaster Response and Recovery♦

(5 cr.)
A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issues, including evacuation, relocation, and tactical and strategic decisions in the immediate aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework (NRF), and they can gain an understanding of how local, state, and federal policies mesh in response
and recovery efforts. Through their exploration, they study how recovery begins once the immediate threat of the emergency wanes and the focus shifts to restoring disaster-affected areas. As part of this course, students complete the FEMA Emergency Management Institute course IS208.a: State Disaster Management.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6320 - Public Policy Implications of Terrorism Legislation and Policies

(5 cr.)
Students in this course are provided with the opportunity to develop a broad perspective on the history of the U.S. Patriot Act, terrorist legislation and immigration laws, and their policy implications on law enforcement, governmental entities, organizations, and individuals. Students gain a foundation to build the skills that public administrators and public policy analysts use to draft and implement public policy and enforce and/or respond to potential terrorist threats while simultaneously upholding and protecting constitutional freedoms. Students examine topics through a wide variety of resources, including contemporary texts, websites, case studies, and material representing international, national, and local governments and organizations. They critically review and analyze the U.S. Patriot Act and similar terrorist legislation and policies, and they participate in discussions about these laws and their implications on U.S. constitutional freedoms.

MMPA 6321 - Terrorism: A Systemic Approach for Emergency Preparedness

(4 cr.)
Terrorism continues to be a constant threat to the American public, facilitating the need for accurate information, organized resources, and established approaches to respond to emergencies and keep the public informed. Students in this course examine terrorism and related public policy on a local, national, and international level. They also assess the need and function of systemic approaches for emergency preparedness. Students explore and discuss topical issues, such as terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Using analytic skills and tools, students assess recommendations that policy makers use in decisions to prevent or respond to terrorism. They also gain hands-on experience initiating the development and/or analysis of a terrorism-preparedness infrastructure.

MMPA 6333 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness

(5 cr.)
Professionals in all areas of public policy and administration work with individuals and organizations of different cultures on a daily basis; therefore, global consciousness is vital
to effective communication and interaction in the field. In this course, students explore and analyze the cultural values and styles of communication, reasoning, and leadership unique to their home culture. Students apply these concepts to better understand the people, values, and policies of other cultures. They also identify and become familiar with challenges that American nonprofit organizations face as they work internationally or cross-culturally within the United States.

**Prerequisites**
- A course or direct experience in nonprofit management is strongly advised.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMPA 6334 - Crossing Borders: U.S. and International NGO Cultures and Environments♦**

(5 cr.)
In this course, students study in depth the cultures, structures, and activities of NGOs in select countries and compare their activities, organizational cultures, structures, and working environments with nonprofits in the United States.

**Prerequisites**
- A course or direct experience in nonprofit management is strongly advised.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMPA 6335 - Placing NGOs in the Global Context♦**

(5 cr.)
Students in this course acquire knowledge and understanding about the geopolitical and economic contexts in which international, nongovernmental (NGO), and voluntary agencies function in other countries. Students analyze the historical, political, social, and cultural contexts in which NGOs work and the implications these contexts have on the work of local and international NGOs. Students identify strategies that make the international and cross-cultural efforts of NGOs successful.

**Prerequisites**
- A course or direct experience in nonprofit management is strongly encouraged.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMPA 6346 - Terrorism: A Systemic Approach for Emergency Preparedness♦**

(5 cr.)
Students in this course receive an overview of terrorism—local, national, and
international—and the need to develop a systemic approach for emergency preparedness. Topics include, but are not limited to, terrorism overview, terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Course participants begin the development and/or analysis of a terrorism preparedness infrastructure and participate in online discussions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6347 - Critical Incident Planning and Leadership

(5 cr.)
Students in this course examine the principles of emergency planning, selection of leaders, specialized planning (e.g., schools, tourism), mutual aid, and leadership theories. They receive a basic foundation for public administrators to develop a critical incident plan and also understand leadership theories. Course participants critically analyze case studies, identifying weaknesses and potential solutions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6380 - Policy and Politics in American Political Institutions

(5 cr.)
Students in this course are introduced to the crafts of policymaking and policy analysis in the U.S. democratic system. Students examine the tasks involved in the policy process, including setting agendas, using policy analysis tools, managing the political process, implementing policy, and providing evaluations and feedback. Through this analysis, students work toward developing skills to conduct policy and economic analyses as well as to determine the political feasibility of proposed policies. They learn about regulation as a policy choice. They also work toward enhancing their ability to develop alternatives and to assess strategies proposed to achieve certain policy objectives. Students engage in scholarly writing assignments and discussions on policy areas of interest, such as communications, immigration, transportation, housing, labor, arts, and environmental policies.

MMPA 6381 - Public Policy and Evaluation

(5 cr.)
There are a variety of tools available to policymakers and policy analysts to evaluate the impact of social programs. In this course, students examine these tools and work toward gaining the skills needed to develop plans for evaluation and to assess social programs effectively. Students engage in discussions and assignments designed to provide practical application of content on a variety of topics, such as selecting programs.
to evaluate, crafting program descriptions, identifying stakeholders and their interests, developing logic models, framing evaluation questions, applying utilization-focused evaluation techniques, using quantitative and qualitative tools to complete formative and summative evaluations, and providing evaluation reports and feedback to decision makers. Using concepts presented in the course, students gain hands-on experience developing an evaluation design for a social program.

**MMPA 6382 - Public Policy and Finance**

(5 cr.)

Public policymakers often rely on microeconomic and macroeconomic models to formulate new policies and re-evaluate existing polices. In this course, students examine the use of such models in the public policy setting and assess how public finance influences policy choices as well as implementation alternatives. Through weekly, analytical writing assignments and peer discussions, students explore tax policies and tax incentive models; budgeting, public/private models; market influences on policy; the impact of government expenditures on income redistribution; and economic considerations of welfare; food stamps, workers’ compensation, Social Security, and outsourcing of public programs. Synthesizing course content and applying critical-thinking skills, students assess a local government jurisdiction, examine the decisions of policy makers, and recommend improvements based on economic models.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMPA 6390 - Strategic Context of Public Management and Leadership**

(5 cr.)

Students in this course engage in a collaborative study of the changing strategic context of public administration. Students apply a systems perspective to construct a public enterprise “mental” model of a public organization to understand the strategic context for practical action and the stakeholder relations involved. Students demonstrate their knowledge of the interrelated flows of money, knowledge, and influence, as they weave these elements in their model. They engage in readings and practical assignments that emphasize management and leadership in a time of unprecedented and unpredictable change. Students also work toward developing professional-action habits for pragmatic-action learning in the practice of public administration.

**MMPA 6391 - Transformative Change in a Shared-Power World**

(5 cr.)

Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the
dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

**MMPA 6392 - The Language of Leadership**

(5 cr.)
In today’s complex environment, leaders engaged in shaping public policy and programs must know how to use the emotional and intellectual power of language to motivate, inspire, and competently manage their organizations. In this course, students examine dynamic leadership techniques, such as effective communication, that effect conscious and unconscious influences on human behavior. Through discussions, group assignments, and individual projects, students apply theoretical and practical course content to demonstrate the necessary components for making effective human connections. Students also learn why stories, symbols, and metaphors are essential elements in the language of leadership.

**MMPA 6400 - Public Health Leadership and Systems Thinking♦**

(5 cr.)
In this course, students explore leadership models and theories, the core principles of public health leadership, and the application of systems thinking to public health. They examine how to create strategies and solutions that efficiently utilize public health and healthcare resources. Students also discuss descriptive and prescriptive systems, focusing on the application of these processes to current public health issues and challenges at the organizational and community levels.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMPA 6405 - Ethics and Social Justice♦**

(5 cr.)
Ethics is a fundamental element of leadership. In this course, students consider some of the leading philosophical bases of ethics as well as foundational social justice themes upon which public service rests. The course uses seminal texts and case studies to illuminate the tasks leaders face as they seek to serve diverse constituents. Students confront the challenge of ethical decision making and moral action in a world characterized (among other things) by economic disparity, power imbalances, social privilege, and division due to race and/or religion. Applying concepts presented in the course, students engage in an in-depth assessment of emerging or persistent ethical and social justice issues, with the objective of demonstrating an ability to make
recommendations which lead to positive social change.

Prerequisites
- MMPA 6116, NPMG 6116, PPPA 8000, PPPA 8000i, MMPA 6200, NPMG 6200, CRJS 6000, CRJH 6002, HUMN 8000, or HLTH 8003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6420 - Organizational Management and Leadership*

*(5 cr.)*
Public and nonprofit leaders in all areas of public administration require a thorough understanding of the expectations of their roles as leaders and managers of diverse and complex organizations. Students use theoretical and applied perspectives from which they study the intricacies of these roles, including the distinction between leadership and management, organizational culture, change management, systems theories, and organizational development. Students gain a practical understanding of these topics through the application of principles and concepts to public, private, and nonprofit organizational settings.

Prerequisites
- MMPA 6200
- MMPA 6405

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6421 - Health Economics*

*(5 cr.)*
Students in this course examine the application of economic principles to healthcare managerial decision making regarding the amount, structure, and distribution of healthcare resources and services. Because of the complexity and uncertainty of the healthcare system as well as the scope of resources consumed by health and health-related organizations, managers must appreciate the economic implications of decisions regarding allocation of resources. Students advance their knowledge of economic principles as reflected in the population demand for health; the demand for healthcare and medical care; the supply of health organizations and practitioners; the role of insurance, moral hazard, and adverse selection; the practice of cost-shifting; the structure, competitive nature, and dynamics of markets; differing objectives of for-profit and nonprofit organizations; variation in consumer access to and utilization of services; roles of uncertainty and information asymmetry; strategies for consumer cost-sharing; and the challenges healthcare organizations face in the pricing, production, allocation, and distribution of health and medical services. Special attention is devoted to
understanding how health services differ in a variety of competitive markets.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6431 - Finance and Budgeting for the Public Sector♦

(5 cr.)
Sound financial practices are crucial to managing scarce funds and making decisions in government and nonprofit organizations. Although the term "public" is synonymous with government, this course also includes nonprofit organizations because they serve a public interest. The course provides students an overview of budgeting and financial management processes in the government and nonprofit sectors from a management perspective. Students examine finance and budgeting concepts, policies, tools, and practices related to public and nonprofit organizations as well as the fiscal climate within which they operate. In addition to reading and analyzing budgets, financial statements, and reports, students also examine issues of equity, transparency, ethics, accountability, and positive social change involved in managing public finances. They develop quantitative and communication skills related to interpreting and presenting information about the financial position and performance of public and nonprofit organizations and contextualize their learning as they examine and apply budgeting tools and skills to real-world scenarios.

Prerequisites
- MMPA 6200
- MMPA 6405

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6435 - Human Resource Management: Building a Capable Workforce♦

(5 cr.)
The acquisition, development, and retention of talent are critical elements in the success of any organization. In this course, students examine theories, approaches, and systems related to hiring, managing, training, and retaining employees in government and nonprofit organizations. Through the use of case studies, students explore topics that include legal and ethical considerations, diversity, performance management, the establishment and implementation of policy, technology, and conflict management. Students apply principles and concepts learned in this course to real-world situations encountered in public, private, and nonprofit organizations.

Prerequisites
- MMPA 6420

Students may take this as a non-degree course, which means they do not have to be enrolled in a
MMPA 6441 - Human Resources Management and Strategic Planning

(5 cr.)
In the public and nonprofit sectors, human resource management and strategic planning are often driven by legislative mandates, delineated by codified requirements, and defined by the challenges of managing a diverse workforce. In this course, students learn about the fundamentals of managing human resources in the public and nonprofit sectors, including how jobs are classified in the public sector and how the volunteer workforce is managed in the nonprofit sector. In addition, students learn how strategic planning in this context is differentiated by the fact that there is no profit motive driving strategic management, vision and mission development, and organizational leadership in the public and nonprofit sectors.

Prerequisites
- MMPA 6116
- MMPA 6200

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6451 - Public Policy Analysis

(5 cr.)
Government officials, research programs, and NGOs are increasingly expected to make better and more transparent use of evidence in producing viable policy options within highly complex policy environments that are heavily influenced by power and politics. Policy analysis requires several distinct skill sets: an understanding of the policy context, technical knowledge and analytical tools to identify and apply evidence ethically and with professional judgment, appreciation and engagement with the concerns and contributions of diverse stakeholders, and the ability to develop and communicate practical policy advice.

This course is framed around Bardach and Patashnik’s eightfold path, which lays out steps to follow when analyzing a policy issue and uses design thinking to guide the process. Students examine key concepts of public policy analysis through evidence-based research to locate issues in relation to theory and current trends. This course provides project-based opportunities to practice and gain the skills and knowledge to use evidence to shape policy more effectively.

