A Message for Students

Dear Students,

We are so glad that you selected Walden as your learning partner and that you are part of our community. Our single focus is on helping you be successful—as a student, graduate, and contributing member of your profession and community. From our founding in 1970, Walden has been committed to providing the best education for working professionals like you.

As you look through this catalog, I hope you don’t think of it as only a list of courses, but as a resource for your educational journey. It is important for you to know that the program requirements in your Program of Study and published in the catalog at your time of admission are the ones you need to follow. Our student handbook contains our policies and procedures on academic progress, support services, student expectations and responsibilities, and other topics. Be sure to check out the "What’s New?" page for significant changes to our programs.

Throughout your journey toward graduation, please remember that you are never alone. The faculty and student support teams here at Walden have you at the center of everything they do. They are committed to your success. Reach out to them when you have questions or need guidance or advice on advancing your goals. We've seen what our alumni have accomplished, and we want the same for you.

We value your time with us and the trust you put in Walden to challenge your mind, unlock your potential, and make it possible for you to achieve your goals. We all look forward to your success.

Personally, I look forward to conferring your degree and seeing how you use it to improve your career and your community.

Sincerely,

Sue Subocz, PhD
Provost and Chief Academic Officer
Information in this version of the Walden University Catalog and Student Handbook is effective as of February 28, 2022.

Walden University is accredited by the Higher Learning Commission.

Walden University practices a policy of nondiscrimination in admission to, access to, and employment in its programs and activities. Walden does not discriminate on the basis of race, color, sex, age, religion or creed, marital status, disability, national or ethnic origin, socioeconomic status, sexual orientation, or other legally protected status.

Walden is committed to providing barrier-free access to its educational services and makes appropriate and reasonable accommodations when necessary. Students requesting accommodations per the Americans with Disabilities Act (ADA) must contact Student Wellness and Disability Services at disability@mail.waldenu.edu (1-800-925-3368, ext. 3121205; or visit the Student Wellness and Disability Services website).

Walden University publications, including the Catalog and Student Handbook, represent current curricula, educational plans, offerings, requirements, tuition, and fees. These may be modified or discontinued from time to time in the university's sole discretion to carry out the university's purposes and objectives. Neither the provisions of this document, nor the acceptance of students through registration and enrollment in the university constitutes a contract or an offer of a contract.

About the Catalog

The Walden University Catalog and Student Handbook are continuously updated online. The most recent version of the catalog is the default publication, but students can access the current handbook or other catalogs and university guidebooks by opening the drop-down menu in the upper-right corner of this page and making a selection. Older catalogs are available by selecting the "Archived Catalogs" link in the right navigation pane.

Students are subject to the policies and procedures described in the most current Walden University Student Handbook, regardless of the academic year in which they were admitted. Students are subject to the degree requirements in the catalog for the academic year in which they were admitted. The university reserves the right to change any provision, offering, requirement, or fee at any time within the student’s enrollment period.

Students are encouraged to provide feedback about the catalog and handbook or any suggestions for improvement by sending their comments to catalog@mail.waldenu.edu.

Students should contact their student success advisor with any questions about information in the catalog or handbook.

For noncatalog questions or assistance, see the Contact Us page for access to Chat, FAQ & Help Center, phone numbers, and addresses. Students may also request support via Chat in the "Help" section of their MyWalden portal.

The faculty and staff of Walden are here to help students succeed in their academic pursuits.

The Catalog

The Walden University Catalog is available electronically only on this website. Updates are made to the online version continuously. Students are encouraged to routinely check the site for new or supplemental information. Students should contact a member of the Student Success Advising Team or the program directors for clarification of specific academic program requirements.

Students who are admitted for, and enrolled during, the 2021–2022 academic year are subject to the degree requirements described in this Walden University Catalog. The university reserves the right to change any provision, offering, requirement, or fee at any time within the student’s enrollment period. Neither the provisions of this Walden University Catalog nor the acceptance of students to the university through the admission, enrollment, and registration processes constitutes a contract or an offer of a contract. The university further reserves the right to require a student to withdraw from the university for cause at any time.
The Student Handbook, Tempo Learning® Addendum, and University Guidebooks

The Walden University Student Handbook includes Walden’s current academic calendar for both quarter- and semester-based programs, university policies, procedures, and resources.

The Tempo Learning® Addendum to the Walden University Student Handbook contains information for students enrolled in or considering enrollment in Walden’s competency-based Tempo Learning® program. The student handbook contains general policies and procedures for all Walden students; the addendum includes any additional policies or those specific to students in the Tempo Learning® program.

The University Guidebooks are published resources posted on this site to help students through their programs, including how to prepare a dissertation or a doctoral study.

Access all publications using the drop-down menu in the upper-right corner of this page.

100 Washington Avenue South, Suite 1210
Minneapolis, MN 55401
Phone: 1-612-338-7224 or 1-800-WALDENU (1-800-925-3368)
Fax: 1-612-338-5092

Administrative Offices
7080 Samuel Morse Drive
Columbia, MD 21046
Phone: 1-866-4WALDEN (1-866-492-5336)
Fax: 1-410-843-8104

Walden University website: https://www.waldenu.edu/

We understand that sometimes you would like to speak to a faculty or staff member face to face; however, Walden’s academic offices are primarily for staff, faculty, and leadership to coordinate the day-to-day operations of the university and are not designed to accommodate student visits.

If you would like to meet your faculty or a staff member in person, Walden does offer local events where you can meet university representatives who are available to answer your questions. Please visit our News and Events page for more details.
Should a more pressing concern arise, please follow prescribed procedures as detailed within this handbook or your online classroom. Our Student Success Advising Team is also available to assist you Monday through Friday, 7 a.m. to 7 p.m. Central time at 1-800-WALDENU (1-800-925-3368).
What's New?

Listed below are the new courses, programs, concentrations, specializations, and certificates included in this version of the 2022–2023 Walden University Catalog. Also listed are those courses, programs, concentrations, specializations, and certificates that have changed significantly and the date that those changes take effect. Unless otherwise noted, all information in this catalog is effective as of February 28, 2022.

Changes remain listed on "What's New?" from the date of the change until publication of the next catalog version. The Walden University Catalog is continuously updated online. The most recent version of the catalog is the default publication. See About the Catalog.

- Updated layout reflecting the new college structures
- Removed Illinois from State Authorization and International Approval Statements
- Updated PhD programs to reflect Residency 4 track options
- Added Post-Master’s Certificate in Pediatric Nurse Practitioner Primary Care
- Removed Alabama state disclaimer from educator preparation programs.

Courses

- HUMN 9100D - DHS Capstone – Updated title (previously Capstone: Leadership and Program Evaluation)

Introduction

About Walden University

Walden University is an accredited institution that for 50 years has provided an engaging learning experience for working professionals. Our mission of producing scholar-practitioners has attracted a community of extraordinary students and faculty, all sharing a common desire to make a positive social impact—to make a difference.

Highlights of Walden's commitment include:

- **Diverse and comprehensive core curriculum:** Walden University provides students the intellectual foundation necessary to see the interrelationships among the central ideas and means of expression that are specific to the disciplines. This foundation supplies a context for knowledge and makes possible the cross-fertilization of ideas to enhance creativity, innovation, and problem-solving.

- **Student-centeredness:** Our faculty and staff are devoted to helping students balance their education with their personal and professional lives. Walden's library, tutoring, and other student services also provide essential resources.

- **Real-world application:** Degree programs are developed by scholar-practitioners who continually assess courses to make sure they are current and relevant.

- **Positive social change:** We believe that knowledge is most valuable when put to use for the greater good. Students, alumni, and faculty are committed to improving the human and social condition by creating and applying ideas to promote the development of individuals, communities, and organizations, as well as society as a whole.

- **Scholar-practitioner model:** Our goal is to help students become scholar-practitioners by challenging them to integrate scholarly research with their own expertise as skilled practitioners in their fields.

History

"I learned this, at least, by my experiment: that if one advances confidently in the direction of his dreams, and endeavors to live the life which he has imagined, he will meet with a success unexpected in common hours."
"Evidence for the failure of higher education is all around us," wrote Harold L. "Bud" Hodgkinson in a 1969 issue of the journal *Soundings*. "Many of our brightest students are telling us that higher education is insulating them from reality rather than assisting them to peel off its infinite layers." Though more a critique of the academy than a blueprint for a new institution, "Walden U: A Working Paper" helped inspire the university that bears the name made famous by Henry David Thoreau.

As Hodgkinson was writing about the need for change in higher education, two New York teachers, Bernie and Rita Turner, fresh from graduate work at the New School for Social Research, were becoming interested in effecting social change by developing a new kind of institution for higher education: one that focused on significant problems affecting society from the vantage point of the professional and one that permitted professionals the opportunity to continue working while earning a degree. Thus, Walden University was born.

Walden began by offering a Doctor of Education (EdD) degree focused on dissertation research for midcareer professionals who had postponed finishing their doctoral degrees. Conferring its first degree in 1971 and implementing a formal curriculum in 1977, Walden provided learner-centered programs to professionals in education, business, and government who pursued doctoral degrees in related disciplines, including health and human services. In 1982, Walden's academic office moved from Bonita Springs, Florida, to Minneapolis, Minnesota, in an effort to gain accreditation in a region that nurtures innovative education. The North Central Association of Colleges and Schools granted Walden University full regional accreditation status in 1990.

After more than 20 years with the university, satisfied that it was well-established, the Turners decided it was time to move on. Don Ackerman, a partner in a venture capital firm in Florida, became the university's owner and chair of the board in 1992. It was at this time that today's Walden began to emerge as an online university with curricula that emphasized a scholar-practitioner philosophy: applying theoretical and empirical knowledge to professional practice with the goal of improving organizations, educational institutions, and whole communities.

To further advance access to higher education, in 1995, Walden offered its first master's degree, the Master of Science in Educational Change and Technology Innovation. The web-based PhD in Psychology program was introduced in 1997, and after a rigorous 2-year self-study process, the North Central Association reaccredited the university for 7 years in 1998.

In February 2002, following the transfer of majority interest in Walden University from Ackerman to Sylvan Ventures, the university began changing from a graduate institution
to a comprehensive university, offering bachelor’s, master’s, and doctoral degrees. In 2004, Ackerman sold his remaining interest in Walden to Laureate Education, Inc. (formerly Sylvan Learning Systems, Inc.).

In January 2005, Walden University merged with National Technological University, an online engineering graduate school also owned by Laureate Education, Inc., providing the university reach into another major profession in need of access to high-quality education. With this change in ownership, the university made significant improvements in its infrastructure, its faculty, and its student services. Walden was reaccredited by the North Central Association for another 7 years in 2005. The university’s curriculum for the master’s program in nursing was accredited by the Commission on Collegiate Nursing Education (CCNE) in 2006.

Each year, the university continued to expand its offerings, with new programs added in education, psychology, healthcare, public administration, and management. In 2008, Walden named its College of Education in honor of Richard W. Riley (the former secretary of the U.S. Department of Education) and launched teacher preparation and special education endorsement programs.

To support its mission to increase access to higher education for working adults, in 2008 Walden launched full bachelor’s programs in such areas as business administration, child development, and psychology. Walden also created a third online peer-reviewed journal: the Journal of Social, Behavioral, and Health Sciences. Similar to Walden’s other two journals, the Journal of Social Change and the International Journal of Applied Management and Technology, this journal promotes research findings and encourages dialogue between scholars and practitioners.

In 2009, Walden’s MS in Mental Health Counseling received accreditation by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Walden also introduced additional technology to better address the needs of its students. Services include a fully digital library, a Career Services Center with practical online tools, Virtual Field Experience (VFE®), and MobileLearn®, which enables students to download course content for use on mobile devices.

In 2010, Walden celebrated its 40th anniversary. The CCNE granted accreditation to Walden’s Bachelor of Science in Nursing (BSN) Completion Program in its first year of eligibility and reaccredited the Master of Science in Nursing program for 10 more years. Also in that year, Walden awarded Nelson Mandela an honorary doctorate degree.

The PhD in Management, Master of Business Administration (MBA), and BS in Business Administration programs were accredited by the Accreditation Council for Business Schools and Programs (ACBSP) in 2011. That same year, President Bill Clinton addressed more than 4,700 graduates from 39 countries at Walden’s 46th Commencement Ceremony, saluting their commitment to higher education while urging them to turn good intentions into positive change.
In 2012, Cynthia G. Baum, PhD, was named the ninth president of Walden after serving as vice president of the College of Health Sciences and the College of Social and Behavioral Sciences and, more recently, as executive vice president of Walden. The Richard W. Riley College of Education and Leadership received accreditation by the National Council for Accreditation of Teacher Education (NCATE), which was considered a significant milestone in Walden’s more than 40-year history of educating educators. Continuing the commitment to high-quality education, the Doctor of Business Administration (DBA) program was accredited by ACBSP.

The year 2013 was significant for several reasons: The Higher Learning Commission (HLC) reaffirmed Walden University’s accreditation for 10 years, the maximum period of time granted. The next reaffirmation of accreditation is scheduled for 2022–2023. Walden also marked a milestone as it celebrated its 50th Commencement Ceremony on Saturday, August 17, 2013, at the Minneapolis Convention Center, with more than 600 graduates and 2,800 guests. The newest alumni were part of a graduating class of nearly 6,000 students representing 50 U.S. states and 65 countries who had completed their bachelor’s, master’s, doctoral, or education specialist degree programs at Walden during the prior 6 months. Also, Walden University’s dedicated day of service to others—a tradition of carrying out its mission of positive social change—became Global Days of Service, a week-long international event.

Additionally, the Doctor of Nursing Practice (DNP) program, in its first year of eligibility, received professional accreditation from the CCNE, and the BS in Information Technology program was accredited by the Computing Accreditation Commission (CAC) of ABET.

In July 2014, Walden celebrated its 52nd Commencement with its largest graduating class in attendance. Dr. Condoleezza Rice, former secretary of state, addressed more than 1,100 graduates and 5,500 guests, faculty, administration, and staff. Rice received an honorary Doctor of Humane Letters, honoris causa degree, from Walden. The newest alumni included the first graduates from the Executive Master of Business Administration (EMBA) program and were part of a graduating class of nearly 5,500 students representing all 50 U.S. states and more than 70 countries.

The PhD in Counselor Education and Supervision and MS in Marriage, Couple, and Family Counseling programs were accredited by CACREP. These programs joined the university’s already accredited MS in Clinical Mental Health Counseling program, making Walden one of the few institutions that offers these CACREP-accredited counseling programs online.

The year 2015 marked Walden’s 45th anniversary. Jonathan Kaplan became Walden’s president, and the university continued its trend of forward-thinking education by introducing Tempo Learning®, a self-paced, competency-based education experience. Walden’s first program to utilize this format was the MS in Early Childhood Studies.
In 2016, Walden University’s School of Social Work and Human Services was officially renamed the Barbara Solomon School of Social Work and Human Services to honor Dr. Barbara Solomon for her contributions as a social work professional and scholar throughout her 50-year career. Dr. Solomon’s research and work have focused on improving social and mental healthcare services for underrepresented populations. As a board member, she has been an integral advisor for Walden’s social work and human services programs.

Walden University achieved another milestone when our Master of Social Work (MSW) program earned accreditation from the Council on Social Work Education (CSWE)—making Walden the first fully online institution to offer a CSWE-accredited MSW program. Graduating from a CSWE-accredited program is required for licensure in most states and helps our MSW graduates advance in their field.

For Walden’s undergraduate students, 2016 was also a pivotal year. The College of Undergraduate Studies became the Center for General Education (CGE). This shift allows students to focus more intensely on their particular discipline while enabling our educators and administrators to develop exemplary general education courses.

Walden continued its history of innovation in 2017 by launching a Consulting Capstone project option in its Doctor of Business Administration (DBA), PsyD in Behavioral Health Leadership, and Doctor of Education (EdD) programs, providing students with an alternative to the traditional doctoral study that allows them to gain real-life experience by consulting with nonprofit organizations and small businesses. Walden’s MS in Addiction Counseling and MS in School Counseling programs received accreditation from CACREP. Walden also established the Walden University Center for Social Change, a connective hub promoting, facilitating, and supporting a wide range of social change initiatives from research to direct action. Walden celebrated commencement with former Maryland Senator Barbara Mikulski and former NAACP president and CEO Benjamin Jealous as speakers.

In 2018, the university achieved renewal of its Certified B Corporation status. Walden also expanded its Tempo Learning® programs to include a Bachelor of Science in Nursing (RN-BSN) completion program and a BS in Early Childhood Studies non-licensure program.

In 2019, Dr. Ward Ulmer was named the university’s 11th president. He is a graduate of Walden’s PhD program and had been a leader at the university for 7 years. Walden also hired its first vice president of diversity, equity, and inclusion. Walden earned accreditation from the Council for the Accreditation of Educator Preparation (CAEP). The university’s Master of Public Health program earned accreditation from the Council on Education for Public Health (CEPH), and the Bachelor of Social Work program was accredited by CSWE.
In 2020, Walden celebrated its 50th anniversary and continued to empower learners and to promote positive social change—50 Years of Empowering the Greater Good. As part of the anniversary celebration, Walden hosted the Talks for Good series of social change mission-inspired panel discussions focused on educational issues and solutions and involving thought leaders, community members, and Walden faculty, students, and alumni. Walden also partnered with alumni around the United States for special service projects in local communities. Adjusting to the COVID-19 pandemic with an abundance of caution and precaution, Walden pivoted from in-person commencement ceremonies to host a virtual graduation celebration in Summer 2020 as well as altering all residencies to virtual experiences. Also in 2020, Walden’s College of Management and Technology (CMT) and School of Management earned a Silver Achievement Award from ACBSP. Walden is the first recipient of this award, which is given to institutions for demonstrating performance excellence and serving as a role model for excellence in higher education.

In 2021, Walden’s Master of Science in Nursing (MSN) program received a 10-year accreditation extension through December 31, 2030, from the CCNE. With greater emphasis on undergraduate education, the Center for General Education became the School of Interdisciplinary Undergraduate Studies. In August 2021, ownership of Walden transitioned from Laureate Education to Adtalem Global Education. Walden and Adtalem share a mission of providing access to quality higher education with a focus on service to communities and the underserved. Both are dedicated to education for students of diverse backgrounds and experiences, and together will provide the nation with diverse graduates who have the talent and skills to answer workforce needs and a passion for advancing positive social change.

In 2022, Walden restructured its academic organization to create significant social change by aligning to address healthcare inequities using an accepted framework – the social determinants of health (SDoH). The "Healthy People 2030 (SDoH)" framework developed by the U.S. Health and Human Services gives Walden a powerful way to view how it prepares adult learners to think holistically about how they make a difference. This new organization consists of two distinct but related divisions: Healthcare Access and Quality and Social Supports for Healthy Communities. College names were also updated to better align with the new divisions and some programs were moved to new colleges. Within the division of Healthcare Access and Quality lives the College of Nursing, College of Social and Behavioral Health, and the newly established College of Allied Health. The division of Social Supports for Healthy Communities supports the Richard W. Riley College of Education and Human Sciences, College of Management and Human Potential, College of Psychology and Community Services, College of Health Sciences and Public Policy, and the School of Interdisciplinary Undergraduate Studies.
### Healthcare Access and Quality  
**College of Nursing**  
**College of Social and Behavioral Health**  
*School of Counseling*  
*Soloman School of Social Work*  
**College of Allied Health (New in 2022)**

**College of Management and Human Potential**  
**College of Psychology and Community Services**  
**College of Health Sciences and Public Policy**  
**School of Interdisciplinary Undergraduate Studies**

Walden’s academic offices are located in Minneapolis, Minnesota. The administrative offices are headquartered in Columbia, Maryland.

## Vision, Mission, and Goals

### Vision
Walden University envisions a distinctively different 21st-century learning community where knowledge is judged worthy to the degree that it can be applied by its graduates to the immediate solutions of critical societal challenges, thereby advancing the greater global good.

### Mission
Walden University provides a diverse community of career professionals with the opportunity to transform themselves as scholar-practitioners so that they can effect positive social change.

### Goals
- To provide multicontextual educational opportunities for career learners.
- To provide innovative, learner-centered educational programs that recognize and incorporate the knowledge, skills, and abilities students bring into their academic programs.
- To provide its programs through diverse process-learning approaches, all resulting in outcomes of quality and integrity.
To provide an inquiry/action model of education that fosters research, discovery, and critical thinking and that results in professional excellence.

To produce graduates who are scholarly, reflective practitioners and agents of positive social change.

Social Change

Walden University defines positive social change as a deliberate process of creating and applying ideas, strategies, and actions to promote the worth, dignity, and development of individuals, communities, organizations, institutions, cultures, and societies. Positive social change results in the improvement of human and social conditions.

This definition of positive social change provides an intellectually comprehensive and socially constructive foundation for the programs, research, professional activities, and products created by the Walden academic community.

In addition, Walden supports positive social change through the development of principled, knowledgeable, and ethical scholar-practitioners, who are and will become civic and professional role models by advancing the betterment of society.

University Outcomes

Walden University strives to produce graduates with the knowledge, skills, and abilities to:

1. Facilitate positive social change where they work, in their communities, and in society.
2. Use their knowledge to positively impact their profession, communities, and society.
3. Demonstrate a commitment to lifelong learning.
4. Apply their learning to specific problems and challenges in their workplace and professional settings.
5. Demonstrate information literacy.*
6. Demonstrate an understanding of the methods of inquiry used in their professional or academic field.
7. Practice legal and ethical integrity in their professional work.
8. Effectively communicate their ideas and the rationale behind them to others.
9. Support diversity and multiculturalism within their profession, communities, and society.

*Information literacy is defined as the ability to know when there is a need for information, and being able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand.
University Values

Quality | Integrity | Student-Centeredness

Values

Three values—quality, integrity, and student-centeredness—are the core of the university and the touchstones for action at all levels of the organization. They demand high standards of excellence, uncompromising openness and honesty, and primary attention to the progress of our students. These values and principles give Walden University its unique identity and underpin the Walden University mission.

Quality

Walden University believes that quality and integrity are the cornerstones of all academic processes.

Walden University believes in innovation and flexibility in the conception and delivery of its educational programs, and that there are many different academic routes to achieve quality and integrity.

Integrity

Walden University believes that education and social change are fundamental to the provision and maintenance of democratic ideals and principles, especially that of the common good.

Walden University believes that its learners effect positive social change when they behave as reflective or scholarly practitioners.

Walden University believes that the inquiry/action model fosters critical thinking and underpins research and discovery for reflective practitioners (bachelor’s and master's students) and scholar-practitioners (doctoral students). This model provides the framework for teaching, learning, and assessment.

Student-Centeredness

Walden University believes that all adult learners should have innovative educational access, especially those who are without opportunity in other venues.

Walden University believes that academic programs must be learner-centered, incorporating learners' prior knowledge and allowing them to focus their academic work on their needs and interests.

Accreditation

Walden University is accredited by the Higher Learning Commission (HLC).
The Richard W. Riley College of Education and Human Services at Walden University is accredited by the Council for the Accreditation of Educator Preparation (CAEP) for a period of 7 years, from April 2019 through June 2026. This accreditation covers initial teacher preparation programs and advanced educator preparation programs. CAEP is the only recognized national accreditor for educator preparation, promoting excellence in educator preparation through quality assurance and continuous improvement.

CAEP accreditation is based on a review of The Richard W. Riley College of Education and Human Service’s initial teacher preparation programs—the BS in Elementary Education and the Master of Arts in Teaching with a specialization in Special Education—and advanced educator preparation programs—the EdS in Educational Leadership and Administration (Principal Preparation programs) and the MS in Education with a specialization in Educational Leadership and Administration. Three of these programs were reviewed by Specialized Professional Associations (SPAs), which defines content-area standards for programs, and achieved national recognition: Master of Arts in Teaching with a specialization in Special Education received SPA approval from Council for the Exceptional Children (CEC); EdS in Educational Leadership and Administration and MS in Education with a specialization in Educational Leadership and Administration both received SPA approval from Education Leadership Constituent Council (ELCC).

Walden’s MS in Clinical Mental Health Counseling, MS in Marriage, Couple, and Family Counseling, MS in School Counseling, and the PhD in Counselor Education and Supervision program are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). CACREP accreditation attests to the quality and relevancy of Walden’s program—a program that helps provide students with the skills and credibility to maximize their impact on the profession. In addition, earning a degree that is CACREP-accredited may help to streamline the licensing application process and provides students with an advantage when applying to doctoral programs.

Walden’s BS in Information Technology program is accredited by the Computing Accreditation Commission of ABET, https://www.abet.org/. ABET is the internationally recognized accreditor for college and university programs in applied science, computing, engineering, and engineering technology. This accreditation reaffirms the quality of Walden’s technology and applied science programs and support services, as well as its commitment to continuous assessment and improvement.

Walden University’s BS in Business Administration, Master of Business Administration (MBA), MS in Finance, Doctor of Business Administration (DBA), and PhD in Management programs are accredited by the Accreditation Council for Business Schools and Programs (ACBSP). Walden’s BS in Accounting and MS in Accounting programs are also accredited by ACBSP and have earned the organization’s Separate Accounting Accreditation. ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.
Walden’s MS in Project Management is accredited by the Global Accreditation Center (GAC) of the Project Management Institute (PMI)®. The GAC is the world’s leading specialized accrediting body for project management and related degree programs.

*The GAC Accredited Program seal is a mark of Project Management Institute, Inc.

The Baccalaureate Degree Program in Nursing (BSN), Master’s Degree Program in Nursing (MSN), Post-graduate APRN certificate program, and Doctor of Nursing Practice (DNP) program at Walden University are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE). Officially recognized by the U.S. Secretary of Education as a national accreditation agency, the Commission on Collegiate Nursing Education (CCNE) is an autonomous accrediting agency, contributing to the improvement of the public’s health. CCNE ensures the quality and integrity of baccalaureate, graduate, and residency programs in nursing.

Walden University’s Bachelor of Social Work (BSW) and Master of Social Work (MSW) programs are accredited by the Council on Social Work Education (CSWE), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA). CSWE’s Commission on Accreditation is responsible for developing accreditation standards that define competent preparation for professional social workers and ensuring that social work programs meet these standards.

The Council on Education for Public Health (CEPH) Board of Councilors acted at its September 6, 2019, meeting to accredit the Master of Public Health (MPH) Program at Walden University for a five-year term, based on an application for accreditation submitted on February 3, 2018. On June 5, 2020, the CEPH Board of Councilors accredited the Doctor of Public Health (DrPH) at Walden University, after reviewing an accreditation application submitted on April 21, 2020. CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and programs of public health. CEPH accreditation provides assurance that the program has been evaluated and met accepted public health profession standards in practice, research, and service. For a copy of the final self-study document and/or final accreditation report, please contact the dean of the School of Health Sciences (adchshealth@mail.waldenu.edu).
State Authorization and International Approval Statements

Alaska

Walden University’s programs are exempt from authorization under AS 14.48 as Walden’s programs are offered online only and Walden University does not have a physical presence in the state.

The Bahamas

Walden University has been granted Institutional Recognition status by The National Accreditation & Equivalency Council of The Bahamas (NAECOB). The Institutional Recognition status does not suggest that Walden University now has accreditation with NAECOB.

Institutional Recognition status indicates that the institution currently holds full accreditation status from international or regional accreditation bodies recognized by The Bahamas. NAECOB’s Institutional Recognition permits the institution to recruit for and offer educational programmes in The Bahamas.

Please direct all inquiries regarding the status of Walden University Institutional Recognition to a representative of NAECOB. Their contact information is outlined below:

The National Accreditation and Equivalency Council of The Bahamas (NAECOB)
RND PLAZA WEST
JOHN F. KENNEDY DRIVE
P.O. BOX N-3913
NASSAU, THE BAHAMAS
TELEPHONE: 328-8872/3
Email: info@naecob.org

California

Note to California Residents

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss.
Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the Fund STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, (916) 431-6959 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

- The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
- You were enrolled at an institution or location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
- You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
- The institution has been ordered to pay a refund by the Bureau but has failed to do so.
- The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
- You have been awarded restitution, or a refund, or other monetary award by and arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from the STRF.

A student whose loan is revived by a loan holder or debt collector after a period of noncollection may, at any time, file a written application for recovery from the STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

**Florida**

Prospective students from Florida may obtain additional information regarding Walden University by contacting the Commission on Independent Education, Florida Department of Education, 325 West Gaines Street, Suite 1414, Tallahassee, FL 32399-0400; 1-888-224-6684. Credits and degrees earned from this college do not automatically qualify the holder to participate in professional licensing examinations to practice certain professions in Florida. Persons interested in practicing a regulated profession in Florida should contact the appropriate state regulatory agency in the field of their interest.

**Georgia**

Walden University is authorized by The Georgia Nonpublic Postsecondary Education Commission, 2082 East Exchange Place, Tucker, GA 30084, 770-414-3300. Students may submit a complaint online at https://gnpec.georgia.gov/student-resources/student-complaints.

**Indiana**

The institution is approved by the Indiana Board for Proprietary Education at 402 West Washington Street, Room W462, Indianapolis, Indiana 46204; 1-317-232-1324 or 1-317-232-6716.
Iowa

Walden University is a registered institution with the Iowa College Student Aid Commission. Students may contact the commission with questions or complaints at the following address: Iowa College Student Aid Commission, 475 SW 5th St., Suite D., Des Moines, IA 50309-4608. Students may also call (877) 272-4456, or submit a complaint online at https://www.iowacollegeaid.gov/sdr.

Kansas

Walden University is authorized to operate in Kansas with a Certificate of Approval from the Kansas Board of Regents, 1000 SW Jackson St., Suite 520, Topeka, KS 66612, 785-430-4240.

Kentucky

Not all of the online programs offered by Walden University have been approved in Kentucky. Please check the Council on Postsecondary Education’s website at https://dataportal.cpe.ky.gov/KYAcademicProgInventory.aspx to view its listing of approved programs. For more information, please contact the Council on Postsecondary Education, 1024 Capital Center Drive, Suite 320, Frankfort, Kentucky 40601.

Please be advised that Walden’s educator preparation programs are NOT accredited in Kentucky by the Education Professional Standards Board and are NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for K–12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at http://www.epsb.ky.gov/.

Maryland

Walden University is a registered institution in the State of Maryland. Any complaints can be directed to the Maryland Attorney General, Consumer Protection Division, 200 St. Paul St., Baltimore, MD 21202, 410-528-8662 or 888-743-0823 (toll free).

Minnesota

Walden University is registered with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

Minnesota Office of Higher Education
1450 Energy Park Drive, Suite 350
St. Paul, MN 55108-5227
Oregon

Walden University is authorized by the State of Oregon to offer and confer the academic degrees described herein, following a determination that state academic standards will be satisfied under OAR 583-030. Inquiries concerning the standards or school compliance may be directed to the Office of Degree Authorization, 1500 Valley River Drive, Suite 100, Eugene, OR 97401.

Pennsylvania

Note to all Pennsylvania residents: Walden University's teacher preparation programs are approved by the Minnesota Professional Educator Licensing and Standards Board as leading to a Minnesota licensure. Walden is not enrolling Pennsylvania residents into the Master of Arts in Teaching (MAT) program in Special Education, but Pennsylvania residents are eligible to enroll into Walden's Bachelor of Science in Elementary Education program. The BS in Elementary Education program has not been reviewed by the Pennsylvania Department of Education, so candidates are instructed to apply for Pennsylvania certification as out-of-state graduates of a teacher preparation program.

South Carolina

Licensed by the South Carolina Commission on Higher Education, 1333 Main Street, Suite 200, Columbia, SC 29201; 1-803-737-2260. Licensure indicates only that minimum standards have been met; and it is not equal to or synonymous with accreditation by an accrediting agency recognized by the U.S. Department of Education.

Texas

While Walden University is not regulated in Texas per Chapter 132 of the Texas Education Code, Walden University is registered with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions. To report concerns and/or complaints students may contact the Minnesota Office of Higher Education at 651-642-0567.

Note to Texas Residents

The Texas Higher Education Coordinating Board (THECB) requires all institutions to have a published grievance procedure that describes the process for filing a complaint.
Walden University’s student complaint procedures can be found at in the Student Handbook on the Student Appeals and Grievances.

Students who have exhausted the institution's grievance procedures may file a complaint with THECB by completing the forms found at the following link: http://www.thecb.state.tx.us/links/student-complaints/. Or, students can contact the THECB Office of General Counsel, PO Box 12788, Austin, TX 78711, (512) 427-6101.

The rules governing student complaints in Texas can be found in Title 19 of the Texas Administrative Code, Sections 1.110-1.120: http://texreg.sos.state.tx.us/public/readtac$ext.ViewTAC?tac_view=5&ti=19&pt=1&ch=1&sch=E&rl=Y.

**Washington, DC**

Walden University has been granted a license by the District of Columbia Higher Education Licensure Commission, 1050 First Street, NE, 5th Floor, Washington, DC 20002, (202) 481-3951.

**Washington State**

Walden University is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes Walden University to advertise, recruit for, and offer field placement components of specific degree programs. The Council may be contacted for a list of currently authorized programs. Authorization by the Council does not carry with it an endorsement by the Council of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-3430 or by email at degreeauthorization@wsac.wa.gov.

The transferability of credits earned at Walden University is at the discretion of the receiving college, university, or other educational institution. Students considering transferring to any institution should not assume that credits earned in any program of study at Walden University will be accepted by the receiving institution. Similarly, the ability of a degree, certificate, diploma, or other academic credential earned at Walden University to satisfy an admission requirement of another institution is at the discretion of the receiving institution. Accreditation does not guarantee credentials or credits earned at Walden University will be accepted by or transferred to another institution. To minimize the risk of having to repeat coursework, students should contact the receiving institution in advance for evaluation and determination of transferability of credits and/or acceptability of degrees, diplomas, or certificates earned.
The Washington Student Achievement Council (WSAC) has authority to investigate student complaints against specific schools. WSAC may not be able to investigate every student complaint. Visit https://www.wsac.wa.gov/student-complaints for information regarding the WSAC complaint process.
Legal Information

Privacy Policy

(Last Updated: August 2021)

Walden University, LLC ("Walden") respects and understands the importance of privacy and security for our online customers and prospective students. We want you to be familiar with how we collect, use and disclose information. This Privacy Policy describes our practices in connection with information that we collect through websites operated by us or on our behalf (the "Websites"), through the software applications made available by us (unless subject to a privacy policy specific to the app) (the "Apps"), through our social media pages (our "Social Media Pages"), through HTML-formatted email messages that we send to you that link to this Privacy Policy, as well as offline interactions you may have with us (collectively, including the Websites, the Apps, our Social Media Pages, and offline activity, the "Services").

Personal Information

"Personal Information" is information that identifies you as an individual or relates to an identifiable individual, which may include:

- Name
- Postal address
- Email address
- Online identifier, such as an Internet Protocol address
- Telephone number
- Educational records
- Work history or other employment information
- Emergency contact details
- Demographic data, including, where relevant, racial and ethnic origin, health and disability information
- Commercial information, such as purchase history
- National and student ID numbers, such as a social security, driver's license, passport, or tax ID
- Membership in professional or industry associations
- Credit and debit card number
- Bank account details
- Profile picture
- Social media account ID
- Inferences drawn from your Personal Information, such as consumer preferences
Collection of Personal Information

We and our service providers collect Personal Information in a variety of ways, including:

Through the Services

We collect Personal Information through the Services, for example, when you visit one of our sites, apply for admission, or maintain an ongoing relationship with Walden as a student.

From you during your course of study or period of enrollment with us.

Offline

We collect Personal Information from you offline, such as when you complete an application for admission, fill out a form at an education or career fair, apply for a student ID card, participate in a promotion, or contact us by phone.

From Other Sources

We receive your Personal Information from other sources, for example:
- our affiliates, partners, and service providers;
- private and publicly available databases;
- application references and/or recommendation writers; and
- other educational institutions.

If you connect your social media account to your Services account, you will share certain Personal Information from your social media account with us, for example, your name, email address, photo, list of social media contacts, and any other information that may be or you make accessible to us when you connect your social media account to your Services account.

We need to collect Personal Information in order to provide the requested Services to you and in order to consider and maintain an academic or business relationship with you. If you do not provide the information requested, we may not be able to provide the Services, consider you for admission, or maintain your status as an enrolled student. If you disclose any Personal Information relating to other people to us or to our service providers in connection with the Services, you represent that you have the authority to do so and to permit us to use the information in accordance with this Privacy Policy.

Use of Personal Information

We and our affiliates, partners, and service providers use Personal Information for legitimate business purposes including:

Providing the functionality of the Services and fulfilling your requests.

To provide the Services’ functionality to you, such as arranging access to your registered account and providing you with related assistance.
To respond to your inquiries and fulfill your requests, when you contact us via one of our online contact forms or otherwise, for example, when you send us questions, suggestions, or complaints.
To complete your transactions and provide you with related assistance.
To send administrative information to you, such as changes to our terms, conditions and policies.
To allow you to send messages to another person if you choose to do so.
We will engage in these activities to manage our contractual relationship with you and/or to comply with a legal obligation.

Providing you with our newsletter and/or other marketing materials and facilitating social sharing
To send you marketing related emails, with information about our services and other news about us.
To facilitate social sharing functionality that you choose to use.
We will engage in this activity with your consent or where we have a legitimate interest.

Analysis of Personal Information for business reporting and providing personalized services.
To analyze or predict our users' preferences in order to prepare aggregated trend reports on how our digital content is used, so we can improve our Services.
To better understand you, so that we can personalize our interactions with you and provide you with information and/or offers tailored to your interests.
To better understand your preferences so that we can deliver content via our Services that we believe will be relevant and interesting to you.
We will provide personalized services either with your consent or because we have a legitimate interest.

Allowing you to participate in sweepstakes, contests, or other promotions.
We may offer you the opportunity to participate in a sweepstakes, contest, or other promotion.
Some of these promotions have additional rules containing information about how we will use and disclose your Personal Information.
We use this information to manage our contractual relationship with you.

Aggregating and/or anonymizing Personal Information.
We may aggregate and/or anonymize Personal Information so that it will no longer be considered Personal Information. We do so to generate other data for our use, which we may use and disclose for any purpose.
Accomplishing our business purposes.
For data analysis, for example, to improve the efficiency of our Services;
For audits, to verify that our internal processes function as intended and are compliant with legal, regulatory or contractual requirements;
For fraud and security monitoring purposes, for example, to detect and prevent cyberattacks or attempts to commit identity theft;
For developing new services;
For enhancing, improving, or modifying our current services;
For identifying usage trends, for example, understanding which parts of our Services are of most interest to users;
For determining the effectiveness of our promotional campaigns, so that we can adapt our campaigns to the needs and interests of our users; and
For operating and expanding our business activities, for example, understanding which parts of our Services are of most interest to our users so we can focus our energies on meeting our users' interests.

We engage in these activities to manage our contractual relationship with you, to comply with a legal obligation, and/or because we have a legitimate interest.

Walden University does not sell Personal Information collected through the Services to third parties.

Disclosure of Personal Information

We disclose Personal Information:

To our affiliates for the purposes described in this Privacy Policy.
To our third party service providers, to facilitate services they provide to us.
These can include providers of services such as website hosting, data analysis, payment processing, order fulfillment, information technology and related infrastructure provision, customer service, email delivery, auditing, and other services.
To third parties, to permit them to send you marketing communications, consistent with your choices.
To third-party sponsors of sweepstakes, contests, and similar promotions.
By using the Services, you may elect to disclose Personal Information
On message boards, classroom discussion forums, chat, profile pages, blogs and other services to which you are able to post information and content (including, without limitation, our Social Media Pages). Please note that any information you post or disclose through these services will become public and may be available to other users and the general public.
Through your social sharing activity. When you connect your Services account with your social media account, you will share information with your friends associated with your social media account, with other users,
and with your social media account provider. By doing so, you authorize us to facilitate this sharing of information, and you understand that the use of shared information will be governed by the social media provider's privacy policy.

Other Uses and Disclosures

We also use and disclose your Personal Information as necessary or appropriate, especially when we have a legal obligation or legitimate interest to do so:

To comply with applicable law.
This can include laws outside your country of residence.

To respond to requests from public and government authorities.
These can include authorities outside your country of residence.

To cooperate with law enforcement.
For example, when we respond to law enforcement requests and orders.

For other legal reasons.
To enforce our terms and conditions; and
To protect our rights, privacy, safety or property, and/or that of our affiliates, you or others.

In connection with a sale or business transaction.
We have a legitimate interest in disclosing or transferring your Personal Information to a third party in the event of any reorganization, merger, sale, joint venture, assignment, transfer or other disposition of all or any portion of our business, assets or stock (including in connection with any bankruptcy or similar proceedings). Such third parties may include, for example, an acquiring entity and its advisors.

Other Information

"Other Information" is any information that does not reveal or cannot be reasonably be used to reveal your specific identity or does not directly relate to an identifiable individual, and may include:

- Browser and device information
- App and/or Website usage data
- Information collected through cookies, pixel tags, and other technologies
- Demographic information and other information provided by you that does not reveal your specific identity, such as your gender or date of birth
- Information that has been aggregated in a manner such that it no longer reveals your specific identity
- Information that has been deidentified or pseudonymized in a manner such that it no longer reveals your specific identity
If we are required to treat Other Information as Personal Information under applicable law, then we may use and disclose it for the purposes for which we use and disclose Personal Information as detailed in this Policy.

Collection of Other Information

We and our service providers collect Other Information in a variety of ways, including:

Through your browser or device

Certain information is collected by most browsers or automatically through your device, such as your Media Access Control (MAC) address, computer type (Windows or Mac), screen resolution, operating system name and version, device manufacturer and model, language, Internet browser type and version and the name and version of the Services (such as the App) you are using. We use this information to ensure that the Services function properly.

Through your use of the Apps

When you download or use the Apps, we and our service providers may track and collect App usage data, such as the date and time the App on your device accesses our servers and what information and files have been downloaded to the App based on your device number.

Using cookies

Cookies are pieces of information stored directly on the computer that you are using. Cookies allow us to collect information such as browser type, time spent on the Services, pages visited, language preferences, and other traffic data. We and our service providers use the information for security purposes, to facilitate navigation, to display information more effectively, and to personalize your experience. We also gather statistical information about use of the Services in order to continually improve their design and functionality, understand how they are used and assist us with resolving questions regarding them. Cookies further allow us to select which of our advertisements or offers are most likely to appeal to you and display them while you are on the Services. We may also use cookies or other technologies in online advertising to track responses to our ads. We do not currently respond to browser do-not-track signals. If you do not want information collected through the use of cookies, most browsers allow you to automatically decline cookies or be given the choice of declining or accepting a particular cookie (or cookies) from a particular website. You may also wish to refer to http://www.allaboutcookies.org/manage-cookies/index.html. If, however, you do not accept cookies, you may experience some inconvenience in
your use of the Services. You also may not receive advertising or other offers from us that are relevant to your interests and needs.

Using pixel tags and other similar technologies

Pixel tags (also known as web beacons and clear GIFs) may be used to, among other things, track the actions of users of the Services (including email recipients), measure the success of our marketing campaigns, and compile statistics about usage of the Services and response rates.

Analytics. This website uses Google® Analytics Premium, a web analytics service provided by Google Ireland Limited ("Google"). Google Analytics Premium uses "cookies", which are text files placed on your computer, to help the website analyze how users use the site. The information generated by the cookies about your use of the website and your current IP-address will be transmitted by your browser to and will be stored by Google on servers in the United States and other countries. On behalf of the operator of this website Google will use this information for the purpose of evaluating your use of the website, compiling reports on website activity and providing other services relating to website activity and internet usage to the website operator. The IP address collected through Google Analytics will not be associated with any other data held by Google. You may refuse the use of cookies by selecting the appropriate settings on your browser, however please note that if you do this you may not be able to use the full functionality of this website. You may also stop the transmission of information generated by the cookies about your use of the website and of your IP address to Google, by downloading and installing the Google Analytics Opt-out Browser Add-on.

Display Advertising. Walden University and its affiliates utilize Display Advertising for remarketing purposes. This involves collecting demographic data (age, gender, and interests) in Google Analytics for site optimization, remarketing, and understanding user behaviors. If you wish to opt out of this, please use the following tool. Walden University and its affiliates use remarketing in conjunction with Google Analytics. Third-party vendors, such as Google, may show relevant advertisements on sites across the Internet. Walden University, its affiliates, and third-party vendors utilize Google Analytics’ first-party cookies and Doubleclick’s third-party cookies together to inform, optimize, and serve ads based on a user’s past visits to this website. In addition, these cookies are used to report ad impressions, other uses of ad services, and interactions with the website.
Using Adobe Flash technology (including Flash Local Shared Objects ("Flash LSOs")) and other similar technologies

We may use Flash LSOs and other technologies to, among other things, collect and store information about your use of the Services. If you do not want Flash LSOs stored on your computer, you can adjust the settings of your Flash player to block Flash LSO storage using the tools contained in the Website Storage Settings Panel. You can also go to the Global Storage Settings Panel and follow the instructions (which may explain, for example, how to delete existing Flash LSOs (referred to as "information"), how to prevent Flash LSOs from being placed on your computer without your being asked, and how to block Flash LSOs that are not being delivered by the operator of the page you are on at the time). Please note that setting the Flash Player to restrict or limit acceptance of Flash LSOs may reduce or impede the functionality of some Flash applications.

IP Address

Your IP address is automatically assigned to your computer by your Internet Service Provider. An IP address may be identified and logged automatically in our server log files whenever a user accesses the Services, along with the time of the visit and the page(s) that were visited. Collecting IP addresses is standard practice and is done automatically by many websites, applications and other services. We use IP addresses for purposes such as calculating usage levels, diagnosing server problems and administering the Services. We may also derive your approximate location from your IP address.

Physical Location

We may collect the physical location of your device by, for example, using satellite, cell phone tower or WiFi signals. We may use your device's physical location to provide you with personalized location-based services and content. We may also share your device's physical location, combined with information about what advertisements you viewed and other information we collect, with our marketing partners to enable them to provide you with more personalized content and to study the effectiveness of advertising campaigns. In some instances, you may be permitted to allow or deny such uses and/or sharing of your device's location, but if you do, we and/or our marketing partners may not be able to provide you with the applicable personalized services and content.
Uses and Disclosures of Other Information

We may use and disclose Other Information for any purpose, except where we are required to do otherwise under applicable law. In some instances, we may combine Other Information with Personal Information. If we do, we will treat the combined information as Personal Information as long as it is combined.

Security

We seek to use reasonable organizational, technical and administrative measures to protect Personal Information within our organization. Unfortunately, no data transmission or storage system can be guaranteed to be 100% secure. If you have reason to believe that your interaction with us is no longer secure, please immediately notify us in accordance with the "Contacting Us" section below.

Choices and Access

Your choices regarding our use and disclosure of your Personal Information

We give you choices regarding our use and disclosure of your Personal Information for marketing purposes. You may opt-out from:

Receiving email marketing from us: If you no longer want to receive marketing-related emails from us on a going-forward basis, you may opt-out by following the instructions contained in each such email or by contacting us at privacy@mail.waldenu.edu.

Receiving other types of marketing communications from us: If you no longer want to receive marketing-related communications from us on a going-forward basis, you may opt-out by contacting us at privacy@mail.waldenu.edu.

Our sharing of your Personal Information with affiliates for their direct marketing purposes: If you would prefer that we discontinue sharing your Personal Information on a going-forward basis with our affiliates for their direct marketing purposes, you may opt-out of this sharing by contacting us at privacy@mail.waldenu.edu.

Our sharing of your Personal Information with unaffiliated third parties for their direct marketing purposes: If you would prefer that we discontinue sharing your Personal Information on a going-forward basis with unaffiliated third parties for their direct marketing purposes, you may opt-out of this sharing by contacting us at privacy@mail.waldenu.edu.

We will try to comply with your request(s) as soon as reasonably practicable. Please note that if you opt-out of receiving marketing-related communications from us, we may still send you important administrative messages, from which you cannot opt-out.
How you can access, change, or delete your Personal Information

If you would like to request to review, correct, update, suppress, restrict or delete Personal Information that you have previously provided to us, or if you would like to request to receive an electronic copy of your Personal Information for purposes of transmitting it to another organization (to the extent this right to data portability is provided to you by applicable law), or if you would like to request information about how your Personal Information has been collected or disclosed, you may contact us using the "Contact Us" information below. We will respond to your request consistent with applicable law.

In your request, please make clear what Personal Information you would like to have changed, whether you would like to have your Personal Information suppressed from our database or otherwise let us know what limitations you would like to put on our use of your Personal Information. For your protection, we will only implement requests with respect to the Personal Information associated with the particular email address that you use to send us your request, and we may need to verify your identity by requesting additional documentation before implementing your request. We will try to comply with your request as soon as reasonably practicable.

Please note that we need to retain certain information for recordkeeping purposes and/or to complete any transactions that you began prior to requesting a change or deletion (e.g., when you make a payment, you may not be able to change or delete the Personal Information provided until after the completion of such transaction).

If you are a resident of California, under 18 and a registered user of the Services, you may ask us to remove content or information that you have posted to the Services by writing to us at the Contact Us address below. Please note that your request does not ensure complete or comprehensive removal of the content or information, as, for example, some of your content may have been reposted by another user.

**Retention Period**

We retain Personal Information for as long as needed or permitted in light of the purpose(s) for which it was obtained and consistent with applicable law.

The criteria used to determine our retention periods include:

- The length of time we have an ongoing relationship with you and provide the Services to you (for example, for as long as you are a student of ours);
- Whether there is a legal obligation to which we are subject (for example, certain laws require us to keep records of your transactions for a certain period of time before we can delete them); or
- Whether retention is advisable in light of our legal position (such as in regard to applicable statutes of limitations, litigation or regulatory investigations).
Third Party Services

This Privacy Policy does not address, and we are not responsible for, the privacy, information or other practices of any third parties, including any third party operating any website or service to which the Services link. The inclusion of a link on the Services does not imply endorsement of the linked site or service by us or by our affiliates.

In addition, we are not responsible for the information collection, use, disclosure or security policies or practices of other organizations, such as Facebook, Apple, Google, Microsoft, RIM, or any other app developer, app provider, social media platform provider, operating system provider, wireless service provider or device manufacturer, including with respect to any Personal Information you disclose to other organizations through or in connection with the Apps or our Social Media Pages.

Third Party Advertising

We use third-party advertising companies to serve advertisements regarding goods and services that may be of interest to you when you access and use the Services and other websites or online services.

You may receive advertisements based on information relating to your access to and use of the Services and other websites or online services on any of your devices, as well as on information received from third parties. These companies place or recognize a unique cookie on your browser (including through the use of pixel tags). They also use these technologies, along with information they collect about your online use, to recognize you across the devices you use, such as a mobile phone and a laptop. If you would like more information about this practice, and to learn how to opt out of it in desktop and mobile browsers on the particular device on which you are accessing this Privacy Policy, please visit:

- From Canada: https://youradchoices.ca/
- From Europe: http://www.edaa.eu/
- From the U.S.: http://optout.aboutads.info/## and http://optout.networkadvertising.org/##.

If you are in the U.S., you may download the AppChoices app at www.aboutads.info/appchoices to opt out in mobile apps.

Use of Services by Minors

The Services are not directed to individuals under the age of sixteen (16), and we do not knowingly collect Personal Information from individuals under sixteen (16).
Jurisdiction and Cross-Border Transfer

Your Personal Information may be stored and processed in any country where we have facilities or in which we engage service providers, and by using the Services you understand that your information will be transferred to countries outside of your country of residence, including the United States, which may have data protection rules that are different from those of your country. In certain circumstances, courts, law enforcement agencies, regulatory agencies or security authorities in those other countries may be entitled to access your Personal Information.

If you are located in the European Economic Area ("EEA"): Some of the non-EEA countries are recognized by the European Commission as providing an adequate level of data protection according to EEA standards (the full list of these countries is available here). For transfers from the EEA to countries not considered adequate by the European Commission, we have put in place adequate measures, such as standard contractual clauses adopted by the European Commission to protect your Personal Information. You may obtain a copy of these measures by following this link.

Third Party Payment Service

We will use a third-party payment service to process payments made through the Services. If you wish to make a payment through the Services, your Personal Information will be collected by such third party and not by us, and will be subject to the third party's privacy policy, rather than this Privacy Policy. We have no control over, and are not responsible for, this third party's collection, use and disclosure of your Personal Information.

Updates to This Privacy Policy

The "Last Updated" legend at the top of this Privacy Policy indicates when this Privacy Policy was last revised. Any changes will become effective when we post the revised Privacy Policy on the Services. Your use of the Services following these changes means that you accept the revised Privacy Policy.

Contacting Walden

Walden University, LLC, having business offices at 7065 Samuel Morse Drive, Columbia, Maryland 21046, U.S.A., is the company responsible for collection, use and disclosure of your Personal Information under this Privacy Policy.

If you have any questions about this Privacy Policy, please contact us at privacy@mail.waldenu.edu, at the postal address above, or by phone at our toll-free telephone number, 1-855-518-5696. Because email communications are not always secure, please do not send sensitive information in your emails to us.
Additional Information for Individuals in the EEA

If you are located in the EEA, you also may lodge a complaint with a data protection authority for your country or region or where an alleged infringement of applicable data protection law occurs.

Additional Information for Individuals in California

Under the California Consumer Privacy Act ("CCPA"), California residents have the right to not receive discriminatory treatment for the exercise of the privacy rights conferred by the CCPA. California residents also have the right to designate an authorized agent to make a request under the CCPA on the resident’s behalf.

Trademarks, Copyright, and Disclaimers

Trademarks

Walden University and Education for Good are registered trademarks of Walden University, LLC. Elements of the Walden University website are protected by trade dress and other laws. The website and its contents may not be copied or imitated in any way without the express written consent of Walden University, LLC.

Copyright Statement

© 2021 Walden University, LLC. All rights reserved. The contents of the Walden University website pages, including, but not limited to, text, graphics, and icons, are copyrighted materials owned or controlled by Walden University and contain Walden University’s name, trademarks, service marks, and trade names. Students may download one copy of these materials on any single computer and print a copy of the materials for their use in learning about, evaluating, or acquiring Walden University services or products. No other permission is granted to students to print, copy, reproduce, distribute, transmit, upload, download, store, display in public, alter, or modify these materials.

Link Policy and Disclaimer

Walden University is not responsible for the content of any third-party-linked site that is not owned by Walden University, or of any other links contained in such third-party sites. Walden University provides links for students’ convenience only, and the inclusion of any link to a site not owned by Walden is not an endorsement by Walden of the site or its contents. Walden University assumes no responsibility for any other party’s site hyperlinked to the Walden University website or in which any part of the Walden University website has been hyperlinked.
No permission is granted here for students to use Walden University’s icons, site address, or other means to hyperlink other Internet sites with any page in the Walden University website. Students must obtain prior written permission to hyperlink in any manner to the Walden University website.

**Warranty and Other Disclaimers**

The materials and information found on the Walden University website are provided "as is," without warranty of any kind, either express or implied, including without limitation any warranty for information, services, or products provided through or in connection with the Walden University website. Without limiting the foregoing, all implied warranties of merchantability, fitness for a particular purpose, expectation of privacy, or non-infringement are expressly excluded and disclaimed. Some jurisdictions do not allow the exclusion of implied warranties, so the above exclusion may not apply to all students. This disclaimer of liability applies to any damages or injury caused by any failure of performance, error, omission, interruption, deletion, defect, delay in operation or transmission, computer virus, communication line failure, theft or destruction, or unauthorized access to, alteration of, or use of record, whether for breach of contract, tortious behavior, negligence, or under any other cause of action. Students specifically acknowledge that Walden University is not liable for any defamatory, offensive, infringing, or illegal materials or conduct, or that of third parties contained on the Walden University website, and Walden University reserves the right to remove such materials from the Walden University website without liability.

**Statement of Ownership**

Walden University is a member of Adtalem Global Education Inc. (NYSE: ATGE; member S&P MidCap 400 Index), a leading workforce solutions provider headquartered in the United States. Adtalem's purpose is to empower students to achieve their goals, find success and make inspiring contributions to our global community. Master’s Degree Programs

MS in Clinical Psychology

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.

The MS in Clinical Psychology program provides a broad background in clinical psychology with the opportunity to complete an optional counseling specialization. It prepares students to work ethically and effectively at the master’s level with diverse individuals in a variety of settings. In addition, this program offers students an opportunity to complete a graduate degree that is more practitioner-focused and less research-focused and includes a broader survey of the topics in clinical psychology compared to many other degree programs.

Learning Outcomes

At the end of the program, students will be able to:

- Describe the foundations of psychology.
- Synthesize psychological theory and research to apply in real-world situations in clinical settings.
- Interpret psychological theory and research.
- Describe psychological theory, research, and practice from a multicultural and/or global perspective.
- Apply psychological theory, research, and practice to scholarly and/or professional activities that promote positive social change.
- Use a framework of evidence-based practice to develop constructive working relationships with clients, supervisors, instructors, and colleagues.
- Demonstrate an appropriate and professional demeanor with clients, supervisors, instructors, and colleagues.

Specializations

- General Program
- Counseling
- Counseling (California Track)
Degree Requirements

56–62 total quarter credits for General Program (97–105 cr. with optional specialization)
Foundation course (3 cr.)
Core courses (45 cr. for General and Counseling; 68 cr. for CA Track)
Foundation Research Sequence course (5 cr. for General and Counseling)
Counseling (non-CA track) specialization curriculum (35 cr., including 10 cr. electives)
Counseling (CA track) specialization curriculum (25 cr.)
Practicum (6–9 cr.)

Curriculum

Foundation Course (3 cr.)

CPSY 6001 - Foundations for Graduate Study in Psychology

Core Courses (45 cr.)

CPSY 6221 - Psychopathology From a Clinical Perspective
CPSY 6215 - Lifespan Development
CPSY 6705 - Ethics and Standards of Professional Practice
CPSY 6342 - Interventions I
CPSY 6341 - Psychological Assessment
CPSY 6343 - Interventions II
CPSY 6701 - Culture and Psychology
CPSY 6250 - Group Process and Dynamics
CPSY 6245 - Social Psychology

Foundation Research Courses (5 cr.)

Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 6110 must be completed during the second term and is linked to Milestone 2 of the academic residencies. RSCH 6210 and RSCH 6310 must be completed prior to registering for the dissertation.

RSCH 6110Y - Research Theory, Design, and Methods

Practicum Sequence (6–9 cr.)

CPSY 6700 - Master's Practicum I
### Course Sequence

Students undertake courses in the following sequence.

### Note on Licensure

The MS in Clinical Psychology degree is not designed to prepare students to become a licensed psychology professional.

The MS in Clinical Psychology Counseling Specialization program is not approved by the Kansas Board of Regents and does not lead to master’s-level psychology license eligibility in the state of Kansas.
Doctoral Degree Programs

**PhD in Clinical Psychology**

Walden's PhD in Clinical Psychology program can prepare students to practice, teach, or research to positively impact the mental health of diverse clientele.

In this blended doctoral program, featuring online and in-person participation, students can gain the skills to assess mental wellness and provide interventions as a practitioner, educator, researcher, or consultant. Taught by respected psychology faculty, coursework explores current theories and empirically supported practice. Students can combine scholarly research with practical experience to build the skills and knowledge to work with people who are struggling with mental illness or general life issues.

Learning Outcomes

At the end of this program, graduates will be able to:

- Explain the contributions of the biological, affective, social, and cognitive areas of psychology as they impact human adaptive and maladaptive functioning.
- Articulate the history of clinical psychology, how the specialty of clinical psychology is unique, and how to develop a clinical psychology identity.
- Synthesize principles of basic and advanced research methods to produce independent scholarly research.
- Demonstrate proficiency in evaluating the effectiveness of empirically supported treatments using an evidence-based practice approach.
- Synthesize theory and contemporary research to establish a theoretically and empirically anchored personal orientation to the practice of clinical psychology.
- Demonstrate proficiency in utilizing empirically supported models of clinical psychotherapy, consultation, and supervision with diverse populations.
- Demonstrate proficiency in utilizing cognitive and personality-assessment skills with diverse populations.
- Develop constructive working relationships with clients, supervisors, instructors, and colleagues while also demonstrating an appropriate and professional demeanor.
- Engage in personal self-assessment to examine feelings, beliefs, attitudes, and opinions regarding their own perspective and worldview as well as those of others.
- Describe salient experiences and perspectives of diverse populations including but not limited to race, culture, socioeconomics, age, gender, sexual orientation, and disability.
Utilize critical thinking and apply relevant ethical codes (e.g., APA, ACA) to decision making with diverse populations in a variety of settings.
Demonstrate the ability to use multicultural clinical intervention and assessment skills in varied training and professional settings.
Demonstrate an awareness of how social/political issues, policies, and events impact the field of clinical psychology.
Engage in professional activities related to clinical psychology that promote positive social change.

Specializations

Changing specializations may increase a student's expected time-to-degree completion and cost.

- General (see below)
- Forensic Psychology
- Health
- Industrial and Organizational Psychology
- Teaching

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan and Program of Study
- Foundation course (5 cr.)
- Core courses (45 cr.)
- Research courses (20 cr.)
- Specialization courses (15 cr.)
- Clinical practicum (6 cr.)
- Internship (12 cr.)
- Blended Academic Year in Residence (40 cr.)
- Completion of the Doctoral Dissertation
  - Dissertation writing courses (5 cr. per term for a minimum of 4 terms; taken continuously until completion)
  - Completion of a beginning-of-quarter, mid-quarter, and end-of-quarter plan for each term
- Four PhD residencies

Curriculum

Foundation Course (5 cr.)
CPSY 8002 - Foundations of Graduate Studies in Clinical Psychology

Core Courses (45 cr.)

CPSY 8207 - History and Systems of Psychology
CPSY 8215 - Lifespan Development
CPSY 8226 - Biopsychology
CPSY 8238 - Cognitive and Affective Bases of Behavior
CPSY 8245 - Interpersonal Psychotherapy
CPSY 8247 - Social Psychology
CPSY 8316 - Tests and Measurement
CPSY 8700 - Psychology and Social Change
CPSY 8781 - Psychopathology From a Clinical Perspective

Research Courses (20 cr.)

RSCH 8110 - Research Theory, Design, and Methods
RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8260 - Advanced Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis

Specialization Courses (15 cr.)

These courses are dependent upon the particular specialization.

For the General program, select three courses from any of the PhD in Clinical Psychology specialization courses as electives. For all other specializations, please see the course list on each specialization page.

Clinical Practicum (6 cr.)

CPSY 8290 - Psychology Practicum I
CPSY 8291 - Psychology Practicum II

Internship (12 cr.)

CPSY 8292 - Psychology Internship I
CPSY 8293 - Psychology Internship II
CPSY 8294 - Psychology Internship III
CPSY 8295 - Psychology Internship IV

Blended Academic Year in Residence (40 cr.)

The courses associated with the Blended Academic Year in Residence (BAYR) must be completed consecutively within a 12-month calendar year. Students that stop the course sequence and do not complete in a consecutive calendar year will need to resume the BAYR course sequence again from the beginning.
PSYR 8117 - Writing a Quality Prospectus in Psychology
PSYR 8232 - Consultation and Supervision in Psychology
PSYR 8240 - Cognitive Behavioral Therapy
PSYR 8340 - Cognitive Assessment
PSYR 8346 - Clinical Psychopharmacology
PSYR 8350 - Personality Assessment
PSYR 8421 - Multicultural Psychology
PSYR 8704 - Ethics and Standards of Psychological Practice

Residency Requirements

Residency 1 – Complete Residency 1 as soon as you begin your program; should be completed in Term 1 or Term 2.
Residency 2 – Complete Residency 2 at the beginning of your second year, around the time of second research course (RSCH 8310).
Residency 3 – Complete Residency 3 once you have a prospectus in Walden’s review system.
Residency 4 – Complete residency 4 after your prospectus is approved as follows: Residency 4 General (RESI 8404) OR Residency 4 Proposal Writing (RESI 8404Q) OR Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR Residency 4 Publishing & Presenting (RESI 8404T) OR an approved professional conference (RESI 8900 for select programs only. Contact Advising for information.) OR a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. NOTE: Intensive Retreats are NOT included in Fast Track tuition.

Completion of the Doctoral Dissertation

CPSY 9000L - Dissertation
Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

* The courses associated with the Blended Academic Year in Residence (BAYR) must be completed consecutively within a 12 month calendar year. Students that stop the course sequence and do not complete in a consecutive calendar year will need to resume the BAYR course sequence again from the beginning.

** Students take this course for a minimum of four terms and are continuously enrolled until completion of their doctoral dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**Note on Licensure**
The PhD in Clinical Psychology program is designed to prepare graduates to qualify to sit for psychology licensing exams in some states. This program is designed to meet the academic licensure requirements of some state psychology boards. However, Walden University’s PhD in Clinical Psychology is not accredited by the American Psychological Association (APA) and has not received designation by the Association of State and Provincial Psychology Boards/National Register (ASPPB/NR), which are requirements for licensure in many states.

Walden enrollment specialists can provide guidance on licensure issues, state-by-state educational requirements, and internship and practicum requirements; however, it remains the student’s responsibility to evaluate and understand the licensure requirements for the state in which he or she resides, as requirements vary widely. Walden University enrollment specialists can provide general guidance on licensure requirements; however, it is the responsibility of each student to understand and comply with the most current psychology licensure information for his or her individual state. Walden makes no guarantee that its PhD in Clinical Psychology program will meet the licensure requirements in any state.

Prospective students should review the specific, detailed licensure requirements applicable to their state(s) of residency to see if the Walden program meets all of the requirements to sit for licensure as set forth in the state regulations. Additionally, some states have additional coursework, residency, or fieldwork requirements that students will need in order to be eligible for licensure as a psychologist in that state.

Prospective students enrolling in licensure-leading programs are advised that relocation to another state may impact the student’s ability to complete field experiences and/or to obtain professional licensure, certification, or other credential in another state. Prospective students are advised to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

**Doctoral Writing Assessment**

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

**8-Year Maximum Time Frame**

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.
The Richard W. Riley College of Education and Human Sciences

Walden University’s Richard W. Riley College of Education and Human Sciences is accredited based on the Council for the Accreditation of Educator Preparation (CAEP) Standards through June 2026. This accreditation covers specific Walden initial teacher and advanced educator preparation programs, including the BS in Elementary Education, Master of Arts in Teaching (MAT) – Special Education specialization, MS in Education – Educational Leadership and Administration specialization, and EdS in Educational Leadership and Administration. The MAT-SPED, MSED-ELA, and EdS-ELA programs were reviewed by Specialized Professional Associations (SPAs), which define content-area standards for programs, and achieved national recognition.

CAEP promotes excellence in educator preparation through quality assurance and continuous improvement. Walden’s College of Education and Human Sciences has earned national accreditation by demonstrating excellence in the areas of content and pedagogy, clinical experiences, selectivity, program impact, and capacity for continuous improvement.

Licensure: Acceptance of education degrees from Walden University by individual states for the satisfaction of certification or licensure requirements rests with each state. Walden’s advisors can provide individuals with basic guidelines and other information about state requirements. It remains the individual’s responsibility to understand and comply with the regulations and other requirements for the state in which he or she resides.

Prospective Washington state students are advised to contact the Office of the Superintendent of Public Instruction at 1-360-725-6275 or prof.educ@k12.wa.us to determine whether Walden’s programs in the field of education are approved for teacher certification or endorsements in Washington state. Additionally, teachers are advised to contact their individual school district as to whether this program may qualify for salary advancement.

Learn more about the Undergraduate Minors and Accelerate Into Master’s (AIM) Programs.

Research and Residencies

Research and Residencies guides and promotes quality in all aspects of doctoral research and residencies in The Richard W. Riley College of Education and Human Sciences. In collaboration with Walden University’s Office of Research and Doctoral Services, Research and Residencies supports student success through the administration of The Richard W. Riley College of Education and Human Sciences University Research Reviewers and the supervision of the Riley College Research Courses and Doctoral Forums. Research and Residencies also coordinates the EdD and PhD residencies for
the Riley College working closely with Walden University's Academic Residencies team. Face-to-face and virtual residencies are offered to students throughout the year in various parts of the country. These residencies provide socialization opportunities using innovative technologies and principles of adult learning to develop scholar-practitioners who think critically and contribute to the greater social good.

**Other Undergraduate Options**

**Minor in Applied Instructional Design and Technology**

Return to: Undergraduate Minors

The Undergraduate Minor in Applied Instructional Design and Technology is designed for non-education major students who are interested in the growing field of instructional design. This minor can help prepare students to use technology to create and evaluate learning materials for use in various instructional settings. For students looking to focus more on design and who are willing to purchase the Adobe Web Premium software, the Applied Instructional Design and Technology minor will allow them to gain actual design experience with hands-on use of the Adobe Web Premium software.

*Note: This minor is not available to students in the BS in Instructional Design and Technology program.*

**Required Courses (30 cr.)**

Courses should be completed in the following order:

- EDUC 1015 - How People Learn
- EIDT 3002 - Multimedia Tools
- EIDT 2002 - Web Design I
- EIDT 2004 - Instructional Design I
- EIDT 3004 - Instructional Design II
- EIDT 4004 - Instructional Design III

**Minor in Introductory Instructional Design and Technology**

The Undergraduate Minor in Introductory Instructional Design and Technology is for the non-education major student who may be interested in designing learning experiences and training programs. Students will gain firsthand knowledge of a learning
management system and how it is used to provide engaging and content-rich instruction. This minor will not require the purchase of Adobe Web Premium software.

Note: This minor is not available to students in the BS in Instructional Design and Technology program.

Required Courses (30 cr.)

- EDUC 1014 - Understanding Today's Instructional Environments
- EDUC 3005 - Evaluation and Assessment
- EIDT 2001 - Technology and Learning
- EIDT 2003 - Introduction to Distance Education
- EIDT 2004 - Instructional Design I
- EIDT 3003 - Ethical and Fair Use of Instructional Materials

Other Undergraduate Options

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a "C" in the graduate-level course but only a grade of "B" or better will carry over to the graduate program. Students who receive a "C" grade will be awarded a grade of "C,"* which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not pass their AIM class are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must take that course as a master's student.

Requirements

Walden University offers several opportunities for undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

Individual programs may determine the specific eligible AIM courses and some programs may limit the number of courses available. Generally, AIM coursework should not account for more than approximately 50% of the credits needed for master's degree completion. Practicum or Capstone requirements for the master's program are not eligible to be satisfied by AIM coursework.

To be eligible to begin AIM courses, students must:
a. Have an overall GPA equal to that required for admission to the associated master’s degree.* BS AIM track students must maintain a 2.5 GPA and have a transfer GPA of at least 2.5 (if transferring credits).

b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor’s program listed below. (Individual programs may determine additional prerequisites.) * BS in Psychology AIM track students do not need to meet this requirement.

c. Be in good financial standing.

d. Not have any incompletes.

AIM courses are (5000-level) graduate courses.*

a. Tuition for these courses is charged at the undergraduate rate for the course-based learning format. For Tempo Learning® these courses are included in the program's subscription cost.

b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.

c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA only.

Students must get a "B" or better in each course to have that course applied to the master's program.

Students who do not earn a grade of "C" or better will not be allowed to take any more 5000-level courses. Later admission to the master’s program requires that the student must take that course as a master's student. * BS in Psychology AIM track students may retake an AIM course a second time if they failed the first time; they must earn a grade of "C" or better the second time in order to stay in the AIM track program.

Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.

Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

Upon completion of the undergraduate program requirements, students should file an Intent to Graduate Form.

Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.
Taking AIM courses does not guarantee admission into a master’s program. Upon admission to the master's program, all AIM graduate courses completed with a "B" or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

Undergraduate students may complete AIM courses to fulfill elective credits, as course substitutions approved by the program director, or they may elect a second concentration within their program of study that is designed for AIM completion. Students are encouraged to consult with Student Success Advising (if in the course-based learning format) or their Academic Coaching (if in the Tempo Learning® format) on the most appropriate plan for their program and academic goals, such as their future master's program and time to completion.

*Note: Graduate students cannot register for AIM courses.

**School of Counseling**

**MS in Clinical Mental Health Counseling**

*These courses are open only to students in the BS in Human Services and BS in Psychology programs. Students may select up to five of these courses. Individual course prerequisites apply*

**Note:** These courses are 11 weeks in length.

These courses must be taken in the order listed.

- HUMN 5100 - Introduction to Mental Health Counseling*
- HUMN 5722 - Theories of Counseling
- HUMN 5316 - Techniques of Counseling
- HUMN 5723 - Multicultural Counseling
- PSYC 5101 - Foundations for Graduate Study in Counseling*
- PSYC 5102 - Introduction to Mental Health Counseling*
- PSYC 5722 - Counseling and Psychotherapy Theories
- PSYC 5316 - Techniques in Counseling
- PSYC 5306 - Ethics and Legal Issues in Counseling
- PSYC 5723 - Multicultural Counseling

*Students are required to take PSYC 5101 along with PSYC 5102 or HUMN 5100.

---

**Note on Endorsement, Licensure, or Certification**

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.
The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

**Undergraduate Minors**

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student’s major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their student success advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Communication
- Minor in Criminal Justice
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Healthcare Management
- Minor in Introductory Instructional Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health

**Post-Baccalaureate Certificate Programs**

**Instructional Design - Post-Baccalaureate Certificate in Instructional Design and Technology**

Return to: Post-Baccalaureate Certificate in Instructional Design and Technology

The specialization in Instructional Design provides students with foundational concepts and principles related to instructional design, multimedia development, learning theories, and instruction. This specialization is for students who are interested in finding out more about this field and who want to demonstrate to current or potential employers their knowledge in this field.

**Certificate Curriculum (12 cr.)**
Note: Students take all courses in the sequence listed.

EDUC 6115 - Learning Theories and Instruction
EIDT 6100 - Instructional Design
EIDT 6110 - Advanced Instructional Design
EIDT 6120 - Multimedia Design and Development

Online Learning - Post-Baccalaureate Certificate in Instructional Design and Technology

Return to: Post-Baccalaureate Certificate in Instructional Design and Technology

In the Online Learning certificate specialization, students can learn to produce and deliver courses from a leader in online content development and instructional delivery. Students leverage Walden's 40 years of experience in the field as they gain effective strategies for engaging and teaching distance learners and for assessing student learning outcomes in online environments.

Certificate Curriculum (12 sem. cr.)

Students work directly with their student success advisor to ensure the appropriate course sequence based on course availability.

EIDT 6100 - Instructional Design
EDUC 6135 - Distance Learning
EIDT 6510 - Online Instructional Strategies
EIDT 6511 - Assessments in Online Environments

Training and Performance Improvement - Post-Baccalaureate Certificate in Instructional Design and Technology

Return to: Post-Baccalaureate Certificate in Instructional Design and Technology

The Training and Performance Improvement certificate specialization focuses on managing and delivering training programs and improving workplace performance through quality instruction. Students explore the latest technologies to support training, and they learn to identify performance gaps, conduct needs assessments, and evaluate program effectiveness.

Certificate Curriculum (12 cr.)

Students work directly with their student success advisor to ensure the appropriate course sequence based on course availability.

EDUC 6115 - Learning Theories and Instruction
Master’s Degree Programs

**MS in Early Childhood Studies (Competency Based)**

Tempo Learning® is Walden’s competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

**Specializations**

- Administration, Management, and Leadership
- Teaching and Learning in Early Childhood Settings

**Degree Requirements**

- 33 total semester credits
- Core competencies (21 sem. cr.)
- Specialization competencies (9 sem. cr.)
- Capstone (3 sem. cr.)

**Core Curriculum**

**Core Competencies (21 sem. cr.)**

EDUC 6005 - Foundations: Early Childhood Studies
- EP001 – Use a Systems Perspective to Understand the "Whole Child"
  Use ecological and family systems to understand the "whole child" and support positive outcomes for children.
- PV001 – History and Evolution of the Early Childhood Field
  Explain foundational research, history, and evolution of the early childhood field in the U.S. and globally.
- PV002 – Roles, Responsibilities and Relationships of Early Childhood Professionals
Examine roles, responsibilities, and relationships among early childhood professionals in various sectors/settings within the field.

PV003 – Leadership in the Early Childhood Field
Apply principles of effective leadership to address challenges and opportunities in the early childhood field.

EDUC 6160 - Early Childhood Development
CD001 – Theories of Childhood Development
Demonstrate and understanding of theories and concepts of child development.

CD002 – Knowledge of the Child Development Continuum
Apply knowledge of the child development continuum to support healthy child development and learning.

CD003 – Culture and Language and Its Influence on Development
Explain how culture and language influence children's behavior and development.

CD004 – Supporting Children With Exceptionalities
Demonstrate an understanding of processes, laws, and resources to support the development of children with exceptionalities.

CD005 – Observing, Documenting, and Assessing Children
Evaluate multiple sources of information to assess individual children in order to plan developmentally appropriate practices that help children progress along the continuum.

EDUC 6161 - Effective Programs and Practices
CC001 – Engages Families and Communities
Use best practices to engage families and communities in early childhood programs.

EP002 – Plan Developmentally Appropriate Curriculum
Plan developmentally appropriate curriculum in alignment with professional standards.

EP004 – Evaluating Program Quality
Apply professional standards, guidelines, and tools to evaluate the quality of early childhood programs and identify areas in need of improvement.

EDUC 6162 - Issues and Trends in the Early Childhood Field
EP003 – Resources and Support in Early Childhood
Identify funding sources and processes for obtaining funding to support early childhood programs and initiatives.

PV004 – Impact of Current Issues & Trends On the Field
On the Field Analyze the implications of issues such as socio-economic conditions, changing demographics, brain research, and technology on child development and the early childhood field.
PV005 – Commitment to Lifelong Learning and Professionalism
Maintain professional currency related to early childhood policies, issues, and trends.

RC004 – Research and Advocacy
Use research findings to advocate for children, families, and the early childhood profession.

EDUC 6163 - Building Research Competencies
RC001 – Foundations of Research
Explain key principles and concepts in early childhood research.

RC002 – Research Methodologies
Apply research methodologies appropriate for specific research questions.

RC003 – Evaluating Research
Evaluate the quality of early childhood research studies.

RC005 – Developing Research Proposals
Create research proposals to address questions in the early childhood field.

EDUC 6164 - Perspectives on Diversity and Equity
CR001 – Culturally Responsive Practices
Recommend culturally responsive practices to promote supportive and respectful partnerships with families and positive outcomes for young children.

CR002 – Impact of Bias and Discrimination on Children, Families, and Communities
Demonstrate an understanding of how bias and discrimination impact children, families, and communities.

CR003 – Access, Equity, and Promoting Change
Apply strategies to promote access, equity, and positive social change for young children, families, and the early childhood field.

EDUC 6165 - Communicating and Collaborating in the Early Childhood Field
CC002 – Communicating and Collaborating with Colleagues
Use effective communication and collaboration strategies to develop professional learning communities and engage with colleagues and other professionals.

CC003 – Communicating and Collaborating with Families
Use communication and collaboration strategies necessary to build effective partnerships with diverse families.

CC004 – Communicating and Collaborating with Agencies and Government Officials
Use communication and collaboration strategies to advocate and work effectively with agencies and government officials.

Specialization Competencies (9 sem. cr.)

These competencies are dependent upon the particular specialization. Please see the competency list on each specialization page.

Capstone Competency (3 sem. cr.)

EDUC 6990 - Capstone: Practical Application in the Early Childhood Field
CP001 – Apply Professional Knowledge and Skills
Synthesize and apply knowledge and skills to address real-world issues or needs in the early

Note on Teacher Licensure or Certification

This program does not lead to teacher licensure or certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

Specializations (Master's)

General Program - MS in Instructional Design and Technology

Return to: MS in Instructional Design and Technology

The General Program offers a core of instructional design, research, project management, and evaluation courses designed to give students a well-rounded education with direct application in the workplace. With a heavy emphasis on leadership, problem-solving skills, and hands-on experience, this specialization provides a solid foundation for success in a wide variety of industries and occupations.

Bachelor's Degree Programs

**BS in Elementary Education**

Walden's BS in Elementary Education program prepares educational professionals for teaching certification, which is required in most public school systems in the United States. This program incorporates strategies proven to help educators develop confidence and succeed in today's diverse classroom environments.

Through their coursework, education professionals explore the integration of technology in the classroom, building family partnerships, collaboration, and literacy. Educators also have the opportunity to apply best practices through in-person experiences in K–6 classrooms.

**Learning Outcomes**

Graduates of this program will be prepared to demonstrate skills in the following areas:
Knowledge and Skills—Demonstrate content knowledge, skills, and pedagogy appropriate to elementary education.

Professional Practice—Demonstrate the skills and dispositions of a professional educator.

Instruction—Promote K-6 children’s development and learning across content areas through the design and implementation of engaging, differentiated learning experiences that support children’s development and learning across all domains.

Assessment—Use data to assess student growth to make informed instructional decisions that build on the strengths and meet the needs of individual children.

Cultural Responsiveness—Practice cultural responsiveness to build positive trusting relationships with children, families, and colleagues and to create supportive learning environments for all.

Technology—Use technology appropriately, resourcefully, and innovatively to personalize and improve teaching and learning.

Collaboration and Relationship Building—Demonstrate the ability to work collaboratively with children, families, colleagues, and communities to improve outcomes for every child and effect positive social change.

Degree Requirements

181 total quarter credits

General Education courses—71 qtr. credits
  HMNT 1001 (completed in 1st term)—6 qtr. credits
  Humanities—15 qtr. credits
  Written and Oral communication—10 qtr. credits
  Math and Natural Sciences—20 qtr. credits
  Social Science—20 qtr. credits

Elementary Education courses—75 qtr. credits
  Lower level core—15 qtr. credits
  Professional core—60 qtr. credits
  7 courses with Field Experience; each contain 15 hours of field experience, or about 2.5 hours per week.

Elective courses—25 qtr. Credits
  10 credits of Demonstration Teaching, 12 weeks (full-time)
  6-week courses (except Demonstration Teaching)

**Note:** In addition to Walden’s general technical requirements, candidates must have access to technology (i.e., scanner or camera) that allows them to electronically submit signed documents verifying their field experience hours.

Curriculum
The Walden BS in Elementary Education program is designed for individuals who want to make a positive impact in elementary education, engage with children and families to promote healthy development and learning, and acquire the skills, knowledge, and dispositions of professional educators. Based on current research, the BS in Elementary Education program aligns with national professional standards and licensure requirements. Walden’s BS in Elementary Education program provides the tools, resources, and experiences that prepare candidates to be effective elementary educators.

Learning outcomes for graduates of the BS in Elementary Education program include deep knowledge of children’s development, motivation, and learning; commitment to professional practice; and skill in the areas of instruction, assessment, cultural responsiveness, technology, relationship-building, and collaboration. Throughout their program of study, teacher candidates also focus on designing integrated curriculum, the arts as an essential part of children’s education, literacy learning, and utilizing a wide array of evidence-based approaches and strategies to support the growth and learning of every child.

General Education (71 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.

Elementary Education Courses (75 cr.)

- EDUC 1004 - Child Development
- HLTH 1000 - Concepts of Health Promotion
- POLI 1001 - American Government and Politics

Professional Core (60 cr.)

- EDUC 2400 - The Professional Educator
- EDUC 2401 - Diverse and Exceptional Learners in the Elementary Classroom
- EDUC 2402 - Exploring Dimensions of Literacy K–6
- EDUC 3050 - Child Development, Motivation, and Learning
- EDUC 3052 - Effective Practices: Planning, Instruction, and Assessment
- EDUC 3053 - Community Building for Effective Classroom Management
- EDUC 3054 - Literacy K–6: Instruction and Assessment
- EDUC 3056 - Integrating Content and Technology to Enhance Learning
- EDUC 4010 - Mathematics K–6: Instruction and Assessment
- EDUC 4020 - Science K–6: Instruction and Assessment
- EDUC 3055 - Social Studies and the Arts K–6: Instruction and Assessment
- EDUC 3051 - Collaboration to Support All Learners
Elective Courses (25 cr.)

Teacher candidates can choose courses from any Walden undergraduate program to take as electives. At least one course (5 cr.) must be at the 3000 or 4000 level.

Demonstration Teaching (10 cr.)

EDUC 4030 - Demonstration Teaching/Seminar: Professional Ethics, Communication, and Collaboration in Elementary Education

Licensure

Walden is approved by the Minnesota Professional Educator Licensing and Standards Board (PELSB) to offer a program leading to a Minnesota Tier 3 license in Elementary Education. All candidates must pass the required Minnesota Teacher Licensure Exams (MTLEs) in order to complete the program. Candidates seeking licensure in Minnesota are responsible for completing any other Minnesota requirements beyond Walden's state-approved program. The Minnesota Professional Educator Licensing and Standards Board (PELSB) is solely responsible for reviewing applications and issuing licenses.

Individuals interested in licensure in states other than Minnesota may qualify by virtue of completing a state-approved educator preparation program; however, individuals must review their state’s regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers. Individuals who reside in certain states may be ineligible to enroll in this program. Walden Enrollment Specialists can provide guidance on licensure questions; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure.

Master's Degree Programs

Master of Arts in Teaching (MAT) in Elementary Education

The Master of Arts in Teaching program in Elementary Education is designed for aspiring educators with a bachelor's degree who wish to become an elementary school teacher. In this program, students focus on creating deep knowledge of children's development, motivation, and learning. Students also concentrate on skills in the areas of instruction, assessment, cultural responsiveness, technology, relationship-building, and collaboration. Throughout the curriculum, students also focus on designing integrated curriculum, the arts as an essential part of children's education, literacy learning, and utilizing a wide
array of evidence-based approaches and strategies to support the growth and learning of every child.

**Learning Outcomes**

Upon completion of the MAT in Elementary Education program, graduates will be prepared to:

- Demonstrate the skills necessary to create learning environments that facilitate meaningful learning experiences for elementary students.
- Demonstrate the professional dispositions of an elementary educator.
- Demonstrate the ability to implement differentiated learning experiences that support development in elementary students.
- Evaluate assessment data to make informed instructional decisions that promote student development.
- Demonstrate the ability to be culturally responsive to foster positive trusting relationships with a variety of stakeholders.
- Appropriately integrate a variety of learning technologies in the classroom.
- Demonstrate the ability to work collaboratively with others to improve educational outcomes for elementary children.
- Apply the results of research in the field of education to create positive social change.
- Demonstrate the skills necessary to be a reflective practitioner who actively seeks opportunities to grow professionally.

**Degree Requirements**

70 total quarter credits

Professional core courses (60 cr.)
- Demonstration Teaching (10 cr.)

**Curriculum**

**Professional Core Courses (60 cr.)**

EDUC 6400 - The Professional Educator
EDUC 6401 - Diverse and Exceptional Learners in the Elementary Classroom
EDUC 6402 - Exploring Dimensions of Literacy K–6
EDUC 6050 - Child Development, Motivation, and Learning
EDUC 6051 - Collaboration to Support All Learners
EDUC 6052 - Effective Practices: Planning, Instruction, and Assessment
EDUC 6053 - Community Building for Effective Classroom Management
EDUC 6054 - Literacy K–6: Instruction and Assessment
EDUC 6055 - Social Studies and the Arts K–6: Instruction and Assessment
EDUC 6056 - Integrating Content and Technology to Enhance Learning
EDUC 6010 - Mathematics K–6: Instruction and Assessment
EDUC 6020 - Science K–6: Instruction and Assessment

Demonstration Teaching (10 cr.)

EDUC 6030 - Demonstration Teaching/Seminar: Professional Ethics, Communication, and Collaboration in Elementary Education

Accreditation

Walden University’s Richard W. Riley College of Education and Human Services is accredited by the Council for the Accreditation of Educator Preparation (CAEP) for a period of seven years, from April 2019 through June 2026. This accreditation covers initial teacher preparation programs and advanced educator preparation programs. CAEP is the only recognized national accreditor for educator preparation, promoting excellence in educator preparation through quality assurance and continuous improvement. The Riley College of Education and Human Services earned CAEP accreditation by meeting rigorous national standards and demonstrating excellence in the areas of content and pedagogy, clinical experiences, selectivity, program impact, and capacity for continuous improvement.

CAEP accreditation is based on a review of The Richard W. Riley College of Education and Human Service's initial teacher preparation programs—the BS in Elementary Education and the Master of Arts in Teaching with a specialization in Special Education—and advanced educator preparation programs—the EdS in Educational Leadership and Administration and the MS in Education with a specialization in Educational Leadership and Administration. Three of these programs were reviewed by Specialized Professional Associations (SPAs), which defines content-area standards for programs, and achieved national recognition: Master of Arts in Teaching with a specialization in Special Education, EdS in Educational Leadership and Administration, and MS in Education with a specialization in Educational Leadership and Administration.

Licensure

Walden is approved by the Minnesota Professional Educator Licensing and Standards Board (PELSB) to offer a program leading to a Minnesota Tier 3 license in Elementary Education. All candidates must pass the required Minnesota Teacher Licensure Exams (MTLEs) in order to complete the program. Candidates seeking licensure in Minnesota are responsible for completing any other Minnesota requirements beyond Walden's state-approved program. The Minnesota Professional Educator Licensing and Standards Board (PELSB) is solely responsible for reviewing applications and issuing licenses.
Individuals interested in licensure in states other than Minnesota may qualify by virtue of completing a state-approved educator preparation program; however, individuals must review their state’s regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers. Individuals who reside in certain states may be ineligible to enroll in this program. Walden Enrollment Specialists can provide guidance on licensure questions; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure.

**Master of Arts in Teaching (MAT) in Special Education (K–Age 21)**

Walden’s Minnesota state-approved teacher preparation program with a Master of Arts in Teaching (MAT) in Special Education is designed to prepare candidates to become special education teachers with the knowledge, skills, and dispositions of exemplary educators who work in diverse settings. This program prepares candidates to teach students with mild to moderate exceptionalities ages K–21. The Richard W. Riley College of Education and Human Services is committed to individuals who seek to become skilled classroom teachers and to providing them developmentally appropriate, student-centered learning experiences that build their students' knowledge and skills.

**Learning Outcomes**

At the end of this program, teachers are able to:

- Understand the central concepts, tools of inquiry, and structures of the discipline he or she teaches and can create learning experiences that make these aspects of subject matter meaningful for students.
- Understand how children learn and develop, and can provide learning opportunities that support a child's intellectual, social, and personal development.
- Understand and use a variety of instructional strategies to encourage student development of critical-thinking, problem-solving, and performance skills.
- Plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals.
- Understand and use formal and informal assessment strategies to evaluate and ensure the continuous intellectual, social, and physical development of the learner.
- Be a reflective practitioner who continually evaluates the effects of his or her choices and actions on others (students, parents, and other professionals in the learning community) and who actively seeks out opportunities to grow professionally.
Use knowledge of effective verbal, nonverbal, and media communication techniques to foster active inquiry, collaboration, and supportive interaction in the classroom.

Foster relationships with school colleagues, parents, and agencies in the larger community to support students' learning and well-being.

Understand how students differ in their approaches to learning and create instructional opportunities that are adapted to diverse learners.

Use an understanding of individual and group motivation and behavior to create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

Specialization

Special Education (K–Age 21) - Master of Arts in Teaching (MAT)

Degree Requirements

46 semester credits

Core courses (18 sem. cr.)

Specialization courses (24 sem. cr.)

Demonstration teaching (4 sem. cr.)

Field experience**: a minimum of 105 hours of classroom-based and virtual experiences in conjunction with coursework; 12 weeks of full-time demonstration teaching

MAT courses

ePortfolio

**Note: In addition to Walden's general technical requirements, candidates must have access to technology (i.e., scanner or camera) that allows them to electronically submit signed documents verifying their field experience hours.

## Guidebook

Walden University requires that all candidates in its teacher preparation program with a Master of Arts in Teaching (MAT) review the Candidate Guidebook and Field Experience and Demonstration Teaching Handbook to help them understand the guidelines and requirements of the program, including transition points and field experiences.

Candidates can access the Candidate Guidebook and Field Experience and Demonstration Teaching Handbook in their ePortfolio. Candidates enrolled in the teacher preparation program with a Master of Arts in Teaching (MAT) should refer to the Candidate Guidebook for complete information on the programs and related policies and procedures related to them. Candidates should refer to the Field Experience and Demonstration Teaching Handbook for detailed information regarding the field experience requirements in the program.

## Licensure

Walden is approved by the Minnesota Professional Educator Licensing and Standards Board (PELSB) to offer a program leading to a Minnesota Tier 3 license in Special Education: Academic Behavioral Strategist. All candidates must pass the required Minnesota Teacher Licensure Exams (MTLEs) in order to complete the program.
Candidates seeking licensure in Minnesota are responsible for completing any other Minnesota requirements beyond Walden's state-approved program. The Minnesota Professional Educator Licensing and Standards Board (PELSB) is solely responsible for reviewing applications and issuing licenses.

Individuals interested in licensure in states other than Minnesota may qualify by virtue of completing a state-approved educator preparation program; however, individuals must review their state's regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers. Individuals who reside in certain states may be ineligible to enroll in this program. Walden Enrollment Specialists can provide guidance on licensure questions; however, it remains the individual's responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure.

**Note to all Pennsylvania residents:** Walden University's teacher preparation program is approved by the Minnesota Professional Educator Licensing and Standards Board as leading to licensure. Because this program is not reviewed by the Pennsylvania Department of Education, candidates are instructed to apply for Pennsylvania certification as out-of-state graduates of a teacher preparation program.

**Note to all Washington residents:** Eligibility for initial educator certification in Washington is based on completion of a state-approved educator preparation program. This program is approved in Minnesota and is authorized for field placements in Washington by the Professional Educators Standards Board. Even though you may be residing in Washington while in this program, your application for educator certification in Washington will be processed as an out-of-state application. Go to https://www.k12.wa.us/certification/teacher-certificate/out-of-state-applicants-teachers for more information. Teachers are advised to contact their individual school districts as to whether this program may qualify for teacher advancement.

**MS in Education - Educational Leadership and Administration (Principal Preparation)**

MS in Education Program Description and Outcomes

This specialization prepares aspiring educational professionals to become licensed principals and educational leaders in diverse P–12 settings. Grounded in research and best practices, this scholar-practitioner program integrates coursework with field experiences at the elementary, middle, and high school levels. Courses explore effective communication, collaboration, and leadership practices; public policies and legal issues affecting school governance and management; budgeting and resource management; and human resource practices for hiring, evaluating, and motivating qualified staff. In support of its focus on student outcomes, the specialization also includes specific coursework on
leading curriculum initiatives to improve literacy and math skills, using data to strengthen schools, and boosting achievement among English language learners. Participants learn strategies for creating safe schools, resolving conflict, and administering discipline effectively. Field experiences integrate learned skills and concepts in school settings under the mentorship of a licensed and practicing school principal. Principal candidates must complete a total of 240 hours of field experience at the elementary, middle, and high school levels. Candidates will complete 160 of those hours at the candidate’s preferred level or level of primary teaching experience, and 40 hours each at the other levels.

Learning Outcomes

At the end of this program, graduates will be able to:

- Design and lead initiatives that evaluate and improve instructional programs.
- Develop, implement, and manage ongoing evaluation and professional development in teaching and learning.
- Create strategic plans using a visioning process to be shared and supported by stakeholders.
- Use data to effectively manage the organization and resources for a safe, secure, and effective learning environment.
- Communicate and collaborate with external publics to address community interests and diverse needs.
- Articulate the school’s role within the broader political, social, economic, legal, and cultural context and respond effectively to changes that impact the school community.
- Model democratic value systems, ethics, and moral leadership.

Degree Requirements

36 total semester credits
- Foundation course (3 sem. cr.)
- Core courses (27 sem. cr.)
- Field Experience courses (6 sem. cr.)
- Minimum 5 semesters enrollment

**Note:** In addition to Walden’s general technical requirements, candidates must have access to technology (i.e., scanner or camera) that allows them to electronically submit signed documents verifying their field experience hours.

**Handbooks**

Walden University requires that all candidates in its principal preparation program review the *Principal Candidate Handbook* and *Field Experience Handbook* to help them understand the guidelines and requirements of the program.

Candidates can access both handbooks from their ePortfolio. Candidates enrolled in the principal preparation program should refer to the *Principal Candidate Handbook* for complete information on the program and other university policies and procedures related to the program’s specializations. Candidates should refer to the *Field Experience*
Handbook for detailed information regarding the field experience requirements in the program.

Licensure

Walden is approved by the Ohio Department of Higher Education to offer a program leading to initial principal licensure. All candidates must pass the required Ohio principal licensure exam (OAE 015 Educational Leadership Exam) in order to complete the program. Candidates seeking licensure in Ohio are responsible for completing any other Ohio requirements beyond Walden’s state-approved program. The Ohio Department of Higher Education is solely responsible for reviewing applications and issuing licenses.

Individuals interested in licensure in states other than Ohio may qualify by virtue of completing a state-approved educator preparation program; however, individuals must review their state’s regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers. Individuals who reside in certain states may be ineligible to enroll in this program. Walden Enrollment Specialists can provide guidance on licensure questions; however, it remains the individual’s responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure.

For Minnesota Residents Only: Students who wish to pursue licensure as an educational leader who reside in Minnesota are not eligible for admission into the MS in Education, Educational Leadership and Administration (Principal Licensure Program), but should instead enroll in the EdS – Educational Leadership and Administration (Principal Licensure Program) that is approved by the Minnesota Board of School Administrators to meet requirements for eligibility for licensure as a school principal in Minnesota.

Education Specialist (EdS) Programs

Education Specialist (EdS) in Educational Leadership and Administration (Principal Preparation) Program

Walden University’s Education Specialist (EdS) in Educational Leadership and Administration (Principal Preparation) program is approved by the Minnesota Board of School Administrators as a principal preparation program that leads to P–12 Principal Licensure in Minnesota, as well as the Ohio Board of Regents as a principal preparation program that leads to Building Level Principal Licenses (grades PreK–6, grades 4–9, and grades 5–12). With curriculum aligned to key professional organizations such as the Interstate School Leaders Licensure Consortium, the National Policy Board for Educational Administration, the Ohio Board of Regents, and the Minnesota Board of
School Administrators, principal candidates can expect a learning experience that is based on established standards by respected organizations.

This program will prepare principal candidates to become exemplary, well-informed school leaders who can manage complex educational issues, evaluate and improve instructional programs, develop diverse school personnel, and create a shared strategic vision, as well as encourage and inspire students, staff, families, and the community to provide a safe and secure learning environment. This unique, scholar-practitioner program is grounded in research and provides authentic school leadership experiences that will lead to the successful development of principal candidates.

Learning Outcomes

All EdS graduates will be prepared to:

- Apply discipline-specific knowledge to address issues in educational settings.
- Apply evidence-based practices to address a problem within the academic and/or work environment and propose a solution.
- Communicate information to a variety of stakeholders using oral and written formats.
- Practice ethically as a professional in the field of education.
- Collaborate with diverse stakeholders to promote continuous improvement in educational settings.
- Advocate for social change to make a positive impact in educational settings.

In addition to the shared EdS learning outcomes above, Educational Leadership and Administration (Principal Preparation) graduates will be prepared to:

- Lead initiatives that evaluate and improve instructional programs.
- Effectively manage all personnel and provide ongoing evaluation and professional development in teaching and learning.
- Create a strategic plan using a visioning process to be shared and supported by all stakeholders.
- Use data to effectively manage the organization and resources for a safe, secure, and effective learning environment.
- Address community interests and diverse needs through communicating and collaborating with internal and external publics.
- Articulate the school's role within the broader political, social, economic, legal, and cultural context and respond effectively to changes that impact the school community.
- Model democratic value systems, ethics, and moral leadership; support others to grow and develop as caring and informed citizens.

Individuals interested in licensure in states other than Minnesota or Ohio may qualify by virtue of completing a state-approved educator preparation program; however, individuals must review their state’s regulations to ensure the program meets all requirements, paying particular attention to any requirements specific to out-of-state program completers. Individuals who reside in certain states may be ineligible to enroll in this program. Walden Enrollment Specialists can provide guidance on licensure questions however, it remains the individual's responsibility to understand and comply with all state licensure requirements. Walden makes no representation or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure.
Non-Licensure

Bachelor’s Degree Programs

BS in Child Development

*This program is no longer accepting new students.* Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.

The Walden University BS in Child Development degree program addresses the needs of child development professionals by providing the tools and strategies needed to improve practice with children across a variety of age levels. Students can choose from eight concentrations: Infant/Toddler, Preschool, Dual Infant/Toddler and Preschool, Child and Adolescent Studies, or Psychology. All eight concentrations in the program deliver an in-depth focus on child development, child-centered learning, developmentally appropriate environments, and effective practices for working with children and families. Students will gain insights in the field of child development through courses that bridge the gap between theoretical and practical knowledge, led by national experts, researchers, and experts in the field.

Learning Outcomes

At the end of this program, the education professional:

- Identifies developmentally appropriate practices related to creating environments that are healthy, respectful, supportive, and challenging for all children.
- Identifies the individual characteristics of children and uses this knowledge to make informed decisions regarding the emotional, social, physical, and intellectual well-being.
- Explains the vital role that healthy, respectful, and reciprocal family and community relationships play in supporting the growth and well-being of the whole child.
- Demonstrates an understanding of the importance of cultural and linguistic diversity and the vital role it plays in children’s healthy development and learning.
- Uses professional resources, including collegial sharing for continued professional development, to promote advocacy and social change.

Concentrations

- General
- Administration and Management
- Child and Adolescent Studies
- Dual Preschool and Infant/Toddler
- Family Health and Wellness
Infant/Toddler
Preschool
Psychology

Degree Requirements

181 total quarter credits
General education courses (46 cr.)
Core courses (55 cr.)
Concentration courses (0-55 cr., depending on concentration)
Elective courses (28-72 cr., depending on concentration)
Capstone course (7 cr.)
ePortfolio

Curriculum

The BS in Child Development curriculum consists primarily of core courses that are 6-week, 5-credit courses, culminating with a 6-week, 7-credit Capstone course. Through these courses, students will develop concentration-specific content knowledge, written and oral communications skills, the ability to contribute professionally to a diverse and changing child development field, and an understanding of developmentally appropriate practices. These skills are essential to the field of early childhood education, and they prepare students to make a successful contribution in their current and future work settings.

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.

Core Courses (45 cr.)

EDUC 1001 - Introduction to Education
EDUC 1002 - Pioneers and Philosophies of Education
EDUC 1004 - Child Development
EDUC 1005 - Child Health, Safety, and Nutrition
EDUC 1006 - Child, Family, and Community Relationships
EDUC 2001 - Language Development
EDUC 3003 - Observation and Assessment of the Young Child
EDUC 4004 - Children With Special Needs
EDUC 4005 - Cultural and Linguistic Diversity

Concentration Courses (0-55 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (28-72 cr.)

Electives are dependent upon the particular concentration. Please see the elective requirements on each concentration page.

Capstone Course (7 cr.)

EDUC 4001 - Capstone
OR
EDUC 4500 - Capstone

Note on Teacher Licensure or Certification

This program does not lead to teacher licensure or certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

BS in Early Childhood Studies

The BS in Early Childhood Studies (BS ECS) offers a strong foundation in child development and early childhood education with the purpose of guiding students in creating environments that are healthy, respectful, nurturing, and challenging for all children. Aligning with the standards of the National Association for the Education of Young Children (NAEYC), the BS ECS courses are crafted for students already involved in early childhood settings as well as those seeking to work with and advocate for young children. Studies focus on how to intentionally draw on child development knowledge to support positive outcomes for young children. Emphasis is placed on ways to develop respectful, responsive partnerships with families and work with socially, culturally, and linguistically diverse populations of young children and families, including those with exceptionalities. Students explore the vital role of social-emotional development and positive guidance in children's healthy development and learning. Through field experience, students gain guided practice and experience as they learn how play, creativity, and the content areas of language arts, social studies, math, and science can draw on and promote children's curiosity, individual interests, and positive attitudes toward learning. Throughout the entire program experience, students are challenged to...
continuously apply reflective and critical perspectives to professional practice that promotes advocacy and positive social change for young children, their families, and the early childhood field.

Note: The BS in Early Childhood Studies is only offered in Walden's competency-based education modality, Tempo Learning®, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Learning Outcomes

Promote environments that are healthy, respectful, supportive, and challenging for all children (birth–8).
Apply knowledge of child development to support positive outcomes for all children.
Develop respectful and responsive partnerships with families and communities to support the healthy development and learning of young children.
Differentiate practices to support a socially, culturally, and linguistically diverse population of young children and families, including those with exceptionalities.
Apply reflective, collaborative, and critical perspectives to professional practice that promote advocacy and social change.

Degree Requirements

180 total quarter credits
General education courses (45 cr.)
Core competencies (75 cr.)
Elective courses (55 cr.)
Capstone competencies (5 cr.)

Curriculum

General Education Courses (45 cr.)

See the general education general education section of this Walden University Catalog.

Note: A minimum of 60 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need
to select 3000- or 4000-level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.

Core Competencies (75 cr.)

**EDUC 1005TL - Health and Safety for Young Children [Tempo Learning®-Specific Course]**

- HS1001 Nutrition and Young Children
  - Identify principles and concepts of healthy nutrition for young children.
- HS1002 Physical Health
  - Explain key concepts related to the physical health of young children.
- HS1003 Physical Activity
  - Recommend developmentally appropriate strategies for promoting healthy physical activity for young children.
- HS1004 Child Safety
  - Explain guidelines and procedures to ensure the safety of young children.
- HS1005 Mental Health
  - Explain key principles and concepts related to mental health in young children.
- HS1006 Promoting Wellness
  - Apply concepts related to the health and safety of young children to promote wellness in children and families.

**EDUC 1101TL - Becoming an Early Childhood Professional [Tempo Learning®-Specific Course]**

- BP1001 Professional Roles and Responsibilities
  - Explain professional responsibilities, roles, and ethics that apply to the early childhood field.
- BP1002 Evolution of the Early Childhood Field
  - Identify historical milestones and contributions of theorists and practitioners to show understanding of the evolution of the early childhood field.
- BP1003 Early Childhood Organizations
  - Explain how key organizations and resources inform the early childhood field.
- BP1004 Issues and Trends That Inform Professional Practice
  - Analyze current early childhood issues and trends to inform professional practice.
BP1005 Identity as an Early Childhood Professional
Integrate critical perspectives to inform a personal identity as an early childhood professional.

EDUC 1102TL - Early Childhood Development [Tempo Learning®-Specific Course]
ED1001 Child Development Concepts and Theories
Identify key concepts and theories in the field of child development.
ED1002 Developmental Continuum: Prenatal to Birth
Explain the developmental continuum, prenatal to birth.
ED1003 Developmental Continuum: Infants and Toddlers
Explain the developmental continuum of infants and toddlers.
ED1004 Developmental Continuum: Preschoolers
Explain the developmental continuum of preschoolers.
ED1005 Developmental Continuum: Ages 5–8
Explain the developmental continuum of children ages 5–8.
ED1006 Factors Influencing Child Development
Explain factors that influence child development.

EDUC 2102TL - Children With Exceptionalities [Tempo Learning®-Specific Course]
CE2001 Legal Requirements for Children With Exceptionalities
Identify legal requirements designed to support children with exceptionalities and their families.
CE2002 Procedural Requirements for Young Children With Exceptionalities
Identify procedural requirements for supporting children with exceptionalities and their families.
CE2003 Characteristics of Children With Exceptionalities
Describe characteristics of children with exceptionalities.
CE2004 Early Intervention
Explain the importance of early intervention for young children and families.
CE2005 Special Education Services for Children With Exceptionalities Ages 3–8
Explain characteristics of special education services and perspectives of parents/families of young children with exceptionalities ages 3–8.
CE2006 Issues and Trends
Explain issues and trends related to children with exceptionalities and their families.
CE2007 Collaborating With Families and Other Professionals to Support Young Children
Analyze collaborative planning with the goal of supporting healthy development and learning for young children with exceptionalities.
EDUC 2403TL - Child, Family, and Community Relationships [Tempo Learning®-Specific Course]
   FR2001 Theories Essential to Understanding Child, Family, and Community Relationships
   Identify human ecological, family systems, and socialization theories related to child and family development.
   FR2002 Dynamic Influences on Children in Family and Community Contexts
   Analyze dynamic influences on children in family and community contexts.
   FR2003 Family Relationships
   Analyze strategies for fostering caring relationships with families.
   FR2004 Family and Community Engagement
   Apply strategies that foster family and community engagement in supporting the healthy development and learning of young children.

EDUC 3013TL - Culturally Responsive Practice [Tempo Learning®-Specific Course]
   CL3001 Culture as Context
   Explain how culture provides a critical context for children's growth and development.
   CL3002 Policies That Support Culturally Responsive Early Childhood Settings
   Analyze how current policy issues and trends impact early childhood settings and the diverse populations of children and family they serve.
   CL3003 Culturally Responsive Curriculum
   Apply principles of culturally responsive curriculum to promote development and learning in young children.
   CL3004 Culturally Responsive Relationships
   Recommend culturally responsive practices to promote supportive and respectful partnerships with families.
   CL3005 Access, Equity, and Positive Social Change
   Apply strategies to promote access, equity, and positive social change for young children, families, and early childhood professionals.

EDUC 3401TL - Social-Emotional Development and Positive Guidance [Tempo Learning®-Specific Course]
   SD3001 The Social-Emotional Developmental Continuum
   Explain the social-emotional developmental continuum for young children.
   SD3002 Foundations of Positive Guidance and Responsive Relationships
   Explain key concepts related to positive guidance and responsive relationships that promote healthy child development and learning.
   SD3003 Problem Solving in Early Childhood Settings
   Apply positive guidance strategies to solve problems in early childhood settings.
SD3004 Analyzing Positive Classroom Communities
   Analyze positive classroom communities based on positive guidance and
   opportunities for healthy social-emotional development and learning.
SD3005 Factors That Can Impact Children's Social Emotional Development
   and Behavior
   Explain how factors can influence children’s social emotional development
   and behavior.
EDUC 3402TL - Effective Practices for Quality Programs Serving Young Children
   [Tempo Learning®-Specific Course]
   QP3001 Developmentally Appropriate Practice
   Analyze how the National Association for the Education of Young
   Children "Principles of Developmentally Appropriate Practice" and
   effective family engagement principles inform quality programs and family
   partnerships.
   QP3002 Standards of Quality
   Explain the types and roles of standards that guide early childhood
   programs.
   QP3003 Effective Program Models
   Explain effective pedagogical and organizational early childhood program
   models.
   QP3004 Effective Teaching and Leadership Practice in Early Childhood
   Programs
   Analyze effective teaching and leadership practices in early childhood
   programs.
EDUC 3403TL - Early Literacy [Tempo Learning®-Specific Course]
   EL3001 Early Literacy Concepts
   Explain concepts related to early literacy skills for young children.
   EL3002 Promoting Early Literacy Among Infants and Toddlers
   Explain signs of emergent literacy in infants and toddlers, and strategies
   for enhancing emergent literacy, while promoting positive dispositions
   toward reading and language learning.
   EL3003 Promoting Early Literacy Among Preschoolers
   Explain signs of emergent literacy in preschoolers, and strategies for
   enhancing emergent literacy, while promoting positive dispositions
   toward reading and language learning.
   EL3004 Promoting Early Literacy in K–3
   Explain strategies for enhancing literacy development and positive
   dispositions toward reading and language learning in K–3 children.
   EL3005 Children’s Literature
   Evaluate the quality of children’s literature across multiple genres and
quality read-aloud experiences to promote positive dispositions toward reading and language learning in young children.

EL3006 Technology, Early Literacy, and Young Children
Analyze issues and strategies related to appropriate use of technology to promote literacy learning in young children.

EDUC 3404TL - Observation, Assessment, and Planning [Tempo Learning®-Specific Course]

AY3001 Assessment for Young Children
Explain key concepts related to uses of assessment and screening to support young children's development and learning.

AY3002 Assessment Strategies and Methods
Analyze essential assessment strategies and methods used to support young children's development and learning.

AY3003 Observation and Analysis
Analyze assessment processes and data to support effective planning in early childhood settings.

AY3004 Assessment in the Classroom Context
Analyze strategies for using assessment as an ongoing practice to support learning for young children.

AY3005 Communication and Collaboration to Support Effective Assessment
Communicate and collaborate with families and other stakeholders to promote meaningful assessment practices.