Prerequisites
- MMPA 6116 or HUMN 8000 or HUMN 6000 or HUMN 8001 or SOCW 8002 or SOCW 8002W or MMHA 6000 or MMHA 6000A or HLTH 8003A or HLTH 8003 or HLTH 8003E or HLTH 8003B or NURS 8003
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination♦

(5 cr.)
In an increasingly complex world, leaders and managers in public and nonprofit organizations plan strategies to fulfill the organizational mission and enhance stakeholder satisfaction. Students in this course explore the role and process of strategic planning, including collaboration, cooperation, and coordination. They also examine the benefits, challenges, and pitfalls of strategic planning, in addition to the impact of globalization. Students apply these concepts to real-life scenarios and develop a strategic plan for a nonprofit or public organization.

Prerequisites
- MMPA 6200
- MMPA 6405

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6480 - Applied Research and Evaluation Methods♦

(5 cr.)
Organizational credibility, community trust, and fundraising are increasingly dependent upon demonstration of program effectiveness and success. Students in this course are introduced to research and evaluation methods in the public and nonprofit sectors to learn ways to measure and assess a program’s effectiveness and potential success as well as to address problems or issues in the field. Students examine the strengths, limitations, and threats to validity; models, quantitative metrics, and tools used to evaluate programs and policies; and legal and ethical issues associated with research and evaluation methods. Using these parameters and other concepts presented in the course, students critically evaluate sample research, consider ways to communicate results to an intended audience, and reflect on trends and challenges that could affect future program evaluation.

Prerequisites
- MMPA 6200
- MMPA 6405

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6540 - Management and Leadership in a Global Context
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships among strategic planning, management, and leadership from an international perspective. Students connect three key institutional elements: “thinking-acting-leading” strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

MMPA 6541 - Sustainable Development for Global Communities

Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

MMPA 6542 - Transformative Change in a Shared-Power World

Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

MMPA 6701 - Diversity, Human Rights, and Social Justice
MMPA 6702 - Race, Gender, and Public Policy

(5 cr.)
[Under development]
Prerequisites
- MMPA 6116
- MMPA 6200

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6740 - Disaster, Crisis, and Trauma

(5 cr.)
There is no shortage of natural and human-made disasters, such as war, violence, genocide, and terrorist activities. Individuals and communities impacted by such disasters often need assistance from professionals who understand the social, cultural, and psychological complexities of crisis and trauma. Students in this course investigate how these incidents impact the psychology of individuals and groups. They assess traditional and current literature and complete practical exercises to learn about theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with trauma. Considering the various ways crisis professionals can promote positive social change, students devote special attention to the importance and development of culturally appropriate, service-delivery programs and interventions for individuals affected and traumatized by disasters.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6741 - Psychology of Terrorism

(5 cr.)
Students in this course explore terrorism from a psychological perspective. Topics include types of terrorism; contributing factors related to the development of terrorists and terrorist organizations; counterterrorism agencies, laws, and regulations; the impact of terrorist events on individuals, families, and communities; prevention, intervention, and postvention with survivors; media coverage of terrorist events; human rights and
ethical issues; and future trends related to the psychology of terrorism. Students examine the threat of terrorism in their own community; evaluate the potential impact; and apply prevention, intervention, and postvention strategies to promote resiliency among individual and families within the community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPA 6810 - Fundamentals of Law and Public Policy

(5 cr.)
Legal decisions and the law often have a major impact on the creation of public policy. In this course, students explore and discuss the relationship between laws and public policy and the impact that court decisions have on policy and policy leaders. They examine the role of administrative agencies in the creation and execution of law and public policy and the role of the courts in resolving challenges to agency rule making; conflicts between executive and legislative branches of government; and conflicts between and among federal, state, and local laws. Students have the opportunity to sharpen their critical-thinking and research-database skills as they search for real-world examples of how fundamental legal concepts and processes affect the creation and execution of law and public policy.

MMPA 6811 - Legal Research for Policy Practitioners

(5 cr.)
There is a wealth of vital legal knowledge available to public policy practitioners. In this course, students explore the many print and electronic resources available for legal research. Students examine how practitioners use the law to inform the creation of public policy. They engage in assignments designed to provide practical application of content to learn how to navigate legal libraries, cite cases, and employ research to support public policy. Students also gain experience in applying legal research to case studies and contemporary issues.

MMPA 6812 - Contemporary Cases and Issues in the Courts

(5 cr.)
Major issues in the Supreme Court continue to have an impact on public policy at the state and local levels. In this course, students examine major past and current U.S. Supreme Court cases related to abortion, privacy, due process, personal property, and freedom of religion and speech. They also examine major cases related to state powers, government entitlement, and powers of the judicial and federal branches of government. From this assessment, students determine how outcomes of such cases affect public policy. Students also explore and discuss individual rights, property rights, administrative law, immigration law, and foreign policy as well as contemporary issues and case studies, to which they apply legal research and verdicts.
MMPA 6820 - Elements of Sustainable and Livable Communities

(5 cr.)
Creating and maintaining sustainable and livable communities require leaders who understand the connections among the natural, built, and social environments, and who can address these connections in a holistic and integrated fashion. Students in this course examine concepts of sustainability and livability and explore popular approaches to creating and maintaining communities that are more environmentally sound, economically prosperous, and socially equitable. They also focus on strategies to halt urban sprawl and to promote alternative modes of transportation. Students define and explore these concepts through case studies and examples drawn from local communities.

MMPA 6821 - Tools for Sustainable Community Development

(5 cr.)
Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

MMPA 6822 - Current Issues in Regional and Local Public Policy

(5 cr.)
Public decision makers must understand and address a variety of complex and interrelated issues, such as land use and transportation, energy and environment, housing and schools, and regional economic development. In this course, students learn how leaders attend to these issues in light of existing policies and contemporary social, economic, political, demographic, and technological trends. Students explore and discuss planning processes, tools, approaches, strategies, and policies used to create sustainable and livable communities through collaborative processes involving multiple stakeholders. Through the development of a policy-option written assignment, students assess critical issues and identify problem-solving strategies.

MMPA 6830 - Current Issues in Homeland Security

(5 cr.)
Since its inception, the Department of Homeland Security has profoundly impacted public policy and administration. Students are provided with an in-depth analysis of
homeland security, including history, concepts, policies, and strategies of prevention and response. Students examine and discuss current, relevant topics, including ethical issues, telecommunications, technology, threat assessment, contingency planning, and risk management. Students hone their critical-thinking and analytic skills through the application of fundamental concepts and principles of homeland security to case studies and current issues.

**MMPA 6831 - Critical Incident Leadership and Planning**

(5 cr.)
Strategic leadership and planning are required to effectively prevent, respond to, and recover from critical incidents that threaten homeland security. Students in this course explore the role and importance of leadership and planning in critical incident management and the application of tools, strategies, and systems to specific critical incidents. Through the evaluation of case studies, students examine the impact of critical incidents on individuals and communities as well as roles of government agencies and nongovernment organizations in managing such incidents. Using concepts and theories presented in the course, students develop a critical incident management plan for their community through which they consider new strategies and perspectives in regard to critical incident leadership and planning.

**MMPA 6832 - Terrorism: Legislation and Policy**

(5 cr.)
The events of September 11, 2001, resulted in a new and intense focus on the issue of terrorism in the United States and abroad. Through traditional literature and a wealth of contemporary journal articles and media sources, students explore the history of terrorism, the evolution and international context of terrorist groups, and the causes of and motivations for terrorist acts. They learn about the laws, regulations, and legislation related to terrorism. They also analyze possible future trends in terrorism as well as the current role of the media, governmental agencies, and entities in the prevention of and response to terrorism. Students use concepts presented in the course and additional research to develop a proposal to change and improve an existing counterterrorism policy.

**MMPA 6840 - Health Policy and Management**

(5 cr.)
In this course, students examine the factors that influence and improve health outcomes of individuals and populations, with attention to the goals of Healthy People 2010 and the main components and issues of organization, financing, and delivery of health services and public health systems in the United States. Topics include management theories and processes, systems thinking, strategic planning and partnerships, quality and performance improvement, leadership, and organizational behavior. The policy process
is addressed, as well as the advocacy role of the public health professional in influencing local, state, and federal policy. The impact of global trends on public health practice, policy, and systems is also considered.

**MMPA 6842 - Leadership, Professionalism, and Ethics in Public Health Practice**

(5 cr.)
Critical issues, such as infectious diseases, inadequate healthcare access, and an aging population, require leaders who have a diverse skill set as well as the professional and ethical sensibilities needed to lead efforts that improve quality of life for individuals and communities. In this course, students examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. They explore ethical choices, values, professionalism, opportunities for advocacy, and the application of principles of social justice implicit in public health decisions and practice. Students learn how to employ collaborative methods for working with and motivating diverse communities and constituencies, and they consider methods and develop new strategies for evaluating and solving current problems in healthcare.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMPA 6850 - Introduction to the Nonprofit Sector**

(5 cr.)
Nonprofit (NPO) and non-government (NGO) organizations can serve to affect people and communities through positive social change. NPO and NGO leaders require a fundamental understanding of the nonprofit sector, including related ethical, legal, financial, and global perspectives. Through the lens of the NPO and NGO leadership, students in this course explore social entrepreneurship, marketing, communication, and governance. Gaining practical insight, students also apply theories presented in the course either to build a business plan for a new NPO/NGO or to evaluate an existing one.

**MMPA 6851 - Board Governance and Volunteer Management**

(5 cr.)
The success of nonprofit organizations (NPOs) is largely dependent on the effective management of program volunteers and board members—individuals who often serve as the lifeblood of NPOs. Students in this course explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation. They focus on methods that organizations use to create and maintain an effective Board of Directors to ensure that the board governs and guides the organization toward their mission. Students design a board development or volunteer management plan based on processes presented in the course and fundamental concepts acquired earlier in the program.
MMPA 6852 - Resource Development

(5 cr.)
All nonprofit organizations require financial resources. Obtaining philanthropic financial support is essential to program delivery and stability. Students in this course explore the concepts of philanthropy and development, identification of funding sources, donor/prospect cultivation and education, and solicitation and appreciation strategies. They focus on processes and strategies for creating an organizational philanthropic culture based on ethics and donor relationships. Using these strategies and other concepts presented in the course, students create a resource development plan for a nonprofit organization.

MMPA 6880 - Social Entrepreneurship and Innovation: A Global Perspective

(5 cr.)
Social entrepreneurs are gaining international attention motivated by the desire for change and to see the world as it can be, not as it is. Students in the course will learn how social entrepreneurs have developed creative solutions to address social problems. The intention of the course is to develop knowledge, appreciate of the role of social entrepreneurs who create social change, deepen students' understanding of the world around them, and to inspire them to use their skills and knowledge to be, as Gandhi said, "the change you wish to see in the world."

Students in this course will gain knowledge about social entrepreneurs and how they are creating solutions to address societal problems, learn how to develop creative solutions to address social problems, and empower students to see social entrepreneurship as a force for social change. The course is designed for those who want to gain valuable tools to prepare them to make an impact on the lives of others. This course will be housed in the School of Public Policy and Administration for future upgrades and course maintenance.

MMPA 6881 - Grant Writing

(5 cr.)
Grant writing is a highly marketable skill that requires many nonprofit, educational, and community organizations to secure external funding in order to provide needed services to the community. In this course, students will explore the basic skills needed for grant writing including identifying potential funding sources, creating objectives and a needs statement, preparing and justifying a budget, identifying appropriate assessment plans, and writing an executive summary. Course assignments will allow students to directly apply what they are reading and discussing by writing a full grant proposal based on an actual Request for Proposal (RFP).

MMPA 6882 - Improving Healthcare Performance Through Social Entrepreneurship
Social entrepreneurship has become prominent as a dynamic approach to address societal needs and problems. Healthcare organizations and their leaders who embrace social entrepreneurship can accomplish their missions by using social entrepreneurship to overcome some of the barriers that inhibit the widespread promotion of innovation and performance in the healthcare environment. In this course, students will examine the principles, the case and need, and role of social entrepreneurship in healthcare, the common traits to become a social entrepreneur, and the organizational models needed to facilitate and promote social entrepreneurship. Additionally, students will learn how to leverage, implement, and integrate social entrepreneurship models into the "health for all" formula, develop new solutions and innovative strategies to address global, local population, community, and individual healthcare needs, and to improve healthcare performance.

**MMPA 6910 - Master of Public Administration Capstone**

(5 cr.)
In this course, students complete a capstone project using action research that fosters social change in public administration or nonprofit management and leadership. In the project they demonstrate the knowledge, skills, and competencies acquired in their master's degree program. The project employs an action research model. Students reflect on how the project and the program have contributed to their personal, scholarly, and professional growth.

**Prerequisites**
- All prior coursework

**MMPP 5111 - Leadership and Organizational Change**

(5 cr.)
Successful public sector organizations require high-caliber leaders who are accountable to multiple constituencies. A rapidly accelerating rate of change and blurring of organizational boundaries contribute to the need for leaders who are equipped to meet the challenge. Students explore the theoretical underpinnings of leadership and the important role of the leader in organizational change. By exploring leadership theory, current research, and practice within an area of public administration or nonprofit/nongovernmental organizations, students will demonstrate their understanding leadership in organizations that are increasingly complex in nature. Ethical dimensions, boundary spanning functions, and how leaders influence positive social change are key factors of this course. Historical and current events, as well as the personal experiences of students are used to examine the demands of leadership.

**MMPP 5280 - Policy and Politics in American Political Institutions**
In this course, students are introduced to the crafts of policymaking and policy analysis in the American democratic system. It covers the policy process—setting agendas, using policy analysis tools, managing the political process, implementing policy, and providing evaluations and feedback. Students develop skills in policy and economic analyses as well as in determining the political feasibility of proposed policies. Regulation as a policy choice will be discussed. Students completing this course will enhance their abilities to develop alternatives and to assess strategies proposed to achieve certain policy objectives. Policy areas of interest to students form the foundation of this course and may include communications, immigration, social, transportation, housing, labor, arts, and environmental policies.

**MMPP 5281 - Program Evaluation**

In this course, students are introduced to the tools used by policymakers and policy analysts to evaluate the impact of social programs. Topics include selecting programs to evaluate, crafting program descriptions, identifying stakeholders and their interests, developing logic models, framing evaluation questions, applying utilization-focused evaluation techniques, using quantitative and qualitative tools to complete formative and summative evaluations, and providing evaluation reports and feedback to decision-makers. By the end of the course, each student will develop a program-evaluation design for a social program.

**MMPP 5282 - Public Policy and Finance**

Students in this course cover microeconomic and macroeconomic models used in policy formulation and how public finance influences policy choices as well as implementation alternatives. Students examine tax policies and tax incentive models, budgeting, public/private models, market influences on policy, the impact of government expenditures on income redistribution, and economic considerations of welfare, food stamps, workers’ compensation, and Social Security. Outsourcing of public programs is also examined.

**MMPP 5379 - Advanced Methods in Public Policy Analysis and Evaluation**

Students in this course receive an in-depth examination of the methods and processes policy analysts use to assist policymakers in identifying problems, formulating and evaluating alternative solutions, and implementing preferred policies. The course includes cost benefit analysis; econometric analysis; policy modeling; the role of economic and political factors in public decision-making and policy formulation; marshaling resources and advocacy; and various applications to specific public policy
topics. The course focuses on various quantitative and qualitative techniques used by policy analysts.

**MMPP 5405 - Ethics and Social Justice**

(5 cr.)
Ethics is a foundational element of leadership. Leaders face increasingly complex social and political challenges as they seek to meet the needs of diverse constituents. Students in this course explore ethics and social justice related to economic disparity, power, and privilege. Students use demographic data, current social trends, and themes to understand, analyze, and address ethical and social justice issues that impact service delivery in a global community.

**MMPP 6100 - Critical Issues in Emergency Management**

(5 cr.)
Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

**MMPP 6111 - Leadership and Organizational Change**

(5 cr.)
Successful public sector organizations require high-caliber leaders who are accountable to multiple constituencies. A rapidly accelerating rate of change and blurring of organizational boundaries contribute to the need for leaders who are equipped to meet the challenge. Students taking this course explore the theoretical underpinnings of leadership and the important role of the leader in organizational change. By exploring leadership theory, current research, and practice within an area of public administration or nonprofit/nongovernmental organizations, students demonstrate their understanding of leadership in organizations that are increasingly complex in nature. Ethical dimensions, boundary-spanning functions, and how leaders influence positive social change are key factors of this course. Students draw on historical and current events, as well as their personal experiences, to examine the demands of leadership.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMPP 6112 - Governance and Public Policy**

(5 cr.)
Democratic principles are the foundation of modern life. In this course, students are provided an overview of democratic governance in public administration, public policy, or nonprofit/nongovernmental organizations in modern society. Students will examine the theoretical underpinnings of democratic governance and public policy in their chosen area of specialization necessary for doctoral-level research. Students will review fundamental theories of governance, research current literature on a specialized topic, and apply best practices within the area of specialization. The emphasis is on the context in which public and nonprofit leaders function and the social institutions that influence public policy and guide administrative decision making.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMPP 6115 - Foundations for Graduate Study**

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. They build a foundation for academic and professional success as scholar-practitioners and social change agents. Topics include the relation of mission and vision to professional goals, development of the program of study, strategies for online success, introduction to the online library, and an introduction to critical thinking, professional writing, and academic integrity. Course assignments focus on the practical application of writing and critical-thinking skills and promote professional and academic excellence.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMPP 6116 - Writing a Quality Prospectus**

(5 cr.)
This five-credit course is focused specifically on the process of writing the doctoral study prospectus. Students will use their preliminary research plan, developed previously, and develop a problem statement, to be used in the doctoral study. They further refine the problem statement and carry out the planning and the library research that will bring them to the formulation of a doctoral study prospectus. The prospectus is a brief paper, typically 15–20 pages in length, that lays out the background for the problem statement, the problem statement itself, a survey of the relevant literature (typically 25–75 references), and a research, implementation, and evaluation plan for the
solution of the problem.

Note: This course is for students who wish to matriculate into the PhD in Public Policy and Administration-PPPA 8115.

**MMPP 6117 - Foundations for Graduate Study**

(3 cr.)

Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. They are provided a foundation for academic and professional success as a scholar-practitioner and social change agent. Topics include the relation of mission and vision to professional goals, development of the program of study, strategies for online success, introduction to the online library, and an introduction to critical thinking, professional writing, and academic integrity. Course assignments focus on the practical application of writing and critical-thinking skills and promote professional and academic excellence.

**MMPP 6137 - The Nature of Crime and Criminology**

(5 cr.)

Students in this course are introduced to contemporary views and theories of maladaptive and criminal behavior. They examine a broad conceptualization of criminal behavior from an interdisciplinary perspective as well as theories and application of criminal profiling. Students also explore specific views of criminal behavior germane to groups, such as psychopaths, serial offenders, and sexually violent predators. At the end of this course, students will have an understanding of the theories and practices that are the foundations of the field of criminology.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMPP 6200 - Risk Assessment, Preparedness, and Disaster Mitigation**

(3 cr.)

Risk assessment and mitigation are key components to effective emergency management and all-hazard planning and response. Students in this course focus on the methods and techniques required to assess an organization or government's risk associated with the protection of human life and capital assets. They study ways to evaluate the social vulnerabilities to disaster and the special needs of at-risk populations, and they explore methods to reduce vulnerabilities and build capacity through structural and nonstructural mitigation. Additionally, students complete the FEMA Emergency Management Institute course IS-393.a: Introduction to Hazard Mitigation as part of this course.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MMPP 6215 - Controversies in Criminal Justice♦

(5 cr.)
Justice is at the heart of the U.S. democratic system, yet opposing viewpoints surrounding and within the system often muddle interpretations of the law and the development of policies to promote and enforce justice. In this course, students examine events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act, for example, the terrorist acts of September 11, 2001. They learn how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties. Through discussion with peers, assessment of contemporary articles, and examination of Supreme Court cases, students have the opportunity to reflect on and potentially broaden their own opinions and perspectives on current criminal justice affairs in regard to issues of law enforcement, public perception, policy development, and ethics.

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6217 - Technological Solutions and 21st-Century Crime♦

(5 cr.)
In consideration of modern technological innovation and the spread of knowledge through digital means, the relationship between technology and criminal activity is increasing. In this course, students explore this relationship and gain a comprehensive view of cyber crime, including current trends. They learn how law enforcement agencies use technology to track and apprehend criminals. Through real-world scenarios, students examine legal responses to cyber crime and learn different approaches and techniques for solving cyber crimes and handling related challenges. Students also have the opportunity to gain a comprehensive understanding of building cases and prosecuting crimes through practical exercises in identification, data mining, and the protection and gathering of evidence.

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6280 - Policy and Politics in American Political Institutions♦

(5 cr.)
Students in this course learn about the crafts of policymaking and policy analysis in the U.S. democratic system. They cover the policy process: setting agendas, using policy analysis tools, managing the political process, implementing policy, and providing evaluations and feedback. Students develop skills in policy and economic analyses as well as in determining the political feasibility of proposed policies. Regulation as a policy choice will be discussed. Students completing this course will enhance their abilities to
Develop alternatives and to assess strategies proposed to achieve certain policy objectives. Policy areas of interest to students form the foundation of this course and may include communications, immigration, social, transportation, housing, labor, arts, and environmental policies.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6281 - Program Evaluation♦

(5 cr.)
Students in this course are introduced to the tools used by policymakers and policy analysts to evaluate the impact of social programs. Topics include selecting programs to evaluate, crafting program descriptions, identifying stakeholders and their interests, developing logic models, framing evaluation questions, applying utilization-focused evaluation techniques, using quantitative and qualitative tools to complete formative and summative evaluations, and providing evaluation reports and feedback to decision makers. By the end of the course, each student will develop a program-evaluation design for a social program.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6282 - Public Policy and Finance♦

(5 cr.)
Students in this course cover microeconomic and macroeconomic models used in policy formulation and how public finance influences policy choices as well as implementation alternatives. Students examine tax policies and tax incentive models, budgeting, public/private models, market influences on policy, the impact of government expenditures on income redistribution, and economic considerations of welfare, food stamps, workers’ compensation, and Social Security. Students also examine outsourcing of public programs.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6300 - Disaster Response and Recovery♦

(5 cr.)
A major concern of disaster response professionals is meeting basic and humanitarian needs of disaster-affected populations. In this course, students explore a range of issues, including evacuation, relocation, and tactical and strategic decisions in the immediate aftermath of an emergency episode. Students study important federal policies related to disaster response and recovery, including the National Response Framework (NRF), and they can gain an understanding of how local, state, and federal policies mesh in response
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6320 - Public Policy Implications of Terrorism Legislation and Policies♦

(5 cr.)
Students in this course receive a broad perspective on the history of the U.S. Patriot Act, similar terroristic legislation and immigration laws, and these policy implications on law enforcement, governmental entities, organizations, and individuals. Public administrators and public policy analysts who are charged with drafting and implementing public policy and enforcing and/or responding to potential terroristic threats build a basic foundation, while simultaneously upholding and protecting constitutional freedoms. Material for this course is drawn from contemporary texts, websites, case studies, and material representing international, national, and local governments and organizations. Students critically review and analyze the U.S. Patriot Act and similar terroristic legislation and policies, and they participate in online discussions about these laws and their implications on U.S. constitutional freedoms.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6321 - Terrorism: A Systemic Approach for Emergency Preparedness♦

(5 cr.)
Students in this course receive an overview of terrorism—local, national, and international—and the need to develop a systemic approach for emergency preparedness. Topics include, but are not limited to, terrorism overview, terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Course participants begin the development and/or analysis of a terrorism preparedness infrastructure and participate in online discussions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6322 - Critical Incident Planning and Leadership

(5 cr.)
Students in this course examine the principles of emergency planning, selection of leaders, specialized planning (e.g., schools, tourism), mutual aid, and leadership theories. Students build a basic foundation for public administrators to develop a critical incident
plan and also understand leadership theories. Course participants critically analyze case studies, identifying weaknesses and potential solutions.

**MMPP 6333 - Holding Up the Mirror: Understanding Different Cultures and Increasing Global Consciousness**

(5 cr.)
Students in this course have an opportunity to explore and understand the cultural values and styles of communication, reasoning, and leadership unique to their home culture. Students apply their increased understanding to other cultures. They also identify and become familiar with the challenges U.S. nonprofits face as they work internationally or cross-culturally within the United States.

**Prerequisites**
- A course or direct experience in nonprofit management is strongly advised.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMPP 6334 - Crossing Borders: U.S. and International NGO Cultures and Environments**

(5 cr.)
In this course, students study in depth the cultures, structures, and activities of NGOs in select countries and compare their activities, organizational cultures, structures, and working environments with nonprofits in the United States.

**Prerequisites**
- A course or direct experience in nonprofit management is strongly advised.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMPP 6335 - Placing NGOs in the Global Context**

(5 cr.)
Students in this course gain knowledge and understanding about the geopolitical and economic contexts in which international, nongovernmental, and voluntary agencies function in other countries. Students analyze the historical, political, social, and cultural contexts in which NGOs work and the implications these contexts have on the work of local and international NGOs. Students identify strategies that make the international and cross-cultural efforts of NGOs successful.

**Prerequisites**
- A course or direct experience in nonprofit management is strongly advised.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*
MMPP 6345 - Public Policy Implications of Terrorism Legislation and Policies

(5 cr.)
Students in this course receive a broad perspective on the history of the U.S. Patriot Act, similar terroristic legislation and immigration laws, and the policy implications on law enforcement, governmental entities, organizations, and individuals. Public administrators and public policy analysts who are charged with drafting and implementing public policy and enforcing and/or responding to potential terroristic threats build a basic foundation, while simultaneously upholding and protecting constitutional freedoms. Material for this course is drawn from contemporary texts, websites, case studies, and material representing international, national, and local governments and organizations. Learners critically review and analyze the U.S. Patriot Act and similar terroristic legislation and policies, and they participate in online discussions about these laws and their implications on U.S. constitutional freedoms.

MMPP 6346 - Terrorism: A Systemic Approach for Emergency Preparedness

(5 cr.)
Students in this course receive an overview of terrorism—local, national, and international—and the need to develop a systemic approach for emergency preparedness. Topics include, but are not limited to, terrorism overview, terrorism and public health, bioterrorism, biosecurity, cyber terrorism, risk assessment, implications for public health, and components of a systemic preparedness infrastructure. Course participants begin the development and/or analysis of a terrorism preparedness infrastructure and participate in online discussions.