EDUC 4019TL - Play, Creativity, and the Arts [Tempo Learning®-Specific Course]

PC4001 Key Concepts and Strategies Related to Play
Analyze concepts and strategies key to understanding the value of play and fostering play in young children.

PC4002 Key Concepts and Strategies Related to Creativity
Analyze concepts and strategies for fostering creativity in young children.

PC4003 Young Children and the Creative Arts
Explain key concepts related to young children and the creative arts.

PC4004 Child-Centered Learning and Creativity
Analyze the role child-centered learning and creative teachers play in fostering children's creative thinking, creative skills, and creative arts expression.

EDUC 4120TL - Effective Practices for Infants and Toddlers [Tempo Learning®-Specific Course]
(This course requires 10 hours of field experience focused on developing and taking part in meaningful learning experiences for infants or toddlers in an early childhood setting.)
DI4001 Responsive Relationships With Infants, Toddlers, and Their Families
Explain approaches and strategies that foster healthy infant and toddler
development through responsive and respectful relationships with infants,
toddlers, and their families.

DI4002 The Role of Play in the Lives of Infants and Toddlers
Synthesize why fostering play is critical to healthy infant and toddler
development.

DI4003 Routines and Transitions That Foster Healthy Development for
Infants and Toddlers
Evaluate effective routines and transitions in infant and toddler care and
education settings.

DI4004 Environments That Support Healthy Development and Learning for
Infants and Toddlers
Evaluate infant and toddler environments that support healthy
development and learning.

DI4005 Meaningful Experiences With Infants and Toddlers
Develop respectful, supportive, and challenging experiences with infants
and toddlers.

EDUC 4121TL - Meaningful Learning Experiences [Tempo Learning®-Specific
Course]
(This course requires 20 hours of field experience focused on developing and
taking part in meaningful learning experiences in a P–3 classroom setting.)

ML4001 Approaches to Meaningful Learning and Teaching
Analyze strategies, approaches, and curriculum models that support
meaningful learning and teaching in P–3 classrooms.

ML4002 Child/Family Contexts to Support Meaningful Learning and Teaching
Analyze characteristics of communities, classrooms, families, and children
to support meaningful learning and teaching.

ML4003 Knowledge of Content Areas and Meaningful Learning and Teaching
Apply knowledge of key concepts to inform planning of meaningful
learning and teaching across content areas in P–3 classrooms.

ML4004 Meaningful Learning Experiences in P–3 Settings
Apply professional knowledge to design, implement, and evaluate
meaningful learning experiences that support positive outcomes for all
children in P–3 settings.

EDUC 4122TL - Learning and Teaching in Inclusive Early ChildhoodSettings [Tempo
Learning®-Specific Course]

IP4001 Foundations of Inclusion
Explain foundational concepts related to high-quality inclusive early
childhood programs.
IP4002 Inclusive Practices in Early Care and Education Settings
  Explain evidence-based strategies for inclusive practice to enhance the development and learning of young children.

IP4003 Environments That Support Quality Inclusion for Young Children
  Explain components and practices of high-quality inclusive environments supportive of young children's access and participation.

IP4004 Partnerships That Support Children in Inclusive Early Childhood Programs
  Explain strategies for partnering with families and other professionals to support inclusive experiences for young children.

IP4005 Supporting Inclusion Through Advocacy, Program Policy, and Evidence-Based Practice
  Apply evidence-based policies, practices, and advocacy strategies to support high-quality inclusive programming in early childhood settings.

Electives (55 cr.)

Choose 11 courses from either general education or other Walden bachelor's degree programs. At least one course (5 elective credits) must be at the 3000–4000 level. Elective credits should total 55 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

Capstone Competencies (5 cr.)

EDUC 4220TL - Early Childhood Professionalism [Tempo Learning®-Specific Course]
  PL4001 Knowledgeable, Reflective, and Critical Perspectives on Early Childhood
    Analyze early childhood knowledge, perspectives, roles, and identities.
  PL4002 Effective Interviewing Techniques for Early Childhood Professionals
    Evaluate skills, strategies, and early childhood knowledge relevant to effective interview performances.
  PL4003 Informed Advocacy in the Early Childhood Field
    Develop research-based advocacy plans for current issues in the early childhood field to promote positive social change.
  PL4004 Professional Development
    Plan for personal and professional development to support meaningful contributions to young children's healthy development and learning.

Note on Teacher Licensure or Certification
This program does not lead to teacher licensure or certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

Other Undergraduate Options

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a "C" in the graduate-level course but only a grade of "B" or better will carry over to the graduate program. Students who receive a "C" grade will be awarded a grade of "C,"* which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not pass their AIM class are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must take that course as a master's student.

Requirements

Walden University offers several opportunities for undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

Individual programs may determine the specific eligible AIM courses and some programs may limit the number of courses available. Generally, AIM coursework should not account for more than approximately 50% of the credits needed for master's degree completion. Practicum or Capstone requirements for the master's program are not eligible to be satisfied by AIM coursework.

To be eligible to begin AIM courses, students must:

a. Have an overall GPA equal to that required for admission to the associated master's degree.* BS AIM track students must maintain a 2.5 GPA and have a transfer GPA of at least 2.5 (if transferring credits).

b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.) * BS in Psychology AIM track students do not need to meet this requirement.

c. Be in good financial standing.

d. Not have any incompletes.

AIM courses are (5000-level) graduate courses.*
a. Tuition for these courses is charged at the undergraduate rate for the course-based learning format. For Tempo Learning® these courses are included in the program's subscription cost.

b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.

c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA only.

Students must get a "B" or better in each course to have that course applied to the master's program.

Students who do not earn a grade of "C" or better will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must take that course as a master's student. * BS in Psychology AIM track students may retake an AIM course a second time if they failed the first time; they must earn a grade of "C" or better the second time in order to stay in the AIM track program.

Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.

Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

Upon completion of the undergraduate program requirements, students should file an Intent to Graduate Form.

Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a "B" or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

Undergraduate students may complete AIM courses to fulfill elective credits, as course substitutions approved by the program director, or they may elect a second concentration within their program of study that is designed for AIM completion. Students are encouraged to consult with Student Success Advising (if in the course-based learning format) or their Academic Coaching (if in the Tempo Learning® format)
on the most appropriate plan for their program and academic goals, such as their future master's program and time to completion.

*Note: Graduate students cannot register for AIM courses.

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure. The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.
**Undergraduate Minors**

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student’s major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their student success advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Communication
- Minor in Criminal Justice
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Healthcare Management
- Minor in Introductory Instructional Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health

**Graduate Certificate Programs**

**Graduate Certificate in Adult Learning**

The Adult Learning certificate can help students meet the increasing demand for qualified adult educators and training professionals. Students will explore a broad range of teaching techniques designed to help adult learners in areas that include adult literacy, vocational education, community programs, employee training, and self-enrichment.

**Certificate Requirements**

12 total semester credits

**Curriculum**

- EDUC 6171 - Theories and Frameworks for Adult Learning
- EDUC 6174 - Developing a Repertoire of Effective Teaching Practices
- EDUC 6175 - Planning, Assessing, and Improving Adult Learning
- EDUC 6176 - Facilitating Collaboration and Group Process

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

Graduate Certificate in College Teaching and Learning

The Graduate Certificate in College Teaching and Learning can help students gain the skills they need to meet the increasing demand for qualified college instructors. Students will discover the major steps in the teaching and learning process: planning, developing, and facilitating learning experiences and assessing outcomes. Online learning environments and student requirements in the virtual classroom will be explored. Credits earned in this certificate program may be applied toward Walden's MS in Higher Education with a specialization in College Teaching and Learning.

Certificate Requirements

12 total semester credit hours
Curriculum

EDUC 6757 - Planning for Learning
EDUC 6758 - Creating Engaging Learning Experiences
EDUC 6759 - Assessing for Learning
EDUC 6760 - Facilitating Learning Online

Course Sequence

The course sequence for this specialization is dependent upon the student's Program of Study. Students work directly with their student success advisor to ensure the appropriate course sequence based on course availability.

Note on Licensure

Walden's Graduate Certificate in College Teaching and Learning focuses on the development of scholarly teaching knowledge and skills. It does not necessarily provide individuals with all of the course credits required to teach in a particular academic discipline; therefore, additional subject-specific graduate credits may be needed. Individuals are responsible for ensuring that they meet the credentialing requirements of the institution where they want to teach. Walden makes no representation or guarantee that completion of this coursework will permit an individual to teach at a higher education institution.

Graduate Certificate in Curriculum, Instruction, and Assessment

This certificate is designed to give teachers the tools to plan, develop, and implement quality units and lessons with an emphasis on the important interrelationships between curriculum, instruction, and assessment. It sets the stage for refocusing and energizing planning so teachers' classrooms can become a place where students are motivated and engaged in meaningful learning.

This certificate also explores how teachers can be effective leaders of learning in their classrooms. Teachers learn the latest findings in neuroscience and apply a variety of teaching strategies that promote and foster real learning and achievement.

Certificate Requirements

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

Graduate Certificate in Early Childhood Administration, Management, and Leadership

The Early Childhood Administration, Management, and Leadership certificate program is designed to prepare educators to effectively manage child care centers or administer programs for young children. Learners explore the essential components of effective early childhood programs and develop the practical personnel and business management skills they need to lead those programs. Coursework covers effective program practices; budget and resource allocation; and personnel recruitment, evaluation, and management. Learners also consider and are provided tools to respectfully address the impact of diversity, culture, and equity issues on early childhood development. Learners
can apply the credits they earn in this certificate program toward Walden’s MS in Early Childhood Studies with a specialization in Administration, Management, and Leadership.

**Note:** The Graduate Certificate in Early Childhood Administration, Management, and Leadership program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

**Competency-Based Education**

In addition to the course-based option described below, students can choose to earn their Graduate Certificate in Early Childhood Administration, Management, and Leadership through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the Graduate Certificate in Early Childhood Administration, Management, and Leadership (Competency Based) page for program details.

**Course-Based Program**

**Certificate Requirements**

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual’s responsibility to understand and comply with all state and school district requirements.

Graduate Certificate in Early Childhood Administration, Management, and Leadership (Competency Based)

Tempo Learning® is Walden’s competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

Certificate Requirements

15 total semester credits

Curriculum

EDUC 6161 - Effective Programs and Practices
EP002 Plan Developmentally Appropriate Curriculum
Plan developmentally appropriate curriculum in alignment with professional standards.
EP004 Evaluating Program Quality
   Apply professional standards, guidelines, and tools to evaluate the quality of early childhood programs and identify areas in need of improvement.

CC001 Engages Families and Communities
   Use best practices to engage families and communities in early childhood programs.

EDUC 6164 - Perspectives on Diversity and Equity

CR001 Culturally Responsive Practices
   Recommend culturally responsive practices to promote supportive and respectful partnerships with families and positive outcomes for young children.

CR002 Impact of Bias and Discrimination on Children, Families, and Communities
   Demonstrate an understanding of how bias and discrimination impact children, families, and communities.

CR003 Access, Equity, and Promoting Change
   Apply strategies to promote access, equity, and positive social change for young children, families, and the early childhood field.

EDUC 6166 - Developing People and Leading Teams

LD001 Ethical and Legal Considerations in Leadership
   Apply ethical principles and legal requirements to managing and leading diverse individuals and teams.

LD002 Leading and Developing Teams
   Plan strategies for managing, leading, and developing teams in early childhood contexts.

LD003 Organizational Culture
   Analyze organizational culture in early childhood contexts and its impact on staff, children, and families.

LD004 Recruiting, Developing, and Retaining Staff
   Apply best practices for the recruitment, professional development, performance evaluation, and retention of diverse staff in early childhood contexts.

EDUC 6167 - Budgeting and Allocating Resources

MP001 Creating Grant Proposals
   Create grant proposals to secure funding for an early childhood program.

MP003 Allocating Resources to Effectively Manage Programs and Facilities
   Use appropriate tools and strategies to budget for and allocate resources in support of early childhood programs and facilities.

MP004 Creating Budgets
   Create balanced budgets for early childhood programs.
EDUC 6168 - Planning and Managing Early Childhood Programs

LD005 Effective Program Planning
Plan elements of effective early childhood programs including mission and vision statements, a family handbook, a plan for family and community involvement, and a design for the indoor and outdoor physical environment.

MP005 Regulations in Early Childhood Settings
Identify state and federal regulations that apply to various early childhood settings.

MP002 Marketing in Early Childhood Programs
Apply effective strategies to market early childhood programs.

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

Graduate Certificate in Early Childhood Advocacy and Public Policy

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden's Time-to-Degree Completion policies.

Through the Graduate Certificate in Early Childhood Advocacy and Public Policy, educators are furnished the background knowledge and specialized skills they need to shape public policy and advocate effectively on behalf of young children, their families, and the field of early childhood studies. Learners explore current research and theories on child development; the essential components of effective early childhood programs; and local, state, national, and international perspectives on early childhood infrastructures. Coursework also examines practical strategies for effecting policy change and public opinion, including grant writing, coalition building, communications planning, and policy development. Learners can apply the credits they earn in this certificate program toward Walden's MS in Early Childhood Studies with a specialization in Early Childhood Public Policy and Advocacy.

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

Graduate Certificate in Elementary Reading and Literacy

The Graduate Certificate in Elementary Reading and Literacy prepares educators to provide developmentally appropriate and culturally responsive literacy instruction to P–6 students of diverse abilities and backgrounds. Courses examine assessment methods, resources, and instructional strategies required to support beginning P–3 readers and developing readers in grades 4–6 by using the five pillars of reading as an organizational
framework (phonemic awareness, phonics, fluency, vocabulary, and comprehension). To support English-language learners (ELLs), educators examine the second-language acquisition process, learn to assess literacy proficiency, and select appropriate instruction materials. Educators learn to assess progress and differentiate instruction for both struggling and gifted readers. Effective collaboration skills are emphasized throughout the coursework. Credits earned from this certificate program may be applied toward Walden’s MS in Education with a specialization in Elementary Reading and Literacy (P–6).

*Walden University’s Graduate Certificate in Elementary Reading and Literacy does not lead to certification or licensure in elementary reading and literacy. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure as an elementary reading and literacy teacher.

Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual’s responsibility to understand and comply with all state and school district requirements.

Graduate Certificate in Engaging Culturally Diverse Learners

Today's classrooms serve students and families of great diversity. So it is essential that teachers develop self-awareness and knowledge with regard to the complex influences of culture, language, and life experiences and explore the nature of diversity in today's society and in today's schools.

The courses in this certificate program offer teachers opportunities to explore current theories, research, and effective practices related to student diversity. Teachers study ways to meet student needs through models such as the Universal Design by Learning (UDL) and Differentiated Instruction (DI) as well as how to integrate technology to customize instruction. Teachers also have hands-on experiences in building a repertoire of research-based strategies for diverse learning environments. The goal of the certificate is for teachers to develop an approach that is appropriate for their students.

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

Graduate Certificate in Enrollment Management and Institutional Marketing

The Certificate in Enrollment Management and Institutional Marketing can help educators explore the latest techniques to attract and retain students in accordance with their institution's mission. Educators develop comprehensive strategies and utilize a range of communication and marketing tools to promote their institution and reach students. Credits earned in this certificate program may be applied toward Walden's MS in Higher Education with a specialization in Enrollment Management and Institutional Marketing.

Certificate Requirements
12 total semester credits

Curriculum

EDUC 6156 - Understanding Students: Learning, Development, and Diversity
EDUC 6755 - Principles of Marketing and Enrollment Management
EDUC 6756 - Emerging Trends in Marketing, Recruitment, and Institutional Promotion
EDUC 6761 - Globalization in Higher Education

Graduate Certificate in Higher Education Leadership for Student Success

The Graduate Certificate in Higher Education Leadership for Student Success is intended to prepare educators to develop and lead higher education programs and services that can improve outcomes for an increasingly diverse student population. Learners examine the history and structure of the U.S. higher education system, as well as factors affecting student success, engagement, and retention. Coursework explores fundamental principles of adult learning, best practices for student success, methodologies for meeting the needs of underprepared and first-generation higher education students, and strategies for leading the institutional changes necessary to improve student outcomes. This program is designed to prepare leaders who can help higher education institutions meet their students’ needs more effectively and cost-efficiently. Learners can apply the credits they earn in this certificate program toward
Walden’s MS in Higher Education with a specialization in Leadership for Student Success.

Certificate Requirements

Graduate Certificate in Integrating Technology in the Classroom

Educators must stay apprised of the latest technologies that support teaching and learning. This certificate provides teachers with the 21st-century knowledge, strategies, and skills to create effective and motivating learning environments, while actively engaging today's technologically savvy students.

The courses in the certificate provide hands-on, practical opportunities to create learner-centered classrooms using the latest digital technologies. Teachers study ways
to meet the needs of diverse learners by incorporating new technologies into instruction across grade levels and content areas.

Certificate Requirements

12 total semester credits

Curriculum

EDUC 6710 - Understanding the Impact of Technology on Education, Work, and Society
EDUC 6711 - Bridging Learning Theory, Instruction, and Technology
EDUC 6712 - Supporting Information Literacy and Online Inquiry in the Classroom
EDUC 6713 - Integrating Technology Across the Content Areas

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide
guidance on program requirements; however, it remains the individual’s responsibility to understand and comply with all state and school district requirements.

**Graduate Certificate in Mathematics 5–8**

This five-course certificate is designed to expand the middle school mathematics teacher’s repertoire of instructional strategies and resources. Using the Common Core State Standards and the National Council of Teachers of Mathematics content and process standards as a framework, students in these courses explore key topics in a well-balanced middle school program, including number systems and operations; geometric thinking and measurement; algebraic reasoning, functions, and equations; and data, probability, and statistical reasoning. The emphases of the program are the proportional reasoning and algebraic thinking skills critical to student success in high school mathematics as well as methods for assessing mathematics skills and knowledge, addressing misconceptions, and engaging students through mathematical modeling and multiple representations.

**Certificate Requirements**

15 total semester credits

**Curriculum**

- **MATH 6551 - Understanding Number Systems and Operations**
- **MATH 6552 - Geometric Thinking and Measurement**
- **MATH 6553 - Algebraic Reasoning, Functions, and Equations**
- **MATH 6554 - Data, Probability, and Statistical Reasoning**
- **MATH 6561 - Learning and Teaching Mathematics**

**Course Sequence**

The course sequence for this specialization is dependent upon the student's Program of Study. Students work directly with their student success advisor to ensure the appropriate course sequence based on course availability.

**Note on Endorsement, Licensure, or Certification**

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide
Graduate Certificate in Mathematics K–6

This five-course certificate is designed for K–6 teachers who wish to deepen their own mathematical expertise as they expand their repertoire of instructional strategies and resources. Using the Common Core State Standards and the National Council of Teachers of Mathematics content and process standards as a framework, the focus of these courses is on preparing teachers to assess K–6 students' existing mathematical knowledge and skills, plan interventions, and engage students. Course topics include practical strategies for teaching the base ten number system and operations; measurement, data, and geometric thinking; and rational numbers and proportional reasoning.

Certificate Requirements

15 total semester credits

Curriculum

- MATH 6561 - Learning and Teaching Mathematics
- MATH 6562 - The Base Ten Number System and Operations: Addition/Subtraction
- MATH 6563 - The Base Ten Number System and Operations: Multiplication/Division
- MATH 6564 - Measurement, Data, and Geometric Thinking
- MATH 6565 - Understanding Rational Numbers and Proportional Reasoning

Course Sequence

The course sequence for this specialization is dependent upon the student's Program of Study. Students work directly with their student success advisor to ensure the appropriate course sequence based on course availability.

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.
Graduate Certificate in Online Teaching for Adult Educators

The Graduate Certificate in Online Teaching for Adult Educators prepares educators to design and deliver online courses and programs geared to adult learners. Grounded in adult learning theory, courses examine how to leverage new technologies to enhance the adult learning process; analyze, select, and design the online instructional strategies most effective for adult learners; integrate course management tools and multimedia technologies into synchronous and asynchronous environments; and assess student learning in those environments.

Certificate Requirements

12 total semester credits

Curriculum

EDUC 6171 - Theories and Frameworks for Adult Learning
EDUC 6177 - Using Technology to Enhance Adult Learning
EDUC 6179 - Online Instructional Strategies for Adult Learners
EDUC 6180 - Assessments in Online Environments for Adult Learners

Graduate Certificate in Reading and Literacy K–12

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.
In this certificate program, students can develop the skills and experience needed to become effective reading and literacy educators, satisfy additional teaching requirements, or transition to a different focus in their career. Through an exploration of reading research, theories, and practices, they can gain an understanding of how to diagnose reading difficulties and assess solutions. The program blends subjects like theory, critical thinking, and promotion of literacy development. Upon completion of the certificate program, educators will be better equipped to support their students to apply literacy skills and effectively connect, interpret, and discern the intricacies of the English language.

Certificate Requirements

12 total semester credits

Curriculum

EDUC 6631 - Foundations of Reading: Theory, Research, and Practice
EDUC 6632 - Assessment and Instruction to Promote Literacy Development
EDUC 6633 - Reading, Writing, and Critical Thinking in Content Disciplines
EDUC 6634 - Assessment and Intervention for Students With Reading Difficulties

Course Sequence

**Graduate Certificate in Science, Grades K–8**

The Graduate Certificate in Science, Grades K–8 strengthens educators' understanding of key science concepts and prepares them to transfer that knowledge to the K–8 classroom. Educators explore the nature and history of science, environmental science, physical phenomena, ecology, and earth science. Throughout these courses, educators engage actively in the scientific process, learning how to apply the tools of scientific inquiry, discovery, and hypothesis to deepen their own understanding and create engaging K–8 learning experiences. Educators consider emerging trends and issues in science and science education, including genetic engineering, biotechnologies, climate change, and the demand for increased science, technology, engineering, and mathematics (STEM) instruction. Credits earned from this certificate program may be applied toward Walden’s MS in Education with a specialization in Science (Grades K–8).

**Certificate Requirements**

15 total semester credits

**Curriculum**

- SCIE 6660 - The Nature of Science
- SCIE 6661 - Exploring the Physical World
- SCIE 6662 - Investigating the Living World
- SCIE 6663 - Exploring the Earth and Beyond
- SCIE 6664 - Looking Into the Future of Science and Education

**Course Sequence**

The course sequence for this specialization is dependent upon the student's Program of Study. Students work directly with their student success advisor to ensure the appropriate course sequence based on course availability.

Graduate Certificate in Special Education

The Graduate Certificate in Special Education prepares educators to develop effective literacy and behavioral interventions, differentiate instruction, and collaborate successfully to support diverse special needs students. Course topics include: research-based approaches to monitoring progress and designing and delivering standards-based instruction in the content areas; methods for identifying reading and writing disabilities and devising appropriate interventions; and advanced behavior assessment, management, and intervention practices. Courses emphasize the importance of professional collaboration in serving special needs students.

Certificate Requirements

12 total semester credits

Curriculum

- EDUC 6780 - Exploring Leadership, Collaboration, and Consultation
- EDUC 6791 - Special Education: Honoring Due Process (Accelerating)
- EDUC 6782 - Supporting Effective Evaluation and Assessment Practices
- EDUC 6784 - Adapting Instruction Using Evidence-Based Strategies

**Graduate Certificate in Teacher Leadership**

This certificate helps teachers establish leadership qualities and build upon existing expertise while renewing excitement about teaching. The courses address key challenges, such as the changing educational environment, parent involvement, and raising student achievement. Teachers study ways to lead with confidence while leveraging the latest research to guide decisions and mentor others throughout the learning community.

Graduate Certificate in Teaching and Diversity in Early Childhood Education

The Graduate Certificate in Teaching and Diversity in Early Childhood Education seeks to prepare educators to understand and address the role that diversity—cultural, socioeconomic, and otherwise—plays in child development and learning. Educators examine the types and stages of early childhood development with a focus on the role of cultural and linguistic diversity; essential components of effective early childhood programs; and the impact of access, equity, and social justice on child development and early childhood programming. Educators also study approaches to meeting the needs of English language learners, children on the autism spectrum, and children with developmental delays. Coursework explores practical strategies for planning curricula, teaching and assessing young children, and referring children to appropriate resources. Learners can apply the credits they earn in this certificate program toward Walden's MS
in Early Childhood Studies with a specialization in Teaching and Diversity in Early Childhood Education.

Certificate Requirements

15 total semester credits

Curriculum

EDUC 6160 - Early Childhood Development
EDUC 6161 - Effective Programs and Practices
EDUC 6164 - Perspectives on Diversity and Equity
EDUC 6357 - Diversity, Development, and Learning

Graduate Certificate in Teaching English Language Learners

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.

This four-course, graduate certificate program provides effective strategies for: teaching English as a Second Language (ESL); making content accessible to English Language Learners (ELLs); and creating collaborative, culturally responsive learning environments. Coursework explores language acquisition theory and research as well as language-learning programs such as dual language immersion, transitional bilingual education, and structured English immersion. Participants learn practical methods for integrating content and literacy objectives to help K–12 students master both subject matter and English listening, speaking, reading, and writing skills. Courses also introduce a variety of assessment tools and interpretative techniques for evaluating language proficiency and guiding instructional approaches.

Certificate Requirements

12 total semester credits

Curriculum

EDUC 6726 - Understanding the English Language Learner
EDUC 6727 - Strategies for Teaching English as a Second Language
EDUC 6728 - Strategies for Teaching Content to English-Language Learners
EDUC 6729 - Assessment and the English-Language Learner

Graduate Certificate in Teaching K–12 Students Online

This certificate prepares teachers to design and deliver online instruction that meets the diverse needs of learners today. Through the courses in this certificate, teachers study ways to create learning experiences that interest, engage, and motivate students. Teachers will be able to accurately assess the progress of learners, while also creating a sense of community where all interactions are meaningful, collaborative, safe, and ethical.

Certificate Requirements

12 total semester credits

Curriculum

EDUC 6570 - Distance Education
EDUC 6571 - Online Instruction
EDUC 6572 - Online Assessment
EDUC 6573 - Trends and Issues in K–12 Online Learning

Course Sequence

The recommended course sequence is as follows:
Post-Baccalaureate Certificate in Instructional Design and Technology

Walden University offers a four-course certificate program in Instructional Design and Technology with specializations in Instructional Design, Online Learning, and Training and Performance Improvement. Depending on the specialization chosen, this certificate will demonstrate to current or potential employers that students have mastered the foundational concepts and principles related to instructional design, distance learning, learning theories, and program effectiveness.

Students who successfully complete the certificate can apply the certificate credits toward Walden’s MS in Instructional Design and Technology degree program.

Specializations

- Instructional Design
- Online Learning
- Training and Performance Improvement

Certificate Requirements

12 total semester credit hours

Additional Technology Requirements

Note: In addition to Walden’s general technical requirements, this program has additional technology requirements:

- Windows Vista or Mac OS X
- Free, downloadable software programs that may be required in order to complete the course and program requirements

Master's Degree Programs

**MS in Developmental Psychology**

The focus of this program is on analysis and application of the theories, methods, approaches, and principles of developmental psychology. The MS in Developmental Psychology and its specializations will include courses in developmental themes and theories; cognitive development; language acquisition; social and emotional development; family processes, peer influence, and relationships; the impact of digital media on development; international perspectives on development, gerontology, health behavior, administration and leadership; developmental psychopathology; behavior analysis; and the study of gender, culture, and human development. Students will be able to apply their knowledge of developmental psychology to promote positive social change in the lives of children, teens, adults, and the community.

**Learning Outcomes**

Upon completion of the MS in Developmental Psychology program, students will be able to:

- Describe the theoretical foundations of developmental psychology.
- Demonstrate the ability to apply principles of developmental psychology in areas of cognitive, language, social, and emotional functioning across the human development lifespan.
- Synthesize principles of developmental psychology theory and research.
- Apply principles of developmental psychology theory and research to real-world educational, social, health, and other settings.
- Interpret psychological theory and research related to developmental psychology.
Describe developmental psychological theory, research, and practice from a multicultural and/or global perspective.
Promote positive social change through the application of developmental psychology theory, research, and practice to scholarly and/or professional activities that promote positive social change.

Note on Licensure

*The MS in Developmental Psychology is not a licensure-leading program and does not prepare an individual to become a licensed psychology or counseling professional.*

**MS in Early Childhood Studies**

In this program, students gain the knowledge and leadership skills necessary for emerging roles in the field. The program allows students to deepen their understanding of child development and learning, and effective programs and practices, as well as explore current issues and trends.

Through field experience, students gain guided practice and experience as they learn how play, creativity, and the content areas of language arts, social studies, math, and
science can draw on and promote children’s curiosity, individual interests, and positive attitudes toward learning. Throughout the entire program experience, students will learn to become skillful communicators, team members, relationship-builders, and collaborators with families, colleagues, and agencies. Knowledge gained regarding equity and inclusion will help students to become advocates for social change in the field of early childhood.

**Note:** The MS in Early Childhood Studies program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:

- Explain practices that promote healthy child development in diverse populations.
- Evaluate inquiry-based child-centered practices that promote play, creativity, and individual growth, exploration and discovery.
- Develop meaningful learning experiences that are responsive to the individual strengths and needs of children.
- Analyze assessment processes used to promote positive outcomes for every child.
- Analyze effective partnerships that foster children's healthy development and learning.
- Analyze current research to inform best practices in early childhood education.
- Evaluate one's professional growth as a leader and advocate in the early childhood field.
- Create opportunities for positive social change as a leader and advocate within the field of early childhood.

**Competency-Based Education**

In addition to the course-based option described below, students can choose to earn their MS in Early Childhood Studies through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the MS in Early Childhood Studies (Competency Based) page for program details.

**Course-Based Program**

**Specializations**
General Program (see below)
Administration, Management, and Leadership
Early Childhood Administration, Management, and Leadership
Early Childhood Public Policy and Advocacy
Teaching Adults in the Early Childhood Field
Teaching and Diversity in Early Childhood Education

Degree Requirements

30–36 total semester credits (30 sem. cr. General program; 36 sem. cr. Early Childhood Administration, Management, and Leadership specialization)
Core courses (27 sem. cr.)
Specialization courses (6 sem. cr.)
Capstone (3 sem. cr.)

Core Curriculum

Foundation Course (3 sem. cr.)
EDUC 6003 - Foundations of Early Childhood Professionalism

Core Courses (27 sem. cr.)
EDUC 6101 - The Developing Brain and the Young Child
EDUC 6102 - Family and Community Partnerships
EDUC 6103 - Play and Creativity
EDUC 6104 - Engaging Environments
EDUC 6106 - Meaningful Curriculum P–3
EDUC 6107 - Observation and Assessment 0–8
EDUC 6108 - Intentional and Responsive Practice in the Content Areas P–3
EDUC 6109 - Meaningful Learning Experiences: P–3

Specialization Courses (6 sem. cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Capstone Course (3 sem. cr.)
EDUC 6918 - Capstone: Leadership and Advocacy in the Early Childhood Field

Note on Teacher Licensure or Certification
This program does not lead to teacher licensure or certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

**MS in Education**

Walden’s fully online MS in Education program centers on the strategies that are intended to lead to greater student achievement and teacher success. The program’s specializations teach advanced skills that are designed to improve student learning. Each specialization area encourages educators to put their new skills to the test in actual classroom and school settings and to continually challenge the results of teaching and learning.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:

- Apply pedagogical and discipline-specific knowledge, skills, and dispositions to support the learning and development of P–12 students.
- Design learning experiences that incorporate students’ strengths by building on prior background and addressing the learning needs of a diverse student population.
- Use data-informed practices to design, implement, and assess differentiated instruction within and across disciplines to promote student learning, critical thinking, and real-world application of knowledge and skills in technology-rich environments.
- Apply data-informed assessments to monitor student achievement, guide instructional planning, and ensure continuous improvement.
- Collaborate with families, communities, and other professionals to promote positive social change.

See also Learning Outcomes for each specialization.

**Specializations**

- Curriculum, Instruction, and Assessment (Grades K–12)
- Accelerated Curriculum, Instruction, and Assessment (Grades K–12)
- Educational Leadership and Administration (International – Non-Licensure)
- Educational Leadership and Administration (Principal Preparation - Licensure)
- Elementary Education (12-Month Option)
- Elementary Education (16-Month Option)
- Elementary Education (20-Month Option)
- Elementary Reading and Literacy (P–6)
- Accelerated Elementary Reading and Literacy (Grades P–6)
Elementary Reading and Mathematics (Grades K–6)
Accelerated Elementary Reading and Mathematics (Grades K–6)
Integrating Technology in the Classroom (Grades K–12)
Accelerated Integrating Technology in the Classroom (Grades K–12)
Mathematics (Grades 5–8)
Mathematics (Grades K–6)
Mathematics and Science (Grades K–8)
Science (Grades K–8)
Self-Designed
Special Education (Grades K–12)
Accelerated Special Education (Grades K–12)
STEM Education (Grades K–8)
Teacher Leadership (Grades K–12)
Accelerated Teacher Leadership (Grades K–12)

Degree Requirements

Degree requirements are dependent upon the particular specialization. Please see each specialization page for more details.

Classroom access is strongly recommended for students enrolled in this master’s degree program. Educators who do not have such access must find a student or group of students to work with when asked to apply their new knowledge and reflect on the results. Students without classroom access will not be given alternative assignments.

Curriculum

The MS in Education program is offered on a semester system. Each specialization has a planned sequence of courses.

Course Sequence

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Note on Teacher Licensure or Certification

The only MS in Education specialization offered by Walden that is state-approved as leading to any educational license or certification is the MS in Education, Educational Leadership and Administration (Principal Licensure Program), which has been approved in Ohio for leading to Building Level Principal Licensure (grades preK–6, grades 4–9, and grades 5–12). No other MS in Education specialization will lead to teacher licensure or
certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

**MS in Health Education and Promotion**

The MS in Health Education and Promotion program is designed to provide students with a global perspective on the role of health education and promotion. Students will explore health behavior theories, models, and practices to support healthy behaviors of the individual and community member’s social and physical environments. Students gain a solid foundation in the health education field by learning strategies to effectively communicate and assess, plan, implement, and evaluate health education programs in a variety of health related settings. Designed to reflect the Seven Areas of Responsibility for Health Educators outlined by the National Commission for Health Education Credentialing (NCHEC), coursework includes research in essential health education and promotion principles involving grant writing, health communication, fitness, wellness, social sciences, behavior change theory, global trends, needs assessments, and current health initiatives. Graduates of the program will excel serving as resource persons and advocates for clients in the discipline of health education and promotion. Upon completion of the MS in Health Education and Promotion, students will be prepared to sit for the national Certified Health Education Specialist (CHES) and Master Certified Health Education Specialist (MCHES) exams.

**Learning Outcomes**

Graduates of this program will be prepared to:

- Examine historic milestones, current challenges, and future trends related to health and health education.
- Analyze biological, social, political, cultural, environmental, and/or behavioral factors that impact individual and population health.
- Assess community needs and capacity for health education.
- Develop culturally-tailored health education programs and communication using health behavior theories and models.
- Evaluate the effectiveness of health education programs, communication, and research.
- Apply key leadership concepts and skills to effectively administer health education programs and services.
- Utilize best practices of health communication to promote and advocate for individual and population health.
- Apply research principles and methods to address 21st-century health challenges.
Focus Areas

These previous MS in Health Education and Promotion focus areas are no longer accepting new students. Current students in these focus areas must complete their programs of study in accordance with Walden's Time-to-Degree Completion policies.

- Emergency Preparedness
- Health Policy and Advocacy
- Population Health
- Self-Designed
- Social Entrepreneurship and Innovation

Degree Requirements

- 50 total quarter credits
- Foundation courses (5 cr.)
- Core courses (35 cr.)
- Elective course (5 cr.)
- Capstone course (5 cr.)

Curriculum

Foundation Course (5 cr.)

- HLTH 6005 - Perspectives on Health and the Developing Professional

Core Courses (35 cr.)

- HLTH 6031 - Public Health Administration and Leadership
- HLTH 6038 - Health Behavior Theory
- HLTH 6110 - Exploring Health Education in the 21st Century
- HLTH 6205 - Assessing Community Needs for Health Education
- HLTH 6246 - Introduction to Research in Health Education and Health Promotion
- HLTH 6412 - Health Education and Communication Strategies
- HLTH 6475 - Program Planning, Implementation, and Evaluation

Elective Course (5 cr.)

- HLTH 6207 - Grant Writing
- HLTH 6362 - Sexual Health and Well-Being

* Students can request via Student Success Advising to change this elective course, or students can opt to add a focus area.
Capstone Course (5 cr.)

**HLTH 6800 - Health Education and Promotion Capstone**

Course Sequence

The recommended course sequence is as follows:

</tbody>
</table>

**Note on Certification**

The MS in Health Education and Promotion has been designed to reflect the Seven Areas of Responsibility for Health Educators outlined by the National Commission for Health Education Credentialing (NCHEC) and to prepare students to sit for the national Certified Health Education Specialist (CHES) and Master Certified Health Education Specialist (MCHES) exams. Walden enrollment specialists can provide information relating to national certification exams; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she resides. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate. Walden makes no representations or guarantee that completion of
Walden coursework or programs will permit an individual to obtain national certification. For more information about the CHES and MCHES exams, students should visit http://www.nchee.org.

**MS in Higher Education**

The MS in Higher Education is designed for individuals who want to make a positive impact on students and staff in 4-year colleges, community colleges, and universities to enhance their institution’s ability to successfully contribute to social equity and positive change. Students will learn to think creatively and critically about the challenges facing higher education institutions and provide expertise in addressing these challenges. Learning activities emphasize the application of research-based best practices from business leadership and management, student learning and support, and systems thinking to maximize institutional effectiveness. Critical issues in higher education policy, administration, emerging technologies, legal and ethical issues, and governance are addressed throughout the program in the context of real-world problems facing today’s colleges.

**Learning Outcomes**

At the end of this program, educator professionals will be able to:

- Apply an understanding of higher education systems, business principles, and student learning in solving institutional problems to drive institutional and student success.
- Make effective decisions based on critical evaluation of research and data.
- Articulate the perspectives and interests of multiple stakeholders.
- Choose leadership approaches appropriate to the culture of the organization.
- Demonstrate an ability to deploy resources to achieve intended results.
- Evaluate the potential impact of policies and processes on student outcomes.

**Specializations**

- General Program
- Adult Learning
- College Teaching and Learning
- Enrollment Management and Institutional Marketing
- Global Higher Education
- Leadership for Student Success
- Online and Distance Learning

**Degree Requirements**

- 30 total semester credits
Foundation course (3 sem. cr.)
Core courses (12–27 sem. cr., depending on the specialization)
Specialization courses (0–12 sem. cr., depending on the specialization)
Capstone course (3 sem. cr.)
Minimum 5 semesters enrollment

Curriculum

Foundation Course (3 sem. cr.)

EDUC 6155 - Understanding Higher Education

Core Courses (12 sem. cr.)

EDUC 6156 - Understanding Students: Learning, Development, and Diversity
EDUC 6157 - Understanding Institutions: Organizational Behavior and Culture
EDUC 6158 - Using Research and Data to Drive Decision Making
EDUC 6263 - Best Practices for Student Success

Additional Core Courses/Specialization Courses

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Capstone Course (3 sem. cr.)

EDUC 6960 - Capstone: Master's Project

Course Sequence

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Note on Teacher Licensure or Certification

This program does not lead to teacher licensure or certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

MS in Instructional Design and Technology

The MS in Instructional Design and Technology provides students with foundational knowledge about how people learn plus the skills they need to be able to design and
assess curricula across a variety of instructional settings. The program delivers the perfect balance of leadership, problem-solving skills, academic theory, and hands-on experience students need to excel. Students gain the knowledge, skills, and experience they will need to enter or advance in the instructional design field in the corporate, education, or nonprofit sectors.

The MS in Instructional Design and Technology courses are aligned with the standards of the Association for Education Communications and Technology (AECT). These standards are critical indicators of quality in instruction through technology, and their inclusion reflects the integrity of the Walden University learning experience, as well as its relevancy in professional and educational settings.

Learning Outcomes

At the end of this program, educator professionals will be able to:

- Design and implement conditions for learning by applying principles, theories, and research associated with instructional systems design, message design, instructional strategies, and learner characteristics.
- Develop instructional materials and experiences by applying principles, theories, and research related to print, audiovisual, computer-based, and integrated technologies.
- Use processes and resources for learning by applying principles, theories, and research related to media utilization, diffusion, implementations, and policy making.
- Plan, organize, coordinate, and supervise instructional technology by applying principles, theories, and research related to project, resource, delivery system, and information management.
- Evaluate the adequacy of instruction and learning by applying principles, theories, and research related to problem analysis, criterion references measurement, formative and summative evaluation, and long-range planning.
- Demonstrate the ability to facilitate equitable access to instructional materials for all learners.
- Demonstrate the ability to apply common technology tools to create innovative learning solutions and materials.

Specializations

- General (below)
- Online Learning
- Training and Performance Improvement
Degree Requirements

30 total semester credits; 36 sem. cr. for specializations
Core courses (27 sem. cr.)
Capstone course (3 sem. cr.)
Optional specialization courses (6 sem. cr.)

Curriculum

Core Courses (27 sem. cr.)

EDUC 6105 - Organizations, Innovation, and Change
EDUC 6115 - Learning Theories and Instruction
EIDT 6121 - Multimedia Design and Development I
EIDT 6122 - Multimedia Design and Development II
EIDT 6100 - Instructional Design
EIDT 6110 - Advanced Instructional Design
EDUC 6125 - Foundations of Research
EDUC 6135 - Distance Learning
EDUC 6145 - Project Management in Education and Training

Specialization Courses (6 sem. cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Capstone Course (3 sem. cr.)

EIDT 6910 - Capstone: Practical Application of Instructional Design

Additional Technology Requirements

Note: In addition to Walden’s general technical requirements, this program has additional technology requirements:

Windows Vista or Mac OS X
Free, downloadable software programs that may be required in order to complete the course and program requirements

Course Sequence

The recommended course sequence is as follows:

**Note on Teacher Licensure or Certification**

This program does not lead to teacher licensure or certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

**MS in Psychology**

The MS in Psychology provides students with pre-doctoral training—a background in the development and application of psychological theories, basic scientific methods, and principles of psychological science.

**Note:** The MS in Psychology program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

**Learning Outcomes**

At the end of this program, students will be able to:
Describe the foundations of psychology.
Synthesize psychological theory and research to apply in real-world situations, such as in educational, social, organizational, and health settings.
Interpret psychological theory and research.
Describe psychological theory, research, and practice from a multicultural and/or global perspective.
Apply psychological theory, research, and practice to scholarly and/or professional activities that promote positive social change.

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their MS in Psychology through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the MS in Psychology (Competency Based) page for program details.

Course-Based Program

Specializations

- General Psychology
- Applied Behavior Analysis
- Applied Psychology
- Crisis Management and Response
- Digital Psychology
- Educational Psychology
- Health Psychology
- Social Psychology
- Self-Designed
- Terrorism and Security

Degree Requirements

- 48 quarter credits (63 cr. for Applied Behavioral Analysis)
- Foundation course (3 cr.)
- Core courses (25 cr.)
- Specialization courses (15 cr.; 30 cr. for Applied Behavioral Analysis)
- Capstone (5 cr.)

Curriculum
There are two tracks in the MS in Psychology program:

**Track I** is for students who want to advance in their careers. (The Applied Behavior Analysis specialization is for Track I students only.)

**Track II** is for those who intend to further their studies in a doctoral program.

**Track I**

**Foundation Course (3 cr.)**

- PSYC 6002 - Foundations of Graduate Study in Psychology

**Core Courses (25 cr.)**

- PSYC 6200 - Themes and Theories of Psychology
- PSYC 6215 - Lifespan Development
- PSYC 6701 - Culture and Psychology
- RSCH 6110 - Research Theory, Design, and Methods
- PSYC 6800 - Applied Psychology Research Methods

**Specialization Courses (15 cr.; 30 cr. for Applied Behavior Analysis)**

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

**Capstone Course (5 cr.)**

- PSYC 6393 - Capstone

**Track II**

**Foundation Course (3 cr.)**

- PSYC 6002 - Foundations of Graduate Study in Psychology

**Core Courses (25 cr.)**

- PSYC 6200 - Themes and Theories of Psychology
- PSYC 6215 - Lifespan Development
- PSYC 6701 - Culture and Psychology
- RSCH 6110 - Research Theory, Design, and Methods
- RSCH 6210 - Quantitative Reasoning and Analysis

**Specialization Courses (15 cr.)**
These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Capstone Course (5 cr.)

**PSYC 6393 - Capstone**

Course Sequence--Track I

Students undertake courses in the following sequence. (For Applied Behavioral Analysis, see course sequence on specialization page.)

<table>

### Quarter | Course | Credits
--- | --- | ---
2 | PSYC 6215 - Lifespan Development | 5 cr.
2 | PSYC 6701 - Culture and Psychology | 5 cr.
3 | RSCH 6110 - Research Theory, Design, and Methods | 5 cr.
3 | Specialization Course | 5 cr.
4 | RSCH 6210 - Quantitative Reasoning and Analysis | 5 cr.
4 | Specialization Course | 5 cr.
5 | Specialization Course | 5 cr.
5 | PSYC 6393 - Capstone | 5 cr.

**Note on Licensure**

*The MS in Psychology is not a licensure program and does not prepare an individual to become a licensed psychology professional.*

### MS in Psychology (Competency Based)

Tempo Learning® is Walden's competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

**Specializations**

- General Psychology

**Degree Requirements**

- 48 quarter credits
- Foundation competencies (3 cr.)
Core competencies (25 cr.)
Specialization competencies (15 cr.)
Capstone competencies (5 cr.)

Curriculum

Foundation Competencies (3 cr.)

PSYC 6002 - Foundations of Graduate Study in Psychology
   GS001 Field of Psychology
      Describe alignment of professional goals for positive social change.
   GS002 Academic Goals
      Demonstrate skills to further academic goals.
   GS003 Professional Goals
      Demonstrate skills to further professional goals.

Core Competencies (25 cr.)

PSYC 6200 - Themes and Theories of Psychology
   PT001 Psychological Themes and Theories
      Evaluate key concepts in theories.
   PT002 Human Behavior
      Evaluate how theories relate to human behavior in diverse settings.
   PT003 Research
      Evaluate how research informs psychological theories.

PSYC 6215 - Lifespan Development
   LF001 Theories and Processes of Development
      Evaluate constructs, processes, and theories related to developmental psychology.
   LF002 Developmental Concepts
      Analyze developmental concepts as applied to the life of an individual.
   LF003 Lifespan
      Synthesize environmental, biological, and cultural influences on development throughout the lifespan.

PSYC 6701 - Culture and Psychology
   CU001 Culture and Human Development
      Evaluate the effect of culture on social, emotional, and cognitive developmental processes and human behavior to gain a better understanding of individuals across the world.
CU002 Social Roles and Social Behavior
Analyze how culture influences socialization, social roles, social cognition, and social behavior to gain a greater appreciation of cultural appropriate behaviors in varied settings.

CU003 Culture and Psychological Well-Being
Use cross-cultural strategies to understand psychological disorders and to promote mental health attitudes, beliefs, and practices.

CU004 Cross-Cultural Research
Promote a global perspective of psychology using cross-cultural research and methods to encourage positive social change.

PSYC 6800 - Applied Psychology Research Methods

PS001 Data Collection and Management
Collect, manage, and clean quantitative data to develop core skills for problem-solving.

PS002 Data Analysis
Analyze quantitative data to answer questions to solve problems in real world situations.

PS003 Data Interpretation
Interpret quantitative data to make generalizations for positive social change.

RSCH 6110 - Research Theory, Design, and Methods

RT001 Philosophy of Science, Theory, and Social Change
Analyze the roles of philosophy, theory, and social change in research.

RT002 Quantitative Research
Assess quantitative research studies for quality and for alignment among critical research components.

RT003 Qualitative Research
Assess qualitative research studies for quality and for alignment among critical research components.

RT004 Mixed Methods Research
Assess mixed methods research (MMR) studies for quality and for alignment among critical research components.

Specialization Competencies (15 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Capstone Competencies (5 cr.)

PSYC 6393 - Capstone
SS001 Research Strategies
Analyze the research strategies that address contemporary issues or problems based on applied research in the field of psychology.

SS002 Issues or Problems in Psychology
Apply psychology to contemporary issues or problems in either the workplace, community, or world.

SS003 Literature Reviews
Synthesize literature related to the field of psychology that is focused on contemporary issues or problems in the workplace, community, or world.

Note on Curriculum

In an effort to ensure competencies are kept up to date and relevant to meet the learning outcomes of the program, the number and subject matter of individual competencies needed to satisfy program course requirements may change. However, program outcomes and the number and subject matter of courses will not be impacted. As a result, the required competencies listed in a student’s individual learning plan may differ from what is currently listed in the catalog.

Post-Master’s Certificate Programs

Post-Master’s Certificate in Community College Leadership

This certificate is meant for community college leaders who want to refine their mission and become more knowledgeable on subjects such as academic transfer programs, workforce development, developmental education and remediation, and community service.

Certificate Courses

EDDD 8040 - The Community College—Historical Context and Critical Issues
EDDD 8041 - Transformational Leadership for Institutional Effectiveness in Community Colleges
EDDD 8042 - Contemporary Issues, Challenges, and Trends in Community Colleges
EDDD 8043 - Promoting Student Development and Success in Community Colleges

Course Sequence

The recommended course sequence is as follows:

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>EDDD 8040 - The Community College—Historical Context and Critical Issues</td>

Quarter | Course | Credits
--- | --- | ---
2 | EDDD 8041 - Transformational Leadership for Institutional Effectiveness in Community Colleges | 5 cr.
3 | EDDD 8042 - Contemporary Issues, Challenges, and Trends in Community Colleges | 5 cr.
4 | EDDD 8043 - Promoting Student Development and Success in Community Colleges | 5 cr.

**Post-Master's Certificate in Curriculum, Instruction, and Assessment**

What aspects contribute to an effective curriculum? In this certificate, educators can focus on effectively designing, modifying, and evaluating curriculum and assessment practices using a systems approach. They will be equipped with skills like strategic planning, curriculum mapping, and program evaluation.

**Certificate Courses**

- EDDD 8050 - Curriculum, Instruction, and Assessment: A Systems Perspective
- EDDD 8051 - Data-Driven Instruction and Assessment
- EDDD 8052 - Curriculum Design to Promote Social Change
- EDDD 8106 - Program Evaluation for Continuous Improvement

**Note on Endorsement, Licensure, or Certification**

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

**Post-Master's Certificate in Early Childhood Leadership**

This certificate is meant for early childhood educators who want to impact the lives of their students. Throughout the program, educators will analyze topics including child
development, family partnerships, and leadership. They will examine the quality of early childhood programs and policies and research strategies to promote positive outcomes.

Certificate Courses

EDPD 8080 - Child Development in the Critical Early Years
EDPD 8081 - The Language/Literacy Continuum From Birth Through Age 8
EDPD 8082 - Meaningful Learning Experiences in Supportive Environments
EDPD 8083 - Evaluating and Leading Effective Early Childhood Programs

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

Post-Master's Certificate in Educational Policy, Leadership, and Management (P–20)

In this certificate program, educators gain the skills critical to managing and advancing change. The focus of the coursework is on political forces that shape the educational process and emphasize governance structures and their influences. Educators will engage in emerging theories of leadership and reflect on current challenges as they relate to education.

Certificate Courses

EDPD 8040 - Governance and Politics of Education
EDPD 8046 - P–20 Education Law, Policy, and Governance
EDPD 8043 - Policy Development and Implementation
EDPD 8044 - Leadership and Management for Change in Education

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

**Post-Master's Certificate in Educational Technology**

This Post-Master’s Certificate in Educational Technology is designed for educators who want to effectively use digital media to improve learning in a variety of settings. The program combines theory with project-based courses that explore the latest trends and issues in educational technology, best practices for integrating technology to facilitate learning, and the application of instructional design principles across multidevice e-learning environments. Credits earned in this program may be applied toward Walden’s EdS in Educational Technology program or PhD in Education program with a specialization in Educational Technology.

**Certificate Requirements**

- 20 total quarter credit hours

**Certificate Curriculum (20 cr.)**

- EDDD 8090 - Trends and Issues in Educational Technology
- EDDD 8103 - eLearning
- EDDD 8093 - Leading Change
- EDDD 8107 - Designing Instruction for eLearning

**Course Sequence**

comply with all state and school district requirements.

**Post-Master's Certificate in Higher Education and Adult Learning**

This certificate program is designed for professionals who want to develop the
knowledge and insight to design, develop, and lead successful adult learning programs. In
this program, educators will examine adult learning theories, explore best practices for
facilitating program planning and assessment, and cultivate leadership skills to effectively
engage and motivate adult learners to create change.

**Certificate Courses**

- EDDD 8020 - Contemporary Issues and Trends in Higher Education and Adult Learning
- EDDD 8021 - Understanding the Adult Learner
- EDDD 8022 - Leadership of Higher Education Programs for Adult Learners
- EDDD 8023 - Program Planning and Assessment

**Post-Master's Certificate in Higher Education Leadership and
Management**

In this certificate program, educators gain the leadership skills and knowledge of
management principles needed to lead meaningful and sustainable change across their
institution. The focus of the coursework is on the current policies and practices of
today's changing higher education landscape, including managing resources, strategic
planning, program evaluation, and leading institutional change.

**Certificate Courses**

- EDDD 8030 - Higher Education in the 21st Century
- EDDD 8031 - Leading and Managing Instructional Change
- EDDD 8032 - Strategic Planning and Program Evaluation in Higher Education
- EDDD 8104 - Managing Resources in Higher Education

**Post-Master's Certificate in Higher Education Leadership,
Management, and Policy**

What makes education successful? If you're intrigued by workflows, analyzing systems,
and examining policies, then this certificate may be of interest. Gain the leadership and
management skills required to address the needs of a dynamic, expanding, and changing higher education landscape.

Certificate Courses

- EDPD 8030 - Higher Education in the 21st Century
- EDPD 8031 - Leading and Managing Instructional Change
- EDPD 8042 - Education Law, Policy, and Governance
- EDPD 8033 - The Politics of Higher Education: Policy Development and Implementation

Post-Master's Certificate in Organizational Research, Assessment, and Evaluation

Effective leaders never stop improving. The focus of this certificate is on fostering a culture of continuous development and iteration. In this program, educators will engage in hands-on applied experiences and utilize processes for rigorous research, assessment, and evaluation of complex organizational systems in an effort to effect positive change.

Certificate Courses

- EDPD 8020 - A New Vision of Organizational Research, Assessment, and Evaluation
- EDPD 8021 - Assessment, Evaluation, and Accountability: The Sociological, Political, and Economic Factors
- EDPD 8023 - Evaluating and Improving Programs, Organizations, and Systems
- EDPD 8024 - Dynamics of Communication for Impact and Results

**Post-Master's Certificate in Reading, Literacy, and Assessment**

This certificate program is designed for educators who wish to influence positive growth in reading and literacy. Educators will gain expertise in the best practices in reading, literacy, and assessment. In this program, they will learn how to promote the success of diverse learners, and focus on data analysis to support effective literacy programs.

**Certificate Courses**

- EDDD 8060 - Issues and Trends in Reading and Literacy
- EDDD 8102 - Promoting the Success of Diverse Learners
- EDDD 8061 - Assessment and Data Analysis to Support Effective Literacy Programs
- EDDD 8062 - Collaborative Approach to Literacy Across the Content Areas

**Note on Endorsement, Licensure, or Certification**

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

Education Specialist (EdS) Programs

Education Specialist (EdS) in Curriculum, Instruction, and Assessment

The Education Specialist (EdS) in Curriculum, Instruction, and Assessment program is designed for classroom teachers, curriculum specialists, department chairs, directors of
instruction, administrators, and any educator who seeks to influence positive educational change and improved student achievement through effective curriculum, instruction, and assessment. Through this program, educators are provided opportunities to develop best practices in learner-centered curriculum and instructional design and strategies, effective teaching, program evaluation, student assessment, and teacher professional development. Scenarios drawn from real life require learners to think critically about ways to drive innovation and change at the systemic level—including local school districts as well as regional, state, and federal education agencies—and apply strategies that can effect measurable improvement in P–12 schools. The critical-thinking skills needed to shape schools and school systems in order to meet the diverse needs of all students are emphasized in course projects and activities.

Learning Outcomes

All EdS graduates will be prepared to:

- Apply discipline-specific knowledge to address issues in educational settings.
- Apply evidence-based practices to address a problem within the academic and/or work environment and propose a solution.
- Communicate information to a variety of stakeholders using oral and written formats.
- Practice ethically as a professional in the field of education.
- Collaborate with diverse stakeholders to promote continuous improvement in educational settings.
- Advocate for social change to make a positive impact in educational settings.

In addition to the shared EdS outcomes above, Curriculum, Instruction, and Assessment graduates will be prepared to:

- Support learning for a diverse student population through the use of technology in effectively designed curriculum.
- Increase skills surrounding program design and evaluation through the use of professional development.
- Demonstrate knowledge of educational trends/ issues in education to promote social change and make a positive impact in school and community environments.
- Utilize data-driven learner-centered assessment to promote continuous improvement in learning and teaching.
- Collaborate with diverse stakeholders, including families, school, and community members in order to advocate for student needs.
- Practice ethically in the profession.
- Demonstrate an understanding of the importance of community service and citizenship through the integration of content curriculum and instruction with real-world projects outside of the classroom.
Design a scholarly response to address a curriculum, instruction, and assessment problem and contribute to the profession.

Note on Educator Licensure or Certification

This program does not lead to educator licensure or certification. Educators are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

*Education Specialist (EdS) in Early Childhood Education*

Educators prepare to become more effective early childhood leaders and advocate for and foster positive outcomes for young children and their families in the Education Specialist (EdS) in Early Childhood Education program. Educators in this program explore the complex family, cultural, societal, and developmental influences that affect child development and learning and critically review current research in the field. They analyze topics such as child development, family partnerships, content knowledge, assessment, effective practices, leadership, advocacy, and professionalism. Through case studies and innovative technology, professionals examine the quality of early childhood programs and policies, implement strategies to promote positive outcomes for young children.
children, and evaluate the leadership characteristics necessary to implement effective change.

Coursework in this specialization is designed to reflect the advanced early childhood professional guidelines set forth by the National Association for the Education of Young Children.

Learning Outcomes

All EdS graduates will be prepared to:

- Apply discipline-specific knowledge to address issues in educational settings.
- Apply evidence-based practices to address a problem within the academic and/or work environment and propose a solution.
- Communicate information to a variety of stakeholders using oral and written formats.
- Practice ethically as a professional in the field of education.
- Collaborate with diverse stakeholders to promote continuous improvement in educational settings.
- Advocate for social change to make a positive impact in educational settings.

In addition to the shared EdS outcomes above, Early Childhood Education (Non-Licensure) graduates will be prepared to:

- Apply research-based skills in the areas of child development and learning to evaluate practices and policies.
- Apply effective leadership practices, including collaboration and advocacy, to promote positive outcomes for young children and families.
- Apply responsible assessment practices to support healthy development and positive learning outcomes for young children.
- Demonstrate an understanding of cultural responsiveness in interactions with children, families, community members, and early childhood professionals.
- Integrate professional resources, including technology, to create effective solutions to authentic problems in the early childhood field.
- Apply a variety of perspectives that are knowledgeable, reflective, and critical to promote professional growth and positive social change in the early childhood field.
- Design a scholarly response to address an early childhood education problem and contribute to the profession.

---

**Education Specialist (EdS) in Educational Administration and Leadership**

The Education Specialist (EdS) in Educational Administration and Leadership program is designed for P–12 administrators who want to increase their ability to influence and transform their educational organization. Leaders can learn about sustainability in their settings and how to nurture their schools to become or remain thriving organizations. Graduates from this EdS program will be able to integrate theory and practice to impact both their careers and the lives of their students, and they can gain skills to build an effective collaborative organization and enhance the P–12 student learning environment. This program does not lead to certification or licensure.

**Learning Outcomes**
All EdS graduates will be prepared to:

Apply discipline-specific knowledge to address issues in educational settings.
Apply evidence-based practices to address a problem within the academic and/or work environment and propose a solution.
Communicate information to a variety of stakeholders using oral and written formats.
Practice ethically as a professional in the field of education.
Collaborate with diverse stakeholders to promote continuous improvement in educational settings.
Advocate for social change to make a positive impact in educational settings.

In addition to the shared EdS outcomes above, Educational Administration and Leadership (Non-Licensure) graduates will be prepared to:

Demonstrate knowledge of current literature/trends in education.
Effectively communicate with others (e.g., verbal, non-verbal, written, and technology-based).
Actively participate in addressing the diverse learning needs of students in the school community through collaboration with a variety of stakeholders.
Demonstrate knowledge of effectively managing resources to improve the learning environment.
Demonstrate the ability to develop materials that contribute to an effective learning environment to improve learning.
Demonstrate the use of technology that can be used to support student learning.
Demonstrate an understanding of cultural responsiveness in interactions with students, teachers/faculty, staff, stakeholders, and the community to encourage a diverse learning environment.
Demonstrate positive professional dispositions (professional conduct, professional qualities, communication, and collaboration).
Promote positive social change in the learning environment.
Design a scholarly response to address an educational, administration, and leadership problem and contribute to the profession.

**Note on Educator Licensure or Certification**

This program does not lead to educator licensure or certification. Educators are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

**Education Specialist (EdS) in Educational Technology**

The Education Specialist (EdS) in Educational Technology program is designed for K–12 educational leaders who want to initiate and bring about change at the district level. By integrating the latest technologies and instructional design principles, educators in this program are prepared to develop and lead technology-supported solutions to learning challenges in the K–12 classroom.

With program outcomes informed by Association for Educational Communications and Technology (AECT) standards, educators in this program are prepared to conduct research on local problems in a rapidly changing field. The EdS in Educational Technology program features an embedded post-master's certificate to advance educators' careers quickly and affordably.

**Learning Outcomes**

All EdS graduates will be prepared to:

- Apply discipline-specific knowledge to address issues in educational settings.
Apply evidence-based practices to address a problem within the academic and/or work environment and propose a solution.
Communicate information to a variety of stakeholders using oral and written formats.
Practice ethically as a professional in the field of education.
Collaborate with diverse stakeholders to promote continuous improvement in educational settings.
Advocate for social change to make a positive impact in educational settings.
In addition to the shared EdS outcomes above, Educational Technology graduates will be prepared to:

Effect positive social change through the use of integrative, innovative technology in the workplace.
Apply innovative technological solutions to learning challenges.
Demonstrate the skills needed to work within a learning community of people, technologies, resources, and professional associations.
Develop innovative intervention plans based on the analysis of educational technology needs.
Approach issues in educational technology using sound principles of digital and information literacy.
Evaluate research in educational technology that is relevant to resolving local or workplace problems.
Practice ethically in the profession.
Communicate ideas to audiences using effective oral, written, and digital formats.
Address diversity/multiculturalism through the use of educational technology in designing instruction.
Design a scholarly response to address an educational technology problem and contribute to the profession.

Note on Educator Licensure or Certification

This program does not lead to educator licensure or certification. Educators are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

Education Specialist (EdS) in Learning, Instruction, and Innovation

The EdS in Learning, Instruction, and Innovation program is for classroom teachers, instructional coordinators, and any educators who wants to enhance their effectiveness through new and creative approaches to curriculum, assessment, and technology integration. Educators explore creative approaches to learning that integrates technology with the needs of learners in a global community in the program's advanced graduate coursework.

Through this education specialist program, educators gain the perspectives, knowledge, and expertise to develop and implement out-of-the-box solutions and innovative experiences grounded in authentic learning. Graduates of the program are prepared to foster a culture of innovation in their educational environment as a classroom teacher or school leader.

Learning Outcomes

All EdS graduates will be prepared to:

- Apply discipline-specific knowledge to address issues in educational settings.
- Apply evidence-based practices to address a problem within the academic and/or work environment and propose a solution.
- Communicate information to a variety of stakeholders using oral and written formats.
- Practice ethically as a professional in the field of education.
- Collaborate with diverse stakeholders to promote continuous improvement in educational settings.
Advocate for social change to make a positive impact in educational settings.
In addition to the shared EdS outcomes above, Learning, Instruction, and Innovation graduates will be prepared to:

Create innovative instruction, curriculum, and assessment grounded in theory and previous research.
Create innovative solutions to learning challenges.
Collaborate with a variety of stakeholders.
Analyze instructional needs to develop innovative intervention plans for learning.
Evaluate problems and issues in learning, instruction, and innovation.
Ground decisions based on research in learning, instruction, and innovation.
Participate in the profession ethically.
Support global diversity and multiculturalism through the use of innovative curriculum and assessment in designing instruction.
Utilize research to create innovative instruction, curriculum, and assessment to effect social change in the workplace.

Note on Educator Licensure or Certification

This program does not lead to educator licensure or certification. Educators are advised to contact their individual school districts as to whether this program may qualify for salary advancement.
Education Specialist (EdS) in Reading, Literacy, and Assessment

The Education Specialist (EdS) in Reading, Literacy, and Assessment program is designed for any educator who wishes to influence positive growth in reading and literacy and gain expertise in best practices regarding reading, literacy, curriculum design and instruction, teacher professional development, and program evaluation and assessment. Education professionals can develop skills and study strategies that can improve reading and curriculum outcomes across the educational system, including classroom instruction, program design, policy implementation, and critical thinking. In this EdS program, education professionals explore sociopolitical, cultural, and economic influences on literacy; curriculum, assessment, and instruction for diverse learners; changing definitions of literacy; best practices in literacy; and program design and evaluation. This specialization is designed for classroom teachers, lead teachers, reading specialists, literacy coaches, department chairs, curriculum specialists, and any instructor who desires to gain a deeper understanding of reading and literacy practices.

*Walden University's Education Specialist (EdS) in Reading, Literacy, and Assessment (Non-Licensure) does not lead to certification or licensure in reading, literacy, and assessment. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure as a reading, literacy, and assessment teacher.

Learning Outcomes

All EdS graduates will be prepared to:

- Apply discipline-specific knowledge to address issues in educational settings.
- Apply evidence-based practices to address a problem within the academic and/or work environment and propose a solution.
- Communicate information to a variety of stakeholders using oral and written formats.
- Practice ethically as a professional in the field of education.
- Collaborate with diverse stakeholders to promote continuous improvement in educational settings.
- Advocate for social change to make a positive impact in educational settings.

In addition to the shared EdS outcomes above, Reading, Literacy, and Assessment (Non-Licensure) graduates will be prepared to:

- Interpret the components of reading curriculum in the 21st century including influences from the sociopolitical landscape, social media, technological innovations, family and community involvement, and influences from applicable education standards.
Establish a plan to gain stakeholder support for improvement of curriculum and literacy programming at the systems level by drawing on professional reading and curriculum standards.

Explain the challenges faced in improving teaching and learning in literacy curriculum across all content areas including prior student learning, language, culture, family, and community values.

Utilize information about literacy assessments used at the national, state, and local levels to assess literacy curriculum.

Demonstrate the ability to create literacy programs that enhance student learning and support professional development for teachers.

Integrate concepts of positive social change in leadership, assessment, professional development, literacy curriculum, and literacy instruction activities.

Practice ethically in the profession.

Design a scholarly response to address a reading, literacy, and assessment problem and contribute to the profession.

Note on Educator Licensure or Certification

This program does not lead to educator licensure or certification. Educators are advised to contact their individual school districts as to whether this program may qualify for salary advancement.
**Education Specialist (EdS) in Special Education**

In the Education Specialist (EdS) in Special Education program, education professionals prepare for leadership roles in school districts, communities, and the profession as a whole. Educators in this program will deepen their understanding of the critical trends and issues impacting special education today. They will learn how to collaborate effectively with families and school staff to enhance special education practice. Learners engage in real-world case studies that require collaborative problem solving and the implementation of research-based strategies.

This EdS curriculum is informed by the Council for Exceptional Children's Advanced Preparation Standards. Key issues in the field of special education, such as leadership and policy, program development and assessment, collaboration, and ethical practice, are emphasized. Educators culminate the program with a capstone project that focuses on a real-world problem of practice in special education.

**Learning Outcomes**

All EdS graduates will be prepared to:

- Apply discipline-specific knowledge to address issues in educational settings.
- Apply evidence-based practices to address a problem within the academic and/or work environment and propose a solution.
- Communicate information to a variety of stakeholders using oral and written formats.
- Practice ethically as a professional in the field of education.
- Collaborate with diverse stakeholders to promote continuous improvement in educational settings.
- Advocate for social change to make a positive impact in educational settings.

In addition to the shared EdS outcomes above, Special Education (Non-Licensure) graduates will be prepared to:

- Follow policies surrounding ethical and legal practices that support high quality education for individuals with diverse educational, behavioral, emotional, and cultural learning needs.
- Apply valid, research-based assessment measures to facilitate learning and behavioral interventions for individuals with diverse educational, behavioral, emotional, and cultural learning needs.
- Evaluate special education programs, including the integration of related services (e.g., assistive technology, behavioral intervention, transition, inclusion), for...
individuals with exceptionalities based upon an understanding of individual differences.

Distinguish research-based strategies used to improve data decision making, supports, and services for individuals with diverse educational, behavioral, emotional, and cultural learning needs.

Support the continuous improvement of education programs/supports/services for individuals with exceptionalities.

Effectively communicate with stakeholders to improve outcomes for individuals with exceptionalities and their families.

Design a scholarly response to address a special education problem and contribute to the profession.

Doctoral Degree Programs
Doctor of Education (EdD)

Walden’s EdD programs are designed for educators who want to continue their practice while assuming influential roles in their schools and communities. The programs are built upon five critical components: teaching and lifelong learning, research and reflective analytical thought, leadership and communication, diversity, and collaborative social change. These critical components are the basis for the programs’ learning outcomes, as students develop expertise in various areas, promoting equity and excellence.

Learning Outcomes

At the end of this program, educator professionals will be able to:

- Apply theoretical knowledge to solve educational problems.
- Critically analyze education-related issues.
- Align research methodologies to questions and hypotheses addressing issues in educational practice.
- Communicate with diverse stakeholders to advocate for students in educational settings.
- Practice ethically as a professional in the field of education.
- Collaborate with diverse stakeholders to promote continuous improvement in educational settings.
- Promote equity in education programs and policies.
- Advocate for social change to make a positive impact in educational settings.

Specializations

Changing specializations may increase a student’s expected time-to-degree completion and cost.

- Community College Leadership
- Curriculum, Instruction, and Assessment
- Early Childhood Education
- Educational Administration and Leadership
- Educational Technology
- Higher Education and Adult Learning
- Higher Education Leadership and Management
- Higher Education (Self-Designed)
- Organizational Leadership and Development
- P–20 Education (Self-Designed)
- Reading, Literacy, and Assessment
Special Education

Degree Requirements

Professional Development Plan and Program of Study

Foundation course (5 cr.)
Research courses (15 cr.)
Specialization courses (30 cr.)
Completing the Doctoral Capstone
  Doctoral support courses (6 cr.)
  Completing the Prospectus (3 cr.)
  Completing the Doctoral Capstone (5 cr. per term for a minimum of four terms; taken continuously until completion)
One academic residency

Curriculum

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Course Sequence

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Residency Requirements

The EdD required residency must be completed by the end of Term 3, regardless of specialization. Optional EdD Advanced residencies are also available later in the program.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

8-Year Maximum Time Frame
Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

**PhD in Developmental Psychology**

Doctoral education in Developmental Psychology is the next logical, broad specialization that Walden's School of Psychology offers. Students interested in human growth and development across the lifespan are provided a doctoral level education in the PhD in Developmental Psychology program. The focus of the PhD in Developmental Psychology program will be on topics including the cognitive, physical, emotional, social, health, and cultural aspects of human development across the lifespan. Students will develop the professional skills needed for nonclinical academic, research, or professional careers. In the PhD in Developmental Psychology program, eight specializations offer students the opportunity to focus their studies: (1) General; (2) Administration and Leadership; (3) Child and Adolescent Development; (4) Health and Human Development; (5) International Perspectives in Developmental Psychology; (6) Research; (7) Teaching; and (8) Self-designed specialization. The doctoral program includes more research- and teaching-focused courses to add to the more practice-focused MS in Developmental Psychology program. Students will be able to apply their knowledge and skills in developmental psychology to promote positive social change in the lives of individuals, families, and communities through teaching, research, and practice.

**Learning Outcomes**

Upon completion of the PhD in Developmental Psychology program, students will be able to:

- Synthesize developmental psychology theory and research in the physical, cognitive, emotional, health, social, and cultural aspects of human lifespan development.
- Articulate the history of developmental psychology and how the specialty of developmental psychology is unique.
- Develop an identity as a developmental psychologist.
- Evaluate how key issues and seminal works within the field of developmental psychology (including the areas of the physical, cognitive, emotional, social, and cultural aspects of human development) apply to human development across the lifespan.
- Produce independent scholarly research utilizing basic and advanced research methods.
- Apply theory and research in the practice of a developmental psychologist.
Demonstrate the ability to apply results of evidence-based developmental psychology research in various institutions and organizations concerned with issues impacting human development.

Describe experiences and perspectives of diverse populations (including but not limited to race, culture, socioeconomics, age, gender, sexual orientation, and disability) from a developmental psychology perspective.

Apply relevant ethical codes (e.g., APA) in developmental psychology research practice and work settings.

Discuss how social/political issues, policies, and events impact the field of developmental psychology.

Engage in professional activities related to developmental psychology that promote positive social change.

Specializations

Changing specializations may increase a student's expected time-to-degree completion and cost.

Completion of Doctoral Dissertation
  Dissertation support courses (7 cr.)
  Dissertation writing courses (5 cr. per term for a minimum of four terms; taken continuously until completion)
Four PhD residencies

Curriculum

Foundation Course (3 cr.)

DPSY 8002 - Foundations for Graduate Study in Psychology

Core Courses (40 cr.)

DPSY 8111 - Themes and Theories of Developmental Psychology
DPSY 8121 - Development in the Digital Age
DPSY 8215 - Lifespan Development
DPSY 8218 - Gender and Development
DPSY 8227 - Language and Cognitive Development
DPSY 8228 - Social and Emotional Development
DPSY 8245 - Social Psychology
DPSY 8701 - Culture and Psychology

Research Courses (25 cr.)

RSCH 8110 - Research Theory, Design, and Methods
RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8260 - Advanced Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis
RSCH 8360 - Advanced Qualitative Reasoning and Analysis

Specialization Courses (15 cr.)

See each specialization page for specific courses.

Residency Requirements

Residency 1 – Complete Residency 1 as soon as you begin your program; should be completed in Term 1 or Term 2.
Residency 2 – Complete Residency 2 at the beginning of your second year, around the time of second research course (RSCH 8310).
Residency 3 – Complete Residency 3 once you have a prospectus in Walden's review system.
Residency 4 – Complete residency 4 after your prospectus is approved as follows:
  Residency 4 General (RESI 8404) OR
  Residency 4 Proposal Writing (RESI 8404Q) OR
  Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
  Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
  Residency 4 Publishing & Presenting (RESI 8404T) OR
an approved professional conference (RESI 8900 for select programs only.
Contact Advising for information.) OR
a dissertation intensive (DRWI 8500) during your 9000 course. Contact
Student Success Advising to register. You must attend all sessions and
advising throughout the entire intensive retreat in order to successfully
complete the experience to satisfy residency 4 requirements. **NOTE:**
Intensive Retreats are NOT included in Fast Track tuition.

**Optional:** Complete a dissertation intensive (DRWI 8500) during DPSY 9000.
Contact Student Success Advising to register.

**Completion of the Doctoral Dissertation**

**DPSY 8115 - Writing a Quality Prospectus in Psychology** OR
**DPSY 8185 - Writing a Quality Prospectus in Psychology**

**AND**

**DPSY 8700 - Literature Review**

**DPSY 9000 - Dissertation**

Students take this course for a minimum of four quarters and are continuously enrolled until
completion of their dissertation with final chief academic officer (CAO) approval. In general,
students are continuously registered in the dissertation course until they complete their capstone
project and it is approved. This usually takes longer than the minimum required terms in the
dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several
independent evaluators including their committee, the University Research Reviewer, and the
Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense
stage; and gain final approval by the chief academic officer. Students must also publish their
dissertation on ProQuest before their degree is conferred. Learn more about the dissertation
process in the Dissertation Guidebook.

they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

For Those Entering With an MS Degree

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan and Program of Study
- Foundations course (3 cr.)
- Core courses (25 cr.)
- Research courses (10 cr.)
- Specialization courses (15 cr.)
- Completion of Doctoral Dissertation
  - Dissertation support courses (7 cr.)
  - Dissertation writing courses (5 cr. per term for a minimum of four terms; taken continuously until completion)
- Four PhD residencies

Curriculum

Foundation Course (3 cr.)

  **DPSY 8002** - Foundations for Graduate Study in Psychology

Core Courses (25 cr.)

  **DPSY 8121** - Development in the Digital Age  
  **DPSY 8218** - Gender and Development  
  **DPSY 8227** - Language and Cognitive Development  
  **DPSY 8228** - Social and Emotional Development  
  AND  
  **DPSY 8412** - Research Foundations OR  
  **RSCH 8210** - Quantitative Reasoning and Analysis OR  
  **RSCH 8310** - Qualitative Reasoning and Analysis

Advanced Research Courses (10 cr.)
RSCH 8260 - Advanced Quantitative Reasoning and Analysis
RSCH 8360 - Advanced Qualitative Reasoning and Analysis

Specialization Courses (15 cr.)

See each specialization page for specific courses.

Residency Requirements

Residency 1 – Complete Residency 1 as soon as you begin your program; should be completed in Term 1 or Term 2.
Residency 2 – Complete Residency 2 at the beginning of your second year, around the time of second research course.
Residency 3 – Complete Residency 3 once you have a prospectus in Walden’s review system.
Residency 4 – Complete residency 4 after your prospectus is approved as follows:
   Residency 4 General (RESI 8404) OR
   Residency 4 Proposal Writing (RESI 8404Q) OR
   Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
   Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
   Residency 4 Publishing & Presenting (RESI 8404T) OR
   an approved professional conference (RESI 8900 for select programs only.
   Contact Advising for information.) OR
   a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. NOTE: Intensive Retreats are NOT included in Fast Track tuition.

Optional: Complete a dissertation intensive (DRWI 8500) during PSYC 9000.
   Contact Student Success Advising to register.

Completion of the Doctoral Dissertation

DPSY 8115 - Writing a Quality Prospectus in Psychology OR
DPSY 8185 - Writing a Quality Prospectus in Psychology
   AND
DPSY 8700 - Literature Review
DPSY 9000 - Dissertation

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.
To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the
Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

* See each specialization page for specific courses for that specialization.

** Students take this course for a minimum of four terms and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

** Master of Philosophy (Embedded Degree)**

Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:

- All required PhD core courses (or KAMs)
- All required PhD specialization courses (or KAMs)
- All required doctoral research and advanced research courses
- Program prospectus development course
- Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.
The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

**Doctoral Writing Assessment**

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

**Note on Licensure**

The PhD in Developmental Psychology program is not a licensure program and does not prepare an individual to become a licensed psychology professional.

**8-Year Maximum Time Frame**

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

**PhD in Education**

The PhD in Education is a research-focused program that produces outstanding professionals who can address the nation's most pressing challenges in the field of education. Specializations in a variety of established and newly emerging fields and a general program are available. For those educators whose particular learning interests are not met by one of the specializations or whose interests are interdisciplinary, The Richard W. Riley College of Education and Human Services also offers a self-designed specialization to meet their unique needs.

The PhD in Education learning outcomes will be demonstrated through numerous direct and indirect measures in each of the PhD specializations.

**Learning Outcomes**

At the end of this program, the education professional will be able to:

- Synthesize content knowledge grounded in a specific educational discipline.
- Critically analyze education-related issues.
Align research methodologies to questions and hypotheses addressing problems in the discipline of education.

Communicate ideas to a variety of audiences related to the profession using oral and written scholarly formats.

Practice ethically as a scholar in the field of education.

Integrate a focus on global diversity and multiculturalism into solving problems in education.

Evaluate the role of education in advancing social justice and positive social change.

Specializations

Changing specializations may increase a student's expected time-to-degree completion and cost.

- Curriculum Instruction Assessment and Evaluation
- Early Childhood Leadership and Advocacy
- Early Childhood Special Education
- Education Policy, Leadership, and Management (P–20)
- Educational Technology and Design
- Higher Education Leadership, Management, and Policy
- Higher Education, Leadership, and Policy (Self-Designed)
- Learning, Instruction, and Innovation
- Organizational Research, Assessment, and Evaluation
- P–20 Education (Self-Designed)
- Reading Literacy, Assessment, and Evaluation

Degree Requirements

- Professional Development Plan and Program of Study
  - Foundation course (5 cr.)
  - Core course (5 cr.)
  - Specialization courses (30 cr.)
  - Doctoral support courses (6 cr.)
  - Research courses (20 cr.)
  - Completion of the Doctoral Capstone
    - Doctoral Dissertation course
  - Four PhD residencies

Curriculum
These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Core Research Sequence (15 cr.)

Courses composing the core research sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100 or 8110 must be completed prior to Residency 2 of the academic residencies. RSCH 8200 or 8210 and RSCH 8300 or 8310 must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8110 - Research Theory, Design, and Methods
- RSCH 8210 - Quantitative Reasoning and Analysis
- RSCH 8310 - Qualitative Reasoning and Analysis

Doctoral Support Courses (6 cr.)

- EDPD 8003 - Tools for Doctoral Research Success
- EDPD 8004 - Demystifying Doctoral Writing for Research
- EDPD 8900 - Completing the Prospectus

Advanced Research Course (5 cr.)

Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative, and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:

- RSCH 8260 - Advanced Quantitative Reasoning and Analysis
- RSCH 8360 - Advanced Qualitative Reasoning and Analysis
- RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Residency Requirements

Complete Residency 1 as soon as you begin your program; should be completed within 90 days of completing your Foundations course (EDPD 8002/EDPD 8006/EDUC 8110).

Complete Residency 2 after RSCH 8100/RSCH 8110.
Complete Residency 3 after RSCH 8200/8210 and RSCH 8300/8310.
Complete Residency 4 after your prospectus is approved and you are enrolled in EDUC 9000 or EDPD 8990 as:
Residency 4 General (RESI 8404) OR
Residency 4 Proposal Writing (RESI 8404Q) OR
Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
Residency 4 Publishing & Presenting (RESI 8404T) OR
a dissertation intensive (DRWI 8500). Contact Student Success Advising to register. NOTE: Intensive Retreats are NOT included in Fast Track tuition.

Completion of the Doctoral Capstone

EDPD 8990 - Completing the Dissertation

Course Sequence

See each specialization page for the course sequence.

Master of Philosophy (Embedded Degree)

Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:

- All required PhD core courses (or KAMs)
- All required PhD specialization courses (or KAMs)
- All required doctoral research and advanced research courses
- Program prospectus development course
- Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.

The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.
Note on Teacher Licensure or Certification

This program does not lead to teacher licensure or certification. Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

PhD in Health Education and Promotion

In recent years, public, professional, governmental, and medical groups have increasingly come to recognize the need for more health and wellness promotion initiatives, as the majority of adults do not meet the minimum recommendations to eat healthfully, exercise more, and make behavioral changes that can reduce disease and prolong their lives. With the focus of healthcare shifting toward preventive care and education, the demand for qualified health educators is projected to rise 21% by 2020.* Now is the time for students to gain the knowledge, skills, and credentials needed to plan, implement, and evaluate prevention programs and services. With an online PhD in Health Education and Promotion degree, students can help groups and individuals lead healthier lifestyles or conduct research in an area that will help make the world a healthier place.

As one of a small number of online doctoral programs that is fully dedicated to this topic, Walden’s health education and promotion degree program explores both individual and population health, focusing on health behavior theory and techniques for changing behaviors. Using the latest technology, students will review case studies that touch on current trends and research and explore best practices from a global perspective.

Learning Outcomes

At the completion of this program, students will be able to:

- Evaluate the factors that impact individual and population health.
- Synthesize assessment results to identify and prioritize health problems.
- Engage in collaborative planning of health interventions.
- Apply knowledge that results in successful implementation and monitoring of health promotion and disease prevention interventions.
- Evaluate the effectiveness of health promotion and disease prevention interventions.
Conduct original health education-related research.
Demonstrate ethical behavior as a health education scholar-practitioner.
Facilitate efforts among stakeholders to achieve common goals related to individual and community health.
Apply health education principles, theories, and models to create professional communication and establish positive public relations.
Use evidence-based research to advocate for policies and programs that promote positive social change related to the health of individuals and communities.

Specializations

Students must select three specialization courses from one of the following specializations to complete during the course of the program.

- Behavioral Health
- Global Health
- Management and Leadership
- Online Teaching in Higher Education
- Population Health
- Research

Minimum Degree Requirements

Track I (prior MS in Health Education and Promotion degree or related health education and promotion degree)

- Doctoral Writing Assessment
- Foundation course (3 cr.)
- Core courses (25 cr.)
- Research courses (20 cr.)
- Specialization courses (15 cr.)
- Completion of Doctoral Capstone
  - Dissertation writing courses (continuous enrollment in 5 cr. per term for a minimum of 4 terms until completion)
- Quarter Plans
- Four PhD residencies

Track II (prior MPH degree)

- Doctoral Writing Assessment
- Foundation course (3 cr.)
Core courses (40 cr.)
Research courses (20 cr.)
Specialization courses (15 cr.)
Completion of Doctoral Capstone
  Dissertation writing courses (continuous enrollment in 5 cr. per term for a minimum of 4 terms until completion)
Quarter Plans
Four PhD residencies

Track III

Doctoral Writing Assessment
Foundation course (3 cr.)
Core courses (55 cr.)
Research courses (20 cr.)
Specialization courses (15 cr.)
Completion of Doctoral Capstone
  Dissertation writing courses (continuous enrollment in 5 cr. per term for a minimum of 4 terms until completion)
Quarter Plans
Four PhD residencies

Residency Requirements

Complete Residency 1 Term 1; required in order to advance into RSCH 8110.
Complete Residency 2 between Terms 2 and 5; required in order to advance into HLTH 8551.
Complete Residency 3 between Terms 6 and 7; required in order to advance into HLTH 9101.
Complete Residency 4 after your prospectus is approved and you are enrolled in EDUC 9000 or EDPD 8990, complete residency 4 during your third year or beyond as:
  Residency 4 General (RESI 8404) OR
  Residency 4 Proposal Writing (RESI 8404Q) OR
  Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
  Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
  Residency 4 Publishing & Presenting (RESI 8404T) OR
  a dissertation intensive (DRWI 8500). Contact Student Success Advising to register. Note: Intensives are not included in Fast Track tuition.

Optional: Complete a PhD dissertation intensive (DRWI 8500) during your dissertation. Contact Student Success Advising to register.

*Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.
Master of Philosophy (Embedded Degree)

Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:
- All required PhD core courses (or KAMs)
- All required PhD specialization courses (or KAMs)
- All required doctoral research and advanced research courses
- Program prospectus development course
- Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.

The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

8-Year Maximum Time Frame

In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements in the student handbook). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

Note on Certification

The PhD in Health Education and Promotion has been designed to reflect the Seven Areas of Responsibility for Health Educators outlined by the National Commission for Health Education Credentialing (NCHEC) and to prepare students to sit for the national Certified Health Education Specialist (CHES) and Master Certified Health Education Specialist (MCHES) exams. Walden enrollment specialists can provide information relating to national certification exams; however, it remains the individual's responsibility to
understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she resides. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain national certification. For more information about the CHES and MCHES exams, students should visit http://www.nchec.org.
College of Health Sciences and Public Policy

Bachelor’s Degree Programs

BS in Health Studies

Walden University’s BS in Health Studies program is designed to empower students as critical and creative thinkers who are capable of addressing the health needs of local and global communities through the delivery of healthcare services. Students will gain the knowledge base required to understand and anticipate the continuing changes in the healthcare industry and prepare health professionals to work within a variety of healthcare settings.

Note: The BS in Health Studies program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

Learning Outcomes

Roman numerals in parentheses at the end of each learning outcome indicate alignment to the Walden University outcomes.

At the end of this program, students will be able to:

- Evaluate health and wellness promotion initiatives. (II, IV, V, VI)
- Critically appraise the context and quality of healthcare delivery within and outside of the United States. (II, IV, V, VI)
- Evaluate health-related research and research methods. (IV, V, VI)
- Explain how a variety of factors (including behavioral theories, social and cultural factors and epidemiological principles) impact health. (II, IV, V, IX)
- Assess public and global health issues across class, race, ethnicity and culture. (I, IV, V, VI, VIII, IX)
- Demonstrate the skills needed to create effective health programs and services (inclusive of program planning, healthcare management and program evaluation). (II, III, IV, V, VI)
- Demonstrate effective communication skills necessary to advance social change in health education and promotion. (I, II, VIII)

Competency-Based Education
In addition to the course-based option described below, students can choose to earn their BS in Health Studies through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the BS in Health Studies (Competency Based) page for program details.

Course-Based Program

Concentrations

Accelerate Into Master's (AIM)
General Program
Child Development
Disaster and Emergency Management
Health and Cultural Diversity
Health Communication
Health Informatics
Healthcare Management
Health Promotion and Wellness
Health Psychology and Behavior
Self-Designed

Degree Requirements

181 total quarter credit hours
General education courses (46 cr.)
Core courses (55 cr.)
Concentration courses (0–25 cr., depending on concentration)
Elective courses (50–75 cr., depending on concentration)
Capstone course (5 cr.)

Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 60 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.
First Term Course (6 cr.)

HMNT 1001 - Living and Learning in the Technological World

Core Courses (55 cr.)

HLTH 1000 - Concepts of Health Promotion
HLTH 1005 - Context of Healthcare Delivery
HLTH 2110 - Behavioral and Cultural Issues in Healthcare
HLTH 2500 - Theories of Health Behavior
HLTH 3115 - Public and Global Health
HLTH 4000 - Introduction to Healthcare Management
HLTH 4200 - Principles of Epidemiology
HLTH 4205 - Introduction to Research Methods and Analysis
HLTH 4380 - Strategies for Health Communication and Wellness
PUBH 4030 - Planning Public Health Programs
PUBH 4100 - Evaluating Public Health Programs

Electives (50–75 cr.)

Students following a specific concentration are to select 10 additional courses to fulfill the elective requirement; students choosing the General Program select 15 additional courses. Students may choose courses from general education, BS in Health Studies, or other Walden bachelor’s degree programs. Students may also be eligible to transfer previous credit to meet their elective requirements. These credits of electives are in addition to the 5-credit general education elective.

Note on Minors: Electives can also be used to complete a six-course minor.

Capstone Course (5 cr.)

HLTH 4900 - Capstone

Note on Certification

The BS in Health Studies concentration in Health Promotion and Wellness has been designed to reflect the Seven Areas of Responsibility for Health Educators outlined by the National Commission for Health Education Credentialing (NCHEC) to prepare students to sit for the national Certified Health Education Specialist (CHES) exam. Walden enrollment specialists can provide information relating to national certification exams; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she resides. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain national certification. For more information about the CHES exam, students should visit http://www.ncheconline.org.
**BS in Health Studies (Competency Based)**

Tempo Learning® is Walden's competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

**Concentrations**

- Health Promotion and Wellness
- Healthcare Management

  - Healthcare Management concentration (25 cr.)
- Elective courses (75 cr.) or
  - Health Promotion and Wellness concentration (50 cr.)
  - Healthcare Management concentration (50 cr.)
- Capstone competencies (5 cr.)

**Curriculum**

**General Education Courses (45 cr.)**

See the general education section of this *Walden University Catalog*.

**Note:** A minimum of 60 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.
Core Competencies (55 cr.)

**HLTH 1000 - Concepts of Health Promotion**
- CH1001 Health Promotion
  - Identify concepts relating to health promotion.
- CH1002 Dimensions of Wellness
  - Apply dimensions of wellness to personal health goals.
- CH1003 Health Literacy
  - Analyze the relationship between health literacy, health marketing, and consumer behavior.
- CH1004 Health Indicators
  - Analyze social determinants of health that impact health indicators.

**HLTH 1005 - Context of Healthcare Delivery**
- HD1001 Bills and Laws
  - Identify the key points of historical bills and laws in healthcare.
- HD1002 Healthcare Systems
  - Compare aspects of the U.S. healthcare system to other countries.
- HD1003 Vertical and Horizontal Integrated Systems
  - Analyze the benefits and limitations of integrated systems.
- HD1004 Current Health Issues in the Workplace
  - Analyze the impact of current healthcare delivery issues.
- HD1005 Barriers to Care
  - Apply strategies to mitigate barriers of care.
- HD1006 Continuum of Care
  - Develop patient plans throughout the continuum of care.

**HLTH 2110 - Behavioral and Cultural Issues in Healthcare**
- BC2001 Health Disparities
  - Demonstrate understanding of health disparities.
- BC2002 Cultural Competence
  - Apply culturally competent practices when working with patients and other healthcare professionals.
- BC2003 Social Ecological Model
  - Apply the social ecological model to community health issues.
- BC2004 Health Disparity Programs
  - Evaluate intervention programs aimed at mitigating health disparities.
- BC2005 Advocacy
  - Advocate for changes to policies or programs that positively impact the health of vulnerable populations.

**HLTH 2500 - Theories of Health Behavior**
HB2001 Influences on Health Behavior
   Analyze the influences of personal, social, and environmental factors on health behaviors.

HB2002 Health Behavior Theories and Models
   Describe key concepts associated with health behavior theories and models.

HB2003 Changing Health Behaviors
   Analyze theory-based strategies to change health behaviors.

HB2004 Applying Health Behavior Theories and Models
   Apply theories and models to the development of strategies that influence health behaviors in specific populations with health issues.

HLTH 3115 - Public and Global Health

PG3001 Global Health Trends and Practices
   Identify key influences on global health trends and practices.

PG3002 Global Health Populations
   Describe key public health populations and global health factors that affect diverse populations and cultures, as well as women and children.

PG3003 Infectious Disease
   Identify and describe infectious diseases and their modes of transmission.

PG3004 Chronic Disease
   Identify chronic diseases, such as heart disease, cancer, and diabetes, and their impact on global health trends.

PG3005 Global Health Organizations and Strategies
   Describe global health agencies, their roles, and the ways in which they support global public health.

PG3006 The Future of Global Health
   Recognize emerging trends in global public health as they relate to population growth, new technology, and ethical/legal considerations.

PG3007 Apply Principles of Global Public Health
   Recommend strategies to positively affect global public health in an identified population.

HLTH 4000 - Introduction to Healthcare Management

HM4001 Manager vs. Leader
   Differentiate the characteristics of managers and leaders.

HM4002 Emotional Intelligence
   Analyze the influence of emotional intelligence on leadership style.

HM4003 Roles and Responsibilities
   Delegate responsibilities within a healthcare management team.

HM4004 Leadership Strategies
   Apply leadership strategies to management scenarios.
HM4005 Leadership Philosophy
   Develop a personal leadership philosophy reflective of emotional intelligence and leadership style.

HLTH 4200 - Principles of Epidemiology
PE4001 Descriptive Epidemiology
   Analyze the epidemiologic factors of disease related to person, place, and time.

PE4002 Study Designs
   Analyze study designs as they apply to the surveillance of diseases.

PE4003 Role of the Epidemiologist
   Analyze the role of the epidemiologist in informing scientific, ethical, economic, and political decisions within public health.

HLTH 4205 - Introduction to Research Methods and Analysis
RM4001 Research Questions
   Develop health-related research questions designed around the scientific method.

RM4002 Literature Review
   Evaluate peer-reviewed research surrounding health-related topics.

RM4003 Research Design
   Apply research design to health-related topics.

RM4004 Ethics in Research
   Apply ethical principles to health-related research.

RM4005 Data Collection and Analysis
   Apply data collection and analysis tools to health-related topics.

RM4006 Presenting Your Proposal
   Present formal research proposals.

HLTH 4380 - Strategies for Health Communication and Wellness
CW4001 Key Characteristics of Health Communications
   Analyze the components and processes of health communication.

CW4002 Resource Evaluation
   Evaluate credible sources.

CW4003 Health Behavior Theories
   Apply health behavior theories and models to develop effective communications.

CW4004 Designing Health Communications
   Design targeted health communications for diverse and low literacy populations.

CW4005 Emerging Technologies
   Recommend technology-based strategies to communicate to diverse populations.
CW4006 Social Marketing Plan
   Develop social marketing plans.

PUBH 4030 - Planning Public Health Programs
   PUBH 4030 - Planning Public Health Programs
   PP4001 Community Needs Assessment
      Justify the selection of public health problems within targeted communities.
   PP4002 Planning Models
      Justify the selection of planning models to address chosen public health problems within targeted communities.
   PP4003 Mission, Goals, Objectives, and Strategies
      Develop measurable goals, objectives, and intervention strategies to address chosen public health issues.
   PP4004 Implementation
      Develop budgets, timelines, and marketing strategies for program plan implementation.
   PP4005 Program Proposal
      Develop proposals to present program plans.

PUBH 4100 - Evaluating Public Health Programs
   PUBH 4100 - Evaluating Public Health Programs
   EV4001 Purposes of Program Evaluation
      Analyze purposes of program evaluation and distinguish between types of evaluation.
   EV4002 Program Evaluation Steps
      Apply the steps in designing and conducting program evaluations.
   EV4003 Program Evaluation Standards
      Assess program evaluation criteria to meet standards.
   EV4004 Data Collection
      Recommend valid data collection tools applicable to program evaluation plans.
   EV4005 Data Analysis and Reporting
      Develop plans for data analysis and reporting evaluation results.

Concentration Courses (0 or 25 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (75 or 50 cr.)

Students are to select 15 or 10 additional courses (based on their concentration) to fulfill the elective requirement. Students may choose courses from either general
education, BS in Health Studies, or other Walden bachelor’s degree programs. At least 30 credits must be at the 3000 level or higher. Individual course prerequisites apply.

Capstone Competencies (5 cr.)

HLTH 4900 - Capstone
CS4001 Professional Standards
   Analyze health knowledge as it applies to professional skills and responsibilities.
CS4002 Professional Development
   Apply communication skills related to professional development.
CS4003 Annotated Bibliography
   Evaluate evidence-based resources relating to selected health issues and professional standards.
CS4004 Communication Skills
   Apply communication skills to selected health issues and professional standards.
CS4005 Social Change
   Apply social change concepts to a selected health issue.

Note on Curriculum

In an effort to ensure competencies are kept up to date and relevant to meet the learning outcomes of the program, the number and subject matter of individual competencies needed to satisfy program course requirements may change. However, program outcomes and the number and subject matter of courses will not be impacted. As a result, the required competencies listed in a student’s individual learning plan may differ from what is currently listed in the catalog.

BS in Healthcare Management (Competency Based)

Tempo Learning® is Walden’s competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

Curriculum

General Education Courses (45 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.

Core Competencies (85 cr.)

ACCT 1004 - Fundamentals of Accounting
   FA1001 The Role of Accounting and Financial Information in Business and Society
       Identify the authoritative and rule-making process of accounting.
   FA1002 The Accounting Cycle: Original Entries to Post-Closing Trial Balance
       Apply the accounting process to basic financial statements.
   FA1003 Financial Statement and Quality Information Assessment
       Evaluate the quality of information reported in financial statements.

HLTH 1000 - Concepts of Health Promotion
   CH1001 Health Promotion
       Identify concepts relating to health promotion.
   CH1002 Dimensions of Wellness
       Apply dimensions of wellness to personal health goals.
   CH1003 Health Literacy
       Analyze the relationship between health literacy, health marketing, and consumer behavior.
CH1004 Health Indicators
   Analyze social determinants of health that impact health indicators

HLTH 1005 - Context of Healthcare Delivery

HD1001 Bills and Laws
   Identify the key points of historical bills and laws in healthcare.

HD1002 Healthcare Systems
   Compare aspects of the U.S. healthcare system to other countries.

HD1003 Vertical and Horizontal Integrated Systems
   Analyze the benefits and limitations of integrated systems.

HD1004 Current Health Issues in the Workplace
   Analyze the impact of current health issues in the workplace.

HD1005 Barriers to Care
   Apply strategies to mitigate barriers of care.

HD1006 Continuum of Care
   Develop patient plans throughout the continuum of care.

HLTH 2110 - Behavioral and Cultural Issues in Healthcare

BC2001 Health Disparities
   Demonstrate understanding of health disparities.

BC2002 Cultural Competence
   Apply culturally competent practices when working with patients and other healthcare professionals.

BC2003 Social Ecological Model
   Apply the social ecological model to community health issues.

BC2004 Health Disparity Programs
   Evaluate intervention programs aimed at mitigating health disparities.

BC2005 Advocacy
   Advocate for changes to policies or programs that positively impact the health of vulnerable populations.

HLTH 2120 - Health Informatics

HI2001 Introduction to Health Informatics
   Analyze the breadth, depth, and importance of health informatics.

HI2002 Threats and Security
   Explain threats that impact informatics applications.

HI2003 Databases
   Analyze how databases are used in healthcare.

HI2004 Technological Tools
   Investigate current and trending technologies in healthcare.

HLTH 3100 - Ethical and Legal Issues in Healthcare

EA3001 Ethical Decision-Making Models
   Apply ethical decision-making models.
EA3002 Code of Ethics
   Apply codes of ethics to health-related issues.
EA3003 Legal Issues
   Apply healthcare-related laws to healthcare settings.
EA3004 Good Samaritan Laws
   Synthesize information on Good Samaritan laws.
EA3005 Informed Consent
   Apply informed consent criteria.
EA3006 End of Life
   Analyze the ethical and legal issues related to completed advanced directives.

HLTH 3105TL - The Interprofessional Healthcare Team [Tempo Learning®-Specific Course]
IH3001 Finding Your Role on the Team
   Analyze the relationship between the roles of different team members.
IH3002 Team Management Skills
   Apply communication and conflict resolution skills in an interprofessional team.
IH3003 Evaluating Team Members
   Evaluate members of an interprofessional team.

HLTH 3110 - Current Issues in Healthcare Policy and Practice
CI3001 Healthcare Delivery Models
   Analyze changing delivery models in acute healthcare.
CI3002 Long-Term Care Delivery Methods
   Evaluate quality, safety, and access of long-term care settings.
CI3003 Health Issues and Policy
   Evaluate U.S. health policies as they compare to policies in other countries.
CI3004 Policy Impact
   Analyze the impact of policy on healthcare.
CI3005 Policy Development
   Propose healthcare policy initiatives.

HLTH 3510 - Health Insurance and Reimbursement
IR3001 Introduction to Health Insurance and Reimbursement
   Identify key concepts relating to health insurance and reimbursement in the United States.
IR3002 Types of Health Insurance
   Analyze different types of health insurance.
IR3003 Fraud and Abuse
Analyze insurance and reimbursement cases for potential fraud and abuse.

IR3004 Revenue Cycle Management
Analyze the importance of effective revenue cycle management for a provider's fiscal stability.

IR3005 Prospective Payment Systems
Analyze the components of varying prospective payment systems.

HLTH 4000 - Introduction to Healthcare Management

HM4001 Manager vs. Leader
Differentiate the characteristics of managers and leaders.

HM4002 Emotional Intelligence
Analyze the influence of emotional intelligence on leadership style.

HM4003 Roles and Responsibilities
Delegate responsibilities within a healthcare management team.

HM4004 Leadership Strategies
Apply leadership strategies to management scenarios.

HM4005 Leadership Philosophy
Develop a personal leadership philosophy reflective of emotional intelligence and leadership style.

HLTH 4100 - Healthcare Organization Theory and Behavior

HT4001 Organizational Structure and Culture
Examine the structure of various organizations.

HT4002 Leadership
Analyze the qualities of leadership.

HT4003 Organizational Behavior Management
Apply management skills to organizational environments.

HT4004 Workplace Motivation
Apply workplace motivation theories.

HT4005 Organizational Change
Apply management strategies to foster positive organizational changes.

HLTH 4110 - Healthcare Quality and Safety

QS4001 Accreditation, Regulation, Certification, and Reporting
Justify the value of accreditation, regulation, certification, and reporting in healthcare organizations.

QS4002 Pay-for-Performance
Evaluate pay-for-performance (P4P) initiatives' impact on patient healthcare quality and safety outcomes.
QS4003 Safety
   Recommend safety improvements to address organizational vulnerabilities in patient care.

QS4004 Quality of Care
   Apply benchmark data to recommend improvements for healthcare quality and safety.

HLTH 4115 - Strategic Planning and Marketing in Healthcare
   MG4001 Mission, Vision, and Values
      Evaluate the mission, vision, and values for healthcare organizations.
   MG4002 SWOT Analysis
      Analyze the strengths, weaknesses, opportunities, and threats of healthcare organizations.
   MG4003 Develop Marketing Plans
      Develop marketing plans for healthcare organizations.

HLTH 4121 - Human Resource Management in Healthcare
   HW4001 Introduction to Human Resources in Healthcare
      Analyze the role of the human resources department in healthcare organizations.
   HW4002 Recruitment and Hiring
      Apply recruitment and hiring human resource strategies.
   HW4003 Compensation, Benefits, and Retention
      Analyze compensation, benefits, and retention strategies.
   HW4004 Performance Evaluations
      Conduct performance evaluations.
   HW4005 Employee Safety
      Recommend solutions to improve employee relations.

HLTH 4205 - Introduction to Research Methods and Analysis
   RM4001 Research Questions
      Develop health-related research questions designed around the scientific method.
   RM4002 Literature Review
      Evaluate peer-reviewed research surrounding health-related topics.
   RM4003 Research Design
      Apply research design to health-related topics.
   RM4004 Ethics in Research
      Apply ethical principles to health-related research.
   RM4005 Data Collection and Analysis
      Apply data collection and analysis tools to health-related topics.
   RM4006 Presenting Your Proposal
      Present formal research proposals.
HLTH 4520 - Healthcare Finance
   HF4001 Introduction to Finance
      Identify terms and concepts relating to healthcare finance.
   HF4002 Budget Analysis
      Analyze the relationship between financial statements and the financial
      health of an organization.
   HF4003 Cost Analysis
      Assess components and purposes of financial reports.
   HF4004 Business Plans and Proposals
      Apply budgeting strategies to effectively manage healthcare operations.

HLTH 4530 - Healthcare Economics From a Population Health Perspective
   HH4001 Introduction to Economics
      Identify concepts related to healthcare economics.
   HH4002 Health Insurance and Reimbursement
      Analyze the economic impact of health insurance and reimbursement.
   HH4003 Economics of Population Health
      Analyze the impact of social determinants of health.

Electives (50 or 45 cr.)

Students are to select 10 or nine courses (based on their concentration) from general
education, BS in Health Studies, or other Walden bachelor's degree programs. Elective
credits should total either 50 or 45 to meet the program requirements. Students may
also be eligible to transfer previous credit to meet their elective requirements.

Note: RN-BSN courses are not available to students outside the RN-BSN program.

Capstone Competencies (5 cr.)

HLTH 4900 - Capstone
   CS4001 Professional Standards
      Analyze health knowledge as it applies to professional skills and
      responsibilities.
   CS4002 Professional Development
      Apply communication skills related to professional development.
   CS4003 Annotated Bibliography
      Evaluate evidence-based resources relating to selected health issues and
      professional standards.
   CS4004 Communication Skills
      Apply communication skills to selected health issues and professional
      standards.
CS4005 Social Change
Apply social change concepts to a selected health issue.

Note on Curriculum

In an effort to ensure competencies are kept up to date and relevant to meet the learning outcomes of the program, the number and subject matter of individual competencies needed to satisfy program course requirements may change. However, program outcomes and the number and subject matter of courses will not be impacted. As a result, the required competencies listed in a student's individual learning plan may differ from what is currently listed in the catalog.

BS in Political Science and Public Administration

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.

Delivering a unique blend of theory and application, Walden’s BS in Political Science and Public Administration program helps prepare students to advance their careers in public service or in the private sector—empowering them to effect positive change in their organizations and their communities. This degree can also help set the foundation for graduate study across a variety of disciplines, including law and public administration.

Through Walden’s new BS in Political Science and Public Administration program, students will have the opportunity to:

- Explore the foundations of American government, as well as contemporary issues and debates related to constitutional law and the judicial process.
- Understand the tools, skills, and strategies of today’s successful public-sector leaders and the intricacies involved in shaping public policy.
- Examine the ethical considerations facing leaders today and learn how to build organizations that reflect strong values.
- Address top issues and challenges in 21st-century global politics, from energy and trade to human rights and healthcare.
- Develop essential leadership skills in human resources, communications, planning, and budgeting.

Learning Outcomes

At the end of the program, students will be able to:

- Explain the constitutional, legal, institutional, and political foundations of American government.
- Explain the historical development and contemporary context of public administration in the United States.
Define ethical leadership and evaluate its importance in contemporary government and public administration.
Explain the principal dimensions of major global issues and their relevance to choices made at the national, state, and local levels.
Identify key debates over political principles that have endured over time and describe how these debates manifested in several contemporary political controversies.
Explain how public policy is formulated and implemented.
Describe how public sector organizations function with their political, social, and economic context.
Demonstrate how the methods of political science, public administration, or social entrepreneurship can be used to solve problems and create positive social change.

Concentrations

General Program
Global Issues and Social Justice
Law and Legal Studies
Managing in the Public Environment
Public Service Through Civic Engagement
Social Entrepreneurship

Degree Requirements

181 total quarter credits
General education courses (46 cr.)
Core courses (35 cr.)
Concentration courses (0-25 cr., depending on concentration)
Elective courses (70-95, depending on concentration)
Capstone course (5 cr.)

Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options.
Students should consult their student success advisor if they have questions about individual program requirements.

Core Courses (35 cr.)

- POLI 1001 - American Government and Politics
- PSPA 1002 - Global Issues in Politics
- PSPA 1003 - Political Controversies
- PSPA 2001 - Principles of Public Administration
- PSPA 2002 - The Making of Public Policy
- PSPA 3001 - Constitutional Law
- PSPA 3002 - Ethics in Public Leadership

Concentration Courses (0–25 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (70–95 cr.)

Electives are dependent upon the particular concentration. Please see the elective requirements on each concentration page.

Capstone Course (5 cr.)

- PSPA 4080 - Capstone

**BS in Public Health**

From disaster relief to disease prevention and child-wellness programs, public health professionals facilitate the conditions for a healthy, productive, and safe society. Create a positive effect on local, national, or international communities with Walden’s Bachelor of Science in Public Health.

The BS in Public Health degree may be the ideal tool to help you create meaningful social change in your community and in the world. This program helps prepare you to meet the growing need for formally trained, caring public health professionals who can address critical 21st-century global health challenges to improve the health of populations. Rooted in the principles and competencies of public health, the curriculum prepares students to translate and apply course content into practice. Students learn about a range of issues impacting population health and healthcare systems, including environmental health, disease prevention, health informatics, global health, ethics, health management, and behavioral and cultural issues.
Choose to complete a general program of study (which allows students to apply transfer credit) or select a concentration to deepen the understanding of a pertinent area of public health. Gain "real world" experience by choosing to complete an optional service learning project, field experience, or study abroad opportunity. This program also provides a solid foundation and fast track for individuals who would like to pursue an advanced degree in public health, such as the Master of Public Health (MPH) or doctorate in public health.

Note: The BS in Public Health program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

Learning Outcomes

Roman numerals in parentheses at the end of each learning outcome indicate alignment to the Walden University outcomes.

At the end of this program, students will be able to:

- Explain the historical development and contemporary context of public health, including the infrastructure and organization of public health systems. (VI)
- Critically examine the role of public health in protecting and promoting the health of populations locally and globally. (II, VI)
- Analyze social, political, and economical issues, which impact public health and healthcare delivery systems within and outside of the United States. (I, IV)
- Explain the biological effects of infections and chronic diseases on the human body. Explain basic epidemiological principles used to study patterns of disease and injury among diverse populations.
- Evaluate health-related research and research methods. (IV, V)
- Analyze the theoretical models including how social, behavioral, cultural, and environmental factors impact behavior change. (IX)
- Demonstrate the skills necessary to create effective public health programs and services (including program planning, healthcare management, and program evaluation). (II, III, IV, VI)
- Analyze legal, regulatory, and ethical issues that impact public health practice. (VII)
- Articulate how public health policy is developed and how individuals and groups influence policy change. (I, II, III, IV, IX)
- Demonstrate effective communication and problem-solving skills necessary for addressing contemporary global public health issues and to promote social change. (I, IV, VI, VIII, X)

Competency-Based Education
In addition to the course-based option described below, students can choose to earn their BS in Healthcare Management through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the BS in Public Health (Competency Based) page for program details.