MMPP 6347 - Critical Incident Planning and Leadership

(5 cr.)
Students in this course examine the principles of emergency planning, selection of leaders, specialized planning (e.g., schools, tourism), mutual aid, and leadership theories. Students build a basic foundation for public administrators to develop a critical incident plan and also understand leadership theories. Course participants critically analyze case studies, identifying weaknesses and potential solutions.

MMPP 6363 - Public Safety Issues

(5 cr.)
This is a comprehensive survey of the issues faced by public safety agencies and personnel at the local, state, and national level, including police and sheriff, emergency medical, and fire services and related organizations. Students in this course emphasize communication and coordination between public safety organizations.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6364 - Managing Public Safety Organizations

(5 cr.)
Students in this course examine how public safety leaders find solutions to major issues confronting their operating systems, both organizations and communities, through research, analysis, planning, and decision making. They adapt classic business management techniques and leadership principles to public safety operations. The concepts of "first planner" and "first responder" are introduced. Solutions and alternatives to varied situations confronting public safety managers are developed. Emphasis is on systems approaches, environmental analyses, contingency planning, implications for change, coordination, and controls.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6365 - Ethics in Preserving Public Safety

(5 cr.)
Students in this course apply the lessons of the first two courses in the specialization—management issues and planning solutions—to specific cases of leadership and personal responsibility in the public safety field. Using primarily the case study method, students analyze leadership and ethical issues that public safety officials encounter in their work and develop effective approaches for how standards and ethics can best be instilled throughout a public safety organization. Students analyze classic cases, including the federal 9/11 Commission report, for lessons applicable to any public safety agency and situation, including intelligence, planning, operations, command, interagency coordination, communication, and technology.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6379 - Advanced Methods in Public Policy Analysis and Evaluation

(5 cr.)
An in-depth examination of the methods and processes policy analysts use to assist policymakers in identifying problems, formulating and evaluating alternative solutions, and implementing preferred policies is provided to students in this course. Students in this course learn about cost-benefit analysis, econometric analysis, policy modeling, the role of economic and political factors in public decision-making and policy formulation, marshaling resources and advocacy, and various applications to specific public policy topics. The focus of the course is on various quantitative and qualitative techniques used by policy analysts.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMPP 6380 - Policy and Politics in American Political Institutions**

(5 cr.)
Students in this course are introduced to the crafts of policymaking and policy analysis in the U.S. democratic system. They cover the policy process—setting agendas, using policy analysis tools, managing the political process, implementing policy, and providing evaluations and feedback. Students develop skills in policy and economic analyses as well as in determining the political feasibility of proposed policies. Regulation as a policy choice will be discussed. Students completing this course will enhance their abilities to develop alternatives and to assess strategies proposed to achieve certain policy objectives. Policy areas of interest to students form the foundation of this course and may include communications, immigration, social, transportation, housing, labor, arts, and environmental policies.

**MMPP 6381 - Program Evaluation**

(5 cr.)
Students in this course receive an introduction to the tools used by policymakers and policy analysts to evaluate the impact of social programs. Topics include selecting programs to evaluate, crafting program descriptions, identifying stakeholders and their interests, developing logic models, framing evaluation questions, applying utilization-focused evaluation techniques, using quantitative and qualitative tools to complete formative and summative evaluations, and providing evaluation reports and feedback to decision makers. By the end of the course, each student will develop a program-evaluation design for a social program.

**MMPP 6382 - Public Policy and Finance**

(5 cr.)
Students in this course cover microeconomic and macroeconomic models used in policy formulation, as well as how public finance influences policy choices and implementation alternatives. Students examine tax policies and tax incentive models, budgeting, public and/or private models, market influences on policy, the impact of government expenditures on income redistribution, and economic considerations of welfare, food stamps, workers' compensation, and Social Security. Students also examine outsourcing of public programs.

**MMPP 6390 - Strategic Context of Public Management and Leadership**

(5 cr.)
Students in this course engage in collaborative study of the changing strategic context of
public administration. Students apply a systems perspective to construct a public enterprise model of the public organization of their choice, as a way of understanding the strategic context for practical action and the stakeholder relations involved. This is an organization "mental model," which is similar to a traditional "business model," but which includes the three interrelated flows of money, knowledge, and influence. Emphasis in this course is on management and leading of the unknown—imagining and creating a future that works in a time of unprecedented and unpredictable change. Students apply strategic scenarios to organizational change for the public organization of special interest to them. Students also develop professional-action habits for pragmatic-action learning in the practice of public administration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**MMPP 6391 - Transformative Change in a Shared-Power World**

(5 cr.)
Students in this course engage in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students are taught a pragmatic-action learning process for studying the experience of transformative change in complex systems. The dynamics of complex adaptive systems are studied to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Appreciative inquiry and other selected methods of transformative change are studied and applied to a positive organizational change situation of special interest to the students. Students also develop professional-action habits for pragmatic-action learning in the practice of public administration.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

**MMPP 6392 - The Language of Leadership**

(5 cr.)
In today's complex environment, leaders engaged in shaping public policy must know how to use the emotional as well as the intellectual power of language to motivate, inspire, and competently manage their organizations. Dynamic leadership requires understanding and use of techniques that affect both conscious and unconscious influences on human behavior. Effective communication connects at many different levels. Students in this course receive both theoretical and practical information; demonstrate the necessary components for making such connections; and show why stories, symbols, and metaphors are essential elements in the language of leadership.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.
MMPP 6400 - Public Health Leadership and Systems Thinking♦

(5 cr.)
In this course, students explore leadership models and theories, the core principles of public health leadership, and the application of systems thinking to public health. They examine how to create strategies and solutions that efficiently utilize public health and healthcare resources. Students also discuss descriptive and prescriptive systems, focusing on the application of these processes to current public health issues and challenges at the organizational and community levels.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6405 - Ethics and Social Justice♦

(5 cr.)
Ethics is a foundational element of leadership. Leaders face increasingly complex social and political challenges as they seek to meet the needs of diverse constituents. Students in this course explore ethics and social justice related to economic disparity, power, and privilege. Students use demographic data, current social trends, and themes to understand, analyze, and address ethical and social justice issues that impact service delivery in a global community.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6420 - Health Economics♦

(5 cr.)
Students in this course examine the application of economic principles to healthcare managerial decision making regarding the amount, structure, and distribution of healthcare resources and services. Because of the complexity and uncertainty of the healthcare system, as well as the scope of resources consumed by health and health-related organizations, managers must appreciate the economic implications of decisions regarding allocation of resources. Students advance their knowledge of economic principles as reflected in the population demand for health; the demand for healthcare and medical care; the supply of health organizations and practitioners; the role of insurance, moral hazard, and adverse selection; the practice of cost-shifting; the structure, competitive nature, and dynamics of markets; differing objectives of for-profit and non-profit organizations; variation in consumer access to and utilization of services; roles of uncertainty and information asymmetry; strategies for consumer cost-sharing; and the challenges healthcare organizations face in the pricing, production, allocation, and distribution of health and medical services. Special attention is devoted to understanding how health services differ in a variety of competitive markets.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program.

Walden University Catalog (March 2022)
MMPP 6431 - Finance and Budgeting for the Public Sector♦

(5 cr.)
Sound financial practices are crucial to managing scarce funds in the public sector. Students in this course examine finance and budgeting concepts, policies, and practices related to organizations as well as the fiscal climate within which they operate. Students gain an understanding of theories underlying fiscal policy, and they read and analyze budgets, financial statements, and financial reports. Other topics include the use of auditing practices, tax systems, financial management, budgetary reform, and financial technology systems specific to government organizations. Students apply what they learn to developing budget and financial projects relevant to public organizations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6450 - Historical and Contemporary Issues in Criminal Justice♦

(5 cr.)
Students in this course look at the evolution of crime—from lone criminals to worldwide syndicates—using the scientific rigor built into the selected readings and discussions. Among the topics examined are the philosophy of community- and problem-oriented policing, transnational crime, terrorism, and the new nexus between them. Current and future leaders will be equipped with the knowledge and depth of understanding to assess and manage the opportunities, innovations, and challenges in their profession.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6452 - Policy Analysis in the Criminal Justice System♦

(5 cr.)
Students in this course review key court decisions and explore the tension between constitutionally guaranteed individual rights and crime prevention and public-safety efforts. Students also cover policy analysis and planning in the criminal justice field and gain an understanding of the policy context in which the criminal justice system functions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6453 - Leadership: Putting Theory Into Practice in Criminal Justice Administration♦
Students in this course are introduced to the problems that currently confront the administration of the criminal justice system as well as problems predicted for the future. To prepare to lead efforts to address these challenges, students learn powerful models for strategic, critical, and reflective thinking. Students immerse themselves in discussion about the major components of effective justice administration: organizational thought and theory, leadership, human capital, policy development and implementation, and collaboration with other public safety and community organizations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination♦

Students in this course explore the role and process of strategic planning with an emphasis on collaboration, cooperation, and coordination within and among organizations. Students apply these concepts to real-life situations and organizations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6480 - Applied Research and Evaluation Methods♦

Organizational credibility, community trust, and fundraising are increasingly dependent upon demonstration of program effectiveness and success. Students in this course are introduced to research and evaluation methods in the public and nonprofit sectors to learn ways to measure and assess a program’s effectiveness and potential success as well as to address problems or issues in the field. Students examine the strengths, limitations, and threats to validity; models, quantitative metrics, and tools used to evaluate programs and policies; and legal and ethical issues associated with research and evaluation methods. Using these parameters and other concepts presented in the course, students critically evaluate sample research, consider ways to communicate results to an intended audience, and reflect on trends and challenges that could affect future program evaluation.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6540 - Management and Leadership in a Global Context
Public policy implementation can take place in various types of organizations. In this course, learners engage in a collaborative study of strategic planning, management, and leadership in the context of public and nonprofit organizations. Students in this course identify, analyze, and evaluate the intricate relationships among strategic planning, management, and leaderships from an international perspective. Students connect three key institutional elements: "Thinking-Acting-and-Leading" strategically. Students apply a management systems approach as they develop, adopt, manage, and lead a strategic plan for an international public or nonprofit organization or with an international focus. Students will understand the strategic context for practical decision making for international public and nonprofit organizations, emphasizing the central role of the environment in the strategic planning process. Students are offered a hands-on approach in this course that tests their ability to make effective and timely management and leadership decisions in complex and uncertain conditions.

**MMPP 6541 - Sustainable Development for Global Communities**

Effective community leaders must be familiar with a wide range of tools, strategies, and skills to create sustainable communities. In this course, students examine these elements to learn how leaders build capacity for community change; assess community needs and resources; create community visions; promote stakeholder interest and participation; analyze community problems; and carry out practices and interventions to improve sustainability in communities. They also explore sustainability frameworks and models, and they apply these and other concepts presented in the course to develop a proposal for sustainable community development, focusing on community assessment, stakeholder involvement, and development planning.

**MMPP 6542 - Transformative Change in a Global Environment**

Students in this course are engaged in a collaborative study of the nature and methods of transformative change in the complex human systems of contemporary public organizations. Students explore and employ a pragmatic-action-learning process for studying the experience of transformative change in complex systems. They examine the dynamics of complex adaptive systems to gain an understanding of how large-scale and highly interrelated human systems change through self-organization. Students explore and apply appreciative inquiry and other selected methods of transformative change to a positive organizational-change situation of personal interest. They also have the opportunity to develop professional-action habits for pragmatic-action learning in the practice of public administration.

**MMPP 6740 - Disaster, Crisis, and Trauma**
Students taking this course define natural and human-made disasters such as war, violence, genocide, and terrorist activities and review how they impact the psychology of individuals and groups. Topics include theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with the trauma. Students focus on the importance and development of culturally appropriate service delivery programs and interventions for individuals affected and traumatized by disaster(s).