Course-Based Program

Concentrations

Accelerate Into Master’s (AIM)
General Program
Child Development
Disaster and Emergency Management
Health and Cultural Diversity
Health Communication
Health Informatics
Health Promotion and Wellness
Health Psychology and Behavior
Healthcare Management

Degree Requirements

181 total quarter credits
General education courses (46 cr.)
Core courses (80 cr.)
Concentration courses (0–25 cr., depending on concentration)
Elective courses (25–50 cr., depending on concentration)
Capstone course (5 cr.)

Curriculum

General Education Courses (46 cr.)

See the general education general education section of this Walden University Catalog.

Note: At least three general education courses taken must be taken at the 3000 level or higher, including SOCI 4080.

First Term Course (6 cr.)

HMNT 1001 - Living and Learning in the Technological World
Core Courses (80 cr.)

- HLTH 1005 - Context of Healthcare Delivery
- HLTH 2110 - Behavioral and Cultural Issues in Healthcare
- HLTH 2500 - Theories of Health Behavior
- HLTH 3100 - Ethical and Legal Issues in Healthcare
- HLTH 3115 - Public and Global Health
- HLTH 4000 - Introduction to Healthcare Management
- HLTH 4200 - Principles of Epidemiology
- HLTH 4205 - Introduction to Research Methods and Analysis
- HLTH 4530 - Healthcare Economics From a Population Health Perspective
- PUBH 1000 - Foundations of Public Health
- PUBH 3000 - Environmental Health
- PUBH 3100 - Human Disease and Prevention
- PUBH 4000 - Public Health Education and Communication
- PUBH 4030 - Planning Public Health Programs
- PUBH 4100 - Evaluating Public Health Programs
- PUBH 4200 - Public Health Policy for Social Change

Concentration Courses (0–25 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (25–50 cr.)

Electives are dependent upon the particular concentration. Please see the elective requirements on each concentration page.

Capstone Course (5 cr.)

- PUBH 4900 - Capstone in Public Health

Note on Certification

The Health Promotion and Wellness concentration in the BS in Public Health program has been designed to reflect the Seven Areas of Responsibility for Health Educators outlined by the National Commission for Health Education Credentialing (NCHEC) to prepare students to sit for the national Certified Health Education Specialist (CHES) exam. Walden enrollment specialists can provide information relating to national certification exams; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she resides. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain national certification. For more information about the CHES exam, students should visit www.nchec.org.
BS in Public Health (Competency Based)

Tempo Learning® is Walden's competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

Concentrations

- Health Promotion and Wellness
- Healthcare Management

Degree Requirements

180 total credits
- General education courses (45 cr.)
- Core competencies (80 cr.)
- Concentration competencies (0 cr.) or
  - Health Promotion and Wellness concentration (25 cr.)
  - Healthcare Management concentration (25 cr.)
- Elective courses (50 cr.) or
  - Health Promotion and Wellness concentration (25 cr.)
  - Healthcare Management concentration (25 cr.)
- Capstone competencies (5 cr.)

Curriculum

General Education Courses (45 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.
Core Competencies (80 cr.)

HLTH 1005 - Context of Healthcare Delivery

HD1001 Bills and Laws
Identify the key points of historical bills and laws in healthcare.

HD1002 Healthcare Systems
Compare aspects of the U.S. healthcare system to other countries.

HD1003 Vertical and Horizontal Integrated Systems
Analyze the benefits and limitations of integrated systems.

HD1004 Current Health Issues in the Workplace
Analyze the impact of current healthcare delivery issues.

HD1005 Barriers to Care
Apply strategies to mitigate barriers of care.

HD1006 Continuum of Care
Develop patient plans throughout the continuum of care.

HLTH 2110 - Behavioral and Cultural Issues in Healthcare

BC2001 Health Disparities
Demonstrate understanding of health disparities.

BC2002 Cultural Competence
Apply culturally competent practices when working with patients and other healthcare professionals.

BC2003 Social Ecological Model
Apply the social ecological model to community health issues.

BC2004 Health Disparity Programs
Evaluate intervention programs aimed at mitigating health disparities.

BC2005 Advocacy
Advocate for changes to policies or programs that positively impact the health of vulnerable populations.

HLTH 2500 - Theories of Health Behavior

HB2001 Influences on Health Behavior
Analyze the influences of personal, social, and environmental factors on health.

HB2002 Health Behavior Theories and Models
Describe key concepts associated with health behavior theories and models.

HB2003 Changing Health Behaviors
Analyze theory-based strategies to change health behaviors.

HB2004 Applying Health Behavior Theories and Models
Apply theories and models to the development of strategies that influence health behaviors in specific populations with health issues.
HLTH 3100 - Ethical and Legal Issues in Healthcare

   EA3001 Ethical Decision-Making Models
      Apply ethical decision-making models.
   EA3002 Code of Ethics
      Apply codes of ethics to health-related issues.
   EA3003 Legal Issues
      Apply healthcare-related laws to healthcare settings.
   EA3004 Good Samaritan Laws
      Synthesize information on Good Samaritan laws.
   EA3005 Informed Consent
      Apply informed consent criteria.
   EA3006 End of Life
      Analyze the ethical and legal issues related to completed advanced directives.

HLTH 3115 - Public and Global Health

   PG3001 Global Health Trends and Practices
      Identify key influences on global health trends and practices.
   PG3002 Global Health Populations
      Describe key public health populations and global health factors that affect diverse populations and cultures, as well as women and children.
   PG3003 Infectious Disease
      Identify and describe infectious diseases and their modes of transmission.
   PG3004 Chronic Disease
      Identify chronic diseases, such as heart disease, cancer, and diabetes, and their impact on global health trends.
   PG3005 Global Health Organizations and Strategies
      Describe global health agencies, their roles, and the ways in which they support global public health.
   PG3006 The Future of Global Health
      Recognize emerging trends in global public health as they relate to population growth, new technology, and ethical/legal considerations.
   PG3007 Apply Principles of Global Public Health
      Recommend strategies to positively affect global public health in an identified population.

HLTH 4000 - Introduction to Healthcare Management

   HM4001 Manager vs. Leader
      Differentiate the characteristics of managers and leaders.
   HM4002 Emotional Intelligence
      Analyze the influence of emotional intelligence on leadership style.
HM4003 Roles and Responsibilities
Delegate responsibilities within a healthcare management team.

HM4004 Leadership Strategies
Apply leadership strategies to management scenarios.

HM4005 Leadership Philosophy
Develop a personal leadership philosophy reflective of emotional intelligence and leadership style.

HLTH 4200 - Principles of Epidemiology
PE4001 Descriptive Epidemiology
Analyze the epidemiologic factors of disease related to person, place, and time.

PE4002 Study Designs
Analyze study designs as they apply to the surveillance of diseases.

PE4003 Role of the Epidemiologist
Analyze the role of the epidemiologist in informing scientific, ethical, economic, and political decisions within public health.

HLTH 4205 - Introduction to Research Methods and Analysis
RM4001 Research Questions
Develop health-related research questions designed around the scientific method.

RM4002 Literature Review
Evaluate peer-reviewed research surrounding health-related topics.

RM4003 Research Design
Apply research design to health-related topics.

RM4004 Ethics in Research
Apply ethical principles to health-related research.

RM4005 Data Collection and Analysis
Apply data collection and analysis tools to health-related topics.

RM4006 Presenting Your Proposal
Present formal research proposals.

HLTH 4530 - Healthcare Economics From a Population Health Perspective
HH4001 Introduction to Economics
Identify concepts related to healthcare economics.

HH4002 Health Insurance and Reimbursement
Analyze the economic impact of health insurance and reimbursement.

HH4003 Economics of Population Health
Analyze the impact of social determinants of health.

PUBH 1000 - Foundations of Public Health
PF1001 Introduction to Public Health
Identify concepts related to public health.
PF1002 Professional Goals
   Develop professional goals based on program learning outcomes.
PF1003 Impact of Chronic Illness
   Analyze the impact of chronic illness on communities.
PF1004 Public Health Services
   Analyze public health services and career opportunities.
PF1005 Advocacy for Public Health
   Advocate for public health interests.

PUBH 3000 - Environmental Health
   EH3001 Introduction to Environmental Health
      Analyze the impact of environmental factors on health.
   EH3002 Agents of Environmental Disease
      Analyze the health effects of agents of environmental disease.
   EH3003 Environmental Policy
      Explain local, national, and global environmental policies relating to air, food, water, and waste management.
   EH3004 Environmental Health Assessment
      Apply findings from an environmental health assessment to home and workplace safety.

PUBH 3100 - Human Disease and Prevention
   DP3001 Public Health Trends
      Analyze the impact of public health trends on disparities.
   DP3002 Biological Factors
      Analyze how the impact of disease on the human body informs public health strategies.
   DP3003 Spread of Disease
      Recommend public health strategies informed by the epidemiologic triangle and chain of infection.
   DP3004 Culture and Psychosocial Factors
      Analyze the impact of culture and psychosocial factors on the incidence and prevalence of chronic disease.
   DP3005 Risk Factors Responsible for Infectious Diseases
      Recommend strategies to address emerging and reemerging disease risk factors.
   DP3006 Modifiable Risk Factors
      Recommend strategies to address modifiable risk factors aimed at preventing disease.

PUBH 4000 - Public Health Education and Communication
PU4001 History and Trends
Identify key historical events and trends in the health education profession.

PU4002 Professional Organizations
Analyze the role of professional organizations in public health advocacy.

PU4003 Professional Development Plans
Apply certification standards to a professional development plan.

PU4004 Codes of Ethics
Apply the Health Education Code of Ethics.

PU4005 Communicating to Populations
Apply communication strategies for public health education.

PUBH 4030 - Planning Public Health Programs

PP4001 Community Needs Assessment
Justify the selection of public health problems within targeted communities.

PP4002 Planning Models
Justify the selection of planning models to address chosen public health problems within targeted communities.

PP4003 Mission, Goals, Objectives, and Strategies
Develop measurable goals, objectives, and intervention strategies to address chosen public health issues.

PP4004 Implementation
Develop budgets, timelines, and marketing strategies for program plan implementation.

PP4005 Program Proposal
Develop proposals to present program plans.

PUBH 4100 - Evaluating Public Health Programs

EV4001 Purposes of Program Evaluation
Analyze purposes of program evaluation and distinguish between types of evaluation.

EV4002 Program Evaluation Steps
Apply the steps in designing and conducting program evaluations.

EV4003 Program Evaluation Standards
Assess program evaluation criteria to meet standards.

EV4004 Data Collection
Recommend valid data collection tools applicable to program evaluation plans.

EV4005 Data Analysis and Reporting
Develop plans for data analysis and reporting evaluation results.

PUBH 4200 - Public Health Policy for Social Change
SX4001 Introduction to the U.S. Government
Recognize the structure and function of the branches of the U.S.
government.
SX4002 Policy Development
Analyze the development of policy to address public health issues.
SX4003 Legal and Ethical Ramifications of Policy
Analyze the legal and ethical ramifications of public health policy.
SX4004 Critiquing Policy
Recommend amendments to public health policy.
SX4005 Advocacy Skills
Develop advocacy plans for public health issues to affect positive social
change.

Concentration Competencies (0 or 25 cr.)
These courses are dependent upon the particular concentration. Please see the course
list on each concentration page.

Electives (50 or 25 cr.)
Students choosing the competency-based program are to select 10 or five additional
courses (based on their concentration) to fulfill the elective requirement. Students may
choose courses from general education, BS in Health Studies, or other Walden
bachelor’s degree programs. Elective credits should total 50 or 25 to meet the program
requirements. Students may also be eligible to transfer previous credit to meet their
elective requirements.

Capstone Competencies (5 cr.)

PUBH 4900 - Capstone in Public Health
CS4001 Professional Standards
Analyze health knowledge as it applies to professional skills and
responsibilities.
CS4002 Professional Development
Apply communication skills related to professional development.
CS4003 Annotated Bibliography
Evaluate evidence-based resources relating to selected health issues and
professional standards.
CS4004 Communication Skills
Apply communication skills to selected health issues and professional
standards.
CS4005 Social Change
Apply social change concepts to a selected health issue.

Note on Curriculum

In an effort to ensure competencies are kept up to date and relevant to meet the learning outcomes of the program, the number and subject matter of individual competencies needed to satisfy program course requirements may change. However, program outcomes and the number and subject matter of courses will not be impacted. As a result, the required competencies listed in a student's individual learning plan may differ from what is currently listed in the catalog.

Other Undergraduate Options

Accelerate Into Master's (AIM)

Accelerate Into Master's (AIM) Programs
Walden University offers opportunities for undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master’s (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a "C" in the graduate-level course but only a grade of "B" or better will carry over to the graduate program. Students who receive a "C" grade will be awarded a grade of "C,"* which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not pass their AIM class are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must take that course as a master's student.

Requirements
Walden University offers several opportunities for undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

Individual programs may determine the specific eligible AIM courses and some programs may limit the number of courses available. Generally, AIM coursework should not account for more than approximately 50% of the credits needed for master's degree completion. Practicum or Capstone requirements for the master's program are not eligible to be satisfied by AIM coursework.

To be eligible to begin AIM courses, students must:

a. Have an overall GPA equal to that required for admission to the associated master's degree.* BS AIM track students must maintain a 2.5 GPA and have a transfer GPA of at least 2.5 (if transferring credits).
b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.) * BS in Psychology AIM track students do not need to meet this requirement.

c. Be in good financial standing.

d. Not have any incompletes.

AIM courses are (5000-level) graduate courses.*

a. Tuition for these courses is charged at the undergraduate rate for the course-based learning format. For Tempo Learning® these courses are included in the program's subscription cost.

b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.

c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA only.

Students must get a "B" or better in each course to have that course applied to the master's program.

Students who do not earn a grade of "C" or better will not be allowed to take any more 5000-level courses. Later admission to the master’s program requires that the student must take that course as a master's student. * BS in Psychology AIM track students may retake an AIM course a second time if they failed the first time; they must earn a grade of "C" or better the second time in order to stay in the AIM track program.

Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.

Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

Upon completion of the undergraduate program requirements, students should file an Intent to Graduate Form.

Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a "B" or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.
Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

Undergraduate students may complete AIM courses to fulfill elective credits, as course substitutions approved by the program director, or they may elect a second concentration within their program of study that is designed for AIM completion. Students are encouraged to consult with Student Success Advising (if in the course-based learning format) or their Academic Coaching (if in the Tempo Learning® format) on the most appropriate plan for their program and academic goals, such as their future master’s program and time to completion.

*Note: Graduate students cannot register for AIM courses.

College of Social and Behavioral Health

**School of Counseling**

### MS in Clinical Mental Health Counseling

*These courses are open only to students in the BS in Human Services and BS in Psychology programs. Students may select up to five of these courses. Individual course prerequisites apply*

**Note:** These courses are 11 weeks in length.

These courses must be taken in the order listed.

| HUMN 5100 - Introduction to Mental Health Counseling* |
| HUMN 5722 - Theories of Counseling |
| HUMN 5316 - Techniques of Counseling |
| HUMN 5723 - Multicultural Counseling |
| PSYC 5101 - Foundations for Graduate Study in Counseling* |
| PSYC 5102 - Introduction to Mental Health Counseling* |
| PSYC 5722 - Counseling and Psychotherapy Theories |
| PSYC 5316 - Techniques in Counseling |
| PSYC 5306 - Ethics and Legal Issues in Counseling |
| PSYC 5723 - Multicultural Counseling |

*Students are required to take PSYC 5101 along with PSYC 5102 or HUMN 5100.

**Note on Endorsement, Licensure, or Certification**

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.
The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

**BS in Political Science and Public Administration to Master of Public Administration (MPA) Articulation**

Walden University's advanced undergraduate Political Science and Public Administration students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's Master of Public Administration (MPA) program.

**Requirements**

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the courses below.
- The student must have completed all general education and core requirements of the BS in Political Science and Administration.

*Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Student Success Advising Team for more information regarding the Accelerate Into Master's (AIM) program.*

**Curriculum**

All graduate courses are taken as electives and must be selected from the list below.

*Note: The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.*

Choose up to five of the following courses for the Master of Public Administration (MPA) program:

- MMPA 5200 - Principles of Public Administration
- MMPA 5405 - Ethics and Social Justice
- MMPA 5420 - Organizational Management and Leadership
- MMPA 5431 - Finance and Budgeting for the Public Sector
- MMPA 5435 - Human Resource Management: Building a Capable Workforce
Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master's (AIM) courses and who are graduating (or have graduated) from the BS in Political Science and Public Administration program are invited to apply to the Master of Public Administration program (MPA). Upon acceptance to Walden’s MPA program, up to five courses can be applied to degree completion requirements.

MMPA 6115 - Foundations for Graduate Study Required

MMPA 6200 - Principles of Public Administration ● Students who successfully complete MMPA 5200 - Introduction to Public Administration (5 cr.) with a "B" or better can have this course waived.

Minor in Health Promotion and Wellness

The Undergraduate Minor in Health Promotion and Wellness is for the non-health sciences major student who is interested in learning how to empower individuals and communities to improve physical fitness, nutrition habits, stress management, and interpersonal behaviors. With a curriculum rooted in the latest findings on prevention and wellness, students can learn how to inspire others as they enhance their own wellness.

Note: This minor is not available to students in the BS in Health Studies, BS in Public Health, or the BS in Healthcare Management programs.
Required Courses (30 cr.)

- HLTH 4300 - Personal Health and Wellness
- HLTH 4320 - Nutrition Across the Lifespan
- HLTH 4340 - Fit and Well: Core Concepts in Exercise Science
- HLTH 4360 - Stress Management and Wellness

And students choose two of the following:

- HLTH 2110 - Behavioral and Cultural Issues in Healthcare
- HLTH 3115 - Public and Global Health
- HLTH 4380 - Strategies for Health Communication and Wellness
- PUBH 3100 - Human Disease and Prevention
- PUBH 4000 - Public Health Education and Communication
- PUBH 4030 - Planning Public Health Programs
- PUBH 4100 - Evaluating Public Health Programs

Minor in Health Studies

The Undergraduate Minor in Health Studies is for the non-health sciences major student and is designed to empower students as critical and creative thinkers who are capable of addressing the health needs of local and global communities through the delivery of healthcare services. Students will gain the knowledge base required to understand and anticipate the continuing changes in the healthcare industry and prepare health professionals to work within a variety of healthcare settings.

Note: This minor is not available to students in the BS in Health Studies, BS in Public Health, or the BS in Healthcare Management programs.

Required Courses (30 cr.)

- HLTH 1005 - Context of Healthcare Delivery
- HLTH 3115 - Public and Global Health
- HLTH 4300 - Personal Health and Wellness

And students choose three of the following:

- HLTH 2110 - Behavioral and Cultural Issues in Healthcare
- HLTH 2115 - Aging Across the Lifespan
- HLTH 3100 - Ethical and Legal Issues in Healthcare
- HLTH 3110 - Current Issues in Healthcare Policy and Practice
- HLTH 4050 - Introduction to Disaster and Emergency Management
- HLTH 4320 - Nutrition Across the Lifespan
- HLTH 4340 - Fit and Well: Core Concepts in Exercise Science
- HLTH 4360 - Stress Management and Wellness
- HLTH 4380 - Strategies for Health Communication and Wellness
- PUBH 3000 - Environmental Health
- PUBH 3100 - Human Disease and Prevention
- PUBH 4000 - Public Health Education and Communication
- PUBH 4100 - Evaluating Public Health Programs
Minor in Political Science and Public Administration

Return to: Undergraduate Minors

The Undergraduate Minor in Political Science and Public Administration is for the non-public administration major student who may be interested in learning how to effect positive change in their organizations and their communities. The minor addresses top issues and challenges in 21st-century global politics, from energy and trade to human rights and healthcare. Students also can develop essential leadership skills in human resources, communications, planning, and budgeting.

Note: This minor is not available to students in the BS in Political Science and Public Administration program.

Required Courses (30 cr.)

POLI 1001 - American Government and Politics
PSPA 1003 - Political Controversies
PSPA 2001 - Principles of Public Administration
Choose three of the following:
PSPA 1002 - Global Issues in Politics
PSPA 2002 - The Making of Public Policy
PSPA 3001 - Constitutional Law
PSPA 3002 - Ethics in Public Leadership
PSPA 3020 - Principles of Public Personnel Management and Human Resources
PSPA 4020 - New Skills for Leaders in the Public Sector

Minor in Public Health

The Undergraduate Minor in Public Health is for the non-health sciences major student. Rooted in the principles and competencies of public health, the curriculum prepares students to translate and apply course content into practice. Students learn about a range of issues impacting population health and healthcare systems, including environmental health, disease prevention, health informatics, global health, ethics, health management, and behavioral and cultural issues.

Note: This minor is not available to students in the BS in Health Studies, BS in Public Health, or the BS in Healthcare Management programs.

Required Courses (30 cr.)

HLTH 2110 - Behavioral and Cultural Issues in Healthcare
HLTH 4200 - Principles of Epidemiology
PUBH 1000 - Foundations of Public Health
PUBH 3000 - Environmental Health
And students choose two of the following:
HLTH 2115 - Aging Across the Lifespan
HLTH 3100 - Ethical and Legal Issues in Healthcare
HLTH 3110 - Current Issues in Healthcare Policy and Practice
HLTH 3115 - Public and Global Health
HLTH 4050 - Introduction to Disaster and Emergency Management
HLTH 4205 - Introduction to Research Methods and Analysis
HLTH 4340 - Fit and Well: Core Concepts in Exercise Science
HLTH 4360 - Stress Management and Wellness
HLTH 4380 - Strategies for Health Communication and Wellness
PUBH 3100 - Human Disease and Prevention
PUBH 4000 - Public Health Education and Communication
PUBH 4030 - Planning Public Health Programs
PUBH 4100 - Evaluating Public Health Programs
PUBH 4200 - Public Health Policy for Social Change

Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student’s major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their student success advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Communication
- Minor in Criminal Justice
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Healthcare Management
- Minor in Introductory Instructional Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health

Graduate Certificate Programs

Graduate Certificate in Government Management

Students who complete this certificate program learn public service management and leadership skills while exploring public management career opportunities.
Students must meet the master’s program admission requirements. Credit from courses taken for a certificate can be applied toward the Master of Public Administration or the MS in Nonprofit Management and Leadership.

Students must show progress and maintain performance in a manner identical to a degree program. Students track their progress in their program of study, similar to degree-seeking students. Students must receive a B or better in each course. Note: A grade of B– is not acceptable.

Certificate Requirements

18 total quarter credits

**Graduate Certificate in Public Health**

This certificate program allows you to gain skills to improve the well-being of people in their community and around the globe. You can explore public health perspectives, interpret data, and examine environmental health concerns. The coursework is developed in alignment with national standards. You can focus on fundamental principles and practices in public health: biostatistics, epidemiology, environmental health, public health administration, and social/behavioral sciences. All credits earned from this certificate can be applied toward Walden’s Master of Public Health (MPH) program.

**Certificate Requirements**

31 total quarter credits

**Curriculum**

- PUBH 6005 - Perspectives on Health and the Developing Scholar-Practitioner
- PUBH 6031 - Public Health Administration and Leadership
- PUBH 6032 - SPSS Revealed
- PUBH 6033 - Interpretation and Application of Public Health Data
- PUBH 6034 - Environmental Health: Local to Global
- PUBH 6035 - Epidemiology: Decoding the Science of Public Health
- PUBH 6038 - Health Behavior Theory

**Course Sequence**

The recommended course sequence is as follows:

*Students who complete the Graduate Certificate in Public Health and wish to enroll in the MPH program, must earn a C or better in PUBH 6005. Students who do not complete the certificate, must earn a B or better in PUBH 6005 if they wish to transfer the course into the MPH program.

Note on Certification

The National Board of Public Health Examiners (NBPHE) offers the Certified in Public Health (CPH) credential as a voluntary core credential for public health professionals. As the eligibility criteria may change periodically, students should visit https://www.nbphe.org/eligibility for more information about certification in public health. It is the individual's responsibility to understand, evaluate, and comply with all requirements relating to national certification. Walden makes no representations or guarantees that completion of Walden coursework or programs will permit an individual to obtain national certification or practice as a public health professional in the state where they intend to practice.

**Graduate Certificate in Public Management and Leadership**

Students will prepare to improve the effectiveness and efficiency of their organizations with this certificate. They will explore how transformative change occurs in complex public systems and will study how to use the language of leadership to shape policy as they motivate, inspire, and lead their organization.
Students must meet the master’s program admission requirements. Credit from courses taken for a certificate can be applied toward the Master of Public Administration or the MS in Nonprofit Management and Leadership.

Students must show progress and maintain performance in a manner identical to a degree program. Students track their progress in their program of study, similar to degree-seeking students. Students must receive a B or better in each course. Note: A grade of B– is not acceptable.

**Graduate Certificate in Public Policy**

This certificate program helps students improve their ability to create and evaluate policies that engage citizens and contribute positively to society. Designed for public and nonprofit administrators who are intimately involved in both executive and legislative board policy and decision-making, the certificate can help students develop the foundational skills and knowledge required to create and assess the financial implications of forward-thinking policy.

Students must meet the master’s program admission requirements. Credit from courses taken for a certificate can be applied toward the Master of Public Administration or the MS in Nonprofit Management and Leadership.

Students must show progress and maintain performance in a manner identical to a degree program. Students track their progress in their program of study, similar to degree-seeking students. Students must receive a B or better in each course. **Note: A grade of B– is not acceptable.**

Graduate Certificate in Strategic Planning and Public Policy

In this certificate program, students will enrich their understanding of how public policy is created and implemented. Designed for emerging leaders in law enforcement, corrections, and probation and parole, the certificate will give students the opportunity to study how to develop effective strategic plans that can further their organization’s mission and vision and adhere to federal, state, and local policies.

Students must meet the master’s program admission requirements. Credit from courses taken for a certificate can be applied toward the Master of Public Administration or the MS in Nonprofit Management and Leadership.

Students must show progress and maintain performance in a manner identical to a degree program. Students track their progress in their program of study, similar to degree-seeking students. Students must receive a B or better in each course. Note: A grade of B– is not acceptable.

Master's Degree Programs

Master of Public Administration (MPA)

As the public and private sectors increasingly evolve and overlap, there will be an increasing demand for leaders and managers who are scholar-practitioners. The Master of Public Administration (MPA) program prepares professionals to excel in this increasingly complex and collaborative environment. The program offers students an opportunity to directly apply academic theories and skills in their own communities, making the learning experience personally meaningful while creating positive social change.

Learning Outcomes

At the end of the program, students will be able to:

- Describe key leadership concepts and theories that can be used to effectively lead and manage in the public sector.
- Determine appropriate skills needed for participating in and contributing to public and nonprofit policy processes.
- Critically evaluate strategies for resolving public policy and administration problems in a global economic and political environment.
- Develop ethical solutions to advance and improve the lives of citizens and organizations.
- Apply models that represent best practices in utilizing diverse perspectives in local, state, national, and international public agencies.
Specializations

Students who wish to gain additional knowledge in a specialized area can complete two courses in a specialization area. Courses must be taken in the order presented.

- General Program (see Course Sequence below)
- Diversity and Social Justice
- Emergency Management
- Law and Public Policy
- Nonprofit Management and Leadership

The following previous MPA specializations are no longer accepting new students. Current students in these specializations must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies. Changing specializations may increase a student’s expected time-to-degree completion and cost.

- Health Policy
- Policy Analysis
- Public Management and Leadership
- Social Entrepreneurship and Innovation
- Terrorism, Mediation, and Peace

Degree Requirements

- 48 total quarter credits
- Foundation course (3 cr.)
- Core courses (30 cr.)
- Elective courses or optional specialization courses* (10 cr.)
- Capstone course (5 cr.)

*Optional specialization courses must be taken in the order shown.

Core Curriculum

Courses are 12 weeks in length.

Foundation Course (3 cr.)

MMPA 6116 - Foundations of Graduate Study

Core Courses (30 cr.)

MMPA 6200 - Principles of Public Administration
MMPA 6405 - Ethics and Social Justice
MMPA 6451 - Public Policy Analysis
MMPA 6431 - Finance and Budgeting for the Public Sector
MMPA 6441 - Human Resources Management and Strategic Planning
MMPA 6480 - Applied Research and Evaluation Methods

Electives or Optional Specialization Courses (10 cr.)

Students in the General Program choose two elective courses from any of the MMPA specialization courses. Students undertaking a specialization complete two specified courses. Specialization courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Capstone Course (5 cr.)

MMPA 6910 - Master of Public Administration Capstone

Course Sequence

Students undertake courses in the following sequence.

Master of Public Health (MPH)

Walden’s Master of Public Health (MPH) program is designed to provide public health practitioners with the specialized skills and core competencies required to improve health and prevent disease among individuals, communities, and populations. Students gain a solid foundation in core public health disciplines, including biostatistics, epidemiology, environmental health, public health administration, and social and behavioral sciences. Students learn to plan, implement, and evaluate public health programs and initiatives with a special focus on reducing disparities in health and serving underserved populations or communities. Students also receive additional instruction in widely used analytical tools, explore current issues in public health financing, and hone their leadership and communication skills.

Consistent with our commitment to continuous quality improvement, Walden redesigned the MPH curriculum to incorporate case studies on the latest public health issues, improve the student's field and classroom experience, and reflect professional guidelines set forth by leading public health organizations.

Learning Outcomes

At the end of this program, students will be able to:

- Utilize culturally appropriate communication skills to convey prevention and intervention strategies used to improve health outcomes among diverse local and global populations.
- Demonstrate an understanding of how research methods, biostatistical data and software, and the epidemiological approach impact the study of patterns of disease, disability, and injury.
- Evaluate biological, environmental, legal, and regulatory factors that affect the health of local and global communities.
- Evaluate the major social, behavioral, and cultural factors that affect the health of local and global populations.
- Appropriately access, interpret, and evaluate public health data that are available through the use of information technology.
- Analyze essential services, systems, public policies, and associated challenges that impact the health of local and global communities.
- Demonstrate skills needed for sound leadership and decision making in public health, including applications of ethics and professionalism.
- Apply health management and systems thinking to public health agencies, programs, policies, and issues.
- Apply the principles of program design, implementation, and evaluation to improve the health of local and global populations.
Exhibit a commitment to professional and ethically responsible public health research and practice.

Degree Requirements

**Note on Accreditation**

The Council on Education for Public Health (CEPH) Board of Councilors acted at its September 6, 2019, meeting to accredit the Master of Public Health (MPH) Program at Walden University for a five-year term, based on an application for accreditation submitted on February 3, 2018. On June 5, 2020, the CEPH Board of Councilors accredited the Doctor of Public Health (DrPH) at Walden University, after reviewing an
accreditation application submitted on April 21, 2020. CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and programs of public health. CEPH accreditation provides assurance that the program has been evaluated and met accepted public health profession standards in practice, research, and service. For a copy of the final self-study document and/or final accreditation report, please contact the dean of the School of Health Sciences (adchshealth@mail.waldenu.edu).

Note on Certification

The National Board of Public Health Examiners (NBPHE) offers the Certified in Public Health (CPH) credential as a voluntary core credential for public health professionals. As the eligibility criteria may change periodically, students should visit https://www.nbphe.org/eligibility for more information about certification in public health. It is the individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification. Walden makes no representations or guarantees that completion of Walden coursework or programs will permit an individual to obtain national certification or practice as a public health professional in the state where they intend to practice.

Master of Public Policy (MPP)

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.

Walden University’s Master of Public Policy (MPP) program will prepare students to work effectively within government agencies, governmental organizations, and the private sector. This includes the intersections of local, state, and federal systems and among socioeconomic sectors. Thus, it provides the ability to apply knowledge and skills practically that will impact society. The program comprises a core of contemporary theory and practice of policy creation, analysis, and implementation. With a unique blend of policy analysis and econometrics, the program will provide students with critical analytical skills essential for public policy professionals and organizational leaders. The MPP will attract leaders in public policy, and those aspiring to be leaders, in a wide variety of organizations which create, operate, analyze, or live by public policy.

Learning Outcomes

Upon completion of the Master of Public Policy, students will be able to:

- Explain how public policies are developed, approved, implemented, and evaluated.
- Apply major theories and concepts associated with the development of U.S. public policy and public administration.
- Apply a variety of data analysis methods in the study of public policy issues.
- Apply a variety of research and design methods in the study of public policy issues.
- Describe how to implement methods of organizational change and development while adhering to ethical standards of practice.
Design strategies for collaboration across the research, policy, and practice sectors to solve complex problems.

Specializations

MS in Emergency Management

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden's Time-to-Degree Completion policies.
The MS in Emergency Management program offers a comprehensive foundation on the history, organizational structure, systems, and concerns that shape the management of disasters and other emergencies. Topics include public safety issues; managing public safety organizations; applied research and evaluation methods; and strategies for assessing, mitigating, and responding to emergency situations. The curriculum features case studies that focus on recent disasters, offering an opportunity for students to build their critical-thinking skills and grow into the next generation of leaders in this relatively new, emerging profession. The program offers the opportunity to help prepare to earn certificates from the Federal Emergency Management Agency's (FEMA) Emergency Management Institute.

Learning Outcomes

At the end of this program, students will be able to:

- Analyze theoretical underpinnings of emergency management implemented in practice. (IV, V, VI)
- Evaluate the research designs used in the study of emergency management issues. (IV, V, VI, VII)
- Interpret research results related to emergency management. (II, IV, V, VI, VII)
- Analyze the emergency management cycle (mitigation, preparedness, response, and recovery) applied to urban and rural settings. (IV, V, VI)
- Appropriately utilize assessment tools used in emergency management to measure risk, vulnerability, resistance, and resilience in communities. (II, IV, V, VI, VII, IX)
- Evaluate response and recovery in emergency planning and their social change implications. (I, II, IV, V, VI, VII, IX)
- Evaluate key leadership concepts and theories used in effectively leading and managing emergency management operations and programs. (IV, V, VI, VII, VIII, IX)

(Roman numerals in parentheses indicate University Outcomes.)

**MS in Nonprofit Management and Leadership**

Nonprofit organizations employ a sizable and increasing share of the nation’s workforce, with employment growth outpacing a number of major industries. The MS in Nonprofit Management and Leadership blends academic theory with hands-on experience so students can learn, explore, and apply strategies related to the nonprofit sector. Students gain the management and organizational skills they need to lead diverse and complex nonprofit organizations and to serve as social change agents in local and global communities.

**Learning Outcomes**

At the end of this program, students will be able to:

- Apply theories, principles, and processes related to nonprofit organizations in a variety of settings.
- Apply ethical solutions and legal guidelines and practices in nonprofit organizations.
- Evaluate the performance of governing boards, staff, volunteers, and programs in nonprofit organizations.
- Apply best practices (concepts, principles, and processes) to budgeting, financial management, resource development, and strategic planning in nonprofit organizations.
- Evaluate best practice models related to developing, leading, and managing domestic and/or international nonprofit organizations.

**Specializations**

Specializations (Master's)

**Public Management and Leadership - MS in Emergency Management**

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden's Time-to-Degree Completion policies.

The MS in Emergency Management program with a specialization in Public Management and Leadership focuses on the multidisciplinary issues of preparedness, mitigation, response, and recovery in anticipating and rebuilding from disasters as they relate to public management. Students can study ways to coordinate and manage emergency situations, develop leadership skills for overseeing emergency programs, and explore the
technical demands of emergency situations. Topics include managing situations that deal with the uncertainty, the nature and methods of transformative change, and leadership strategies for influencing and shaping public policy. Students have an opportunity to apply strategic scenarios to create organizational change for a public organization of their choice. The curriculum can also help prepare students to earn certificates from the Federal Emergency Management Agency’s (FEMA) Emergency Management Institute.

Specialization Curriculum (15 cr.)

- MSEM 6390 - Strategic Context of Public Management and Leadership
- MSEM 6542 - Transformative Change in a Global Environment
- MSEM 6392 - The Language of Leadership

**Terrorism and Emergency Management - MS in Emergency Management**

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.
The MS in Emergency Management program with a specialization in Terrorism and Emergency Management focuses on the history, organizational systems, planning, and response associated with public crises, with an emphasis on terrorism. Students can explore and analyze terrorism and counterterrorism efforts, develop the critical-thinking skills required to address public crises, and study policies that pertain to domestic and international terrorism. Topics include terrorism and public health, bioterrorism, cyber terrorism, risk assessment, and the components of a systemic preparedness infrastructure. Students have an opportunity to analyze the U.S. Patriot Act and similar legislation and policies, and discuss their impact on U.S. constitutional freedoms. The curriculum can also help prepare students to earn certificates from the Federal Emergency Management Agency’s (FEMA) Emergency Management Institute.

Specialization Curriculum (15 cr.)

- MSEM 6320 - Public Policy Implications of Terrorism Legislation and Policies
- MSEM 6740 - Disaster, Crisis, and Trauma
- MSEM 6771 - Terrorism: A Systematic Approach for Emergency Preparedness

Doctoral Degree Programs

**Doctor of Public Administration (DPA)**

The DPA program is designed to prepare students to engage in and address the problems and challenges associated with the administration of public and nonprofit organizations in the U.S. and the world. Through their coursework, students explore the practice of public administration, management, and applied research in a global context, thereby enabling them to gain expertise in solving the complex problems that public organizations encounter. Graduates with a DPA degree are positioned for career opportunities in applied research, management, leadership, and the administration of public and nonprofit organizations; they can also pursue careers in consultancy with organizations that contract with public entities. Students in this program may choose from several specializations, including Geographic Information System (GIS) systems.

**Learning Outcomes**

Upon completion of the Doctor of Public Administration (DPA) program, students will be able to:

- Evaluate effective leadership/management principles (including theory, concepts, and practices) utilized in the public sector.
- Evaluate solutions to practical problems in public administration using evidence-based practices and research.
- Apply ethical concepts of public administration within organizations.
- Apply culturally sensitive public administration research to meet the needs of diverse populations at local, state, national, and international levels of government.
- Utilize analytic methods in making decisions related to public administration that contribute to positive social change.
- Engage in scientific inquiry to advance practice in the field of public administration.

**Specializations**

These previous Doctor of Public Administration (DPA) specializations are no longer accepting new students. Current students in these specializations must complete their programs of study in accordance with Walden's Time-to-Degree Completion policies. Changing specializations may increase a student's expected time-to-degree completion and cost.

- Criminal Justice
- Emergency Management
Geographic Information Systems (GIS)
Global Leadership
Health Policy
Homeland Security Policy and Coordination
International Nongovernmental Organizations (NGOs)
Law and Public Policy
Local Government Management for Sustainable Communities
Nonprofit Management and Leadership
Policy Analysis
Terrorism, Mediation, and Peace

Minimum Degree Requirements

Doctoral Writing Assessment
Professional Development Plan and Program of Study
Foundations course (3 cr.)
Core courses (40 cr.)
Research courses (10 cr.)
Completion of the Doctoral study
  Doctoral Study completion course (5 cr. per term for a minimum of four terms; taken continuously until completion of the doctoral study)
  Quarter Plans
  Two residencies

Quarter | Course | Credits
--- | --- | ---
5 | DDPA 8300 - Writing Applied Research and Funding Proposals | 5 cr.
6 | RSCH 8110 - Research Theory, Design, and Methods | 5 cr.
7+ | DDPA 8400 - Professional Administrative Study | 5 cr. per term for a minimum of 4 terms; taken continuously until completion and approved by CAO

*Students take this course for a minimum of four quarters and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**Doctoral Writing Assessment**

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

**8-Year Maximum Time Frame**
Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum timeframe, but an extension is not guaranteed.

**Doctor of Public Health (DrPH)**

The Doctor of Public Health (DrPH) degree prepares public health practitioners to assume positions of leadership and influence in practice-based settings. In this professional doctoral degree program, students explore public health challenges from both a domestic and global standpoint and how evidence-based research can be applied to advance public health goals. Through their coursework, students examine topics such as ethics, budgeting, critical analysis, and supervision, with an overarching emphasis on enhancing practical skills. Students in this multidisciplinary program have the opportunity to collaborate on assignments with students from other Walden College of Health Sciences and Public Policy programs.

**Learning Outcomes**

As a graduate of this program, students will be prepared to:

- Critically evaluate the interdisciplinary role of stakeholders in the application and evaluation of population-based public health strategies.
- Evaluate approaches to inform and influence public health interventions and strategies.
- Apply research methods in the investigation of public health problems.
- Critically evaluate evidence-based research, theories, and models used in public health.
- Apply systems-thinking skills and strategies for the promotion of public health policy and advocacy.
- Apply evidence-based research and practices to promote positive social change.
- Examine the application of economic theories in relation to public health systems across diverse community settings.
- Apply community health assessment techniques to identify, prioritize, and formulate solutions to community public health problems.
- Apply ethical principles in public health practice.

**Track 1 (For students who hold a Master of Public Health degree)**

**Minimum Degree Requirements**
For students who hold a Master of Public Health (MPH) degree, Track I allows them to forgo foundational public health courses and complete the program in a shorter amount of time.

* Students take this course for a minimum of three terms and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval. In general, students are continuously registered in the doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the doctoral study course shell.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred. Learn more about the doctoral study process in the Doctoral Study Guidebook.

**Doctoral Writing Assessment**

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

**Note on Accreditation**

The Council on Education for Public Health (CEPH) Board of Councilors acted at its September 6, 2019, meeting to accredit the Master of Public Health (MPH) Program at Walden University for a five-year term, based on an application for accreditation submitted on February 3, 2018. On June 5, 2020, the CEPH Board of Councilors accredited the Doctor of Public Health (DrPH) at Walden University, after reviewing an accreditation application submitted on April 21, 2020. CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and programs of public health. CEPH accreditation provides assurance that the program has been evaluated and met accepted public health profession standards in practice, research, and service. For a copy of the final self-study document and/or final accreditation report, please contact the dean of the School of Health Sciences (adchshealth@mail.waldenu.edu).

**Note on Certification**

The National Board of Public Health Examiners (NBPHE) offers the Certified in Public Health (CPH) credential as a voluntary core credential for public health professionals. As the eligibility criteria may change periodically, students should visit https://www.nbphe.org/eligibility for more information about certification in public health. It is the individual's responsibility to understand, evaluate, and comply with all requirements relating to national certification. Walden makes no representations or guarantees that completion of Walden coursework or programs will permit an individual to obtain national certification or practice as a public health professional in the state where they intend to practice.
8-Year Maximum Time Frame

In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell. Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements in the student handbook). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

PhD in Public Health

In the PhD in Public Health program focuses on seeking solutions to significant public health problems by applying and integrating knowledge into public health practice and research. Through the program, the development and demonstration of research and analytical skills are fostered to prepare students for careers in academia or in public and private organizations and institutions. Students may elect to specialize in either Community Health, Environmental and Occupational Health, or Epidemiology.

Learning Outcomes

At the end of the program, students will be able to:

- Apply ethical decision-making in public health research.
- Design public health research proposals that are evidence based and competitive.
- Critically evaluate scholarly literature in public health and related disciplines.
- Demonstrate leadership skills to facilitate evidence-based public health solutions.
- Conduct original public health research that has the ability to promote positive social change in diverse populations.
- Demonstrate appropriate communication skills necessary to deliver complex public health research and information to professional audiences.

Specializations

Changing specializations may increase a student's expected time-to-degree completion and cost.

- Community Health (Tracks I and II)
- Environmental and Occupational Health (Tracks I and II)
- Epidemiology (Tracks I and II)

Minimum Degree Requirements
Doctoral Writing Assessment

Foundation courses (5 cr.)

Core courses

Track I

Community Health: 43 cr.
Environmental and Occupational Health: 43 cr.
Epidemiology: 43 cr.

Track II

Community Health: 69 cr.
Environmental and Occupational Health: 69 cr.
Epidemiology: 69 cr.

Specialization courses

Track I

Community Health: 15 cr.
Environmental and Occupational Health: 15 cr.
Epidemiology: 15 cr.

Track II

Community Health: 15 cr.
Environmental and Occupational Health: 15 cr.
Epidemiology: 15 cr.

Dissertation Seminar (5 cr.)

Completion of Dissertation (15 cr. minimum)

Dissertation writing courses (continuous enrollment in 5 cr. per term for a minimum of 3 terms until completion)

Four PhD residencies

Curriculum

The PhD program has two tracks, providing different levels of foundational knowledge based on the students’ studies prior to entering the program. All students complete the same core and specialization curriculum.

Track I: Students who enter the program with a master’s degree in public health complete PHLT 8006/8011 - Foundations of Doctoral Success in Public Health followed by the program’s core and specialization courses.

Track II: Students who enter the program with a bachelor’s degree or with a graduate degree that is not in public health complete a set of foundational courses in the core competencies and practice of public health before they move on to the sequence of courses described for Track II, followed by the core and specialization courses.
Residency Requirements

PhD Residency 1 must be completed before taking RSCH 8110H.
PhD Residency 2 must be completed after RSCH 8110H and before PHLT 8068.
PhD Residency 3 must be completed after RSCH 8210H and before PHLT 9005.
PhD Residency 4 must be completed after after your prospectus is approved and PHLT 9005 is completed as:

- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR
- a dissertation intensive (DRWI 8500) during your 9000 course in the dissertation writing phase to progress toward completion and defense of the dissertation. Contact Student Success Advising to register. NOTE: Intensives are NOT included in Fast Track tuition.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

8-Year Maximum Time Frame

In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements in the student handbook). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

PhD in Public Policy and Administration (PPA)

The PhD in Public Policy and Administration program is designed to prepare students to address the challenges of governance and service delivery that exist both in the U.S. and around the world. Coursework explores public policy theory, research, and practice in a global context, enabling students to gain expertise in effective U.S. policy management and the ability to apply those insights to problems facing the world at large. The PhD in
Public Policy and Administration can position students for career opportunities in research, higher education, or administration in the private, public, or nonprofit sector. Students in this program may choose a specialization that fits their personal and/or career objectives.

Learning Outcomes

At the end of the program, students will be able to:

- Discuss leadership concepts and theories that have been used to effectively lead and manage in the public sector.
- Analyze evidence-based research, theories, and models used to promote participation in public and nonprofit policy processes.
- Develop solutions for problems related to public policy and public administration using theory and research.
- Ethically apply the major theories and concepts of public policy and public administration within organizations.
- Evaluate models and best practices utilizing diverse perspectives in local, state, national, and international public agencies by using evidence-based research.

Specializations

These previous PhD in Public Policy and Administration specializations are no longer accepting new students. Current students in these specializations must complete their programs of study in accordance with Walden's Time-to-Degree Completion policies.

- Criminal Justice
- Emergency Management
- Geographic Information Systems (GIS)
- Global Leadership
- Health Policy
- Homeland Security Policy and Coordination
- International Nongovernmental Organizations (NGOs)
- Law and Public Policy
- Local Government Management for Sustainable Communities
- Nonprofit Management and Leadership
- Policy Analysis
- Public Management and Leadership
- Terrorism, Mediation, and Peace

Minimum Degree Requirements
Doctoral Writing Assessment

Professional Development Plan and Program of study

Foundation course (3 cr.)
Core courses (25 cr.)
Research courses (20 cr.)
Completion of the Doctoral Capstone
  Doctoral support course (5 cr.)
  Dissertation writing courses (5 cr. per term for a minimum of four terms; taken continuously until completion)
Quarter Plans
Four residencies

Curriculum

Foundation Course (3 cr.)

  PPPA 8004 - Foundations in Doctoral Studies
  OR
  PPPA 8004I - Foundations in Doctoral Studies

Core Courses (25 cr.)

  PPPA 8104 - Intellectual Traditions and Theoretical Foundations of Public Policy and Administration
  PPPA 8111 - Leadership and Organizational Change
  PPPA 8112 - Governance and Public Policy
  PPPA 8405 - Ethics and Social Justice
  PPPA 8431 - Finance and Budgeting for the Public Sector

Foundation Research Sequence (15 cr.)

Courses composing the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8110 must be completed prior to Residency 2 of the academic residencies. RSCH 8210 and RSCH 8310 must be completed prior to beginning the dissertation or attending Residency 3.

  RSCH 8110 - Research Theory, Design, and Methods
  RSCH 8210 - Quantitative Reasoning and Analysis
  RSCH 8310 - Qualitative Reasoning and Analysis

Advanced Research Course (5 cr.)
All PhD students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

- RSCCH 8260 - Advanced Quantitative Reasoning and Analysis
- RSCCH 8360 - Advanced Qualitative Reasoning and Analysis
- RSCCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Residency Requirements

Complete Residency 1 as soon as you begin your program; should be completed in Term 1 or Term 2.

Complete Residency 2 within 18 months of your start date or linked to your registration for or completion of your first research course.

Complete Residency 3 by the end of your third year.

Complete residency 4 after your prospectus is approved as follows:

- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR

an approved professional conference (RESI 8900 for select programs only.

Contact Advising for information.) OR

a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. **NOTE:** Intensive Retreats are **NOT** included in Fast Track tuition.

Optional: Complete a PhD dissertation intensive (DRWI 8500) during your dissertation. Contact Student Success Advising to register.

Completion of the Doctoral Capstone

**PPPA 8115 - Writing a Quality Prospectus**

**PPPA 9000 - Dissertation**

Students take this course for a minimum of four terms and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval. Most Walden students who complete their dissertation/doctoral study take more than 2 years to do so.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense
stage; and gain final approval by the chief academic officer. Students must also publish their
dissertation on ProQuest before their degree is conferred. Learn more about the dissertation
process in the Dissertation Guidebook. In general, students are continuously registered in the
dissertation course until they complete an approved dissertation, which usually requires more than
the minimum terms in the dissertation course shell.

*Students take this course for a minimum of four terms and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In
general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Master of Philosophy (Embedded Degree)

Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:
   All required PhD core courses (or KAMs)
   All required PhD specialization courses (or KAMs)
   All required doctoral research and advanced research courses
   Program prospectus development course
   Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.

The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

8-Year Maximum Time Frame
Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.
College of Management and Human Potential

Undergraduate Certificate Programs

Undergraduate Certificate in Data Science

The Data Science certificate features a sequence of five courses totaling 25 credits. This valuable credential attests to specialized knowledge and skills that can be applied immediately across many industries that use data to make business decisions. The data science courses associated with this certificate were developed in partnership with IBM.

Note: This certificate is currently not available as a standalone offering. Students may complete the certificate requirements by way of program concentration or elective courses to earn this credential as a part of their undergraduate degree program.

Certificate Requirements

- 25 total quarter credits
- 2.5 quarters (7 months) to complete

Curriculum

- DSCI 2010 - Data Science Essentials
- DSCI 2020 - Storytelling With Data: Visualization and Communication
- DSCI 3030 - Data Mining and Analysis
- DSCI 3040 - Advanced Data Science Tools and Techniques
- STAT 3401 - Statistics for Data Analytics

### Bachelor's Degree Programs

**BS in Accounting**

This program is not currently accepting new students.

Students in the BS in Accounting program are provided with a comprehensive professional accounting knowledge base mapped to American Institute of Certified Public Accountants (AICPA) competencies in functional accounting and professional and ethical standards. In today's diverse, global, and technologically sophisticated accounting environment, these competencies are highly sought by employers. Through this program, students gain a practical knowledge of the principles, theories, concepts, and professional practices used in today's global accounting environment.

In core courses, students learn about professional accounting products, master the intricacies of developing those products, and explore how to interpret financial information to support business and organizational decision making. Students also master the digitization of accounting data and the technology that support international financial reporting.

Students can choose the Public Accountancy concentration or the General Program and then focus on gaining the knowledge required to become certified public accountants (CPAs)* or prepare for other professional certifications. By combining a solid foundation in accounting principles with the flexibility to choose career-focused coursework, the BS in Accounting program ensures students gain professionally relevant skills that can be directly applied in the working world.

The program is results-oriented and extends beyond theories and conceptual understanding to practical application. Learning outcomes are achieved through coursework completed in specific area requirements for general education, as well as through both lower- and upper-division content courses.

*Quarter 1 courses may need to be taken in reverse order, depending on availability.

**If completing certificate requirements within a Walden undergraduate degree, the following courses may fulfill the STAT 3401 requirement: PSYC 3002, STAT 2001, STAT 2002, or STAT 3001.
The BS in Accounting program provides students with a comprehensive understanding of accounting principles and practices, combining functional skills with a larger perspective of accounting’s role in business.

At the end of this program, students will:

- Apply problem-solving skills to multiple accounting situations, including those occurring in the international setting.
- Communicate effectively about accounting and business practices within the context of larger organizational frameworks.
- Access relevant accounting/financial guidance and apply it in their accounting practice.
- Demonstrate well-developed competency in their accounting techniques.
- Demonstrate collaborative skills across accounting and functional business areas.
- Analyze sources of organizational risk.
- Apply knowledge of the legal and regulatory environment in which the accounting profession operates.
- Apply ethical reasoning in their accounting practices.

Concentrations

- General Program
- Public Accountancy

Degree Requirements

181 total quarter credits
- General education courses (45 cr.)
- Core courses (106 cr.)
- Concentration courses (0–20 cr., depending on concentration)
- Electives (5–25 cr., depending on concentration)
- Capstone course (5 cr.)

Curriculum

General Education Courses (45 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options.
Students should consult their student success advisor if they have questions about individual program requirements.

Core Courses (106 cr.)

- LDRS 1001 - Personal and Organizational Leadership
- ACCT 1004 - Fundamentals of Accounting
- ACCT 2002 - Managerial Accounting: Introduction to Financial Planning and Analysis
- ACCT 2004 - Financial Accounting
- ACCT 3001 - Intermediate Accounting I
- ACCT 3002 - Auditing and Internal Controls
- ACCT 3003 - Intermediate Accounting II
- ACCT 3004 - Intermediate Accounting III
- ACCT 3005 - Intermediate Accounting IV
- ACCT 3006 - Accounting Information Systems
- ACCT 4001 - Government and Nonprofit Accounting
- ACCT 4002 - Advanced Financial Accounting I
- ACCT 4005 - Federal Taxation I: Individual Taxation
- BUSI 1002 - Introduction to Management
- BUSI 2001 - Business Law
- BUSI 3002 - Ethical Leadership
- COMM 4101 - Organizational Communication
- ECON 1002 - Microeconomics
- FNCE 3001 - Financial Management
- MRKT 3001 - Marketing
- STAT 2002 - Business Statistics

Concentration Courses (0–20 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (5–25 cr.)

Electives are dependent upon the particular concentration. Please see the elective requirements on each concentration page.

Capstone Course (5 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Accreditation
Walden’s BS in Accounting program is accredited by ACBSP and has earned the organization's Specialized Accounting Accreditation. ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

Note on Licensure

Most states require individuals to complete 150 semester (225 quarter) hours in certain subject areas in order to be eligible to sit for the Certified Public Accountant (CPA) exam and/or obtain a CPA license. Walden's accounting programs can help graduates progress toward meeting those requirements. The BS in Accounting offers 120 quarter (80 semester) credit hours that include upper-level courses in topics such as financial accounting, auditing, taxation, and management accounting. The MS in Accounting program offers 30 semester (45 quarter) credit hours, while the MBA Accounting specialization offers nine semester (13.5 quarter) credit hours. These programs include graduate courses in topics such as financial accounting, managerial accounting, and legal and ethical accounting practices. This will require students to complete additional coursework to meet state requirements.

In each state, there are specific policies that must be followed when an individual is seeking to become a licensed accountant. Some states will not allow individuals who complete the Walden accounting programs to sit for the CPA licensing exams due to state-specific issues such as professional accreditation or face-to-face instruction. For information on the educational requirements for your state, refer to the state's Board of Accountancy or related agency.

Walden enrollment specialists can provide guidance about accountant licensure; however, it remains the responsibility of the individual enrolling in the program to read, understand, and comply with the licensure requirements in the state where he or she resides. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

Walden University can make no representation, warranty, guarantee, or commitment that successful completion of a Walden program, or coursework for credit within a program, will make a graduate eligible to sit for a licensure exam or to obtain state licensure.

BS in Business Administration

The BS in Business Administration program equips students with an array of highly marketable skills, preparing them for key roles across all types and sizes of business organizations.
Students can choose from nine concentrations, each designed to meet the real demands of today's job marketplace. This program emphasizes collaboration and international application of business practices. Students can interact and network with esteemed faculty who are active business leaders and practitioners from a wide range of industries.

Note: The BS in Business Administration program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

Learning Outcomes

At the end of this program, students will be able to:

Demonstrate proficiency in the fundamental business principles and practices that enable firms to operate in both domestic and global environments.
Employ critical-thinking and analysis skills to solve business problems in a real-world context.
Analyze ethical issues that impact business decisions from economic, political, legal, and social perspectives.
Describe the ways in which diversity influences a company's ability to achieve its goals.
Evaluate the application of technology as a strategy for competitive advantage in business.
Conduct basic research using scholarly sources to acquire new knowledge in the business domain.

For more data on BS in Business Administration Learning Outcomes and results of the Student Satisfaction Surveys, see the CMT Data Page.

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their BS in Business Administration through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the BS in Business Administration (Competency Based) page for program details.

BUSI 4900 - Capstone: Strategic Business Management

Accreditation

Walden University’s BS in Business Administration program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

BS in Business Administration (Competency Based)

Tempo Learning® is Walden’s competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

Concentrations

Accelerate Into Master’s (AIM)

Capstone competency (5 cr.)

Curriculum

General Education Courses (45 cr.)

See the general education section of this *Walden University Catalog*.

Note: A minimum of 60 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.

Core Competencies (61 cr.)

**ACCT 1004 - Fundamentals of Accounting**

**FA1001 The Role of Accounting and Financial Information in Business and Society**
   Identify the authoritative and rule-making process of accounting.

**FA1002 The Accounting Cycle: Original Entries to Post-Closing Trial Balance**
   Apply the accounting process to basic financial statements.

**FA1003 Financial Statement and Quality Information Assessment**
   Evaluate the quality of information reported in financial statements.

**BUSI 1002 - Introduction to Management**

**MA1001 The Role of Managers and Leaders**
   Describe the effects of managerial and leadership roles and approaches on employees and on diverse organizations.

**MA1002 Decision Making and Motivation**
   Explain techniques, tools, and methods of managerial decision making and employee motivation.

**MA1003 Ethical Leadership and Management**
   Identify the impact of ethics on managerial practices in a diverse organization.

**BUSI 2001 - Business Law**
BU2001 Foundations of the Law, Court Systems, and Procedures
Explain the foundations of law and court systems in a business context.

BU2002 Types of Business Law
Apply business law and legal research to business practices, including social change initiatives.

BU2003 Legal Structures in Business
Apply concepts regarding types of legal structures to business scenarios.

BUSI 3010 - Operations Management

OP3001 Operations, Supply Chain, and Cross-Functional Decision Making
Illustrate supply chain and operations management concepts and practices in organizations.

OP3002 Product Flow and Product-Process Strategy
Employ product flow processes and product-process strategies for an organization.

OP3003 Lean Thinking and Lean Systems in Operations
Explain the impact of lean systems on organizational culture, sustainability, and positive social change.

OP3004 Quality Management
Analyze criteria for quality management practices and product/service quality.

DSCI 2010 - Data Science Essentials

DS2001 Data Science in the Business World
Explain the role of data science in business and organizational contexts.

DS2002 Using Data Science Frameworks to Solve Business Problems
Apply a data science framework to a business problem.

DS2003 Ethics and Security in Data Science
Describe ethical and security practices for data scientists.

ECON 1002 - Microeconomics

MS1001 Economic Decision Making
Apply basic economic principles to decision making.

MS1002 Supply and Demand
Explain the foundations and determinants of supply and demand models and the price adjustment mechanism that allows markets to reach equilibrium.

MS1003 Industry Structure and Strategy
Explain industry structure and competitive dynamics affecting firm behavior and profitability.

MS1004 Role of Government and Global Markets
Explain the effects of globalization and government policies on business operations and strategy.
FNCE 3001 - Financial Management

FN3001 Understanding Financial Management and Financial Statements
Relate the importance of financial markets and financial results to ethical business practices.

FN3002 Time Value of Money and Capital Budgeting
Apply time value of money and capital budgeting methods to financial problems.

FN3003 Stocks and Bonds
Explain features of stocks and bonds and their value within the financial marketplace.

FN3004 Investment Returns and Risk Premiums
Explain arithmetic returns, geometric returns, and their relationship to risk premiums.

HRMG 3001 - Human Resource Management

RA3001 Human Resource as a Strategic Partner
Explain the role of the human resources function as a strategic business partner in organizations.

RA3002 Equal Employment Opportunity Practices and Policies
Analyze human resources practices that impact equal employment opportunities.

RA3003 Human Resources and Talent Management Leadership Functions and Performance
Illustrate human resource tools, methods, and strategies for managing the talent pipeline in a changing organization.

RA3004 Human Resources as a Social Change Agent
Explain the role of human resources in creating positive social change.

ISYS 3001 - Information Systems in Enterprise

IS3001 Information Technology (IT) and the Organization
Identify aspects of information technology and their functions in organizations.

IS3002 Major E-Commerce Business Models
Analyze major e-commerce business models and key components of their information technology infrastructure.

IS3003 Technological Trends
Analyze emerging trends and technologies that enable innovation.

IS3004 Societal Impact of Information Systems
Analyze the impact of ethical and security-related IT practices on society.

IS3005 Organizational Competitiveness and IT
Analyze an organization’s competitiveness within its industry.

LDRS 1001 - Personal and Organizational Leadership
PO1001 Personal Leadership Development
Analyze personal leadership and personal responsibility in leadership development.

PO1002 Team and Organizational Development
Explain the importance of leadership in developing teams and organizations.

PO1003 Ethical Leadership, Social Responsibility, and Positive Social Change
Apply ethical and socially responsible leadership practices to promote positive social change.

MRKT 3001 - Marketing
MK3001 The Role of Marketing
Analyze the role of marketing in building and establishing relationships with users of products and services.

MK3002 Situational and SWOT Analyses
Analyze the attractiveness of a market opportunity for an organization.

MK3003 Markets and Market Development: The Four Ps
Identify best practices related to marketing mix variables for a new product or service across product life.

MK3004 Analyzing the Effectiveness of Marketing
Analyze the effectiveness of digital marketing, sustainability, and social responsibility strategies for an organization.

STAT 2002 - Business Statistics
BS2001 Probability Theory
Use probability theory to predict outcomes.

BS2002 Statistical Analysis in Decision Making
Analyze descriptive statistics and inferential statistical techniques to make business decisions.

BS2003 Statistical Process Control in Decision Making
Explain the use of statistical process control in business decision making.

Electives (70 cr.)

Students are to select 14 additional courses to fulfill the elective requirement. Students may choose courses from either general education courses, BS in Business Administration courses, or courses from any of Walden’s bachelor’s degree programs. At least 30 credits must be at the 3000 level or higher. Individual course prerequisites apply.

Capstone Competency (5 cr.)
BUSI 4900 - Capstone: Strategic Business Management
SB4001 Global Business Strategy Development and Execution
Synthesize multidisciplinary strategic approaches for building sustainable competitive advantage in a global environment.

Note on Curriculum

In an effort to ensure competencies are kept up to date and relevant to meet the learning outcomes of the program, the number and subject matter of individual competencies needed to satisfy program course requirements may change. However, program outcomes and the number and subject matter of courses will not be impacted. As a result, the required competencies listed in a student’s individual learning plan may differ from what is currently listed in the catalog.

BS in Business Communication

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.

Students in the BS in Business Communication program are prepared to meet the growing demand for professionals who can create effective business strategies and communicate them effectively to colleagues, customers, and other key audiences. Through a multidisciplinary curriculum, students learn strategic communication skills while exploring the fundamentals of business and the dynamics of organizations. Topics in this program include social media; interpersonal, oral, and written communications; emerging media and new technologies; human resources; leadership; and organizational management.

Learning Outcomes

Graduates of the program will be prepared to:

- Use fundamental business principles and practices to solve business problems in a real-world context.
- Demonstrate an awareness of their own values, dispositions, and communication styles through their personal and professional communication.
- Apply technology to enable digital communication in professional settings.
- Demonstrate economic, political, legal, ethical, and socially aware strategies in their communications with both local and global audiences.
- Utilize a systems perspective to optimize organizational, community, and global communication.
- Employ critical-thinking skills in selecting communication strategies that are appropriate considering the diversity of the audience.
- Examine communication strategies necessary to promote social change.
Degree Requirements

181 total quarter credits
General education courses (46 cr.)
Core courses (60 cr.)
Elective courses (70 cr.)
Capstone course (5 cr.)

Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.

Core Courses (60 cr.)

BUSI 1002 - Introduction to Management
HRMG 3001 - Human Resource Management
MRKT 3001 - Marketing
COMM 3001 - Applied Interpersonal Communication
COMM 2003 - Writing for the Digital Age
MEDC 3001 - Communicating Through Media and Technology
PREL 3001 - Principles of Public Relations
COMM 4101 - Organizational Communication
PREL 4103 - Crisis Communications
MRKT 4511 - Marketing Communications
COMM 4001 - Intercultural Communication
MRKT 4512 - International Marketing Communications

Electives (70 cr.)

Students are to select 14 additional courses to fulfill the elective requirement. Students may choose courses from either general education courses, BS in Business Communication concentration courses, BS in Business Administration courses, courses from any of Walden’s bachelor’s degree programs, or Accelerate Into Master’s (AIM) courses. Individual course prerequisites apply. These elective credits are in addition to the five-credit general education elective.
Note on Minors: Electives can also be used to complete a six-course minor.

Capstone Course (5 cr.)

COMM 4901 - Communication Capstone

Note on Accreditation

At the bachelor’s level, Walden University’s BS in Business Administration and BS in Accounting are the only programs accredited by the Accreditation Council for Business Schools and Programs (ACBSP). The BS in Business Communication is not accredited by the ACBSP. Please visit our Accreditation page to see the list of Walden accreditations.

BS in Computer Information Systems

This program is not currently accepting new students.

The BS in Computer Information Systems addresses a growing need in the marketplace for professionals who can bridge the gap between information technology and the organizations and people who depend upon it.

Graduates of the BS in Computer Information Systems program will have a cross-disciplinary set of skills and knowledge that will allow them to work with business and other stakeholders to define information processing needs. They will be able to map those requirements onto the building blocks provided by an ever-changing set of technologies. They also will have a strong set of process skills enabling them to carry out these tasks in a reliable and collaborative fashion.

On top of a core set of business and information systems skills, each BS in Computer Information Systems student will gain more specialized skills in a variety of areas. Concentration options focus on the positive impact information systems can have on people and society, in areas such as security, usability, and collaboration.

Learning Outcomes

At the end of this program, students will be able to:

- Apply the fundamental concepts of computing and mathematics to organizational and societal priorities.
- Apply business and system analysis methods to identify and define the computing requirements of organizations.
Design, implement, and evaluate a computer-based system or program that meets the needs of organizational stakeholders.

Work collaboratively with others to implement new process and systems in an organization.

Demonstrate knowledge of the ethical, legal, security, and social dimensions of their work.

Communicate effectively with information system stakeholders.

Analyze the impact of information system solutions on individuals, organizations, and global society.

Create a professional development plan based on recognition of its need and value.

Apply current techniques and tools to manage information systems projects.

Demonstrate knowledge of processes that support the delivery and management of information systems within a business environment.

Program Educational Objectives (PEOs)

Develop information systems solutions to meet the needs of employers and communities in a global society.

Collaborate effectively with a variety of stakeholders to meet user needs.

Be employed in progressively more responsible positions in the information systems field.

Demonstrate ethical behavior as information system professionals.

Demonstrate sensitivity to the impact of technology on the individual, the organization, and society as an information system professional.

Maintain up-to-date knowledge in the world of information systems and information systems-related business practices.

Concentrations

General Program
Cyber Security for Information Systems
Information Systems Management
Web and Mobile Applications Design

Degree Requirements

181 total quarter credits
General education (45 cr.)
Core courses (61 cr.)
Concentration courses (5–25 cr., depending on concentration)
Elective courses (45–65 cr., depending on concentration)
Capstone course (5 cr.)

Curriculum

General Education Courses (45 cr.)

See the general education section of this *Walden University Catalog*.

Note: A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.

Core Courses (61 cr.)

Business Courses (31 cr.)

- LDRS 1001 - Personal and Organizational Leadership
- ACCT 1004 - Fundamentals of Accounting
- BUSI 1002 - Introduction to Management
- BUSI 3010 - Operations Management
- ISYS 3001 - Information Systems in Enterprise
- STAT 3001 - Statistical Methods and Applications

Computer Information Systems Courses (30 cr.)

- CMIS 2001 - Internet Computing
- ITEC 1005 - The Profession and Practice of Information Technology
- ITEC 2040 - Systems Analysis
- ITEC 2050 - Systems Design
- ITEC 2060 - Database Management Systems
- ITEC 2055 - Technical Problem-Solving and Project Management

Concentration Courses (5–25 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (45–65 cr.)

Students are to select 9–13 additional courses, depending on whether they select the General Program option or a concentration, to fulfill the elective requirement. Students
may choose courses from either general education courses, BS in Computer Information Systems concentration courses, courses from any of Walden's bachelor's degree programs, or Accelerate Into Master's (AIM) courses. Individual course prerequisites apply. Each concentration has a minimum number of elective courses that must be taken at the upper level. See individual concentration pages for more information.

Note on Minors: Electives can also be used to complete a six-course minor.

Capstone Course (5 cr.)

CMIS 4999 - IS Capstone Project

BS in Healthcare Management

The BS in Healthcare Management prepares students to effectively direct, manage, and evaluate health services, organizations, and programs within a variety of settings, such as hospitals, clinics, nursing and retirement communities, physician's offices, corporations, and nonprofit organizations. Students gain skills and competencies necessary to effectively lead healthcare organizations in the 21st century and to improve the quality, safety, and delivery of health services. Because of the evolving U.S. health system, the aging population, and the projected shortage of healthcare professionals, there is a growing need for healthcare administrators. Demand and opportunity for those with even bachelor's-level training will crescendo over the next decade.

Note: The BS in Healthcare Management program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

Learning Outcomes

Roman numerals in parentheses at the end of each learning outcome indicate alignment to the Walden University outcomes.

At the end of this program, students will be able to:

- Critically appraise the context and quality of health care delivery inside and outside of the United States. (I, IV, V, VI, VIII, IX)
- Evaluate health-related research and research methods. (V, VI)
- Analyze how population health impacts health care (including behavioral, demographic, and cultural factors). (IV, V, VI)
- Explain how different factors impact the delivery of healthcare services (including technology, legal, and ethical factors). (IV, V, VII)
Evaluate the inter-professional approach to health care delivery. (II, VIII)
Articulate critical issues in acute and long-term care from the perspective of patient and practitioner. (IV, V, VI, VII, VIII, IX)
Analyze evidence based factors that impact a health care organization's performance, quality, and safety. (II, IV, V, VI)
Apply foundational healthcare economic evaluation and financial management skills. (II, IV, V, VI)
Apply strategic planning methods to healthcare organizations (including planning, implementing, and marketing). (II, III, IV, V, VI)
Evaluate human resource methods of managing healthcare employees. (II, IV, V, VI, VII, IX)
Demonstrate an understanding of healthcare financial issues (including insurance, reimbursement, and prospective payment). (II, IV, V, VI)

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their BS in Healthcare Management through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the BS in Healthcare Management (Competency Based) page for program details.

Course-Based Program

Degree Requirements

181 total quarter credits
General Education courses (46 cr.)
Core courses (85 cr.)
Elective courses (45 cr.)
Capstone course (5 cr.)

Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 60 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000- or 4000-level courses as either general education or elective options.
Students should consult their student success advisor if they have questions about individual program requirements.

First Term Course (6 cr.)

HMNT 1001 - Living and Learning in the Technological World

Core Courses (85 cr.)

ACCT 1004 - Fundamentals of Accounting
HLTH 1000 - Concepts of Health Promotion
HLTH 1005 - Context of Healthcare Delivery
OR
MMHA 5050 - U.S. Healthcare Delivery System

HLTH 2110 - Behavioral and Cultural Issues in Healthcare
HLTH 2120 - Health Informatics
HLTH 3100 - Ethical and Legal Issues in Healthcare
OR
MMHA 5300 - Law, Ethics, and Policy in Healthcare Administration

HLTH 3105 - Interprofessional Teamwork in Healthcare
HLTH 3110 - Current Issues in Healthcare Policy and Practice
HLTH 3510 - Health Insurance and Reimbursement
HLTH 4000 - Introduction to Healthcare Management
HLTH 4100 - Healthcare Organization Theory and Behavior
HLTH 4110 - Healthcare Quality and Safety
OR
MMHA 5900 - Healthcare Quality Management

HLTH 4115 - Strategic Planning and Marketing in Healthcare
HLTH 4121 - Human Resource Management in Healthcare
OR
MMHA 5500 - Human Resource Management and Organizational Development and Leadership for Healthcare Administrators

HLTH 4205 - Introduction to Research Methods and Analysis
HLTH 4520 - Healthcare Finance
HLTH 4530 - Healthcare Economics From a Population Health Perspective

Electives (45 cr.)

Choose eight courses from general education, BS in Health Studies, or other Walden bachelor’s degree programs. Elective credits should total 45 to meet the program requirements. Students may also be eligible to transfer previous credit to meet their elective requirements.

Note on Minors: Electives can also be used to complete a six-course minor.
Note: RN-BSN courses are not available to students outside the RN-BSN program.

Capstone Course (5 cr.)

HLTH 4900 - Capstone

BS in Information Technology

This program is not currently accepting new students.

The BS in Information Technology (IT) program integrates expertise in the information technology and business fields. It is designed to help students form a solid foundation for long-term career growth and success in today’s global, IT-driven environment.

This degree program will help equip students with the technical skills they need to succeed in the field, while providing a strong understanding of key managerial and organizational concepts.

Through hands-on lab activities, students will have the opportunity to collaborate with cross-functional teams and problem-solve real-world challenges. Students will also gain the added advantage of joining Walden’s diverse learning community—an experience that helps uniquely position them to work in the multicultural, interdisciplinary teams typical of today’s global, IT-driven economy.

Learning Outcomes

At the end of this program, students will be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Identify and analyze user needs and to take them into account in the selection, creation, integration, evaluation, and administration of computing-based systems.
- Evaluate the positive social change impacts of information technology on individuals, organizations, and society.

Program Educational Objectives (PEOs)
Develop IT solutions to meet the needs of employers and communities in a global society.
Implement IT projects to satisfy business needs within time, budget, and quality constraints.
Collaborate effectively with a variety of stakeholders to meet user needs.
Be employed in progressively more responsible positions in the IT field.
Demonstrate ethical behavior as IT professionals.
Demonstrate sensitivity to the impact of technology on the individual, the organization, and society as an IT professional.
Maintain up-to-date knowledge in the world of IT and IT-related business practice.

Concentrations

Students must complete one of the following concentrations. For each concentration, all listed courses are required for the concentration.

- Cybersecurity
- Database Administration
- Network Administration
- Web and Mobile Applications Development
- Self-Designed

Degree Requirements

- 181 total quarter credits
- General education courses (45 cr.)
- Core courses (96 cr.)
- Concentration courses (20 cr.)
- Elective courses (15 cr.)
- Capstone courses (5 cr.)

Curriculum

General Education Courses (45 cr.)

See the general education section of this *Walden University Catalog*.

*Note:* A minimum of 55 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.
Core Courses (96 cr.)

- LDRS 1001 - Personal and Organizational Leadership
- ITEC 1005 - The Profession and Practice of Information Technology
- ITEC 1015 - Introduction to Computer Systems
- ITEC 1020 - Networking Fundamentals
- ITEC 1030 - Introduction to Programming
- ITEC 2010 - Data Structures
- ITEC 2030 - Platform Technologies and Operating Systems
- ITEC 2040 - Systems Analysis
- ITEC 2050 - Systems Design
- ITEC 2055 - Technical Problem-Solving and Project Management
- ITEC 2025 - Discrete Structures
- ITEC 2060 - Database Management Systems
- ITEC 2070 - User Experience Design
- ITEC 2080 - Web Programming
- ITEC 3010 - Web and Mobile Technologies
- ITEC 3020 - Information Assurance and Security
- ITEC 4010 - Network Administration
- ITEC 4030 - Systems Integration
- STAT 3401 - Statistics for Data Analytics

Concentration Courses (20 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (15 cr.)

Students are to select three additional courses to fulfill the elective requirement. Students may choose courses from either general education courses, BS in Information Technology concentration courses, courses from any of Walden's bachelor's degree programs, or Accelerate Into Master's (AIM) courses. Individual course prerequisites apply. These 15 credits of electives are in addition to the 5-credit general education elective.

Note on Minors: Electives can also be used to complete a six-course minor. Although this program requires fewer than six elective courses, students have the option to complete a minor and graduate with more than the required number of credits for this program.

Capstone Courses (5 cr.)

- ITEC 4999 - IT Capstone Project

Accreditation
Walden's BS in Information Technology program is accredited by the Computing Accreditation Commission of ABET, https://www.abet.org/. ABET is the internationally recognized accreditor for college and university programs in applied science, computing, engineering, and engineering technology. This accreditation reaffirms the quality of Walden’s technology and applied science programs and support services, as well as its commitment to continuous assessment and improvement.

Program of Distinction

As a further mark of quality, Walden University has been designated by the National Security Agency (NSA) and the Department of Homeland Security (DHS) as a National Center of Academic Excellence in Cyber Defense Education for the BS in Information Technology Cybersecurity concentration.

For cybersecurity resources, please visit our Center for Cybersecurity Education.

Other Undergraduate Options

**Accelerate Into Master's (AIM)**

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for undergraduate students to accelerate time to the completion of a master’s degree. This option, called Accelerate Into Master’s (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master’s program.

When undergraduate students attempt a 5000-level course, they may earn a "C" in the graduate-level course but only a grade of "B" or better will carry over to the graduate program. Students who receive a "C" grade will be awarded a grade of "C,”* which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not pass their AIM class are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must take that course as a master's student.

Requirements

Walden University offers several opportunities for undergraduate students in certain programs to accelerate time to completion in certain master’s degree programs.

Individual programs may determine the specific eligible AIM courses and some programs may limit the number of courses available. Generally, AIM coursework should not account for more than approximately 50% of the credits needed for master's degree completion. Practicum or Capstone requirements for the master's program are not eligible to be satisfied by AIM coursework.
To be eligible to begin AIM courses, students must:

a. Have an overall GPA equal to that required for admission to the associated master's degree. BS AIM track students must maintain a 2.5 GPA and have a transfer GPA of at least 2.5 (if transferring credits).

b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.) BS in Psychology AIM track students do not need to meet this requirement.

c. Be in good financial standing.

d. Not have any incompletes.

AIM courses are (5000-level) graduate courses.

a. Tuition for these courses is charged at the undergraduate rate for the course-based learning format. For Tempo Learning® these courses are included in the program's subscription cost.

b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.

c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA only.

Students must get a "B" or better in each course to have that course applied to the master's program.

Students who do not earn a grade of "C" or better will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must take that course as a master's student. BS in Psychology AIM track students may retake an AIM course a second time if they failed the first time; they must earn a grade of "C" or better the second time in order to stay in the AIM track program.

Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program. Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

Upon completion of the undergraduate program requirements, students should file an Intent to Graduate Form.
Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master’s program. Upon admission to the master’s program, all AIM graduate courses completed with a "B" or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

Undergraduate students may complete AIM courses to fulfill elective credits, as course substitutions approved by the program director, or they may elect a second concentration within their program of study that is designed for AIM completion. Students are encouraged to consult with Student Success Advising (if in the course-based learning format) or their Academic Coaching (if in the Tempo Learning® format) on the most appropriate plan for their program and academic goals, such as their future master's program and time to completion.

*Note: Graduate students cannot register for AIM courses.

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

Minor in Healthcare Management

The Undergraduate Minor in Healthcare Management is for the non-health sciences major student interested in improving the quality, safety, and delivery of health services. Because of the evolving U.S. health system, the aging population, and the projected shortage of healthcare professionals, there is a growing need for healthcare administrators.

Note: This minor is not available to students in the BS in Health Studies, BS in Public Health, or the BS in Healthcare Management programs.

Required Courses (30 cr.)

- HLTH 1005 - Context of Healthcare Delivery
- HLTH 4000 - Introduction to Healthcare Management
- HLTH 4115 - Strategic Planning and Marketing in Healthcare
- HLTH 4120 - Managing the Healthcare Workforce

And students choose two of the following:

- HLTH 2120 - Health Informatics
- HLTH 3100 - Ethical and Legal Issues in Healthcare
- HLTH 3110 - Current Issues in Healthcare Policy and Practice
- HLTH 4100 - Healthcare Organization Theory and Behavior
- HLTH 4105 - Healthcare Finance and Economics
- HLTH 4110 - Healthcare Quality and Safety

Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses.
with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their student success advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Communication
- Minor in Criminal Justice
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Healthcare Management
- Minor in Introductory Instructional Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health

Graduate Certificate Programs

**Graduate Certificate in Advanced Cyber Security**

This program is not currently accepting new students.

This graduate certificate program is designed to prepare current IT professionals to remediate critical security risks, including ransomware and other cybercrimes, and implement mitigating controls for a secure and protected environment. Through hands-on, interactive coursework, students have the opportunity to

- Explore current and emerging information security threats.
- Design tests to probe system penetrability in your technology, networks, and physical environments.
- Evaluate application of laws and regulations to IT.
- Develop incident response, security plans, and security awareness programs.

The Graduate Certificate in Advanced Cyber Security is part of Walden’s information technology program offerings. Walden is designated by the National Security Agency (NSA) and the Department of Homeland Security (DHS) as a National Center of Academic Excellence in Cyber Defense Education through the year 2019.

**Certificate Requirements**

- 9 semester credits
- 1.5 semesters (6 months) to complete

**Curriculum**
ITEC 6620 - Information and Systems Security
ITEC 6630 - Computer Law, Crime, and Investigation
ITEC 6640 - Topics in High-Assurance Computing

Graduate Certificate in Advanced Project Management

This program is not currently accepting new students.

Project Management Certificates

Walden University’s project management certificate programs are geared toward students who want to learn the foundational skills for this field or those who want to build upon their existing senior-level experience to advance their career in project management. Each program positions students to take the Project Management Professional (PMP)® exam® from the Project Management Institute (PMI)®. Students who are already PMP-certified and are seeking recertification earn Professional Development Units (PDUs) that can be applied toward the 60 credits needed. Walden is also a PMI Registered Education Provider (R.E.P.) and, as such, has agreed to abide by PMI-established quality assurance criteria. Credits from all required courses in both certificate programs can be applied toward Walden’s M.S. in Project Management program.

The Graduate Certificate in Advanced Project Management is designed for senior project managers. Aligned with the standards in the Project Management Institute’s (PMI’s)® A Guide to the Project Management Body of Knowledge (PMBOK® Guide), this certificate program leverages students’ knowledge and experience to help them place project management in a strategic perspective within their organizations. Students who successfully complete this certificate program will have a demonstrable proficiency in advanced project management skills that they can show current and future employers.

*Eligibility for the PMP® credential requires individuals to first attain specific educational and project management experience, including 35 contact hours of project management education and a minimum of 3 years, or 36 months, of project management experience, during which at least 4,500 hours were spent...
leading and directing project tasks. The final step in earning the PMP credential is passing the PMP exam. For more information, visit the Project Management Institute (PMI) website at www.pmi.org.

Note: PMI is a registered trademark and service mark of the Project Management Institute, Inc. PMP is a registered certification mark of the Project Management Institute, Inc.

Graduate Certificate in Applied Project Management

Project Management Certificates

Walden University's project management certificate programs are geared toward students who want to learn the foundational skills for this field or those who want to build upon their existing senior-level experience to advance their career in project management. Each program positions students to take the Project Management Professional (PMP)® exam® from the Project Management Institute (PMI)®. Students who are already PMP-certified and are seeking recertification earn Professional Development Units (PDUs) that can be applied toward the 60 credits needed. Walden is also a PMI Registered Education Provider (R.E.P.) and, as such, has agreed to abide by PMI-established quality assurance criteria. Credits from all required courses in both
Certificate programs can be applied toward Walden’s MS in Project Management program.

The Graduate Certificate in Applied Project Management introduces the required skills necessary for managing projects in today's work environment. Fully aligned with the standards in Project Management Institute's (PMI's) A Guide to the Project Management Body of Knowledge (PMBOK® Guide), this certificate program covers the key process areas that every project manager must be able to address. Students who successfully complete this certificate program will have a demonstrable proficiency in essential project management skills that they can show current and future employers.

*Eligibility for the PMP® credential requires individuals to first attain specific educational and project management experience, including 35 contact hours of project management education and a minimum of 3 years, or 36 months, of project management experience, during which at least 4,500 hours were spent leading and directing project tasks. The final step in earning the PMP credential is passing the PMP exam. For more information, visit the Project Management Institute (PMI) website at www.pmi.org.

Note: PMI is a registered trademark and service mark of the Project Management Institute, Inc. PMBOK is a registered trademark of the Project Management Institute, Inc.

Note: The Graduate Certificate in Applied Project Management program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their Graduate Certificate in Applied Project Management through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the Graduate Certificate in Applied Project Management (Competency Based) page for program details.

Course-Based Program

Certificate Requirements

9 total semester credits

Curriculum

MSPM 6102 - Practices in Project Management
MSPM 6130 - Budgeting and Management of Operations
MSPM 6140 - Enterprise and Project Risk Management

**Graduate Certificate in Applied Project Management (Competency Based)**

Tempo Learning® is Walden's competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

**Certificate Requirements**

- 9 total semester credits

**Curriculum**

- MSPM 6102 - Practices in Project Management♦
  - PM001 Project Management Methods
    - Explain the discipline of project management and its processes.
  - PM002 Project Initiation
    - Prepare a project charter using standard project management tools and techniques.
  - PM003 Project Planning
    - Prepare a comprehensive project plan using standard project management tools and techniques.
PM004 Project Performance Measurement
Assess project performance against agreed-to criteria using qualitative and quantitative methods.

PM005 Project Closing Processes
Conduct a post-project audit to close out a project.

MSPM 6130 - Budgeting and Management of Operations

PM012 Strategic Operations Management
Apply portfolio management as a model for determining the appropriate strategic mix of product and service offerings.

PM013 Integrated Time and Cost Management
Design an integrated supply chain management plan using project management time and cost tools and techniques.

PM014 Quality Management in Operations
Formulate a plan to assure and control project quality in alignment with organizational quality standards and goals.

MSPM 6140 - Enterprise and Project Risk Management

PM006 Organizational Risk Strategy
Develop organization-level strategies for managing risks driven by internal and external environmental factors.

PM007 Project Risk Management
Prepare a project risk management plan using standard project management tools and techniques.

PM008 Project Risk Measurement
Assess project risk performance against agreed-to criteria using qualitative and quantitative methods.

Graduate Certificate in Auditing
This program is not currently accepting new students.

This certificate prepares students with the core skills and knowledge that are critical to professionals in the field of auditing. The Graduate Certificate in Auditing coursework covers topics including business risk management, financial and operational controls, risk control matrix, and regulatory compliance systems. The program also explores fraud prevention and security of sensitive financial information in an organizational context. Credits from the certificate can be applied toward Walden’s MS in Accounting program.

Certificate Requirements

12 total semester credits

Curriculum
ACCT 6600 - Managing Operational and Financial Business Risks
ACCT 6610 - Managing Regulatory Compliance

Graduate Certificate in Brand and Product Marketing

This program is not currently accepting new students.

The Graduate Certificate in Brand and Product Marketing focuses on developing strategies for building strong brands and compelling product messages. Through their coursework, students explore the key elements of brand and product management, consumer insights and their role in marketing planning, and how to optimize a campaign's reach and impact by assessing and interpreting performance data. Students in this program also have the opportunity to apply their knowledge to the development of a strategic marketing plan for a real or fictional business.

Certificate Requirements

- 9 sem. cr.
- 1.5 semesters (6 months) to complete

Graduate Certificate in Human Resource Management

The Graduate Certificate in Human Resource Management (HRM) is a four-course overview of key HRM topics and issues facing HRM professionals. Students investigate issues identified within the competencies outlined by the Society for Human Resource Management (SHRM) as being critical to the success of human resource (HR) professionals. Coursework prepares learners to provide innovative HR solutions in an increasingly complex global economy. Students explore the dynamic field of HR and its role in business results and human capital development. Credits earned from this certificate program may be applied toward Walden's MS in Human Resource Management.

Graduate Certificate in Leading Complex Organizational Projects

Managing a successful project team requires a leader to lead skilled personnel and support technical excellence. A manager in the field of project management is responsible for how the project will be completed and who will effectively be assigned to perform the work. Managers have a responsibility to plan, organize, evaluate, direct, and lead their teams to achieve overall business success. For those looking for a challenging and informative opportunity, the Graduate Certificate in Leading Complex Organizational Projects can set students apart from other leaders in their field.

Note: This certificate is not available as a standalone offering. Students may complete the certificate requirements along the way to completing their MBA degree by way of program core or specialization courses.

- ACCT 6010 - Analysis and Communication for the Financial Professional
- ACCT 6020 - Legal and Ethical Issues in Accounting and Finance
- ACCT 6130 - Managerial Accounting for Organizational Performance

Course Sequence

The recommended course sequence is as follows:
Graduate Certificate in Population Health

This program is not currently accepting new students.

Healthcare delivery systems in the United States and around the world are evolving and are challenged by aging populations, rising healthcare costs, less than optimal patient care and business outcomes, and economic inefficiencies. Population health is a broad-based, system-wide response to these challenges. Population health is defined as the health outcomes of a group of individuals within a targeted population, including the distribution of such outcomes within the group. Contemporary population health aims to prevent and cure the population’s chronic diseases through engaging the healthcare stakeholders (community, providers, healthcare consumers, government agencies, and payers) and by integrating evidence-based clinical care and healthcare management practices to address and improve population health needs and requirements within the complex and changing landscape.

This certificate provides a comprehensive foundation in the essentials of population health—new care-delivery structures, socioeconomic determinants of disease, data analytics, and identification of community health needs. This program enables students to enhance their skills in population health to lead and manage complex population healthcare programs and services. This certificate also allows students to continue their studies later to earn a full Master of Healthcare Administration (MHA) degree.

Certificate Requirements

20 total quarter credits

Master's Degree Programs

**Executive Master of Business Administration (EMBA)**

This program is not currently accepting new students.

Students in Walden's Executive Master of Business Administration (EMBA) program learn how to become effective business leaders in today's global marketplace. The curriculum combines application-based coursework with real-world learning to prepare students with the skills they need to make executive-level decisions. Students study topics such as economic theory, stakeholder analysis, innovative marketing, and managing a global workforce. Courses feature online interviews and presentations with innovators and leaders in today's business, economic, and technology industries, offering students a diverse range of perspectives. By attending a U.S.-based residency with their cohort, students hone their leadership and team-building skills. An international residency provides them with a new understanding of cultures and global business practices.
Note: Students may only enroll in the EMBA program as part of Business to Business partnerships.

Learning Outcomes

Students in the EMBA program will be able to:

- Develop appropriate solutions to address problems that are common in a business environment.
- Demonstrate professional communication skills necessary for the business environment.
- Demonstrate the ability to make decisions that are ethical and socially responsible within a global business context.
- Effectively collaborate with others from diverse perspectives in a business environment.
- Use systems thinking in the evaluation of business operations, decisions, and processes.
- Apply skills that are necessary to improve an organization's competitive position in a complex global marketplace.
- Create a vision for positive change in one's self, organization, or broader community.
- Evaluate how businesses operate in the U.S. and abroad.

Degree Requirements

Accreditation
Walden University’s Executive Master of Business Administration (EMBA) program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

Master of Business Administration (MBA)

In Walden’s MBA program students connect to real-world issues and trends through coursework that emphasizes core business skills, decision-making, and strategies. This program is designed to help students become more effective business communicators, successful collaborators, creative thinkers, and world-class managers who are well-equipped to work in today’s global work environments. The curriculum touches upon all facets of business and integrates career development strategies throughout the coursework. This provides students with the opportunity to gain skills they need to effectively manage their careers. MBA students can choose to complete a general MBA program or add a specialization from the list below to customize their MBA program.

Note: The Master of Business Administration (MBA) program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

Learning Outcomes

At the end of this program, students will:

- Evaluate the environment in which businesses operate.
- Develop well-reasoned, appropriate decisions within a business context.
- Generate solutions to a variety of complex business scenarios.
- Effectively employ business-appropriate communication skills.
- Demonstrate an understanding of the skills necessary to work effectively with others in diverse business environments.
- Evaluate how business administration knowledge and skills enable a variety of stakeholders to contribute to positive social change.

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their Master of Business Administration (MBA) through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the Master of Business Administration (MBA) (Competency Based) page for program details.
Course-Based Program

Accreditation

Walden University’s Master of Business Administration (MBA) program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

**Master of Business Administration (MBA) (Competency Based)**

Tempo Learning® is Walden’s competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

Specializations

- Healthcare Management
- Project Management

Degree Requirements
30 total semester credits
Core competencies (27 sem. cr.)
Capstone (3 sem. cr.)

Core Curriculum

Core Competencies (27 sem. cr.)

WMBA 4990 - Business Essentials
BE001 Business Leadership, Management, and Ethics
   Recognize ethical, legal, leadership, and human resource issues in the business environment.
BE002 Accounting and Finance
   Explain key accounting and finance concepts in the business environment.
BE003 Economics and Quantitative Methods/Statistics
   Recognize economic and statistical concepts and methods used in business.
BE004 Information Systems Management and Global Dimensions of Business
   Identify factors that support managing information in a global business environment.
BE005 Marketing and Business Integration and Strategic Management
   Identify the relationship among strategic management, operations management, business integration, and marketing that enhances the effectiveness of marketing efforts.

WMBA 6000A - Dynamic Leadership
DL001 Dynamic Leadership Frameworks and Theories
   Evaluate leadership approaches through established leadership frameworks and theories.
DL002 Leadership and Followership
   Develop strategies for effective leadership and followership that incorporate best practices.
DL003 Leadership's Relationship to Management
   Synthesize personal values and experiences to support leadership development and ethical decision making.

WMBA 6010A - Managing People and Promoting Collaboration
MN001 Shaping a Positive and Inclusive Workplace
   Evaluate the role of managers in creating an engaging and inclusive workplace culture.
MN002 Developing Individual and Teams
Assess management strategies that promote development of individual employees and teams.

MN003 Managing Authenticly and Ethically
Synthesize a personal management code of ethics that focuses on diversity, inclusion, personal values, ethical management, and positive social change.

WMBA 6020A - Fostering a Culture of Innovation
FC001 Understanding Creativity and Innovation
Analyze the role of creativity and innovation in business practices.

FC002 Generating Breakthrough Ideas That Inspire Innovative Solutions
Develop leadership strategies that foster a culture of creativity and innovation in an organization.

FC003 Harnessing Creativity and Innovation to Develop a Successful Organizational Strategy
Appraise creative and innovative solutions to address an organizational challenge.

WMBA 6030A - Managing Business Information Systems
MB001 The Role and Value of Information Systems in Business
Evaluate strategies to drive strategic value from information technology.

MB002 Managing Data, Security, and Business Continuity
Evaluate approaches to support business continuity in the context of ethics, privacy, and security risks.

MB003 Aligning the Organization and Planning for the Future
Appraise the effects of organizational culture on information technology implementation and management.

WMBA 6695 - Communication for Leaders and Managers

MM001 Communication Begins With Who, Why, and How
Evaluate communication channels and mediums to communicate effectively for messaging purpose, audience, and context.

MM002 Interpersonal Communication
Apply appropriate verbal and nonverbal skills to communicate effectively in one-to-one communication.

MM003 Communicating Across and Beyond the Organization
Apply differentiated communication approaches to influence stakeholder perception and change, both within and beyond the organization.

WMBA 6040A - Improving Business Performance
IV001 Thinking in Systems for Organizational Improvement
Evaluate organizational problems using a systems thinking approach to support decision making and effective communication.

IV002 Improving Business Performance Through Systems Thinking
Develop a plan to manage and improve organizational performance that integrates a systems thinking approach.

IV003 Practicing Systems Thinking
Evaluate solutions to organizational challenges and opportunities in light of systems thinking, ethical reasoning, and management theory.

WMBA 6050A - Accounting for Management Decision Making
AM001 Budgeting for Decision Making
Analyze organizational performance in terms of strategic planning, forecasts, and budgets.

AM002 Costs, Prices, and Profits
Assess managerial accounting tools and measures to inform decision making.

AM003 Performance Measurements: Planet, People, and Profit
Evaluate the financial, social, and environmental performance of an organization using accounting measures and frameworks.

WMBA 6060A - Marketing for Competitiveness
MT001 Understanding the Customer, Products and Services, and Technology
Analyze the influence of creative and innovative marketing strategies on buyer behavior.

MT002 Linking Marketing and Strategy
Evaluate aspects of marketing strategy to support decision making and capture market share.

MT003 Marketing Impact on the Organizational Level
Propose marketing tactics to address market trends for a diverse audience.

WMBA 6070A - Managerial Finance
MF001 Multiple Perspectives of Financial Management
Appraise a publicly traded company’s practices related to global financial management.

MF002 Financial Analysis
Evaluate a company’s financial health and areas for improvement based on financial ratios.

MF003 Capital Budget in Finance
Analyze financial data related to short- and long-term financing needs for an organization.
Capstone Competency (3 sem. cr.)

WMBA 6990A - Capstone: Sustainable Business Practices and Strategies

SU001 Understanding the Organization
   Analyze aspects of organizational strategy development and implementation.

SU002 Evaluating Opportunities and the Organization’s Readiness
   Assess the effects of cross-functional strategic thinking on an organization’s performance and strategic advantage.

SU003 Articulating Organizational Strategy and Understanding the Individual’s Role
   Develop a strategic plan based on personal skills and knowledge for improved organizational performance.

Master of Healthcare Administration (MHA)

The healthcare system is experiencing a rapid transformation. With the implementation of the Patient Protection and Affordable Care Act, an aging population, and emerging new technologies, employment of medical and health services administrators and managers is projected to grow 23% from 2012 to 2022.

Today’s healthcare industry employers require effective, visionary leaders who can help them respond to the needs of their communities while optimizing organizational performance and outcomes. Our fully online Master of Healthcare Administration (MHA) degree program can put you at the forefront of the field and help you improve the experience of healthcare providers as well as patients.

As a leader in healthcare education, Walden is dedicated to meeting the needs of our students, the healthcare industry, and employers. The coursework in this online healthcare administration degree program explores the latest trends and allows you to develop the professional competencies expected by top healthcare organizations:

   Critical and creative thinking and problem solving
   Business and interpersonal communication
   Strategic planning
   Adaptability and collaboration
   Change management

Taught by doctoral level faculty, our MHA degree program features curriculum with multimedia that lends a real-world perspective to your online learning experience.

With a Master of Healthcare Administration degree from Walden, you can gain the skills and credentials that allow you to pursue healthcare leadership roles and make a difference in your organization and community.
Note: The Master of Healthcare Administration (MHA) program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

Learning Outcomes

1. Utilize effective oral and written communication strategies as productive healthcare administrators
2. Analyze the components of effective health care delivery for diverse populations in the United States
3. Assess the effect of delivery of care on patient outcomes and equity for healthcare organizations
4. Analyze the impact of environmental factors on healthcare operations management
5. Assess the impact of emerging trends and innovation on healthcare organization’s performance
6. Apply critical thinking to solve healthcare administration challenges in considering the social determinants of health framework
7. Appraise strategic practices on achieving sustainable competitive advantage for healthcare organizations
8. Evaluate the role of healthcare administrators in improving health outcomes through facilitating social change

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their Master of Healthcare Administration (MHA) through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the Master of Healthcare Administration (MHA) (Competency Based) page for program details.

Course-Based Program

Degree Requirements

53–68 total quarter credits (depending on whether a student chooses to complete an optional specialization)

Core courses (53 cr.)
Optional specialization (15 cr.)

Optional Specializations
Leadership and Organizational Development
Population Health
Social Entrepreneurship and Innovation
Systems and Policy Specialization

Curriculum

General Program

In the general Master of Healthcare Administration (MHA) program, you prepare to help your organization address the challenges of today's changing healthcare landscape. Through coursework, you will explore the regulations, laws, court decisions, and health policies that impact health service providers. You also examine and analyze the latest theories, technologies, and strategies in the field, focusing on developing the advanced business skills that today's healthcare employers need. Multimedia and case studies are integrated into the relevant curriculum to help you gain the knowledge and credentials to pursue healthcare leadership roles.

Core Courses (53 cr.)

- MMHA 6000 - Foundations of Healthcare Administration
- MMHA 6050 - Contemporary Topics in the U.S. Healthcare Delivery System
- MMHA 6200 - Principles of Population Health in Healthcare Administration
- MMHA 6300 - Law, Ethics, and Policy in Healthcare Administration
- MMHA 6400 - Healthcare Financial Management and Economics
- MMHA 6600 - Healthcare Informatics and Technology Management
- MMHA 6700 - Healthcare Operations Management
- MMHA 6800 - Marketing Management and Business Communication for Healthcare Administrators
- MMHA 6900 - Healthcare Quality Management
- MMHA 6999 - Strategic Planning in Healthcare Administration

</table>

*Students enrolling in a midterm start date will take MMHA 6000A, a 6-week version of this course by itself in their first term.

**Note on Licensure**

*The Master of Healthcare Administration is not a licensure leading program and does not prepare an individual to become a licensed professional in healthcare administration, healthcare leadership, nursing home administration, or other similar positions.*

**Master of Information Systems Management (MISM)**

*This program is not currently accepting new students.*

The Master of Information Systems Management program integrates management and technical training to prepare students for IT-related senior management positions. After developing basic networking, programming, and database management skills in core courses, students learn to manage IT projects and teams across multiple organizations,
develop business strategies that provide a competitive advantage, and secure information systems and assets. After completing the four core courses, students are eligible to receive the Graduate Certificate in Information Systems at no additional cost. Upon completion of the full program, students are prepared to design and lead the information systems, resources, and personnel that are critical to organizations' effectiveness and success.

Learning Outcomes

At the end of this program, students will be able to:

- Design appropriate software system structures in response to application needs, organizational environment, and technical ecology.
- Make appropriate design choices based on system, service, and business process needs.
- Analyze social, legal, ethical, and professional issues in business and technical decision making.
- Employ best communication practices with business partners, users, customers, and third-party providers.
- Use sound evaluation practices to select appropriately among competing technologies and technical approaches.
- Manage business processes through analysis, design, and optimization in response to organizational needs.

**MS in Accounting**

This program is not currently accepting new students.

The MS in Accounting program is focused on advanced accounting principles as well as current topic analyses that form a basis for improved decision-making and analytical capability. This program is geared toward accounting professionals who desire to refine and increase their knowledge in accounting topics. These individuals may be working as public accountants, in private practice, in government, or in nonprofit organizations. The
core courses in the MS in Accounting program focus on developing skills in accounting research and communication, legal and ethical analysis, and managerial accounting with a focus on organization-wide performance. This degree program also has content aligned with professional certifications such as CPA, CIA, CFE, CFA, and CMA.

The MS in Accounting program is results-oriented and extends beyond theories and conceptual understanding to practical application. Advanced learning outcomes are achieved through a live research and case study methodology that will provide learners with the skills necessary to thrive in a rapidly changing profession.

Learning Outcomes

At the end of this program, students will be able to:

- Assess the impact of managerial decisions in organizational contexts using research techniques and results.
- Communicate effectively about accounting and business practices, demonstrating knowledge of and respect for a variety of audiences.
- Effectively employ quantitative and analytical skills essential in the accounting profession.
- Construct alternative solutions to unique accounting situations and challenges.
- Evaluate accounting and business practices from ethical, legal, and regulatory perspectives, considering diverse stakeholders and competing interests.
- Appraise the mission-critical role the accounting professional has as an active partner in supporting the goals and needs of the organization.
- Evaluate opportunities accounting professionals have to promote sustainable, socially aware organizations.

Specializations

- Accounting for the Professional
- Accounting With CPA Emphasis
- Self-Designed

Degree Requirements

- 30 total semester credits
  - Core courses (15 sem. cr.)
  - Specialization courses (15 sem. cr.)

Curriculum
Core Courses (15 sem. cr.)

ACCT 4990 - Business Essentials
ACCT 6000 - Decision-Making Tools for Today's Financial Professional
ACCT 6010 - Analysis and Communication for the Financial Professional

ACCT 6140 - Current Trends in Accounting Standards

Specialization Courses (15 sem. cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Course Sequence

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

Accreditation

Walden's MS in Accounting program is accredited by ACBSP and has earned the organization's Specialized Accounting Accreditation. ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

Note on Licensure

Most states require individuals to complete 150 semester (225 quarter) hours in certain subject areas in order to be eligible to sit for the Certified Public Accountant (CPA) exam and/or obtain a CPA license. Walden's accounting programs can help graduates progress toward meeting those requirements. The BS in Accounting offers 120 quarter (80 semester) credit hours that include upper-level courses in topics such as financial accounting, auditing, taxation, and management accounting. The MS in Accounting offers 30 semester (45 quarter) credit hours, while the MBA Accounting specialization offers nine semester (13.5 quarter) credit hours. These programs include graduate courses in topics such as financial accounting, managerial accounting, and legal and ethical accounting practices. This will require students to complete additional coursework to meet state requirements.

In each state, there are specific policies that must be followed when an individual is seeking to become a licensed accountant. Some states will not allow individuals who complete the Walden accounting programs to sit for the CPA licensing exams due to state-specific issues such as professional accreditation or face-to-face instruction. For
information on the educational requirements for your state, refer to the state’s Board of Accountancy or related agency.

Walden enrollment specialists can provide guidance about accountant licensure; however, it remains the responsibility of the individual enrolling in the program to read, understand, and comply with the licensure requirements in the state where he or she resides. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

Walden University can make no representation, warranty, guarantee, or commitment that successful completion of a Walden program, or coursework for credit within a program, will make a graduate eligible to sit for a licensure exam or to obtain state licensure.

MS in Communication

This program is not currently accepting new students.

Through a curriculum aligned with the latest communication practices and theories, the MS in Communication program prepares students for challenging careers in marketing, public relations, social media, and related fields. Coursework focuses on how to create engaging messages for local, national, and global audiences and translate that messaging into various media. Students also explore how to strategize, execute, and measure integrated communication plans using both traditional and digital channels.

Learning Outcomes

Graduates of the MS in Communication program will be prepared to:

- Critically analyze media from producer and consumer perspectives.
- Apply communication theories and principles effectively.
- Use appropriate traditional and digital media to attain desired results.
- Demonstrate an understanding of how the regulatory environment impacts the communication field.
- Evaluate communication plans and activities.
- Implement communication plans and activities that will result in achievement of organizational goals.
- Practice ethically in the field of communication.
- Communicate professionally with stakeholders.
- Use the creative process to solve organizational issues.

### Note on Accreditation

At the master's level, Walden University's Master of Business Administration (MBA), MS in Accounting, and MS in Finance are the only programs accredited by the Accreditation Council for Business Schools and Programs (ACBSP). The MS in Communication is not accredited by the ACBSP. Please visit our Accreditation page to see the list of Walden accreditations.

**MS in Cybersecurity**

This program is not currently accepting new students.
The MS in Cybersecurity program equips students with the real-world training to monitor, detect, and manage today's dangerous digital threats. Through courses developed in collaboration with IBM, students focus on:

- The latest cybersecurity technology and the practical application of this technology in the context of business information and real-world problems.
- Mastering specialized business, compliance, and management principles along with the technical skills needed to compete for desirable cybersecurity jobs.
- Hands-on learning through realistic threat simulations. Students learn by doing and build practical skills that are immediately applicable in the workplace.

Students also explore groundbreaking advances in cyber forensics, cybercrime prevention, and secure coding as they build the confidence to lead critical cybersecurity initiatives and cross-functional teams.

Learning Outcomes

Upon completion of the MS in Cybersecurity, students will be able to:

- Evaluate emerging technical developments that apply to cybersecurity.
- Evaluate the role of cybersecurity elements within the context of the modern workplace.
- Examine cryptography elements for practical application in both commercial and non-commercial settings.
- Critique cybersecurity strategies that can be deployed to prevent cybercrime.
- Examine computer forensics elements for their practical usage in both commercial and non-commercial organizations.
- Evaluate management processes that can be deployed to prevent or limit potential cyber-attacks in the workplace.

**MS in Data Science**

This program is not currently accepting new students.

The MS in Data Science program empowers students with the specialized skills needed to turn raw information into valuable business insights. Through courses developed in collaboration with IBM, students focus on:

- Using digital data and tools to analyze and ethically solve pressing problems in any organization or industry.
- Learning how to collect, analyze, and visualize data, and communicate insights to diverse stakeholders.
- Building practical, immediately applicable skills through interactive case studies, visualizations, and applications.
Walden’s MS in Data Science program is focused on responsible data management practices and the ethical use of data to address business challenges.

Learning Outcomes

Upon completion of the MS in Data Science, students will be able to:

- Evaluate emerging technical developments that apply to data science.
- Analyze current technologies that provide practical solutions to data science problems.
- Evaluate the role of supporting technologies for data science in data driven decision-making.
- Analyze legal, ethical, professional and social issue elements within the domain of data science.
- Differentiate how the techniques and tools of big data predictive analytics can be used to add "business value" in data driven decision-making in the modern work place.

Degree Requirements

**MS in Finance**

This program is not currently accepting new students.

The MS in Finance program is designed to prepare students to advance their careers as effective finance professionals with the relevant knowledge and specialized skills to meet the needs of employers and industry today. Emphasizing a practical approach, the program is taught by industry experts and combines case studies, group discussion, and project-based learning. Graduates will be positioned for careers in corporate finance, investment banking, financial management, financial markets, securities firms, government, and other settings. The program offers three specializations that align with careers in the field: Chartered Financial Analyst (CFA®), Certified Financial Planner (CFP®), and Finance for the Professional (Self-Designed). Through a capstone course, the CFA and CFA specializations feature simulation experiences designed to prepare students to sit for the internationally recognized CFA or CFP exams.

**Learning Outcomes**

Graduates of the MS in Finance program will be prepared to:

- Demonstrate the analytical skills essential for the financial professional.
- Employ communication strategies that display an acute awareness of the needs of the intended audiences.
- Evaluate financial problems to provide reliable recommendations for decision making.
Evaluate risk and return strategies in the context of an organization’s mission and objectives.
Apply appropriate principles of valuation to major financial assets and securities.
Demonstrate the ability to develop recommendations for investment and financial policies to maximize firm value.
Employ financial knowledge to promote sustainable, socially aware organizations and ethical decision making.

Accreditation

Walden University’s MS in Finance program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading specialized accreditation association that identifies and supports excellence in business education.

**MS in Human Resource Management (students beginning program Fall 2019 or later)**

The MS in Human Resource Management (HRM) program has been designed for learners who may want to pursue a career in HRM as well as HRM professionals who choose to expand their skills and knowledge. The program offers two tracks: Track I is designed for those who are newer to the HRM field and need a comprehensive
perspective on HRM, while Track II is intended for those with more experience who want to customize their program of study to align with this experience and their career interests.

The program adopts a human capital perspective throughout. Learners prepare to oversee, develop, and manage the human capital of small to large organizations, thereby addressing the vital roles of the human resource (HR) professional in both operational and strategic settings. Students have the opportunity to develop and enhance critical management, strategic, organizational, and analytical skills. Through simulation experiences of reality-based scenarios as well as traditional curricula, learners consider best practices and emerging trends in the specializations found within HRM. The program of study aligns with the competencies curriculum specified by the Society for Human Resource Management (SHRM).

Note: The MS in Human Resource Management program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

Note: Students who begin their program in Fall 2019 or later undertake the redesigned MS in Human Resource Management curriculum below. Students enrolled prior to Fall 2019 continue under the previous program of study.

Learning Outcomes

Demonstrate human resources knowledge in relation to being an internal strategic partner.
Evaluate the strategic role of human resources in creating organizational capacity and agility.
Examine the role of human resources in legal and regulatory compliance of an organization.
Appraise the role of human resources in change management.
Evaluate the role of human resources in facilitating social change opportunities.
Demonstrate an understanding of human resource leadership responsibilities as an internal strategic partner.

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their MS in Human Resource Management through the competency-based education modality. Upon successful completion of program requirements, students will earn the
same Walden degree in either modality. See the MS in Human Resource Management (Competency Based) page for program details.

Course-Based Program

Track I

Degree Requirements

30 total semester credits
Core courses (27 sem. cr.)
Capstone course (3 sem. cr.)

Curriculum

Core Courses (27 cr.)

- MHRM 6101 - Foundations of Human Resource Management
- MHRM 6201 - Individual and Organizational Performance Management
- MHRM 6301 - Legal and Regulatory Environment
- MHRM 6401 - Human Resource Analytics
- MHRM 6501 - Conflict Management and Negotiation
- MHRM 6601 - Benefits, Compensation, and Resource Allocation
- MHRM 6701 - Strategic Positioning and Social Change
- MHRM 6751 - Global and Cultural Effectiveness
- MHRM 6801 - Organizational Effectiveness and Leadership

Capstone Course (3 sem cr.)

Choose one of the options below.
- MHRM 6901 - Capstone: Strategic Human Resource Management
- MHRM 6902 - Capstone: Meeting SHRM Competencies

**Note on Accreditation**

At the master's level, Walden University’s Master of Business Administration (MBA), MS in Accounting, and MS in Finance are the only programs accredited by the Accreditation Council for Business Schools and Programs (ACBSP). The MS in Human Resource Management program is not accredited by the ACBSP. Please visit our Accreditation page to see the list of Walden accreditations.

**MS in Human Resource Management (students beginning program prior to Fall 2019)**

The MS in Human Resource Management program was designed for students who want to enter the field or those who want to grow and expand their existing careers in human resources. The program applies a human capital development and management approach throughout all of its specializations and courses. Students prepare to oversee, develop, and manage the human capital of small to large organizations, thereby addressing the vital roles of the human resource professional within an operations and strategy setting. Students have the opportunity to develop and enhance critical management, strategic, organizational, and analytical skills through one of three specializations, which are based on industry needs and traditional curricula. Each
specialization aligns with the recommended curriculum and skill development needs of human resource professionals as identified by the Society for Human Resource Management (SHRM).

Note: The School of Management redesigned the MS in Human Resource Management program effective Fall 2019. The specializations following the curriculum below—Functional Human Resource Management, Integrating Functional and Strategic Human Resource Management, Organizational Strategy—are no longer accepting new students. Only students enrolled in the MS in Human Resource Management program in Summer 2019 or earlier are eligible for this version of the program. Students who begin their program in Fall 2019 or later will be enrolled in the MS in Human Resource Management redesigned curriculum.

Learning Outcomes

At the end of the program, students will be able to:

Apply the theoretical and practical aspects of human resource management to formulate strategies that will enable organizations to achieve both operational and strategic goals related to the organization’s human capital.
Deploy appropriate HRM metrics and other HRM analytics to make informed decisions that enhance the effectiveness of the recruitment, training, development, and retention of human resources and align the HRM strategy with the overall organizational strategy and purpose.
Appraise and apply techniques in talent management that human resource professionals may use to facilitate effective position planning, talent selection, placement, compensation and rewards, as well as retention.
Propose mediation or negotiation strategies that lead to positive, ethical outcomes and demonstrate scrupulous consideration of perceived points of conflict; differences in values, beliefs, and cultures; or divergence of goals.
Assess opportunities to improve and sustain organizational performance through strategic thinking and management, the development of human capital, the allocation of physical and financial resources.
Exhibit the ability to make reasoned, ethical decisions based on professional standards and practices for ethical conduct, legal requirements, and regulatory guidelines in human resource management that are in the best interest of the individual, the organization, the environment, and society as a whole.
Propose systematic, systemic, and sustainable solutions to complex business problems related to human capital and human resource needs and issues by applying critical-thinking and analytical skills.

**Note on Accreditation**

At the master's level, Walden University's Master of Business Administration (MBA), MS in Accounting, and MS in Finance are the only programs accredited by the Accreditation Council for Business Schools and Programs (ACBSP). The MS in Human Resource Management program is not accredited by the ACBSP. Please visit our Accreditation page to see the list of Walden accreditations.
**MS in Industrial and Organizational (I/O) Psychology**

Defined as the "scientific study of the workplace," industrial and organizational (I/O) psychology explores the impact of individual, group, and organizational psychology on workplace health, productivity, and effectiveness.

With a focus on practical application in the workplace, the MS in Industrial and Organizational (I/O) Psychology provides scholar-practitioners with an in-depth understanding of individual, group, and organizational behavior in the workplace; research design and analytical skills; and expertise applying evidence-based I/O practices in the diverse organizational settings.

Students have opportunities through their capstone projects to synthesize and apply knowledge gained in the program to a practical project designed to promote social change. Optional blended coursework provides opportunities for in-person feedback and hands-on practice, while specializations allow students to gain additional expertise in areas consistent with their interests and career goals.

The curriculum in this Master of Science program is designed to reflect the professional guidelines set forth by the Society for Industrial and Organizational Psychology (SIOP).

**Note:** The MS in Industrial and Organizational (I/O) Psychology program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

**Learning Outcomes**

As graduates of this program, students will be able to:

- Describe behavior using current theory and research in industrial and organizational psychology.
- Articulate the uniqueness of the industrial/organizational psychology specialization including the history specific to this specialization.
- Discuss how key industrial and organizational issues impact organizations (i.e., issues such as selection, performance management, performance measurement, job analysis, individual behavior, leadership, motivation, organizational culture, work teams, and/or job attitudes).
- Explain the principles of basic research methods.
- Appropriately summarize the role of research in the field of industrial and organizational psychology.
- Apply ethical organizational intervention practices.
Appropriately select effective organizational interventions based on empirical evidence.
Summarize the influence of diverse populations on individual, group, and organizational behavior.
Apply principles of industrial and organizational psychology to scholarly and/or professional activities to promote lifelong learning.
Engage in practices that result in positive social change.

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their MS in Industrial and Organizational (I/O) Psychology through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the MS in Industrial and Organizational (I/O) Psychology (Competency Based) page for program details.

Note on Licensure

The MS in Industrial and Organizational Psychology is not a licensure-leading program and does not prepare an individual to become a licensed psychology or counseling professional.

MS in Industrial and Organizational (I/O) Psychology (Competency Based)

Tempo Learning® is Walden's competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

  - Demonstrate skills to further academic goals.
- GS003 Professional Goals
  - Demonstrate skills to further professional goals.
Core Competencies (15 cr.)

IPSY 6200TL - Themes and Theories in Industrial and Organizational Psychology [Tempo Learning®-Specific Course]

TT001 Historical Development and Contemporary Industrial and Organizational Psychology
Analyze the historical development of industrial and organizational (I/O) psychology and how it has contributed to the contemporary practice of I/O psychology.

TT002 Industrial Psychology: Contemporary Themes, Models, and Theories and Their Application
Evaluate and apply contemporary themes, models, and theories related to the practice of industrial psychology in workplace settings and organizations.

TT003 Organizational Psychology: Contemporary Themes, Models, and Theories and Their Application
Evaluate and apply contemporary themes, models, and theories related to the practice of organizational psychology in workplace settings and organizations.

TT004 The Impact of Industrial and Organizational Psychology on Organizations
Evaluate how I/O models, theories, principles, and practices impact individual, group, and organizational behavior.

TT005 Cross-Cultural and Ethical Practice in Industrial and Organizational Psychology
Apply strategies, best practices, ethical guidelines, and laws to cross-cultural, ethical, and legal issues in the workplace.

IPSY 6214TL - Consulting for Organizational Development and Change [Tempo Learning®-Specific Course]

OD001 Foundations of Consulting for Organizational Development and Change: Theories and Models
Evaluate behavioral science theories and models of organizational development and consultation to issues faced by organizations.

OD002 Methods for Improving Performance
Evaluate methods for improving individual, group, practitioner, and organizational performance through consulting, coaching, ongoing learning, and change management within an organizational setting.

OD003 Consultation Practices and Intervention Planning
Evaluate consultation practices that apply to contracting, planning,
assessment, intervention, and evaluation within different levels of an organization.

OD004 Strategies and Applications for Addressing Organizational Development and Change Challenges
Recommend strategies and methods using the phases of consultation to address organizational change challenges.

OD005 Organizational Development Future Trends and Professional Development
Analyze strategies for professional development based on personal skills, preferences, and career objectives.

IPSY 6480 - Psychology of Organizational Behavior

OB001 Defining Organizational Behavior and Its Importance to the World of Work
Apply individual differences, group and team dynamics, and organizational change and development theories to organizational settings and explain the benefits to organizations.

OB002 Leadership, Power, and Structural Dynamics of Organizational Behavior
Evaluate impacts of globalization, organizational culture, leadership and power, diversity, and structural dynamics on employees and organizations.

OB003 Employee Behavior, Motivation, Personality, and Perceptions
Analyze ethical methods for assessing employee behavior, values, attitudes, moods, emotions, motivation, job satisfaction, and personalities in organizations.

OB004 Strategies for Addressing Organizational Behavior Challenges
Develop a method and/or process to address organizational behavior challenges related to resistance, conflict, competition, and change in organizations.

OB005 Organizational Behavior Professional Development and Social Change
Apply organizational behavior skills and knowledge to professional development of industrial and organizational psychology practitioners.

Research Competencies (10 cr.)

RSCH 6110 - Research Theory, Design, and Methods
RT001 Philosophy of Science, Theory, and Social Change
Analyze the roles of philosophy, theory, and social change in research.
RT002 Quantitative Research
Assess quantitative research studies for quality and for alignment among critical research components.

RT003 Qualitative Research
Assess qualitative research studies for quality and for alignment among critical research components.

RT004 Mixed Methods Research
Assess mixed methods research (MMR) studies for quality and for alignment among critical research components.

RSCH 6210 - Quantitative Reasoning and Analysis
QR001 Preliminary Statistics
Analyze data distributions.

QR002 Statistics to Compare Groups
Synthesize quantitative data in comparing groups using SPSS software.

QR003 Statistics to Examine Relationships Among Variables
Synthesize quantitative data to examine variable relationships using SPSS software.

Specialization Competencies (15 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Capstone Competencies (5 cr.)

IPSY 6393 - Capstone
IU001 Research Strategies
Analyze the research strategies that address contemporary issues or problems based on applied research in the field of psychology.

IU002 Issues or Problems in Psychology
Apply psychology to contemporary issues or problems in either the workplace, community, or world.

IU003 Literature Reviews
Synthesize literature related to the field of psychology that is focused on contemporary issues or problems in the workplace, community, or world.

Note on Curriculum

In an effort to ensure competencies are kept up to date and relevant to meet the learning outcomes of the program, the number and subject matter of individual competencies needed to satisfy program course requirements may change. However, program outcomes and the number and subject matter of courses
will not be impacted. As a result, the required competencies listed in a student’s individual learning plan may differ from what is currently listed in the catalog.

**MS in Information Technology**

This program is not currently accepting new students.

Offering a choice of five specializations, Walden’s MS in Information Technology program provides students with the advanced skills required for senior IT specialist and management positions. In core courses, students develop essential networking, programming, and database management skills. Students then choose advanced training in one of five high-demand specializations: Big Data Analytics, Health Informatics, Information Assurance and Cyber Security, Information Systems, or Software Engineering. After completing the four core courses, students are eligible to receive the Graduate Certificate in Information Systems at no additional cost. Upon completion of the full program, students are prepared to create, maintain, and secure information systems in a variety of settings.

**Learning Outcomes**

At the end of this program, students will be able to:

- Apply core information technology principles and practices.
- Apply best software engineering principles and practices to develop and maintain stable, secure, scalable, maintainable software.
- Work in geographically dispersed teams to produce effective solutions to complex information technology problems.
- Recommend appropriate information technology solutions based on organizational needs and an evaluation of alternatives.
- Identify and discuss professional, individual, organizational, societal, and regulatory implications of information systems and technology.
- Select technologies, policies, and procedures to assure the confidentiality, integrity, and availability of information and IT systems.

**Specializations**

- Big Data Analytics
- Health Informatics
- Information Assurance/Cyber Security
- Information Systems
- Software Engineering

**Degree Requirements**
30 total semester credits
Core Courses (12 sem. cr.)
Specialization Courses (18 sem. cr.)

Curriculum

Core Courses (12 sem. cr.)

ITEC 6111 - Information Technology in the Organization
ITEC 6115 - Computer Networking and Operating Systems
ITEC 6030 - Principles of Programming
ITEC 6145 - Enterprise Database Design

Specialization Courses (18 sem. cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Course Sequence

The sequence of courses for this program is dependent upon the specialization. Please see the course sequence chart on each specialization page.

MS in Leadership

This program is not currently accepting new students.

The MS in Leadership program is designed to help leaders build the necessary knowledge base and skills to meet the ever-evolving challenges of a complex world. The content and activities encompassed in the leadership degree program help prepare leaders to seek and find innovative answers to novel problems and challenges; deploy effective strategies to facilitate change and manage conflict; and inspire individuals to work together toward a shared vision for a better future. Moreover, this program helps prepare students to create positive change through effective leadership.

Learning Outcomes

At the end of the program, students will:

- Apply leadership principles utilized to foster positive transformation of individuals and organizations.
- Effectively utilize communication strategies appropriate to intended audience.
- Assess relationship-building strategies used by leaders.
Evaluate holistic problem solving strategies that leaders use in complex environments.
Utilize effective self-reflections skills in order to continue a lifelong evaluation of personal leadership values, strengths, and goals.
Appraise techniques leaders facilitate effective collaboration necessary to lead others towards a common goal.
Evaluate appropriate social change leadership strategies.

*Note: Courses in specializations must be taken in the sequence specified. Students should refer to course descriptions for more information on prerequisite requirements.

Note on Accreditation

At the master's level, Walden University’s Master of Business Administration (MBA), MS in Accounting, and MS in Finance are the only programs accredited by the Accreditation Council for Business Schools and Programs (ACBSP). The MS in Leadership program is not accredited by the ACBSP. Please visit our Accreditation page to see the list of Walden accreditations.

**MS in Management**

This program is not currently accepting new students.

Walden’s MS in Management program focuses on helping learners gain the managerial skills necessary to thrive in a rapidly changing world. Building on the fundamentals of quality management—sound, ethical decision making and solid communication—the program features a curriculum relevant to the real world and designed to enhance the learner's effectiveness as a manager within a wide range of organizations. Learners have the option to add three courses to the end of the program, allowing them to expand and deepen their core management knowledge through specialized study.

Learning Outcomes

At the end of this program, students will be able to:

- Assess strategies managers use to achieve organizational goals.
- Effectively utilize communication strategies appropriate to intended audience.
- Evaluate strategies managers use to create positive work environments.
- Appropriately synthesize a variety of relevant information to make sound managerial decisions.
- Utilize effective self-reflections skills in order to create professional and personal development plans.
- Appraise methods managers use to facilitate effective collaboration in support of organizational goals.
Assess how managerial skills and knowledge enable individuals to act as agents of positive social change.

**MS in Marketing**
This program is not currently accepting new students.

Featuring coursework grounded in established theory and current best practices, the MS in Marketing program examines a variety of traditional and digital tools and platforms and how they integrate into the marketing mix. Students explore customer understanding—the foundation for marketing planning and execution—and the importance of relationship marketing in customer retention. Other topics include the role of persuasion and storytelling in developing content, the creative process, leveraging the power of social media, and brand and product management. Students also examine marketing analytics as a way to inform strategic decision making. The program offers myriad hands-on project opportunities and culminates in the development of a strategic marketing plan.

Learning Outcomes

Graduates of the MS in Marketing program will be prepared to:

- Formulate statements of marketing opportunities to facilitate dialogue among stakeholders.
- Make ethically and socially responsible decisions.
- Collaborate with others from diverse perspectives in a business environment.
- Apply current trends to analyze marketing problems.
- Communicate professionally with stakeholders.
- Evaluate marketing decisions in a business environment.

**MS in Project Management**

This program is not currently accepting new students.

Walden University’s MS in Project Management can help equip students with the skills needed to manage projects while leading diverse teams to help their organizations achieve their strategic goals. In this program, students will explore ways to communicate effectively with all stakeholders and will control project risks as they successfully develop and implement projects for their organizations.

**Learning Outcomes**

At the end of the program, students will be able to:

- Demonstrate the ability necessary to produce project management outputs in accordance with established practices for conducting projects within an organization.
- Develop project-based solutions to business problems and opportunities to achieve the strategic performance goals of an organization.
- Manage individual projects from initiation to closure that meet stakeholder requirements and achieve the objectives of the project.
- Synthesize the threats and opportunities of environmental factors into the creation of project and enterprise-level risk management plans.
- Evaluate the social change impact on social, economic, and environmental factors that contribute to sustainability in project management.
- Appropriately apply professional practices for ethical and socially responsible conduct by project management practitioners.

**Vision for MS in Project Management**

To create a community of scholars and networks of project managers who will benefit the scholastic and professional communities of project management, and their clients and organizations, worldwide.

**Mission for MS in Project Management**

The mission of the program is to provide a diverse community of career professionals with the opportunity to develop project management best practices as well as the business, communication, and leadership skills necessary to manage projects and teams for the purpose of helping organizations achieve strategic goals. Graduates of the program will also be provided an opportunity to transform themselves as scholar-practitioners so that they can effect positive social change in their families, communities, and around the world.

**Note on Accreditation**

Walden’s MS in Project Management is accredited by the Global Accreditation Center (GAC) of the Project Management Institute (PMI)®. The GAC is the world’s leading specialized accrediting body for project management and related degree programs.

*The GAC Accredited Program seal is a mark of Project Management Institute, Inc.

At the master’s level, Walden University’s Master of Business Administration (MBA), MS in Accounting, and MS in Finance are the only programs accredited by the Accreditation Council for Business Schools and Programs (ACBSP). The MS in Project Management is not accredited by the ACBSP. Please visit our Accreditation page to see the list of Walden accreditations.

**MS in Software Engineering**

This program is not currently accepting new students.

The MS in Software Engineering program equips students with the advanced technical and leadership skills to oversee complex, large-scale development projects in the 2020s. Through courses developed in collaboration with IBM, students focus on:

- The application of engineering best practices to the design, development, testing, and evaluation of software systems.
- Developing cutting-edge expertise in security risk management, secure coding, big data analytics, and intelligent systems.
Learning practical, immediately applicable skills through interactive case studies, visualizations, and applications. In this master's program, hands-on programming labs give students the freedom to apply what they've learned in an authentic yet safe environment.

Learning Outcomes

Upon completion of the MS in Software Engineering, students will be able to:

- Evaluate emerging technical developments that apply to software engineering.
- Evaluate software engineering paradigms, tools, and techniques.
- Examine the skills required to lead a project in the construction of a complex commercial software system.
- Examine IT issues and methodologies used in the design and development of IT systems.
- Demonstrate an understanding of best practices used to develop and manage software development teams.
- Demonstrate an understanding of best practices used to develop and manage complex software development projects.

**Doctoral Degree Programs**

**Doctor of Business Administration (DBA)**

The DBA program is designed for visionary professionals who want to use their expertise to change how their business changes the world. With access to resources that allow students to track their progress more closely, they will define the social change impact they want to make—and then design their doctoral experience around it. Coursework in this program includes self-analysis activities as well as international case studies. Students can explore some of today's greatest business challenges and opportunities—including globalization, ethics, and relationship management—and examine those issues in relation to their own organization.

**Learning Outcomes**

At the end of the program, students will be able to:

- Evaluate the relevance of current and emerging business theory and practice from an interdisciplinary perspective (WO III, IV, V, VI, VIII).
- Formulate effective solutions to complex, real-world problems common to the practice of business and management (WO II, IV, V, VIII).
Apply current research literature to practical problems found in business and management (WO III, IV, V, VI, VIII).
Evaluate scholarly research in business and management (WO II, III, IV, V, VI).
Design rigorous research that contributes to the professional body of knowledge of business and management (WO II, III, IV, V, VI).
Design rigorous research that contributes to positive social change (WO I, II, IV, VII, VIII, IX).
Apply professional ethics appropriately (WO I, II, IV, VII, VIII, IX).

Foundation courses (3 sem. cr.)
Core business course (3 sem. cr.)
Business strategy course (3 sem. cr.)
Research methods courses (12 sem. cr.)
Specialization courses (9 sem. cr.)
Completion of Doctoral Study
  Doctoral mentoring (4 sem. cr.)
Doctoral study writing courses (3 sem. cr. per term for a minimum of 5 terms until completion, with two 8-week terms taken per semester)

Two academic residencies

Note: Students who have earned a Chartered Property Casualty Underwriter (CPCU), Professional in Human Resources (PHR), Senior Professional in Human Resources (SPHR), Global Professional in Human Resources (GPHR), Chartered Financial Analyst, or Project Management Institute designation or certification may be eligible to accelerate their DBA program. For information, contact the Student Success Advising Team.

Curriculum

Foundation Courses (3 sem. cr.)

DDBA 4990 - Business Essentials
DDBA 8006 - Contemporary Challenges in Business

Core and Business Strategy Courses (6 sem. cr.)

DDBA 8151 - Organizational Leadership: Doctoral Theory and Practice
DDBA 8161 - Business Strategy and Innovation for Competitive Advantage

Research Methods Courses (12 sem. cr.)

DDBA 8300 - Qualitative and Quantitative Methodology for Applied Business Research
DDBA 8303 - Qualitative and Case Study Methodology for Business Analysis Research
DDBA 8307B - Quantitative Business Data Analysis Using SPSS

Specialization Courses (9 sem. cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page. Changing specializations may increase a student’s expected time-to-degree completion and cost.

Residency Requirements

Complete Residency 1 face-to-face as soon as you begin your program (while taking DDBA 8006 or DDBA 8151); required in order to advance into DDBA 8300.

Complete Residency 2 face-to-face just prior to the start or during the first few weeks of DDBA 8303; required in order to advance into DDBA 8307.

Optional: Complete a DBA Doctoral Study Intensive retreat face-to-face during DDBA 8101/8101C/8101P or DDBA 9001/9001C/9001P. Contact Student Success Advising to register.
Completion of the Doctoral Capstone

**DDBA 8101 - Doctoral Study Mentoring**
**OR**
**DDBA 8101C - Doctoral Study Mentoring**
**OR**
**DDBA 8101P - Doctoral Portfolio Capstone Mentoring**
1 cr. each session = total 4 cr. To be taken along with other coursework after completion of DDBA 8303 until beginning DDBA 9001/9001C/9001P.

**DDBA 9001 - Doctoral Study Completion**
**OR**
**DDBA 9001C - Doctoral Study Completion**
**OR**
**DDBA 9001P - Doctoral Portfolio Capstone Completion**
Students take this course for a minimum of five terms (two 8-week terms per semester) and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval.
To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the CAO. Students must also publish their doctoral study on ProQuest before their degree is conferred. Learn more about the doctoral study process in the DBA Doctoral Study Rubric and Handbook.

* DDBA 8101/8101C/8101P - 1 cr. each session = total 4 cr.; To be taken along with other coursework after completion of DDBA 8303 until beginning DDBA 9001/9001C/9001P.

** Students take this course for a minimum of five terms (two 8-week terms per semester) and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval. To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the CAO. Students must also publish their doctoral study on ProQuest before their degree is conferred. Learn more about the doctoral study process in the DBA Doctoral Study Rubric and Handbook.

**Doctoral Writing Assessment**

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

**Accreditation**

Walden University’s Doctor of Business Administration (DBA) program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a
leading specialized accreditation association that identifies and supports excellence in business education.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

**Doctor of Healthcare Administration (DHA)**

The Doctor of Healthcare Administration (DHA) program prepares professionals to effectively manage the healthcare delivery demands of their organizations and the communities they serve. Through a multidisciplinary curriculum, students gain insight into the post-Affordable Care Act landscape and gain the core business and leadership skills expected by today's healthcare employers. By blending theory with research in their coursework, students in the DHA program focus on utilizing practice-based research, communication strategies, and data-driven approaches for decision making to improve the healthcare experience for both providers and patients.

**Learning Outcomes**

The DHA Program Learning Outcomes relate to the Walden University Outcomes.

As graduates of this program, students will be prepared to:

- Demonstrate evidence-based leadership approaches in changing healthcare environments. (WLO II, IV, VI, VII, VIII)
- Engage in scientific inquiry to advance research and practice in complex healthcare systems. (WLO I, II, III, V, VI, VII)
- Critically evaluate the interdisciplinary role of stakeholders in healthcare administration strategies. (WLO V, VI, VII)
- Demonstrate data-driven decision making in healthcare setting financial management, strategic planning, economic analysis, and quality assessment. (WLO II, III, IV, V, VI, VII)
- Apply ethical and legal principles to healthcare administration practice and communication. (WLO II, III, IV, VII, VIII, IX)
- Assess risk management in healthcare settings using scientifically validated principles. (WLO IV, V, VI)
- Promote positive social change through health management and systems thinking. (WLO I, II, IV, VI, VII, IX)
Track 1 (For students who hold a Master of Healthcare Administration degree)

Minimum Degree Requirements

Doctoral Writing Assessment
Foundations courses (0 cr.)
Core courses (33 cr.)
Research methods courses (10 cr.)
Capstone Research (20 cr.)
  Five Doctoral Study Seminar courses (1 cr. per term)
  Capstone Prospectus Completion (5 cr.)
  Capstone Proposal (5 cr.)
  Capstone Completion writing courses (5 cr. per term; taken continuously until completion)
  Doctoral companion course (0 cr.)
Two residencies
Optional: Capstone Intensive

Curriculum

Foundations Courses (0 cr.)

Core Courses (33 cr.)

  DDHA 8006 - Doctor of Healthcare Administration Foundational Concepts OR
  DDHA 8011 - Doctor of Healthcare Administration Foundational Concepts
  AND
  DDHA 8203 - Advanced Healthcare Operations Management
  DDHA 8103 - Advanced Healthcare Quality and Risk Management
  DDHA 8113 - Advanced Concepts in Healthcare Leadership
  DDHA 8703 - Advanced Health Analytics and Data-Driven Decision Making
  DDHA 8750 - Trends and Issues in Executive Level Management for Healthcare Administrators
  DDHA 8503 - Strategic Management and System Thinking

Research Courses (10 cr.)

  RSCH 8110 - Research Theory, Design, and Methods
  DDHA 8303 - Research Methods for Healthcare Administrators

Residency Requirements

  Residency 1 is required in order to advance into DDHA 8750, DDHA 8103, DDHA 8113, and DDHA 8703.
Complete Residency 2 after successful completion of both Residency 1 and DDHA 9003 - Doctoral Study Seminar I and prior to DDHA 9200 - Doctoral Study Prospectus Completion.

Optional: Complete a DHA Intensive during your capstone.

Completion of the Doctoral Capstone

DDHA 9003 - Doctoral Study Seminar I
DDHA 9013 - Doctoral Study Seminar II
DDHA 9023 - Doctoral Study Seminar III
DDHA 9033 - Doctoral Study Seminar IV
DDHA 9043 - Doctoral Study Seminar V
DDHA 9200 - Doctoral Study Prospectus Completion
DDHA 9203 - Doctoral Study Proposal Completion
DDHA 9213 - Doctoral Study Completion

Students are continuously enrolled in DDHA 9213 until completion of their capstone project with final chief academic officer (CAO) approval. In general, students are continuously registered in the doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the doctoral study course shell.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred. Learn more about the doctoral study process by contacting a student success advisor.

Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

**8-Year Maximum Time Frame**

In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements in the student handbook). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.
Doctor of Information Technology (DIT)

This program is not currently accepting new students.

This program prepares students to address information technology-related challenges at the highest level of an organization. Students examine the latest advancements in technology and develop solutions for complex, real-world industry challenges. They also study ways to effectively communicate complex IT strategies to company executives and stakeholders. Coursework focuses on IT strategic analysis, information management, and human-computer interaction. The curriculum blends theory and practice through a variety of learning formats, including leadership simulations, seminar courses, a doctoral study, and residencies.

Learning Outcomes

Graduates of the Doctor of Information Technology (DIT) program will be prepared to:

- Critically evaluate current research and best practices in the area of IT methods in organizations.
- Analyze best practices and research to determine appropriate design of integrated IT systems.
- Recommend IT strategies that support enterprise mission and objectives following tenets of professional, social, and ethical responsibility.
- Demonstrate IT leadership skills at the team and enterprise levels.
- Demonstrate the ability to communicate technical and business concepts to a range of audiences.
- Demonstrate the ability to formulate project management, compliance, and sourcing of IT within an organization.
- Conduct original research that contributes to professional and actionable knowledge in an applied environment.

Specializations

Applied Information Technology
Information Technology Leadership

Minimum Degree Requirements

- Doctoral Writing Assessment (0 cr.)
- Foundation course (3 sem. cr.)
- Technical core courses (18 sem. cr.)
- Research sequence (10 sem. cr.)
Specialization seminar/leadership courses (15 sem. cr.)
Completion of Doctoral Study
  Doctoral mentoring course (0 sem. cr.)
  Doctoral study completion course (3 sem. cr. each term for a minimum of five terms until completion, with two 8-week terms taken per semester)
  Two academic residencies

Curriculum

Foundation Course (3 sem. cr.)
  ITEC 8000 - Foundations and Communications for Information Technology

Technical Core Courses (18 sem. cr.)
  ITEC 8240 - Advanced Database Systems
  ITEC 8665 - Predictive Analytics for Decision Making
  ITEC 8255 - Cyber Crime Prevention and Protection
  ITEC 8225 - Technology Innovation and Change Management
  ITEC 8250 - Requirements and Quality Engineering
  ITEC 8425 - Strategic Technology Management

Research Courses (10 sem. cr.)
  ITEC 8427 - Applied Research Methods—Qualitative and Quantitative
  ITEC 8437 - Quantitative Decision Making for Strategic Analysis
  ITEC 8447 - Qualitative and Case Study Research for Strategic Analysis

Specialization Seminar/Leadership Courses (15 sem. cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page. Changing specializations may increase a student's expected time-to-degree completion and cost.

Completion of the Doctoral Study
  ITEC 8100 - Doctoral Study Mentoring
  ITEC 9000 - Doctoral Study Completion

Residency Requirements

  Complete Residency 1 as soon as you begin your program; required in order to advance into ITEC 8427.
Complete Residency 2 during your research methodology courses; required in order to advance into specialization seminar/leadership courses and ITEC 8100.

Optional: Complete a DIT Doctoral Study Intensive any time after completing the first ITEC 8100. Contact Student Success Advising to register.

* Students take this course for a minimum of five terms and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the
oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred. Learn more about the doctoral study process in the DIT Process Guide.

**Doctoral Writing Assessment**

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

**8-Year Maximum Time Frame**

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

**PhD in Health Services**

The PhD in Health Services program examines healthcare delivery and healthcare systems in the U.S. and internationally. Students are trained by scholar-practitioners to identify problems and solutions based on social science theories and models as well as a knowledge of historical and contemporary issues in health services and management. The program of study places an emphasis on healthcare practice and applied research. The program prepares students for careers in which doctoral-level education is desired, such as academia, research, government, and private sector positions within healthcare organizations.

**Learning Outcomes**

At the end of this program, students will be able to:

- Accurately evaluate the efficiency and effectiveness of healthcare policy in a dynamic healthcare environment.
- Lead and inform the professional dialogue on key health services issues.
- Design, conduct, and analyze studies of economic evaluation in healthcare.
- Apply critical-thinking skills to the analysis of controversial issues and conflicting perspectives associated with healthcare ethics and law.
- Identify and mobilize human and institutional resources and services to meet the health services needs of diverse communities and populations.
- Engage in scientific inquiry that advances the knowledge base of research and practice in health services.
Specializations

Community Health
Healthcare Administration
Leadership
Public Health Policy
Self-Designed

Minimum Degree Requirements

Doctoral Writing Assessment
Foundation course (3 cr.)
Core courses (30 cr.)
Research courses (20 cr.)
Specialization courses (20 cr.)
Electives (8–10 cr.)
Dissertation Preparation course (5 cr.)
Proposal, dissertation, and oral presentation (20 cr. min.–120 cr. [8 yr. max.])
   Dissertation writing courses (continuous enrollment in 5 cr. per term for a minimum of 4 terms until completion)
Four PhD residencies

Curriculum

Foundation Course (3 cr.)

**HLTH 8003 - Building a Multidisciplinary Approach to Health**

All beginning PhD in Health Services students are required to successfully complete this course and are automatically enrolled in it in their first quarter.

Core Courses (30 cr.)

**HLTH 8051 - Contemporary Topics in the U.S. Healthcare Delivery**

**HLTH 8201 - Principles of Population Health in Healthcare Administration**

**HLTH 8300 - Law, Ethics, and Policy in Healthcare Administration**

**HLTH 8401 - Healthcare Financial Management and Economics**

**HLTH 8500 - Human Resources Management and Organizational Development and Leadership for Healthcare Administrators**

**HLTH 8800 - Marketing Management and Business Communication**

Research Courses (20 cr.)
Advanced Research Course (5 cr.)

All PhD students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements. One of the following three courses is required:

- RSCH 8260 - Advanced Quantitative Reasoning and Analysis
- RSCH 8360 - Advanced Qualitative Reasoning and Analysis
- RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Foundation Research Sequence (15 cr.)

Courses composing the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8100 or 8110 must be completed prior to Residency 2 of the academic residencies. RSCH 8200 or 8210 and RSCH 8300 or 8310 must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8110 - Research Theory, Design, and Methods
- RSCH 8210 - Quantitative Reasoning and Analysis
- RSCH 8310 - Qualitative Reasoning and Analysis

Specialization Courses (20 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Elective Courses (8–10 cr.)

Select two elective courses from other doctoral-level programs with the approval of the program director.

Dissertation Preparation (5 cr.)

- HLTH 8551 - Preparing for Dissertation

Completion of the Dissertation (minimum of 20 cr.)

- Dissertation Writing Courses
  - HLTH 9001 - Health Services Dissertation

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation/doctoral study course until they complete...
their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.
To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Residency Requirements

**Complete Residency 1 in Term 1; required in order to advance into RSCH 8110 in Term 2.**

Complete Residency 2 between Terms 2 and 5; required in order to advance into HLTH 8551.

Complete Residency 3 between Terms 6 and 7; required in order to advance into HLTH 9001.

Complete Residency 4 after your prospectus is approved and you are enrolled in EDUC 9000 or EDPD 8990, complete residency 4 during your third year or beyond as:

- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR
- a dissertation intensive (DRWI 8500). Contact Student Success Advising to register. **Note: Intensives are not included in Fast Track tuition.**

Optional: Complete a PhD dissertation intensive (DRWI 8500) during your dissertation. Contact Student Success Advising to register.

PhD in Health Services for MHA Graduates

Students who hold a Master of Healthcare Administration (MHA) degree now have the opportunity to complete Walden’s PhD in Health Services in less time. The special program of study recognizes the academic progress previously achieved with an MHA degree and waives 30 credits of core courses and one elective course required for the PhD in Health Services, significantly reducing the time and money needed to complete the doctoral degree.

The program is available to current students and alumni of the Walden MHA program, as well as to students who hold an MHA degree from another accredited university.

Degree Requirements for Students Who Hold an MHA Degree

- Doctoral Writing Assessment
Foundation course (3 cr.)
Research courses (20 cr.)
Specialization courses (20 cr.)
Electives (4–5 cr.)
Dissertation preparation course (HLTH 8551; 5 cr.)
Completion of Dissertation
  Dissertation writing courses (continuous enrollment in 5 cr. per term for a minimum of 4 terms until completion)
Four PhD residencies

Master of Philosophy (Embedded Degree)

Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:

- All required PhD core courses (or KAMs)
- All required PhD specialization courses (or KAMs)
- All required doctoral research and advanced research courses
- Program prospectus development course
- Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.

The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

8-Year Maximum Time Frame

In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements in the student handbook). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.
**PhD in Industrial and Organizational (I/O) Psychology**

Defined as the "scientific study of the workplace," industrial and organizational (I/O) psychology explores the impact of individual, group, and organizational psychology on workplace health, productivity, and effectiveness.

The PhD in Industrial and Organizational Psychology degree is designed to prepare scholar-practitioners to apply evidence-based I/O principles to lead positive change in the 21st-century workplace as researchers, consultants, educators, or organizational leaders.

Through core coursework completed in a prescribed sequence, students develop an in-depth understanding of individual, group, and organizational behavior in the workplace; advanced research design and analytical skills; and expertise applying evidence-based I/O practices in diverse organizational settings. Optional blended coursework provides opportunities for in-person feedback and hands-on practice, while specializations allow students to gain additional expertise in areas consistent with their interests and career goals. Through their dissertation, students have the opportunity to explore in-depth a specific area of interest and contribute to the body of knowledge in the I/O field.

The curriculum in this doctoral program is designed to reflect the professional guidelines set forth by the Society for Industrial and Organizational Psychology (SIOP).

**Learning Outcomes**

As graduates of this program, students will be able to:

- Explain behavior using current theory and research in industrial and organizational (I/O) psychology.
- Discuss the history of industrial and organizational psychology, how the specialty of I/O psychology is unique, and how to develop an I/O psychology identity.
- Critically examine how key industrial and organizational issues impact organizations (i.e., issues such as selection, performance management, performance measurement, job analysis, individual behavior, leadership, motivation, organizational culture, work teams, and/or job attitudes).
- Correctly utilize principles of basic and advanced research methods to produce independent scholarly research.
- Evaluate research in the area of industrial and organizational psychology.
- Develop empirically based organizational intervention practices.
- Evaluate the effectiveness of organizational interventions.
- Use ethical research and intervention practices.
- Evaluate the influence of diverse populations on individual, group, and organizational behavior.
Apply principles of industrial and organizational psychology to scholarly and/or professional activities to promote lifelong learning. Engage in research practices that result in positive social change.

Specializations

Changing specializations may increase a student’s expected time-to-degree completion and cost.

- Consulting Psychology
- Evidence-Based Coaching
- General Practice
- Human Resource Management
- International Business
- Self-Designed

For Students Entering With a BS Degree

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan and Plan of Study
- Foundation course (3 cr.)
- Core courses (40 cr.)
- Research courses (25 cr.)
- Specialization courses (15–17 cr.; see each specialization for specific courses)
- Completion of the Doctoral Dissertation
  - Dissertation support courses (7 cr.)
  - Dissertation writing courses (5 cr. per term for a minimum of four terms; taken continuously until completion)
- Quarter Plans
- Four PhD residencies

Curriculum

Foundation Course (3 cr.)

- IPSY 8004 - Foundations of Graduate Study in Psychology

Core Courses (40 cr.)

- IPSY 8202 - Survey Research Methods
IPSY 8214 - Consulting for Organizational Change
IPSY 8252 - Themes and Theories of I/O Psychology
IPSY 8480 - Psychology of Organizational Behavior
IPSY 8551 - I/O Tests and Measurement
IPSY 8552 - Psychological Motivation at Work
IPSY 8754 - Personnel Psychology in the Workplace
IPSY 8579 - Job Attitudes, Measurement, and Change

Research Courses (25 cr.)

- RSCH 8110 - Research Theory, Design, and Methods
- RSCH 8210 - Quantitative Reasoning and Analysis
- RSCH 8260 - Advanced Quantitative Reasoning and Analysis
- RSCH 8310 - Qualitative Reasoning and Analysis
- RSCH 8360 - Advanced Qualitative Reasoning and Analysis

Specialization Courses (15–17 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Residency Requirements

Residency 1 – Complete Residency 1 as soon as you begin your program; should be completed in Term 1 or Term 2.
Residency 2 – Complete Residency 2 at the beginning of your second year, around the time of second research course.
Residency 3 – Complete Residency 3 once you have a prospectus in Walden’s review system.
Residency 4 – Complete residency 4 after your prospectus is approved as follows:
    Residency 4 General (RESI 8404) OR
    Residency 4 Proposal Writing (RESI 8404Q) OR
    Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
    Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
    Residency 4 Publishing & Presenting (RESI 8404T) OR
    an approved professional conference (RESI 8900 for select programs only.
    Contact Advising for information.) OR
    a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. **NOTE:** Intensive Retreats are NOT included in Fast Track tuition.

Optional: Complete a dissertation intensive (DRWI 8500) during IPSY 9000. Contact Student Success Advising to register.
Completion of the Doctoral Dissertation

**IPSY 8115 - Writing a Quality Prospectus in Psychology OR**  
**IPSY 8185 - Writing a Quality Prospectus in Psychology AND**  
**IPSY 8702 - Dissertation Literature Review Lab**  
**IPSY 9000 - Dissertation**  
Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred.

**IPSY 8185 - Writing a Quality Prospectus in Psychology**
**AND**
**IPSY 9000 - Dissertation**
Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred.

You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency requirements. **NOTE:** Intensive Retreats are NOT included in Fast Track tuition. | |
| | Optional: Complete a dissertation intensive (DRWI 8500) during IPSY 9000. Contact Student Success Advising to register. | |

* These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

** Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Note on Licensure

*The PhD in Industrial and Organizational Psychology is not a licensure-leading program and does not prepare an individual to become a licensed psychology professional.*

Master of Philosophy (Embedded Degree)

Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:

---

Walden University Catalog (March 2022) 458
All required PhD core courses (or KAMs)
All required PhD specialization courses (or KAMs)
All required doctoral research and advanced research courses
Program prospectus development course
Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.
The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

PhD in Management

The ACBSP-accredited online PhD in Management degree from Walden University takes an interdisciplinary approach to the field of management and its influence on the development of individuals and society. Students conduct original research in a specific area of interest as they focus on current management research problems and connect their research to implications for positive social change. Students may choose a specialization that fits a personal or career objective or design an individualized specialization. PhD in Management students explore the challenges and opportunities in their profession and within today’s organizations. Aligning with Walden’s mission of positive social change, students also study ways to facilitate positive social change through original research in management, ethical decision making and theoretical challenges to enhance their capabilities as researchers, scholars, managers, teachers, or consultants.

Learning Outcomes
Evaluate the evolution of the field of management and organizations and its influence on human and societal development.
Analyze key theories, concepts, and tools as they relate to the functioning of leadership and organizations.
Evaluate management and systems thinking principles that have influenced the development of organizations and societal systems.
Evaluate the relevance of seminal, current, and emerging management and organizational change theory and practice from an interdisciplinary perspective.
Demonstrate the skills needed to conduct research that contributes to positive social change.

Completion Program

Students who have been in a PhD Management program at another institution and only need to complete their dissertation may be eligible to earn their doctorate through Walden’s PhD completion program.

Minimum Degree Requirements

Doctoral Writing Assessment (0 cr.)
Core courses (20 cr.)
Specialization courses (15 cr.)
Foundation Research Sequence (15 cr.)
Advanced Research course (5 cr.)
Completion of Doctoral Capstone
Dissertation Preparation courses (9 cr.)
Dissertation writing course (5 credits per quarter for a minimum of four quarters until completion)
Four PhD residencies

Curriculum

Core Courses (20 cr.)

MGMT 4990M - Business Essentials
MGMT 8003M - Gateway to Doctoral Management Studies
MGMT 8005M - Organizational Perspectives and Implications for Leaders
MGMT 8007M - Complexity and Systems Thinking Dynamics
MGMT 8009M - Organizational Decision Making and Judgment

Specializations Courses (15 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Foundation Research Sequence (15 cr.)

RSCH 8110 - Research Theory, Design, and Methods
RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis

Advanced Research Course (5 cr.)

PhD students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

RSCH 8260 - Advanced Quantitative Reasoning and Analysis
RSCH 8360 - Advanced Qualitative Reasoning and Analysis
RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Residency Requirements

Residency 1 - Complete Residency 1 as soon as you begin your program; no later than within 90 days of completing MGMT 8003M.
Residency 2 - Complete Residency 2 at the beginning of your second year, around the time of second research course (RSCH 8310). Completion of Residencies 1
and 2 is required prior to registration in the advanced research course and MGMT 9000.

Residency 3 - Complete Residency 3 once you have a draft prospectus.

Residency 4 - Complete residency 4 after your prospectus is approved as:
- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR

A dissertation intensive (DRWI 8500) during MGMT 9000M in the dissertation writing phase to progress toward completion and defense of the dissertation. Contact Student Success Advising to register.

Optional: Complete a dissertation intensive (DRWI 8500) during MGMT 9000M. Contact Student Success Advising to register. Note: Intensives are not included in Fast Track tuition.

Completion of the Doctoral Capstone

Dissertation Preparation Courses (9 cr.)

- MGMT 8900M - Prospectus Development and Alignment
- MGMT 8910M - Dissertation Development Process
- MGMT 8920M - Developing the Content Literature Review and Research Method and Design

Dissertation

- MGMT 9000M - Doctoral Dissertation (5 credits per quarter for a minimum of four quarters until completion) *
  *Students are continuously enrolled in MGMT 9000M for a minimum of four quarters until completion of their dissertation with final chief academic officer (CAO) approval.
  To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Learn more about the dissertation process in the Dissertation Guidebook.

A minimum 3.0 GPA is mandatory.

The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

Accreditation

Walden University’s PhD in Management program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). ACBSP is a leading, specialized accreditation association that identifies and supports excellence in business education.
8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

Psyd in Behavioral Health Leadership

Today’s healthcare system demands behavioral health leaders who can manage the delivery of quality behavioral health and mental health services in an increasingly integrated care setting. Students in this professional doctoral program in leadership are prepared to meet this need. Students in this nonlicensure program can gain cross-disciplinary knowledge, business and management skills, and practical experience that can be used to help shape the rapidly changing integrated healthcare landscape.

Learning Outcomes

Graduates of the PsyD in Behavioral Health Leadership program will be able to:

Articulate the foundation of behavioral health leadership.
Develop a personal orientation to the practice of behavioral health leadership that is theoretically and empirically anchored.
Produce an applied practice-based project exploring a behavioral health practice issue or problem.
Assess behavioral health behavior in broad cultural, social, political, and/or economic contexts.
Evaluate the delivery of psychological services of behavioral health programs for diverse populations.
Develop leadership skills for the management of mental health delivery systems.
Evaluate relevant ethical principles in managing products and delivery of services in behavioral health work settings.
Describe how legal and regulatory policies in behavioral healthcare impact individuals, communities, and society.
Promote positive social change through evidence-based behavioral health leadership practices.
Demonstrate the ability to apply principles of behavioral health leadership in diverse mental health delivery settings.

*** Students take this course for a minimum of four quarters and are continuously enrolled until completion of their doctoral research project with final chief academic officer (CAO) approval. In general, students are continuously registered in the doctoral capstone course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the doctoral capstone course shell.

To complete a doctoral capstone, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their capstone on ProQuest before their degree is conferred.

Note on Licensure

*The PsyD in Behavioral Health Leadership is not a licensure-leading program and does not prepare an individual to become a licensed psychology professional.*
Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

Post-Doctoral Certificate Programs

Post-Doctoral Bridge to Business Administration Certificate

The Post-Doctoral Bridge to Business Administration Certificate program is designed to provide students who hold a doctoral degree in business or a non-business field with core knowledge in a business discipline outside their previous doctoral studies. Students explore such topics as marketing, business strategy, and compliance. This certificate program emphasizes business aspects in a global context and explores relevant trends students can apply in settings that include postsecondary education, research, and consulting.

With the exception of DDBA 8006, DDBA 8161, and a maximum of one course in a three-course focus area that satisfies a learning outcome in a different focus area, any courses used toward the completion of a doctoral program cannot be applied toward the completion of the post-doctoral bridge certificate.

Certificate Requirements

- Hold a recognized terminal degree in a business or non-business field
- 15 total semester credit hours
  - Foundation course (3 sem. cr.)
  - Core course (3 sem. cr.)
  - Focus courses (9 sem. cr.)

Curriculum

Foundation Course (3 sem. cr.)
DDBA 8006 - Contemporary Challenges in Business

Core Course (3 sem. cr.)

DDBA 8161 - Business Strategy and Innovation for Competitive Advantage

Focus Courses (9 sem. cr.)

Choose from one of the following three-course focus sequences:

Accounting

DDBA 8550 - Seminar in Managerial Accounting
DDBA 8551 - Seminar in Accounting-Based Performance Evaluation Systems
DDBA 8552 - Seminar in International Aspects of Managerial Accounting

Entrepreneurship

DDBA 8511 - Seminar in Innovation Management
DDBA 8541 - Seminar in Entrepreneurial Finance
DDBA 8531 - Seminar in B2B Marketing

Finance

DDBA 8540 - Seminar in International Finance
DDBA 8541 - Seminar in Entrepreneurial Finance
DDBA 8523 - Seminar in Law and Compliance

Healthcare Management

DDBA 8560 - Seminar in Healthcare Managerial Decision Making
DDBA 8561 - Seminar in Managing Healthcare Delivery Systems
DDBA 8562 - Seminar in Law and Ethics in Healthcare Management

Human Resource Management

DDBA 8580 - The New HR: The Savvy Strategic Partner
DDBA 8581 - Succession Planning: A Survival Tool of the Fittest
DDBA 8582 - An HR Plan for Organizational Agility

Information Systems Management

DDBA 8510 - Seminar in Global Supply Chain Management
DDBA 8511 - Seminar in Innovation Management
DDBA 8512 - Seminar in IT for Competitive Advantage

International Business
DDBA 8510 - Seminar in Global Supply Chain Management
DDBA 8540 - Seminar in International Finance
DDBA 8524 - Seminar in Multicultural Management

Leadership

DDBA 8521 - Seminar in Change Management
DDBA 8522 - Seminar in Sustainability
DDBA 8524 - Seminar in Multicultural Management

Marketing

DDBA 8533 - Seminar in Marketing Research
DDBA 8531 - Seminar in B2B Marketing
DDBA 8532 - Seminar in Consumer Behavior

Project Management

DDBA 8570 - Seminar in Program and Portfolio Management
DDBA 8571 - Seminar in Project Portfolio Performance and Organizational Effectiveness
DDBA 8572 - Seminar in Project-Based Strategic Leadership

Post-Doctoral Bridge to Management Certificate

The Post-Doctoral Bridge to Management Certificate program is designed to provide students who hold a doctoral degree in management or a non-management field with core knowledge in a management discipline outside their previous doctoral studies.
Students explore areas such as finance, human resources and organizational behavior, leadership strategy, innovation and organizational design, and information systems. This certificate program emphasizes management aspects in a global context and explores relevant trends students can apply in settings that include postsecondary education, research, and consulting.

With the exception of MGMT 8003M, any courses used toward the completion of a doctoral program cannot be applied toward the completion of the post-doctoral bridge certificate.

Certificate Requirements

Hold a recognized terminal degree in a business or non-business field
20 total quarter credit hours
Foundation course (5 cr.)
Focus courses (15 cr.)

Curriculum

Foundation Course (5 cr.)

MGMT 8003M - Gateway to Doctoral Management Studies

Focus Courses (15 cr.)

Choose from one of the following three-course focus sequences*:

Leadership and Organizational Strategy

MGMT 8405M - Challenging Conventional Leadership and Influence
MGMT 8415M - Socially Conscious Leader
MGMT 8425M - Responding to Behavior and Change as a Multicultural Leader

Information Systems Management

MGMT 8505M - IT Security and Compliance
MGMT 8515M - Strategic IT Leadership and System Architecture
MGMT 8525M - Big Data Decision Making and Management

21st Century Finance

MGMT 8605M - Financial Risk Management and Decision Making for Organizations
MGMT 8615M - Financial Corporate Social Responsibility and Ethics
MGMT 8625M - Leadership Through Changing Financial Organizational Structures
Human Resource Management

MGMT 8705M - Organizational Behavior Performance and Evaluation
MGMT 8715M - Human Resource Strategy, Legal, and Ethical Considerations
MGMT 8725M - Human Resource Talent Management

Organizational Design and Innovation

MGMT 8805M - Agile and Disruptive Innovation Management
MGMT 8815M - Managing by Design Theory
MGMT 8825M - Ethics of Artificial Intelligence and Autonomous Systems

Course Sequence

The recommended course sequence is as follows:

<table>
<thead>
<tr>
<th>Quarter</th>

<td>Focus Courses*</td>
<td>15 cr.</td>
</tr>
</tbody>
</table>

*Note: Students take focus courses in the three-course sequences as listed.

Dual Degree

BS in Business Administration Dual Degree and Global Business Concentration Programs

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden's Time-to-Degree Completion policies.

Graduates in the Dual Degree program obtain both their home institution Bachelor of Science (BS) in Business Administration as well as a BS in Business Administration from Walden University. Both programs can be completed in nine semesters.

The Walden Dual Degree program is designed to give students the tools for an international career in business. It is a 10-course sequence of core courses in the Walden BS in Business Administration program that, taken in conjunction with the home institution BS in Business Administration program allows the student to earn a BS in Business Administration from Walden University.

The Dual Degree program has many benefits:

- It offers an intensive curriculum designed to build business skills.
Students additionally obtain a Certificate on Global Business upon completion of the fourth Walden University course, and a Certificate in Global Marketing Communications upon completion of the seventh course. Students obtain their BSBA degree upon completion of their last course in the sequence of Walden University Dual Degree coursework, and completion of their UVM course work is required.

The course sequence is designed to allow the student the same amount of time to complete the bachelor's degree at their local university.

Students can earn a degree from a U.S. university without leaving their home country.

Students become skilled at working individually and in teams at distance using technology.

Students build their English skills for use in professional and business environments. Students learn time management skills to meet the exigencies of a dual degree, the academic demands of the on-site home campus and the different demands of Walden's one online program.

The Dual Degree program offers start dates every semester: January, May, and September. Please consult with the Walden coordinator for specific details.

Global Business Concentration Program

The Global Business Concentration (GBC) is designed for students who wish to enhance their global business knowledge, complete coursework from a U.S. university, and gain business knowledge and experience. Students are not required to have previous coursework in business, and thus, students from non-business majors interested in obtaining training and a credential in business from a U.S. institution can participate. The concentration is a three-course sequence, two of which are used in the Dual Degree program.

The Global Business Concentration has many benefits:

- It requires only three semesters of coursework to complete the sequence.
- Students will receive a Certificate of Recognition from Walden University upon successful completion of the courses.
College of Nursing

Bachelor's Degree Programs

Bachelor of Science in Nursing (BSN) (Competency Based)

Tempo Learning® is Walden's competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

RN-BSN Track

Degree Requirements

- 180 total credits
- General education courses (50 cr.)
- Upper-level nursing core courses (50 cr.)
- Elective courses and prior nursing credit (80 cr.)

Core Curriculum

General Education Courses (50 cr.)

See the general education section of this Walden University Catalog.

Upper-Level Nursing Core (50 cr.)

NURS 3100 - Issues and Trends in Nursing

(Note: NURS 3100 is worth 5 credits, not 6, in the competency-based program.)
IN3001 The Power of Nursing
Recognize the role of the nurse as a leader in the dynamic field of healthcare.

IN3002 Nurses at the Forefront of Issues and Trends
Analyze factors, issues, and trends impacting the nursing profession.

IN3003 Quality and Safety Practices for Healthcare Solutions
Explain how evidence-based nursing solutions promote patient quality and safety.

IN3004 Interprofessional Teamwork: Civil Collaboration for the Common Good
Recommend appropriate strategies to promote civility and interprofessional communication in the workforce.

IN3005 Powerful Caring Leads to Social Change
Analyze the responsibility of nursing professionals to advocate for social change.

IN3006 Creating Your Personal Nursing Legacy
Evaluate areas of strength and areas of professional growth for improving the health and healthcare delivery of populations.

NURS 3020 - Health Assessment

HA3001 Cultural and Genetic Influences on Health
Identify population health, cultural influences, and genetic and genomic information as it relates to conducting a health history and physical assessment.

HA3002 Ethical Issues in Health Assessment
Articulate ethical issues related to obtaining a health history and physical exam.

HA3003 Biopsychosocial Factors
Evaluate the impact of biopsychosocial factors on a patient during a health assessment.

HA3004 Comprehensive Health History
Conduct and document a comprehensive health history.

HA3005 Comprehensive Physical Assessment
Conduct and document a comprehensive physical assessment.

NURS 3110A - Information Management and Patient Care Technology

IM3001A Informatics in Healthcare
Recognize the importance of nursing informatics in healthcare and how it impacts the nurse’s role and the healthcare institution.

IM3002A Clinical Data Evaluation
Evaluate clinical data to support evidence-based decision-making related to safe, quality healthcare delivery.

IM3003A Protecting Patient Privacy
Use strategies to ensure the protection of patient data and privacy.

IM3004A Healthcare Technology and Informed Decision Making
Create educational plans in collaboration with patients based on information from healthcare technology.

NURS 3150 - Foundations of Nursing Research
NR3001 Research Process
Recognize the elements of the research process.
NR3002 Research Methodology
Analyze research methodologies.
NR3003 Interpreting Data
Analyze and interpret research data.
NR3004 Research Recommendations
Generate reasonable conclusions and recommendations based on published research findings.

NURS 4100 - Quality and Safety Through Evidence-Based Practice
EP4001 Evidence-Based Practice Models for Research
Understand the importance of using models to facilitate evidence-based practice.
EP4002 Clinical Nursing Issues
Develop an evidence-based practice question based on a clinical nursing issue.
EP4003 Evaluating Research
Evaluate research related to a clinical practice issue.
EP4004 Designing Interventions
Recommend evidence-based clinical interventions or process improvements to promote positive patient health outcomes.

NURS 4105 - Advocacy Through Healthcare Policy
HP4001 Policy and the Role of the Nurse
Analyze the role of the nurse as a force that shapes policy.
HP4002 U.S. Healthcare System
Demonstrate an understanding of the U.S. healthcare system.
HP4003 Social Determinants of Health
Analyze healthcare policy and social determinants of health and how they impact health disparities.
HP4004 Evaluating Health Policy
Evaluate federal, state, and local policies on healthcare.
HP4005 Advocacy for Policy Change
  Recommend policy change to advocate for positive patient outcomes.
NURS 4115 - Role of the Nurse—Public and Global Health
GH4001 Principles of Epidemiology
  Recognize principles of epidemiology.
GH4002 The Role of the Nurse in Disaster and Emergency Preparedness
  Analyze the role of the nurse leader in preparing for and responding to public health disasters and emergencies.
GH4003 Communication and Collaboration With Diverse Cultures
  Analyze population health beliefs and behaviors to inform culturally competent nursing practice.
GH4004 The State of Global Health
  Compare a health problem and the healthcare system of the U.S. to other countries.
NURS 4210 - Role of the Nurse Leader in Population Health
PH4001 The Role of the Nurse Leader in Population Health
  Analyze the role of the nurse leader in population health.
PH4002 Identifying Health Problems Within Your Community
  Justify a public health problem within your community using multiple sources of data.
PH4003 Community Assessment (Practicum)
  Analyze a population health problem based on a community assessment.
PH4004 Evidence-Based Practice in Public Health Nursing (Practicum)
  Synthesize sources of information to inform public health nursing interventions.
PH4005 Evidence-Based Intervention Plan (Practicum)
  Create an evidence-based primary intervention plan at the system level in collaboration with health leaders to improve the health of a population in your community.
NURS 4005 - Topics in Clinical Nursing
CN4001 Nurse as Leader
  Analyze the leadership role of the nurse in preventing and managing health problems across the lifespan in healthcare practice settings.
CN4002 Genetics and Genomics
CN4003 Staffing Plan
  Analyze the process of creating a staffing plan that meets both patient care needs and budget constraints.
CN4004 Data-Driven Nursing Interventions
   Create a data-driven nursing intervention based on quality indicators.

NURS 4220A - Leadership Competencies in Nursing and Healthcare
   LC4001A Leadership for Organizational Culture and Growth
      Analyze leadership for organizational culture and growth to promote positive social change through patient quality and safety.

   LC4002A Healthcare Quality
      Analyze healthcare quality for nursing practice.

   LC4003A Quality Improvement Processes
      Analyze quality improvement processes.

   LC4004A Quality Improvement Tools
      Analyze information from quality improvement tools.

   LC4005A Improving Patient Quality and Safety
      Apply quality improvement processes and tools as a scholar-practitioner to improve quality and safety.

Elective Courses and Prior Nursing Credit (80 cr.)

Nurses admitted to the program may be awarded up to 50 quarter credits for meeting competencies required to achieve the nursing license through either a diploma program or an associate degree program.

Students with less than 80 transfer credits can choose elective courses from any of Walden's bachelor degree programs.

**Bachelor of Science in Nursing (BSN) Completion Program**

In the Bachelor of Science in Nursing (RN-BSN) Completion Program, current registered nurses (RNs) who have a diploma or associate degree in nursing are provided with the opportunity to earn a BSN degree.

Walden's Commission on Collegiate Nursing Education (CCNE)-accredited RN-BSN completion program is structured to support and equip RNs with specialized skills and current knowledge they can apply on the job immediately. Students may be eligible to transfer up to 75%* of the required credits. Classes start every 6 weeks.**

The hallmark offering of this program is the interactive Digital Learning Experience™ by Shadow Health®. With real-time, virtual assessments, students can engage in a highly interactive learning environment through the simulation.

Prospective Washington students: Walden University is approved by the Washington State Nursing Care Quality Assurance Commission to provide practice experiences in Washington State for a Bachelor's of Science in Nursing; Master of Science in Nursing
with a specialization in Nursing Education, Nursing Informatics, Leadership and Management, Family Nurse Practitioner, Adult-Gerontology Acute Care Nurse Practitioner, Adult-Gerontology Primary Care Nurse Practitioner, and Psychiatric and Mental Health Nurse Practitioner; as well as the Doctor of Nursing Practice (DNP) program. For more information, go to the following website: https://www.doh.wa.gov/LicensesPermitsandCertificates/NursingCommission/NursingEducation/NursingPrograms.

Note: The Bachelor of Science in Nursing (BSN) program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

* **Transfer credits and start times do not apply to the Bachelor of Science in Nursing (BSN) (Competency Based) modality.

Learning Outcomes

- Apply leadership and informatics concepts in decision making to promote patient safety and quality care.
- Use evidence based on the sciences, humanities, and research to guide nursing practice across the health-illness continuum in a variety of healthcare settings.
- Evaluate the implications of policy on issues of access, equity, affordability, and social justice in healthcare delivery including the health of vulnerable populations and healthcare disparities.
- Demonstrate effective communication and collaboration skills to improve patient outcomes.
- Implement individual and population-focused interventions to promote health and to prevent and manage disease and injuries.
- Exhibit accountability for personal and professional behaviors in accordance with standards of moral, ethical, and legal conduct with a commitment to continuous professional development.
- Provide patient-centered nursing care based on a comprehensive and focused health assessment across the lifespan using sound clinical judgment as well as developmentally and culturally appropriate approaches.

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their Bachelor of Science in Nursing (BSN) through the competency-based education modality. Upon successful completion of program requirements, students will earn the
same Walden degree in either modality. See the Bachelor of Science in Nursing (BSN) (Competency Based) page for program details.

Accreditation

The Baccalaureate Degree Program in Nursing (BSN), Master’s Degree Program in Nursing (MSN), and Doctor of Nursing Practice (DNP) program at Walden University are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE). Officially recognized by the U.S. Secretary of Education as a national accreditation agency, the Commission on Collegiate Nursing Education (CCNE) is an autonomous accrediting agency, contributing to the improvement of the public's health. CCNE ensures the quality and integrity of baccalaureate, graduate, and residency programs in nursing.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

Concentrations

**RN-BSN Track - Bachelor of Science in Nursing (BSN)**

The Bachelor of Science in Nursing (BSN) Completion Program provides current registered nurses (RNs) who have a diploma or associate's degree in nursing with the opportunity to earn a BSN degree.

The program is specifically designed to provide students with the evidence-based practices that can be applied on the job immediately. At the same time, students will develop the skills of reflection, independent learning, and enhanced critical thinking that will enable them to stay current in their field throughout their career.
Degree Requirements

to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

**RN-BSN-AIM Track - Bachelor of Science in Nursing (BSN)**

The RN-BSN-AIM program provides current registered nurses (RNs) who have a diploma and/or associate's degree in nursing with the opportunity to earn a BSN degree as well as take three master's-level courses that can be transferred* into a Master of Science in Nursing (MSN) degree.

The program is specifically designed to provide students with the evidence-based practices that can be applied on the job immediately. At the same time, students will develop the skills of reflection, independent learning, and enhanced critical thinking that will enable them to stay current in their field throughout their career.

The RN-BSN-AIM program will provide a student with a bachelor's degree. All students will enter the program with previously earned education credits. These credits may include:

- Credits awarded for meeting competencies required to achieve the nursing license through either a diploma program or an associate's degree program.
- Transfer credits from undergraduate courses that they have taken at other universities.
- 135 of the 181 quarter credits may potentially be transferred into the program (depending upon the qualifications the students bring as they enter).

*After completion of the BSN program, students must apply to the MSN program, and the three master's-level courses can be transferred into an MSN degree if the students receive a grade of B or higher.

**Degree Requirements**

181 total credits
- General Education (50 cr.)
- Upper-level nursing core courses (51 cr.)

Upper-Level Nursing Core (50 cr.)

NURS 3100 - Issues and Trends in Nursing
(Note: NURS 3100 is worth 5 credits, not 6, in the competency-based program.)
IN3001 The Power of Nursing
  - Recognize the role of the nurse as a leader in the dynamic field of healthcare.
IN3002 Nurses at the Forefront of Issues and Trends  
Analyze factors, issues, and trends impacting the nursing profession.

IN3003 Quality and Safety Practices for Healthcare Solutions  
Explain how evidence-based nursing solutions promote patient quality and safety.

IN3004 Interprofessional Teamwork: Civil Collaboration for the Common Good  
Recommend appropriate strategies to promote civility and interprofessional communication in the workforce.

IN3005 Powerful Caring Leads to Social Change  
Analyze the responsibility of nursing professionals to advocate for social change.

IN3006 Creating Your Personal Nursing Legacy  
Evaluate areas of strength and areas of professional growth for improving the health and healthcare delivery of populations.

NURS 3020 - Health Assessment

HA3001 Cultural and Genetic Influences on Health  
Identify population health, cultural influences, and genetic and genomic information as it relates to conducting a health history and physical assessment.

HA3002 Ethical Issues in Health Assessment  
Articulate ethical issues related to obtaining a health history and physical exam.

HA3003 Biopsychosocial Factors  
Evaluate the impact of biopsychosocial factors on a patient during a health assessment.

HA3004 Comprehensive Health History  
Conduct and document a comprehensive health history.

HA3005 Comprehensive Physical Assessment  
Conduct and document a comprehensive physical assessment.

NURS 3150 - Foundations of Nursing Research

NR3001 Research Process  
Recognize the elements of the research process.

NR3002 Research Methodology  
Analyze research methodologies.

NR3003 Interpreting Data  
Analyze and interpret research data.

NR3004 Research Recommendations  
Generate reasonable conclusions and recommendations based on published research findings.
NURS 4115 - Role of the Nurse—Public and Global Health

GH4001 Principles of Epidemiology
Recognize principles of epidemiology.
GH4002 The Role of the Nurse in Disaster and Emergency Preparedness
Analyze the role of the nurse leader in preparing for and responding to public health disasters and emergencies.
GH4003 Communication and Collaboration With Diverse Cultures
Analyze population health beliefs and behaviors to inform culturally competent nursing practice.
GH4004 The State of Global Health
Compare a health problem and the healthcare system of the U.S. to other countries.

NURS 5052 - Essentials of Evidence-Based Practice

EB001 Evidence-Based Practice and the Quadruple Aim
Analyze the relationship between evidence-based practice and the Quadruple Aim in healthcare organizations.
EB002 Research Methodology
Analyze research methodologies described in peer-reviewed articles.
EB003 Clinical Inquiry, Problem-Intervention-Comparison-Outcome-Time (PICOT), and Searching Databases
Analyze relevant, peer-reviewed articles in support of PICOT questions.
EB004 Critical Appraisal, Evaluation/Summary, and Synthesis of Evidence
Recommend best practices based on critical appraisal of evidence-based research.
EB005 Evidence-Based Decision-Making
Recommend evidence-based organizational changes using an evidence-based practice approach to decision making.
EB006 Disseminating Evidenced-Based Practice Changes
Analyze dissemination strategies for evidence-based practice changes in healthcare.

NURS 4005 - Topics in Clinical Nursing

CN4001 Nurse as Leader
Analyze the leadership role of the nurse in preventing and managing health problems across the lifespan in healthcare practice settings.
CN4002 Genetics and Genomics
CN4003 Staffing Plan
Analyze the process of creating a staffing plan that meets both patient care needs and budget constraints.
CN4004 Data-Driven Nursing Interventions
Create a data-driven nursing intervention based on quality indicators.

NURS 4210 - Role of the Nurse Leader in Population Health
PH4001 The Role of the Nurse Leader in Population Health
   Analyze the role of the nurse leader in population health.
PH4002 Identifying Health Problems Within Your Community
   Justify a public health problem within your community using multiple sources of data.

PH4003 Community Assessment (Practicum)
   Analyze a population health problem based on a community assessment.

PH4004 Evidence-Based Practice in Public Health Nursing (Practicum)
   Synthesize sources of information to inform public health nursing interventions.

PH4005 Evidence-Based Intervention Plan (Practicum)
   Create an evidence-based primary intervention plan at the system level in collaboration with health leaders to improve the health of a population in your community.

NURS 4220A - Leadership Competencies in Nursing and Healthcare
LC4001A Leadership for Organizational Culture and Growth
   Analyze leadership for organizational culture and growth to promote positive social change through patient quality and safety.
LC4002A Healthcare Quality
   Analyze healthcare quality for nursing practice.
LC4003A Quality Improvement Processes
   Analyze quality improvement processes.
LC4004A Quality Improvement Tools
   Analyze information from quality improvement tools.
LC4005A Improving Patient Quality and Safety
   Apply quality improvement processes and tools as a scholar-practitioner to improve quality and safety.

NURS 5050 - Policy and Advocacy for Improving Population Health
PA001 Agenda Setting
   Evaluate federal agendas to promote healthcare issues within the policymaking system/process.
PA002 Legislation
   Advocate a position on a population health-related bill.
PA003 Regulation
   Analyze how regulations influence the nurse's role and the delivery, costs, and access to healthcare.
PA004 Design and Implementation
   Analyze advocacy and the role of the nurse in healthcare program design and implementation.

PA005 Healthcare Program/Policy Evaluation
   Assess outcomes of population health program/policy evaluations.

PA006 Global Healthcare Issues
   Analyze the impact of nurse advocacy on addressing global health issues.

NURS 5051 - Transforming Nursing and Healthcare Through Technology

TN001 What is Informatics?
   Analyze frameworks and tools for the role of the nurse as an informaticist and knowledge worker.

TN002 The Role of Nurse Informatics in Healthcare
   Analyze the role of the nurse informaticist in nursing informatics projects to improve outcomes or efficiencies in healthcare organizations.

TN003 Data to Information to Knowledge to Wisdom
   Analyze how standardized terminologies impact the practice of healthcare and nursing informatics.

TN004 Technologies Supporting Applied Practice and Optimal Patient Outcomes
   Analyze nursing informatics research on the application of clinical systems to improve outcomes and efficiencies.

TN005 The Nurse Leader and the Systems Development Life Cycle
   Define the role of the nurse for participation on an implementation team as a component of the systems development life cycle.

TN006 Policy and Regulation Supporting Informatics and Technology
   Evaluate legislative policies and regulations for health and nursing informatics and their impact on improvement for outcomes and efficiencies in nursing practice.

Elective Courses and Prior Nursing Credit (80 cr.)

Nurses admitted to the program may be awarded up to 50 quarter credits for meeting competencies required to achieve the nursing license through either a diploma program or an associate degree program.

Students with less than 80 transfer credits can choose elective courses from any of Walden’s bachelor degree programs.
Other Undergraduate Options

Accelerate Into Master's (AIM)

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a "C" in the graduate-level course but only a grade of "B" or better will carry over to the graduate program. Students who receive a "C" grade will be awarded a grade of "C,\*" which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not pass their AIM class are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must take that course as a master's student.

Requirements

Walden University offers several opportunities for undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

Individual programs may determine the specific eligible AIM courses and some programs may limit the number of courses available. Generally, AIM coursework should not account for more than approximately 50% of the credits needed for master's degree completion. Practicum or Capstone requirements for the master's program are not eligible to be satisfied by AIM coursework.

To be eligible to begin AIM courses, students must:

a. Have an overall GPA equal to that required for admission to the associated master's degree.* BS AIM track students must maintain a 2.5 GPA and have a transfer GPA of at least 2.5 (if transferring credits).

b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.) * BS in Psychology AIM track students do not need to meet this requirement.

c. Be in good financial standing.

d. Not have any incompletes.

AIM courses are (5000-level) graduate courses.*
a. Tuition for these courses is charged at the undergraduate rate for the course-based learning format. For Tempo Learning® these courses are included in the program's subscription cost.

b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.

c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA only.

   Students must get a "B" or better in each course to have that course applied to the master's program.

   Students who do not earn a grade of "C" or better will not be allowed to take any more 5000-level courses. Later admission to the master’s program requires that the student must take that course as a master's student. * BS in Psychology AIM track students may retake an AIM course a second time if they failed the first time; they must earn a grade of "C" or better the second time in order to stay in the AIM track program.

   Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.

   Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

Upon completion of the undergraduate program requirements, students should file an Intent to Graduate Form.

   Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a "B" or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

Undergraduate students may complete AIM courses to fulfill elective credits, as course substitutions approved by the program director, or they may elect a second concentration within their program of study that is designed for AIM completion. Students are encouraged to consult with Student Success Advising (if in the course-based learning format) or their Academic Coaching (if in the Tempo Learning® format)
on the most appropriate plan for their program and academic goals, such as their future master's program and time to completion.

*Note: Graduate students cannot register for AIM courses.

**Note on Endorsement, Licensure, or Certification**

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.
**Undergraduate Minors**

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their student success advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Communication
- Minor in Criminal Justice
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Healthcare Management
- Minor in Introductory Instructional Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health
- Minor in Public Health

**Master's Degree Programs**

**Master of Science in Nursing (MSN)**

The Master of Science in Nursing (MSN) prepares students to focus their practice on the identified health needs of society, become leaders in their field through scholarship, influence the quality of patient care, manage technology and information, gain autonomy in their careers, and develop a lifelong commitment to learning. The MSN program offers a range of specializations in the most critical areas of nursing today.

**Note:** The Master of Science in Nursing (MSN) program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

**MSN Learning Outcomes**

At the end of this program, students will be able to:
Synthesize organizational/systems leadership for cost-effective specialist nursing practice that contributes to high-quality healthcare delivery, advancement of the nursing profession, and social change.

Critique evidence-based literature drawing from diverse theoretical perspectives and pertinent research to guide decision making that demonstrates best practices for specialist nursing practice in a global society.

Integratively assess, diagnose, plan, implement, and evaluate cost-effective healthcare strategies that reduce health disparities by patient/population advocacy for access to specialist nursing care.

Demonstrate ability to effectively communicate using audience-specific oral, written, and information technology for professional delivery of specialist nursing care.

Evaluate health needs of diverse populations for necessary teaching/coaching functions based on specialist nursing knowledge to restore/promote health and prevent illness/injury.

Exhibit ongoing commitment to professional development and value of nursing theories/ethical principles (altruism, autonomy, human dignity, integrity, social justice) in accordance with ethically responsible, legally accountable, specialist nursing practice.

Implement specialist nursing roles to promote quality improvement of patient-centered care in accordance with professional practice standards that transform health outcomes for diverse populations.

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their Master of Science in Nursing (MSN) through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the Master of Science in Nursing (MSN) (Competency Based) page for program details.

Course-Based Program

Specializations

Adult Gerontology Acute Care Nurse Practitioner
Adult Gerontology Primary Care Nurse Practitioner
Family Nurse Practitioner
Nurse Executive
Nursing Education
Nursing Informatics
Pediatric Nurse Practitioner Primary Care
Psychiatric Mental Health Nurse Practitioner
Public Health Nursing

Please note: All specializations require a practicum experience or experiences.

The College of Nursing recommends completing one clinical course at a time because of the number of required hours that need to be completed during one 11-week quarter. All Nurse Practitioner specialization courses require satisfactory completion of prerequisite courses prior to beginning the practicum component (i.e., Advanced Health Assessment, Advanced Pharmacology, and Advanced Pathophysiology).

Degree Requirements

BSN Track: 53 or 63 quarter credits; RN Track: 79 or 84 quarter credits (depending on specialization)
Foundation course (3 cr.)
Professional Development Plan and program of study
Core courses (20 cr.)
Specialization courses (30 or 40 cr., depending on specialization)
   Advanced Health Assessment, Advanced Pathophysiology, and Advanced Pharmacology are prerequisites for the Nurse Practitioner practicum component.
Portfolio (excludes Adult Gerontology Acute Care Nurse Practitioner, Adult Gerontology Nurse Practitioner, Family Nurse Practitioner, and Psychiatric Mental Health Nurse Practitioner specializations)

Curriculum

The MSN program has two admission tracks for registered nurses:

BSN Track: This track is for students with a Bachelor of Science in Nursing (BSN) degree.
RN Track: This track is for students with an associate’s degree in nursing or a diploma in nursing that prepares for licensure in registered nursing. RN-MSN applications will not be accepted without a nursing degree conferred.

BSN Track: BSN graduates enter the MSN program at the core course level.

RN Track: Students complete 26 quarter credits of undergraduate-level foundational courses before starting the MSN core courses. The foundational courses contain the essential content and learning activities to prepare students for the core courses but are not equivalent to the degree requirements of a BSN program.

BSN and RN Tracks: All students complete the same MSN core and specialization curriculum. The four core courses provide students with graduate-level knowledge in
areas of theory, research, diversity, legality/ethics, and healthcare systems. The specialization courses build on the core courses and offer students direction and guidance for influencing nursing practice in selected areas. A portfolio based on the specific outcomes of the program must be submitted and approved before the degree is granted. (Portfolio required for Nursing Education, Leadership and Management, Nursing Informatics, and Public Health Nursing specializations only).

Foundational and Core Curricula

BSN Track Only: Foundation Course (3 cr.)

NURS 6003 - Transition to Graduate Study for Nursing

RN Track Only: Foundation Courses (26 cr.)

NURS 3101 - Issues and Trends in Nursing
NURS 3151 - Foundations of Nursing Research
NURS 4211 - Role of the Nurse Leader in Population Health
NURS 4006 - Topics in Clinical Nursing
NURS 4221 - Leadership Competencies in Nursing and Healthcare

BSN and RN Tracks: Core Courses (23 cr.)*

NURS 6002 - Transition to Graduate Study for Nursing
OR
NURS 6003 - Transition to Graduate Study for Nursing
AND
NURS 6050 - Policy and Advocacy for Improving Population Health
NURS 6051 - Transforming Nursing and Healthcare Through Technology
NURS 6052 - Essentials of Evidence-Based Practice
NURS 6053 - Interprofessional Organizational and Systems Leadership

* Students in the Public Health Nursing specialization will complete PUBH 6127 instead of NURS 6050.

General Education Courses Available

Courses are available at Walden for those RN students who have not completed the required prerequisite undergraduate credits of general education courses.

Note: Students must earn a "C" or better in each course and maintain a GPA of 3.0.

### Communication (2 courses)

- ENGL 1001 - English Composition
- ENGL 2002 - Professional Writing for Successful Communication

### Arts & Humanities (2 courses)

- HMNT 3001 - Modern Popular Culture
- PHIL 1001 - Introduction to Philosophy

### Social/Behavioral Sciences (2 courses)

- PSYC 1001 - Introduction to Psychology
- SOCI 1001 - Introduction to Sociology

### Science (3 courses)

**Required:**
- BIOL 3020 - Essentials of Human Anatomy and Physiology (May be transferred or taken at Walden.)

**Additional Science courses, if needed:**
- BIOL 1001 - Introduction to Biology
- BIOL 2320 - Nutritional Science

### Statistics (1 course)

- STAT 3001 - Statistical Methods and Applications

### Elective (1 course)
ANTH 3001 - Indigenous Peoples in the Modern World

*General Education courses are available at Walden for those students who have not completed the minimum undergraduate credits of general education courses required for admission to the master's program.

Accreditation

The Baccalaureate Degree Program in Nursing (BSN), Master's Degree Program in Nursing (MSN), and Doctor of Nursing Practice (DNP) program at Walden University are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE). Officially recognized by the U.S. Secretary of Education as a national accreditation agency, the Commission on Collegiate Nursing Education (CCNE) is an autonomous accrediting agency, contributing to the improvement of the public’s health. CCNE ensures the quality and integrity of baccalaureate, graduate, and residency programs in nursing.

Note on Certification

The MSN nurse practitioner specializations are designed to prepare graduates to qualify to sit for national nurse practitioner certification exams, which are required for practice as a nurse practitioner in most states. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency to determine specific certification exam requirements. Walden enrollment specialists can provide information relating to national certification exams; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she resides, as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain national certification. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners (AANP) at https://www.aanp.org/education/aanp-certification-program, American Nurses Credentialing Center (ANCC) at www.nursingworld.org/our-certifications, or the American Association of Critical Care Nurses (AACN) at APRNcert@aacn.org.
Note on Licensure

The MSN nurse practitioner specializations are designed to prepare graduates with an active registered nurse (RN) license to practice as nurse practitioners. However, each state Board of Nursing has its own academic and certification requirements and issues its own credential for an RN to be permitted to practice as a nurse practitioner in that state. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency in the state in which he or she resides to determine specific requirements. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate. Walden enrollment specialists can provide guidance relating to the state-by-state requirements for practice as a nurse practitioner; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to the practice as a nurse practitioner in the state in which he or she resides, as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure, authorization, endorsement, or other state credential. For more information about the requirements to practice as a nurse practitioner, students should contact the appropriate Board of Nursing or state agency.

Prospective Alabama students: State approval of a program to offer Alabama licensed nurses’ opportunities for advanced degrees does not indicate eligibility for approval to practice as an advanced nurse in Alabama. Applications for approval in Alabama are required to meet the Alabama requirements for national certification, graduation from a specific-type program for the advanced practice approval, and completion of the appropriate application. Any program offering a pre-licensure track to Alabama students shall meet the requirements of the Alabama regulations for pre-licensure programs or the graduates may not be eligible to take the national licensure examination required by the Alabama Board of Nursing to enter the practice. www.abn.alabama.gov

Prospective Washington students: Walden University is approved by the Washington State Nursing Care Quality Assurance Commission to provide practice experiences in Washington State for a Bachelor’s of Science in Nursing, Master of Science in Nursing with a specialization in Nursing Education, Nursing Informatics, Leadership and Management, Family Nurse Practitioner, Adult-Gerontology Acute Care Nurse Practitioner, Adult-Gerontology Primary Care Nurse Practitioner, and Psychiatric and Mental Health Nurse Practitioner, as well as the Doctor of Nursing Practice (DNP) program. For more information, go to the following website: https://www.doh.wa.gov/LicensesPermitsandCertificates/NursingCommission/NursingEducation/NursingPrograms.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.
Master of Science in Nursing (MSN) (Competency Based)

Tempo Learning® is Walden's competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

Specializations

- Nurse Executive
- Nursing Education
- Nursing Informatics

Degree Requirements

BSN Track: 53 quarter credits
- Foundation competencies (3 cr)
- Core competencies (20 cr)
- Specialization competencies (30 cr)

RN Track: 78 quarter credits
- Foundation Competencies (25 cr.)
- Core Competencies (23 cr.)
- Specialization Competencies (25 cr.)
- Capstone Competencies (5 cr.)

Curriculum

The MSN (Competency Based) program has two admission tracks for registered nurses:

BSN Track: This track is for students with a Bachelor of Science in Nursing (BSN) degree.
   BSN graduates enter the MSN program at the core course level.

RN Track: This track is for registered nurses who hold a diploma in nursing, associate degree in nursing, or bachelor's degree (other than BSN).
This track requires that students fulfill general education requirements. Once students meet these requirements, they can begin the foundation and core courses for the MSN.

BSN Track: Foundational and Core Curricula

BSN Track Only: Foundation Competencies (3 cr.)

**NURS 6003TL - Transition to Graduate Study for Nursing [Tempo Learning®-Specific Course]**

- **FG001 Networking for Academic and Professional Success**
  Develop an academic and professional network.
- **FG002 Academic and Professional Strategies and Resources**
  Identify academic resources and strategies for success.
- **FG003 Academic and Professional Integrity**
  Apply strategies to promote academic integrity and professional ethics.
- **FG004 Scholarship and Nursing Practice**
  Analyze peer-reviewed research related to issues in nursing practice.
- **FG005 Professional Development Plan**
  Create professional development plans for academic success and professional practice.
- **FG006 Standards of Practice**
  Justify selection of the MSN specialization using standards and scope of practice.

BSN Track Only: Core Competencies (20 cr.)

**NURS 6050TL - Policy and Advocacy for Improving Population Health [Tempo Learning®-Specific Course]**

- **PA001 Agenda Setting**
  Evaluate federal agendas to promote healthcare issues within the policymaking system/process.
- **PA002 Legislation**
  Advocate a position on a population health-related bill.
- **PA003 Regulation**
  Analyze how regulations influence the nurse's role and the delivery, costs, and access to healthcare.
- **PA004 Design and Implementation**
  Analyze advocacy and the role of the nurse in healthcare program design and implementation.
PA005 Healthcare Program/Policy Evaluation
Assess outcomes of population health program/policy evaluations.

PA006 Global Healthcare Issues
Analyze the impact of nurse advocacy on addressing global health issues.

NURS 6051TL - Transforming Nursing and Healthcare Through Technology [Tempo Learning®-Specific Course]
TN001 What is Informatics?
Analyze frameworks and tools for the role of the nurse as an informaticist and knowledge worker.

TN002 The Role of Nurse Informatics in Healthcare
Analyze the role of the nurse informaticist in nursing informatics projects to improve outcomes or efficiencies in healthcare organizations.

TN003 Data to Information to Knowledge to Wisdom
Analyze how standardized terminologies impact the practice of healthcare and nursing informatics.

TN004 Technologies Supporting Applied Practice and Optimal Patient Outcomes
Analyze nursing informatics research on the application of clinical systems to improve outcomes and efficiencies.

TN005 The Nurse Leader and the Systems Development Life Cycle
Define the role of the nurse for participation on an implementation team as a component of the systems development life cycle.

TN006 Policy and Regulation Supporting Informatics and Technology
Evaluate legislative policies and regulations for health and nursing informatics and their impact on improvement for outcomes and efficiencies in nursing practice.

NURS 6052TL - Essentials of Evidence-Based Practice [Tempo Learning®-Specific Course]
EB001 Evidence-Based Practice (EBP) and the Quadruple Aim
Analyze the relationship between evidence-based practice and the Quadruple Aim in healthcare organizations.

EB002 Research Methodology
Analyze research methodologies described in peer-reviewed articles.

EB003 Clinical Inquiry, Problem-Intervention-Comparison-Outcome-Time (PICOT), and Searching Databases
Analyze relevant, peer-reviewed articles in support of PICOT questions.

EB004 Critical Appraisal, Evaluation/Summary, and Synthesis of Evidence
Recommend best practices based on critical appraisal of evidence-based research.
EB005 Evidence-Based Decision-Making
Recommend evidence-based organizational changes using an evidence-based practice approach to decision-making.

EB006 Disseminating Evidenced-Based Practice Changes
Analyze dissemination strategies for evidence-based practice changes in healthcare.

NURS 6053TL - Interprofessional Organizational and Systems Leadership [Tempo Learning®-Specific Course]
IO001 Healthcare Environment
Analyze the impact of national healthcare trends on organizational leadership practice.

IO002 Professionalism
Assess organizational policies and the promotion of ethical practice in addressing healthcare issues/stressors.

IO003 Leadership
Create a leadership philosophy to promote transformational leadership in nursing practice.

IO004 Promoting Organizational Health
Recommend evidence-based strategies to create healthy work environments and promote positive organizational health.

IO005 Organizational Change
Create comprehensive plans for meaningful organizational change.

BSN Track Only: Specialization Competencies (30 cr.)

These competencies are dependent upon the particular specialization. Please see the course list on each specialization page. Changing specializations may increase a student's expected time-to-degree completion and cost.

RN Track: Foundational and Core Curricula

RN Track Only: Foundation Competencies (25 cr.)

NURS 3100 - Issues and Trends in Nursing

IN3001 The Power of Nursing
Recognize the role of the nurse as a leader in the dynamic field of healthcare.

IN3002 Nurses at the Forefront of Issues and Trends
Analyze factors, issues, and trends impacting the nursing profession.
IN3003 Quality and Safety Practices for Healthcare Solutions
   Explain how evidence-based nursing solutions promote patient quality and safety.

IN3004 Interprofessional Teamwork: Civil Collaboration for the Common Good
   Recommend appropriate strategies to promote civility and interprofessional communication in the workforce.

IN3005 Powerful Caring Leads to Social Change
   Analyze the responsibility of nursing professionals to advocate for social change.

IN3006 Creating Your Personal Nursing Legacy
   Evaluate areas of strength and areas of professional growth for improving the health and healthcare delivery of populations.

NURS 3150 - Foundations of Nursing Research
   NR3001 Research Process
      Recognize the elements of the research process.

   NR3002 Research Methodology
      Analyze research methodologies.

   NR3003 Interpreting Data
      Analyze and interpret research data.

   NR3004 Research Recommendations
      Generate reasonable conclusions and recommendations based on published research findings.

NURS 4210 - Role of the Nurse Leader in Population Health
   PH4001 The Role of the Nurse Leader in Population Health
      Analyze the role of the nurse leader in population health.

   PH4002 Identifying Health Problems Within Your Community
      Justify a public health problem within your community using multiple sources of data.

   PH4003 Community Assessment (Practicum)
      Analyze a population health problem based on a community assessment.

   PH4004 Evidence-Based Practice in Public Health Nursing (Practicum)
      Synthesize sources of information to inform public health nursing interventions.

   PH4005 Evidence-Based Intervention Plan (Practicum)
      Create an evidence-based primary intervention plan at the system level in collaboration with health leaders to improve the health of a population in your community.

NURS 4005 - Topics in Clinical Nursing
CN4001 Nurse as Leader
Analyze the leadership role of the nurse in preventing and managing health problems across the lifespan in healthcare practice settings.

CN4002 Genetics and Genomics
Develop a patient education fact sheet for a genetic based healthcare issue.

CN4003 Staffing Plan
Analyze the process of creating a staffing plan that meets both patient care needs and budget constraints.

CN4004 Data-Driven Nursing Interventions
Create a data-driven nursing intervention based on quality indicators.

NURS 4220A - Leadership Competencies in Nursing and Healthcare

LC4001A Leadership for Organizational Culture and Growth
Analyze leadership for organizational culture and growth to promote positive social change through patient quality and safety.

LC4002A Healthcare Quality
Analyze healthcare quality for nursing practice.

LC4003A Quality Improvement Processes
Analyze quality improvement processes.

LC4004A Quality Improvement Tools
Analyze information from quality improvement tools.

LC4005A Improving Patient Quality and Safety
Apply quality improvement processes and tools as a scholar-practitioner to improve quality and safety.

RN Track Only: Core Competencies (23 cr.)

NURS 6003TL - Transition to Graduate Study for Nursing [Tempo Learning®-Specific Course]

FG001 Networking for Academic and Professional Success
Develop an academic and professional network.

FG002 Academic and Professional Strategies and Resources
Identify academic resources and strategies for success.

FG003 Academic and Professional Integrity
Apply strategies to promote academic integrity and professional ethics.

FG004 Scholarship and Nursing Practice
Analyze peer-reviewed research related to issues in nursing practice.

FG005 Professional Development Plan
Create professional development plans for academic success and professional practice.
FG006 Standards of Practice
Justify selection of the MSN specialization using standards and scope of practice.

NURS 6050TL - Policy and Advocacy for Improving Population Health [Tempo Learning®-Specific Course]
PA001 Agenda Setting
Evaluate federal agendas to promote healthcare issues within the policymaking system/process.
PA002 Legislation
Advocate a position on a population health-related bill.
PA003 Regulation
Analyze how regulations influence the nurse's role and the delivery, costs, and access to healthcare.
PA004 Design and Implementation
Analyze advocacy and the role of the nurse in healthcare program design and implementation.
PA005 Healthcare Program/Policy Evaluation
Assess outcomes of population health program/policy evaluations.
PA006 Global Healthcare Issues
Analyze the impact of nurse advocacy on addressing global health issues.

NURS 6051TL - Transforming Nursing and Healthcare Through Technology [Tempo Learning®-Specific Course]
TN001 What is Informatics?
Analyze frameworks and tools for the role of the nurse as an informaticist and knowledge worker.
TN002 The Role of Nurse Informatics in Healthcare
Analyze the role of the nurse informaticist in nursing informatics projects to improve outcomes or efficiencies in healthcare organizations.
TN003 Data to Information to Knowledge to Wisdom
Analyze how standardized terminologies impact the practice of healthcare and nursing informatics.
TN004 Technologies Supporting Applied Practice and Optimal Patient Outcomes
Analyze nursing informatics research on the application of clinical systems to improve outcomes and efficiencies.
TN005 The Nurse Leader and the Systems Development Life Cycle
Define the role of the nurse for participation on an implementation team as a component of the systems development life cycle.
TN006 Policy and Regulation Supporting Informatics and Technology
Evaluate legislative policies and regulations for health and nursing
informatics and their impact on improvement for outcomes and efficiencies in nursing practice.

NURS 6052TL - Essentials of Evidence-Based Practice [Tempo Learning®-Specific Course]
- EB001 Evidence-Based Practice (EBP) and the Quadruple Aim
  Analyze the relationship between evidence-based practice and the Quadruple Aim in healthcare organizations.
- EB002 Research Methodology
  Analyze research methodologies described in peer-reviewed articles.
- EB003 Clinical Inquiry, Problem-Intervention-Comparison-Outcome-Time (PICOT), and Searching Databases
  Analyze relevant, peer-reviewed articles in support of PICOT questions.
- EB004 Critical Appraisal, Evaluation/Summary, and Synthesis of Evidence
  Recommend best practices based on critical appraisal of evidence-based research.
- EB005 Evidence-Based Decision-Making
  Recommend evidence-based organizational changes using an evidence-based practice approach to decision-making.
- EB006 Disseminating Evidenced-Based Practice Changes
  Analyze dissemination strategies for evidence-based practice changes in healthcare.

NURS 6053TL - Interprofessional Organizational and Systems Leadership [Tempo Learning®-Specific Course]
- IO001 Healthcare Environment
  Analyze the impact of national healthcare trends on organizational leadership practice.
- IO002 Professionalism
  Assess organizational policies and the promotion of ethical practice in addressing healthcare issues/stressors.
- IO003 Leadership
  Create a leadership philosophy to promote transformational leadership in nursing practice.
- IO004 Promoting Organizational Health
  Recommend evidence-based strategies to create healthy work environments and promote positive organizational health.
- IO005 Organizational Change
  Create comprehensive plans for meaningful organizational change.

RN Track Only: Specialization Competencies (25 cr.)
These competencies are dependent upon the particular specialization. Please see the course list on each specialization page. Changing specializations may increase a student's expected time-to-degree completion and cost.

RN Track Only: Capstone Competencies (5 cr.)

These competencies are dependent upon the particular specialization. Please see the course list on each specialization page. Changing specializations may increase a student's expected time-to-degree completion and cost.

Specializations (Master's)

**Adult Gerontology Acute Care Nurse Practitioner - Master of Science in Nursing (MSN)**

In the Adult/Gerontology Acute Care Nurse Practitioner specialization, students build their core competencies to become nurse practitioners while acquiring the advanced practice skills essential to high-acuity healthcare settings such as hospital emergency rooms, intensive care units, trauma centers, and specialty practices. Coursework prepares students for the challenges of managing the care of acutely or chronically ill adolescents (13+), young adults, adults, and older adults across the entire patient care experience, from initial assessment and diagnosis to developing a treatment and care plan. Graduates of this program will also be prepared to apply research and evidence-based practice to support quality improvement initiatives.

Specialization Courses (35 cr.)

- **NURS 6501 - Advanced Pathophysiology**
- **NURS 6521 - Advanced Pharmacology**
- **NURS 6512 - Advanced Health Assessment and Diagnostic Reasoning**
- **NRNP 6566 - Advanced Care of Adults in Acute Settings I**
- **PRAC 6566 - Advanced Care of Adults in Acute Settings I Practicum**
- **NRNP 6540 - Advanced Practice Care of Older Adults**
- **PRAC 6540 - Advanced Practice Care of Older Adults Practicum**
- **NRNP 6550 - Advanced Practice Care of Adults in Acute Care Settings II**
- **PRAC 6550 - Advanced Practice Care of Adults in Acute Care Settings II Practicum**
- **NRNP 6560 - Advanced Care of Adults in Acute Settings III**
- **PRAC 6560 - Advanced Care of Adults in Acute Settings III Practicum**

**Note on Certification**

*The MSN nurse practitioner specializations are designed to prepare graduates to qualify to sit for national nurse practitioner certification exams, which are required for practice as a nurse practitioner in most states. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency to determine specific certification exam requirements. Walden enrollment specialists can*
provide information relating to national certification exams; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she resides, as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain national certification. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners (AANP) at https://www.aanp.org/education/aanp-certification-program, American Nurses Credentialing Center (ANCC) at www.nursingworld.org/our-certifications, or the American Association of Critical Care Nurses (AACN) at APRNcert@aacn.org.

Note on Licensure

The MSN nurse practitioner specializations are designed to prepare graduates with an active registered nurse (RN) license to practice as nurse practitioners. However, each state Board of Nursing has its own academic and certification requirements and issues its own credential for an RN to be permitted to practice as a nurse practitioner in that state. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency in the state in which he or she resides to determine specific requirements. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate. Walden enrollment specialists can provide guidance relating to the state-by-state requirements for practice as a nurse practitioner; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to the practice as a nurse practitioner in the state in which he or she resides, as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure, authorization, endorsement, or other state credential. For more information about the requirements to practice as a nurse practitioner, students should contact the appropriate Board of Nursing or state agency.

Prospective Alabama students: State approval of a program to offer Alabama licensed nurses’ opportunities for advanced degrees does not indicate eligibility for approval to practice as an advanced nurse in Alabama. Applications for approval in Alabama are required to meet the Alabama requirements for national certification, graduation from a specific-type program for the advanced practice approval, and completion of the appropriate application. Any program offering a pre-licensure track to Alabama students shall meet the requirements of the Alabama regulations for pre-licensure programs or the graduates may not be eligible to take the national licensure examination required by the Alabama Board of Nursing to enter the practice. www.abn.alabama.gov

Prospective Washington students: Walden University is approved by the Washington State Nursing Care Quality Assurance Commission to provide practice experiences in Washington State for a Bachelor’s of Science in Nursing, Master of Science in Nursing with a specialization in Nursing Education, Nursing Informatics, Leadership and Management, Family Nurse Practitioner, Adult-Gerontology Acute Care Nurse Practitioner, Adult-Gerontology Primary Care Nurse Practitioner, and Psychiatric and Mental Health Nurse Practitioner, as well as the Doctor of Nursing Practice (DNP) program. For more information, go to the following website: https://www.doh.wa.gov/LicensesPermitsandCertificates/NursingCommission/NursingEducation/NursingPrograms.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional
requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

**Adult Gerontology Primary Care Nurse Practitioner - Master of Science in Nursing (MSN)**

Adult/Gerontology Primary Care Nurse Practitioners (AGNPs) are advanced practice nurses who hold a Master of Science in Nursing (MSN) and have advanced clinical education. AGNPs are trained to assess, diagnose, treat, and manage a variety of health issues among adult patients, ages 13 years and older. This specialization explores strategies for improving health outcomes through effective communication and collaboration. Students have the opportunity to explore current health topics through a curriculum developed in collaboration with experts. Courses are rooted in evidence-based practice so that students can gain knowledge in providing quality, comprehensive, accessible, and cost-effective care.

This specialization can prepare students to make a positive difference in today's dynamic and ever-changing healthcare environment, whether in clinical practice or a related health professional role. Students can prepare to advance their careers. Graduates can pursue national adult-gerontology nurse practitioner certification and state credentialing.

**Specialization Courses (35 cr.)**

- NURS 6501 - Advanced Pathophysiology
- NURS 6521 - Advanced Pharmacology
- NURS 6512 - Advanced Health Assessment and Diagnostic Reasoning
- NRNP 6531 - Primary Care of Adults Across the Lifespan
- PRAC 6531 - Primary Care of Adults Across the Lifespan Practicum
- NRNP 6540 - Advanced Practice Care of Older Adults
- PRAC 6540 - Advanced Practice Care of Older Adults Practicum
- NRNP 6552 - Advanced Nurse Practice in Reproductive Health Care
- PRAC 6552 - Advanced Nurse Practice in Reproductive Health Care Practicum
- NRNP 6565 - Synthesis in Advanced Nursing Practice of Patients in Primary Care Settings
- PRAC 6565 - Synthesis in Advanced Nursing Practice of Patients in Primary Care Settings Practicum

**Note on Certification**

The MSN nurse practitioner specializations are designed to prepare graduates to qualify to sit for national nurse practitioner certification exams, which are required for practice as a nurse practitioner in most states. Because no graduate program can guarantee that graduates will be permitted to practice as a
nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency to determine specific certification exam requirements. Prospective Alabama students: State approval of a program to offer Alabama licensed nurses’ opportunities for advanced degrees does not indicate eligibility for approval to practice as an advanced nurse in Alabama. Applications for approval in Alabama are required to meet the Alabama requirements for national certification, graduation from a specific-type program for the advanced practice approval, and completion of the appropriate application. Any program offering a pre-licensure track to Alabama students shall meet the requirements of the Alabama regulations for pre-licensure programs or the graduates may not be eligible to take the national licensure examination required by the Alabama Board of Nursing to enter the practice. www.abn.alabama.gov

Prospective Washington students: Walden University is approved by the Washington State Nursing Care Quality Assurance Commission to provide practice experiences in Washington State for a Bachelor’s of Science in Nursing, Master of Science in Nursing with a specialization in Nursing Education, Nursing Informatics, Leadership and Management, Family Nurse Practitioner, Adult-Gerontology Acute Care Nurse Practitioner, Adult-Gerontology Primary Care Nurse Practitioner, and Psychiatric and Mental Health Nurse Practitioner, as well as the Doctor of Nursing Practice (DNP) program. For more information, go to the following website: https://www.doh.wa.gov/LicensesPermitsandCertificates/NursingCommission/NursingEducation/NursingPrograms.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on
how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

**Family Nurse Practitioner - Master of Science in Nursing (MSN)**

Family Nurse Practitioners (FNPs) are advanced practice registered nurses with the knowledge and skills to assess and manage health issues in patients of all ages, from birth through the senior years. This specialization can prepare students to gain autonomy or advance in their career as healthcare professionals. Through a series of courses and well-rounded clinical practice experiences focused on current health issues, students can effectively implement and facilitate disease prevention, health promotion, health maintenance, and restorative care interventions.

This online Family Nurse Practitioner specialization focuses on evidence-based techniques that can enhance the quality of care and outcomes for patients. The program offers strategies that can prepare students to work in primary care outpatient health settings or change the course of their healthcare career. Graduates of the program can pursue national family nurse practitioner certification and state credentialing.

**Specialization Courses (35 cr.)**

- NURS 6501 - Advanced Pathophysiology
- NURS 6521 - Advanced Pharmacology
- NURS 6512 - Advanced Health Assessment and Diagnostic Reasoning
- NRNP 6531 - Primary Care of Adults Across the Lifespan
- PRAC 6531 - Primary Care of Adults Across the Lifespan Practicum
- NRNP 6541 - Primary Care of Adolescents and Children
- PRAC 6541 - Primary Care of Adolescents and Children Practicum
- NRNP 6552 - Advanced Nurse Practice in Reproductive Health Care
- PRAC 6552 - Advanced Nurse Practice in Reproductive Health Care Practicum
- NRNP 6568 - Synthesis in Advanced Nursing Practice of Patients in Family Care Settings
- PRAC 6568 - Synthesis in Advanced Nursing Practice of Patients in Family Care Settings Practicum

**Note on Certification**

*The MSN nurse practitioner specializations are designed to prepare graduates to qualify to sit for national nurse practitioner certification exams, which are required for practice as a nurse practitioner in most states. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency to determine specific certification exam requirements. Walden enrollment specialists can provide information relating to national certification exams; however, it remains the individual’s*
responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she resides, as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain national certification. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners (AANP) at https://www.aanp.org/education/aanp-certification-program, American Nurses Credentialing Center (ANCC) at www.nursingworld.org/our-certifications, or the American Association of Critical Care Nurses (AACN) at APRNcert@aacn.org.

Note on Licensure

The MSN nurse practitioner specializations are designed to prepare graduates with an active registered nurse (RN) license to practice as nurse practitioners. However, each state Board of Nursing has its own academic and certification requirements and issues its own credential for an RN to be permitted to practice as a nurse practitioner in that state. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency in the state in which he or she resides to determine specific requirements. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate. Walden enrollment specialists can provide guidance relating to the state-by-state requirements for practice as a nurse practitioner; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to the practice as a nurse practitioner in the state in which he or she resides, as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure, authorization, endorsement, or other state credential. For more information about the requirements to practice as a nurse practitioner, students should contact the appropriate Board of Nursing or state agency.

Prospective Alabama students: State approval of a program to offer Alabama licensed nurses’ opportunities for advanced degrees does not indicate eligibility for approval to practice as an advanced nurse in Alabama. Applications for approval in Alabama are required to meet the Alabama requirements for national certification, graduation from a specific-type program for the advanced practice approval, and completion of the appropriate application. https://www.doh.wa.gov/LicensesPermitsandCertificates/NursingCommission/NursingEducation/NursingPrograms.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education
Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

**Nurse Executive - Master of Science in Nursing (MSN)**

In the Nurse Executive specialization, students have the opportunity to prepare for a management role as a nurse administrator through a targeted curriculum designed to help students develop essential management and leadership skills. Coursework helps students gain insight into how effective, collaborative management can support the ultimate goal of improving patient outcomes. The program includes options for deepening knowledge through sub-specializations in risk management and health policy: two areas of high demand in the marketplace. Students have the opportunity to gain skills in management strategy, decision-making, planning, finance, patient safety management, and human resources.

**Specialization Courses (30 cr.)**

- NURS 6201 - Leadership in Nursing and Healthcare
- NURS 6211 - Finance and Economics in Healthcare Delivery
- NURS 6221 - Managing Human Resources
- NURS 6231 - Healthcare Systems and Quality Outcomes
- NURS 6241 - Strategic Planning in Healthcare Organizations
- NURS 6600 - Capstone Synthesis Practicum

**Optional Sub-Specialization: Health Policy (10 cr.)**

- NURS 6226 - Introduction to Healthcare Policy
- NURS 6227 - Current Issues in Health Policy

**Optional Sub-Specialization: Risk Management (10 cr.)**

- NURS 6223 - Healthcare Quality Assurance and Risk Management in Healthcare Organizations
- NURS 6224 - Quality Assurance and Regulatory Compliance

**Note on Field Experience and Relocating**

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education
Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

**Nurse Executive - Master of Science in Nursing (MSN) (Competency Based)**

In the Nurse Executive specialization, students have the opportunity to prepare for a management role as a nurse administrator through a targeted curriculum designed to help students develop essential management and leadership skills. Coursework helps students gain insight into how effective, collaborative management can support the ultimate goal of improving patient outcomes. Students have the opportunity to gain skills in management strategy, decision-making, planning, finance, patient safety management, and human resources.

**Specialization Competencies (30 cr.)**

- **NURS 6201 - Leadership in Nursing and Healthcare**
  - LN001 Leadership Models and Styles
    - Apply leadership styles to address varied situations in healthcare settings.
  - LN002 Systems Thinking in Nursing Leadership
    - Apply systems thinking to improve nursing leadership in transitions of care processes.
  - LN003 Strategies for Conflict Resolution
    - Apply strategies for conflict resolution.
  - LN004 Leadership to Support Excellence in Nursing Practice
    - Analyze transformational leadership behaviors that support evidence-based practice.
  - LN005 Empowerment of the Nurse Leader in Organizational Structures
    - Analyze opportunities for the nurse executive to enact, influence, and engage in decision-making to improve health and care delivery.

- **NURS 6211 - Finance and Economics in Healthcare Delivery**
  - FE001 Making a Business Case
    - Apply concepts and principles of finance and economics to the proposal of new healthcare products and services.
  - FE002 Health Economics and Financial Analysis
    - Apply skills for creating and managing healthcare budgets.
  - FE003 Budgets and Budgeting
    - Create and manage healthcare budgets.
FE004 Costs and Savings
Evaluate healthcare service costs and savings.

FE005 Financial Health and Nurse Entrepreneurs
Assess financial reports and apply financial concepts for healthcare budget requests.

NURS 6221 - Managing Human Resources
MH001 Employee Recruitment and Selection
Apply strategies for effectively recruiting and selecting nursing staff.

MH002 Support and Empowerment of Employees
Develop an employee empowerment plan that supports job performance and satisfaction.

MH003 Performance Management in Nursing Settings
Apply systems thinking in assessing employee performance in nursing settings.

MH004 Diversity as a Human Resource
Apply strategies for embracing, leveraging, and managing diversity and inclusion in nursing settings.

MH005 Leadership, Ethics, and the Law
Apply legal and ethical standards to actions and decision-making in nursing leadership.

NURS 6231 - Healthcare Systems and Quality Outcomes
HQ001 Methods and Tools for Quality and Safety
Apply methods and tools for quality and safety in healthcare.

HQ002 Measurement and Evaluation of Quality Outcomes
Apply strategies for measuring and evaluating quality outcomes in healthcare settings.

HQ003 Interdisciplinary Collaboration in Nursing
Analyze interdisciplinary approaches to maximize quality of care and patient outcomes.

HQ004 Innovations to Improve Outcomes
Recommend systems innovations to improve quality outcomes.

NURS 6241 - Strategic Planning in Healthcare Organizations
HC001 Key Concepts in Strategic Planning in Healthcare Organizations
Explain concepts related to the purposes and processes of strategic planning in healthcare settings.

HC002 Strategic Planning Needs Analysis
Analyze strategic planning needs for healthcare organizations or issues.

HC003 Goals, Objectives, and Strategies to Inform Strategic Plans
Develop goals, objectives, and strategies to inform strategic plans.
HC004 Resources to Inform Strategic Plans
  Apply resources to inform strategic plans.
NURS 6600TL - Capstone [Tempo Learning®-Specific Course]
SY001 Leadership, Nursing Practice, and Social Change
  Apply leadership principles to design programs to enhance nursing practice and promote social change.
SY002 Leadership and Career Advancement
  Create plans to participate in leadership and professional growth opportunities to achieve professional goals and objectives.

Note on Curriculum

In an effort to ensure competencies are kept up to date and relevant to meet the learning outcomes of the program, the number and subject matter of individual competencies needed to satisfy program course requirements may change. However, program outcomes and the number and subject matter of courses will not be impacted. As a result, the required competencies listed in a student’s individual learning plan may differ from what is currently listed in the catalog.

Nursing Education - Master of Science in Nursing (MSN)

The Nursing Education specialization prepares nurses for faculty positions in all types of undergraduate nursing programs, as well as for educator roles in diverse practice settings. Graduates have the knowledge to develop, plan, implement, and evaluate educational programs for nursing students and other individuals or groups needing health-related education.

Specialization Courses (30 cr.)

- NURS 6321 - Curriculum Development, Assessment, and Evaluation
- NURS 6331 - Teaching Learning Strategies: Integrating Technology Into Nursing Education
- NURS 6341 - Specialty in Clinical Nursing
- NURS 6351 - Role of the Nurse Educator
- NURS 6370 - Foundational Skills for Nurse Educators in Academic and Healthcare Environments
- NURS 6380 - Advanced Pathopharmacology and Advanced Health Assessment for Nurse Educators

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states,
and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

**Nursing Education - Master of Science in Nursing (MSN) (Competency Based)**

The Nursing Education specialization prepares nurses for faculty positions in all types of undergraduate nursing programs, as well as for educator roles in diverse practice settings. Graduates have the knowledge to develop, plan, implement, and evaluate educational programs for nursing students and other individuals or groups needing health-related education.

**Specialization Competencies (30 cr.)**

**NURS 6321 - Curriculum Development, Assessment, and Evaluation**

- **AE001 Foundational Concepts of Curriculum Development, Assessment, and Evaluation**
  - Explain foundational concepts and principles related to curriculum development, assessment, and evaluation.
- **AE002 Introduction to Curriculum Development**
  - Evaluate alignment and congruence of curriculum components.
- **AE003 Curriculum Design Approaches and Processes**
  - Analyze curriculum design approaches, components, and processes.
- **AE004 Curriculum and Evaluation Processes**
  - Analyze standards-based nursing curriculum, assessments, and evaluations designed to improve health and performance outcomes.