**MMPP 6810 - Fundamentals of Law and Public Policy**

(5 cr.)
Legal decisions and the law have an impact on the creation of public policy. Students in this course explore the relationship between laws and public policy and the impact that court decisions have on policy and policy leaders. Topics include legal concepts and terminology, legal jurisdictions, case law, seminal cases, and the Supreme Court's roles and procedures. Students apply fundamental legal concepts and principles to case studies and contemporary problems.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMPP 6811 - Legal Research for Policy Practitioners**

(5 cr.)
There is a wealth of vital legal knowledge available to public policy practitioners. In this course, students will be introduced to a number of print and electronic resources available for legal research, and they will gain an understanding of how the law is used to inform the creation of public policy. Topics include navigating legal libraries, citing cases, and using research to support public policy. Students apply legal research to case studies and contemporary issues.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**MMPP 6812 - Contemporary Cases and Issues in the Courts**

(5 cr.)
Major issues in the Supreme Court have an impact on public policy at the state and local levels. Students in this course examine major past and current U.S. Supreme Court decisions and explore how these decisions affect public policy. Topics include individual rights, property rights, administrative law, immigration law, and foreign policy. Students apply legal research and verdicts to case studies and current issues.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program.*
MMPP 6820 - Elements of Sustainable and Livable Communities♦

(5 cr.)
Creating and maintaining livable and sustainable communities require leaders who understand and can assess the interrelated elements that make a community viable over time. Students in this course explore demographics, health, education, employment opportunities, transportation, recreation, housing, natural resources, technology, and other elements necessary to sustain a thriving community. Students define and explore these concepts through case studies and local community examples.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6821 - Tools for Sustainable Community Development♦

(5 cr.)
Effective community leaders require comprehensive tools and resources to create livable and sustainable communities. Students explore topics that include demographic analysis and forecasting, citizen engagement, economic forecasting and budgeting, acquisition of alternative funding sources, GIS (geographic information system) technology, comprehensive-use planning, and other tools and resources needed to meet the challenge of creating and maintaining sustainable communities. Students use case studies and examples drawn from local communities to identify and apply appropriate strategies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6822 - Current Issues in Regional and Local Public Policy♦

(5 cr.)
Local government leaders must understand and address complex and interrelated issues including public health and safety, urban sprawl, immigration, transportation, the aging of the baby-boom generation, affordable housing, living wage jobs, and the threats to natural resources. Students in this course explore current concepts with an emphasis on creating livable and sustainable communities through cooperation, coordination, and collaboration of community stakeholders. Students use local community examples to assess critical issues and identify problem-solving strategies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6830 - Current Issues in Homeland Security♦
Since its inception, the Department of Homeland Security has profoundly impacted public policy and administration. Students in this course examine homeland security history, concepts, policies, and strategies of prevention and response. Topics include ethical issues, telecommunications, technology, threat assessment, contingency planning, and risk management. Students apply fundamental concepts and principles of homeland security to case studies and current issues.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6831 - Critical Incident Planning and Leadership

Strategic leadership is required to address the challenges and complexities of homeland security. To respond to critical incidents while and after they occur, leaders must plan tactically and understand how to obtain and mobilize resources. Students explore the roles of leaders in relation to activating or coordinating funding, personnel, jurisdictional issues, training, communication, information management, technology, and healthcare in order to create an effective response to homeland security needs. Course participants critically analyze case studies, identifying weaknesses and potential solutions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6832 - Terrorism: Legislation and Policy

The events of September 11, 2001, resulted in a new and intense focus on the issue of terrorism in the United States and abroad. In this course, students explore the history of terrorism; laws, regulations, and legislation related to terrorism; and the roles of the media, governmental agencies, and entities in the prevention of and response to terrorism. Students apply their knowledge to case studies and current trends related to terrorism.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6840 - Health Policy and Management

Students in this course examine the factors that influence and improve health outcomes of individuals and populations, with attention to the goals of Healthy People 2010 and the main components and issues of organization, financing, and delivery of health services and public health systems in the United States. Topics include management theories and processes, systems thinking, strategic planning and partnerships, quality and
performance improvement, leadership, and organizational behavior. The policy process is addressed as well as the advocacy role of the public health professional in influencing local, state, and federal policy. The impact of global trends on public health practice, policy, and systems is also considered.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6841 - Legal and Regulatory Aspects of Public Health♦

(5 cr.)
Students in this course examine the role of federal, state, and local government in the assurance of public health through legislation and regulation. Consideration is given to contemporary legal and regulatory issues arising in public health practice and emergencies with attention to public health security and preparedness in response to bioterrorism and disasters.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6842 - Leadership, Professionalism, and Ethics in Public Health Practice♦

(5 cr.)
Students in this course examine theories of leadership as well as the professional attributes, skills, styles, and strategies required to advance public health goals. Ethical choices, values, professionalism, opportunities for advocacy, and the application of principles of social justice implicit in public health decisions and practice are considered, with emphasis on a collaborative approach to working with diverse communities and constituencies.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6850 - Introduction to the Nonprofit Sector♦

(5 cr.)
Nonprofit organizations serve as the foundation for many social change efforts. Students in this course explore the history, foundations, and types of nonprofit organizations and the diverse political, social, and economic contexts within which they exist. Students examine and apply marketing, public relations, and communication concepts and strategies to case studies and contemporary situations. Ethical, legal, and global lenses are applied to the study of the nonprofit sector. Students develop a concept paper guiding the development of a nonprofit organization.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MMPP 6851 - Board Governance and Volunteer Management♦

(5 cr.)
Volunteers are the "lifeblood" of many nonprofit organizations. These organizations rely heavily on their volunteer board of directors to govern and guide them toward their mission. The success of nonprofit organizations is largely dependent on the effective management of program volunteers and board members. Students in this course explore the volunteer management process, including volunteer recruitment, orientation, training, supervision, and evaluation, with an emphasis on creating and maintaining an effective board of directors. Students design a board development or volunteer management plan based on the concept paper they developed in the Introduction to the Nonprofit Sector course.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6852 - Resource Development♦

(5 cr.)
All nonprofit organizations require financial resources. Obtaining philanthropic financial support is essential to program delivery and stability. Students explore the concepts of philanthropy and development, identification of funding sources, donor/prospect cultivation and education, and solicitation and appreciation strategies. An emphasis is placed on creating an organizational philanthropic culture based on ethics and donor relationships. Students create a resource development plan for the organization designed in the Introduction to the Nonprofit Sector course.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMPP 6910 - Capstone Seminar♦

(5 cr.)
Students in this course have an opportunity to integrate learning from courses in the program in a capstone project, defined as an applied project with a written paper or a research paper. Students may use the capstone to focus on governance, policy, or leadership and management in either the public or nonprofit sectors or take a cross-sector comparative perspective.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6000 - Dynamic Leadership♦

(3 sem. cr.)
Being an effective leader is essential in business and demands that an individual has a
strong set of competencies including the ability to understand one’s self, motivate others, understand organizational culture, and manage ambiguity. In this course, students begin their personal and professional transformation by closely examining their current strengths and weaknesses, values, decision-making processes, and approaches to dealing with difficult problems. Students also explore leadership in turbulent times by examining how effective leaders think as well as how various management styles impact situations and relationships within an organization.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6010 - Managing People and Promoting Collaboration♦

(3 sem. cr.)
Contemporary business environments are increasingly competitive, global, fast paced, and knowledge intensive. In these environments, effective use of human capital is vital to an enterprise’s success and survival. In this course, students will explore practical issues related to developing individuals and managing collaboration and will examine the skills and strategies necessary to address them effectively. Students will examine ethical and legal implications of managing a diverse workforce including issues that arise from cross-cultural differences and virtual work settings. The importance of communication as a tool to manage internal and external relationships is emphasized as it relates to the effectiveness of managing people to achieve organizational goals.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6100 - The Character of Leadership

(3 sem. cr.)
There are many challenges in the work of an ethical, vision-oriented leader at any level of organization. In this course, students examine these challenges and learn about the skills needed to navigate in turbulent, changing environments that often pose difficult choices. Students explore concepts related to level-five leadership and servant leadership, and they begin the process of self-assessment and reflection-in-action. Students are also provided with an introduction to Walden University, graduate studies at Walden, the MS in Leadership program, and all related processes and policies, including best practices of online learning and employing graduate-level standards to coursework.

MMSL 6105 - Finding Your Inner Leader♦

(3 sem. cr.)
Being an effective authentic and trustworthy leader requires considerable self-awareness based on commitment to candid self-reflection and the wisdom to recognize how they
can best serve others through creating shared vision for a better future. In this course, students examine their values, experiences, skills, capabilities, preferences, and knowledge in context of their leadership aspirations. Students will examine factors that affect their ability to influence and inspire others and create plans to strengthen these leadership skills. Students will learn strategies to navigate in turbulent, changing environments that often pose difficult choices and discover how leaders rise to meet challenges and opportunities.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6110 - Building Organizational Culture: Leaders as Architects♦

(3 sem. cr.)
Organizational leaders act as partners in shaping, and are shaped by, the organizational cultures they seek to influence. Students in this course learn to recognize the elements that make up an organization’s culture as well as ways to harness these for positive change and organizational success. They explore perspectives on how to make conceptual sense of the cultural landscape of organizations and examine the implications for leading and building effective communities at various levels of application. Students assess and discuss a variety of topics, such as tools of self-development, the reciprocal nature of leadership, and cultural components.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6115 - Communication for Leaders and Managers♦

(3 sem. cr.)
Effective communication is frequently cited as one of the most important factors in managerial and organizational success—as well as one of the areas of greatest dissatisfaction. In this course, students take a close look at the components of effective communication and hone strategies for communication success. They explore how self-perception and perception of others affect communication and will develop skills for communicating more effectively with diverse audiences. Topics include the communication process, interpersonal communication, self-awareness in communication, communication channels and mediums, and communicating across and beyond the organization.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6125 - Initiating and Managing Change♦

(3 sem. cr.)
Today’s business environment is constantly evolving to accommodate changes in
economy, leadership, new regulations, and internal reduction and growth. Organizations require leaders who know how to work through barriers to effect positive and efficient organizational change. Students in this course learn about situations that constitute and require such change. They engage in a variety of assignments through which they explore effective strategies for initiating change and anchoring change into corporate culture to achieve organizational goals as well as for managing unplanned or unwelcome change. Students explore a variety of approaches and methods to transition individuals and organizations within evolving environments. They distinguish between reactive responses and proactive responses to change and examine the implications of culture, inertia, and uncertainty. Additionally, students explore the importance of understanding motivation and effective communication in mitigating negative reactions to change and facilitating the change process itself.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6175 - Managing, Mediating, and Resolving Conflict ♦

(3 sem. cr.)
Managers and leaders must be skilled in conflict management including the capability to mediate or resolve conflict at the interpersonal through organizational levels. Students in this course explore the challenges of managing people in times of perceived conflict and dispute, and they work toward developing skills to identify different types of conflict situations. Students will gain the knowledge of methods and tools to prevent, manage, and break inherent conflict. Students also consider the implications of emotion and the multifaceted array of conflict-management styles—factors for which professionals must account. They engage in hands-on, practical exercises in general contingency thinking and action approaches and communication styles designed to help them resolve conflicts and move toward win-win outcomes.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6201 - Individual and Organizational Performance Management ♦

(3 sem. cr.)
Performance management involves the ongoing activities of employee evaluation and development focused on achieving the organization’s short- and long-term goals. Performance management also is required to meet ethical and statutory requirements. Looking at the continuous nature of performance management underscores the importance of identifying and supporting talent development. Students assess performance management systems within the context of the defined system metrics supporting the organization’s goals, and they assess the role of performance management in strengthening the organization through diversity and inclusion.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
MMSL 6510 - Building Organizational Capacity Through Succession Planning♦

(3 sem. cr.)
Organizations need to identify strategic talent today for their future success. In this course, students explore the processes that define an organization's future human resource needs, identify the gaps between today's resource requirements and future needs of the organization, and develop strategies to meet these needs. Through interactive discussion and practical exercises, students learn how to develop internal talent profiles, define career management tracks, conduct internal recruiting, develop comprehensive succession planning strategies, and use information technology to support these activities.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6520 - Building Human Capital Through Training and Development♦

(3 sem. cr.)
Training and development provide an organization's workforce the tools it needs to contribute to success. Students explore the processes of conducting a needs assessment and developing a training proposal that builds the business case for a training intervention for both individuals and groups, creating the basis for an annual training and development plan. Integrating adult and workplace learning theory into the development of training solutions, students learn how to design, implement, and evaluate the effectiveness of a training solution.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6540 - Innovation and Technology♦

(3 sem. cr.)
Contemporary and successful leaders must leverage technology in every appropriate way to achieve goals in the complex global environment. In this course, students explore the role of information and information technology in organizations and learn how to identify and analyze emerging technologies, including and beyond the scope of information technology. Students focus on the importance of technology and innovation in today's multifaceted environment as well as the ethical implications thereof. Through individual and group applications, students examine strategies to nurture innovation and cultivate technology development. They also take time to reflect on concepts presented in the course and consider how they can use this information to become the type of leader who effects change through innovative means.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
MMSL 6550 - Strategic Human Resource Management

(3 sem. cr.)
In today's organization, human resource management plays an important strategic role and increasingly contributes to its competitiveness. Students will explore how a more proactive and systemic approach to human resources addresses strategic business challenges throughout the organization—market positioning, talent acquisition, innovation, product development, quality, customer service, and operating functions. Students will see how results-based performance management is tied to the organization's strategic agenda. Students will compare different theoretical perspectives of strategic human resource management and see the value of preparing employees of the future today to create sustainable competitive advantage.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6560 - Managing Business Partner Relationships

(3 sem. cr.)
Human resource departments are increasingly becoming networked organizations. Students in this course build the skills needed to evaluate build-or-buy alternatives for meeting human resource needs, negotiate contracts with service providers, develop service-level agreements, and track progress of ongoing contracts. Students examine how the human resource professional can leverage systems to integrate vendor-supplied services such as training, consulting, recruiting, assessment, coaching, and information systems.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6605 - Performance and Management

(3 sem. cr.)
Performance management is a set of practices and processes that creates career opportunities to attract appropriate resources, establishes an environment that nurtures individual productivity and development, and smoothly transitions individuals to their next position or organization. Students in this course are provided with the opportunity to address these three key sets of processes. They practice writing job descriptions, selecting the right employees, developing skill-based performance standards, effecting relevant onboarding programs, and implementing educational and training programs intended to drive the success of employees and the organization as a whole. They explore how to maximize employee productivity through structured feedback, coaching, reflective performance development conversations, effective compensation models,
employee recognition programs, and career development paths. Students also examine ways to improve performance management systems by integrating feedback from the exit interviews of valued employees.

**MMSL 6620 - Fostering a Culture of Innovation**

(3 sem. cr.)
In today's complex and uncertain environment, innovation is important to achieving business success. In this course, students examine how to be effective creative leaders who can readily apply imagination to resolve complex problems. Additionally, students explore methods to establish a work environment conducive to creative thinking. Students will gain a set of proven methods, skills, and strategies that enable innovative breakthroughs to occur in a much more deliberate and predictable manner.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMSL 6635 - Harnessing the Power of Data and Information**

(3 sem. cr.)
Effectively using data and information can make the difference in whether the best decisions are made or problems are solved correctly. There are multiple approaches to practical managerial problem solving that are rooted in the systematic collection, analysis, and display of relevant data and information. In this course, students examine the importance of data, beginning with the process of transforming data into information, and then focusing on the best methods for presenting that information in support of sound and ethical decision making. Students evaluate common misinterpretations or errors in working with data and determine how to detect data and information presented in a deceptive manner. Students explore current paradigms in data-based decision making and problem solving. They learn how they can use these analytical-thinking practices to improve their general managerial decision-making skills.

**MMSL 6645 - Improving Business Performance**

(3 sem. cr.)
One of the most critical challenges in maintaining and improving organizational performance is identifying core strengths and weaknesses within the organization and across the more general value creation landscape. The focus of this course is on the challenges and opportunities for managers to create value and to increase organizational performance through the effective deployment of systems thinking and change management skills. Students in the course explore systems thinking as a process whereby problems are viewed as individual components within a larger system and explore how various operational and systems thinking frameworks can be utilized to optimize organizational performance in both industrial and service settings.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
MMSL 6655 - Marketing Communications, Storytelling, and Persuasion

(3 sem. cr.)
Whether one is addressing a customer, an audience, or a jury, the aim is to use the tools of persuasion to influence individuals to take action. Especially in social media, it is critically important to establish an appropriate tone, voice, and personality. Tying these strategies to the overall brand positioning is even more important. It has been found that storytelling is one of the most effective tools of persuasion. Rather than simply stating the facts, the story puts facts into a meaningful context, so that the consumer can understand and empathize with the characters in the story and, therefore, identify with the brand's social media personality. In this course, students explore the elements of the story and the approaches used to develop content. Understanding the impact of individual channels on a strategy for integrated marketing communications and positioning allows the marketer to allocate budgets more effectively and efficiently.

MMSL 6660 - Personal Leadership: Mentoring and Coaching♦

(3 sem. cr.)
Mentoring requires an understanding and integration of many theories, including leadership, interaction, and communication, that support the development of effective leaders. Students in this course understand and apply skills of effective mentoring, such as active listening, learning, empowering, and enabling change. Students engage in practical exercises, such as using feedback to create interactive dialogue and asking questions to acquire a deeper understanding of mentoring and coaching processes. In consideration of modern and virtual environments, students explore the challenges of mentoring or coaching individuals in a virtual or team setting.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

MMSL 6665 - Creative Strategy and Execution: From Brief to Presentation

(3 sem. cr.)
Students in this course leverage a wide range of knowledge and skills to conceive and execute a global communications campaign that uses traditional and digital media. Grounded in concepts of integrated marketing communication, students have the opportunity to develop and review a creative or innovative brief. Students generate solutions for that brief across the phases of the creative process, present and defend solutions, and evaluate solutions using metrics. Topics include the creative process, integrated marketing communication, selecting appropriate channels, pitching and selling ideas, and evaluation metrics.
MMSL 6670 - Budgeting and Resource Allocation

(3 sem. cr.)
A key function of management is the ability to interpret financial data to make effective decisions. It often involves careful planning and forecasting that takes into account many factors, such as expenses, investments, and often, unforeseen financial obligations. Students examine the role of various accounting tools, budgeting, and resource allocation along with related processes within the organizational context and how those can be used effectively. They examine processes related to managing budgets and strategies to read and communicate effectively the often complex financial information related to organizational performance and then use these tools to make sound decisions. Students also explore and discuss the implications of resource availability as well as methods to plan for and prioritize the use of resources, while considering ethical issues related to sustainability and resource scarcity.

MMSL 6680 - Individual and Organizational Commitment to Social Responsibility♦

(4 sem. cr.)
Taking into account global concerns, such as human rights, the environment, and factors of sustainability, individuals and organizations alike have incorporated a business model with a vision of change and a mission to positively influence society. In this course, students explore multiple approaches to understanding and improving the systemic relationships and obligations that exist among individuals, organizations, and the larger set of connected communities. Through assessment of past and current corporate practices of successful organizations, students gain practical insight on effective and non-effective strategies, in addition to related ethical considerations. Through application and reflection, students consider the role they can play in implementing change and growth without doing harm through unintended byproducts and outcomes, developing the ability to practice social responsibility as part of their daily work.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6681 - Social/Environmental Entrepreneurship and Sustainable Development♦

(4 sem. cr.)
Leaders can have a major impact on the environment and the lives of others through the promotion of positive social change in private enterprise. In this course, students explore and evaluate opportunities to create value through the development of new organizations that respond in sustainable ways to the needs of the micro-level community and the world at large. Students prepare to build new organizations that solve problems within a systems context. They gain hands-on experience drafting new venture plan outlines that focus on social and environmental entrepreneurship issues. Students assess and discuss planning, operations, and decision-making approaches from a
leadership perspective. They also build into their approach to planning, operations, and decision making a global awareness that begins within their local community and extends far beyond.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6700 - Introduction to Human Resource Management♦

(4 sem. cr.)
Students are provided with a comprehensive overview of human resource (HR) management in this course. Students explore the role of HR managers as strategic partners who focus on the mission and goals of an organization. Within the strategic and legal framework, they examine the remaining areas of HR management functions, including workforce planning and employment; human resource development; total rewards of compensation, benefits, and rewards; risk management of health, safety, and well-being; and employee and labor relations. Students examine the use of technology as a tool in providing HR metrics to measure outcomes. They also work toward gaining the skills that enable them to develop important employment- and HR-related policies and procedures, responsibilities inherent in HR functions, programs, and activities.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6701 - Strategic Human Resource Management

(4 sem. cr.)
In this course, students adopt a strategic view of human resource management programs in evaluating their alignment with organizational strategic goals for real-world problems. Students explore such concepts as human resource issues involved with mergers and acquisitions, global management of human resources, and high-performance systems required to achieve competitive advantage.
Prerequisites
  • MMSL 6700

MMSL 6730 - Strategies for Advancing Innovation and Technology♦

(4 sem. cr.)
Major fluctuations in the economy often force managers to make important, timely decisions that harness existing resources within their organization, leading to new developments and strategic advantage. In this course, students address important management challenges that are typical in today’s technology-based businesses. They learn ways to align business needs with technological solutions and identify new opportunities or applications for technology. Students have the opportunity to gain the requisite skills to manage processes that ensure technology solutions enhance an
organization’s competitive position.

Prerequisites
• MMSL 6540

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6731 - Strategies for Implementing Innovation and Technology

(4 sem. cr.)
In light of rapidly evolving technology, there are many factors involved in ensuring that businesses remain successful. Such factors involve understanding new technological capabilities and aligning them with the goals of a company and the needs of customers. Students in this course explore these factors and examine how managers make decisions to help ensure their company remains innovative and technologically adept. They examine the processes and tools involved in implementing new technologies and formulate solutions to overcome related challenges. In addition, students examine and discuss how technology solutions are affected when the context is global in scope.

Prerequisites
• MMSL 6630

MMSL 6740 - Entrepreneurship and New Venture Creation

(4 sem. cr.)
An important trend of which managers must be aware involves business organizations moving from a profit-only mentality to one in which they utilize their profits and other resources to enhance society. Students in this course explore entrepreneurial concepts and processes that apply to startup enterprises as well as those that are well-established with an innovative focus or entrepreneurial spirit. Students engage in coursework focused on market opportunity, risk management, change management, innovation, product development, financing and raising capital, intellectual property, and commercialization. They have the opportunity to apply these and related concepts to problems common in contemporary organizational contexts.

❖ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6741 - Building and Funding an Entrepreneurial Venture

(4 sem. cr.)
In this course, students continue to build their entrepreneurial skills and knowledge by addressing problems drawn from real-world organizations. Students analyze how the organization contributes to society (local, national, or international), how entrepreneurship and commercial activities affect the environment, and how the
potential of forming "glocalities" (a combination of individuals, business organizations, and political agencies) becomes more significant in the future in terms of working in unison to better society. Students also use case studies and other practical exercises to evaluate innovative funding sources and investigate the challenges involved in maintaining growth and sustainability.

Prerequisites

- MMSL 6640

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6750 - Foundations in Project Management♦

(4 sem. cr.)

Students are introduced to the art and science of project management as applied to different types of project situations. They learn about the tools, techniques, and methodologies used to lead a project successfully throughout the project life cycle. They analyze the role of the project manager as an integral administrator overseeing the execution, progress, and interaction of all parties involved. They explore the function of the project management office (PMO), project organizations, team building, project selection, and portfolio management. Exploring context through real-world problems, students learn how managers employ the scope of work, work definition, scheduling, risk management, control, and close out throughout the course of a project. In addition, students learn how project managers use requests for proposals (RFPs), proposals, and contracts to define a project clearly and safeguard their company.

Note: There is a special technology requirement for this course, requiring the use of Microsoft Project. The software will be provided in trial form, but there is not a Mac version available in this software. Students in this course are required to use Microsoft Windows XP or Server 2003 or later. Since Mac users may experience difficulty using the software, we recommend the following: (a) Mac users should be prepared to use a PC during this course, or (b) Mac users should purchase the appropriate software or hardware to be able to replicate the Windows environment on their Mac.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MMSL 6751 - Project Management Skills for Managers

(4 sem. cr.)

As organizations continue to grow in scope and size, so do their projects, requiring individuals with a unique and diverse set of management skills who are able to see a product through from conception to distribution. In this course, students delve deeper into the realm of project management to assess its impact on the business environment in a domestic and global context. Students examine the "soft" skills of project
management as the keys to improving its practice. In the context of real-world problems, they assess research and engage in practical simulations to determine best practices of project management in today's organizations.

**Prerequisites**
- MMSL 6650

**Note:** There is a special technology requirement for this course, requiring the use of Microsoft Project. The software will be provided in trial form, but there is not a Mac version available in this software. Students in this course are required to use Microsoft Windows XP, Server 2003, or later. Considering Mac users may experience difficulty using the software, we recommend the following: (a) Mac users should be prepared to use a PC during this course, or (b) Mac users should purchase the appropriate software or hardware to be able to replicate the Windows environment on their Mac.

**MMSL 6801 - Organizational Effectiveness and Leadership**

(3 sem. cr.)
Achieving measurable progress toward the organization's goals, or the degree to which the outcomes are achieved, is the meaning of organizational effectiveness. It is a key responsibility of human resource (HR) departments to plan for and support the organization's ability (both in terms of capacity and agility) to achieve the goals. HR has a leadership position in building organizational effectiveness, since capacity is directly proportionate to people and talent, and agility is directly related to how well an organization and a team responds to the need for change. Having the right people in the right positions and anticipating and filling gaps in key talent areas collectively lead to an organization's success. This course prepares the student with the skills to design and lead key organizational initiatives that both build its capacity and competitively position it for success.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MMSL 6905 - Capstone: A Case for Leaders as Change Agents**

(3 sem. cr.)
Leaders face all sorts of complex issues and opportunities to effect positive change that require well-thought-through solutions. To be effective, leaders must be able to analyze facts, assumptions, and theories and prioritize potential solutions. Students in this course apply their leadership skills and knowledge and build upon those to critically analyze a challenging leadership situation and create a vision for bringing about a better condition. Students integrate themes from the program as well as their own authentic leadership preferences and experiences to develop a leadership case study that will enable them to showcase their ability to put their transformational leadership capabilities into action.
MRKT 3001 - Marketing

(5 cr.)
Students examine basic marketing functions and the execution of successful marketing processes. They gain a fundamental understanding of marketing concepts, practices, terminology, associated technologies, and practical applications including customer relationship management.
Prerequisites
BS in Accounting
- BUSI 1001 or BUSI 1002
BS in Business Administration
- BUSI 1001 or BUSI 1002
BS in Communication
- BUSI 1001 or BUSI 1002
All Other Programs
- BUSI 1002

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 4501 - Marketing Management

(5 cr.)
Successful business strategies and policies depend on effective marketing management processes and knowledgeable leaders. Through this course, students have the opportunity gain the creative decision-making skills required to develop and implement strategic marketing programs. Students learn about fundamental concepts and elements of marketing, including marketing mix, channels of distribution, and industrial and international marketing. They evaluate current events and contemporary business case studies to develop a real-world understanding of the development, organization, implementation, and control of the marketing plan.
Prerequisites
- MRKT 3001

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 4502 - International Marketing

(5 cr.)
Keeping with the 21st-century shift to globalization, businesses often need to extend their services beyond their home country to keep a competitive advantage. In this course, students explore the cultural, legal, technological, and financial aspects of various
countries to understand the driving forces of marketing within a multinational framework. In addition, students learn to apply the tools of the marketing management process to the international environment. Through this course, students work toward gaining the strategic decision-making skills that professionals use to compete in the global marketplace.