**NURS 6331 - Teaching Learning Strategies: Integrating Technology Into Nursing Education**

- **TL001 Course Design and Learner Characteristics**
  - Analyze learner characteristics and their influence on lesson design.
- **TL002 Instructional Strategies and Learning Outcomes**
  - Evaluate instructional strategies and methods to support learning outcomes in nursing education.
- **TL003 Lesson Planning and Implementation**
  - Design classroom or face-to-face lessons that integrate technology to achieve learning objectives and outcomes.
- **TL004 Testing and Evaluation**
  - Create appropriate assessments and evaluations to measure desired outcomes for nursing education.
TL005 Digital Learning Experiences
Develop asynchronous, online, and media-based lessons to improve nursing practice and patient care.

NURS 6341 - Specialty in Clinical Nursing
SN001 Focus and Objectives for Advanced Practice
Identify a focus within a clinical specialty and formulate objectives for advanced nursing practice.
SN002 Comprehensive and Systematic Assessment
Plan and conduct comprehensive and systematic assessments on patients using advanced levels of decision-making within a clinical specialty.
SN003 Patient Care
Recommend evidence-based interventions in advanced nursing practice to ensure positive outcomes for patients.
SN004 Self-Assessment in Advanced Practice
Use multiple measures to self-assess performance for advanced skills and practice within a clinical specialty.

NURS 6351 - Role of the Nurse Educator
RN001 Nurse Educator Roles and Settings
Analyze roles of nurse educators in a variety of nursing settings.
RN002 Professional Goals and Roles
Identify professional goals as a nurse educator and analyze settings and roles related to those goals.
RN003 Conflict Management
Apply strategies for the nurse educator to prevent and manage conflict in nursing education.
RN004 Supporting All Learners
Apply strategies to create positive learning environments and to support learner needs, perspectives, and performance.
RN005 Career Advancement and Changing Roles
Write résumés, cover letters, and professional profiles to advance in the field of nursing education.

NURS 6370 - Foundational Skills for Nurse Educators in Academic and Healthcare Environments
NE001 The Roles of the Academic Nurse Educator and the Nursing Professional Development Practitioner
Differentiate the roles of the academic nurse educator and the nursing professional development practitioner.
NE002 Learning Theories in Nursing Education
Apply learning theories for nursing education in academic and practice settings.
NE003 Educational Design Process
Apply the educational design process to educational activities that meet defined learning needs.

NE004 Organizational Alignment
Align professional activities with the mission, vision, and strategic plan of a professional organization/institution.

NE005 Nursing Professional Development as a Nursing Specialty Practice
Apply the Nursing Professional Development Scope and Standards of Practice into all areas of professional development practice.

NE006 Role of the Academic Clinical Nurse Educator
Integrate core competencies for academic clinical nurse educators into academic education practice.

NE007 Leadership in Nursing Education in Academic and Practice Settings
Analyze leadership in nursing education in academic and practice settings.

NURS 6380TL - Advanced Pathopharmacology and Advanced Health Assessment [Tempo Learning®-Specific Course]

AH001 Concepts of Advanced Health Assessment for the Nurse Educator
Perform comprehensive and systematic health assessments at an advanced clinical reasoning level.

AH002 Concepts of Advanced Pathophysiology and Pharmacology for the Nurse Educator
Analyze pathophysiology and pharmacotherapeutic interventions of common disorders across the lifespan.

AH003 Case Presentation
Synthesize plans of care for case presentation.

Note on Curriculum
In an effort to ensure competencies are kept up to date and relevant to meet the learning outcomes of the program, the number and subject matter of individual competencies needed to satisfy program course requirements may change. However, program outcomes and the number and subject matter of courses will not be impacted. As a result, the required competencies listed in a student’s individual learning plan may differ from what is currently listed in the catalog.

Nursing Informatics - Master of Science in Nursing (MSN)
The Nursing Informatics specialization prepares nurses to more effectively utilize information technology to enhance the quality of patient care. This specialization blends nursing science with computer and information science. Coursework focuses on such key areas as information systems, database concepts, and effective project management. Graduates have the knowledge to integrate data, information, and knowledge to support decision-making processes that affect patients and providers. (Additional software may be required.)
Specialization Courses (30 cr.)

- NURS 6401 - Informatics in Nursing and Healthcare
- NURS 6412 - Information and Knowledge Management
- NURS 6421 - Supporting Workflow in Healthcare Systems
- NURS 6441 - Project Management: Healthcare Information Technology
- NURS 6451 - Evaluation Methods for Health Information Technology
- NURS 6461 - Capstone Synthesis Practicum

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

Nursing Informatics - Master of Science in Nursing (MSN) (Competency Based)

The Nursing Informatics specialization prepares nurses to more effectively utilize information technology to enhance the quality of patient care. This specialization blends nursing science with computer and information science. Coursework focuses on such key areas as information systems, database concepts, and effective project management. Graduates have the knowledge to integrate data, information, and knowledge to support decision-making processes that affect patients and providers. (Additional software may be required.)

Specialization Competencies (30 cr.)

- NURS 6401 - Informatics in Nursing and Healthcare
  - IF001 Data-Driven Evidence-Based Practice
    - Apply evidence-based research for integration into clinical decision support to solve problems and improve patient care.
  - IF002 Perspectives on the Sharing of Healthcare Information
    - Evaluate the sharing of healthcare data and information between organizations in healthcare contexts.
IF003 Potential Challenges of Informatics Technologies
   Analyze the potential challenges of EHR systems.
IF004 ANA Informatics Competencies in Practice
   Apply ANA informatics competencies to nursing practice according to ANCC standards.
IF005 Policy-Driven Nursing Informatics
   Analyze policy mandates to establish and maintain nursing informatics practices.

NURS 6412 - Information and Knowledge Management
IK001 Electronic Databases: The Backbone of Healthcare Record Keeping
   Analyze the evolution of database uses and integration in nursing settings.
IK002 Database Design and Relational Databases
   Develop basic relational databases using database design principles.
IK003 Database Queries for Data Analysis
   Design database queries for effective data analysis.
IK004 Data Integrity, Security, and Storage
   Recommend best practices for ensuring data integrity and security.
IK005 Data Analysis to Improve Patient Care and Outcomes
   Recommend ethical data mining and information sharing strategies to improve patient care and outcomes.

NURS 6421 - Supporting Workflow in Healthcare Systems
WF001 Workflow Models and the Role of the Nurse Informaticist
   Recommend workflow models from the perspective of the nurse informaticist throughout the systems development life cycle (SDLC).
WF002 Workflow Process Improvement for Healthcare Technologies
   Develop gap analysis plans to recommend workflow process improvements for healthcare information technologies to prevent workarounds.
WF003 Workflow Redesign Solutions and Implementation Strategies
   Apply workflow redesign solutions and implementation strategies to achieve meaningful-use compliance.

NURS 6441 - Project Management: Healthcare Information Technology
PI001 Change Management in Healthcare Information Technology Projects
   Develop a change management plan based on principles of project management and planning.
PI002 Healthcare Information Technology Project Plan
   Develop a healthcare information technology project plan to improve quality and safety in healthcare settings.
PI003 Strategies in Healthcare Information Technology Project Management
Evaluate strategies and best practices for effective and ethical healthcare information technology project management.

NURS 6451 - Evaluation Methods for Health Information Technology
EM001 The Role of Health Information Technology (HIT) Evaluation
   Analyze the characteristics of health information technology (HIT) evaluation.
EM002 Health Information Technology (HIT) Evaluation Plan
   Create an evidence-based practice evaluation plan for a health information technology (HIT) implementation.
EM003 Dissemination and Ethics in Health Information Technology (HIT) Evaluation
   Evaluate strategies related to dissemination and ethics in health information technology (HIT) evaluation.

NURS 6461 - Capstone Synthesis Practicum
NS001 Opportunities for Leadership and Professional Growth for the Nurse Informaticist
   Develop an evidence-based project to meet nursing informatics needs at a professional organization.
NS002 Leadership and Career Advancement
   Prepare a professional portfolio to advance a nurse informaticist role.

Note on Curriculum

In an effort to ensure competencies are kept up to date and relevant to meet the learning outcomes of the program, the number and subject matter of individual competencies needed to satisfy program course requirements may change. However, program outcomes and the number and subject matter of courses will not be impacted. As a result, the required competencies listed in a student’s individual learning plan may differ from what is currently listed in the catalog.

Pediatric Nurse Practitioner Primary Care - Master of Science in Nursing (MSN)

This specialization will meet the needs of nurses who wish to specialize in pediatrics primary care and will enable nurses to seek their master’s degree and enter practice as a pediatric nurse practitioner primary care (PNP-PC).

Specialization Courses (40 cr.)

NURS 6501 - Advanced Pathophysiology
NURS 6521 - Advanced Pharmacology
NURS 6512 - Advanced Health Assessment and Diagnostic Reasoning
NURS 6800 - Advanced Pediatric Development and Behavior
NRNP 6810 - Primary Care Approaches for Children
PRAC 6810 - Advanced Pediatric Nursing Practicum I: Primary Care
NRNP 6820 - Management of Complex Pediatric Conditions
PRAC 6820 - Advanced Pediatric Nursing Practicum II: Complex Care
NRNP 6830 - Management of Specialized Populations
PRAC 6830 - Advanced Pediatric Nursing Practicum III: Specialty Care
NRNP 6840 - Synthesis of Pediatric Primary Care
PRAC 6840 - Advanced Pediatric Nursing Practicum IV: Synthesis Care

Note on Certification

The MSN nurse practitioner specializations are designed to prepare graduates to qualify to sit for national nurse practitioner certification exams, which are required for practice as a nurse practitioner in most states. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency to determine specific certification exam requirements. Walden enrollment specialists can provide information relating to national certification exams; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she resides, as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain national certification. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners (AANP) at https://www.aanp.org/education/aanp-certification-program, American Nurses Credentialing Center (ANCC) at www.nursingworld.org/our-certifications, or the American Association of Critical Care Nurses (AACN) at APRNcert@aacn.org.

Note on Licensure

The MSN nurse practitioner specializations are designed to prepare graduates with an active registered nurse (RN) license to practice as nurse practitioners. However, each state Board of Nursing has its own academic and certification requirements and issues its own credential for an RN to be permitted to practice as a nurse practitioner in that state. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency in the state in which he or she resides to determine specific requirements. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate. Walden enrollment specialists can provide guidance relating to the state-by-state requirements for practice as a nurse practitioner; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to the practice as a nurse practitioner in the state in which he or she resides, as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure, authorization, endorsement, or other state credential. For more information about the requirements to practice as a nurse practitioner, students should contact the appropriate Board of Nursing or state agency.

Prospective Alabama students: State approval of a program to offer Alabama licensed nurses’ opportunities for advanced degrees does not indicate eligibility for approval to practice as an advanced nurse in Alabama. Applications for approval in Alabama are required to meet the Alabama requirements for national certification, graduation from a specific-type program for the advanced practice approval, and completion of the appropriate application. Any program offering a pre-licensure track to Alabama students shall meet the requirements of the Alabama regulations for pre-licensure programs or the graduates may not be eligible to take the national licensure examination required by the Alabama Board of Nursing to enter the practice. www.abn.alabama.gov

Prospective Washington students: Walden University is approved by the Washington State Nursing Care Quality Assurance Commission to provide practice experiences in Washington State for a Bachelor's
Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

Psychiatric Mental Health Nurse Practitioner - Master of Science in Nursing (MSN)

The Psychiatric Mental Health Nurse Practitioner (PMHNP) is an advanced practice registered nurse trained to provide a wide range of mental health services to patients and families in a variety of settings. PMHNPs diagnose, conduct therapy, and prescribe medications for patients who have psychiatric disorders, medical organic brain disorders, or substance abuse problems. They are licensed to provide emergency psychiatric services, conduct psychosocial and physical assessment of their patients, develop and manage treatment plans, and provide ongoing manage patient care. They may also serve as consultants or as educators for families and staff. The PMHNP has a focus on making a psychiatric diagnosis, differentiates between medical disorders with psychiatric symptoms, and orders appropriate medications to treat various psychiatric disorders. A PMHNP can often practice autonomously, depending on state licensure laws.

Graduates of Walden’s program will be eligible to take the national certifying examination, PMHNP—Across the Lifespan, through the American Nurses Credentialing Center (ANCC).

Specialization Courses (40 cr.)

- NURS 6501 - Advanced Pathophysiology
- NURS 6521 - Advanced Pharmacology

of Science in Nursing, Master of Science in Nursing with a specialization in Nursing Education, Nursing Informatics, Leadership and Management, Family Nurse Practitioner, Adult-Gerontology Acute Care Nurse Practitioner, Adult-Gerontology Primary Care Nurse Practitioner, and Psychiatric and Mental Health Nurse Practitioner, as well as the Doctor of Nursing Practice (DNP) program. For more information, go to the following website: https://www.doh.wa.gov/LicensesPermitsandCertificates/NursingCommission/NursingEducation/NursingPrograms.
NURS 6512 - Advanced Health Assessment and Diagnostic Reasoning
NURS 6630 - Psychopharmacologic Approaches to Treatment of Psychopathology
NRNP 6635 - Psychopathology and Diagnostic Reasoning
PRAC 6635 - Psychopathology and Diagnostic Reasoning Practicum
NRNP 6645 - Psychotherapy With Multiple Modalities
PRAC 6645 - Psychotherapy With Multiple Modalities Practicum
NRNP 6665 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan I
PRAC 6665 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan I Practicum
NRNP 6675 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan II
PRAC 6675 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan II Practicum

Note on Certification

The MSN nurse practitioner specializations are designed to prepare graduates to qualify to sit for national nurse practitioner certification exams, which are required for practice as a nurse practitioner in most states. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency to determine specific certification exam requirements. Walden enrollment specialists can provide information relating to national certification exams; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification exams for the state in which he or she resides, as requirements vary widely. Because no graduate program can guarantee that graduates will be permitted to practice as a nurse practitioner upon graduation, we encourage students to consult the appropriate Board of Nursing or state agency in the state in which he or she resides to determine specific requirements. Additionally, prospective students are advised if they choose to relocate to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate. Walden enrollment specialists can provide guidance relating to the state-by-state requirements for practice as a nurse practitioner; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to the practice as a nurse practitioner in the state in which he or she resides, as requirements vary widely. Walden makes no representations or guarantee that completion of Walden coursework or programs will permit an individual to obtain state licensure, authorization, endorsement, or other state credential. For more information about the requirements to practice as a nurse practitioner, students should contact the appropriate Board of Nursing or state agency.

Prospective Alabama students: State approval of a program to offer Alabama licensed nurses’ opportunities for advanced degrees does not indicate eligibility for approval to practice as an advanced nurse in Alabama. Applications for approval in Alabama are required to meet the Alabama requirements for national certification, graduation from a specific-type program for the advanced practice approval, and completion of the appropriate application. Any program offering a pre-licensure track to Alabama students shall meet the requirements of the Alabama regulations for pre-licensure
programs or the graduates may not be eligible to take the national licensure examination required by the Alabama Board of Nursing to enter the practice. www.abn.alabama.gov

**Prospective Washington students:** Walden University is approved by the Washington State Nursing Care Quality Assurance Commission to provide practice experiences in Washington State for a Bachelor’s of Science in Nursing, Master of Science in Nursing with a specialization in Nursing Education, Nursing Informatics, Leadership and Management, Family Nurse Practitioner, Adult-Gerontology Acute Care Nurse Practitioner, Adult-Gerontology Primary Care Nurse Practitioner, and Psychiatric and Mental Health Nurse Practitioner, as well as the Doctor of Nursing Practice (DNP) program. For more information, go to the following website: https://www.doh.wa.gov/LicensesPermitsandCertificates/NursingCommission/NursingEducation/NursingPrograms.

**Note on Field Experience and Relocating**

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

**Public Health Nursing - Master of Science in Nursing (MSN)**

Students in the Public Health Nursing specialization are prepared to take a lead role in improving health outcomes for entire populations, particularly those in underserved communities. The focus of the coursework is on skills such as assessing communities and populations; identifying high-risk groups; and developing culturally sensitive, realistic, population-based nursing interventions.

**Specialization Courses (30 cr.)**

- **PUBH 6034 - Environmental Health: Local to Global**
- **NURS 6700 - Epidemiology and Population Health**
- **PUBH 6475 - Program Planning, Implementation, and Evaluation**
- **NURS 6710 - Public Health Nursing Theory and Practice**
- **NURS 6720 - Population-Based Public Health Nursing Interventions**
- **NURS 6730 - Public Health Nursing Leadership**

**Note on Field Experience and Relocating**

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may
impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

Post-Master’s Certificate Programs

Post-Master’s Certificate in Adult Gerontology Acute Care Nurse Practitioner

This certificate program prepares nurses with an MSN or a nurse practitioner MSN degree with the specialized information, knowledge, and skills to be eligible to take the national NP certification examination appropriate to the specialty and to obtain NP licensure at the state level.

Certificate Requirements

- 38 total quarter credits
  - Core course (3 cr.)
  - Specialization courses (35 cr., includes the required 640 practicum hours*)

Fast Track (for licensed and certified Family Nurse Practitioners or Adult Gerontology Primary Care Nurse Practitioners)

- 38 quarter credits
  - Core courses (3 cr.)
  - Specialization courses (15 cr., includes the required 500 practicum hours)
  - Prior nursing credit from Family Nurse Practitioner or Adult Gerontology Primary Care Nurse Practitioner program (up to 20 cr.)

Course Sequence

Students undertake courses in the following sequence.

<table>

*Courses must be taken at Walden University.
With the exception of NURS 6003, all didactic courses are 5 quarter credits. All clinical courses are 3 credits didactic and 2 credits clinical practice.

Note on CCNE Accreditation

The Baccalaureate Degree Program in Nursing (BSN), Master's Degree Program in Nursing (MSN), Post-graduate APRN certificate program, and Doctor of Nursing Practice (DNP) program at Walden University are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE). Officially recognized by the U.S. Secretary of Education as a national accreditation agency, the Commission on Collegiate Nursing Education (CCNE) is an autonomous accrediting agency, contributing to the improvement of the public's health. CCNE ensures the quality and integrity of baccalaureate, graduate, and residency programs in nursing.

Note on Licensure, Certification, or Other State Credential Necessary to Practice as a Nurse Practitioner

Most states require graduation from a CCNE-accredited nurse practitioner program to be eligible to apply for certification to practice as an NP. However, the requirements for certification as a nurse practitioner vary from state to state. Each state board that is responsible for regulating the practice of nurse practitioners has its own academic requirements and issues its own certification to practice in that state. While Walden University enrollment specialists can provide general information relating to the state-
by-state educational requirements for certification, it remains the student's responsibility to understand, evaluate, and comply with all requirements relating to field education experiences, licensing or certification, authorization or endorsement for the state in which she or he resides. Walden University makes no representations or guarantee that completion of its coursework or programs will permit an individual to obtain state licensure, certification, authorization, endorsement, or other state credential. Licensure and certification eligibility determinations are ultimately determined by the appropriate state board that issues the credential to practice.

Prospective students enrolling in licensure/certification-leading programs are advised that relocation to another state may impact the student's ability to complete field experiences and/or to obtain professional licensure, certification or other credential in another state. Prospective students are advised to carefully review, evaluate and understand the requirements of the applicable board of nursing or agency that has jurisdiction over Registered Nurses (RNs) and Advance Practice Registered Nurses (APRNs) in the state in which they intend to relocate.

**Note on Field Experience and Relocating**

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

**Post-Master's Certificate in Adult Gerontology Primary Care Nurse Practitioner**

This certificate program prepares nurses with an MSN or a nurse practitioner MSN degree with the specialized information, knowledge, and skills to be eligible to take the national NP certification examination appropriate to the specialty and to obtain NP licensure at the state level.

**Post-Master's Certificate in Nursing Informatics**

This certificate program, which blends nursing science with computer and information science, prepares nurses to more effectively utilize information technology to enhance the quality of patient care. Coursework focuses on such key areas as information systems, database concepts, and effective project management. Students who complete this certificate program have the knowledge to integrate data, information, and knowledge to support decision-making processes that affect patients and providers.

*Courses must be taken at Walden University.

With the exception of NURS 6003, all didactic courses are 5 quarter credits. All clinical courses are 3 credits didactic and 2 credits clinical practice.

Note on CCNE Accreditation

The Baccalaureate Degree Program in Nursing (BSN), Master's Degree Program in Nursing (MSN), Post-graduate APRN certificate program, and Doctor of Nursing Practice (DNP) program at Walden University are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE). Officially recognized by the U.S. Secretary of Education as a national accreditation agency, the Commission on Collegiate Nursing Education (CCNE) is an autonomous accrediting agency, contributing to the improvement of the public's health. CCNE ensures the quality and integrity of baccalaureate, graduate, and residency programs in nursing.

Note on Licensure, Certification, or Other State Credential Necessary to Practice as a Nurse Practitioner

Most states require graduation from a CCNE-accredited nurse practitioner program to be eligible to apply for certification to practice as an NP. However, the requirements for certification as a nurse practitioner vary from state to state. Each state board that is responsible for regulating the practice of nurse practitioners has its own academic requirements and issues its own certification to practice in that state. While Walden University enrollment specialists can provide general information relating to the state-by-state educational requirements for certification, it remains the student’s responsibility to understand, evaluate, and comply with all requirements relating to field education experiences, licensing or certification, authorization or endorsement for the state in which she or he resides. Walden University makes no representations or guarantee that completion of its coursework or programs will permit an individual to obtain state licensure, certification, authorization, endorsement, or other state credential. Licensure and certification eligibility determinations are ultimately determined by the appropriate state board that issues the credential to practice.

Prospective students enrolling in licensure/certification-leading programs are advised that relocation to another state may impact the student’s ability to complete field experiences and/or to obtain professional licensure, certification or other credential in another state. Prospective students are advised to carefully review, evaluate and
understand the requirements of the applicable board of nursing or agency that has jurisdiction over Registered Nurses (RNs) and Advance Practice Registered Nurses (APRNs) in the state in which they intend to relocate.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

*Post-Master's Certificate in Psychiatric Mental Health Nurse Practitioner*

This certificate program prepares nurses with an MSN or a nurse practitioner MSN degree with the specialized information, knowledge, and skills to be eligible to take the national NP certification examination appropriate to the specialty and to obtain NP licensure at the state level.

Certificate Requirements

- 43 total quarter credits with 640 clinical hours
  - Foundation course (3 cr.)
  - Specialization courses (40 cr.)

Doctoral Degree Programs
Doctor of Nursing Practice (DNP)

The Doctor of Nursing Practice (DNP) program builds on the student's knowledge and expertise to strengthen advanced nursing practice, augment healthcare delivery, and improve patient outcomes. The program's coursework covers a range of topics, including healthcare policy and advocacy, quality improvement, evidence-based practice, information systems/technology, advanced nursing practice, and organizational and systems leadership.

Learning Outcomes

At the end of this program, students will be able to:

- Translate research findings to direct evidence-based nursing practice.
- Develop organizational system changes for quality improvement in healthcare delivery in response to local and/or global community needs.
- Apply optimal utilization of healthcare information technology across healthcare settings.
- Advocate for the advancement of nursing and healthcare policy through sharing of science-based knowledge with healthcare policy makers.
- Demonstrate leadership to facilitate collaborative teams for improving patient and populations health outcomes.
- Utilize advanced nursing practice knowledge to implement methodologies to improve population health outcomes.
- Establish a foundation for lifelong learning for continual elevation of contributions to the field of nursing through active involvement in professional organizations and/or other professional bodies.

Specializations

Changing specializations may increase a student's expected time-to-degree completion and cost.

- Traditional (see below)
  - Adult Gerontology Acute Care Nurse Practitioner
  - Adult Gerontology Primary Care Nurse Practitioner
  - Executive Leadership
  - Family Nurse Practitioner
  - Pediatric Nurse Practitioner Primary Care
  - Psychiatric Mental Health Nurse Practitioner

Minimum Degree Requirements
The Doctor of Nursing Practice offers several specializations, many of which have two entry options: BSN-DNP and MSN-DNP. See specialization pages for details on minimum required credits by specialization and track.

Foundation course (5 cr.)
Core courses (40 cr.)
Field experience (up to 8 cr., for students with fewer than 600 documented clinical hours)
Completion of DNP project
  DNP Project Mentoring course (0 cr.; starting after completion of NURS 8302, taken as companion course throughout the program of study until project completed)
  DNP Project Completion course (if needed to complete DNP Project after all other coursework has been completed; 3 cr. per term, taken continuously until completion of the DNP project)
Optional: Complete a DNP Intensive retreat (DRWI 8505) in Term 1 (NURS 8110) or later

Curriculum

The DNP program offers several specializations with two admission entry options for registered nurses:

  BSN-DNP entry: This option is for students with a Bachelor of Science in Nursing (BSN) degree.
  MSN-DNP entry: This option is for students with a Master of Science in Nursing (MSN) degree.

Foundational and Core Curricula

Foundation Course (5 cr.)

  NURS 8002 - Foundations and Essentials for the Doctor of Nursing Practice or NURS 8006 - Foundations and Essentials for the Doctor of Nursing Practice

BSN-DNP Entry Only: Essential Courses (10 cr.)

  DNRS 6052 - Essentials of Evidence Based Practice
  DNRS 6211 - Finance and Economics in Healthcare Delivery

Core Courses (40 cr.)

  NURS 8114 - Theoretical and Scientific Foundations of Nursing
  NURS 8201 - Research for Evidence Based Practice
NURS 8302 - Leading Organizations for Quality Improvement Initiatives
NURS 8502 - Evidence Based Practice I
NURS 8503 - Evidence Based Practice II
NURS 8210 - Transforming Nursing and Healthcare Through Technology
NURS 8310 - Epidemiology and Population Health
NURS 8100 - Healthcare Policy and Advocacy

Field Experience (up to 8 cr.)

Students with fewer than 600 documented clinical hours take up to 8 credits of field experience (see Determining Clinical Hours for Admissions section).

NURS 8601 - DNP Field Experience

Course Sequence

The DNP traditional program course sequence is as follows.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

*Note: In general, students are continuously registered in the doctoral project course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

**Determining Clinical Hours for Admissions**

To determine how many clinical hours students have upon entering the program, students must submit a letter from their previous master's in nursing program. It must be sent from the program director, associate dean, or dean of their previous institution.

The letter must include all of the following items:

- Date
- Student's full name
- University name, department, school
- Name and title of authority sending the letter (must be the program director or above), and contact information for follow-up if necessary
- Program director, associate dean, or dean's signature
- University letterhead
- Date and title of degree earned
- Specialization earned
- Total number of preceptor verified field experience hours

The signed letter will be submitted as an element. Admissions will determine how many documented clinical hours students have completed prior to DNP entry and how many
they will be required to complete in the DNP program (NURS 8601 - DNP Field Experience).

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

8-Year Maximum Time Frame

In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements in the student handbook). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

Accreditation

The Baccalaureate Degree Program in Nursing (BSN), Master’s Degree Program in Nursing (MSN), and Doctor of Nursing Practice (DNP) program at Walden University are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE). Officially recognized by the U.S. Secretary of Education as a national accreditation agency, the Commission on Collegiate Nursing Education (CCNE) is an autonomous accrediting agency, contributing to the improvement of the public’s health. CCNE ensures the quality and integrity of baccalaureate, graduate, and residency programs in nursing. For students, accreditation signifies program innovation and continuous self-assessment.

Note on Licensure

The Doctor of Nursing Practice (core program) and the DNP Executive Leadership specialization are not licensure programs and will not prepare students as nurse practitioners.

Walden's DNP nurse practitioner specializations are designed to academically prepare graduates with an active registered nurse (RN) license to practice in the United States as nurse practitioners. However, each state has its own academic preparation and authority to practice requirements and issues its own license for an RN to be permitted to practice as a nurse practitioner in that state. Learn more about professional licensure.
No graduate program can guarantee that graduates will obtain licensure to practice as a nurse practitioner. We encourage students to consult the appropriate board of nursing or regulatory authority in the states or jurisdictions in which they reside or intend to seek licensure to determine specific requirements. Walden Enrollment Specialists can provide information relating to licensure; however, it remains the individual's responsibility to understand, evaluate, and comply with all requirements relating to licensure for the state in which they intend to practice, as requirements vary widely.

Note on Certification

Walden's DNP NP specializations are designed to academically prepare graduates to apply for national certification. Walden makes no representations or guarantees that completion of Walden coursework or programs will permit an individual to achieve national certification. We encourage students to consult an appropriate certifying body for the specific certification eligibility requirements. Students should also consult their state board of nursing or other state agency to determine what certifications are required or accepted in that state. It is an individual's responsibility to understand, evaluate, and comply with all requirements relating to national certification, as requirements vary widely. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners Certification Board at www.aanpcert.org, the American Nurses Credentialing Center at www.nursingworld.org/ancc, or other nurse practitioner certification websites.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

Note

Prospective Washington students: Walden University is approved by the Washington State Nursing Care Quality Assurance Commission to provide practice experiences in Washington State for a Bachelor's of Science in Nursing; Master of Science in Nursing with a specialization in Nursing Education, Nursing Informatics, Leadership and
Management, Family Nurse Practitioner, Adult-Gerontology Acute Care Nurse Practitioner, Adult-Gerontology Primary Care Nurse Practitioner, and Psychiatric and Mental Health Nurse Practitioner; as well as the Doctor of Nursing Practice (DNP) program. For more information, go to the following website: https://www.doh.wa.gov/LicensesPermitsandCertificates/NursingCommission/NursingEducation/NursingPrograms.

**PhD in Nursing**

The PhD in Nursing program prepares nursing professionals for advanced careers in nursing research, practice, and education. With a focus on readying students to contribute to nursing science, advance knowledge in nursing practice, and improve healthcare services, practices, and policies, course topics include: advanced quantitative, qualitative, and mixed-methods research design; quality improvement systems and leadership; and theoretical and scientific perspectives in nursing. The doctoral dissertation enables students to conduct and publish original research that contributes to the body of knowledge in their chosen specialty. Based on their educational and career goals, students will choose from among five focus areas: Education, Healthcare Administration, Interdisciplinary Health, Leadership, and Public Health Policy. Students wishing to continue their studies may also pursue a second, optional focus area.

**Learning Outcomes**

Graduates of this program will be prepared to:

- Utilize current research and theory to develop prevention and intervention strategies that advance the knowledge and practice of nursing.
- Demonstrate advanced competency in research design and methodology to address social problems and needs.
- Engage in scientific inquiry that advances the knowledge base of research and practice in the profession.
- Evaluate the role of research and scholarship in the field of nursing in relation to its role in improving health interventions and advancing the development of related theory.
- Synthesize nursing's philosophical and/or theoretical underpinnings in the practice of research.
- Contribute to the science of nursing through social change and social policy initiatives.
- Apply ethical decision making and values to the profession.
- Advocate for policies and programs that improve health outcomes among culturally diverse populations.
Lead professional communication that supports the discipline and practice of nursing.
Demonstrate the ability to act as a role model and mentor to others who wish to pursue the profession (stewardship).

Focus Areas

Bridge Option for Students With a DNP - PhD in Nursing
Healthcare Administration
Interdisciplinary Health Focus
Leadership
Nursing Education
Population Health

Minimum Degree Requirements

The PhD in Nursing offers two entry options: BSN-PhD and MSN-PhD. See specialization pages for details on minimum required credits by specialization and entry option.

Foundation course (1 cr.)
Core courses (25 cr. or 50 cr., depending upon BSN-PhD or MSN-PhD entry)
Research courses (20 cr.)
Doctoral Seminar (5 quarter cr.)
Focus area courses (15 cr.)
Completion of the Doctoral Capstone
  Dissertation (minimum 15 quarter cr., taken continuously until completion of the dissertation)
  Doctoral Writing Assessment (0 cr.)
  Four PhD residencies

Core Curriculum

BSN-PhD entry: This entry option is for registered nurses (RN) who have earned their bachelor's in nursing degree.

MSN-PhD entry: This entry option is for registered nurses (RN) who have earned their master's in nursing degree.

Foundation Course (1 cr.)

NURS 8003 - Foundations and Essentials in Nursing
Core Courses (25 cr. or 50 cr.)

BSN-PhD entry students take 50 credits of core courses. MSN-PhD entry students take 25 credits of core courses. See each focus area for course information.

Research Courses (20 cr.)

Foundation Research Courses (15 cr.)

- RSCH 8110 - Research Theory, Design, and Methods
- RSCH 8210 - Quantitative Reasoning and Analysis
- RSCH 8310 - Qualitative Reasoning and Analysis

Advanced Research Course (5 cr.)

- RSCH 8260 - Advanced Quantitative Reasoning and Analysis
  OR
- RSCH 8360 - Advanced Qualitative Reasoning and Analysis
  OR
- RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Doctoral Seminar (5 cr.)

- NURS 8710 - Doctoral Seminar I
- NURS 8720 - Doctoral Seminar II
- NURS 8730 - Doctoral Seminar III
- NURS 8740 - Doctoral Seminar IV
- NURS 8750 - Doctoral Seminar V

Focus Area Courses (15 cr.)

See each focus area for course information.

Completion of the Doctoral Capstone

- NURS 9000 - Dissertation
  Students take this course for a minimum of three quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Residency Requirements
Complete Residency 1 as soon as you begin your program; required in order to advance into RSCH 8101N.

Complete Residency 2 prior to entering NURS 8551.

Complete Residency 3 once you have a draft prospectus.

Complete Residency 4 after your prospectus is approved and you are enrolled in EDUC 9000 or EDPD 8990, complete residency 4 during your third year or beyond as:

- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR
- a dissertation intensive (DRWI 8500). Contact Student Success Advising to register.

Optional: Complete a PhD dissertation intensive retreat (DRWI 8500) during your dissertation. Contact Student Success Advising to register.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

Specializations (Doctoral)

**Adult-Gerontology Acute Care Nurse Practitioner - Doctor of Nursing Practice (DNP)**

In the Adult-Gerontology Acute Care Nurse Practitioner specialization, students build their core competencies to become nurse practitioners while acquiring the advanced practice skills essential to high-acuity healthcare settings such as hospital emergency rooms, intensive care units, trauma centers, and specialty practices. Coursework prepares students for the challenges of managing the care of acutely or chronically ill adolescents (13+), young adults, adults, and older adults across the entire patient care...
experience, from initial assessment and diagnosis to developing a treatment and care plan. Graduates of this program will also be prepared to apply research and evidence-based practice to support quality improvement initiatives.

Minimum Completion Requirements

BSN-DNP entry: 90 quarter credits. MSN-DNP entry: 80 quarter credits

- Doctoral Writing Assessment (0 cr.)
- Foundation course (5 cr.)
  - BSN-DNP entry only: Essential courses (10 cr.)
    - DNRS 6052 - Essentials of Evidence-Based Practice
    - DNRS 6211 - Finance and Economics in Healthcare Delivery
- Core courses (40 cr.)
- Specialization courses (35 cr., includes the required 640 practicum hours*)
- Completion of DNP Project
- Doctoral Mentoring (0 cr.)
- Doctoral DNP Project Completion (if needed to complete DNP Project after all other coursework has been completed; 3 cr. per term, taken continuously until completion of the DNP Project)

Note: Students who enter the program with certain approved APRN licensure and certification will receive prior nursing credit and will be required to complete at least 500 practicum hours*.

Specialization Courses (35 cr.)

- DNRS 6501 - Advanced Pathophysiology
- DNRS 6521 - Advanced Pharmacology
- DNRS 6512 - Advanced Health Assessment and Diagnostic Reasoning
- DRNP 6540 - Advanced Practice Care of Older Adults
- PRCM 6540 - Advanced Practice Care of Older Adults Practicum
- DRNP 6566 - Advanced Practice Care of Adults in Acute Settings I Practicum
- PRCM 6566 - Advanced Practice Care of Adults in Acute Settings I Practicum
- DRNP 6550 - Advanced Practice Care of Adults in Acute Care Settings II
- PRCM 6550 - Advanced Practice Care of Adults in Acute Care Settings II Practicum
- DRNP 6560 - Advanced Practice Care of Adults in Acute Settings III
- PRCM 6560 - Advanced Practice Care of Adults in Acute Settings III Practicum

**Note on Licensure**

Walden’s DNP nurse practitioner specializations are designed to academically prepare graduates with an active registered nurse (RN) license to practice in the United States as nurse practitioners. However, each state has its own academic preparation and
authority to practice requirements and issues its own license for an RN to be permitted to practice as a nurse practitioner in that state. Learn more about professional licensure.

No graduate program can guarantee that graduates will obtain licensure to practice as a nurse practitioner. We encourage students to consult the appropriate board of nursing or regulatory authority in the states or jurisdictions in which they reside or intend to seek licensure to determine specific requirements. Walden Enrollment Specialists can provide information relating to licensure; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to licensure for the state in which they intend to practice, as requirements vary widely.

Note on Certification

Walden’s DNP NP specializations are designed to academically prepare graduates to apply for national certification. Walden makes no representations or guarantees that completion of Walden coursework or programs will permit an individual to achieve national certification. We encourage students to consult an appropriate certifying body for the specific certification eligibility requirements. Students should also consult their state board of nursing or other state agency to determine what certifications are required or accepted in that state. It is an individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification, as requirements vary widely. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners Certification Board at www.aanpcert.org, the American Nurses Credentialing Center at www.nursingworld.org/ancc, or other nurse practitioner certification websites.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.
**Adult-Gerontology Primary Care Nurse Practitioner - Doctor of Nursing Practice (DNP)**

In the Adult-Gerontology Primary Care Nurse Practitioner specialization, students explore strategies for improving health outcomes among adult patients, ages 13 years and older, through effective communication and collaboration. Students have the opportunity to explore current health topics through a curriculum developed in collaboration with experts. Courses are rooted in evidence-based practice so that students can gain knowledge in providing quality, comprehensive, accessible, and cost-effective care.

This specialization can prepare students to make a positive difference in today’s dynamic and ever-changing healthcare environment, whether in clinical practice or a related health professional role. Students can prepare to advance their careers. Graduates can pursue national adult-gerontology nurse practitioner certification and state credentialing.

**Minimum Completion Requirements**

BSN-DNP entry: 90 quarter credits. MSN-DNP entry: 80 quarter credits

- Doctoral Writing Assessment (0 cr.)
- Foundation course (5 cr.)
  - BSN-DNP entry only: Essential courses (10 cr.)
    - DNRS 6052 - Essentials of Evidence-Based Practice
    - DNRS 6211 - Finance and Economics in Healthcare Delivery
- Core courses (40 cr.)
- Specialization courses (35 cr., includes the required 640 practicum hours*)
- Completion of DNP Project
- Doctoral Mentoring (0 cr.)
- Doctoral DNP Project Completion (if needed to complete DNP Project after all other coursework has been completed; 3 cr. per term, taken continuously until completion of the DNP Project)

**Note:** Students who enter the program with certain approved APRN licensure and certification will receive prior nursing credit and will be required to complete at least 500 practicum hours*.

**Specialization Courses (35 cr.)**

- DNRS 6501 - Advanced Pathophysiology
- DNRS 6521 - Advanced Pharmacology
DNRS 6512 - Advanced Health Assessment and Diagnostic Reasoning
DRNP 6531 - Primary Care of Adults Across the Lifespan
PRCM 6531 - Primary Care of Adults Across the Lifespan Practicum
DRNP 6540 - Advanced Practice Care of Older Adults
PRCM 6540 - Advanced Practice Care of Older Adults Practicum
DRNP 6552 - Advanced Nurse Practice in Reproductive Health Care
PRCM 6552 - Advanced Nurse Practice in Reproductive Health Care Practicum
DRNP 6565 - Synthesis in Advanced Nursing Practice Care of Patients in Primary Care Settings
PRCM 6565 - Synthesis in Advanced Nursing Practice Care of Patients in Primary Care Settings Practicum

**Note on Licensure**

Walden's DNP nurse practitioner specializations are designed to academically prepare graduates with an active registered nurse (RN) license to practice in the United States as nurse practitioners. However, each state has its own academic preparation and authority to practice requirements and issues its own license for an RN to be permitted to practice as a nurse practitioner in that state. Learn more about professional licensure.

No graduate program can guarantee that graduates will obtain licensure to practice as a nurse practitioner. We encourage students to consult the appropriate board of nursing or regulatory authority in the states or jurisdictions in which they reside or intend to seek licensure to determine specific requirements. Walden Enrollment Specialists can provide information relating to licensure; however, it remains the individual's responsibility to understand, evaluate, and comply with all requirements relating to licensure for the state in which they intend to practice, as requirements vary widely.

**Note on Certification**

Walden’s DNP NP specializations are designed to academically prepare graduates to apply for national certification. Walden makes no representations or guarantees that completion of Walden coursework or programs will permit an individual to achieve national certification. We encourage students to consult an appropriate certifying body for the specific certification eligibility requirements. Students should also consult their state board of nursing or other state agency to determine what certifications are
required or accepted in that state. It is an individual’s responsibility to understand, evaluate, and comply with all requirements relating to national certification, as requirements vary widely. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners Certification Board at www.aanpcert.org, the American Nurses Credentialing Center at www.nursingworld.org/ancc, or other nurse practitioner certification websites.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

Bridge Option for Students With a DNP - PhD in Nursing

Walden offers students who hold a Doctor of Nursing Practice (DNP) degree a shorter path to the PhD in Nursing.

Eligibility Requirements

DNP from Walden or another accredited university with a Master of Science in Nursing Degree as a prerequisite or earned equivalent.

Degree Requirements

- Foundations course (1 cr.)
- Core courses (25 cr.)
- Research courses (20 cr.)
- Doctoral Seminar (5 cr.)
- Focus area courses (15 cr.)
  - Applicants with an earned MSN and DNP will be awarded 15 credits.

Completion of the Doctoral Capstone
  - Dissertation (minimum 15 cr., taken continuously until completion of the dissertation)
- Four PhD residencies
Curriculum

Foundation Course (1 cr.)

NURS 8003 - Foundations and Essentials in Nursing

Core Courses (25 cr.)

NURS 8112 - Theoretical and Scientific Foundations of Nursing Research
NURS 8301 - Leading Organizations for Quality Improvement Initiatives
NURS 8250 - Advanced Theoretical and Scientific Perspectives in Nursing
NURS 8210 - Transforming Nursing and Healthcare Through Technology
NURS 8551 - Preparing for Dissertation

Research Courses (20 cr.)

Foundation Research Courses (15 cr.)

RSCH 8110 - Research Theory, Design, and Methods
RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis

Advanced Research Course (5 cr.)

Choose one:
RSCH 8260 - Advanced Quantitative Reasoning and Analysis OR
RSCH 8360 - Advanced Qualitative Reasoning and Analysis OR
RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Doctoral Seminar (5 cr.)

NURS 8710 - Doctoral Seminar I
NURS 8720 - Doctoral Seminar II
NURS 8730 - Doctoral Seminar III
NURS 8740 - Doctoral Seminar IV
NURS 8750 - Doctoral Seminar V

Focus Area Courses (15 cr.)

Applicants with an earned MSN and DNP will be awarded 15 credits.

Completion of the Doctoral Capstone

NURS 9000 - Dissertation
Students take this course for a minimum of three quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.
To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Residency Requirements

Complete Residency 1 face-to-face as soon as you begin your program; should be completed within 90 days of completing your Foundations course.

Complete Residency 2 as face-to-face or virtual within 18 months of your start date or linked to your registration for or completion of your first research course.

Complete Residency 3 face-to-face by the end of your third year.

Complete Residency 4 after your prospectus is approved and you are enrolled in EDUC 9000 or EDPD 8990, complete residency 4 during your third year or beyond as:

- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR

a dissertation intensive (DRWI 8500). Contact Student Success Advising to register.

Optional: Complete a PhD Dissertation Intensive retreat (DRWI 8500) face-to-face during your dissertation. Contact Student Success Advising to register.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.
Executive Leadership - Doctor of Nursing Practice (DNP)

The Executive Leadership specialization in Walden's online DNP program can academically prepare you to make an even greater impact on your patients' healthcare experience. Gain the systems thinking, knowledge, and confidence to implement and lead quality improvement initiatives across teams and organizations. Become a catalyst for improved patient care and better patient outcomes.

Minimum Completion Requirements

- 45 quarter credits
- Doctoral Writing Assessment (0 cr.)
- Foundation course (5 cr.)
- Core courses (30 cr.)
- Specialization courses (10 cr.)
- Field experience (up to 6 cr., for students with fewer than 600 documented clinical hours)

Completion of DNP Project

- Doctoral Mentoring (0 cr.)
- Doctoral DNP Project Completion (if needed to complete DNP Project after all other coursework has been completed; 3 cr. per term, taken continuously until completion of the DNP Project)

Specialization Courses (10 cr.)

- NURS 8504 - Evidence Based Practice for the Executive Leader I
- NURS 8505 - Evidence Based Practice for the Executive Leader II

**Note on Licensure**

The Doctor of Nursing Practice Executive Leadership specialization is not a licensure program and will not prepare students as nurse practitioners.
**Family Nurse Practitioner - Doctor of Nursing Practice (DNP)**

Family Nurse Practitioners (FNPs) are advanced practice registered nurses with the knowledge and skills to assess and manage health issues in patients of all ages, from birth through the senior years. This specialization can prepare students to gain autonomy or advance in their career as healthcare professionals. Through a series of courses and well-rounded clinical practice experiences focused on current health issues, students can effectively implement and facilitate disease prevention, health promotion, health maintenance, and restorative care interventions.

This online Family Nurse Practitioner specialization focuses on evidence-based techniques that can enhance the quality of care and outcomes for patients. The program offers strategies that can prepare students to work in primary care outpatient health settings or change the course of their healthcare career. Graduates of the program can pursue national family nurse practitioner certification and state credentialing.

**Minimum Completion Requirements**

**BSN-DNP entry:** 90 quarter credits. **MSN-DNP entry:** 80 quarter credits

- Doctoral Writing Assessment (0 cr.)
- Foundation course (5 cr.)
  - BSN-DNP entry only: Essential courses (10 cr.)
    - DNRS 6052 - Essentials of Evidence-Based Practice
    - DNRS 6211 - Finance and Economics in Healthcare Delivery
- Core courses (40 cr.)
- Specialization courses (35 cr., includes the required 640 practicum hours*)

**Note on Licensure**

Walden's DNP nurse practitioner specializations are designed to academically prepare graduates with an active registered nurse (RN) license to practice in the United States as nurse practitioners. However, each state has its own academic preparation and authority to practice requirements and issues its own license for an RN to be permitted to practice as a nurse practitioner in that state. Learn more about professional licensure.

No graduate program can guarantee that graduates will obtain licensure to practice as a nurse practitioner. We encourage students to consult the appropriate board of nursing or regulatory authority in the states or jurisdictions in which they reside or intend to seek licensure to determine specific requirements. Walden Enrollment Specialists can provide information relating to licensure; however, it remains the individual's responsibility to understand, evaluate, and comply with all requirements relating to licensure for the state in which they intend to practice, as requirements vary widely.

**Note on Certification**

Walden's DNP NP specializations are designed to academically prepare graduates to apply for national certification. Walden makes no representations or guarantees that completion of Walden coursework or programs will permit an individual to achieve national certification. We encourage students to consult an appropriate certifying body for the specific certification eligibility requirements. Students should also consult their state board of nursing or other state agency to determine what certifications are required or accepted in that state. It is an individual's responsibility to understand, evaluate, and comply with all requirements relating to national certification, as requirements vary widely. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners Certification
Board at www.aanpcert.org, the American Nurses Credentialing Center at www.nursingworld.org/ancc, or other nurse practitioner certification websites.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

**Pediatric Nurse Practitioner Primary Care - Doctor of Nursing Practice (DNP)**

This specialization will meet the needs of nurses who wish to specialize in pediatrics primary care and will enable nurses to seek their master's degree and enter practice as a pediatric nurse practitioner primary care (PNP-PC).

**Minimum Completion Requirements**

BSN-DNP entry: 95 quarter credits. MSN-DNP entry: 85 quarter credits

- Doctoral Writing Assessment (0 cr.)
- Foundation course (5 cr.)
  - BSN-DNP entry only: Essential courses (10 cr.)
    - DNRS 6052 - Essentials of Evidence-Based Practice
    - DNRS 6211 - Finance and Economics in Healthcare Delivery
- Core courses (40 cr.)
- Specialization courses (40 cr.)
- Completion of DNP Project
- Doctoral Mentoring (0 cr.)
- Doctoral DNP Project Completion (if needed to complete DNP Project after all other coursework has been completed; 3 cr. per term, taken continuously until completion of the DNP Project)

**Specialization Courses (40 cr.)**

**Note on Licensure**

Walden’s DNP nurse practitioner specializations are designed to academically prepare graduates with an active registered nurse (RN) license to practice in the United States as nurse practitioners. However, each state has its own academic preparation and authority to practice requirements and issues its own license for an RN to be permitted to practice as a nurse practitioner in that state. Learn more about professional licensure.

No graduate program can guarantee that graduates will obtain licensure to practice as a nurse practitioner. We encourage students to consult the appropriate board of nursing or regulatory authority in the states or jurisdictions in which they reside or intend to seek licensure to determine specific requirements. Walden Enrollment Specialists can provide information relating to licensure; however, it remains the individual’s responsibility to understand, evaluate, and comply with all requirements relating to licensure for the state in which they intend to practice, as requirements vary widely.

**Note on Certification**

Walden’s DNP NP specializations are designed to academically prepare graduates to apply for national certification. Walden makes no representations or guarantees that completion of Walden coursework or programs will permit an individual to achieve national certification. We encourage students to consult an appropriate certifying body for the specific certification eligibility requirements. Students should also consult their state board of nursing or other state agency to determine what certifications are required or accepted in that state. It is an individual's responsibility to understand, evaluate, and comply with all requirements relating to national certification, as
requirements vary widely. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners Certification Board at www.aanpcert.org, the American Nurses Credentialing Center at www.nursingworld.org/ancc, or other nurse practitioner certification websites.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

Psychiatric-Mental Health Nurse Practitioner - Doctor of Nursing Practice (DNP)

The Psychiatric Mental Health Nurse Practitioner (PMHNP) is an advanced practice registered nurse trained to provide a wide range of mental health services to patients and families in a variety of settings. PMHNPs diagnose, conduct therapy, and prescribe medications for patients who have psychiatric disorders, medical organic brain disorders, or substance abuse problems. They are licensed to provide emergency psychiatric services, conduct psychosocial and physical assessment of their patients, develop and manage treatment plans, and provide ongoing manage patient care. They may also serve as consultants or as educators for families and staff. The PMHNP has a focus on making a psychiatric diagnosis, differentiates between medical disorders with psychiatric symptoms, and orders appropriate medications to treat various psychiatric disorders. A PMHNP can often practice autonomously, depending on state licensure laws.

Graduates of Walden’s program will be eligible to take the national certifying examination, PMHNP—Across the Lifespan, through the American Nurses Credentialing Center (ANCC).

Minimum Completion Requirements

BSN-DNP entry: 95 quarter credits. MSN-DNP entry: 85 quarter credits

    Doctoral Writing Assessment (0 cr.)
Foundation course (5 cr.)
   BSN-DNP entry only: Essential courses (10 cr.)
      DNRS 6052 - Essentials of Evidence-Based Practice
      DNRS 6211 - Finance and Economics in Healthcare Delivery
Core courses (40 cr.)
Specialization courses (40 cr.)
Completion of DNP Project
Doctoral Mentoring (0 cr.)
Doctoral DNP Project Completion (if needed to complete DNP Project after all
other coursework has been completed; 3 cr. per term, taken continuously until
completion of the DNP Project)

Specialization Courses (40 cr.)

   DNRS 6501 - Advanced Pathophysiology
   DNRS 6521 - Advanced Pharmacology
   DNRS 6512 - Advanced Health Assessment and Diagnostic Reasoning
   DNRS 6630 - Psychopharmacologic Approaches to Treatment of Psychopathology
   DRNP 6645 - Psychotherapy With Multiple Modalities
   PRCM 6645 - Psychotherapy With Multiple Modalities Practicum
   DRNP 6635 - Psychopathology and Diagnostic Reasoning
   PRCM 6635 - Psychopathology and Diagnostic Reasoning Practicum
   DRNP 6665 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan I
   PRCM 6665 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan I Practicum
   DRNP 6675 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan II
   PRCM 6675 - Psychiatric Mental Health Nurse Practitioner Care Across the Lifespan II Practicum

Note on Licensure

Walden's DNP nurse practitioner specializations are designed to academically prepare graduates with an active registered nurse (RN) license to practice in the United States as nurse practitioners. However, each state has its own academic preparation and authority to practice requirements and issues its own license for an RN to be permitted.
to practice as a nurse practitioner in that state. Learn more about professional licensure.

No graduate program can guarantee that graduates will obtain licensure to practice as a nurse practitioner. We encourage students to consult the appropriate board of nursing or regulatory authority in the states or jurisdictions in which they reside or intend to seek licensure to determine specific requirements. Walden Enrollment Specialists can provide information relating to licensure; however, it remains the individual's responsibility to understand, evaluate, and comply with all requirements relating to licensure for the state in which they intend to practice, as requirements vary widely.

Note on Certification

Walden's DNP NP specializations are designed to academically prepare graduates to apply for national certification. Walden makes no representations or guarantees that completion of Walden coursework or programs will permit an individual to achieve national certification. We encourage students to consult an appropriate certifying body for the specific certification eligibility requirements. Students should also consult their state board of nursing or other state agency to determine what certifications are required or accepted in that state. It is an individual's responsibility to understand, evaluate, and comply with all requirements relating to national certification, as requirements vary widely. For more information about nurse practitioner certification exams, students should visit the American Academy of Nurse Practitioners Certification Board at www.aanpcert.org, the American Nurses Credentialing Center at www.nursingworld.org/ancc, or other nurse practitioner certification websites.

Note on Field Experience and Relocating

Students who are considering relocating are advised to contact their student success advisor prior to any decision to relocate in order to determine how relocation may impact progress in their program. Advisors can provide information and guidance on how relocating may result in possible changes, restrictions, and/or additional requirements affecting field experience. Each Board of Nursing and Higher Education Authority governs the field experience rules and regulations in their respective states, and students may be unable to complete field experience in the state in which they plan to relocate. While Walden is committed to working collaboratively with students to secure field sites across the United States, it is imperative that students contact their student success advisor immediately when considering relocating.

Focus Areas
Healthcare Administration - PhD in Nursing

The Healthcare Administration focus area prepares students to administer healthcare programs and services through the application of best practices in leadership, professionalism, ethics, and strategic planning. With an emphasis on working collaboratively and effectively with diverse populations, students will examine the principles of social justice implicit in healthcare decisions and practice. Students will also explore the theoretical underpinnings of governance and public policy in healthcare administration. Throughout the dissertation process, students will be supported by scholar-practitioner faculty members.

BSN-PhD Entry

BSN-PhD entry: 106 quarter credits.

BSN-PhD Entry Core Courses (50 cr.)

Choose four (20 cr.) of the following courses:
- DNUR 6201 - Leadership in Nursing and Healthcare
- DNUR 6211 - Finance and Economics in Healthcare Delivery
- DNUR 6221 - Managing Human Resources
- DNUR 6223 - Healthcare Quality Assurance and Risk Management in Healthcare Organizations
- DNUR 6227 - Current Issues in Health Policy
- DNUR 6231 - Healthcare Systems and Quality Outcomes
- DNUR 6224 - Quality Assurance and Regulatory Compliance

Complete all of the following courses:
- NURS 8112 - Theoretical and Scientific Foundations of Nursing Research
- NURS 8100 - Healthcare Policy and Advocacy
- NURS 8301 - Leading Organizations for Quality Improvement Initiatives
- NURS 8210 - Transforming Nursing and Healthcare Through Technology
- NURS 8250 - Advanced Theoretical and Scientific Perspectives in Nursing
- NURS 8551 - Preparing for Dissertation

BSN-PhD Entry Focus Area Courses (15 cr.)

Choose any three of the following courses:
- HLTH 8500 - Human Resources Management and Organizational Development and Leadership for Healthcare Administrators
- HLTH 8300 - Law, Ethics, and Policy in Healthcare Administration
- HLTH 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
- HLTH 8750 - Trends and Issues in Executive Level Management for Healthcare Administrators

MSN-PhD Entry
MSN-PhD entry: 81 quarter credits.

MSN-PhD Entry Core Courses (25 cr.)

NURS 8112 - Theoretical and Scientific Foundations of Nursing Research
NURS 8301 - Leading Organizations for Quality Improvement Initiatives
NURS 8250 - Advanced Theoretical and Scientific Perspectives in Nursing
NURS 8210 - Transforming Nursing and Healthcare Through Technology
NURS 8551 - Preparing for Dissertation

MSN-PhD Entry Focus Area Courses (15 cr.)

Choose any three of the following courses:

HLTH 8500 - Human Resources Management and Organizational Development and Leadership for Healthcare Administrators
HLTH 8300 - Law, Ethics, and Policy in Healthcare Administration
HLTH 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
HLTH 8750 - Trends and Issues in Executive Level Management for Healthcare Administrators

*Interdisciplinary Health Focus - PhD in Nursing*

Students may create their own Interdisciplinary Health focus area by choosing three courses from any of the four other PhD in Nursing specializations: Education, Healthcare Administration, Leadership, and Public Health Policy. Each course must be from a different focus area. Throughout the dissertation process, students will be supported by scholar-practitioner faculty members.

BSN-PhD Entry

BSN-PhD entry: 106 quarter credits.

BSN-PhD Entry Core Courses (50 cr.)

Choose four (20 cr.) of the following courses:

DNUR 6201 - Leadership in Nursing and Healthcare
DNUR 6211 - Finance and Economics in Healthcare Delivery
DNUR 6221 - Managing Human Resources
DNUR 6231 - Healthcare Systems and Quality Outcomes
DNUR 6710 - Public Health Nursing Theory and Practice
PUBH 6034 - Environmental Health: Local to Global
DNUR 6321 - Curriculum Development, Assessment, and Evaluation
DNUR 6370 - Foundational Skills for Nurse Educators in Academic and Healthcare Environments
DNUR 6331 - Teaching Learning Strategies: Integrating Technology Into Nursing Education
Complete all of the following courses:

BSN-PhD Entry Focus Area Courses (15 cr.)

Choose one course from each area.

Area 1
- NURS 8540 - Academic Nursing Faculty Role Development
- NURS 8542 - Curriculum Change: Applying Research Strategies to Prepare Tomorrow’s Nursing Education Programs
- NURS 8544 - Strategies for Teaching Innovations in Nursing Education
- NURS 8546 - Strategies for Innovation in Nursing Education

Area 2
- HLTH 8136 - Leadership, Professionalism, and Ethics in Public Health Practice
- HLTH 8392 - The Language of Leadership
- HLTH 8111 - Leadership and Organizational Change

Area 3
- HLTH 8750 - Trends and Issues in Executive Level Management for Healthcare Administrators
- HLTH 8300 - Law, Ethics, and Policy in Healthcare Administration
- HLTH 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
- HLTH 8500 - Human Resources Management and Organizational Development and Leadership for Healthcare Administrators

MSN-PhD Entry

MSN-PhD entry: 81 quarter credits.

MSN-PhD Entry Core Courses (25 cr.)

- NURS 8112 - Theoretical and Scientific Foundations of Nursing Research
- NURS 8301 - Leading Organizations for Quality Improvement Initiatives
- NURS 8250 - Advanced Theoretical and Scientific Perspectives in Nursing
- NURS 8210 - Transforming Nursing and Healthcare Through Technology
- NURS 8551 - Preparing for Dissertation

MSN-PhD Entry Focus Area Courses (15 cr.)

Choose one course from each area:
Area 1
NURS 8540 - Academic Nursing Faculty Role Development
NURS 8542 - Curriculum Change: Applying Research Strategies to Prepare Tomorrow's Nursing Education Programs
NURS 8544 - Strategies for Teaching Innovations in Nursing Education
NURS 8546 - Strategies for Innovation in Nursing Education

Area 2
HLTH 8136 - Leadership, Professionalism, and Ethics in Public Health Practice
HLTH 8392 - The Language of Leadership
HLTH 8111 - Leadership and Organizational Change

Area 3
HLTH 8750 - Trends and Issues in Executive Level Management for Healthcare Administrators
HLTH 8300 - Law, Ethics, and Policy in Healthcare Administration
HLTH 8465 - Strategic Planning: Collaboration, Cooperation, and Coordination
HLTH 8500 - Human Resources Management and Organizational Development and Leadership for Healthcare Administrators

Leadership - PhD in Nursing

The Leadership focus area helps prepare students to be healthcare leaders who can work effectively with diverse workforces and communities under varying political and economic conditions. They will explore competencies in organizational change management, team building, mediation, collaboration, and systems thinking and planning. Students will examine the theoretical underpinnings of leadership and ethics, as well as the professional attributes, skills, styles, and strategies required to advance organizational goals. The use of dynamic language techniques by leadership will be explored, providing students with a practical foundation for motivating, inspiring, and managing their organizations through effective communication. Throughout the dissertation process, students will be supported by scholar-practitioner faculty members as they pursue individual research in an interest area of healthcare leadership.

BSN-PhD Entry

BSN-PhD entry: 106 quarter credits.

BSN-PhD Entry Core Courses (50 cr.)

Choose four (20 cr.) of the following courses:
DNUR 6201 - Leadership in Nursing and Healthcare
DNUR 6211 - Finance and Economics in Healthcare Delivery
DNUR 6241 - Strategic Planning in Healthcare Organizations
DNUR 6231 - Healthcare Systems and Quality Outcomes
DNUR 6226 - Introduction to Healthcare Policy
Complete all of the following courses:

- **NURS 8112** - Theoretical and Scientific Foundations of Nursing Research
- **NURS 8100** - Healthcare Policy and Advocacy
- **NURS 8301** - Leading Organizations for Quality Improvement Initiatives
- **NURS 8210** - Transforming Nursing and Healthcare Through Technology
- **NURS 8250** - Advanced Theoretical and Scientific Perspectives in Nursing
- **NURS 8551** - Preparing for Dissertation

BSN-PhD Entry Focus Area Courses (15 cr.)

Choose any three of the following courses:

- **HLTH 8136** - Leadership, Professionalism, and Ethics in Public Health Practice
- **HLTH 8031** - Public Health Administration and Leadership
- **HLTH 8392** - The Language of Leadership
- **HLTH 8111** - Leadership and Organizational Change

**MSN-PhD Entry**

**MSN-PhD entry:** 81 quarter credits.

**MSN-PhD Entry Core Courses (25 cr.)**

- **NURS 8112** - Theoretical and Scientific Foundations of Nursing Research
- **NURS 8301** - Leading Organizations for Quality Improvement Initiatives
- **NURS 8210** - Transforming Nursing and Healthcare Through Technology
- **NURS 8250** - Advanced Theoretical and Scientific Perspectives in Nursing
- **NURS 8551** - Preparing for Dissertation

**MSN-PhD Entry Focus Area Courses (15 cr.)**

Choose any three of the following courses:

NURS 8250 - Advanced Theoretical and Scientific Perspectives in Nursing
NURS 8210 - Transforming Nursing and Healthcare Through Technology
NURS 8551 - Preparing for Dissertation

MSN-PhD Entry Focus Area Courses (15 cr.)

Choose any three of the following courses:
Population Health - PhD in Nursing

Students in this focus area have the opportunity to develop leadership and advanced population health nursing skills in community-based assessment, program planning, interventions, and outcomes. Students learn to design and influence population health at the local, regional, and global levels by analyzing risk factors of disease and how to initiate preventative measures by conducting research to improve the health care needs of communities and populations. Students also explore how data is used to form policy recommendations and to draft legislation that promotes the equal distribution of health resources and reductions in health risks.

BSN-PhD Entry

BSN-PhD entry: 106 quarter credits.

BSN-PhD Entry Core Courses (50 cr.)

- PUBH 6475 - Program Planning, Implementation, and Evaluation
- DNUR 6710 - Public Health Nursing Theory and Practice
- PUBH 6034 - Environmental Health: Local to Global
- DNUR 6052 - Essentials of Evidence-Based Practice
- NURS 8112 - Theoretical and Scientific Foundations of Nursing Research
- NURS 8100 - Healthcare Policy and Advocacy
- NURS 8301 - Leading Organizations for Quality Improvement Initiatives
- NURS 8210 - Transforming Nursing and Healthcare Through Technology
- NURS 8250 - Advanced Theoretical and Scientific Perspectives in Nursing

MSN-PhD Entry Focus Area Courses (15 cr.)

Choose only three courses from the options below.

NURS 8310 - Epidemiology and Population Health
PUBH 8038 - Health Behavior Theory
PHLT 8402 - Applied Leadership and Multicultural Perspectives in Public Health
PHLT 8051 - Advanced Issues in Global Public Health
College of Psychology and Community Services

Bachelor's Degree Programs

**BS in Criminal Justice**

Walden University’s BS in Criminal Justice program is designed to help students gain the skills and knowledge to prepare for a career in law enforcement, the justice system, corrections, homeland security, and social services. The program blends contemporary theory on the nature, extent, and cause of crime with the study of national and international criminal justice practices. Learning is supported through coursework and a final capstone project. The curriculum is based on the recommendations of the Academy of Criminal Justice Sciences. The program can help prepare students to become more effective social change agents in criminal justice organizations at the local, state, federal, or international levels.

**Note:** The BS in Criminal Justice program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

**Learning Outcomes**

At the end of the program, students will be able to:

- Explain concepts, theoretical perspectives, empirical findings, and trends in criminal justice.
- Demonstrate the ability to apply legal and ethical principles to the criminal justice system.
- Describe the structure, function, and interaction of key institutions in criminal justice.
- Discuss the patterns, typologies, and root causes of crime.
- Apply criminal justice concepts, processes, and practices to social justice and social change.

**Competency-Based Education**
In addition to the course-based option described below, students can choose to earn their BS in Criminal Justice through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the BS in Criminal Justice (Competency Based) page for program details.

Course-Based Program

Concentrations

- Advanced Topics in Criminal Justice (AIM)
- Computer Information Systems and Security
- Corrections and Human Services
- Crime and Criminal Investigation
- Crime and Criminals
- Criminal Justice Management and Administration
- Criminal Justice Management and Administration (AIM)
- Homeland Security
- Human Services for Criminal Justice
- Self-Designed

Degree Requirements

- 181 total quarter credits
  - General education courses (46 cr.)*
  - Core courses (45 cr.)
  - Concentration courses (20 cr.)
  - Elective courses (65 cr.)
  - Capstone course (5 cr.)

*Review the list of required general education courses by program.

Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 60 quarter credits must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.
First Term Course

HMNT 1001 - Living and Learning in the Technological World

Core Courses (45 cr.)

CRJS 1001 - Contemporary Criminal Justice Systems
CRJS 2001 - Criminology and Social Control
CRJS 2002 - Juvenile Delinquency and Justice
CRJS 2003 - Criminal Law
CRJS 3001 - Corrections
CRJS 3002 - Courts and Judicial Process
CRJS 3003 - Law Enforcement
CRJS 3004 - Data Analysis for Criminal Justice Professionals
CRJS 4203 - Introduction to Victimology

Concentration Courses (20 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (65 cr.)

Choose 13 courses from general education, BS in Criminal Justice, or other Walden bachelor’s degree programs. Elective credits should total 65 to meet the program requirements. At least 10 credits must be at the 3000, 4000, or 5000 level. Students may also be eligible to transfer previous credit to meet your elective requirements.

Capstone Course (5 cr.)

CRJS 4160 - Capstone: Ethics and Diversity in Criminal Justice

Note on Licensure

Walden's BS in Criminal Justice program is not considered a Professional Peace Officer Education Program for the state of Minnesota and is not designed or intended to prepare graduates for licensure as a peace officer, police officer, or other law enforcement officer in any state.

BS in Criminal Justice (Competency Based)

Tempo Learning® is Walden's competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully
passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

Core Competencies (45 cr.)

CRJS 1001 - Contemporary Criminal Justice Systems ♦
CJ1001 The Contemporary Criminal Justice System
   Analyze roles and responsibilities in an evolving criminal justice system.
CJ1002 Crime and Reporting
   Compare the perception of crime occurrence and crime reporting to address public misconceptions.
CJ1003 Mental Health and the Criminal Justice System
   Differentiate between mental health issues and criminal behavior in criminal justice practice.
CJ1004 Diversion, Sentencing, and Corrections
   Distinguish between diversionary responses to crime, sentencing rationale, and corrections rationale.

CRJS 2001 - Criminology and Social Control
   SG2001 Definitions and Typologies of Crime and Deviation
      Differentiate between crime and deviance.
   SG2002 Social Control
      Analyze forms of social control and their relationships to society and criminal justice.
   SG2003 Theory in Criminology
      Compare the application of the classical school and the positivist school of criminological theory in criminal justice practice.
   SG2004 Community Approaches to Social Problems and Law Enforcement
      Develop a community-based law enforcement plan to address a community problem.

CRJS 2002 - Juvenile Delinquency and Justice
   JD2001 The Evolving Definition of Juvenile
      Analyze the qualifications for juvenile distinction in the criminal justice system.
   JD2002 Factors That Influence Juvenile Delinquency
      Distinguish between biological, psychological, and sociological influences of juvenile delinquency.
   JD2003 Working with Juvenile Offenders
      Apply strategies for working with juveniles based on adjudication decisions.
   JD2004 The Criminal Courts and Juvenile Offenders
      Recommend an offender to either family and juvenile court or adult criminal court.

CRJS 2003 - Criminal Law
   LA2001 Criminal Responsibility Under Criminal Law
      Compare criminal responsibility in varied settings.
   LA2002 Classifications of Defense
      Apply classifications of justification in criminal justice settings.
   LA2003 Prosecutorial Roles
      Differentiate between prosecutorial roles and decisions in the criminal justice system.
   LA2004 The Role of Jurisdiction and Precedent in Criminal Law
      Apply international, federal, state, or local law to criminal justice practice.

CRJS 3001 - Corrections
CX3001 The History and Evolution of Corrections Systems
   Analyze the history and evolution of corrections systems.

CX3002 Corrections Philosophy and Theory
   Apply philosophical orientations, concepts, and theories of corrections practice.

CX3003 Corrections Practice in Institutions
   Apply corrections practice and policy recommendations in institutional corrections settings.

CX3004 Corrections Practice in Communities
   Develop a community-based corrections plan.

CRJS 3002 - Courts and Judicial Process
   JP3001 The Judicial System
      Analyze factors that contribute to choices and processes in the judicial system.
   JP3002 Roles in the Judicial System
      Analyze factors that contribute to choices and processes in the judicial system.
   JP3003 Professional Standards and Ethics
      Apply professional standards and ethics to criminal justice practice in the judicial system.
   JP3004 Justice in a Changing Society
      Apply diversity and cultural awareness to criminal justice practice in the judicial system.

CRJS 3003 - Law Enforcement
   LW3001 Law Enforcement History
      Compare historical aspects of law enforcement and policing to contemporary criminal justice practice.
   LW3002 Law Enforcement Management and Organizational Structure
      Distinguish between local, state, and federal law enforcement agencies in criminal justice practice.
   LW3003 The Use of Power in Law Enforcement
      Distinguish between the appropriate uses of power, discretion, and deception in law enforcement practice.
   LW3004 Technology in Law Enforcement
      Evaluate the influence of technological innovations in law enforcement.

CRJS 3004 - Data Analysis for Criminal Justice Professionals
   DA3001 The Role of Research in Criminal Justice
      Analyze the application of data driven research and crime analysis.
DA3002 Foundational Research Methods
Apply data analysis and foundational research methods in criminal justice settings and practice.

DA3003 Research Tools and Basic Computer Applications in Criminal Justice
Apply tools for management and organization of criminal justice data, databases, and analyses.

DA3004 Crime Analysis and Geographic Information Systems (GIS)
Apply mapping tools for crime analysis.

CRJS 4203 - Introduction to Victimology

VT4001 Crime and Victimization Theory
Analyze how victimization theory affects criminal justice practice.

VT4002 Types of Victims
Analyze how victim type affects crime reporting.

VT4003 Crime Reporting, Policy, and Victim Roles
Relate methods of crime reporting to victimization policy changes in the criminal justice process.

VT4004 Resources for Victims
Recommend appropriate resource guidance for crime victims.

Concentration Competencies (20 cr.)
These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Elective Competencies (65 cr.)
Choose 13 courses from general education, BS in Criminal Justice, or other Walden bachelor’s degree programs. Elective credits should total 65 to meet the program requirements. At least 10 credits must be at the 3000, 4000, or 5000 level. Students may also be eligible to transfer previous credit to meet their elective requirements.

Capstone Competencies (5 cr.)

CRJS 4160 - Capstone: Ethics and Diversity in Criminal Justice

DD4001 Ethics in Criminal Justice Issues
Recommend ethical approaches for decision-making, behavior, and policies that address criminal justice issues.

DD4002 Cultural Diversity in Criminal Justice
Develop a diversity policy to address bias in the criminal justice system.
BS in Forensic Psychology

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.

The BS in Forensic Psychology program provides a broad background in general psychology with an additional strong foundation aimed specifically at forensic psychology. To further the students’ opportunities, four concentrations are offered. Graduates of the program will be prepared to work effectively and ethically with diverse populations (victims, criminals, families, children, adults, etc.) in a wide range of settings (government, courts, business, community, and correctional institutions).

Learning Outcomes

At the end of this course, students will be able to:

- Describe current issues, problems, and trends in the field of forensic psychology.
- Apply basic research methods in psychology, including research design, data analysis, and interpretation.
- Use forensic assessment strategies, including interviews and observations, to solve problems related to forensic psychology.
- Apply psychological theory and research to provide successful interventions for personal, social, and organizational issues in the realm of forensic psychology.
- Describe the role of ethical behavior in promoting social change in a variety of settings.
- Demonstrate the ability to use guidelines and standards of the profession to communicate information about psychological processes in various forensic settings.
- Discuss the importance of diversity and multicultural issues when evaluating and intervening with forensic psychology populations.
- Develop a strategy for personal and career development in the field of forensic psychology.

Concentrations

- Forensics and the Law
- Leadership and Management
- Victims and Justice
- Self-Designed

Curriculum

General Education Courses (46 cr.)

See the General Education section of this *Walden University Catalog*.

*Note:* At least three general education courses taken must be taken at the 3000 level or higher, including SOCI 4080.

Core Courses (50 cr.)

- PSYC 1001 - Introduction to Psychology
- PSYC 2001 - Cross-Cultural Psychology
- PSYC 2009 - Theories of Personality
- PSYC 3002 - Introduction to Basic Statistics
- PSYC 3003 - Methods in Psychological Inquiry
- PSYC 3004 - Psychological Disorders
- CRJS 4102 - The Criminal Mind
- FPSY 2101 - Introduction to Forensic Psychology
- FPSY 4111 - Forensic Interviewing and Investigation
- FPSY 4112 - Forensic Assessment

Concentration Courses (15 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (65 cr.)

Students are to select 13 additional courses to fulfill the elective requirement. At least four elective courses (20 credits) must be at the 3000 level or above in the BS in Psychology or BS in Forensic Psychology programs. For the remaining nine courses (45 credits), students may choose courses from general education courses, BS in Forensic Psychology concentration courses, or courses from any of Walden’s bachelor’s degree programs.

*Note:* Electives can also be used to complete a six-course minor. RN-BSN courses are not available to students outside the RN-BSN program.
Capstone Course (5 cr.)

FPSY 4920 - Capstone

BS in Human Services

This program prepares students to meet the growing need for qualified professionals who have a broad understanding of human services program development, implementation, and evaluation. Through this curriculum, students gain the practical skills required to assist individuals and communities in crisis. The curriculum comprises courses through which students have the opportunity to develop core human services competencies, including managing and resolving conflict, organizing community resources, and interacting with diverse communities.

Learning Outcomes

Upon completion of the program, students will be able to:

- Describe the roles of human services professional practitioners.
- Develop a professional identity as a new human service professional practitioner.
- Describe how human services related research informs the delivery of culturally sensitive human services.
- Demonstrate an understanding of the appropriate application of a variety of human services intervention strategies.
- Communicate with a variety of stakeholders in a professional manner.
- Demonstrate an ability to determine client needs based on a variety of information.
- Demonstrate skills necessary to advocate for client needs in order to support positive social change.

Concentrations

- Addictions
- Child and Adolescent Development
- Courts and the Legal System
- Criminal Justice
- Cultural Studies
- Disability Studies
- Global Social Justice and Civic Engagement
- Leadership and Administration
- Psychology
- Self-Designed
Degree Requirements

181 total quarter credits
General education courses (46 cr.)
Core courses (45 cr.)
Concentration courses (30-35 cr., depending on concentration)
Elective courses (50-55 cr., depending on concentration)
Capstone course (5 cr.)

Curriculum

BS in Human Services students should take HUMN courses when possible.

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: At least three general education courses taken must be at the 3000 level or higher, including SOCI 4080.

Core Courses (45 cr.)

HUMN 1030 - The Human Services Professional Practitioner: The Humanitarian in Practice
HUMN 2007 - Developing the Helping Relationship
HUMN 2050 - Understanding Urban Culture and Community Assessment
HUMN 3010 - Crisis and Positive Intervention
HUMN 3013 - Person-Centered Planning and Case Management
HUMN 4003 - Measuring Effectiveness of Human Services Delivery
HUMN 4009 - Cultural Humility and Diversity
HUMN 4010 - Mental Health Crisis Response
HUMN 4020 - Advocacy in the Global Community

Concentration Courses (30–35 cr.)

These courses are dependent upon the particular concentration. Please see the course list on each concentration page.

Electives (50–55 cr.)

Electives are dependent upon the particular concentration. Please see the elective requirements on each concentration page.

Capstone Course (5 cr.)
BS in Psychology

Build a gratifying career and become a positive force in people's lives. You want more than just a job—you want a meaningful career. Build the foundation for a rewarding future with our online BS in Psychology program. Explore the latest psychology concepts, research, and theories, and gain the skills to help others improve their lives.

Learning Outcomes

At the end of this program, students will be able to:

- Demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.
- Understand and apply basic research methods in psychology, including research design and data analysis and interpretation.
- Respect and use critical and creative thinking, skeptical inquiry, and, when possible, a scientific approach to solve problems related to behavior and mental processes.
- Understand and apply psychological principles to personal, social, and organizational issues.
- Tolerate ambiguity, act ethically, and reflect other values that are the underpinnings of psychology as a science serving a global society.
- Apply cultural competencies to effective and sensitive interactions with people from diverse backgrounds and cultural perspectives.

Concentrations

- Accelerate Into Master's (AIM)
- Addiction
- Applied Psychology
- Child and Adolescent Development
- Criminal Justice
- Forensic Psychology
- General Psychology
- Human Services
- Preparation for Graduate Studies
- Workplace Psychology

Degree Requirements

181 total quarter credit hours
General education courses (46 cr.)
Core courses (35 cr.)
Concentration courses (25–35 cr., depending on concentration)
Psychology elective courses (10–20 cr., depending on concentration)
Elective courses (45–65 cr., depending on concentration)

Curriculum

General Education Courses (46 cr.)

See the general education section of this Walden University Catalog.

Note: A minimum of 55 quarter credits must be completed at the 3000, 4000, or 5000 level in order to meet program requirements. In some cases, this means that students will need to select 3000 or 4000 level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.

Core Courses (35 cr.)

PSYC 2000 - Psychology Seminar
PSYC 2001 - Cross-Cultural Psychology
PSYC 2005 - Social Influences on Behavior
PSYC 2009 - Theories of Personality
PSYC 3002 - Introduction to Basic Statistics
PSYC 3003 - Methods in Psychological Inquiry
PSYC 4010 - Psychology Capstone

Psychology Elective Courses (10–20 cr.)

Psychology elective courses are dependent upon the particular concentration. Please see the requirements on each concentration page.

Electives (40–65 cr.)

Electives are dependent upon the particular concentration. Please see the elective requirements on each concentration page.

Note on Licensure

The BS in Psychology is not a licensure program and does not prepare an individual to become a licensed psychology or counseling professional.

Other Undergraduate Options
Accelerate Into Master's (AIM)

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a "C" in the graduate-level course but only a grade of "B" or better will carry over to the graduate program. Students who receive a "C" grade will be awarded a grade of "C,"* which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not pass their AIM class are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must take that course as a master's student.

Requirements

Walden University offers several opportunities for undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

Individually programs may determine the specific eligible AIM courses and some programs may limit the number of courses available. Generally, AIM coursework should not account for more than approximately 50% of the credits needed for master's degree completion. Practicum or Capstone requirements for the master's program are not eligible to be satisfied by AIM coursework.

To be eligible to begin AIM courses, students must:

a. Have an overall GPA equal to that required for admission to the associated master's degree.* BS AIM track students must maintain a 2.5 GPA and have a transfer GPA of at least 2.5 (if transferring credits).

b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.) * BS in Psychology AIM track students do not need to meet this requirement.

c. Be in good financial standing.

d. Not have any incompletes.

AIM courses are (5000-level) graduate courses.*

a. Tuition for these courses is charged at the undergraduate rate for the course-based learning format. For Tempo Learning® these courses are included in the program's subscription cost.
b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.

c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA only.

Students must get a "B" or better in each course to have that course applied to the master's program.

Students who do not earn a grade of "C" or better will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must take that course as a master's student. * BS in Psychology AIM track students may retake an AIM course a second time if they failed the first time; they must earn a grade of "C" or better the second time in order to stay in the AIM track program.

Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.

Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

Upon completion of the undergraduate program requirements, students should file an Intent to Graduate Form.

Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a "B" or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

Undergraduate students may complete AIM courses to fulfill elective credits, as course substitutions approved by the program director, or they may elect a second concentration within their program of study that is designed for AIM completion. Students are encouraged to consult with Student Success Advising (if in the course-based learning format) or their Academic Coaching (if in the Tempo Learning® format) on the most appropriate plan for their program and academic goals, such as their future master’s program and time to completion.
*Note: Graduate students cannot register for AIM courses.

* Students are required to take PSYC 5101 along with PSYC 5102 or HUMN 5100.

**Note on Endorsement, Licensure, or Certification**
This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.

**BS in Forensic Psychology to Master of Public Administration (MPA) Articulation**
Walden University’s advanced undergraduate psychology students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden's or Master of Public Administration (MPA) programs.
Requirements

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the courses below.
- The student must have completed all general education and core requirements of the BS in Forensic Psychology.

Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Student Success Advising Team for more information regarding the Accelerate into Master’s (AIM) program.

Curriculum

All graduate courses are taken as electives and must be selected from the list below.

Note: The courses outlined in the Accelerate Into Master’s (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to five of the following courses for the Master of Public Administration (MPA) program:

- MMPA 5200 - Principles of Public Administration
- MMPA 5405 - Ethics and Social Justice
- MMPA 5420 - Organizational Management and Leadership
- MMPA 5431 - Finance and Budgeting for the Public Sector
- MMPA 5435 - Human Resource Management: Building a Capable Workforce
- MMPA 5451 - Public Policy Analysis
- MMPA 5480 - Applied Research and Evaluation Methods

Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master’s (AIM) courses and who are graduating (or have graduated) from the BS in Forensic Psychology program are invited to apply to the Master of Public Administration (MPA) program. Upon acceptance to Walden’s MPA program, up to five courses can be applied to degree completion requirements.

- MMPA 6115 - Foundations for Graduate Study Required
- MMPA 6200 - Principles of Public Administration
  Students who successfully complete MMPA 5200 - Introduction to Public Administration (5 cr.) with a "B" or better can have this course waived.
MMPA 6405 - Ethics and Social Justice  
Students who successfully complete MMPA 5405 - Ethics and Social Justice (5 cr.) with a "B" or better can have this course waived.

MMPA 6420 - Organizational Management and Leadership  
Students who successfully complete MMPA 5420 - Organizational Management and Leadership (5 cr.) with a "B" or better can have this course waived.

MMPA 6431 - Finance and Budgeting for the Public Sector  
Students who successfully complete MMPA 5431 - Finance and Budgeting for the Public Sector (5 cr.) with a "B" or better can have this course waived.

MMPA 6435 - Human Resource Management: Building a Capable Workforce  
Students who successfully complete MMPA 5435 - Human Resource Management: Building a Capable Workforce (5 cr.) with a "B" or better can have this course waived.

MMPA 6451 - Public Policy Analysis  
Students who successfully complete MMPA 5451 - Public Policy Analysis (5 cr.) with a "B" or better can have this course waived.

MMPA 6465 - Strategic Planning: Collaboration, Cooperation, and Coordination  
Required

MMPA 6480 - Applied Research and Evaluation Methods  
Students who successfully complete MMPA 5480 - Applied Research and Evaluation Methods (5 cr.) with a "B" or better can have this course waived.

MMPA 6910 - Master of Public Administration Capstone  Required

BS in Forensic Psychology to MS in Criminal Justice Articulation

Walden University's advanced undergraduate psychology students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden’s MS in Criminal Justice or MS in Criminal Justice Leadership and Executive Management.

Requirements

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the courses below.
- The student must have completed all general education and core requirements of the BS in Forensic Psychology.

Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Student Success Advising Team for more information regarding the Accelerate Into Master’s (AIM) program.
Curriculum

All graduate courses are taken as electives and must be selected from the list below.

Note: The courses outlined in the Accelerate into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Choose up to five of the following courses for the MS in Criminal Justice program in specific specializations:

- CRJS 5203 - Victimology
- CRJS 5215 - Controversies in Criminal Justice
- CRJS 5217 - Technological Solutions and 21st-Century Crime
- CRJS 5511 - Special Populations

Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master's courses and who are graduating (or have graduated) from the BS in Forensic Psychology program, are invited to apply to the MS in Criminal Justice program. Upon acceptance to Walden's MS in Criminal Justice program, up to five courses can be applied to degree completion requirements.

- CRJS 6203 - Victimology\(^\star\) \textit{Required}
- CRJS 6215 - Controversies in Criminal Justice\(^\star\) Students who successfully complete CRJS 5215 - Controversies in Criminal Justice (5 cr.) with a "B" or better can have this course waived.
- CRJS 6216 - Criminal Justice Research\(^\star\) \textit{Required}
- CRJS 6217 - Technological Solutions and 21st-Century Crime\(^\star\) Students who successfully complete CRJS 5217 - Technological Solutions and 21st-Century Crime (5 cr.) with a "B" or better can have this course waived.
- CRJS 6218 - Applied Communications\(^\star\) \textit{Required}
- CRJS 6405 - Ethics and Social Justice\(^\star\) \textit{Required}
- CRJS 6420 - Organizational Management and Leadership\(^\star\) \textit{Required}
- CRJS 6511 - Special Populations\(^\star\) \textit{Required}

BS in Forensic Psychology to MS in Criminal Justice Leadership and Executive Management Articulation

BS in Psychology to MS in Psychology Articulation

Walden University’s advanced undergraduate psychology students are eligible to take select graduate courses as part of their undergraduate degree program completion. Upon admission to the associated graduate program, these courses may then be applied to Walden’s MS in Psychology.

Requirements

To help ensure student success, the following requirements have been established:

- The student must be in good standing with the university.
- The student must maintain an overall GPA of 2.5 or better to be eligible to register for the courses below.
- The student must have completed all general education and core requirements of the BS in Psychology.

Note: Students are advised to consult the Walden University Student Handbook and contact a member of the Student Success Advising Team for more information regarding the Accelerate Into Master's (AIM) program.

Curriculum

All graduate courses are taken as electives and must be selected from the list below.

Note: The courses outlined in the Accelerate Into Master's (AIM) program are 12 weeks in length and are only offered in September, December, March, and June.

Take the five courses for the MS in Psychology program:

- PSYC 5315 - Tests and Measurement
- PSYC 5480 - Psychology of Organizational Behavior
- PSYC 5701 - Culture and Psychology
- PSYC 6215 - Lifespan Development
- PSYC 6245 - Social Psychology

Walden University Catalog (March 2022)
Articulation Requirements

Walden University students who have successfully completed Accelerate Into Master’s (AIM) courses and who are graduating (or have graduated) from the BS in Psychology program are invited to apply to the MS in Psychology program. Upon acceptance to Walden’s MS in Psychology program, up to five courses can be applied to degree completion requirements.

- **PSYC 6001 - Foundations for Graduate Study in Psychology** Required
- **PSYC 6205 - History and Systems of Psychology** Required
- **PSYC 6211 - Contemporary Issues in Psychology** Required
- **PSYC 6215 - Lifespan Development** Students who successfully complete PSYC 5215 - Lifespan Development (5 cr.) with a "B" or better can have this course waived.
- **PSYC 6240 - Human Motivation** Required
- **PSYC 6245 - Social Psychology** Students who successfully complete PSYC 5245 - Social Psychology (5 cr.) with a "B" or better can have this course waived.
- **PSYC 6305 - Statistics 1** Required
- **PSYC 6315 - Tests and Measurement** Students who successfully complete PSYC 5315 - Tests and Measurements (5 cr.) with a "B" or better can have this course waived.
- **PSYC 6393 - Capstone** Required
- **PSYC 6480 - Psychology of Organizational Behavior** Students who successfully complete PSYC 5480 - Psychology of Organizational Behavior (5 cr.) with a "B" or better can have this course waived.
- **PSYC 6701 - Culture and Psychology** Students who successfully complete PSYC 5701 - Culture and Psychology (5 cr.) with a "B" or better can have this course waived.

**Minor in Criminal Justice**

The Undergraduate Minor in Criminal Justice is for the non-public policy and administration student who may be interested in law enforcement, the justice system, corrections, homeland security, and social services. With this minor, students can blend contemporary theory on the nature, extent, and cause of crime with the study of national and international criminal justice practices.

**Note:** This minor is not available to students in the BS in Criminal Justice program.

**Required Courses (30 cr.)**

- **CRJS 1001 - Contemporary Criminal Justice Systems**
- **CRJS 2001 - Criminology and Social Control**
- **CRJS 2003 - Criminal Law**
  And students choose three of the following:
CRJS 3001 - Corrections
CRJS 3002 - Courts and Judicial Process
CRJS 3003 - Law Enforcement
CRJS 3004 - Data Analysis for Criminal Justice Professionals
CRJS 4102 - The Criminal Mind

Minor in Psychology

The Undergraduate Minor in Psychology is for the non-psychology major student who wants a broad understanding and global perspective of psychology and its relevance in an increasingly diverse and global society. Students will apply psychological theories to current issues in psychology as they gain perspective in social awareness, responsibility, civic engagement, cross-cultural competence, and evidence-based decision making in an information-rich world.

Note: This minor is not available to students in the BS in Forensic Psychology or BS in Psychology programs.

Required Courses (30 cr.)

PSYC 1001 - Introduction to Psychology

Students choose five of the following. At least two must be 3000-level or 4000-level:
PSYC 2001 - Cross-Cultural Psychology
PSYC 2002 - Human Development: Childhood and Adolescence
PSYC 2003 - Human Development: Adulthood
PSYC 2005 - Social Influences on Behavior
PSYC 2009 - Theories of Personality
PSYC 3001 - Cognitive Psychology
PSYC 3004 - Psychological Disorders
PSYC 3005 - Racial and Ethnic Identities
PSYC 3006 - Psychology of Gender
PSYC 3007 - Influence and Persuasion
PSYC 4002 - Brain and Behavior
PSYC 4006 - Global Perspectives in Psychology
PSYC 4008 - Intergroup Conflict and Peace Building

Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student’s major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their student success advisor. Students may select a maximum of two minors.
Minor in Applied Instructional Design and Technology
Minor in Business
Minor in Communication
Minor in Criminal Justice
Minor in Health Promotion and Wellness
Minor in Health Studies
Minor in Healthcare Management
Minor in Introductory Instructional Design and Technology
Minor in Political Science and Public Administration
Minor in Psychology
Minor in Public Health

Graduate Certificate Programs

**Graduate Certificate in Conflict Management and Negotiation**

In a constantly changing world, there's a growing need for professionals skilled in the areas of negotiation and dispute resolution. The focus of this certificate is on providing the core competencies to meet that need for those who interact within organizations, communities, and governments. Students will explore current theory and best practices and gain the essential skills to help negotiate and resolve disputes within communities.

Certificate Curriculum (20 cr.)

- HUMN 6702 - Introduction to the Dynamics of Conflict and Negotiation
- HUMN 6742 - Conflict, Conflict Resolution, and Peace
- HUMN 6405 - Ethics and Social Justice
- HUMN 6204 - Intergroup Relations

**Graduate Certificate in Criminal Justice**

In this certificate program, students focus their understanding of key issues confronting the American criminal justice system, as well as policy analysis and the contemporary decision-making models. This certificate is designed for criminal justice professionals in policing, the courts, corrections, security, and associated support agencies.

Students must meet the master's program admission requirements. Credit from courses taken for a certificate can be applied toward the Master of Public Administration or the MS in Nonprofit Management and Leadership.

Students must progress and maintain performance in a manner identical to a degree program. Students track their progress in their program of study, similar to degree-seeking students. Students must receive a B or better in each course. Note: A grade of B– is not acceptable.

Master's Degree Programs

**MS in Criminal Justice**

Walden University’s MS in Criminal Justice program will prepare students to effectively work within criminal justice agencies, governmental organizations, and the private sector. The programs comprise a core of contemporary theory and practice as well as the study of national and international issues in the administration of criminal justice. This includes the intersections of management of local, state, and federal criminal justice systems. Thus, it provides the ability to practically apply knowledge and skills that will
impact society. With a unique blend of criminal behavioral theory, human services, technology, homeland security, and management, the program will provide students with critical 21st-century skills.

Note: The MS in Criminal Justice program is offered in two different learning modalities: the course-based modality and the competency-based modality, Tempo Learning®.

Learning Outcomes

At the end of the program, students will be able to:

Utilize theory and research to analyze historical trends and current perspectives in criminal justice.

Use research to evaluate factors related to crime and the impact of crime on criminal justice policies, practices, and procedures.

Evaluate the impact of U.S. constitutional policy and procedures on the criminal justice system.

Analyze the impact of the criminal justice process on victims and perpetrators.

Synthesize principles from criminal justice theories, processes, and practices to promote social justice and positive social change.

Compare the structural functions and interactions of law enforcement, courts, and corrections within the criminal justice system at the local, state, and federal level.

Discuss how criminal justice laws and policies are adopted, implemented, and evaluated.

Competency-Based Education

In addition to the course-based option described below, students can choose to earn their MS in Criminal Justice through the competency-based education modality. Upon successful completion of program requirements, students will earn the same Walden degree in either modality. See the MS in Criminal Justice (Competency Based) page for program details.

Course-Based Program

Specializations

General Program (below)
Behavioral Sciences
Cybercrimes
Emergency Management
Homeland Security Policy and Coordination
International/Global Criminal Justice
Law and Public Policy
Public Management and Leadership
Terrorism, Mediation, and Peace

**MS in Criminal Justice (Competency Based)**

Tempo Learning® is Walden's competency-based education modality, an alternative way of earning a Walden degree offered for some Walden programs. Instead of courses, the Walden Tempo Learning® program is comprised of competencies and rigorous assessments. Students progress through the Tempo Learning® model by successfully passing competency assessments. A student must successfully achieve or master all competency assessments to graduate from the program.

Students earn the same Walden degree whether they choose the course-based or the competency-based modality.

**Specializations**

Public Management and Leadership

**Degree Requirements**

48 total quarter credits
Foundation course (3 cr.)
Core courses (25 cr.)
Specialization courses (15 cr.)
Capstone course (5 cr.)

Core Curriculum

Foundation Competencies (3 cr.)

CRJS 6002 - Foundations of Graduate Study
  FD001 Professional Goals
    Identify professional goals.
  FD002 Introduction to Criminal Justice Research
    Summarize criminal justice research.
  FD003 Social Change
    Identify time management skills.

Core Competencies (25 cr.)

CRJS 6137 - The Nature of Crime and Criminology
  NC001 Foundations of Criminal Theories and Practices
    Demonstrate an understanding of foundational theories and practices in criminology.
  NC002 Contemporary Views and Theories of Criminal Behavior
    Explain contemporary views and theories of criminal behavior.
  NC003 Criminal Profiling
    Apply theories of criminal profiling and groups.
  NC004 Ethics in Corrections
    Promote ethical incarceration practices and treatment of offenders.
  NC005 Rehabilitation
    Promote diversion, reentry, probation and parole, and rehabilitation treatment programs.

CRJS 6215 - Controversies in Criminal Justice
  CO001 Contemporary Policies and Practices
    Interpret U.S. legal policies and practices related to the criminal justice system.
  CO002 Issues in Criminal Justice
    Demonstrate knowledge of policies and practices related to contemporary issues challenging the criminal justice system.
  CO003 Media
    Evaluate the influence of media and/or social media on crime and criminal justice.
CO004 Corrections Reform Policy
Develop a corrections reform policy by applying knowledge of the history, theory, practice, and the legal environment of the reentry process.

CRJS 6216 - Criminal Justice Research♦
RS001 Root Causes of Crime
Explain root causes of crime from data.
RS002 Impact of Crime on Communities
Analyze the impact of crime on communities.
RS003 Research Methodologies
Apply qualitative and quantitative research methods for conducting and analyzing criminal justice/criminology research.

CRJS 6511 - Special Populations♦
SL001 Juvenile Justice
Promote culturally sensitive, developmentally appropriate, and research-based juvenile justice practices and policies.
SL002 Hate Crimes
Analyze characteristics of hate crimes against protected race, class, sexual orientation, and gender categories.
SL003 Special Populations
Promote equitable, culturally sensitive, and research-based practices and policies for offenders from special populations.
SL004 Cultural Sensitivity and Awareness
Demonstrate cultural sensitivity and awareness both within the criminal justice professional community and toward populations being served.

CRJS 6203 - Victimology♦
VC001 Impact of Crime on Individuals and Communities
Apply principles of victimology to address its causes and effects and promote social change.
VC002 Criminology Theory
Analyze biological, psychological, social, and structural variables that contribute to offender and victim typologies.
VC003 Community Work
Demonstrate the ability to work with the community and public forums.
VC004 Victim Services
Demonstrate an understanding of types of services and supports available to victims.

Specialization Competencies (15 cr.)
These competencies are dependent upon the particular specialization. Please see the competency list on each specialization page.

Capstone Competency (5 cr.)

CRJS 6910 - Capstone: Criminal Justice Ethics and Social Justice

ES001 Ethics and Social Justice

Demonstrate the ability to make recommendations for applying laws, policies, professional standards, and codes of ethics in complex and ambiguous social justice situations.

**MS in Criminal Justice Leadership and Executive Management**

The MS in Criminal Justice program will prepare students to effectively work within criminal justice agencies, governmental organizations, and the private sector. The specializations comprise a core of contemporary theory and practice as well as the study of national and international issues in the administration of criminal justice. This includes the intersections of management of local, state, and federal criminal justice systems. Thus, the program provides students the opportunity to practically apply knowledge and skills that will impact society. With a unique blend of criminal behavioral theory, human services, technology, homeland security, and management, the program will provide students with critical 21st-century skills.

**Learning Outcomes**

At the end of the program, students will be able to:

- Utilize theory and research to analyze historical trends and current perspectives in criminal justice.
- Use research to evaluate factors related to crime and the impact of crime on criminal justice policies, practices, and procedures.
- Evaluate the impact of US constitutional policy and procedures on the criminal justice system.
- Analyze the impact of the criminal justice process on victims and perpetrators.
- Synthesize principles from criminal justice theories, processes, and practices to promote social justice and positive social change.
- Compare the structural functions and interactions of law enforcement, courts, and corrections within the criminal justice system at the local, state, and federal level.
- Discuss how criminal justice laws and policies are adopted, implemented, and evaluated.
- Evaluate the management philosophies used in managing human resources in criminal justice organizations.
Discuss the leadership skills needed for working with diverse populations.

**MS in Forensic Psychology**

Walden University’s MS in Forensic Psychology prepares individuals to work within settings that integrate psychology and the legal system, including jails and prisons, community corrections offices, law enforcement agencies, the military, victims’ advocacy programs and systems, and governmental agencies focused on criminal justice and crime.

Forensic psychology is a rapidly growing field. This program emphasizes the integration of psychology into forensic settings. It is especially geared toward professionals interested in career advancement and enhancement, rather than a move into clinical forensic practice with clients.

Thus, instead of leading to licensure or practice within forensic or correctional systems, graduates of this program leverage the benefits of psychology and clinical understanding to positively impact the larger forensic and criminal justice systems and to enhance personal career opportunities through graduate education.

The Walden focus on social justice and community benefit will give graduates the edge in making these systems that touch thousands of lives more functional and able to serve the populations within them.

**Learning Outcomes**

At the end of this program, students will be able to:

- Analyze the role of psychology within the legal system.
Promote social change through application of advanced psychological concepts/principles within forensic settings.

Analyze the principles of research design as applied to forensic psychology research.

Distinguish the professional roles and responsibilities that are unique to the practice of forensic psychology.

Explain relevant ethical codes (e.g., APA and Specialty Guidelines for Forensic Psychologists) used in forensic work settings.

Apply psychological theories relevant to criminal behavior in forensic psychology settings.

Explain the assessment elements (psychological assessment, risk assessment, psychological reports) used within forensic psychology settings.

Specializations

- General Program
- Criminal Justice Self-Designed
- Cybercrimes
- Family Violence
- Legal Issues in Forensic Psychology
- Military
- Police Psychology
- Sex Offender Behavior
- Terrorism
- Victimology
- Self-Designed

Degree Requirements

- 48 total quarter credits (including 45 cr. completed at Walden)
  - Foundation course (3 cr.)
  - Core courses (25 cr.)
  - Specialization courses (15 cr.)
  - Capstone (5 cr.)

Curriculum

Foundation Course (3 cr.)

  FPSY 6002 - Foundations of Graduate Studies in Psychology

Core Courses (30 cr.)
**Specialization Courses (15 cr.)**

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Note on Licensure

The MS in Forensic Psychology is not a licensure program and does not prepare an individual to become a licensed psychology professional.

MS in Human Services

Human services professionals make a positive difference every day. A commitment to improving the quality of life for others benefits the entire community. Walden’s MS in Human Services program helps students make an even greater impact by preparing them with the skills they need to become effective leaders in fostering social change. Students in this online master's degree program focus on expanding their understanding of the delivery, accessibility, accountability, and coordination of agency services.

By earning their MS in Human Services degree at Walden, students broaden their knowledge as human services professionals and advance their understanding of human services theory, research, and practice. Students learn strategies to address the ethical and social justice issues that are impacting the effective delivery of human services throughout the world today.

As graduates of the MS in Human Services program, students can work in a variety of roles providing direct services to individuals, families, or communities or providing leadership to agencies and programs.

When students choose Walden’s MS in Human Services, they can benefit from the flexibility of online learning and from MobileLearn®. Offered exclusively at Walden, MobileLearn not only enables students to choose where and when they learn, but it also gives them the ability to choose how they learn.

Learning Outcomes

Graduates in the MS in Human Services program will be prepared to:

Demonstrate the skills necessary to advocate for a variety of individuals and groups in order to promote social change.
Evaluate human services related scenarios in order to determine appropriate needs and solutions.
Communicate effectively with diverse groups of individuals.
Demonstrate an understanding of the history of the human services profession in relation to its impact on the practice of human services.
Analyze the appropriateness of human services practice for diverse individuals and groups.
Advocate for the needs of diverse populations in order to promote positive social change.
Develop a professional identity as a human service professional practitioner.

Specializations

- General Program
- Community and Social Services
- Community Intervention and Leadership
- Conflict Management and Negotiation
- Criminal Justice
- Disaster, Crisis, and Intervention
- Family Studies and Intervention
- Gerontology
- Global Social Services
- Human Services Nonprofit Administration
- Mental Health
- Military Families and Culture
- Social Policy Analysis, and Planning
- Studies in Aging

Degree Requirements

48–53 total quarter credits depending on specialization

- Foundation course (3 cr.)
- Core courses (25 cr.)
- Elective/specialization courses (15–20 cr.)
- Capstone (5 cr.)

Core Curriculum

Foundation Course (3 cr.)

HUMN 6000 - Foundation of Graduate Study in Human Services

Core Courses (25 cr.)

HUMN 6160 - The Advanced Human Services Professional Practitioner in a Changing World
HUMN 6161 - Assessment and Motivational Interviewing
HUMN 6162 - Cultural Humility and Diversity
HUMN 6480 - Applied Research and Evaluation Methods
HUMN 6207 - Grant Writing
Elective/Specialization Courses (15–20 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page. Choose elective courses (5 cr. each) from any MS in Human Services specialization.

Capstone Course (5 cr.)

HUMN 6660 - Social Change, Leadership, and Advocacy for Human Services Professional Practitioners

Course Sequence

Students undertake courses in the following sequence.

*All specialization courses should be taken before HUMN 6660.

Note on Licensure
The MS in Human Services program, including its specializations, is not designed to lead to professional licensure, including, but not limited to, licensure as a professional therapist, counselor, social worker, or psychologist.

Doctoral Degree Programs

**Doctor of Human Services (DHS)**

Do you want to deepen your impact as a social problem-solver? Walden’s practitioner-focused Doctor of Human Services (DHS) program curriculum is designed to help human services professionals effect meaningful change in the field through direct practice, advocacy, or policy.

In the DHS program, students can gain the expertise to help organizations move the needle on complex social issues. Students can focus their studies through two specializations and complete a capstone project on a topic they are passionate about. Graduates from program feeling energized, confident, and ready to make a difference for individuals, families, and communities.

A DHS degree prepares human services professionals to address social problems through evidence-based advocacy and program evaluation.

**Learning Outcomes**

At the end of the program, students will be able to:

- Assess the needs of clients accessing human services programs using a variety of evidence-supported approaches.
- Evaluate the effectiveness of the human service programs using a variety of evidence-supported approaches.
- Develop strategies for working collaboratively with interdisciplinary teams of professionals to deliver support services to diverse populations.
- Design research that contributes to positive social change related to human services.
- Advocate for the needs of diverse populations in order to promote positive social change.
- Develop an advanced human services practitioner professional identity.

**Specializations**

- Leadership and Program Evaluation in Human Services Organizations
- Prevention, Intervention, and Advocacy

**Minimum Degree Requirements**
68 quarter credits
Doctoral Writing Assessment
Foundation course (3 cr.)
Core courses (30 cr.)
Specialization courses (15 cr.)
Completion of the Doctoral Capstone
  Communities of Practice and Research (CPR) courses (5 cr.; continuously enrolled in 1 cr. per term for a minimum of 5 terms until CPR completion)
  Capstone writing courses (continuous enrollment in 5 cr. per term for a minimum of 3 terms until completion)

Curriculum

Foundation Course (3 cr.)

HUMN 8001D - Keys to Doctoral Studies Success

Core Courses (30 cr.)

HUMN 8206D - The World of Human Services: Reimagined
HUMN 8304D - Data as Evidence
HUMN 8243D - Push and Pull of Understanding Human Services Problems: Force Field Analysis
HUMN 8244D - Champions for Change: Action Research for Advocacy
HUMN 8237D - Advanced Program Evaluation
HUMN 8207D - Grant Writing

Specialization Courses (15 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Completion of the Doctoral Capstone

  Communities of Practice and Research (CPR) Courses
  (5 cr.; continuously enrolled in 1 cr. per term for a minimum of five terms until CPR completion)
  HUMN 9001D - Communities of Practice and Research 1
  HUMN 9002D - Communities of Practice and Research 2
  HUMN 9003D - Communities of Practice and Research 3
  HUMN 9004D - Communities of Practice and Research 4
  HUMN 9005D - Communities of Practice and Research 5

  Capstone Writing Course
  (5 cr. per term for a minimum of three terms; taken continuously until completion)
HUMN 9100D - DHS Capstone

*Students take this course for a minimum of three quarters and are continuously enrolled until completion of their doctoral study with final chief academic officer (CAO) approval. In general, students are continuously registered in the doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the doctoral study course shell.

To complete a doctoral study, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their doctoral study on ProQuest before their degree is conferred. Learn more about the doctoral study process in the Professional Doctorate Documents.

**Doctoral Writing Assessment**

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

**Note on Licensure**

The Doctor of Human Services program, including its specializations, is not designed to lead to professional licensure including licensure as a professional therapist, counselor, social worker, or psychologist.

**8-Year Maximum Time Frame**

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.
**PhD in Criminal Justice**

The PhD in Criminal Justice program helps prepare students with the skills needed to pursue a range of criminal justice-related roles including leadership and education. Spanning topics such as homeland security, human services, and the role of technology in law enforcement, the curriculum examines contemporary criminal justice theory and practice while outlining some of the national and global issues facing the field today. Students can choose from six optional specializations to create a program of study that is tailored to their professional objectives.

**Learning Outcomes**

Upon graduation, students will be able to:

- Evaluate the root causes of crime and its impact on criminal justice policies, practices, and procedures.
- Evaluate management philosophies in managing human resources in criminal justice organizations.
- Synthesize theory and research on the historical trends and current perspectives in criminal justice.
- Apply data analysis techniques and research design methods to scholarly research in criminal justice.
- Evaluate the role of criminal justice in advancing social justice and positive social change.

**Program Types**

**General (Track I)**—Track I is a program of study for students who have a master's degree in criminal justice or a related field.

**General (Track II)**—Track II is a program of study for students who have a master's degree in a discipline unrelated to the criminal justice field.

**Specializations**

Changing specializations may increase a student's expected time-to-degree completion and cost.

- General Program (below)
- Emergency Management
- Global Leadership
- Homeland Security Policy and Coordination
- Justice Administration (not a specialization option for the Track II program of study)
Law and Public Policy
Online Teaching in Higher Education
Public Management and Leadership

General Program (Track I)

Minimum Degree Requirements

  Doctoral Writing Assessment
  Professional Development Plan and Program of Study
  Foundation course (3 cr.)
  Core courses (20 cr.)
  Specialization/elective courses (15 cr.)
  Research courses (20 cr.)
  Completion of Doctoral Dissertation
    Dissertation support courses (5 cr.)
    Dissertation writing courses (5 cr. per term for a minimum of four terms taken continuously until completion)
  Quarter Plans
  Four PhD residencies

Curriculum

Foundation Course (3 cr.)

   CRJS 8002 - Foundations of Doctoral Study

Core Courses (20 cr.)

   CRJS 8350 - History and Contemporary Issues in Criminal Justice
   CRJS 8351 - Policy and Analysis in Criminal Justice Systems
   CRJS 8352 - Leadership: Putting Theory into Practice in Criminal Justice Administration
   CRJS 8381 - Program Evaluation

Specialization/Elective Courses (15 cr.)

   These courses are dependent upon the particular specialization. Please see the course list on each specialization page. For the general program, students select three courses from any of the PhD in Criminal Justice specialization courses.

Research Courses (20 cr.)

   RSCH 8110 - Research Theory, Design, and Methods
RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis
AND
RSCH 8260 - Advanced Quantitative Reasoning and Analysis OR
RSCH 8360 - Advanced Qualitative Reasoning and Analysis OR
RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Residency Requirements

Complete Residency 1 as soon as you begin your program; should be completed within 90 days of completing your Foundations course.

Complete Residency 2 within 18 months of your start date or linked to your registration for or completion of your first research course.

Complete Residency 3 by the end of your third year.

Complete Residency 4 after your prospectus is approved as follows:
- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR
- an approved professional conference (RESI 8900 for select programs only.
  Contact Advising for information.) OR
- a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. NOTE: Intensive Retreats are NOT included in Fast Track tuition.

Optional: Complete a PhD dissertation intensive (DRWI 8500) during your dissertation. Contact Student Success Advising to register.

Completion of the Doctoral Dissertation

**CRJS 8115 - Writing a Quality Prospectus**
**CRJS 9000 - Dissertation**
* Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Fast-Track Option Program of Study – Track I

Walden offers a Fast-Track Option. With the Fast-Track Option, students take up to three courses and a dissertation preparatory course to expedite their path through the program.

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan and Program of Study
- Foundation course (3 cr.)
- Core courses (20 cr.)
- Specialization/elective courses (15 cr.)
- Research courses (20 cr.)
- Completion of Doctoral Dissertation
  - Dissertation support course (5 cr.)
  - Dissertation writing courses (5 cr. per term for a minimum of three terms taken continuously until completion)
- Quarter Plans
- Four PhD residencies

In addition, students must

- Pass a writing assessment.
- Submit an application essay.
- Maintain a 3.0 GPA.

Walden students have up to 8 years to complete their doctoral program unless they petition for an extension.

In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.
To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

* In quarters 2 and 3, CRJS 9000 is equivalent to ACRJ 9001A. ACRJ 9001A is a one-credit course.
** In quarter 4, CRJS 9000 is equivalent to ACRJ 9001B. ACRJ 9001B is a one-credit course.

General Program (Track II)

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan and Program of Study
- Foundation course (3 cr.)
- Core courses (35 cr.)
- Specialization courses (15 cr.)

  *Note: The General program does not require electives or specialization courses.

- Research courses (20 cr.)
- Completion of Doctoral Dissertation
  - Dissertation support course (5 cr.)
  - Dissertation writing courses (5 cr. per term for a minimum of four terms taken continuously until completion)
- Quarter Plans
Four PhD residencies

Curriculum

Foundation Course (3 cr.)

CRJS 8002 - Foundations of Doctoral Study

Core Courses (35 cr.)

CRJS 8137 - The Nature of Crime and Criminology
CRJS 8215 - Controversies in Criminal Justice
CRJS 8217 - Technological Solutions and 21st-Century Crime
CRJS 8350 - History and Contemporary Issues in Criminal Justice
CRJS 8351 - Policy and Analysis in Criminal Justice Systems
CRJS 8352 - Leadership: Putting Theory into Practice in Criminal Justice Administration
CRJS 8381 - Program Evaluation

Specialization Courses (15 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Research Courses (20 cr.)

RSCH 8110 - Research Theory, Design, and Methods
RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis
AND
RSCH 8260 - Advanced Quantitative Reasoning and Analysis OR
RSCH 8360 - Advanced Qualitative Reasoning and Analysis OR
RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Residency Requirements

Complete Residency 1 as soon as you begin your program; should be completed within 90 days of completing your Foundations course.

Complete Residency 2 within 18 months of your start date or linked to your registration for or completion of your first research course.

Complete Residency 3 by the end of your third year.

Complete Residency 4 after your prospectus is approved as follows:

Residency 4 General (RESI 8404) OR
Residency 4 Proposal Writing (RESI 8404Q) OR
Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
Residency 4 Publishing & Presenting (RESI 8404T) OR
an approved professional conference (RESI 8900 for select programs only.
Contact Advising for information.) OR
a dissertation intensive (DRWI 8500) during your 9000 course. Contact
Student Success Advising to register. You must attend all sessions and
advising throughout the entire intensive retreat in order to successfully
complete the experience to satisfy residency 4 requirements. NOTE:
Intensive Retreats are NOT included in Fast Track tuition.

Optional: Complete a PhD dissertation intensive (DRWI 8500) during your
dissertation. Contact Student Success Advising to register.

Completion of the Doctoral Dissertation

CRJS 8115 - Writing a Quality Prospectus
CRJS 9000 - Dissertation
Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.
To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Fast-Track Option Program of Study – Track II

Walden offers a Fast-Track Option. With the Fast-Track Option, students take up to three courses and a dissertation preparatory course to expedite their path through the program.

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan and Program of Study
- Foundation course (3 cr.)
- Core courses (35 cr.)
- Specialization courses (15 cr.)
  
  Note: The General program does not require electives or specialization courses.
- Research courses (20 cr.)
- Completion of Doctoral Dissertation
  - Dissertation support course (5 cr.)
  - Dissertation writing courses (5 cr. per term for a minimum of three terms taken continuously until completion)
- Quarter Plans

Walden students have up to 8 years to complete their doctoral program unless they petition for an extension.

In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. * In quarters 2 and 3, CRJS 9000 is equivalent to ACRJ 9001A. ACRJ 9001A is a one-credit course.

** In quarter 4, CRJS 9000 is equivalent to ACRJ 9001B. ACRJ 9001B is a one-credit course.

Master of Philosophy (Embedded Degree)

Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:

- All required PhD core courses (or KAMs)
- All required PhD specialization courses (or KAMs)
- All required doctoral research and advanced research courses
- Program prospectus development course
- Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.

The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

8-Year Maximum Time Frame
Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

Note on Licensure

Walden’s PhD in Criminal Justice program is not considered a Professional Peace Officer Education Program for the state of Minnesota and is not designed or intended to prepare graduates for licensure as a peace officer, police officer, or other law enforcement officer in any state.

PhD in Forensic Psychology

Students in Walden’s PhD in Forensic Psychology program will explore the systems and programs that strive to create positive change in the legal system and community settings. Students can broaden their understanding of advanced forensic psychology and examine ways to evaluate programs designed for populations such as the incarcerated, recently released offenders, the mentally ill, and juvenile offenders. Walden's PhD in Forensic Psychology program offers a variety of specializations to help students meet their personal and professional goals. Students may choose from the General Program or the following specializations: Criminal Justice Self-Designed, Crisis Leadership Management, Crisis Response, Legal Issues in Forensic Psychology, Self-Designed, or Victimology.

Learning Outcomes

As graduates of this program, students will be prepared to:

- Evaluate behavior using psychological theory and research from a forensic psychology perspective.
- Analyze seminal works in forensic psychology in terms of their relation to education and/or research.
- Differentiate between advanced legal concepts pertaining to forensic psychology.
- Integrate principles of advanced research methods to produce independent scholarly research related to forensic psychology.
- Evaluate how assessment elements (psychological assessment, risk assessment, psychological reports) are used within forensic psychology settings.
- Engage in decision making using relevant ethical codes (e.g., APA and Specialty Guidelines for Forensic Psychologists) in forensic work settings.
- Promote social change through the integration of principles of forensic psychology in scholarly and/or professional activities.
Specializations

Changing specializations may increase a student's expected time-to-degree completion and cost.

- General Practice
- Criminal Justice Self-Designed
- Crisis Leadership Management
- Crisis Response
- Legal Issues in Forensic Psychology
- Self-Designed
- Victimology

For Students Entering With a BS Degree

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan and Program of Study
- Foundation Course (3 cr.)
- Core courses (45 cr.)
- Research courses (20 cr.)
- Specialization courses (15 cr.)
- Completion of Doctoral Dissertation
  - Dissertation support courses (7 cr.)
  - Dissertation writing courses (5 cr. per term for a minimum of four terms; taken continuously until completion)
- Four PhD residencies

Curriculum

Foundation Course (3 cr.)

  FPSY 8002 - Foundations of Graduate Study in Psychology

Core Courses (45 cr.)

  FPSY 8116 - Understanding Forensic Psychology Research
  FPSY 8126 - Understanding Violence, Risk, and Threat Assessment
  FPSY 8135 - Criminal Behavior
  FPSY 8214 - Consulting for Organizational Change
  FPSY 8252 - Themes and Theories of Psychology
  FPSY 8314 - Program Evaluation
FPSY 8400 - Advanced Issues in Forensic Psychology
FPSY 8720 - Abnormal Behavior
FPSY 8762 - Teaching of Psychology

Research Courses (20 cr.)

RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8260 - Advanced Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis
RSCH 8360 - Advanced Qualitative Reasoning and Analysis

Specialization Courses (15 cr.)

See each specialization page for the list of courses for that specialization.

Residency Requirements

Residency 1 – Complete Residency 1 as soon as you begin your program; should be completed in term 1 or term 2.
Residency 2 – Complete Residency 2 at the beginning of your second year, around the time of second research course (RSCH 8310).
Residency 3 – Complete Residency 3 once you have a prospectus in Walden's review system.
Residency 4 – Complete Residency 4 after your prospectus is approved as follows:
   Residency 4 General (RESI 8404) OR
   Residency 4 Proposal Writing (RESI 8404Q) OR
   Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
   Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
   Residency 4 Publishing & Presenting (RESI 8404T) OR
an approved professional conference (RESI 8900 for select programs only.
   Contact Advising for information.) OR
   a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. NOTE: Intensive Retreats are NOT included in Fast Track tuition.

Optional: Complete a dissertation intensive (DRWI 8500) during FPSY 9000.
   Contact Student Success Advising to register. Note: Intensives are not included in Fast Track tuition.

Completion of the Doctoral Dissertation

FPSY 8115 - Writing a Quality Prospectus in Psychology OR
FPSY 8185 - Writing a Quality Prospectus in Psychology
AND

FPSY 8700 - Dissertation Literature Review Lab
FPSY 9000 - Dissertation

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

For Students Entering With an MS Degree

Minimum Degree Requirements

   Doctoral Writing Assessment
   Professional Development Plan and Program of Study
   Foundation course (3 cr.)
   Core courses (25 cr.)
   Research courses (10 cr.)
   Specialization courses (15 cr.)
   Completion of Doctoral Dissertation
      Dissertation support courses (7 cr.)
      Dissertation writing courses (5 cr. per term for a minimum of four terms; taken continuously until completion)
   Four PhD residencies

Curriculum

Foundation Course (3 cr.)

   FPSY 8002 - Foundations of Graduate Study in Psychology

Core Courses (25 cr.)

   FPSY 8102 - Intersection of Crime, Psychology, and the Law
   FPSY 8126 - Understanding Violence, Risk, and Threat Assessment
   FPSY 8400 - Advanced Issues in Forensic Psychology
   FPSY 8412 - Research Foundations
   FPSY 8910 - Legal Issues and Social Change in Forensic Psychology

Research Courses (10 cr.)

   RSCH 8260 - Advanced Quantitative Reasoning and Analysis
   RSCH 8360 - Advanced Qualitative Reasoning and Analysis

Specialization Courses (15 cr.)

See each specialization page for the list of courses for that specialization.

Residency Requirements
Residency 1 – Complete Residency 1 as soon as you begin your program; should be completed in Term 1 or Term 2.
Residency 2 – Complete Residency 2 at the beginning of your second year, around the time of second research course.
Residency 3 – Complete Residency 3 once you have a prospectus in Walden’s review system.
Residency 4 – Complete Residency 4 after your prospectus is approved as follows:
- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR
- an approved professional conference (RESI 8900 for select programs only.
  Contact Advising for information.) OR
- a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. NOTE: Intensive Retreats are NOT included in Fast Track tuition.
Optional: Complete a dissertation intensive (DRWI 8500) during FPSY 9000. Contact Student Success Advising to register. Note: Intensives are not included in Fast Track tuition.

Completion of the Doctoral Dissertation

FPSY 8115 - Writing a Quality Prospectus in Psychology OR
FPSY 8185 - Writing a Quality Prospectus in Psychology
AND
FPSY 8700 - Dissertation Literature Review Lab
FPSY 9000 - Dissertation
Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.
To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Fast-Track Option Program of Study for MS Entry

Walden offers a Fast-Track Option. With the Fast-Track Option, students take additional courses and begin their dissertation early to expedite their path through the program.

Minimum Degree Requirements

   Doctoral Writing Assessment
   Professional Development Plan and Program of Study
   Foundation course (3 cr.)
   Core courses (25 cr.)
   Research courses (10 cr.)
   Specialization courses (15 cr.)
   Completion of Doctoral Dissertation
       Dissertation support courses (7 cr.)
       Dissertation writing courses (continuously enrolled until completion)
   Four PhD residencies

   Students must also
       Pass a writing assessment.
       Submit an application essay.
       Maintain a 3.0 GPA.

Walden students have up to 8 years to complete their doctoral program unless they petition for an extension.

In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation study course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.
Course Sequence

Note: PhD in Forensic Psychology Fast-Track Option courses are identified with an APSY course prefix for enrollment purposes. APSY course descriptions align with corresponding FPSY courses, as listed below.

Students undertake courses in the following sequence.

* FPSY 9000 aligns with APSY 9000A Dissertation Prep.

** FPSY 9000 aligns with APSY 9000B Dissertation Prep.

Note on Licensure
The PhD in Forensic Psychology is not a licensure-leading program and does not prepare an individual to become a licensed psychology professional.

Master of Philosophy (Embedded Degree)

Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:
- All required PhD core courses (or KAMs)
- All required PhD specialization courses (or KAMs)
- All required doctoral research and advanced research courses
- Program prospectus development course
- Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.

The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

PhD in Human Services

Social service practitioners face an increasingly diverse clientele, as delivery systems and client populations become more multicultural and include a broader range of complex issues. The PhD in Human and Social Services program prepares students to excel within a diverse service-delivery system by equipping them with action-oriented
research skills and context-sensitive knowledge for application within unique practice environments.

Learning Outcomes

At the end of the program, students will be able to:

- Develop strategies for assessing the needs of diverse populations based on human services theory and research.
- Make ethical decisions based on the needs of diverse populations.
- Conduct original research in human services to promote positive social change.
- Advocate for individuals who are seeking human services supports.
- Communicate effectively with others to promote the effective delivery of human services.
- Develop a professional identity as a human services researcher.

Specializations

Changing specializations may increase a student's expected time-to-degree completion and cost.

- General Program
- Advanced Research
- Community and Social Services
- Community Intervention and Leadership
- Conflict Management and Negotiation
- Criminal Justice
- Disaster, Crisis, and Intervention
- Family Studies and Interventions
- Gerontology
- Global Social Services
- Higher Education
- Human Services Nonprofit Administration
- Mental Health
- Military Families and Culture
- Social Policy and Analysis and Planning
- Studies in Aging

For Students Entering With an MS Degree (Track I)

Minimum Degree Requirements
Doctoral Writing Assessment
Professional Development Plan and Program of Study
Foundation course (3 cr.)
Core courses (20 cr.)
Specialization or Elective courses (15 cr.)
Research courses (20 cr.)
Completion of the Doctoral Dissertation
  Dissertation support course (5 cr.)
  Communities of Practice and Research (CPR) courses (5 cr.; continuously enrolled in 1 cr. per term for a minimum of 5 terms until CPR completion)
  Dissertation writing courses (continuous enrollment in 5 cr. per term for a minimum of 3 terms until completion)
Quarter Plans
Four residencies

Core Curriculum

Foundation Course (3 cr.)

  HUMN 8001 - Keys to Doctoral Studies Success

Core Courses (20 cr.)

  HUMN 8785 - Social Change in Action: Prevention, Consultation, and Advocacy
  HUMN 8208 - Teaching in Human Services
  HUMN 8207 - Grant Writing
  HUMN 8209 - Human Services Theory

Specialization Courses (15 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page. For the elective courses, students choose from any PhD in Human Services specialization courses.

Foundation Research Courses (15 cr.)

Courses composing the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8110 must be completed prior to Residency 2 of the academic residencies. RSCH 8210 and RSCH 8310 must be completed prior to beginning the dissertation or attending Residency 3.
Advanced Research Course (5 cr.)

PhD students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

- RSCH 8260 - Advanced Quantitative Reasoning and Analysis
- RSCH 8360 - Advanced Qualitative Reasoning and Analysis
- RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Residency Requirements

Complete Residency 1 as soon as you begin your program; should be completed in term 1 or term 2.

Complete residency 2 after completing RSCH 8100/8110.

Complete residency 3 after completing RSCH 8100/8110, 8200/8210, 8300/8310.

Complete residency 4 after your prospectus is approved as follows:

- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR
- an approved professional conference (RESI 8900 for select programs only.

Contact Advising for information.) OR

a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. NOTE: Intensive Retreats are NOT included in Fast Track tuition.

Optional: Complete a PhD dissertation intensive (DRWI 8500) during your dissertation. Contact Student Success Advising to register.

Completion of the Doctoral Dissertation

- HUMN 8550 - Preparing for Dissertation
- HUMN 9001A - Communities of Practice and Research 1
- HUMN 9002A - Communities of Practice and Research 2
- HUMN 9003A - Communities of Practice and Research 3
- HUMN 9004A - Communities of Practice and Research 4
HUMN 9005A - Communities of Practice and Research 5
HUMN 9001 - Dissertation
Students take this course for a minimum of three quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.
To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Foundation Research Courses (15 cr.)

Courses comprising the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8110 is a prerequisite for Residency 2 of the academic residencies.

RSCH 8110 - Research Theory, Design, and Methods
RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis

Advanced Research Course (5 cr.)

Those enrolled in this specialization are required to complete an advanced research course. The university offers three advanced research courses: quantitative, qualitative,
and mixed-methods. When the prospectus is approved, students will take the advanced research course selected as the methodology approved for the dissertation.

Students are required to complete one of the following courses:

- **RSCH 8260** - Advanced Quantitative Reasoning and Analysis
- **RSCH 8360** - Advanced Qualitative Reasoning and Analysis
- **RSCH 8460** - Advanced Mixed-Methods Reasoning and Analysis

**Residency Requirements**

- Complete Residency 1 as soon as you begin your program; should be completed in term 1 or term 2.
- Complete residency 2 after completing RSCH 8100/8110.
- Complete residency 3 after completing RSCH 8100/8110, 8200/8210, 8300/8310.
- Complete residency 4 after your prospectus is approved as follows:
  - Residency 4 General (RESI 8404) OR
  - Residency 4 Proposal Writing (RESI 8404Q) OR
  - Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
  - Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
  - Residency 4 Publishing & Presenting (RESI 8404T) OR
  - an approved professional conference (RESI 8900 for select programs only).
  - Contact Advising for information.) OR
- a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. **NOTE:** Intensive Retreats are NOT included in Fast Track tuition.

**Optional:** Complete a PhD dissertation intensive (DRWI 8500) during your dissertation. Contact Student Success Advising to register.

**Completion of the Doctoral Dissertation**

- **HUMN 8550** - Preparing for Dissertation
- **HUMN 9001A** - Communities of Practice and Research 1
- **HUMN 9002A** - Communities of Practice and Research 2
- **HUMN 9003A** - Communities of Practice and Research 3
- **HUMN 9004A** - Communities of Practice and Research 4
- **HUMN 9005A** - Communities of Practice and Research 5
- **HUMN 9001** - Dissertation

Students take this course for a minimum of three quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the
Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

## Course Sequence for Students Entering With a BS Degree (Track II)

Students undertake courses in the following sequence.

* Students take this course for a minimum of three quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Master of Philosophy (Embedded Degree)

Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:
- All required PhD core courses (or KAMs)
- All required PhD specialization courses (or KAMs)
All required doctoral research and advanced research courses
Program prospectus development course
Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.
The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

Note on Licensure

The PhD in Human Services program, including its specializations, is not designed to lead to professional licensure including licensure as a professional therapist, counselor, social worker, or psychologist.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

PhD in Psychology

The university’s mission includes broad access to high-quality postsecondary education through a distance-learning environment and preparation of its graduates to achieve professional excellence and to effect positive social change. Consistent with this mission, the PhD in Psychology program is designed to prepare scholar-practitioners to meet real-world challenges and facilitate positive change in individuals, groups, organizations, and local, national, and global communities.

Specifically, the program prepares lifelong learners to integrate psychological theory, research, established methods of scientific inquiry, and evidence-based practices that incorporate cultural and individual diversity. The School of Psychology training model encompasses an integrated, developmental, and sequential plan of study that includes web-based and face-to-face coursework; residencies that provide opportunities for
knowledge and skill acquisition, ethical practice, and professional socialization; field training; and demonstration of research competency.

Learning Outcomes

As graduates of this program, students will be able to:

- Apply principles of basic and advanced research methods to produce independent scholarly research.
- Apply relevant ethical codes (e.g., APA) to decision making with diverse populations in various settings.
- Promote social change through the integration of principles of psychology in scholarly and/or professional activities.
- Communicate effectively to a variety of stakeholders and audiences.
- Demonstrate an in-depth understanding of psychology-specific knowledge and theory to improve the condition of individuals, groups, and organizations.
- Demonstrate proficiency in utilizing empirically supported models for teaching, consultation, and research.
- Develop a professional identity appropriate to one's professional goals.

Specializations

Changing specializations may increase a student's expected time-to-degree completion and cost.

- Educational Psychology
- Health Psychology
- Research in Psychology
- Social Psychology
- Teaching in Psychology
- Self-Designed

For Students Entering With a BS Degree

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan and Program of Study
- Foundation course (3 cr.)
- Core courses (40 cr.)
- Research courses (20 cr.)
- Specialization courses (20 cr.)
Completion of the Doctoral Dissertation
  Dissertation support courses (7 cr.)
  Dissertation writing courses (5 cr. per term for a minimum of four terms; taken continuously until completion)

Quarter Plans
Four PhD residencies

Curriculum

Foundation Course (3 cr.)
  PSYC 8004 - Foundations for Graduate Study in Psychology

Core Courses (40 cr.)
  PSYC 8214 - Consulting for Organizational Change
  PSYC 8215 - Lifespan Development
  PSYC 8252 - Themes and Theories of Psychology
  PSYC 8315 - Program Evaluation
  PSYC 8412 - Research Foundations
  PSYC 8701 - Culture and Psychology
  PSYC 8762 - Teaching of Psychology
  PSYC 8920R - Research Practicum OR
  PSYC 8920T - Teaching Practicum

Research Courses (20 cr.)
  RSCH 8110 - Research Theory, Design, and Methods
  RSCH 8210 - Quantitative Reasoning and Analysis
  RSCH 8260 - Advanced Quantitative Reasoning and Analysis
  RSCH 8360 - Advanced Qualitative Reasoning and Analysis

Specialization Courses (20 cr.)
  These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Residency Requirements
  Residency 1 – Complete Residency 1 as soon as you begin your program; should be completed in Term 1 or Term 2.
  Residency 2 – Complete Residency 2 at the beginning of your second year, around the time of second research course.
Residency 3 – Complete Residency 3 once you have a prospectus in Walden’s review system.

Residency 4 – Complete residency 4 after your prospectus is approved as follows:
- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
- Residency 4 Publishing & Presenting (RESI 8404T) OR
- an approved professional conference (RESI 8900 for select programs only.
  Contact Advising for information.) OR

a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. NOTE: Intensive Retreats are NOT included in Fast Track tuition.

Optional: Complete a dissertation intensive (DRWI 8500) during PSYC 9000. Contact Student Success Advising to register. Note: Intensives are not included in Fast Track tuition.

Completion of the Doctoral Dissertation

PSYC 8115 - Writing a Quality Prospectus (5 cr.) OR
PSYC 8185 - Writing a Quality Prospectus (5 cr.)
AND
PSYC 8702 - Dissertation Literature Review Lab (2 cr.)
PSYC 9000 - Dissertation

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

** Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Fast-Track Option Program of Study

Walden offers a Fast-Track Option. With the Fast-Track Option, students take additional courses and begin their dissertation early to expedite their path through the program.

(Note: There is no Fast-Track Option for the Self-Designed specialization [BS or MS entry].)

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan and Program of Study
- Foundation course (3 cr.)
- Core courses (40 cr.)
- Research courses (20 cr.)
- Specialization courses (20 cr.)
- Completion of Doctoral Dissertation
  - Dissertation support courses (7 cr.)
  - Dissertation writing courses (5 cr. per term for a minimum of four terms; taken continuously until completion)
Quarter Plans

Four PhD residencies

In addition, students must

- Pass a writing assessment.
- Submit an application essay.
- Maintain a 3.0 GPA.

Walden students have up to 8 years to complete their doctoral program unless they petition for an extension.

In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

* Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Fast-Track Option Program of Study

Walden offers a Fast-Track Option. With the Fast-Track Option, students take additional courses and begin their dissertation early to expedite their path through the program.
Minimum Degree Requirements

Doctoral Writing Assessment
Professional Development Plan and Program of Study
Foundation course (3 cr.)
Core courses (40 cr.)
Research courses (20 cr.)
Specialization courses (20 cr.)
Completion of Doctoral Dissertation
  Dissertation support courses (7 cr.)
  Dissertation writing course (5 cr. per term for a minimum of four terms; taken continuously until completion)
Quarter Plans
Four PhD residencies

Students must also
  Pass a writing assessment.
  Submit an application essay.
  Maintain a 3.0 GPA.

Walden students have up to 8 years to complete their doctoral program unless they petition for an extension.

In general, students are continuously registered in the dissertation/doctoral study course until they complete their capstone project and it is approved. This usually takes longer than the minimum required terms in the dissertation/doctoral study course shell.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Course Sequence

The Fast-Track Option course sequences for students entering with an MS degree are dependent upon the particular specialization. Please see the course sequence on each specialization page.

Master of Philosophy (Embedded Degree)
Walden awards the Master of Philosophy (MPhil) degree to recognize PhD students for academic achievement leading up to their dissertation. With an MPhil, students will be able to demonstrate to employers and others that they have an advanced knowledge base in their field of study as well as proficiency in research design and evaluation.

Students are eligible to apply for this credential while continuing their PhD program once they have completed:
- All required PhD core courses (or KAMs)
- All required PhD specialization courses (or KAMs)
- All required doctoral research and advanced research courses
- Program prospectus development course
- Residencies 1, 2, and 3

A minimum 3.0 GPA is mandatory.

The MPhil requires a minimum of 45 quarter credits. Maximum transfer of credit varies by program but is not to exceed 50% of the overall, or embedded, program requirements.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

Note on Licensure

_The PhD in Psychology program is not a licensure-leading program and does not prepare an individual to become a licensed psychology professional._

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

Post-Doctoral Certificate Programs

_Discontinued program.

*Post-Doctoral Respecialization Certificate*

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden's Time-to-Degree Completion policies.
Earning a Respecialization Certificate gives students the opportunity to gain theory and knowledge in a specialization other than the one they focused on in their degree work. Students complete a unique program of study that accounts for previous coursework and includes courses required to achieve essential knowledge in the new specialization.

Specializations

Choose from any of the following specializations:

- Educational Psychology
- Forensic Psychology
- General Psychology
- Health Psychology
- Organizational Psychology
- Social Psychology

Specialization Requirements

Specific coursework determined by the student and the School of Psychology’s faculty chair for the specialization chosen
Minimum 3.0 GPA
Time to completion may vary by student, depending on individual progress and credits transferred, if applicable. For a personalized estimate of time to completion, students should call an enrollment specialist at 1-866-492-5336.

Students should request information or speak with an enrollment specialist by calling 1-866-492-5336 for assistance in deciding which online program best fits their goals. A list of international toll-free phone numbers is available for students outside the United States.

Note on Licensure

The respecialization certificate is not a licensure program and does not prepare an individual to become a licensed psychology professional.
College of Social and Behavioral Health

Barbara Solomon School of Social Work

Bachelor’s Degree Programs

Bachelor of Social Work (BSW)

The Bachelor of Social Work degree is designed to prepare students for service to individuals, families, groups, organizations, and communities as social work practitioners. Each student in the program will complete coursework, skills training, and supervised field experience. Students will receive support designed to prepare them for ethical and competent practice as professional social workers who employ evidence-based practice. Walden anticipates that graduates will be prepared to design culturally and contextually relevant generalist social services in their practice, and to provide mentoring and supervision, advocacy, and collaboration activities with their varied client populations.

Learning Outcomes

Upon completion of the Bachelor of Social Work program, students will be able to:

- Demonstrate the development of a professional orientation and identity as a generalist social worker.
- Follow and apply professional and ethical standards and values as set forth by the National Association of Social Workers (NASW) to social work practice.
- Demonstrate a commitment to positive social change by advancing human rights and social, economic, and environmental justice.
- Utilize evidence-based research and critical-thinking skills to serve traditionally oppressed and disenfranchised populations.
- Apply theories of human growth and development to social work practice with individuals, families, groups, organizations, and communities.
- Demonstrate culturally competent knowledge and skills in the areas of engagement, assessment, intervention, and evaluation as a generalist social worker.

Degree Requirements

- 182 total quarter credits (including 45 cr. completed at Walden)
- General education courses (51 cr.)
- Core courses (60 cr.)
Elective courses (50 cr.)
Field Experience courses (20 cr.)
Social Work Skills Lab Course (1 cr.)

General Education (51 cr.)
See the general education section of this Walden University Catalog.

Core Courses (60 cr.)
The following courses are required as part of Bachelor of Social Work core:

SOCW 2001 - Introduction to Social Work
SOCW 2002 - Basic Skills for Social Work Practice
SOCW 2003 - Introduction to the Welfare State
SOCW 3001 - Diversity and Multiculturalism
SOCW 3002 - Human Behavior in the Social Environment I
SOCW 3003 - Human Behavior in the Social Environment II
SOCW 3004 - Social Work Research I
SOCW 4001 - Policy and Advocacy
SOCW 4002 - Social Work Research II
SOCW 4003 - Generalist Practice I—Individuals/Families
SOCW 4004 - Generalist Practice II—Groups
SOCW 4005 - Generalist Practice III—Organizations and Communities

Elective Courses (50 cr.)
Students are to select 10 additional courses to fulfill the elective requirement. Students may choose courses from either general education courses or courses from any of Walden's bachelor's degree programs. These 50 credits of electives are in addition to the 9-credit general education electives.

Field Experience (20 cr.)

SOCW 4100 - Field Seminar I
SOCW 4110 - Field Seminar II

Social Work Skills Lab (1 cr.)

BWLB 4900 - Social Work Skills Lab — Complete Social Work Skills Lab after you have completed SOCW 3004 and SOCW 4003. SOCW 4004 is recommended before Skills Lab; however, it can be taken concurrently with Skills Lab. This lab includes online course content integrated with a 3-day, face-to-face or virtual synchronous requirement: 3 weeks online; 3 days face-to-face or virtual synchronous sessions; 2 weeks online.
Accreditation Statement

Walden’s Bachelor of Social Work is accredited by the Council on Social Work Education (CSWE), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA). CSWE’s Commission on Accreditation is responsible for developing standards that define competent preparation for professional social workers and ensuring that social work programs meet these standards.

Note on Licensure

The Walden University Bachelor of Social Work (BSW) program is designed to prepare graduates to practice as licensed social workers in states that offer licensure at the bachelor’s level. However, each state board responsible for the regulation of social work has its own requirements for licensure, including appropriate accreditation of academic programs.

Walden’s Bachelor of Social Work has achieved candidacy for accreditation by the Council on Social Work Education’s (CSWE) Commission on Accreditation. Candidacy for a baccalaureate or master’s social work program by the CSWE’s Commission on Accreditation indicates that it has made progress toward meeting criteria for the assessment of program quality evaluated through a peer review process. A program that has attained candidacy has demonstrated a commitment to meeting the compliance standards set by the Educational Policy and Accreditation Standards but has not yet demonstrated full compliance.

Students who enter programs that attain candidacy in or after the academic year in which they begin their program of study will be retroactively recognized as having graduated from a CSWE-accredited program once the program attains initial accreditation. Candidacy is typically a 5-year process, and attaining candidacy does not guarantee that a program will eventually attain initial accreditation. Candidacy applies to all program sites and program delivery methods of an accredited program. Accreditation provides reasonable assurance about the quality of the program and the competence of students graduating from the program.

Prospective students enrolling in licensure-leading programs are advised that relocation to another state may impact the student’s ability to complete field experiences and/or to obtain professional licensure, certification, or other credential in another state. Prospective students are advised to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

Other Undergraduate Options

Accelerate Into Master's (AIM)

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for undergraduate students to accelerate time to the completion of a master’s degree. This option, called Accelerate Into Master’s (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master’s program.

When undergraduate students attempt a 5000-level course, they may earn a "C" in the graduate-level course but only a grade of "B" or better will carry over to the graduate program. Students who receive a "C" grade will be awarded a grade of "C,"* which will permit the grade to be used toward the undergraduate-level requirement but not
toward the master's-level requirement. Students who do not pass their AIM class are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must take that course as a master's student.

Requirements
Walden University offers several opportunities for undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

Individual programs may determine the specific eligible AIM courses and some programs may limit the number of courses available. Generally, AIM coursework should not account for more than approximately 50% of the credits needed for master's degree completion. Practicum or Capstone requirements for the master's program are not eligible to be satisfied by AIM coursework.

To be eligible to begin AIM courses, students must:

a. Have an overall GPA equal to that required for admission to the associated master's degree.* BS AIM track students must maintain a 2.5 GPA and have a transfer GPA of at least 2.5 (if transferring credits).

b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.) * BS in Psychology AIM track students do not need to meet this requirement.

c. Be in good financial standing.

d. Not have any incompletes.

AIM courses are (5000-level) graduate courses.*

a. Tuition for these courses is charged at the undergraduate rate for the course-based learning format. For Tempo Learning® these courses are included in the program's subscription cost.

b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.

c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA only.

Students must get a "B" or better in each course to have that course applied to the master's program.

Students who do not earn a grade of "C" or better will not be allowed to take any more 5000-level courses. Later admission to the master's program requires that the student must take that course as a master's student. * BS in Psychology AIM track students may retake an AIM
course a second time if they failed the first time; they must earn a grade of "C" or better the second time in order to stay in the AIM track program.

Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program. Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

Upon completion of the undergraduate program requirements, students should file an Intent to Graduate Form. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master's program. Upon admission to the master's program, all AIM graduate courses completed with a "B" or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

Undergraduate students may complete AIM courses to fulfill elective credits, as course substitutions approved by the program director, or they may elect a second concentration within their program of study that is designed for AIM completion. Students are encouraged to consult with Student Success Advising (if in the course-based learning format) or their Academic Coaching (if in the Tempo Learning® format) on the most appropriate plan for their program and academic goals, such as their future master's program and time to completion.

*Note: Graduate students cannot register for AIM courses.

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warranty, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual’s responsibility to understand and comply with all state and school district requirements.

Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student’s major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their student success advisor. Students may select a maximum of two minors.

Minor in Applied Instructional Design and Technology
Minor in Business
Minor in Communication
Minor in Criminal Justice
Minor in Health Promotion and Wellness
Minor in Health Studies
Minor in Healthcare Management
Minor in Introductory Instructional Design and Technology
Minor in Political Science and Public Administration
Minor in Psychology
Minor in Public Health

Master’s Degree Programs

**Master of Social Work (MSW)**

The Master of Social Work (MSW) degree program is designed to prepare students to provide services to individuals, families, groups, organizations, and communities. By selecting one of four concentrations focused on specific populations, students learn to draw from social work theory and methods to engage, evaluate, and intervene in the problems experienced by individuals, families, and groups. Skills gained through this program can be applied in schools, hospitals, private practice, social service agencies, and mental health clinics. Students have an additional opportunity to increase their knowledge by choosing an optional focus area in one of five key areas, and customized case studies throughout the program add perspective to the curriculum. In-person residencies and field experience also help prepare graduates to provide culturally and contextually relevant social work services in their practice, using mentoring, supervision, advocacy, and collaboration activities with their varied client populations.

**Learning Outcomes**

Graduates of Walden’s Master of Social Work (MSW) program will be prepared to:

- Develop a professional orientation and identity as a social worker.
- Apply legal and ethical standards in the administration of social work.
- Apply principles of advocacy that promote cultural understanding and positive social change in individuals, communities, and society.
- Utilize evidence-based research and critical-thinking skills to inform practice in meeting the needs of diverse clientele.
- Synthesize and apply theories of human growth and development to develop culturally responsive social work practices.
- Apply knowledge and skills in the areas of engagement, assessment, intervention, and evaluation with individuals, families, groups, organizations, and communities.
## Program Goals

Concentrations

These previous MSW concentrations are no longer accepting new students. Current students in these concentrations must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.

- Advanced Clinical Practice
- Military Social Work
- Social Work in Healthcare
- Social Work With Children and Families

Focus Areas

- Addictions
- Child and Family
- Healthcare
- Military
- Trauma

Minimum Degree Requirements

- 92–97 total quarter credits (depending upon Focus Area)
- Foundation course (3 cr.)
- Core courses (65 cr.)
Electives (10 cr. required; 15 cr. for Focus Area and optional certificate)
Field Experience (12 cr.)
Two Social Work Skills Labs (1 cr. each). These labs include online course content integrated with a 3-day, face-to-face or virtual synchronous requirement.
  3 weeks online
  3 days face-to-face or virtual synchronous sessions
  2 weeks online

Note: The following (tracks) are available for the MSW program:

Traditional option (up to two courses/term)—This track is similar to most traditional master's-level programs in which students either complete one or two courses per quarter.

Traditional Fast Track option (Intensive course load)—This track requires students to complete three courses in the first quarter, while completing two courses in the remaining quarters.

Advanced Standing (requires BSW)—This track is for students who enter the program with a Bachelor of Social Work (BSW) degree that is accredited by the Council on Social Work Education (CSWE).

Advanced Standing Minimum Degree Requirements

52–57 total quarter credits
Core courses (35 cr.)
Electives (10–15 cr.)
Field Experience (6 cr.)
One Social Work Skills Lab (1 cr.)

Curriculum

Foundation Course (3 cr.)

Core Courses (65 cr.)

SOCW 6101 - Essential Skills for Social Work Practice
SOCW 6301 - Social Work Practice Research I
SOCW 6200 - Human Behavior and the Social Environment I
SOCW 6051 - Diversity, Human Rights, and Social Justice
SOCW 6210 - Human Behavior and the Social Environment II
SOCW 6500 - Social Work Field Education I
SOCW 6551 - Social Policy, Welfare, and Change
SOCW 6510 - Social Work Field Education II
SOCW 6060 - Social Work Theory and Clinical Practice
SOCW 6111 - Advanced Clinical Social Work Practice I
SOCW 6361 - Social Policy: Analysis and Advocacy
SOCW 6121 - Advanced Clinical Social Work Practice II
SOCW 6311 - Social Work Practice Research II
SOCW 6090 - Psychopathology and Diagnosis for Social Work Practice
SOCW 6070 - Supervision, Leadership, and Administration in Social Work Organizations
SOCW 6520 - Social Work Field Education III
SOCW 6530 - Social Work Field Education IV

Elective/Focus Area Courses (10–15 cr.)

Students are required to select two electives from the Focus Areas and may select an optional third elective for an embedded certificate from the same Focus Area. Please see the course list on each Focus Area page.

Field Experience Courses (12 cr.)

SOCW 6500 - Social Work Field Education I
SOCW 6510 - Social Work Field Education II
SOCW 6520 - Social Work Field Education III
SOCW 6530 - Social Work Field Education IV

Skills Lab Requirements

Complete Social Work Skills Lab I after completing SOCW 6002; required before entering SOCW 6500 - Social Work Field Education I. (Exception: Advanced Standing students can skip Social Work Skills Lab I.)

Complete Social Work Skills Lab II after SOCW 6510 and prior to enrolling in SOCW 6520 - Social Work Field Education III. (Exception: Advanced Standing students must complete Social Work Skills Lab II after SOCW 6002.)

Course Sequences

Course Sequence: Traditional

Students must complete Social Work Skills Lab I prior to taking SOCW 6500 (field education course).

Students must complete Social Work Skills Lab II prior to taking SOCW 6520 (field education course).

The recommended course sequence is as follows:

Graduate Certificate in Social Work (Optional Embedded Certificate)

Students can choose to focus their studies by selecting two elective courses from the same focus area. An optional certificate, along with the MSW, can be added to the MSW program if students select three courses from a specific focus area. (Note: Optional certificates add 5 credits to the program.)

The five optional certificates align with the focus areas:

- Graduate Certificate in Social Work: Addictions
- Graduate Certificate in Social Work: Child and Family
- Graduate Certificate in Social Work: Healthcare
- Graduate Certificate in Social Work: Military
- Graduate Certificate in Social Work: Trauma

Accreditation Statement

Walden University’s Master of Social Work (MSW) program is accredited by the Council on Social Work Education (CSWE), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA). CSWE’s Commission on Accreditation is responsible for developing standards that define competent preparation for professional social workers and ensuring that social work programs meet these standards.
Note on Licensure

The Walden University Master of Social Work (MSW) program is designed to prepare graduates to practice as licensed social workers in many states. However, the requirements for licensure as a social worker vary greatly from state to state. Each state board that is responsible for regulating the practice of social work has its own academic requirements and issues its own license to practice as a social worker in that state. Additionally, students should be advised that the Walden MSW program is not designed or intended to prepare graduates for licensure as a school social worker; however, graduates might be eligible for licensure as a school social worker in their particular state of residence.

While Walden enrollment specialists can provide general information relating to the state-by-state educational requirements for social work licensure or certification, it remains the student’s responsibility to understand, evaluate, and comply with all requirements relating to field education experiences, licensing or certification, authorization, or endorsement for the state in which she or he resides. Walden makes no representations or guarantee that completion of its coursework or programs will permit an individual to obtain state licensure, certification, authorization, endorsement, or other state credential. Licensure eligibility determinations are ultimately determined by the appropriate state board that issues the credential to practice.

Prospective students enrolling in licensure-leading programs are advised that relocation to another state may impact the student’s ability to complete field experiences and/or to obtain professional licensure, certification, or other credential in another state. Prospective students are advised to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

Doctoral Degree Programs

Doctor of Social Work (DSW)

The Doctor of Social Work (DSW) is a postgraduate program designed to prepare students as advanced practitioners who employ action research to design, implement, and assess social work and social welfare programs and policies for suitability for the diverse needs of families, communities, and society. This program may prepare students to design culturally and contextually relevant social services; mentor others in their efforts to provide social services to individuals, communities, and society; and provide leadership and advocacy in the social work profession regarding needs of individuals and communities with schools, governments, health services, criminal justice systems, and mental health organizations.

The DSW program specifically differs from the PhD in Social Work because the development and training in the DSW is focused on providing advanced development for the practitioner-scholar. The PhD program is focused on developing scholar-practitioners for service as researchers, agency leaders, policy analysts, and educators.

Learning Outcomes

At the end of this program, graduates will be able to:

- Identify social work practice gaps through the use of theory, current research, and best practices.
Demonstrate the ability to employ a variety of research approaches to understand or address social work practice problems.

Synthesize research related to social work interventions, social programs, and the social work practice knowledge base.

Critically evaluate social problems and social work practice gaps from a culturally aware, ethical, and empirically driven perspective.

Demonstrate the ability to collaborate with a variety of stakeholders to advocate for social change.

Demonstrate the ability to collaborate with a variety of stakeholders to advocate for policies and practices that advance the economic and social well-being of culturally diverse clientele.

Demonstrate advanced knowledge and skill in a specialized area of social work practice.

Specializations

Changing specializations may increase a student’s expected time-to-degree completion and cost.

- Addictions and Social Work
- Advanced Clinical Practice and Supervision
- Clinical Expertise
- Criminal Justice
- Disaster, Crisis, and Intervention
- Family Studies and Interventions
- Impact Leadership in Social Work Administration
- Medical Social Work
- Policy Practice
- Social Work Administration
- Social Work Education

Minimum Degree Requirements

- Doctoral Writing Assessment
- Professional Development Plan
- Foundation course (3 cr.)
- Core courses (25 cr.)
- Research courses (15 cr.)
- Specialization courses (15 cr.)
- Completion of Doctoral Study
Building Doctoral Socialization and Competency (1 cr. per term for five terms)
Doctoral Study Action Research Project (5 cr. per term; taken continuously until completion)
Quarter Plans
One residency

Curriculum

Foundation Course (3 cr.)

SOCW 8002 - Foundations of Graduate Study

Core Courses (25 cr.)

SOCW 8110 - Advanced Social Work Theory and Practice
SOCW 8117 - Diversity and Multiculturalism
SOCW 8137 - Contemporary Issues, Social Change, and Social Policy
SOCW 8138 - Program and Practice Evaluation
SOCW 8112 - Social Work Scholarship

Research Courses (10 cr.)

RSCH 8110 - Research Theory, Design, and Methods
And choose one course from the following:
RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis

Advanced Research Course (5 cr.)

RSCH 8260 - Advanced Quantitative Reasoning and Analysis OR
RSCH 8360 - Advanced Qualitative Reasoning and Analysis

Specialization Courses (15 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page. Changing specializations may increase a student's expected time-to-degree completion and cost.

Residency Requirements

Complete one residency as soon as you begin your program; required before you begin your second research course (RSCH 8210 OR RSCH 8310).
Completion of the Doctoral Capstone Research Project

**Building Doctoral Socialization and Competency**
(5 cr.; continuously enrolled in 1 cr. per term for a minimum of five terms until completion)
- SOCW 8601 - Building Doctoral Socialization and Competency 1
- SOCW 8602 - Building Doctoral Socialization and Competency 2
- SOCW 8603 - Building Doctoral Socialization and Competency 3
- SOCW 8604 - Building Doctoral Socialization and Competency 4
- SOCW 8605 - Building Doctoral Socialization and Competency 5

**Capstone Research Course**
(5 cr. per term for a minimum of three terms; taken continuously until completion)
- SOCW 8610 - Capstone Research Project

**Course Sequence**

Students undertake courses in the following sequence.

</tbody>
</table>

*Students take this course for a minimum of three quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval. In general, students are continuously registered in the dissertation course until they complete their dissertation, and it is approved. This usually takes longer than the minimum required terms in the dissertation course shell.

**Doctoral Writing Assessment**

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university's required doctoral writing assessment. Designed to evaluate incoming doctoral students' writing
skills, this assessment aims to help prepare incoming doctoral students to meet the university's expectations for writing at the doctoral level.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.

PhD in Social Work

The PhD in Social Work program is designed to prepare experienced social work professionals as leaders, researchers, educators, and supervisors in the field. This program offers students an opportunity to engage in a core body of social work knowledge and processes that focus on the history and development of the profession, contemporary issues in social work, advanced social work theory and practice, program planning and evaluation, and research methods leading to a dissertation experience designed to prepare students for their roles as leaders and advocates for social change in the field.

Learning Outcomes

Graduates of this program are able to:

- Synthesize scholarly research and theory to examine gaps in social work knowledge.
- Demonstrate the skills necessary to create and implement ethical research designs that take into account cultural factors to expand social work knowledge.
- Demonstrate the ability to employ a variety of research approaches to understand or address the etiology and dynamics of social problems and needs.
- Evaluate research related to social work interventions, social programs, and the empirical knowledge-base.
- Analyze social problems related to the field of social work from a culturally aware, ethical, and empirically-driven perspective.
- Demonstrate the ability to collaborate with a variety of stakeholders to advocate for social change.
- Demonstrate the ability to use scholarly research to advocate for policies and practices that advance the economic and social well-being of culturally diverse clientele.
- Demonstrate advanced knowledge and skills in social work practice and research.

Specializations
Addictions and Social Work  
Advanced Clinical Practice and Supervision  
Clinical Expertise  
Criminal Justice  
Disaster, Crisis, and Intervention  
Family Studies and Interventions  
Impact Leadership in Social Work and Administration  
Medical Social Work  
Policy Practice  
Social Work Administration  
Social Work Education

Minimum Degree Requirements

Doctoral Writing Assessment
Professional Development Plan
Foundation course (3 cr.)
Core courses (20 cr.)
Specialization courses (15 cr.)
Research Courses (20 cr.)
Completion of Doctoral Capstone
  Building Doctoral Socialization and Competency (1 cr. per term for five terms)
  Dissertation support course (5 cr.)
  Dissertation (5 cr. per term for a minimum of three terms; taken continuously until completion)
Quarter Plans
Four residencies

Curriculum

Foundation Course (3 cr.)

  SOCW 8002 - Foundations of Graduate Study

Core Courses (20 cr.)

  SOCW 8110 - Advanced Social Work Theory and Practice  
  SOCW 8112 - Social Work Scholarship  
  SOCW 8137 - Contemporary Issues, Social Change, and Social Policy  
  SOCW 8138 - Program and Practice Evaluation
Specialization Courses (15 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Foundation Research Courses (15 cr.)

Courses comprising the Foundation Research Sequence are conducted online and require weekly readings, participation in discussions, and assignment completion. Course instructors guide discussions and evaluate discussion and application assignments. RSCH 8110 must be completed prior to Residency 2 of the academic residencies. RSCH 8210 and RSCH 8310 must be completed prior to beginning the dissertation or attending Residency 3.

- RSCH 8110 - Research Theory, Design, and Methods
- RSCH 8210 - Quantitative Reasoning and Analysis
- RSCH 8310 - Qualitative Reasoning and Analysis

Advanced Research Course (5 cr.)

All PhD students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

- RSCH 8260 - Advanced Quantitative Reasoning and Analysis
- RSCH 8360 - Advanced Qualitative Reasoning and Analysis
- RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Residency Requirements

Complete Residency 1 as soon as you begin your program; should be completed in Term 1 or Term 2.

Complete Residency 2 within 18 months of your start date or linked to your registration for or completion of your first research course.

Complete Residency 3 by the end of your third year.

Complete residency 4 after your prospectus is approved as follows:

- Residency 4 General (RESI 8404) OR
- Residency 4 Proposal Writing (RESI 8404Q) OR
- Residency 4 Methods & Data Collection: Qualitative (RESI 8404R) OR
- Residency 4 Methods & Data Collection: Quantitative (RESI 8404S) OR
Residency 4 Publishing & Presenting (RESI 8404T) OR an approved professional conference (RESI 8900 for select programs only. Contact Advising for information.) OR a dissertation intensive (DRWI 8500) during your 9000 course. Contact Student Success Advising to register. You must attend all sessions and advising throughout the entire intensive retreat in order to successfully complete the experience to satisfy residency 4 requirements. **NOTE:** Intensive Retreats are NOT included in Fast Track tuition.

Optional: Complete a PhD dissertation intensive (DRWI 8500) during your dissertation. Contact Student Success Advising to register.

**Completion of the Doctoral Capstone**

**Building Doctoral Socialization and Competency**

SOCW 9001A - Building Doctoral Socialization and Competency 1
SOCW 9002A - Building Doctoral Socialization and Competency 2
SOCW 9003A - Building Doctoral Socialization and Competency 3
SOCW 9004A - Building Doctoral Socialization and Competency 4
SOCW 9005A - Building Doctoral Socialization and Competency 5

**Dissertation Writing Courses**

SOCW 8550 - Preparing for Dissertation
SOCW 9000 - Dissertation

Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

School of Counseling

Master's Degree Programs

**MS Dual Degree in Clinical Mental Health Counseling and School Counseling**

Mental health professionals are already committed to improving the mental and emotional health of others. This program allows students to gain the confidence, qualifications, and critical thinking skills needed to help clients cope with daily life and overcome their greatest challenges. Students can also strengthen their focus on helping clients develop their strengths and find their own solutions to issues.

Learning Outcomes

The following Learning Outcomes are common to all MS in counseling programs. The competent and confident counseling professional will:

- Analyze the different roles and settings of a counselor.
- Apply sound ethical and legal practices in the work of a counselor.
- Analyze cultural development theories and models.
- Examine empirically based theories of human development.
- Evaluate approaches of career development appropriate to diverse needs and life experiences.
- Examine appropriate evidence-based counseling practices for prevention and intervention.
- Apply essential counseling skills across multiple settings.
- Select group facilitation strategies that are culturally and ethically relevant.
Analyze assessment procedures to support planning for appropriate counseling interventions.
Evaluate research methods commonly used in the counseling profession.

Additional Program-Specific Learning Outcomes

**MS in Clinical Mental Health Counseling**

Evaluate effective treatment strategies for addressing the needs of mental health clients.
Choose appropriate diagnostic intervention processes to meet a broad range of mental health issues.
Assess the impact of biological/neurological mechanisms on mental health.
Develop strategies for interfacing with outside stakeholders (i.e., the legal system and behavioral health professionals).

**MS in School Counseling**

Examine the factors that put K–12 students at risk for mental health and behavioral disorders.
Choose strategies for assisting K–12 students in reaching personal, academic, and social growth.
Assess data to inform decision making within the school setting.
Critically examine the connections between social, familial, emotional, and behavior problems and academic achievement.

**Specializations**

- General Program
- Addiction Counseling
- Forensic Counseling
- Marriage, Couple, and Family Counseling
- Military Families and Culture
- Trauma and Crisis Counseling

**Degree Requirements**

111 total quarter credits for General Program (121 cr. with optional 10-credit specialization)
Foundation course (1 cr.)
Core courses (95 cr.)
Field experience (15–25 cr.; Practicum: 100 hours CMHC; Internship: 600 hours CMHC and 600 hours School Counseling)
Optional specialization courses (10 cr.)
Professional Development Plan, licensure plan
2 Pre-Practicum Labs (6 weeks online with 4 days of face-to-face experience)
Group Lab (9 weeks online with 14 hours of live synchronous group)

Curriculum

Foundation Course (1 cr.)

COUN 6101 - Foundations for Graduate Study in Counseling

Core Courses (95 cr.)

COUN 6100 - Introduction to Mental Health Counseling
COUN 6111 - Introduction to School Counseling
COUN 6215 - Lifespan Development
COUN 6250 - Group Process and Dynamics
COUN 6306 - Ethics and Legal Issues in Counseling
COUN 6311 - Leadership, Advocacy, and Consultation in the Schools
COUN 6316 - Techniques in Counseling
COUN 6317 - Child and Adolescent Counseling
COUN 6336 - Crisis, Trauma, and Disaster Response
COUN 6360 - Assessment in Counseling and Education
COUN 6626 - Research Methodology and Program Evaluation
COUN 6720 - Diagnosis and Assessment
COUN 6722 - Theories of Counseling
COUN 6723 - Multicultural Counseling
COUN 6726 - Couples and Family Counseling
COUN 6730 - Counseling Addictive Disorders
COUN 6743 - Psychopharmacology
COUN 6753 - Career Counseling
COUN 6785 - Social Change in Action: Prevention, Consultation, and Advocacy

Specialization Courses (10 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Pre-Practicum Labs

Each pre-practicum includes online course content integrated with a 4-day, face-to-face residential requirement.

3 weeks online
4 days face-to-face (see the Pre-Practicum Calendar)
2 weeks online
CPLB 601L - Pre-Practicum 1

Accreditation

Walden University’s MS in Clinical Mental Health Counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) as a mental health counseling program under the 2016 standards. CACREP is a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA) and a requirement for licensure in many states.

Walden University’s MS in School Counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) as a mental health counseling program under the 2016 standards. CACREP is a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA) and a requirement for licensure in many states.

Notes on Licensure

MS in Clinical Mental Health Counseling

The Walden University Master of Science in Clinical Mental Health Counseling (CMHC) program is designed to prepare graduates to practice as a licensed professional counselor (LPC) or licensed mental health counselor (LMHC) in many states. However, the requirements for licensure as a LPC or LMHC varies greatly from state to state. Each state board that is responsible for regulating the practice of professional or mental health counseling has its own academic requirements and issues its own license to practice as a LPC or LMHC in that state.

Walden CMHC graduates may apply for licensure as a professional counselor, such as the LPC or LMHC, in most states. However, each state issues its own credential for an individual to be permitted to practice as a licensed professional or mental health counselor in that state. While Walden enrollment specialists can provide general information relating to the state-by-state educational requirements for mental health or professional counseling licensure or certification, it remains the student’s responsibility to understand, evaluate, and comply with all requirements relating to field education experiences, licensing or certification, authorization, or endorsement for the state in which she or he resides. Walden makes no representations or guarantee that completion of its coursework or programs will permit an individual to obtain state licensure, certification, authorization, endorsement, or other state credential. Licensure eligibility determinations are ultimately determined by the appropriate state board that issues the credential to practice.

Prospective students enrolling in licensure-leading programs are advised that relocation to another state may impact the student’s ability to complete field experiences and/or to obtain professional licensure, certification, or other credential in another state. Prospective students are advised to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

MS in School Counseling

The Walden University Master of Science (MS) in School Counseling program is designed to prepare graduates to practice as a licensed school counselor in many states. However, the requirements for licensure as a school counselor vary greatly from state to state. Each state board that is responsible for regulating the practice of school counseling has its own academic requirements and issues its own license to practice as a school counselor in that state.

The Walden MS in School Counseling program is accredited by the Council on Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council.
for Higher Education Accreditation (CHEA), which may also be a requirement to become a licensed or certified school counselor in some states.

Walden MS in School Counseling graduates may apply for licensure as a school counselor in most states, as the MS in School Counseling program is approved in both Minnesota and Ohio. Graduates in some states will be eligible for licensure based on completion of a state-approved program, where they can apply directly to their state educator board ("direct apply"). Other states have a separate application and process for someone completing an out-of-state approved preparation program ("license-in-hand pathway"), where in order for a graduate to be eligible for licensure or certification, he or she must first obtain a license in an approved state (Minnesota or Ohio) prior to applying for licensure in his or her state of residence.

Prospective students must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program to be eligible to apply directly to their state board, (2) if they need to obtain a license from the state where the program has been approved (Minnesota or Ohio) prior to applying in the state they reside, and (3) any additional requirements the student will need to complete prior to their state granting the license. Students residing in Minnesota and Ohio are eligible to apply directly to their state board, as Walden’s MS in School Counseling is approved by both state boards. Additionally, some states require school counselors to hold an existing teaching license or certificate, and/or obtain teaching experience, in order to be eligible for a school counseling certificate or license.

Each state issues its own credential for an individual to be permitted to practice as a licensed school counselor in that state. While Walden enrollment specialists can provide general information relating to the state-by-state educational requirements for school counseling licensure or certification, it remains the student’s responsibility to understand, evaluate, and comply with all requirements relating to field education experiences, licensing or certification, authorization, or endorsement for the state in which she or he resides. Walden makes no representations or guarantee that completion of its coursework or programs will permit an individual to obtain state licensure, certification, authorization, endorsement, or other state credential. Licensure eligibility determinations are ultimately determined by the appropriate state board that issues the credential to practice.

Prospective students enrolling in licensure-leading programs are advised that relocation to another state may impact the student’s ability to complete field experiences and/or to obtain professional licensure, certification, or other credential in another state. Prospective students are advised to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

**MS in Clinical Mental Health Counseling**

The MS in Clinical Mental Health Counseling program prepares students to identify and address the need for culturally and contextually relevant counseling and social change for individuals, communities, and society.

**Learning Outcomes**

The following Learning Outcomes are common to all MS in counseling programs. The competent and confident counseling professional will:

- Analyze the different roles and settings of a counselor.
- Apply sound ethical and legal practices in the work of a counselor.
- Analyze cultural development theories and models.
- Examine empirically based theories of human development.
Evaluate approaches of career development appropriate to diverse needs and life experiences.
Examine appropriate evidence-based counseling practices for prevention and intervention.
Apply essential counseling skills across multiple settings.
Select group facilitation strategies that are culturally and ethically relevant.
Analyze assessment procedures to support planning for appropriate counseling interventions.
Evaluate research methods commonly used in the counseling profession.

Graduates of the MS in Clinical Mental Health Counseling program will also be able to:

Evaluate effective treatment strategies for addressing the needs of mental health clients.
Choose appropriate diagnostic intervention processes to meet a broad range of mental health issues.
Assess the impact of biological/neurological mechanisms on mental health.
Develop strategies for interfacing with outside stakeholders (i.e., the legal system and behavioral health professionals).

Specializations (Optional)

General Program
Addiction Counseling
Career Counseling
Forensic Counseling
Marriage, Couple, and Family Counseling
Military Families and Culture
State Education - MS in Clinical Mental Health Counseling (only for students with specific state requirements)
Trauma and Crisis Counseling

Degree Requirements

90 total quarter credits for General Program
Foundation course (1 cr.)
Core courses (80 cr.)
Field experience: (9 cr.: 100-hour practicum; 600-hour internship)
Optional specialization courses (10 cr.)
Optional State Education Specialization (only for students with specific state requirements)
Professional Development Plan, licensure plan
2 Pre-Practicum Labs (6 weeks online with 4 days of face-to-face or virtual synchronous sessions)
Group Lab (9 weeks online with 14 hours of live synchronous group)

Core Curriculum (General Program)

The MS in Clinical Mental Health Counseling consists of core coursework; two 4-day pre-practica, which include a 4-day face-to-face or virtual synchronous experience; a practicum; an internship; and the completion of a capstone. Core courses must be taken in the order presented. Additional courses may be taken at the end of the program of study to provide breadth and depth of learning.

Foundation Course (1 cr.)

COUN 6101 - Foundations for Graduate Study in Counseling

Core Courses (80 cr.)

COUN 6100 - Introduction to Mental Health Counseling
COUN 6316 - Techniques in Counseling

**Accreditation**

Walden University’s MS in Clinical Mental Health Counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) as a mental health counseling program under the 2016 standards. CACREP is a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA) and a requirement for licensure in many states.

**Note on Licensure**

*The Walden University Master of Science in Clinical Mental Health Counseling (CMHC) program is designed to prepare graduates to practice as a licensed professional counselor (LPC) or licensed mental health counselor (LMHC) in many states. However, the requirements for licensure as a LPC or LMHC vary greatly from state to state. Each state board that is responsible for regulating the practice of professional or mental health counseling has its own academic requirements and issues its own license to practice as a LPC or LMHC in that state.*
Walden CMHC graduates may apply for licensure as a professional counselor, such as the LPC or LMHC, in most states. However, each state issues its own credential for an individual to be permitted to practice as a licensed professional or mental health counselor in that state. While Walden enrollment specialists can provide general information relating to the state-by-state educational requirements for mental health or professional counseling licensure or certification, it remains the student’s responsibility to understand, evaluate, and comply with all requirements relating to field education experiences, licensing or certification, authorization, or endorsement for the state in which she or he resides. Walden makes no representations or guarantee that completion of its coursework or programs will permit an individual to obtain state licensure, certification, authorization, endorsement, or other state credential. Licensure eligibility determinations are ultimately determined by the appropriate state board that issues the credential to practice.

Prospective students enrolling in licensure-leading programs are advised that relocation to another state may impact the student’s ability to complete field experiences and/or to obtain professional licensure, certification, or other credential in another state. Prospective students are advised to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

**MS in Marriage, Couple, and Family Counseling**

This program is no longer accepting new students. Current students must complete their programs of study in accordance with Walden’s Time-to-Degree Completion policies.

The MS in Marriage, Couple, and Family Counseling program at Walden University is designed to provide students with all the educational competencies and skill development as entry-level professional counselors who specialize in preventing and remediating conflicts or crises in and fostering the development of individuals, marriages, couples, and families and to provide students with the advantage of quality distance education and training. With an emphasis on systems theory and evidence-based practice, the program trains individuals to work in a culturally and contextually appropriate way in a variety of settings, including community agencies, county and state agencies, hospitals, and private practice, and to provide consultation to businesses and agencies.

**Learning Outcomes**

The following Learning Outcomes are common to all MS in counseling programs. The competent and confident counseling professional will:

- Analyze the different roles and settings of a counselor.
- Apply sound ethical and legal practices in the work of a counselor.
- Analyze cultural development theories and models.
- Examine empirically based theories of human development.
- Evaluate approaches of career development appropriate to diverse needs and life experiences.
- Examine appropriate evidence-based counseling practices for prevention and intervention.
- Apply essential counseling skills across multiple settings.
Select group facilitation strategies that are culturally and ethically relevant.
Analyze assessment procedures to support planning for appropriate counseling interventions.
Evaluate research methods commonly used in the counseling profession.
Graduates of the MS in Marriage, Couple, and Family Counseling program will also be able to:

Evaluate therapeutic models appropriate to marriage, couple, and family counseling.
Develop systems-based treatment strategies for addressing the needs of couples and families.
Evaluate the impact of complex life-based factors (e.g., crisis and trauma, addiction, interpersonal violence, employment) on marriages, couples, and families.
Identify prevention-based strategies that foster family wellness.

Specializations

General Program (below)
Addiction Counseling
Career Counseling
Forensic Counseling
Military Families and Culture
State Education - MS in Marriage, Couple, and Family Counseling (only for students with specific state requirements)
Trauma and Crisis Counseling

Degree Requirements

90 total credits for General Program
Foundation Course (1 cr.)
Core courses (80 cr.)
Field experience (9 cr.: 100-hour practicum; 600-hour internship)
Optional specialization courses (10 cr.)
Optional State Education Specialization (only for students with specific state requirements)
Professional Development Plan, licensure plan
2 Pre-Practicum Labs (6 weeks online with 4 days face-to-face or virtual synchronous sessions)

Curriculum
The MS in Marriage, Couple, and Family Counseling consists of core coursework; two pre-practicum, which include a 4-day face-to-face or virtual synchronous experience; a practicum; and an internship. Core courses must be taken in the order presented. Additional courses may be taken at the end of the program of study to provide breadth and depth of learning.

Foundation Course (1 cr.)

COUN 6101 - Foundations for Graduate Study in Counseling

Core Courses (80 cr.)

COUN 6201 - Introduction to Marriage, Couple, and Family Counseling
COUN 6722 - Theories of Counseling
COUN 6316 - Techniques in Counseling
COUN 6306 - Ethics and Legal Issues in Counseling
COUN 6356 - Advanced Theory and Application in Marriage, Couples, and Family Counseling
COUN 6215 - Lifespan Development
COUN 6723 - Multicultural Counseling
COUN 6336 - Crisis, Trauma, and Disaster Response
COUN 6250 - Group Process and Dynamics
COUN 6346 - Child and Adolescent Counseling
COUN 6626 - Research Methodology and Program Evaluation
COUN 6753 - Career Counseling
COUN 6730 - Counseling Addictive Disorders
COUN 6360 - Assessment in Counseling and Education
COUN 6361 - Human Sexuality
COUN 6785 - Social Change in Action: Prevention, Consultation, and Advocacy

Specialization Courses (10 cr.)

These courses are dependent upon the particular specialization. Please see the course list on each specialization page.

Field Experience (9 cr.)

COUN 6671 - Counseling Practicum
COUN 6682A - Counseling Internship I
COUN 6682B - Counseling Internship II

Pre-Practicum Labs

Each pre-practicum includes online course content integrated with a 4-day, face-to-face or virtual synchronous residential requirement.
3 weeks online
4 days face-to-face or virtual synchronous sessions (see the Pre-Practicum Calendar)
2 weeks online
FPLB 631L - Pre-Practicum 1
FPLB 632L - Pre-Practicum 2

**Accreditation**

Walden University’s MS in Marriage, Couple, and Family Counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA). CACREP accreditation is a requirement for licensure in many states.

**Note on Licensure**

The Walden University Master of Science in Marriage, Couple, and Family Counseling (MCFC) program is designed to prepare graduates to practice as a licensed professional counselor (LPC) or licensed mental health counselor (LMHC) in many states. However, each state board responsible for the regulation of mental health counseling has its own requirements for licensure including appropriate accreditation of academic programs.
Walden MCFC graduates may apply for licensure as a professional counselor, such as the LPC or LMHC, in many states. However, each state issues its own credential for an individual to be permitted to practice as a licensed professional counselor or mental health counselor in that state. While Walden enrollment specialists can provide general information relating to the state-by-state educational requirements for mental health or professional counseling licensure or certification, it remains the student’s responsibility to understand, evaluate, and comply with all requirements relating to field education experiences, licensing or certification, authorization, or endorsement for the state in which she or he resides. Walden makes no representations or guarantee that completion of its coursework or programs will permit an individual to obtain state licensure, certification, authorization, endorsement, or other state credential. Licensure eligibility determinations are ultimately determined by the appropriate state board that issues the credential to practice.

Prospective students enrolling in licensure-leading programs are advised that relocation to another state may impact the student’s ability to complete field experiences and/or to obtain professional licensure, certification, or other credential in another state. Prospective students are advised to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

**MS in School Counseling**

The MS in School Counseling degree is designed to prepare students to serve as certified or licensed school counselors in pre-kindergarten through high school (PreK–12) school settings. The MS in School Counseling program will include curricular experiences, residency experiences, and fieldwork experiences all designed to best prepare students to serve as professional school counselors in the field. Walden graduates will be prepared to support PreK–12 students in diverse school settings to be emotionally, socially, and academically successful.

**Learning Outcomes**

The following Learning Outcomes are common to all MS in counseling programs. The competent and confident counseling profession will:

- Analyze the different roles and settings of a counselor.
- Apply sound ethical and legal practices in the work of a counselor.
- Analyze cultural development theories and models.
- Examine empirically based theories of human development.
- Evaluate approaches of career development appropriate to diverse needs and life experiences.
- Examine appropriate evidence-based counseling practices for prevention and intervention.
- Apply essential counseling skills across multiple settings.
- Select group facilitation strategies that are culturally and ethically relevant.
- Analyze assessment procedures to support planning for appropriate counseling interventions.
- Evaluate research methods commonly used in the counseling profession.

Graduates of the MS in School Counseling program will also be able to:
Examine the factors that put K–12 students at risk for mental health and behavioral disorders.
Choose strategies for assisting K–12 students in reaching personal, academic, and social growth.
Assess data to inform decision making within the school setting.
Critically examine the connections between social, familial, emotional, and behavior problems and academic achievement.

**Accreditation**

Walden University’s MS in School Counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) as a mental health counseling program under the 2016 standards. CACREP is a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA) and a requirement for licensure in many states.

**Note on Licensure**

The Walden University Master of Science (MS) in School Counseling program is designed to prepare graduates to practice as a licensed school counselor in many states. However, the requirements for licensure as a school counselor vary greatly from state to state. Each state board that is responsible for regulating the practice of school counseling has its own academic requirements and issues its own license to practice as a school counselor in that state.

The Walden MS in School Counseling program is accredited by the Council on Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA), which may also be a requirement to become a licensed or certified school counselor in some states.

Walden MS in School Counseling graduates may apply for licensure as a school counselor in most states, as the MS in School Counseling program is approved in both Minnesota and Ohio. Graduates in some states will be eligible for licensure based on completion of a state-approved program, where they can apply directly to their state educator board (“direct apply”). Other states have a separate application and process for someone completing an out-of-state approved preparation program (“license-in-hand pathway”), where in order for a graduate to be eligible for licensure or certification, he or she must first obtain a license in an approved state (Minnesota or Ohio) prior to applying for licensure in his or her state of residence.
Prospective students must research their state licensure requirements to determine (1) if they are required to complete a state-approved licensure program to be eligible to apply directly to their state board, (2) if they need to obtain a license from the state where the program has been approved (Minnesota or Ohio) prior to applying in the state they reside, and (3) any additional requirements the student will need to complete prior to their state granting the license. Students residing in Minnesota and Ohio are eligible to apply directly to their state board, as Walden’s MS in School Counseling is approved by both state boards. Additionally, some states require school counselors to hold an existing teaching license or certificate, and/or obtain teaching experience, in order to be eligible for a school counseling certificate or license.

Each state issues its own credential for an individual to be permitted to practice as a licensed school counselor in that state. While Walden enrollment specialists can provide general information relating to the state-by-state educational requirements for school counseling licensure or certification, it remains the student’s responsibility to understand, evaluate, and comply with all requirements relating to field education experiences, licensing or certification, authorization, or endorsement for the state in which she or he resides. Walden makes no representations or guarantee that completion of its coursework or programs will permit an individual to obtain state licensure, certification, authorization, endorsement, or other state credential. Licensure eligibility determinations are ultimately determined by the appropriate state board that issues the credential to practice.

Prospective students enrolling in licensure-leading programs are advised that relocation to another state may impact the student’s ability to complete field experiences and/or to obtain professional licensure, certification, or other credential in another state. Prospective students are advised to carefully review, evaluate, and understand the requirements of the applicable licensure board in the state in which they intend to relocate.

Doctoral Degree Programs

PhD in Counselor Education and Supervision

The doctoral program in Counselor Education and Supervision is designed to evaluate the theory and practice of counseling through quantitative and qualitative research and to prepare educators and leaders in the profession of counseling.

Learning Outcomes

Graduates of the PhD in Counselor Education and Supervision program will be able to:

- Respond appropriately to legal and ethical issues across multiple counselor educator roles.
- Appropriately address multicultural issues across multiple counselor educator roles.
- Apply advanced skills for practice as a counseling professional.
- Create a pedagogical identity reflective of effective teaching practices in counselor education.
- Develop contextually appropriate responses to supervisory situations using evidence based models.
- Critically examine the gatekeeping functions required of counselor educators.
- Critique effective practices of research and scholarship.
- Recommend research designs appropriate to the problem being studied.
- Develop effective leadership skills that promote advocacy.
Specializations

Changing specializations may increase a student's expected time-to-degree completion and cost.

- General Program (see below)
- Addiction Counseling
- Advanced Research Methods
- Clinical Mental Health Counseling
- Consultation
- Counseling and Social Change
- Forensic Mental Health Counseling
- Leadership and Program Evaluation
- Marriage Couple and Family Counseling
- School Counseling
- Trauma and Crisis

Minimum Degree Requirements

- Professional Development Plan and Program of Study (included in COUN 8001)
- Foundation course (1 cr.)
- Prerequisites (39 cr.)
  - To be completed if students have not graduated with a CACREP-accredited master's degree
- Core courses (30 cr.)
- Research courses (20 cr.)
- Specialization courses (10–15 cr., depending on the specialization)
- Field experience courses (9 cr.)
  - Practicum (3 cr.)
  - Internship (6 cr.)
- Completion of the Doctoral Dissertation
  - Dissertation support courses (5 cr.)
  - Dissertation writing courses (5 cr. per term for a minimum of 4 terms; taken continuously until completion)
- Quarter Plans
- One residency
- Two Pre-Practicum Labs (6 weeks online, 4 days face-to-face or virtual synchronous sessions)

Curriculum
Foundation Course (1 cr.)

COUN 8001 - Foundations of Graduate Study in Counselor Education and Supervision

Core Courses (30 cr.)

COUN 8110 - Professional Orientation, Ethics, and Identity
COUN 8125 - Teaching in Counselor Education
COUN 8115 - Advanced Counseling Theories
COUN 8135 - Clinical Supervision
COUN 8120 - Professional Consultation, Program Evaluation, and Leadership
COUN 8203 - Survey Research Methods

Research Courses (15 cr.)

RSCH 8110 - Research Theory, Design, and Methods
RSCH 8210 - Quantitative Reasoning and Analysis
RSCH 8310 - Qualitative Reasoning and Analysis

Advanced Research Course (5 cr.)

All PhD students are required to complete one advanced-level research course that mirrors the methodology of their intended dissertations. The university offers three advanced courses; individual programs may have other advanced options. Students should refer to their specific programs of study to determine program-specific requirements.

One of the following three courses is required:

RSCH 8260 - Advanced Quantitative Reasoning and Analysis
OR
RSCH 8360 - Advanced Qualitative Reasoning and Analysis
OR
RSCH 8460 - Advanced Mixed-Methods Reasoning and Analysis

Specialization Courses

These courses are dependent upon the particular specialization. The General specialization does not require specialization courses. Please see the course list on each specialization page.

Field Experience Courses (9 cr.)

COUN 8890 - Counseling Doctoral Practicum
COUN 8895 - Doctoral Internship I
COUN 8896 - Doctoral Internship II
Residency and Pre-Practicum Lab Requirements

Complete Residency (RESI 8801C) as soon as you begin your program; no later than within 90 days of completing your Foundations course (within the first two terms of your program). View the calendar, then register using your myWalden portal or by contacting Student Success Advising.

Pre-Practicum 1—Complete Pre-Practicum 1 after you have completed Residency 1, COUN 8001, COUN 8110, RSCH 8110, COUN 8125, COUN 8115, RSCH 8210, RSCH 8310, and COUN 8135 in order to advance in the program.

Pre-Practicum 2—Complete Pre-Practicum 2 after you have completed Pre-Practicum 1, COUN 8203, COUN 8120, and either RSCH 8260, RSCH 8360, or RSCH 8460 in order to advance in the program.

Each pre-practicum includes online course content integrated with a 4-day, face-to-face or virtual residential requirement.

3 weeks online
4 days face-to-face or virtual synchronous sessions (see the Pre-Practicum Calendar)
2 weeks online
CPLB 802L - Pre-Practicum 1: Enhancing Teaching and Research Skills
CPLB 803L - Pre-Practicum 2: Advanced Supervision, Teaching, and Research Skills

Completion of the Doctoral Capstone

COUN 8551 - Preparing for Dissertation
COUN 8561 - Dissertation
Can begin dissertation with start of first internship.

Prerequisites

Students who have not graduated from a CACREP-accredited master’s program may be required to fulfill prerequisite requirements.

</table>
* Students take two electives or two to three specialization courses, depending on the specialization chosen.

** To complete a doctoral dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Doctoral Writing Assessment

Students who start or readmit to doctoral programs at Walden University in the university catalog for academic year 2017 or later will complete the university’s required doctoral writing assessment. Designed to evaluate incoming doctoral students’ writing skills, this assessment aims to help prepare incoming doctoral students to meet the university’s expectations for writing at the doctoral level.

Accreditation

Walden University’s PhD in Counselor Education and Supervision program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA).

Note on Licensure

The PhD in Counselor Education and Supervision is not a licensure program and does not prepare an individual to become a licensed counseling professional.

8-Year Maximum Time Frame

Students have up to 8 years to complete their doctoral degree requirements (see Enrollment Requirements). Students may petition to extend the 8-year maximum time frame, but an extension is not guaranteed.
School of Interdisciplinary Undergraduate Studies

The School of Interdisciplinary Undergraduate Studies (SIUS) is the academic unit of Walden University responsible for the general education curriculum, as well as the Bachelor of Science in Communication program. Faculty in the school represent the wide array of disciplines contained in general education in addition to communication.

SIUS collaborates with Walden's other colleges and schools in the planning and delivery of undergraduate degree programs. The school also collaborates with Walden's student support units to build and maintain an enriching learning experience for undergraduate students.

Programs

The Walden University General Education Curriculum
BS in Communication
BS in Interdisciplinary Studies [Limited Offerings in Fall Quarter 2020 and Winter Quarter 2021]

School Mission

Walden University's School of Interdisciplinary Undergraduate Studies provides a diverse community of learners—including career starters, changers, and advancers—the opportunity to develop as professional leaders who create positive social change in their communities. Through Walden's scholar-practitioner model, students enhance and develop professional skills. Graduates contribute to the well-being of their communities by helping to solve contemporary problems.

The School of Interdisciplinary Undergraduate Studies is the academic unit responsible for the General Education curriculum, a component of all Walden baccalaureate degree programs. The school collaborates closely with other Walden colleges and schools in the planning and delivery of undergraduate degree programs, particularly as they relate to general education.

The school's faculty members represent the wide array of disciplines contained in its General Education and BS Communication programs. The school collaborates with all academic and student support units in support of a positive university experience for undergraduate students.
The Walden University General Education Program

The Walden University General Education Curriculum

Bachelor’s degree programs at Walden University combine academic study with real-world applications to prepare students for today’s competitive economy and society in business, technology, education, social, behavioral, and health sciences. General education courses blend with degree program courses to provide the breadth and depth of knowledge needed by the 21st-century citizen.

Walden’s general education outcomes focus on communication, critical thinking, ethical reasoning, integrative learning, global learning, and social change. Students apply their learning as they complete coursework in communication, humanities, natural sciences, mathematics, and social sciences. These competencies prepare students for diverse public and professional lives where they will help shape a changing global community.

Learning Outcomes

Through the general education program, the bachelor’s degree graduate of Walden University will

1. Employ appropriate written and oral communication techniques in a variety of contexts. (Communication)
2. Interpret information and diverse points of view to make informed decisions. (Critical Thinking)
3. Apply ethical reasoning to practical situations. (Ethical Reasoning)
4. Synthesize learning from at least two fields of study to address problems individually and in collaboration with others. (Integrative Learning)
5. Explain a variety of different perspectives, such as diversity, equity, and inclusion interests, to present a position on a public issue. (Civic and Global Learning)
6. Examine the influences of social structures on the self, society, and civic engagement. (Social Change)

General Education Areas and Requirements

(Minimum of 45 cr. total, see individual program requirements)

Note: A minimum of 55 quarter credits* must be completed at the 3000 or 4000 level in order to meet program requirements. In some cases, this means that students will need
to select 3000 or 4000 level courses as either general education or elective options. Students should consult their student success advisor if they have questions about individual program requirements.

* Some programs may require a more than 55 credits to be completed at the 3000 or 4000 level. Please consult the catalog page for your specific page.

Written and Oral Communications

(Minimum of two courses; ENGL 1010 is required)

- COMM 1006 - Stereotypes and Scandals: Exploring the Power of Mass Communication and Mass Media
- COMM 1008 - Interpersonal Communication for Personal and Professional Success
- COMM 2002 - Fundamentals of Public Speaking
- COMM 4001 - Intercultural Communication
- ENGL 1010 - Writing With Confidence and Purpose
- ENGL 2002C - Professional Writing for Successful Communication

Humanities

(Minimum of two courses; HMNT 1001 may be required by program)

- ARTS 2001C - Fundamentals of Photographic Arts
- ENGL 2050C - Women's Literature and Social Change
- ENGL 2110 - Creative Writing: Fundamentals of Short Fiction
- ENGL 3110C - Creative Writing: Nonfiction and Poetry
- HMNT 1001 - Living and Learning in the Technological World
- HMNT 1050C - Humanities Through the Arts
- HMNT 3001C - Modern Popular Culture
- PHIL 1001S - Introduction to Philosophy
- PHIL 2001C - Ethics
- PHIL 3010 - Science and Spirituality
- RELG 2001C - World Religions

Mathematics/Natural Sciences

(Minimum of two courses)

- BIOL 1001 - Introduction to Biology
- BIOL 2320C - Nutritional Science
- BIOL 3020 - Essentials of Human Anatomy and Physiology
- CHEM 1001 - Introduction to Chemistry
- MATH 1030 - College Math
- MATH 1040 - College Algebra Concepts
- NASC 1001S - Environmental Science
- PHSC 1001C - Earth Science
• SCNC 4001C - Analyzing Contemporary Scientific Controversies
• STAT 3001 - Statistical Methods and Applications

Social Sciences

(Minimum of two courses)

• ANTH 3001C - Indigenous Peoples in the Modern World
• ECON 1002 - Microeconomics
• GEOG 1001 - World Regional Geography
• HIST 2005 - World History 1900–1945
• HIST 2006 - World History 1945–2000
• HIST 2050C - U.S. History Through the Lens of Social Change
• IDST 2050C - Interdisciplinary Experience: Sustaining Quality of Life in the City
• IDST 4002 - Seminar in Public Service
• POLI 1001S - American Government and Politics
• PSYC 1001 - Introduction to Psychology
• SOCI 1001S - Introduction to Sociology
• SOCI 2001C - Multicultural Dimensions of Society
• SOCI 4080C - Social Responsibility
• WLDN 2010 - What's Your Problem?

Programs Requiring Specific General Education Courses

The following general education courses are required for Bachelor of Science programs. If required, HMNT 1001 must be taken at Walden University. The other courses in this table are eligible for transfer credit. Also see the Transfer Maximum by Program table in the Walden University Student Handbook.

**Other Undergraduate Options**

- Accelerate Into Master’s (AIM) Programs
• Undergraduate Minors

Accelerate Into Master's (AIM) Programs

Walden University offers opportunities for undergraduate students to accelerate time to the completion of a master's degree. This option, called Accelerate Into Master's (AIM), allows undergraduate students to complete graduate-level courses, upon approval of their advisor, that will fulfill the requirements for their undergraduate program as well as graduate requirements for a future master's program.

When undergraduate students attempt a 5000-level course, they may earn a "C" in the graduate-level course but only a grade of "B" or better will carry over to the graduate program. Students who receive a "C" grade will be awarded a grade of "C,"* which will permit the grade to be used toward the undergraduate-level requirement but not toward the master's-level requirement. Students who do not pass their AIM class are not permitted to continue taking 5000-level courses. Later admission to the master's program requires that students must take that course as a master's student.

Requirements

Walden University offers several opportunities for undergraduate students in certain programs to accelerate time to completion in certain master's degree programs.

1. Individual programs may determine the specific eligible AIM courses and some programs may limit the number of courses available. Generally, AIM coursework should not account for more than approximately 50% of the credits needed for master's degree completion. Practicum or Capstone requirements for the master's program are not eligible to be satisfied by AIM coursework.

2. To be eligible to begin AIM courses, students must:
   a. Have an overall GPA equal to that required for admission to the associated master's degree.* BS AIM track students must maintain a 2.5 GPA and have a transfer GPA of at least 2.5 (if transferring credits).
   b. Have completed a minimum of 90 credits and any specific core requirements associated with their bachelor's program listed below. (Individual programs may determine additional prerequisites.) * BS in Psychology AIM track students do not need to meet this requirement.
   c. Be in good financial standing.
   d. Not have any incompletes.

3. AIM courses are (5000-level) graduate courses.*
a. Tuition for these courses is charged at the undergraduate rate for the course-based learning format. For Tempo Learning® these courses are included in the program's subscription cost.

b. Courses taken as an undergraduate count as fulfilling undergraduate degree requirements.

c. Grades for graduate courses taken as an undergraduate are incorporated into the undergraduate GPA only.

4. Students must get a "B" or better in each course to have that course applied to the master's program.
   - Students who do not earn a grade of "C" or better will not be allowed to take any more 5000-level courses. Later admission to the master’s program requires that the student must take that course as a master’s student. * BS in Psychology AIM track students may retake an AIM course a second time if they failed the first time; they must earn a grade of "C" or better the second time in order to stay in the AIM track program.

5. Students are expected to maintain the undergraduate GPA expected for admission to the associated master's program.
   - Falling below this GPA prevents the student from taking any additional graduate courses as an undergraduate student.

6. Upon completion of the undergraduate program requirements, students should file an Intent to Graduate Form.

7. Students who complete these courses successfully are not required to pursue the master's degree and/or may defer enrollment to a future date. Transfer of credit policies, including those related to expiration, would apply.

Taking AIM courses does not guarantee admission into a master’s program. Upon admission to the master’s program, all AIM graduate courses completed with a "B" or better are applied to graduate program. The graduate GPA is calculated based only on those graduate courses taken as a graduate student.

Institutional coursework expires within 10 years unless otherwise notated by the individual academic unit or program.

Undergraduate students may complete AIM courses to fulfill elective credits, as course substitutions approved by the program director, or they may elect a second concentration within their program of study that is designed for AIM completion. Students are encouraged to consult with Student Success Advising (if in the course-based learning format) or their Academic Coaching (if in the Tempo Learning® format)
on the most appropriate plan for their program and academic goals, such as their future master's program and time to completion.

*Note: Graduate students cannot register for AIM courses.

Master's Program

Eligible Courses
(specific course availability may differ within the Tempo Learning® format)

programs. Students may select up to five of these courses. Individual course prerequisites apply

Note: These courses are 11 weeks in length.

These courses must be taken in the order listed.

- HUMN 5316 - Techniques of Counseling
- HUMN 5723 - Multicultural Counseling
- PSYC 5101 - Foundations for Graduate Study in Counseling
- PSYC 5102 - Introduction to Mental Health Counseling
- PSYC 5722 - Counseling and Psychotherapy Theories
- PSYC 5316 - Techniques in Counseling
- PSYC 5306 - Ethics and Legal Issues in Counseling
- PSYC 5723 - Multicultural Counseling

* Students are required to take PSYC 5101 along with PSYC 5102 or HUMN 5100.

Note on Endorsement, Licensure, or Certification

This program does not lead to an endorsement, certification, or licensure. Walden makes no representation, warrant, guarantee, or commitment that successful completion of this program or coursework for graduate credit within this program will permit a graduate to obtain state certification or licensure.

The graduate degree program and coursework within the program in which you are enrolling may be accepted by many states toward upgrading or renewing a license or obtaining a salary increase (depending on state or district policy). Teachers are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Walden enrollment specialists can provide guidance on program requirements; however, it remains the individual's responsibility to understand and comply with all state and school district requirements.
Undergraduate Minors

Students have the option to select a minor after starting their undergraduate program. Unlike an undergraduate concentration, a minor must be in a discipline outside the student's major. Students should verify individual requirements for each minor, including which programs are ineligible. An undergraduate minor consists of six or more courses with a minimum of two at the upper level. Students wishing to add a minor to their program should contact their student success advisor. Students may select a maximum of two minors.

- Minor in Applied Instructional Design and Technology
- Minor in Business
- Minor in Communication
- Minor in Criminal Justice
- Minor in Health Promotion and Wellness
- Minor in Health Studies
- Minor in Healthcare Management
- Minor in Introductory Instructional Design and Technology
- Minor in Political Science and Public Administration
- Minor in Psychology
- Minor in Public Health
Office of Academic Support

The Office of Academic Support provides student services that support the academic and professional growth of Walden University students. The center offers several non-degree Student Success Courses designed to improve Walden University students’ knowledge and skills in reading, writing, statistics, communications, and critical thinking.

Also see the Office of Academic Support section of the *Walden University Student Handbook* for information on the Writing Center, the Academic Skills Center, the CAEX Program, and additional services.
CAEX Courses

The Office of Academic Support offers several courses designed to improve Walden University students’ knowledge and skills in reading, writing, statistics, communications, and critical thinking, and to help students successfully complete their academic program.

Faculty or Student Success Advising staff also may recommend these courses to help students who need extra support to successfully complete their studies.

Credit is granted for successful completion of each credit-bearing student success course but does not apply toward degree program requirements.

Most courses are available in both quarter-based and semester-based programs. Course length varies depending on the program and specific course.

Courses

For Students in Quarter-Based Programs

- CAEX 3100U - Skills for Academic Integrity for Undergraduates
- CAEX 3100 - Skills for Academic Integrity
- CAEX 3500 - Internship
- CAEX 4000 - Transitioning From Undergraduate to Graduate Writing
- CAEX 6055 - Graduate Writing I: Basic Composition Skills
- CAEX 6065 - Graduate Writing II: Intermediate Composition Skills
- CAEX 6070 - Graduate Writing III: Advanced Composition Skills
- CAEX 6100 - Critical Thinking for Social Change
- CAEX 6200 - Basic APA Style: Citations and References
- CAEX 6300 - Reading Techniques for Graduate Study
- CAEX 6500 - Internship
- CAEX 6600 - Creative Writing for Social Change
- CAEX 6700 - Strategic Writing for Social Change
- CAEX 8010 - Doctoral Writing Workshop: Revising and Editing the Proposal
- CAEX 8020 - Doctoral Writing Workshop: Revising and Editing the Introduction
- CAEX 8030 - Doctoral Writing Workshop: Revising and Editing the Literature Review
- CAEX 8040 - Doctoral Writing Workshop: Revising and Editing the Methods Section
- CAEX 8050 - Doctoral Writing Workshop: Revising and Editing the Postproposal Sections
- CAEX 8100 - Preproposal Writing Workshop
- CAEX 8350 - Writing a Literature Review
- CAEX 8900 - Statistics and SPSS Skills Seminar for Doctoral Students

For Students in Semester-Based Programs
- CAEX 3101 - Skills for Academic Integrity
- CAEX 6056 - Graduate Writing I: Basic Composition Skills
- CAEX 6066 - Graduate Writing II: Intermediate Composition Skills
- CAEX 6071 - Graduate Writing III: Advanced Composition Skills

- CAEX 8105 - Writing Workshop: Preproposal
- CAEX 8351 - Writing a Literature Review
- CAEX 8901 - Statistics and SPSS Skills Seminar for Doctoral Students
Course Descriptions

ACCT 1003 - Introduction to Accounting I♦

(5 cr.)
Students in this introduction to accounting course take a top-down approach to understanding introductory accounting documents and procedures by exploring a business’s financial statements, including the balance sheet, income statement, and cash flow statement. Students explore the practical uses for information that can be gleaned from these statements, individually and as a whole, through a detailed examination of the properties and characteristics of each statement. Students engage in application assignments and discussions on a variety of topics, such as regulations that should be followed when preparing financial statements as promulgated by generally accepted accounting principles (GAAP). Students examine the U.S. use of GAAP in comparison to the use of international financial reporting standards.

Prerequisites
- BUSI 1001 or 1002
- MATH 1001, MATH 1002, MATH 1030, or MATH 1040

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 1004 - Fundamentals of Accounting♦

(5 cr.)
Students take a top-down approach to understanding introductory accounting documents and procedures by exploring a business’s financial statements, including the balance sheet, income statement, and cash flow statement in this course. Students explore the practical uses for information that can be gleaned from these statements, individually and as a whole, through a detailed examination of the properties and characteristics of each statement. Students engage in application assignments and discussions on a variety of topics, such as regulations that should be followed when preparing financial statements as promulgated by generally accepted accounting principles (GAAP). Students examine the U.S. use of GAAP in comparison to the use of International Financial Reporting Standards.

Prerequisites
BS in Accounting
- BUSI 1001 or BUSI 1002
- MATH 1030 or MATH 1040

BS in Business Administration
- BUSI 1001 or BUSI 1002
- MATH 1030 or MATH 1040
BS in Communication

- BUSI 1001 or BUSI 1002
- MATH 1030 or MATH 1040

BS in Computer Information Systems

- BUSI 1001 or BUSI 1002
- MATH 1030 or MATH 1040

BS in Healthcare Management

- MATH 1030 or MATH 1040 or STAT 3001

All Other Programs

- BUSI 1002
- MATH 1030 or MATH 1040

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 2001 - Accounting II

(5 cr.)
In this continuation of Accounting I, students build upon knowledge of accounting principles, including the basic techniques and procedures of internal reporting in organizations and corporations. Students examine a variety of terms and concepts, enabling them to gain a clear understanding of corporate reporting and the fundamental elements of managerial accounting. Students apply strategies involving cost behavior, job-order, cost-volume-profit analysis, performance planning and budgeting, standard costs and variance analysis, relevant costs, and the statement of cash flows to real-world scenarios. Students also assess best practices in employing relevant information in the decision-making process, acquiring practical skills to use in addressing actual accounting problems in the professional arena.

Prerequisites
- ACCT 1001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 2002 - Managerial Accounting: Introduction to Financial Planning and Analysis

(5 cr.)
Individuals responsible for directing and controlling an operation depend on managerial accounting to provide important data. Through this course, students learn about the essential elements of managerial accounting, including strategic, organizational, and
operational decision making using financial information. They examine cost-volume-profit analysis, capital budgeting, operational budgeting, forecasting tools, and performance measurement. Students work through case studies and functional exercises for a contextual understanding of managerial accounting, including the application of quantitative methods to determine performance, planning, and control in operations.

Prerequisites

BS in Accounting
- ACCT 2001 or ACCT 2003 or ACCT 2004S

BS in Business Administration
- ACCT 2001 or ACCT 2003 or ACCT 2004S

All Other Programs
- ACCT 2003 or ACCT 2004S

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 2003 - Introduction to Accounting II*

(5 cr.)
In this continuation of Accounting I, students build upon knowledge of accounting principles, learning a basic foundation of key managerial accounting concepts and activities. Students learn how managers use accounting information for decision making in an organization. They explore how to develop business plans for small businesses and larger manufacturing corporations as well as how to distinguish between the two types of organizations. Through a variety of assignments focusing on the coverage of cost-volume-profit analysis, performance planning, and budgeting, students have the opportunity to gain managerial decision-making skills, helping them prepare for issues they may encounter in the field.

Prerequisites
- ACCT 1003 or ACCT 1001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 2004 - Financial Accounting*

(5 cr.)
Students in this course build upon their knowledge of accounting principles from Fundamentals of Accounting, providing a basic foundation of key financial accounting concepts and activities. Students engage in application assignments and discussions such as the recording, storing, and summarizing of economic events of the business enterprise to meet external reporting needs. Emphasis is placed on the preparation and analysis of financial statements and other financial reports provided to the public based
on the accounting equation, accrual accounting concepts, and data gathering.

Prerequisites

BS in Accounting
- ACCT 1001 or ACCT 1003 or ACCT 1004S

BS in Business Administration
- ACCT 1001 or ACCT 1003 or ACCT 1004S

All Other Programs
- ACCT 1004S

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 3001 - Intermediate Accounting ♦

(5 cr.)

Although businesses often use the same authoritative standards in the production and presentation of financial statements, statements may still differ in a variety of ways. Recognizing these differences requires careful analysis and a variety of techniques. In this course, students consider an overview of prevailing accounting issues as well as the ethical considerations encountered in the process. This is the first in a four-course sequence in which students build upon content covered in introductory accounting courses. Students explore the principles of accrual accounting and interpret the steps in the accounting cycle. They learn about financial statement presentation and disclosure requirements, and they examine the conceptual framework and measurement principles underlying financial accounting. They also assess the relationship between the reporting and auditing functions in corporations. Additionally, students evaluate differences between Financial Accounting Standards Board's Accounting Standards Codification and international financial reporting standards and apply these standards to their coursework.

Prerequisites

BS in Accounting
- ACCT 1004S or ACCT 2001 or ACCT 2003

BS in Business Administration
- ACCT 1004S or ACCT 2001 or ACCT 2003

All Other Programs
- ACCT 2003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 3002 - Auditing and Internal Controls♦
Auditing a company's financial statements requires the ability to apply generally accepted auditing standards to a variety of situations. In this course, students learn the specifics of auditing and how to choose appropriate audit testing. They explore a variety of topics, including professional ethics, audit planning and documentation, audit evidence, statistical tools, materiality and risk, and audit reports for different assurance and non-assurance services. Students examine internal controls and accounting systems as well as software designed for evaluating business information. Through a group project, students work toward gaining practical knowledge and problem-solving skills as they analyze real audit issues and cases. Students apply the Statements of Audit Standards from the Audit Standards Board and Audit Standards of the Public Company Accounting Oversight Board to their auditing situations.

Prerequisites
BS in Accounting
- ACCT 2001 or ACCT 2003 or ACCT 2004S

All Other Programs
- ACCT 2003 or ACCT 2004S

Note: Concurrent enrollment in ACCT 3001 is recommended.

ACCT 3003 - Intermediate Accounting II♦

How does a business handle its investments and capital and what are the generally-accepted accounting principles when valuing inventory? This course provides students with the opportunity to consider and respond to prevailing accounting questions as well as gain insight on related ethical considerations; it is the second in a four-course sequence and is a continuation of Intermediate Accounting I. Students learn ways to categorize, measure and report on cash, receivables, inventories, and investments. They gain practice in financial statement presentation and disclosure requirements. Through evaluation and online discussion, students explore the auditing function as well as inventory cost methods. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards.

Prerequisites
BS in Accounting
- ACCT 3001 or ACCT 1004S

All Other Programs
- ACCT 3001

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ACCT 3004 - Intermediate Accounting III**

(5 cr.)
Physical assets continually change in value; knowing how to account for them is an important task in proper financial statement disclosure. In this course, students investigate current accounting issues as well as the ethical considerations encountered in the process; this course is the third in a four-course sequence and is a continuation of Intermediate Accounting II. Students examine the measurement and accounting for property, plant, and equipment. They also explore intangible assets, current liabilities, and contingencies. They focus on financial statement presentation and discuss how it relates to the auditing function. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards.

**Prerequisites**
- BS in Accounting
  - ACCT 3003 or ACCT 1004S
- All Other Programs
  - ACCT 3003

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**ACCT 3005 - Intermediate Accounting IV**

(5 cr.)
What is capital structure, and how can a business use it for sustainability and reaching long-term goals? In this course, students have the opportunity to respond to such questions as well as to gain insight on related ethical considerations; it is the fourth in a four-course sequence and a continuation of Intermediate Accounting III. Students explore the measurement and reporting principles for stockholders’ equity, retained earnings, long-term liabilities, long-term receivables, discontinued operations, and extraordinary items. They gain further practice in financial statement presentation and disclosures and explore their relationship to the auditing function. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and international financial reporting standards.

**Prerequisites**
- BS in Accounting
  - ACCT 3004 or ACCT 1004S
- All Other Programs
  - ACCT 3004
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 3006 - Accounting Information Systems

(5 cr.)
Nearly all businesses have an accounting system that provides appropriate financial information required to make informed, timely decisions. Therefore, the design of the system is vital to the efficiency and internal controls of acquiring such information. In this course, students learn the fundamental concepts of accounting systems design, including how accounting systems capture important business transactions that drive decisions and execution. Students learn about the technology of accounting systems, file processing, database concepts and tools, and internal control and risks. They explore how to audit the information system as well as how to use the information system to perform audit functions. Through the examination of the latest commercial accounting software, students learn about technological developments for the production of reports and exchange of business data.

Prerequisites
BS in Accounting

- ACCT 2001 or ACCT 2003 or ACCT 2004S

All Other Programs

- ACCT 2003 or ACCT 2004S

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 4001 - Government and Nonprofit Accounting

(5 cr.)
The function and role of private and public sector organizations are often very different; therefore, the accounting principles used to run for-profit businesses and government businesses cannot always be the same. In this course, students compare and contrast the characteristics of government and nonprofit organizations and explore the ethical and social responsibilities of accountants working with these institutions. They also examine the measurement and reporting requirements for governmental and nonprofit organizations. They engage in discussions about the concepts of fund accounting, budget and control issues, and revenue and expense recognition. Students gain hands-on experience preparing financial statements for each type of organization. As a basis for their coursework, students use the Financial Accounting Standards Board's Accounting Standards Codification and pronouncements of the Government Accounting Standards Board.
Prerequisites

BS in Accounting
  • ACCT 3005 or ACCT 1004S

All Other Programs
  • ACCT 3005

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 4002 - Advanced Financial Accounting I

(5 cr.)
Lease accounting from the perspective of the lessor and lessee is an important consideration for business as an alternative to financing. But what options are available for lessors and lessees in accounting for lease transactions? In this course, students have the opportunity to investigate and respond to prevailing accounting issues in this area. This course continues the three-course sequence of Intermediate Accounting. Students assess and explain the measurement and reporting disclosures for leases, pensions, equity compensation, derivatives, and earnings per share. They apply best practices in the presentation of financial statements and analyze how these relate to the auditing function. Students also gain hands-on practice in determining pension obligations and expenses. As a basis for their coursework, students apply the Financial Accounting Standards Board’s Accounting Standards Codification and international financial reporting standards.

Prerequisites
  • ACCT 3005

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 4003 - Advanced Financial Accounting II

(5 cr.)
How can external users to an organization employ the statement of cash flow as a means to foresee an organization’s prospect for future earnings? In this course, students have the opportunity to research and answer accounting questions such as this; it is the second in a three-course sequence and continues the approach used in the Intermediate Accounting sequence. Students examine the measurement and reporting disclosures for changes in accounting principles, correction of errors, the statement of cash flows, segment and interim reporting, and deferred taxes. Students continue to learn about financial statement presentation and disclosures as well as how these elements relate to the auditing function. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and international
financial reporting standards.
Prerequisites
• ACCT 4002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 4004 - Advanced Financial Accounting III

(5 cr.)
Whether it is to expand technical offerings or to gain the competitive edge over smaller entities, companies often merge together or acquire other companies. Often times, this creates a positive effect on the companies involved; other times, it create severe financial strains on a company’s limited financial resources. In this course, students investigate prevalent accounting issues such as this; it is the third in a three-course sequence and continues the approach used in the Intermediate Accounting sequence. Students explore the measurement and reporting disclosures for mergers, acquisitions, and foreign currency translation. Students continue to learn financial statement presentation of business combinations and explore some of the auditing issues in this area. As a basis for their coursework, students use the Financial Accounting Standards Board’s Accounting Standards Codification and International Financial Reporting Standards.
Prerequisites
• ACCT 4003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 4005 - Federal Taxation I: Individual Taxation

(5 cr.)
In this course, students have the opportunity to gain a fundamental understanding of personal income taxes and how they are computed. They also learn appropriate tax concepts and terminologies important for students wishing to pursue a career in accounting and taxes. Students examine the federal income tax structure and apply income tax accounting to cases of individual and sole proprietorship taxation as they assemble information and documentation needed to prepare federal tax returns. They analyze federal income tax laws governing gross income, deductions, calculation of income tax rates, income tax credits, and the alternative minimum tax for individuals.
Prerequisites
BS in Accounting
• ACCT 2001 or ACCT 2003 or ACCT 2004S
All Other Programs

Walden University Catalog (March 2022) 813
• ACCT 2004S

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ACCT 4006 - Federal Taxation II: Corporate Taxation♦

(5 cr.)
This course is a continuation of Federation Taxation I and the focus is on corporate federal taxes. Students appraise the role taxation plays on organizations, the corporate structure, and tax strategies. They learn about the application of federal income taxes business entities, including corporations, partnerships, and entities taxed as partnerships and S corporations. They also examine gift and estate taxes and income taxation of estates and trusts. Students contextualize their learning through the preparation of a corporate federal tax return and related schedules. They consider the allocation of partnership taxable income and other deductions, credits, self-employment taxes, and loss carrybacks and carryforwards. Through the evaluation of legal and ethical issues involved in federal tax practice, students become familiar with laws, best practices, and the responsibilities of accounting professionals.

Prerequisites
• ACCT 4005

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ACCT 4900 - Accounting Capstone Project

(5 cr.)
A capstone course is designed to bring together knowledge gained through the entire program and permit students to demonstrate mastery of the various course competencies. The major course project in this capstone course is a strategic case study. Through this project, students apply and integrate a variety of skills, tools, and knowledge to assess the strategic issues in a real-world case analysis and arrive at recommendations for change and/or improvement. Through coursework and the final capstone project, students appraise and explain a variety of topics, such as basic accounting theory, financial reporting, deferred taxes, engagement planning, client risk, auditing, concepts of accounting and investment percentage, objectives of the statement of cash flows, contracts, sales, bankruptcy, the debtor-creditor relationship, and business law and ethics. In this course, students have the chance to demonstrate their understanding and competency in complex problem identification and solution.

Prerequisites
• All required core and upper-division Accounting courses
ACCT 4990 - Business Essentials

(0 sem. cr.)
A background in the basics of business is often a key to making the most of a graduate business or management program. In this foundational course, students can build their business acumen in major functional areas that are essential to business success including business leadership and management, business ethics, the legal environment of business, accounting, finance, economics, quantitative methods and statistics, information systems management, global business, marketing, and strategic management.

ACCT 6000 - Decision-Making Tools for Today's Financial Professional

(3 sem. cr.)
Today's effective finance professionals use a variety of financial management tools as they seek to evaluate alternatives and make sound financial recommendations. Students will gain practical experience of a financial professional's role by using financial modeling tools such as breakeven and cost-volume-profit analysis for model pricing and cost sensitivity, forecasting and cost prediction, variance cost analysis, relevant cost analysis, project valuation and prioritization using payback, rates of return, and discounted cash flow methods. Students’ increased diagnostic critical-thinking skills will help them to construct effective, ethical, fact-based arguments, which are among the fundamental capabilities required for financial decision making. Using relevant management articles, case studies, and topic analyses, students also examine how to align business needs with fact-based solutions, how to identify new opportunities, and how to manage and enhance an organization's competitive position.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

ACCT 6010 - Analysis and Communication for the Financial Professional

(3 sem. cr.)
An essential skill for nearly all financial professionals is the ability to effectively communicate with the organization to manage internal and external relationships. The importance of communication in finance is emphasized, and students are presented with the opportunity to practice using the tools required for effectual and efficient presentation of information while gaining critical-thinking, reading, and scholarly writing skills. Students explore various written and presentational forms of communication that financial professionals use within organizational and managerial settings. Students examine techniques for developing and presenting white papers, memoranda used to communicate issues and recommendations to management, and financial and nonfinancial information. They learn about concepts in balanced communication coverage and how to adapt to constantly changing modes of communication, including social networking, blogging, and using professional organizations and training programs to their advantage. Through these activities, students gain a better understanding of the
roles and responsibilities of the financial professional as well as the ethical methodologies required to maintain a professional obligation to the community and their clients.

**ACCT 6020 - Legal and Ethical Issues in Accounting and Finance**

(3 sem. cr.)
In the news, it is too often that we hear about cases of financial fraud and misconduct involving major corporations. It is a social and professional obligation of financial professionals to be concerned and knowledgeable on topics involving legal and ethical issues in accounting and financial reporting. In this course, students learn to appreciate this role and explore the various legal and professional responsibilities of which financial professionals must be aware when developing financial statements and reports. They examine a variety of issues, such as the differences between statute and regulation and between common and statutory law. Students also assess the role of bankruptcy and its impact on business relationships. Through the extensive use of current and seminal case studies, students take a practical approach to examining the best practices of doing business in today's sociopolitical climate from a legal and ethical perspective.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ACCT 6130 - Managerial Accounting for Organizational Performance**

(3 sem. cr.)
One of the primary functions of the accountant's role is preparing internal accounting information that can be used by management for effective decision making and organizational performance. Students can gain a practical perspective into this role through case study review and analysis of pricing and contribution margin analysis, cost management and allocation, activity-based costing and throughput accounting, and inventory management. Students assess performance measurements, including key performance indicators, balanced scorecard, and forecasting. They explore operating and capital budgeting and financial planning techniques and become familiar with quantitative models and approaches used in management accounting. Through this course, students learn about the different departments and operating divisions within an organization and how they work individually and collaboratively to handle accounting responsibilities.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ACCT 6140 - Current Trends in Accounting Standards**

(3 sem. cr.)
Students in this course enhance and utilize advanced accounting research skills in order
to investigate and review the current and emerging accounting issues and changes in promulgated accounting standards that could impact 21st-century business. Students examine a variety of up-to-date and relevant topical areas that are discussed in sources such as the Financial Accounting Standards Board, International Accounting Standards Board, and Securities and Exchange Commission. As a result of their studies in this course, students will be able to anticipate changes in accounting standards and analyze potential impacts for making informed decisions and recommendations to management.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6600 - Managing Operational and Financial Business Risks♦

(3 sem. cr.)
Accountants and business managers must be astute and proactive in managing a business to combat the inevitable threat of operational and financial risks, including those involving credit, market, liquidity, reputation, technology, and legality. In this course, students assess the tools used by accountants and managers in managing these risks. They explore the various processes used to identify, analyze, and assess risks, and they learn the appropriate use of financial and operational controls to mitigate such risks. Additionally, students examine ways to implement techniques, such as developing a risk control matrix and using the concepts of the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework to improve an organization’s enterprise risk management.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6610 - Managing Regulatory Compliance♦

(3 sem. cr.)
Regulatory compliance involves the policies and processes that organizations use to ensure that they follow the rules and regulations in place by the firms that control financial activity in a given jurisdiction. In this course, students explore the facets of regulatory compliance, focusing on the role of accounting with respect to corporate governance within an organizational setting. They also focus on how organizations build transparency into their governance and compliance systems. Students review and explore the responsibilities of management in terms of compliance and auditing and explore the complex processes of checks and balances that comprise compliance systems. Students further develop their understanding of regulatory compliance through a review of the Foreign Corrupt Practices Act and the Sarbanes-Oxley Act, in addition to an evaluation of decisions made by the Securities and Exchange Commission and the Public Corporation Accounting Oversight Board.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
ACCT 6620 - Accounting Theory and Application♦

(3 sem. cr.)
In this quantitative course, students examine the process by which accounting policies are formulated and modified. Students use current research and case analyses to make critical evaluations of fundamental accounting concepts and foundations, such as revenue recognition, lease accounting, and other current issues, in light of their theoretical, empirical, practical, and political aspects. Students demonstrate their ability to use promulgated accounting literature to improve their general decision-making and communication skills in the area of accounting as they engage in functional exercises and weekly discussions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ACCT 6630 - Tax Analysis and Decision Making♦

(3 sem. cr.)
Students in this course are provided with an overview of current topics in taxation strategies for individuals and corporations. They learn about the Internal Revenue Service Code on tax differences, including book and tax accounting, inclusions, exclusions, deductions, credits, and tax aspects of property transactions. Students employ a "walk-through" technique through which they gain first-hand experience in the use of tax research services. Students also explore how economic, social, and cultural forces influence tax policy.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ACCT 6640 - Solving CPA Problems♦

(3 sem. cr.)
In this course, students review content pulled directly from prior certified public accountant (CPA) exams on a variety of topics, including current accounting trends, managerial accounting, and regulatory issues. Students conduct research, discuss with peers, and analyze the answers to actual CPA exam items to gain a thorough understanding of the format, concepts, and principles on which exam questions are based, gaining confidence and preparedness for taking the CPA exam.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

ACCT 6650 - Forensic and Advanced Auditing Topics♦

(3 sem. cr.)
In this course, students are provided with tools, techniques, and insight to evaluate the
potential for fraud within current operating and financial reporting systems. Students examine creative accounting techniques and red flags of fraud, such as the development of false financial statements; misuse of corporate resources; false revenue recognition; and fraud perpetrated for the benefit of third parties, shareholders, and managers. They explore special topics, such as the override of existing internal controls and absence of proper accounting documentation. Students also examine fraud audit standards, principles of legal evidence, and concepts of the Daubert Rule. Additionally, students examine strategies for identifying sources of securing evidence to prevent loss, corruption, and contamination.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6660 - International Perspectives in Accounting♦

(3 sem. cr.)
Students in this course examine current topics in international standards for accounting, including financial statement presentation, auditing, and accounting for importers, exporters, and multinational corporations to gain a comprehensive understanding of the various perspectives involved in international accounting. Students examine foreign exchange rates and markets, controlled economy accounting, social responsibility reporting, inflation accounting, and international taxation and its impact on an organization's international financial statements. Additionally, students analyze issues in accounting for multinationals, including areas of accounting and financial reporting standards. They also conduct an evaluation of international accounting harmonization efforts, including those involving accounting standards, to acquire an appreciation of the importance of comparability in regard to international financial statements.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6665 - Initiating and Managing Change♦

(3 sem. cr.)
Students in this course explore effective strategies to initiate change in order to achieve organizational goals, as well as how to manage unplanned or unwelcome change. Students explore a variety of approaches and methods to transition individuals and organizations within a changing environment. Students distinguish between reactive responses and proactive responses to change, including examining the implications of culture, inertia, and uncertainty. Additionally, students explore the importance of understanding motivation and effective communication in mitigating negative reactions to change and facilitating the change process itself.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
**ACCT 6670 - Not-for-Profit and Government Accounting**

*(3 sem. cr.)*

Students explore accounting and financial reporting principles for nonprofit and governmental organizations in this course. They examine issues regarding fund accounting principles, budgetary accounting, and financial reporting practices. Through a variety of assignments on the specifics of the nonprofit and government accounting arena, students develop and hone diagnostic skills and their analytical problem-solving ability. Students learn about the concepts, procedures, and mechanics of financial and managerial accounting and the role of accounting information in nonprofit organizations.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**ACCT 6675 - Critical Thinking for Effective Management**

*(3 sem. cr.)*

This course is designed to improve the learner’s overall critical-thinking and reasoning skills within a managerial context. Using relevant management articles, case studies, and current topics analyses, learners will hone their diagnostic reading skills and will learn to construct effective, ethical, evidence-based arguments, which are fundamental capabilities of effective managers.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**ACCT 6685 - Creating Sustainable Solutions Through Systems Thinking**

*(3 sem. cr.)*

Students in this course explore systems thinking as a process whereby problems are viewed as individual components within a larger system. Students encounter a framework for analyzing relationships within a system and for avoiding the risks associated with viewing problems in isolation. Students use systems thinking tools to model single-, double-, and multiple-loop feedback systems, both at the micro and macro levels of analysis. In addition, students are introduced to scenario building, and they examine how the practice of systems thinking lays the foundation for creating sustainable outcomes for organizations and society.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**ACCT 6691 - Practices in Project Management**

*(3 sem. cr.)*

Students in this course are introduced to the knowledge, skills, tools, and techniques needed to successfully manage projects throughout the life of a project, known as the
project life cycle. By learning about the project management Knowledge Areas and Process Groups as well as the distinguishing characteristics of each, students gain an appreciation for how these two dimensions of project management interact in initiating, planning, executing, monitoring and controlling, and closing a project.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 6781 - Information Security Governance

(3 sem. cr.)
Students in this course cover information security issues in an organizational context, recognizing the increasing stakes in keeping systems safe from tampering and disclosure. Topics include management structures and processes for enterprise information security; information security in the supply chain; legal, regulatory, audit, and policy issues; risk management; and the business case for information security.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

ACCT 9999 - Accounting Prerequisite Test

(0 cr.)
Students in this quantitative course examine the process by which accounting policies are formulated and modified. Students use current research and case analyses to make critical evaluations of fundamental accounting concepts and foundations, such as revenue recognition, lease accounting, and other current issues, in light of their theoretical, empirical, practical, and political aspects. Students demonstrate their ability to use promulgated accounting literature to improve their general decision-making and communication skills in the area of accounting as they engage in functional exercises and weekly discussions.