Prerequisites
- MRKT 3001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

MRKT 4503 - Strategic Services Marketing♦

(5 cr.)
Marketing a service requires a different approach than marketing a traditional product. Services and products each serve different emotional, physical, and intellectual needs, so marketers must learn to present them strategically to consumers. In this course, students evaluate how service marketing differs from product marketing. They explore concepts such as the service marketing mix, total quality management, customer perceptions of services, and the pricing of services. They assess and discuss the role of pricing, the importance of adopting strategies, and the role of service environments. For a practical understanding of the service industry and marketing, students develop a comprehensive plan in the context of real-world service challenges.

Prerequisites
- MRKT 3001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

MRKT 4504 - Global Marketing

(5 cr.)
In this course, students examine foundational concepts in global marketing. Examples and cases cover both developed and developing markets. Topics include culture and marketing, global and local competitors, cross-cultural consumer behavior and research, and intercultural marketing communications.

Prerequisites
- MRKT 3001

MRKT 4505 - Hispanic Marketing in a Multicultural Context♦

(5 cr.)
Students address key issues in developing and implementing marketing strategies with an
emphasis on business environments that incorporate a Hispanic cultural perspective. Topics include relating marketing strategy to organizational strategy, research and forecasting approaches, competitive analysis, and implementation of marketing strategies.

Prerequisites
- MRKT 3001

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 4506 - Marketing Communication♦

(5 cr.) Developing targeted communication media (written, spoken, digital, broadcast, and printed) is necessary to specifically support the marketing initiatives and strategies of any planned effort. Students will use the tools and skills of integrated messaging, image clarity and enhancement, media relations, positioning, and persuasion. Basic principles are applied to evaluate successful and failed marketing communications efforts.

Prerequisites
- MRKT 3001

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 4511 - Marketing Communications♦

(5 cr.) Students in this course prepare to engage effectively in the practice of developing targeted communications—written, spoken, broadcast, and printed—that specifically support the marketing initiatives and strategies of any planned effort. Students hone their problem-solving and creative skills while practicing with marketing tools, such as integrated messaging, image clarity and enhancement, media relations, positioning, and persuasion. They use basic marketing principles to assess successful and failed marketing communications efforts and create a portfolio of useable approaches.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 4512 - International Marketing Communications♦

(5 cr.) Students in this course learn concepts to expand the scope of their marketing communications knowledge to include international breadth and depth. They address unique challenges, including culture, globally diverse markets, international regulation,
and media differences, while embracing the remarkable opportunity of international exchange. Using integrated marketing communications principles, students engage in practical applications of content, such as the planning, development, and implementation of a marketing communications campaign for the global market. Through these globally focused projects, students acquire the necessary awareness and essential skills to function within the international marketing arena.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 4513 - Media Planning and Purchasing♦

(5 cr.)
There is more to marketing a product or service than creating an engaging commercial or a colorful ad. A critical aspect of implementing a marketing plan involves deciding how to distribute the message, whom the message will reach, and through which media avenue the message is delivered. With the rise of technology and telecommunications, this task is becoming more and more challenging. In this course, students explore these challenges and become grounded in fundamental concepts of media planning, such as gross rating points and effective reach. They use modeling tools that allow them to see the effects of different media plans in putting into operation a media strategy as part of a larger plan. Ultimately, students learn to develop an effective plan with appropriate reach and impact.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 6100 - Integrated Marketing in the Digital Age

(3 sem. cr.)
Marketing strategies continue to change as a result of new and innovative digital opportunities. To remain competitive in today's fast-paced environment, organizations must have an integrated strategy. Students in this course explore a variety of marketing tools and platforms—both traditional and digital—and the role they play in a strategic marketing mix. Students will examine the role of marketing within an organization and learn how consumer insights and online behavior can influence product, price, distribution, and promotion. Course content also includes the coordination of mass, direct, and online marketing activities and channels; market analysis; and the challenges and opportunities that marketing technologies bring.

MRKT 6110 - Digital Marketing♦

(3 sem. cr.)
Through the use of digital marketing tools and strategies, organizations can assess how digital campaigns are performing and can respond in real time. The response may be
content change, keyword search modifications, or even budget allocations across channels. Digital marketing, however, relies on the marketer knowing advanced concepts and best practices for emerging media platforms to reach and influence consumers. Students can learn to assess online analytics and interpret performance results to determine campaign return on investment (ROI). Insights are provided about the best website design practices, as well as about the ways in which web-based tools support digital marketing, search engine optimization (SEO), online advertising, and the integrations of channels such as mobile, display, video, and social media.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 6120 - Relationship Marketing

(3 sem. cr.)
Discover how to foster consumer loyalty and increase customer retention through the application of relationship marketing. Throughout this course, students can explore ways to leverage Internet communication channels and technologies to engage, convert, and retain customers in both business-to-business (B2B) and business-to-consumer (B2C) markets. Additionally, students examine how to plan, design, and execute fully integrated customer relationship management (CRM) systems to get insight into customers' preferences, provide personalization, and provide targeted messaging automation. Other relationship marketing topics include database marketing across traditional and digital media, digital/social CRM, and customer experience management (CEM).

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 6130 - Communicating Using Social and Digital Media

(3 sem. cr.)
While some companies may still be asking, "Why should we care about social media?" most are now asking, "How can we leverage the power of social media?" In this course, students examine how social media has changed the way consumers interact with brands and apply elements of storytelling to develop a social media strategy for an organizational scenario. In addition, students explore issues of ethics, privacy, and media law that are heightened by social media and digital communication distribution. Topics include types of social media, audience appropriateness, reputation management, social media strategy, evaluation methods, and the communications regulatory environment, including media law and privacy.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 6135 - Harnessing the Power of Data and Information
Effectively using data and information can make the difference in whether the best decisions are made or problems are solved correctly. There are multiple approaches to practical managerial problem solving that are rooted in the systematic collection, analysis, and display of relevant data and information. In this course, students examine the importance of data, beginning with the process of transforming data into information, and then focusing on the best methods for presenting that information in support of sound and ethical decision making. Students evaluate common misinterpretations or errors in working with data and determine how to detect data and information presented in a deceptive manner. Students explore current paradigms in data-based decision making and problem solving. They learn how they can use these analytical-thinking practices to improve their general managerial decision-making skills.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MRKT 6140 - Market Research and Customer Insights**

Understanding consumer behavior is essential for developing and effectively marketing products and services. In this course, students can learn how to use customer data and insights to improve strategic marketing decisions and improve performance. Students have the opportunity to analyze factors that influence buyer behavior during all stages of the purchasing process and to consider how learnings can be translated into product strategy and related marketing decisions. Additionally, students will study market segmentation and targeting practices as key means of differentiation.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**MRKT 6150 - Marketing Communications, Storytelling, and Persuasion**

Whether one is addressing a customer, an audience, or a jury, the aim is to use the tools of persuasion to influence individuals to take action. Especially in social media, it is critically important to establish an appropriate tone, voice, and personality. Tying these strategies to the overall brand positioning is even more important. It has been found that storytelling is one of the most effective tools of persuasion. Rather than simply stating the facts, the story puts facts into a meaningful context, so that the consumer can understand and empathize with the characters in the story and, therefore, identify with the brand’s social media personality. In this course, students explore the elements of the story and the approaches used to develop content. Understanding the impact of individual channels on a strategy for integrated marketing communications and positioning allows the marketer to allocate budgets more effectively and efficiently.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
MRKT 6160 - Design Thinking: Strategy and the Creative Process♦

(3 sem. cr.)
The ability to marry creative artistry with the strategic business needs of the client is essential for success. In this course, students explore the concepts of design thinking, strategy, and the creative process as tools to solve business problems. Topics covered in this course include an overview of the design business landscape, understanding the creative brief, audience insight, and cultural awareness as foundational to the creative process. Students focus on developing creative, problem-solving approaches that are relevant to real-world business needs.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 6170 - Brand and Product Management♦

(3 sem. cr.)
Key differences exist between brand and product management, and, yet, both are crucial to the success of a product or service. In this course, students will explore the many elements of brand management, including brand architecture, the development and sustainability of the brand, brand positioning, and the perceived value of the brand. Students will analyze competitive information, and can learn to apply that knowledge in areas such as product differentiation. Throughout the course, students also will examine the critical business skills, tools, and techniques necessary for effective product management. Students will focus on the stages of a product's lifecycle, consumer demand and pricing, multichannel product management, and the fundamentals of profit and loss management.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MRKT 6900 - From Marketing Strategy to Execution♦

(3 sem. cr.)
How can a marketing plan help a business meet its goals and objectives? How can a marketing plan help capitalize on consumer insights and trends? How can the latest innovations and communication strategies be used to reach the target audience? In this course, students will be immersed in all aspects of developing a comprehensive 3-year marketing plan that aligns with an organization's business strategy and helps marketers make better decisions about their products, services, customers, brand, and competition. Students can learn to apply best practices for market segmentation, consumer insights, competitive analysis, brand positioning and strategy, and consumer acquisition and retention strategies, as well as developing tactical ideas for each strategy,
and providing financial justification for the plan.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6010 - The Passion to Teach

(1 sem. cr.)
Teaching is among the most valuable and meaningful professions an individual can choose; yet, given the nature of the modern educational climate, it is also one of the most challenging. Educators in this course explore the definition of professionalism, examine the challenges of today's classrooms, and discuss what it means to be a professional in today's learning environment. This course is designed to reignite educators' passion for teaching and to support the development of skills for graduate-level online learning.

MSED 6015 - Communicating Professionally

(1 sem. cr.)
Educators explore what it means to participate in a culture of scholarship and utilize the many resources that Walden provides to ensure academic success. Through the development of their own research-based philosophy of education, education professionals deepen their written communication skills, their confidence in expressing ideas in an effective manner, and their ability to distinguish popular from peer-reviewed resources. Educators also strengthen their knowledge of APA Style and formatting techniques.

MSED 6020 - Planning for Professional Growth

(1 sem. cr.)
Effective teachers are leaders who make a positive difference in classrooms, schools, and society. They are also lifelong learners who remain current in research-based educational resources, advancements, and practices. In this course, educators are introduced to the standards, dispositions, and proficiencies guiding the practices of teacher-leaders and engage in self-reflection of their own teaching experiences. By defining their professional identities and synthesizing resources, education professionals create individual learning and professional goal plans outlining what they want to know and be able to do at the conclusion of their master's degree journey.

MSED 6025 - Exploring Diversity in the Learning Environment

(1 sem. cr.)
In today's learning environment, global awareness is increasingly important, and educators need to demonstrate leadership and cross-cultural skills to set a positive example for students, families, and colleagues. Educators in this course use scholarly
resources to identify and critically think about issues related to diversity in classrooms, schools, and communities. They engage with interactive case scenarios and assess their own beliefs related to serving diverse student groups and their families.

MSED 6030 - Meeting the Needs of Diverse Learners

(1 sem. cr.)
Education professionals in this course explore culturally responsive teaching practices; the value of adapting the learning environment for multiple diverse populations; and strategies for collaboration with colleagues, families, and communities. Dynamic teachers meld student background experiences with differentiation strategies in order to engage all learners in high-quality learning experiences. In this way, educators ensure more equitable access for all learners and promote positive social change. They analyze demographic data, identify an underserved population, assess their personal diversity proficiencies, and apply key concepts of diversity to develop a Diversity Project for their current school setting.

Prerequisites
- MSED 6025

MSED 6035 - Teachers as Social Change Agents

(1 sem. cr.)
In this course, educators examine the concept of positive social change and analyze the impact it has on local, state, and national learning environments. Advocating for positive social change can start in the classroom but should expand to the educational community and beyond. Therefore, educators work toward becoming a social change agent by aligning Walden University’s mission with their own beliefs about student learning, investigating challenges in their current school setting, and developing a social change action plan for their local educational environment.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6110 - The Collaborative Educator

(1 sem. cr.)
Leadership and collaboration are core competencies for today’s teachers and are skills educators must embrace and continually refine. Educators in this course assess their communication style and examine the benefits and challenges of leading and collaborating with others to maximize the learning potential of every student. By practicing their leadership and collaborative skills using interactive simulations, education professionals apply the skills and dispositions that foster leadership and produce collaborative relationships with colleagues and families.