Prerequisites
Graduate Certificate in Auditing
- ACCT 6600
- ACCT 6210
- WMBA 6120
Graduate Certificate in Managerial Accounting
- ACCT 6000
- ACCT 6210
- FNCE 6120
All other courses
- MRKT 6100 OR MRKT 6110
- MRKT 6120
- MRKT 6130
Note: This course is not open to students. All open courses are listed in the catalog.

**AHUM 9001A - Dissertation**

(1 cr.)
Through this course, doctoral students have the opportunity to integrate their program of study into an in-depth exploration of an interest area that includes the completion of a research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation. Students are registered each term until successful completion of the dissertation.

Students take this course for a minimum of 20 credits and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**AHUM 9001B - Dissertation**

(2 cr.)
Through this course, doctoral students have the opportunity to integrate their program of study into an in-depth exploration of an interest area that includes the completion of a research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation. Students are registered each term until successful completion of the dissertation.

Students take this course for a minimum of 20 credits and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

**AMDS 8301 - Advanced Individual Studies: Academic Publishing Option**

(4 cr.)
This advanced individual study course is designed for students who wish to integrate
learning from the core curriculum in preparation for advanced KAM and dissertation research. In this course, students gain hands-on practice using research tools, writing a literature review, evaluating peer research, and providing feedback as a reviewer. They also explore the process involved in preparing a proposal for publication and academic publication in general. Students review *The International Journal of Applied Management and Technology* (IJAMT), an online refereed journal, to examine current issues and collaborate with peers in the area of business and technology management.

**AMDS 8521 - Current Research in Deterministic Methods**

(4 cr.)

There are no specific course descriptions for this course for doctoral students due to the flexibility inherent in the Knowledge Area Module (KAM) learning model, which allows students to develop expertise in their area of interest through an individualized program. The number of KAMs required varies by program, but each KAM culminates in a scholarly paper comprising three segments: Breadth, Depth, and Application. Through the KAM process, students will apply what they have learned to meet a need in their profession.

**AMDS 8899 - Capstone Seminar**

(6 cr.)

Students in this course integrate all of their previous work on knowledge and learning management, resulting in a comprehensive dissertation proposal. Students assess various research methods and data-gathering techniques; determine best practices; explore the various Walden resources, and review APA style and Walden evaluation format. They consider their professional goals in the context of their education and develop plans for continued learning and career development in the context of their personal objectives and priorities. Students also identify future areas for research and development in their specialization. Throughout this seminar course, students engage in discussions to share progress, new perspectives, and peer feedback.

**Prerequisites**

- Foundation, core, and specialization courses, and at least one KAM; or permission of the program director

**AMDS 9000 - Dissertation**

(20 cr.)

Through this course, doctoral students have the opportunity to integrate their program of study into an in-depth exploration of an interest area that includes the completion of a research study. Students complete the dissertation independently, with the guidance of a dissertation supervisory committee chair and committee members. Students complete a prospectus, proposal, Institutional Review Board application, and dissertation. Once
students register for AMDS 9000, they will be registered each term until successful completion of the dissertation.

**Prerequisites**
- Foundation course, core KAMs, RSCH 8100Z, and RSCH 8200Z

**ANTH 3001 - Indigenous Peoples in the Modern World**

*(5 cr.)*

In this course, students work toward developing a modern and inclusive understanding of indigenous peoples of the world. They explore indigenous identity; historical continuity with pre-colonial and/or pre-settler societies; indigenous identity in relation to natural resources; and indigenous languages, cultures, and beliefs. Students complete a series of weekly field note assignments in which they address topics or themes related to the exploration of their own indigenous identity. Through this course, students gain the knowledge needed to explain processes of indigenization, adaptation, and communication as phenomena of globalization.

⚠️ **Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.**

**ANTH 3001C - Indigenous Peoples in the Modern World**

*(5 cr.)*

In this course, students work toward developing a modern and inclusive understanding of indigenous peoples of the world. They explore indigenous identity; historical continuity with pre-colonial and/or pre-settler societies; indigenous identity in relation to natural resources; and indigenous languages, cultures, and beliefs. Students complete a series of weekly field note assignments in which they address topics or themes related to the exploration of their own indigenous identity. Through this course, students gain the knowledge needed to explain processes of indigenization, adaptation, and communication as phenomena of globalization.

⚠️ **Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.**

**APLB 651L - Pre-Practicum 1**

*(0 cr.)*

By participating in a Walden Pre-Practicum, students gain skills in their development as scholar-practitioners. Through their Pre-Practicum experiences, students expand their network of peers and faculty members while developing their professional skills and identity. In Pre-Practicum 1, students begin to apply the core skills and techniques introduced in their Techniques course. Students begin to develop the multicultural competencies needed for counseling. Per program requirements, there is a synchronous
experience in this course. Students continue to expand their knowledge of counselor credentialing.

**APLB 652L - Pre-Practicum 2**

(0 cr.)
In Pre-Practicum 2, students continue to develop core skills from Pre-Practicum 1 and integrate advanced skills in their development as scholar-practitioners. Through their Pre-Practicum experiences, students expand their network of peers and faculty members while continuing to develop their professional skills and identity. In Pre-Practicum 2, students begin to develop group leadership skills, integrate counseling theory, and continue to demonstrate cultural competency skills. Students engage in developing their upcoming field experience plan and continue credentialing skills activities.

**Prerequisites**
Addiction Counseling; Marriage, Family, and Couple Counseling; and Clinical Mental Health Counseling Programs
- GRPL 6100
- COUN 6250
School Counseling Programs
- GRPL 6100
- COUN 6350

**ARTS 2001 - Fundamentals of Photographic Arts**

(5 cr.)
Students in this course are introduced to the fundamentals of photography and visual fine arts using photography as the medium of expression. Students will be required to have simple film or digital cameras to produce their photographs. Topics include history and principles of design such as emotion, line, plane, space, color, light, value, texture, proportion, and scale. Upon completion, the students will be able to communicate ideas and experiences through photography, edit a portfolio of photographs in color and monochrome, and participate in an online exhibition of images.

**Prerequisites**
- ENGL 1001 or ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**ARTS 2001C - Fundamentals of Photographic Arts**

(5 cr.)
Students in this course are introduced to the fundamentals of photography and visual
fine arts using photography as the medium of expression. Students will be required to have simple film or digital cameras to produce their photographs. Topics include history and principles of design such as emotion, line, plane, space, color, light, value, texture, proportion, and scale. Upon completion, the students will be able to communicate ideas and experiences through photography, edit a portfolio of photographs in color and monochrome, and participate in an online exhibition of images.

Prerequisites
• ENGL 1001 or ENGL 1010

BIOL 1001 - Introduction to Biology

(5 cr.)
The basis of study in a variety of fields requires the capacity to view the world from multiple perspectives as well as the ability to ask investigative questions on the intricacies of life. Students in this course work toward gaining such skills as they survey fundamental biological principles. They engage in discussions and application-based assignments that emphasize basic biology, cell biology, metabolism, genetics, taxonomy, evolution, ecology, and diversity. Students are also introduced to the scientific method. Upon completion, students are able to demonstrate increased knowledge and a better understanding of biology as it applies to everyday life.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BIOL 1001A - Introduction to Biology

(5 cr.)
The basis of study in a variety of fields requires the capacity to view the world from multiple perspectives, as well as the ability to ask investigative questions on the intricacies of life. Students in this course work toward gaining such skills as they survey fundamental biological principles. They engage in discussions and application-based assignments that emphasize basic biology, cell biology, metabolism, genetics, taxonomy, evolution, ecology, and diversity. Students are also introduced to the scientific method. Upon completion, students are able to demonstrate increased knowledge and a better understanding of biology as it applies to everyday life.

Prerequisites
• PSYC 1001A

BIOL 1099 - The Science of Climate

(1 cr.)
All of life on Earth needs energy to survive and thrive. Although plant life is able to derive energy directly from the sun and produces oxygen in the process, most animal
life, including human life, must gather energy in other ways. Ultimately, the nutritional needs of almost every creature on the planet are satisfied by consuming plants and their fruits. However, in the modern world, humans want energy for more than survival. We want energy to drive our automobiles, power our factories, our homes, and our society. In our quest for energy, we have consumed enormous amounts of energy embodied in the fossil remains of previous life-forms. Unfortunately, in this process we have altered the natural carbon cycle, changed the chemical composition of our atmosphere, and affected our global climate. In this course, students examine the natural carbon cycle with its basis in cellular respiration and photosynthesis. They also explore human impact on the carbon cycle and how our use of fossilized energy relates to global warming and climate change.

Note: Students who have previously taken BIOL 1001 - Introduction to Biology will not receive credit for this course.

BIOL 2320 - Nutritional Science♦

(5 cr.)
An understanding of the fundamental principles of nutrition can help people make important decisions regarding a healthy diet to keep the body functioning as it should. This course introduces students to the fundamentals of the nutritional sciences with an emphasis on the biochemistry of human systems. Through discussions, lab work, and other practical assignments, students explore the body's digestive and metabolic processes, the components of a healthy diet, the role of nutrition in growth and health through the life cycle, and the relationships between nutrition, health, culture, and the environment. Through this course, students gain knowledge needed to apply scientific principles when interpreting nutritional information.

Prerequisites
- ENGL 1001 or ENGL 1010

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BIOL 2320C - Nutritional Science♦

(5 cr.)
An understanding of the fundamental principles of nutrition can help people make important decisions regarding a healthy diet to keep the body functioning as it should. This course introduces students to the fundamentals of the nutritional sciences with an emphasis on the biochemistry of human systems. Through discussions, lab work, and other practical assignments, students explore the body's digestive and metabolic processes, the components of a healthy diet, the role of nutrition in growth and health through the life cycle, and the relationships between nutrition, health, culture, and the environment. Through this course, students gain knowledge needed to apply scientific
principles when interpreting nutritional information.

Prerequisites

- ENGL 1001 or ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BIOL 3020 - Essentials of Human Anatomy and Physiology**

(5 cr.)

This course is a study of human anatomy and physiology, which is the structure and function of bodily systems. Students in the course extend from an analysis of cellular processes and tissue structures to the 11 major systems of the human body. Students focus specifically on the regulatory functions of the body that maintain homeostasis and how disruptions in homeostasis may result in injury and/or disease. This course is designed for a general education undergraduate audience.

Prerequisites

- ENGL 1001 or ENGL 1010

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 1002 - Introduction to Management**

(5 cr.)

The roles, functions, and styles of managers, specifically principles and procedures for planning, organizing, leading, and controlling organizations, are addressed in this introductory course. Emphasized is the practical application of theory to reality. Students focus on the techniques, tools, and methods of managerial decision making and employee motivation, as well as consider the effects of ethical leadership and management practices on an organization. This course is structured so that students have the opportunity to see the interrelationships among the functions, components, and disciplines that comprise the field of management and thereby gain a comprehensive perspective as a foundation for the further study of management.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 2001 - Business Law**

(5 cr.)

Responsible business leaders and decision makers must conduct transactions and operations according to clearly defined rules, laws, and processes to ensure stability and protection for their company. Students in this course examine the legal issues faced by
managers, fundamental legal principles, and common issues in the field, such as workplace law, contract disputes, and intellectual property guidelines. Students engage in discussions and application assignments focused on the responsibilities of business professionals, such as understanding the fundamental legal principles in business and commerce; analyzing business contracts; adhering to legal issues in interviewing, hiring, and firing; developing, using, and defending intellectual property; and understanding the regulatory context.

Prerequisites

BS in Accounting
- BUSI 1001 or BUSI 1002

BS in Business Administration
- BUSI 1001 or BUSI 1002

BS in Communication
- BUSI 1001 or BUSI 1002

All Other Programs
- BUSI 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSI 2003 - Operations♦

(5 cr.)
An overview of the concepts, methodologies, and applications of business operations management is provided to students in this course. Students can learn about operations as related to the process of transforming resources into products and services. They explore the responsibility of operations managers to make sound, cost-effective decisions that increase the productivity and competitiveness of manufacturing and service organizations. Students also have the opportunity to learn the process of planning, implementing, and monitoring operations to ensure the continuous improvement of goods and services.

Prerequisites
- BUSI 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSI 3001 - Knowledge Management and Organizational Change♦

(5 cr.)
Students learn how information systems enable organizations to identify, acquire, store, analyze, distribute, and reuse information and knowledge systematically from all sources
(e.g., internal and external, explicit and tacit) to enhance organizational productivity and competitiveness. In this course, students extend the theory of Knowledge Management and Intellectual Capital to the development of learning organizations and evaluate the definition of learning organizations and the creation of environments that facilitate knowledge growth and distribution.

**Prerequisites**
- BUSI 1001 or BUSI 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3002 - Ethical Leadership**
(5 cr.)
In this course, students prepare for a leadership role in the modern organization. They examine the basic principles of leadership, motivational theory, the importance of communication, and current and future trends. Students assess, discuss, and learn how to apply their own styles of leadership in the workplace and the community. They engage in a range of assignments that emphasize ethical leadership through personal and interpersonal effectiveness and organizational development. Students also learn the importance of followership and the similarities between the roles of follower and leader at all levels of the organization.

**Prerequisites**
- BUSI 1001 or BUSI 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 3003 - Dynamics of Change**
(5 cr.)
All businesses experience change. Sometimes change is required to ensure stability; other times, the purpose of change is expansion for competitive advantage. In this course, students explore the responsibilities of managers and leaders to implement effective organizational change as well as to ensure that employees understand the function and benefits of change. Students examine change as it impacts people, processes, and products. They learn to employ tools for dealing with and managing change. They also examine methods for coping with change as an individual, a member of a group, and a member of an organization.

**Prerequisites**
- BUSI 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a
BUSB 3004 - Entrepreneurship for Small Business♦

(5 cr.)

Students examine the processes required to undertake the creation and maintenance of a successful business enterprise, with an emphasis on small business, in this course. Students focus initially on startup basics for a new small business, followed by the details involved in the development of a business plan. Finally, the nuts and bolts of day-to-day business management are examined, with issues ranging from legal matters to employment decisions.

Prerequisites
• BUSI 1001 or BUSI 1002 or SOCI 4080

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSB 3005 - Critical Thinking♦

(5 cr.)

Problem solving and decision making based on recognizing problems, gathering data, developing alternatives, and choosing solutions are critical skills for the professional manager. In this course, students apply these skills to a variety of business examples. Students become familiar with critical-thinking and decision-making methodologies. They gain practical experience identifying logical fallacies, analyzing research methodologies, and choosing appropriate problem-solving techniques. Students also reflect on content presented in the course to consider ways to become more effective critical and logical thinkers.

Prerequisites
• BUSI 1001, BUSI 1002, or COMM 1004

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSB 3006 - Advanced Business Law♦

(5 cr.)

In this course, students build on concepts and skills learned in BUSI 2001 to gain a more comprehensive understanding of the laws, regulations, and principles that affect business operations. Students devote special attention to business law topics included on the Uniform CPA Exam. They analyze law of agency, debtor-creditor relationships, bankruptcy, government regulation of business, real and personal property, commercial paper, and secured transactions. Through this course, students work toward gaining the
ability to identify legal issues, determine if legal action is required, and to competently discuss the issues with other professionals.

Prerequisites
• BUSI 2001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSI 3007 - Knowledge Management♦

(5 cr.)
Information systems enable organizations to systematically identify, acquire, store, analyze, distribute, and reuse information and knowledge from all sources (e.g., internal and external, explicit and tacit) to enhance organizational productivity and competitiveness. Students in this course examine these processes and apply the theories of knowledge management (KM) and intellectual capital to the development of learning organizations. Students also evaluate the definition of learning organizations and the creation of environments that facilitate knowledge growth and distribution. Using course concepts and theories, students reflect on KM and explain how they plan to employ it in personal and professional endeavors.

Prerequisites
• BUSI 1001 or BUSI 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSI 3008 - Corporate Entrepreneurship♦

(5 cr.)
Students in this course examine how corporations succeed and grow by embracing a culture of innovation and entrepreneurship within the organization. Students learn current models for corporate entrepreneurship and innovation that align with the strategic objectives of the enterprise. Students also examine the design of repeatable and sustainable processes that leverage existing business practices and support entrepreneurial initiatives.

Prerequisites
• BUSI 1002

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

BUSI 3010 - Operations Management♦
(5 cr.)
An overview of the concepts, methodologies, and applications of business operations management is provided to students in this course. Students focus on operations, the supply chain, and the process of transforming resources into products and services. They explore the responsibility of operations managers to make cost-effective and cross-functional decisions that increase the productivity and competitiveness of manufacturing and service organizations. Students examine product flow processes and product-process strategies to increase efficiency and effectiveness within organizations. Students also have the opportunity to learn the process of planning, implementing, and monitoring operations to ensure the continuous improvement and quality standards of goods and services.

Prerequisites
BS in Business Administration
- BUSI 1001 or BUSI 1002
BS in Computer Information Systems
- BUSI 1001 or BUSI 1002
All Other Programs
- BUSI 1002

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**BUSI 4001 - Strategic Business Capstone Project**

(5 cr.)
In this capstone course, students use knowledge gained throughout the entire program to demonstrate mastery of various course competencies. The major course project in which students engage is a simulation-based, strategic case study. Students apply and integrate a variety of skills, tools, and knowledge to assess the strategic issues in a real-world case analysis and arrive at recommendations for change and/or improvement. Through this course, students demonstrate their understanding and competency in identifying complex problems and solutions.

Prerequisites
- All required core and upper-division business administration courses

**BUSI 4002 - Small Business Ventures**

(5 cr.)
The focus of this course is on evaluating business concepts and business plans for small businesses so that students can develop strategies for successfully launching and operating a small business. Students examine the small business life cycle and explore resources available to small business owners. Real-world case studies expose students
to the challenges of running a small business venture. Topics covered include startup
business ideas, financing the small business, legal and liability issues, employment
decisions, ethical and moral considerations, and expansion opportunities for small
businesses.
Prerequisites
  •  BUSI 1002

* Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

BUSI 4003 - Marketing Strategies for Small Business♦

(5 cr.)
In this course, students address the unique aspects of marketing a small business.
Students examine market definition, product development, and diversification strategies
designed to help small business owners expand their business reach. Students learn
effective ways small businesses can leverage technology such as e-commerce, social
media, and other online marketing methods.
Prerequisites
  •  BUSI 4002

* Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

BUSI 4004 - Customer Relationship Management for Small Business♦

(5 cr.)
In this course, students learn about the impact of operating decisions on customer
relationships as they relate to building, maintaining, and growing a loyal customer base.
Students assess approaches to customer relationship marketing and management for
competitive advantage. They also evaluate strategies for excellence in customer service
within a culture driven to meet and exceed customer expectations.
Prerequisites
  •  BUSI 4002

* Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

BUSI 4900 - Capstone: Strategic Business Management

(5 cr.)
In this capstone experience, students apply knowledge gained throughout the entire
program to demonstrate mastery of various core business competencies. Students apply
and integrate a variety of skills, technologies, tools, and knowledge to assess strategic
issues in a real-world context to develop recommendations for organizational change and/or improvement. Through this capstone, students also demonstrate their understanding and competency in identifying complex problems and solutions. * Students in the course-based modality will engage in a third-party, online, simulation-based strategic management activity, and students in the competency-based modality will complete a comprehensive business proposal focused on employing strategies to build sustainable competitive advantage.

Prerequisites
- All required core and concentration courses/competencies

**BWLB 4900 - Social Work Skills Lab**

(1 cr.)
The Social Work Skills Lab is a 1-credit, 6-week hybrid class that includes 3 weeks of online content, followed by a 4-day synchronous residential component, and then closes with 2 weeks of online content. Students in the Social Work Skills Lab I reinforce the content covered in the Social Work courses with an emphasis on skills development and advanced topics in diversity and inclusion, evidence-based practice, ethics, and development of the professional self. Material covered includes practice labs focused on individual engagement and assessment, group development and leadership, and an understanding of how to advocate within organizations and communities. A key component of the skills lab is to prepare and assess students for their readiness to enter the field.

Prerequisites
- SOCW 2001
- SOCW 2002
- SOCW 3001
- SOCW 3002
- SOCW 3003
- SOCW 3004
- SOCW 4001
- SOCW 4002
- SOCW 4003
- SOCW 4004
- SOCW 4005

*Note:* This course contains a required 4-day face-to-face experience and will bill with an additional lab fee.

**CAEX 3100 - Skills for Academic Integrity**
In this 4-week course, students study Walden’s policy on academic integrity and apply strategies to ensure academic integrity in their work. The course is designed to help graduate students recognize and avoid violations of academic integrity. In a supportive environment, students practice the techniques needed to ensure academic integrity, including paraphrasing, quoting, avoiding misuse of previously written material, managing time, and using plagiarism-detection software to screen for originality.

Note: This course is for quarter-based graduate (including master's-level and doctoral level) students. (This course was previously listed as WCSS 3100.)

CAEX 3100U - Skills for Academic Integrity for Undergraduates

(1.5 cr.)
In this 4-week course, students study Walden's policy on academic integrity and apply strategies to ensure academic integrity in their work. The course is designed to help undergraduate students recognize and avoid violations of academic integrity. In a supportive environment, students practice the techniques needed to ensure academic integrity, including paraphrasing, quoting, avoiding misuse of previously written material, managing time, and using plagiarism-detection software to screen for originality.

CAEX 3101 - Skills for Academic Integrity

(1 sem. cr.)
In this 4-week course, students study Walden's policy on academic integrity and apply strategies to ensure academic integrity in their work. The course is designed to help graduate students recognize and avoid violations of academic integrity. In a supportive environment, students practice the techniques needed to ensure academic integrity, including paraphrasing, quoting, avoiding misuse of previously written material, managing time, and using plagiarism-detection software to screen for originality.

Note: This course is for semester-based graduate (including master's-level and doctoral level) students. (This course was previously listed as WCSS 3101.)

CAEX 3500 - Internship

(0 cr.)
As part of students' approved internship placement, this course is an opportunity for students to apply classroom learning to real-world conditions. Activities include journal entries, evaluations, and reflection on topics such as ethics, communication, collaboration, transferable skills, and social change. Upon completion, students will gain exposure to a professional setting related to their program of study and explore the practical application of skills in the global workplace.

Note: This course is for undergraduate students only.

CAEX 4000 - Transitioning From Undergraduate to Graduate Writing
In this 6-week course, students transitioning from undergraduate to graduate writing can learn how to identify scholarly writing, critically read and evaluate sources, and practice scholarly voice. Students demonstrate their scholarly writing skills by completing a one- to two-page paper in which they compare and contrast two peer-reviewed articles. Students also receive instruction in basic APA paraphrasing and citation.

Prerequisites

- Undergraduate students must have completed a minimum of 40 degree credits to be eligible to register.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CAEX 6001 - Transitioning to Graduate Writing for Public Health

In this 6-week course, public health students transitioning to graduate writing can learn how to identify scholarly writing, critically read and evaluate sources, and practice scholarly voice. Public health students demonstrate their scholarly writing skills by completing a one- to two-page paper in which they compare and contrast two peer-reviewed articles. Students also receive instruction in basic APA paraphrasing and citation.

Note: This course is available only to Master of Public Health (MPH) students. Credits do not count toward the MPH degree.

CAEX 6055 - Graduate Writing I: Basic Composition Skills

In this 6-week course, graduate students take the first step in developing their reading and writing skills for scholarly work. Students read a research article and summarize its parts, thus becoming more familiar with the language, structure, and style of the academic conversation. In addition to summary writing, topics include APA citation, scholarly voice, and revision. Students also maintain a journal of writing feedback they've received and apply that feedback to papers for their discipline-specific courses. After completion, students move on to CAEX 6065/6066 - Graduate Writing II: Intermediate Composition Skills.

CAEX 6056 - Graduate Writing I: Basic Composition Skills (0 sem. cr.)

In this 6-week course, graduate students take the first step in developing their reading and writing skills for scholarly work. Students read a research article and summarize its parts, thus becoming more familiar with the language, structure, and style of the
academic conversation. In addition to summary writing, topics include APA citation, scholarly voice, and revision. Students also maintain a journal of writing feedback they've received and apply that feedback to papers for their discipline-specific courses. After completion, students move on to CAEX 6065/6066 - Graduate Writing II: Intermediate Composition Skills.

CAEX 6065 - Graduate Writing II: Intermediate Composition Skills

(0 cr.)
This 6-week course primes graduate students not only to understand a scholarly text but to critically read and form an argument based on it. Topics covered include paraphrasing, APA citation, analysis, academic paragraphs, and revising and editing. Students participate in a robust writing community where they practice writing in discussion forums, keep a feedback journal, and apply their learning to papers for their discipline-specific courses. Through these activities, students should begin to see their place in the scholarly conversation. This course is complementary to CAEX 6055/6056 - Graduate Writing I: Basic Composition Skills, and enhances the skills covered in CAEX 6050. Students in this course are expected to have a familiarity with the skills covered in CAEX 6055/6056 - Graduate Writing I: Basic Composition Skills.

CAEX 6066 - Graduate Writing II: Intermediate Composition Skills

(0 sem. cr.)
This 6-week course primes graduate students not only to understand a scholarly text but to critically read and form an argument based on it. Topics covered include paraphrasing, APA citation, analysis, academic paragraphs, and revising and editing. Students participate in a robust writing community where they practice writing in discussion forums, keep a feedback journal, and apply their learning to papers for their discipline-specific courses. Through these activities, students should begin to see their place in the scholarly conversation. This course is complementary to CAEX 6055/6056 - Graduate Writing I: Basic Composition Skills, and enhances the skills covered in CAEX 6050. Students in this course are expected to have a familiarity with the skills covered in CAEX 6055/6056 - Graduate Writing I: Basic Composition Skills.

CAEX 6070 - Graduate Writing III: Advanced Composition Skills

(1.5 cr.)
In this 8-week course, students build on already developed paragraph, paraphrasing, and analysis skills. Students explore how to synthesize sources on a topic and organize their ideas into a literature review. They also receive instruction in advanced scholarly voice and APA Style nuances. By the end of this course, students should be more comfortable entering the scholarly conversation in their respective fields.

Note: This course is for quarter-based graduate students.
CAEX 6071 - Graduate Writing III: Advanced Composition Skills

(1 sem. cr.)
In this 8-week course, students build on already developed paragraph, paraphrasing, and analysis skills. Students explore how to synthesize sources on a topic and organize their ideas into a literature review. They also receive instruction in advanced scholarly voice and APA Style nuances. By the end of this course, students should be more comfortable entering the scholarly conversation in their respective fields.

Note: This course is for semester-based graduate students.

CAEX 6100 - Critical Thinking for Social Change

(1.5 cr.)
In this 6-week course, students become writer-advocates of a social change issue of their choosing. They use critical thinking to analyze the issue, acknowledge complexities, and research a potential solution. Students also learn techniques for argumentative writing in support of their proposed change. These techniques include gathering evidence, examining the validity of that evidence, and constructing a thesis statement. By the end of the course, students will have gained confidence in their voice and their place in the conversation surrounding the social change issue. This course could be helpful to master’s or doctoral students who are about to begin their capstone and would like a jumpstart on topic selection and initial writing.

Note: This course is for quarter-based graduate-level students.

CAEX 6101 - Critical Thinking for Social Change

(1 sem. cr.)
In this 6-week course, students become writer-advocates of a social change issue of their choosing. They use critical thinking to analyze the issue, acknowledge complexities, and research a potential solution. Students also learn techniques for argumentative writing in support of their proposed change. These techniques include gathering evidence, examining the validity of that evidence, and constructing a thesis statement. By the end of the course, students will have gained confidence in their voice and their place in the conversation surrounding the social change issue. This course could be helpful to master’s or doctoral students who are about to begin their capstone and would like a jumpstart on topic selection and initial writing.

Note: This course is for semester-based graduate-level students.

CAEX 6200 - Basic APA Style: Citations and References

(1.5 cr.)
In this 4-week course, students are introduced to the American Psychological Association (APA) style of citing and referencing sources. The course is designed to help prepare master’s and doctoral students for successful scholarly writing experiences in
Walden coursework and beyond. Students can learn the core concepts of in-text
citations, references, and paper formatting and practice applying those concepts through
discussions and a variety of assessments. They will finish with a personal plan for
continued development of APA skills.

Note: Because the focus is on foundational APA Style, more advanced or nuanced topics
like voice, numbers, statistical form, and tables and figures are not addressed in this
course. This course is for quarter-based graduate (including master's level and doctoral
level) students. (This course was previously listed as WCSS 6200.)

CAEX 6201 - Basic APA Style: Citations and References

(1 sem. cr.)
In this 4-week course, students are introduced to the American Psychological
Association (APA) style of citing and referencing sources. The course is designed to help
prepare master's and doctoral students for successful scholarly writing experiences in
Walden coursework and beyond. Students can learn the core concepts of in-text
citations, references, and paper formatting and practice applying those concepts through
discussions and a variety of assessments. They will finish with a personal plan for
continued development of APA skills.

Prerequisites
- Because the focus is on foundational APA Style, more advanced or nuanced
topics like voice, numbers, statistical form, and tables and figures are not
addressed in this course. This course is for semester-based graduate (including
master's level and doctoral level) students. (This course was previously listed as
WCSS 6201.)

CAEX 6300 - Reading Techniques for Graduate Study

(1.5 cr.)
Graduate study involves analyzing many research articles, theoretical texts, and other
complex materials. Because of the specialized nature of graduate study, new techniques
for reading are needed. In this 4-week course, students practice an active approach to
reading, gaining skills that will assist in quickly navigating texts and retaining information.
Topics covered include comprehension, interpretation, and evaluation. Through
strategies of critical reading and annotating, students prepare to be better researchers
and writers.

Note: This course is for quarter-based graduate (including master's level and doctoral
level) students.

CAEX 6301 - Reading Techniques for Graduate Study

(1 sem. cr.)
Graduate study involves analyzing many research articles, theoretical texts, and other
complex materials. Because of the specialized nature of graduate study, new techniques for reading are needed. In this 4-week course, students practice an active approach to reading, gaining skills that will assist in quickly navigating texts and retaining information. Topics covered include comprehension, interpretation, and evaluation. Through strategies of critical reading and annotating, students prepare to be better researchers and writers.

Note: This course is for semester-based graduate (including master's level and doctoral level) students.

CAEX 6500 - Internship

(0 cr.)
As part of students’ approved internship placement, this course is an opportunity for students to apply classroom learning to real-world conditions. Activities include journal entries, evaluations, and reflection on topics such as ethics, communication, collaboration, transferable skills, and social change. Upon completion, students will gain exposure to a professional setting related to their program of study and explore the practical application of skills in the global workplace.

Note: This course is for quarter-based graduate (including master's level and doctoral level) students.

CAEX 6501 - Internship

(0 cr.)
As part of students’ approved internship placement, this course is an opportunity for students to apply classroom learning to real-world conditions. Activities include journal entries, evaluations, and reflection on topics such as ethics, communication, collaboration, transferable skills, and social change. Upon completion, students will gain exposure to a professional setting related to their program of study and explore the practical application of skills in the global workplace.

Note: This course is for semester-based graduate (including master's level and doctoral level) students.

CAEX 6600 - Creative Writing for Social Change♦

(1.5 cr)
Creative writing has a rich history of influencing societal norms and upsetting the status quo. In this 6-week course, graduate students learn how creative writing can be used to advance social change. Students analyze examples of social change writing in poetry, creative nonfiction, and fiction and draft a short work of creative writing on their social change passion. Through creative writing, students practice reaching an audience outside their scholarly discipline. They also explore creative writing techniques that can be applied to benefit their scholarly writing. This course is appropriate for both students who have prior experience in creative writing and those who do not.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CAEX 6700 - Strategic Writing for Social Change♦

(1.5 cr)
In this 6-week course, students draw from their academic research writing and learn to apply it for broader audiences. Students explore how to compose a grant proposal, how to recognize and leverage rhetorical strategies in popular publications, and how to tailor content for social media. Students also receive instruction in identifying grant opportunities and publication outlets. By the end of this course, students should be more comfortable writing and publishing for nonacademic audiences.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CAEX 8010 - Doctoral Writing Workshop: Revising and Editing the Proposal
This small-group workshop is for doctoral students who have a working draft of their dissertation, project, or doctoral study proposal but find themselves needing writing guidance and support. With the help of the writing faculty member, workshop participants will spend 6 weeks advancing the proposal draft through tailored one-on-one writing instruction and supportive group work with the students' peers. Students will get to know the required components of the proposal and have the opportunity to learn how to address common writing issues, such as APA Style, citing and referencing sources, clarity and concision, and writer’s block. Importantly, the instruction and feedback that students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the proposal. As needed, the writing faculty member will help create a tailored plan based on students' specific needs to ensure that they can continue to advance their draft.

**Prerequisites**

- Approved premise/prospectus

**CAEX 8015 - Doctoral Writing Workshop: Revising and Editing the Proposal**

(o sem. cr.)

Doctoral students who have begun the development of their dissertation, project, or doctoral study proposal but find themselves needing writing guidance and support should take this small-group workshop. With the assistance of the writing faculty member, students will spend 6 weeks advancing their proposal through tailored one-on-one writing instruction and supportive group work with their peers. They will get to know the required components of the proposal and have an opportunity to learn how to address common writing issues, such as APA, citing and referencing sources, clarity and concision, and writer’s block. Importantly, the instruction and feedback students receive will be anchored in their own work. In addition to a further developed proposal, at the end of the workshop, students will have a tailored plan based on their specific needs to ensure that they can continue to make progress on their draft.

**Prerequisites**

- Approved premise/prospectus

**CAEX 8020 - Doctoral Writing Workshop: Revising and Editing the Introduction**

(o cr.)

This small-group workshop is for doctoral students who have a working draft of their dissertation, project, or doctoral study proposal but find themselves needing writing guidance and support with the proposal’s introduction. With the help of the writing faculty member, workshop participants will spend 6 weeks advancing the draft of the introduction through tailored one-on-one writing instruction.
and supportive group work with the students’ peers. Students will get to know the required components of the introduction and have the opportunity to learn how to describe their study, its purpose, and its intentions, as well as address common writing issues associated with the introduction, such as writing a strong problem statement, articulating the gap in the literature or practice, applying correct usage of APA and source citations, and overcoming writer’s block. Importantly, the instruction and feedback that students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the introduction. As needed, the writing faculty member will help create a tailored plan based on students’ specific needs to ensure that they can continue to advance their draft.

Prerequisites

- Approved premise/prospectus

CAEX 8025 - Doctoral Writing Workshop: Revising and Editing the Introduction

(o sem. cr.)
Doctoral students who are committed to an area of research for their dissertation, project study, or doctoral study but unclear as to how to introduce and articulate its importance to a scholarly audience should take this small-group workshop. With the help of the writing faculty member, workshop participants will spend 6 weeks advancing the draft of the introduction through tailored one-on-one writing instruction and supportive group work with the students’ peers. Students will get to know the required components of the introduction and have the opportunity to learn how to describe their study, its purpose, and its intentions, as well as address common writing issues associated with the introduction, such as writing a strong problem statement, articulating the gap in the literature or practice, applying correct usage of APA and source citations, and overcoming writer’s block. Importantly, the instruction and feedback that students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the introduction. As needed, the writing faculty member will help create a tailored plan based on students’ specific needs to ensure that they can continue to advance their draft.

Prerequisites

- Approved premise/prospectus

CAEX 8030 - Doctoral Writing Workshop: Revising and Editing the Literature Review

(0 cr.)
This small-group workshop is for doctoral students who have a working draft of their dissertation, project, or doctoral study proposal but find themselves needing writing guidance and support with the proposal’s literature review.
With the help of the writing faculty member, workshop participants will spend 6 weeks advancing the draft of the literature review through tailored one-on-one writing instruction and supportive group work with the students' peers. Students will get to know the required components of the literature review and have the opportunity to learn how to address common writing issues, such as effective use of summary and synthesis, applying correct usage of APA and source citations, and articulating search strategies. Importantly, the instruction and feedback that students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the literature review. As needed, the writing faculty member will help create a tailored plan based on students' specific needs to ensure that they can continue to advance their draft.

**Prerequisites**

- Approved premise/prospectus

**CAEX 8035 - Doctoral Writing Workshop: Revising and Editing the Literature Review**

(o sem. cr.)
Is writing the literature review a stumbling block? Is the research relayed without purpose or synthesis? This small-group workshop is for doctoral candidates who have begun the literature review of their dissertation, project study, or doctoral study but need writing guidance and support. With the help of the writing faculty member, students will spend 6 weeks advancing their literature review through tailored one-on-one writing instruction and supportive group work with their peers. Students will get to know the required components of the literature review and have the opportunity to learn how to address common writing issues, such as effective use of summary and synthesis, applying correct use of APA and source citations, and articulating search strategies. Importantly, the instruction and feedback students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the literature review. While this workshop focuses on the writing components of the literature review, optional instructional materials are available to help students learn and practice advanced library skills needed for a successful review of the literature. As needed, the faculty member will help create a tailored plan based on students' specific needs to ensure that they can continue to advance their draft.

**Prerequisites**

- Approved premise/prospectus

**CAEX 8040 - Doctoral Writing Workshop: Revising and Editing the Methods Section**
This small-group workshop is for doctoral students who have a working draft of their dissertation, project, or doctoral study proposal but find themselves needing writing guidance and support with the proposal's methods section.

With the help of the writing faculty member, workshop participants will spend 6 weeks advancing the draft of the methods section through tailored one-on-one writing instruction and supportive group work with the students' peers. Students will get to know the required components of the methods section and have the opportunity to learn how to address common writing issues inherent in this section, including effectively explaining data collection and analysis, formatting APA-compliant tables and figures, and articulating ethical procedures and concerns associated with the study. Importantly, the instruction and feedback that students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the methods section. As needed, the writing faculty member will help create a tailored plan based on students' specific needs to ensure that they can continue to advance their draft.

Prerequisites

- Approved premise/prospectus

CAEX 8045 - Doctoral Writing Workshop: Revising and Editing the Methods Section

Writing about the method or methods of study can be a challenge. It's not easy to articulate variables, validity, or data analysis plans. Students who feel like they need some extra help or support with the writing component of their dissertation, project study, or doctoral study methods section should take this small-group workshop. With the help of the writing faculty member, students will spend 6 weeks advancing the writing of their methods section through tailored one-on-one writing instruction and supportive group work with their peers. Workshop students will get to know the required components of the methods section and have the opportunity to learn how to address common writing issues inherent in this section, including effectively explaining data collection and analysis, formatting APA-compliant tables and figures, and articulating ethical procedures and concerns associated with the study. Importantly, the instruction and feedback students receive will be anchored in their own work. The goal of this workshop is to help students make progress toward the completion of the methods section. If needed, the faculty member will help create a tailored plan based on students' specific needs to ensure that they can continue to advance their draft.

Prerequisites

- Approved premise/prospective
CAEX 8050 - Doctoral Writing Workshop: Revising and Editing the Postproposal Sections

(0 cr.)
This small-group writing workshop is for doctoral students who have begun the postproposal sections (e.g., results, discussion, conclusion, recommendations) of their dissertation, project, or doctoral study. With the assistance of the faculty, students will spend 6 weeks writing and revising the postproposal sections through tailored one-on-one writing instruction and supportive group work with their colleagues. They will get to know the required components of these sections and have an opportunity to learn how to address common writing issues, such as APA, tables and figures, scholarly voice, and writer’s block. Importantly, the instruction and feedback students receive will be anchored in their own work. In addition to further developed postproposal sections, at the end of the workshop, students will have a tailored plan based on their specific needs to ensure that they can continue to make progress on their draft.

Prerequisites
  • Approved proposal

CAEX 8055 - Doctoral Writing Workshop: Revising and Editing the Postproposal Sections

(0 cr.)
This small-group writing workshop is for doctoral students who have begun the postproposal sections (e.g., results, discussion, conclusion, recommendations) of their dissertation, project, or doctoral study. With the assistance of the faculty, students will spend 6 weeks writing and revising the postproposal sections through tailored one-on-one writing instruction and supportive group work with their colleagues. They will get to know the required components of these sections and have an opportunity to learn how to address common writing issues, such as APA, tables and figures, scholarly voice, and writer’s block. Importantly, the instruction and feedback students receive will be anchored in their own work. In addition to further developed postproposal sections, at the end of the workshop, students will have a tailored plan based on their specific needs to ensure that they can continue to make progress on their draft.

Prerequisites
  • Approved proposal

CAEX 8100 - Preproposal Writing Workshop

(0 cr.)
Doctoral students who are transitioning from coursework to preproposal work but find themselves needing additional structure and writing guidance should take this small-group workshop. A "preproposal document" is what each doctoral student must
complete prior to beginning the proposal phase of his or her doctoral capstone—in some programs, this document is called a prospectus; in others, a premise. Receiving assistance from faculty and engaging in supportive discussion with colleagues, students will spend 6 weeks generating content based on their program's specific preproposal and doctoral capstone writing requirements. In addition to becoming knowledgeable about the specific requirements of their program, students will also develop a plan for completion of their preproposal document, practice important research and drafting skills, work toward effective communication with faculty, and learn important self-assessment and revision strategies. Importantly, the instruction students receive will be anchored in their own work, as instructor feedback will focus on clarity, precision, concision, and scholarly voice in the capstone document. At the workshop's conclusion, students will have tailored a set of tools based on their specific needs to ensure they continue to make progress on their preproposal draft.

CAEX 8105 - Writing Workshop: Preproposal

(0 cr.)
Doctoral students who are transitioning from coursework to preproposal work but find themselves needing additional structure and writing guidance should take this small-group workshop. A "preproposal document" is what each doctoral student must complete prior to beginning the proposal phase of his or her doctoral capstone—in some programs, this document is called a prospectus; in others, a premise. Receiving assistance from faculty and engaging in supportive discussion with colleagues, students will spend 6 weeks generating content based on their program's specific preproposal and doctoral capstone writing requirements. In addition to becoming knowledgeable about the specific requirements of their program, students will also develop a plan for completion of their preproposal document, practice important research and drafting skills, work toward effective communication with faculty, and learn important self-assessment and revision strategies. Importantly, the instruction students receive will be anchored in their own work, as instructor feedback will focus on clarity, precision, concision, and scholarly voice in the capstone document. At the workshop's conclusion, students will have tailored a set of tools based on their specific needs to ensure they continue to make progress on their preproposal draft.

CAEX 8350 - Writing a Literature Review

(1.5 cr.)
Doctoral students with strong research, critical-thinking, and writing skills are better equipped to complete the literature review section of their capstone. This 8-week course focuses on understanding the purpose of the literature review and the foundational skills needed to complete it, such as developing search strategies, synthesizing sources, and constructing paragraphs. Students have the opportunity to apply writing, research, and critical-thinking skills in writing components of the literature review. In the second half of the course, students may submit up to five pages of the
literature review per week for instructor feedback. By the end of the course, students will have a clear plan in place for drafting the rest of their literature review.

Prerequisites
• Approved premise/prospective

Note: This course is for quarter-based doctoral students. Students who have already begun writing the literature for their proposal should take the Doctoral Writing Workshop: Revising and Editing the Literature Review (CAEX 8030) course instead.

CAEX 8351 - Writing a Literature Review

(1 sem. cr.)
Doctoral students with strong research, critical-thinking, and writing skills are better equipped to complete the literature review section of their capstone. This 8-week course focuses on understanding the purpose of the literature review and the foundational skills needed to complete it, such as developing search strategies, synthesizing sources, and constructing paragraphs. Students have the opportunity to apply writing, research, and critical-thinking skills in writing components of the literature review. In the second half of the course, students may submit up to five pages of the literature review per week for instructor feedback. By the end of the course, students will have a clear plan in place for drafting the rest of their literature review.

Prerequisites
• Approved premise/prospective

Note: This course is for semester-based doctoral students. Students who have already begun writing the literature for their proposal should take the Doctoral Writing Workshop: Revising and Editing the Literature Review (CAEX 8035) course instead.

CAEX 8900 - Statistics and SPSS Skills Seminar for Doctoral Students

(0 cr.)
The purpose of this small-group seminar is to help doctoral students learn to navigate SPSS software and develop basic statistical skills. The seminar is designed to minimize statistics anxiety and help students feel more comfortable using statistics tools. During the 6-week session, students learn how to upload or create an SPSS dataset, how to manage and manipulate variables, and how to run common statistical tests and graphs. Upon completion, students should have the basic SPSS and statistical knowledge to conduct a quantitative research study. This seminar is appropriate for students who have completed graduate-level statistics courses and are developing their doctoral capstone proposals.

Note: For quarter-based students.

CAEX 8901 - Statistics and SPSS Skills Seminar for Doctoral Students
The purpose of this small-group seminar is to help doctoral students learn to navigate SPSS software and develop basic statistical skills. The seminar is designed to minimize statistics anxiety and help students feel more comfortable using statistics tools. During the 6-week session, students learn how to upload or create an SPSS dataset, how to manage and manipulate variables, and how to run common statistical tests and graphs. Upon completion, students should have the basic SPSS and statistical knowledge to conduct a quantitative research study. This seminar is appropriate for students who have completed graduate-level statistics courses and are developing their doctoral capstone proposals.

Note: For semester-based students.

**CHEM 1001 - Introduction to Chemistry**

(5 cr.)
In this course, students explore the fundamental concepts of chemistry and survey important chemical elements and their compounds. They engage in a range of assignments on such topics as chemical measurements, properties of atoms and molecules, chemical reactions, chemical calculations, and properties of gases. Through these assignments, students gain a practical understanding of chemistry needed to describe the structure and components of basic atoms, use the periodic table to locate important chemical information, describe several types of chemical bonds, and manipulate common chemical formulas and equations.

Prerequisites
- MATH 1001 or MATH 1002 or MATH 1030 or MATH 1040

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CLRA 6100 - Introduction to Clinical Research**

(3 sem. cr.)
Students in this course are provided with an overview of the clinical research enterprise from a historical and evolutionary perspective, including examples of landmark studies and controversies. Students consider the context in which researchers design and implement human clinical studies and explore a variety of topics, including the components, general principles, and issues in clinical research; types and classification of research studies; formulation of research objectives and outcomes; definition and phases of clinical trial protocols; and the roles and responsibilities of the clinical research team and study sponsors. Students become familiar with key medical terminology, including basic concepts of health, wellness, and disease. They work toward developing critical-thinking, written, verbal, and interpersonal communication skills as well as competencies needed for student success in an online environment. Students also begin work on their portfolio through assigned learning activities, including a journal of interactions and
interviews with professionals in the field, an assessment of an organization's culture, and the identification of management challenges in clinical research.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6115 - Pathophysiological Basis of Clinical Research♦

(3 sem. cr.)
Clinical research management or monitoring requires an understanding of the pathology under investigation as well as the corresponding physiological systems related to disease. Through this course, students gain basic knowledge of normal and pathophysiological mechanisms of disease, acquiring a foundation for clinical assessment, decision making, and management of clinical trials. Students learn methods for interpreting the rationale and procedures underlying the clinical research protocol to adequately assess the subject's response to therapeutic interventions. Students conduct case studies on various disorders and diseases through which they explain the disease process on structural and functional levels as well as the critical factors that relate to patients' conditions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6130 - Ethical, Legal, and Regulatory Considerations in Clinical Investigations♦

(3 sem. cr.)
The nature of human clinical research and clinical investigation facilitates a host of ethical, legal, and regulatory issues related to the treatment of subjects, personal privacy, and institutional compliance, among others. Students in this course examine ethical codes of conduct, regulatory requirements, and existing laws that govern clinical research in the context of historical events that contributed to their development. They also explore recruitment and protection of human subjects; diversity and vulnerable populations in research; informed consent; privacy and confidentiality; the role of independent review committees; and the importance of reporting serious adverse events (SAEs). Students also discuss social and ethical implications of genetic technologies and research. Applying course concepts, students complete an FDA form for a clinical trial in their region, deepening their understanding of legal protocol.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6145 - Design and Conduct of the Clinical Protocol♦

(3 sem. cr.)
An introduction to the basic elements of research design for clinical inquiry is provided
in this course. Students explore the methods and goals of clinical research; formulation of the research objective and hypothesis; identification of outcome measures; issues of reliability and validity; randomization procedures; documentation requirements; and data collection, analysis, and interpretation. Sharpening critical-thinking skills, students consider the potential risks and benefits of a clinical trial case study, which they use to justify continuation or termination of the drug development process. They also examine practical aspects of clinical trial management, including the design of the case report form (CRF), clinical laboratory and multicenter trial administration, and outsourcing. Through a review of scholarly literature, students explore and describe the ethical and regulatory requirements for which professionals must account in the design of a clinical research study. Additionally, students explore health disparities and cultural diversity as factors that affect participation of subjects in clinical trials.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6160 - Good Clinical Practice (GCP) in Managing and Monitoring Clinical Trials♦

(3 sem. cr.)
Through this course, students learn the process and procedures of managing and monitoring a clinical trial from study initiation to closeout. Students examine the basic tenets of good clinical practice (GCP), including historical considerations, compliance, and recruitment of study participants, focusing on quality assurance and data safety monitoring boards (DSMBs). Through discussions and application-based assignments, students investigate and describe the relationship between regulations and GCP; how GCP affects the practical elements of conducting clinical studies; the challenges of multi-center or large-scale trials, such as risk assessment and management; protocol management and amendments; and audits and various considerations for reporting requirements. Students in this course are provided with official guidance on GCP from the International Conference on Harmonization (ICH) as well as operational imperatives of GCP.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6175 - Biostatistics♦

(3 sem. cr.)
Competent and valuable clinical research administrators are able to read and evaluate the statistical accuracy of research, summarize data, and distinguish common distributions; however, to engage knowledgeably in these tasks, administrators must understand the language of clinical research, which is rooted in biostatistics. In this course, students learn applications and interpretations of biostatistics, including descriptive methodologies, commonly used statistical tests, confidence intervals,
statistical inference and probability, analysis of variance, and considerations in powering a study. Students learn basic concepts of data collection and analysis using statistical computer software, such as SPSS. Applying principles of survey research, students also complete a written analysis of a survey design, through which they assess the method and validity as well as consider ways the survey could be improved.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6190 - Information and Data Management

(3 sem. cr.)
The importance of information systems and information technology in increasing efficiencies in the management of clinical research data is examined in this course. The application of legal and ethical principles is considered, with attention to the development of a data collection and management plan that promotes information archiving and access as well as edit and query management. Issues of confidentiality and the security of information systems are addressed. Emerging technology that facilitates the capture and analysis of clinical study results, such as electronic data capture (EDC) and electronic case reporting forms (eCRF), is also examined.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6205 - Product Development in the Pharmaceutical, Biotechnology, and Medical Device Industries

(3 sem. cr.)
In this course, students examine current trends and issues in the pharmaceutical, biotechnology, and medical device industries, focusing on how the commercial enterprise uses clinical research to bring products to market through the clinical development and regulatory process. They examine the process by which discoveries become new drugs or medical devices, the preclinical process, and the development of the clinical research plan, and they consider new drug and medical device applications, pre-market approvals, marketing authorizations, and post-marketing surveillance. Through discussions and practical assignments, students consider a variety of topics, including pharmacogenomics, pharmacoepidemiology, recent safety concerns of regulators, globalization, the politics of drug pricing and healthcare reimbursement, product life-cycle management, outsourcing of studies to developing countries, patent strategies, and accelerated approval of medications. They also analyze case studies representing several therapeutic categories from multiple perspectives, including business, medical, scientific, ethical, regulatory, and biomedical engineering.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
CLRA 6220 - Health Economics and Financial Management in Clinical Research Administration♦

(3 sem. cr.)
The medical product research and development process requires individuals who can make informed financial decisions that maximize health benefits, using economic principles and discerning the best allocation of resources for profitability. Students in this course are provided with a foundation for economic evaluation and financial management, with a focus on the development, analysis, and communication of economic and financial data in the context of clinical research. Students explore health economic issues in the global marketplace, and they analyze and describe advantages and disadvantages of conducting clinical global trials, considering issues of enrollment, informed consent, application of Good Clinical Practice (GCP), patient compliance, and data security. In addition, students consider financial management aspects of clinical research, including estimating cost of clinical protocol, deciding whether to outsource, calculating direct clinical costs versus research administrative costs and institutional overhead, and developing and negotiating clinical trial budgets and payment terms with sponsors.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6235 - Epidemiology♦

(3 sem. cr.)
Students are provided with an overview of epidemiologic methodology in the study of the distribution and etiology of disease and health-related conditions in human populations in this course. Students examine important study designs and discuss the strengths and weaknesses inherent in each. They also explore issues related to inference and causality that can be derived from studies as well as approaches to the evaluation of preventive measures. Students engage in assignments designed to provide practical application of course concepts on a variety of topics, such as calculation and interpretation of measures, acute outbreak investigations, incidence and prevalence, observational study designs, and investigation of randomized trials.

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CLRA 6550 - Practicum

(3 sem. cr.)
Students have the opportunity to apply and integrate the knowledge and skills acquired throughout the MS in Clinical Research Administration and further develop key professional competencies in the practicum. Students engage in a supervised field experience, which they align to their academic and professional goals. The field
experience occurs at a clinical site where a research study is underway or with a research sponsor who is planning or facilitating a study. Supervision by an on-site preceptor involved in the planning or conduct of a clinical research study is a critical component of the practicum. The on-site supervisor and the course instructor monitor and evaluate students’ performance throughout the entire practicum experience. Students are required to complete 120 hours of practicum work. They must also participate in an accompanying online seminar course and begin to develop an ePortfolio based on assigned professional development activities.

**CLRA 6560 - Capstone**

(3 sem. cr.)
The capstone is an opportunity for students to demonstrate their mastery of principles, concepts, and content presented throughout the MS in Clinical Research Administration program. Students choose from a selection of overarching themes and topical areas reflecting the breadth of subjects covered in the program. Guided by their faculty advisor, students identify a particular area of interest and produce a substantive written paper and presentation in an area of clinical research administration. Students also engage in group discussions through which they consider their career development plan, share information on their capstone research topic and process, and exchange feedback on final capstone presentations.

**CMIS 1001 - Introduction to Information Systems**

(5 cr.)
The definition of information systems (IS) is broad and can encompass a large number of components. The most important aspect, however, is that IS are vital to the daily function of nearly all individuals and organizations. In this course, students have the opportunity to gain an appreciation of the role that information systems play in their lives as well as in different types of organizations and societies. Students obtain a broad overview of the field of information systems through the examination and discussion of technology, practical applications, and related career issues. They also use case studies that represent recent situations in actual organizations to gain real-world knowledge of how a business manages its data in conjunction with business processes to create an information system.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 1002 - Information Technology Infrastructure**

(5 cr.)
Businesses whose systems are lacking or experience failure are at risk of significant loss of time, money, and customer faith. Therefore, information technology (IT) is essential to the function and success of nearly all businesses. Through this course, students
prepare for a role in the field of IT as they learn fundamental concepts of the IT infrastructure that underlie information systems. Students examine both hardware (computers, networks, interface devices) and software (operating systems, middleware, applications, system software) elements. They also explore key issues of capacity, performance, reliability, scale, and obsolescence for a thorough understanding of all aspects of IT infrastructure.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 1003 - Object-Oriented Programming I♦**

(5 cr.)
Modern software design and programming require techniques that simplify the development and maintenance process. Object-oriented programming (OOP) does just this by allowing programmers to develop objects that represent complex concepts in applications. In this course, students learn fundamental aspects of computer programming in an object-oriented language. Students learn about key concepts, including real-world objects, actions, and information in terms of data and algorithms; the translation and execution of computer programs; and the notion of an organized process of software development. They engage in hands-on practice in designing, creating, running, and testing programs and discuss related topics to share ideas and obtain different perspectives.

Prerequisites
  • MATH 1040

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CMIS 1004 - Object-Oriented Programming Concepts♦**

(5 cr.)
Information systems rely on underlying programs that respond to users and process information. An information systems specialist must understand the structure and purpose of programs and be able to work with programmers to ensure designs that meet system requirements. Object-oriented programming (OOP) and design facilitate this by presenting information systems as classes and objects that represent complex system contexts in a manner directly transferable to programming specifications. In this course, students learn fundamental aspects of computer programming in an object-oriented language. Students learn about key concepts, including real-world objects and methods in an information systems context. They engage in hands-on practice in designing, creating, and running programs and discuss programming and design topics to share ideas and obtain different perspectives. This concept focus enables students to relate programming to information systems and
provides a foundation for learning specific programming languages and skills in the future.

Prerequisites

- MATH 1040

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 2001 - Internet Computing♦

(5 cr.)
The Internet stitches together many disparate devices and software components into a flexible fabric that supports an enormous variety of uses. Students in this course learn about the functions of these components through a comprehensive evaluation of Internet computing. They examine the design of the Internet protocol stack, the structure and function of some of the most important Internet services and applications, and Internet governance. Students have the opportunity to gain practical experience through the application of concepts, such as performance, scale, and reliability, in the design of information systems.

Prerequisites

BS in Computer Information Systems

- ITEC 1010 or CMIS 1002 or ITEC 1005

All Other Programs

- CMIS 1002 or ITEC 1010

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 2002 - Object-Oriented Programming II♦

(5 cr.)
Students in this course elaborate their study of object-oriented programming by delving deeper into the key concepts of programming with objects, including complex data structures. Students examine and discuss hierarchy, modularity, and abstraction—concepts that they will use in subsequent courses in the program. Students supplement their hands-on programming practice by engaging in assignments designed to provide practical application of context, including the use and development of documentation in a web-based environment. Through this course, students learn to write more elaborate code and solve real-world problems they will encounter in the field.

Prerequisites

- CMIS 1003

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
CMIS 3001 - Computing and Society
(5 cr.)
There are invariably challenges in the aggressive world of information technology (IT) requiring those in the field to understand and adhere to a professional code of ethics. Students in this course are introduced to the interaction of information systems with core social concerns, including privacy, democracy, equity, security, economic progress, and intellectual property rights. Students learn to consider the social, ethical, and legal considerations inherent in the design and use of information systems. They also examine real-world and hypothetical case studies for a practical approach to applying the professional code of ethics to the field.
Prerequisites
• CMIS 2001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 3002 - Database Management Systems
(5 cr.)
All types of businesses rely on systems to manage their data and to keep that data secure, accurate, and reliable. A database is a system designed to do just this as well as to simplify the processes of data entry, search, and retrieval. Students in this course focus on the representation and manipulation of information in relational database management systems. Students learn how to map real-world concepts onto relational representations and how to manipulate them through relational queries to implement data-intensive applications. Students also learn to use a core subset of the structured query language (SQL) and how relational databases fit into a wide variety of practical information systems.
Prerequisites
• CMIS 3004

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 3003 - Requirements Analysis
(5 cr.)
A critical step in the development of information systems, and one in which the seeds of disaster often are sown, is the analysis and definition of system requirements, both functional and non-functional. In this course, students are introduced to systems analysis...
and the responsibilities of a systems analyst. Students learn about the identification of stakeholders and techniques for requirement elicitation, representation (e.g., use cases), and life cycles (e.g., iterative methods, and maintenance). Students complete a comprehensive analysis project through which they work toward gaining hands-on experience meeting the responsibilities of a systems analyst.

Prerequisites
- CMIS 1003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 3004 - Object-Oriented Design♦

(5 cr.)
In this course, students learn the discipline of reducing requirements to the structural and functional design of information systems through the application of object-oriented principles to the design phase of the systems development life cycle (SDLC). They engage in discussions and assignments on a variety of topics, including conceptual modeling, design patterns, and application frameworks. They learn the basics of modeling, design representations, and the role of computer-aided software engineering (CASE) tools. Students have the opportunity to gain insight on contemporary methodologies employed in systems development, such as agile development, the Unified Process (UP), eXtreme Programming (XP), Model-Driven Architecture (MDA), and frameworks.

Prerequisites
- CMIS 3003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 3005 - Information Systems Project Management♦

(5 cr.)
The process of creation, from conception through completion, is complex and requires a diverse set of management skills. Students are introduced to the knowledge, tools, and techniques needed to manage information systems projects effectively throughout a project life cycle. Students learn how information systems projects are organized and managed for efficiency and reliability. They explore topics including software process models, estimation, planning, and scheduling. Students examine case studies of successful and unsuccessful projects and gain experience with key elements of project management practice.

Prerequisites
- CMIS 3004
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4101 - Information Security and Privacy♦
(5 cr.)
The responsibility of an information security specialist is to supervise operations that follow industry best practices for security and data integrity. This role helps to ensure that systems are free from external threats and risks that may jeopardize or harm an organization. In this course, students examine the role of a security specialist and learn the key concepts and concerns of information security and privacy, including technical, social, and policy issues. Students examine fundamental notions of authentication, authorization, and encryption in the context of everyday information systems activities. Students analyze and discuss case studies of security and privacy breaches to understand economic and human impact.
Prerequisites
• CMIS 2001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4102 - Information Security Techniques I♦
(5 cr.)
Today, the risk of hackers infiltrating networks and computer systems is high and all organizations are at risk of potential exploitation or data theft. In this course, students examine information security attacks and defenses at the individual computer level and explore physical and software intrusions and defenses. Students learn best practices in configuring and maintaining systems to minimize the risk of compromise. They engage in application and discussion assignments focusing on topics such as viruses, Trojan horses, physical compromise, stolen credentials, and related protective measures.
Prerequisites
• CMIS 4101

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4103 - Information Security Techniques II♦
(5 cr.)
Understanding a computer network as a symbiotic system connected to the Internet, including the relationships of network devices, such as gateways, switches, routers, and
hubs, is important step in minimizing the risk of threats that compromise networks. In this course, students examine information security attacks and defenses in the network. They consider hardware and software vulnerabilities and denial of service attacks. Students take a hands-on approach to understanding defense techniques as they complete practical exercises focused on planning, detection, and recovery measures. They also explore and discuss the social and technical aspects of anonymity in the network as they relate to network abuse and free speech.

Prerequisites
- CMIS 4102

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4104 - Computer Forensics

(5 cr.)
The increase of information shared online puts users, both individuals and larger entities, such as government agencies and corporations, at major risk of invasion of privacy and more serious crimes, such as child pornography, financial fraud, and personal identify theft. In this course, students learn basic approaches to analyzing information systems for evidence of illegal or inappropriate activities. They engage in a range of assignments focusing on the legal, ethical, and policy implications of various forensic techniques and monitoring practices. Students also learn to analyze forensic issues of real-world case studies to learn to choose appropriate techniques to minimize risk and combat breaches in security.

Prerequisites
- CMIS 4103

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4201 - Human Factors

(5 cr.)
Understanding how people interact with computers in various environments is crucial to the development of interfaces that address the needs of differing personality types. In this course, students learn about human-computer interaction (HCI) including various aspects of human perception and cognitive performance that inform the design of effective and usable information system interfaces. Students also examine disabilities and appropriate adaptation thereto, such as the implementation of accessibility elements in HCI. Through the exploration of current literature and case studies, students learn techniques to help them avoid some of the most common design gaffes in the development of user interfaces.

Prerequisites
• CMIS 1001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4202 - HCI Evaluation Methods

(5 cr.)
An effective and user-friendly human-computer interface (HCI) requires careful analysis, assessment, and modification. Students in this course learn empirical and heuristic methods for evaluating and improving human-computer interfaces. They also learn methods in conducting and analyzing user studies and ways to measure interfaces against models of human performance. Students engage in a group project through which they apply usability evaluation methods to a real-life scenario resulting in an actual HCI evaluation and report. This course also introduces students to the ethical and regulatory issues in human studies, providing them with the opportunity to understand all factors involved in conducting HCI evaluations.
Prerequisites
• CMIS 4201

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4203 - User Interface Development

(5 cr.)
How do we design interfaces for optimal efficiency and appeal? Effective design requires an understanding of the goals, needs, and skills of the user. In this course, students consider these factors and build on their knowledge of user interface evaluation to synthesize effective and usable interfaces. Students discuss a variety of topics, such as basic principles and guidelines of design, application of design principles, prototyping, and mapping. Through practical exercises and other course assignments, students apply their requirements analysis skills to develop user interface designs and use rapid prototyping tools in the process of innovation and iteration.
Prerequisites
• CMIS 4202

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4204 - Computer-Mediated Communications
Communication through outlets such as e-mail, instant messages, blogs, and text messages is an intrinsic part of our daily lives. This evolving form of interaction continues to progress; therefore, it is important to know how humans use media to initiate, manage, and maintain both personal and professional interaction. In this course, students use a historical perspective to trace the evolution of varying styles of communication, including the persistent recurrence of key concepts, such as links and threads. Students learn about the principal modes of computer-mediated communications among individuals and groups. They also learn select approaches and tools for specific applications. Students explore contemporary practices in computer-mediated communications and assess the implications of evolving applications and solutions.

Prerequisites
- CMIS 2001 or MEDC 3001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4301 - Structure of the Healthcare Industry

What determines patients’ plan of care and what role does technology play in their diagnosis and treatment? Through this course, students have the opportunity to answer questions such as these as well as to gain a broad understanding of healthcare as a complex business system. Students examine the main elements of the healthcare industry in the United States and elsewhere, analyzing the interests and information needs of healthcare professionals, provider organizations, researchers, pharmaceutical companies, public health agencies, regulators, insurers, individuals, and others. They examine classic literature and current articles in the field to gain an appreciation of the trends toward and obstacles to information exchange. Though this course, students also have the opportunity to survey the various professional careers available in healthcare and consider their goals and interests in relation to these opportunities.

Prerequisites
- BUSI 1001 or BUSI 1002

CMIS 4302 - Patient Records Practice and Policy

As in most industries, healthcare relies heavily on information technology to provide the infrastructure for healthcare delivery in the global marketplace. Through this course, students have the opportunity to gain the necessary skills to understand the complexities of healthcare information systems components. Students examine the trends in the development of standardized patient records for a variety of health-related
applications. They use requisite skills in requirements analysis and design to address the challenges in the field and engage in coursework on topics including privacy, confidentiality, and standardization. Students assess and discuss a variety of topics, such as medical devices, guidelines, and standards as well as the differences among electronic health records, electronic medical records, and personal health records.

Prerequisites
BS in Health Studies BS in Public Health
- CMIS 4301 or HLTH 1005
BS in Public Health
- CMIS 4301 or HLTH 1005

CMIS 4303 - Healthcare Information Systems Applications

(5 cr.)
The cost of delivering healthcare in the United States continues to grow exponentially; therefore, the industry is in need of ways to optimize the financial components associated with delivery while focusing on better quality of care. Through this course, students learn about healthcare information systems applications designed to add value to the delivery of healthcare from a financial and clinical outcomes-based perspective. Students examine some of the most important classes of healthcare information systems, ranging from patient care management to epidemiology to billing to research data analysis. Case studies provide students with a practical opportunity to exercise their information systems design and analysis skills as well as to consider social and ethical issues related to the field.
Prerequisites
- CMIS 4302

CMIS 4402 - E-Learning Concepts and Systems

(5 cr.)
Technology and network connectivity has forever changed the way universities conduct education and students achieve learning; it is no longer confined to the traditional classroom setting within structured timeframes. Through the electronic learning (e-learning) environment, students now have the opportunity to study at their own pace, with more flexibility of time and location, such as in the evening after work or in a café away from home. In this course, students examine key structural and functional elements of e-learning systems and explore how technology lends to the development of e-learning applications. Drawing upon both their experience as e-learners and their information systems expertise, students engage in group or individual projects focused on specific aspects of the learner experience, management functionality, and other properties of e-learning systems.
Prerequisites
CMIS 2001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CMIS 4501 - Computer-Supported Collaborative Work

(5 cr.)
With the advancement of technology, most organizations, including educational institutions, now rely on multiple-user applications to maximize workflow efficiency, enhance learning, and allow for collaboration of diverse skills and experiences. In this course, students examine existing systems and proposals for information support for collaboration in formal and informal settings, along with their organizational and cultural contexts. Drawing upon students’ own experience in online collaboration and requisite knowledge of information systems analysis and design, they analyze and discuss case studies to better understand new collaboration capabilities and ways to improve computer-based collaborative work continually.

CMIS 4601 - Information Systems Service Management

(5 cr.)
Businesses often do not have the knowledge or resources to execute a project on their own. As a result, they rely on external resources, often times using offshore vendors who have the skills and tools required to complete the job. While this process allows business-lucrative opportunities, it also requires someone to manage the relationship between the organization and outside vendor. In this course, students examine the conception of information systems (IS) as collections of services aggregated in a supply chain that stretches across organizations and continents. Students investigate the concept of service-oriented architecture and the various disciplines of open interfaces, open source software, service-level agreements, and client-vendor relationships that allow complex assemblies of services to work. They analyze and discuss the business and organizational strengths and weaknesses of different approaches for a real-world, practical understanding of IS service management.

Prerequisites

• ISYS 3001

CMIS 4999 - IS Capstone Project

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
In this capstone project course, students complete an integrative information systems project that combines multiple aspects of their information systems program. The project requires collaboration with a team of students to manage, analyze, design, implement, and evaluate a computer-based information system. The system development process is initiated with a case study included within the course structure. Students will develop a project charter that will guide them through the discovery of system requirements, the creation of a system design, and the development and testing of a functional computer application. Students will develop a management presentation to describe the project design and justify the continuation of the project. Students will also examine their professional goals in the context of their education and develop plans for continued learning and career development based on their personal objectives and priorities.

**Prerequisites**
- All required core and concentration courses

**COMM 1003 - Introduction to Mass Communication**

Students in this course are introduced to basic concepts of communication to mass audiences. Students' primary focus is the application of communication principles and theories needed to achieve intended outcomes in crisis scenarios, public relations, public and community affairs, and when influencing thinking or opinions. Students explore mass communication theory, historical context, concepts, and applications. Through this course, students work toward gaining applied skills and sensitivity to the social impact of mass communication.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COMM 1003C - Introduction to Mass Communication**

Students in this course are introduced to basic concepts of communication to mass audiences. Students' primary focus is the application of communication principles and theories needed to achieve intended outcomes in crisis scenarios, public relations, public and community affairs, and when influencing thinking or opinions. Students explore mass communication theory, historical context, concepts, and applications. Through this course, students work toward gaining applied skills and sensitivity to the social impact of mass communication.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COMM 1004C - Interpersonal Communication**
Effective interpersonal communication is a necessary tool for productivity and quality of life. Students in this course examine practical concepts and skills for enhancing communication with others. They analyze and discuss theories and models of interpersonal communication, listening, verbal communication, nonverbal communication, communication styles, affective and cognitive communication, giving and receiving feedback, and communicating interpersonally in a variety of modalities. Using insights gained from their weekly analyses, students engage in a final project through which they improve the status and satisfaction of their real-world work relationships.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 1006 - Stereotypes and Scandals: Exploring the Power of Mass Communication and Mass Media♦

Mass communication and mass media are such a normal part of people’s daily lives that they sometimes don’t give them the attention they deserve. The messages, images, and stories individuals see and hear influence and impact them in ways they may not understand. In this course students explore user-generated content, personal branding, and how the modern mass and social media has brought mass communication to almost everyone. Students also examine how political and social messages relate to fake news, and how they can be a part of social change.

Prerequisites
BS in Communication
  • COMM 1010
All Other Programs
  • None

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 1008 - Interpersonal Communication for Personal and Professional Success♦

Effective interpersonal skills are in high demand with employers, necessary for productivity, and improve individuals’ quality of life. Students in this course examine practical concepts and soft skills for personal and professional success. Students explore and discuss listening, verbal communication, nonverbal communication, communication styles, culture, giving and receiving feedback, and interaction in a variety of modalities. Using insights gained from their weekly assignments, students engage in a final project through which they can earn an interpersonal soft skills certificate.
Prerequisites
BS in Communication
  • COMM 1010
All Other Programs
  • None

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 1010 - Introduction to Communication♦

(5 cr.)
The field of communication has grown exponentially in the last 100 years, as various contexts create and influence practice. Once focused only on public speaking, the communication field now encompasses many types of specialized applications, including health, small group, organizational, interpersonal, and intercultural. This class introduces students to foundations of communication, processes that influence communication, and characteristics of effective communication, and provides students the necessary base for success in subsequent communication courses and professional life.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 1099 - Interpersonal Communication

(1 cr.)
Effective interpersonal skills are in high demand with employers, are necessary for productivity, and improve individuals’ quality of life. Students in this course examine practical concepts and soft skills for personal and professional success. Students explore and discuss listening, mindfulness and emotional intelligence, communication and conflict styles, leadership, culture, technology, and interaction in a variety of modalities. Using insights gained from their weekly assignments, students engage in a final project through which they can earn an interpersonal soft skills certificate of completion.

COMM 2001 - Dynamics of Group Communication♦

(5 cr.)
Now more than ever, organizations are looking for individuals who can work effectively in a group. Students delve into the concepts and strategies of effective group functioning while applying these concepts to a group experience. In addition, students examine research on groups and teams including the following topics: stages of team development, handling conflict effectively, communicating effectively through various modes, valuing diversity, the impacts of groupthink, and encouraging creativity.

Prerequisites
BS in Communication
• COMM 1010
All Other Programs
• None

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 2002 - Fundamentals of Public Speaking♦

(5 cr.)
Whether you participate in training, a business meeting, or community event, being a skilled public speaker differentiates an uninteresting experience from an engaging one. Students in this course work to develop and enhance their ability and confidence in presentation skills, empathic listening, and critical thinking. Topics include developing content and organizing ideas using proven techniques for the oral delivery of informative and persuasive speeches. Additional topics include audience analysis, critical listening and thinking, and the use of technology in presentations. In this course, students have an opportunity to improve their public communication skills, as well as plan, create, and deliver presentations.
Prerequisites
BS in Communication
• COMM 1010
All Other Programs
• None

Note: This course is delivered over a 6-week term but is equated to COMM 2002E, which is delivered in a 12-week term.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 2003 - Writing for the Digital Age♦

(5 cr.)
It has been said that "good writing is good writing no matter the medium," but is that really true? In this course, students examine the fundamentals of writing such as purpose, context, voice, and structure, as well as how the implementation of those fundamentals varies for print, Internet, advertising, and broadcast mediums. Students explore the best ways to use productivity software such as documents, presentations, spreadsheets, charts, and graphs to create a compelling argument. In addition, students will study and then apply the knowledge of digital communication to interpret tone and purpose. No matter the industry or career focus, writing for the digital age is an increasingly important topic of study.

Students may take this as a non-degree course, which means they do not have to be enrolled in a
COMM 2005 - Digital Storytelling♦

(5 cr.)
Digital storytelling drives the Internet and communication. Writers tell stories on every blog, website, and social media post in the ever-expanding online, mobile environment. User-generated content, citizen journalists, vloggers, and influencers increasingly drive views and capture audiences. Students study the hallmarks of effective digital writing, including clear, concise language and ease of reading across multiple platforms and programs. Digital writing strategies and techniques are key, modern workplace skills, and this course provides engaging, real-world opportunities for students to develop their soft skill set.

Prerequisites
BS in Communication
  • COMM 1010
All Other Programs
  • None

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 3001 - Applied Interpersonal Communication♦

(5 cr.)
In this course, students have the opportunity to examine the cognitive and affective aspects of communication, thus increasing self-awareness. They explore acceptance, perception, emotional intelligence, self-presentation, learning styles, models of human information processing, and aspects of the psychology of language. Through a comprehensive self-assessment, students gain insight into their ability to communicate, manage conflict, influence others, and work effectively with those who have different values and beliefs.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 3002 - Negotiation and Persuasion♦

(5 cr.)
Students in this course are introduced to communication theory and research on persuasion and negotiation. Through the application of theory, students will become more informed, critical senders and receivers of persuasive messages in their professional and everyday lives. Students explore the skills needed to plan, design, and deliver persuasive oral and written messages, while learning to identify and resist
undesirable propaganda efforts.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 3004 - Communication Theory♦

(5 cr.)

There is nothing as practical as a good theory. The expanding field of communication has developed a number of theories that explain, predict, and recreate communication impacts. Some of these theories apply to their specific fields, while others have broader application across communication disciplines. Students in this course examine and apply a variety of communication theories within health, small group, organizational, public speaking, interpersonal, intercultural, traditional, and nontraditional contexts. This class assists students in creating, assessing, and choosing effective communication strategies suitable for a variety of contexts.

Prerequisites

• COMM 1010

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 3005 - Business Communication♦

(5 cr.)

Effective oral and written communication skills are in high demand by employers. This course offers students the opportunity to focus on the skills needed for successful business performance and relationships. Students receive training in meeting management; virtual conferencing; working in virtual teams; and strategic visual representation of relationships and data for target audiences, including spreadsheets, business letters, memos, and other forms of print and electronic communication. Students also work toward gaining insight into their ability to communicate, to manage conflict, and to be culturally competent in the workplace.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 4001 - Intercultural Communication♦

(5 cr.)

Globalization has created a smaller world. Media, culture, commerce, new neighbors, and new family members have drastically increased interactions among culturally diverse people. In this global environment, people need to interact effectively with all types of people, cultures, and world views. In this course, students are provided tools for observing, evaluating, and understanding various cultures to communicate effectively
with others. Students explore the impact of culture and personal identity on communication strategies. They distinguish the modes and styles of communication unique to their personal culture from the cultures of others. Students explain how theories of cultural differences can help to anticipate and overcome challenges in intercultural situations. In addition, students apply effective intercultural communication skills to academic, personal, and professional settings.

Prerequisites
BS in Communication
- COMM 1010
All Other Programs
- None

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 4101 - Organizational Communication◆

(5 cr.)
Students in this course work toward gaining skills to communicate effectively in a diverse, global environment. They examine the relationship of culture and personal identity to communication strategies. They also learn to distinguish the modes and styles of communication unique to their personal culture from the cultures of others; explain the theories of cultural differences; anticipate and overcome challenges in cross-cultural situations; and apply effective cross-cultural communication skills to academic, personal, and professional settings. Students engage in a final project through which they gain hands-on experience working with someone from another culture, acquiring practical skills to use in the 21-century global society.

Prerequisites
BS in Communication
- COMM 1010
All Other Programs
- None

◆ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 4901 - Communication Capstone

(5 cr.)
Students conclude their study in communications in this course as they integrate theory and practice developed throughout the program. Students create a comprehensive communications plan through which they apply concepts and tools appropriate to the needs of a chosen setting based on a thorough assessment of strategic direction,
audience or market, advantages, weaknesses, obstacles, and opportunities.

Prerequisites
- All required core and concentration courses

Note: Students complete this course after they meet all other requirements in the program.

COMM 6100 - Communication Theory in Practice: Here and Now♦

(3 sem. cr.)
It has been said that all communication is persuasive in nature. Whether this assertion is true or not, it is likely that individuals frequently attempt to persuade others on a daily basis. In this course, students explore the theories and approaches needed to enhance persuasive messages, make communication more effective, and generate a desired effect. Students examine how to craft oral, written, and visual messages that integrate persuasive theory for a selected audience. Topics include the psychology of messaging, communicating a consistent message across various media, rhetorical theory, persuasion, negotiation, and cognitive dissonance.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 6110 - Media Effects: Mass Media in Modern Society♦

(3 sem. cr.)
Today’s mass media is constantly evolving. Technological advances have shifted the concept of mass media from analog waves to digital bytes. Both content creators and consumers alike interact with their media in new ways. Through this course students prepare for today’s global audience. In this course, students examine the history and evolution of the mass media landscape. They explore the theories, concepts, and trends that support informed digital consumers and content creators. Also, students explore the effects of media on consumer actions and the ethical boundaries that arise in creating mass media. Ultimately, their study will reveal the impact of social media, the effects of media on society, and the nature of the global mass media audience.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 6120 - Persuasive Storytelling♦

(3 sem. cr.)
What do lawyers, journalists, and advertisers have in common? Whether they are addressing a jury, a readership, or a consumer, each wants to influence individuals to action and attempts to do so through persuasive storytelling. In this course, students explore the elements of a story and the approaches used to frame narratives. In addition, students examine the methods used to put persuasive theory into practice
through public speaking, presentations, and written and visual communication and communicate a single story in a variety of media. Topics include written and visual narrative, elements of story, and persuasion applied to various media.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 6130 - Communicating Using Social and Digital Media♦

(3 sem. cr.)
While some companies may still be asking, "Why should we care about social media?" most are now asking, "How can we leverage the power of social media?" In this course, students examine how social media has changed the way consumers interact with brands and apply elements of storytelling to develop a social media strategy for an organizational scenario. In addition, students explore issues of ethics, privacy, and media law that are heightened by social media and digital communication distribution. Topics include types of social media, audience appropriateness, reputation management, social media strategy, evaluation methods, and the communications regulatory environment, including media law and privacy.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 6140 - Message Design, Audience, and Evaluation♦

(3 sem. cr.)
Using reputable sources lends credibility to a message. But how does a communication professional determine which supporting information is appropriate to help craft a message, gain audience insight, choose a communication channel, or evaluate the impact of a message? In this course, students examine research approaches that are common to the field of communication and appropriate for answering questions about audiences and evaluating messages. Topics include simple quantitative analysis and qualitative research approaches such as focus groups, interviewing, and surveys, as well as basic metrics such as cost of media, cost per sale, return on investment, and web analytics.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 6150 - Interpersonal Communication♦

(3 sem. cr.)
The ability to communicate with others influences success in both professional and personal settings. As communities and places of work become increasingly diverse, the intersections of interpersonal and intercultural communication also increase, and communicators need to be aware that the cultural diversity of their audiences should affect the way they convey information. Students in this course examine interpersonal
and intercultural intersections and study the influence of cultural diversity on interpersonal communication. By examining theory, students develop an approach to practice and hone individual strategies for communicating successfully in diverse interpersonal situations. Topics include interpersonal communication theory, intercultural communication theory, individual communication competence, nonverbal channels, person perception, conflict resolution, and listening and communication barriers.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COMM 6160 - Creative Strategy and Execution: From Brief to Presentation**

(3 sem. cr.)

Students in this course leverage a wide range of knowledge and skills to conceive and execute a global communication campaign that uses traditional and digital media. Grounded in concepts of integrated marketing communication, this course provides students with the opportunity to develop and review a creative or innovative brief. Students generate solutions for that brief across the phases of the creative process, present and defend solutions, and evaluate solutions using metrics. Topics include the creative process, integrated marketing communication, selecting appropriate channels, pitching and selling ideas, and evaluation metrics.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COMM 6170 - Public Relations Concepts and Strategy**

(3 sem. cr.)

To successfully build and manage the relationship between an organization and the public in today's increasingly global community, a strategic communications plan requires the use of both traditional and new technology. Students in this course explore, from a global perspective, the needs of various public relations stakeholders, including the customer, the press, and the investor. Topics include how to change behaviors, advocate for causes, design messages for specific audiences, select appropriate communication channels, and evaluate results of public relations campaigns. Students also consider the potential legal and ethical aspects of the practice of public relations.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COMM 6180 - Crisis Communication**

(3 sem. cr.)

Protecting an individual, company, or organization from the potential negative results of a crisis requires the development of a crisis management plan to anticipate and mitigate
risk. Students in this course explore the use of media relations and public-opinion research techniques to minimize unwanted impacts from crises. Students review real-world controversies and crisis management plans to develop original communication plans that address risks and provide value to the stakeholders. Other topics include the impact of criminal or government investigations, media inquiries, lawsuits, and other scenarios involving ethical disputes.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

COMM 6190 - Marketing Communications, Storytelling, and Persuasion

(3 sem. cr.)
Whether one is addressing a customer, an audience, or a jury, the aim is to use the tools of persuasion to influence individuals to take action. Especially in social media, it is critically important to establish an appropriate tone, voice, and personality. Tying these strategies to the overall brand positioning is even more important. It has been found that storytelling is one of the most effective tools of persuasion. Rather than simply stating the facts, the story puts facts into a meaningful context, so that the consumer can understand and empathize with the characters in the story and, therefore, identify with the brand’s social media personality. In this course, students explore the elements of the story and the approaches used to develop content. Understanding the impact of individual channels on a strategy for integrated marketing communications and positioning allows the marketer to allocate budgets more effectively and efficiently.

COMM 6501 - Brand and Product Management

(3 sem. cr.)
Key differences exist between brand and product management, and, yet, both are crucial to the success of a product or service. In this course, students will explore the many elements of brand management, including brand architecture, the development and sustainability of the brand, brand positioning, and the perceived value of the brand. Students analyze competitive information, and they learn to apply that knowledge in areas such as product differentiation. Throughout the course, students also will examine the critical business skills, tools, and techniques necessary for effective product management. The focus of this course is on the stages of a product’s lifecycle, consumer demand and pricing, multichannel product management, and the fundamentals of profit and loss management.

COMM 6502 - Practices in Project Management

(3 sem. cr.)
Students in this course are introduced to the knowledge, skills, tools, and techniques needed to successfully manage projects throughout the life of a project, known as the project life cycle. By learning about the project management Knowledge Areas and
Process Groups as well as the distinguishing characteristics of each, students gain an appreciation for how these two dimensions of project management interact in initiating, planning, executing, monitoring and controlling, and closing a project.

COMM 6503 - Stakeholder Management and Organizational Behavior

(3 sem. cr.)
One role of the project manager is to lead teams in complex and diverse organizational settings while concurrently communicating with all stakeholders. In this course, students analyze this dual role and examine how individual and group behavior impacts organizational effectiveness. They discover how using influence, rather than organizational power, leads to more successful project management. Students learn ways to design projects to support organizational goals and how to build and engage organizational capital (intellectual, human, physical, financial, and structural). They also apply stakeholder management practices to engage in and manage relationships with the community of project stakeholders.

COMM 6504 - Managing People and Promoting Collaboration

(3 sem. cr.)
Contemporary business environments are increasingly competitive, global, fast paced, and knowledge intensive. In these environments, effective use of human capital is vital to an enterprise’s success and survival. In this course, students explore practical issues related to developing individuals and managing collaboration and examine the skills and strategies necessary to address them effectively. Students examine ethical and legal implications of managing a diverse workforce including issues that arise from cross-cultural differences and virtual work settings. The importance of communication as a tool to manage internal and external relationships is emphasized as it relates to the effectiveness of managing people to achieve organizational goals. Topics include planning and executing staffing strategies, developing individuals, fostering positive work environments, creating and sustaining teams, maintaining influence in the organization, managing a global workforce, managing programs for productivity improvement, and planning and managing the human side of organizational change.

COMM 6505 - Fostering a Culture of Innovation♦

(3 sem. cr.)
In today’s complex and uncertain environment, innovation is important to achieving business success. In this course, students examine how to be effective creative leaders who can readily apply imagination to resolve complex problems. Additionally, students explore methods to establish a work environment conducive to creative thinking. Students gain a set of proven methods, skills, and strategies that enable innovative breakthroughs to occur in a much more deliberate and predictable manner.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COMM 6506 - Personal Leadership: Mentoring and Coaching

(3 sem. cr.)
Mentoring requires an understanding and integration of many theories, including leadership, interaction, and communication, that support the development of effective leaders. Students in this course are helped to understand and apply skills of effective mentoring, such as active listening, learning, empowering, and enabling change. Students engage in practical exercises, such as using feedback to create interactive dialogue and asking questions to acquire a deeper understanding of mentoring and coaching processes. In consideration of modern and virtual environments, students explore the challenges of mentoring or coaching individuals in a virtual or team setting.

COMM 6507 - Analysis and Communication for the Financial Professional

(3 sem. cr.)
An essential skill for nearly all financial professionals is the ability to effectively communicate with the organization to manage internal and external relationships. The emphasis of this course is on the importance of communication in finance. The aim of the course is to provide students with the opportunity to practice using the tools required for effectual and efficient presentation of information while gaining critical-thinking, reading, and scholarly-writing skills. Students explore various written and presentational forms of communication that financial professionals use within organizational and managerial settings. Students examine techniques for developing and presenting white papers, memoranda used to communicate issues and recommendations to management, and financial and nonfinancial information. They study concepts in balanced communication coverage and how to adapt to constantly changing modes of communication, including social networking, blogging, and using professional organizations and training programs to their advantage. Through these activities, students gain a better understanding of the roles and responsibilities of the financial professional as well as the ethical methodologies required to maintain a professional obligation to the community and their clients.

COMM 6508 - Information Technology in the Organization

(3 sem. cr.)
Through a review of modern computer systems and the social and economic issues related to their use, students in this course are introduced to the conceptual foundations for designing, developing, and deploying large-scale management information systems. They investigate the role of information technology in an organization—particularly the collection, storage, and distribution of information for operations, planning, and decision making.
COMM 6509 - Training and Development

(3 sem. cr.)
The ability to manage and deliver training is an essential skill for human resource and performance improvement professionals. In this course, educators explore models, techniques, and best practices for managing and delivering training systems and modules. They focus on a range of topics, including managing the learning environment, selecting appropriate materials and assessments, and tracking learner performance and completion. Educators also explore technologies that support the planning, presenting, and managing of instructor-led and self-directed courses and training systems in face-to-face and virtual environments.

COMM 6510 - Managing a Sustainable Small Business

(3 sem. cr.)
Small businesses make up a large majority of all businesses in the United States. Students in this course are presented with the fundamentals of successfully establishing a sustainable small business enterprise. They address small business organization, operation, management, and sustainability. Business topics in the areas of planning, accounting, finance, and marketing are analyzed through the lens of the small business organization. Students analyze the unique relationships between government and small businesses. Topics include how to identify what determines the status of being a small business with local, state, and federal government agencies as well as how small businesses apply sustainable practices to be profitable. Students investigate the crucial role that technology plays in managing small business operations and evaluate popular software applications for efficiently managing those functions.

COMM 6900 - Communication Capstone

(3 sem. cr.)
Students in this course incorporate theory in practice to synthesize knowledge gained throughout the program. Through the creation of a communication research project, students examine how a communication professional can influence others to enhance positive social change in both organizations and communities. In addition, students reflect on their own communication strengths and opportunities, and develop a communication action plan. Through the completion of the research project and action plan, students have the opportunity to create portfolio pieces.
Prerequisites
- All required core and elective courses

COUN 6100 - Introduction to Mental Health Counseling

(5 cr.)
Students are introduced to the mental health counseling profession in this course.
Students explore the history, philosophy, and theoretical foundations of the profession, as well as the scope of practice, credentialing, and other professional issues. The focus of this course is on students as future mental health counselors. Students receive an overview of the mental health counseling program, the profession, and professional competencies.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6101 - Foundations for Graduate Study in Counseling

(1 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. They are provided with a foundation for academic and professional success as scholar-practitioners and social change agents. Topics include the relation of mission and vision to professional goals; development of the Professional Development Plan; strategies for online success; introduction to the online library; and introduction to critical thinking, professional writing, and academic integrity. The focus of course assignments is on the practical application of writing and critical-thinking skills and the promotion of professional and academic excellence as they relate to practice in counseling.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6102 - Introduction to Career Counseling

(5 cr.)
In today's unstable economy and fluctuating job market, individuals must contend with a gamut of challenges, including forced early retirement, working past retirement, changing jobs, and seeking further education to start new careers. For these reasons, counselors are often needed to help such individuals work through these issues. Through this course, students are introduced to the career counseling profession, including the history, philosophy, and theoretical foundations. They also explore the scope of practice, credentialing, and other professional issues. Through written assignments and other application-focused activities, students assess theories and issues specific to the career counseling role and consider their future in a professional context.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6103 - Introduction to Addiction

(5 cr.)
Students in this course are introduced to aspects of professional functioning as addiction counselors, including but not limited to role setting of addiction counselors; history,
philosophy, and trends in addiction counseling; professional standards for addiction counselors; effects of crises and trauma-causing events on persons with addictions; self-care; and ethical and culturally sensitive practice of addiction counseling. Students also explore competencies, credentialing, and other professional issues. Students explore the future as addiction counselors as well as an overview of the addiction counseling profession.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6110 - Foundations of Graduate Study in School Counseling♦

(1 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students are provided a foundation for academic and professional success as scholar-practitioners and social change agents. Topics include the relation of mission and vision to professional goals; development of the program of study and Professional Development Plan; strategies for online success; introduction to the online library; and introduction to critical thinking, professional writing, and academic integrity. Students view the New Student Orientation and read and agree to the Counseling Student Guide. The focus of the course assignments is on the practical application of writing and critical-thinking skills and the promotion of professional and academic excellence as they relate to practice in school counseling.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6111 - Introduction to School Counseling♦

(5 cr.)
This is a foundation course designed to introduce students to the school counseling profession. Students taking the course explore the history of the profession; the roles, functions, and professional identity of the school counselor; and the current models of school counseling programs such as the American School Counselor Association (ASCA) national model. Students develop knowledge of the current issues and directions for the profession, as well as the requirements and challenges of being a professional school counselor.

Prerequisites
  • COUN 6101

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6145 - Crisis Management♦
Small- and large-scale disasters of all types continue to abound. Communities need trained individuals who are prepared to respond to such incidents and who can help plan for future disasters as well as train others to plan and respond. In this course, students learn the fundamentals of crisis management and crisis leadership. They develop an understanding of the theories and models related to crises, disasters, and other events caused by trauma. Students also learn about ethical, legal, and diversity considerations in crisis and trauma response. Through analyses of topical literature, applications, and discussions, students gain a practical understanding of the models for training and supporting other counselors in the areas of crisis response applicable to community, national, and international crises. Employing concepts learned in the course, students develop a crisis management plan for their own community.

COUN 6201 - Introduction to Marriage, Couple, and Family Counseling

Counselors seeking to work with couples and families must understand the changing landscape of family dynamics and the diverse perspectives through which they must practice. Students in this course are introduced to the specialty area of marriage, couple, and family counseling, and they receive an orientation to professional organizations, preparation standards, credentials relevant to the specialty area, and legal and ethical issues. Students explore the history, philosophy, and trends in marriage, couple, and family counseling and examine a variety of theoretical perspectives, techniques, and related concepts, such as systems, family development, wellness, and family lifecycle. Through topical literature, case studies, and shared experiences, students assess societal trends and treatment issues related to working with multicultural and diverse family systems. They also consider future trends and potential challenges in the field.

COUN 6201A - Introduction to Marriage, Couple, and Family Counseling
Students are introduced to the specialty area of marriage, couple, and family counseling in this course. They are provided an orientation to professional organizations, preparation standards, and credentials relevant to the specialty area. Through this course, students will be exposed to the history, philosophy, and trends in marriage, couple, and family counseling. A variety of theoretical perspectives, techniques, and related concepts (e.g., systems, family development, wellness, and family life cycle) are reviewed. Societal trends and treatment issues related to working with multicultural and diverse family systems are explored. Legal and ethical issues related to working in this specialty area are addressed.

**COUN 6202 - Theories, Treatment, and Case Management of Addiction**

Students in this course explore treatment intervention and case management strategies for addiction counseling, using various models of treatment, recovery, relapse prevention, and continuing care for addictive disorders. They learn treatment principles and philosophies of addiction-related programs, and they increase self-awareness as addiction counselors by assessing their own limitations; recognizing when they need additional resources and support; and knowing when and where to refer clients when appropriate. In addition, students examine substance abuse policies and regulatory processes that influence service delivery in addiction counseling.

**Prerequisites**

- MS in Clinical Mental Health Counseling
  - COUN 6785
  - COUN 6730

- MS in School Counseling
  - COUN 6322
  - COUN 6320

- MS Dual Degree in Clinical Mental Health Counseling and School Counseling
  - COUN 6730D
  - CPLB 601L

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**COUN 6204 - Assessment in Counseling and Addiction**

Students receive an overview of the different types of diagnostic and assessment tools used in addictions counseling based on professional standards for testing. Students engage in a comprehensive examination of psychometric properties used to develop and evaluate these instruments. They learn various models and approaches to clinical
evaluations for addictive disorders and examine the appropriate use of assessments for addictions. Moreover, students learn how to assess for a biopsychosocial and spiritual history, and they address ethical, legal, and sociocultural issues, including cultural bias and fairness.

Prerequisites

**MS in Clinical Mental Health Counseling**

- COUN 6785
- COUN 6730

**MS Dual Degree in Clinical Mental Health Counseling and School Counseling**

- COUN 6730D
- CPLB 601L

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**COUN 6210 - Ethics and Legal Issues in School Counseling**

(5 cr.)

In this course, students are provided with an introduction to the field of professional counseling and the foundations of school counseling. Students address the following topics: history, philosophy, client and counselor advocacy with an emphasis on the counselor’s role as social change agent, cultural dynamics, consultation, and trends in professional counseling. The counseling profession’s ethical standards are also addressed with an emphasis on the American School Counselor Association and American Counseling Association code of ethics and counselor ethical decision-making processes.

Prerequisites

- COUN 6301

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**COUN 6214 - Lifespan Development**

(5 cr.)

In this course, students are provided with an advanced overview of development through the lifespan, including prenatal, childhood, and adolescent phases. Basic developmental processes and theories are examined and applied to developmental milestones that occur within these phases of development. Themes of diversity are highlighted throughout the course. Additional topics include ethics, research, global perspectives, and social change.

Prerequisites

- COUN 6210
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6215 - Lifespan Development♦

(5 cr.)
In this course, students are provided with an overview of development through the lifespan, including childhood, adolescence, adulthood, and aging experiences. Physical, social, emotional, and cognitive issues are covered, as well as the expected developmental milestones during each of these phases of development. The latest research in attachment theory, brain research, and aging is included, and themes of diversity issues related to developmental research are highlighted throughout the course.
Prerequisites
MS in Clinical Mental Health Counseling
- COUN 6316
- COUN 6306
- COUN 6723
MS Dual Degree in Clinical Mental Health Counseling and School Counseling
- COUN 6311
- COUN 6360

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6250 - Group Process and Dynamics♦

(5 cr.)
Group work is an effective counseling method that allows group members to share perspectives and provide useful feedback and information in a structured setting. Using relevant literature, multimedia resources, and a scholar-practitioner model, students examine stages of group process; group dynamics; and ethical, legal, and training standards. Students examine the types of counseling groups as well as the unique leadership skills required for each type of group. Students are provided with a comprehensive review of theoretical approaches applicable to group counseling. Students engage in a variety of practical application assignments and discussions, focusing on the efficacy of using group counseling with multicultural and diverse populations. Students will develop an evidence-based mental health group proposal appropriate for potential implementation in field experience. Students engage in a process of self-reflection to increase self-awareness for enhanced group leadership knowledge and skills.
Group lab is a separate 0-credit, required course that occurs simultaneously with the Group Process and Dynamics course. Students need to ensure that they are enrolled and participating in both courses.

Prerequisites

- COUN 6215
- CPLB 601L

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6301 - Theories of Counseling♦

(5 cr.)
This course introduces theories of counseling and psychotherapy to prepare students to conceptualize problems and respond with appropriate, evidence-based interventions and techniques. Students will become familiar with the origin, key concepts, and interventions and techniques of each of the theories presented. Students will develop an awareness of how counseling theories drive the treatment process and apply theories to diverse case studies. A major focus of this course is to support students as they develop their personal theoretical orientation.

Prerequisites

- COUN 6110

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6302 - Counseling Techniques in the Schools♦

(5 cr.)
Students in this course focus on principles and skills related to interviewing and observation as well as related legal, ethical, and cultural issues. Students gain practice in conducting interviews, making behavioral observations, collecting and interpreting data during an interview, and developing written reports of findings.

Prerequisites

- COUN 6111
- COUN 6301

Note: In addition to the course materials listed by the university bookstore, students are required to have access to a video recording device, a tripod, and an audio recording device, which they will begin using the first week of class.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
COUN 6306 - Ethics and Legal Issues in Counseling♦

(5 cr.)
Students in this course are provided with an introduction to the field of professional counseling and the foundations of counseling. Students explore the history, philosophy, cultural dynamics, and trends in professional counseling. They examine consultation as well as client and counselor advocacy, focusing on the counselor’s role as social change agent. Students also examine and apply ethical standards of the counseling profession, including the American Counseling Association (ACA) Code of Ethics and counselor ethical decision-making processes. Through a final reflective project designed to influence their future ethical framework, students define their ethical perspectives, including influences, values, and goals.

Prerequisites
• COUN 6722

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6311 - Leadership, Advocacy, and Consultation in the Schools♦

(5 cr.)
Students in this course explore the role of leader and consultant in a school setting. The development of a data-driven comprehensive school counseling program is emphasized in this course along with specific strategies for communicating with key stakeholders, working to close the achievement gap, and working within the mission of schools to advocate for student needs.

Prerequisites
MS in School Counseling
• COUN 6302

MS Dual Degree in Clinical Mental Health Counseling and School Counseling
• COUN 6316
• COUN 6306

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6312 - Multicultural Counseling♦

(5 cr.)
Students in this course have the opportunity to increase their awareness, knowledge, skills, and advocacy related to working with clients from a multicultural perspective. Students foster self-understanding of their own cultural-identity development, biases, stereotypes, values, and strengths while gaining self-awareness of the effects of power,
privilege, and marginalization within the counseling relationship. Further, students can gain knowledge of various issues within diversity. Students explore various theories of multicultural counseling and the role of social justice and advocacy in counseling.

Prerequisites
- COUN 6311

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6314 - Program Evaluation

(5 cr.)
The skills required to assess research and work effectively with stakeholders are among the many proficiencies required of professionals who evaluate and develop programs. In this course, students examine these skill sets as well as the history, theory, and major approaches underlying program evaluation. Students learn how to select appropriate quantitative and/or qualitative models and techniques to perform evaluations, demonstrate program effectiveness, and disseminate results. Additionally, students explore the procedures and techniques involved in offering their evaluation services to a specific group or organization. They also examine strategies to gain stakeholder interest in developing appropriate standards, research progress, and evaluation outcomes. Students acquire practical experience evaluating a program of interest through which they outline organizational structure, identify stakeholders, employ evaluation models, explain steps in planning, and predict possible challenges or stakeholder fears, for which they recommend solutions.

Prerequisites
- COUN 6305
- COUN 6310

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6316 - Techniques in Counseling

(5 cr.)
Personal attitudes, values, and beliefs often affect a counselor's ability to establish an appropriate relationship and rapport with clients. In this course, students learn to evaluate their personal attitudes and beliefs to positively influence their counseling approaches. They explore principles and skills related to interviewing and observation, and they examine related legal, ethical, and cultural issues. Students gain practice in conducting interviews, making behavioral observations, collecting and interpreting data during an interview, and developing written reports of findings. Synthesizing concepts, skills, and personal reflections, students demonstrate their ability to engage in a
counseling session using techniques learned throughout the course.

Prerequisites
MS in Clinical Mental Health Counseling
- COUN 6722

MS Dual Degree in Clinical Mental Health Counseling and School Counseling
- COUN 6111

Note: Students are required to have access to a video recording device, a tripod, and an audio recording device, which they will begin using the first week of class.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6317 - Child and Adolescent Counseling
(5 cr.)

Students in this course are provided with an overview of empirically supported theories and techniques for working with children and adolescents in the counseling process. The course is designed to enhance students' theoretical and practical understanding of the systemic interplay among children, adolescents, families, and the stakeholders in their lives. Emphasis is given to a family-systems view of intervention, with specific attention to developmental, cognitive, behavioral, educational, multicultural, and environmental issues. Students will be exposed to a distinct group of empirically supported interventions aimed at improving individual and family functioning. Legal and ethical issues related to counseling children and adolescents will be explored.

Prerequisites
MS in School Counseling
- COUN 6311
- SPLB 671L

MS Dual Degree in Clinical Mental Health Counseling and School Counseling
- COUN 6626
- CPLB 601L

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6320 - Group Counseling and Guidance in the Schools
(5 cr.)

In this course, students are prepared to work with groups in school settings. They examine group theory, process, and dynamics and apply them through the creation of a small group plan. Using relevant literature, media resources, and practitioner based approach, students develop an understanding of ethically, culturally, and contextually relevant group practice, group leaders' roles and responsibilities, the relevance and
purpose of group work, and strategies for using groups to foster social change.

Prerequisites
- COUN 6317
- SPLB 671L

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6322 - Crisis, Trauma, and Disaster Response♦

(5 cr.)
This course is designed to provide students with an understanding of the personal and systemic impact of crises, disasters, and other trauma-causing events on children, adolescents, and families within schools and communities. Students examine theories and response models as they relate to sexual trauma, crisis in individuals and families, crisis in the community, crisis in the school, and crisis in the nation and in the world. They explore topics including crisis assessment, counselor competencies, vicarious trauma and countertransference, specific related diagnoses, and advocacy. Students consider cultural, legal, and ethical issues related to crisis, trauma, and disaster events and response.

Prerequisites
- COUN 6311
- SPLB 671L

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6324 - Assessment in Counseling and Education♦

(5 cr.)
Students in this course are provided with an overview of individual and group approaches to assessment and evaluation used in a variety of counseling and educational settings. Students examine the psychometric properties used to develop and evaluate these instruments. Topics include a historical perspective of assessment, basic concepts of standardized and nonstandardized testing, measures of central tendency, normative sampling and standardization, reliability and validity, assessment report writing, test score interpretation, and test construction. Students also address the ethical, legal, and multicultural issues related to selecting, administering, and interpreting assessment and evaluation instruments and techniques in counseling.

Prerequisites
- COUN 6317
- SPLB 671L
- COUN 6322
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6326 - Research and Program Evaluation♦

(5 cr.)
Students in this course are introduced to evaluation research and provided with a foundation in the design of qualitative, quantitative, and mixed-method approaches to counseling research and evaluation. Students learn the strengths and limitations of each method and under what circumstances each design would be most appropriate. They consider the importance of scholarly writing and learn how to identify a topic for research and how to conduct a literature search. Students explore the history and theory underlying program evaluation, approaches to evaluation, and techniques used to perform the evaluation and demonstrate program effectiveness. Additionally, students explore the procedures involved in offering their evaluation services to a specific group or organization. They also examine strategies to gain stakeholder interest in developing appropriate standards, research progress, and evaluation outcomes. Students gain hands-on experience developing a research proposal in which they address key elements, such as collecting and analyzing data, writing an introduction, stating a purpose for the study, identifying research questions and hypotheses, using theory, and communicating the significance of the study. Additionally, students consider the legal and ethical issues associated with human subjects’ protection.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6328 - Research and School Counseling Program Evaluation♦

(5 cr.)
Students in this course are provided with a foundation in research methods, statistical analysis, needs assessment, and program evaluation in counseling. They are introduced to qualitative, quantitative, and mixed-method approaches; single case designs; action research; and outcomes research. Students can learn how to identify a topic for research, conduct a literature search, and use research to inform evidence-based practice. They also learn the importance of scholarly writing. Students examine the principles, models, and applications of needs assessment and program evaluation, and they learn to use the findings to effect program modifications. Emphasis will also be on the ethically and culturally relevant strategies for interpreting and reporting the results of research and/or program evaluation studies. Statistical methods used in conducting research and program evaluation are reviewed.

Prerequisites
- COUN 6320
- COUN 6324
COUN 6333 - Vicarious Trauma and Compassion Fatigue

(5 cr.)
This course is designed to provide students with an understanding and awareness of vicarious trauma and compassion fatigue for first responders. Students examine intervention strategies and models of treatment and prevention of vicarious trauma and compassion fatigue through the lens of counselor educator, supervisor, and clinician. Assignments include conducting a needs assessment and examining the use of standardized instruments. Students propose social change recommendations related to vicarious trauma and compassion fatigue to promote informed and competent trauma-response helping professionals. Students emphasize the ethical, legal, multicultural, and spiritual implications for wellness and self-care, including personal, professional, and organizational elements. As a final project, students interview a first responder and develop an organizational wellness plan for his or her setting.

Prerequisites
MS in Clinical Mental Health Counseling
- COUN 6785
- COUN 6730
- CPBL 602L

MS Dual Degree in Clinical Mental Health Counseling and School Counseling
- COUN 6730
- CPLB 601L

COUN 6336 - Crisis, Trauma, and Disaster Response

(5 cr.)
This course is designed to provide students with an understanding of the personal and systemic impact of crises, disasters, and other trauma-causing events on individuals, couples, families, and communities. Students examine theories and response models as they relate to sexual trauma, crisis in individuals and families, crisis in the community, and crisis in the nation and in the world. They explore and discuss topics related to counselor competencies, vicarious trauma and counter transference, specific diagnoses, and advocacy. Students also engage in assignments designed to provide practical application of crisis assessment. Through contemporary articles and case studies, they consider and discuss cultural, legal, and ethical issues related to crisis, trauma, and
disaster events and response.

Prerequisites
- COUN 6785
- COUN 6730
- CPBL 602L

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6346 - Child and Adolescent Counseling

(5 cr.)
In this course, students examine empirically supported theories and techniques for working with children and adolescents in the counseling process. Students work toward enhancing their theoretical and practical understanding of the systemic interplay among children, adolescents, families, and the stakeholders in their lives. They engage in coursework and readings focused on a family-systems view of intervention, and they devote special attention to developmental, cognitive, behavioral, educational, multicultural, and environmental issues. Students assess a distinct group of empirically supported interventions aimed at improving individual and family functioning. They also explore the legal and ethical issues related to counseling children and adolescents.

Prerequisites
- COUN 6785
- COUN 6730

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6346A - Child and Adolescent Counseling

(5 cr.)
In this course, students are provided with an overview of empirically supported theories and techniques for working with children and adolescents in the counseling process. The course is designed to enhance students' theoretical and practical understanding of the systemic interplay among children, adolescents, families, and the stakeholders in their lives. Emphasis is given to a family-systems view of intervention, with specific attention to developmental, cognitive, behavioral, educational, multicultural, and environmental issues. Students will be exposed to a distinct group of empirically supported interventions aimed at improving individual and family functioning. Legal and ethical issues related to counseling children and adolescents will be explored.

COUN 6351 - Psychological Assessment: Personality
Students in this course are introduced to basic skills related to assessment of personality and social-emotional functioning. Students are presented with theoretical basis, skill sets, and examples, and they learn to establish and maintain rapport in a testing situation; administer, record, and score specific measures of personality and social-emotional functioning; interpret test results; and summarize results in a written report. The focus is on applied aspects of psychological testing.

**Prerequisites**
- Matriculation into the Counseling Psychology or Clinical Psychology specializations, or MS in Clinical Mental Health Counseling students by permission; a grade of "B" or better in COUN 6315 or in another graduate course in tests and measurements.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 6354 - Academic and Career Counseling**

(5 cr.)
Academic and career counselors are concerned with student life on all levels to support the personal and educational development of each student. Students in this course examine educational, developmental, and counseling theories related to academic and career counseling. The focus of this course is on academic and career development from elementary school through college. Students will explore intellectual and emotional intelligence, multicultural issues, attitudes, values, and psychosocial needs of the life-long learner. Students will gain skills required to assist a highly diversified student body in academic planning, career exploration, decision making, and personal growth.

**Prerequisites**
- SPLB 671L
- COUN 6322
- COUN 6320

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 6356 - Advanced Theory and Application in Marriage, Couples, and Family Counseling**

(5 cr.)
This is an advanced course in the study and application of family systems theory. Students apply content knowledge gained in earlier courses 6201/6726 and other core courses to complex and comprehensive case studies. The case studies are rich and inclusive of current issues in family and couples counseling, such as the impact of
technology, crisis intervention, addiction, school and community factors, ethical
dilemmas, socio-cultural considerations, and issues related to social justice and
advocacy. Students engage in the processes of clinical assessment, treatment planning,
goal writing, care coordination, discharge planning, clinical documentation, ethical
practice, and safety planning. Course work also cultivates students' case
conceptualization and case presentation skills.

Prerequisites
- COUN 6722
- COUN 6316

*Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.*

**COUN 6360 - Assessment in Counseling and Education**

(5 cr.)
Assessments are important tools that counselors use to gain information about clients
and to aid practice. Therefore, counselors must know what assessment tools are
available; have the ability to read, interpret, and analyze results of tests; and keep
abreast of changing trends in working with assessments as well as new assessment tools
and changes in technology. Students in this course are provided with an overview of
assessments used in counseling and education as well as the responsibilities of
counselors using assessments. Students learn about the different types of tests used in
clinical, educational, and organizational settings, and they examine the psychometric
properties used to develop and evaluate these instruments. They also explore
normative sampling and standardization, reliability and validity, test score interpretation,
and test development. Additionally, students assess and discuss ethical, legal, and
sociocultural issues, including cultural bias and fairness. A foundation for the course is
professional standards for testing.

Prerequisites
**MS in Clinical Mental Health Counseling**
- COUN 6316
- COUN 6306

**MS Dual Degree in Clinical Mental Health Counseling and School Counseling**
- COUN 6316
- COUN 6306
- COUN 6723

*Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.*

**COUN 6361 - Human Sexuality**
(3 cr.)
Students in this course examine the place of sexuality in human life, including the
influences of biological, psychological, social, and cultural factors. Students look
particularly at the interface of sexual issues in clinical work. Special attention is paid to
the issues of gender, culture, sexual health, and sexual dysfunction from
a sexological perspective. This course is as much about learning about human sexuality
and helping clients with sexual issues as it is about exploring students’ own ideas, values,
bases, and discomfort about sex and sexuality. It is both an academic, intellectual
journey and a personal adventure.
Prerequisites
MS in Clinical Mental Health Counseling
  • COUN 6785
  • COUN 6730
MS in School Counseling
  • COUN 6322
  • COUN 6320
MS Dual Degree in Clinical Mental Health Counseling and School Counseling
  • COUN 6730D
  • CPLB 601L

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

COUN 6361S - Human Sexuality♦

(3 cr.)
Students are provided with a framework for understanding human sexuality in the
context of couple, marriage, and family counseling in this course. Students explore
empirically supported counseling approaches related to sexual functioning, intimacy,
gender, and sexual orientation. They use a systemic framework for understanding the
role and impact of sexuality on couples, marriages, and families. Students also explore
and discuss specific topics related to issues of sexual diversity, gender identity, sexual
offending, trauma, and victimization. Legal and ethical issues related to addressing
sexuality in counseling are addressed.
♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more
information.

COUN 6401 - School Counseling Practicum

(3 cr.)
The Counseling Practicum is an introduction to the capstone experience. During the
practicum course, students begin to synthesize and apply the knowledge, skills, and
professional dispositions learned throughout their program of study. Students must
secure a field experience site, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for practicum enrollment. Once enrolled, students will spend a minimum average of 8–10 hours per week at the site that they have secured. They will complete direct counseling hours, weekly individual or triadic supervision with their site supervisor, administrative duties, and other activities as assigned by the site. Concurrently, students will participate in weekly case conceptualization activities, 2 hours of group supervision per week with their faculty supervisor, and other clinically relevant assignments directly related to the work at the site. There are multiple synchronous components in this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites

- CPBL 602L
- Approval from the Office of Field Experience

COUN 6402 - Working With Military Spouses, Families, and Children♦

(5 cr.)
The nature of military work responsibilities impacts not only military personnel but their families as well. Frequent family relocations, extensive deployments, parent-child separation, and high-risk jobs all contribute to unique family dynamics. This course is designed to educate students about the experience and unique support needs of military personnel and their families.

Prerequisites

MS in Clinical Mental Health Counseling
- COUN 6785
- COUN 6730

MS in School Counseling
- COUN 6322
- COUN 6320

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6404 - Military Culture♦

(5 cr.)
This course is designed to provide students with an understanding of military culture. The focus of this course is on understanding the world of work for military personnel; the sociocultural identity development of military personnel; the experience of military families; support for military personnel and their families; and socioeconomic and other lifestyle challenges for military personnel. As a result of this course, students will be more informed about the mental health and social support needs of these populations.
Prerequisites
MS in Clinical Mental Health Counseling
- COUN 6785
- COUN 6730
MS in School Counseling
- COUN 6322
- COUN 6320

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6404F - Military Culture♦

(5 cr.)
This course is designed to provide students with an understanding of military culture. The focus of this course is on understanding the world of work for military personnel; the sociocultural identity development of military personnel; the experience of military families; support for military personnel and their families; and socioeconomic and other lifestyle challenges for military personnel. As a result of this course, students will be more informed about the mental health and social support needs of these populations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6404S - Military Culture♦

(5 cr.)
This course is designed to provide students with an understanding of military culture. The focus of this course is on understanding the world of work for military personnel; the sociocultural identity development of military personnel; the experience of military families; support for military personnel and their families; and socioeconomic and other lifestyle challenges for military personnel. As a result of this course, students will be more informed about the mental health and social support needs of these populations.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6406 - Working With Military Spouses, Families, and Children

(5 cr.)
The nature of military work responsibilities impacts not only military personnel but their families as well. Frequent relocations, extended deployments, parent-child separation, and high-risk jobs all contribute to unique family dynamics. This course is designed to educate students about the experience and unique support needs of military personnel and their families.
COUN 6500 - School Counseling Internship I

(3 cr.)
Counseling Internship I is the first of a two-part capstone experience. During the Internship I course, site and faculty supervisors guide and evaluate students on their ability to synthesize and apply the knowledge, skills, and professional dispositions learned throughout their program of study. Students must secure a field experience site, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for Internship I enrollment. Once enrolled, students will spend a minimum average of 25–35 hours per week at the site that they have secured. They will complete direct counseling hours, weekly individual or triadic supervision with their site supervisor, administrative duties, and other activities as assigned by the site. Concurrently, students will participate in weekly case conceptualization activities, 2 hours of group supervision per week with their faculty supervisor, and other clinically relevant assignments directly related to the work at the site. There are multiple synchronous components in this course. Students must be prepared to be flexible in meeting the demands of this course.
Prerequisites
- Office of Field Experience approval required

COUN 6501 - School Counseling Internship II

(3 cr.)
Counseling Internship II is second of a two-part capstone experience. During the Internship II course, site and faculty supervisors guide and evaluate students on their ability to synthesize and apply the knowledge, skills, and professional dispositions learned throughout their program of study. Students must secure a field experience site, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for Internship II enrollment. Once enrolled, students will spend a minimum average of 25–35 hours per week at the site that they have secured. They will complete direct counseling hours, weekly individual or triadic supervision with their site supervisor, administrative duties, and other activities as assigned by the site. Concurrently, students will participate in weekly case conceptualization activities, 2 hours of group supervision per week with their faculty supervisor, and other clinically relevant assignments directly related to the work at the site. There are multiple synchronous components in this course. Students must be prepared to be flexible in meeting the demands of this course.
Prerequisites
- Successful completion of Counseling Internship I
- Office of Field Experience approval required

COUN 6511 - Treatment of Forensic Populations
In this course, students gain the foundational knowledge necessary to evaluate and subsequently treat many different forensic populations, such as sex offenders, substance abusers, and white-collar criminals. Students analyze the use of traditional forms of intervention, including individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice. Applying concepts and theories learned in the course, students develop a project scenario in which they feature an offender and describe treatment approaches as well as related ethical, legal, and multicultural factors that may impact treatment. Reflecting on the course, students also consider and discuss professional identity and goals.

Prerequisites
MS in Clinical Mental Health Counseling
- COUN 6785
- COUN 6730

MS Dual Degree in Clinical Mental Health Counseling and School Counseling
- COUN 6730
- CPLB 601L

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6512 - Juvenile Justice, Delinquency, and Development

In this course, students focus on the various aspects of the juvenile justice system and the population that it serves. Students experience an overview of development theories, such as biological, cognitive, social-emotional, and social. Students apply these theories to cases of juvenile delinquency to determine appropriate prevention, treatment, and intervention strategies. They examine juvenile justice codes, case law, and effective methods for reporting offenses. Students also explore the changing landscape of the juvenile justice field based on current research of its population. Using theories presented in the course, students develop a delinquency-prevention or treatment program for their community, focusing on the underlying goal of social justice and change.

Prerequisites
MS in Clinical Mental Health Counseling
- COUN 6785
- COUN 6730

MS Dual Degree in Clinical Mental Health Counseling and School Counseling
- COUN 6730
- CPLB 601L

Students may take this as a non-degree course, which means they do not have to be enrolled in a
COUN 6512A - Juvenile Justice, Delinquency, and Development

(5 cr.)
The focus of this course is on the various aspects of the juvenile justice system and the population that it serves. As such, a thorough understanding of normal juvenile development is provided as a backdrop in which to better apply current juvenile justice codes and case law. The changing landscape of the juvenile justice field based on current research with its population will be covered.

COUN 6626 - Research Methodology and Program Evaluation

(5 cr.)
Students in this course are introduced to evaluating professional counseling research and provided with a foundation in program evaluation. Analysis of counseling literature is used to demonstrate the importance of research in advancing the counseling profession, including how to critique research to inform counseling practice. Students learn to distinguish between quantitative, qualitative, and mixed-methods designs, the strengths and limitations of each method, and under what circumstances each design would be most appropriate. Additionally, students consider the ethical and cultural issues associated with research involving human subjects. Through evaluating professional literature, students will gain an understanding of designs used in research and program evaluation and the use of data in counseling. Additionally, students explore the ethical underpinnings of program evaluation, approaches to evaluation, and techniques used to perform the assessment of program effectiveness. Students examine the procedures involved in evaluating the needs of a specific group or organization and gain hands-on experience conducting a search for professional counseling literature, developing an annotated bibliography, and identification of evidence-based counseling practices.

Prerequisites

- COUN 6215
- COUN 6720
- CPLB 601L

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6671 - Counseling Practicum

(3–5 cr.)
The Counseling Practicum is an introduction to the capstone experience. During the practicum course, students begin to synthesize and apply the knowledge, skills, and
professional dispositions learned throughout their program of study. Students must secure a field experience site, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for practicum enrollment. Once enrolled, students will spend a minimum average of 8–10 hours per week at the site that they have secured. They will complete direct counseling hours, weekly individual or triadic supervision with their site supervisor, administrative duties, and other activities as assigned by the site. Concurrently, students will participate in weekly case conceptualization activities, 2 hours of group supervision per week with their faculty supervisor, and other clinically relevant assignments directly related to the work at the site. There are multiple synchronous components in this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites
- All core courses in the program of study
- All residencies
- Approval by the Office of Field Experience

COUN 6682A - Counseling Internship I

(3–5 cr.)
Counseling Internship I is the first course of a two-part capstone experience. By the end of the two courses, students will have conducted 600 hours of focused application of their counseling skills, with 240 of those hours being direct services to their identified population/setting. During the Internship I course, site and faculty supervisors guide and evaluate students on their ability to synthesize and apply the knowledge, skills, and professional dispositions learned throughout their program of study. Students must secure a field experience site, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for Internship I enrollment. Once enrolled, students complete direct counseling hours, weekly individual or triadic supervision with their site supervisor, administrative duties, and other activities as assigned by the site. Concurrently, students participate in course activities each week designed to integrate their experiences at the site into their skills and professional identity as counselors-in-training, as well as participate in 2 hours of group supervision per week with their faculty supervisor and other clinically relevant assignments directly related to the work at the site. There are multiple synchronous components of this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites
- Successful completion of Counseling Practicum
- Approval by the Office of Field Experience

COUN 6682B - Counseling Internship II
Counseling Internship II is the second course of a two-part capstone experience. By the end of the two courses, students will have conducted 600 hours of focused application of their counseling skills, with 240 of those hours being direct services to their identified population/setting. During the Internship I course, site and faculty supervisors guide and evaluate students on their ability to synthesize and apply the knowledge, skills, and professional dispositions learned throughout their program of study. Students must secure a field experience site, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for Internship II enrollment. Concurrently, students participate in course activities each week designed to integrate their experiences at the site into their skills and professional identity as counselors-in-training, as well as participate in 2 hours of group supervision per week with their faculty supervisor and other clinically relevant assignments directly related to the work at the site. There are multiple synchronous components of this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites
- Successful completion of Counseling Internship I
- Approval by the Office of Field Experience

COUN 6720 - Diagnosis and Assessment

Students are provided with an overview of what is commonly referred to as abnormal psychology; however, students also consider factors constituting normalcy from multiple perspectives. Students explore the application of diagnostic criteria in various mental health work settings, such as schools, rehabilitation facilities, community agencies, and private practices. Using the scholar-practitioner model, students consider environmental and biological factors contributing to behavioral disorders. Students also examine techniques commonly used for the diagnosis and treatment of cognitive, emotional, and developmental disorders as well as for psychophysiological and psychosocial problems. Though coursework and discussions, students consider multicultural factors that complicate diagnosis as well as current trends and contemporary issues in clinical assessment and diagnosis.

Prerequisites
MS in Clinical Mental Health Counseling
- COUN 6723
- COUN 6360
- CPLB 601L

MS Dual Degree in Clinical Mental Health Counseling and School Counseling
COUN 6311
COUN 6360

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6721 - Advanced Psychopathology♦

(5 cr.)
In this course, students engage in an in-depth examination of current theory and research associated with major psychological disorders and their diagnoses. Students explore the primary classification systems in terms of their applicability and limitations as well as the factors that impact the assessment, diagnosis, and treatment of disorders along a continuum of mental health. Students engage in practical assignments, focusing on applications of the diagnostic criteria in terms of case conceptualization.
Prerequisites
• COUN 6720

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6722 - Theories of Counseling♦

(5 cr.)
This course introduces theories of counseling and psychotherapy to prepare students to conceptualize problems and respond with appropriate, evidence-based interventions and techniques. Students will become familiar with the origin, key concepts, and interventions and techniques of each of the theories presented. Students will develop an awareness of how counseling theories drive the treatment process and apply theories to diverse case studies. A major focus of this course is to support students as they develop their personal theoretical orientation.
Prerequisites
• COUN 6101
• COUN 6100

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6723 - Multicultural Counseling♦

(5 cr.)
Students in this course have the opportunity to increase their awareness, knowledge, skills, and advocacy related to working with clients from a multicultural perspective.
Students foster self-understanding of their own cultural-identity development, biases, stereotypes, values, and strengths while gaining self-awareness of the effects of power, privilege, and marginalization within the counseling relationship. Further, students can gain knowledge of various issues within diversity. Students explore various theories of multicultural counseling and the role of social justice and advocacy in counseling.

**Prerequisites**

**MS in Clinical Mental Health Counseling**
- COUN 6722

**MS Dual Degree in Clinical Mental Health Counseling and School Counseling**
- COUN 6316

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**COUN 6724 - Child Psychotherapy**

*(5 cr.)*

What are some of the special considerations of therapeutic treatment approaches in children? In this course, students have the opportunity to answer this question as they explore the psychological treatment of children from an array of theories and techniques, including play therapy. Students examine and discuss fundamentals and contemporary issues related to playroom organization, intake interviews, psychological assessment, treatment, evaluation, and intervention. They also explore typical play behaviors of children at various levels of development, cross-cultural aspects of play and their meanings as well as issues of cultural sensitivity and ethical practice. Students complete a final written assignment to synthesize course concepts and demonstrate their understanding of child psychotherapy.

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**COUN 6726 - Couples and Family Counseling**

*(5 cr.)*

An important skill for clinicians to have is a fundamental understanding of the dynamics and functioning of couples and families. Students in this course are introduced to concepts and applications in theoretical perspectives and techniques, classical schools of thought, and recent developments in couples and family therapy. Students explore culture, gender, and ethnicity factors in family development. They also review and compare theoretical frameworks in couples and family therapy, including psychosocial, psychodynamic, transgenerational, strategic, cognitive-behavioral, and social constructionist models. Additionally, students assess the roles of culture, spirituality, and values in understanding families.

COUN 6728 - Substance Abuse Counseling

(5 cr.)
Students in this course examine psychological aspects of addictions involving alcohol, prescription medications, and illegal substances. Current research in the field of dependency and addiction is explored. Topics include diagnosis, models of treatment, treatment planning, use of group and family treatment plans, and efficacy of treatment. Strategies to promote change, including the transtheoretical model of behavior change, are discussed.

COUN 6730 - Counseling Addictive Disorders♦

(5 cr.)
Students are provided with a foundation for counseling clients who have both substance-related and behavioral addictions. In this course, students examine historical perspectives and current trends in addiction treatment, as well as the biological and environmental influences on the etiology of addiction. Techniques and processes for assessment and diagnosis are examined in the context of individual, group, and systemic perspectives, with attention given to developmental and multicultural influences on addiction. Influences of public policy and advocacy on addiction and treatment are also examined.

COUN 6740 - Disaster, Crisis, and Trauma♦
There is no shortage of natural and human-made disasters, such as war, violence, genocide, and terrorist activities. Individuals and communities impacted by such disasters often need assistance from professionals who understand the social, cultural, and psychological complexities of crisis and trauma. Students in this course investigate how these incidents impact the psychology of individuals and groups. They assess traditional and current literature and complete practical exercises to learn about theories of trauma; actions and behaviors following a disaster; stress, coping, and adjustment difficulties; psychological disorders (e.g., post-traumatic stress disorder); and available resources to deal with trauma. Considering the various ways crisis professionals can promote positive social change, students devote special attention to the importance and development of culturally appropriate, service-delivery programs and interventions for individuals affected and traumatized by disasters.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6742 - Conflict, Conflict Resolution, and Peace♦

(5 cr.)
Through this course, students engage in a study of conflict, conflict resolution, and peace from psychological and social psychological perspectives. Students examine the concept of conflict and methods of addressing it, including management, resolution, and transformation; theories related to conflict resolution; approaches to conflict resolution, including negotiation and third-party interventions; and social psychological factors that influence conflict and conflict resolution. They also consider the influence of culture in conflict and conflict resolution; the role of ethics; intractable and international conflicts; the concept of peace; and how third-party approaches can contribute to the peace process. Students apply conflict resolution approaches to conflicts at all levels, from interpersonal to those involving whole nations.

COUN 6743 - Psychopharmacology♦
As client advocates, counselors rely on knowledge of psychotropic medications to inform treatment. This course introduces a spectrum of psychotropic medications used in the management of mental, behavioral, and addictive disorders. Students explore medication classification, drug interaction, and side effects. In addition, students distinguish between medical and psychopathological conditions that present in similar ways to addictive disorders. As part of a professional learning community, students collaborate with peers in written scholarly dialogue to explore psychopharmacological intervention in the treatment of addiction and other psychopathologies that may coexist. Students analyze factors that increase the likelihood for a person, community, or group to be at risk for disorders and examine the cultural and contextual factors considered in the ethical treatment of clients. Across counseling specializations, this course builds foundational clinical knowledge of the intersection of counseling and psychotropic medical treatment.

- CPBL 602L

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 6753 - Career Counseling

Students in this course are provided with the opportunity to develop practical skills in career and vocational assessment as well as functional knowledge of how career assessment can assist in the exploration and understanding of the interrelationship among work, family, and life roles. They examine major sources of career and work information available on the Internet as well as through printed material and computer-based guidance systems. Gaining practical career counseling experience, students administer, score, and interpret printed and computer-based assessments of career interests, beliefs, and values. Students learn how to integrate career development theory and assessment results with career clinical interventions. They also examine clinical and assessment issues, devoting attention to computer-based applications and multicultural implications.

COUN 6771 - Counseling Practicum

(3–5 cr.)
The Counseling Practicum is an introduction to the capstone experience. During the practicum course, students begin to synthesize and apply the knowledge, skills, and professional dispositions learned throughout their program of study. Students must secure a field experience site, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for practicum enrollment. Once enrolled, students will spend a minimum average of 8–10 hours per week at the site that they have secured. They will complete direct counseling hours, weekly individual or triadic supervision with their site supervisor, administrative duties, and other activities as assigned by the site. Concurrently, students will participate in weekly case conceptualization activities, 2 hours of group supervision per week with their faculty supervisor, and other clinically relevant assignments directly related to the work at the site. There are multiple synchronous components in this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites
- All core courses in the program of study
- All residencies
- Approval by the Office of Field Experience

COUN 6777 - Essentials of Public Health: A Case Study Approach

(5 cr.)
Students evaluate key aspects of public health, including its history, mission, essential services, core functions, infrastructure, resources, workforce, achievements, challenges, and career options in this course. They explore these facets through case studies, a hypothetical scenario, and journal articles. Although the main focus of this course is on the U.S. public health system, students are also exposed to global issues and views of public health.

COUN 6778 - Social, Behavioral, and Cultural Factors in Public Health

(5 cr.)
Students in this course are presented with an examination and analysis of the major social, behavioral, and cultural variables and issues that affect the health of populations, including community, gender, age, socioeconomic status, race, ethnicity, and
environment, as well as behavioral risks. Research, theoretical, and conceptual frameworks from the social and behavioral sciences are explored as applied to public health problems and the reduction of health disparities.

**COUN 6782A - Counseling Internship I**

(3–5 cr.)
Counseling Internship I is the first course of a two-part capstone experience. By the end of the two courses, students will have conducted 600 hours of focused application of their counseling skills, with 240 of those hours being direct services to their identified population/setting. During the Internship I course, site and faculty supervisors guide and evaluate students on their ability to synthesize and apply the knowledge, skills, and professional dispositions learned throughout their program of study. Students must secure a field experience site, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for Internship I enrollment. Once enrolled, students complete direct counseling hours, weekly individual or triadic supervision with their site supervisor, administrative duties, and other activities as assigned by the site. Concurrently, students participate in course activities each week designed to integrate their experiences at the site into their skills and professional identity as counselors-in-training, as well as participate in 2 hours of group supervision per week with their faculty supervisor and other clinically relevant assignments directly related to the work at the site. COUN 6785 - Social Change in Action: Prevention, Consultation, and Advocacy♦

(5 cr.)
In this course, students prepare for their roles as counselors and agents of social change
in the areas of prevention, consultation, and community advocacy with diverse
populations in different settings in order to bring about positive social change. At
Walden University, positive social change is "a deliberate process of creating and
applying ideas, strategies, and actions to promote the worth, dignity, and development
of individuals, communities, organizations, institutions, cultures, and societies. Positive
social change results in the improvement of human and social conditions" (Walden
University, 2018). Prevention, consultation, and advocacy are tools and methods to help
bring about positive social change in local communities and globally. Students examine
relationships between prevention, consultation, and advocacy giving consideration to
theoretical underpinnings, diversity, and ethics. Students also identify a mental health or
public health need in their community, develop a prevention plan to address that need,
engage in consultation with fellow students about the prevention plan, and explore
advocacy related to the community need. Applying prevention, consultation, and
advocacy in this course is all oriented toward promoting positive social change and
becoming more effective agents of change.

Prerequisites
MS in Clinical Mental Health Counseling
- COUN 6250
- COUN 6626
- CPLB 601L
- COUN 6726

MS Dual Degree in Clinical Mental Health Counseling and School Counseling

- CPLB 601L
• COUN 6726
• COUN 6317

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

COUN 6810S - Working With Exceptional Children♦

(5 cr.)
All learners possess unique characteristics, interests, and abilities. One of the most important responsibilities of school counselors is to consider the individual strengths and needs of students with exceptionalities and to collaborate with families and other stakeholders to individualize their education appropriately. In this course, education professionals learn about the Individualized Education Program (IEP) process, including referral, eligibility, and the importance of using research-based interventions. They explore stakeholder responsibilities, consider assessments and other forms of data that inform program planning, and develop IEP for a case study student. Education professionals consider the benefits of assistive technology and the role of transition planning in developing individualized education for learners with exceptionalities.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

COUN 6900 - CA LPCC Survey Course♦

(3 cr.)
Students in this course address a wide variety of California-specific content that is required by California’s Board of Behavioral Sciences, in order for a program graduate to be eligible for licensing as a Licensed Professional Clinical Counselor (LPCC). Topics include the distinctive dimensions of human diversity in the state, including immigrants and lesbian, gay, bisexual, and transgender (LGBT) individuals; abuse and abuse-reporting issues regarding children, spouses/partners, and seniors; aging and long-term care; and the recovery perspective in services for persons with mental health and/or addiction concerns.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

COUN 6910 - Legal Issues and Social Change in Forensic Psychology♦

(5 cr.)
Students in this course critically examine the effects of recent legislation, case law, and national policies on social change and on consultation and research in forensic psychology. Students have opportunities to explore and discuss contemporary and controversial issues such as the ethics of civil commitment, the death penalty, police use
of force, investigative practices to curtail terrorism, hate crimes, and transfer of juveniles to adult criminal court and how related legal issues affect forensic psychology and society in general. They also analyze ethical issues that often arise for forensic psychology professionals who are working in these areas.

**Prerequisites**

**MS in Clinical Mental Health Counseling**
- COUN 6785
- COUN 6730

**MS Dual Degree in Clinical Mental Health Counseling and School Counseling**
- COUN 6730
- CPLB 601L

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 6912 - Mental Health Law**

(5 cr.)
Mental health counseling professionals in all areas, especially criminal forensic psychological practice, may encounter various conflicts regarding psychological and legal approaches to treatment. Therefore, it is important for counselors to have a firm understanding of mental health law to avoid conflicts, such as issues of liability and malpractice. Students in this course are provided with the opportunity to examine several different aspects of the law related to mental health issues, including those constituting forensic psychological practice, such as civil matters (personal injury and civil competency issues) and criminal matters (competency to stand trial, criminal responsibility, diminished capacity, and death-penalty issues). Students employ recent court decisions and laws, such as the Tarasoff ruling, mandated reporting, and the Health Insurance Portability and Accountability Act (HIPAA), to examine how mental health law influences the practice of psychology and mental health counseling.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 6912A - Mental Health Law**

(5 cr.)
Students in this course examine several different aspects of the law related to mental health issues. Laws and court decisions that affect the practice of psychology—such as the Tarasoff ruling, mandated reporting, and the Health Insurance Portability and Accountability Act (HIPAA)—are addressed, as are the many areas of law that constitute forensic psychological practice, including civil matters (such as personal injury and civil competency issues) and criminal matters (such as competency to stand trial, criminal responsibility, diminished capacity, and death penalty issues).
COUN 8001 - Foundations of Graduate Study in Counselor Education and Supervision

(1 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as scholar-practitioners and social change agents. Students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence as they relate to counselor educators and supervisors.

COUN 8102 - Intersection of Crime, Psychology, and the Law♦

(5 cr.)
Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They have the opportunity to learn how forensic psychology links to legal systems as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students can acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the fields.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8110 - Professional Orientation, Ethics, and Identity

(5 cr.)
Students in this doctoral-level course work toward preparing their professional identity as counselor educators and supervisors. They explore the professional orientation and characteristics of counselors, counselor educators, and supervisors as well as related ethical and legal issues encountered in daily work situations. Students engage in discussions and assignments designed to provide practical application of competencies and responsibilities of counselor educators and supervisors. Students also examine the American Counseling Association (ACA) Code of Ethics and other relevant standards of practice as well as multicultural issues related to counselor preparation training. Through this course, students have the opportunity to gain professional awareness and create a professional development plan that can be implemented throughout their degree program.

COUN 8111 - Leadership and Organizational Change♦
Successful organizations in a rapidly changing and complex world require leaders who embrace change and are able to engage others in change. In this course, students use traditional literature, current articles, and interactive media to explore the qualities, characteristics, and skills of effective leaders as well as the theories, models, and relationships between leadership and organizational change. They assess the ethical issues and standards as well as the opportunities and challenges related to leading diverse organizations through change. Students also examine how current leaders employ leadership and organizational change to contribute to social change, and they consider how to use these lessons to make further positive changes within an organization or their own community.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8115 - Advanced Counseling Theories

There are many counseling theories available for professional use in practice. It is the responsibility of the counselor, however, to understand these theories, know which to use in specific settings and situation, and decide which are best suited to his or her own style or methods. In this course, students explore and evaluate major traditional and contemporary theories of the counseling profession, including psychoanalytic, person-centered, rational emotive behavioral therapy (REBT), multicultural, feminist, and solution-focused. Students apply these and other theories to diverse populations and settings. They also consider how they might advise students and supervisees who use these theories, and they analyze related challenges in teaching and supervising. In doing so, students consider the impact of their own psychosocial, racial, and ethnic identities. Finally, students develop a personal integrative theoretical orientation.

Prerequisites
- COUN 8110
- RESI 8801C

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8116 - Understanding Forensic Psychology

Students in this course will better understand how to be astute consumers of forensic psychology research. Basic principles of statistics, such as reliability and validity, are covered. At the same time, students learn how to critically read forensic psychology research and how to best apply research results to forensic clinical settings.
COUN 8120 - Professional Consultation, Program Evaluation, and Leadership

(5 cr.)
In this course, students work toward increasing their knowledge and skills related to the roles of consultant and program evaluator in community agencies, mental health settings, P–12 schools, and university settings. Through a variety of practical discussions and assignments, students explore leadership theory and skills; systems theory; consultation models and processes; program evaluation models and methods; ethical, legal, and professional issues; and availability of funding sources. Students synthesize knowledge and apply skills to case studies and real-life examples. They also apply the Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards to an evaluation of the components of a counselor education program.

Prerequisites
- COUN 8135
- RSCH 8110S
- COUN 8125
- COUN 8115
- RSCH 8210S
- COUN 8135
- RSCH 8310S
- RESI 8802C

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8125 - Teaching in Counselor Education

(5 cr.)
In this course, students prepare to become competent teachers of counselor education through the examination of various adult learning theories and methods to work effectively with different learning styles, cultural dynamics, and diversity. Counselor educators in training learn how to help counseling students acquire and apply knowledge and skills, and they examine methods to evaluate learning outcomes. Students also have the opportunity to examine effectiveness within their personal teaching practice. Incorporating knowledge, skills, and professional dispositions learned throughout the course, students have opportunities to design curriculum, teach in a variety of settings, evaluate, and receive feedback as a counselor educator in training.

Prerequisites
- COUN 8001
- COUN 8110
- RESI 8801C

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
COUN 8126 - Assessment in Forensic Psychology

(5 cr.)
In this course, students cover the varied assessment techniques and instruments used in the forensic psychology arena. Some of the assessment areas covered include risk assessment, juvenile evaluations, lie detection, custody evaluations, and many of the psychological tests and instruments that are used in these assessments. Students will receive a solid foundation of the knowledge of forensic psychology techniques and assessment, rather than specific skills, in administering and interpreting psychological tests.

COUN 8127 - Understanding Violence, Risk, and Threat Assessment

(5 cr.)
This course covers the varied assessment techniques and instruments used in the forensic psychology arena. Some of the assessment areas covered include risk assessment, juvenile evaluations, lie detection, custody evaluations, and many of the psychological tests and instruments that are used in these assessments. The course will provide a solid foundation of the knowledge of forensic psychology techniques and assessment rather than specific skills in administering and interpreting psychological tests.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8135 - Clinical Supervision

(5 cr.)
Clinical supervision of counselors and counselors in training requires in-depth knowledge of major conceptual approaches, methods, and techniques; evaluation; and ethical and legal issues related to supervisory interactions and responsibilities. Students in this course are provided with the opportunity to develop their professional identity and learn the skills of a clinical supervisor. Throughout this course, students engage in experiential applications, discussions, and self-reflective assignments that focus on the strategies for working with supervisees representing diverse backgrounds and developmental and learning styles. After a critical analysis of the purpose of supervision, theoretical frameworks, and models of supervision, students develop and apply their own theory of supervision in a practice setting in which each participant oversees a group of practicum students.

Prerequisites
- COUN 8110
- COUN 8115
COUN 8125

COUN 8136 - Criminal Behavior

(5 cr.)
This course provides students with contemporary views, theories, and case study analysis of maladaptive and criminal behavior, victimology and victim-offender relationships. A broad conceptualization of criminal behavior, such as that woven from biological, sociological and psychological perspectives is explored and evaluated. Theories of crime and the application of risk factors associated with criminal behavior are examined. Additionally, students will be exposed to specific offender groups, both violent and non-violent, including psychopaths, serial and mass murderers, criminal paraphiliacs, arsonists, white-collar thieves, scam artists, domestic terrorists, and others.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8140 - Professional Counselor as Scholar-Practitioner

(5 cr.)
The responsibility of scholar-practitioners in the field of counseling is to consume and disseminate information in clinical, academic, and administrative settings. Students are provided with a model for development as professional counselors and scholar-practitioners through which they learn to process knowledge and engage in professional advocacy in this course. Students explore relationship, professional-writing, and presentation proficiencies and apply these skills in practice scenarios through application-based assignments. They also identify and evaluate publication and presentation venues. Applying course concepts and acquired knowledge, students gain practical experience as scholar-practitioners as they complete a manuscript for submission to a peer-reviewed, counseling-related journal.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8146 - Crisis Management

(5 cr.)
Small- and large-scale disasters of all types continue to abound. Communities need trained individuals who are prepared to respond to such incidents and who can help plan for future disasters as well as train others to plan and respond. In this course, students learn the fundamentals of crisis management and crisis leadership. They develop an understanding of the theories and models related to crises, disasters, and other events caused by trauma. Students also learn about ethical, legal, and diversity considerations in crisis and trauma response. Through analyses of topical literature,
applications, and discussions, students gain a practical understanding of the models for training and supporting other counselors in the areas of crisis response applicable to community, national, and international crises. Employing concepts learned in the course, students develop a crisis management plan for their own community.

Prerequisites
- RESI 8802

COUN 8202 - Theories, Treatment, and Case Management of Addiction♦

(5 cr.)
Students in this course explore treatment intervention and case management strategies for addiction counseling, using various models of treatment, recovery, relapse prevention, and continuing care for addictive disorders. They learn treatment principles and philosophies of addiction-related programs, and they increase self-awareness as addiction counselors by assessing their own limitations; recognizing when they need additional resources and support; and knowing when and where to refer clients when appropriate. In addition, students examine substance abuse policies and regulatory processes that influence service delivery in addiction counseling.

♦Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8203 - Survey Research Methods

(5 cr.)
An in-depth study of a range of survey methods administered via in-person interview, self-report, phone interview, and Internet administration is introduced in this course. Topics will include survey design, administration, analysis, and addressing sources of bias. Students also review theoretical and empirical research on question and questionnaire effects. Students prepare in the practice of writing questions and designing questionnaires, both in general and in light of existing research.

Prerequisites
- RSCH 8110
- RSCH 8210
- RESI 8801C

COUN 8204 - Assessment in Counseling and Addiction♦

(5 cr.)
This course provides students with an overview of the different types of diagnostic and assessment tools used in addictions counseling. This course includes a comprehensive examination of psychometric properties used to develop and evaluate these instruments. Students will understand the various models and approaches to clinical
evaluations for addictive disorders and will understand the appropriate use of assessments for addictions. In addition, students will understand how to assess for a biopsychosocial and spiritual history. The course also addresses ethical, legal, and sociocultural issues including cultural bias and fairness. Professional standards for testing provide a foundation for the course.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

COUN 8215 - Lifespan Development♦

(5 cr.)
Students in this course are provided with an advanced overview of development through the lifespan, including prenatal, childhood, adolescent, adult, and late adult phases. Basic developmental processes and theories are examined and applied to developmental milestones that occur within these phases of development. Themes of diversity are highlighted throughout the course. Additional topics include ethics, research, global perspectives, and social change.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

COUN 8250 - Group Process and Dynamics♦

(5 cr.)
Group work is an effective counseling method that allows group members to share perspectives and provide useful feedback and information in a structured setting. Using relevant literature, multimedia resources, and a scholar-practitioner model, students examine stages of group process; group dynamics; and ethical, legal, and training standards. Students examine the types of counseling groups as well as the unique leadership skills required for each type of group. Students are provided with a comprehensive review of theoretical approaches applicable to group counseling. Students engage in a variety of practical application assignments and discussions, focusing on the efficacy of using group counseling with multicultural and diverse populations. Students will develop an evidence-based mental health group proposal appropriate for potential implementation in field experience. Students engage in a process of self-reflection to increase self-awareness for enhanced group leadership knowledge and skills.

Group lab is a separate 0-credit, required course that occurs simultaneously with the Group Process and Dynamics course. Students need to ensure that they are enrolled and participating in both courses.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

COUN 8310 - Research Design♦
Students in this course build a foundation in the design of qualitative, quantitative, and mixed-method approaches to psychological research. Students learn the strengths and limitations of each method and under what circumstances each approach would be the most appropriate research design. Students learn how to identify a topic for research, how to conduct a literature search, and the importance of scholarly writing. Students learn to write a research proposal, addressing the following key elements: researching, writing an introduction, stating a purpose for the study, identifying research questions and hypotheses, using theory, defining the significance of the study, and collecting and analyzing data. Students are exposed to legal and ethical issues associated with human subjects' protection.

Prerequisites
- COUN 6305

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8311 - Leadership, Advocacy, and Consultation in the Schools♦

(5 cr.)
Students in this course explore the role of leader and consultant in a school setting. The development of a data-driven comprehensive school counseling program is emphasized in this course along with specific strategies for communicating with key stakeholders, working to close the achievement gap, and working within the mission of schools to advocate for student needs.

◊ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8314 - Program Evaluation♦

(5 cr.)
The skills required to assess research and work effectively with stakeholders are among the many proficiencies required of professionals who evaluate and develop programs. In this course, students examine these skill sets as well as the history, theory, and major approaches underlying program evaluation. Students learn how to select appropriate quantitative and/or qualitative models and techniques to perform evaluations, demonstrate program effectiveness, and disseminate results. Additionally, students explore the procedures and techniques involved in offering their evaluation services to a specific group or organization. They also examine strategies to gain stakeholder interest in developing appropriate standards, research progress, and evaluation outcomes. Students acquire practical experience evaluating a program of interest through which they outline organizational structure, identify stakeholders, employ evaluation models, explain steps in planning, and predict possible challenges or stakeholder fears, for which
they recommend solutions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8315 - Tests and Measurements✦

(5 cr.)
Students in this course receive an overview of the different types of tests used in clinical, educational, and organizational settings. Included in the overview is a comprehensive examination of psychometric properties used to develop and evaluate these instruments. Topics include normative sampling and standardization, reliability and validity, test score interpretation, and test development. Students also address ethical, legal, and sociocultural issues, including cultural bias and fairness. Professional standards for testing provide a foundation for the course.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8316 - Techniques of Counseling✦

(5 cr.)
Students in this course focus on principles and skills related to interviewing and observation as well as related legal, ethical, and cultural issues. Students gain practice in conducting interviews, making behavioral observations, collecting and interpreting data during an interview, and developing written reports of findings.

Note: In addition to the course materials listed by the university bookstore, students are also required to have access to a video recording device, a tripod, and an audio recording device, which they will begin using the first week of class.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8317 - Program Evaluation✦

(5 cr.)
The skills required to assess research and work effectively with stakeholders are among the many proficiencies required of professionals who evaluate and develop programs. In this course, students examine these skill sets as well as the history, theory, and major approaches underlying program evaluation. Students learn how to select appropriate quantitative and/or qualitative models and techniques to perform evaluations, demonstrate program effectiveness, and disseminate results. Additionally, students explore the procedures and techniques involved in offering their evaluation services to a specific group or organization. They also examine strategies to gain stakeholder interest in developing appropriate standards, research progress, and evaluation outcomes. Students acquire practical experience evaluating a program of interest through which
they outline organizational structure, identify stakeholders, employ evaluation models, explain steps in planning, and predict possible challenges or stakeholder fears, for which they recommend solutions.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8319 - Group Counseling and Guidance in Schools♦

(5 cr.)
In this course, students are prepared to work with groups in school settings. They examine group theory, process, and dynamics and apply them through the creation of a small group plan. Using relevant literature, media resources, and practitioner based approach, students develop an understanding of ethically, culturally, and contextually relevant group practice, group leaders' roles and responsibilities, the relevance and purpose of group work, and strategies for using groups to foster social change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8320 - Counseling Practicum

(3 cr.)
The focus of this course is on experiential learning, which is an essential component of applied professional training. Students complete a supervised practicum experience at an approved site with a minimum of 100 hours, allowing them to develop their counseling skills and professional knowledge while under supervision. Students communicate their learning at the site with their colleagues and instructor in the practicum course and gain additional knowledge regarding clinical practice by interacting with their colleagues and instructor. There is an offline requirement of a group supervision teleconference once a week with the practicum instructor.
Prerequisites
- Approval of the coordinator of field training

COUN 8326 - Research and Program Evaluation♦

(5 cr.)
Students in this course are provided with a foundation in research methods, statistical analysis, needs assessment, and program evaluation in counseling. They are introduced to qualitative, quantitative, and mixed-method approaches; single case designs; action research; and outcomes research. Students can learn how to identify a topic for research, conduct a literature search, and use research to inform evidence-based practice. They also learn the importance of scholarly writing. Students examine the principles, models, and applications of needs assessment and program evaluation, and they learn to use the findings to effect program modifications. Emphasis will also be on
the ethically and culturally relevant strategies for interpreting and reporting the results of research and/or program evaluation studies. Statistical methods used in conducting research and program evaluation are reviewed.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 8333 - Vicarious Trauma and Compassion Fatigue♦**

(3 cr.)
Through this course, students gain an understanding and awareness of vicarious trauma and compassion fatigue for trauma-response-helping professionals. They examine intervention strategies and models of treatment and prevention of vicarious trauma and compassion fatigue through the lens of counselor educators, supervisors, and clinicians. Applying course concepts, students gain hands-on practice conducting a needs assessment and examining the use of standardized instruments. They also propose social change recommendations related to vicarious trauma and compassion fatigue to promote informed and competent trauma-response-helping professionals. Students engage in course assignments that emphasize the ethical, legal, multicultural, and spiritual implications for wellness and self-care, including personal, professional, and organizational elements. As a final project, students interview a trauma-response-helping professional and develop an organizational wellness plan for their setting.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 8336 - Crisis, Trauma, and Disaster Response♦**

(3 cr.)
This course is designed to provide students with an understanding of the personal and systemic impact of crises, disasters, and other trauma-causing events on individuals, couples, families, and communities. Students examine theories and response models as they relate to sexual trauma, crisis in individuals and families, crisis in the community, and crisis in the nation and in the world. They explore and discuss topics related to counselor competencies, vicarious trauma and counter transference, specific diagnoses, and advocacy. Students also engage in assignments designed to provide practical application of crisis assessment. Through contemporary articles and case studies, they consider and discuss cultural, legal, and ethical issues related to crisis, trauma, and disaster events and response.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 8346 - Child and Adolescent Counseling♦**
In this course, students examine empirically supported theories and techniques for working with children and adolescents in the counseling process. Students work toward enhancing their theoretical and practical understanding of the systemic interplay among children, adolescents, families, and the stakeholders in their lives. They engage in coursework and readings focused on a family-systems view of intervention, and they devote special attention to developmental, cognitive, behavioral, educational, multicultural, and environmental issues. Students assess a distinct group of empirically supported interventions aimed at improving individual and family functioning. They also explore the legal and ethical issues related to counseling children and adolescents.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8356 - Advanced Theories and Techniques in Marriage, Couple, and Family Counseling

This is an advanced course in the study and application of family systems theory. Students apply content knowledge gained in earlier courses 6201/6726 and other core courses to complex and comprehensive case studies. The case studies are rich and inclusive of current issues in family and couples counseling, such as the impact of technology, crisis intervention, addiction, school and community factors, ethical dilemmas, socio-cultural considerations, and issues related to social justice and advocacy. Students engage in the processes of clinical assessment, treatment planning, goal writing, care coordination, discharge planning, clinical documentation, ethical practice, and safety planning. Course work also cultivates students’ case conceptualization and case presentation skills.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8360 - Assessment in Counseling and Education

Students in this course are provided with an overview of individual and group approaches to assessment and evaluation used in a variety of counseling, educational, and organizational settings. Students examine the psychometric properties used to develop and evaluate these instruments. Topics include a historical perspective of assessment, basic concepts of standardized and nonstandardized testing, measures of central tendency, normative sampling and standardization, reliability and validity, assessment report writing, test score interpretation, and test construction. Students also address the ethical, legal, and multicultural issues related to selecting, administering, and interpreting assessment and evaluation instruments and techniques in counseling.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program.
COUN 8361 - Human Sexuality

(5 cr.)
Students are provided with a framework for understanding human sexuality in the context of couple, marriage, and family counseling in this course. Students explore empirically supported counseling approaches related to sexual functioning, intimacy, gender, and sexual orientation. They use a systemic framework for understanding the role and impact of sexuality on couples, marriages, and families. Students also explore and discuss specific topics related to issues of sexual diversity, gender identity, sexual offending, trauma, and victimization. Legal and ethical issues related to addressing sexuality in counseling are addressed.

COUN 8551 - Preparing for Dissertation

(5 cr.)
The focus of this course is on the preparation for the dissertation phase of training. In this course, students identify a dissertation topic and potential dissertation committee members; begin to conduct a literature review; develop a problem statement and research questions; and evaluate research designs, methods, and types of analyses to use for their dissertation. Students also complete their initial premise in this course and an annotated outline of their prospectus. The prospectus is a brief paper, typically 15–20 pages in length, which helps students organize, delineate, and make decisions regarding their doctoral study and appropriate research methodology. It is strongly recommended that students take this course after they have successfully completed all research courses in their program of study.
Prerequisites
- COUN 8120
- COUN 8203
- RSCH 8260 or RSCH 8360 or RSCH 8460
- CPLB 802L

COUN 8561 - Dissertation

(5 cr. per term for a minimum of four terms until completion)
Doctoral students have the opportunity to integrate their program of study into a research study through which they explore a specific area of interest in this course. Students complete the dissertation with the guidance of a chair and committee members through a learning platform classroom in which weekly participation is required. Students work with their dissertation chair to write the prospectus, complete an approved proposal (the first three chapters of the dissertation), complete an application for Institutional Review Board approval, collect and analyze data, and
complete the dissertation. During the final quarter, students prepare the dissertation for final review by the university and conclude with an oral defense of their dissertation. Once students register for COUN 8561, they are registered each term until successful completion of the dissertation for a minimum of four terms. Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Prerequisites

- Successful completion of COUN 8896

COUN 8626 - Research and Program Evaluationʉ

(5 cr.)
Students in this course are provided with a foundation in research methods, statistical analysis, needs assessment, and program evaluation in counseling. They are introduced to qualitative, quantitative, and mixed-method approaches; single case designs; action research; and outcomes research. Students can learn how to identify a topic for research, conduct a literature search, and use research to inform evidence-based practice. They also learn the importance of scholarly writing. Students examine the principles, models, and applications of needs assessment and program evaluation, and they learn to use the findings to effect program modifications. Emphasis will also be on the ethically and culturally relevant strategies for interpreting and reporting the results of research and/or program evaluation studies. Statistical methods used in conducting research and program evaluation are reviewed.

ʉ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8630 - Interviewing and Observational Strategiesʉ

(5 cr.)
Personal attitudes, values, and beliefs often affect a counselor's ability to establish an appropriate relationship and rapport with clients. In this course, students learn to evaluate their personal attitudes and beliefs to positively influence their counseling approaches. They explore principles and skills related to interviewing and observation, and they examine related legal, ethical, and cultural issues. Students gain practice in conducting interviews, making behavioral observations, collecting and interpreting data.
during an interview, and developing written reports of findings. Synthesizing concepts, skills, and personal reflections, students demonstrate their ability to engage in a counseling session using techniques learned throughout the course.

Note: Students are required to have access to a video recording device, a tripod, and an audio recording device, which they will begin using the first week of class.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8631 - Treatment of Forensic Populations♦

(5 cr.)
In this course, students gain the foundational knowledge necessary to evaluate and subsequently treat many different forensic populations, such as sex offenders, substance abusers, and white-collar criminals. Students analyze the use of traditional forms of intervention, including individual and group psychotherapy, as well as recent developments in intervention, such as restorative justice. Applying concepts and theories learned in the course, students develop a project scenario in which they feature an offender and describe treatment approaches as well as related ethical, legal, and multicultural factors that may impact treatment. Reflecting on the course, students also consider and discuss professional identity and goals.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8632 - Mental Health Law♦

(5 cr.)
In this course, students examine several different aspects of the law related to mental health issues. Laws and court decisions that affect the practice of psychology, such as the Tarasoff ruling, mandated reporting, and the Health Insurance Portability and Accountability Act (HIPAA) are addressed, as are the many areas of law that constitute forensic psychological practice, including civil matters (such as personal injury and civil competency issues) and criminal matters (such as competency to stand trial, criminal responsibility, diminished capacity, and death-penalty issues).

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8650 - Introduction to the Nonprofit Sector♦

(5 cr.)
Nonprofit organizations (NPOs) can serve to positively affect people's lives through social change, but they require leaders who have a fundamental understanding of the nonprofit sector, including related ethical, legal, and global perspectives. Students in this course explore these viewpoints as well as the history, foundations, and types of NPOs.
They also examine the diverse political, social, and economic contexts within which NPOs exist. Students explore and apply marketing, public relations, and communication concepts and strategies to case studies and contemporary situations. Gaining practical insight, students also apply theories presented in the course to the development of a concept paper guiding the development of a nonprofit organization.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 8660 - Social Change, Leadership, and Advocacy for Counseling Professionals**

*(5 cr.)*

Counselor educators have a responsibility to foster social change, provide leadership, and service the counseling professional. Students have the opportunity to gain a thorough understanding of this responsibility as well as the prospect of enhancing their professional development plans by identifying specific goals for professional involvement and service, including advocacy for their own community, clients, students, or profession. Students examine the processes of advocacy and social change. They use contemporary research to analyze the current trends and issues of the profession. Students also identify how community, national, and international issues affect the counseling profession.

Prerequisites

- RESI 8802

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 8661 - Social Change in Action: Prevention, Consultation, and Advocacy**

*(5 cr.)*

This course is designed to prepare students for their roles as counselors in prevention, intervention, and consultation endeavors with specific populations in specific settings. Using an action research model, students will prepare a blueprint for a prevention, intervention, or consultation project for a community, agency, or organization.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**COUN 8662 - Psychology and Social Change**

*(5 cr.)*

In this course, students analyze and evaluate theories of social and personal change. Students engage in a variety of conceptual and application assignments focused on power and social inequalities, ethnic inequalities, global environment, and issues related
to gender and sexism, such as homophobia. In addition, students examine the impact of social change theories on children, families, and societies. They explore the concepts of change agent and change advocate as well as the role of the psychologist as change agent. Students also engage in an integrative written assignment to synthesize theories and analyze a current social problem in their community, for which they propose an action to address the issue and drive positive social change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8671 - Consulting for Organizational Change♦

(5 cr.)
In this course, students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. Students address topics such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Applications include the assessment of an organization and the development of strategies to address identified needs for change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8672 - Psychological Consultation

(5 cr.)
What is the role of consultation in the delivery of psychological services and how does it differ from therapy or counseling? Students in this course have the opportunity to answer such questions as they examine the history, theory, process, and methods in the field of psychological consultation. They explore the qualifications and techniques required of psychologists who consult in various settings, including the courtroom; business and industry; and educational, mental health, and medical situations. Students apply concepts and theories learned in the course to a consultation action plan based on personal experience or one anticipated in a future professional situation. Through this project, students consider multiple factors, such as setting, clients, data collection, professional challenges, multicultural considerations, and ethical issues.

COUN 8682A - CounselingInternship I

(3 cr.)
Through this internship, mental health counseling students have an upper-level, supervised "capstone" clinical experience designed to refine and enhance their basic counseling skills, integrate their professional knowledge and skills, and continue their development in specialization areas.
Prerequisites
  • COUN 6671
• Approval of the coordinator of field training

COUN 8682B - Counseling Internship II

(3 cr.)
Through this internship, mental health counseling students have an upper-level, supervised "capstone" clinical experience designed to refine and enhance their basic counseling skills, integrate their professional knowledge and skills, and continue their development in specialization areas.

Prerequisites
• COUN 6671
• COUN 8682A
• Approval of the coordinator of field training

COUN 8720 - Diagnosis and Assessment♦

(5 cr.)
Students are provided with an overview of what is commonly referred to as abnormal psychology; however, students also consider factors constituting normalcy from multiple perspectives. Students explore the application of diagnostic criteria in various mental health work settings, such as schools, rehabilitation facilities, community agencies, and private practices. Using the scholar-practitioner model, students consider environmental and biological factors contributing to behavioral disorders. Students also examine techniques commonly used for the diagnosis and treatment of cognitive, emotional, and developmental disorders as well as for psychophysiological and psychosocial problems. Through coursework and discussions, students consider multicultural factors that complicate diagnosis as well as current trends and contemporary issues in clinical assessment and diagnosis.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8721 - Advanced Psychopathology♦

(5 cr.)
In this course, students engage in an in-depth examination of current theory and research associated with major psychological disorders and their diagnoses. Students explore the primary classification systems in terms of their applicability and limitations as well as the factors that impact the assessment, diagnosis, and treatment of disorders along a continuum of mental health. Students engage in practical assignments, focusing on applications of the diagnostic criteria in terms of case conceptualization.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a
COUN 8722 - Theories of Counseling

(5 cr.)
This course introduces theories of counseling and psychotherapy to prepare students to conceptualize problems and respond with appropriate, evidence-based interventions and techniques. Students will become familiar with the origin, key concepts, and interventions and techniques of each of the theories presented. Students will develop an awareness of how counseling theories drive the treatment process and apply theories to diverse case studies. A major focus of this course is to support students as they develop their personal theoretical orientation.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-877-253-4869 (toll)] for more information.

COUN 8723 - Multicultural Counseling

(5 cr.)
Students are provided with the opportunity to increase their knowledge of multicultural counseling and the delivery of psychological services as well as related skills needed in professional practice. Students explore diversity and identity issues and discuss their impact on the therapeutic relationship. They examine the application of traditional theoretical orientations and current multicultural theories to culturally diverse groups. Through a variety of assignments designed to provide practical application of content, students also investigate counseling concepts related to race and ethnicity, sex and gender, sexual orientation, social class, age, and ability.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-877-253-4869 (toll)] for more information.

COUN 8726 - Couples and Family Counseling

(5 cr.)
An important skill for clinicians is to have a fundamental understanding of the dynamics and functioning of couples and families. Students in this course are introduced to concepts and applications in theoretical perspectives and techniques, classical schools of thought, and recent developments in couples and family therapy. Students explore culture, gender, and ethnicity factors in family development. They also review and compare theoretical frameworks in couples and family therapy, including psychosocial, psychodynamic, transgenerational, strategic, cognitive-behavioral, and social constructionist models. Additionally, students assess the roles of culture, spirituality, and values in understanding families.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-877-253-4869 (toll)] for more information.
COUN 8728 - Substance Abuse Counseling♦

(5 cr.)
The impact of substance abuse on the lives of people with addictions, and the lives of their families, makes for a highly complex and challenging area of mental health counseling. Counselors working with these individuals must possess a comprehensive understanding of the background, controversies, and current approaches in regard to the treatment of substance abuse. In this course, students examine psychological aspects of addictions involving alcohol, prescription medications, and illegal substances. They also examine current research in the field of dependency and addiction. Students engage in a variety of conceptual and application-based assignments on diagnosing patients, choosing among models of treatment, planning treatment, using group and family treatment plans, and ensuring treatment efficacy. They also consider strategies to promote change, including the trans-theoretical model of behavior change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

COUN 8730 - Counseling Addictive Disorders♦

(5 cr.)
Students are provided with a foundation for counseling clients who have both substance-related and behavioral addictions. In this course, students examine historical perspectives and current trends in addiction treatment, as well as the biological and environmental influences on the etiology of addiction. Techniques and processes for assessment and diagnosis are examined in the context of individual, group, and systemic perspectives, with attention given to developmental and multicultural influences on addiction. Influences of public policy and advocacy on addiction and treatment are also examined.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.);1-443-627-7222 (toll)] for more information.

COUN 8743 - Psychopharmacology♦

As client advocates, counselors rely on knowledge of psychotropic medications to inform treatment. This course introduces a spectrum of psychotropic medications used in the management of mental, behavioral, and addictive disorders. Students explore medication classification, drug interaction, and side effects. In addition, students distinguish between medical and psychopathological conditions that present in similar ways to addictive disorders. As part of a professional learning community, students collaborate with peers in written scholarly dialogue to explore psychopharmacological intervention in the treatment of addiction and other psychopathologies that may coexist. Students analyze factors that increase the likelihood for a person, community, or group to be at risk for disorders and examine the cultural and contextual factors
considered in the ethical treatment of clients. Across counseling specializations, this course builds foundational clinical knowledge of the intersection of counseling and psychotropic medical treatment.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8753 - Career Counseling♦

(5 cr.)
Academic and career counselors are concerned with student life on all levels to support the personal and educational development of each student. Students in this course examine educational, developmental, and counseling theories related to academic and career counseling. The focus of this course is on academic and career development from elementary school through college. Students will explore intellectual and emotional intelligence, multicultural issues, attitudes, values, and psychosocial needs of the life-long learner. Students will gain skills required to assist a highly diversified student body in academic planning, career exploration, decision making, and personal growth.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8890 - Counseling Doctoral Practicum

(3 cr.)
Counseling Doctoral Practicum is an advanced clinical experience as the first of a three-part practitioner capstone experience before dissertation. During the practicum course, students work toward gaining and applying new and advanced clinical knowledge, skills, and professional dispositions. Students must secure a field experience site, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for practicum enrollment. Once enrolled, students will spend a minimum average of 8–10 hours per week at the site that they have secured. They will complete direct counseling hours using the new and advanced skills, weekly individual or triadic supervision with their site supervisor, administrative duties, and other activities as assigned by the site. Concurrently, students will participate in weekly case conceptualization activities, 2 hours of group supervision per week with their faculty supervisor, and other clinically relevant assignments directly related to the work at the site. There are multiple synchronous components of this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites
• All core courses in the program of study
• All residencies
• Approval by the Office of Field Experience
COUN 8895 - Doctoral Internship I

(3 cr.)
Counseling Doctoral Internship I is the second of a three-part capstone experience before dissertation. During the Doctoral Internship I course, site contacts, and individual and group supervisors guide and evaluate students on their ability to synthesize and apply the knowledge, skills, and professional dispositions in a minimum of three of five Counseling Educator domains (Teaching, Supervision, Leadership/Advocacy, Counseling, and Research). Students must secure field experience site(s) for each domain of focus, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for Doctoral Internship I enrollment. Once enrolled, students will spend a minimum average of 25–35 hours per week at the site(s) that they have secured. They will complete activities directly related to the approved domains, weekly individual or triadic supervision with their individual supervisor, administrative duties, and other activities the site assigns. Concurrently, students will participate in weekly course discussion and assignments that promote developing a professional identity as a Counselor Educator, 2 hours of group supervision per week with their faculty supervisor, and other domain-relevant assignments directly related to the work at the site. There are multiple synchronous components of this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites
- Successful completion of Counseling Doctoral Practicum
- Approval by the Office of Field Experience

COUN 8896 - Doctoral Internship II

(3 cr.)
Counseling Doctoral Internship II is the third of a three-part capstone experiences before dissertation. During the Doctoral Internship II course, site contacts and individual and group supervisors guide and evaluate students on their ability to synthesize and apply the knowledge, skills, and professional dispositions in a minimum of three of five Counseling Educator domains (Teaching, Supervision, Leadership/Advocacy, Counseling, and Research). Students must secure field experience sites for each domain of focus, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for Doctoral Internship II enrollment. Once enrolled, students will spend a minimum average of 25–35 hours per week at the site(s) that they have secured. They will complete activities directly related the approved domains, weekly individual or triadic supervision with their assigned individual supervisor, administrative duties, and other activities the site assigns. Concurrently, students will participate in weekly course discussions and assignments that promote on developing a well-rounded professional identity as a Counselor Educator, 2 hours of group supervision per week with their faculty supervisor, and other domain-relevant assignments directly related to the work at the site. There are multiple synchronous components of this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites
- Successful completion of Counseling Doctoral Practicum
- Approval by the Office of Field Experience
components of this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites
- Successful completion of Counseling Doctoral Internship I
- Approval by the Office of Field Experience

COUN 8910 - Legal Issues and Social Change in Forensic Psychology

(5 cr.)
Students in this course critically examine the effects of recent legislation, case law, and national policies on social change and on consultation and research in forensic psychology. Students have opportunities to explore and discuss contemporary and controversial issues such as the ethics of civil commitment, the death penalty, police use of force, investigative practices to curtail terrorism, hate crimes, and transfer of juveniles to adult criminal court and how related legal issues affect forensic psychology and society in general. They also analyze ethical issues that often arise for forensic psychology professionals who are working in these areas.

* Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

COUN 8995 - Doctoral Internship 1

(3 cr.)
Counseling Doctoral Internship I is the second of a three-part capstone experience before dissertation. During the Doctoral Internship 1 course, site contacts as well as individual and group supervisors guide and evaluate students on their ability to synthesize and apply the knowledge, skills, and professional dispositions in a minimum of 3 of 5 Counseling Educator domains (Teaching, Supervision, Leadership/Advocacy, Counseling, and Research). Students must secure field experience site(s) for each domain of focus, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for Doctoral Internship 1 enrollment. Once enrolled, students will spend a minimum average of 25–35 hours per week at the site(s) that they have secured. They will complete activities directly related to the approved domains, weekly individual or triadic supervision with their individual supervisor, administrative duties, and other activities the site assigns. Concurrently, students will participate in weekly course discussions and assignments that promote development of a professional identity as a Counselor Educator, 2 hours of group supervision per week with their faculty supervisor, and other domain-relevant assignments directly related to the work at the site. There are multiple synchronous components of this course. Students must be prepared to be flexible in meeting the demands of this course.

Prerequisites
- Successful completion of Counseling Doctoral Practicum
• Approval by the Office of Field Experience

COUN 8996 - Doctoral Internship 2

(3 cr.)
Counseling Doctoral Internship 2 is the third of a three-part capstone experiences before dissertation. During the Doctoral Internship 2 course, site contacts, as well as individual and group supervisors guide and evaluate students on their ability to synthesize and apply the knowledge, skills, and professional dispositions in a minimum of 3 of 5 Counseling Educator domains (Teaching, Supervision, Leadership/Advocacy, Counseling, and Research). Students must secure field experience sites for each domain of focus, apply with the Office of Field Experience within the published application window, and earn approval before being eligible for Doctoral Internship 2 enrollment. Once enrolled, students will spend a minimum average of 25–35 hours per week at the site(s) that they have secured. They will complete activities directly related the approved domains, weekly individual or triadic supervision with their assigned individual supervisor, administrative duties, and other activities the site assigns. Concurrently, students will participate in weekly course discussions and assignments that promote the development of a well-rounded professional identity as a Counselor Educator, 2 hours of group supervision per week with their faculty supervisor, and other domain-relevant assignments directly related to the work at the site. There are multiple synchronous components of this course. Students must be prepared to be flexible in meeting the demands of this course.
Prerequisites
• Successful completion of Counseling Doctoral Internship 1
• Approval by the Office of Field Experience

CPLB 601L - Pre-Practicum 1

(0 cr.)
By participating in a Walden Pre-Practicum, students gain skills in their development as scholar-practitioners. Through Pre-Practicum experiences, students expand their network of peers and faculty members while they develop their professional skills and identity. In Pre-Practicum 1, students begin to apply the core skills and techniques introduced in the Techniques course. Students also continue to develop the multicultural competencies needed for counseling. Per program requirements, there is a synchronous experience. Students will receive specific information about their upcoming field experience and credentialing.
Prerequisites
• COUN 6316
CPLB 602L - Pre-Practicum 2

(0 cr.)
In Pre-Practicum 2, students continue to develop core skills from Pre-Practicum 1 and integrate advanced skills in their development as scholar-practitioners. Through their Pre-Practicum experiences, students expand their network of peers and faculty members while they continue to develop professional skills and identity. In Pre-Practicum 2, students begin to develop group leadership skills, integrate counseling theory, and continue to demonstrate cultural competency skills. Students will engage in developing their upcoming field experience plan and continue credentialing skills activities.
Prerequisites
  • COUN 6250

CPLB 802L - Pre-Practicum 1: Enhancing Teaching and Research Skills

(0 cr.)
In Pre-Practicum 1, students examine their professional identity as counselor-educators and develop key components of a research plan. Students develop these skills through the practice of teaching and the acquisition of enhanced research knowledge. Topics include roles, responsibilities, philosophy of, and best practices within teaching. Students also develop research questions, align research questions and methodologies, explore social change in research, and explore literature critique and synthesis.
Prerequisites
  • RSCH 8210
  • RSCH 8310
  • COUN 8115
  • COUN 8125
  • COUN 8135

CPLB 803L - Pre-Practicum 2: Advanced Supervision, Teaching, and Research Skills

(0 cr.)
In Pre-Practicum 2, students continue to examine and strengthen their professional identity while gaining the teaching and supervision experiences that are required by the Council for Accreditation of Counseling & Related Educational Programs (CACREP). A complement to both the Clinical Supervision and Teaching in Counselor Education courses, students in this Pre-Practicum have the opportunity to enhance and demonstrate advanced teaching skills and clinical supervision both online and in face-to-face environments. During the Pre-Practicum, students will also enhance their knowledge of research methodologies and alignment of research, and they design and
present a research proposal to inform and develop their research skills.

Prerequisites
- CPLB 802L
- COUN 8203
- COUN 8120

CPSY 6001 - Foundations for Graduate Study in Psychology

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students receive a foundation for academic and professional success as scholar-practitioners and social change agents. Topics include the relation of mission and vision to professional goals; development of the program of study and professional development plan; strategies for online success; introduction to the online library; and introduction to critical thinking, professional writing, and academic integrity. Course assignments focus on practical application of writing.

CPSY 6215 - Lifespan Development

(5 cr.)
Students in this course are provided with an advanced overview of human development through the lifespan, including prenatal, childhood, adolescent, adult, and late-adult phases. Students examine and apply basic processes and theories to developmental milestones that occur within these phases of development. They explore factors of heredity and environmental elements on human development, and they consider ethical issues, research considerations, and global perspectives as they assess strategies to promote optimal development. Students also engage in coursework and discussions that highlight themes of diversity and social change.

✿ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CPSY 6221 - Psychopathology From a Clinical Perspective

(5 cr.)
Students in this course examine in-depth current theory and research associated with major psychological disorders and their diagnosis. The primary classification systems are explored in terms of their applicability and limitations. The factors that impact the assessment, diagnosis, and treatment of disorders along a continuum of mental health are explored. Application of the diagnostic criteria in terms of case conceptualization is emphasized.

✿ Students may take this as a non-degree course, which means they do not have to be enrolled in a
CPSY 6245 - Social Psychology♦

(5 cr.)
Students in this course examine both human cognition and behavior through the lens of research and theory in social psychology. Topics include perception, attitudes, relationships and attraction, altruism, prejudice and aggression, conformity and obedience, group behavior, and the influence of culture. The implications of social psychology theory and research are explored in relation to social justice and social change.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CPSY 6250 - Group Process and Dynamics♦

(5 cr.)
Students in this course receive a comprehensive review of counseling approaches to group therapy. The theoretical bases of different approaches to group therapy, including psychoanalytic, existential, person-centered, gestalt, transactional, behavioral, rational-emotive, and reality-therapy are examined. The focus of this course is on counseling of various types of groups, the efficacy of using group therapy as treatment method with multicultural and diverse populations, and the stages of group development.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CPSY 6341 - Psychological Assessment♦

(5 cr.)
There is a variety of assessment types that professionals use in modern clinical psychology settings. In this course, students learn about these assessments, focusing on cognitive and personality assessments as well as other tests commonly used in clinical practice. They engage in a comprehensive examination of measurement theory and the psychometric properties used to develop and evaluate these instruments. Students also explore related topics, including normative sampling and standardization, reliability and validity, test score interpretation, and test development. Through assignments and discussions, students address ethical, legal, and sociocultural issues, including cultural bias and fairness. A foundation for this course is professional standards for psychological testing.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CPSY 6342 - Interventions I♦
The focus of this course is on the acquisition and demonstration of clinical and counseling skills in the context of empirically supported modes of intervention. Students apply skills in treatment planning exercises, clinical vignettes, and face-to-face simulations of psychotherapy sessions.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CPSY 6343 - Interventions II

The focus of this course is on the application of empirically supported treatment and interventions to client problems ranging from problems in living to severe mental disorders in selected populations. Students demonstrate the implementation of intervention models, including cognitive-behavioral therapy, person-centered therapy, short-term dynamic psychotherapy, and integrative psychotherapy. Culturally competent interventions are emphasized within an ethical framework for clinical or counseling practice.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CPSY 6700 - Master’s Practicum I

The focus of this course is on experiential learning, which is an essential component of applied professional training. Students in the practicum are provided with the opportunity to engage in a supervised experience that integrates theory and research with practice. The practicum experience includes guided development of professional skills, awareness of professional and ethical issues, professional and interpersonal growth, development of cultural competence, and effective use of supervision. In addition to on-site supervision, students are required to participate in an online classroom experience.

CPSY 6701 - Culture and Psychology

Students in this course explore the cultural components, research, and theory of cross-cultural psychology. In addition to the previously listed goals, students focus on the impact that culture has on the field of psychology around the world. The scope of this course is broad, with the core theme being cross-cultural psychology (focusing on cultures representing different parts of the world) and comparing cultural influence on human psychology. Many of the topics addressed are related to human development. Additionally, interactions among culture and social behaviors, health, mental health, and mental illnesses are emphasized throughout the duration of this course.
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

### CPSY 6705 - Ethics and Standards of Professional Practice

(5 cr.)
Students in this course examine the psychologist’s principles of conduct, code of ethics, and standards of practice. The guidelines for practice in specific psychological services and with identified populations are explored. The ethical decision-making process is studied in depth. Topics include informed consent, confidentiality, duty to warn, mandated reporting, recordkeeping, the limits of competency, and dual relationships. Through this course, students also address issues of professional development, such as supervision, peer consultation, and continuing education.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

### CPSY 6722 - Counseling and Psychotherapy Theories

(5 cr.)
Students in this course summarize the history and explore the primary concepts of the major approaches to counseling and psychotherapy in current use. The empirical foundations of each theory are examined, and examples are supplied showing how each method is applied to clients. Limitations of each approach are also explored.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

### CPSY 6728 - Substance Abuse Counseling

(5 cr.)
Students in this course examine psychological aspects of addictions involving alcohol, prescription medications, and illegal substances. Current research in the field of dependency and addiction is explored. Topics include diagnosis, models of treatment, treatment planning, use of group and family treatment plans, and efficacy of treatment. Strategies to promote change, including the transtheoretical model of behavior change, are discussed.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

### CPSY 6810 - Master’s Internship I

(3 cr.)
The focus of this course is on experiential learning, which is an essential component of applied professional training. In the practicum, students have the opportunity to engage
in a supervised experience that integrates theory and research with practice. The practicum experience includes guided development of professional skills; awareness of professional and ethical issues; professional and interpersonal growth; development of cultural competence; and effective use of supervision. In addition to on-site supervision, students are required to participate in an online classroom experience.

CPSY 6900 - Master's Practicum III

(3 cr.)
This course is an optional third quarter following the required two-quarter practicum sequence for those students seeking additional field experience. During this course, students will complete a minimum of 300 additional hours. In this course, students are able to engage in a supervised experience that integrates theory and research with practice. The practicum experience includes guided development of professional skills; awareness of professional and ethical issues; professional and interpersonal growth; development of cultural competence; and effective use of supervision. In addition to on-site supervision, students are required to participate in an online classroom experience.

Prerequisites
- Completion of the practicum application
- Approval of the field placement coordinator

CPSY 6910 - Master's Internship II

(3 cr.)
The focus of this course is on experiential learning, which is an essential component of applied professional training. In the practicum, students have the opportunity to engage in a supervised experience that integrates theory and research with practice. The practicum experience includes guided development of professional skills; awareness of professional and ethical issues; professional and interpersonal growth; development of cultural competence; and effective use of supervision. In addition to on-site supervision, students are required to participate in an online classroom experience.

CPSY 8002 - Foundations of Graduate Studies in Clinical Psychology

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students build a foundation for academic and professional success as social change agents. They assess the relationship of Walden's mission and vision to professional goals. They establish connections with their peers and the broader Walden community. Students engage in course assignments focused on the practical application of scholarly writing, critical-thinking skills, academic integrity, ethics, and the promotion of professional and academic excellence within the field of psychology.
CPSY 8101 - Introduction to Forensic Psychology

(5 cr.)
Students in this course are provided with an overview of the areas covered by a broad definition of forensic psychology. In doing so, the students are introduced to the basic tenements of forensic psychology and the criminal justice system. Topics of study include criminal profiling, police psychology, psychology in the criminal courts, correctional psychology and others. Assignments focus on providing the student with a broad basic knowledge of the forensic psychology field.

Prerequisites
- CPSY 8002L

CPSY 8102 - Intersection of Crime, Psychology, and the Law

(5 cr.)
Students in this course are provided with an expansive overview of forensic psychology, including basic tenets, practices, and procedures. Students explore subspecialties of forensic psychology; roles and responsibilities; and related legal, ethical, and diversity issues. They learn how forensic psychology links to the criminal justice system as they explore related topics, including criminal profiling, police psychology, psychology in the criminal courts, and correctional psychology. Through this course, students acquire a broad understanding of forensic psychology theories and concepts, which they apply to the analysis of controversial issues and contemporary challenges within the field.

CPSY 8126 - Understanding Violence, Risk, and Threat Assessment

(5 cr.)
Students in this course cover the varied assessment techniques and instruments used in the forensic psychology arena. Some of the assessment areas covered include risk assessment, juvenile evaluations, lie detection, custody evaluations, and many of the psychological tests and instruments that are used in these assessments. Students receive a solid foundation of the knowledge of forensic psychology techniques and assessment in this course rather than specific skills in administering and interpreting psychological tests.

Prerequisites
- CPSY 8101
- CPSY 8002L

CPSY 8207 - History and Systems of Psychology

(5 cr.)
Students in this course focus on the historical and philosophical roots of psychology and counseling. Topics include structuralism, functionalism, behaviorism, psychoanalysis,
gestalt, and existentialism, as well as contemporary perspectives including evolutionary psychology, positive psychology, postmodernism, and feminist psychology. Themes of diversity and multiculturalism in psychology and counseling are highlighted within each of the perspectives.

**Prerequisites**

- CPSY 8002L

---

**CPSY 8214 - Consulting for Organizational Change**

(5 cr.)

Organizational and professional development (OPD) professionals promote and implement organizational change by using fundamental techniques of change management. Students in this course examine and apply these tools, including consulting competencies, approaches, and organizational change models to learn the skills of an OPD consultant. Students explore methods for accelerating individual, group, and organizational performance through consulting, coaching, and change management. They also explore related topics, such as organizational assessment; team development; strategic planning; group dynamics; power, politics, and influence; leadership; and conflict management. Students apply course concepts to the assessment of an organization and the development of strategies to address identified needs for change.

**Prerequisites**

- CPSY 8002L
- CPSY 8752

---

**CPSY 8215 - Lifespan Development**

(5 cr.)

Students in this course are provided with an advanced overview of human development through the lifespan, including prenatal, childhood, adolescent, adult, and late-adult phases. Students examine and apply basic processes and theories to developmental milestones that occur within these phases of development. They explore factors of heredity and environmental elements on human development, and they consider ethical issues, research considerations, and global perspectives as they assess strategies to promote optimal development. Students also engage in coursework and discussions that highlight themes of diversity and social change.

**Prerequisites**

- CPSY 8002L

---

**CPSY 8226 - Biopsychology**

(5 cr.)

An important branch of psychology, known as biopsychology, combines neuroscience
with basic psychological models for the purpose of understanding how the brain and neurotransmitters influence human behavior. In this course, students examine the structure and functions of the central and peripheral nervous systems and explore the impact of neurobiology, endocrinology, and physiology on human behavior. They learn about brain functioning, including exploration of neural conduction; effects of neurotransmitters; sensory systems; and mechanisms of attention, memory, perception, and language. Students also explore literature addressing issues related to neuroplasticity, lateralization, and regeneration. Applying knowledge and skills gained throughout the course, students develop a final research paper through which they synthesize biopsychology concepts, critically analyze related research, and demonstrate APA-writing ability.

Prerequisites
- CPSY 8002L

CPSY 8238 - Cognitive and Affective Bases of Behavior

(5 cr.)
Core theories of cognition and affect are reviewed as well as their roles in human functioning. Students in the course will review basic components of cognition, including knowledge acquisition, knowledge representation, language and various aspects of thinking, and emotions. There is also a focus on the multidimensional and interactive characteristics of human cognitive and affective functioning. A specific emphasis is placed on theories and research bearing on how cognition and affect interact in important areas of human functioning such as emotional regulation, construction of reality, motivation, psychopathology, and health.

Prerequisites
- CPSY 8002L
- CPSY 8781

CPSY 8242 - Changing Health Behavior: Theory and Practice

(5 cr.)
Students in this course will review past and current models of health behavior change, disease prevention, disease management, and relapse prevention. Coverage of health-related issues includes dietary needs, tobacco and drug use, safer sexual practices, and stress management. In addition, students will examine the analysis of behavior change within specific populations (young, elderly, cognitively impaired, etc.) and factors that predict or serve as obstacles to lifestyle change and adherence.

Prerequisites
- CPSY 8002L
CPSY 8245 - Interpersonal Psychotherapy

(5 cr.)
Students in this course will acquire and demonstrate skills essential to the practice of the interpersonal psychotherapy approach to treatment. Students will integrate historical and current views of relational theory and its relationship to the interpersonal psychotherapy approach and how this information impacts clinical practice and focus when attempting to decrease or eliminate symptoms and solve problems in a client's experience. In addition, students will synthesize research regarding interpersonal psychotherapy and its effectiveness in treatment regarding various disorders and maladaptive behavioral patterns as well as its effectiveness and/or limitations when working with diverse populations. Students will have the opportunity to demonstrate clinical interviewing skills, interpersonal psychotherapy treatment approach skills, case conceptualization skills from the interpersonal psychotherapy approach, and receive feedback from faculty and peers. Ethical considerations specific to the practice of the interpersonal psychotherapy approach are discussed.
Prerequisites
- CPSY 8002L
- CPSY 8781

CPSY 8247 - Social Psychology

(5 cr.)
Factors of cognition and social behavior are at the root of nearly all experiences pertaining to individuals in society. In this course, students use the lens of social psychology to examine perceptions, attitudes, relationships and attraction, motivation to help others, prejudice and aggression, conformity and obedience, group behavior, and the influence of culture. Students apply knowledge and skills gained in the course to a final project in which they develop a plan for using social psychology research to address a significant social problem. Moreover, students consider ways to extend lessons learned to their personal and professional lives to effect positive social change as scholar-practitioners.
Prerequisites
- CPSY 8002L

CPSY 8284C - Psychology Practicum III

(3 cr.)
This course is the third of the four-course, yearlong practicum sequence. Students continue their practicum, applying the principles and methods of empirically supported treatments and approaches learned from their coursework. Students bring closure to their work on real-world problems that they developed with their preceptors. Students
evaluate and complete their practicum project and present their project in the workplace and in the online classroom.

**CPSY 8285C - Psychology Practicum IV**

(3 cr.)
This course is the fourth of the four-course, yearlong practicum sequence. Students continue their practicum applying the principles and methods of empirically supported treatments and approaches learned from their coursework. Students bring closure to their work on real-world problems that they developed with their preceptors. Students evaluate and complete their practicum project and present their project in the workplace and in the online classroom.

**CPSY 8290 - Psychology Practicum I**

(3 cr.)
This course is the first of the two-course practicum sequence. Students are able to engage in a supervised experience that integrates theory and research with practice. Working in collaboration with their site supervisor and course instructor, the students' practicum experience includes guided development of intermediate conceptual, assessment, intervention, and evaluation skills; awareness of professional and ethical issues; professional and interpersonal growth; development of cultural competence; and effective use of supervision.

Prerequisites
- Field Experience approval required

**CPSY 8291 - Psychology Practicum II**

(3 cr.)
This course is the second of the two-course practicum sequence. Students are able to engage in a supervised experience that integrates theory and research with practice. Working in collaboration with their site supervisor and course instructor, the students' practicum experience includes guided development of intermediate conceptual, assessment, intervention, and evaluation skills; awareness of professional and ethical issues; professional and interpersonal growth; development of cultural competence; and effective use of supervision.

Prerequisites
- Field Experience approval required

**CPSY 8292 - Psychology Internship I**

(3 cr.)
The internship course is taken in conjunction with a supervised clinical experience and is
intended to prepare clinical psychology students for readiness to enter practice. This course follows completion of the practicum sequence and is designed to develop intermediate intervention and assessment skills, integrate professional knowledge and skills with evidence-based practices, and continue focused development in specialization areas. A minimum of 2,000 clock hours with at least 900 clock hours of direct client contact must be documented.

Prerequisites
- Field Experience approval required

CPSY 8293 - Psychology Internship II

(3 cr.)
The internship course is taken in conjunction with a supervised clinical experience and is intended to prepare clinical psychology students for readiness to enter practice. This course follows completion of the practicum sequence and is designed to develop intermediate intervention and assessment skills, integrate professional knowledge and skills with evidence-based practices, and continue focused development in specialization areas. A minimum of 2,000 clock hours with at least 900 clock hours of direct client contact must be documented.

Prerequisites
- Field Experience approval required

CPSY 8294 - Psychology Internship III

(3 cr.)
The internship course is taken in conjunction with a supervised clinical experience and is intended to prepare clinical psychology students for readiness to enter practice. This course follows completion of the practicum sequence and is designed to develop intermediate intervention and assessment skills, integrate professional knowledge and skills with evidence-based practices, and continue focused development in specialization areas. A minimum of 2,000 clock hours with at least 900 clock hours of direct client contact must be documented.

Prerequisites
- Field Experience approval required

CPSY 8295 - Psychology Internship IV

(3 cr.)
The internship course is taken in conjunction with a supervised clinical experience and is intended to prepare clinical psychology students for readiness to enter practice. This course follows completion of the practicum sequence and is designed to develop intermediate intervention and assessment skills, integrate professional knowledge and
skills with evidence-based practices, and continue focused development in specialization areas. A minimum of 2,000 clock hours with at least 900 clock hours of direct client contact must be documented.

Prerequisites
- Field Experience approval required

CPSY 8316 - Tests and Measurement

(5 cr.)
Students in this course are provided with an overview of the different types of tests used in clinical, educational, and organizational settings. Students engage in a comprehensive examination of psychometric properties used to develop and evaluate these instruments. They examine normative sampling and standardization, reliability and validity, test score interpretation, and test development. Students also consider related ethical, legal, and sociocultural issues, including cultural bias and fairness. Professional standards for testing provide a foundation for the course.

Prerequisites
- RSCH 8110

CPSY 8520 - Psychology and the Courts

(5 cr.)
Students taking this course cover the major roles that a forensic psychologist could have within the court system. Issues such as expert testimony, jury selection, eyewitness testimony, and consultation with attorneys are covered. Additionally, practical skills such as documentation and report writing are addressed.

CPSY 8522 - Psychology and the Courts

(5 cr.)
In this course, students cover the major roles that a forensic psychologist could have within the court system. Issues such as expert testimony, jury selection, eyewitness testimony, and consultation with attorneys will be covered. Additionally, practical skills such as documentation and report writing will be addressed.

Prerequisites
- CPSY 8002L
- CPSY 8101

CPSY 8700 - Psychology and Social Change

(5 cr.)
In this course, students analyze and evaluate theories of social and personal change.
Students engage in a variety of conceptual and application assignments focused on power and social inequalities, ethnic inequalities, global environment, and issues related to gender and sexism, such as homophobia. In addition, students examine the impact of social change theories on children, families, and societies. They explore the concepts of change agent and change advocate as well as the role of the psychologist as change agent. Students also engage in an integrative written assignment to synthesize theories and analyze a current social problem in their community, for which they propose an action to address the issue and drive positive social change.

Prerequisites
- CPSY 8002L

CPSY 8745 - Health Psychology

(5 cr.)
Health psychologists work toward positive change in healthcare and health behavior through the study of relationships between patients and providers, how individuals and groups adapt to illness, damaging health behaviors, health cognitions, and many other related issues. In this course students explore the field of health psychology with a focus on the biopsychosocial model. They discuss behavioral and biomedical theories as well as the effect of psychological (personality), behavioral (health behaviors and coping), and social factors (stress and physician-patient relationships) on physical health and wellness. Through the examination of current literature and peer discussions, students explore and address issues related to cardiovascular and immune health, including heart disease, stroke, cancer, and HIV/AIDS. They demonstrate their understanding of course material and consider how topics apply to their personal and professional life through the development of taskforce papers, a health brochure, and a final essay.

Prerequisites
- CPSY 8002L

CPSY 8748 - Stress and Coping

(5 cr.)
Students in this course examine contemporary theories on the perception of stress, appraisal of stressors, ways of coping, and the psychophysiological mechanisms involved in the stress response. They explore topical issues, including psychoneuroimmunology, behavioral nutrition, psychophysiology, traumatic stress, chronic pain, and stress-related psychophysiological and medical disorders as they relate to stress and coping. Students engage in discussions designed to provide practical application of course content. Demonstrating breadth and depth of knowledge and critical-thinking skills, students explore a topic of interest through a final research proposal and paper on a current issue related to course concepts.

Prerequisites
- CPSY 8002L

**CPSY 8752 - Psychology of Organizational Behavior**

(5 cr.)
Effective leadership coaches must be fully capable of working with clients immersed in different organizational cultures that present unique challenges. In this course, students apply models, approaches, and frameworks; individual and team coaching strategies; and ethical guidelines to multiple case studies related to coaching for leadership development. Students gain practical insight on the characteristics, factors, and conditions that influence coaching efficacy, assessment, and evaluation. In addition, students consider diversity, ethics, and professional issues and challenges in the context of leadership coaching.

**Prerequisites**
- CPSY 8002L

**CPSY 8755 - Leadership and Leader Development**

(5 cr.)
Effective leadership requires the ability to facilitate positive change, lead others in efforts to effect similar change, and work through challenges when met with resistance to change. Students in this course are provided with an extensive overview of leadership theories. Students explore definitions of leadership, major theoretical leadership models, and contextual and situational factors related to leadership and change. Students also examine various perspectives on leadership and the role of leadership in the achievement of organizational, group, and team goals. Students engage in practical assignments and discussions, focusing on effective leadership issues and practices during the process of organizational change.

**Prerequisites**
- CPSY 8002L

**CPSY 8762 - Teaching of Psychology**

(5 cr.)
Students in this course examine theories, techniques, and issues related to teaching psychology at the college/university level, both online and in person. They focus primarily on teaching skills, developing rapport with students, managing the course, and managing the classroom. Classroom communication and ethical issues relevant to both faculty and students are also covered.

**Prerequisites**
- CPSY 8002L
CPSY 8763 - Principles of Instructional Design

(5 cr.)
Students in this course are presented with an overview and critical analysis of various instructional methods and techniques, including their historical, psychological, and social foundations. Students analyze specific instructional applications in various settings and through multiple theories of learning, such as behavioral, cognitive, humanistic, and social-situational. They apply prior knowledge of learning, development, and cognition to understand these applications. Students also consider and discuss the major challenges affecting curriculum design as well as potential future trends. Demonstrating understanding of course concepts, students critically analyze and present current issues in instructional design through collaborative projects.
Prerequisites
• CPSY 8002L

CPSY 8764 - Instructional Design for Online Course Development

(5 cr.)
In this course, students explore instructional design and delivery of online courses, issues related to assessment, evaluation in a distance-learning environment, and appropriate and systematic use of technology in online learning venues. Addressing course objectives and discussion questions, students explore and assess issues related to learning styles and instructional strategies in the online environment as well as alternatives to the online lecture. Students gain hands-on experience developing components for online instruction using course concepts and best practices in the field.
Prerequisites
• CPSY 8002L
• CPSY 8763

CPSY 8781 - Psychopathology From a Clinical Perspective

(5 cr.)
Students in this course are provided with an in-depth examination of current theory and research associated with major psychological disorders and their diagnosis. The primary classification systems are explored in terms of their applicability and limitations. The factors that impact the assessment, diagnosis, and treatment of disorders along a continuum of mental health are explored. Application of the diagnostic criteria in terms of case conceptualization is emphasized.

CPSY 9000 - Dissertation

(5 cr. per term for a minimum of 4 quarters until completion)
Doctoral students are provided with the opportunity to integrate their program of
study into a research study through which they explore a specific area of interest in this course. Students complete the dissertation with the guidance of a chair and committee members through a learning platform classroom in which weekly participation is required. Students work with their dissertation chair to write the prospectus, complete an approved proposal (the first three chapters of the dissertation), complete an application for Institutional Review Board approval, collect and analyze data, and complete the dissertation. During the final quarter, students prepare the dissertation for final review by the university and conclude with an oral defense of their dissertation. Once students register for CPSY 9000, they are registered each term until successful completion of the dissertation for a minimum of four terms. Students take this course for a minimum of four quarters and are continuously enrolled until completion of their dissertation with final chief academic officer (CAO) approval.

To complete a dissertation, students must obtain the academic approval of several independent evaluators including their committee, the University Research Reviewer, and the Institutional Review Board; pass the Form and Style Review; gain approval at the oral defense stage; and gain final approval by the chief academic officer. Students must also publish their dissertation on ProQuest before their degree is conferred. Learn more about the dissertation process in the Dissertation Guidebook.

Prerequisites
- All prior coursework

CPSY 9000L - Dissertation

(5 cr. per term for a minimum of four terms)
Doctoral students are provided with the opportunity to integrate their Program of Study into a research study through which they explore a specific area of interest in this course. Students complete the dissertation with the guidance of a chair and committee members through a learning platform classroom in which weekly participation is required. Students work with their dissertation chair to write the prospectus, complete an approved proposal (the first three chapters of the dissertation), complete an application for Institutional Review Board approval, collect and analyze data, and complete the dissertation. During the final quarter, students prepare the dissertation for final review by the university and conclude with an oral defense of their dissertation. Once students register for CPSY 9000L, they are registered each term until successful completion of the dissertation for a minimum of four terms.

Prerequisites
- Foundation courses
- Core courses
- Designation of an approved dissertation committee chairperson
CRJS 1001 - Contemporary Criminal Justice Systems♦

(5 cr.)
What is criminal justice and how is it delivered and administered? Student in this course are provided with a survey of the contemporary criminal justice system in the United States, with emphasis on the roles and responsibilities of police (law enforcement), courts (adjudication), and corrections. Students analyze methods of diversion by criminal justice personnel at all levels of practice. Students analyze the components of and major players in the criminal justice process and system and apply this content to current events and dilemmas. They overview crime and criminal law and explore how these concepts connect to criminal justice. Students also consider diversity, mental health considerations, and ethical challenges and issues as they relate to all aspects of criminal justice. Finally, students explore and discuss how the criminal justice system addresses criminality; consider its strengths and limitations; and examine issues, challenges, and trends related to the system.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 2001 - Criminology and Social Control♦

(5 cr.)
People commit crimes for a variety of reasons, and these crimes vary in their impact on individual victims and society. Students in this course examine a range of views, definitions, and perspectives on crime and criminology; the nature, causes, and typologies of crime and offenders; theories that attempt to explain why individuals commit crimes; and approaches to the prevention and control of crime. Students apply theories and perspectives to crime in real life as well as to crime presented in vignettes and case studies. Students devote special attention to the debate between social-responsibilities and social-problems approaches to criminology.

Prerequisites
BS in Criminal Justice
- CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

BS in Human Services Criminal Justice Concentration
- CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

BS in Psychology Forensic Psychology Concentration
- CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

All Other Programs
- CRJS 1001 or PSYC 1002 or PSYC 1003

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
CRJS 2002 - Juvenile Delinquency and Justice♦

(5 cr.)
In this course, students examine the factors that lead some juveniles to engage in criminal or antisocial behavior as well as ways to intervene in the process and outcome. They consider the biological, psychological, and sociological factors in juvenile delinquency as well as modern trends in prevention and treatment. Through traditional literature and interactive learning modules, students explore the concept of juvenile justice and consider the proper age that society should hold a juvenile criminally responsible as well as the age that juveniles should be tried as adults.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 2003 - Criminal Law♦

(5 cr.)
Books, movies, and television programs about crime, particularly those that feature criminals and trials, have been popular for decades. But there's more to criminal law than the theatrics that media often features. In this course, students examine the concepts and principles related to criminal law. They engage in discussions and assignments designed to provide practical application on a variety of topics, including domestic and international crimes, criminal defense, punishment, and sentencing.

Prerequisites
BS Criminal Justice
- CRJS 1001 or POLI 1001 or POLI 1001S or FPSY 2101

BS in Human Services Criminal Justice Concentration
- CRJS 1001 or POLI 1001 or POLI 1001S or FPSY 2101

All Other Programs
- CRJS 1001 or POLI 1001

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 3001 - Corrections♦

(5 cr.)
What is the goal of the corrections system? Is it punishment, rehabilitation, or both? In this course, students have the opportunity to answer such questions through the examination of the history of corrections as well as the practice and legal environment in corrections, including institutional and community-based programs and their relationship to other areas of the criminal justice system. Students also learn about correctional philosophy and practices related to incarceration, diversions, community-based corrections, and treatment of offenders. They employ analytical skills to assess
the role of corrections professionals and challenges facing corrections in a society that continues to change in demographics, norms, and expectations of criminal justice.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 3002 - Courts and Judicial Process♦

(5 cr.)
The pathways through the judicial process begin with choices—from a decision to arrest through the pursuit of a case in the system. In this course, students analyze and apply information about the components of the judicial system, including their structure, function, and processes. Students examine the professional roles within the system and learn how the system selects these figures. They learn about judicial conduct and professional standards and apply these concepts to examples of judicial behavior. Students also analyze issues related to the courts and judicial process in an increasingly diverse society and consider these in regard to future trends, such as in cases and legal claims.

Prerequisites
BS Criminal Justice
- CRJS 1001 or PSPA 1002 or PSYC 1001 or PSYC 1001Y or FPSY 2101 or CRJS 2002
BS in Human Services
- CRJS 1001 or PSPA 1002 or FPSY 2101 or CRJS 2003
BS in Psychology Forensic Psychology Concentration
- CRJS 1001 or PSPA 1002 or PSYC 1001 or PSYC 1001Y or FPSY 2101 or CRJS 2002
All Other Programs
- CRJS 1001 or PSPA 1001
- CRJS 2003

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 3003 - Law Enforcement♦

(5 cr.)
There is a diverse assortment of issues and challenges involved in enforcing laws and protecting the public, for which a wide array of agencies share responsibility in addressing. Such agencies encompass federal, state, and local police as well as private figures, such as security officers and city inspectors. In this course, students examine the roles and responsibilities of law enforcement professionals and explore the development and evolution of law enforcement in the United States. They examine community
policing models and the use of power, discretion, and deception by police. Students also engage in practical discussions and exercises to explore long-standing, contemporary, and future law enforcement issues and challenges.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 3004 - Data Analysis for Criminal Justice Professionals♦

(5 cr.)
All criminal justice professionals must understand the methods of extracting and using data and research—a critical function lending to the responsibilities of all roles in the system, including law enforcement, crime prevention, sentencing, and corrections. Students in this course explore how professionals apply basic statistical principles and research methods to contemporary criminal justice problems and issues in court, law enforcement, and correctional settings. Students learn how to evaluate data and research, represent data using graphs, and present data using statistical measures. They also consider ethical issues related to criminal justice research and technological advancements that influence current and future criminal justice data analysis and research.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 3010 - Profiling Serial and Mass Murderers♦

(5 cr.)
Law enforcement officials characterize serial murder among one of the most abhorrent of all criminal behavior. In this course, students examine the interest in serial and mass murder in popular culture and explore typologies and theories of criminal behavior. They assess and discuss the history and evolution of profiling; roles, goals, and responsibilities of profilers; the use of profiling in criminal investigations; and populations victimized by serial and mass murderers. Students also apply typologies and criminal theories to real-world case scenarios.

Prerequisites
BS Psychology Criminal Justice Concentration
• CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003
All Other Programs
• CRJS 1001 or PSYC 1002 or PSYC 1003

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 4101 - Criminal Evidence and Investigation♦
Criminal investigation is a critical duty at all levels of public and private law enforcement. Students in this course examine the integral tasks involved in such investigation through the examination of proper collection, tagging, and processing of evidence as well as the chain of custody. Students also learn how to assess a crime scene; interview and interrogate witnesses and suspects; and use informants and surveillance techniques in an investigation. Students also consider and discuss the codes of ethics to which investigators adhere as well as the impact of technological advancements on the future of criminal investigation.

Prerequisites
- CRJS 1001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 4102 - The Criminal Mind

What makes a criminal unique? Criminal justice professionals confront criminal behavior in many forms. In this course, students explore theories and research that provide cognitive, behavioral, and psychological explanations of criminal behavior. Through the examination of such theories, students have the opportunity to gain the professional knowledge and sensibilities to be able to interact effectively with offenders. Students also investigate potential trends and current biological research that may change or advance the study and treatment of criminal behavior.

Prerequisites
- BS Criminal Justice: CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003 or FPSY 2101
- BS in Psychology Criminal Justice and Forensic Psychology Concentrations: CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003 or FPSY 2101
- All Other Programs: CRJS 1001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 4103 - Drugs, Gangs, and Organized Crime

The implications surrounding drug trade, gangs, and organized crime are felt throughout communities domestically and around the globe. In this course, students explore these
implications as well as domestic and international law enforcement efforts in managing issues contiguous to drugs and crime. Students have the opportunity to gain real world insight into urban problems involving drugs, gang processes and activity, and organized crime through examination of current information and trends. They further dissect these concerns to learn what impact such issues have on crime in general and the cost of policing in the United States.

**Prerequisites**
- CRJS 1001

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.*

**CRJS 4150 - Capstone: International Justice and Human Rights**

*(5 cr.)*
In this capstone course, students have the opportunity to discover new concepts and synthesize existing knowledge and skills acquired throughout the program, keeping in mind the end goal of future positive social change. They first focus their attention on the basic rights of all human beings and the rule of law in the international arena—topics of increasing global importance. Students also investigate real-world examples of human rights violations, both domestic and international, and they assess responses and resolutions to such violations. Finally, students develop a project or paper that integrates and applies the concepts of international justice, rule of law, and/or human rights in their area of concentration.

**Prerequisites**
- CRJS 1001

**CRJS 4160 - Capstone: Ethics and Diversity in Criminal Justice**

*(5 cr.)*
Students in this course will explore the implications of ethics and diversity in the criminal justice field. Students examine the importance of ethical behavior on controversial issues and decision-making in law enforcement, corrections, and the courts system. Students will also explore the importance of diversity among employees in the field of criminal justice, as well as an understanding of cultural diversity as a building block of an unbiased justice system.

**Prerequisites**
- All required core and concentration courses

**CRJS 4201 - Restorative Justice**
Criminal justice involves more than retribution; it is twofold in that it must punish offenders and also address their needs and the needs of victims and the community. Students in this course explore the theory of justice and practices that emphasize repairing the harm caused by criminal behavior. They learn the ways in which this effort contrasts with an adversarial approach to justice. Students learn about strategies involving stakeholders in actions that transform the relationships among victims, offenders, communities, and criminal justice agencies in their response to crime. They also explore and reflect on case studies and topical models for an in-depth understanding how professionals conduct restorative justice in the real world.

**Prerequisites**

**BS Criminal Justice**
- CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003 or FPSY 2101

**BS in Human Services Criminal Justice Concentration**
- CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003 or FPSY 2101

**BS in Psychology Criminal Justice Concentration**
- CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003 or FPSY 2101

**All Other Programs**
- CRJS 1001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

**CRJS 4202 - Mobilizing and Coordinating Community Response**

While victim response is vital, it is also important to focus on the potential effects of crime on a community, such as economic instability, drug use, prejudices, and further criminal activity. Students in this course identify existing community resources that professionals use in conjunction with planned and ad hoc community responses to learn positive and effective intervention strategies that address the needs of individuals and communities affected by criminal incidents. They also assess the challenges inherent in such efforts and discuss ways to mitigate obstacles. Gaining new perspectives on possible ways to address the coordination of community response, students examine how victims perceive crime and/or change their role as a result of the crime.

**Prerequisites**

**BS Criminal Justice**
- CRJS 1001 or HLTH 3115 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

**BS in Human Services Criminal Justice Concentration**
• CRJS 1001 or HLTH 3115S or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

BS in Psychology Criminal Justice Concentration

• CRJS 1001 or HLTH 3115 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003

All Other Programs

• CRJS 1001

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 4203 - Introduction to Victimology

(3 cr.)
There are many considerations related to the perception, needs, and treatment of crime victims, which continue to lend to a growing area of study and legislation. Students in this course learn about the different types of victimization as well as the differences between direct and indirect victims of crime. They examine the role of criminal justice practitioners who work with and respond to victims. Students also assess and discuss the many ethical issues related to victims' human and civil rights and the impact of these rights on criminal justice professionals and changing legislation. Through case studies and contemporary literature, students also analyze both current problems and future trends in victimology.

Prerequisites
BS Criminal Justice

• CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003 or FPSY 2101

BS in Human Services Criminal Justice Concentration

• CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003 or FPSY 2101

BS in Psychology Criminal Justice and Forensic Psychology Concentrations

• CRJS 1001 or PSYC 1001 or PSYC 1001Y or PSYC 1002 or PSYC 1003 or FPSY 2101

All Other Programs

• CRJS 1001

*Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 4205 - Crisis Intervention
Communities around the nation have identified the need for resources to help people in various states of crisis, such as those associated with mental health issues, substance and alcohol abuse, and myriad forms of violence. Criminal justice professionals are positioned to refer those in crisis to proper community resources or use alternate intervention responses that may avoid arrest and incarceration. In this course, students explore the phenomenon of crisis through models, skill-sets, and methods used for crisis intervention. Students examine examples of these such as de-escalation, diffusion, negotiation, employment of multicultural perspectives, and Crisis Intervention Teams (CITs).

**Prerequisites**
- CRJS 1001

---

**CRJS 4206 - Probation and Parole**

Students in this course will review historical trends in and the evolution of probation and parole as applied in the U.S. criminal justice system. Course discussion topics will include community-based programs, such as work release, halfway houses, treatment centers, and therapeutic community centers. The course includes an examination of both adult and juvenile systems and the stakeholders in community corrections.

**Prerequisites**
- CRJS 1001

---

**CRJS 4301 - Terrorism**

Acts of physical and psychological violence to create fear have occurred throughout the ages, but they have only recently begun to affect the United States directly. The American public, now more than ever, must be aware of the possible threat of further terrorist attacks. In this course, students learn about current legislation to counter terrorism as well as to provide U.S. citizens with knowledge of these efforts and any further threats. Students engage in assignments on topics related to domestic and international terrorism, including theory, history of and trends related to terrorism, causes and goals of terrorist groups, and responses to terrorist acts by the criminal justice system. Students examine and analyze contemporary terrorist threats and movements and contemplate future trends.

**Prerequisites**
- BS in Criminal Justice
  - CRJS 1001 or HLTH 3115
- All Other Programs
  - CRJS 1001
Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 4302 - Critical Incidents and Cross-Agency Coordination♦

(5 cr.)
What happens when disasters occur, natural or otherwise, and the agencies that respond operate independent of one another? Students in this course have the opportunity to examine the fallout of such events to learn effective ways to manage critical incidents, avoiding errors of the past, thus helping to prevent widespread harm to communities. They learn about the development of broad-based contingency planning and the development of strategies, policies, and procedures for cross-agency coordination. Through practical exercises and simulations, students sharpen their critical-thinking and problem-solving skills as they learn ways to develop models of cross-agency coordination that anticipate prototypical critical incident responses.

Prerequisites
• CRJS 1001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 4303 - WMD and Disaster Response♦

(5 cr.)
In an age of technological innovation, nuclear advancement, and virtual spread of knowledge, terrorism is at the vanguard of governmental action. In this course, students explore and discuss methods used by the criminal justice system to counter and manage disaster incidents, and they examine law enforcement responses to such incidents. Students learn about the function of the National Incident Management System (NIMS) and the Incident Command System (ICS)—agencies created specifically to provide specialized guidance and support to all levels of government and nongovernmental organizations who respond to disasters. They examine different types of weapons of mass destruction (including biological and chemical threats) as well as cyber terrorism. Through this course, students work toward gaining practical skills to engage in organizational preparation efforts in many different professional positions, including disaster response.

Prerequisites
• CRJS 1001

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
CRJS 4401 - Management and Supervision in Criminal Systems

(5 cr.)
Today’s criminal justice organizations are complex and varied, and they require effective management, administration, and leadership. Students in this course analyze and discuss the function and nature of criminal justice organizations. Through the examination of traditional literature, in addition to contemporary videos and articles, students learn about criminal justice management and leadership roles and processes, politics and socialization, motivation, organizational change, technology, and current ethical considerations. Students apply concepts presented in the course to practical management problems and issues in law enforcement, prosecution, courts, and corrections.

Prerequisites
- CRJS 1001

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 4402 - Planning and Budgeting

(5 cr.)
Planning and applying effective budgeting strategies are critical elements in managing corporate and government criminal justice organizations. In this course, students have the opportunity to gain fundamental skills for effective management while focusing on short- and long-term financial analysis as well as on policy and budget creation. They complete practical application assignments, focusing on issues of plan development, grant sources, and different tasks and challenges related to budgeting. Students also engage in discussions with peers on a variety of topics, such as the public and private budgets, strategies, financing, forecasting, and ethical issues related to public budgeting.

Prerequisites
- CRJS 1001 or MATH 1002

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 5111 - Information Technology in Criminal Justice

(5 cr.)
In the 21st century, criminal justice organizations have evolved in the way they use records and data management systems to protect and gather evidence. While new technologies and the use of social media have increased and have assisted criminal justice professionals in tracking and apprehending criminals, there still are challenges for law enforcement, the courts, and prison systems. In this course, students will explore case studies related to challenges with protecting and collecting evidence as well as
ethical dilemmas with the use of technology. Students examine how technology is used in criminal law, law enforcement, criminal procedures, or court procedures. In addition, students can look into the future of information technology as it relates to criminal justice.

Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 5137 - The Nature of Crime and Criminology

(5 cr.)
Students in this course are introduced to contemporary views and theories of maladaptive and criminal behavior. They examine a broad conceptualization of criminal behavior from an interdisciplinary perspective as well as theories and application of criminal profiling. Students also explore specific views of criminal behavior germane to groups, such as psychopaths, serial offenders, and sexually violent predators. At the end of this course, students will have an understanding of the theories and practices that are the foundations of the field of criminology.

CRJS 5203 - Victimology

(5 cr.)
What is the relationship between victims and those who commit crimes against them? How does the criminal justice system protect victims of crime? Who are the secondary victims of crime? In this course, students explore how victims interact with the police and the legal system and their patterns and tendencies. Students review how factors such as class, race, and sexual orientation affect the perception of the victim by different constituents, including the public, the court system, and the media. Students assess the concept of primary and secondary victims and gain knowledge about the range of services and resources available to victims.

CRJS 5215 - Controversies in Criminal Justice

(5 cr.)
In this course, students review recent events that have significantly changed how the legal system interprets the U.S. Constitution, the U.S. Code, and the U.S. Patriot Act. Students analyze case studies to further explore relevant events, such as how the terrorist acts of September 11, 2001, have broadened the interpretation of certain areas of the law. Students heighten their understanding of how social and historical changes have shifted perspectives and sparked debates on expanding the rights of government versus safeguarding personal civil rights and civil liberties.

CRJS 5216 - Criminal Justice Research♦
CRJS 5217 - Technological Solutions and 21st-Century Crime

(5 cr.)
In this course, students learn about the relationship of technology and criminal activity, which includes current trends in cyber crime. Not only will students gain a comprehensive view of cyber crime, they will learn how technology is used by law enforcement agencies to track and apprehend such criminals. Students are provided with technique scenarios for solving the crimes. Methods to deal with the problem are introduced, and students study legal responses for these issues. By identifying, data mining, protecting, and gathering evidence, students will have a comprehensive understanding of solving and prosecuting these crimes. Additionally, techniques and tools used to build and solve cyber crime cases are presented and analyzed.

CRJS 5218 - Applied Communication♦

(5 cr.)
Practitioners in the field of criminal justice must be adept in preparing communications for colleagues, supervisors, and the public. In this course, students have the opportunity to develop the skills needed to produce effective documents that criminal justice professionals use on a daily basis, such as court records, data analysis reports, and program-implementation plans. Student learn how to conduct interviews, gather background information, and use decision-making and critical-thinking skills to create clear, concise communications. They broaden their ability to write for a specific purpose and a highly defined audience as they incorporate criminal justice principles and practices into a variety of communication tools.
♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.
CRJS 5400 - Strategic Context of Management and Leadership♦

(5 cr.)
Students in this course engage in a collaborative study of the changing strategic context of criminal justice management and leadership. Students will understand the strategic context for stakeholder relations needed while resolving issues in criminal justice. They engage in readings and practical assignments that emphasize management and leadership in a time of unprecedented and unpredictable change. Students also work toward being able to apply data and statistics to engage communities and to design program evaluations.

♦ Students may take this as a non-degree course, which means they do not have to be enrolled in a program. Contact an enrollment specialist [1-866-492-5336 (U.S.); 1-443-627-7222 (toll)] for more information.

CRJS 5511 - Special Populations

(5 cr.)
Students in this course perform an in-depth analysis of treatment of women and people of color as professionals, litigants, victims, and offenders in the criminal justice system. They further examine systemic outcomes of the intersections of race, class, sexual orientation, and gender for these groups in relation to social justice and social inequality. Through critical examination of readings and data analysis, students will come to understand the complexity of the historical relationship between these groups and the American criminal justice system and broader social context.

CRJS 6002 - Foundations of Graduate Study

(3 cr.)
Students in this course are introduced to Walden University and to the requirements for successful participation in an online curriculum. Students work toward building a foundation for academic and professional success as a scholar-practitioner and social change agent. They assess the relationship of mission and vision to professional goals and develop a program of study and strategies for online success. Students also explore resources used throughout the program, such as the online Walden University Library. Students engage in course assignments focused on the practical application of professional writing, critical-thinking skills, and the promotion of professional and academic excellence.

CRJS 6100 - Critical Issues in Emergency Management♦

(5 cr.)