Students may take this as a non-degree course, which means they do not have to be enrolled in a...
MSED 6115 - Designing Engaging Instruction♦

(1 sem. cr.)
Teachers ensure continuous improvement for student learning through attention to the relationship among classroom curriculum, instruction, and assessment. In this course, educators build upon their skills in designing and differentiating instruction and add effective strategies for doing so to their professional library. They analyze a variety of learning theories, learner variables, and data-informed practices to design standard-based plans for P–12 classroom curricula that meet the diverse learning needs of their students.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6120 - Enriching Learning With Technology♦

(1 sem. cr.)
Technology is changing how individuals learn, work, and live faster than they have ever changed before. A technology that is new today will be obsolete in a few years. How do educators keep up with new technologies in order to enrich learning in their classrooms? In this course, education professionals examine the future of technology-based teaching and learning, discover promising trends, and explore instructional strategies and tools to facilitate content area literacy and learning. They investigate the technology-related challenges in their own school setting and develop grant proposals to change initiatives in their classroom.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6125 - Differentiating by Design♦

(1 sem. cr.)
Multiple strategies are often needed to differentiate instruction for all learners. Strategies often need to be adjusted from lesson to lesson; and, as teachers today know, not all strategies work for every student, every time. In this course, educators explore the practice of differentiating instruction by content, process, and product as a way to meet students’ diverse learning needs. Applying the concepts of universal design for learning and their classroom curriculum, education professionals plan and implement a lesson differentiated by content, process, and product with their students.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6130 - Increasing Student Engagement♦
To optimize student achievement, effective teachers create learning environments that are engaging, supportive, and respectful, and that foster positive relationships with P–12 students and their families. Educators explore and implement strategies to motivate and engage students at the individual level to optimize learning. By reflecting on their current skills, analyzing current educational theories, and creating tools to support classroom management, educators gather additional resources to support increased student engagement and motivation and to build positive relationships in their educational settings.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

MSED 6135 - Effective Behavioral Interventions♦

(1 sem. cr.)
Just as teachers must implement strategies for managing dynamic classroom systems to create clear and consistent expectations, so must they include strategies to address individual student behavior needs. Educators are called upon as professionals to observe and assess behaviors in order to create behavioral interventions for learners in any classroom setting. In this course, education professionals engage with case scenarios to analyze student behaviors and offer support to colleagues. Throughout the course, educators implement behavior strategies and interventions and create a customized behavior support system for one student that will serve as a model for learners in their current school setting. They develop professional development resources using evidence-based practices for improving behavior to share with colleagues and to add to their professional library.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

MSED 6140 - Designing Data-Driven Instruction♦

(1 sem. cr.)
When teachers are data literate, they inform their professional practice by providing a strong support for meaningful classroom change based on a school environment of data use. In this course, educators explore the meaning of data literacy, assess whether their educational settings are data literate, and examine how they currently use data to drive instruction. Education professionals investigate various methods and strategies for using data in their classrooms to plan and design instruction and to support student performance.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

MSED 6145 - Inquiry-Based Teaching and Learning♦
Inquiry-based teaching strives to ignite student curiosity about the world. It is used to shift learning to be more student-focused and promotes student engagement. The development of stimulating questions plays a key role in this approach to teaching and learning. In this course, educators examine student-directed learning and inquiry-based teaching strategies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6150 - Implementing a STEM Approach

While the concept of STEM education is not new, the concept of integrating science, technology, engineering, and math principles as a part of daily practice continues to evolve and looks different in each classroom, school, and district. Foundationally, implementing a STEM approach requires a change in how teachers teach and learners learn; therefore, how educators apply STEM principles in the classroom depends on the educators themselves and the learning needs of their students. In this course, educational professionals explore STEM teaching and learning strategies and the shifts in pedagogy and attitude required to implement a STEM approach. Educators also explore pedagogical models designed to inspire innovative thinking and how STEM principles can be used to advocate for and affect social change in the classroom and community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6155 - Fluencies for the Digital Generation

Today’s ever-changing and emerging technologies are transforming society: how people live, how business is conducted, and how digital natives learn. For students to be successful in the digital landscape, they will need to acquire proficiency in the digital literacies, or fluencies, of solution, information, creativity, media, and collaboration. In this course, educators redefine what it means to be literate in today’s technology-rich world and explore how to implement strategies supporting each fluency for digital natives in their classrooms. Through the development of a Fluency Project, they explore the use and application of various technologies to enhance learning and support collaborative problem-solving.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6160 - Understanding English Language Learners
Students have always had diverse learning needs, but today’s classrooms—with K–12 students from a wide array of linguistic and cultural backgrounds and experiences—are more diverse than ever before. Educational professionals examine concepts of culturally responsive teaching, language acquisition, and psychology to better support English language learners. They explore ways to create a learning environment that values all linguistic and cultural backgrounds, supports language development and acquisition, and ultimately enhances the learning of all students. Through an interactive case scenario, educators apply strategies to learn about a student’s language, culture, and community, and add resources to their professional library on supporting linguistically diverse students.

**MSED 6165 - Teaching English Language Learners**

Making academic content accessible and comprehensible for English language learners requires K–12 teachers to know and be able to execute specific strategies. Educators in this course apply practical strategies to support English language learners’ academic language development so they can achieve a high degree of proficiency in listening, speaking, reading, writing, and vocabulary in English-language learning environments. Through the development of professional development materials, education professionals examine current research and strategies to prepare lessons that integrate both content and literacy objectives to better enhance the English language development of English language learners in general classroom settings.

**MSED 6170 - Advocacy in Education**

In the ever-changing educational landscape, if teachers are not one of the voices in support of learners, who will be? In this course, educators explore the importance of speaking on behalf of students when educational needs are not being met. By examining research and collaborative dialogue, education professionals explore strategies for advocacy and what it means to be an advocate in the field. Educators challenge themselves to be innovative and transformative in how they think and act regarding how their students learn and the impact of advocacy on families and the school community at large.
MSED 6175 - The Ethical Teacher–Leader♦

(1 sem. cr.)
Educators not only teach, they lead. Developing teacher leadership skills is an important component of positively impacting student success, not only in an individual classroom but also in a school and in learning communities. In this course, education professionals engage in personal assessment to cultivate the dispositions and attitudes of a teacher–leader and explore avenues for improving professional practice to share strategies with colleagues. Through a simulated ethical dilemma, educators examine their core values and beliefs regarding ethics as a teacher and leader in their school community.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6180 - The Trauma-Informed Educator♦

(1 sem. cr.)
In this course, educators examine the effects of trauma-causing events and situations on learners and families within schools and communities and what they can do to support students and their learning while recovering from trauma. Education professionals explore the cultural and ethical issues related to trauma within the school setting and strategies to support the psychological needs of students who experience trauma.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6185 - Literacy in the Primary Grades (P–3)♦

(1 sem. cr.)
Building a strong foundation of literacy skills and experiences in young children is critical to their success in school and life. In this course, educators examine the characteristics and essential literacy concepts of emergent and beginning readers and writers and current tools to support the literacy development of learners in preschool through third grade. Education professionals analyze appropriate developmental, research-based methods for meeting student needs and apply them to their own classrooms to build an effective literacy environment for emergent and beginning literacy learners.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6190 - Literacy Growth in Grades 4–6♦

(1 sem. cr.)
Grades 4–6 can present unique challenges and opportunities for literacy learning. Education professionals evaluate research-based instructional and assessment practices to help actively engage students in further literacy growth and achieve literacy goals. In
this course, educators focus on adding effective strategies to their professional library on supporting writing about texts, academic vocabulary, listening and speaking, and the use of technology for content-area reading. They consider how to incorporate different levels, types, and genres of text to support all students’ learning and literacy development.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6195 - Reading Interventions

(1 sem. cr.)
Today’s classrooms require teachers to become competent and confident in supporting both students who struggle with reading and writing and those who excel. Education professionals in this course focus on accelerating the literacy development of learners with reading difficulties—including students with exceptionalities—and on addressing the needs of gifted students. Throughout this course, educators examine informal and formal reading assessments, consider how to use data to inform reading instruction, and develop a plan to create positive changes in literacy instruction that will impact students’ learning in school and at home.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6200 - Developing Cognitively Demanding Mathematical Tasks

(1 sem. cr.)
Preparing students to be mathematically literate in today’s world is an important undertaking. To foster high levels of learning and achievement in mathematics, teachers must have a deep understanding of mathematical concepts and know how best to teach them. In this course, educators examine the characteristics of high-level, cognitively demanding mathematical tasks to meet the challenges of today’s high standards and foster student learning. They explore authentic and engaging mathematical experiences, including mathematical modeling, representing mathematical ideas in multiple ways, and identifying and addressing student misconceptions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6205 - Orchestrating Mathematical Discourse

(1 sem. cr.)
Today’s headlines emphasize the need to prepare students for science, technology, engineering, and mathematics (STEM) careers; yet preparing students to be mathematically literate in today’s world is a heavy charge. Learners must know how to think mathematically, be critical consumers of information, collaborate with others to
reach common goals, and apply mathematical skills and understanding to tackle atypical, real-world problems. Educators in this course explore practices to orchestrate meaningful mathematical discussions in the classroom that engage students' intellect, stretch their thinking, increase their mathematical understanding, and expand their toolkit for solving everyday problems.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6210 - Developing Resilient Learners

(1 sem. cr.)
The ability to recover and endure when facing challenging situations is defined as resilience. In this course, educators examine the current literature and strategies for supporting students in developing resiliency and grit. They explore the impact they can have on increasing resiliency in students, including classroom strategies, interpersonal skills, and family outreach.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSED 6901 - Capstone I: Defining the Action Research Question

(1 sem. cr.)
Educators in this course explore the action research process as a meaningful and vital aspect of the teaching profession. When education professionals hear the word research, it often conjures images of endless statistical analysis and long hours poring through journals and books on a given topic. Not surprisingly, these images may deter education professionals from engaging in research. Here, teachers are presented with concepts needed to conduct research in their own classrooms or schools and to enact positive social change. They begin the action research process by identifying a current issue or problem in their classroom or school setting, writing a literature review, and refining research questions.

MSED 6902 - Capstone II: Planning for Action Research

(1 sem. cr.)
Education professionals use action research to positively impact P–12 student learning in a variety of ways. They address relevant problems, become involved in collaborative inquiry, use data and research to inform their practice, improve P–12 student academic success, and contribute to positive social change in their classrooms and school environments. Educators in this course continue the action research process by drafting research plans, finalizing research questions, and planning for data collection.

Prerequisites
- MSED 6901
Note: Capstone I and II cannot be taken concurrently.

**MSED 6903 - Capstone III: Reporting on Action Research**

(1 sem. cr.)
In this course, education professionals collect and analyze student data, implement data-informed decisions to guide instructional planning, and engage in reflective practices to ensure continuous improvement and enhance professional growth. They complete the action research process by finalizing their action research and literature reviews, interpreting data, and outlining the impact of action research on future practices in their classrooms and social change in their school community. They do so as part of an inquiry and recursive process, one where professionals continuously evaluate and validate their findings to improve action research plans.

**Prerequisites**
- MSED 6901
- MSED 6902

Note: Prerequisites must be completed prior to enrollment in MSED 6903.

**MSEM 5100 - Critical Issues in Emergency Management**

(5 cr.)
Students in this course examine the theories and concepts underpinning contemporary emergency management and how to understand the phenomena of natural and human-caused disasters. Students examine the historical context of emergency management, the general process of risk assessment, the emergency management cycle, communications within emergency management and crisis planning, and the general policy and legal framework surrounding the process of emergency management in the United States with a focus on the National Incident Management System (NIMS). Case studies of major catastrophes are used to explore contemporary and practical hazard management. Students can complete the FEMA Emergency Management Institute courses IS-100.b - Introduction to Incident Command System and either IS-800.b - National Response Framework: An Introduction or IS700.a - National Incident Management System as part of this course. Nationally recognized certificates are awarded for successful completion of FEMA courses.

**MSEM 5363 - Public Safety Issues**

(5 cr.)
In consideration of technological innovation, terrorism, and other modern factors, threats to the American public are changing, thus requiring professionals who have the ability to identify, plan for, and mitigate crime and disaster incidents. In this course, students examine foundational public safety concepts and investigate issues faced by
public safety agencies and personnel at the local, state, and national levels, including police and sheriff, emergency medical services, fire services, and related organizations. They explore and discuss the ways in which public safety organizations communicate and coordinate, and they learn why effective interaction is vital to emergency management. They also have the opportunity to gain practical experience employing tools used by public safety professionals, such as a public safety constituency matrix through which they assess competing demands on the various agencies. In this course, students work toward gaining the skills necessary to anticipate the needs of various constituents to develop effective public safety initiatives.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

MSEM 5364 - Managing Public Safety Organizations♦

(5 cr.)
Public safety leaders are responsible for finding solutions to major issues confronting their community and organizational operating systems through research, analysis, planning, and decision making. In this course, students assess these tools and solutions to learn the intricacies of managing public safety organizations. They engage in written assignments and discussions on a variety of topics, such as systems approaches, environmental analyses, contingency planning, implications for change, coordination, and controls. Students explore ways to apply classic business management techniques and leadership principles to public safety operations. They also apply concepts presented in the course to the development of solutions and alternatives to varied situations confronting public safety managers. Additionally, students learn about the concepts of "first planner" and "first responder."

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
